

Drexel University

Graduate Course Catalog

2017-2018

Table of Contents

Graduate Catalog	7	Biotechnology	64
Center for Food and Hospitality Management	7	Cancer Biology	65
Culinary Arts and Science	7	Certificate in Clinical Research	67
Food Science	9	Certificate in Drug Discovery and Development	68
Hospitality Management	10	Certificate in Medical and Healthcare Simulation	69
Center for Sport Management	12	Certificate in Quantitative Principles for Clinical Research	69
Sport Management	12	Clinical Research for Health Professionals	69
Close School of Entrepreneurship	13	Clinical Research Organization and Management	71
Entrepreneurship and Innovation	13	Criminalistic Science	71
College of Computing & Informatics	14	Drexel Pathway to Medical School	72
Advanced Certificate in Information Studies and Technology	15	Drug Discovery and Development	73
Archives Specialist Certificate	15	Evening Post-Baccalaureate Pre-Medical Certificate Program	75
Certificate in Cybersecurity, Law and Policy	15	Forensic Science	76
Computer Science	16	Histotechnology	79
Computer Science	16	Immunology	80
Data Science	21	Infectious Disease	82
Graduate Minor in Applied Data Science	21	Interdepartmental Medical Science	84
Graduate Minor in Computational Data Science	21	Interdisciplinary Health Sciences	85
Graduate Minor in Computer Science	22	Laboratory Animal Science	86
Graduate Minor in Healthcare Informatics	22	Medical and Healthcare Simulation	88
Health Informatics	22	Medical Science	89
Information Studies	28	Microbiology and Immunology	90
Information Systems	32	Molecular and Cell Biology and Genetics	92
Library and Information Science	38	Molecular Medicine	94
Library and Information Science / Information Systems Dual Degree	42	Neuroscience	95
Post-Baccalaureate Certificate in Applied Data Science	42	Pathologists' Assistant	98
Post-Baccalaureate Certificate in Computational Data Science	42	Pharmacology and Physiology	100
Software Engineering	42	Pre-Veterinary Graduate Minor	103
Youth Services Specialist Certificate	47	College of Nursing and Health Professions	103
College of Medicine: Graduate School of Biomedical Sciences and Professional Studies	47	Addictions Counseling	104
Academic Medicine	49	Adult-Gerontology Acute Care Nurse Practitioner Post-Master's Certificate	104
Biochemistry	50	Adult-Gerontology Primary Care Nurse Practitioner Post-Master's Certificate	105
Biomedical Studies	53	Art Therapy and Counseling	106
Biomedicine and Business	54	Certificate in Advanced Practice in Hand and Upper Quarter Rehabilitation	108
Biomedicine and Digital Media	57	Certificate in Couple and Family Therapy	108
Biomedicine and Entrepreneurship	59	Certificate in Forensic Trends and Issues in Contemporary Healthcare	109
Biomedicine and Law	62	Certificate in Medical Family Therapy	110
		Certificate in Neuroscience, Learning and Online Instruction	110

Certificate in Nursing Education	111	MSN "Bridge" Program	144
Certificate in Nursing Leadership in Health Systems Management	111	MSN in Nurse Anesthesia	145
Certificate in Pediatric Rehabilitation	112	MSN: Adult-Gerontology Acute Care Nurse Practitioner	146
Certificate in Substance Use Disorder Treatment	113	MSN: Adult-Gerontology Primary Care Nurse Practitioner	146
Certificate Nursing Innovation	113	MSN: Clinical Nurse Leader Concentration	147
Certificate of Advanced Study in Complementary and Integrative Therapies	114	MSN: Clinical Trials Research Concentration	153
Certificate of Advanced Study in Holistic Hospice and Palliative Care	115	MSN: Family/Individual Across the Lifespan Nurse Practitioner	159
Certificate of Advanced Study in Integrative Addiction Therapies	116	MSN: Nursing Education Concentration	160
Certificate of Advanced Study in Women's Integrative Health	116	MSN: Nursing Innovation Concentration	162
Clinical Nurse Leader Post-Master's Certificate	117	MSN: Nursing Leadership in Health Systems Management Concentration	165
Complementary and Integrative Health	118	MSN: Pediatric Acute Care Nurse Practitioner	168
Couple and Family Therapy	120	MSN: Pediatric Primary Care and Pediatric Acute Care Dual Option	169
Couple and Family Therapy DCFT	122	MSN: Pediatric Primary Care Nurse Practitioner	170
Dance/Movement Therapy and Counseling	122	MSN: Psychiatric Mental Health Nurse Practitioner	171
Doctor of Nursing Practice	124	MSN: Women's Health/Gender Related Nurse Practitioner	172
Doctor of Physical Therapy	126	Music Therapy and Counseling	173
Family/Individual Across the Lifespan Nurse Practitioner Post-Master's Certificate	129	Nursing: MSN-PhD Joint Degree Program	174
Graduate Minor in Addictions Counseling	130	Nutrition Sciences	174
Graduate Minor in Advanced Study in Complementary and Integrative Therapies	130	Pediatric Acute Care Nurse Practitioner Post-Master's Certificate	176
Graduate Minor in Advanced Study in Holistic Hospice and Palliative Care	131	Pediatric Primary Care and Pediatric Acute Care Dual Nurse Practitioner Post-Master's Certificate	177
Graduate Minor in Advanced Study in Integrative Addiction Therapies	131	Pediatric Primary Care Nurse Practitioner Post-Master's Certificate	178
Graduate Minor in Advanced Study in Women's Integrative Health	132	PhD in Creative Arts Therapies	179
Graduate Minor in Integrated Nursing Care of Autism Spectrum Disorder	132	PhD in Nursing	183
Graduate Minor in Neuroscience, Learning and Online Instruction	133	Physician Assistant (PA)	184
Graduate Minor in Nursing Education	133	Physician Assistant Post-Professional Master's Program	186
Graduate Minor in Nursing Leadership in Health Systems Management	134	Post-Baccalaureate Certificate in Integrated Nursing Care of Autism Spectrum Disorder (ASD)	187
Graduate Minor in Service to Veterans	134	Post-Master's Certificate in Geriatrics	188
Graduate Minor in Sexual Health and Wellness	135	Post-Master's Certificate in Music Therapy	189
Health Sciences DHSc	135	Post-Master's Certificate in Nurse Anesthesia	190
Human Nutrition	135	Post-Master's Certificate in Nursing Education	191
Issues in Human Trafficking Certificate	139	Post-Master's Certificate: Emergency/Trauma Nurse Practitioner	191
Master of Family Therapy	140	Psychiatric Mental Health Nurse Practitioner Post-Master's Certificate	192
Master of Health Administration	142	Quality, Safety and Risk Management in Healthcare	193
		Rehabilitation Sciences	195
		Rehabilitation Sciences	198
		Service to Veterans	201

Sexual Health and Wellness	201	Retail & Merchandising	252
Women's Health/Gender-Related Nurse Practitioner Post-Master's Certificate	202	Urban Strategy	253
Goodwin College of Professional Studies	203	The College of Arts and Sciences	255
Nonprofit Management: Public, Professional & Social Sectors	203	Biological Sciences	255
Professional Studies	203	Chemistry	258
Graduate College	204	Communication	261
Certificate in STEM Undergraduate Education	205	Communication, Culture and Media	264
Graduate Minor in Undergraduate STEM Education	205	Environmental Policy	267
LeBow College of Business	205	Environmental Science	268
Accounting	206	Graduate Minor in Communication	270
Business	208	Graduate Minor in Communication, Culture, and Media	270
Business Administration	209	Joint JD/PhD Law-Psychology Program	270
Business Analytics	211	Mathematics	271
Business Analytics Management	213	Physics	274
Certificate in Advanced Business	213	Programs in Psychology and Clinical Psychology	278
Certificate in Business Analytics	214	Public Policy	283
Certificate in Leadership	214	Publishing	285
Doctorate in Business Administration (DBA)	214	Science, Technology, and Society	286
Executive MBA Program	218	The College of Engineering	288
Finance	219	Architectural Engineering	289
Financial Analysis	221	Certificate in Construction Management	292
Graduate Minor in Business Analytics	221	Certificate in Real Estate	293
Graduate Minor in Operations Research	221	Certificate in Sustainability and Green Construction	293
Graduate Minor in Sustainable Operations Management	222	Chemical Engineering	293
Marketing	222	Civil Engineering	298
MBA Programs	224	Computer Engineering	301
Supply Chain Management and Logistics	226	Construction Management	306
LeBow College of Business: School of Economics	228	Cybersecurity	307
Economic Data Analysis	228	Electrical Engineering	311
Economics	229	Electrical Engineering/Telecommunications Engineering	317
Economics	231	Engineering Management	322
Economics and Computer Science	234	Engineering Technology	327
The Antoinette Westphal College of Media Arts & Design	234	Environmental Engineering	328
Arts Administration	235	Graduate Certificate in Project Management	330
Design Research	237	Graduate Minor in Computational Engineering	331
Digital Media	238	Master of Engineering	332
Fashion Design	242	Materials Science and Engineering	332
Interior Architecture and Design	245	Mechanical Engineering and Mechanics	336
Museum Leadership	247	Nanomaterials	340
Paul F. Harron Television Management Program	249	Peace Engineering	340
		Project Management	342
		Property Management	347

Vince and Judy Vidas Program in Systems Engineering	348	Population Health Science	417
Certificate in Systems Design and Development	351	Public Health	417
Certificate in Systems Engineering	352	Public Health Ethics	422
Certificate in Systems Engineering Analysis	352	Public Health MD/MPH	427
Certificate in Systems Engineering Integrated Logistics	353	Under Construction	433
Certificate in Systems Reliability Engineering	354	The School of Biomedical Engineering, Science, and Health Systems	433
The College of Medicine	354	Advanced Certificate in Bioinformatics	434
The Doctor of Medicine (MD) Program	355	Advanced Certificate in Biomedical Technology Development	435
The Dornsife School of Public Health	357	Advanced Certificate in Tissue Engineering	435
Biostatistics	357	Biomedical Engineering	435
Biostatistics PhD	362	Biomedical Science	439
Certificate in Epidemiology and Biostatistics	362	Graduate Minor in Bioinformatics	443
Certificate in Global Health	363	Integrated Biomedical Engineering and Business	443
Certificate in Lesbian, Gay, Bisexual and Transgender (LGBT) Health	363	Medical Product Design and Device Development	446
Certificate in Maternal and Child Health	363	The School of Education	447
Community Health and Prevention	364	Adult Education and Organization Development	448
Community Health and Prevention PhD	373	Advanced Teaching and Curriculum Certificate	451
Environmental & Occupational Health	373	Applied Behavior Analysis	451
Environmental and Occupational Health Sciences	379	Certificate in Adult Education	454
Epidemiology	379	Certificate in Autism Spectrum Disorders	454
Executive Master of Public Health	388	Certificate in Collaborative Special Education Law and Process	455
Graduate Minor in Biostatistics	393	Certificate in Community College Administration and Leadership	456
Graduate Minor in Global Health	393	Certificate in Creativity and Innovation	456
Graduate Minor in Health Economics	393	Certificate in E-Learning Leadership	456
Graduate Minor in Human Health Risk Assessment	393	Certificate in Educational Policy	457
Graduate Minor in Infectious Disease Prevention and Control	393	Certificate in Instructional Design	458
Graduate Minor in Latino and Immigrant Health	394	Certificate in Math Leadership & Coaching	458
Graduate Minor in Lesbian, Gay, Bisexual and Transgender (LGBT) Health	394	Certificate in Mathematics Learning & Teaching	459
Graduate Minor in Maternal and Child Health	395	Certificate in Multisensory Reading Instruction Level 1	459
Graduate Minor in Program Monitoring and Evaluation	395	Certificate in Student Development and Affairs	460
Graduate Minor in Public Health Emergency Preparedness ...	396	Creativity and Innovation	460
Graduate Minor in Public Health Ethics and History	396	Education Improvement and Transformation	463
Graduate Minor in Substance Use and Misuse	396	Education PhD	466
Graduate Minor in Urban Health	397	Educational Administration	469
Health Management and Policy	397	Educational Administration	474
Health Policy and Social Justice	405	Educational Leadership and Management	477
Health Services Research and Policy	410	Global and International Education	480
Health Services Research and Policy MS	415	Graduate Intern Teaching Certificate	484
Law (JD) / Public Health (MPH)	415	Higher Education	485

Instructional Technology Specialist Certificate	488	Biostatistics	552
K-12 Virtual School Leadership Certificate	489	Business Statistics	553
Learning Technologies	489	Career Integrated Education	556
Mathematics Learning & Teaching	493	Chemical Engineering	556
Post-Bachelor's Certificate in Applied Behavior Analysis	496	Chemistry	558
Post-Bachelor's Certificate in Special Education Leadership	497	Civil Engineering	562
Post-Bachelor's Teaching Certificate: Elementary Education	497	Civil, Architectural & Environmental Engineering	567
Post-Bachelor's Teaching Certificate: Secondary Education	498	Communication	567
Reading Specialist Certificate	502	Communication, Culture and Media	570
School Principal Certificate	502	Community Health and Prevention	573
Special Education	503	Complement & Integrative Therapy	577
Special Education 7-12 Post-Bachelor's Certificate	507	Computer Science	580
Special Education PreK-8 Post-Bachelor's Certificate	508	Computing & Security Technology	586
Sport Coaching Leadership	509	Construction Management	586
STEM Education Certificate	511	Cooperative Management	588
Teaching English as a Second Language	511	Couple & Family Therapy	588
Teaching, Learning and Curriculum	512	Creative Arts in Therapy	597
Thomas R. Kline School of Law	517	Creativity Studies	610
American Legal Practice	518	Design and Merchandising	611
Certificate in Criminal Law	518	Design Research	612
Certificate in Cybersecurity and Information Privacy Compliance	519	Digital Media	613
Certificate in Financial Regulatory Compliance	519	E-Learning	617
Certificate in Health Care Compliance	520	Economics	618
Certificate in Human Resources Compliance	520	Education Human Resource Development	622
Certificate in NCAA Compliance	520	Education Improvement & Transformation	624
Higher Education Compliance	521	Education Learning Technology	624
Master of Legal Studies	521	Educational Administration	627
The JD Program	523	Educational Lifelong Literacy	629
Trial Advocacy and Dispute Resolution	525	Educational Policy	633
Quarter	527	Electrical & Computer Engineering	634
Graduate	527	Electrical & Computer Engineering - Computers	634
Accounting	529	Electrical & Computer Engineering - Electroph	639
Adult Education	531	Electrical & Computer Engineering - Power Engineering	642
Architectural Engineering	532	Electrical & Computer Engineering - Systems	644
Architecture	533	Engineering Geology	649
Art History	535	Engineering Management	649
Arts Administration	535	Engineering Technology	653
Biomedical Engineering & Science	538	Engineering, General	654
Bioscience & Biotechnology	547	Entrepreneurship and Innovation	654
		Environmental & Occupational Health	657
		Environmental Engineering	659

Environmental Policy	662	Operations Research	777
Environmental Science	664	Organizational Behavior	779
Epidemiology	668	Peace Engineering	780
Fashion Design	671	Physical Therapy Rehab Science	781
Finance	676	Physician Assistant	789
Food	678	Physics	795
Food Science	679	Physics - Environmental Science	797
Forensic Science	681	Political Science	797
General Business	681	Production Operations Management	798
Geography Education	685	Professional Studies	800
Global & International Education	685	Project Management	802
Health Management and Policy	688	Property Management	803
Health Services Administration	692	Psychology	804
Higher Education	693	Public Health	810
History	696	Public Policy	815
Homeland Security Management	697	Publishing	816
Hotel & Restaurant Management	698	Real Estate	817
Human Resource Management	700	Rehabilitation Sciences	818
Industrial Design	700	Research	820
Information Science & Systems	700	Retail & Merchandising	821
Interdisciplinary Graduate Course	710	Science, Technology and Society	823
Interior Design	711	Software Engineering	826
International Business	713	Special Education	827
Intra Professional Studies	714	Sport Coaching Leadership	832
Legal Studies	717	Sport Management	835
Linguistics	718	Systems Engineering	838
Management	718	Taxation	841
Management of Information Systems	721	Teacher Education	842
Marketing	723	Telecommunications	850
Materials Engineering	725	Television Management	852
Mathematics	729	Visual Studies	854
Mathematics Education	734	Westphal Studies	855

Center for Food and Hospitality Management

Drexel University's Center for Food and Hospitality Management offers programs designed to address the critical scientific, social and business issues surrounding the food industry. The programs emphasize both academic and career development for an innovative study of the art, science and business of the food.

One of the most distinct qualities of all of our programs is the way we uniquely and individually work to connect each student to their ideal career. Through supportive and connected faculty, graduate level co-op and thesis opportunities, the most relevant guest lecturers, and partnerships with key regional and national employers, our programs build an industry-relevant resume and a strong network before graduation.

Programs are taught by accomplished faculty with experience in all areas of the food industry. Coursework is offered in the science of food to include food chemistry, sensory and food microbiology and the culinary arts to include baking, beverage, gastronomy, food policy, sustainability and more. The programs are intended for students who plan to pursue careers as food scientists, as research chefs, in product development, quality assurance, food marketing, for food related non-profit sector, in academia and beyond.

Majors

- Culinary Arts and Science (MS) (p. 7)
- Food Science (MS) (p. 9)
- Hospitality Management (MS) (p. 10)

Culinary Arts and Science

Major: Culinary Arts and Science

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 12.0509

Standard Occupational Classification (SOC) code: 11-9051; 19-1012

About the Program

The Culinary Arts and Science (CAS) program investigates the modern system of food production and consumption by combining critical, systems-thinking based scholarship and experiential, hands-on culinary learning. Faculty in the CAS program come from a mix of disciplinary backgrounds and contribute a range of perspectives and approaches that all converge in the object of study: food and the system in which it is produced. The CAS program focuses on three core pillars of study: culinary arts, food and culinary science, and food systems. Drexel University's CAS program is unique, as it is the only program in which students can combine rigorous, academic studies with culinary-arts training. While all students will take courses in all three pillars, each individual will be able to focus his or her program through electives on the particular area of CAS that they wish to engage with. Students will work individually with faculty or staff advisors to develop an individual plan of study.

Students who will fit well within the CAS program are independent, rigorous thinkers who are first and foremost interested in effecting change within the food system. Students come from a variety of academic and professional backgrounds, but share a deep commitment to understanding and responding to the world's food-related challenges. The CAS program at Drexel offers more than just critique and theory-development; classes emphasize the development of practical, real-world fixes to food-system problems. Students will have the opportunity to engage further with a required practicum course and the option for a research-based thesis project.

Students who are considering the CAS program see this degree as a dual opportunity: to gain the skills necessary to respond to the dilemmas facing the world's food system and to advance their careers within the culinary world, food industry, and non-profits who share their goals. The program appreciates and welcomes a diversity of backgrounds, including students from the liberal arts and professional studies, the hard sciences, and professionals who are seeking to orient their career towards food-related work.

Admission Requirements

Applicants to the program must meet the general requirements for admission to graduate studies at Drexel University.

Prospective students must also submit a 500-word essay explaining why they want to enter the program and some of the issues related to food, cooking, and society that they would like to study. These statements are read carefully by the faculty screening committee to evaluate each applicant's sense of purpose and fit for the program.

Visit the Graduate Admissions (<http://drexel.edu/grad>) website for more information about requirements and deadlines, as well as instructions for applying online.

This program has the following course requirements, which may be waived for equivalent professional/academic experience or taken as co-reqs in the first terms of the degree. Please contact the admissions coordinator or the Program Director for more information on possible equivalencies.

CULA 115 Culinary Fundamentals
 FDSC 100 ServSafe
 CULA 125 Foundations of Professional Baking
 FDSC 154 Foods: Ingredients, Interactions, and Formulations

Degree Requirements

Basic Requirements (21 credits)

FDSC 506	Food Composition & Behavior	3.0
FDSC 550	Food Microbiology	3.0
FOOD 503	Global Cuisine Studio	3.0
FOOD 520	Culinary Studio	3.0
FOOD 605	Culture and Gastronomy	3.0
FOOD 606	The Contemporary Food System	3.0
FOOD 801	Food Systems Practicum/Project	2.0
FOOD 890	Seminar in Culinary Arts and Science	1.0

Advanced Requirements (9 credits)^{*}

Culinary Arts (select at least 1 of the following)

FOOD 626	Kitchen Garden	
HRM 501	Foundations of the Hospitality Industry	
HRM 565	Culinary Tourism	

Food Science (select at least 1 of the following)

FDSC 557	Advanced Food Product Development	
FDSC 568	Functional Foods	
FDSC 577	Food Engineering	

Food Systems (select at least 1 of the following)

CCM 701	Contemporary Social Theory	
COM 516	Campaigns for Health and Environment	
SCTS 501	Introduction to Science, Technology and Society	
SCTS 610	Material Culture	

Thesis and Electives[†]

FOOD 699	Thesis Research in Culinary Arts and Science	15.0
Culinary Arts Electives ^{††}		
FOOD 503	Global Cuisine Studio	
FOOD 525	Garde Manger Laboratory	
FOOD 530	Charcuterie	
FOOD 600	Advanced Studies with a Master Chef	
FOOD 612	Food Writing	
FOOD 626	Kitchen Garden	
HRM 501	Foundations of the Hospitality Industry	
HRM 565	Culinary Tourism	
Food Science Electives ^{††}		

FDSC 501	Research Methods for Food Science	
FDSC 557	Advanced Food Product Development	
FDSC 568	Functional Foods	
FDSC 577	Food Engineering	
FDSC 662	Sensory Evaluation of Food	
Food Systems Electives ^{††}		
CCM 701	Contemporary Social Theory	
CCM 715	Media, Advocacy and Public Spaces	
CCM 735	Material Culture	
CCM 760	The Body Digital: Biopolitics and New Media	
COM 516	Campaigns for Health and Environment	
COM 520	Science Writing	
COM 575	Grant Writing	
PLCY 509	Sustainability & Public Policy	
SCTS 501	Introduction to Science, Technology and Society	
SCTS 502	Research Methods	
SCTS 610	Material Culture	
SCTS 615	The Biopolitics of Health	
SCTS 660	Theoretical and Sociological Aspects of Measurement	

Total Credits 45.0

* Nine (9.0) credits of courses taken in completion of the Advanced Requirements do not count towards the Thesis and Elective Requirement. For example, if FOOD 626 is the only course a student completes under the Culinary Arts Advanced Requirement, it cannot count towards the 15.0 credits of Electives. However, if a student takes both FOOD 626 and HRM 501, this will count as 3.0 credits towards Electives.

** Students who elect to pursue the Thesis option should plan to complete 9.0 credits of FOOD 699 Thesis Research in Culinary Arts and Science, and select 6.0 credits from the list of suggested electives.

† The presence of a course on this list does not guarantee that it will be offered during any particular term. Some courses are offered at faculty discretion or only once every several years.

†† Graduate students in the MS Culinary Arts and Science program may take other electives from across Drexel University with prior approval from the Director of the MS Program in Culinary Arts and Science. Unless otherwise noted, these courses may not be repeated for credit.

Sample Plan of Study

First Year

Term 1		Credits
FOOD 605	Culture and Gastronomy	3.0
FOOD 520	Culinary Studio	3.0
Food Systems Elective		3.0
Term Credits		9.0

Term 2

FDSC 506	Food Composition & Behavior	3.0
FOOD 503	Global Cuisine Studio	3.0
Food Systems Elective		3.0
Term Credits		9.0

Term 3

FOOD 606	The Contemporary Food System	3.0
Food Science Elective		3.0
Food Systems or Culinary Arts Elective		3.0
Term Credits		9.0

Second Year

Term 1

FDSC 550	Food Microbiology	3.0
FOOD 890	Seminar in Culinary Arts and Science	1.0
Thesis or Culinary Arts Elective*		3.0
Thesis or Food Systems Elective*		3.0
Term Credits		10.0
Term 2		
FOOD 801	Food Systems Practicum/Project	2.0
Thesis or Food Science Elective*		3.0
Food Systems or Culinary Arts Elective		3.0
Term Credits		8.0
Total Credit: 45.0		

* Students pursuing the Thesis option will generally take 6.0 credits of thesis research in the first quarter of their second year, and 3.0 credits the second quarter; however, if necessary in order to pursue desired electives this order can be modified by working with the Program Director or an advisor.

Culinary Arts & Science Faculty

Jonathan Deutsch, PhD (*New York University*). Professor. Social and cultural aspects of food, culinary education, culinary improvisation, recipe and product development; food sustainability.

Brandy-Joe Milliron, PhD (*Arizona State University*). Assistant Professor. Development and evaluation of modifications in the natural environment to promote healthier living; Farm to table school initiatives

Michael Traud, JD (*Villanova University*) *Program Director, Hospitality and Tourism Management*. Assistant Clinical Professor. Implementation of Korean Cuisine in the United States; hospitality law; Italian cuisine.

Rosemary Trout, MS (*Drexel University*) *Interim Program Director, Culinary Arts and Food Science*. Instructor. Food labeling and regulations; food safety and sanitation in food service and food manufacturing; food processing; sensory evaluation.

Charles Ziccardi, MS (*Drexel University*). Assistant Teaching Professor. Classic Italian cuisine, Italian culture, gardening for the kitchen, food sustainability, and professional hospitality management.

Emeritus Faculty

A. Philip Handel, PhD (*University of Massachusetts*). Professor Emeritus. Food science, especially lipid chemistry; food composition and functionality; evaluation and analysis of frying fats and fried foods.

Food Science

Major: Food Science

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: Available for full-time on-campus master's-level students

Classification of Instructional Programs (CIP) code: 01.1001

Standard Occupational Classification (SOC) code: 19-1012

About the Program

Pushing the boundaries of food development through science is at the core of Drexel University's Master of Science in Food Science. The program offers dynamic, multidisciplinary education grounded in the latest research techniques and technological applications for those

interested in applying science to meet an ever-growing demand for healthy, safe and nutritious foods. The Master of Science (MS) in Food Science is a unique program because we are housed with Culinary Arts. Because of collaborative opportunities to work with faculty and students who are pursuing the art and taste of good food, our MSFS students work on current and novel product development for companies looking for sustainable and interesting new products. Our students gain a comprehensive overview of the food industry. The curriculum includes both theoretical and applied aspects of the science, technology, sustainability, and safety of food. Food scientists learn to integrate and apply knowledge from the disciplines of chemistry, physics, engineering, microbiology, nutrition and culinary arts in order to preserve, process, package, and distribute foods that are safe, nutritious, enjoyable, and affordable.

The program provides a science-based professional education that encompasses classroom theory, practical research, and application. Food science is concerned with foods, ingredients, and their physicochemical and biochemical interactions at the molecular and cellular levels. Students in the food science program participate in research by completing a research project. They also have the option of designing and executing a thesis under faculty direction. Current research in food science includes:

- Food sustainability and reuse issues
- Food product development
- Food engineering
- Sensory analysis of foods

The program is designed for students who:

- are already working within the food industry and seeking professional advancement
- have an undergraduate degree in a general science-related area such as biology or chemistry, and would like to change fields or move into the more specialized field of food science

The MS in Food Science program offers students numerous opportunities for hands-on, real-world careers in applied science and technology. Potential employers include food product manufacturers, along with other companies providing services related to institutional feeding or supplying ingredients, processing equipment, and packaging materials. Technical and administrative positions are also available in various government agencies and with independent testing laboratories.

Food scientists are needed in the areas of:

- Food Product Development
- Food quality assessment and management
- Food processing and engineering
- Food product research and development
- Food sustainability and food waste reduction and practices
- Technical sales and support
- Sensory analysis

Additional Information

For additional information, view the Center for Hospitality and Sport Management's Master of Science in Food Science (<http://drexel.edu/hsm/academics/Culinary-Arts-Food-Science/MS-in-Food-Science>) web page.

Admission Requirements

In addition to the program's admission requirements, students are expected to demonstrate competency in the coursework or its equivalent listed in the following table. The graduate committee evaluates each applicant's transcripts at the time of application. In some cases, courses listed as prerequisites may be taken as co-requisites during the first year of graduate study if deemed appropriate by the graduate admissions committee.

- General chemistry - One year to include organic chemistry
- Biochemistry - One or two quarters or semesters to include structures and basic metabolism
- Biological Science - Three courses to include general biology, genetics, and microbiology
- Mathematics - One year to include calculus
- Statistics - One course to include hypothesis testing, correlation, and regression
- Physics - Two terms or one year (non-calculus based) to include mechanics, optics, electricity, and magnetism

For information about admission requirements and to apply to the MS in Food Science, please visit the Office of Graduate Admissions (<http://drexel.edu/grad/programs/hsm/food-science>).

Degree Requirements

Food Science Core Competency - Required

BIO 610	Biochemistry of Metabolism	3.0
or NFS 530	Macronutrient Metabolism	
or NFS 531	Micronutrient Metabolism	
FDSC 550	Food Microbiology	3.0
FDSC 551	Food Microbiology Laboratory	2.0
FDSC 556	Food Preservation Processes	3.0
FDSC 560	Food Chemistry	3.0
FDSC 577	Food Engineering	3.0
FDSC 662	Sensory Evaluation of Food	3.0
FDSC 890	Seminar in Food Science	1.0

Food Science Electives

Select 12.0 credits from the following:

COOP 601	Advanced Co-op Guidance for Master's Degree Students	
FDSC 506	Food Composition & Behavior	
FDSC 554	Microbiology & Chemistry of Food Safety I	
FDSC 558	Nutritional Impact of Food Processing Methods	
FDSC 561	Food Analysis	
FDSC 568	Functional Foods	
FDSC 654	Microbiology & Chemistry of Food Safety II	
FDSC 669	Readings in Food Science	

Electives

Select 12.0 credits from the following:

BIO 610	Biochemistry of Metabolism	
BIO 660	Microbial Physiology	
CHEM 753	Chemical Instrumentation	
ENVS 636	Principles of Toxicology I	
ENVS 637	Principles of Toxicology II	
NFS 530	Macronutrient Metabolism	
NFS 531	Micronutrient Metabolism	

Food Science Faculty

Tali Gidalevitz, PhD (*University of Chicago*). Assistant Professor. Genetic and molecular pathways regulating protein folding homeostasis, and their role in protein conformation diseases, aging, and development.

Irene E. Olsen, PhD, RD, LDN (*Tufts University*) *Courtesy Appointment*. Visiting Research Professor.

Jennifer J. Quinlan, PhD (*North Carolina State University*). Associate Professor. Food microbiology; Microbiological quality and safety of produce, dairy and meat products in markets in high vs. low socioeconomics areas; *Bacillus* and *Clostridium* spores in food processing.

Vicki Schwartz, DCN, RD, LDN, CNSC, FAND (*Drexel University*) *Nutrition and Foods*. Assistant Clinical Professor. Standardized patients vs real patients in nutrition counseling

Emeritus Faculty

Donna H. Mueller, PhD, RD (*Temple University*). Associate Professor Emeritus. Clinical nutrition; Pediatric nutrition; Nutrition in pulmonary diseases, especially cystic fibrosis; Nutrition in developmental delay; Dental nutrition; Dietetic education and professional development.

Hospitality Management

Major: Hospitality Management

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 52.0904

Standard Occupational Classification (SOC) code: 11-9051; 11-9071; 11-9081

Note: Effective Fall 2016, students will no longer be accepted into this program.

About the Program

This two-year online master's program provides a solid education in management, travel and tourism and allows students to pursue elective coursework in global tourism or gaming and casino management. Career paths include senior management of hotels and resorts, convention services, strategic development for online distribution of travel services, real-estate development projects and business ownership.

Both at the national and international level, travel and hospitality have become primary industries that require increasing numbers of professionals at all skill levels. Additional educational opportunities at the graduate level will be required to fill the needs of the tourism industry. Top professionals with an MS degree have excellent prospects at home and in the global marketplace.

Drexel University has a professional and technological emphasis as well as a track record of supporting the relationship between academics and industry. The degree in hospitality management is designed to prepare graduates to be key decision makers in the hospitality industry.

Additional Information

For additional information, visit the Center for Hospitality & Sport Management's Master of Science in Hospitality Management (<http://drexel.edu/hsm/academics/Hospitality-and-Tourism/MS-in-Hospitality-Management>) page.

Admission Requirements

Classes start in the fall and spring terms. Applications are submitted throughout the year. Admission requirements include:

- a completed application form
- a Bachelor's degree from an accredited institution
- an undergraduate GPA of 3.0 or higher (graduate degree GPAs will be considered along with the undergraduate GPA)
- official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended. Applicants must supply transcripts regardless of the number of credits earned or the type of school attended. If an applicant does not list all post-secondary institutions on the application and these are listed on transcripts received from other institutions, processing of the application will be delayed until the remaining transcripts have been submitted.
- two letters of recommendation
- a personal essay
- a resume
- International students must submit a TOEFL score of 550 or higher. For more information regarding international applicant requirements, view the International Students Admissions Information (<http://drexel.edu/iss/NewStudent.html>) page.

Visit the Graduate Admissions (<http://www.drexel.edu/grad/programs/hsm/hospitality-management>) website for more information about requirements and deadlines, as well as instructions for applying online.

Degree Requirements

The Master of Science in Hospitality Management program requires completion of 45.0 credit hours (quarter) of study. The curriculum includes a core of 12 required courses (36.0 credits), including three courses from the LeBow College of Business and a research course where students consult with a faculty advisor to identify a suitable problem area in hospitality management and develop and carry out appropriate methodology to address the problem. Students select three elective courses in areas such as global tourism, gaming and casino management, or custom options approved by the program director and academic advisor.

Hospitality Management Required Courses (24 credits)

HRM 501	Foundations of the Hospitality Industry	3.0
HRM 505	Customer Service for Professionals	3.0
HRM 515	Destination and Resort Management	3.0
HRM 555	Hospitality Human Resource Management	3.0
HRM 610	The Global Tourism System	3.0
HRM 612	Tourism and Sustainability	3.0
HRM 650	Strategic Management & Leadership in Hospitality	3.0
HRM 680	Research Methods for Hospitality and Tourism	3.0

Business Core (9 credits)

BUSN 501	Measuring and Maximizing Financial Performance	3.0
HRM 595	Economics of Tourism	3.0
ORGB 625	Leadership and Professional Development	3.0

ORGB 631	Leading Effective Organizations	3.0
Electives		12.0
HRM 572	Gaming Information Systems	
HRM 575	Current Issues in Gaming	
HRM 614	Tourism Development	
HRM 616	Tourism Marketing and Branding	
HRM 670	Casino Financial Analysis	
HRM 672	Security and Risk Management	
HRM 674	Tribal Gaming Management	
HRM 676	Casino Marketing	
HRM 997	Research Project in Hospitality Management	
Total Credits		48.0

Hospitality Management Faculty

Linda Forristal, PhD (*Purdue University*). Associate Teaching Professor. Destination management, marketing, branding, communications, cultural heritage tourism including foodways, indigenous tourism.

Michael Traud, JD (*Villanova University*) Program Director, *Hospitality and Tourism Management*. Assistant Clinical Professor. Implementation of Korean Cuisine in the United States; hospitality law; Italian cuisine.

Center for Sport Management

Drexel University's Center for Sport Management offers a master of science program in sport management. The program enables students to gain a deep understanding of business as it specifically applies to the sports industry.

The program is administered by an accomplished faculty with collective experience in all areas of sport business. Coursework is offered in areas such as sport marketing, media, management, economics, statistics, finance, leadership, and law. The program is intended for students who plan to pursue careers in sport-oriented organizations such as professional sports teams, collegiate athletic departments, sport media networks, sport marketing firms, recreational sport organizations, and more.

Upon graduation students will be prepared to:

- Apply business and economic fundamentals to the management of sport organizations.
- Apply the area of law and labor relations to the sports industry and agencies.
- Use existing technologies and be prepared for emerging technologies in the sport management field.
- Effectively organize, evaluate and improve and use new information in sports.
- Utilize the knowledge and skills learned with an experimental learning experience, to produce an applied project or a thesis.
- Understand the role of sport and sports organizations in the broader economy and society at large.

Major

Sport Management (MS) (p. 12)

Sport Management

Major: Sport Management

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 52.0299

Standard Occupational Classification (SOC) code: 11-1021

About the Program

The program is designed for individuals working in the sports industry and for those who are and looking to make a career change into the industry. Graduates of the MS program in Sport Management are familiarized with management skills suitable to the broad spectrum of organizations falling within the sport industry. These organizations include professional sports teams and leagues, intercollegiate athletics, sport governing bodies, sport agencies, sport marketing and promotions firms, and other corporate sport enterprises.

The program content provides an integrated educational experience directed toward developing the ability to apply knowledge and skills to the planning, design, implementation, and evaluation of sport programs,

and to offer solutions to practical problems in the sport management field. Graduates are expected to be leaders in their chosen area of interest by incorporating the various perspectives from the multidisciplinary training and applying them to current issues in sport and society.

Program Goals

Graduates of the Master of Science in Sport Management will be able to:

- Apply business and economic fundamentals to the management of sport organizations.
- Apply the area of law and labor relations to the sports industry and agencies.
- Use existing technologies and be prepared for emerging technologies in the sport management field.
- Effectively organize, evaluate and improve and use new information in sports.
- Utilize the knowledge and skills learned with an experimental learning experience, an applied project or thesis.
- Understand the role of sport and sports organizations in the broader economy and society at large.

Sport Management Faculty

Lawrence Cohen, JD (*Temple University*). Assistant Teaching Professor. Sports and antitrust law; tickets sales data analytics; sport sponsorship trends.

Jeffrey Levine, JD (*Tulane University, ABD Louisville*). Assistant Clinical Professor. Expertise in sport, law and policy.

Joel Maxcy, PhD (*Washington State University*) Director. Professor. Economics of sport; labor economics & policy; economics of antitrust & regulation.

Ellen Staurowsky, EdD (*Temple University*) Program Director, *Athletic Administration Concentration*. Professor. Social justice issues in sport; gender equity in sport; Title IX pay equity and equal employment opportunity; athlete exploitation; college sport reform; and misappropriation of American Indian imagery in sport.

Karen Weaver, EdD (*University of Pennsylvania*). Associate Clinical Professor. Sport marketing & promotions, public relations, media, and leadership in sport.

Close School of Entrepreneurship

In today's extremely competitive global workforce, there is an increased value and demand for initiative, independence, innovation, and the intellectual dexterity to rethink of old ways of doing things and invent new ones. The Charles D. Close School has pioneered an approach to entrepreneurship education that addresses this need by teaching students to be entrepreneurial thinkers and doers, preparing them to meet the world market on solid footing and to create their own opportunities.

The Close School defines entrepreneurship as more than starting a company or sparking innovation within established organizations. At the Close School, entrepreneurship is a habit of mind and attitude; a skill set applicable to pursuing innovation in business, personal and career contexts; we assist students in cultivating an approach to life build around innovative thinking, calculated daring and proactive behavior.

Within our unique curriculum, students learn skills such as resilience, collaboration, negotiation and communication. The Close School's academic programs prepare students to face the challenges of self-employment and new venture creation in an evolving 21st century workforce.

About the Program

The Charles D. Close School of Entrepreneurship is founded on the principle that entrepreneurship encompasses more than starting a new venture. Entrepreneurship is a habit of mind and an attitude; a

skill set applicable to pursuing innovation in business, personal, and career contexts; and an approach to life built around innovative thinking, calculated daring, and proactive behavior.

The MS in Entrepreneurship and Innovation is designed for recent graduates or working professionals who wish to increase their knowledge and experiences in innovation and entrepreneurship. The MS focuses on developing the entrepreneurial mindset and the skills associated with new venture creation and corporate innovation.

For additional information about the MS in Entrepreneurship and Innovation, please contact Ian Sladen at is27@drexel.edu.

About the Graduate Minor

The Entrepreneurship and Innovation Graduate Minor is designed to enrich a graduate student's program via rigorous and applied course work in the area of entrepreneurship. The skills of entrepreneurial thinking and doing are applicable to students in every Master's degree program as these competencies resonate with student careers in established companies or new ventures. Students will learn how to learn from failure; how to communicate complex ideas; how to evaluate opportunities and how to implement innovations.

College of Computing & Informatics

From our position on the leading edge of information and technology, Drexel University's College of Computing & Informatics (CCI) instills the knowledge and skills necessary for our students to lead and innovate across industries in a rapidly evolving technological landscape.

Building on Drexel University's exceptional foundation of entrepreneurship and cooperative education, we provide unparalleled professional experiences and the on-the-job training that is vital to preparing today's students for tomorrow's world. At CCI, our unique structure bringing computing and informatics together under one roof in a dynamic, collaborative college allows us to spot trends before they emerge, to solve problems before they occur, and to build a better tomorrow, starting today.

The College contributes to theory and practice along dimensions that include technical, human, organizational, policy and societal considerations. This broad perspective positions the College to address the complex, multi-disciplinary problems that are increasingly common as society becomes more dependent on information technology.

The academic programs of the College provide broad and deep coverage of computing & informatics. For more information about the College, please visit the College's website (<http://www.drexel.edu/cci>).

Advanced Certificate in Information Studies and Technology

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's

Number of Credits to Completion: 24.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 3 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 11.0401

Standard Occupational Classification (SOC) Code: 15-1199

This non-degree program provides specialized training beyond the master's degree so that practitioners can update and extend their skills and knowledge by adding position-relevant coursework in order to meet their current employment requirements. It is not intended to provide coursework that can be applied to the College of Computing & Informatics' master's or doctoral degrees. The program leads to an Advanced Certificate in Information Studies and Technology awarded through the College of Computing & Informatics.

Admission Requirements

Applicants must have completed a master's degree in areas such as library science, computer or information science, information systems, instructional technology, software engineering, or other appropriate degrees from a suitable accredited program that has prepared them for advanced study in the area chosen for specialization. Applicants must meet all the general requirements for admission to graduate studies and the College of Computing & Informatics. Admissions requirements include: completed graduate application form, photocopies of transcripts from all colleges and/or universities attended, essay, resume and Graduate Record Examination (or equivalent), if required.

Requirements

The Advanced Certificate in Information Studies and Technology consists of a minimum of eight courses that must be completed within three calendar years. Students must take four INFO courses as well as complete the final independent study within the College. The three remaining courses may be taken from offerings within the College or from other programs in the University, based on consultation with the student's advisor and agreement of the faculty mentor.

More courses, including a practicum in place of the independent study, may be required for students holding a master's in library science who are seeking certification as School Library/Media specialists in Pennsylvania.

Additional Information

For additional information, view the College of Computing & Informatics Advanced Certificate in Information Studies and Technology (<http://drexel.edu/ci/programs/professional-development-programs/advanced-certificate-in-information-studies-and-technology>) web page.

Archives Specialist Certificate

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's

Number of Credits to Completion: 15.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 3 years

Financial Aid Eligibility: Not eligible

Classification of Instructional Program (CIP) Code: 25.0103

Standard Occupational Classification (SOC) Code: 25-4011

NOTE: Effective Fall 2017, students are no longer being accepted into the Archives Specialist certificate program. Prospective students are encouraged to explore the Advanced Certificate in Information Studies and Technology (p. 15) which provides specialized, customized training beyond the master's degree.

This certificate is designed for professionals already holding a master's degree from an ALA-accredited program or a graduate degree closely related to this specialization.

The specialization in archival studies focuses on the practice and theory of managing collections of records and papers in a variety of archival settings, including governmental agencies, libraries, historical societies, corporations, not-for-profit organizations, museums, and religious institutions.

The course content within this specialization provides the educational component required for post-graduate certification by the Academy of Certified Archivists. This certification may also be of interest to students planning careers in academic and special libraries.

The program must be completed within five years.

Required Courses

INFO 560	Introduction to Archives I	3.0
INFO 561	Introduction to Archives II	3.0
INFO 750	Archival Access Systems	3.0
Select two of the following courses:		6.0
INFO 751	Archival Appraisal	
INFO 755	Electronic Records Management	
INFO 756	Digital Preservation	
Total Credits		15.0

Certificate in Cybersecurity, Law and Policy

Certificate Level: Graduate

Admission Requirements: Bachelor's Degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 9.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 3 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 11.1003

Standard Occupational Classification (SOC) Code: 15-1122

Note: Effective Fall 2016, students are no longer being accepted into this certificate program.

The certificate explores the vulnerabilities that arise from the use of cyberspace. The certificate coursework explores how the United States and the many other nations are responding to those vulnerabilities and how to analyze the policy and legal frameworks that are developing.

Students will examine issues relating to the organization of the Internet and cyberspace to understand how both governmental entities, and private parties, may – and do – respond to cyber threats under the current legal and policy frameworks. Students will be introduced to policy and legal concepts relating to the private sector and civilian government engagement in cyberspace. The program will also include an examination of the application of traditional laws of armed conflict to the new cyber domain.

Credits earned in the Certificate in Cybersecurity, Law & Policy program may not be transferred to the MS in National Security Management.

Required Courses

INFO 517	Principles of Cybersecurity	3.0
INFO 717	Cyber-Computer Crime Law	3.0
INFO 718	Cybersecurity, Law and Policy	3.0

Computer Science

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 12.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 11.0701

Standard Occupational Classification (SOC) Code: 15-1131

About the Program

The Post-Baccalaureate Certificate Program in Computer Science accepts applicants who hold Bachelor degrees in areas other than Computer Science and offers them opportunities to learn the fundamentals of programming and theory in computer science. The aim is to provide an efficient and systematic education on basics of computer science without any prerequisite knowledge. The certificate program may also serve as an on-ramp to a Master of Science in Computer Science (p. 16) or Software Engineering (p. 42), if completed with predetermined grade requirements.

Required Core Courses

CS 520	Computer Science Foundations	3.0
CS 570	Programming Foundations	3.0
CS 571	Advanced Programming Techniques	3.0

Elective Courses

Complete 1 of the following courses:

CS 500	Fundamentals of Databases
CS 510	Introduction to Artificial Intelligence
CS 521	Data Structures and Algorithms I
CS 525	Theory of Computation
CS 530	Developing User Interfaces
CS 536	Computer Graphics
CS 540	High Performance Computing
CS 543	Operating Systems
CS 544	Computer Networks
CS 550	Programming Languages
CS 575	Software Design
CS 583	Introduction to Computer Vision
Total Credits	12.0

Computer Science

Major: Computer Science

Degree Awarded: Master of Science in Computer Science (MSCS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MSCS); 90.0 (PhD)

Co-op Option: Available for full-time on-campus master's-level students

Classification of Instructional Programs (CIP) code: 11.0701

Standard Occupational Classification (SOC) code: 11-3021; 15-1111; 15-1131; 15-1132; 15-1199

About the Program

The Department of Computer Science in the College of Computing & Informatics (<http://drexel.edu/cci>) houses research groups actively conducting research on a wide range of topics in Computer Science including artificial intelligence, algorithms, computer vision and graphics, programming languages, networks, privacy and security, high-performance computing, software engineering, computer algebra, and algorithms. The department emphasizes both interdisciplinary and applied research and is supported by major federal research grants from the National Science Foundation, Department of Defense, Department of Energy, and the National Institute of Standards and Technology, as well as by private sources.

Master of Science in Computer Science

The Master of Science in Computer Science program is designed to provide breadth of understanding in the core topics of computer science, in-depth advanced material, and a range of topics in the research areas of the faculty. A balance of theory and practice is presented, preparing students to perform cutting edge research as well as training students to become practicing computer scientists or software engineers in business, industry, or government. A thesis option is available to prepare students for doctoral studies or other research-oriented career paths.

A graduate co-op is available for the Master of Science program. For more information, visit the Steinbright Career Development Center's website (<http://www.drexel.edu/scdc/co-op/graduate>).

Doctorate in Computer Science

Students enrolled in the PhD in Computer Science program are expected to become an expert in a research area in computer science or its interdisciplinary field with other disciplines. They are expected to conduct research in considerable depth, and make substantial contributions through creative research and serious scholarship. The program is designed for students to ensure core knowledge of the fundamental computer science areas and to conduct bleeding edge research at the forefront of a selected area. Students are prepared for leadership careers in research and education in computer science and interdisciplinary work using computer science.

Additional Information

For more information about these programs, visit the College of Computing & Informatics' website (<http://drexel.edu/cqi>).

Master of Science in Computer Science

General Requirements

Students must complete a minimum of 45.0 graduate credits for the MS degree. All students are required to submit a plan of study form with a Graduate Advisor (<http://drexel.edu/cqi/resources/current-students/graduate-professional-development/advising>) at the beginning of their studies. Significant changes to the plan of study should be discussed with a Graduate Advisor.

Core Requirements 18.0

Students must take 1 course marked "Core Candidate" from each of the 6 categories below. There are 2 Core Candidate courses in each category.

Theory

CS 521	Data Structures and Algorithms I (Core Candidate)
CS 522	Data Structures and Algorithms II
CS 525	Theory of Computation (Core Candidate)
CS 620	Advanced Data Structure and Algorithms
CS 621	Approximation Algorithms
CS 623	Computational Geometry

Intelligent Systems

CS 500	Fundamentals of Databases (Core Candidate)
CS 510	Introduction to Artificial Intelligence (Core Candidate)
CS 511	Robot Laboratory
CS 610	Advanced Artificial Intelligence
CS 611	Game Artificial Intelligence
CS 612	Knowledge-based Agents
CS 613	Machine Learning

Programming Systems

CS 550	Programming Languages (Core Candidate)
CS 575	Software Design (Core Candidate)
CS 576	Dependable Software Systems
CS 650	Program Generation and Optimization
CS 675	Reverse Software Engineering
CS 676	Parallel Programming

Computer Systems

CS 543	Operating Systems (Core Candidate)
CS 544	Computer Networks (Core Candidate)
CS 643	Advanced Operating Systems
CS 645	Network Security
CS 647	Distributed Systems Software

Vision and Graphics

CS 536	Computer Graphics (Core Candidate)
CS 537	Interactive Computer Graphics
CS 558	Game Engine Programming
CS 583	Introduction to Computer Vision (Core Candidate)
CS 634	Advanced Computer Vision

CS 636	Advanced Computer Graphics
--------	----------------------------

Applications

CS 530	Developing User Interfaces (Core Candidate)
CS 540	High Performance Computing (Core Candidate)
CS 567	Applied Symbolic Computation
CS 590	Privacy
CS 630	Cognitive Systems
CS 668	Computer Algebra I
CS 669	Computer Algebra II

Breadth Requirements 9.0

Students must take an additional 3 courses from the remaining courses above, spanning at least 2 of the listed categories.

Depth Requirements 6.0

Students are required to complete at least 2 600- or 700-level Computer Science (CS) courses beyond the breadth requirement. The CS Independent Study course (CS 1599, CS 1699, CS 1799) may be taken if approved by the College.

Additional Graduate-Level Courses 6.0

Two additional graduate level courses are required. These courses are typically 600- or 700-level Computer Science (CS) courses. Graduate courses may be taken from outside the department, if on the list of approved external courses, and may include CS Independent Study (CS 1599, CS 1699, CS 1799) and CS 997 Research in Computer Science, if approved by the College.

Other courses, such as intermediate 500-level and special topics, may also qualify for fulfilling this requirement. Students must check with their advisor to see if this is the case, and have these courses approved by the College. Any course offered by another department that is not on the list of approved external courses must be approved by the College, or it will not count towards the degree.

Thesis or Non-Thesis Option 6.0

Thesis Option

Usually students pursuing a Master's Thesis will first do 3.0 research credits (CS 1599, CS 1699, CS 1799 or CS 997) to obtain background knowledge required by the thesis topic. It is the responsibility of the student to find a thesis supervisor.

CS 898	Master's Thesis
--------	-----------------

Non-thesis Option

The non-thesis option requires 2 additional 600- or 700-level Computer Science (CS) courses taken in place of the 6.0 thesis credits.

Total Credits 45.0

PhD in Computer Science

Core Requirements 18.0

Students must take 1 course marked "Core Candidate" from each of the 6 categories below. There are 2 Core Candidate courses in each category.

Theory

CS 521	Data Structures and Algorithms I (Core Candidate)
CS 525	Theory of Computation (Core Candidate)
CS 522	Data Structures and Algorithms II
CS 620	Advanced Data Structure and Algorithms
CS 621	Approximation Algorithms
CS 623	Computational Geometry

Intelligent Systems

CS 500	Fundamentals of Databases (Core Candidate)
CS 510	Introduction to Artificial Intelligence (Core Candidate)
CS 511	Robot Laboratory
CS 610	Advanced Artificial Intelligence
CS 611	Game Artificial Intelligence
CS 612	Knowledge-based Agents
CS 613	Machine Learning

Programming Systems

CS 550	Programming Languages (Core Candidate)
CS 575	Software Design (Core Candidate)
CS 576	Dependable Software Systems
CS 650	Program Generation and Optimization
CS 675	Reverse Software Engineering

CS 676	Parallel Programming
Computer Systems	
CS 543	Operating Systems (Core Candidate)
CS 544	Computer Networks (Core Candidate)
CS 643	Advanced Operating Systems
CS 645	Network Security
CS 647	Distributed Systems Software
Vision and Graphics	
CS 536	Computer Graphics (Core Candidate)
CS 583	Introduction to Computer Vision (Core Candidate)
CS 537	Interactive Computer Graphics
CS 558	Game Engine Programming
CS 634	Advanced Computer Vision
CS 636	Advanced Computer Graphics
Applications	
CS 530	Developing User Interfaces (Core Candidate)
CS 540	High Performance Computing (Core Candidate)
CS 567	Applied Symbolic Computation
CS 590	Privacy
CS 630	Cognitive Systems
CS 668	Computer Algebra I
CS 669	Computer Algebra II
Breadth Requirement	12.0

Students must take another 4 intermediate and advanced courses from the remaining courses above, spanning at least 3 of the listed course categories while earning at least a grade of B in each course.

Depth Requirement	18.0
--------------------------	------

Students are required to complete at least 18.0 credits of CS courses beyond the Breadth Requirement. These courses should be 600- or 700-level courses. Course selection must be approved by the student's research advisor. The department will periodically offer topics courses, typically run in a seminar fashion, on current research areas of interest to faculty. As part of the Depth Requirements, 3.0 out of the 18.0 credits, but no more than 9.0 credits, are to be Independent Study work (CS 690).

Plan of Study

Upon entering the PhD program, each student will be assigned an Graduate Advisor, and with the help of the Advisor will develop and file a plan of study (which can be brought up to date when necessary). The plan of study should be filed with the Graduate Advisor no later than the end of the first term.

Qualifying Requirements

PhD student must pass each of the six core courses selected as part of the "Core Requirements" (one "Core Candidate" course from each of the listed categories) with a grade B+ or higher. If a student fails to meet this minimum grade requirement, he or she may either (1) take the other "Core Candidate" course in the same category and obtain a grade of B + or higher; (2) retake the same course at the next offering; or (3) retake the final exam of the same course with permission by the instructor, if deemed appropriate by the instructor and the College. Normally, a student is expected to satisfy this requirement by the end of the student's first year. These requirements, including the remedial actions, must be completed by the end of the student's second year. Transfer credits may count towards these requirements subject to course instructor approval of the syllabus for the transferred course.

Candidacy Exam

The Computer Science candidacy examination serves to define the student's research domain and to evaluate the student's knowledge and understanding of various fundamental and seminal results in that domain. At this point the student is expected to be able to read, understand,

analyze, and explain advanced technical results in a specialized area of computer science at an adequate level of detail. The candidacy examination will evaluate those abilities using a defined set of published manuscripts. The student will prepare a written summary of the contents of the material, present the summary orally, and answer questions about the material. The examination committee will evaluate the written summary, the oral presentation, and the student's answers.

Thesis Proposal

After completing the candidacy examination successfully, the PhD candidate must prepare a thesis proposal that outlines, in detail, the specific problems that will be solved in the PhD dissertation. The quality of the research proposal should be at the level of, for example, a peer-reviewed proposal to a federal funding agency, or a publishable scientific paper. The candidate is responsible for sending the research proposal to the PhD committee two weeks before the oral presentation. The PhD committee need not be the same as the candidacy exam committee, but it follows the same requirements and must be approved by the Office of Graduate Studies. The oral presentation involves a 30-minute presentation by the candidate followed by an unspecified period during which the committee will ask questions. After the question and answer period, the candidate will be asked to leave the room and the committee will determine if the research proposal has been accepted. The research proposal can be repeated at most once.

Thesis Defense

After completing the research proposal successfully, the PhD candidate must conduct the necessary research and publish the results in a PhD dissertation. The dissertation must be submitted to the PhD committee two weeks prior to the oral defense. The oral presentation involves a 45-minute presentation by the candidate, open to the public, followed by an unspecified period during which the committee will ask questions. The question-and-answer period is not open to the public. After the question and answer period, the candidate will be asked to leave the room and the committee will determine if the candidate has passed or failed the examination. The candidate will be granted one more chance to pass the final defense if (s)he fails it the first time. Paperwork selecting the thesis committee and indicating the results of the thesis defense must be filed with the College of Computing & Informatics (<http://www.drexel.edu/cci>) and the Graduate College (<http://www.drexel.edu/graduatestudies>).

Dual Degree Opportunities

Graduate students already enrolled in a master's degree program at Drexel have the opportunity, through the dual master's program, to work simultaneously on two CCI master's degrees and to receive both upon graduation. To be eligible, graduate students must be currently working on their first CCI master's degree when requesting admission to the second CCI master's degree. They must obtain approval from the graduate advisors of both programs and work out a plan of study encompassing coursework and/or research (thesis) credits for both degrees.

To satisfy dual degree requirements for the MSCS and another degree the plan of study must include the following: mandatory core, flexible core, breadth and one depth course for a total of 30.0 credits. To obtain a dual degree you must have a minimum of 60 credits, thesis and research credits will be in excess of the 30.0 credits required by MSCS. The dual degree for MSCS students is only available to on-campus students. Please contact your advisor (<http://drexel.edu/ccj/resources/current-students/graduate-professional-development/advising>) for more information on program requirements as some CCI master's degree combinations may require additional prerequisites.

The dual master's student must complete the Change of Curriculum and Status form (http://drexel.edu/%7E/media/Files/graduatecollege/forms/Change_of_Curriculum_and_Status.ashx?!a=en) and obtain approvals from both graduate advisors. Final approval is granted by the Graduate College (<http://drexel.edu/graduatecollege>). The student is then registered in both majors simultaneously. Upon graduation, the student must file two Application for Degree (<http://drexel.edu/drexelcentral/graduation/information/applying-for-degree>) forms.

About the Graduate Minor

The Graduate Minor Degree in Computer Science trains current Drexel graduate students either in an MS or a PhD program of their home departments other than the Computer Science Department to obtain fundamental computer science knowledge as well as an introduction to advanced topics in computer science that will be suitable for their own graduate studies. The aim is to provide a systematic and efficient education to Drexel graduate students interested in expanding their studies through integration of computing, including but not limited to rigorous algorithmic thinking and effective computational implementation, without any prerequisites on computer science knowledge.

