## FOOD AND THE BRAIN RESEARCH STUDY

- Are you between 18-40 years of age?
- Do you have <u>no</u> allergies to dairy, wheat, soy, nuts, tomatoes or corn?
- Do you wish to be part of a brain activity study?

You might be eligible to participate in our **RESEARCH STUDY**!

The purpose of our study is to learn more about how eating influences brain activity.

The study consists of a total of two, 1.5-hour visits at Drexel University, each on a separate day.

## For participating in the study, you will be eligible for

- \$30 compensation (\$15 each visit)
- Free food
- Exposure to fNIRS technology

This research is conducted by a researcher who is a member of Drexel University.

## For more information or to enroll contact the Nasser Eating Behavior Laboratory at (267) 359-6287 or food.vs.brain@gmail.com