Program Requirements

Required Core Courses

CS 520	Computer Science Foundations	3.0
CS 570	Programming Foundations	3.0
CS 571	Advanced Programming Techniques	3.0

Elective Courses 6.0

Complete 2 courses selected from the Master of Science in Computer Science Core Requirements. One course must be a core candidate. If courses are taken from two different Core Requirement categories, both courses must be a Core Candidate.

Theory

CS 521	Data Structures and Algorithms I (Core Candidate)
CS 522	Data Structures and Algorithms II
CS 525	Theory of Computation (Core Candidate)
CS 620	Advanced Data Structure and Algorithms
CS 621	Approximation Algorithms
CS 623	Computational Geometry

Intelligent Systems

CS 500	Fundamentals of Databases (Core Candidate)
CS 510	Introduction to Artificial Intelligence (Core Candidate)
CS 511	Robot Laboratory
CS 610	Advanced Artificial Intelligence
CS 611	Game Artificial Intelligence
CS 612	Knowledge-based Agents
CS 613	Machine Learning

Programming Systems

CS 550	Programming Languages (Core Candidate)
CS 575	Software Design (Core Candidate)
CS 576	Dependable Software Systems
CS 650	Program Generation and Optimization
CS 675	Reverse Software Engineering
CS 676	Parallel Programming

Computer Systems

CS 543	Operating Systems (Core Candidate)
CS 544	Computer Networks (Core Candidate)
CS 643	Advanced Operating Systems
CS 645	Network Security
CS 647	Distributed Systems Software

Vision and Graphics

CS 536	Computer Graphics (Core Candidate)
CS 537	Interactive Computer Graphics
CS 558	Game Engine Programming
CS 583	Introduction to Computer Vision (Core Candidate)
CS 634	Advanced Computer Vision
CS 636	Advanced Computer Graphics

Applications

CS 530	Developing User Interfaces (Core Candidate)
CS 540	High Performance Computing (Core Candidate)
CS 567	Applied Symbolic Computation
CS 590	Privacy
CS 630	Cognitive Systems
CS 668	Computer Algebra I
CS 669	Computer Algebra II

Total Credits 15.0

Drexel University Libraries

Drexel University Libraries (<http://www.library.drexel.edu>) is a learning enterprise, advancing the University's academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through four physical locations, including W. W. Hagerty Library, Hahnemann Library, Queen Lane Library and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science,

computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at library.drexel.edu or in-person at W. W. Hagerty Library (<http://www.library.drexel.edu/locations>).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

iCommons

Located in Room 106 of the Rush Building, the College's iCommons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, more collaborative space for its students and a furnished common area. There is a fully equipped conference room for student use with a 42" display and videoconferencing capabilities. The iCommons provides technical support to students, faculty, and administrative staff. In addition, the staff provides audio-visual support for all presentation classrooms within the Rush Building. Use of the iCommons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the iCommons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the iCommons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as "DreamSpark" that allows students free access to a wide array of Microsoft software titles and operating systems.

The iCommons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University's network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

Rush Building

The Rush Building houses classrooms, CCI administrative offices (academic advising, graduate admissions, faculty, etc.) and the iCommons computer lab (open to all CCI students). The building holds 6 classrooms equipped for audio-visual presentation. These rooms typically contain a networked PC, HD video player, ceiling mounted projectors, and other equipment for presentations and demonstrations. Four of these classrooms are fully equipped to function as laptop computing labs for networking, programming and database-related projects.

The Information Technology Laboratory, located in the Rush Building, consists of enterprise class information technology hardware that students would encounter in industry positions. The hardware includes 20 high powered workstations that are available to students and specialized networking lab simulation software. The hardware is networked and reconfigurable utilizing multiple virtual technologies as needed for the various classes the laboratory supports. In addition, a special system has been built into to the classroom to allow for conversion into a standard

laptop computing lab utilizing motorized monitor lifts that allow the monitors and keyboards to recess into the desk.

University Crossings - Cyber Learning Center and Computer Lab

CCI also has classrooms, administrative office and faculty offices located in University Crossings, located at the corner of JFK Blvd. and Market Street. The building houses the Cyber Learning Center, a student computer lab, as well as several classrooms with video-conference enabled technology and media projection capabilities.

The Cyber Learning Center (CLC) provides consulting and other learning resources for students taking computer science classes. The CLC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

Both the CLC and UC Lab now serve as a central hub for small group work, student meetings, and TA assistance. The UC Lab is organized with desk space around the perimeter of the lab for individual or partner/pair-programmed student work, as well as with clusters of tables which can be connected as needed into pods to create workspaces for larger groups.

Research Laboratories

The College houses multiple research labs, led by CCI faculty, across Drexel's main campus including: the Auerbach and Berger Families Cybersecurity Laboratory, Drexel Health and Risk Communication Lab, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), Geometric and Intelligent Computing Laboratory (GICL), High Performance Computing Laboratory (SPIRAL), Privacy, Security and Automation Laboratory (PSAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College's research web page (<http://cci.drexel.edu/research.aspx>).

Alumni Garden

The Rush Building's Alumni Garden provides additional collaborative space for students, faculty, professional staff and alumni. The Garden features wireless networking, tables with built-in power outlets, accessible covered patio and balconies and a bicycle rack. The Alumni Garden (<http://cci.drexel.edu/about/our-facilities/rush-building/rush-alumni-garden-request-for-use.aspx>) may be reserved for Drexel events.

3401 Market Street

3401 Market Street houses faculty offices and doctoral student workspaces. It also is home to College research groups such and University initiatives such as the Isaac L. Auerbach Cybersecurity Institute (<http://drexel.edu/cci/research/centers-institutes/Cybersecurity>). The Institute's Auerbach and Berger Families Cybersecurity Laboratory serves as University's first training facility dedicated to identifying challenges and discovering solutions in the areas of cyber infrastructure protection and incident response.

Computer Science Faculty

Yuan An, PhD (*University of Toronto, Canada*). Associate Professor. Conceptual modeling, schema and ontology mapping, information

integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

David Augenblick, MS (*University of Pennsylvania*). Associate Teaching Professor. Introductory and object-oriented programming, data structures and database systems, computer application project management, application of computer programming principles and solutions to engineering problems.

M. Brian Blake, PhD (*George Mason University*) *Executive Vice President for Academic Affairs and Provost; Distinguished Professor of Systems and Software Engineering; Joint Appointments with the College of Engineering and the College of Medicine*. Software engineering approaches for integration of Web-based systems.

Mark Boady, PhD (*Drexel University*). Assistant Teaching Professor. Computer Algebra, complex symbolic calculations, automation of computation problems

David E. Breen, PhD (*Rensselaer Polytechnic Institute*). Associate Professor. Self-organization, biomedical image/video analysis, biological simulation, geometric modeling and visualization

Matthew Burlick, PhD (*Stevens Institute of Technology*). Assistant Teaching Professor. Image processing, machine learning, real-time video tracking, object detection and classification, statistics/probability, and acoustics

Yuanfang Cai, PhD (*University of Virginia*). Associate Professor. Formal software design modeling and analysis, software economics, software evolution and modularity.

Bruce W. Char, PhD (*University of California-Berkeley*). Professor. Symbolic mathematical computation, algorithms and systems for computer algebra, problem-solving environments parallel and distributed computation.

Colin Gordon, PhD (*University of Washington*). Assistant Professor. Software reliability, program behavior, concurrent and systems-level code, formal assurance, programming models, distributed computing, even testing

Rachel Greenstadt, PhD (*Harvard University*). Associate Professor. Artificial intelligence, privacy, security, multi-agent systems, economics of electronic privacy and information security.

Jeremy R. Johnson, PhD (*Ohio State University*). Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Constantine Katsinis, PhD (*University of Rhode Island*). Teaching Professor. High-performance computer networks, parallel computer architectures with sustained teraflops performance, computer security, image processing.

Geoffrey Mainland, PhD (*Harvard University*). Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD (*University of Toronto*). Professor. Software engineering; software security; code analysis; evolutionary computation.

Adelaida Alban Medlock, MS (*Drexel University*). Associate Teaching Professor. Introductory programming; computer science education.

William Mongan, MS (*Drexel University*) *Associate Department Head for Undergraduate Affairs, Computer Science*. Associate Teaching

Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach

Ko Nishino, PhD (*University of Tokyo*) *Associate Department Head for Graduate Affairs, Computer Science*. Professor. Computer vision, computer graphics, analysis and synthesis of visual appearance.

Krzysztof Nowak, PhD (*Washington University*). Associate Teaching Professor. Fourier analysis, partial differential equations, image processing, wavelets, asymptotic distribution of eigenvalues, numerical methods and algorithms, computer science education.

Santiago Ontañón, PhD (*University of Barcelona*). Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning

Jeffrey L. Popyack, PhD (*University of Virginia*). Professor. Operations research, stochastic optimization, computational methods of Markov decision processes; artificial intelligence, computer science education.

Jeffrey Salvage, MS (*Drexel University*). Teaching Professor. Object-oriented programming, multi-agent systems, software engineering, database theory, introductory programming, data structures.

Dario Salvucci, PhD (*Carnegie Mellon University*) *Department Head, Computer Science*. Professor. Human computer interaction, cognitive science, machine learning, applications for driving.

Kurt Schmidt, MS (*Drexel University*). Associate Teaching Professor. Data structures, math foundations for computer science, programming tools, programming languages.

Ali Shokoufandeh, PhD (*Rutgers University*) *Senior Associate Dean of Research*. Professor. Theory of algorithms, graph theory, combinatorial optimization, computer vision.

Erin Solovey, PhD (*Tufts University*). Assistant Professor. Human-computer interaction, brain-computer interfaces, tangible interaction, machine learning, human interaction with complex and autonomous systems.

Julia Stoyanovich, PhD (*Columbia University*). Assistant Professor. Data and knowledge management, big data, biological data management, search and ranking.

Brian Stuart, PhD (*Purdue University*). Associate Teaching Professor. Machine learning, networking, robotics, image processing, simulation, interpreters, data storage, operating systems, computer science, data communications, distributed/operating systems, accelerated computer programming, computer graphics.

Filippos Vokolos, PhD (*Polytechnic University*). Assistant Teaching Professor. System architecture, principles of software design and construction, verification and validation methods for the development of large software systems, foundations of software engineering, software verification & validation, software design, programming languages, dependable software systems.

Graduate Minor in Computer Science

About the Program

The Graduate Minor Degree in Computer Science trains current Drexel graduate students either in an MS or a PhD program of their home departments other than the Computer Science Department to obtain fundamental computer science knowledge as well as an introduction to advanced topics in computer science that will be suitable for their own graduate studies. The aim is to provide a systematic and efficient education to Drexel graduate students interested in expanding their studies through integration of computing, including but not limited to rigorous algorithmic thinking and effective computational implementation, without any prerequisites on computer science knowledge.

Required Core Courses

CS 520	Computer Science Foundations	3.0
CS 570	Programming Foundations	3.0
CS 571	Advanced Programming Techniques	3.0

Elective Courses 6.0

Complete 2 courses selected from the Master of Science in Computer Science Core Requirements. One course must be a core candidate. If courses are taken from two different Core Requirement categories, both courses must be a Core Candidate.

Theory

CS 521	Data Structures and Algorithms I (Core Candidate)
CS 522	Data Structures and Algorithms II
CS 525	Theory of Computation (Core Candidate)
CS 620	Advanced Data Structure and Algorithms
CS 621	Approximation Algorithms
CS 623	Computational Geometry

Intelligent Systems

CS 500	Fundamentals of Databases (Core Candidate)

Additional Information

For more information, please visit the College of Computing & Informatics (<http://drexel.edu/cci/programs/graduate-programs>)' website.

Graduate Minor in Healthcare Informatics

About the Minor

This graduate minor provides a basic acquaintance with health informatics principles and practices for students pursuing careers in a wide variety of health related professions. Healthcare informatics is defined here as the ability to generate data, information, and knowledge as well as to implement, adapt, and validate existing informatics approaches to solve healthcare problems. Healthcare informatics also concerns the management and sharing of healthcare data, the social and behavioral issues in healthcare, and the ethics, law, and socio-economic policy. Health informaticians also lead staff education and joint problem solving to promote implementation of healthcare information systems in practice and research settings.

Admission Requirements

Only for currently admitted and enrolled Drexel students in good standing. Students in Health Informatics Masters (MSHI) program are not eligible.

Program Requirements

Required Core Courses

INFO 648	Healthcare Informatics	3.0
or INFO 733	Public Health Informatics	
INFO 731	Managing Health Informatics Projects	3.0
INFO 732	Healthcare Informatics: Planning & Evaluation	3.0

Electives

Choose 2 of the following *		6.0
HMP 701	Health Care Data Analytics	
INFO 517	Principles of Cybersecurity	
INFO 555	Introduction to Geographic Information Systems	
INFO 659	Introduction to Data Analytics	
INFO 712	Information Assurance	
IPS 584	Analysis of Performance Standards in Healthcare Quality	
NURS 532	Evaluation of Health Outcomes	
NURS 553	Data Analysis for Decision-Making in HC Management	
Total Credits		15.0

* Other electives may be approved by the Program Director.

Health Informatics

Major: Health Informatics

Degree Awarded: Master of Science in Health Informatics (MSHI)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.2706

Standard Occupational Classification (SOC) code: 15-1111

About the Program

The Master of Science in Health Informatics (MSHI) at the College of Computing & Informatics prepares graduates to use data, information and knowledge for scientific inquiry and problem solving to improve health outcomes. The program addresses the challenges and opportunities encountered as healthcare transforms itself into a digital, patient-centered system. The inter-disciplinary nature of the MSHI program brings clinicians and IT professionals together to analyze problems and develop solutions through the application of advanced information technology.

Students in this program complete their required courses in the College of Computing & Informatics and choose from a group of approved electives drawn from the College of Nursing and Health Professions, the Dornsife School of Public Health and the LeBow College of Business. All courses are delivered online and students are encouraged to enroll in approved experiential learning programs. Under the guidance of skilled faculty, students engage in a variety of learning activities, develop their organizational leadership skills and develop an appreciation of the varied perspectives in today's healthcare world.

The MS in Health Informatics enables IT professionals who want to expand their knowledge and skills into healthcare, whether in patient care organizations such as hospitals and clinics, or the insurance and pharmaceutical industries. The flexibility of this program is ideal for clinicians who wish to acquire technical skills to advance their careers in today's competitive health care environment.

Drexel's MSHI degree program is in Candidacy Status, pending accreditation review by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM). Drexel University's educational programs are accredited by MSCHE (Middle States Commission on Higher Education).

Additional Information

For more information about this program, visit the College of Computing & Informatics' MS in Health Informatics (<http://drexel.edu/cci/academics/programs/graduate-programs/ms-in-health-informatics>) web page.

Degree Requirements

The curriculum is based around contemporary health issues and has been designed to help students understand the current landscape of health informatics and how information, technology and people relate and intersect in healthcare environments. Because health informatics is an interdisciplinary field, all students will complete a common core of 10 courses (30 quarter hours) from the College of Computing & Informatics before choosing from a suite of specialized electives offered by the College of Computing & Informatics or other Colleges at Drexel University.

The College recommends that all students take INFO 648 in their first term, if possible. Students wishing to take two classes their first term should consider enrolling in INFO 530 as well.

Students are strongly encouraged to consult with their graduate advisor when registering for courses.

Required Courses

INFO 540	Perspectives on Information Systems	3.0
INFO 600	Web Systems & Architecture	3.0
INFO 605	Database Management Systems	3.0

INFO 608	Human-Computer Interaction	3.0
INFO 620	Information Systems Analysis and Design	3.0
INFO 648	Healthcare Informatics	3.0
INFO 659	Introduction to Data Analytics	3.0
INFO 712	Information Assurance *	3.0
INFO 731	Managing Health Informatics Projects	3.0
INFO 732	Healthcare Informatics: Planning & Evaluation	3.0
INFO 896	Health Informatics Experience	3.0
Approved Electives		9.0
Choose three of the following:		
BUSN 651	Healthcare Business Practice I: Foundations	
BUSN 652	Healthcare Business Practice II	
BUSN 653	Healthcare Business Practice III: Capstone	
EPI 570	Introduction to Epidemiology	
EPI 572	Design and Analysis of Epidemiological Studies	
HSAD 505	Ethical and Legal Issues in Healthcare Management and Policy	
INFO 517	Principles of Cybersecurity	
INFO 555	Introduction to Geographic Information Systems	
INFO 606	Advanced Database Management	
INFO 610	Analysis of Interactive Systems	
INFO 611	Design of Interactive Systems	
INFO 622	Content Representation	
INFO 624	Information Retrieval Systems	
INFO 634	Data Mining	
INFO 733	Public Health Informatics	
INFO 753	Introduction to Digital Curation	
NURS 531	Epidemiology in Action: Tracking Health & Disease	
NURS 532	Evaluation of Health Outcomes	
NURS 557	Leadership and Stewardship in the Health Professions	
NURS 558	Economics of Healthcare Management & Policy	
NURS 564	The Business of Healthcare	
RSCH 519	Introduction to Biostatistics	
RSCH 523	Methods for Health Research	
Free electives		3.0
Total Credits		45.0

* Students who are new to computing may take INFO 517 as an elective prior to registering for INFO 712.

NOTE: After completing 6 courses, students must file a statement of intent and a proposal with the Program Director regarding INFO 896.

Sample Plan of Study

Term 1		Credits
INFO 540	Perspectives on Information Systems	3.0
INFO 648	Healthcare Informatics	3.0
Term Credits		6.0
Term 2		Credits
INFO 600	Web Systems & Architecture	3.0
INFO 608	Human-Computer Interaction	3.0
Term Credits		6.0
Term 3		Credits
INFO 659	Introduction to Data Analytics	3.0
INFO 731	Managing Health Informatics Projects	3.0
Term Credits		6.0
Term 4		Credits
INFO 605	Database Management Systems	3.0
INFO 620	Information Systems Analysis and Design	3.0
Term Credits		6.0
Term 5		Credits

Approved Elective		3.0
Free Elective		3.0
Term Credits		6.0
Term 8		
INFO 896	Health Informatics Experience	3.0
Term Credits		3.0
Total Credit: 45.0		

* Students who are new to computing may take INFO 517 as an elective prior to registering for INFO 712

NOTE: After completing 6 courses, students must file a statement of intent and a proposal with the Program Director regarding INFO 896 Health Informatics Experience.

Dual Degree Opportunities

Graduate students already enrolled in a master's degree program at Drexel have the opportunity, through the dual master's program, to work simultaneously on two CCI master's degrees and to receive both upon graduation. To be eligible, graduate students must be currently working on their first CCI master's degree when requesting admission to the second CCI master's degree. They must obtain approval from the graduate advisors of both programs and work out a plan of study encompassing coursework and/or research (thesis) credits for both degrees. Please contact your advisor (<http://drexel.edu/cc/resources/current-students/graduate-professional-development/advising>) for more information on program requirements as some CCI master's degree combinations may require additional pre-requisites.

The dual master's student must complete the Change of Curriculum and Status form (http://drexel.edu/%7E/media/Files/graduatecollege/forms/Change_of_Curriculum_and_Status.ashx?la=en) and obtain approvals from both graduate advisors. Final approval is granted by the Graduate College (<http://drexel.edu/graduatecollege>). The student is then registered in both majors simultaneously. Upon graduation, the student must file two Application for Degree (<http://drexel.edu/drexelcentral/graduation/information/applying-for-degree>) forms.

Evaluations

The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the Health Informatics degree is evaluated relative to the following Learning Objectives:

Specific learning outcomes for program graduates include the following:

- Articulate the ways in which data, information, and knowledge are used to solve health problems from the individual to the population level.
- Apply theories, methods, and processes for the generation, storage, retrieval, use, management, and sharing of healthcare data, information, and knowledge.
- Apply, adapt, and validate informatics concepts and approaches as they relate to specific biomedical and healthcare problems.

- Select relevant concepts and techniques from the social sciences to solve problems in health informatics.
- Work collaboratively across disciplines to define, discuss, and resolve health problems.
- Analyze the ethical and policy issues related to biomedical and healthcare informatics.

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 9.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 3 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.2706

Standard Occupational Classification (SOC) Code: 15-1111

Certificate in Healthcare Informatics

About the Program

This online certificate program is designed for working professionals who want to increase their knowledge of how health information technology can be deployed to improve health outcomes. Clinicians and information professionals gain a broad knowledge of contemporary health informatics, and the complex social and organizational issues surrounding this major change in healthcare. Students also acquire skills in planning and evaluation.

Graduates of the program may advance their careers in health IT-related responsibilities or explore new opportunities in this growing field. Students enrolled in any master's program in the College of Computing & Informatics may also complete the certificate in healthcare informatics.

Program Requirements

Required Courses

Facilities

Drexel University Libraries

Drexel University Libraries (<http://www.library.drexel.edu>) is a learning enterprise, advancing the University's academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through four physical locations, including W. W. Hagerty Library, Hahnemann Library, Queen Lane Library and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science,

computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at library.drexel.edu or in-person at W. W. Hagerty Library (<http://www.library.drexel.edu/locations>).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

iCommons

Located in Room 106 of the Rush Building, the College's iCommons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, more collaborative space for its students and a furnished common area. There is a fully equipped conference room for student use with a 42" display and videoconferencing capabilities. The iCommons provides technical support to students, faculty, and administrative staff. In addition, the staff provides audio-visual support for all presentation classrooms within the Rush Building. Use of the iCommons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the iCommons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the iCommons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as "DreamSpark" that allows students free access to a wide array of Microsoft software titles and operating systems.

The iCommons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University's network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

Rush Building

The Rush Building houses classrooms, CCI administrative offices (academic advising, graduate admissions, faculty, etc.) and the iCommons computer lab (open to all CCI students). The building holds 6 classrooms equipped for audio-visual presentation. These rooms typically contain a networked PC, HD video player, ceiling mounted projectors, and other equipment for presentations and demonstrations. Four of these classrooms are fully equipped to function as laptop computing labs for networking, programming and database-related projects.

The Information Technology Laboratory, located in the Rush Building, consists of enterprise class information technology hardware that students would encounter in industry positions. The hardware includes 20 high powered workstations that are available to students and specialized networking lab simulation software. The hardware is networked and reconfigurable utilizing multiple virtual technologies as needed for the various classes the laboratory supports. In addition, a special system has been built into to the classroom to allow for conversion into a standard

laptop computing lab utilizing motorized monitor lifts that allow the monitors and keyboards to recess into the desk.

University Crossings - Cyber Learning Center and Computer Lab

CCI also has classrooms, administrative office and faculty offices located in University Crossings, located at the corner of JFK Blvd. and Market Street. The building houses the Cyber Learning Center, a student computer lab, as well as several classrooms with video-conference enabled technology and media projection capabilities.

The Cyber Learning Center (CLC) provides consulting and other learning resources for students taking computer science classes. The CLC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

Both the CLC and UC Lab now serve as a central hub for small group work, student meetings, and TA assistance. The UC Lab is organized with desk space around the perimeter of the lab for individual or partner/pair-programmed student work, as well as with clusters of tables which can be connected as needed into pods to create workspaces for larger groups.

Research Laboratories

The College houses multiple research labs, led by CCI faculty, across Drexel's main campus including: the Auerbach and Berger Families Cybersecurity Laboratory, Drexel Health and Risk Communication Lab, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), Geometric and Intelligent Computing Laboratory (GICL), High Performance Computing Laboratory (SPIRAL), Privacy, Security and Automation Laboratory (PSAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College's research web page (<http://cci.drexel.edu/research.aspx>).

Alumni Garden

The Rush Building's Alumni Garden provides additional collaborative space for students, faculty, professional staff and alumni. The Garden features wireless networking, tables with built-in power outlets, accessible covered patio and balconies and a bicycle rack. The Alumni Garden (<http://cci.drexel.edu/about/our-facilities/rush-building/rush-alumni-garden-request-for-use.aspx>) may be reserved for Drexel events.

3401 Market Street

3401 Market Street houses faculty offices and doctoral student workspaces. It also is home to College research groups such and University initiatives such as the Isaac L. Auerbach Cybersecurity Institute (<http://drexel.edu/cci/research/centers-institutes/Cybersecurity>). The Institute's Auerbach and Berger Families Cybersecurity Laboratory serves as University's first training facility dedicated to identifying challenges and discovering solutions in the areas of cyber infrastructure protection and incident response.

Computing & Informatics Faculty

Denise E. Agosto, PhD (*Rutgers, The State University of New Jersey*). Professor. Information behavior, public libraries, gender, children, young adults, multicultural materials.

Yuan An, PhD (*University of Toronto, Canada*). Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

David Augenblick, MS (*University of Pennsylvania*). Associate Teaching Professor. Introductory and object-oriented programming, data structures and database systems, computer application project management, application of computer programming principles and solutions to engineering problems.

Ellen Bass, PhD (*Georgia Institute of Technology*) *Head of Department of Information Science; Joint Appointment with the College of Nursing and Health Professions*. Professor. Characterizing human judgement and decision making, modeling human judgement when supported by information automation, computational models of human-human and human-automation coordination.

Mark Boady, PhD (*Drexel University*). Assistant Teaching Professor. Computer Algebra, complex symbolic calculations, automation of computation problems

David E. Breen, PhD (*Rensselaer Polytechnic Institute*). Associate Professor. Self-organization, biomedical image/video analysis, biological simulation, geometric modeling and visualization

Matthew Burlick, PhD (*Stevens Institute of Technology*). Assistant Teaching Professor. Image processing, machine learning, real-time video tracking, object detection and classification, statistics/probability, and acoustics

Yuanfang Cai, PhD (*University of Virginia*). Associate Professor. Formal software design modeling and analysis, software economics, software evolution and modularity.

Christopher Carroll, MS (*Drexel University*). Assistant Teaching Professor. Information technology within healthcare companies, computer networking and design, IT infrastructure, server technology, information security, virtualization and cloud computing.

Bruce W. Char, PhD (*University of California-Berkeley*). Professor. Symbolic mathematical computation, algorithms and systems for computer algebra, problem-solving environments parallel and distributed computation.

Chaomei Chen, PhD (*University of Liverpool*). Professor. Information visualization, visual analytics, knowledge domain visualization, network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Michael Chu, MSE (*University of Pennsylvania*). Associate Teaching Professor. System, server, computer networking and design; IT Infrastructure; information technology management and security; Web system programming; database and mobile application development

Catherine D. Collins, MLIS (*Indiana University*). Associate Teaching Professor. Knowledge management, collection development, management of information organizations, information sources and services, international development.

M. Carl Drott, PhD (*University of Michigan*). Associate Professor. Systems analysis techniques, web usage, competitive intelligence.

Andrea Forte, PhD (*Georgia Institute of Technology*) *PhD in Information Studied Program Director*. Associate Professor. Social computing, human-

computer interaction, computer-supported cooperative work, computer-supported collaborative learning, information literacy.

Susan Gasson, PhD (*University of Warwick*). Associate Professor. The co-design of business and IT-systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Colin Gordon, PhD (*University of Washington*). Assistant Professor. Software reliability, program behavior, concurrent and systems-level code, formal assurance, programming models, distributed computing, even testing

Jane Greenberg, PhD (*University of Pittsburgh*) *Alice B. Kroeger Professor; Director, Metadata Research Center*. Metadata, ontological engineering, data science, knowledge organization, information retrieval

Rachel Greenstadt, PhD (*Harvard University*). Associate Professor. Artificial intelligence, privacy, security, multi-agent systems, economics of electronic privacy and information security.

Peter Grillo, PhD (*Temple University*) *Associate Department Head for Undergraduate Affairs, Information Science*. Teaching Professor. Strategic applications of technology within organizations.

Gregory W. Hislop, PhD (*Drexel University*) *Senior Associate Dean for Academic Affairs*. Professor. Information technology for teaching and learning, online education, structure and organization of the information disciplines, computing education research, software evaluation and characterization.

Xiaohua Tony Hu, PhD (*University of Regina, Canada*). Professor. Data mining, text mining, Web searching and mining, information retrieval, bioinformatics and healthcare informatics.

Jeremy R. Johnson, PhD (*Ohio State University*). Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Weimao Ke, PhD (*University of North Carolina at Chapel Hill*). Associate Professor. Information retrieval (IR), distributed systems, intelligent filtering/recommendation, information visualization, network science, complex systems, machine learning, text/data mining, multi-agent systems, the notion of information.

Xia Lin, PhD (*University of Maryland*) *Department Head, Information Science; Director of International Programs*. Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Geoffrey Mainland, PhD (*Harvard University*). Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD (*University of Toronto*). Professor. Software engineering; software security; code analysis; evolutionary computation.

Gabriela Marcu, PhD (*Carnegie Mellon University*). Assistant Teaching Professor. Human-computer interaction, health informatics, action research, ethnography, user experience design, designing for social change, organizational information systems, ubiquitous computing, knowledge management.

Adelaida Alban Medlock, MS (*Drexel University*). Associate Teaching Professor. Introductory programming; computer science education.

William Mongan, MS (*Drexel University*) *Associate Department Head for Undergraduate Affairs, Computer Science*. Associate Teaching Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach

Gaurav Naik, MS (*Drexel University*). Assistant Research Professor. Computer networking and cybersecurity

Ko Nishino, PhD (*University of Tokyo*) *Associate Department Head for Graduate Affairs, Computer Science*. Professor. Computer vision, computer graphics, analysis and synthesis of visual appearance.

Danuta A. Nitecki, PhD (*University of Maryland at College Park*) *Dean of Libraries*. Professor. Library metrics and use in management, library as place, and academic library service models.

Krzysztof Nowak, PhD (*Washington University*). Associate Teaching Professor. Fourier analysis, partial differential equations, image processing, wavelets, asymptotic distribution of eigenvalues, numerical methods and algorithms, computer science education.

Santiago Ontañón, PhD (*University of Barcelona*). Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning

Jung-ran Park, PhD (*University of Hawaii at Manoa*). Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Alex Poole, PhD (*University of North Carolina*). Assistant Professor. Archives and records, digital humanities, digital curation, pedagogy, diversity and inclusivity in the LIS profession

Jeffrey L. Popyack, PhD (*University of Virginia*). Professor. Operations research, stochastic optimization, computational methods of Markov decision processes; artificial intelligence, computer science education.

Lori Richards, PhD (*University of North Carolina*). Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Michelle L. Rogers, PhD (*University of Wisconsin-Madison*). Associate Professor. Human-computer interaction, healthcare informatics, human factors engineering, socio-technical systems, health services research, patient safety.

Jeffrey Salvage, MS (*Drexel University*). Teaching Professor. Object-oriented programming, multi-agent systems, software engineering, database theory, introductory programming, data structures.

Dario Salvucci, PhD (*Carnegie Mellon University*) *Department Head, Computer Science*. Professor. Human computer interaction, cognitive science, machine learning, applications for driving.

Kurt Schmidt, MS (*Drexel University*). Associate Teaching Professor. Data structures, math foundations for computer science, programming tools, programming languages.

Ali Shokoufandeh, PhD (*Rutgers University*) *Senior Associate Dean of Research*. Professor. Theory of algorithms, graph theory, combinational optimization, computer vision.

Erin Solovey, PhD (*Tufts University*). Assistant Professor. Human-computer interaction, brain-computer interfaces, tangible interaction, machine learning, human interaction with complex and autonomous systems.

Il-Yeol Song, PhD (*Louisiana State University*) *PhD in Information Studies Program Director*. Professor. Conceptual modeling, ontology and patterns, data warehouse and OLAP, object-oriented analysis and design with UML, medical and bioinformatics data modeling & integration.

Julia Stoyanovich, PhD (*Columbia University*). Assistant Professor. Data and knowledge management, big data, biological data management, search and ranking.

Brian Stuart, PhD (*Purdue University*). Associate Teaching Professor. Machine learning, networking, robotics, image processing, simulation, interpreters, data storage, operating systems, computer science, data communications, distributed/operating systems, accelerated computer programming, computer graphics.

Filippos Vokolos, PhD (*Polytechnic University*). Assistant Teaching Professor. System architecture, principles of software design and construction, verification and validation methods for the development of large software systems, foundations of software engineering, software verification & validation, software design, programming languages, dependable software systems.

Rosina Weber, PhD (*Federal University of Santa Catarina*). Associate Professor.

Jake Williams, PhD (*University of Vermont*). Assistant Professor. Data science, scientific programming, computational social science, computational linguistics and natural language processing, mathematics, machine learning, algorithms and scalability

Erija Yan, PhD (*Indiana University*). Assistant Professor. Network Science, information analysis and retrieval, scholarly communication methods and applications.

Christopher C. Yang, PhD (*University of Arizona, Tucson*). Associate Professor. Web search and mining, security informatics, knowledge management, social media analytics, cross-lingual information retrieval, text summarization, multimedia retrieval, information visualization, information sharing and privacy, artificial intelligence, digital library, and electronic commerce.

Emeritus Faculty

Michael E. Atwood, PhD (*University of Colorado*) *Associate Dean for Research and for Undergraduate Education*. Professor Emeritus. Human-computer interaction, computer-supported cooperative work, organizational memory.

Thomas A. Childers, PhD (*Rutgers University*). Professor Emeritus. Measurement, evaluation, and planning of information and library services, the effectiveness of information organizations.

Prudence W. Dalrymple, PhD (*University of Wisconsin-Madison*) *Director, Institute for Healthcare Informatics*. Professor Emeritus. User-centered information behaviors, particularly in the health arena, health informatics,

evidence based practice, education for the information professions and evaluation, and translation of research into practice.

David E. Fenske, PhD (*University of Wisconsin-Madison*). Dean Emeritus and Professor. Digital libraries, informatics, knowledge management and information technologies.

John B. Hall, PhD (*Florida State University*). Professor Emeritus. Academic library service, library administration, organization of materials.

Linda S. Marion, PhD (*Drexel University*). Professor Emeritus. Formal and informal communication, bibliometric studies of scholarly communication, diffusion of information, information use in the social sciences, academic and public libraries, information science education.

Katherine W. McCain, PhD (*Drexel University*). Professor Emeritus. Scholarly communication, information production and use in the research process, development and structure of scientific specialties, diffusion of innovation, bibliometrics, evaluation of information retrieval systems.

Carol Hansen Montgomery, PhD (*Drexel University*) *Dean of Libraries Emeritus*. Research Professor. Selection and use of electronic collections, evaluation of library and information systems, digital libraries, economics of libraries and digital collections.

Delia Neuman, PhD (*The Ohio State University*). Professor Emeritus. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Gerry Stahl, PhD (*University of Colorado, Northwestern University*). Professor Emeritus. Human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, theory of collaboration.

Howard D. White, PhD (*University of California at Berkeley*). Professor Emeritus. Literature information systems, bibliometrics, research methods, collection development, online searching.

Susan Wiedenbeck, PhD (*University of Pittsburgh*). Professor Emeritus. Human-computer interaction, end-user programming/end-user development, empirical studies of programmers, interface design and evaluation.

Valerie Ann Yonker, PhD (*Drexel University*). Professor Emeritus. Human service information systems, systems analysis and design, measurement in software evaluation, knowledge engineering.

Information Studies

Major: Information Studies

Degree Awarded: Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 90.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 11.0401

Standard Occupational Classification (SOC) code: 15-1111

About the Program

The College of Computing & Informatics' on-campus PhD in Information Studies program prepares students to become creative, interdisciplinary researchers with foundations in information science, data science, and human-centered computing. The main focus of the program is on research with applications that benefit all sectors of society.

Purpose and Scope

The program is designed to support all students in attaining a high level of scholarly achievement in both supervised and independent study and research. There are few fixed program requirements, and the master's degree is not a prerequisite for the PhD. The doctoral program has two major goals: acquisition of in-depth knowledge in a specialized research area and the kind of interdisciplinary breadth that is required to support creative scholarship. The degree prepares students for leadership research careers in academia, industry, administration, and policy-setting.

Opportunities

Most graduates move into academic or research and development (R&D) careers.

Additional Information

For more information about this program, visit the College of Computing & Informatics' Doctoral Program in Information Studies (<http://drexel.edu/cci/academics/programs/graduate-programs/phd-information-studies>) web page.

Degree Requirements

Coursework

A PhD student is required to complete an approved plan of study consisting of a total of 45.0 credits beyond the master's degree including at least 24.0 credit hours of courses (8 courses), 5.0 credit hours of seminars, and 16.0 credit hours of research. Students entering without a master's degree need to complete the course credits associated with the master's degree in addition to the 45.0 credits discussed here, which is a total of 90.0 credits.

PhD students are required to earn 24 post-master's course credits, broken down as follows:

- 3 research methods courses
- 3 foundations courses
- 2 specialization courses
- 3 seminar credits for the PhD Process and Practice (PPP)
- 2 seminar credits for two selected Special Topics Seminars (each seminar is 1.0 credit)

Admission to Candidacy

It is expected that a PhD student should complete the comprehensive exam at the end of the second year. The exam assesses expertise in the major area in which the student intends to perform research. The examination itself consists of two parts, written and oral, and both parts must be passed to enter candidacy.

Dissertation

The student should produce an original piece of research as partial fulfillment for earning the doctorate. The dissertation, committee activity, and protocol must comply with Drexel University's policy on "Doctoral Candidacy and Dissertation Committees."

Required Research Methods Courses

INFO 812	Research Statistics I	3.0
INFO 813	Quantitative Methods	3.0
INFO 816	Qualitative Research Methods	3.0

Facilities

Drexel University Libraries

Drexel University Libraries (<http://www.library.drexel.edu>) is a learning enterprise, advancing the University's academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through four physical locations, including W. W. Hagerty Library, Hahnemann Library, Queen Lane Library and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at library.drexel.edu or in-person at W. W. Hagerty Library (<http://www.library.drexel.edu/locations>).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

iCommons

Located in Room 106 of the Rush Building, the College's iCommons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, more collaborative space for its students and a furnished common area. There is a fully equipped conference room for student use with a 42" display and videoconferencing capabilities. The iCommons provides technical support to students, faculty, and administrative staff. In addition, the staff provides audio-visual support for all presentation classrooms within the Rush Building. Use of the iCommons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the iCommons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the iCommons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as "DreamSpark" that allows students free access to a wide array of Microsoft software titles and operating systems.

The iCommons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University's network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

Rush Building

The Rush Building houses classrooms, CCI administrative offices (academic advising, graduate admissions, faculty, etc.) and the iCommons computer lab (open to all CCI students). The building holds 6 classrooms equipped for audio-visual presentation. These rooms typically contain a networked PC, HD video player, ceiling mounted projectors, and other equipment for presentations and demonstrations. Four of these classrooms are fully equipped to function as laptop computing labs for networking, programming and database-related projects.

The Information Technology Laboratory, located in the Rush Building, consists of enterprise class information technology hardware that students would encounter in industry positions. The hardware includes 20 high powered workstations that are available to students and specialized networking lab simulation software. The hardware is networked and reconfigurable utilizing multiple virtual technologies as needed for the various classes the laboratory supports. In addition, a special system has been built into the classroom to allow for conversion into a standard laptop computing lab utilizing motorized monitor lifts that allow the monitors and keyboards to recess into the desk.

University Crossings - Cyber Learning Center and Computer Lab

CCI also has classrooms, administrative office and faculty offices located in University Crossings, located at the corner of JFK Blvd. and Market Street. The building houses the Cyber Learning Center, a student computer lab, as well as several classrooms with video-conference enabled technology and media projection capabilities.

The Cyber Learning Center (CLC) provides consulting and other learning resources for students taking computer science classes. The CLC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

Both the CLC and UC Lab now serve as a central hub for small group work, student meetings, and TA assistance. The UC Lab is organized with desk space around the perimeter of the lab for individual or partner/pair-programmed student work, as well as with clusters of tables which can be connected as needed into pods to create workspaces for larger groups.

Research Laboratories

The College houses multiple research labs, led by CCI faculty, across Drexel's main campus including: the Auerbach and Berger Families

Cybersecurity Laboratory, Drexel Health and Risk Communication Lab, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), Geometric and Intelligent Computing Laboratory (GICL), High Performance Computing Laboratory (SPIRAL), Privacy, Security and Automation Laboratory (PSAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College's research web page (<http://cci.drexel.edu/research.aspx>).

Alumni Garden

The Rush Building's Alumni Garden provides additional collaborative space for students, faculty, professional staff and alumni. The Garden features wireless networking, tables with built-in power outlets, accessible covered patio and balconies and a bicycle rack. The Alumni Garden (<http://cci.drexel.edu/about/our-facilities/rush-building/rush-alumni-garden-request-for-use.aspx>) may be reserved for Drexel events.

3401 Market Street

3401 Market Street houses faculty offices and doctoral student workspaces. It also is home to College research groups such and University initiatives such as the Isaac L. Auerbach Cybersecurity Institute (<http://drexel.edu/cci/research/centers-institutes/Cybersecurity>). The Institute's Auerbach and Berger Families Cybersecurity Laboratory serves as University's first training facility dedicated to identifying challenges and discovering solutions in the areas of cyber infrastructure protection and incident response.

Information Science Faculty

Denise E. Agosto, PhD (*Rutgers, The State University of New Jersey*). Professor. Information behavior, public libraries, gender, children, young adults, multicultural materials.

Yuan An, PhD (*University of Toronto, Canada*). Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

Ellen Bass, PhD (*Georgia Institute of Technology*) *Head of Department of Information Science; Joint Appointment with the College of Nursing and Health Professions*. Professor. Characterizing human judgement and decision making, modeling human judgement when supported by information automation, computational models of human-human and human-automation coordination.

Christopher Carroll, MS (*Drexel University*). Assistant Teaching Professor. Information technology within healthcare companies, computer networking and design, IT infrastructure, server technology, information security, virtualization and cloud computing.

Chaomei Chen, PhD (*University of Liverpool*). Professor. Information visualization, visual analytics, knowledge domain visualization, network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Catherine D. Collins, MLIS (*Indiana University*). Associate Teaching Professor. Knowledge management, collection development, management of information organizations, information sources and services, international development.

M. Carl Drott, PhD (*University of Michigan*). Associate Professor. Systems analysis techniques, web usage, competitive intelligence.

Andrea Forte, PhD (*Georgia Institute of Technology*) *PhD in Information Studied Program Director*. Associate Professor. Social computing, human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, information literacy.

Susan Gasson, PhD (*University of Warwick*). Associate Professor. The co-design of business and IT-systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Jane Greenberg, PhD (*University of Pittsburgh*) *Alice B. Kroeger Professor; Director, Metadata Research Center*. Metadata, ontological engineering, data science, knowledge organization, information retrieval

Peter Grillo, PhD (*Temple University*) *Associate Department Head for Undergraduate Affairs, Information Science*. Teaching Professor. Strategic applications of technology within organizations.

Gregory W. Hislop, PhD (*Drexel University*) *Senior Associate Dean for Academic Affairs*. Professor. Information technology for teaching and learning, online education, structure and organization of the information disciplines, computing education research, software evaluation and characterization.

Xiaohua Tony Hu, PhD (*University of Regina, Canada*). Professor. Data mining, text mining, Web searching and mining, information retrieval, bioinformatics and healthcare informatics.

Weimao Ke, PhD (*University of North Carolina at Chapel Hill*). Associate Professor. Information retrieval (IR), distributed systems, intelligent filtering/recommendation, information visualization, network science, complex systems, machine learning, text/data mining, multi-agent systems, the notion of information.

Xia Lin, PhD (*University of Maryland*) *Department Head, Information Science; Director of International Programs*. Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Danuta A. Nitecki, PhD (*University of Maryland at College Park*) *Dean of Libraries*. Professor. Library metrics and use in management, library as place, and academic library service models.

Jung-ran Park, PhD (*University of Hawaii at Manoa*). Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Alex Poole, PhD (*University of North Carolina*). Assistant Professor. Archives and records, digital humanities, digital curation, pedagogy, diversity and inclusivity in the LIS profession

Lori Richards, PhD (*University of North Carolina*). Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Michelle L. Rogers, PhD (*University of Wisconsin-Madison*). Associate Professor. Human-computer interaction, healthcare informatics, human

factors engineering, socio-technical systems, health services research, patient safety.

Aleksandra Sarcevic, PhD (*Rutgers University*). Assistant Professor. Computer-supported cooperative work, human-computer interaction, healthcare informatics, crisis informatics, social analysis of information and communications technology (ICT).

Il-Yeol Song, PhD (*Louisiana State University*) *PhD in Information Studies Program Director*. Professor. Conceptual modeling, ontology and patterns, data warehouse and OLAP, object-oriented analysis and design with UML, medical and bioinformatics data modeling & integration.

Rosina Weber, PhD (*Federal University of Santa Catarina*). Associate Professor.

Jake Williams, PhD (*University of Vermont*). Assistant Professor. Data science, scientific programming, computational social science, computational linguistics and natural language processing, mathematics, machine learning, algorithms and scalability

Christopher C. Yang, PhD (*University of Arizona, Tucson*). Associate Professor. Web search and mining, security informatics, knowledge management, social media analytics, cross-lingual information retrieval, text summarization, multimedia retrieval, information visualization, information sharing and privacy, artificial intelligence, digital library, and electronic commerce.

Emeritus Faculty

Michael E. Atwood, PhD (*University of Colorado*) *Associate Dean for Research and for Undergraduate Education*. Professor Emeritus. Human-computer interaction, computer-supported cooperative work, organizational memory.

Thomas A. Childers, PhD (*Rutgers University*). Professor Emeritus. Measurement, evaluation, and planning of information and library services, the effectiveness of information organizations.

Prudence W. Dalrymple, PhD (*University of Wisconsin-Madison*) *Director, Institute for Healthcare Informatics*. Professor Emeritus. User-centered information behaviors, particularly in the health arena, health informatics, evidence based practice, education for the information professions and evaluation, and translation of research into practice.

David E. Fenske, PhD (*University of Wisconsin-Madison*). Dean Emeritus and Professor. Digital libraries, informatics, knowledge management and information technologies.

Linda S. Marion, PhD (*Drexel University*). Professor Emeritus. Formal and informal communication, bibliometric studies of scholarly communication, diffusion of information, information use in the social sciences, academic and public libraries, information science education.

Katherine W. McCain, PhD (*Drexel University*). Professor Emeritus. Scholarly communication, information production and use in the research process, development and structure of scientific specialties, diffusion of innovation, bibliometrics, evaluation of information retrieval systems.

Carol Hansen Montgomery, PhD (*Drexel University*) *Dean of Libraries Emeritus*. Research Professor. Selection and use of electronic collections, evaluation of library and information systems, digital libraries, economics of libraries and digital collections.

Delia Neuman, PhD (*The Ohio State University*). Professor Emeritus. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Howard D. White, PhD (*University of California at Berkeley*). Professor Emeritus. Literature information systems, bibliometrics, research methods, collection development, online searching.

Susan Wiedenbeck, PhD (*University of Pittsburgh*). Professor Emeritus. Human-computer interaction, end-user programming/end-user development, empirical studies of programmers, interface design and evaluation.

Valerie Ann Yonker, PhD (*Drexel University*). Professor Emeritus. Human service information systems, systems analysis and design, measurement in software evaluation, knowledge engineering.

Information Systems

Major: Information Systems

Degree Awarded: Master of Science in Information Systems (MSIS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: Available for full-time on-campus master's-level students

Classification of Instructional Programs (CIP) code: 11.0401

Standard Occupational Classification (SOC) code: 11-3021

About the Program

The College of Computing & Informatics' Master of Science in Information Systems (MSIS) prepares students for both the technical and real-world aspects of creating and managing information systems. The program, which is offered both online and on campus, part-time and full-time, aims to develop professionals who are able to understand, participate in, develop, and lead information technology change.

The MSIS is an interdisciplinary program that prepares students with both the domain knowledge and practical competencies to compete in the ever-changing technical landscape of information system business requirements, software design and management, data-oriented informatics and user experience design. The program is designed for students with no prior background in information systems who would like an education in the latest innovative methods in data analysis, human-centered computing, and information systems, or those with experience in information systems development who wish to refresh and update their technical design and analysis skills. Courses integrate the business, organizational, information, and technical aspects of computer-based information systems, while offering the chance to develop expertise in three specialist areas:

1. Software and systems development, such as organizational information system design, requirements analysis, software project management, modern systems development and implementation.
2. Data analytics, information, and knowledge management, such as organizational data management, data mining, natural language processing, intelligent systems, and competitive intelligence.
3. Human-centered computing, such as human-computer interaction, user-experience design, social computing, collaboration systems, and online community support.

A graduate co-op is available for this program. For more information, visit the Steinbright Career Development Center's website (<http://www.drexel.edu/scdc/co-op/graduate>).

Additional Information

For more information about this program, visit the College of Computing & Informatics' MS in Information Systems (<http://drexel.edu/cci/programs/graduate-programs/ms-in-information-systems>) web page.

Degree Requirements

Required Courses

INFO 532	Software Development	3.0
INFO 540	Perspectives on Information Systems	3.0
INFO 600	Web Systems & Architecture	3.0
INFO 605	Database Management Systems	3.0
INFO 608	Human-Computer Interaction	3.0
INFO 620	Information Systems Analysis and Design	3.0
INFO 627	Requirements Engineering and Management	3.0
INFO 638	Software Project Management	3.0
INFO 646	Information Systems Management	3.0

Free Electives *

6.0

Total Credits

45.0

* Courses in the distribution course set that students do not take to meet the distribution requirement may be taken as free electives. All other masters-level INFO courses may be taken as free electives. MSIS students may not take courses designated as doctoral-level courses.

Dual Degree Opportunities

Graduate students already enrolled in a master's degree program at Drexel have the opportunity, through the dual master's program to work simultaneously on two master's degrees and to receive both upon graduation. To be eligible, graduate students must be currently working on their first degree when requesting admission to the second. They must obtain approval from the graduate advisors of both programs and work

out a plan of study encompassing coursework and/or research (thesis) credits for both degrees. Please contact your advisor (<http://drexel.edu/cci/resources/current-students/graduate-professional-development/advising>) for more information on program requirements as some CCI master's degree combinations may require additional pre-requisites.

The dual master's student must complete the Change of Curriculum and Status form (http://drexel.edu/%7E/media/Files/graduatecollege/forms/Change_of_Curriculum_and_Status.ashx?la=en) and obtain approvals from both graduate advisors. Final approval is granted by the Graduate College (<http://drexel.edu/graduatecollege>). The student is then registered in both majors simultaneously. Upon graduation, the student must file two Application for Degree (<http://drexel.edu/drexelcentral/graduation/information/applying-for-degree>) forms.

Dual MSIS and MSLIS Option

63.0 Quarter credits

About the Program

The dual master's degree program, consisting of a Master of Science in Library and Information Science (MSLIS) and a Master of Science in Information Systems (MSIS), combines the Library and Information Science program focus on selecting, organizing, managing and accessing information resources to meet user information needs with the MS in Information System program skills in creating and managing the databases, interfaces, and information systems that connect users with the information they are seeking.

Learning Objectives

Graduates of the dual program are prepared to assume leadership and management positions designing, developing, and delivering innovative technological solutions to information problems in a variety of contexts; evaluating information services and products; and managing organizations that facilitate access to recorded knowledge. Students who pursue this path greatly increase their ability to compete in today's cutting-edge information marketplace, where the importance of digitized information resources and the needs of organizations and companies to provide networked access to these resources via intranet gateways and knowledge management systems is steadily increasing. Their preparation encompasses the knowledge and abilities required to:

- Explain the foundational principles, professional ethics and values, and social context within which various information professionals work.
- Design and deliver library and information services and/or products using appropriate resources in libraries, archives and/or other information organizations.
- Analyze the structure, description, and bibliographic control of literatures.
- Develop appropriate information-seeking strategies to select information resources for given audiences.
- Retrieve information in various formats and from various technologies/platforms.
- Communicate knowledge and skills related to accessing, evaluating and using information, information resources and/or information technology.
- Manage information organizations using appropriate strategies and approaches.

- Use a human-centered approach to analyze information needs and design solutions to meet those needs.
- Lead or contribute substantially to a team in developing information technology products and services.
- Evaluate, compare, and select from alternative and emerging information technologies.
- Communicate with technical and non-technical audiences about information technology concepts and stakeholder needs.
- Contribute substantially to an information technology plan for an organization.
- Explain information technology uses, benefits, and ethical and global issues for individuals and organizations.

Required Courses

INFO 530	Foundations of Information Systems	3.0

INFO 712	Information Assurance	
INFO 731	Managing Health Informatics Projects	
INFO 755	Electronic Records Management	
INFO 782	Issues in Informatics	

Free Electives *	9.0
Total Credits	63.0

* Courses in the distribution course set that students do not take to meet the distribution requirement may be taken as free electives. All other master's level INFO courses may be taken as free electives. MS/MS(LIS) students may not take courses designated as doctoral level or courses INFO 861, INFO 863, or INFO 998.

Facilities

Drexel University Libraries

Drexel University Libraries (<http://www.library.drexel.edu>) is a learning enterprise, advancing the University's academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through four physical locations, including W. W. Hagerty Library, Hahnemann Library, Queen Lane Library and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at library.drexel.edu or in-person at W. W. Hagerty Library (<http://www.library.drexel.edu/locations>).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

iCommons

Located in Room 106 of the Rush Building, the College's iCommons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, more collaborative space for its students and a furnished common area. There is a fully equipped conference room for student use with a 42" display and videoconferencing capabilities. The iCommons provides technical support to students, faculty, and administrative staff. In addition, the staff provides audio-visual support for all presentation classrooms within the Rush Building. Use of the iCommons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the iCommons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the iCommons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as "DreamSpark" that allows students free access to a wide array of Microsoft software titles and operating systems.

The iCommons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet

via the University's network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

Rush Building

The Rush Building houses classrooms, CCI administrative offices (academic advising, graduate admissions, faculty, etc.) and the iCommons computer lab (open to all CCI students). The building holds 6 classrooms equipped for audio-visual presentation. These rooms typically contain a networked PC, HD video player, ceiling mounted projectors, and other equipment for presentations and demonstrations. Four of these classrooms are fully equipped to function as laptop computing labs for networking, programming and database-related projects.

The Information Technology Laboratory, located in the Rush Building, consists of enterprise class information technology hardware that students would encounter in industry positions. The hardware includes 20 high powered workstations that are available to students and specialized networking lab simulation software. The hardware is networked and reconfigurable utilizing multiple virtual technologies as needed for the various classes the laboratory supports. In addition, a special system has been built into the classroom to allow for conversion into a standard laptop computing lab utilizing motorized monitor lifts that allow the monitors and keyboards to recess into the desk.

University Crossings - Cyber Learning Center and Computer Lab

CCI also has classrooms, administrative office and faculty offices located in University Crossings, located at the corner of JFK Blvd. and Market Street. The building houses the Cyber Learning Center, a student computer lab, as well as several classrooms with video-conference enabled technology and media projection capabilities.

The Cyber Learning Center (CLC) provides consulting and other learning resources for students taking computer science classes. The CLC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

Both the CLC and UC Lab now serve as a central hub for small group work, student meetings, and TA assistance. The UC Lab is organized with desk space around the perimeter of the lab for individual or partner/pair-programmed student work, as well as with clusters of tables which can be connected as needed into pods to create workspaces for larger groups.

Research Laboratories

The College houses multiple research labs, led by CCI faculty, across Drexel's main campus including: the Auerbach and Berger Families Cybersecurity Laboratory, Drexel Health and Risk Communication Lab, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), Geometric and Intelligent Computing Laboratory (GICL), High Performance Computing Laboratory (SPIRAL), Privacy, Security and Automation Laboratory (PSAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College's research web page (<http://cci.drexel.edu/research.aspx>).

Alumni Garden

The Rush Building's Alumni Garden provides additional collaborative space for students, faculty, professional staff and alumni. The Garden features wireless networking, tables with built-in power outlets, accessible covered patio and balconies and a bicycle rack. The Alumni Garden (<http://cci.drexel.edu/about/our-facilities/rush-building/rush-alumni-garden-request-for-use.aspx>) may be reserved for Drexel events.

3401 Market Street

3401 Market Street houses faculty offices and doctoral student workspaces. It also is home to College research groups such and University initiatives such as the Isaac L. Auerbach Cybersecurity Institute (<http://drexel.edu/cci/research/centers-institutes/Cybersecurity>). The Institute's Auerbach and Berger Families Cybersecurity Laboratory serves as University's first training facility dedicated to identifying challenges and discovering solutions in the areas of cyber infrastructure protection and incident response.

Evaluations

The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the Information Systems degree is evaluated relative to the following Learning Objectives:

Graduates of the MS in Information Systems program are prepared to assume leadership and management positions designing, developing, and delivering innovative technological solutions to information problems in a variety of contexts. Their preparation encompasses the knowledge and abilities required to:

- Use a human-centered approach to analyze information needs and design solutions to meet those needs.
- Lead or contribute substantially to a team in developing information technology products and services.
- Evaluate, compare, and select from alternative and emerging information technologies.
- Communicate with technical and non-technical audiences about information technology concepts and stakeholder needs.
- Contribute substantially to an information technology plan for an organization.
- Explain information technology uses, benefits, and ethical and global issues for individuals and organizations.

Computing & Informatics Faculty

Denise E. Agosto, PhD (*Rutgers, The State University of New Jersey*). Professor. Information behavior, public libraries, gender, children, young adults, multicultural materials.

Yuan An, PhD (*University of Toronto, Canada*). Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

David Augenblick, MS (*University of Pennsylvania*). Associate Teaching Professor. Introductory and object-oriented programming, data structures and database systems, computer application project management, application of computer programming principles and solutions to engineering problems.

Ellen Bass, PhD (*Georgia Institute of Technology*) *Head of Department of Information Science; Joint Appointment with the College of Nursing and Health Professions*. Professor. Characterizing human judgement and decision making, modeling human judgement when supported by information automation, computational models of human-human and human-automation coordination.

Mark Boady, PhD (*Drexel University*). Assistant Teaching Professor. Computer Algebra, complex symbolic calculations, automation of computation problems

David E. Breen, PhD (*Rensselaer Polytechnic Institute*). Associate Professor. Self-organization, biomedical image/video analysis, biological simulation, geometric modeling and visualization

Matthew Burlick, PhD (*Stevens Institute of Technology*). Assistant Teaching Professor. Image processing, machine learning, real-time video tracking, object detection and classification, statistics/probability, and acoustics

Yuanfang Cai, PhD (*University of Virginia*). Associate Professor. Formal software design modeling and analysis, software economics, software evolution and modularity.

Christopher Carroll, MS (*Drexel University*). Assistant Teaching Professor. Information technology within healthcare companies, computer networking and design, IT infrastructure, server technology, information security, virtualization and cloud computing.

Bruce W. Char, PhD (*University of California-Berkeley*). Professor. Symbolic mathematical computation, algorithms and systems for computer algebra, problem-solving environments parallel and distributed computation.

Chaomei Chen, PhD (*University of Liverpool*). Professor. Information visualization, visual analytics, knowledge domain visualization, network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Michael Chu, MSE (*University of Pennsylvania*). Associate Teaching Professor. System, server, computer networking and design; IT Infrastructure; information technology management and security; Web system programming; database and mobile application development

Catherine D. Collins, MLIS (*Indiana University*). Associate Teaching Professor. Knowledge management, collection development, management of information organizations, information sources and services, international development.

M. Carl Drott, PhD (*University of Michigan*). Associate Professor. Systems analysis techniques, web usage, competitive intelligence.

Andrea Forte, PhD (*Georgia Institute of Technology*) *PhD in Information Studied Program Director*. Associate Professor. Social computing, human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, information literacy.

Susan Gasson, PhD (*University of Warwick*). Associate Professor. The co-design of business and IT-systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Colin Gordon, PhD (*University of Washington*). Assistant Professor. Software reliability, program behavior, concurrent and systems-level code, formal assurance, programming models, distributed computing, even testing

Jane Greenberg, PhD (*University of Pittsburgh*) *Alice B. Kroeger Professor; Director, Metadata Research Center*. Metadata, ontological engineering, data science, knowledge organization, information retrieval

Rachel Greenstadt, PhD (*Harvard University*). Associate Professor. Artificial intelligence, privacy, security, multi-agent systems, economics of electronic privacy and information security.

Peter Grillo, PhD (*Temple University*) *Associate Department Head for Undergraduate Affairs, Information Science*. Teaching Professor. Strategic applications of technology within organizations.

Gregory W. Hislop, PhD (*Drexel University*) *Senior Associate Dean for Academic Affairs*. Professor. Information technology for teaching and learning, online education, structure and organization of the information disciplines, computing education research, software evaluation and characterization.

Xiaohua Tony Hu, PhD (*University of Regina, Canada*). Professor. Data mining, text mining, Web searching and mining, information retrieval, bioinformatics and healthcare informatics.

Jeremy R. Johnson, PhD (*Ohio State University*). Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Weimao Ke, PhD (*University of North Carolina at Chapel Hill*). Associate Professor. Information retrieval (IR), distributed systems, intelligent filtering/recommendation, information visualization, network science,

complex systems, machine learning, text/data mining, multi-agent systems, the notion of information.

Xia Lin, PhD (*University of Maryland*) *Department Head, Information Science; Director of International Programs*. Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Geoffrey Mainland, PhD (*Harvard University*). Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD (*University of Toronto*). Professor. Software engineering; software security; code analysis; evolutionary computation.

Gabriela Marcu, PhD (*Carnegie Mellon University*). Assistant Teaching Professor. Human-computer interaction, health informatics, action research, ethnography, user experience design, designing for social change, organizational information systems, ubiquitous computing, knowledge management.

Adelaida Alban Medlock, MS (*Drexel University*). Associate Teaching Professor. Introductory programming; computer science education.

William Mongan, MS (*Drexel University*) *Associate Department Head for Undergraduate Affairs, Computer Science*. Associate Teaching Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach

Gaurav Naik, MS (*Drexel University*). Assistant Research Professor. Computer networking and cybersecurity

Ko Nishino, PhD (*University of Tokyo*) *Associate Department Head for Graduate Affairs, Computer Science*. Professor. Computer vision, computer graphics, analysis and synthesis of visual appearance.

Danuta A. Nitecki, PhD (*University of Maryland at College Park*) *Dean of Libraries*. Professor. Library metrics and use in management, library as place, and academic library service models.

Krzysztof Nowak, PhD (*Washington University*). Associate Teaching Professor. Fourier analysis, partial differential equations, image processing, wavelets, asymptotic distribution of eigenvalues, numerical methods and algorithms, computer science education.

Santiago Ontañón, PhD (*University of Barcelona*). Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning

Jung-ran Park, PhD (*University of Hawaii at Manoa*). Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Alex Poole, PhD (*University of North Carolina*). Assistant Professor. Archives and records, digital humanities, digital curation, pedagogy, diversity and inclusivity in the LIS profession

Jeffrey L. Popyack, PhD (*University of Virginia*). Professor. Operations research, stochastic optimization, computational methods of Markov decision processes; artificial intelligence, computer science education.

Lori Richards, PhD (*University of North Carolina*). Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Michelle L. Rogers, PhD (*University of Wisconsin-Madison*). Associate Professor. Human-computer interaction, healthcare informatics, human factors engineering, socio-technical systems, health services research, patient safety.

Jeffrey Salvage, MS (*Drexel University*). Teaching Professor. Object-oriented programming, multi-agent systems, software engineering, database theory, introductory programming, data structures.

Dario Salvucci, PhD (*Carnegie Mellon University*) *Department Head, Computer Science*. Professor. Human computer interaction, cognitive science, machine learning, applications for driving.

Kurt Schmidt, MS (*Drexel University*). Associate Teaching Professor. Data structures, math foundations for computer science, programming tools, programming languages.

Ali Shokoufandeh, PhD (*Rutgers University*) *Senior Associate Dean of Research*. Professor. Theory of algorithms, graph theory, combinatorial optimization, computer vision.

Erin Solovey, PhD (*Tufts University*). Assistant Professor. Human-computer interaction, brain-computer interfaces, tangible interaction, machine learning, human interaction with complex and autonomous systems.

Il-Yeol Song, PhD (*Louisiana State University*) *PhD in Information Studies Program Director*. Professor. Conceptual modeling, ontology and patterns, data warehouse and OLAP, object-oriented analysis and design with UML, medical and bioinformatics data modeling & integration.

Julia Stoyanovich, PhD (*Columbia University*). Assistant Professor. Data and knowledge management, big data, biological data management, search and ranking.

Brian Stuart, PhD (*Purdue University*). Associate Teaching Professor. Machine learning, networking, robotics, image processing, simulation, interpreters, data storage, operating systems, computer science, data communications, distributed/operating systems, accelerated computer programming, computer graphics.

Filippos Vokolos, PhD (*Polytechnic University*). Assistant Teaching Professor. System architecture, principles of software design and construction, verification and validation methods for the development of large software systems, foundations of software engineering, software verification & validation, software design, programming languages, dependable software systems.

Rosina Weber, PhD (*Federal University of Santa Catarina*). Associate Professor.

Jake Williams, PhD (*University of Vermont*). Assistant Professor. Data science, scientific programming, computational social science, computational linguistics and natural language processing, mathematics, machine learning, algorithms and scalability

Erija Yan, PhD (*Indiana University*). Assistant Professor. Network Science, information analysis and retrieval, scholarly communication methods and applications.

Christopher C. Yang, PhD (*University of Arizona, Tucson*). Associate Professor. Web search and mining, security informatics, knowledge management, social media analytics, cross-lingual information retrieval, text summarization, multimedia retrieval, information visualization, information sharing and privacy, artificial intelligence, digital library, and electronic commerce.

Emeritus Faculty

Michael E. Atwood, PhD (*University of Colorado*) *Associate Dean for Research and for Undergraduate Education*. Professor Emeritus. Human-computer interaction, computer-supported cooperative work, organizational memory.

Thomas A. Childers, PhD (*Rutgers University*). Professor Emeritus. Measurement, evaluation, and planning of information and library services, the effectiveness of information organizations.

Prudence W. Dalrymple, PhD (*University of Wisconsin-Madison*) *Director, Institute for Healthcare Informatics*. Professor Emeritus. User-centered information behaviors, particularly in the health arena, health informatics, evidence based practice, education for the information professions and evaluation, and translation of research into practice.

David E. Fenske, PhD (*University of Wisconsin-Madison*). Dean Emeritus and Professor. Digital libraries, informatics, knowledge management and information technologies.

John B. Hall, PhD (*Florida State University*). Professor Emeritus. Academic library service, library administration, organization of materials.

Linda S. Marion, PhD (*Drexel University*). Professor Emeritus. Formal and informal communication, bibliometric studies of scholarly communication, diffusion of information, information use in the social sciences, academic and public libraries, information science education.

Katherine W. McCain, PhD (*Drexel University*). Professor Emeritus. Scholarly communication, information production and use in the research process, development and structure of scientific specialties, diffusion of innovation, bibliometrics, evaluation of information retrieval systems.

Carol Hansen Montgomery, PhD (*Drexel University*) *Dean of Libraries Emeritus*. Research Professor. Selection and use of electronic collections, evaluation of library and information systems, digital libraries, economics of libraries and digital collections.

Delia Neuman, PhD (*The Ohio State University*). Professor Emeritus. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Gerry Stahl, PhD (*University of Colorado, Northwestern University*). Professor Emeritus. Human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, theory of collaboration.

Howard D. White, PhD (*University of California at Berkeley*). Professor Emeritus. Literature information systems, bibliometrics, research methods, collection development, online searching.

Susan Wiedenbeck, PhD (*University of Pittsburgh*). Professor Emeritus. Human-computer interaction, end-user programming/end-user development, empirical studies of programmers, interface design and evaluation.

Valerie Ann Yonker, PhD (*Drexel University*). Professor Emeritus. Human service information systems, systems analysis and design, measurement in software evaluation, knowledge engineering.

Library and Information Science

Major: Library and Information Science

Degree Awarded: Master of Science in Library and Information Science (MSLIS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 25.0101

Standard Occupational Classification (SOC) code: 25-4021

About the Program

The College of Computing & Informatics' Master of Science in Library and Information Science (MSLIS) provides students with a foundation in a wide variety of information professions. The program addresses the contexts in which librarians and other information professionals work, the systems and services they provide, and the uses of new and emerging technologies in the field.

The library and information science program assures students of a solid introduction to the field, a logical progression of coursework, and a wide variety of electives. All students are required to complete the six core courses, including a Capstone Project, totaling 27.0 credits. The Capstone Project provides a closer connection to information work to ensure that students have practical work experience by the time they graduate and are prepared to enter the workforce at a professional level. Completion of the MSLIS program requires a total of 45.0 credits. Students may take any available INFO subject electives to complete their required number of credits in the program.

Accreditation

The College of Computing & Informatics is a member of the Association for Library and Information Science Education. In 2010, the MS program in Library and Information Science was fully reaccredited with "continuous accreditation" status until 2017. The program presentation for reaccreditation is scheduled to occur in October 2017.

Professional Affiliation for MS Students

Student groups include student chapters of the American Library Association, the Association for Information Science & Technology, the Progressive Librarians Guild, the Society of American Archivists, and the Special Libraries Association.

Additional Information

For more information about this program, visit the College of Computing & Informatics' MS in Library and Information Science (<http://drexel.edu/ccf/programs/graduate-programs/ms-in-library-and-information-science>) web page.

Degree Requirements

- 15 courses total (45.0 credits) - 6 required courses plus electives (see Specializations below)
- Students culminate their studies with a Capstone Project, allowing them to gain practical work experience in the field before graduation

- Program can be completed through a broad range of electives in the LIS program and/or drawn from the strengths of other CCI information science course offerings
- Average time to complete an MSLIS: 1.5 years of full-time study or 2.5 years of part-time study

Core Courses

INFO 505	Information Professions and Professionals	3.0
INFO 506	Users, Services, & Resources	3.0
INFO 507	Leading and Managing Information Organizations	3.0
INFO 590	Organization of Data and Information	3.0
INFO 591	Data and Digital Stewardship	3.0
INFO 890	Capstone Project	3.0
Electives		27.0
Total Credits		45.0

* Select from available INFO courses

Specializations (INFO Courses)

Students may customize their degree toward their areas of professional practice by completing specializations in the following domain areas:

Digital Technology Services

Introduces collaborative technologies that enable the design and implementation of digital services. Focuses on data analytics, content description technologies (such as XML), systems technologies, and user interface technologies.

- *Professional Interests:* Data Analytics/Service Specialist; Digital Services Specialist; Digital Stewardship/Data Specialist; User Experience Specialist
- Sample courses:
 - INFO 552: Introduction to Web Design
 - INFO 605: Introduction to Data Management
 - INFO 657: Digital Library Technology
 - INFO 659: Introduction to Data Analytics
 - INFO 608: Human Computer Interaction
 - INFO 633: Information Visualization
 - INFO 658: Information Architecture

Information and Data Services

Focuses on the developments of information and data service functions and products, such as intellectual access to physical and digital information resources, searching and resource organizing, knowledge representations and discovery, metadata schemes and tools, intellectual property rights and electronic publishing.

- *Professional Interests:* Archival Specialist; Knowledge Organization/Metadata Specialist; Scholarly Communications Specialist; Subject Specialist
- Sample courses:
 - INFO 560: Introduction to Archives I
 - INFO 622: Content Representation
 - INFO 660: Cataloging and Classification
 - INFO 662: Metadata and Resource Description
 - INFO 750: Archival Access Systems
 - INFO 753: Introduction to Digital Curation
 - INFO 755: Electronic Records Management

User and Community Services

Analyzes the resources necessary to support diverse users across many types of information organizations in public and/or private settings. Surveys problems solved by project management, design, and customer service to support a variety of community information resource needs.

- *Professional Interests:* Academic Library Specialist; Community Engagement, Education, and Outreach Specialist; Information Literacy Specialist; Health Informatics Specialist; Public Library Specialist; User Services Specialist; Youth Services Specialist
- Sample courses:
 - INFO 552: Introduction to Web Design
 - INFO 649: Library Programming
 - INFO 650: Public Library Service
 - INFO 651: Academic Library Service
 - INFO 665: Collection Development
 - INFO 682: Storytelling
 - INFO 683: Resources for Children

Dual Degrees

Graduate students already enrolled in a master's degree program at Drexel have the opportunity, through the dual master's program to work simultaneously on two master's degrees and to receive both upon graduation. To be eligible, graduate students must be currently working on their first degree when requesting admission to the second. They must obtain approval from the graduate advisors of both programs and work out a plan of study encompassing coursework and/or research (thesis) credits for both degrees. Please contact your advisor (<http://drexel.edu/ccr/resources/current-students/graduate-professional-development/advising>) for more information on program requirements as some CCI master's degree combinations may require additional pre-requisites.

The dual master's student must complete the Change of Curriculum and Status form (http://drexel.edu/%7E/media/Files/graduatecollege/forms/Change_of_Curriculum_and_Status.ashx?la=en) and obtain approvals from both graduate advisors. Final approval is granted by the Graduate College (<http://drexel.edu/graduatecollege>). The student is then registered in both majors simultaneously. Upon graduation, the student must file two Application for Degree (<http://drexel.edu/drexelcentral/graduation/information/applying-for-degree>) forms.

Dual MSIS and MSLIS Option

63.0 quarter credits

About the Program

The dual master's degree program, consisting of a Master of Science in Library and Information Science MSLIS and a Master of Science in Information Systems (MSIS), combines the Library and Information Science program focus on selecting, organizing, managing and accessing information resources to meet user information needs with the MS in Information System program skills in creating and managing the databases, interfaces, and information systems that connect users with the information they are seeking.

Learning Objectives

Graduates of the dual program are prepared to assume leadership and management positions designing, developing, and delivering innovative technological solutions to information problems in a variety of contexts; evaluating information services and products; and managing organizations that facilitate access to recorded knowledge. Students

who pursue this path greatly increase their ability to compete in today's cutting-edge information marketplace, where the importance of digitized information resources and the needs of organizations and companies to provide networked access to these resources via intranet gateways and knowledge management systems is steadily increasing. Their preparation encompasses the knowledge and abilities required to:

- Explain the foundational principles, professional ethics and values, and social context within which various information professionals work.
- Design and deliver library and information services and/or products using appropriate resources in libraries, archives and/or other information organizations.
- Analyze the structure, description, and bibliographic control of literatures.
- Develop appropriate information-seeking strategies to select information resources for given audiences.
- Retrieve information in various formats and from various technologies/platforms.
- Communicate knowledge and skills related to accessing, evaluating and using information, information resources and/or information technology.
- Manage information organizations using appropriate strategies and approaches.
- Use a human-centered approach to analyze information needs and design solutions to meet those needs.
- Lead or contribute substantially to a team in developing information technology products and services.
- Evaluate, compare, and select from alternative and emerging information technologies.
- Communicate with technical and non-technical audiences about information technology concepts and stakeholder needs.
- Contribute substantially to an information technology plan for an organization.
- Explain information technology uses, benefits, and ethical and global issues for individuals and organizations.

Required Courses

INFO 530	Foundations of Information Systems	3.0
----------	------------------------------------	-----

MS(LIS) Required Courses

INFO 515	Introduction to Research in Information Organizations	3.0
INFO 520	Social Context of Information Professions	3.0
INFO 522	Information Access & Resources	3.0
INFO 521	Information Users and Services	3.0
INFO 640	Managing Information Organizations	3.0

MSIS Required Courses

INFO 532	Software Development	3.0
INFO 600	Web Systems & Architecture	3.0
INFO 605	Introduction to Database Management	3.0
INFO 608	Human-Computer Interaction	3.0
INFO 620	Information Systems Analysis and Design	3.0
INFO 630	Evaluation of Information Systems	3.0
INFO 638	Software Project Management	3.0
INFO 646	Information Systems Management	3.0

Distribution Requirements

Completion of at least four of the following courses is required for the degree. 12.0
Additional courses from this list may be taken as electives.

INFO 540	Perspectives on Information Systems
INFO 606	Advanced Database Management
INFO 607	Applied Database Technologies

INFO 610	Analysis of Interactive Systems	
INFO 611	Design of Interactive Systems	
INFO 612	Knowledge Base Systems	
INFO 613	XML and Databases	
INFO 616	Social and Collaborative Computing	
INFO 622	Content Representation	
INFO 624	Information Retrieval Systems	
INFO 625	Cognition and Information Retrieval	
INFO 627	Requirements Engineering and Management	
INFO 633	Information Visualization	
INFO 634	Data Mining	
INFO 636	Software Engineering Process I	
INFO 637	Software Engineering Process II	
INFO 648	Healthcare Informatics	
INFO 653	Digital Libraries	
INFO 655	Intro to Web Programming	
INFO 657	Digital Library Technologies	
INFO 658	Information Architecture	
INFO 710	Information Forensics	
INFO 712	Information Assurance	
INFO 731	Managing Health Informatics Projects	
INFO 755	Electronic Records Management	
INFO 782	Issues in Informatics	
Free Electives*		9.0
Total Credits		63.0

* Courses in the distribution course set that students do not take to meet the distribution requirement may be taken as free electives. All other master's level INFO courses may be taken as free electives. MS/MS(LIS) students may not take courses designated as doctoral level or courses INFO 861, INFO 863, or INFO 998.

Facilities

Drexel University Libraries

Drexel University Libraries (<http://www.library.drexel.edu>) is a learning enterprise, advancing the University's academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through four physical locations, including W. W. Hagerty Library, Hahnemann Library, Queen Lane Library and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at [library.drexel.edu](http://www.library.drexel.edu) or in-person at W. W. Hagerty Library (<http://www.library.drexel.edu/locations>).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

iCommons

Located in Room 106 of the Rush Building, the College's iCommons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, more collaborative space for its students and a furnished common area. There is a fully equipped conference room for student use with a 42" display and videoconferencing capabilities. The iCommons provides technical support to students, faculty, and administrative staff. In addition, the staff provides audio-visual support for all presentation classrooms within the Rush Building. Use of the iCommons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the iCommons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the iCommons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as "DreamSpark" that allows students free access to a wide array of Microsoft software titles and operating systems.

The iCommons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University's network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

Rush Building

The Rush Building houses classrooms, CCI administrative offices (academic advising, graduate admissions, faculty, etc.) and the iCommons computer lab (open to all CCI students). The building holds 6 classrooms equipped for audio-visual presentation. These rooms typically contain a networked PC, HD video player, ceiling mounted projectors, and other equipment for presentations and demonstrations. Four of these classrooms are fully equipped to function as laptop computing labs for networking, programming and database-related projects.

The Information Technology Laboratory, located in the Rush Building, consists of enterprise class information technology hardware that students would encounter in industry positions. The hardware includes 20 high powered workstations that are available to students and specialized networking lab simulation software. The hardware is networked and reconfigurable utilizing multiple virtual technologies as needed for the various classes the laboratory supports. In addition, a special system has been built into to the classroom to allow for conversion into a standard laptop computing lab utilizing motorized monitor lifts that allow the monitors and keyboards to recess into the desk.

University Crossings - Cyber Learning Center and Computer Lab

CCI also has classrooms, administrative office and faculty offices located in University Crossings, located at the corner of JFK Blvd. and Market Street. The building houses the Cyber Learning Center, a student computer lab, as well as several classrooms with video-conference enabled technology and media projection capabilities.

The Cyber Learning Center (CLC) provides consulting and other learning resources for students taking computer science classes. The CLC is

staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

Both the CLC and UC Lab now serve as a central hub for small group work, student meetings, and TA assistance. The UC Lab is organized with desk space around the perimeter of the lab for individual or partner/pair-programmed student work, as well as with clusters of tables which can be connected as needed into pods to create workspaces for larger groups.

Research Laboratories

The College houses multiple research labs, led by CCI faculty, across Drexel's main campus including: the Auerbach and Berger Families Cybersecurity Laboratory, Drexel Health and Risk Communication Lab, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), Geometric and Intelligent Computing Laboratory (GICL), High Performance Computing Laboratory (SPIRAL), Privacy, Security and Automation Laboratory (PSAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College's research web page (<http://cci.drexel.edu/research.aspx>).

Alumni Garden

The Rush Building's Alumni Garden provides additional collaborative space for students, faculty, professional staff and alumni. The Garden features wireless networking, tables with built-in power outlets, accessible covered patio and balconies and a bicycle rack. The Alumni Garden (<http://cci.drexel.edu/about/our-facilities/rush-building/rush-alumni-garden-request-for-use.aspx>) may be reserved for Drexel events.

3401 Market Street

3401 Market Street houses faculty offices and doctoral student workspaces. It also is home to College research groups such and University initiatives such as the Isaac L. Auerbach Cybersecurity Institute (<http://drexel.edu/cci/research/centers-institutes/Cybersecurity>). The Institute's Auerbach and Berger Families Cybersecurity Laboratory serves as University's first training facility dedicated to identifying challenges and discovering solutions in the areas of cyber infrastructure protection and incident response.

Evaluations

The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the Library and Information Science degree is evaluated relative to the following Learning Objectives:

Graduates of the MSLIS program are prepared to assume leadership positions in designing, executing, and evaluating information services and products and in managing organizations that facilitate access to recorded knowledge. Their preparation enables them to gain the knowledge and abilities required to:

- Explain the foundational principles, professional ethics and values, and social and technological contexts within which various information professionals work.
- Identify and analyze the information needs of various communities (e.g., academic institutions, local neighborhoods, workplaces,

schools) and design and implement library/information programs and services to meet those needs.

- Analyze and apply information policies and information-related laws (including the standards and guidelines of pertinent professional organizations) that advance the creative and ethical applications of information technologies and the delivery of information resources throughout society.
- Foster the core values of the profession (e.g., access, equity, intellectual freedom, privacy, social justice) in all programs and services offered in these communities.
- Encourage the development of information literacy in support of all areas of individuals' and communities' needs (e.g., in formal and informal education, career development, healthcare and financial planning, research innovation, political and social engagement, etc.).
- Lead and manage information agencies, projects, and people through creative and effective approaches to planning, budgeting, policy making, fundraising, communication, and advocacy.
- Use research and data in sophisticated ways to demonstrate the value of the library and to help individuals and communities address community challenges (e.g., poverty and hunger, population shifts, economic development, preservation of cultural heritage, etc.).
- Help individuals and communities to understand, appraise, organize, manage, and preserve digital assets available through a variety of formal and informal sources and to create and manage their own digital identities and materials effectively.

Library & Information Science Faculty

Denise E. Agosto, PhD (*Rutgers, The State University of New Jersey*). Professor. Information behavior, public libraries, gender, children, young adults, multicultural materials.

Chaomei Chen, PhD (*University of Liverpool*). Professor. Information visualization, visual analytics, knowledge domain visualization, network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Catherine D. Collins, MLIS (*Indiana University*). Associate Teaching Professor. Knowledge management, collection development, management of information organizations, information sources and services, international development.

Susan Gasson, PhD (*University of Warwick*). Associate Professor. The co-design of business and IT-systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Jane Greenberg, PhD (*University of Pittsburgh*) *Alice B. Kroeger Professor; Director, Metadata Research Center*. Metadata, ontological engineering, data science, knowledge organization, information retrieval

Xia Lin, PhD (*University of Maryland*) *Department Head, Information Science; Director of International Programs*. Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Gabriela Marcu, PhD (*Carnegie Mellon University*). Assistant Teaching Professor. Human-computer interaction, health informatics, action research, ethnography, user experience design, designing for social change, organizational information systems, ubiquitous computing, knowledge management.

Jung-ran Park, PhD (*University of Hawaii at Manoa*). Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Lori Richards, PhD (*University of North Carolina*). Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Erija Yan, PhD (*Indiana University*). Assistant Professor. Network Science, information analysis and retrieval, scholarly communication methods and applications.

Emeritus Faculty

Thomas A. Childers, PhD (*Rutgers University*). Professor Emeritus. Measurement, evaluation, and planning of information and library services, the effectiveness of information organizations.

Prudence W. Dalrymple, PhD (*University of Wisconsin-Madison*) *Director, Institute for Healthcare Informatics*. Professor Emeritus. User-centered information behaviors, particularly in the health arena, health informatics, evidence based practice, education for the information professions and evaluation, and translation of research into practice.

David E. Fenske, PhD (*University of Wisconsin-Madison*). Dean Emeritus and Professor. Digital libraries, informatics, knowledge management and information technologies.

John B. Hall, PhD (*Florida State University*). Professor Emeritus. Academic library service, library administration, organization of materials.

Linda S. Marion, PhD (*Drexel University*). Professor Emeritus. Formal and informal communication, bibliometric studies of scholarly communication, diffusion of information, information use in the social sciences, academic and public libraries, information science education.

Katherine W. McCain, PhD (*Drexel University*). Professor Emeritus. Scholarly communication, information production and use in the research process, development and structure of scientific specialties, diffusion of innovation, bibliometrics, evaluation of information retrieval systems.

Delia Neuman, PhD (*The Ohio State University*). Professor Emeritus. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Howard D. White, PhD (*University of California at Berkeley*). Professor Emeritus. Literature information systems, bibliometrics, research methods, collection development, online searching.

Valerie Ann Yonker, PhD (*Drexel University*). Professor Emeritus. Human service information systems, systems analysis and design, measurement in software evaluation, knowledge engineering.

Standard Occupational Classification (SOC) code: 15-1132; 15-1133

About the Program

The College of Computing & Informatics' Master of Science in Software Engineering (MSSE) program was created in response to the growing importance of software in modern society and the rapid rise in demand for professional software engineers.

The MS in Software Engineering program draws on the broad strengths of the College of Computing & Informatics to provide a curriculum that encompasses behavioral, managerial, and technical aspects of software engineering. The program is appropriate for students interested in technical and managerial software work across a wide range of application domains.

All students in the program take a core curriculum that provides a foundation spanning key software engineering topics and providing an integrative software studio experience. Students also take electives allowing them to specialize and gain in-depth knowledge according to their individual interests and career goals.

Additional Information

For more information about this program, please visit the College of Computing & Informatics' MS in Software Engineering (<http://drexel.edu/>)

cci/academics/programs/graduate-programs/ms-in-software-engineering) web page.

Degree Requirements

Software Engineering Core Courses

Core Courses

SE 575	Software Design	3.0
SE 576	Software Reliability and Testing	3.0
SE 577	Software Architecture	3.0
SE 578	Security Engineering	3.0
SE 627	Requirements Engineering and Management	3.0
SE 630	Software Engineering Economics	3.0
SE 636	Software Engineering Process	3.0

Breadth Courses

12.0

Choose 12 credits from the following:

CS 500	Fundamentals of Databases
CS 530	Developing User Interfaces
CS 645	Network Security
CS 647	Distributed Systems Software
INFO 608	Human-Computer Interaction
INFO 633	Information Visualization
SE 610	Open Source Software Engineering
SE 572	Web Services and Mobile Architectures
SE 638	Software Project Management

Depth and Software Studio Courses

12.0

At least 12 total credits, including at least 6 and up to 9 Software Studio credits, are required

Choose 1 or 2 of the following to fulfill the depth requirement:

Any graduate CS course not required for the core or counted as a breadth course	
ECEC 500	Fundamentals Of Computer Hardware
ECEC 622	Parallel Programming
ECEC 641	Web Security I
ECEC 632	Performance Analysis of Computer Networks
ECEC 642	Web Security II
ECEC 643	Web Security III
INFO 517	Principles of Cybersecurity
INFO 555	Introduction to Geographic Information Systems
INFO 605	Database Management Systems
INFO 606	Advanced Database Management
INFO 607	Applied Database Technologies
INFO 610	Analysis of Interactive Systems
INFO 611	Design of Interactive Systems
INFO 634	Data Mining
INFO 648	Healthcare Informatics
INFO 679	Information Ethics
INFO 710	Information Forensics
INFO 712	Information Assurance
INFO 725	Information Policy
Complete 2 or 3 software studio courses:	
SE 691	Software Studio

Total Credits 45.0

Sample Plan of Study

Term	Credits
Term 1	
SE 575	Software Design 3.0
SE 627	Requirements Engineering and Management 3.0
	Term Credits 6.0
Term 2	
SE 576	Software Reliability and Testing 3.0

SE 630	Software Engineering Economics	3.0
	Term Credits	6.0
Term 3		
SE 577	Software Architecture	3.0
SE 636	Software Engineering Process	3.0
	Term Credits	6.0
Term 4		
SE 578	Security Engineering	3.0
	Breadth Course	3.0
	Term Credits	6.0
Term 5		
SE 691	Software Studio	3.0
	Breadth Course	3.0
	Term Credits	6.0
Term 6		
SE 691	Software Studio	3.0
	Breadth Course	3.0
	Term Credits	6.0
Term 7		
SE 691	Software Studio	3.0
	Breadth Course	3.0
	Term Credits	6.0
Term 8		
	Depth Course	3.0
	Term Credits	3.0

Total Credit: 45.0

Dual Degree Opportunities

Graduate students already enrolled in a master's degree program at Drexel have the opportunity, through the dual master's program, to work simultaneously on two CCI master's degrees and to receive both upon graduation. To be eligible, graduate students must be currently working on their first CCI master's degree when requesting admission to the second CCI master's degree. They must obtain approval from the graduate advisors of both programs and work out a plan of study encompassing coursework and/or research (thesis) credits for both degrees. Please contact your advisor (<http://drexel.edu/cci/resources/current-students/graduate-professional-development/advising>) for more information on program requirements as some CCI master's degree combinations may require additional pre-requisites.

The dual master's student must complete the Change of Curriculum and Status form (http://drexel.edu/%7E/media/Files/graduatecollege/forms/Change_of_Curriculum_and_Status.ashx?la=en) and obtain approvals from both graduate advisors. Final approval is granted by the Graduate College (<http://drexel.edu/graduatecollege>). The student is then registered in both majors simultaneously. Upon graduation, the student must file two Application for Degree (<http://drexel.edu/drexelcentral/graduation/information/applying-for-degree>) forms.

Facilities

Drexel University Libraries

Drexel University Libraries (<http://www.library.drexel.edu>) is a learning enterprise, advancing the University's academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through four physical locations, including W. W. Hagerty Library, Hahnemann Library, Queen Lane Library and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits

per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at library.drexel.edu or in-person at W. W. Hagerty Library (<http://www.library.drexel.edu/locations>).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

iCommons

Located in Room 106 of the Rush Building, the College's iCommons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, more collaborative space for its students and a furnished common area. There is a fully equipped conference room for student use with a 42" display and videoconferencing capabilities. The iCommons provides technical support to students, faculty, and administrative staff. In addition, the staff provides audio-visual support for all presentation classrooms within the Rush Building. Use of the iCommons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the iCommons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the iCommons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as "DreamSpark" that allows students free access to a wide array of Microsoft software titles and operating systems.

The iCommons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University's network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

Rush Building

The Rush Building houses classrooms, CCI administrative offices (academic advising, graduate admissions, faculty, etc.) and the iCommons computer lab (open to all CCI students). The building holds 6 classrooms equipped for audio-visual presentation. These rooms typically contain a networked PC, HD video player, ceiling mounted projectors, and other equipment for presentations and demonstrations. Four of these classrooms are fully equipped to function as laptop computing labs for networking, programming and database-related projects.

The Information Technology Laboratory, located in the Rush Building, consists of enterprise class information technology hardware that students would encounter in industry positions. The hardware includes 20 high powered workstations that are available to students and specialized networking lab simulation software. The hardware is networked and reconfigurable utilizing multiple virtual technologies as needed for the

various classes the laboratory supports. In addition, a special system has been built into to the classroom to allow for conversion into a standard laptop computing lab utilizing motorized monitor lifts that allow the monitors and keyboards to recess into the desk.

University Crossings - Cyber Learning Center and Computer Lab

CCI also has classrooms, administrative office and faculty offices located in University Crossings, located at the corner of JFK Blvd. and Market Street. The building houses the Cyber Learning Center, a student computer lab, as well as several classrooms with video-conference enabled technology and media projection capabilities.

The Cyber Learning Center (CLC) provides consulting and other learning resources for students taking computer science classes. The CLC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

Both the CLC and UC Lab now serve as a central hub for small group work, student meetings, and TA assistance. The UC Lab is organized with desk space around the perimeter of the lab for individual or partner/pair-programmed student work, as well as with clusters of tables which can be connected as needed into pods to create workspaces for larger groups.

Research Laboratories

The College houses multiple research labs, led by CCI faculty, across Drexel's main campus including: the Auerbach and Berger Families Cybersecurity Laboratory, Drexel Health and Risk Communication Lab, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), Geometric and Intelligent Computing Laboratory (GICL), High Performance Computing Laboratory (SPIRAL), Privacy, Security and Automation Laboratory (PSAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College's research web page (<http://cci.drexel.edu/research.aspx>).

Alumni Garden

The Rush Building's Alumni Garden provides additional collaborative space for students, faculty, professional staff and alumni. The Garden features wireless networking, tables with built-in power outlets, accessible covered patio and balconies and a bicycle rack. The Alumni Garden (<http://cci.drexel.edu/about/our-facilities/rush-building/rush-alumni-garden-request-for-use.aspx>) may be reserved for Drexel events.

3401 Market Street

3401 Market Street houses faculty offices and doctoral student workspaces. It also is home to College research groups such and University initiatives such as the Isaac L. Auerbach Cybersecurity Institute (<http://drexel.edu/cci/research/centers-institutes/Cybersecurity>). The Institute's Auerbach and Berger Families Cybersecurity Laboratory serves as University's first training facility dedicated to identifying challenges and discovering solutions in the areas of cyber infrastructure protection and incident response.

Computing & Informatics Faculty

Denise E. Agosto, PhD (*Rutgers, The State University of New Jersey*). Professor. Information behavior, public libraries, gender, children, young adults, multicultural materials.

Yuan An, PhD (*University of Toronto, Canada*). Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

David Augenblick, MS (*University of Pennsylvania*). Associate Teaching Professor. Introductory and object-oriented programming, data structures and database systems, computer application project management, application of computer programming principles and solutions to engineering problems.

Ellen Bass, PhD (*Georgia Institute of Technology*) *Head of Department of Information Science; Joint Appointment with the College of Nursing and Health Professions*. Professor. Characterizing human judgement and decision making, modeling human judgement when supported by information automation, computational models of human-human and human-automation coordination.

Mark Boady, PhD (*Drexel University*). Assistant Teaching Professor. Computer Algebra, complex symbolic calculations, automation of computation problems

David E. Breen, PhD (*Rensselaer Polytechnic Institute*). Associate Professor. Self-organization, biomedical image/video analysis, biological simulation, geometric modeling and visualization

Matthew Burlick, PhD (*Stevens Institute of Technology*). Assistant Teaching Professor. Image processing, machine learning, real-time video tracking, object detection and classification, statistics/probability, and acoustics

Yuanfang Cai, PhD (*University of Virginia*). Associate Professor. Formal software design modeling and analysis, software economics, software evolution and modularity.

Christopher Carroll, MS (*Drexel University*). Assistant Teaching Professor. Information technology within healthcare companies, computer networking and design, IT infrastructure, server technology, information security, virtualization and cloud computing.

Bruce W. Char, PhD (*University of California-Berkeley*). Professor. Symbolic mathematical computation, algorithms and systems for computer algebra, problem-solving environments parallel and distributed computation.

Chaomei Chen, PhD (*University of Liverpool*). Professor. Information visualization, visual analytics, knowledge domain visualization, network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Michael Chu, MSE (*University of Pennsylvania*). Associate Teaching Professor. System, server, computer networking and design; IT Infrastructure; information technology management and security; Web system programming; database and mobile application development

Catherine D. Collins, MLIS (*Indiana University*). Associate Teaching Professor. Knowledge management, collection development,

management of information organizations, information sources and services, international development.

M. Carl Drott, PhD (*University of Michigan*). Associate Professor. Systems analysis techniques, web usage, competitive intelligence.

Andrea Forte, PhD (*Georgia Institute of Technology*) *PhD in Information Studied Program Director*. Associate Professor. Social computing, human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, information literacy.

Susan Gasson, PhD (*University of Warwick*). Associate Professor. The co-design of business and IT-systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Colin Gordon, PhD (*University of Washington*). Assistant Professor. Software reliability, program behavior, concurrent and systems-level code, formal assurance, programming models, distributed computing, even testing

Jane Greenberg, PhD (*University of Pittsburgh*) *Alice B. Kroeger Professor; Director, Metadata Research Center*. Metadata, ontological engineering, data science, knowledge organization, information retrieval

Rachel Greenstadt, PhD (*Harvard University*). Associate Professor. Artificial intelligence, privacy, security, multi-agent systems, economics of electronic privacy and information security.

Peter Grillo, PhD (*Temple University*) *Associate Department Head for Undergraduate Affairs, Information Science*. Teaching Professor. Strategic applications of technology within organizations.

Gregory W. Hislop, PhD (*Drexel University*) *Senior Associate Dean for Academic Affairs*. Professor. Information technology for teaching and learning, online education, structure and organization of the information disciplines, computing education research, software evaluation and characterization.

Xiaohua Tony Hu, PhD (*University of Regina, Canada*). Professor. Data mining, text mining, Web searching and mining, information retrieval, bioinformatics and healthcare informatics.

Jeremy R. Johnson, PhD (*Ohio State University*). Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Weimao Ke, PhD (*University of North Carolina at Chapel Hill*). Associate Professor. Information retrieval (IR), distributed systems, intelligent filtering/recommendation, information visualization, network science, complex systems, machine learning, text/data mining, multi-agent systems, the notion of information.

Xia Lin, PhD (*University of Maryland*) *Department Head, Information Science; Director of International Programs*. Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Geoffrey Mainland, PhD (*Harvard University*). Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD (*University of Toronto*). Professor. Software engineering; software security; code analysis; evolutionary computation.

Gabriela Marcu, PhD (*Carnegie Mellon University*). Assistant Teaching Professor. Human-computer interaction, health informatics, action research, ethnography, user experience design, designing for social change, organizational information systems, ubiquitous computing, knowledge management.

Adelaida Alban Medlock, MS (*Drexel University*). Associate Teaching Professor. Introductory programming; computer science education.

William Mongan, MS (*Drexel University*) *Associate Department Head for Undergraduate Affairs, Computer Science*. Associate Teaching Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach

Gaurav Naik, MS (*Drexel University*). Assistant Research Professor. Computer networking and cybersecurity

Ko Nishino, PhD (*University of Tokyo*) *Associate Department Head for Graduate Affairs, Computer Science*. Professor. Computer vision, computer graphics, analysis and synthesis of visual appearance.

Danuta A. Nitecki, PhD (*University of Maryland at College Park*) *Dean of Libraries*. Professor. Library metrics and use in management, library as place, and academic library service models.

Krzysztof Nowak, PhD (*Washington University*). Associate Teaching Professor. Fourier analysis, partial differential equations, image processing, wavelets, asymptotic distribution of eigenvalues, numerical methods and algorithms, computer science education.

Santiago Ontañón, PhD (*University of Barcelona*). Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning

Jung-ran Park, PhD (*University of Hawaii at Manoa*). Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Alex Poole, PhD (*University of North Carolina*). Assistant Professor. Archives and records, digital humanities, digital curation, pedagogy, diversity and inclusivity in the LIS profession

Jeffrey L. Popyack, PhD (*University of Virginia*). Professor. Operations research, stochastic optimization, computational methods of Markov decision processes; artificial intelligence, computer science education.

Lori Richards, PhD (*University of North Carolina*). Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Michelle L. Rogers, PhD (*University of Wisconsin-Madison*). Associate Professor. Human-computer interaction, healthcare informatics, human factors engineering, socio-technical systems, health services research, patient safety.

Jeffrey Salvage, MS (*Drexel University*). Teaching Professor. Object-oriented programming, multi-agent systems, software engineering, database theory, introductory programming, data structures.

Dario Salvucci, PhD (*Carnegie Mellon University*) *Department Head, Computer Science*. Professor. Human computer interaction, cognitive science, machine learning, applications for driving.

Kurt Schmidt, MS (*Drexel University*). Associate Teaching Professor. Data structures, math foundations for computer science, programming tools, programming languages.

Ali Shokoufandeh, PhD (*Rutgers University*) *Senior Associate Dean of Research*. Professor. Theory of algorithms, graph theory, combinatorial optimization, computer vision.

Erin Solovey, PhD (*Tufts University*). Assistant Professor. Human-computer interaction, brain-computer interfaces, tangible interaction, machine learning, human interaction with complex and autonomous systems.

Il-Yeol Song, PhD (*Louisiana State University*) *PhD in Information Studies Program Director*. Professor. Conceptual modeling, ontology and patterns, data warehouse and OLAP, object-oriented analysis and design with UML, medical and bioinformatics data modeling & integration,.

Julia Stoyanovich, PhD (*Columbia University*). Assistant Professor. Data and knowledge management, big data, biological data management, search and ranking.

Brian Stuart, PhD (*Purdue University*). Associate Teaching Professor. Machine learning, networking, robotics, image processing, simulation, interpreters, data storage, operating systems, computer science, data communications, distributed/operating systems, accelerated computer programming, computer graphics.

Filippos Vokolos, PhD (*Polytechnic University*). Assistant Teaching Professor. System architecture, principles of software design and construction, verification and validation methods for the development of large software systems, foundations of software engineering, software verification & validation, software design, programming languages, dependable software systems.

Rosina Weber, PhD (*Federal University of Santa Catarina*). Associate Professor.

Jake Williams, PhD (*University of Vermont*). Assistant Professor. Data science, scientific programming, computational social science, computational linguistics and natural language processing, mathematics, machine learning, algorithms and scalability

Erija Yan, PhD (*Indiana University*). Assistant Professor. Network Science, information analysis and retrieval, scholarly communication methods and applications.

Christopher C. Yang, PhD (*University of Arizona, Tucson*). Associate Professor. Web search and mining, security informatics, knowledge management, social media analytics, cross-lingual information retrieval, text summarization, multimedia retrieval, information visualization, information sharing and privacy, artificial intelligence, digital library, and electronic commerce.

Emeritus Faculty

Michael E. Atwood, PhD (*University of Colorado*) *Associate Dean for Research and for Undergraduate Education*. Professor Emeritus. Human-computer interaction, computer-supported cooperative work, organizational memory.

Thomas A. Childers, PhD (*Rutgers University*). Professor Emeritus. Measurement, evaluation, and planning of information and library services, the effectiveness of information organizations.

Prudence W. Dalrymple, PhD (*University of Wisconsin-Madison*) Director, *Institute for Healthcare Informatics*. Professor Emeritus. User-centered information behaviors, particularly in the health arena, health informatics, evidence based practice, education for the information professions and evaluation, and translation of research into practice.

David E. Fenske, PhD (*University of Wisconsin-Madison*). Dean Emeritus and Professor. Digital libraries, informatics, knowledge management and information technologies.

John B. Hall, PhD (*Florida State University*). Professor Emeritus. Academic library service, library administration, organization of materials.

Linda S. Marion, PhD (*Drexel University*). Professor Emeritus. Formal and informal communication, bibliometric studies of scholarly communication, diffusion of information, information use in the social sciences, academic and public libraries, information science education.

Katherine W. McCain, PhD (*Drexel University*). Professor Emeritus. Scholarly communication, information production and use in the research process, development and structure of scientific specialties, diffusion of innovation, bibliometrics, evaluation of information retrieval systems.

Carol Hansen Montgomery, PhD (*Drexel University*) *Dean of Libraries Emeritus*. Research Professor. Selection and use of electronic collections, evaluation of library and information systems, digital libraries, economics of libraries and digital collections.

Delia Neuman, PhD (*The Ohio State University*). Professor Emeritus. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Gerry Stahl, PhD (*University of Colorado, Northwestern University*). Professor Emeritus. Human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, theory of collaboration.

Howard D. White, PhD (*University of California at Berkeley*). Professor Emeritus. Literature information systems, bibliometrics, research methods, collection development, online searching.

Susan Wiedenbeck, PhD (*University of Pittsburgh*). Professor Emeritus. Human-computer interaction, end-user programming/end-user development, empirical studies of programmers, interface design and evaluation.

Valerie Ann Yonker, PhD (*Drexel University*). Professor Emeritus. Human service information systems, systems analysis and design, measurement in software evaluation, knowledge engineering.

Youth Services Specialist Certificate

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's

Number of Credits to Completion: 15.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion 3 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 25.9999

Standard Occupational Classification (SOC) Code: 25-4021

NOTE: Effective Fall 2017, students are no longer being accepted into the Youth Services Specialist certificate program. Prospective students are encouraged to explore the Advanced Certificate in Information Studies and Technology (p. 15) which provides specialized, customized training beyond the master's degree.

This certificate is designed for professionals already holding a master's degree from an ALA-accredited program or a graduate degree closely related to this specialization. This program meets the interests of students planning public library careers with a focus on youth populations.

The program must be completed within five years.

Required Courses

INFO 650	Public Library Service	3.0
INFO 683	Resources for Children	3.0
INFO 684	Resources for Young Adults	3.0
Select two of the following:		6.0
INFO 649	Library Programming	
INFO 552	Introduction to Web Design for Information Organizations	
INFO 665	Collection Management	
Total Credits		15.0

College of Medicine: Graduate School of Biomedical Sciences and Professional Studies

Overview

Renowned for its innovative, student-centered educational programs, the Graduate School of Biomedical Sciences and Professional Studies in the College of Medicine at Drexel University provides regionally unique PhD and Master's level academic offerings that attract the brightest, most ambitious and entrepreneurial applicants. With a strong emphasis on job placement in different scientific and health related career fields as well as academic rigor to prepare students for medical and health-related professional schools, Drexel students are at the forefront of their selected disciplines and emerge as graduates as the next generation of leaders.

Today, there are more than 950 students pursuing doctoral or master's degrees within the Graduate School in the College of Medicine.

The collaborative nature of the new Graduate School with other Drexel schools (Engineering and College of Arts and Sciences, among others) provides students with a multidisciplinary advantage. Coupled with the solid foundation afforded by a Drexel education, innovation-driven programming offers students a unique experience to launch their careers in the chosen field of study.

The Graduate School of Biomedical Sciences and Professional Studies is committed to supporting and promoting an academic "success-network" that propels the transition from training in different disciplines to becoming leaders in solving global problems.

More information is available on the Graduate School of Biomedical Sciences and Professional Studies (<http://www.drexel.edu/medicine/Academics/Graduate-School>) website.

Majors

- Academic Medicine (MS) (p. 49)
- Biochemistry (MS, PhD) (p. 50)

- Biomedical Studies (MS) (p. 53)
- Biomedicine and Business (MS) (p. 54)
- Biomedicine and Digital Media (MS) (p. 57)
- Biomedicine and Entrepreneurship (MS) (p. 59)
- Biomedicine and Law (MS) (p. 62)
- Biotechnology (MS) (p. 64)
- Cancer Biology (MS) (p. 65)
- Clinical Research for Health Professionals (MS) (p. 69)
- Clinical Research Organization & Management (MS) (p. 71)
- Criminalistic Science (MS) (p. 71)
- Drexel Pathway to Medical School (MS) (p. 72)
- Drug Discovery and Development (MS) (p. 73)
- Forensic Science (MS) (p. 76)
- Histotechnology (MS) (p. 79)
- Immunology (MS) (p. 80)
- Infectious Disease (MS) (p. 82)
- Interdepartmental Medical Science (MS) (p. 84)
- Interdisciplinary Health Sciences (MS) (p. 85)
- Laboratory Animal Science (MLAS) (p. 86)
- Medical and Healthcare Simulation (MS) (p. 88)
- Medical Science (MS) (p. 89)
- Microbiology and Immunology (MS, PhD) (p. 90)
- Molecular Cell Biology and Genetics (MS, PhD) (p. 92)
- Molecular Medicine (MS) (p. 94)
- Neuroscience (MS, PhD) (p. 95)
- Pathologists' Assistant (MS) (p. 98)
- Pharmacology & Physiology (MS, PhD) (p. 100)

NEW: Minors

- Drug Discovery and Development (p. 75)
- Pre-veterinary (p. 103)

Certificates

- Clinical Research (p. 67)
- **NEW:** Drug Discovery and Development
- Medical and Healthcare Simulation (p. 69)
- Pre-Medical, Evening Program (p. 75)
- Quantitative Principles for Clinical Research (p. 69)

Mission Statement

Drexel University College of Medicine excels and innovates in education, research, and delivery of compassionate care in our culture of diversity, spirited inquiry, collaboration, and opportunity.

About the College

The College of Medicine's main campus, Queen Lane, is in a suburban-like setting in the East Falls section of Philadelphia. Additional facilities are located at the Center City campus, next to Hahnemann University Hospital. Our Pediatrics Department is at St. Christopher's Hospital for Children, and the Psychiatry Department is based at Friends Hospital. Students can receive clinical education at more than 20 affiliated hospitals and ambulatory sites chosen for their commitment to teaching as well as medical excellence. The College of Medicine is renowned for its

innovative educational programs, enhanced by the use of technology that permeates all components of the curriculum.

The College's medical practice, Drexel Medicine®, is a patient-focused practice emphasizing quality, innovation and community service, and enhanced by physician involvement in the research and educational programs.

Collaborative projects leveraging Drexel University's technological expertise continue to push the frontiers of nanomedicine and neuroengineering. The College of Medicine is a major regional center for spinal cord research, and has developed one of the leading centers for malaria study in the nation. Additionally, the College is home to a memory disorders center dedicated to ground-breaking research in Alzheimer's and related dementias.

Drexel University College of Medicine houses one of eight National Institute on Drug Abuse (NIDA) Centers of Excellence for Physician Information, one of 21 National Centers of Excellence in Women's Health designated by the Department of Health & Human Services, the Executive Leadership in Academic Medicine (ELAM) program, and the Archives and Special Collections on Women in Medicine. It has developed the largest HIV/AIDS primary care practice in the Mid-Atlantic region, with extensive NIH-funded research in prevention and therapeutic intervention. Faculty clinicians are highly respected in numerous other specialties, including cardiology and pain management.

Facilities

Drexel University College of Medicine (<http://www.drexel.edu/medicine>) is a living laboratory, giving students a broad variety of hands-on experience, enhanced by clinical rotations in hospitals, practicums, and external research opportunities, depending on their program of study. Students in all programs benefit from the College's physical plant, which offers some of the most advanced facilities in biomedical, health sciences, and healthcare education. The Queen Lane campus is designed for the purpose of teaching basic sciences and clinical skills in lecture halls, classrooms, small group rooms and a variety of laboratories. The College of Medicine provides wireless Internet access to curricular resources from anywhere on campus. Computers, multimedia technology, and the Internet augment the information and skills students learn from classes, print materials, and on clinical rotations. College of Medicine faculty members have been leaders in developing interactive computer-based learning tools, ranging from biochemical exercises to simulated patients presenting ethical dilemmas. Comprehensive curriculum websites, streaming videos of lectures, and online slide atlases for histology and pathology are all available.

Some of the College's key facilities and their features include:

Queen Lane Student Activities Center

A 17,700-square-foot student activity center was completed in 2006 at the Queen Lane Campus. The Student Activities Center occupies 2 floors and houses a full line of exercise equipment, a bookstore, student government offices and flexible space for events and lectures. The facility is available to students, staff and groups.

Queen Lane Medical Simulation Center

The College opened a state-of-the-art simulation center for medical education in 2010. Part of a new 25,000-square-foot addition, the center allows students to learn in simulated operating room and patient room settings.

Clinical Education Assessment Center

Ten examination rooms with digital capture that simulate physicians' offices are linked to control and observation rooms for faculty. Students work with standardized patients to enhance their abilities in medical interviewing, physical examination skills, and patient counseling.

Multidisciplinary Laboratories

- Forty-two tables with microscopes for teaching neuroanatomy, microbiology, and pathology are available.
- Microscopes are equipped with a networked video system so that all students in a class can look at a single slide under the microscope through monitors on their lab tables or on a projection screen and can retrieve microscopic images via computer.

New College Building

The New College Building at the Center City Hahnemann campus is designed for the purpose of teaching basic and clinical sciences, with auditoriums, classrooms, laboratories and offices. The lecture halls are designed to accommodate a variety of educational methodologies, spanning from the basic lecture format to the enriched laboratory setting where courses such as Anatomy, Pathology, Microbiology, Histology and Applied Anatomic Pathology can be taught.

Libraries

Drexel University has four libraries (<http://www.drexel.edu/medicine/About/Libraries>) to serve the needs of students, faculty and staff. The collections of two libraries – one at Queen Lane and one at Center City – emphasize subjects relevant to the health sciences, with print resources distributed to meet the needs of the programs and departments at each campus, and free document delivery service between the locations.

Computers in the reference areas of each library, and the Microcomputer Centers, provide access to the Libraries' online catalog; to databases (indexes) including MEDLINE, CINAHL, and PsycINFO; to more than 2000 full-text electronic journals, and to online reference resources such as MD Consult and Harrison's Online. Full Internet access is provided for reference and research purposes.

All online resources (databases, electronic journals, etc.) are available to students, staff and faculty who are registered Library users, and can be accessed from off-campus locations. In addition to Internet access, computers in the Microcomputer Centers also provide a broad range of software including word processing, spreadsheet, communications, graphics, and statistics. Computer-assisted instruction and tutorials are available for many curricula-related topics. A plotter and scanner are also available at some locations.

The Library staff is dedicated to providing assistance to students and other library users through on-the-spot reference help, mediated literature searches, and instructional sessions. Guides are available online to help with the use of Library services and resources.

Videoconferencing

Drexel University College of Medicine makes extensive use of videoconferencing between Philadelphia campuses and clinical teaching sites, and the Sacramento campus. There are videoconferencing classrooms with split screen to allow for speakers in different locations.

Web-Based Instruction

Uses of web-based instruction range from providing a supplement to classroom instruction to teaching a whole course remotely. Many instructors post their syllabi on the web, distribute supplementary readings

via the web, and set up electronic discussion lists for their students. Having students submit assignments electronically is common practice.

Unique faculty-developed tools, including doc.com, a web-based set of video encounters between physician and patient, help medical students improve their communication skills. DxR, a web-based patient simulation program, trains students in clinical reasoning; and MedEthEx provides an online series of exercises in medical ethics and communication. The recently implemented Web-OSCE, closely linked to doc.com, allows medical trainees to interview standardized patients remotely and receive performance feedback.

Academic Medicine

Major: Academic Medicine

Degree Awarded: Master of Science

Calendar Type: Semester

Total Credit Hours: 36.0 + research based publication; Additional 25.0 credits for concentration in otolaryngology

Classification of Instructional Programs (CIP) code: 51.1199

Standard Occupational Classification (SOC) code: 25-1071

Note: This program is currently not accepting students.

About the Program

Exceptional residents often pursue scholarly activities in addition to fulfilling their other residency requirements. This program is designed for those residents who publish research and pursue scholarly activities in addition to their typical residency training, and who desire to pursue careers in clinical education in their field of interest.

Students pursuing an MS in Academic Medicine must designate a concentration. At this time the first available concentration is the field of otolaryngology.

The MS in Academic Medicine is designed to address topics of value to the academic physician, including training in leadership, education, ethics, professionalism, public health, health accreditation, statistics, bioepidemiology, research techniques, medical writing and editing, grant writing, research regulations, public speaking and academic health center management. These are topics typically important to educators, but not commonly covered in depth during residency training.

Goals and Objectives

The MS in academic medicine provides a structured pathway for physicians planning careers as clinical educators to acquire specialized knowledge and to demonstrate a special expertise in teaching. The objectives of the MS in Academic Medicine include:

- training young physicians to be skilled clinical educators;
- providing students with core knowledge about academic medicine that is not included systematically in residency training programs;
- encouraging research;
- exposing students to the process of supervising and mentoring research;
- encouraging life-long continued study of materials and methods for clinical education.

Examinations

All residents are required to take in-service training examinations annually. This is a national, standardized test provided for each clinical

specialty. Performance at the 70th percentile or better in this examination is considered a passing grade for the MS. Alternatively, board certification would be sufficient to acknowledge that the student has mastered a body of knowledge suitable for the MS degree. Each clinical specialty has its own (very rigorous) requirements for board certification, supervised by the American Board of Medical Specialties.

Admission Requirements

Applications are reviewed by the department in which the degree is offered (for example: otolaryngology - head and neck surgery).

Recommendations for acceptance are presented to the Biomedical Graduate Education Committee of the College of Medicine for final approval. The requirements for admission include but are not limited to:

- enrollment in an ACGME approved residency program;
- satisfactory completion of at least one year of residency;
- a letter of recommendation from the applicant's Department Chair or Program Director;
- an interview in person;
- medical school transcript.

Visit the Office of Biomedical Graduate Studies Admissions website for more detailed information about applying to the program, including important application dates.

Degree Requirements

A minimum of thirty-six semester credits are required with a B average or better. Thus, the course of study for the MS in Academic Medicine will be in addition to the standard curriculum for residents plus the requirement of a research based, first authored publication.

Research Requirements

Each candidate for the MS will conduct a research project under the guidance of his/her advisory committee. In most cases this project will encompass clinical or bench research that will result in a first author publication in a peer-reviewed journal. (Case reports are not sufficient for fulfilling this requirement.) However if the student is involved in scholarly activity of another nature that is deemed sufficiently rigorous by the advisory committee, flexibility to recognize and accept other activities is intended. For example, such activities might include writing a book or developing the curriculum for a new academic program.

Curriculum

ACMD 600S	Academic Medicine: Core Knowledge I	3.0
ACMD 601S	Academic Medicine: Core Knowledge II	3.0
ACMD 602S	Academic Medicine Thesis Research	4.0
IDPT 500S	Responsible Conduct of Research	2.0
IDPT 600S	Thesis Defense (taken twice, each time for 9 credits)	18.0
Additional didactic courses included in the Associated Residency Program		6.0
Total Credits		36.0

Required courses for concentration in Otolaryngology

25.0 semester credits

OTO 600S	General Otolaryngology	3.0
OTO 601S	Otology	3.0
OTO 602S	Head and Neck Oncology	3.0
OTO 603S	Pediatric Otolaryngology, Introduction	3.0

OTO 604S	Journal Club in Otolaryngology	1.0
Select two Otolaryngology electives from the following:		6.0
OTO 605S	Laryngology – Voice, Introduction	
OTO 606S	Laryngology – Voice, Advanced	
OTO 607S	Laryngology – Swallowing	
OTO 608S	Temporal Bone Dissection	
OTO 609S	Neurotology	
OTO 610S	Audiology	
OTO 611S	Endocrine Surgery	
OTO 612S	Allergy and Immunology	
OTO 613S	Radiology of the Head and Neck	
OTO 614S	Pathology and Histology	
OTO 615S	Pediatric Otolaryngology, Advanced	
OTO 616S	Otolaryngology Practice	
OTO 617S	Research Methodology and Publication	
OTO 618S	Facial Plastic and Reconstructive Surgery	
OTO 619S	Sleep Disorders	
OTO 620S	Taste and Smell	
OTO 622S	Bronchoesophagology	
Select one Otolaryngology surgery elective from the following:		6.0
OTO 700S	General Otolaryngologic Surgery	
OTO 701S	Otologic Surgery	
OTO 702S	Head and Neck Oncologic Surgery	
OTO 700S	General Otolaryngologic Surgery	
OTO 703S	Pediatric Otolaryngologic Surgery	
OTO 704S	Neurotologic Surgery	
OTO 705S	Laryngologic Surgery	
OTO 706S	Rhinologic Surgery	
OTO 707S	Surgery of the Sinuses	
OTO 708S	Bronchoesophagology	
OTO 709S	Cosmetic Plastic and Reconstructive Surgery	
Total Credits		25.0

Biochemistry

Major: Biochemistry

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Semester

Total Credit Hours: 37.5 (non-thesis MS) 64.5 (thesis MS) or 96.0 (PhD)

Classification of Instructional Programs (CIP) code: 26.0202

Standard Occupational Classification (SOC) code: 19-1021

About the Program

The graduate program in biochemistry offers a challenging and broad-based graduate program of research and coursework leading to the MS or PhD degree. The aim of the graduate program is to train scientists to identify, address, and solve biomedical problems at the molecular level. The themes of molecular structure, molecular mechanisms, and molecular regulation are recurrent throughout the diverse research areas represented by the biochemistry faculty.

MS in Biochemistry (Thesis or Non-Thesis options)

A minimum of two years of full-time study is required for an MS degree. Master's graduates typically look forward to careers in clinical biochemistry, in pharmaceuticals and medical research equipment sales, or as research technicians in university and industrial laboratories.

PhD in Biochemistry

The average duration of study for a PhD degree is 5-6 years. Graduates are well-rounded, independent scientists qualified to pursue careers in research in universities, the pharmaceutical and biotech industries, and government. In addition, PhD scientists may choose to focus on college teaching, research administration, science policy, or patent law.

About the Curriculum

Background courses in biochemistry, molecular and cell biology, and integrative biology are taken during the first academic year. In addition, every student carries out short research projects in three different laboratories chosen by the student. This exposure to research not only gives the student broad research training, but also helps the student to select a thesis advisor at the end of the first academic year. In the second year, the student begins thesis research and takes several advanced courses, tailored to the student's individual interests. All students participate in student seminars and are encouraged to attend seminars in the department and University.

Courses Repeatable for Credit

As well as taking all required courses, MS and PhD students may re-enroll in courses having the status "repeatable for credit" (such as journal club, seminar and research courses) for the duration of their program in order to meet the total number of credits required for graduation.

Additional Information

For more information about this program, including scheduling a plan of study, visit the College of Medicine's Biomedical Graduate Studies (<http://www.drexelmed.edu/Home/AcademicPrograms/BiomedicalGraduateStudies.aspx>) website.

MS Degree Requirements (Thesis)

Required Courses

BIOC 502S	Biochemistry 1st Lab Rotation	4.0
BIOC 506S	Biochemistry Journal Club *	4.0
BIOC 507S	Biochemistry Seminar Series *	4.0
BIOC 508S	Experimental Approaches to Biochemical Problems	3.0
BIOC 511S	Communication for Researchers	1.0
BIOC 600S	Biochemistry Thesis Research **	27.0
BIOC 603S	Advanced Topics in Biochemistry and Molecular Biology	1.5
IDPT 500S	Responsible Conduct of Research	2.0
IDPT 501S	Biostatistics I	2.0
IDPT 521S	Molecular Structure and Metabolism	5.0
IDPT 526S	Cells to Systems	5.0
MCBG 506S	Advanced Cell Biology	2.0
MCBG 507S	Macromolecular Structure & Function	2.0
One Advanced Elective		2.0-4.0
BIOC 510S	Cancer Biology	
MIIM 555S	Molec. Mech. Of Micro. Path	
MIIM 625S	Advanced Molecular Virology	
MIIM 630S	Advanced Molecular Biology

Total Credit: 37.5-39.5

Degree Requirements (PhD)

The program requires the completion *96.0 semester credits*. During the third year, students develop a plan for their doctoral research in conjunction with their thesis advisor. A formal, written thesis proposal is then presented to the student's Thesis Advisory Committee. Acceptance of this proposal after oral examination by the Committee leads to the final stage of doctoral training. PhD candidates then spend the majority of their time on thesis research. After concluding their research, they must submit and publicly defend their thesis before the Thesis-Examination Committee.

Required Courses

BIOC 502S	Biochemistry 1st Lab Rotation	4.0
BIOC 503S	Biochemistry 2nd Lab Rotation	4.0
BIOC 504S	Biochemistry 3rd Lab Rotation	4.0
BIOC 506S	Biochemistry Journal Club	9.0
BIOC 507S	Biochemistry Seminar Series	9.0

Biomedical Studies

Major: Biomedical Studies

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 56.0

Classification of Instructional Programs (CIP) code: 26.0102

Standard Occupational Classification (SOC) code: 19-1042

About the Program

This two-year special Master's degree program is designed for students who have completed the all health professional school prerequisites and may need to strengthen their science background and/or MCAT score before applying to medical or other health professional schools. The program combines the former one-year Medical Science Preparatory (MSP) program curriculum with the former Master of Science in Biological Science (MBS) program curriculum into a two-year Master's program.

In the first year, students take advanced undergraduate courses in physics and chemistry, graduate courses in biochemistry, physiology, anatomy, psychology/sociology and laboratory techniques, and a year-long dedicated MCAT preparation course. At the end of the year, students sit for the MCAT and complete a summer research project. Students transition into the second year of the program after successful completion of the first year curriculum (passing all courses with a minimum cumulative graduate GPA of 3.0). During the second year, students take rigorous coursework in biochemistry, physiology, cell biology & histology and neuroanatomy, utilizing the IMS (p. 84) curriculum medical school-equivalent lectures and laboratory materials, as well as an ethics and a professionalism course, to complete the MS degree.

Admission Requirements

Applicants to the MBS program must have fulfilled undergraduate pre-medical requirements and demonstrated mastery of the material at a minimum grade of C. These requirements include a year of biology, chemistry, physics and organic chemistry, including respective laboratory sections. Applicants are required to submit official MCAT scores if the exam was taken, or general GRE scores in lieu of the MCAT. The following credentials are competitive for application to the MBS program:

- An minimum undergraduate math/science and cumulative GPA of 2.9
- All premedical prerequisite courses at a grade of C or better
- Minimum MCAT scores of 21 (pre-2015 MCAT), or 35th percentile (2015 MCAT), or minimum GRE scores of 50th percentile

Applicants with lower scores may be considered, if they can demonstrate a marked improvement in their academic history. Health care-related experiences, community service, research, leadership and extracurricular activities are also taken into consideration.

Degree Requirements

Required Undergraduate Courses

MSP 400S	Advanced Topics in Chemistry I	4.0
MSP 401S	Advanced Topics in Chemistry II	4.0
MSP 402S	Advanced Topics in Physics I	4.0
MSP 403S	Advanced Topics in Physics II	4.0
MSP 404S	Concepts in Science and Verbal Reasoning I	6.0
MSP 405S	Concepts in Science and Verbal Reasoning II	6.0

Required MS Courses

MSPP 511S	Concepts in Biochemistry and Cell Biology	4.0
MSPP 512S	Psychosocial and Behavioral Factors in Health and Medicine	3.0
MSPP 525S	Community Dimensions of Medicine	2.0
MSPP 505S	Laboratory Techniques in Biochemistry & Molecular Biology	2.0
MSPP 513S	Advanced Human Anatomy	4.0
MSPP 515S	Advanced Human Physiology	4.0

Biomedicine and Business

Major: Biomedicine and Business

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 36.0

Classification of Instructional Programs (CIP) code: 52.0201; 26.1201

Standard Occupational Classification (SOC) code: 11-1021; 13-000;

19-1020

About the Program

Mission Statement

The MS in Biomedicine and Business degree program provides comprehensive training in fundamental aspects of scientific discovery, technology commercialization and business. The program prepares graduates for management positions in scientifically oriented organizations in the public or private sector (e.g., biotechnology and pharmaceutical industry, academics, government, non-profit organizations). Students develop broad core knowledge in biological sciences and biomedical technology development and commercialization plus finance, economics, and organizational leadership. The program features a non-thesis, hybrid format with biomedical science courses taught fully online, and business courses conducted on campus in the evenings.

Curriculum

This is an interdisciplinary hybrid (blended) program offered by the College of Medicine. It is taught by faculty from Drexel University College of Medicine's Department of Microbiology and Immunology, Institute for Molecular Medicine and Infectious Disease teach the science courses in this program, which are offered online (certain elective courses are available face-to-face). Faculty from Drexel University's LeBow College of Business teach the business courses, which are offered face-to-face (select courses may be offered online).

This non-thesis program consists of required and elective courses in science and business and a flexible internship or experiential learning component. Students can customize their plan of study by selecting from a list of advanced science or business elective courses. Students must complete a minimum total of 36.0 semester credits to graduate.

Full-time and Part-Time Options

Students may meet the degree requirements in either a full-time (at least 9.0 credits per semester) or part-time basis. Full-time students generally complete the program in 2 years. Part time students must complete the program within six years. Students must enroll in at least 4.5 semester credits of College of Medicine courses to qualify for financial aid. For information regarding financial aid, please visit Drexel Central (<http://www.drexel.edu/drexelcentral>).

Program Contact Information

For questions about the curriculum and program goals, please contact:

Sandra Urdaneta-Hartmann, MD, PhD, MBA

Program Director
Email: slu22@drexel.edu

For questions about how to apply to the program, please contact an enrollment counselor at DUonline@drexel.edu (duonline@drexel.edu) or provide your contact information and someone will follow up with you.

Admission Requirements

For acceptance into the MS in Biomedicine and Business program, post-college applicants must have completed a four-year degree program. An undergraduate degree in business, biology, chemistry-based bachelor's degree program, or equivalent is preferred but not required. Although a minimum cumulative grade point average (GPA) of 3.0 is strongly desired, an applicant with a lower cumulative GPA will be considered if other strengths are apparent in the application.

Applicants must also fulfill the following requirements for consideration as defined by the Program Advisory Committee and the Graduate Program Committee (Curriculum & Evaluation Subcommittee) within the Graduate School of Biomedical Sciences and Professional Studies at the College of Medicine:

- Official transcripts from all colleges and universities attended
- Essay/Personal statement
- Resume
- References from at least three instructors or professionals

Official test scores from graduate and professional admission exams, such as the Graduate Record Examination (GRE), Graduate Management Admission Test (GMAT), Law School Admission Test (LSAT), or Medical College Admission Test (MCAT), are optional but highly desirable.

International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. Applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score on the Test of English as a Foreign Language (TOEFL). IELTS scores may be submitted in lieu of TOEFL scores. An evaluation by World Education Services (WES) is required for transcripts from institutions outside the United States.

Online applications (<https://online.drexel.edu/online-degrees/biomedical-degrees/ms-biomedicine-business/#apply>) are accepted all year round, but all admitted students initiate their studies in the following fall semester. Students are encouraged to apply no later than July 1 for consideration for admission the following fall semester. Students may defer admission by one year.

Program Contact Information

For questions about the curriculum and program goals, please contact one of the Program Directors:

Sandra Urdaneta-Hartmann, MD, PhD, MBA
Email: slu22@drexel.edu

Sandhya Kortagere, PhD
Email: sandhya.kortagere@drexelmed.edu

For questions about how to apply to the program, please contact an enrollment counselor at duonline@drexel.edu or visit the Drexel University Online MS in Biomedicine and Business web page (<https://>

online.drexel.edu/online-degrees/biomedical-degrees/ms-biomedicine-business).

Degree Requirements

Courses with the MIIM or IDPT designations are offered by Drexel University College of Medicine and are taught in semester terms (fall and spring). These courses are available in a traditional (face-to-face), hybrid, and/or online formats. Most of these traditional courses and hybrid courses are offered in the evenings at either the Center City Campus or the Queen Lane Campus (<http://www.drexel.edu/about/directions>).

Courses offered by LeBow College of Business are designated as BUSN. They are taught face-to-face in quarter terms (fall, winter, spring and summer) at the University City Campus (Building No. 61 in the University City Campus map (<http://drexel.edu/about/directions/university-city-map>)). The University City campus is a 10-minute walk from Center City, the core of Philadelphia's (<http://www.drexel.edu/about/philadelphia>) commercial and business district. Shuttle service is available between campuses.

There are several ways to customize the internship or experiential learning component (2.0 - 6.0 semester credits) so that it satisfies both the degree requirements and, especially, the student's own personal needs and career aspirations. The duration of the internship may vary. Shorter rotations may require that the student enroll in elective courses to meet the semester credit requirements for degree.

Please note that the credits for the BUSN courses shown below are shown in quarter credits. Three (3.0) credit quarter courses confer the equivalent of 2.0 semester credits. The program required the completion of 36.0 semester credits for graduation. Semesters and quarters overlap sufficiently to allow full-time students to meet the degree requirements for this program in two years.

Required Courses

Science Requirements		
IDPT 500S	Responsible Conduct of Research	2.0
	or MIIM 503S Biomedical Ethics	
MIIM 515S	Concepts in Biomedicine I	3.0
	or MIIM 530S Fundamentals of Molecular Medicine I	
MIIM 516S	Concepts in Biomedicine II	2.0
	or MIIM 531S Fundamentals of Molecular Medicine II	
MIIM 535S	Biomedical Technology Commercialization I	1.0
MIIM 536S	Biomedical Technology Commercialization II	1.0
MIIM 550S	Biomedicine Seminar	2.0
MIIM 605S	Experiential Learning	4.0
MIIM 631S	Biomedical Innovation Development and Management	4.0
MIIM 645S	Biomedical Career Explorations	1.0
Business Requirements		
BUSN 501	Measuring and Maximizing Financial Performance *	3.0
BUSN 502	Essentials of Economics *	3.0
MGMT 601	Managing the Total Enterprise *	3.0
Electives		
Select a minimum of 8 credits from the following electives: 8.0		
IDPT 501S	Biostatistics I	
	or MIIM 517 Applied Statistics for Biomedical Sciences	
MIIM 521S	Biotechniques I: Molecular and Genomic Methods	
MIIM 533S	Molecular Medicine Journal Club II	
MIIM 534S	Molecular Medicine Journal Club I	
MIIM 540S	Viruses and Viral Infections	
MIIM 541S	Bacteria and Bacterial Infections	
MIIM 542S	Mycology and Fungal Infections	
MIIM 543S	Parasitology and Parasitic Diseases	

MIIM 545S	Introduction to Infectious Diseases	
MIIM 546S	Introduction to Immunology	
MIIM 606S	Microbiology and Immunology Seminar	
MIIM 613S	Emerging Infectious Diseases	
MIIM 653S	Clinical Correlations in Infectious Disease	
ORGB 625	Leadership and Professional Development *	
ORGB 631	Leading Effective Organizations *	
Total Credits		37.0

* Science courses are offered on a semester basis, and business courses are offered on a quarter basis. Semesters and quarters overlap sufficiently to allow students to meet the degree requirements in 2 years. The formula to convert quarter credit hours to semester credit hours is: Number of quarter credit hours x 0.6667 = Number of semester credit hours. Therefore a 3.0 quarter credit course will convert to 2.0 semester credits. This program requires a minimum of 36.0 semester credits to meet the degree requirements.

Sample Plan of Study

Below is a sample full-time plan of study that can be completed in two years. Students may also opt to enroll part-time. Part-time students must complete the program within six years. To learn more about part-time options, please contact the Program Director, Sandra Urdaneta-Hartmann, MD, PhD, MBA at slu@drexel.edu for more information.

First Year		
Fall		Credits
MIIM 515S or 530S	Concepts in Biomedicine I Fundamentals of Molecular Medicine I	3.0
MIIM 550S	Biomedicine Seminar	2.0
IDPT 500S or MIIM 503S	Responsible Conduct of Research Biomedical Ethics	2.0
BUSN 501 *	Measuring and Maximizing Financial Performance	3.0
Term Credits		10.0
Total Credit: 10.0		

* Business requirements are listed in quarter credits. However, 2.0 semester credits will be awarded for 3.0 quarter credits. Total semester credits for first year, fall semester = 9.0

First Year		
Spring		Credits
MIIM 516S or 531S	Concepts in Biomedicine II Fundamentals of Molecular Medicine II	2.0
MIIM 535S	Biomedical Technology Commercialization I	1.0
IDPT 501S	Biostatistics I	2.0
BUSN 502 *	Essentials of Economics	3.0
MGMT 601 *	Managing the Total Enterprise	3.0
Term Credits		11.0
Total Credit: 11.0		

* Business requirements are listed in quarter credits. However, 2.0 semester credits will be awarded for 3.0 quarter credits. Total semester credits for first year, spring semester = 9.0

Second Year		
Fall		Credits
MIIM 536S	Biomedical Technology Commercialization II	1.0
MIIM 605S	Experiential Learning	4.0
ORGB 625 *	Leadership and Professional Development	3.0

MIIM 540S **	Viruses and Viral Infections (or other elective)	2.0
Term Credits		10.0
Total Credit: 10.0		

* Business requirements are listed in quarter credits. However, 2.0 semester credits will be awarded for 3.0 quarter credits. Total semester credits for second year, spring semester = 9.0

** Other electives are as follows: MIIM 521S, MIIM 530S, MIIM 531S, MIIM 533S, MIIM 534S, MIIM 541S, MIIM 542S, MIIM 543S, MIIM 545S, MIIM 546S, MIIM 606S, MIIM 613S, MIIM 653S, ORGB 625, ORGB 631

Second Year		
Spring		Credits
MIIM 631S	Biomedical Innovation Development and Management	4.0
MIIM 645S	Biomedical Career Explorations	1.0
ORGB 631 *	Leading Effective Organizations	3.0
MIIM 521S **	Biotechniques I: Molecular and Genomic Methods (or other elective)	2.0
Term Credits		10.0
Total Credit: 10.0		

* Business requirements are listed in quarter credits. However, 2.0 semester credits will be awarded for 3.0 quarter credits. Total semester credits for second year, spring semester = 9.0

** Other electives are as follows: MIIM 530S, MIIM 531S, MIIM 533S, MIIM 534S, MIIM 540S, MIIM 541S, MIIM 542S, MIIM 543S, MIIM 545S, MIIM 546S, MIIM 606S, MIIM 613S, MIIM 653S, ORGB 625, ORGB 631

Program Goals

Upon completion of the degree requirements of this program students would have achieved the following program-level goals:

1. Develop core knowledge in biological sciences, technology development and commercialization
2. Gain understanding of finance, economics, management and organization leadership
3. Apply business expertise to evaluate the process of delivering biomedical products to market
4. Develop skills to identify and evaluate professional ethical dilemmas and appropriate solutions
5. Strengthen communication, leadership, and soft-skills (e.g., teamwork, problem-solving, knowledge of career opportunities, networking)

Drexel Student Learning Priorities (DSLPs)

In the course of meeting these program-level goals, students would have also made progress in all of Drexel's Student Learning Priorities (DSLPs) (<http://drexel.edu/provost/assessment/outcomes/dslp>) to help them build their future:

Core Intellectual and Practical Skills:

- Communication
- Creative and critical thinking
- Ethical reasoning
- Information literacy
- Self-directed learning

Experiential and Applied Learning:

- Global competence
- Leadership
- Professional practice
- Research, scholarship and creative expression
- Responsible citizenship

Biomedicine and Digital Media

Major: Biomedicine and Business

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 36.0

Classification of Instructional Programs (CIP) code: 50.0102; 26.1201

Standard Occupational Classification (SOC) code: 19-1020; 19-1042; 27-1014

About the Program

The MS in Biomedicine and Digital Media program intersects science, technology, entrepreneurship, and interactive digital art design and animation. This skills-based program is for individuals interested in media design and production careers with an emphasis in health and science.

Graduates of this program will be prepared to progress into more advanced graduate studies in science or digital media and/or careers in scientifically oriented media/communication jobs in the public or private sector (e.g., academic, scientific publishing and media companies), or lead their new ventures in digital imaging.

Curriculum

This is an interdisciplinary hybrid (blended) program offered by the College of Medicine. The science courses, which are offered online are taught by faculty from Drexel University College of Medicine's Department of Microbiology and Immunology, Institute for Molecular Medicine and Infectious Disease. Certain elective courses are available face-to-face. Faculty from Drexel University's College of Media Arts and Design teach the digital media courses which are offered face-to-face.

This non-thesis program consists of required and elective courses in science and digital media and a flexible internship or experiential learning component. Students can customize their plan of study by selecting from a list of advanced science or digital media elective courses. Students must complete a minimum of 36.0 semester credits to graduate.

Please view the Degree Requirements and Sample Plan of Study for more details.

Full-time and Part-Time Options

Students may meet the degree requirements in either a full-time (at least 9.0 credits per semester) or part-time basis. Full-time students generally complete the program in 2 years. Part-time students must complete the program within six years. Students must enroll in at least 4.5 semester credits of College of Medicine courses to qualify for financial aid. For information regarding financial aid, please visit Drexel Central (<http://www.drexel.edu/drexelcentral>).

Program Contact Information

For questions about the curriculum and program goals, please contact one of the Program Directors:

Sandra Urdaneta-Hartmann, MD, PhD, MBA

Program Director

Email: slu22@drexel.edu

Sandhya Kortagere, PhD

Email: sandhya.kortagere@drexelmed.edu
(sandhya.kortagere@drexelmed.edu)

For questions about how to apply to the program, please contact an enrollment counselor at duonline@drexel.edu and provide your contact information and someone will follow up with you.

Admission Requirements

For acceptance into the MS in Biomedicine and Digital Media program, post-college applicants must have completed a four-year degree program. An undergraduate degree in digital media, biology, chemistry-based bachelor's degree program, or equivalent is preferred but not required. Although a minimum of cumulative grade point average (GPA) of 3.0 is strongly desired, an applicant with a lower cumulative GPA will be considered if other strengths are apparent in the application.

Applicants must also fulfill the following requirements for consideration as defined by the Program Advisory Committee and the Graduate Program Committee (Curriculum & Evaluation Subcommittee) within the Graduate School of Biomedical Sciences and Professional Studies at the College of Medicine:

- Official transcripts from all colleges and universities attended
- Essay/personal statement
- Resume
- References from at least three instructors or professionals

Official test scores from graduate admission exams, such as the Graduate Record Examination (GRE), are optional but highly desirable.

International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. Applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score on the Test of English as a Foreign Language (TOEFL). IELTS scores may be submitted in lieu of TOEFL scores. An evaluation by World Education Services (WES) is required for transcripts from institutions outside the United States.

Online applications (<https://online.drexel.edu/online-degrees/biomedical-degrees/ms-biomedicine-business/#apply>) are accepted all year round, but all admitted students initiate their studies in the following fall semester. Students are encouraged to apply no later than July 1 for consideration for admission the following fall semester. Students may defer admission by one year.

Program Contact Information

For questions about how to apply to the program, please contact an enrollment counselor at duonline@drexel.edu.

Degree Requirements

Courses with the MIIM or IDPT designation are offered by Drexel University College of Medicine and are taught in semester terms (fall and spring). These courses are available in a traditional (face-to-face), hybrid, and/or online formats. Most of these traditional courses and hybrid courses are offered in the evenings at either the Center City Campus or the Queen Lane Campus (<http://www.drexel.edu/about/directions>).

Courses offered by Westphal College of Media Arts and Design are designated as DIGM. They are taught face-to-face in quarter terms (fall, winter, spring and summer) at the University City Campus (Building No. 71 in the University City Campus map (<http://drexel.edu/about/directions/university-city-map>)). The University City campus is a 10-minute walk from Center City, the core of Philadelphia's (<http://www.drexel.edu/about/philadelphia>) commercial and business district. Shuttle service is available between campuses.

There are several ways to customize the experiential learning component (2.0 - 6.0 semester credits) so that it satisfies both the degree requirements and, especially, the student's own personal situation. The duration of the internship may vary. Shorter rotations may require that the student enroll in elective courses to meet the semester credit requirements for degree.

Please note that the credits for the DIGM courses shown below are shown in quarter credits. Three (3.0) credit quarter courses confer the equivalent of 2.0 semester credits. The program required the completion of 36.0 semester credits for graduation. Semesters and quarters overlap sufficiently to allow full-time students to meet the degree requirements for this program in two years.

Required Courses

Science Requirements		
IDPT 500S	Responsible Conduct of Research	2.0
or MIIM 503S	Biomedical Ethics	
MIIM 515S	Concepts in Biomedicine I	3.0
or MIIM 530S	Fundamentals of Molecular Medicine I	
MIIM 516S	Concepts in Biomedicine II	2.0
or MIIM 531S	Fundamentals of Molecular Medicine II	
MIIM 535S	Biomedical Technology Commercialization I	1.0
MIIM 536S	Biomedical Technology Commercialization II	1.0
MIIM 550S	Biomedicine Seminar	2.0
MIIM 605S	Experiential Learning	3.0
MIIM 631S	Biomedical Innovation Development and Management	4.0
MIIM 645S	Biomedical Career Explorations	1.0
Digital Media Requirements		
DIGM 505	Design and Interactivity Bootcamp *	3.0
DIGM 506	Animation and Game Design Bootcamp *	3.0
DIGM 520	Interactivity I *	3.0
DIGM 521	Interactivity II *	3.0
DIGM 525	Animation I *	3.0
DIGM 530	Game Design I *	3.0

Electives

Students must select a minimum of 5 credits from the following:		5.0
IDPT 501S	Biostatistics I	
or MIIM 517S	Applied Statistics for Biomedical Sciences	
MIIM 521S	Biotechniques I: Molecular and Genomic Methods	
MIIM 533S	Molecular Medicine Journal Club II	
MIIM 534S	Molecular Medicine Journal Club I	
MIIM 540S	Viruses and Viral Infections	
MIIM 541S	Bacteria and Bacterial Infections	
MIIM 542S	Mycology and Fungal Infections	
MIIM 543S	Parasitology and Parasitic Diseases	
MIIM 545S	Introduction to Infectious Diseases	
MIIM 546S	Introduction to Immunology	
MIIM 606S	Microbiology and Immunology Seminar	
MIIM 613S	Emerging Infectious Diseases	
MIIM 653S	Clinical Correlations in Infectious Disease	
DIGM 526	Animation II	

DIGM 531	Game Design II	
Total Credits		42.0

* Science courses are offered on a semester basis, and digital media courses are offered on a quarter basis. Semesters and quarters overlap sufficiently to allow students to meet the degree requirements in 2.5 years. The formula to convert quarter credit hours to semester credit hours is: Number of quarter credit hours x 0.6667 = Number of semester credit hours. Therefore a 3.0 quarter credit course will convert to 2.0 semester credits. This program requires a minimum of 36.0 semester credits to meet the degree requirements.

Sample Plan of Study

Below is a sample full-time plan of study that can be completed in two years. Students may also opt to enroll part-time. Part-time students must complete the program within six years. To learn more about part-time options, please contact the Program Director, Sandra Urdaneta-Hartmann, MD, PhD, MBA at slu@drexel.edu for more information.

First Year

Fall		Credits
MIIM 515S	Concepts in Biomedicine I	3.0
or 530S	Fundamentals of Molecular Medicine I	
MIIM 550S	Biomedicine Seminar	2.0
DIGM 525*	Animation I	3.0
DIGM 520*	Interactivity I	3.0
Term Credits		11.0

Total Credit: 11.0

* Digital Media courses are listed in quarter credits. However, 2.0 semester credits will be awarded for 3.0 quarter credits. Total semester credits for first year, fall semester = 9.0

First Year

Spring		Credits
MIIM 516S	Concepts in Biomedicine II	2.0
or 531S	Fundamentals of Molecular Medicine II	
MIIM 535S	Biomedical Technology Commercialization I	1.0
IDPT 500S	Responsible Conduct of Research	2.0
or MIIM 503S	Biomedical Ethics	
DIGM 530*	Game Design I	3.0
DIGM 521*	Interactivity II	3.0
Term Credits		11.0

Total Credit: 11.0

* Digital Media courses are listed in quarter credits. However, 2.0 semester credits will be awarded for 3.0 quarter credits. Total semester credits for first year, spring semester = 9.0

Second Year

Fall		Credits
MIIM 536S	Biomedical Technology Commercialization II	1.0
MIIM 605S	Experiential Learning	3.0
MIIM 540S**	Viruses and Viral Infections (or other elective)	2.0
MIIM 653S**	Clinical Correlations in Infectious Disease (or other elective)	3.0
Term Credits		9.0

Total Credit: 9.0

** Other electives are as follows: IDPT 500S, IDPT 501S, MIIM 521S, MIIM 530S, MIIM 531S, MIIM 533S, MIIM 534S, MIIM 541S, MIIM 542S, MIIM 543S, MIIM 545S, MIIM 606S, MIIM 613S, DIGM 526, DIGM 531

Second Year

Spring		Credits
MIIM 631S	Biomedical Innovation Development and Management	4.0
MIIM 645S	Biomedical Career Explorations	1.0
DIGM 526 ^{*,**}	Animation II (or other elective)	3.0
DIGM 531 ^{*,**}	Game Design II (or other elective)	3.0
Term Credits		11.0

Total Credit: 11.0

* Digital Media courses are listed in quarter credits. However, 2.0 semester credits will be awarded for 3.0 quarter credits. Total semester credits for second year, spring semester = 9.0

** Other electives are as follows: IDPT 500S, IDPT 501S, MIIM 521S, MIIM 530S, MIIM 531S, MIIM 533S, MIIM 534S, MIIM 540S, MIIM 541S, MIIM 542S, MIIM 543S, MIIM 545S, MIIM 606S, MIIM 613S, MIIM 653S

Program Goals

Upon completion of the degree requirements of this program students would have developed:

- A broad core knowledge in interactive digital media development for application in biomedical science and innovative technologies
- More in-depth analytical, research, and critical thinking skills applicable to the process of biomedical technology development
- Skills to identify professional ethical dilemmas and evaluate appropriate solutions
- Graduate-level communication and leadership skills
- Additional professional soft skills (e.g., teamwork, problem-solving, knowledge of career opportunities, networking)

Drexel Student Learning Priorities (DSLPs)

In the course of meeting these program-level goals, students would have also made progress in all of Drexel's Student Learning Priorities (DSLPs) (<http://www.drexel.edu/provost/irae/assessment/outcomes/dslp>) to help them build their future:

Core Intellectual and Practical Skills:

- Communication
- Creative and critical thinking
- Ethical reasoning
- Information literacy
- Self-directed learning

Experiential and Applied Learning:

- Global competence
- Leadership
- Professional practice
- Research, scholarship and creative expression
- Responsible citizenship

Biomedicine and Entrepreneurship

Major: Biomedicine and Entrepreneurship

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 36.0

Classification of Instructional Programs (CIP) code: 52.0701; 26.1201

Standard Occupational Classification (SOC) code: 19-1020;

19-1042; 11-1011

About the Program

Mission Statement

The MS in Biomedicine and Entrepreneurship program integrates training in technical and practical aspects of science, research and entrepreneurship for individuals interested in pursuing innovation-driven careers in the life sciences. The program helps develop individual initiative and entrepreneurial thinking around scientific discoveries and innovation. The program is designed to facilitate not only new venture creation but also individual initiative and entrepreneurial thinking.

Graduates of the program will be prepared to progress into more advanced graduate studies in science or entrepreneurship and/or careers in scientifically oriented management jobs in the public or private sector. These graduates will especially be equipped to lead or have top management roles in new biomedical or life sciences ventures.

Curriculum

This is an interdisciplinary online program offered by the College of Medicine. Faculty from Drexel University College of Medicine's Department of Microbiology and Immunology, Institute for Molecular Medicine and Infectious Disease teach the science courses in this program which are offered online (certain elective courses are available face-to-face). Faculty from Drexel University's Charles D. Close School of Entrepreneurship (<http://drexel.edu/close>) teach the entrepreneurship courses.

This non-thesis program consists of required and elective courses in science and entrepreneurship and a flexible experiential learning component. Students can customize their plan of study depending on each individual's academic and professional aspirations.

Students must complete a minimum total of 36.0 semester credits to graduate.

Please view the Degree Requirements and Sample Plan of Study for more details.

Full-time and Part-Time Options

Students may meet the degree requirements in either a full-time (at least 9.0 credits per semester) or part-time basis. Full-time students generally complete the program in two years. Part-time students must complete the program within six years. Students must enroll in at least 4.5 semester credits of College of Medicine courses to qualify for financial aid. For additional information regarding financial aid, please visit Drexel Central (<http://drexel.edu/drexelcentral>).

Program Contact Information

For questions about the curriculum and program goals, please contact one of the Program Directors:

Sandra Urdaneta-Hartmann, MD, PhD, MBA
Program Director
Email: sl22@drexel.edu

Sandhya Kortagere, PhD
Email: sandhya.kortagere@drexelmed.edu

For questions about how to apply to the program, please contact an enrollment counselor at duonline@drexel.edu

Additional information can be found on the College of Medicine's website (<http://www.drexel.edu/medicine/Academics/Graduate-School/Biomedicine-Entrepreneurship>).

Admission Requirements

For acceptance into the MS in Biomedicine and Entrepreneurship program, post-college applicants must have completed a four-year degree program in business, biology, chemistry-based bachelor's degree program, or equivalent, with at least a 3.0 GPA.

Applicants must also fulfill the following requirements for consideration as defined by the Program Advisory Committee and the Graduate Program Committee (Curriculum & Evaluation Subcommittee) within the Graduate School of Biomedical Sciences and Professional Studies at the College of Medicine:

- Official transcripts from all colleges and universities attended;
- Official test scores from graduate and professional admission exams are highly desirable, such as the Graduate Record Examination (GRE), Graduate Management Admission Test (GMAT), Law School Admission Test (LSAT), or Medical College Admission Test (MCAT); and
- References from at least three instructors or professionals.

International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. Applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score on the Test of English as a Foreign Language (TOEFL). IELTS scores may be submitted in lieu of TOEFL scores. An evaluation by World Education Services (WES) is required for transcripts from institutions outside the United States.

Online applications (https://banner.drexel.edu/pls/duprod/bwskalog.P_displginnon) are accepted all year round, but all admitted students initiate their studies in the following fall semester. Students are encouraged to apply no later than July 1 for consideration for admission the following fall semester. Students may defer admission by one year.

Program Contact Information

For questions about how to apply to the program, please contact:

Stephanie Schleidt
Academic Administrator
Graduate School of Biomedical Sciences and Professional Studies
245 North 15th Street, Mail Stop 344sds
Philadelphia, PA 1910

Email: stephanie.schleidt@drexelmed.edu

Degree Requirements

Courses with the MIIM or IDPT designation are offered by Drexel University College of Medicine and are taught in semester terms (fall and spring). These courses are available in a traditional (face-to-face), hybrid, and/or online formats. Some of these traditional courses and hybrid courses are offered in the evenings at either the Center City Campus or the Queen Lane Campus (<http://www.drexel.edu/about/directions>).

Courses offered by the Close School of Entrepreneurship are designated as ENTP. They are taught mostly online in quarter terms (fall, winter, spring and summer).

There are several ways to customize the experiential learning component (2.0 - 6.0 semester credits) so that it satisfies both the degree requirements and, especially, the student's own personal situation. The duration of the internship may vary. Shorter rotations may require that the student enroll in elective courses to meet the semester credit requirements for degree.

Please note that the credits for the ENTP courses shown below are shown in quarter credits. Three (3.0) credit quarter courses confer the equivalent of 2.0 semester credits. The program required the completion of 36.0 semester credits for graduation. Semesters and quarters overlap sufficiently to allow full-time students to meet the degree requirements for this program in 2 years.

Required Courses		
Science Requirements		
IDPT 500S	Responsible Conduct of Research	2.0
or MIIM 503S	Biomedical Ethics	
MIIM 515S	Concepts in Biomedicine I	3.0
or MIIM 530S	Fundamentals of Molecular Medicine I	
MIIM 516S	Concepts in Biomedicine II	2.0
or MIIM 531S	Fundamentals of Molecular Medicine II	
MIIM 535S	Biomedical Technology Commercialization I	1.0
MIIM 536S	Biomedical Technology Commercialization II	1.0
MIIM 550S	Biomedicine Seminar	2.0
MIIM 605S	Experiential Learning	4.0
MIIM 631S	Biomedical Innovation Development and Management	4.0
MIIM 645S	Biomedical Career Explorations	1.0
Entrepreneurship Requirements		
ENTP 501	Entrepreneurship Essentials	3.0
ENTP 585	Innovation in Established Companies	3.0
ENTP 640	Methods of Entrepreneurship	3.0
ENTP 690	The Lean Launch	3.0
Electives		
Select a minimum of 6 credits from the following electives:		6.0
IDPT 501S	Biostatistics I	
or MIIM 517S	Applied Statistics for Biomedical Sciences	
MIIM 521S	Biotechniques I: Molecular and Genomic Methods	
MIIM 533S	Molecular Medicine Journal Club II	
MIIM 534S	Molecular Medicine Journal Club I	
MIIM 540S	Viruses and Viral Infections	
MIIM 541S	Bacteria and Bacterial Infections	
MIIM 542S	Mycology and Fungal Infections	
MIIM 543S	Parasitology and Parasitic Diseases	
MIIM 545S	Introduction to Infectious Diseases	
MIIM 546S	Introduction to Immunology	
MIIM 606S	Microbiology and Immunology Seminar	
MIIM 613S	Emerging Infectious Diseases	

MIIM 653S	Clinical Correlations in Infectious Disease	
ENTP 535	Social Entrepreneurship *	
Total Credits		38.0

* Science courses are offered on a semester basis, and entrepreneurship courses are offered on a quarter basis. Semesters and quarters overlap sufficiently to allow students to meet the degree requirements in 2 years. The formula to convert quarter credit hours to semester credit hours is: Number of quarter credit hours x 0.6667 = Number of semester credit hours. Therefore a 3.0 quarter credit course will convert to 2.0 semester credits. This program requires a minimum of 36.0 semester credits to meet the degree requirements.

Sample Plan of Study

Below is a sample full-time plan of study that can be completed in two years. Students may also opt to enroll part-time. Part-time students must complete the program within four years. To learn more about part-time options, please contact the Program Director, Sandra Urdaneta-Hartmann, MD, PhD, MBA at sl@drexel.edu for more information.

First Year

Fall		Credits
MIIM 515S or 530S	Concepts in Biomedicine I Fundamentals of Molecular Medicine I	3.0
MIIM 550S	Biomedicine Seminar	2.0
IDPT 500S or MIIM 503S	Responsible Conduct of Research Biomedical Ethics	2.0
ENTP 501 *	Entrepreneurship Essentials	3.0
Term Credits		10.0

Total Credit: 10.0

* Entrepreneurship requirements are listed in quarter credits. However, 2.0 semester credits will be awarded for 3.0 quarter credits. Total semester credits for first year, fall semester = 9.0

First Year

Spring		Credits
MIIM 516S or 531S	Concepts in Biomedicine II Fundamentals of Molecular Medicine II	2.0
MIIM 535S	Biomedical Technology Commercialization I	1.0
ENTP 585 *	Innovation in Established Companies	3.0
MIIM 541S **	Bacteria and Bacterial Infections (or other elective)	2.0
MIIM 543S **	Parasitology and Parasitic Diseases (or other elective)	2.0
Term Credits		10.0

Total Credit: 10.0

* Entrepreneurship requirements are listed in quarter credits. However, 2.0 semester credits will be awarded for 3.0 quarter credits. Total semester credits for first year, spring semester = 9.0

** Other electives are as follows: MIIM 521S, MIIM 530S, MIIM 531S, MIIM 533S, MIIM 534S, MIIM 540S, MIIM 542S, MIIM 545S, MIIM 546S, MIIM 606S, MIIM 613S, MIIM 653S, ENTP 535

Second Year

Fall		Credits
MIIM 536S	Biomedical Technology Commercialization II	1.0
MIIM 605S	Experiential Learning	4.0
ENTP 640 *	Methods of Entrepreneurship	3.0
ENTP 690 *	The Lean Launch	3.0
Term Credits		11.0

Total Credit: 11.0

* Entrepreneurship requirements are listed in quarter credits. However, 2.0 semester credits will be awarded for 3.0 quarter credits. Total semester credits for second year, fall semester = 9.0

Second Year

Spring		Credits
MIIM 631S	Biomedical Innovation Development and Management	4.0
MIIM 645S	Biomedical Career Explorations	1.0
IDPT 501S	Biostatistics I	2.0
ENTP 535 *	Social Entrepreneurship (or other elective)	3.0
Term Credits		10.0

Total Credit: 10.0

* Entrepreneurship requirements are listed in quarter credits. However, 2.0 semester credits will be awarded for 3.0 quarter credits. Total semester credits for second year, spring semester = 9.0

** Other electives are as follows: MIIM 521S, MIIM 530S, MIIM 531S, MIIM 533S, MIIM 534S, MIIM 540S, MIIM 541S, MIIM 542S, MIIM 543S, MIIM 545S, MIIM 546S, MIIM 606S, MIIM 613S, MIIM 653S

Program Goals

Upon completion of the degree requirements for this MS program, students would have achieved the following program-level goals:

- Develop broad core knowledge in biological sciences, entrepreneurship and biomedical innovation**
 - Be proficient in fundamental concepts in molecular and cellular biology, and other major areas within the biological sciences
 - Be proficient in fundamental concepts in entrepreneurship
 - Be proficient in the process of biomedical innovation development and commercialization
- Develop analytical and critical thinking skills**
 - Be able to critically analyze the ideas and concepts related to science and entrepreneurship presented written or orally by others (e.g., textbooks, journals, mass media, presentations by peers and subject matter experts)
 - Be able to identify, analyze, and evaluate the need for innovative solutions to problems or challenges in biomedicine and innovation management
 - Be able to identify and analyze challenges faced in biomedical innovation development and management
 - Be able to discuss the commercial viability of innovative biomedical products (e.g., drugs, devices, diagnostics, digital media content)
 - Be able to draft and analyze strategic and tactical plans to deliver a biomedical product to the market
 - Be able to articulate and defend their analysis
- Develop research skills**
 - Be proficient at conducting primary research
 - Be proficient in collecting data from electronic databases, the World Wide Web, the library, and other sources
 - Be able to interpret data
- Develop professional ethics**
 - Be able to identify and evaluate professional ethical dilemmas, and discuss appropriate resolutions
 - Apply professional ethical standards such as appropriate attribution of ideas, good recordkeeping, and truthful presentation of data/facts and conclusions

- Be able identify and evaluate the economic and social impact of strategic decisions
5. **Develop communication and leadership skills**
- Be proficient at developing oral and/or written comprehensive reports, presenting facts, analysis, and conclusions
 - Be proficient at using appropriate technologies for communication
 - Be able to interact and work effectively with others in work settings involving cultural and demographic diversity
6. **Develop other “work readiness” soft skills (e.g., teamwork, problem-solving, knowledge of career opportunities, networking)**
- Be knowledgeable of career opportunities in their desired field
 - Be proficient at presenting a professional profile of oneself
 - Be proficient at time-management
 - Be able to work in teams
 - Begin to develop problem-solving skills for use in the workplace
 - Begin to develop a professional network

Drexel Student Learning Priorities (DSLPs)

In the course of meeting these program-level goals, students would have also made progress in all of (<https://www.drexel.edu/provost/learningpriorities>) Drexel’s Student Learning Priorities (DSLPs (<http://drexel.edu/provost/assessment/outcomes/dslp>)) (<http://www.drexel.edu/provost/irae/assessment/outcomes/dslp>) to help them build their future:

Core Intellectual and Practical Skills:

- Communication
- Creative and critical thinking
- Ethical reasoning
- Information literacy
- Self-directed learning

Experiential and Applied Learning:

- Global competence
- Leadership
- Professional practice
- Research, scholarship and creative expression
- Responsible citizenship

Biomedicine and Law

Major: Biomedicine and Law

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 36.0

Classification of Instructional Programs (CIP) code: 26.1201; 22.0000

Standard Occupational Classification (SOC) code: 19-1020; 23-2000

About the Program

The Masters of Science in Biomedicine and Law degree program comprehensive training in technical and practical aspects of science and innovation, as well as in the legal aspects related to new biomedical product development, entrepreneurship and regulatory compliance. This program is geared to individuals interested in careers focused in technology development.

Graduates of this program will be prepared to progress into more advanced graduate studies in science and/or careers in scientifically

oriented management jobs in the public or private sector (e.g., technology commercialization offices, patent agencies). These individuals will also be competitive Law School applicants, if they so chose to continue their professional studies, even though credits for their legal coursework in this program will not be transferable for Law School credits.

Curriculum

This is an interdisciplinary online program offered by the College of Medicine. It is taught by faculty from Drexel University College of Medicine’s Department of Microbiology and Immunology, Institute for Molecular Medicine and Infectious Disease teach the science courses in this program, which are offered online (certain elective courses are available face-to-face). Faculty from Drexel University’s Kline School of Law teach the entrepreneurship courses.

This non-thesis program consists of required and elective courses in science and law and a flexible experiential learning component or internship. Students can customize their plan of study depending on each individual’s academic and professional aspirations.

Students must complete a minimum total of 36.0 semester credits to graduate.

Full-time and Part-Time Options

Students may meet the degree requirements in either a full-time (at least 9.0 credits per semester) or part-time basis. Full-time students generally complete the program in 2 years. Part-time students must complete the program within six years. Students must enroll in at least 4.5 semester credits of College of Medicine courses to qualify for financial aid. For information regarding financial aid, please visit Drexel Central (<http://drexel.edu/drexelcentral>).

Program Contact Information

For questions about the curriculum and program goals, please contact one of the Program Directors:

Sandra Urdaneta-Hartmann, MD, PhD, MBA

Email: slu22@drexel.edu

Sandhya Kortagere, PhD

Email: sandhya.kortagere@drexelmed.edu

For questions about how to apply to the program, please contact an enrollment counselor at DUonline@drexel.edu (duonline@drexel.edu) or provide your contact information and someone will follow up with you.

Program Goals

Upon completion of the degree requirements for this MS program, students would have developed:

1. A broad core knowledge in biological sciences and legal aspects of biomedical innovation
2. More in-depth analytical, research, and critical thinking skills
3. An advanced understanding of professional ethics
4. Graduate-level communication and leadership skills
5. Other “work readiness” soft skills such as teamwork, problem-solving, knowledge of career opportunities, and networking.

Drexel Student Learning Priorities (DSLPs)

In the course of meeting these program-level goals, students would have also made progress in all of Drexel's Student Learning Priorities (DSLPs) (<http://www.drexel.edu/provost/irae/assessment/outcomes/dslp>) to help them build their future:

Core Intellectual and Practical Skills:

- Communication
- Creative and critical thinking
- Ethical reasoning
- Information literacy
- Self-directed learning

Experiential and Applied Learning:

- Global competence
- Leadership
- Professional practice
- Research, scholarship and creative expression
- Responsible citizenship

Admission Requirements

For acceptance into the MS in Biomedicine and Law program, post-college applicants must have completed a four-year degree program. A degree in biology, chemistry-based bachelor's degree program, or equivalent, is preferred but not required. A minimum GPA of 3.0 is strongly preferred.

Applicants must also fulfill the following requirements for consideration as defined by the Program Advisory Committee and the Graduate Program Committee (Curriculum & Evaluation Subcommittee) within the Graduate School of Biomedical Sciences and Professional Studies at the College of Medicine:

- Official transcripts from all colleges and universities attended;
- Essay/Personal statement
- Resume; and
- References from at least three instructors or professionals.

Official test scores from graduate admission exams, such as the Graduate Record Examination (GRE), are optional but highly desirable.

International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. Applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score on the Test of English as a Foreign Language (TOEFL). IELTS scores may be submitted in lieu of TOEFL scores. An evaluation by World Education Services (WES) is required for transcripts from institutions outside the United States.

Online applications (<https://online.drexel.edu/online-degrees/biomedical-degrees/ms-biomedicine-business/#apply>) are accepted all year round, but all admitted students initiate their studies in the following fall semester. Students are encouraged to apply no later than July 1 for consideration for admission the following fall semester. Students may defer admission by one year.

Program Contact Information

For questions about how to apply to the program, please contact an enrollment counselor at DUonline@drexel.edu (duonline@drexel.edu).

Degree Requirements

Courses with the MIIM or IDPT designation are offered by Drexel University College of Medicine and are taught in semester terms (fall and spring). These courses are available in a traditional (face-to-face), hybrid, and/or online formats. Most of these traditional courses and hybrid courses are offered in the evenings at either the Center City Campus or the Queen Lane Campus (<http://www.drexel.edu/about/directions>).

Courses offered by the Kline School of Law are designated as LSTU. They are taught mostly online in semester terms (fall and spring).

There are several ways to customize the experiential learning component (2.0 - 6.0 semester credits) so that it satisfies both the degree requirements and, especially, the student's own personal situation. The duration of the internship may vary. Shorter rotations may require that the student enroll in elective courses to meet the semester credit requirements for degree.

Program Requirements

Required Courses

Science Requirements		
MIIM 515S	Concepts in Biomedicine I	3.0
or MIIM 530S	Fundamentals of Molecular Medicine I	
MIIM 516S	Concepts in Biomedicine II	2.0
or MIIM 531S	Fundamentals of Molecular Medicine II	
MIIM 535S	Biomedical Technology Commercialization I	1.0
MIIM 536S	Biomedical Technology Commercialization II	1.0
MIIM 550S	Biomedicine Seminar	2.0
MIIM 605S	Experiential Learning	4.0-6.0
MIIM 631S	Biomedical Innovation Development and Management	4.0
MIIM 645S	Biomedical Career Explorations	1.0
Law Requirements		
LAW 783S	Bioethics	2.0
or IDPT 500S	Responsible Conduct of Research	
or MIIM 503S	Biomedical Ethics	
LSTU 500S	Introduction to the Legal System	3.0
LSTU 506S	Patients and Privacy: HIPAA and Related Regulations	3.0
Electives		
Select a minimum of 4 credits from the following Science electives:		4.0
MIIM 517S	Applied Statistics for Biomedical Sciences	
MIIM 521S	Biotechniques I: Molecular and Genomic Methods	
MIIM 533S	Molecular Medicine Journal Club II	
MIIM 534S	Molecular Medicine Journal Club I	
MIIM 540S	Viruses and Viral Infections	
MIIM 541S	Bacteria and Bacterial Infections	
MIIM 542S	Mycology and Fungal Infections	
MIIM 543S	Parasitology and Parasitic Diseases	
MIIM 545S	Introduction to Infectious Diseases	
MIIM 546S	Introduction to Immunology	
MIIM 606S	Microbiology and Immunology Seminar	
MIIM 613S	Emerging Infectious Diseases	
MIIM 653S	Clinical Correlations in Infectious Disease	
Select a minimum of 6 credits from the following Law electives:		6.0
LAW 610S	Reproductive Rights Law	
LAW 674S	Health Care Fraud and Abuse	
LAW 703S	Law and Entrepreneurship	
LAW 780S	Health Law I: Reg Qual Access	

LAW 781S	Health Law II: Regul Cost Access
LAW 782S	Health Policy Colloquium
LAW 784S	Health Care Finance
LAW 788S	Law of Medical Malpractice
LAW 792S	Food and Drug Law
LAW 872S	Health Law Legal Research
LSTU 501S	Compliance Skills: Auditing, Investigation & Reporting
LSTU 503S	Legal Research and Analysis
LSTU 504S	Health Care Rules and Regulations
LSTU 505S	Health Care Quality, Patient Safety and Risk Management
LSTU 507S	Risk Assessment and Management

Total Credits 36.0-38.0

Sample Plan of Study

Below is a sample full-time plan of study that can be completed in two years. Students may also opt to enroll part-time. Part-time students must complete the program within four years. To learn more about part-time options, please contact the Program Director, Sandra Urdaneta-Hartmann, MD, PhD, MBA at slu@drexel.edu for more information.

First Year

Fall		Credits
LAW 783S, IDPT 500S, or MIIM 503S	Bioethics Responsible Conduct of Research Biomedical Ethics	2.0
LSTU 500S	Introduction to the Legal System	3.0
MIIM 515S or 530S	Concepts in Biomedicine I Fundamentals of Molecular Medicine I	3.0
MIIM 550S	Biomedicine Seminar	2.0
	Term Credits	10.0

Spring

LSTU 503S*	Legal Research and Analysis (or other law elective)	3.0
LSTU 506S	Patients and Privacy: HIPAA and Related Regulations	3.0

MIIM 645S	Biomedical Career Explorations	1.0
	Term Credits	10.0

Total Credit: 38.0

* Other law electives are as follows: LAW 610S, LAW 674S, LAW 703S, LAW 780S, LAW 781S, LAW 782S, LAW 784S, LAW 788S, LAW 792S, LAW 872S, LSTU 501S, LSTU 504S, LSTU 505S, LSTU 507S

** Other science electives are as follows: MIIM 521S, MIIM 530S, MIIM 531S, MIIM 533S, MIIM 534S, MIIM 541S, MIIM 542S, MIIM 543S, MIIM 545S, MIIM 546S, MIIM 606S, MIIM 613S, MIIM 653S

Biotechnology

Major: Biotechnology

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 40.5

Classification of Instructional Programs (CIP) code: 26.1201

Standard Occupational Classification (SOC) code: 11-9121; 19-1029

About the Program

The MS in Biotechnology program is designed to train laboratory personnel in the theory and practice of state-of-the-art technologies for biochemical analysis. The program is targeted to individuals who will be seeking employment in biotechnology/pharmaceutical firms or academic laboratories and is appropriate for recent college graduates or experienced technicians. Graduates of this program will possess a set of technical skills that will make them very competitive for laboratory jobs in the academic or industrial sectors, or, if they are already employed, enhance their potential for advancement.

The program length is three semesters plus one summer session and includes both classes and hands-on practica.

Admission Requirements

For acceptance to the program, the applicant must have completed a four-year biology or chemistry-based bachelor's degree program, or equivalent, with at least a 3.0 GPA. Students must fulfill all requirements for consideration as defined by the Drexel University College of Medicine Biomedical Graduate Education Committee:

- official transcripts from all colleges and universities attended;
- official copies of entrance test scores and official test scores from the Graduate Record Examination (GRE);
- references from at least three instructors or professionals;
- an application fee, made payable to Drexel University is required for application processing (online application is free);
- International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. Applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score on the Test of English as a Foreign Language (TOEFL), or IELTS.

Students applying to the program will be expected to have undergraduate experience in chemistry, cell biology, biochemistry, and mathematics--including, at a minimum--two semesters each of inorganic chemistry, organic chemistry, physics, calculus and biology.

Visit Drexel University's Graduate Admissions (<http://www.drexel.edu/grad/programs/ducom>) site for additional information regarding specific requirements for applying to the College of Medicine as well as important application dates.

About the Curriculum

The program consists of two parts:

1. A set of required didactic courses designed to provide students with the theoretical underpinnings of modern Biochemistry and Biotechnology. This knowledge will form a foundation for the hands-on aspects of the second portion of the curriculum.

2. A set of four hands-on practica providing detailed exposure and experience in four different aspects of biochemistry/biotechnology. Each practica will be conducted under the close supervision of a faculty member with expertise in the area, and will progress from an initial set of experiments in which the results are already known (allowing students to become familiar with techniques) then progressing to a project tightly associated with the ongoing research in the mentor's laboratory.

Practica during the fall and spring semesters will be 4.0 semester credit hours. The summer practicum will be 8.0 semester credit hours, and will include preparation of a scholarly paper that reviews a topic related to the techniques associated with that particular practicum. Possible practica themes include: protein expression and purification; crystallography; gene expression and manipulation; protein-protein and protein-ligand interaction with SPR; and imaging/microscopy.

Program Requirements

Required Courses

BIOC 507S	Biochemistry Seminar Series *	4.0
BIOC 508S	Experimental Approaches to Biochemical Problems	3.0
BIOC 603S	Advanced Topics in Biochemistry and Molecular Biology	1.5
IDPT 500S	Responsible Conduct of Research	2.0
IDPT 521S	Molecular Structure and Metabolism	5.0
IDPT 526S	Cells to Systems	5.0

Required Practica

BIOC 513S	Biotechnology Practicum I	4.0
BIOC 514S	Biotechnology Practicum II	4.0
BIOC 515S	Biotechnology Practicum III	8.0
BIOC 516S	Biotechnology Practicum IV	4.0

Total Credits		40.5
---------------	--	------

* Taken each semester for one credit.

Sample Plan of Study

First Year

Fall		Credits
BIOC 507S	Biochemistry Seminar Series	1.0
BIOC 513S	Biotechnology Practicum I	4.0
IDPT 521S	Molecular Structure and Metabolism	5.0

Total Credit: 40.5

Cancer Biology

Major: Cancer Biology

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 40.0-43.0

Classification of Instructional Programs (CIP) code: 26.0911

Standard Occupational Classification (SOC) code: 19-1042

About the Program

The goal of the MS in Cancer Biology program is to provide a master's degree focused on the fundamentals of cancer from an interdisciplinary perspective, including:

- biology and molecular biology of cancer initiation;
- metastasis;
- treatment; and
- bioinformatics/systems biology.

The program is designed to meet the needs of two groups of individuals: (1) new or recent college graduates who wish to increase their marketability for jobs in academic or industrial laboratories through the acquisition of knowledge and skills more developed than obtained through a standard college curriculum; and (2) currently employed technical staff in the pharmaceutical or biotechnology industry (or academia) who wish to advance their position.

Consisting of both classroom and laboratory instruction, the program fills a need to train laboratory personnel in cancer theory and research. Graduates of this program will possess knowledge in both the theoretical as well as the practical level.

Certificate in Clinical Research

Certificate Level: Graduate

Admissions Requirements: Bachelor's degree or higher

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 15.0

Instructional Delivery: Online

Calendar Type: Semester

Expected Time to Completion: 1.5 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.0719

Standard Occupational Classification (SOC) Code: 11-9111

This part-time certificate program is a valuable professional resource for today's busy physicians, physician assistants, nurses, clinical fellows, research coordinators, and other individuals working in the clinical arena who want in-depth exposure to the skills and knowledge needed in the evolving clinical research field without having to commit to an entire master's program. All courses are conducted online to accommodate the needs of working professionals.

This program requires the successful completion of five graduate courses. Credits earned in the certificate program are recognized towards the Master of Science in Clinical Research Organization and Management. (<http://online.drexel.edu/online-degrees/biomedical-degrees/ms-crom>)

Admission Requirements

A bachelor's degree from a regionally accredited institution in the United States or an equivalent international institution.

Cumulative GPA of 3.0 (graduate degree GPA will be considered along with the undergraduate GPA).

Required documents:

- A completed application
- Official transcripts from all universities of colleges and other post-secondary educational institutions (including trade schools) attended
- Two letters of recommendation
- Essay on your past successes, goals and objectives for pursuing this program
- Resume
- Additional requirements for international students

A telephone interview may be requested

Certificate in Drug Discovery and Development

Certificate Level: Graduate

Admissions Requirements: Bachelor's degree or higher

Certificate Type: Post-baccalaureate

Number of Credits to Completion: 15.0

Instructional Delivery: Online

Calendar Type: Semester

Expected Time to Completion: 2 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 26.1001

Standard Occupational Classification (SOC) Code: 19-1042

The Certificate in Drug Discovery and Development program provides in-depth exposure to the multiple elements involved in drug discovery and development. This program has been designed to help students establish an enduring and productive career within the pharmaceutical and biotechnology industry. It covers all aspects of drug discovery and development ranging from the discovery and characterization of drug targets through to regulatory approval and commercialization. Students will also be exposed to business aspects as well as to other areas of biotechnology and to the basic sciences of pharmacology and physiology.

The Certificate in Drug Discovery and Development is available to individuals who have already obtained a BS or BA degree in some field of the biomedical or health sciences who may wish to pursue an industry-focused training. This includes individuals who wish to have a broader base of information about drug discovery and development, those who may wish to transition into the industry, or those who are already active in the industry and seek to increase their knowledge. The curriculum has been designed with the recognition that the complex pharmaceutical and biotechnical industries require a diversity of personnel experience.

Admission Requirements

Students must meet all entrance requirements of the MS program. The applicant must have completed a four-year bachelor's degree, nursing degree or equivalent program in a relevant subject area with a preferred GPA of at least 3.0. All students must submit two confidential letters of recommendation, a personal statement explaining their interest in the program and all previous official educational transcripts. No standardized test is required for admission but if one has been taken, such as the GRE and MCAT, the scores must be submitted for review. The merit of each applicant will be evaluated by the admissions committee of the program.

Certificate in Medical and Healthcare Simulation

Certificate Level: Graduate

Admissions Requirements: Bachelor's degree or higher

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 19.0

Instructional Delivery: Online, Campus

Calendar Type: Semester

Expected Time to Completion: 1.5 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.11999

Standard Occupational Classification (SOC) Code: 11-9121

The Post-Baccalaureate Certificate in Medical and Healthcare Simulation offers a sample of courses from the Master of Science in Medical Science (MSMS) degree program. A minimum of 19.0 credits must be completed over the part time curriculum. The 19.0 credits toward the certificate requirement must be completed within three years. Individuals who later decide to matriculate in the full MSMS program will be given MSMS degree credit for courses successfully completed.

Program Requirements

Required Courses

MSMS 501S	Simulation Curriculum and Design I	3.0
MSMS 506S	Debriefing in Simulation	3.0
MSMS 701S	Simulation Laboratory Practicum I	4.0
Select a Minimum of 9.0 Credits from the following:		9.0
MSMS 503S	Biostatistics in Healthcare Literature	
MSMS 504S	Principles of Assessment: Measurement Theory, Assessment Principles & Tools	
MSMS 505S	Standardized Patient Course	
MSMS 507S	High Fidelity, Low Fidelity and Task Trainers

Certificate in Quantitative Principles for Clinical Research

Certificate Level: Graduate

Admissions Requirements: Bachelor's degree or higher

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 9.0

Instructional Delivery: Online

Calendar Type: Semester

Expected Time to Completed: 1.5 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.0000; 51.0719

Standard Occupational Classification (SOC) Code: 11-9111

This certificate of study addresses the needs of residents and fellows to attain knowledge in the basic principles of clinical research - analyzing data, understanding medical literature, and communicating results. All coursework is online, providing flexibility for the trainees and training programs.

Students completing this certificate can then apply to either the Clinical Research Organization and Management (<http://online.drexel.edu/online-degrees/biomedical-degrees/ms-crom>) or the Clinical Research for Health Professionals (<http://online.drexel.edu/online-degrees/biomedical-degrees/ms-crhp>) program to obtain an MS degree.

Admissions Requirements

A bachelor's degree from a regionally accredited institution in the United States or an equivalent international institution.

Required Documents

- A completed application
- Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended
- Additional requirements for International Students

CR 525S	Scientific Writing and Medical Literature	3.0
Total Credits		9.0

Clinical Research for Health Professionals

Major: Clinical Research for Health Professionals

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 36.0

Classification of Instructional Programs (CIP) code: 51.0000

Standard Occupational Classification (SOC) code: 11-9199

About the Program

The MS in Clinical Research for Health Professionals program is a non-thesis curriculum designed for residents, fellows, and clinicians seeking knowledge in the conduct of translational and investigator-initiated research. The degree often acts as an advanced preparation for independent investigators and other practicing researchers familiar with clinical research, while developing their clinical careers.

The program is also available to other clinical health professionals such as nurses (with a minimum of a bachelor's degree required), medical technologists, etc., to help these individuals advance their professional opportunities.

Online course work coupled with supervised independent research activities will allow health care professionals in any academic hospital setting throughout the US to receive an MS degree from Drexel University College of Medicine (DUCoM).

Research Project

While the MS in Clinical Research for Health Professionals program does not require a thesis, the program is consistent with a master's level education that challenges students to clearly express well-organized thoughts in written form. The collection, analysis and refinement of scientific information to produce a professional-level written document are crucial skills for those in the health professions. This requirement will expose students to the entire process of developing an independent research project and reporting on that research project up to and including experiencing a facsimile of the peer review and re-submission process. The research project will provide students with the opportunity to develop, test and report on research hypotheses.

It is anticipated that each student will conduct a minimum of nine hours research per week for 3.0 credits per semester. Research may include a broad spectrum of clinical studies such as: retrospective studies; bench-top studies in conjunction or not with pharmaceutical companies; development of new clinical methodologies/techniques; or, development/evaluation of new medical devices. Research mentors must be established researchers with a doctoral degree. A curriculum vitae of the proposed research mentor must be submitted with the student's application for evaluation by the admissions committee and the program director. The appropriateness of the mentor will be evaluated by an ad hoc committee whose members come from the Graduate School faculty. The student must submit a 7-10 page journal-format paper at the end of each semester documenting their research and demonstrating that each successive semester's work builds upon their prior work.

For more information about the program and to apply, visit the Drexel University Online (<http://online.drexel.edu/online-degrees/biomedical-degrees/ms-crhp>) web site.

* Research may include a broad spectrum of clinical studies such as: retrospective studies; bench-top studies in conjunction or not with pharmaceutical companies; development of new clinical methodologies/ techniques; or, development/evaluation of new clinical devices.

Research mentors must be established researchers with a doctoral degree. A curriculum vitae of the proposed research mentor must be submitted with the student's application. The appropriateness of the mentor will be evaluated by an ad hoc committee whose members come from the Graduate School faculty.

The student must submit a 7-10 page journal-format paper at the end of each semester documenting their research and demonstrating that each

successive semester's work builds upon their prior work. Contact the program director for additional requirements.

Clinical Research Organization and Management

Major: Clinical Research Organization and Management

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 36.0

Classification of Instructional Programs (CIP) code: 51.0000

Standard Occupational Classification (SOC) code: 11-9199

About the Program

The Master of Science in Clinical Research Organization and Management is an online program designed both for individuals already trained in the area of clinical sciences, as well as for others who desire a focused education in the proper conduct of clinical research.

The Master of Science in Clinical Research Organization and Management program offers students a rigorous graduate education taught by leaders from the pharmaceutical, biotechnology and medical device industries, as well as from academic research centers. The program provides online courses that include scientific rationale related to the design and analysis of clinical trials, epidemiology and biostatistics, ethics-based reasoning for the conduct of research, clinical trial management and monitoring processes, and federal regulatory rules and policies essential to the development of a broadly-educated and well-prepared professional in clinical research and new therapeutic product investigation.

The program is designed so that graduates will be able to:

- Successfully apply the framework and philosophies of research to the management of clinical trials, employing quality principles of current good clinical practice to produce valid and useful data;
- Ensure that sound ethical principles and values are always recognized and upheld in research involving a human population;
- Use current statistical knowledge and methods in the design, implementation, conduct, and assessment of clinical trial programs; and
- Describe the scientific and clinical research literature to effectively interpret the results of clinical research, thereby enhancing the decision-making process.

Students work with advisors to customize their course plans to meet their career goals.

Program Delivery Options

All Clinical Research (CR) courses are offered solely online. Visit Drexel University Online for details.

Degree Requirements

The Master of Science in Clinical Research Organization and Management program consists of 12 courses (36.0 credits). Any courses offered by the Clinical Research Organization Management program (Subject code "CR") may be applied to fulfill the requirements of this major. No master's thesis is required.

The program is organized into five areas of study devoted to clinical research and related administrative and regulatory issues. Students may take courses within their preferred area of study, a cross-section of courses within other areas of study, **or any other Clinical Research (CR) courses being offered.**

Criminalistic Science

Major: Criminalistic Science

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 44.5

Classification of Instructional Programs (CIP) code: 43.0111

Standard Occupational Classification (SOC) code: 19-4092; 33-3021

About the Program

The School of Biomedical Sciences and Professional Studies offers the Master of Science in Criminalistic Science. The Master of Science in Criminalistic Science is designed to introduce students to the basic principles of Criminalistic Science while also providing opportunities to pursue either more traditional and/or more innovative concentrations of study.

Criminalistics is defined as the scientific study and analysis of crime scenes and the evidence within those scenes to solve a crime and apprehend the perpetrator of the crime. The disciplines within criminalistics are science based, with most using multiple combinations of the natural sciences to conduct examinations and analysis of evidence and crime scenes.

In addition to required courses in criminal law, trial process and the use of evidence, the Master of Science in Criminalistic Science program offers courses in fingerprint science, forensic engineering, motor vehicle crash reconstruction, firearms and tool mark analysis, fire and explosion analysis, footwear and tire track analysis, bloodstain pattern analysis, trace materials and forensic geology and botany, and nuclear, biological, chemical terrorism/mass disaster management.

Admission Requirements

Applicants must have a bachelor's degree from an accredited US college or university or its equivalent. Official general GRE scores are required for admission. Typical applicants would have a minimum 3.0 GPA.

Selection is based upon academic qualifications, standardized test scores, references, an evaluation of the candidate's goals and commitment, and a telephone interview.

Each applicant's academic record will be evaluated based upon its individual merits. Since consideration for employment within the field of criminalistic science necessitates the absence of a criminal background, it is expected that all individuals applying to this program will have no history of criminal behavior, including prior illicit drug and/or prescription drug abuse.

Drexel Pathway to Medical School

Major: Drexel Pathway to Medical School

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 47.0

Classification of Instructional Programs (CIP) code: 26.9999

Standard Occupational Classification (SOC) code: 19-1029

About the Program

This intensive, one-year master's degree program provides qualifying candidates a conditional acceptance for matriculation into Drexel University's College of Medicine following successful completion of the program. Small-group instruction is provided during the intensive introductory summer enrichment portion of the curriculum and individual counseling with an administrative advocate is available throughout the program.

Drexel University College of Medicine
Division of Pre-medical and Pre-health Programs
Graduate School of Biomedical Sciences and Professional Studies
New College Building, Room 4104
245 North 15th Street, Mail Stop 344
Philadelphia, PA 19102

Phone: 215-762-4692

Email: medicallsciences@drexelmed.edu

Visit the Drexel University College of Medicine's website: Drexel Pathway to Medical School Program (<http://www.drexelmed.edu/Home/AcademicPrograms/GraduateSchoolofBiomedSciencesProfStudies/DrexelPathwaytoMedicalSchool.aspx>).

Admission Requirements

The program is open to all premedical students who have successfully completed the prerequisite coursework for medical school with a grade of C or better. A minimum 2.90 cumulative and sciences undergraduate GPA is required for application to the program, as well as a total MCAT score of 25 (former exam format) with no score in any section less than 8, or a total 45% percentile (new MCAT format) with no subsection less than 45% percentile, subject to change. Applicants who meet these requirements are considered for an interview by the admissions committee of the College of Medicine.

Drug Discovery and Development

Major: Drug Discovery and Development

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 38.0

Classification of Instructional Programs (CIP) code: 26.1001

Standard Occupational Classification (SOC) code: 19-1029

About the Program

The MS in Drug Discovery and Development program provides in-depth exposure to the multiple elements involved in drug discovery and development. This unique program provides the rigorous scientific and technical training necessary to succeed in the complex and multidisciplinary field of drug discovery. It has been designed to prepare students for a smooth transition into an enduring and productive career within the pharmaceutical and biotechnology industry. It covers all aspects of drug discovery and development beginning with the identification of a drug target and proceeding through to clinical trials, regulatory approval and commercialization. Students will also be introduced to business aspects as well as to other areas of biotechnology and to the basic sciences of pharmacology and physiology.

The MS in Drug Discovery and Development is available to individuals who have already obtained a BS or BA degree in the biomedical sciences, health sciences or related fields who wish to pursue an industry-focused master's-level degree. This includes individuals who plan to pursue a career in the pharmaceutical or biotechnical industries.

This program is also intended for individuals from other disciplines who wish to have a broader base of information about drug discovery and development, those who may wish to transition into the industry, or those who are already active in the industry and seek to increase their

knowledge. The curriculum has been designed with the recognition that the pharmaceutical and biotechnical industries require a diversity of personnel experience and expertise.

For more information about this program, visit the College of Medicine's Biomedical Graduate Studies (<http://www.drexel.edu/medicine/Academics/Graduate-School/Drug-Discovery-Development>) page.

Admission Requirements

For acceptance to the program, the applicant must have completed a four-year biology or chemistry-based bachelor's degree program, or equivalent, with at least a 3.0 GPA. Students must fulfill all requirements for consideration as defined by the Drexel University College of Medicine Biomedical Graduate Education Committee:

- official transcripts from all colleges and universities attended;
- official copies of entrance test scores and official test scores from the Graduate Record Examination (GRE) for applicants to the full-time program;
- references from at least three instructors or professionals;
- an application fee is required for the full-time program;
- International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. Applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score on the Test of English as a Foreign Language (TOEFL), or IELTS.

Students applying to the program will be expected to have undergraduate experience in chemistry, cell biology, biochemistry, and mathematics and are encouraged to have training in inorganic chemistry, organic chemistry, physics, calculus and biology.

Visit Drexel University's Graduate Admissions (<http://www.drexel.edu/grad/programs/ducom>) site for additional information regarding specific requirements for applying to the Graduate School of Biomedical Science and Professional Studies in the College of Medicine as well as important application dates.

For additional information on how to apply, visit Drexel's Admissions page for Biomedical Graduate Studies (<http://www.drexel.edu/grad/programs/ducom/apply>).

Degree Requirements

The curriculum is designed to provide students with a detailed core focusing on the many facets of the drug discovery and development process, while simultaneously providing students with multiple options to pursue related areas of interest.

Required Courses

IDPT 500S	Responsible Conduct of Research	2.0-3.0
or CR 612S	Fundamentals of Compliance	
NEUR 500S	Statistics for Neuro/Pharm Research	2.0-3.0
or IDPT 501S	Biostatistics I	
or CR 520S	Applications of Clinical Research Biostatistics	
PHRM 502S	Current Topics in Pharmacology & Physiology	1.0
PHRM 512S	Graduate Pharmacology	3.0
PHRM 517S	Advanced Topics in Pharmacology	1.0
PHRM 525S	Drug Discovery and Development I	3.0
PHRM 526S	Drug Discovery and Development II	3.0
PHRM 605S	Research in Drug Discovery and Development	4.0

About the Graduate Minor

The Graduate Minor in Drug Discovery and Development provides exposure to the multiple elements involved in drug discovery and development. This program has been designed to help students transition to a productive career within the pharmaceutical and biotechnology industry. It covers all aspects of drug discovery and development ranging from the discovery and characterization of drug targets through to regulatory approval and commercialization. Students will also be exposed to business aspects as well as to other areas of biotechnology and to the basic sciences of pharmacology and physiology.

Admission Requirements

Requirements for admission are enrollment in a biomedical science, biomedical engineering or biology graduate program and the approval of the parent program's director.

Evening Post-Baccalaureate Pre-Medical Certificate Program

Certificate Level: Undergraduate

Admissions Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 32.0

Instructional Delivery: Campus

Calendar Type: Semester

Expected Time to Completion: 2 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.1199

Standard Occupational Classification (SOC) Code: 11-9121

The School of Biomedical Sciences and Professional Studies at Drexel University's College of Medicine offers the part-time Evening Post-Baccalaureate Pre-Medical certificate (PMED). This program gives individuals who hold a non-science baccalaureate degree the opportunity to continue working while they take courses in the evening to prepare themselves for medical, veterinary, dental, podiatric, chiropractic, or other allied health professional schools. This program also affords the individual who took science courses many years ago the opportunity to revisit the sciences. The structured program is the equivalent of five semesters completed in succession.

Linkage and affiliation agreements have been established for successful students upon completion of the PMED program. These schools include Drexel University College of Medicine, Edward Via College of Osteopathic Medicine, Philadelphia College of Osteopathic Medicine, and the Robert Wood Johnson School of Medicine.

The program consists of 5 semesters parsed out over 2 years. The curriculum offers the prerequisite science courses required by most health professional schools. During the first year, general chemistry and general physics with laboratories are offered. During the second year, students take organic chemistry and general biology in the summer and fall semesters. During the final semester, a formal MCAT review course is offered to students, expense free. In addition, two elective courses

are offered including Molecular Biology & Biochemistry and Sociology & Psychology.

Admission Requirements

Students applying to the program must have a bachelor's degree from an accredited institution in the United States. Admission into the program is competitive because of the limited number of seats. Applicants are accepted on a rolling admissions basis.

An applicant should have a minimum combined SAT score of 1000 or ACT score of 21 and a minimum undergraduate grade point average of 3.00. For those individuals far removed from the college years, additional factors, or other more recent coursework, will be considered.

Applicants to the program should have at least 6.0 semester credits of coursework in English literature and the behavioral sciences (psychology, sociology, or philosophy), as that is a requirement for admission into most health professional schools. The opportunity exists within the program to acquire these courses if a student without these courses is accepted. A strong understanding of algebra and trigonometry is a prerequisite for the program. Calculus will also be beneficial.

The program's application can be found on the College of Medicine's Evening Post-Baccalaureate Pre-Med Certificate Admissions (<http://www.drexelmed.edu/Home/Admissions/ProfessionalStudiesintheHealthSciences/EveningPostBaccalaureatePremedical.aspx>) web page.

Program Requirements

Required Courses

PMED 111S	General Chemistry I	3.0
PMED 112S	General Chemistry I Lab	1.0
PMED 121S	General Physics I	3.0
PMED 122S	General Physics I Lab	1.0
PMED 131S	General Chemistry II	3.0
PMED 132S	General Chemistry II Lab	1.0
PMED 141S	General Physics II	3.0
PMED 142S	General Physics II Lab	1.0
PMED 211S	General Biology I	3.0
PMED 212S	General Biology I Lab	1.0
PMED 221S	Organic Chemistry I	3.0
PMED 222S	Organic Chemistry I Lab	1.0
PMED 231S	General Biology II	3.0
PMED 232S	General Biology II Lab	1.0
PMED 241S	Organic Chemistry II	3.0
PMED 242S	Organic Chemistry II Lab	1.0

Optional

PMED 151S	College Algebra & Trigonometry	
PMED 240S	Conceptual Reviews in General and Organic Chemistry	
PMED 800S	Registered for Degree Only	
PMED T180S	Special Topics in Pre-Medical	
PMED T280S	Special Topics in Pre-Medical	

Total Credits 32.0

Additional Information

Forensic Science

Major: Forensic Science

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 45.0

Classification of Instructional Programs (CIP) code: 43.0106

Standard Occupational Classification (SOC) code: 19-4092

About the Program

The Graduate School of Biomedical Sciences and Professional Studies offers the Master of Science in Forensic Science. The curriculum is designed to provide students with a set of core courses that serve as an introduction to the many facets of forensic science as well as an essential foundation for several more specialized disciplines in the field. There are multiple options for specialization, and courses required for each of the concentrations enable students to acquire specialized knowledge on topics that are directly related to their specific areas of interest and career goals.

For more information about this program, visit the College of Medicine's Master of Science in Forensic Science (<http://www.drexel.edu/medicine/Academics/Graduate-School/Forensic-Science>) web page.

Admission Requirements

The forensic program is limited to those students whose undergraduate degree contains a strong background in the natural sciences. The program is designed to attract students at a multidisciplinary level. Students are required to have an undergraduate degree in the natural sciences. A minimum of 3.0 GPA on a 4.0 system is desired; however, supplemental materials and overall experience are factored into the acceptance process. The following must be submitted for consideration:

- Application with \$75.00 fee
- Official transcripts from each college and/or university attended
- Three letters of recommendation (two must be academic)
- Official MCAT or GRE test scores

Contact information

For additional information on how to apply for this program, contact:

Requirements

Required Core Courses:

MFSP 540S	Basic Laboratory Techniques and Quality Assurance/Quality Control	3.0
MFSP 550S	Biological Aspects of the Forensic Sciences	2.0

MFSP 557S	Drug Chemistry	2.0
MFSP 561S	Techniques of Crime Scene Investigation	3.0
MFSP 564S	Forensic Comparative Science	3.0
MFSP 572S	Forensic Research Project I	3.0
MFSP 573S	Forensic Research Project II	1.5
MFSP 574S	Forensic Research Paper	1.0
MFSP 575S	Introduction to Criminal Law and Trial Process	3.0
MFSP 576S	Ethics for the Forensic Scientist	2.0
MFSP 592S	Forensic Graduate Seminar	1.5
MFSP 602S	Professional Courtroom Testimony & Moot Court	3.0
Concentrations and electives		17.0

Complete one concentration and free electives for a total of 17.0 credits

Criminalistic Concentration (14.0 credits):

MFSP 562S	Arson and Explosive Analysis	
MFSP 563S	Latent Fingerprint Analysis	
MFSP 571S	Bloodstain Pattern Analysis	
MFSP 565S	Firearms and Tool Mark Analysis	
MFSP 578S	Forensic Photography	

Molecular Biology Concentration (14.0 credits)

IDPT 501S	Biostatistics I	
IHS 514S	Molecular Biology & Biochemistry of the Cell *	
MFSP 577S	Genetics for the Forensic Scientist	
MFSP 589S	Forensic DNA Analysis	
MFSP 597S	Forensic Serology	

Forensic Medicine Concentration (13.0 credits)

MFSP 551S	Human Function	
MFSP 552S	Structure of the Human Body	
MFSP 553S	Human Structure Lab	
MFSP 583S	The Autopsy in Clinical Forensic Medicine	
MFSP 584S	Introduction to Forensic Radiology	
MFSP 585S	Clinical Forensic Emergency Medicine and Traumatology	

Chemistry (12.0 credits)

CHEM 530	Analytical Chemistry I **	
CHEM 531	Analytical Chemistry II *	
CHEM 541	Organic Chemistry I **	
CHEM 755	Mass Spectrometry **	
CHEM 789	Experimental Design and Statistics in Chemistry **	
MFSP 558S	Instrumental Analysis	

Elective Courses:

Students select electives from the following list with the approval of a program director.

IHS 513S	Scientific Writing for Healthcare Professionals	
MFSP 554S	Principles of Forensic Pathology	
MFSP 555S	Forensic Sciences Summer Practicum	
MFSP 556S	Forensic Anthropology and Topics in Human Identification	
MFSP 566S	Techniques of interview and interrogation	
MFSP 568S	Vehicle Accident Reconstruction and Analysis	
MFSP 569S	Footwear and Tire Track Analysis	
MFSP 570S	Nuclear/Biological/Chemical Terrorism	
MFSP 579S	Forensic Microbiology	
MFSP 580S	Principles of Immunology	
MFSP 581S	Human Osteology and Calcified Tissue Biology I	
MFSP 582S	Human Osteology and Calcified Tissue Biology II	
MFSP 586S	Introduction to Forensic Pediatrics	
MFSP 587S	Introduction to Forensic Psychology	
MFSP 588S	Advanced Topics in Cell Biology	
MFSP 590S	Homicide Investigation	
MFSP 591S	Criminal Investigative Analysis I	
MFSP 593S	Cyber Crime	
MFSP 595S	Criminal Investigative Analysis II	

MFSP 599S	Special Topics	
Total Credits		45.0

* May be listed as IHS 999S

** Course numbers that do not have an S suffix are quarter courses but the credits have been converted to semester values.

Histotechnology

Major: Histotechnology

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 47.0

Classification of Instructional Programs (CIP) code: 51.1007

Standard Occupational Classification (SOC) code: 29-2011; 29-2012

About the Program

The Graduate School of Biomedical Sciences and Professional Studies offers the Master of Science in Histotechnology program. This one-year (12-month) program combines academic studies with a clinical practicum to prepare the students to perform complex tissue specimen preparations in the histology laboratory. The program provides advanced training and is designed to enable graduates to work as highly qualified histotechnologists under the supervision of pathologists.

Coursework includes histology, biochemistry, advanced histotechnology, anatomy, physiology, microbiology, medical ethics, laboratory management and leadership skills. In addition to the course work, students complete a three-month practicum designed to allow students to apply the knowledge and techniques learned during their didactic courses in a clinical hospital setting. The practicum allows the student the opportunity to perform routine as well as specialized, histotechnology techniques under the supervision of a qualified histotechnologist.

Program Accreditation

The *National Accrediting Agency for Clinical Laboratory Sciences (NAACLS)* has established national standards for Histotechnology training programs. The standards include both didactic course work and clinical experiences necessary to properly educate a Histotechnologist. The Master of Histotechnology program at Drexel University College of Medicine is accredited by NAACLS. Visit the NAACLS (<http://www.naacls.org>) website for more information about the professional activities of this organization.

Professional Certification

The *American Society for Clinical Pathology Board of Certification (ASCP BOC)* has established a national certification program for Histotechnologists. Graduates of the Master of Histotechnology program are eligible to sit for the national certification examination for Histotechnology. Visit the ASCP BOC (<http://www.ascp.org/Board-of-Certification>) website to read more about the certification program and the professional activities of this organization.

Professional Affiliation

The *National Society for Histotechnology (NSH)* is a non-profit organization, committed to the advancement of Histotechnology, its practitioners and quality standards of practice through leadership, education and advocacy. Visit the NSH website to read more about the professional activities of this organization.

Career Opportunities

Histotechnologists are employed in community hospitals, academic centers such as medical schools and university hospitals, private pathology laboratories, medical research centers, government hospitals. Additional opportunities are available in clinical and industrial research, veterinary pathology, marine biology and forensic pathology.

For more information about this program, visit the College of Medicine's Master of Science in Histotechnology (<http://www.drexelmed.edu/Home/AcademicPrograms/ProfessionalStudiesintheHealthSciences/AlliedHealthProfessionPrograms/HistotechnologyProgram.aspx>) page.

Admission Requirements

A bachelor's degree in a biological or allied health science, with a cumulative GPA of approximately 2.75, is the minimum requirement for acceptance into the Master's Degree Program. Prerequisite course work includes mathematics, English composition, general chemistry, organic and/or biochemistry and biological science. Microbiology, anatomy and histology are recommended but not required.

All candidates will be required to have a formal interview with one of the program director's prior to final acceptance. Deadline for submission of the application is the second Friday in June of the year in which the students plan to enroll.

Candidates for admission must provide the following credentials:

- Completed application form
- Resume
- Official Transcripts from all schools attended or where coursework was attempted or taken
- Official General Graduate Record Examination (GRE) scores
- Three letters of evaluation
- Self-assessment essays:
 - A. Discuss personal goals, conditions, or career aspirations that motivate you to pursue graduate study at Drexel University.
 - B. What are your most important accomplishments?
 - C. What do you expect to achieve through this program?

The application and supporting material must be received no later than the program deadline date.

Immunology

Major: Immunology

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 36.0

Classification of Instructional Programs (CIP) code: 26.0507

Standard Occupational Classification (SOC) code: 11-9121

About the Program

Mission Statement

The Master of Science in Immunology, offered by the Department of Microbiology and Immunology and the Institute for Molecular Medicine and Infectious Disease (IIMMID), provides education and training in areas of research in basic and clinical immunology and immunologically based diseases. Students in this program acquire theoretical and practical knowledge about the normal functions of the immune system and disease pathogenesis associated with immunological dysfunction. Students also learn how this knowledge is applied to develop tools for diagnosis, treatment, prognosis, and prevention of immunologically based diseases. Graduates from this program will be ready to enter the biotechnology workforce and are attractive candidates for doctoral programs in science and medicine.

The Master of Science in Immunology program is designed to provide academic and practical biotechnical knowledge in translational research, particularly in the areas of immunotherapeutic and vaccine development.

Curriculum

The two year non-thesis program encompasses fundamental requirements to establish a sound grounding in immunology, biochemistry, genetics, cellular and molecular biology. The program

is typically completed in two full-time years (four semesters of at least nine credits) of required and elective graduate courses, and one or more experiential research components in the first or second year. The flexibility of the curriculum enables students to complete the degree requirement within 18 months on an accelerated basis, and up to 4 years on a part-time basis. The successful completion of the degree will be determined by grades obtained in the graduate courses, participation in seminars and journal clubs, and performance in the research component. A minimum of 36.0 credits is required to graduate, with at least 6 of those earned as research credits.

The experiential research component of the curriculum can be fulfilled by two alternative approaches. Most students choose to engage in an intensive 6.0 credit hands-on research internship in which a 12-16 week research program will be undertaken in a laboratory at Drexel University, another academic institution, or at a biotechnology or biopharmaceutical company. Alternatively, students may choose to engage in a less intensive experience spanning two semesters, or conduct an independent research project, with the approval and supervision of Program Directors.

Traditional (Face-to-Face), Hybrid, or Online Learning Options

Classes can be attended at any of Drexel College of Medicine locations: Center City and Queen Lane campuses in Philadelphia. State-of-the-art video conferencing provides real-time interactive learning at these locations. Most classes are held in the late afternoon/early evening to facilitate participation of working professionals. The program may also be completed fully online, offered through Drexel University Online (<https://online.drexel.edu/online-degrees/biomedical-degrees/ms-immunology>). All required courses and most electives have online sections and online students experience the same curriculum as face-to-face or hybrid students. Online sections are designed to maximize interactions among students and faculty, and may include live web sessions. Individual students also may choose a mix of traditional and online (hybrid) courses. The goal is to provide maximum scheduling flexibility.

Program Contact information

For more detailed information about the curriculum and program goals, please contact either:

Stephen Jennings, PhD

Email: stephen.jennings@drexelmed.edu

or

Pooja Jain, PhD

Email: pooja.jain@drexelmed.edu

Program Goals

Over the course of completing the program, students will develop

1. Core knowledge of molecular and cellular disciplines that constitute biomedical sciences
2. Working knowledge of normal functions of the immune system at the cellular and molecular level and how immunological dysfunction contributes to immunologically based disease

3. Practical knowledge and skills that help identify gaps in the biomedical field for the development of molecular diagnostic and therapeutic tools.
4. Skills in basic, translational, or clinical research
5. Professional ethics necessary for the responsible conduct of research
6. Communication and leadership skills
7. Other soft skills (e.g., collaboration, problem solving, career planning, networking) that facilitate career advancement and promotion

In the course of meeting these program-level goals, students will have also made progress in all of the Drexel Student Learning Priorities (DSLPS) to help them build their futures.

Core Intellectual and Practical Skills:

- Communication
- Critical and creative thinking
- Ethical reasoning
- Information literacy
- Self-directed learning
- Technology use

Experiential and Applied Learning:

- Global competence
- Leadership
- Professional practice
- Research, scholarship and creative expression
- Responsible citizenship

Admission Requirements

For acceptance into the Master of Science in Immunology program, the applicant must have completed a four-year biology or chemistry-based BA or BS degree program with undergraduate coursework in biology, microbiology, immunology, chemistry, biochemistry, mathematics, and/or other related subjects. Although a minimum cumulative grade point average (GPA) of 3.00 is strongly desired, an applicant with a lower cumulative GPA will be considered if other strengths are apparent in the application.

To be considered for acceptance, an applicant must provide the following as part of a complete online application for admission:

- Official transcripts from all colleges and universities attended
- A current *curriculum vitae* (CV) or resume
- References from at least three instructors or professionals

Although standardized test scores are not required for admission, official copies of scores from the Graduate Record Examination (GRE) or Medical College Admission Test (MCAT) will be considered if submitted as part of the application.

International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. In addition to the above requirements, applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS).

Acceptance into the program will be decided by considering the sum of the applicant's undergraduate curriculum, cumulative GPA, GRE/MCAT scores, recommendation letters, and relevant research and professional experience.

Online applications are considered year round. Potential students are encouraged to apply no later than July 1 for Fall admission, or December 1 for Spring admission.

For additional information about the program and to access the online application, view the Master of Science in Immunology (<http://drexel.edu/medicine/academics/Graduate-School/immunology>) page on the College of Medicine's website.

Degree Requirements

About the Curriculum

Through the combination of required and elective courses, a total of 36.0 credits is required to successfully obtain the degree of Masters of Science in Molecular Medicine. In order to maintain full-time student status, a minimum of 9.0 credits must be taken in any given academic semester. In most cases, there are both traditional (face-to-face) and online sections for each course). Students should work with their program advisors to plan their course of study.

Research Requirements

The research component of the curriculum can be fulfilled by two alternative approaches. Most student choose to engage in a hands-on research internship in which a 12 week research program will be undertaken in a laboratory at Drexel, another academic institution, or at a biotechnology or biopharmaceutical company. Alternatively, students may choose to engage in an independent research project, with the approval and supervision of Program Directors.

For an individualized plan of study listing the sequence of courses to be completed, students should work with their program advisor.

Program Requirements

Required Courses

IDPT 500S	Responsible Conduct of Research	2.0
or MIIM 503S	Biomedical Ethics	
IDPT 501S	Biostatistics I	2.0
or MIIM 517S	Applied Statistics for Biomedical Sciences	
MIIM 527S	Immunology, Immunopathology and Infectious Diseases	3.0
MIIM 530S	Fundamentals of Molecular Medicine I	3.0
MIIM 531S	Fundamentals of Molecular Medicine II	2.0
MIIM 532S	Fundamentals of Molecular Medicine III	2.0
MIIM 533S	Molecular Medicine Journal Club II	1.0
MIIM 534S	Molecular Medicine Journal Club I	1.0
MIIM 606S	Microbiology and Immunology Seminar	1.0
MIIM 546S	Introduction to Immunology	2.0
MIIM 654S	Clinical Correlations in Immunology	3.0

To complete the MS in Immunology degree, 36.0 credits must be accrued. Students may choose from a menu of additional electives, depending on their academic goals. 14.0

Possible Electives

MIIM 502S	Micro & Immuno. Journal Club
MIIM 521S	Biotechniques I: Molecular and Genomic Methods
MIIM 522S	Biotechniques II: Immunological Methods
MIIM 524S	Vaccines and Vaccine Development
MIIM 525S	Principles of Biocontainment
MIIM 526S	Animal Models in Biotechnology

MIIM 527S	Immunology, Immunopathology and Infectious Diseases
MIIM 540S	Viruses and Viral Infections
MIIM 541S	Bacteria and Bacterial Infections
MIIM 542S	Mycology and Fungal Infections
MIIM 543S	Parasitology and Parasitic Diseases
MIIM 555S	Molec. Mech. Of Micro. Path
MIIM 607S	IMMUNOLOGY II
MIIM 612S	MOLEC MECH OF VIRAL PATHOGENSI
MIIM 613S	Emerging Infectious Diseases
MIIM 615S	Experimental Therapeutics
MIIM 621S	Biomedical Research I
MIIM 622S	Biomedical Research II
MIIM 625S	Advanced Molecular Virology
MIIM 630S	Advanced Molecular Biology
MIIM 651S	Research Internship in Immunology
MLAS 529S	Molecular Genetics
Total Credits	36.0

Infectious Disease

Major: Infectious Disease

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 36.0

Classification of Instructional Programs (CIP) code: 26.0508

Standard Occupational Classification (SOC) code: 19-1022; 19-1029

About the Program

Mission Statement

The Master of Science in Infectious Disease (<http://www.drexel.edu/medicine/Academics/Graduate-School/Infectious-Disease>) program, offered by the Department of Microbiology and Immunology (<http://www.drexel.edu/medicine/About/Departments/Microbiology-Immunology>) and by the Institute for Molecular Medicine and Infectious Disease (<http://www.drexel.edu/medicine/About/Departments/Institute-for-Molecular-Medicine-Infectious-Disease>) (IMMID), provides graduate-level training in the area of infectious disease. Classroom activities, online learning, and research experiences cover fundamentals of molecular biology, cell biology, and immunology, as well as basic, translational, and clinical aspects of diseases caused by important infectious pathogens, including HIV, methicillin-resistant *Staphylococcus aureus* (MRSA), malarial parasites, influenza virus, and Zika virus. Elective courses offer highly focused studies of topics relevant to infectious disease, including: vaccines and vaccine development; viral, bacterial, parasitic, and fungal pathogens; emerging pathogens; principles of biocontainment; and experimental therapeutics.

The program is designed to prepare students for careers in infectious disease in government, industry, and academic environments. The program is ideally suited for enhancing the scientific credentials of recent college graduates, early career scientists, premedical students, industrial employees, and clinical laboratory technicians.

Curriculum

This non-thesis degree program comprises numerous required and elective graduate courses, as well as an elective research internship that can be completed during the course of the training program. Although most learners will complete the program in two years (four semesters) as full-time students, some may opt to enroll on a part-time basis, taking up to six years to complete the degree program. Elective courses

available to students in the program provide knowledge and expertise in areas relevant to infectious disease research, such as emerging infectious diseases, vaccines and vaccine development, biotechniques and laboratory research, and principles of biocontainment. The successful completion of the degree will be determined by grades obtained in the graduate courses, participation in seminars and journal clubs, and (if applicable) performance in the experiential learning component. The degree is conferred upon successful completion of a minimum of 36.0 credits of course work.

Learning Options

The Master of Science in Infectious Disease Program is available in two learning formats. Students can enroll in the face-to-face/hybrid program and attend classes at the Center City and Queen Lane campuses of the Drexel University College of Medicine in Philadelphia. Most classes are held in the late afternoon/early evening to facilitate participation of working professionals. All required and most elective courses are offered both live and online, providing the student the flexibility to formulate a hybrid plan of study that includes a mix of traditional, face-to-face courses and online courses.

The online degree program which is offered through Drexel University Online, features the same curriculum as the face-to-face/hybrid program, including the experiential research internship. Online courses are designed in a way to maximize interactions among students and faculty, including live web sessions with faculty and guest speakers.

These different program formats students with maximum flexibility to meet their schedule demands and accommodate their learning preferences.

Experiential Learning

A signature element of the Program is the Research Internship in Infectious Disease. The internship encompasses one of three specific areas of research in the field of infectious disease:

- basic discovery involving infectious bacterial, viral, fungal, or parasitic pathogens that cause human disease;
- translational research focused on the development of new approaches to diagnose, prevent, or treat infectious diseases; and
- clinical infectious disease research focused on infectious diseases in humans.

Most students choose to engage in a hands-on research internship consisting of an 18-week research project in a laboratory at Drexel University, another academic institution, or at a biotechnology or biopharmaceutical company. Students in the online program can make arrangements with academic or industrial institutions in their home regions rather than in the Greater Philadelphia region. Alternatively, traditional and online students may choose to engage in independent research projects with the approval and supervision of the Program Director.

Program Contact Information

For more detailed information about the curriculum and program goals, please contact:

Fred Krebs, Ph.D. (Director)

Email: fred.krebs@drexelmed.edu

Visit the websites for the face-to-face/hybrid and online Master of Science in Infectious Disease programs for more detailed information. For additional information regarding application deadlines, the online application process, and specific requirements for applying to the College

of Medicine, visit Drexel University's Graduate Admissions (<http://www.drexel.edu/grad/programs/ducom/infectious-disease>) site.

Program Goals

Upon completion of the Master of Science in Infectious Disease Program, students will have achieved the following program-level goals:

1. **Develop broad core knowledge in the biological sciences.**
 - Demonstrate proficiency in fundamental concepts in molecular biology, biochemistry, and cell biology.
 - Demonstrate proficiency in these areas as they are described and applied in the primary scientific literature.
2. **Develop a working knowledge of infectious disease pathogens and the diseases that they cause.**
 - Demonstrate basic science knowledge of pathogens that cause human disease in the fields of virology, parasitology, bacteriology, mycology, and others.
 - Identify diseases caused by these pathogens and the mechanisms of pathogenesis.
 - Be able to critically analyze and evaluate publications in the primary literature that describe basic, translational, and clinical infectious disease research.
3. **Develop skills in analytical and critical thinking.**
 - Develop proficiency in critical analyses of ideas and concepts related to infectious disease research documented in the primary literature.
 - Use critical thinking skills in collegial presentations and discussions of research focused on infectious diseases and the pathogens that cause them.
4. **Develop skills in basic, translational, or clinical research.**
 - Develop new laboratory skills or enhance pre-existing skills.
 - Be proficient in collecting information and data from electronic source material and databases.
 - Apply analytical skills and critical thinking to data analyses.
5. **Develop professional ethics necessary for the responsible conduct of research.**
 - Be able to identify and evaluate professional ethical dilemmas, and discuss appropriate resolutions.
 - Apply professional ethical standards such as appropriate attribution of ideas, good recordkeeping, and truthful presentation of data/facts and conclusions.
6. **Develop communication and leadership skills.**
 - Be proficient at developing oral and/or written comprehensive reports, presenting facts, analysis, and conclusions.
 - Be proficient at using appropriate technologies for communication.
 - Be able to interact and work effectively with others in work settings involving cultural and demographic diversity.
7. **Develop other soft skills (e.g. collaboration, problem solving, career planning, networking) that facilitate career advancement and promotion.**
 - Develop a working knowledge of career opportunities in the desired field.
 - Effectively present a professional profile of oneself.
 - Be proficient at time and task management.
 - Be able to work effectively in collaborative and team-driven settings.

- Begin the development of problem-solving skills to be used in the workplace.
- Begin to establish a professional network.

Drexel Student Learning Priorities (DSLPS)

In the course of meeting these program-level goals, students will have also made progress in all of the Drexel Student Learning Priorities (DSLPS) (<http://www.drexel.edu/provost/irae/assessment/outcomes/dslp>) to help them build their futures:

Core Intellectual and Practical Skills

- Communication
- Critical and creative thinking
- Ethical reasoning
- Information literacy
- Self-directed learning
- Technology use

Experiential and Applied Learning

- Global competence
- Leadership
- Professional practice
- Research, scholarship, and creative expression
- Responsible citizenship

Admission Requirements

For acceptance into the Master of Science in Infectious Disease program, the applicant must have completed a four-year biology or chemistry-related BA or BS degree program with undergraduate coursework in biology, microbiology, immunology, chemistry, biochemistry, mathematics, and/or other related subjects. Although a minimum cumulative grade point average (GPA) of 3.00 is strongly desired, an applicant with a lower cumulative GPA will be considered if other strengths are apparent in the application.

To be considered for acceptance, an applicant must provide the following as part of a complete online application for admission:

- Official transcripts from all colleges and universities attended
- A current *curriculum vitae* (cv) or resume
- References from at least three instructors or professionals

Although standardized test scores are not required for admission, official copies of scores from the Graduate Record Examination (GRE) or Medical College Admission Test (MCAT) will be considered if submitted as part of the application.

International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. In addition to the above requirements, applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS).

Acceptance into the program will be decided by considering the sum of the applicant's undergraduate curriculum, cumulative GPA, GRE/MCAT

scores, recommendation letters, and relevant research or professional experiences.

Visit the websites for the face-to-face/hybrid and online Masters of Science in Infectious Disease programs for more detailed information. For additional information regarding application deadlines, the online application process, and specific requirements for applying to the College of Medicine, visit Drexel University's Graduate Admissions (<http://www.drexel.edu/grad/programs/ducom/infectious-disease>) site.

Degree Requirements

Courses with an MIIM or IDPT designation are offered by the Drexel University College of Medicine and are taught on a semester schedule (fall and spring). These courses are available in traditional (face-to-face), hybrid, and/or online formats. Some of these traditional courses and hybrid courses are offered as evening classes at locations on either the Center City Campus or the Queen Lane Campus.

At least 36.0 credits are required to complete the program and earn a Master's Degree in Infectious Disease.

Required Courses

IDPT 500S	Responsible Conduct of Research	2.0

Interdepartmental Medical Science

Major: Interdepartmental Medical Science
Degree Awarded: Master of Science

Calendar Type: Semester

Total Credit Hours: 39.0

Classification of Instructional Programs (CIP) code: 26.9999

Standard Occupational Classification (SOC) code: 11-9121

About the Program

The Interdepartmental Medical Sciences (IMS) program is a one-year Master of Science degree program that combines challenging graduate science coursework and personalized advising to guide students through the medical school application process. Students take courses equivalent to first-year medical school courses, including: Medical Biochemistry; Medical Physiology; Medical Microanatomy; Medical Immunology; Medical Neuroanatomy, and Medical Nutrition. Students who complete the coursework successfully are guaranteed an interview with Drexel University College of Medicine's MD program through our linkage agreement.

Admission Requirements

Students with an undergraduate GPA of 3.0 or higher can be considered for this program. In addition, applicants must have a minimum MCAT score of 27 (with no section less than 8), under the old system, or a composite score at the 75 percentile or better in the 2015 MCAT in order to be considered for admission to the program.

Interdisciplinary Health Sciences

Major: Interdisciplinary Health Sciences

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 48.0

Classification of Instructional Programs (CIP) code: 51.1099

Standard Occupational Classification (SOC) code: 29-2011; 29-2012

About the Program

The School of Biomedical Sciences and Professional Studies, Division of Pre-Medical and Pre-Health (PMPH) Programs, offers the Master of Science degree in Interdisciplinary Health Sciences (IHS). Students matriculating in this program are provided an opportunity to enhance their academic credentials and demonstrate an ability to succeed in biomedical science courses with content relevant to their chosen healthcare profession. Students are offered personalized guidance as they select from a broad range of course options.

IHS students complete multiple required courses throughout their first and second years. These courses are designed to provide general knowledge and skills essential for a career in the health sciences. Elective courses are selected with a program advisor to best suit the needs and interests of each student. Students entering their second year in IHS must decide upon a concentration track, and complete a specified number of courses within that concentration track prior to graduation. In this way, the IHS curriculum is both structured and flexible. The goal is to reinforce the healthcare career interests of each student.

During the second year of IHS, students complete a rigorous research project. These projects teach students to communicate complex scientific information, while honing their critical thinking and analysis skills. Students may choose to complete a one-year mentored research project, which may be laboratory or clinically-oriented. This option is offered to students who have a dedicated interest in biomedical research. Alternately, a literature analysis project is offered for those who wish to pursue independent research on a biomedical topic of their choice.

Upon completion of IHS, students will have a strong, integrated view of the biomedical sciences - providing numerous advantages to graduates, whether using the degree as a springboard for further professional education or for direct entry into the healthcare workforce.

Students must complete a minimum of 48.0 credits to graduate, and must complete all required courses. The Master of Science degree will be awarded contingent upon satisfactory completion of all program requirements, including an earned GPA of no less than 3.0.

For more information about the program, visit the College of Medicine's MS in Interdisciplinary Health Sciences (<http://www.drexel.edu/medicine/Academics/Graduate-School/Interdisciplinary-Health-Sciences>) page.

Admission Requirements

Applicants to the IHS program must meet the following criteria:

- Earned a minimum undergraduate math/science GPA of 2.5
- Successfully completed all pre-medical prerequisite courses
- Received MCAT scores in the 20th-50th percentile range, or minimum GRE – 50th percentile

Qualifying students participating in other PMPH Master of Science programs may have the option to transition into IHS, if healthcare career goals deem the transfer appropriate.

Applicants with lower scores may be considered if they can demonstrate recent upward academic trends, or exemplary healthcare experience or community service activities.

For more information about applying to the program, visit the College of Medicine's MS in Interdisciplinary Health Science Admissions (<http://www.drexel.edu/medicine/Academics/Graduate-School/Interdisciplinary-Health-Sciences>) web page.

Degree Requirements

Required Courses		
IHS 500S	Career Development in the Health Sciences Seminar I	1.0
IHS 501S	Career Development in the Health Sciences Seminar II	1.0
IHS 507S	Initiating Biomedical Research	2.0
IHS 508S	MIHS Research Project	1.5
IHS 509S	MIHS Research Paper	1.5
MSPP 525S	Community Dimensions of Medicine	2.0
IHS 510S	Introductory Biostatistics	3.0
	Introduction to Scientific Writing **	2.0
Concentration Courses and Electives *		34.0
Total Credits		48.0

* Number of elective credits may vary depending on concentration selected.

** Introduction to Scientific Writing will be offered as a Special Topics Course, IHS T580S, during the 2017-2018 academic year.

Concentrations:

Biochemical and Pharmacologic Principles		
Select six of the following:		
CR 614S	Introduction to Clinical Pharmacology	3.0
MFSP 557S	Drug Chemistry	2.0
MFSP 551S	Human Function	3.0
MFSP 580S	Principles of Immunology	2.0
MLAS 529S	Molecular Genetics	3.0
MSPA 580S	Medical Microbiology I	4.0
MSPA 581S	Medical Microbiology II	3.0
MSPP 515S	Advanced Human Physiology	4.0
MSPP 511S	Concepts in Biochemistry and Cell Biology	4.0
PHRM 512S	Graduate Pharmacology	3.0
IHS 502S	Neuropharmacology	3.0
IHS 514S	Molecular Biology & Biochemistry of the Cell	3.0
IHS 525S	Human Nutrition	3.0
IHS T580S	Special Topics in Interdisciplinary Health Science *	3.0

Concepts in Anatomy and Pathology		
Select six of the following:		
CR 500S	Epidemiology	3.0
MFSP 551S	Human Function	3.0
MFSP 554S	Principles of Forensic Pathology	4.0
MFSP 556S	Forensic Anthropology and Topics in Human Identification	3.0
MFSP 580S	Principles of Immunology	2.0
MFSP 584S	Introduction to Forensic Radiology	2.0
MLAS 531S	Embryology	3.0
MLAS 536S	Animal Models for Biomedical Research	1.0
MLAS 545S	Fundamentals of Histology	3.0
MSPP 515S	Advanced Human Physiology	4.0

MSPP 513S	Advanced Human Anatomy	4.0
MSPP 511S	Concepts in Biochemistry and Cell Biology	4.0
IHS 514S	Molecular Biology & Biochemistry of the Cell	3.0
IHS 525S	Human Nutrition	3.0
FCA 510S	Gross Human Skeletal Biology	3.0
IHS T580S	Special Topics in Interdisciplinary Health Science *	3.0

Laboratory Techniques

Select six of the following:

CR 505S	Ethical Issues in Research	3.0
CR 511S	The History of Misconduct in Biomedical Research	3.0
CR 515S	Intro to Clinical Trials	3.0
CR 565S	Contemporary Issues in Human Research Protection	3.0
CR 600S	Designing the Clinical Trial	3.0
CR 612S	Fundamentals of Compliance	3.0
IHS 522S	Enhanced Laboratory Investigation I	2.0
IHS 523S	Enhanced Laboratory Investigation II	2.0
MFSP 556S	Forensic Anthropology and Topics in Human Identification	3.0
MFSP 577S	Genetics for the Forensic Scientist	2.0
MFSP 578S	Forensic Photography	3.0
MFSP 579S	Forensic Microbiology	2.0
MFSP 589S	Forensic DNA Analysis	4.0
MLAS 523S	Organizational Management	3.0
MLAS 525S	Animal Anatomy	2.0
MLAS 535S	Biology & Care Of Lab Animals	4.0
MLAS 536S	Animal Models for Biomedical Research	1.0
MLAS 545S	Fundamentals of Histology	3.0
MLAS 610S	Diseases of Laboratory Animals	3.0
MSPA 520S	Medical Terminology	3.0
MSPA 580S	Medical Microbiology I	4.0
MSPA 581S	Medical Microbiology II	3.0
MSPP 505S	Laboratory Techniques in Biochemistry & Molecular Biology	2.0
MFSP T580S	Special Topics in Forensic Science *	3.0

Medical Science**Required Courses for this Concentration**

IMSP 502S	Medicine and Society I	3.0
IMSP 506S	Medical Professionalism and Leadership	3.0
IMSP 513S	Medical Biochemistry	8.0
IMSP 522S	Medical Physiology I	3.5
IMSP 523S	Medical Physiology II	3.5
IMSP 542S	Medical Microanatomy I	5.0
IMSP 543S	Medical Microanatomy II	3.0
IMSP 562S	Medical Neuroanatomy	6.0

Optional

IMSP 544S	Medical Immunology I	1.5
IMSP 545S	Medical Immunology II	1.5
IMSP 552S	Medical Nutrition	1.0

Additional Electives

CR 609S	Innovative Product Development	3.0
MFSP 558S	Instrumental Analysis	2.0
MFSP 567S	Basic Techniques for the Analysis of Biomolecules	3.0
MFSP 581S	Human Osteology and Calcified Tissue Biology I	3.0
MFSP 582S	Human Osteology and Calcified Tissue Biology II	2.0
MFSP 585S	Clinical Forensic Emergency Medicine and Traumatology	2.0
MFSP 586S	Introduction to Forensic Pediatrics	3.0
MFSP 587S	Introduction to Forensic Psychology	2.0
MFSP 588S	Advanced Topics in Cell Biology	2.0

* Please see your advisor for the course numbers and topics that are acceptable.

Sample Plan of Study

First Year

Fall		Credits
IHS 500S	Career Development in the Health Sciences Seminar I	1.0
IHS 510S	Introductory Biostatistics	3.0
	Introduction to Scientific Writing	2.0
	Minimum of 6.0 additional credits selected from list of electives in conjunction with program director	6.0
Term Credits		12.0

Spring

IHS 501S	Career Development in the Health Sciences Seminar II	1.0
MSPP 525S	Community Dimensions of Medicine	2.0
	Minimum of 6.0 additional credits selected from list of electives in conjunction with program director	6.0
IHS 507S***	Initiating Biomedical Research	2.0
Term Credits		11.0

Second Year**Fall**

IHS 508S	MIHS Research Project	1.5
	Additional credits selected from list of electives in conjunction with program director, with at least 5.0 credits coming from concentration track [†]	10.0
Term Credits		11.5

Spring

IHS 509S	MIHS Research Paper	1.5
	Additional credits selected from list of electives in conjunction with program director, with at least 5.0 credits coming from concentration track [†]	12.0
Term Credits		13.5

Total Credit: 48.0

* Students taking the Medical Sciences track are also required to take all IMS fall courses except for Basic Immunology I, Basic Immunology II, and Fundamentals of Nutrition and Diet.

** Please see your advisor for acceptable course numbers.

*** Students may also take this course in the Fall of Year two with approval of the Program Director.

† Number of credits is only a suggestion and may be split differently between Semesters.

Laboratory Animal Science

Major: Laboratory Animal Science

Degree Awarded: Master of Laboratory Animal Science (MLAS)

Calendar Type: Semester

Total Credit Hours: 49.0

Classification of Instructional Programs (CIP) code: 01.0999

Standard Occupational Classification (SOC) code: 19-1011

About the Program

The Graduate School of Biomedical Sciences and Professional Studies offers the Master of Laboratory Animal Science (MLAS) degree. The MLAS program is designed for individuals who have a bachelor's degree in animal science or a related field and who are seeking advanced career positions in laboratory animal science and laboratory animal facility management. Alternatively, the MLAS degree is also a powerful means to enhance students' credentials for admission to veterinary medical school.

The MLAS program is a full-time, two-year program that begins in August of each year. The first two years of the program consists primarily of classroom instruction, while the last semester is reserved for experiential

learning. The program is flexible for traditional and non-traditional students alike due to the availability of evening courses.

Available Online

For individuals who are currently working in the laboratory animal science field, the MLAS program is available online as well. Please review our website (<http://www.drexel.edu/medicine/Academics/Graduate-School/Master-of-Laboratory-Animal-Science/Online-MLAScience>) for specific details about the online program.

Curriculum

The MLAS curriculum consists of basic science courses, laboratory animal science courses, and a practicum. The basic science courses were designed to build a solid foundation required for a successful career in laboratory animal science. The laboratory animal science courses focus on all aspects of laboratory animal science, including facility management. The practicum provides the student with the opportunity to apply the theoretical knowledge they have learned to the field of Laboratory Animal Science. The outcome is a highly trained laboratory animal science professional with a solid foundation in the sciences.

Practicum

MLAS faculty and administration assist the students in identifying and securing practicum sites at universities, biotechnology organizations, and pharmaceutical companies. Practicum sites are available in Pennsylvania, New Jersey, New York, Delaware, Virginia, Kentucky, North Carolina, and Texas. The list expands every year. In many instances, the practicum sites have offered our students a permanent position within their organization upon completion of the MLAS degree.

Career Opportunities

MLAS graduates hold positions in laboratory animal facilities of universities, biotechnology companies, government agencies, and pharmaceutical companies. There they serve as veterinarians, supervisors, managers, IACUC administrators, trainers, educators, consultants, and sales representatives.

Veterinary Medical School

Successful completion of the MLAS program can also significantly improve a student's academic credentials for application to veterinary medical school. Please review our website (<http://www.drexel.edu/medicine/Academics/Graduate-School/Master-of-Laboratory-Animal-Science>) for a comprehensive list of veterinary medical schools that have been attended by MLAS alumni.

Philadelphia, PA 19102
Tel. 215.762.7968 | Fax: 215-762-7961
Erin.Vogelsong@DrexelMed.edu | drexel.edu/medicine

Admission Requirements

Students will be selected on the basis of adequate educational background and veterinary/ research/ animal care experience.

Prerequisite coursework includes: chemistry, biology, organic chemistry, and physics.

Candidates for admission must provide the following credentials:

- Bachelor's degree from an accredited U.S. college or university
- Cumulative GPA of 3.0 or higher
- General Graduate Record Exam (GRE) scores at or above the 50th percentile in all areas obtained within the last 5 years
- Official transcript from all post-secondary institutions attended
- Three letters of reference, two must be from science professors
- Personal statement stating the applicant's academic and professional goals

The deadline for submission of applications is the second Friday in July of the year the student seeks admission.

Erin.Vogelsong@DrexelMed.edu | drexel.edu/medicine

Degree Requirements

The MLAS degree can be completed full-time in two years and one summer practicum, or part-time in three or less years. Students must successfully complete a minimum of 49.0 credit hours for graduation. A minimum grade point average of 3.0 is required for graduation as well as grades of "C" or better.

Required Courses

MLAS 501S	Laboratory Animal Seminar	2.0
MLAS 510S	Clinical Orientation In Laboratory Animal Facilities	1.0
MLAS 520S	Financial Mgmt In Lab Anim Sci	3.0
MLAS 521S	Arch Eng & Plan For Anim Fac	4.0
MLAS 523S	Organizational Management	3.0
MLAS 525S	Animal Anatomy	2.0
MLAS 530S	Biostats In Vet Science	3.0
MLAS 535S	Biology & Care Of Lab Animals	4.0
MLAS 536S	Animal Models for Biomedical Research	1.0
MLAS 606S	Clinical Laboratory Techniques and Concepts	1.0
MLAS 610S	Diseases of Laboratory Animals	3.0
MLAS 801S	Laboratory Animal Practicum	12.0
MSPA 580S	Medical Microbiology I	4.0

Electives

Students must select a minimum of 6.0 credits from the following:

IHS 514S	Molecular Biology & Biochemistry of the Cell	6.0
MLAS 500S	Animal Nutrition	

MLAS 502S	Occupational Safety and Health in Laboratory Animal Care and Use Programs
MLAS 503S	The Institutional Animal Care and Use Committee's (IACUC) Role in Animal Research
MLAS 513S	Biochemical Basis of Disease (Upenn)
MLAS 514S	Hematopoiesis (Upenn)
MLAS 529S	Molecular Genetics
MLAS 531S	Embryology
MLAS 545S	Fundamentals of Histology
MSPP 511S	Concepts in Biochemistry and Cell Biology
PHGY 503S	Graduate Physiology
PHRM 512S	Graduate Pharmacology
Total Credits 49.0	

Medical and Healthcare Simulation

Major: Medical Healthcare Simulation

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 39.0

Classification of Instructional Programs (CIP) code: 51.1199

Standard Occupational Classification (SOC) code: 11-9121

About the Program

The goal of the MS in Medical Healthcare Simulation program is to educate healthcare professionals using simulation based methodology to bring a new level of standards and rigor in addition to creating new leaders to help shape the future of simulation education. The MS in Medical Healthcare Simulation program is a combination of both required and elective graduate courses, together with an intensive immersive educational experience. The majority of the educational experience will occur via an e-learning experience with three one-week mandatory in person simulation laboratory experiences.

Program Delivery

The curriculum is planned for a two-year time frame with each group to complete the curriculum as a cohort. However, the program may be extended, if appropriate, to accommodate part-time students or potential conflicts that might arise. These decisions will be determined by the program directors and in consultation with the student's mentor/advisor.

Admission Requirements

For acceptance into the MS in Medical and Healthcare Simulation program, the applicant must have, at a minimum, completed a four-year bachelor's degree, nursing degree program or equivalent, with a preferred GPA of 3.0 and must also have fulfilled all of the requirements for consideration as defined by the program committee.

All students must submit three confidential letters of evaluation and all previous official educational transcripts. If you have taken any standardized test, such as GRE and MCAT, the scores must be submitted for review. No standardized test is required for admission at this time. Each student will be assessed holistically based on the requirements by the program's committee.

As the degree program is directed toward medical simulation the background in medical care is required. The applicant must have graduated from medical school, or have a nursing or Bachelor's Degree or other health professional training (approved by the program director on individual basis) with an interest in simulation. A record of achievement

in medical education, as provided by letters of reference, publications, teaching evaluations, or prior specialized training or experience in medical education is desired, but not required.

Degree Requirements

Required Courses

MSMS 501S	Simulation Curriculum and Design I	3.0
MSMS 503S	Biostatistics in Healthcare Literature	3.0
MSMS 504S	Principles of Assessment: Measurement Theory, Assessment Principles & Tools	3.0
MSMS 506S	Debriefing in Simulation	3.0
MSMS 701S	Simulation Laboratory Practicum I	4.0
MSMS 702S	Simulation Laboratory Practicum II	4.0
MSMS 703S	Simulation Laboratory Practicum III	4.0
MSMS 801S	Capstone	1.0
MSMS 802S	Capstone Project Implementation	2.0

Elective Courses

Students must select a minimum of 12 credits from the following:		12.0
CR 510S	Sponsored Projects Finance	
CR 525S	Scientific Writing and Medical Literature	
CR 550S	Leadership Skills	
CR 635S	Strategic Planning	
MSMS 505S	Standardized Patient Course	
MSMS 507S	High Fidelity, Low Fidelity and Task Trainers	
MSMS 508S	Interprofessional Education	
MSMS 509S	Fundamentals of Simulation Program Administration	
MSMS 511S	Patient Safety and Simulation	
MSMS 600S	Adult Learning in Healthcare	
MSMS I899S	MSMS Independent Study	
Total Credits		39.0

Sample Plan of Study

First Year (Part-Time)

Term 1		Credits
MSMS 701S	Simulation Laboratory Practicum I	4.0
MSMS 501S	Simulation Curriculum and Design I	3.0
Term Credits		7.0
Term 2

Medical Science

Major: Medical Science

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 62.0

Classification of Instructional Programs (CIP) code: 26.9999

Standard Occupational Classification (SOC) code: 11-9121

About the Program

The Master of Science in Medical Science (MMS) program is a rigorous, direct-entry two-year degree program that couples a challenging and rich curriculum with engaged and personalized student advisement. The program is designed to provide talented students with both medical knowledge and research competencies.

The first and second years of study focus on honing different skill sets. This sequence allows students to develop strong, well-rounded academic portfolios and become competitive candidates for seats in medical school or as they continue their graduate medical education.

About the Program

The Department of Microbiology and Immunology offers students the MS and PhD degrees. The programs are designed to promote understanding of the molecular mechanisms of infectious diseases. The department has research programs in the areas of parasitic, viral, and opportunistic infections; bacterial pathogenesis and genomics; immunology; and drug development driven by investigators with national and international reputations and with extended histories of extramural funding from the NIH, as well as other sources of funding.

In the first year, students complete both required courses in the core curriculum, and research laboratory rotation requirements. All students must pass an examination at the end of the first year, while also attending seminars and journal clubs.

MS in Microbiology and Immunology

MS students are required to successfully complete the core curriculum and the first year program-specific course work (Molecular Pathogenesis I and II and Immunology). The preliminary examination, taken at the end of the first year, involves a proposal describing the research to be undertaken towards completion of the MS degree. In all semesters, MS students must attend seminars and journal clubs.

PhD in Microbiology and Immunology

PhD students are required to successfully complete the core curriculum and the first year program-specific course work (Molecular Pathogenesis I and II and Immunology). The preliminary examination, taken at the end of the first year, involves a research proposal written in response to a question submitted by a committee of the Program's faculty. Advanced level courses in immunology, virology, advanced molecular biology, microbial pathogenesis, experimental therapeutics and emerging infectious diseases are offered to interested students in the second year and PhD students are required to enroll for credit for at least two advanced courses.

PhD candidates must pass a qualifying examination in the middle of their third year. In all semesters, PhD students must attend seminars and journal clubs. PhD students are also required to submit a minimum of two manuscripts (publications from their research) during the course of the program. The average amount of time required to complete the PhD requirements is five years.

Courses Repeatable for Credit

As well as taking all required courses, MS and PhD students may re-enroll in courses having the status "repeatable for credit" (such as journal club,

seminar and research courses) for the duration of their program in order to meet the total number of credits required for graduation.

For more information, including scheduling a plan of study, visit the College of Medicine's Microbiology and Immunology Program (<http://www.drexelmed.edu/Home/AcademicPrograms/BiomedicalGraduateStudies/Programs/MastersDoctoralPrograms/MicrobiologyImmunology.aspx>) website.

Non-Thesis Option

44.0 credits

Required Courses

IDPT 500S	Responsible Conduct of Research	2.0
IDPT 501S	Biostatistics I	2.0
IDPT 521S	Molecular Structure and Metabolism	5.0
IDPT 526S	Cells to Systems	5.0
IDPT 850S	Literature Review Non-Thesis MS	4.0
MIIM 502S	Micro & Immuno. Journal Club [*]	4.0
MIIM 508S	Immunology I	3.0
MIIM 512S	Molecular Pathogenesis I (Viral Pathogenesis)	3.0
MIIM 513S	Molecular Pathogenesis II	3.0
MIIM 606S	Microbiology and Immunology Seminar [*]	4.0

Advanced Electives

Select a minimum of nine credits of Advanced Electives.

MIIM 504S	Micro. & Immuno. 1st Rotation	
MIIM 524S	Vaccines and Vaccine Development	
MIIM 528S	Structural Bioinformatics	
MIIM 555S	Molec. Mech. Of Micro. Path	
MIIM 607S	IMMUNOLOGY II	
MIIM 613S	Emerging Infectious Diseases

Molecular and Cell Biology and Genetics

Major: Molecular and Cell Biology and Genetics

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Semester

Total Credit Hours: 36.0-48.0 (MS) or 96.0 (PhD)

Classification of Instructional Programs (CIP) code: 26.0910

Standard Occupational Classification (SOC) code: 19-1029

About the Program

The interdisciplinary, research-oriented Molecular and Cell Biology and Genetics program offers both MS and PhD degrees. Its strength is derived from the combined research expertise of the faculty in various departments, including Neurobiology and Anatomy, Biochemistry and Molecular biology, Microbiology and Immunology, Medicine, Pathology, and Pharmacology and Physiology. Faculty members conduct research on a broad array of topics, including cell, molecular, and cancer biology as well as genetics, infectious diseases and immunology.

About the MS Program

In the MS program, the focus is on strengthening the student's grasp of molecular biology and biotechnology and on providing a knowledge of research methods available in this fast-expanding field.

About the PhD Program

This program is research focused, with the ultimate goal of training students to become leaders of scientific research in academics and industry. In addition to completing the curriculum requirements, PhD students must pass a qualifying exam at the end of their second year.

Additional Information

For more information about the program, contact:

Amanda Mangano
Academic Coordinator
Biomedical Graduate and Postgraduate Studies
Drexel University College of Medicine
2900 Queen Lane Suite G24
Philadelphia, PA 19129-1096
215.991.8146
amanda.mangano@drexelmed.edu

Admission Requirements

Drexel University College of Medicine has a rolling admissions policy, which means that complete applications are reviewed as they are received. Applicants are therefore advised to apply early, as decisions to accept or deny admission may be made before the official deadlines.

To learn more about applying to Drexel College of Medicine programs visit the Drexel College of Medicine's Biomedical Studies Admissions

(<http://www.drexel.edu/medicine/Academics/Graduate-School/Biomedical-Studies>) website.

About the Curriculum

Background courses in biochemistry, molecular and cell biology, and integrative biology are taken during the first academic year. In addition, every student carries out short research projects in three different laboratories during the first year. This exposure to research not only gives the student broad research training, but also helps the student to select a thesis advisor at the end of the first academic year. In the second year, the student begins thesis research and takes several advanced courses, tailored to the student's individual interests.

The program offers a weekly seminar series with invited external and intramural speakers who address the program's broad research interests. Journal Club members meet weekly in their own informal setting to present results of interest from the current literature.

Courses Repeatable for Credit

As well as taking all required courses, MS and PhD students may re-enroll in courses having the status "repeatable for credit" (such as journal club, seminar and research courses) for the duration of their program in order to meet the total number of credits required for graduation.

For more information, including scheduling a plan of study, visit the College of Medicine's Molecular and Cell Biology and Genetics Program (<http://www.drexelmed.edu/Home/AcademicPrograms/BiomedicalGraduateStudies/Programs/MastersDoctoralPrograms/MolecularCellBiologyGenetics.aspx>) website.

Thesis Option

61.5 semester credits

Required Courses		
BIOC 603S	Advanced Topics in Biochemistry and Molecular Biology	1.5
IDPT 500S	Responsible Conduct of Research	2.0
IDPT 501S	Biostatistics I	2.0
IDPT 521S	Molecular Structure and Metabolism	5.0

NEUR 511S	Advanced Cellular and Developmental Neuroscience
NEUR 512S	Advanced Systems and Behavioral Neuroscience
PHRM 507S	Prin of Neuropharmacology
PHRM 512S	Graduate Pharmacology
PHRM 525S	Drug Discovery and Development I
PHRM 526S	Drug Discovery and Development II
PHRM 602S	Research Methods in Pharmacology

General Electives

IDPT 507S	Teaching Practicum I
IDPT 508S	Teaching Practicum II
IDPT 509S	Teaching Practicum III
MCBG 501S	MCBG 1st Lab Rotation
MCBG 502S	MCBG 2nd Lab Rotation
MCBG 503S	MCBG 3rd Lab Rotation

MCBG 600S	MCBG Thesis Research
Total Credits	36.5

* Taken each semester in the two year program.

PhD Degree Requirements

During the third year, students develop a plan for their doctoral research in conjunction with their thesis advisor. A formal, written thesis proposal is then presented to the student's Thesis Advisory Committee. Acceptance of this proposal after oral examination by the Committee leads to the final stage of doctoral training. PhD candidates then spend the majority of their time on thesis research. After concluding their research, they must submit and publicly defend their thesis before the Thesis-Examination Committee.

Required Courses

BIOC 603S	Advanced Topics in Biochemistry and Molecular Biology	1.5
IDPT 500S	Responsible Conduct of Research	2.0
IDPT 501S	Biostatistics I	2.0
IDPT 521S	Molecular Structure and Metabolism	5.0

Total Credits 126.5

* Taken each semester with the exception of the last, when only Thesis Defense is taken.

** Taken each semester starting in year 2, with the exception of the last semester when only Thesis Defense is taken.

Molecular Medicine

Major: Molecular Medicine

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 36.0

Classification of Instructional Programs (CIP) code: 26.0204

Standard Occupational Classification (SOC) code: 19-1029

About the Program

Mission Statement

The Master of Science in Molecular Medicine program, offered by the Department of Microbiology and Immunology and by the Institute for Molecular Medicine and Infectious Disease (IMMID), provides education and training in areas of research in human health at the molecular level. Students in this program acquire theoretical and practical knowledge about normal body functions and disease pathogenesis at the molecular level. Students also learn how this knowledge is applied to develop novel tools for diagnosis, treatment, prognosis, and prevention of disease. Graduates from this program will be ready to enter the biotechnology workforce, and are attractive candidates for doctoral programs in science and medicine.

The Master of Science in Molecular Medicine program is designed to provide academic and practical biotechnological knowledge in translational research, particularly in the areas of molecular therapeutics and vaccine development.

Curriculum

The two year non-thesis program encompasses fundamental requirements to establish a sound grounding in microbiology, biochemistry, genetics, and molecular biology. The program is typically completed in two full-time years (four semesters of at least nine credits) of required and elective graduate courses, and one or more experiential research components in the first or second year. The flexibility of the curriculum enables students to complete the degree requirement within 18 months on an accelerated basis, and up to 4 years on a part-time basis. The successful completion of the degree will be determined by grades obtained in the graduate courses, participation in seminars and journal clubs, and performance in the research component. A minimum of 36.0 credits is required to graduate, with at least 6.0 of those earned as research credits.

The experiential research component of the curriculum can be fulfilled by two alternative approaches. Most students choose to engage in an intensive 6.0 credit hands-on research internship in which a 12-16 week research program will be undertaken in a laboratory at Drexel, another academic institution, or at a biotechnology or biopharmaceutical company. Alternatively, students may choose to engage in a less intensive experience spanning two semesters, or conduct an independent research project, with the approval and supervision of Program Directors.

Traditional (Face-to-Face), Hybrid, or Online Learning Options

Classes can be attended at any of Drexel College of Medicine locations: Center City and Queen Lane campuses in Philadelphia. State-of-the-

art video conferencing provides real-time interactive learning at these locations. Most classes are held in the late afternoon/early evening to facilitate participation of working professionals. The program may also be completed fully online, offered through Drexel University Online. All required courses and most electives have online sections and online students experience the same curriculum as face-to-face or hybrid students. Online sections are designed to maximize interactions among students and faculty and may include live web sessions. Individual students also may choose a mix of traditional and online courses (hybrid). The goal is to provide maximum scheduling flexibility.

Program Contact information

For more detailed information about the curriculum and program goals, please contact either:

Pamela Norton, PhD

Email: pamela.norton@drexelmed.edu

or

Stephen Jennings, PhD

Email: stephen.jennings@drexelmed.edu

Program Goals

Over the course of completing the program, students will develop:

1. Core knowledge of molecular and cellular disciplines that constitute biomedical sciences
2. Working knowledge of normal body functions at the molecular level and how these are altered in states of disease
3. Practical knowledge and skills that help identify gaps in the biomedical field for the development of molecular diagnostic and therapeutic tools
4. Skills in basic, translational, or clinical research
5. Professional ethics necessary for the responsible conduct of research
6. Communication and leadership skills
7. Other soft skills (e.g. collaboration, problem solving, career planning, networking) that facilitate career advancement and promotion

In the course of meeting these program-level goals, students will have also made progress in all of the Drexel Student Learning Priorities (DSLPS) to help them build their futures.

Core Intellectual and Practical Skills:

- Communication
- Critical and creative thinking
- Ethical reasoning
- Information literacy
- Self-directed learning
- Technology use

Experiential and Applied Learning:

- Global competence
- Leadership
- Professional practice

- Research, scholarship and creative expression
- Responsible citizenship

Admission Requirements

For acceptance into the Master of Science in Molecular Medicine program, the applicant must have completed a four-year biology or chemistry-based BA or BS degree program with undergraduate coursework in biology, microbiology, immunology, chemistry, biochemistry, mathematics, and/or other related subjects. Although a minimum cumulative grade point average (GPA) of 3.00 is strongly desired, an applicant with a lower cumulative GPA will be considered if other strengths are apparent in the application.

To be considered for acceptance, an applicant must provide the following as part of a complete online application for admission:

- Official transcripts from all colleges and universities attended
- A current *curriculum vitae* (CV) or resume
- References from at least three instructors or professionals

Although standardized test scores are not required for admission, official copies of scores from the Graduate Record Examination (GRE) or Medical College Admission Test (MCAT) will be considered if submitted as part of the application.

International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. In addition to the above requirements, applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS).

Acceptance into the program will be decided by considering the sum of the applicant's undergraduate curriculum, cumulative GPA, GRE/MCAT scores, recommendation letters, and relevant research or professional experiences.

Online applications are considered year round. Potential students are encouraged to apply no later than July 1 for Fall admission, or December 1 for Spring admission.

For additional information about the program and to access the online application, view the MS in Molecular Medicine (<http://www.drexelmed.edu/Home/AcademicPrograms/BiomedicalGraduateStudies/Programs/MastersDoctoralPrograms/MolecularMedicine.aspx>) page on the College of Medicine's website.

Degree Requirements

About the Curriculum

Through the combination of required and elective courses, a total of 36.0 credits is required to successfully obtain the degree of Masters of Science in Molecular Medicine. In order to maintain full-time student status, a minimum of 9.0 credits must be taken in any given academic semester. In most cases, there are both traditional (face-to-face) and online sections for each course). Students should work with their program advisors to plan their course of study.

Research Requirements

The research component of the curriculum can be fulfilled by two alternative approaches. Most students choose to engage in a hands-

on research internship in which a 12 week research program will be undertaken in a laboratory at Drexel, another academic institution, or at a biotechnology or biopharmaceutical company. Alternatively, students may choose to engage in an independent research project, with the approval and supervision of Program Directors.

For an individualized plan of study listing the sequence of courses to be completed, students should work with their program advisor.

Required Courses

IDPT 500S	Responsible Conduct of Research	2.0
or MIIM 503S	Biomedical Ethics	
IDPT 501S	Biostatistics I	2.0
or MIIM 517S	Applied Statistics for Biomedical Sciences	
MIIM 540S	Viruses and Viral Infections	2.0
MIIM 541S	Bacteria and Bacterial Infections	2.0
MIIM 542S	Mycology and Fungal Infections	2.0
MIIM 543S	Parasitology and Parasitic Diseases	2.0
MIIM 527S	Immunology, Immunopathology and Infectious Diseases	3.0
MIIM 530S	Fundamentals of Molecular Medicine I	3.0
MIIM 531S	Fundamentals of Molecular Medicine II	2.0
MIIM 532S	Fundamentals of Molecular Medicine III	2.0
MIIM 533S	Molecular Medicine Journal Club II	1.0
MIIM 534S	Molecular Medicine Journal Club I	1.0
MIIM 606S	Microbiology and Immunology Seminar	1.0

Electives

To complete the 36.0 credits total, students select from a menu of additional electives, and complete their required research component.		11.0
MIIM 521S	Biotechniques I: Molecular and Genomic Methods	
MIIM 522S	Biotechniques II: Immunological Methods	
MIIM 523S	Molecular Virology	
MIIM 524S	Vaccines and Vaccine Development	
MIIM 525S	Principles of Biocontainment	
MIIM 526S	Animal Models in Biotechnology	
MIIM 555S	Molec. Mech. Of Micro. Path	
MIIM 613S	Emerging Infectious Diseases	
MIIM 615S	Experimental Therapeutics	
MIIM 621S	Biomedical Research I	
MIIM 622S	Biomedical Research II	
MIIM 625S	Advanced Molecular Virology	
MIIM 650S	Research Internship in Molecular Medicine	
MLAS 529S	Molecular Genetics	

Total Credits

36.0

Neuroscience

Major: Neuroscience

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Semester

Total Credit Hours: 36.0 - 48.0 (MS); 96.0 (PhD)

Classification of Instructional Programs (CIP) code: 26.1501

Standard Occupational Classification (SOC) code: 11-9121

About the Program

The College of Medicine School of Biomedical Sciences and Professional Studies offers an interdepartmental and multidisciplinary graduate program in Neuroscience leading to MS and PhD degrees. The program provides a vibrant research component for both MS and PhD degrees leading to published scientific work in reputable journals, as well as training in the panoply of research and presentation skills required to conduct and disseminate the research. Students are provided with a curriculum of integrated courses that include the essentials for biomedical

research as well as courses that span cellular, developmental, systems, and behavioral neurosciences, as well as neuroanatomy and injury and disease of the nervous system. Upon completing these programs, students pursue careers in academic, governmental, or industrial settings.

The MS in Neuroscience Program

The MS program provides students a broad background in neuroscience and the techniques used in neuroscience research. In addition to the thesis-based MS program, Drexel offers a non-thesis degree program in which students can earn the degree without a research project by taking additional classes and writing a literature review paper. Students who wish to continue their graduate training after the MS degree may apply to the PhD program, and their credits may be applied to the doctoral program.

The PhD in Neuroscience Program

The PhD program trains individuals to conduct independent hypothesis-driven research and to teach in the neurosciences. The program includes two years of coursework as well as original research leading to published thesis work. Laboratory rotations begin in the fall of the first year.

Additional Information

For more information, visit the College of Medicine's Neuroscience Program (<http://www.drexel.edu/medicine/Academics/Graduate-School/Neuroscience>) web site.

Admission Requirements

Students interested in cellular, systems (including neuro-engineering) and behavioral neuroscience are encouraged to apply. There are no minimal requirements but applicants should be competitive with regard to grades, GRE scores, research experience, and letters of recommendation.

Applicants are encouraged to use email to contact any of the faculty of the program with whom they may share scientific interests to discuss their suitability to the program and/or potential projects in relevant laboratories.

The Drexel University College of Medicine: School of Biomedical Sciences and Professional Studies has a rolling admissions policy, which means that complete applications are reviewed as they are received. Applicants are therefore advised to apply early, as decisions to accept or deny admission may be made before the official deadlines.

To learn more about applying to Drexel College of Medicine programs visit the College of Medicine's Graduate School of Biomedical Sciences and Professional Studies (<http://www.drexel.edu/medicine/Academics/Graduate-School>) website.

About the Curriculum

Students in both the PhD and MS programs begin their coursework with a core curriculum. The curriculum consists of a series of core courses that are shared by all of the biomedical graduate programs in the medical school, and a series of programmatic courses. All students in the Neuroscience Program must take the core curriculum, although the possibility exists for students to be excused from a particular course if they are able to prove that they already have the necessary knowledge required of the particular course.

During the second year, students select elective courses and begin their thesis research in consultation with the Advisory-Examination Committee. At the end of the second year, students take a comprehensive examination to qualify for PhD candidacy.

There are three rotations in the curriculum for which the student will be assigned a grade. The purpose of these rotations is to enable the student to select the most appropriate Graduate Advisor to supervise the research project for the student. The Neuroscience Program Director and Steering Committee will advise each student on the selection of rotations, as well as on the progress and outcome of rotations. Flexibility will be afforded in certain situations in which the student may be able to select an advisor before completing all three rotations, or in situations wherein it is advisable to terminate a particular rotation early in favor of another choice.

Courses Repeatable for Credit

As well as taking all required courses, MS and PhD students may re-enroll in courses having the status "repeatable for credit" (such as journal club, seminar and research courses) for the duration of their program in order to meet the total number of credits required for graduation.

MS Degree Requirements: Non-Thesis Option

MS without thesis: 36.0 semester credits

Required Courses		
IDPT 500S	Responsible Conduct of Research	2.0
IDPT 521S	Molecular Structure and Metabolism	5.0
IDPT 526S	Cells to Systems	5.0
IDPT 850S	Literature Review Non-Thesis MS	4.0
NEUR 500S	Statistics for Neuro/Pharm Research	2.0
NEUR 501S	Neuroscience 1st Lab Rotation	4.0
NEUR 508S	Graduate Neuroscience I	2.5
NEUR 520S	Neurobiology Topics I *	4.0
NEUR 521S	Neurobiology Topics II *	4.0
NEUR 602S	Medical Neuroscience	6.0
NEUR 609S	Graduate Neuroscience II	4.0
Advanced Electives		
Select at least one of the following:		1.0-4.0
NEUR 511S	Advanced Cellular and Developmental Neuroscience	
NEUR 512S	Advanced Systems and Behavioral Neuroscience	
NEUR 634S	Motor Systems	
Total Credits		43.5-46.5

* Taken twice in the two year program.

Approved Electives

Students may opt to take additional approved electives in consultation with their advisor.

Suggested Electives		
MCBG 506S	Advanced Cell Biology	2.0
PHRM 507S	Prin of Neuropharmacology	3.0
PHRM 512S	Graduate Pharmacology	3.0
General Electives		
IDPT 507S	Teaching Practicum I	1.0-4.0
IDPT 508S	Teaching Practicum II	1.0-4.0
IDPT 509S	Teaching Practicum III	1.0-4.0
NEUR 502S	Neuroscience 2nd Lab Rotation	4.0
NEUR 503S	Neuroscience 3rd Lab Rotatin	4.0
NEUR 600S	Neuroscience Thesis Research	9.0

* Additional courses from the Biograduate Medical programs may be taken as electives. Students should check with the College of Medicine's Graduate School of Biomedical Sciences and Professional Studies (<http://www.drexelmed.edu/Home/AcademicPrograms/BiomedicalGraduateStudies.aspx>) programs.

Sample Plan of Study (MS)

First Year

Fall		Credits
IDPT 521S	Molecular Structure and Metabolism	5.0
NEUR 501S	Neuroscience 1st Lab Rotation	4.0
NEUR 508S	Graduate Neuroscience I	2.5
NEUR 520S	Neurobiology Topics I	2.0
Term Credits		13.5

NEUR 600S	Neuroscience Thesis Research	9.0
Advanced Elective		1.0-4.0
Term Credits		14.0-17.0

Total Credit: 53.5-56.5

PhD Degree Requirements

Students are required to complete 96.0 credits; for additional graduation requirements, refer to the School of Biomedical Sciences and Professional Studies Handbook and the Neuroscience Program Policies and Procedures (<http://www.drexelmed.edu/Home/AcademicPrograms/BiomedicalGraduateStudies/Programs/MastersDoctoralPrograms/Neuroscience.aspx>).

During the third year, students develop a plan for their doctoral research in conjunction with their thesis advisor. A formal, written thesis proposal is then presented to the student's Thesis Advisory Committee. Acceptance of this proposal after oral examination by the Committee leads to the final

stage of doctoral training. PhD candidates then spend the majority of their time on thesis research. After concluding their research, they must submit and publicly defend their thesis before the Thesis-Examination Committee.

PhD students may enroll in courses having the status "repeatable for credit" (such as journal club, seminar and research courses) for the duration of their program in order to meet the degree completion requirement of 96.0 credits.

Required Courses

IDPT 500S	Responsible Conduct of Research	2.0
IDPT 521S	Molecular Structure and Metabolism	5.0
IDPT 526S	Cells to Systems	5.0

Pathologists' Assistant

Major: Pathologists' Assistant

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 91.0

Classification of Instructional Programs (CIP) code: 51.0811

Standard Occupational Classification (SOC) code: 29-2055

About the Program

The School of Biomedical Sciences and Professional Studies offers the Master of Science in Pathologists' Assistant (PathA). The pathologists' assistant is an intensely trained allied health professional who provides anatomic pathology services under the direction and supervision of a pathologist. Pathologists' assistants interact with pathologists in the

same manner that physicians' assistants carry out their duties under the direction of physicians in surgical and medical practice.

The PathA program offers students the opportunity to train in the highly specialized field of anatomic pathology. This two-year, full-time program begins in May of each year. The first year is comprised of the instructional portion of the program supplemented by pathology laboratory exposure. The second year of the program is composed of several hospital-based clinical rotations offering progressively responsible experience in autopsy and surgical pathology. These rotations are supplemented with informal classroom education.

Program Accreditation

The National Accrediting Agency for Clinical Laboratory Sciences (NAACLS): NAACLS, in conjunction with the AAPA, has established national standards for Pathologists' Assistant training programs. The standards include both didactic course work and clinical experiences necessary to properly educate a pathologists' assistant. The Master of Pathologists' Assistant program at the Drexel University College of Medicine is accredited by NAACLS. Visit the NAACLS (<http://www.naacls.org>) website for more information about the professional activities of this organization.

Professional Certification

The American Society for Clinical Pathology Board of Registry (ASCP BOC): The ASCP BOC, in conjunction with the AAPA, has established a national certification program for Pathologists' Assistants. In 2005, the ASCP BOC first offered a national certification examination for Pathologists' Assistants. In order to be eligible for the BOC examination, applicants must be graduates of a pathologists' assistant educational program accredited by the National Accrediting Agency for Clinical Laboratory Science (NAACLS). Visit the ASCP BOC (<http://www.ascp.org/Board-of-Certification>) website to read more about the certification program and the professional activities of this organization.

Professional Affiliation

The American Association of Pathologists' Assistants (AAPA): The AAPA is the only national professional organization for pathologists' assistants.

The AAPA:

- is a not-for-profit, volunteer organization dedicated to advancing the pathologists' assistant profession by providing its members with education, networking, and professional support;
- supports professional competency through program accreditation and individual certification;
- promotes public and professional awareness of the pathologist's assistant as an integral member of the healthcare team.

Visit the AAPA (<http://www.pathassist.org>) website for more additional information about this association.

Career Opportunities

Pathologists' assistants are employed in community hospitals, academic centers such as medical schools and university hospitals, private pathology laboratories, medical research centers, government hospitals and medical examiner offices.

For more information about this program, visit the College of Medicine's Master of Science in Pathologists' Assistant (<http://www.drexelmed.edu/Home/AcademicPrograms/ProfessionalStudiesintheHealthSciences/>

AlliedHealthProfessionPrograms/
PathologistsAssistantPathAProgram.aspx) program's web page.

Admission Requirements

A pathologist's assistant is someone who has the ability to relate to people, the capacity for calm and reasoned judgment and who demonstrates a commitment to quality patient care.

The program's courses and content are ideal for:

- Recent graduates with a degree in a biological or allied health science, with exposure to anatomy, physiology, chemistry and microbiology. Previous exposure to pathology is recommended.
- Allied health professionals, in particular cytotechnologists, histotechnologists and medical technologists.

Admission requirements

Students will be selected on the basis of adequate educational background and medical experience. A bachelor's degree in a biological or allied health science with a cumulative GPA of at least 3.0 is the minimum requirement for acceptance into the program. Prerequisite course work will include microbiology, human anatomy, physiology, mathematics, English composition, general chemistry, organic and/or biochemistry and biological science.

All candidates will be required to have a formal interview with the Selection Committee prior to final acceptance. Deadline for submission of the application is the second Friday in February of the year in which the students plan to enroll.

Candidates for admission must provide the following credentials:

- Completed application form
- Resume
- Official transcripts from all college or university attended or where coursework was attempted or taken
- Official General Graduate Record Examination (GRE) scores
- Three letters of evaluation
- Self-assessment essays:
 - A. Discuss personal goals, conditions, or career aspirations that motivate you to pursue graduate study at Drexel University.
 - B. What are your most important accomplishments?
 - C. What do you expect to achieve through this program?

Pharmacology and Physiology

Major: Pharmacology and Physiology

Degree Awarded: Master of Science (MS) and Doctor of Philosophy (PhD)

Calendar Type: Semester

Total Credit Hours: 43.0-60.0 (MS); 96.0 (PhD)

Classification of Instructional Programs (CIP) code: 26.1002

Standard Occupational Classification (SOC) code: 19-1042

About the Programs

The Department of Pharmacology and Physiology offers graduate programs leading to the MS and the PhD degrees. The programs require independent research under the direction of departmental faculty members who are engaged in highly active research programs involving molecular, cellular, and behavioral approaches to experimental pharmacology and physiology in a strongly collaborative environment.

Students in both the PhD and MS programs begin their coursework with a core curriculum in biomedical sciences, and immediately start laboratory rotations. Intensive graduate level pharmacology, physiology and neuropharmacology courses round out the core programmatic courses. Specialization in ion channel physiology, smooth muscle physiology, behavioral pharmacology and signal transduction processes may involve the taking of several elective courses. Each program requires the defense of a thesis based on original research.

About the MS Program

The MS program, requiring two years of full-time study, provides a broad knowledge and technical expertise in pharmacology and physiology, allowing graduates to become partners in research in either an academic or an industrial environment. Students who wish to continue their graduate

studies after the MS degree may apply to the PhD program, and their course credits may be applied to the doctoral program.

About the PhD Program

PhD candidates must pass a qualifying examination by November of their third year and they must have one accepted co-author manuscript and one submitted first-author manuscript in peer-reviewed journals during the course of the program.

Admission Requirements

Drexel University College of Medicine has a rolling admissions policy, which means that complete applications are reviewed as they are received. Applicants are therefore advised to apply early, as decisions to accept or deny admission may be made before the official deadlines.

To learn more about applying to Drexel College of Medicine programs visit the Drexel College of Medicine's Graduate School of Biomedical Sciences and Professional Studies (<http://www.drexel.edu/medicine/Academics/Graduate-School>) website.

Degree Requirements (MS)

About the Curriculum

The core curriculum is a comprehensive interdisciplinary program of study for all first-year research master's students in the Biomedical Graduate Studies programs. The goal of the core curriculum is to provide a broad foundation in biomedical sciences and serve as a framework for advanced study in more specialized areas.

Courses Repeatable for Credit

As well as taking all required courses, students may re-enroll in courses having the status "repeatable for credit" (such as journal club, seminar and research courses) for the duration of their program in order to meet the total number of credits required for graduation.

Additional Information

For more information about scheduling and developing a plan of study, visit the College of Medicine's Pharmacology and Physiology (<http://www.drexelmed.edu/Home/AcademicPrograms/BiomedicalGraduateStudies/Programs/MastersDoctoralPrograms/PharmacologyPhysiology.aspx>) web page.

CR 616S	Intro to Therapeutic Products	
CR 617S	Informatics in Pharm Res & Development	
PHRM 505S	Pharm & Phys 3rd Lab Rotation	
Total Credits		64.0

* Taken each semester.

** Taken each semester starting in the second year.

Degree Requirements (PhD)

About the Curriculum

The core curriculum is a comprehensive interdisciplinary program of study for all PhD students in the Biomedical Graduate Studies programs. The goal of the core curriculum is to provide a broad foundation in biomedical sciences and serve as a framework for advanced study in more specialized areas.

Courses Repeatable for Credit

As well as taking all required courses, students may re-enroll in courses having the status "repeatable for credit" (such as journal club, seminar and research courses) for the duration of their program in order to meet the total number of credits required for graduation.

Additional Information

For more information about scheduling and developing a plan of study, visit the College of Medicine's Pharmacology and Physiology (<http://www.drexelmed.edu/Home/AcademicPrograms/BiomedicalGraduateStudies/Programs/MastersDoctoralPrograms/PharmacologyPhysiology.aspx>) web page.

Program Requirements

Required Courses

IDPT 500S	Responsible Conduct of Research	2.0
IDPT 501S	Biostatistics I	2.0
or NEUR 500S Statistics for Neuro/Pharm Research		

IDPT 507S	Teaching Practicum I	1.0-4.0
IDPT 508S	Teaching Practicum II	1.0-4.0
IDPT 509S	Teaching Practicum III	1.0-4.0
IDPT 521S	Molecular Structure and Metabolism	5.0
IDPT 526S	Cells to Systems	5.0
IDPT 600S	Thesis Defense	9.0
PHRM 502S	Current Topics in Pharmacology & Physiology *	9.0
PHRM 503S	Pharm & Phys 1st Lab Rotation	4.0
PHRM 504S	Pharm & Phys 2nd Lab Rotation	4.0
PHRM 505S	Pharm & Phys 3rd Lab Rotation	4.0
PHRM 507S	Prin of Neuropharmacology	3.0
PHRM 512S	Graduate Pharmacology	3.0
PHRM 516S	Advanced Topics in Physiology	1.0
PHRM 517S	Advanced Topics in Pharmacology	1.0
PHRM 600S	Pharmacology Thesis Research **	63.0
PHGY 503S	Graduate Physiology	4.0
Advanced Electives		8.0

Choose at least two Advanced Electives for a minimum of eight credits.

PHRM 518S	New Frontiers in Therapy	
PHRM 519S	Methods in Biomedical Research	
PHRM 525S	Drug Discovery and Development I	
PHRM 526S	Drug Discovery and Development II	
BIOC 510S	Cancer Biology	
MIIM 508S	Immunology I	
MIIM 521S	Biotechniques I: Molecular and Genomic Methods	
MLAS 536S	Animal Models for Biomedical Research	
NEUR 507	Neuroscience I	

General Electives

CR 500S	Epidemiology	
CR 513S	Business Processes and Contemporary Concerns in Pharmaceutical R & D	
CR 514S	World Wide Regulatory Submissions	
CR 515S	Intro to Clinical Trials	
CR 520S	Applications of Clinical Research Biostatistics	
CR 525S	Scientific Writing and Medical Literature	
CR 530S	Tech Transfer	
CR 535S	Current Federal Regulatory Issues in Biomedical Research	
CR 545S	Pharmaceutical Law	
CR 550S	Leadership Skills	
CR 555S	Compliance & Monitoring Issues	
CR 570S	Principles and Practice of Pharmacovigilance	
CR 600S	Designing the Clinical Trial	
CR 609S	Innovative Product Development	
CR 612S	Fundamentals of Compliance	
CR 614S	Introduction to Clinical Pharmacology	
CR 616S	Intro to Therapeutic Products	
CR 617S	Informatics in Pharm Res & Development	
CR 620S	Biotech/Research	
CR 625S	Health Policy and Economics	
CR 635S	Strategic Planning	
Total Credits		130.0-139.0

* Taken each semester with the exception of the last when only Thesis Defense is taken.

** Taken each semester starting in year 2, with the exception of the last semester when only Thesis Defense is taken.

Pre-Veterinary Graduate Minor

About the Graduate Minor

Students desiring to attend veterinary medical school will have the option to elect to complete a pre-vet minor within the Master of Laboratory Animal Science (MLAS) program (p. 86). The addition of these courses to the MLAS program will help to further enhance the student's application to veterinary medical school by providing additional rigorous and relevant graduate level coursework.

Admission Requirements

Students will be selected on the basis of adequate educational background and veterinary/ research/ animal care experience.

Prerequisite coursework includes: chemistry, biology, organic chemistry, and physics.

Admission into the PVET minor is primarily open to MLAS students. Admission into the minor by other program students is at the discretion of the MLAS program director in concert with the director/ academic advisor of the potential applicant.

Program Requirements

Choose 9.0 credits from the list below: 9.0

IHS 514S	Molecular Biology & Biochemistry of the Cell	
MLAS 500S	Animal Nutrition	
MLAS 545S	Fundamentals of Histology	
MSPP 511S	Concepts in Biochemistry and Cell Biology	
PHGY 503S	Graduate Physiology	
PHRM 512S	Graduate Pharmacology	
Total Credits		9.0

College of Nursing and Health Professions

The College of Nursing and Health Professions offers a wide range of graduate programs. Many programs offer flexible scheduling, making it possible for students to continue their education with night and weekend courses. Others are web-based programs available online.

Majors

- Art Therapy and Counseling (MA) (p. 106)
- Creative Arts Therapies (PhD) (p. 179)
- **NEW:** Complementary and Integrative Health (MS)
- Couple and Family Therapy (PhD) (p. 120)
- Dance/Movement Therapy and Counseling (MA) (p. 122)
- Family Therapy (MFT) (p. 140)
- Health Administration (MHA) (p. 142)
- Human Nutrition (MS) (p. 135)
- Music Therapy and Counseling (MA) (p. 173)
- Nurse Anesthesia (MSN) (p. 145)
- Nursing (PhD) (p. 183)
- Nursing Practice (DNP) (p. 124)
- **Nursing - Advanced Role (MSN)**
 - Clinical Nurse Leader (p. 147)
 - Clinical Trials Research (p. 153)

- Nursing Education (p. 160)
- Nursing Innovation (p. 162)
- Nursing Leadership in Health Systems Management (p. 165)
- MSN-Bridge Program (p. 144)
- **Nursing - Nurse Practitioner (MSN)**
 - Adult-Gerontology Acute Care Nurse Practitioner
 - Adult-Gerontology Primary Care Nurse Practitioner (p. 146)
 - Family/Individual Across the Lifespan Nurse Practitioner (p. 159)
 - Pediatric Acute Care Nurse Practitioner (p. 168)
 - Pediatric Primary Care Nurse Practitioner (p. 170)
 - Pediatric Primary Care and Pediatric Acute Care Dual Option Nurse Practitioner (p. 169)
 - Psychiatric Mental Health Nurse Practitioner (p. 171)
 - Women's Health/Gender Related Nurse Practitioner (p. 172)
- Nutrition Sciences (PhD) (p. 174)
- Physical Therapy (DPT) (p. 126)
- Physician Assistant (MHS) (p. 184)
- Physician Assistant Post-Professional Master's Program (p. 186)
- **NEW:** Quality, Safety and Risk Management in Healthcare (MS, MSN)
- Rehabilitation Sciences (DHSc) (p. 198)
- Rehabilitation Sciences (MHS, PhD) (p. 195)

NEW: Graduate Minors

- Advanced Study in Complementary and Integrative Therapies (p. 130)
- Advanced Study in Holistic Hospice and Palliative Care (p. 131)
- Advanced Study in Integrative Addiction Therapies (p. 131)
- Advanced Study in Women's Integrative Health (p. 132)
- Health Administration (p. 144)
- Integrated Nursing Care of Autism Spectrum Disorder (p. 132)
- Neuroscience, Learning and Online Instruction (p. 133)
- Nursing Education (p. 133)
- Nursing Leadership in Health Systems Management (p. 134)
- Service to Veterans (p. 134)
- Sexual Health and Wellness (p. 135)

Certificates

- Complementary and Integrative Therapies (p. 114)
- Couple and Family Therapy (p. 108)
- Forensic Trends and Issues in Contemporary Healthcare (p. 109)
- Geriatrics (p. 188)
- Hand and Upper Quarter Rehabilitation (p. 108)
- Holistic Hospice and Palliative Care (p. 115)
- Integrative Addiction Therapies (p. 116)
- Issues in Human Trafficking (p. 139)
- Medical Family Therapy (p. 110)
- Music Therapy (p. 189)
- Neuroscience, Learning and Online Instruction (p. 110)
- Nurse Anesthesia (p. 190)
- **Nursing Certificates - Advanced Role**
 - Clinical Nurse Leader Post-Master's Certificate (p. 117)
 - Nursing Innovation (p. 113)

- Integrated Nursing Care of Autism Spectrum Disorder (ASD) (p. 187)
- Nursing Education Post-Bachelor's Certificate (p. 111)
- Nursing Education Post-Master's Certificate (p. 191)
- Nursing Leadership in Health Systems Management (p. 111)
- **Nursing Certificates - Nurse Practitioner**
 - Adult-Gerontology Acute Care Nurse Practitioner Post-Master's Certificate
 - Adult-Gerontology Primary Care Nurse Practitioner Post-Master's Certificate (p. 105)
 - **NEW:** Emergency/Trauma Nurse Practitioner
 - Family/Individual Across the Lifespan Nurse Practitioner Post-Master's Certificate (p. 129)
 - Pediatric Acute Care Nurse Practitioner Post-Master's Certificate (p. 176)
 - Pediatric Primary Care Nurse Practitioner Post-Master's Certificate (p. 178)
 - Pediatric Primary Care and Pediatric Acute Care Dual Nurse Practitioner Post-Master's Certificate (p. 177)
 - Psychiatric Mental Health Nurse Practitioner Post-Master's Certificate (p. 192)
 - Women's Health/Gender Related Nurse Practitioner Post-Master's Certificate (p. 202)
- Pediatric Rehabilitation (p. 112)
- Service to Veterans (p. 201)
- Sexual Health and Wellness (p. 201)
- Substance Use Disorder Treatment (p. 113)
- Women's Integrative Health (Advanced Study) (p. 116)

About the College

As the practice of medicine has become more complex with the advent of technology and new drug therapies, so has the provision of health services. An increasingly diverse, aging US population experiencing higher rates of chronic illness is demanding more service and culturally competent care. While technology improvements help provide the means to deliver safer, high-quality care, our society is facing shortages in health professionals such as nurses, mental health workers, nurse anesthetists, physician assistants, and rehabilitation science professionals. The demand for these and other skilled professionals continues to increase and is expected to remain steady well into the 21st century. There is no more vibrant a place to prepare for these kinds of meaningful, rewarding careers than at Drexel University's College of Nursing and Health Professions (<http://www.drexel.edu/cnhp>). The College offers associate's, bachelor's, master's, and doctoral degrees in more than a dozen health care fields.

Just as the health profession disciplines have come of age, so has the College of Nursing and Health Professions. Founded in 1969 as the College of Allied Health Professions with just three degree programs and a faculty of five, the college has undergone a remarkable evolution. Today it serves over 3,000 students, with a broad array of contemporary program offerings. Along the way, it has earned widespread recognition and accreditation for the education of health professionals.

Mission and Approach

The College believes that the health care needs of today and tomorrow can best be met by professionals who have expertise in their own fields and a concurrent understanding of other health disciplines. In addition to

providing a broad-based education that balances academic learning with clinical training, the University promotes collaboration among students in our College of Nursing and Health Professions, our School of Public Health, and the College of Medicine, which draws from the rich traditions of predecessors Hahnemann University and the Medical College of Pennsylvania.

Teamwork is as important in academics as it is in health care. The College of Nursing and Health Professions' dedicated and knowledgeable faculty members work closely with students, providing a supportive and creative learning environment. Graduates from the College possess a wide range of experiences and the knowledge, compassion, and lifelong learning skills needed to become accomplished health care professionals.

The student body, which is diverse in age and culture, reflects Drexel University's commitment to provide qualified students with an opportunity for advanced education. Drexel welcomes nontraditional applicants and especially encourages applications from underrepresented minorities and those interested in practicing in underserved areas.

Many of Drexel's College of Nursing and Health Professions programs offer flexible scheduling, making it possible for students to continue their education through part-time, online, night, or weekend study.

Accreditation

Nursing programs are accredited by the CCNE (Commission on Collegiate Nursing Education), and the PA State Board of Nursing.

The Couple and Family Therapy MFT degree and Post-Master's Certificates are accredited by COAMFTE (Commission on Accreditation of Marriage and Family Therapy Education).

The Creative Arts in Therapy MA degrees in Dance/Movement Therapy, Music Therapy, and Art Therapy are approved by the ADTA (American Dance Therapy Association), the AMTA (American Music Therapy Association), and the AATA (American Art Therapy Association), respectively.

The Didactic Program in Nutrition is accredited by ACEND (Accreditation Council for Education in Nutrition and Dietetics).

The Health Services Administration program is certified by AUPHA (Association of University Programs in Health Administration).

The Nurse Anesthesia program is accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs.

The Professional Physical Therapy (DPT) program is accredited by CAPTE (Commission on Accreditation in Physical Therapy Education).

The Physician Assistant program is accredited by ARC-PA (Accreditation Review Commission on Education for the Physician Assistant).

Adult-Gerontology Acute Care Nurse Practitioner Post-Master's Certificate

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's

Number of Credits to Completion: 39.0; 800 clinical hours

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 51.3822

Standard Occupational Classification (SOC) Code: 29-1171

Gainful Employment Disclosure (<http://deptapp08.drexel.edu/gainfulemployment/Nursing-Certificate-PM/51.3801-Gedt.html>)

The online Adult-Gerontology Acute Care Nurse Practitioner (AGACNP) program is designed to prepare practitioners for professional practice in the management of medical, surgical, and critical-care adult patient populations. This certificate is offered to those individuals who have earned a master's degree in nursing and seek further preparation as an Adult Gerontology Acute Care Nurse Practitioner. Graduates will be eligible to sit for the AACN and/or ANCC's Adult Gerontology Acute Care Certification Examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulation, and evaluation. OCI visits occur 2-4 times during the clinical portion of the program and range from 2-3 days. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab. These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

Program Requirements

Required Courses

Support Courses		
NURS 548	Advanced Pathophysiology	3.0
NURS 549	Advanced Pharmacology	3.0
NURS 550	Advanced Health Assessment & Diagnostic Reasoning	4.0
Concentration Courses		
NURS 554	Pharmacology for Adult-Gerontology Acute Care Nurse Practitioners	3.0
NURS 570	Adult Gerontology Acute Care NP I: Introduction to Adult Gerontology Acute Care Medicine	5.0
NURS 571	Adult Gerontology Acute Care Nurse Practitioner II: Mgmt/Care of Patients in Acute/Crit Care Med Set	5.0
NURS 572	Adult Gerontology Acute Care Nurse Practitioner III: Mgmt/Care of Patients in Acute Surgical Setting	5.0
NURS 573	Adult Gerontology Acute Care NP IV: Management of Care of Patients in Critical Care Settings	5.0
NURS 580	Adult Gero Acute Care NP V: Mgmt/Care of Clients in Acute, Critical Care, Med or Surg Settings	5.0
NURS 664	Professional Issues for Nurse Practitioners	1.0
Total Credits		39.0

Additional Information

Adult-Gerontology Primary Care Nurse Practitioner Post-Master's Certificate

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's

Number of Credits to Completion: 34.0; 640 clinical hours

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 51.3822

Standard Occupational Classification (SOC) Code: 29-1171

Gainful Employment Disclosure (<http://deptapp08.drexel.edu/gainfulemployment/Nursing-Certificate-PM/51.3801-Gedt.html>)

The Post-Master's Certificate in Adult-Gerontology Primary Care (AGPC) Nurse Practitioner program is intended for MSN prepared professionals who would like to gain further knowledge in the primary care continuum. It is designed to prepare practitioners who will take advanced nursing roles as clinicians, educators, researchers, and leaders in the rapidly changing, evidence-driven healthcare environment. Emphasis is placed on evidence-based practice, interdisciplinary collaboration, and critical use of evolving technology. Graduates will be prepared to provide care for adults throughout their lifespan to promote maximal health, reduce risks and manage acute and chronic health condition.

Graduates will be eligible to apply for certification as an Adult-Gerontology Primary Care Nurse Practitioner through the American Academy of Nurse Practitioners (AANP) and American Nurses Credentialing Center (ANCC).

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulation, and evaluation. OCI visits occur 2-4 times during the clinical portion of the program and range from 2-3 days. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab. These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

Art Therapy and Counseling

Major: Art Therapy and Counseling
Degree Awarded: Master of Arts (MA)
Calendar Type: Quarter
Total Credit Hours: 90.0
Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.2301
 Standard Occupational Classification (SOC) code: 29-1129

About the Program

The graduate Art Therapy and Counseling program offers a progressive curriculum that integrates didactic, experiential, supervisory, and clinical experiences to prepare students for providing art therapy and counseling services in a range of settings. Students learn theories applied to art therapy practice and contemporary approaches that support their understanding of the healing aspects of the creative process. Emphasis is placed on the complex interactions among the client, the therapist, and the art process that promote therapeutic change. Students apply this knowledge in practicum and internship experiences offered in a variety of behavioral health and community settings, such as psychiatric hospitals, medical facilities, schools, forensic settings, and shelters.

We provide educational experiences to promote professional development and multicultural competence conducive to the ethical, reflective, and socially-aware practice of art therapy. Our aim is to prepare professional art therapists capable of critical thinking with regard to the therapeutic use of art and the creative process while promoting respect for the diversity of human experiences.

For additional information about the program, visit the College of Nursing and Health Professions' Art Therapy and Counseling (<https://www.drexel.edu/cnhp/academics/graduate/MA-Art-Therapy-Counseling>) website.

Creative Arts Therapies Department Faculty

Yasmine Awais, MAAT, ATR-BC, ATCS, LCAT, LPC (*Art Institute of Chicago*). Clinical Professor. Art therapy with diverse populations, art therapy in non-profit settings, clinical supervision.

Joke Bradt, PhD, MT-BC (*Temple University*). Associate Professor. Research in music therapy, chronic pain, systematic reviews.

Natalie Rae Carlton, PhD, ATR-BC, LPCC (*Leslie University*) Director, *Art Therapy MA Program*. Associate Clinical Professor. New media and art therapy, social justice in art activities, transgender and LGBTQ identity.

Nancy Gerber, PhD, ATR-BC (*Union Institute and University*) Director, *PhD Program in Creative Arts Therapies*. Associate Clinical Professor. Art therapy assessment and treatment of adolescents and adults; modern psychoanalysis and art therapy; arts therapy education and doctoral education; arts based research and mixed methods research.

Sharon W. Goodill, PhD, BC-DMT, NCC, LPC (*Union Institute and University*) Chair, *Department of Creative Arts Therapies*. Clinical Professor. Medical dance/movement, mind/body studies, movement assessment for DMT, CAT research and leadership.

Scott Horowitz, MA, MT-BC, LPC (*Drexel University*) Director of *Field Education*. Clinical Instructor. Interdisciplinary practice and education, developmental models of clinical and practicum supervision, music therapy and neurodevelopmental populations.

Florence Ierardi, MM, MT-BC, LPC (*Temple University*) Director, *Music Therapy and Counseling MA Program*. Associate Clinical Professor. Clinical improvisation, trauma-informed music therapy, multicultural music therapy perspectives.

Girija Kaimal, EdD, MA (*Harvard University*). Assistant Professor. Art therapy, educational research, program evaluation, art therapy.

Dawn Morningstar, MCAT, VC-DMT, LP (*Hahnemann University*). Associate Clinical Professor. Specialty in working with children and adolescents, Dance/movement therapist at Drexel's Parkway Health and Wellness faculty practice outpatient clinic.

Michele D. Rattigan, MA, ATR-BC, NCC, LPC (*MCP Hahnemann University*) Coordinator of *CAT Clinical Services*. Assistant Clinical Professor.

Ellen Schelly-Hill, MMT, BC-DMT, NCC, LPC (*Antioch NE Graduate School*) Director of Dance/Movement Therapy and Counseling MA Program. Associate Clinical Professor. Adults diagnosed with mood disorders, anxiety, chronic pain and with histories of trauma; clinical supervision; ethics.

Certificate in Advanced Practice in Hand and Upper Quarter Rehabilitation

Certificate Level: Graduate
Admission Requirements: Bachelor's degree
Certificate Type: Post-Baccalaureate
Number of Credits to Completion: 16.0
Instructional Delivery: Online
Calendar Type: Quarter
Expected Time to Completion: 1 year
Financial Aid Eligibility: Not aid eligible
Classification of Instructional Program (CIP) Code: 51.2308
Standard Occupational Classification (SOC) Code: 29-1123

Note: Effective Fall 2016, students will no longer be accepted into this certificate program.

The Certificate of Advanced Practice in Hand and Upper Quarter Rehabilitation program is designed for practicing clinicians in physical therapy and occupational therapy who wish to gain advanced understanding of the upper quarter, including the cervical spine, shoulder, elbow, wrist, and hand. This program consists of four courses offered online.

The curriculum is based on the most recent hand therapy practice analysis conducted by the Hand Therapy Certification Commission (HTCC). The HTCC oversees the certification process for qualifying occupational and physical therapists as "certified hand therapists" or CHTs. This Certificate of Advanced Practice in Hand and Upper Quarter Rehabilitation is recognized by HTCC as a resource to assist with preparation for the CHT examination.

After successfully completing the four required courses, students receive a post-professional certificate of completion. The credits may be transferred into degree programs within Physical Therapy and Rehabilitation Sciences.

Program Requirements

Foundations of Practice Requirements		
PTRS 767	Foundations in Hand Therapy	4.0
PTRS 768	Upper Quarter Joint Pathology	4.0
PTRS 769	Nerve Injuries of the Upper Quarter	4.0
PTRS 770	Diseases That Affect the Hand	4.0
Total Credits		16.0

Additional Information

For more information, visit the College's Hand Therapy Certificate web page (<https://www.drexel.edu/cnhp/academics/post-baccalaureate/Certificate-PB-Advanced-Practice-Hand-and-Upper-Quarter-Rehabilitation>). To apply, please visit the program's Drexel University Online web page (<http://www.drexel.com/online-degrees/nursing-degrees/cert-hand>).

Certificate in Couple and Family Therapy

Certificate Level: Graduate
Admission Requirements: Master's degree
Certificate Type: Post-Master's Certificate
Number of Credits to Completion: 43.0
Instructional Delivery: Campus
Calendar Type: Quarter
Expected Time to Completion: 2 years
Financial Aid Eligibility: Aid eligible
Classification of Instructional Program (CIP) Code: 51.1505
Standard Occupational Classification (SOC) Code: 21-1013
Gainful Employment Disclosure (<http://deptapp08.drexel.edu/gainfulemployment/Couple-Family-Therapy/51.1505-Gedt.html>)

Note: Effective Fall 2016, students will no longer be accepted into this program.

About the Program

Drexel University offers a post-master's program leading to a certificate in couple and family therapy. The program is accredited by the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE) of the American Association for Marriage and Family Therapy (AAMFT). The post-master's certificate in couple and family therapy can be expected to lead towards licensure as a Marriage and Family Therapist, meets the foundational educational and clinical to become credentialed as an Emotionally Focused Therapist and satisfies the Pre-Clinical Membership requirements for AAMFT.

Clinical Practicum Experience

PMC students are enrolled in practicum for 4 consecutive quarters. Interns generally participate in one practicum site during their tenure in the PMC. All interns must complete a continuous 12-month calendar year at one practicum site prior to graduation. Interns will be expected to spend 20 hours per week working at the approved program practicum site. Scheduling of specific times will be negotiated by the intern, on-site supervisor and CFT Director of Clinical Training. Interns will receive supervision from AAMFT Approved Supervisors/or Equivalent and Credentialed Emotionally Focused Therapist Supervisors. The practicum schedule must not conflict with class schedule. Interns are expected to average 13-15 client contact hours per week in order to achieve the 350 clinical hour requirement by the end of the program. Case loads usually consist of more than 14 clients to ensure that the intern will average 13-15 client contact hours per week.

Curriculum

The curriculum assists students in integrating theory and practice. Issues of race, ethnicity, culture, class, gender, sexual orientation, spirituality, religion, age, ability, power, and privilege are addressed throughout the program. Students are fully trained to assume clinical practice in couple and family therapy.

Required Courses		
Theoretical Foundations		
CFTP 501	Introduction to Family Therapy	4.0
CFTP 503	Historical and Sociocultural Influences	4.0
Clinical Practice		
CFTP 508	Structural Family Therapy	4.0
Individual Development and Family Relations		

CFTP 520	Family Life Cycle	4.0
Professional Identity and Ethics		
CFTP 522	Legal and Ethical Implications in Couple and Family Therapy Practice	4.0
Research		
CFTP 525	Research in Couple and Family Therapy	4.0
Required Additional Learning		
CFTP 526	Person of the Therapist Experience I	2.0
CFTP 527	Person of the Therapist Experience II	2.0
CFTP 753	Introduction to Emotionally Focused Therapy	4.0
CFTP 754	Core Skills in Emotionally Focused Therapy	4.0
Electives		
CFTP 505	Bowen Theory	
CFTP 506	Contextual Theory and Therapy	
CFTP 507	Collaborative Approaches	
CFTP 509	Couples Therapy	
CFTP 510	Sex Therapy	
CFTP 511	Object Relations Theory	
CFTP 512	Behavioral Models of Family Therapy	
CFTP 517	Addictions in The Family	
CFTP 518	Medical Family Therapy	
CFTP 519	Family Violence	
CFTP 537	Nosology & Couple and Family Therapy Practice	
Practicum		
CFTP 530	Clinical Practicum/Supervision I	2.0
CFTP 531	Clinical Practicum/Supervision II	2.0
CFTP 532	Clinical Practicum/Supervision III	2.0
CFTP 533	Clinical Practicum/Supervision IV	1.0
Total Credits		43.0

Certificate in Forensic Trends and Issues in Contemporary Healthcare

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 9.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 43.0106

Standard Occupational Classification (SOC) Code: 19-4092

The certificate program examines contemporary trends and issues related to the wide range of interpersonal violence, crime and sudden violent death that may be encountered in a variety of healthcare settings. Theoretical tenets, methods for assessment and related implications for intervention and/or referral will be examined from a multifaceted perspective—including that of the offender, crime victim, families, and the healthcare community-at-large.

Program Goals

- Examine social attitudes and perceptions toward victimization and offending behavior;
- Identify the psychological, physical and legal aspects of victimization;
- Assess victim trauma and identify appropriate interventions for victimized clients;

- Assess the motivational intent and behavior patterns of offenders who commit aggressive crimes;
- Analyze institutional approaches and subsequent response patterns to victims and offenders in a variety of settings (e.g., inpatient, outpatient, primary care settings, academic, etc.);
- Assess ethical dimensions of healthcare issues relative to the role and scope of practice and healthcare providers;
- Examine healthcare policy assessment, development and/or modification to enhance health promotion of offenders and victims across the lifespan.

Admission Requirements

Admission to this program requires completion of a BS/BA degree. The program is intended for providers and educators in the healthcare sciences, as well as professionals who have direct contact with victims and/or offenders across disciplines and areas of practice (e.g. social workers, criminal justice, police, high school teachers, etc). The program is open to practitioners, graduate student and healthcare educators across the continuum of specialties and agencies.

TOEFL Requirement

International applicants, as well as immigrants to the United States and US permanent residents whose native language is not English and who have not received a bachelor's degree or higher in the United States, Australia, Canada, Ireland, New Zealand, or the United Kingdom, must show proficiency in English speaking as well as listening, writing, and reading. American citizens born on US military bases abroad may be waived from the TOEFL requirements after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

- If you take the TOEFLiBT exam, you must have a minimum combined score for the listening, writing, and reading sections of 79 plus a speaking section score of 26 or higher.
- If you take the TOEFL, you must have a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher.

Program Requirements

Requirements		
NURS 519	Forensic Science Foundations	3.0
NURS 528	Victimology – Contemporary Trend	3.0
NURS 533	Forensic Mental Health	3.0
Total Credits		9.0

Certificate in Medical Family Therapy

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's

Number of Credits to Completion: 14.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.1505

Standard Occupational Classification (SOC) Code: 21-1013

This certificate program is offered to those individuals who have earned a master's degree and seek further education. The program, offered online, is designed to introduce a variety of currently practicing health care professionals to the ways acute and chronic medical illnesses and conditions influence and are influenced by psychosocial, relational, and family conditions and environments. Additionally, couple and family therapists and other professionals trained in the sub-specialty of medical family therapy (or collaborative healthcare) will learn to work cooperatively to bridge gaps in the health care systems, and provide comprehensive and culturally congruent family focused services.

Required Courses

MFTP 518	Medical Family Therapy	3.0
MFTP 537	Multicultural & Family Systems Approach to Healthcare	4.0
MFTP 538	Issues and Trends in Health Policy for Families	3.0
Select one of the following:		4.0
CFTP 500	Introduction to Systems Theory	
CFTP 501	Introduction to Family Therapy	
CFTP 503	Historical and Sociocultural Influences	
CFTP 505	Bowen Theory	
CFTP 508	Structural Family Therapy	
CFTP 510	Sex Therapy	
CFTP 517	Addictions in The Family	
CFTP 519	Family Violence	
CFTP 520	Family Life Cycle	
CFTP 537	Nosology & Couple and Family Therapy Practice	
Total Credits		14.0

Certificate in Neuroscience, Learning and Online Instruction

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 12.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.3817

Standard Occupational Classification (SOC) Code: 25-1072

The Post-Baccalaureate Certificate in Neuroscience, Learning & Online Instruction marks achievement of advanced understanding, comprehension, and application of principles of neuroanatomy, neuroscience, cognitive processing, and learning theory to online

instruction. This interdisciplinary four-course certificate includes three core courses and one discipline specific elective course. The program provides knowledge and skills to post-baccalaureate professionals and graduate students enrolled at Drexel University who seek a certificate to instruct courses in online and/or blended environments across multiple fields of study utilizing methodological approaches related to neuroscience, the brain's memory systems, the learning process, and the impact of health and emotions on learning.

Each course may be taken alone or as part of the four-course post-baccalaureate certificate. Certificate completion is only awarded if all four courses are taken and completed with a grade of B or higher. Graduate students at Drexel University may take any course regardless of discipline major and may consider pursuing this concentration as a graduate minor. Drexel undergraduate students may apply to take these courses with approval of course instructor and senior level standing at the University.

The discipline-specific elective course must be related to the learner's professional subject domain. This credit must be at the graduate level and may be transferred in and applied to certificate requirements. For more information, please contact Ms. Jillian Randall at 267-359-5692 or jnr56@drexel.edu.

Admission Requirements

- Bachelor's Degree from a fully accredited program
- 3.0 GPA or above on all previous coursework or last 60.0 credits completed
- Official transcripts from all previous educational institutions required
- Personal statement describing interest in certificate program
- Curriculum Vitae or Resume
- One professional letter of recommendation

TOEFL Requirement

International applicants, as well as immigrants to the United States and US permanent residents whose native language is not English and who have not received a bachelor's degree in higher in the United States, Australia, Canada, Ireland, New Zealand, or the United Kingdom, must show proficiency in English speaking as well as listening, writing, and reading. American citizens born on US military bases abroad may be waived from the TOEFL requirement after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

If you take the TOEFLiBT exam, you must have a minimum combined score for the listening, writing, and reading sections of 79 plus a speaking section score of 26 or higher.

If you take the TOEFL, you must have a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher.

Program Requirements

Core Courses		
IPS 553	Neuroscience of Learning	3.0
IPS 554	Online Neuropedagogy, Regulations & Online Instruction	3.0
IPS 600	Capstone: Applying Neurobiology to Online Instruction	3.0
Elective		3.0
Select one of the following:		
EDLT 550	Introduction to Instructional Design	
ELL 503	Teaching and Learning Issues in E-Learning	
NURS 606	Curriculum Design for Higher Level Cognition	

NURS 615	Assessment, Measurement and Evaluation	
Total Credits		12.0

- * Other electives with program approval.

Certificate in Nursing Education

Certificate Level: Graduate

Admission Requirements: Bachelor's Degree

Certificate Type: Post Baccalaureate

Number of Credits to Completion: 12.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.3817

Standard Occupational Classification (SOC) Code: 25-1072

This certificate program provides a four-course grouping of classes that focus on knowledge and skills required for nurse educator roles. Courses are chosen from the MSN in Nursing Education curriculum. Upon completion of this certificate program, the student will have 12.0 graduate credits from an NLN/CCNE-approved master's in nursing program.

Admission Requirements

- Bachelor's Degree from a fully accredited program.
- 3.0 GPA or above on all previous coursework or last 60 credits completed.
- Official transcripts from all previous educational institutions required.
- Personal statement describing interest in certificate program.
- Curriculum Vitae or Resume.
- One professional letter of recommendation

TOEFL Requirement

International applicants, as well as immigrants to the United States and U.S. permanent residents whose native language is not English and who have not received a bachelor's degree or higher in the United States, Australia, Canada, Ireland, New Zealand, or the United Kingdom, must show proficiency in English speaking as well as listening, writing, and reading. American citizens born on U.S. military bases abroad may be waived from the TOEFL requirement after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

Certificate in Nursing Leadership in Health Systems Management

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 12.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.3817

Standard Occupational Classification (SOC) Code: 25-1072

This certificate program focuses on development of a leadership style and skills set essential for individuals in or seeking administrative roles. The program provides a four-course grouping of classes from the MSN in Nursing Leadership in Health Systems Management curriculum. Selected classes provide essential skills for supervisory and management positions that help professionals perform in their expanded roles and grow as emerging leaders.

Emphasis will be placed on fiscal and organizational management, strategic planning, integrated quality outcomes measurement, organizational structures, marketing, and management of human resources within organizations. The program provides the student with information and strategies to problem solve, make decisions, resolve conflict and operationalize the mission and goals of the healthcare delivery organization.

Admission Requirements

- Bachelor's Degree from a fully accredited program.
- 3.0 GPA or above on all previous coursework or last 60 credits completed.
- Official transcripts from all previous educational institutions required.
- Personal statement describing interest in certificate program.

Note: Effective Spring 2017, students will no longer be accepted into this program.

This program is for licensed physical and occupational therapists who work or aspire to work in early intervention, school-based therapy or other pediatric services and who seek to develop expertise in this field.

Graduates of the program will be prepared to enhance activity, participation and measurable outcomes for children and their families through the application of research, theory, and emergent knowledge to practice. Issues across the spectrum of care, for ages from birth to 21, are addressed and practitioners have the opportunity to enhance their comprehension of family and client-centered practice in a diversity of settings. The program incorporates philosophies of practice, issues of advanced clinical decision making, intervention and service delivery approaches, advocacy, and clinical leadership.

Students can tailor their studies and assignments to meet personal needs. Individualized assignments allow them to apply key themes and issues to practice. The program provides physical and occupational therapists with advanced knowledge and skills to develop expertise in the field of pediatric rehabilitation.

After successfully completing the required credits, students receive a post-professional certificate of completion. The credits may be transferred into degree programs within Physical Therapy and Rehabilitation Sciences.

Certificate in Substance Use Disorder Treatment*Certificate Level: Graduate**Admission Requirements: Bachelor's degree**Certificate Type: Post-Baccalaureate**Number of Credits to Completion: 18.0**Instructional Delivery: Online**Calendar Type: Quarter**Expected Time to Completion: 1 year**Financial Aid Eligibility: Not aid eligible**Classification of Instructional Program (CIP) Code: 34.0104**Standard Occupational Classification (SOC) Code: 21-1011*

This certificate is designed for individuals with bachelor's degrees in psychology, social work, nursing, or other allied health professions who want to advance their knowledge of substance use disorders treatment and supervision practices. It is offered through the Counseling and Family Therapy Department's Behavioral Health Counseling Program within the College of Nursing and Health Professions of Drexel University, and is designed for individuals working in health care settings serving people with substance use disorders. The certificate requires the completion of six online courses for a total of 18.0 quarter credits. Completion of this certificate does not in and of itself certify clinical expertise. The required coursework can also be applied toward a specialty focus area for students in the Innovations and Intra/Entrepreneurship Advanced Practice Nursing Track.

Each course focuses on a core competency needed to facilitate recovery from substance abuse. Students will acquire knowledge concerning the etiology of substance use behavior; the bio-psycho-social nature of addiction; substance use patterns across the lifespan and; recovery and relapse prevention. Students will also develop skills related to motivational enhancement, cognitive / behavioral change and workforce supervision.

Program goals

The goal of this certificate program is for students to:

- Gain an understanding of the bio-psycho-social dynamics of substance use;
- Develop evidence-based treatment competencies;
- Gain educational training hours to either obtain or maintain a credential as a drug/alcohol counseling professional.

In and of itself, this certificate does not take the place of supervised, clinical training, but rather serves as one of several possible components required to obtain a professional certification or clinical license to practice.

Program Requirements**Required Courses**

This Nursing Innovation Certificate program is for individuals who want to understand the theories of innovation, examine some successful and failed innovations, as well as learn what it takes to be a successful intra/entrepreneur. This program is ideal for the student who seeks to re-invent and innovate in nursing practice in a variety of roles, as clinician,

educator, administrator, clinical scientist, or in the business environment of healthcare. This certificate is available for individuals that hold a Bachelor's degree.

This program provides a five-course grouping of classes focusing on re-inventing and promoting innovative nursing practice in a variety of roles, as clinician, educator, administrator, clinical scientist or in the business environment of healthcare. Courses are chosen from the MSN in Nursing Innovation. It is designed to emphasize entrepreneurial and intrapreneurial approaches to advanced nursing practice.

Program Requirements

Required Courses

Certificate of Advanced Study in Complementary and Integrative Therapies

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 12.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.3300

Standard Occupational Classification (SOC) Code: 29-1199

The Certificate of Advanced Study in Complementary and Integrative Therapies (CIT) program is designed to provide practicing healthcare professionals with an "evidence-based program" in complementary and integrative therapies. This knowledge will allow them to assess, guide and evaluate patient use and to integrate CIT into their professional practice. The program provides students with the cultural and theoretical basis for applying complementary and integrative therapies while focusing on the skills and techniques of specific therapies.

This program is applicable to a wide range of healthcare professionals including nurses, nurse practitioners, physician's assistants, creative arts therapists, couple and family therapists, women's health practitioners, members of oncology organizations, members of AHNA and more. Admission requires a minimum of a bachelor's degree from an accredited college or university.

The program content is congruent with the educational standards set forth by the American Association of Holistic Nurses (AHNA) and the Foundations in Clinical Aromatherapy course adheres to the educational standards (level one) set forth by the National Association for Holistic Aromatherapy (NAHA).

Features and Benefits:

- Embraces the foundational principles of holistic Integrative care, focusing on the mind, body, spirit approach to achieve optimal health and healing within the framework of conventional healthcare.
- Courses are taught by internationally-recognized leaders in Complementary and Integrative Therapies and faculty trained in both conventional healthcare and integrative therapies.
- Program is taught wholly online in a highly dynamic learning format that engages students.

Admission Requirements:

Individuals submitting an application must fulfill the following:

- 2.75 GPA or above on all previous coursework
- Minimum of a bachelor's degree from an accredited college or university
- Official transcripts from all universities or colleges attended
- Nurse, physician assistants, and other healthcare professionals who hold licensure or a certificate: copy of license, eligibility for licensure, or certificate
- Current resume
- Completed application form
- Two letters of recommendation
- Personal statement (no more than two pages and no less than one page double-spaced) that will give the admissions committee a better understanding of the followings:
 - Why you are choosing this particular program of study
 - Your plans upon completion of the certificate
 - How your current work experience will enhance your experience in this program
- International students will need to meet university international student admissions guidelines, including TOEFL Program Requirements.

Program Requirements

Required Courses

CIT 501	Foundations of Phytotherapy	3.0
CIT 502	Foundations of Complementary and Integrative Therapies	3.0
CIT 503	Holistic Living For The Caregiver	3.0
Select one of the following:		3.0
CIT 511	Spirituality, Health and Healing	
CIT 512	Body Movement Therapies	
CIT 513	Yoga for the Enlightened Practitioner	
CIT 552	Integrative Advanced Relaxation Techniques (I-ART)	
CIT 600	Foundations in Clinical Aromatherapy	
CIT 602	Women's Integrative Health	
CIT 617	Qigong: Bio-energy Therapy	
CIT 618	Principles of Holistic Nursing	
CIT 619	Principles of Bioenergy Therapies	
CIT 620	Integrative Meditation: Where East Meets West	
CIT 628	Special Topics in Complementary and Integrative Therapies	
CIT 690	Independent Study	
Total Credits		12.0

Certificate of Advanced Study in Holistic Hospice and Palliative Care

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 12.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.3306

Standard Occupational Classification (SOC) Code: 29-1199

The Certificate of Advanced Study in Holistic Hospice and Palliative Care provides students with a mind-body-spirit approach to end-of-life care. Graduates of the program develop mastery in providing compassionate spiritual care to patients and their families.

The use of Complementary and Integrative Therapies (CIT) within the scope of end-of-life care provides practitioners the tools needed to treat the holistic spectrum of the patient and their family, while integrating an effective and efficient delivery of care. The program's curriculum focuses on evidenced-based complementary and integrative therapy approaches that can be integrated within the framework of conventional healthcare practice.

Features and Benefits:

- This holistic program is driven by the principle of patient-centered care that provides compassionate and supportive integrative care to both the patient and their family.
- Courses are taught by internationally recognized leaders in Complementary and Integrative Therapies and faculty trained in both conventional healthcare and integrative therapies.
- Courses are offered wholly online in a highly dynamic learning format that engages students.

Admission Requirements:

- 2.75 GPA or above on all previous coursework
- A baccalaureate degree with a major in a health-related field from an accredited college or university
- Official transcripts from all universities or colleges attended
- A completed application form
- Nurse, nurse practitioner, physician assistants, and other healthcare professionals who hold licensure or a certificate: copy of license, eligibility for licensure, or certificate
- Current resume

- Two letters of recommendation
- Personal statement (no more than two pages and no less than one page double-spaced) that will give the admissions committee a better understanding of the followings:
 - Why you are choosing this particular program of study
 - Your plans upon completion of the certificate
 - How your current work experience will enhance your experience in this program
- International students will need to meet university international student admissions guidelines, including TOEFL Program Requirements.

Certificate of Advanced Study in Integrative Addiction Therapies

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 12.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.3300

Standard Occupational Classification (SOC) Code: 29-1199

The Certificate of Advanced Study in Integrative Addiction Therapies prepares healthcare professionals to treat patients suffering from substance use disorders within the holistic spectrum by healing the body, mind, and spirit. Students will learn to integrate evidence-based complementary and integrative therapies (CIT) such as nutritional neuroscience, neurofeedback, meditation, auricular acupuncture, and Qigong bioenergy therapies within the framework of conventional healthcare. These integrative therapies will enable healthcare practitioners to incorporate innovative, caring and holistic methods to an underserved population.

Substance use disorders are among this country's most ubiquitous health and social issues. This cutting edge program is designed to empower practitioners to utilize complementary and integrative therapies within the scope of conventional healthcare practice to treat substance use disorders and enhance patient outcomes. It will provide practitioners the tools needed to treat the substance use disorder patient (and their family) within the holistic spectrum, healing body, mind and spirit.

A holistic, integrative treatment program for addiction requires combining neuronutritional treatment with other facets (bio, psycho, social, spiritual, economic), including counseling and education to support lifestyle change.

Features and Benefits:

- This ground-breaking Integrative Addiction Therapies program is the first program of its kind worldwide.
- It is the first program to offer future addiction healthcare professionals the skills needed to help their patients achieve health and recovery within the holistic spectrum healing mind, body and spirit, using natural and integrative methods.
- Courses are taught by internationally recognized leaders in Complementary and Integrative Therapies and distinguished psychotherapists in the field of Integrative Addiction Therapies.
- Courses are offered wholly online in a dynamic and interactive learning environment.

Admission Requirements:

- 2.75 GPA or above on all previous coursework
- A baccalaureate degree with a major in a health-related field from an accredited college or university
- Official transcripts from all universities or colleges attended
- A completed application form

- Nurse, nurse practitioner, physician assistants, and other healthcare professionals who hold licensure or a certificate: copy of license, eligibility for licensure, or certificate
- Current resume
- Two letters of recommendation
- Personal statement (no more than two pages and no less than one page double-spaced) that will give the admissions committee a better understanding of the followings:
 - Why you are choosing this particular program of study
 - Your plans upon completion of the certificate
 - How your current work experience will enhance your experience in this program
- International students will need to meet university international student admissions guidelines, including TOEFL Program Requirements.

Certificate of Advanced Study in Women's Integrative Health

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 12.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.3300

Standard Occupational Classification (SOC) Code: 29-1199

The Certificate of Advanced Study in Women's Integrative Health provides healthcare professionals with a mind-body-spirit approach to care. Studies have shown that women desire a broader, integrative approach to their healthcare and share a philosophical congruence with Complementary and Integrative Health (CIH) core values. In this program, students learn to integrate evidence-based complementary and integrative health therapies such as phytotherapy, nutrition, mind/body, and energy

therapy modalities within the framework of conventional healthcare practice.

Integrative healthcare reaffirms the importance of the relationship between practitioner and patient, focuses on the whole person, and utilizes all appropriate therapeutic approaches, both conventional biomedicine and CIH practices to achieve optimal health and healing. Women's Integrative Health provides a model of care that is most compatible and reflective of women's emotional and psychological needs in the health care relationship and prepares students to incorporate an innovative, caring and holistic spectrum of treatment. Students learn to explore the fullness of women's lives, taking into account a woman's beliefs, intuitions, and preferences for care which allows them to form a healing partnership, while providing their patients with the finest possible healthcare.

Features & Benefits:

- This pioneering program in Women's Integrative Health provides healthcare professionals evidenced based integrative treatment protocols that are holistic, addressing the mind, body, spirit complex that are inherently personalized and individualized.
- Courses are taught by leading Women's Integrative Health Practitioners and internationally-recognized experts in complementary and integrative therapies.
- Courses are offered entirely online in a dynamic and interactive learning environment.

Admission Requirements:

- 2.75 GPA or above on all previous coursework
- A baccalaureate degree with a major in a health-related field from an accredited college or university
- Official transcripts from all universities or colleges attended
- A completed application form
- Nurse, nurse practitioner, physician assistants, and other healthcare professionals who hold licensure or a certificate: copy of license, eligibility for licensure, or certificate
- Current resume/cv
- Two letters of recommendation
- Personal statement (no more than two pages and no less than one page double-spaced) that will give the admissions committee a better understanding of the followings:
 - Why you are choosing this particular program of study
 - Your plans upon completion of the certificate
 - How your current work experience will enhance your experience in this program
- International students will need to meet university international student admissions guidelines, including TOEFL Program Requirements.

TOEFL Requirement:

International applicants, as well as immigrants to the United States and U.S. permanent residents whose native language is not English and who have not received a bachelor's degree or higher in the United States, Australia, Canada, Ireland, New Zealand, or the United Kingdom, must show proficiency in English speaking as well as listening, writing, and reading. American citizens born on U.S. military bases abroad may be waived from the TOEFL requirement after providing documentation

of this status. Otherwise, applicants must meet one of the following requirements:

- If you take the TOEFLiBT exam, you must have a minimum combined score for the listening, writing, and reading sections of 79 plus a speaking section score of 26 or higher.
- If you take the TOEFL, you must have a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher.

Program Requirements

CIT 503	Holistic Living For The Caregiver	3.0
CIT 534	Witches, Wise Women and Women Healers	3.0
CIT 602	Women's Integrative Health	3.0
CIT 658	Advanced Women's Integrative Health	3.0
Total Credits		12.0

Clinical Nurse Leader Post-Master's Certificate

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's Certificate

Number of Credits to Completion: 30.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.3801

Standard Occupational Classification (SOC) Code: 29-1141

About the Program

The Clinical Nurse Leader (CNL) oversees care coordination of a distinct group of patients, is a resource for clinical decision making, and serves as a lateral integrator of care. This clinical leader puts evidence-based practice into action to ensure that patients benefit from the latest innovations in care delivery. The CNL collects and evaluates patient outcomes, assesses cohort risk, and has the decision-making authority to change care plans when necessary. This clinician functions as part of an interdisciplinary team by communicating, planning, and implementing care directly with other health care professionals including physicians, pharmacists, social workers, therapists, clinical nurse specialists, and nurse practitioners. The CNL is a leader in the health care delivery system across all setting in which health care is delivered.

Students in this certificate program have the opportunity to learn about healthcare management, policy and quality improvement at the point of care with individuals seeking health care, while obtaining knowledge of healthcare systems, finance and economics. In addition, students will be given the opportunity to learn about advanced clinical assessment, pathophysiology, and advanced pharmacology, if not taken as part of their original MSN.

Students will also learn about designing and redesigning client care based on evidence-based knowledge and analysis of outcomes, as well as gain knowledge of healthcare reimbursement and issues in planning care across the lifespan, as well as the following:

- Application of tools for risk analysis
- Utilize epidemiological methodology to collect data and knowledge acquisition in planning quality improvement programs
- Manage and develop therapeutic partnerships
- Develop, monitor disease management programs to support improved outcomes

Admission Requirements

- Masters degree (MSN) from a program fully accredited by NLN and/or CCNE
- Official transcripts from all previous educational institutions required
- Personal statement describing interest in certificate program and particular specialty
- Curriculum Vitae or resume
- GPA of 2.75 or above on all previous coursework or last 60.0 credits completed

TOEFL Requirements

International applicants, as well as immigrants to the United States and US permanent residents whose native language is not English and who have not received a bachelor's degree or higher in the United States, Australia, Canada, Ireland, New Zealand, or the United Kingdom, must show proficiency in English speaking as well as listening, writing, and reading. American citizens born on U.S. military bases abroad may be waived from the TOEFL requirement after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

- If you take the TOEFLiBT exam, you must have a minimum combined score for the listening, writing, and reading sections of 79 plus a speaking section score of 26 or higher.
- If you take the TOEFL, you must have a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher.

The 3 P's (Advanced Pharm, Advanced Pathophysiology and Advanced Clinical Physical Assessment) may be waived if taken within 5 years.

Program Requirements

NURS 531	Epidemiology in Action: Tracking Health & Disease	3.0
NURS 532	Evaluation of Health Outcomes	3.0
NURS 548	Advanced Pathophysiology	3.0
NURS 549	Advanced Pharmacology	3.0
NURS 550	Advanced Health Assessment & Diagnostic Reasoning	4.0
NURS 602	Foundations for Clinical Nurse Leader	4.0

Complementary and Integrative Health

Major: Complementary and Integrative Health

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.3306

Standard Occupational Classification (SOC) code: 29-1129

About the Program

The Masters in Science in Complementary and Integrative Health(CIH) is designed to provide practicing healthcare professionals with an evidenced-based program in complementary and integrative health practices. Students will be taught to assess, guide and evaluate patient use of alternative modalities and to integrate CIH into one's own professional practice. The program provides core competencies in complementary and integrative health, and a selection of specialty concentrations that include holistic, hospice and palliative care, integrative addiction therapies, women's integrative health or a select plan of concentrated study. This program provides the theoretical basis for applying complementary and integrative health practices and emphasizes the integration of evidence-based CIH therapies such as phytomedicine, functional nutrition, and mind/body modalities within the framework of conventional healthcare practice.

A foundational principle of this program is interdisciplinary practice and collaboration with the goal of improving health outcomes. In addition, students will be introduced to historical, indigenous healthcare practices and upon graduation may seek further training to build expertise in a particular modality (e.g. yoga, nutrition, Raiki, etc.) which may lead to additional credentialing or licensing.

Program Mission and Values

The program mission is to develop leaders in complementary and integrative healthcare. We are committed to developing competent practitioners through exemplary and rigorous training in the clinical applications of complementary and integrative health; comprehensive curricula incorporating theoretical foundations, research and evidence-based practice; and provision of extensive support and mentorship to advance the integrative healthcare professional role. All efforts in the

program are designed to build knowledge, enhance practice, foster professional integrity, promote innovation, engage in interdisciplinary collaboration, and ultimately improve the health outcomes of patients and families from diverse communities across the continuum of care.

Program Outcomes

The graduate of the Master of Science in Complementary and Integrative Health:

- Practices within a legal and ethical framework of health care delivery and scope of practice.
- Advances the role of advanced practice in the health care system through scholarship, clinical experience, advocacy and political involvement.
- Demonstrates critical thinking and diagnostic reasoning skills in clinical decision-making.
- Integrates multiple technologies and relevant theories into the organization and synthesis of health data required to develop plans of care for patients, families and communities.
- Integrates culturally sensitive health promotion activities that contribute to the health and wellness of the community into clinical practice.
- Demonstrates leadership in health care through involvement in the development of outcome-based standards of care and practice-based health policy issues.
- Evaluates and modify the quality and effectiveness of clinical practice based on current research findings, standards of care and patient outcomes.
- Contributes to the advancement of complementary and integrative health and humanity through communication, collaboration and education.

Intended Audience

This program is applicable to a wide range of healthcare professionals including nurses, advanced practice nurses, nurse practitioners, physician's assistants, psychologists, women's health practitioners, members of oncology organizations, clinical nutritionists, psych/mental health nurse practitioners and couple and family therapists.

This program is congruent with the educational standards set forth by the American Holistic Nurses Association (AHNA) and meets the core competencies of the Academic Consortium for Integrative Medicine & Health.

For more information, contact:

Mr. Redian Furxhiu
Student Services Manager
rf53@drexel.edu
267.359.5691

Admission Requirements

- Licensed healthcare professional within a scope of practice from a variety of disciplines including nurses, advanced practice nurses, nurse practitioners, physician's assistants, psychologists, women's health practitioners, members of oncology organizations, clinical nutritionists, psych/mental health nurse practitioners and couple and family therapists
- A baccalaureate degree with a major in a health related field from an accredited university

- GPA of 3.0 or above on all previous course work
- A completed application
- Official transcripts from all universities or colleges and other post-secondary
- Two professional letters of recommendation from either previous or immediate supervisors or former faculty members who can attest to your clinical knowledge, skill and potential aptitude for graduate study
- Personal statement
- Resume including specific details of your responsibilities and job experiences

International students will need to meet university international student admissions guidelines including TOEFL.

TOEFL Requirement:

International Applicants, as well as Immigrants to the US and US Permanent Residents, whose native language is not English, and who have not received a Bachelor's degree or higher in the US, Australia, Canada, Ireland, New Zealand or the United Kingdom, must show proficiency in English speaking as well as listening, writing and reading. US citizens born on US military bases abroad may be waived from the TOEFL requirement after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

If the TOEFLiBT exam is taken, students are required to have a minimum combined score for the listening, writing and reading sections of 79 Plus a speaking section score of 26 or higher.

If the TOEFL is taken, students are required to have a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher.

Health and Rehabilitation Sciences PhD Faculty

Lisa Ann Chiarello, PT, PhD, FAPTA (*Hahnemann University*) Director, PhD and Doctor of Health Science in Rehabilitation Sciences and Associate Director of Center for Family Intervention Science. Professor. Pediatric community-based practice; family-centered care; determinants of outcomes; and participation of children with physical disabilities.

David Ebaugh, PT, PhD (*Drexel University*). Clinical Professor. Identification and treatment of neuromusculoskeletal impairments associated with shoulder pain and dysfunction; differential diagnosis of shoulder problems; orthopedic examinations and interventions

Margaret Finley, PT, PhD (*University of Maryland*). Associate Professor. Upper extremity movement patterns in persons with chronic neuromuscular disorders.

Clare Milner, PhD, FACSM (*University of Leeds*) Research Lab Coordinator. Associate Professor. Biomechanics of lower extremity injury, injury prevention, and rehabilitation; overuse injuries in runners; gait in people with knee pathology

Margaret O'Neil, PT, PhD, MPH (*MCP Hahnemann University; Duke University; University of North Carolina at Chapel Hill*). Associate Professor. Identification of psychometrically sound objective physical activity measures for use as outcomes in activity-based physical therapy interventions for children with chronic conditions (obesity) and those with physical disabilities (especially cerebral palsy) and designing flexible active video games to improve access and participation and increase fitness, physical activity, and functional mobility in youth with physical disabilities.

Robert J. Palisano, PT, ScD, FAPTA (*Boston University*) Associate Dean for Research, College of Nursing and Health Professions. Distinguished University Professor. Classification and prognosis for gross motor function in children and youth with cerebral palsy; interventions to improve activity and participation in children with physical disabilities; transition to adulthood for youth with disabilities.

Sheri Silfies, PT, PhD (*MCP Hahnemann University*). Associate Professor. Identification and treatment of impairments in neuromuscular control of trunk mobility and stability in patients with low back pain, focusing on mechanism of recurrent low back pain; core control in athletes.

Glenn Williams, PT, PhD, ATC (*University of Delaware*) Chair, Department of Physical Therapy & Rehabilitation Sciences. Associate Professor. Neuromuscular plasticity after joint injury, orthopaedic-sports rehabilitation, human performance, post-traumatic osteoarthritis.

Emeritus Faculty

Susan Smith, PT, PhD (*University of Connecticut, Texas Woman's University*). Associate Professor and Dean Emerita, College of Nursing and Health Professions. Geriatrics: health promotion and interventions for manifestations of low bone mass; assessment of fall risk and fall prevention interventions for older adults

Couple and Family Therapy

Major: Couple and Family Therapy
 Degree Awarded: Doctor of Philosophy (PhD)
 Calendar Type: Quarter
 Total Credit Hours: 118.0
 Co-op Option: None
 Classification of Instructional Programs (CIP) code: 51.1505
 Standard Occupational Classification (SOC) code: 21-1013

About the Program

The PhD program in Couple and Family Therapy (CFT) aims to develop the next generation of couple and family therapy scholars with a particular

focus on research related to family based psychotherapy, families and health and health disparities. Students are trained to advance the knowledge base of couple and family therapy through education, research and clinical services with a particular emphasis on evidenced informed treatment modalities.

Graduates of the Couple and Family Therapy PhD program will serve as researchers in public and private institutions, faculty in graduate programs of couple and family therapy, psychology, social work or medical schools, and as clinicians in mental health agencies or private practice.

The PhD program in Couple and Family Therapy is rooted in relational and systems theories and therapies. Emphasis is on specialized training in couple and family therapy theories such as Attachment-based Family Therapy and Emotionally Focused Family Therapy and Medical Family Therapy approaches. Students are expected to demonstrate critical and analytical thinking with respect to the broad areas of systems theory and therapy, and have a primary interest in research and scholarship. The Couple and Family Therapy Department is committed to attracting minority scholars as well as training students to be aware and sensitive to contextual issues such as race, class, gender, spirituality and sexual orientation, as well as power and privilege.

For additional information about the PhD in Couple and Family Therapy, visit the program's Couple and Family Therapy Department (<https://www.drexel.edu/cnhp/academics/doctoral/PHD-Couple-Family-Therapy>) web site.

Degree Requirements

Students are required to complete the standard curriculum in couple and family therapy before pursuing the doctoral curriculum. The standard curriculum is offered in the COAMFTE- accredited Master of Family Therapy (p. 140) and Post-Master's Certificate programs at the University.

The curriculum includes study in the following areas:

- Theory and research in couple and family therapy
- Research methodology, including statistics, research design, and computer applications
- Evidenced informed and specialized instruction in couple and family therapy
- Diverse family structures,
- Supervised clinical experience

Required Courses

CFTP 712	Family Theory	3.0
CFTP 713	Introduction to CFT Clinical Research	3.0
CFTP 720	Couple Therapy Theory & Practice	3.0
CFTP 729	Diverse Families and Communities: Intervention Strategies	3.0
CFTP 735	Family Healthcare Policy	3.0
CFTP 752	Independent Study in Couple and Family Therapy	7.0
CFTP 757	Attachment, Emotions and Psychotherapy	3.0
CFTP 758	Dyadic Analysis and Longitudinal Causal Modeling in CFT	3.0
CFTP 759	Psychotherapy Outcome and Process Research	3.0
CFTP 760	Teaching Practicum	2.0
NHP 762	Health Professional Education	3.0
RSCH 714	Qualitative Research Methods I	3.0
RSCH 759	Foundations of Biostatistics	3.0
RSCH 770	Foundations in Research Methods	3.0
RSCH 811	Intermediate Biostatistics	3.0
RSCH 815	Scientific Inquiry and Writing	3.0

Elective		3.0-4.0
Internship - Minimum of 27 credits*		27.0
CFTP 801	Couple and Family Therapy Internship	
Dissertation*		37.0
CFTP 802	Couple and Family Therapy Dissertation	
CFTP 803	Couple and Family Therapy Dissertation Defense	
Total Credits		118.0-119.0

* Internship (CFTP 801): Students are required to complete at least three terms of internship during the third or fourth year of the program. They must register for 9.0 credits per quarter to cover this activity. Most internships will be done in 3 quarters (27.0 credits), but the expectation has been set that the internship will be completed after 4 quarters (36.0 credits) to give the student some flexibility. Dissertation (CFTP 802): Students should begin their dissertation in year three or four of the program. This project is expected to take four quarters (36.0 credits). For each of those quarters the student must register for 9.0 credits of CFTP 802. If the project takes longer than four quarters, the student may continue to sign up for 9.0 credits of CFTP 802 each quarter. It is anticipated, however, that all students will complete their dissertations after 8 quarters (2 years, 72.0 credits).

Dissertation Defense (CFTP 803): Students are required to defend their dissertations when they are complete. To defend, a student must register and pay for one credit of CFTP 803.

Students must be actively engaged in clinical practice throughout the program. Before graduating from the PhD program, all students are encouraged to complete at least 1,000 hours of direct client contact hours.

Internship

All students are required to do an internship. Internship supervisors must be clearly senior in experience to the student intern. The purpose of the internship is to provide students with a supervised full-time clinical, research, academic or administrative experience of at least nine months duration. Clinical and alternate internships must emphasize relationally focused practice and research. For the clinical internship, it is to ensure that students meet the 1,000 direct client contact hour standard.

Students should contact the Couple and Family Therapy Department (<https://www.drexel.edu/cnhp/academics/departments/Couple-and-Family-Therapy>) for additional information about the qualifying exam and the dissertation.

Sample Plan of Study

Term 1		Credits
CFTP 712	Family Theory	3.0
CFTP 713	Introduction to CFT Clinical Research	3.0
RSCH 759	Foundations of Biostatistics	3.0
	Term Credits	9.0
Term 2

Couple and Family Therapy Faculty

Stephanie Brooks, PhD, LCSW, LMFT (*Drexel University*) *Associate Dean for Health Professionals, Interim Program Director PhD in Couple and Family Therapy.* Clinical Professor. Forensic family therapy, couple and family therapy supervision and training, person of the therapist, racism and stress, couples living with ADHD, trauma and violence, and sex therapy.

Maureen Davey, MFT, PhD, LMFT (*Syracuse University*). Associate Professor. Development of culturally sensitive family-based interventions for historically under-served populations.

Stephanie Krauthamer Ewing, PhD, MPH (*University of Delaware*). Assistant Professor. Promoting healthy emotional development and resilience in children and adolescents, attachment and caregiving relationships, impact of trauma on parenting and attachment,

developmental and contextual risk factors for depression and suicide risk in youth, evidence based treatments for depression and suicide risk, research methodology.

Kenneth Hardy, PhD (*Florida State University*). Professor. Challenging society to think critically about the hidden but significant connections that often exist between trauma and issues of oppression.

Christian Jordal, PhD, LMFT (*Virginia Polytechnic Institute and State University*) *Program Director, Master of Family Therapy; Coordinator of Student Experiential Learning.* Associate Clinical Professor. LGBT and mixed orientation relationships, marital commitment, program outcome measurement, sex therapy.

Laura L. Lynch, PhD (*Drexel University*). Assistant Clinical Professor. Medical family therapy, collaborative and family-centered healthcare, experiences of couples and families coping with chronic illness, resident physician wellness.

Marlene F. Watson, PhD, LMFT (*Virginia Polytechnic and State University*). Associate Professor. Forensic family therapy, siblings, race, class, gender and health policy issues.

Ebony White, PhD, LPC, NCC, ACS (*Montclair State*). Assistant Clinical Professor. Multicultural Counseling & Development, Adolescents with Behavioral Diagnoses, Supervision & Training.

Erica Wilkins, PhD, MFT (*Texas Tech University*). Assistant Clinical Professor. Clinical Coordinator. Residual effects of slavery on African Americans, HIV/AIDS, treatment of post-traumatic stress, grief counseling, substance abuse and the family, culturally competent services, and contextual therapy.

Dance/Movement Therapy and Counseling

Major: Dance/Movement Therapy and Counseling
Degree Awarded: Master of Arts (MA)

Calendar Type: Quarter

Total Credit Hours: 90.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.2302

Standard Occupational Classification (SOC) code: 29-1129

About the Program

Dance/movement therapy (DMT) is a body/mind-integrated approach to mental health counseling, in which movement is an essential medium. In this two-year curriculum, students learn to creatively and effectively engage in therapy relationships that support the emotional, cognitive, social and physical integration and functioning of the clients with whom they will work.

The curriculum involves students in experiential and reflective learning processes as well as more traditional discussion, lecture, and clinical education formats. Through a balance of classroom education and clinically supervised practicum and internship experiences, students develop a strong foundation for skilled practice. Program coursework addresses human development, psychopathology, the therapy relationship, and therapeutic change processes through a bio-psycho-sociocultural lens. Students apply this understanding and observational skills based in Laban Movement Analysis (LMA) to assess client strengths and limitations to inform therapy goals. Improvisational processes support

the design of relevant movement and verbal therapy interventions in both individual and group therapy. The curriculum includes specialized approaches with adult and child clinical populations. Attention to professional identity and ethics further prepares students for entry into the profession.

For additional information about the program, visit the College of Nursing and Health Professions' Dance/Movement Therapy (<https://www.drexel.edu/cnhp/academics/graduate/MA-Dance-Movement-Therapy-Counseling>) web site.

Degree Requirements

Core Courses

ARTS 501	Introduction to Creative Arts Therapy I	2.0
ARTS 502	Introduction to Creative Arts Therapy II	2.0
ARTS 504	Human Psychological Development I	2.0
ARTS 505	Clinical Diagnosis of Psychopathology I	2.0
ARTS 506	Professional Orientation and Ethics I	1.0
ARTS 507	Group Dynamics in Counseling and Psychotherapy I	2.0
ARTS 508	Introduction to Behavioral Research I	2.0
ARTS 509	Human Psychological Development II	2.0
ARTS 513	Clinical Diagnosis of Psychopathology II	2.0
ARTS 515	Introduction to Behavioral Research II	2.0
ARTS 601	Theories of Counseling and Psychotherapy I	2.0
ARTS 602	Social and Cultural Foundations in Counseling and Psychotherapy I	2.0
ARTS 603	Clinical Appraisal and Assessment I	2.0
ARTS 604	Career Counseling	4.0
ARTS 605	Theories of Counseling and Psychotherapy II	2.0
ARTS 606	Professional Orientation and Ethics II	3.0
ARTS 607	Clinical Appraisal and Assessment II	2.0

Dance/Movement Therapy Track Courses

ARTS 519	Neuroscience: Concepts and Applications for Creative Arts Therapy	3.0
ARTS 552	Therapy Relationship Skills I	2.0
ARTS 553	Therapy Relationship Skills II	2.0
ARTS 554	Movement Observation I	2.0
ARTS 555	Laban Movement Analysis Lab	1.0
ARTS 556	Movement Observation II	2.0
ARTS 557	Theory and Practice I- Children	2.0
ARTS 558	Theory and Practice II: Children	2.0
ARTS 559	Introduction to Dance/Movement Therapy History and Literature	1.0
ARTS 563	Movement Perspectives in Human Development	2.0
ARTS 564	Group Dynamics II: Counseling and Dance/Movement Therapy	2.0
ARTS 654	Theory and Practice III: Adults	2.0
ARTS 655	Social and Cultural Foundations II: Counseling and Dance/Movement Therapy	2.0
ARTS 656	Mental Health Applications of Movement Analysis I	2.0
ARTS 657	Mental Health Applications of Movement Analysis II	2.0

Total Credit: 90.0		

* Please note that the electives are in addition to the 90 credits required for the degree. Please consult with your advisor before registering for an elective.

Creative Arts Therapies Department Faculty

Yasmine Awais, MAAT, ATR-BC, ATCS, LCAT, LPC (*Art Institute of Chicago*). Clinical Professor. Art therapy with diverse populations, art therapy in non-profit settings, clinical supervision.

Joke Bradt, PhD, MT-BC (*Temple University*). Associate Professor. Research in music therapy, chronic pain, systematic reviews.

Natalie Rae Carlton, PhD, ATR-BC, LPCC (*Leslie University*) Director, *Art Therapy MA Program*. Associate Clinical Professor. New media and art therapy, social justice in art activities, transgender and LGBTQ identity.

Nancy Gerber, PhD, ATR-BC (*Union Institute and University*) Director, *PhD Program in Creative Arts Therapies*. Associate Clinical Professor. Art therapy assessment and treatment of adolescents and adults; modern psychoanalysis and art therapy; arts therapy education and doctoral education; arts based research and mixed methods research.

Sharon W. Goodill, PhD, BC-DMT, NCC, LPC (*Union Institute and University*) Chair, *Department of Creative Arts Therapies*. Clinical Professor. Medical dance/movement, mind/body studies, movement assessment for DMT, CAT research and leadership.

Scott Horowitz, MA, MT-BC, LPC (*Drexel University*) Director of *Field Education*. Clinical Instructor. Interdisciplinary practice and education, developmental models of clinical and practicum supervision, music therapy and neurodevelopmental populations.

Florence Ierardi, MM, MT-BC, LPC (*Temple University*) Director, *Music Therapy and Counseling MA Program*. Associate Clinical Professor. Clinical improvisation, trauma-informed music therapy, multicultural music therapy perspectives.

Girija Kaimal, EdD, MA (*Harvard University*). Assistant Professor. Art therapy, educational research, program evaluation, art therapy.

Dawn Morningstar, MCAT, VC-DMT, LP (*Hahnemann University*). Associate Clinical Professor. Specialty in working with children and adolescents, Dance/movement therapist at Drexel's Parkway Health and Wellness faculty practice outpatient clinic.

Michele D. Rattigan, MA, ATR-BC, NCC, LPC (*MCP Hahnemann University*) Coordinator of *CAT Clinical Services*. Assistant Clinical Professor.

Ellen Schelly-Hill, MMT, BC-DMT, NCC, LPC (*Antioch NE Graduate School*) Director of *Dance/Movement Therapy and Counseling MA Program*. Associate Clinical Professor. Adults diagnosed with mood disorders, anxiety, chronic pain and with histories of trauma; clinical supervision; ethics.

Doctor of Nursing Practice

Major: Nursing Practice

Degree Awarded: Doctor of Nursing Practice (DNP)

Calendar Type: Quarter

Total Credit Hours: 46.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.3818

Standard Occupational Classification (SOC) code: 11-9111

About the Program

The Doctor of Nursing Practice (DNP) at Drexel University is designed for nurses seeking a terminal degree in nursing practice and offers an alternative to research-focused doctoral programs. The mission of the DNP program is to prepare individuals to assume leadership roles as executives or practitioners and to apply evidence-based practice to improve individual, family, and community health outcomes.

Nurses graduating in Drexel's DNP program are well-equipped to fully implement the science developed by nurse researchers in PhD, DNSc, and other research-focused nursing doctorates.

Program Objectives

The objectives are focused in two areas: leadership in an executive role and a practitioner role. Graduates of the DNP degree will be prepared to:

- Evaluate patient care delivery approaches to meet the current and anticipated needs of patient populations based on outcomes and scientific findings.
- Translate research into clinical practice and policy to improve care and outcomes.
- Use advanced communication skills (use of technology and information) - to lead quality improvement and patient safety.
- Use principles of business, finance, economics, and health policy to develop and implement plans to improve the quality of healthcare delivery.
- Demonstrate sensitivity to diversity in patients and providers.

- Evaluate effective strategies for the management of ethical dilemmas that can occur in the course of healthcare delivery.

Admission Requirements

Applicants must have a bachelor of science in nursing or advanced practice masters' degree in nursing. In addition, applicants must have a current, active US license to practice nursing. Applicants would complete a standard graduate application including submission of the following:

- Copy of professional license, nurse executive advanced (NEA) certificate and advanced practice license(s)
- University/college transcripts (except for graduates of Drexel)
- Two letters of recommendation from advisors, supervisors, professors or mentors
- CV
- Personal statement on reasons for their interest in the DNP and career plan

Degree Requirements

Curriculum

The sequence of the doctoral program of study is organized to integrate the core courses while at the same time prepare students for immersion in research courses. The clinical and role practica provide students with opportunity to enhance their leadership skills in clinical practice and executive roles in service delivery.

The program offers two tracks:

- **The Practitioner Track:** for the student who wants to remain in clinical practice post-graduation.
- **The Executive Track:** for graduates who want careers in executive nursing and health care management, but who still prefer a nursing doctorate with a connection to clinical practice.

Required Courses

NURS 703	Health Policy and Economics	3.0
NURS 706	Applied Epidemiology	3.0
NURS 713	Human Responses to Altered Function in Health and Illness	3.0
NURS 714	Introduction to Qualitative Methods in Nursing Inquiry	3.0
NURS 716	Scientific Foundation of Nursing Knowledge Development	3.0
NURS 718	Quantitative Methods for Practice-based Nursing Inquiry	3.0
NURS 719	Leadership in Organizations and Systems	3.0
NURS 720	Health Information Technology and Information Systems	3.0
NURS 830	Doctoral Nursing Practice Clinical Practicum	3.0
NURS 835	Doctoral Nursing Practice Role Practicum	3.0
NURS 836	Clinical and Applied Nursing Ethics	3.0
NURS 837	Translating Evidence into Clinical Practice	3.0
NURS 840	DNP Project Seminar	3.0
NURS 841	DNP Project Advisement	1.0
NURS 891	Doctoral Nursing Special Topics for the Nurse Executive	3.0
RSCH 519	Introduction to Biostatistics	3.0
Total Credits		46.0

Program Delivery

The DNP program is an online program that includes program orientation and didactic instructions on information and technology and a residency

requirement. The program orientation and didactic instructions on information and technology occurs before the fall session.

The residency requirement occurs during the first year summer session when the student is enrolled in 2 didactic courses on campus. The student is expected to develop and implement a DNP project. The proposal defense maybe done virtually or in person. During the defense, the student will demonstrate effective verbal communication skills and knowledge in the area of interest to the DNP Project Committee (Faculty Chair and 1 doctorally prepared member selected by the student), and finalize plans for implementation of the DNP project. The final oral defense of the DNP project denotes the culmination of the degree program. Students who successfully defended their DNP projects must sign a IDEA distribution license Form granting permission to share their projects in the repository.

Sample Plan of Study

First Year

Total Credit:		46.0

* Continue as necessary.

Doctor of Nursing Practice Faculty

Katherine Kaby Anselmi, PhD, JD, FNP-BC, WHNP-BC (*University of Pennsylvania*) Assistant Dean of Accreditation/Regulatory Affairs & Online Innovation. Associate Clinical Professor. Nursing, law, family nurse practitioner, women's health nurse practitioner.

Joan Rosen Bloch, PhD, CRNP (*University of Pennsylvania*). Associate Professor. Maternal and infant health outcomes with a particular focus on racial and ethnic perinatal health disparities.

Kathleen Fisher, PhD, CRNP (*Pennsylvania State University*). Associate Clinical Professor. Health care for vulnerable populations, decision making in vulnerable populations (i.e. individuals with intellectual disability.)

Mary Gallagher-Gordon, PhD, MSN, RN, CNE (*Drexel University*) Senior Director of Contracts, Compliance and Academic Community Initiatives. Assistant Clinical Professor. Informatics, patient safety and nursing education, NCLEX review.

Ellen Giarelli, EdD, MSN, CRNP (*University of Pennsylvania; Rutgers University*) Director of Post-baccalaureate Certificate Program in the Integrated Nursing Care of Autism Spectrum Disorder. Associate Professor. Genetic/genomic nursing care, self-management of chronic disorders, autism spectrum disorder.

Elizabeth Gonzalez, PhD, MSN, PMHCNS-BC (*New York University*) Department Chair, *Doctoral Nursings*. Associate Clinical Professor. Chronic stress, geropsychiatry, depression among the elderly, minority health issues and cross-cultural research among family caregivers of persons with dementia.

Loretta Jemmott, PhD, RN, FAAN (*University of Pennsylvania*). HIV/AIDS prevention, health promotion and translational research.

William Lorman, PhD, JD, PMHNP-BC, CARN-AP, FIAAN (*American Institute*). Assistant Clinical Professor. Addiction and mental health.

Sally K. Miller, PhD, CRNP (*Walden University*). Clinical Professor. Adult-gerontology primary and acute care nurse practitioner, family nurse practitioner, advanced pathophysiology, advanced pharmacology.

Bobbie Posmontier, PhD, CNM, PMHNP-BC (*University of Pennsylvania*). Associate Professor. Labor and delivery, midwifery, postpartum care, neonatal intensive care, improving access to care for women with postpartum depression, family psychiatric nurse practitioner.

Albert Rundio, Jr., PhD, DNP, RN, APRN, NEA, BC, FAAN (*University of Pennsylvania*) Associate Dean for Post Licensure and Graduate Nursing Programs. Clinical Professor. Nursing graduate leadership and management track.

Jaime Slaughter-Acey, PhD, MPH (*University of Illinois at Chicago*). Assistant Professor. The access and utilization of perinatal health services such as prenatal case management (PCM) and prenatal care; adverse perinatal health outcomes fetal growth, preterm birth, and cerebral palsy; and the interaction of social, psychosocial, behavioral, and biological determinants of racial/ethnic health disparities in perinatal health.

Roberta Waite, EdD, MSN, PMHCNS-BS (*Widener University*) Assistant Dean of Academic Integration and Evaluation of Community Programs. Associate Professor. Psychiatric nursing; depression and ADHD in

minority adults, and the effects of adverse childhood experiences on adult health in minority adults.

Linda Wilson, PhD, RN, CPAN, CAPA, BC, CNE, CHSE (*Rutgers University*) Assistant Dean for Special Projects, Simulation & CNE Accreditation. Associate Clinical Professor. Simulation informatics and technology, perianesthesia, pain management, critical care, trauma, emergency preparedness.

Patti Rager Zuzelo, EdD, RN, ACNS-BC, ANP-BC, CRNP, FAAN (*Widener University*). Clinical Professor. Advanced practice nursing, leadership and management, nursing education, clinical nurse specialist (adult health) and adult nurse practitioner.

Doctor of Physical Therapy

Major: Physical Therapy

Degree Awarded: Doctor of Physical Therapy (DPT)

Calendar Type: Quarter

Total Credit Hours: 128.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.2308

Standard Occupational Classification (SOC) code: 29-1123

About the Program

The Doctor of Physical Therapy (DPT) curriculum produces broadly educated physical therapists, while being sensitive to the needs of the health care community and the students' interests. The program strives to foster both intellectual and professional growth in students and is reflective of contemporary practice to prepare graduates for the ongoing changes in health care delivery.

The Doctor of Physical Therapy (DPT) program prepares students for autonomous practice in physical therapy. As a science, physical therapy examines human motion at the tissue, organ, and systems levels. In the clinical environment, physical therapists (PTs) examine and evaluate patients/clients and implement procedural interventions that restore physical function for all people across the life span. As essential practitioners in the health care delivery system, PTs assume roles in rehabilitation services, prevention and health maintenance programs, and professional and community programs. As professional members of the health care team, PTs supervise support personnel, serve as consultants to other health care personnel, serve as consultants to families and caregivers, participate in administrative services, and conduct clinical research. PTs also serve as advocates for health policy and standards of care that help ensure optimum care for their patients/clients.

Graduates of the Doctor of Physical Therapy program are prepared to fulfill their professional obligations, provide leadership to the profession, and use their knowledge and skills to contribute to the health care of society.

The program is just under 3 years in length and spans eleven academic quarters. The curriculum consists of integrated didactic and clinical study with an emphasis on adult learning methodology. Foundational courses are emphasized during the first year, with subsequent quarters sequenced to progress through the hierarchy of educational objectives from simple to complex. All didactic material is organized for synthesis and application to professional practice.

For more information visit the Physical Therapy and Rehabilitation Science (<https://www.drexel.edu/cnhp/academics/doctoral/DPT-Doctor->

Physical-Therapy) page on the College of Nursing and Health Professions website.

For application instructions, visit the Drexel's Graduate Admission web page for the Doctor of Physical Therapy (<http://drexel.edu/grad/programs/cnhp/professional-doctor-of-physical-therapy>).

Degree Requirements

The DPT curriculum occurs in a 10-week quarter format over eleven quarters: fall, winter, spring, and summer I; fall, winter, spring, and summer II; and fall, winter and spring III. Classes begin in late September for first-year students. The curriculum is subject to modification.

Clinical Education

A strong history of comprehensive clinical education exists for our professional students. The clinical education for the DPT program is integrated into the didactic portions of the curriculum so that knowledge obtained in the classroom is readily put into practice. The DPT program has contracts with hundreds of clinical sites across the nation, representing all facets of professional practice. Students build confidence by participating in part-time integrated clinical experiences (ICEs) during the first year of the program and 32-33 weeks of full-time clinical experiences that offer various levels of acuity in different clinical environments.

Students may select from clinical sites that offer experiences with all ages across the life span and in a variety of environments including, but not limited to acute care, pediatrics, adult rehabilitation, geriatrics, orthopedics, sports medicine, and industrial and occupational rehabilitation.

For more information visit the Physical Therapy and Rehabilitation Sciences Overview (<https://www.drexel.edu/cnhp/academics/doctoral/DPT-Doctor-Physical-Therapy>) page on the College of Nursing and Health Professions web site.

Facilities

Teaching Facilities

Most classes are held in lecture halls, classrooms, or laboratories on the Center City (Health Sciences) Campus of Drexel University. The entire campus has wireless capability for easy internet access. The Department of Physical Therapy and Rehabilitation Sciences has two state-of-the-art dedicated laboratories where the clinical components of the professional curriculum are taught. In these laboratories equipment reflects current physical therapy practice and is part of a multi-disciplinary clinical learning and resource center. Included as part of the resource center is a standardized patient lab that utilizes paid actors to simulate various clinical situations while students' interactions with those "patients" are monitored by supervising faculty. This center provides a rich environment for student learning.

The department also utilizes an anatomy lab where dissection of human cadavers occurs during the first two terms of the program. The anatomy course work focuses on the areas most relevant to physical therapy making connections to clinical practice.

Our teaching resources also include supported distance learning technology. Instructional materials are provided through text, graphics, audio and video formats and are available online through a course

management system 24 hours a day. Our online courses are highly interactive through the use of web discussion boards and audio chat tools.

Additionally, the Professional DPT program uses its own faculty-staffed clinical sites as well as various clinical sites in the area to enhance the educational experience of the student. The department operates outpatient physical therapy sites in the Drexel Recreation Center on the University City campus, a multidisciplinary Parkway Health and Wellness Center on the Center City campus and a pro-bono practice in the 11th Street Family Health Center. Students rotate through these facilities getting individualized mentoring while connecting classroom content with clinical practice. These experiences are in addition to the 32-33 weeks of full-time clinical education the student will experience throughout the curriculum.

Research Facilities

The Department conducts hypothesis-driven research in human movement, biomechanics, motor control, community-based practice and family-centered care. Some of this research is conducted in a 23,000 square foot multidisciplinary center on the Center City Campus. The center has a gait and motion analysis lab containing a video-based motion analysis system with in-floor force plates, and neuromuscular performance labs equipped with custom-built force measuring systems, 16-channel EMG system and electromagnetic tracking systems. Other research is conducted via partnerships with organizations locally, nationally, and internationally. Other departments involved in the research center include Nutrition Sciences and Nursing which provides fertile ground for collaboration. Professional DPT students have the opportunity to work with faculty and PhD students on ongoing laboratory projects through optional research practica.

Physical Therapy and Rehabilitation Sciences Faculty

Maria Benedetto, DPT (*University of Puerto Rico; Columbia University*). Associate Clinical Professor. Pediatrics, Motor learning and motor control; yoga for children; dance prevention and injury rehabilitation

Lisa Ann Chiarello, PT, PhD, FAPTA (*Hahnemann University*) *Director, PhD and Doctor of Health Science in Rehabilitation Sciences and Associate Director of Center for Family Intervention Science*. Professor. Pediatric community-based practice; family-centered care; determinants of outcomes; and participation of children with physical disabilities.

David Ebaugh, PT, PhD (*Drexel University*). Clinical Professor. Identification and treatment of neuromusculoskeletal impairments associated with shoulder pain and dysfunction; differential diagnosis of shoulder problems; orthopedic examinations and interventions

Margaret Finley, PT, PhD (*University of Maryland*). Associate Professor. Upper extremity movement patterns in persons with chronic neuromuscular disorders.

Kevin E. Gard, PT, DPT, OCS (*Temple University*) *Vice-Chair, Department of Physical Therapy and Rehabilitation Sciences and Director, Professional Doctor of Physical Therapy Program*. Clinical Professor. Orthopedics; sports medicine.

Noel Goodstadt, PT, DPT, OCS, CSCS (*MCP Hahnemann University; Temple University*) *Director of Residency Programs*. Associate Clinical Professor. Orthopedic care of shoulder, knee and spine, residency training.

Margery A. Lockard, PT, PhD (*Hahnemann University*). Clinical Professor. Orthopedic/musculoskeletal physical therapy; management of patients using prosthetic and orthotic devices; and anatomy and physiology.

Robert Maschi, PT, DPT, OCS, CSCS (*Temple University*). Associate Clinical Professor. Orthopedics, musculoskeletal disorders, lower extremity biomechanics and movement analysis

Clare Milner, PhD, FACSM (*University of Leeds Research Lab Coordinator*). Associate Professor. Biomechanics of lower extremity injury, injury prevention, and rehabilitation; overuse injuries in runners; gait in people with knee pathology

Kathryn D. Mitchell, PT, DPT, NCS (*Temple University Assistant Director of Clinical Education*). Associate Clinical Professor. Adult neurologic rehabilitation; vestibular rehabilitation/concussion; balance and falls in Multiple Sclerosis.

Margaret O'Neil, PT, PhD, MPH (*MCP Hahnemann University; Duke University; University of North Carolina at Chapel Hill*). Associate Professor. Identification of psychometrically sound objective physical activity measures for use as outcomes in activity-based physical therapy interventions for children with chronic conditions (obesity) and those with physical disabilities (especially cerebral palsy) and designing flexible active video games to improve access and participation and increase fitness, physical activity, and functional mobility in youth with physical disabilities.

Robert J. Palisano, PT, ScD, FAPTA (*Boston University Associate Dean for Research, College of Nursing and Health Professions*). Distinguished University Professor. Classification and prognosis for gross motor function in children and youth with cerebral palsy; interventions to improve activity and participation in children with physical disabilities; transition to adulthood for youth with disabilities.

Sheri Silfies, PT, PhD (*MCP Hahnemann University*). Associate Professor. Identification and treatment of impairments in neuromuscular control of trunk mobility and stability in patients with low back pain, focusing on mechanism of recurrent low back pain; core control in athletes.

Sinclair A. Smith, MS, DSc (*Boston University Chair, Health Sciences*). Professor. The use of magnetic resonance spectroscopy and near infrared spectroscopy to non-invasively study neuromuscular metabolism in humans; creatine supplementation on mitochondrial respiration; weight training studies.

Sara Tomaszewski, PT, DPT, OCS (*Duke University*). Clinical Instructor. Orthopedics and sports physical therapy, injury prevention, and return-to-sport decision making.

Sarah Wenger, PT, DPT, OCS (*Arcadia University; Temple University Coordinator, Professional Practice Lab*). Associate Clinical Professor. Health and wellness in underserved populations, chronic care management, chronic pain.

Annette Willgens, PT, EdD, PCS (*Northcentral University Director of Clinical Education*). Associate Clinical Professor. Qualitative and mixed methods research focus using survey data, phenomenology, and grounded theory to explore issues in clinical education including self-care and stress management. She is a yoga, mindfulness, and reiki practitioner. She teaches in the pediatrics and functional mobility courses as well as developing integrated clinical experiences during each term.

Glenn Williams, PT, PhD, ATC (*University of Delaware Chair, Department of Physical Therapy & Rehabilitation Sciences*). Associate Professor. Neuromuscular plasticity after joint injury, orthopaedic-sports rehabilitation, human performance, post-traumatic osteoarthritis.

Emeritus Faculty

Margo Orlin, PT, PhD, FAPTA (*Drexel University*). Associate Professor Emeritus. Walking and running biomechanics and participation in children with developmental disabilities, evaluation of enhancing participation for children and adolescents with cerebral palsy.

Patricia Rubertone, PT, MPT, MSW, EdD (*Widener University*). Associate Professor Emeritus. Student learning; course design; judgment of physical therapy student clinic performance by novice vs. experienced clinical instructors.

Susan Smith, PT, PhD (*University of Connecticut, Texas Woman's University*). Associate Professor and Dean Emerita, College of Nursing and Health Professions. Geriatrics: health promotion and interventions for manifestations of low bone mass; assessment of fall risk and fall prevention interventions for older adults

Family/Individual Across the Lifespan Nurse Practitioner Post-Master's Certificate

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's

Number of Credits to Completion: 38.0 quarter credits; 720 clinical hours

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 51.3805

Standard Occupational Classification (SOC) Code: 29-1171

Gainful Employment Disclosure (<http://deptapp08.drexel.edu/gainfulemployment/Nursing-Certificate-PM/51.3801-Gedt.html>)

The Family/Individual Across the Lifespan Nurse Practitioner (FNP) online program focuses on the application of advanced-practice nursing knowledge -- including physical, psychosocial, and environmental assessment skills -- to manage common health and illness problems of clients of all ages and their families. This certificate is offered to those individuals who have earned a master's degree in nursing and seek further preparation to become a Family/Individual Across the Lifespan Nurse Practitioner (FNP). Graduates will be eligible to sit for the AANP's Family/Individual Across the Lifespan Nurse Practitioner Certification Examination and/or the ANCC's Family/Individual Across the Lifespan Nurse Practitioner Certification Examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On-Campus Intensive (OCI) learning experiences, simulation, and evaluation. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab.

These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

For more information about this program, visit Drexel's MSN Nurse Practitioner Programs (<http://drexel.edu/cnhp/academics/graduate/MSN-Nurse-Practitioner-Family-Individual-Across-Lifespan>) web page.

Graduate Minor in Advanced Study in Complementary and Integrative Therapies

About the Minor

Advanced Study in Complementary and Integrative Therapies (CIT) program is designed to provide practicing healthcare professionals with an "evidence-based program" in complementary and integrative therapies. This knowledge will allow them to assess, guide and evaluate patient use and to integrate CIT into their professional practice. The program provides students with the cultural and theoretical basis for applying complementary and integrative therapies while focusing on the skills and techniques of specific therapies.

This program is applicable to a wide range of healthcare professionals including nurses, nurse practitioners, physician's assistants, creative arts therapists, couple and family therapists, women's health practitioners, members of oncology organizations, members of AHNA and more. Admission requires a minimum of a bachelor's degree from an accredited college or university.

The program content is congruent with the educational standards set forth by the American Association of Holistic Nurses (AHNA) and the Foundations in Clinical Aromatherapy course adheres to the educational standards (level one) set forth by the National Association for Holistic Aromatherapy (NAHA).

Admission Requirements

- Current enrollment in a master's program at Drexel University.
- GPA of 3.0 and above
- Standardized Tests: None
- Transcripts: Not required
- Prerequisites: N/A
- References: Not required
- Personal Statement/ Essay: Personal statement describing interest minor and relevance to career goals
- Interview/Portfolio: Not required
- CV/Resume: Required

Program Requirements

CIT 501	Foundations of Phytotherapy	3.0
CIT 502	Foundations of Complementary and Integrative Therapies	3.0
CIT 503	Holistic Living For The Caregiver	3.0
Select one of the following:		3.0
CIT 511	Spirituality, Health and Healing	
CIT 512	Body Movement Therapies	
CIT 513	Yoga for the Enlightened Practitioner	
CIT 552	Integrative Advanced Relaxation Techniques (I-ART)	
CIT 600	Foundations in Clinical Aromatherapy	
CIT 602	Women's Integrative Health	
CIT 617	Qigong: Bio-energy Therapy	
CIT 618	Principles of Holistic Nursing	
CIT 619	Principles of Bioenergy Therapies	
CIT 620	Integrative Meditation: Where East Meets West	
CIT 628	Special Topics in Complementary and Integrative Therapies	
CIT 690	Independent Study	

Total Credits

12.0

Graduate Minor in Advanced Study in Holistic Hospice and Palliative Care

About the Graduate Minor

The graduate minor in Advanced Study in Holistic Hospice and Palliative Care provides students with a mind-body-spirit approach to end-of-life care. Graduates develop mastery in providing compassionate spiritual care to patients and their families.

The use of Complementary and Integrative Health (CIH) therapies within the scope of end-of-life care provides practitioners the tools needed to treat the holistic spectrum of the patient and their family, while integrating an effective and efficient delivery of care.

This approach to end-of-life care is driven by the principle of patient-centered care that eliminates unnecessary hospital re-admission and costly medical treatments, while alleviating pain and suffering.

Admission Requirement

- Current enrollment in a master's program at Drexel University.
- GPA of 3.0 and above
- Standardized Tests: None
- Transcripts: Not required.
- Prerequisites: N/A
- References: Not required.
- Personal Statement/ Essay: Personal statement describing interest minor and relevance to career goals.
- Interview/Portfolio: Not required.
- CV/Resume: Required.

Graduate Minor in Advanced Study in Integrative Addiction Therapies

About the Graduate Minor

The graduate minor in Advanced Study in Integrative Addiction Therapies prepares healthcare professionals to treat patients suffering from substance use disorders within the holistic spectrum by healing the body, mind, and spirit. Students will learn to integrate evidence-based complementary and integrative therapies (CIT) such as nutritional neuroscience, neurofeedback, meditation, auricular acupuncture, and Qigong bioenergy therapies within the framework of conventional healthcare. These integrative therapies will enable healthcare practitioners to incorporate innovative, caring and holistic methods to an underserved population.

Substance use disorders are among this country's most ubiquitous health and social issues. This cutting edge program is designed to empower practitioners to utilize complementary and integrative therapies within the scope of conventional healthcare practice to treat substance use disorders and enhance patient outcomes. It will provide practitioners the tools needed to treat the substance use disorder patient (and their family) within the holistic spectrum, healing body, mind and spirit.

A holistic, integrative treatment program for addiction requires combining neuronutritional treatment with other facets (bio, psycho, social, spiritual, economic), including counseling and education to support lifestyle change.

Admission Requirements

- Current enrollment in a master's program at Drexel University.
- GPA of 3.0 and above
- Standardized Tests: None
- Transcripts: Not required
- Prerequisites: N/A
- References: Not required

Graduate Minor in Advanced Study in Women's Integrative Health

About the Graduate Minor

The graduate minor in Advanced Study in Women's Integrative Health provides healthcare professionals with a mind-body-spirit approach to care. Studies have shown that women desire a broader, integrative approach to their healthcare and share a philosophical congruence with Complementary and Integrative Health core values. In this program, students learn to integrate evidence-based complementary and integrative therapies such as phytomedicine, nutrition, mind/body, and energy therapy modalities within the framework of conventional healthcare practice.

Integrative healthcare reaffirms the importance of the relationship between practitioner and patient, focuses on the whole person, and utilizes all appropriate therapeutic approaches, both conventional biomedicine and complementary and integrative health practices to achieve optimal health and healing. Women's Integrative Health provides a model of care that is most compatible and reflective of women's emotional and psychological needs in the health care relationship and prepares students to incorporate an innovative, caring and holistic spectrum of treatment. Students learn to explore the fullness of women's lives, taking into account a woman's beliefs, intuitions, and preferences for care which allows them to form a healing partnership, while providing their patients with the finest possible healthcare.

Admission Requirement

- Current enrollment in a master's program at Drexel University
- GPA of 3.0 and above
- Standardized Tests: None
- Transcripts: Not required

Graduate Minor in Integrated Nursing Care of Autism Spectrum Disorder

About the Graduate Minor

Autism spectrum disorder (ASD) is a condition that has significant health implications across the lifespan for affected people and their family members.

This graduate minor focuses specifically on the integrated care of the complex health problems of people affected by autism spectrum disorder, as well as the collaborations among patients, families, and healthcare providers. The program prepares students to pursue a highly innovative role in an area of practice in which the value of nursing care needs to be developed.

The graduate minor in Integrated Nursing Care of Autism Spectrum Disorder prepares nurses to understand and deliver lifelong care to people with ASD.

This 12.0 credit online minor provides students with opportunities to specialize in across the life-span ASD nursing care. Students will learn how to integrate core ASD characteristics and features with nursing care and to serve patients and their families in a variety of service settings.

Students will develop their skill as members of a treatment team that includes patients, families, and other healthcare providers. Courses will instruct students to provide appropriate, responsive, collaborative, and professional service to this unique population of patients. The program helps students to develop a practice philosophy and long-term professional agenda in ASD care to include practice, education, and research.

Admission Requirement

- Current enrollment in a master's program at Drexel University.
- GPA of 3.0 and above
- Standardized Tests: None
- Transcripts: Not required.
- Prerequisites: N/A
- References: Not required.
- Personal Statement/ Essay: Personal statement describing interest minor and relevance to career goals.
- Interview/Portfolio: Not required.
- CV/Resume: Required.

Graduate Minor in Neuroscience, Learning and Online Instruction

About the Graduate Minor

This six-course graduate minor includes three interdisciplinary core courses and three discipline specific elective courses. The program provides knowledge and skills to health professions graduate students enrolled at Drexel University who seek to build the skills and competencies essential to instruct courses in online and/or blended environments across multiple fields of study utilizing methodological approaches related to neuroscience, the brain's memory systems, the learning process, and the impact of health and emotions on learning.

Students currently enrolled in a masters program may use required courses in their masters program to meet the 9.0 credit electives requirement. Please contact Ms. Jillian Randall (contact info below) for more information.

Admission Requirement

- Current enrollment in a master's program at Drexel University
- GPA of 3.0 and above
- Standardized Tests: None
- Transcripts: Not required
- Prerequisites: N/A
- References: Not required
- Personal Statement/ Essay: Personal statement describing interest minor and relevance to career goals
- Interview/Portfolio: Not required

Graduate Minor in Nursing Education

About the Graduate Minor

The graduate minor in Nursing Education prepares students to work as nursing educators, nursing faculty, or nursing professors in all types of programs, at all levels, in a variety of settings. This program has a special focus on preparing students with the required competencies to be successful on the nurse educator certification exam.

Currently, there is a severe and critical nursing faculty shortage in the United States. This program will prepare graduates fill these faculty positions and educator positions in healthcare organizations through cutting-edge content and learning experiences that build the skills and competencies essential for today's nurse educators.

The program integrates theories specific to adult learning, curriculum design, evaluation of courses and program evaluation of courses and programs, critical thinking, both clinical and classroom techniques, and the preparation for the role of the nursing professor. The program also includes opportunities to explore contemporary and leading-edge educational modalities. Knowledge and skills gained through this program are applicable in a variety of settings.

This unique program even instructs students on how to teach online and use technology to teach nursing in innovative ways. The culminating practicum, which runs over two terms, provides students with opportunities to put what has been learned into practice. Participants complete a role practicum experience in teaching, providing ample opportunity to apply theory to practice. In addition, students are required to attend an immersive on-campus intensive (OCI) simulation residency when taking practicum. The OCI hours will count as part of the required 160 total practicum hours (24 practicum hours earned). The OCI is offered biannually in January or July.

Admission Requirement

- Current enrollment in a masters program at Drexel University.
- GPA of 3.0 and above
- Standardized Tests: None
- Transcripts: Not required
- Prerequisites: N/A
- References: Not required

- Personal Statement/ Essay: Personal statement describing interest minor and relevance to career goals
- Interview/Portfolio: Not required
- CV/Resume: Required

Tuition and Fee Rates

Please visit Drexel University Online (<https://online.drexel.edu/financing/tuition.aspx>).

Program Requirements

Required Courses

NURS 591	Foundations of Nursing Education	3.0
NURS 606	Curriculum Design for Higher Level Cognition	3.0
NURS 613	The Role and Responsibility of the Nursing Professor	3.0
or NURS 616	Teaching Methods in Nursing Education	
NURS 615	Assessment, Measurement and Evaluation	3.0
NURS 632	Nurse Educator and Faculty Role Practicum	6.0
Total Credits		18.0

Graduate Minor in Nursing Leadership in Health Systems Management

About the Graduate Minor

The graduate minor in Nursing Leadership in Health Systems Management focuses on development of a leadership style and skills set essential for nurses in or seeking administrative roles. The program provides the student with information and strategies to problem solve, make decisions, resolve conflict and operationalize the mission and goals of the healthcare delivery organization. In addition, the program guides development of essential skills for supervisory and management positions that help professionals perform in their expanded roles and grow as emerging leaders. Emphasis will be placed on fiscal and organizational management, strategic planning, integrated quality outcomes measurement, organizational structures, marketing, and management of human resources within organizations.

Admission Requirement

- Current enrollment in a masters program at Drexel University
- GPA of 3.0 and above
- Standardized Tests: None
- Transcripts: Not required
- Prerequisites: N/A
- References: Not required
- Personal Statement/ Essay: Personal statement describing interest minor and relevance to career goals
- Interview/Portfolio: Not required
- CV/Resume: Required

Graduate Minor in Service to Veterans

About the Graduate Minor

The graduate minor in Service to Veterans marks achievement of advanced understanding, comprehension and application of the issues surrounding the veteran who has returned from military service and is entering or has entered civilian life. This combination of six courses provides the learner with the necessary knowledge to identify specific health and learning needs of veterans, and to provide advocacy resources to help meet those needs.

These courses will all be delivered through online instruction. By completing this minor, the learner will be able to identify, refer and advocate for the veteran and veteran family members with necessary specialized skills and knowledge, to address many health and educational needs of this unique group.

Students currently enrolled in a masters program may use required courses in their masters program to meet the 6.0 credit concentration requirement. Please contact Ms. Jillian Randall (contact info below) for more information.

Admission Requirement

- Current enrollment in a masters program at Drexel University
- GPA of 3.0 and above

Graduate Minor in Sexual Health and Wellness

About the Graduate Minor

The graduate minor in Sexual Health and Wellness provides the healthcare professional with the knowledge, skills, and attitudes required to provide comprehensive and sensitive sexual health care to patients and their partners. Graduates will be able to discuss a wide range of patient sexual health issues, promote sexual wellness, diagnose and treat sexual problems, and provide patient education on various sexual health topics.

Upon completing the program, graduates be able to:

- Collaborate with other appropriate health care team members to improve patient sexual health
- Conduct age-appropriate sexual health screenings, in-depth sexual history interviews, and sexual health counseling

- Demonstrate an understanding of healthy sexual function, sexual response cycles, sexual orientation, gender identity, and human sexual behavior
- Design individualized, comprehensive, culturally appropriate plans of care to help patients achieve their sexual health goals
- Develop specific ways to act as an ally to patients who may experience discrimination and marginalization due to their sexual and gender identity, behaviors, or history
- Provide age-appropriate, culturally-competent, and comprehensive patient education on a wide variety of sexuality topics
- Reflect on the importance of sexual wellness as part of the overall health of patients, with a deep understanding of the potential biological, psychological, social, cultural, and religious influencing factors

Admission Requirement

- Current enrollment in a master's program at Drexel University
- GPA of 3.0 and above
- Standardized Tests: None
- Transcripts: Not required
- Prerequisites: N/A
- References: Not required
- Personal Statement/ Essay: Personal statement describing interest minor and relevance to career goals

Human Nutrition

Major: Human Nutrition

Degree Awarded: Master's of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 30.1901

Standard Occupational Classification (SOC) code: 29-1031

About the Program

The Human Nutrition major is designed to provide the didactic coursework necessary to prepare students to address the nutrition needs of individuals or groups, through prevention or management of illness or chronic disease. This major also encompasses nutrition science, the application of the principles of biochemistry, physiology, and biology to human nutritional needs. The major includes two tracks; the Didactic Program in Dietetics (DPD) track leading to becoming a Registered Dietitian/Nutritionist (RDN), and the Nutrition Sciences track leading to application in research or industry. Applicants to the program should indicate to which track they are applying.

Current research in human nutrition includes: the prevention of obesity and diabetes across the lifespan; community engagement to improve healthful food access, availability, and exposure in school and clinic-based settings; nutrition misinformation in the areas of diabetes, oncology and weight control; and effectiveness of nutrition education (particularly by the use of multimedia) on health and eating habits.

Current research in nutrition science includes: dopamine-mediated mechanisms of food intake regulation in humans and its impact on metabolic homeostasis, especially as it applies to obesity, eating disorders and aging; the relationship between human exposure to pesticides and oxidative stress by measuring biomarkers of oxidative stress in biological fluids and DNA damage in human cells; identifying potential unique food safety risks for minority racial/ethnic and low income populations; and, understanding whether novel dietary interventions can influence bone-regulating hormones, bone mineral density, pro-inflammatory cytokines and energy metabolism.

Graduate study in human nutrition is offered on both a full-time and part-time basis. Students are admitted only in the Fall or Winter terms. Students in the DPD track are required to complete a comprehensive exam at the end of the first year of study, and have the option to complete a research thesis. Students in the Nutrition Sciences track are required to complete a research thesis. In addition to the core curriculum, students select specialty courses relating to their major, as well as electives.

Mission, Goals, and Outcome Measures

Drexel University's Department of Nutrition Sciences, Nutrition and Dietetics Program integrates a foundation in the nutrition sciences with courses in the social sciences to provide the knowledge, skills, and professional values needed for successful entry into dietetic internships, graduate school, or dietetics employment. The learning environment is structured to allow students and interns to use current technology, to participate in conducting research, and to engage in experiential learning, including co-operative education for undergraduates.

Goal 1

To provide quality didactic instruction and learning experiences to prepare graduates to be accepted into dietetic internships and graduate schools, or work in the field of dietetics.

Objective #1: Eighty percent of graduating BS students and 90% of graduating MS students will apply to an accredited dietetic internship.

Objective #2: Eighty percent of students who apply to dietetic internships or Individualized Supervised Practice Pathways (ISPPs) are accepted.

Objective #3: Seventy-five percent of students who apply to graduate school are accepted.

Objective #4: Eighty percent of graduates of the Drexel University ISPP who seek employment will be employed within six months of program completion.

Objective #5: Graduates of the didactic program in dietetics (DPD) will rate 10 aspects of their didactic and learning experiences and average of "4" or better, on a scale of 1=poor to 5=excellent.

Objective #6: At least 90% of students will complete the program within 150% of the expected time frame for the program (BS-DPD full-time = 4 years; BS-DPD part-time = 5 to 7 years; Masters of Science [MS]-DPD full-time = 2 years; MS-DPD part-time = 4 years; ISPP full-time = 3 quarters or 1 year; ISPP part-time = 6 quarters or 2 years).

Goal 2

To prepare graduates to become competent entry-level dietitians.

Objective #1: The program's first time pass rate on the entry exam for all tracks (BS-DPD, MS-DPD, and ISPP) will be 80% or higher.

Objective #2: Internship directors of graduates of the DPD will rate 10 aspects of the students' preparation for internship an average "4" or better, on a scale of 1=poor to 5=excellent.

Objective #3: Employers of alumni of the ISPP will rate 10 aspects of the employees' preparation for entry-level practice an average of "4" or better, on a scale of 1=poor to 5=excellent.

Goal 3

To increase diversity in the profession by recruiting and retaining students from under-represented groups and facilitating their success in the program.

Objective #1: At least 10% of students in all tracks (BS-DPD, MS-DPD and ISPP cumulatively) will be from under-represented groups.

Visit the College's MS in Human Nutrition web page (<https://www.drexel.edu/cnhp/academics/graduate/MS-Human-Nutrition>) for more information.

Program Prerequisites

The Human Nutrition program builds on a fundamental background in human behavior, written communication, and the sciences of biology, chemistry, physiology and nutrition.

Applicants may apply to the program at any point in time while completing prerequisites. However, if they are accepted, all prerequisite courses must be completed with a grade of B or better before students may enroll in the program.

- 1 year of English composition and/or literature
- 1 semester of general biology with lab to include cells and genetics
- 2 semesters of general chemistry with lab, OR, 1 semester of general chemistry with lab AND 1 semester of organic chemistry with lab
- 1 semester of upper-level (300 to 400 level) biochemistry
- 1 semester of human physiology, OR, 2 semesters of anatomy & physiology with lab
- 1 semester of general psychology

- 1 semester of statistics
- 1 semester of nutrition

In addition, students completing the DPD track will be required to complete the following two courses either before entry to the program or while completing the degree program to receive a DPD Verification Statement.

1 semester of basic and quantity food preparation (DPD track only), OR
1 semester of basic food preparation and 1 semester quantity food (DPD track only)

Degree Requirements - Nutrition Sciences Track

Students are required to complete 21.0 credits of CORE courses and then select 24.0 credits of electives chosen from courses currently offered in Biology, Nutrition, Food Science, Environmental Science or Public Health after consulting with their advisor.

DPD Track:

FDSC 506	Food Composition & Behavior	3.0
NFS 510	Profession of Dietetics	3.0
NFS 525	Nutritional Assessment Through the Life Cycle	3.0
NFS 530	Macronutrient Metabolism	3.0
NFS 531	Micronutrient Metabolism	3.0
NFS 543	Medical Nutrition Therapy I	3.0
NFS 544	Medical Nutrition Therapy II	3.0
NFS 545	Nutrition in Critical Care	3.0
NFS 546	World Nutrition	3.0
NFS 550	Foodservice Systems Management	3.0
NFS 601	Research Methods	3.0
NFS 630	Nutrition Counseling	3.0
NFS 690	Community Nutrition	3.0
NFS 849	Readings in Therapeutic Nutrition	3.0
Elective		3.0
Total Credits		45.0

Nutrition Sciences Track:

Required Courses		18.0
NFS 525	Nutritional Assessment Through the Life Cycle	
NFS 601	Research Methods	
NFS 602	Methods of Nutrition Research	
NFS 680	Special Topics	
NFS 997	Research	
Electives (27 credits chosen from the following; must be approved by thesis advisor or committee)		27.0
BIO 500	Biochemistry I	
BIO 501	Biochemistry Laboratory I	
BIO 526	Immunology	
BIO 562	Biology of Neuron Function	
BIO 565	Neurobiology of Disease	
BIO 566	Endocrinology	
BIO 610	Biochemistry of Metabolism	
BIO 611	Biochemistry Laboratory II	
BIO 613	Genomics	
BIO 614	Behavioral Genetics	
BIO 615	Proteins	
BIO 616	Biochemistry of Major Diseases	
FDSC 506	Food Composition & Behavior	
FDSC 550	Food Microbiology	

FDSC 551	Food Microbiology Laboratory
FDSC 554	Microbiology & Chemistry of Food Safety I
FDSC 558	Nutritional Impact of Food Processing Methods
FDSC 560	Food Chemistry
FDSC 561	Food Analysis
FDSC 568	Functional Foods
FDSC 654	Microbiology & Chemistry of Food Safety II
FDSC 662	Sensory Evaluation of Food
NFS 530	Macronutrient Metabolism
NFS 531	Micronutrient Metabolism
NFS 546	World Nutrition
NFS 625	Nutrition and Exercise Physiology
NFS 650	Advanced Nutritional Chemistry I
NFS 651	Advanced Nutritional Chemistry II
NFS 690	Community Nutrition
NFS 810	Topics in Metabolic Nutrition
NFS 811	Topics in Community Nutrition
PSY 828	Weight and Eating Disorders
RSCH 759	Foundations of Biostatistics
RSCH 770	Foundations in Research Methods
RSCH 811	Intermediate Biostatistics
RSCH 812	Interpretation of Data
RSCH 813	Measurement Theory in Healthcare

Total Credits 45.0

Degree Requirements - Didactic Program in Dietetics (DPD) Track

The Didactic Program in Dietetics (DPD) (<https://www.drexel.edu/cnhp/academics/graduate/MS-Human-Nutrition>) provides the coursework that is required to become a Registered Dietitian/Nutritionist (RD/RDN). *Dietetics* is the practical application of nutrition in the prevention and treatment of disease. Dietetics is an exciting and challenging profession because there are many diseases that are related to nutrition, such as heart disease, high blood pressure, stroke, cancer, diabetes and obesity.

The Drexel University Didactic Program in Dietetics (DPD) provides classroom training for students who want to become Registered Dietitians/Nutritionists (RD/RDN). Our Didactic Program in Dietetics is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics:

Academy of Nutrition and Dietetics
120 South Riverside Plaza
Suite 2000
Chicago, IL 60606
800-877-1600 x5400
www.eatright.org (<http://www.eatright.org>)

The Academy of Nutrition and Dietetics (<https://www.cdrnet.org>) is the nation's largest organization of food and nutrition professionals, most of whom are Registered Dietitians (RD) or Registered Dietitians/Nutritionists (RDN). Note that the "RD" and "RDN" credential are the same credential. The Academy of Nutrition and Dietetics included the "RDN" to reflect that "all registered dietitians are nutritionists, but not all nutritionists are registered dietitians." In addition, the Academy of Nutrition and Dietetics states that adding the word to "nutritionist" to the RD credential allows for a broader notion of wellness.

To become an RD/RDN, students must complete a:

- Minimum of a bachelor's degree with course work approved by ACEND. Coursework typically includes food and nutrition sciences, chemistry, biochemistry, physiology, microbiology, community nutrition, nutrition counseling, basic and quantity food preparation, foodservice systems management and medical nutrition therapy.
 - NOTE: As of January 1, 2024, the minimum of a Master's degree will be required to be able to take the RDN exam.
- An accredited, supervised practice program, also called a dietetic internship (DI), at health-care facilities, community agencies and in foodservice operations. The internship must provide a minimum of 1200 hours of hands-on training.
- Pass a national examination administered by the Commission on Dietetic Registration.

Students who already have a bachelor's degree and want to become an RD/RDN, may complete coursework approved by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) at the master's degree level. Drexel University was one of the first universities in the country to offer the DPD program on the graduate level.

The MS in Human Nutrition with the DPD option is a full- or part-time program with courses offered in the evening. The program is 45.0 credits with a written comprehensive exam and may be completed in 18 months to two years with full-time study. Students who enroll part-time typically complete the program in three to four years. After completing the MS in Human Nutrition, students participating in this program will also receive a Verification Statement that shows successful completion of the DPD and allows them to apply for an accredited supervised practice experience (dietetic internship).

Required Courses

FDSC 506	Food Composition & Behavior	3.0
NFS 510	Profession of Dietetics	3.0

Nutrition Sciences Faculty

Joseph I. Boullata, PharmD, RPh, BCSNP, FASPEN, VACN (*University of Maryland*). Clinical Professor. Nutrition-medication interactions; Vitamin D metabolism; Nutrition support.

Elizabeth Brooks, JD, IBCLC (*George Washington University*) *Human Lactation Program*. Instructor.

Charlene Compher, PhD, RD, CNSC, LDN, FAND, FASPEN (*Drexel University*) *Courtesy Appointment*. Visiting Research Professor.

Nyree Dardarian, MS, RDN, LDN, CSSD, FAND (*Drexel University*) *Director, Center for Nutrition & Performance*. Clinical Assistant Professor. Energy expenditure; Sports nutrition

Francesco De Luca, MD (*Catholic University of Sacred Heart, Rome, Italy*) *Courtesy Appointment*. Visiting Research Professor.

Angelo Del Parigi, MD (*University of Bari, Italy*) *Courtesy Appointment*. Visiting Research Professor.

Garrison L. Draper, MSc, CSCS, USAW, ISPAS (*Edith Cowan University, Perth, WA*) *Courtesy Appointment*. Visiting instructor

Susan Ettinger, PhD, RD, DABN, CDN (*Columbia University*) *Courtesy Appointment*. Visiting Research Professor.

Debi Page Ferrarello, RN, MSN, MS, IBCLC, RLC (*Jefferson University, Arcadia University*). Instructor. Human Lactation Certificate Program

Susan Fuchs, IBCLC (*Drexel University*). Instructor. Human Lactation Certificate Program

Andrea Judge, MPH, IBCLC, RLC (*University of North Carolina*). Clinical Instructor. Human Lactation Certificate Program

Joseph Kehayias, PhD (*Indiana University*). Professor. Body composition analyses; Measurement of sarcopenia; Osteoporosis; Energy expenditure.

Tanya V.E. Kral, PhD (*Pennsylvania State University*) *Courtesy Appointment*. Visiting Research Professor.

Beth L. Leonberg, MS, MA, RDN, FAND (*Colorado State University, Rowan University*) *Director, Didactic Program in Dietetics*. Assistant Clinical Professor. Pediatric nutrition.

Rachelle Lessen, MS, RD, IBCLC, LDN (*Arcadia University*). Instructor. Human Lactation Certificate Program

Brandy-Joe Milliron, PhD (*Arizona State University*). Assistant Professor. Development and evaluation of modifications in the natural environment to promote healthier living; Farm to table school initiatives

Juan Muniz, PhD (*Oregon State University*) *Director, Nutritional Biochemistry Laboratory*. Assistant Clinical Professor. Food microbiology; Community-based research to assess pesticide levels in homes; Prevention of health effects of pesticides for indigenous farmworkers.

Jennifer A. Nasser, PhD, RD, FTOS (*Rutgers University*). Associate Professor. Dopamine-mediated mechanisms of food intake regulation in humans and its impact on metabolic homeostasis, especially as it applies to obesity, eating disorders and aging.

Irene E. Olsen, PhD, RD, LDN (*Tufts University*) *Courtesy Appointment*. Visiting Research Professor.

Jennifer J. Quinlan, PhD (*North Carolina State University*). Associate Professor. Food microbiology; Microbiological quality and safety of produce, dairy and meat products in markets in high vs. low socioeconomic areas; Bacillus and Clostridium spores in food processing.

Sobhana Ranjan, PhD, RD (*University of Delhi, India*) *Courtesy Appointment*. Visiting Research Professor.

Barry Ritz, PhD (*Drexel University*) *Courtesy Appointment*. Visiting Research Professor.

Vicki Schwartz, DCN, RD, LDN, CNSC, FAND (*Drexel University*) *Nutrition and Foods*. Assistant Clinical Professor. Standardized patients vs real patients in nutrition counseling

Patricia A. Shewokis, PhD (*University of Georgia*). Professor. Roles of cognition and motor function during motor skill learning; role of information feedback frequency on the memory of motor skills, noninvasive neural imaging techniques of functional near infrared spectroscopy (fNIR) and electroencephalography (EEG) and methodology and research design.

Deeptha Sukumar, PhD (*Rutgers University*). Assistant Professor. Vitamin D and magnesium and bone mineral density; Obesity and bone mineral density.

Alison Ventura, PhD (*Pennsylvania State University*) *Courtesy Appointment*. Visiting Research Professor. Factors that contribute to the development of eating behaviors and dietary preferences during infancy and early childhood.

Stella L. Volpe, PhD, RDN, LDN, ACSM-CEP, FACSM (*Virginia Polytechnic Institute and State University*) *Chair, Nutrition Sciences*. Professor. Prevention of obesity and diabetes across the lifespan; Mineral metabolism and exercise; Energy balance; Sports nutrition.

Emeritus Faculty

Donna H. Mueller, PhD, RD (*Temple University*). Associate Professor Emeritus. Clinical nutrition; Pediatric nutrition; Nutrition in pulmonary diseases, especially cystic fibrosis; Nutrition in developmental delay; Dental nutrition; Dietetic education and professional development.

Issues in Human Trafficking Certificate

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 9.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 34.0199

Standard Occupational Classification (SOC) Code: 21.1019

NOTE: This certificate program is not accepting applicants.

Human Trafficking is an issue of academic and professional importance. A number of organizations, academic and otherwise, are taking the initiative to provide students, service providers, and those working in this area, with a variety of trainings, some of which are general and others more specific to the participants' professional backgrounds and needs. Aside from law enforcement and social service disciplines, the medical and healthcare fields are incorporating a variety of courses and trainings into their curriculum, particularly those with an interest in service learning and social justice issues.

This certificate, which consists of three courses, will provide students with the knowledge and foundation regarding the who, what, when, where, why and how of human trafficking, the role they can play in identifying and supporting victims and what they can do to combat this growing and global phenomenon.

Admission Requirements

- Bachelor's degree from a fully accredited program.
- 3.0 GPA or above on all previous coursework or last 60 credits completed.
- Official transcripts from all previous educational institutions required.
- Personal statement describing interest in certificate program.
- Curriculum Vitae or Resume.
- One professional letter of recommendation.

TOEFL Requirements

International applicants, as well as immigrants to the United States and US permanent residents whose native language is not English and who have not received a bachelor's degree or higher in the US, Australia, Canada, Ireland, New Zealand, or the United Kingdom, must show proficiency in English speaking as well as listening, writing, and reading. American citizens born on US military bases abroad may be waived from the TOEFL requirement after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

- If the TOEFLiBT exam is taken, a minimum combined score for the listening, writing, and reading sections of 79 plus a speaking section score of 26 or higher must be obtained.
- If the TOEFL is taken, a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher must be obtained.

Program Requirements

Required Courses

IPS 545	Introduction to Human Trafficking	3.0
IPS 546	Psychosocial Dimensions of Human Trafficking	3.0
IPS 547	Human Trafficking: Domestic and Global Trends	3.0
Total Credits		9.0

Master of Family Therapy

Major: Family Therapy

Degree Awarded: Master of Family Therapy (MFT)

Calendar Type: Quarter

Total Credit Hours: 90.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.1505

Standard Occupational Classification (SOC) code: 21.1013

About the Program

The Master of Family Therapy Program prepares couple and family therapy practitioners for clinical practice and is designed to meet the educational requirements for license eligibility in the state of Pennsylvania. It is a two-year full-time degree program and offers part-time options accredited by the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE).

The program prepares students for the profession of couple and family therapy through academic and clinical training. It exposes students to broad areas of theory and practice and provides an intensive, supervised clinical experience. The program emphasizes the interdependence of individual experience and the relational context, extending from family of origin (including traditional and nontraditional families) to the global community. The program is committed to training students to be aware of and sensitive to cultural diversity. In addition, the person of the therapist, including the student's own culture, is a major aspect of the clinical training.

For more information, visit Drexel's College of Nursing and Health Professions Couple and Family Therapy Department (<https://www.drexel.edu/cnhp/academics/departments/Couple-and-Family-Therapy>) web page.

Degree Requirements

The MFT curriculum assists students in integrating theory and practice. Issues of cultural diversity such as race, class, gender, sexual orientation, and ethnicity and power and privilege are addressed throughout the program. Students are fully trained to assume clinical practice in couple and family therapy and meet the educational requirements for Clinical Fellow membership in the AAMFT.

Required Courses

Foundations of Relational/Systemic Practice, Theories & Models		
CFTP 500	Introduction to Systems Theory	4.0
CFTP 501	Introduction to Family Therapy	4.0
CFTP 502	Introduction to Family Therapy II	3.0
Clinical Treatment with Individuals, Couples & Families		
CFTP 506	Contextual Theory and Therapy	4.0
CFTP 509	Couples Therapy	4.0
CFTP 510	Sex Therapy	4.0
CFTP 540	Child Therapy in Couple and Family Therapy	3.0
Diverse, Multicultural/International &/or Underserved Communities		
CFTP 503	Historical and Sociocultural Influences	4.0
CFTP 504	Sociocultural Influences II	3.0
Research & Evaluation		
CFTP 524	Research I: Family Evaluation	3.0
CFTP 525	Research in Couple and Family Therapy	4.0
Professional Identity, Law, Ethics and Social Responsibility		
CFTP 522	Legal and Ethical Implications in Couple and Family Therapy Practice	4.0
CFTP 526	Person of the Therapist Experience I	2.0
CFTP 527	Person of the Therapist Experience II	2.0
CFTP 528	Person of the Therapist Experience III	2.0
CFTP 542	Professional Development Seminar	1.0
Biopsychosocial Health & Development across the Life Span		
CFTP 520	Family Life Cycle	4.0
CFTP 521	Human Development	4.0
Systemic/Relational Assessment & Mental Health Diagnosis and Treatment		
CFTP 513	DSM I: Adult Psychopathology	3.0
CFTP 514	DSM II: Child Psychopathology	3.0

Contemporary Issues

CFTP 725	Trauma and Families	4.0
----------	---------------------	-----

Community Intersections & Collaboration

CFTP 518	Medical Family Therapy	4.0
CFTP 529	Family Policy	4.0

Clinical Practice & Supervision

CFTP 530	Clinical Practicum/Supervision I	1.0
CFTP 531	Clinical Practicum/Supervision II	1.0
CFTP 532	Clinical Practicum/Supervision III	1.0
CFTP 533	Clinical Practicum/Supervision IV	1.0
CFTP 534	Clinical Practicum/Supervision V	1.0
CFTP 535	Clinical Practicum/Supervision VI	1.0
CFTP 536	Clinical Practicum/Supervision VII	1.0
CFTP 539	Clinical Readiness Seminar	3.0
CFTP 541	Live Supervision Group	2.0

Capstone Project

CFTP 543	Capstone Project	1.0
----------	------------------	-----

Total Credits		90.0
---------------	--	------

Clinical Practicum Experience

All interns must complete two practicum experiences continuously prior to graduation: 9 month and 12 month. Interns will be expected to spend 16-20 hours per week working at the approved program practicum site. The intern, site supervisor, and CFT Director of Clinical Training negotiate practicum schedules. The practicum schedule cannot conflict with program class schedule.

Clinical practicum sites are located primarily in Philadelphia, Delaware, and New Jersey. Settings include addictions facilities, schools, family based and forensic family therapy treatment programs, hospitals, community health centers, juvenile justice treatment systems, and inpatient and outpatient behavioral health agencies. Students should expect to travel up to 30 miles to their practicum site or for related supervision. Transportation, therein is the responsibility of the student.

For additional information, students should contact the Couple and Family Therapy Department (<https://www.drexel.edu/cnhp/academics/departments/Couple-and-Family-Therapy>).

Sample Plan of Study**Full-time:**

Term 1		Credits
CFTP 500	Introduction to Systems Theory	4.0
CFTP 522	Legal and Ethical Implications in Couple and Family Therapy Practice	4.0
CFTP 539	Clinical Readiness Seminar	3.0
CFTP 526	Person of the Therapist Experience I	2.0
CFTP 530	Clinical Practicum/Supervision I	1.0
	Term Credits	14.0
Term 2		
CFTP 501	Introduction to Family Therapy	4.0
CFTP 503	Historical and Sociocultural Influences	4.0
CFTP 513	DSM I: Adult Psychopathology	3.0
CFTP 527	Person of the Therapist Experience II	2.0
CFTP 531	Clinical Practicum/Supervision II	1.0
	Term Credits	14.0
Term 3		
CFTP 502	Introduction to Family Therapy II	3.0
CFTP 514	DSM II: Child Psychopathology	3.0
CFTP 521	Human Development	4.0
CFTP 528	Person of the Therapist Experience III	2.0

CFTP 532	Clinical Practicum/Supervision III	1.0
	Term Credits	13.0

Term 4

CFTP 520	Family Life Cycle	4.0
CFTP 533	Clinical Practicum/Supervision IV	1.0
CFTP 540	Child Therapy in Couple and Family Therapy	3.0
	Term Credits	8.0

Term 5

CFTP 506	Contextual Theory and Therapy	4.0
CFTP 518	Medical Family Therapy	4.0

Couple and Family Therapy Faculty

Stephanie Brooks, PhD, LCSW, LMFT (*Drexel University*) Associate Dean for Health Professionals, Interim Program Director PhD in Couple and Family Therapy. Clinical Professor. Forensic family therapy, couple and family therapy supervision and training, person of the therapist, racism and stress, couples living with ADHD, trauma and violence, and sex therapy.

Maureen Davey, MFT, PhD, LMFT (*Syracuse University*). Associate Professor. Development of culturally sensitive family-based interventions for historically under-served populations.

Stephanie Krauthamer Ewing, PhD, MPH (*University of Delaware*). Assistant Professor. Promoting healthy emotional development and resilience in children and adolescents, attachment and caregiving relationships, impact of trauma on parenting and attachment, developmental and contextual risk factors for depression and suicide risk in youth, evidence based treatments for depression and suicide risk, research methodology.

Kenneth Hardy, PhD (*Florida State University*). Professor. Challenging society to think critically about the hidden but significant connections that often exist between trauma and issues of oppression.

Christian Jordal, PhD, LMFT (*Virginia Polytechnic Institute and State University*) Program Director, Master of Family Therapy; Coordinator of Student Experiential Learning. Associate Clinical Professor. LGBT and

mixed orientation relationships, marital commitment, program outcome measurement, sex therapy.

Laura L. Lynch, PhD (*Drexel University*). Assistant Clinical Professor. Medical family therapy, collaborative and family-centered healthcare, experiences of couples and families coping with chronic illness, resident physician wellness.

Marlene F. Watson, PhD, LMFT (*Virginia Polytechnic and State University*). Associate Professor. Forensic family therapy, siblings, race, class, gender and health policy issues.

Ebony White, PhD, LPC, NCC, ACS (*Montclair State*). Assistant Clinical Professor. Multicultural Counseling & Development, Adolescents with Behavioral Diagnoses, Supervision & Training.

Erica Wilkins, PhD, MFT (*Texas Tech University*). Assistant Clinical Professor. Clinical Coordinator. Residual effects of slavery on African Americans, HIV/AIDS, treatment of post-traumatic stress, grief counseling, substance abuse and the family, culturally competent services, and contextual therapy.

Master of Health Administration

Major: Health Administration

Degree Awarded: Master of Health Administration (MHA)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.0701

Standard Occupational Classification (SOC) code: 11-9111

About the Program

The Master of Health Administration program consists of 10 core courses, one on-site residency, and one elective course, for a total of 45.0 credits. All courses, except for the residency, will be conducted online through Drexel University Online (<http://online.drexel.edu/online-degrees/nursing-degrees/mha>). The residency is designed to provide students with a full master's level collaborative experience, with on-campus and/or community activities, and the experience of working directly with health care or public health service organizations to improve the planning, delivery and evaluation of these services.

Students will learn the extent of health disparities in urban areas based on current health indices, such as infant mortality rates, life expectancy and violence, and the policy, systems management, and epidemiological tools for addressing these.

The curriculum includes community orientation, financial skills, analytical thinking, and strategic orientation. The community orientation is expressed in the public health approach in courses such as the Introduction to Descriptive Epidemiology and Biostatistics, which is based in the tradition of social epidemiology.

Students collaborate to produce an Applied Management Project which will be assigned in groups as a culminating project for the program. In this project, students will apply management tools and/or research tools to address particular administrative challenges, assuring that students think at an organizational level and use particular strategies to respond to change.

In addition to the content of the workforce course, self-confidence and self-development are integrated in the management courses and the

on-campus portion of the program, which encourages self-reflection, application of theoretical perspectives, and synthesis of data and management tools. In the online portion of the course, students engage in threaded discussions with classmates about their completed projects.

The curriculum is designed to allow a student to graduate in two academic years, by taking two courses in the fall, winter, spring of year one; one course in the fall, two courses winter and spring terms of year two; and one five-day on-site residency. Students can also complete the program in three years by taking one course per term, including the summer term in Year 1 and Year 2. In this option, the five-day residency is in the summer of Year 2. For students who enter during Spring term, two courses a term can be taken with graduation occurring the following term.

Additional Information

The contact for this program is:

Melissa Aliulis, BS
Administrative Coordinator
Health Administration Department

About the Graduate Minor

This graduate minor is designed for those pursuing graduate studies who are interested in finding a place in management in the health care industry, health policy, health care advocacy, non-profit organizations or other leadership roles in health care services or human services.

Admission Requirements

Students must be currently enrolled in a graduate program at Drexel University, be ready for the rigors of online coursework, receive approval from your program in which are enrolled, and receive approval from the Health Administration Department, since enrollment size is limited.

Program Requirements

Required Courses

HSAD 505	Ethical and Legal Issues in Healthcare Management and Policy	4.0
HSAD 530	Politics and Policy of Healthcare Resources	4.0
HSAD 540	Resources, Recruitment and Retention in Healthcare	4.0

Choose 1 of the following courses: 3.0-4.0

HSAD 525	National Health Expenditures	
HSAD 550	Planning in the Era of the Affordable Care Act	
HSAD 562	Group Dynamics & Leadership in Health Care Management	
IPS 564	The Business of Healthcare	

Total Credits 15.0-16.0

Health Services Administration Faculty

Jesse Ballenger, PhD (*Case Western Reserve University*). Associate Teaching Professor. Healthcare, medicine and ethics; aging and neurodegenerative diseases; Science and Technology Studies.

Merritt Brockman, DHA, FACHE (*Medical University of South Carolina*). Assistant Professor. Patient Centered Medical Home, Improvements in Health Care Delivery.

Chalmers Clark, PhD (*Graduate Center of the City University of New York*). Associate Professor. Wittgenstein (the contextual grounds of human language), Holism in the Naturalized Epistemology of WV Quine, Trust relations in the medical profession (physician-patient, biomedical research, and public health), the professions and public trusts.

Fred DiCostanzo, EdD (*Rutgers University*). Assistant Professor. Organizational leadership, Healthcare Management, Human resources and team effectiveness

Stephen F. Gambescia, PhD, MEd, MBA (*Temple University*). Professor. Health care policy, nonprofits and health care, and health care management and leadership.

Kevin Mitchell, PhD, MBA (*Walden University*). Assistant Professor. Health disparities in vulnerable populations, strategic healthcare management, evidenced based medicine and clinical pharmacology and therapeutics.

Kristine A. Mulhorn, PhD (*University of Delaware*) Chair, Department of Health Administration. Professor. Disability and aging; cross-national methods of functioning.

Constance Karin Perry, PhD, EMT (*University of Buffalo*). Associate Professor. Biomedical ethics and ethical theory. Research interests include autonomy, personhood, feminist ethics, the ethics of animal experimentation, and ethical issues in reproduction and pregnancy.

Spencer R. Ward, PhD (*University of Nebraska*). Assistant Professor. The use of behavioral techniques to reduce performance anxiety, improve the knowledge acquisition process and promote distance-learning models.

Emeritus Faculty

David Flood, PhD (*University of Pennsylvania*). Professor Emeritus. Medical humanities: an examination of topics in medicine and health care from the perspectives of literature, the arts, and medical ethics.

MSN "Bridge" Program

Bridge to the Master of Science in Nursing (MSN): 3.0 quarter credits (no degree awarded at this time)

MSN for Nurses with a Non-Nursing BA or BS

About the Program

Drexel University's RN-MSN "bridge" program is available for nurses who have a bachelor's degree in a field other than nursing and now wish to pursue an MSN degree. Applicants to this program must complete the admission process to the MSN program and seek initial advisement from the MSN program academic advisors. The bridge program is available only to students applying for the MSN Advance Role programs. It is not available for students wishing to pursue an MSN Nurse Practitioner degree. To learn more about alternative pathways to becoming a nurse practitioner, contact Ms. Jillian Randall or Mr. Redian Furxhiu (see contact information below).

The graduate program department chair reviews the applicant's file for program eligibility and prerequisites are established on an individual basis.

The "bridge" consists of one undergraduate course. Individuals with extensive professional experience may request to waive the bridge course. Contact Mr. Redian Furxhiu (rf53@drexel.edu) or Ms. Jillian Randall (jnr56@drexel.edu) for more information. The required "bridge course" in the MSN Advance Role Track is NURS 335 *Genetics and Genomics: Application to Nursing Practice* (3.0 quarter credits). This class is available entirely online, is delivered in 10-week, quarter term session. This course is offered in every term, and includes mandatory synchronous class meetings.

After successfully completing all requirements and admission to the MSN program, students progress directly into graduate-level courses. (Note: The BSN is not awarded in this program.)

Bridge to MSN Requirements

NURS 335 Genetics and Genomics: Application to Nursing Practice 3.0

See the College's Nursing: MSN-Bridge Program (<https://www.drexel.edu/cnhp/academics/graduate/MSN-Bridge>) web page for more details about the program, and visit the Drexel University Online MSN Bridge Program (<http://www.drexel.com/online-degrees/nursing-degrees/rn-msn-bridge>) web page for information about the online delivery format. If you are interested in earning both a BSN and MSN, consider enrollment in the

Accelerated RN/BSN/MSN (<http://catalog.drexel.edu/undergraduate/collegeofnursingandhealthprofessions/nursingrnbsnmsn>) program.

Additional Information

For more information about MSN Advance Roles Track program, contact:

Mr. Redian Furxhiu
Student Services Manager
rf53@drexel.edu (fr53@drexel.edu)
267.359.5691

or

Ms. Jillian Randall
Academic Advisor
jnr56@drexel.edu (jrn56@drexel.edu)
267.359.5692

MSN in Nurse Anesthesia

Major: Nurse Anesthesia

Degree Awarded: Master of Science in Nursing (MSN)

Calendar Type: Quarter

Total Credit Hours: 89.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.3804

Standard Occupational Classification (SOC) code: 29.1151

About the Program

The Master of Science in Nursing in nurse anesthesia is a 28-month, 89.0 quarter credit, full-time program. The program offers 18 theoretical nursing and research credits, a 15.0 quarter credit basic science component, a 31.0 quarter credits didactic anesthesia component and a 25.0 credit clinical component. Upon successful completion of the program's outcomes the student is awarded an MSN in nurse anesthesia and is eligible to take the national certification examination offered by the NBCRNA Council on Certification of Nurse Anesthetists.

The Nurse Anesthesia Program is accredited by the:
Council on Accreditation of Nurse Anesthesia Educational Programs
222 South Prospect Avenue, Suite 304
Park Ridge, IL 60068
847.692.7050

PMC in Nurse Anesthesia

The College of Nursing and Health Professions also offers a post-master's certificate in nurse anesthesia (p. 190) option. Upon successful completion of the program's outcomes the student is awarded a certificate in nurse anesthesia and is eligible to take the national certification examination offered by the NBCRNA Council on Certification of Nurse Anesthetists.

Additional Information

For more information, contact the Academic Advisor of the Nurse Anesthesia Program:
MSN Programs Academic Advisor
1601 Cherry Street
267.359.5786

Additional information is also available on Drexel's College of Nursing and Health Professions Nurse Anesthesia Program (<https://www.drexel.edu/cnhp/academics/graduate/MSN-Nursing-Nurse-Anesthesia>) web page.

Admission Requirements

The nurse anesthesia program begins annually in January. Applications are reviewed continually. Applications should be made 12-18 months in advance of the anticipated January start date. Interviews are conducted throughout the year.

Prospective applicants must demonstrate their ability to pursue graduate work, as exemplified by high scholastic achievement, high aptitude-test scores, and letters of recommendation. Applicants for the nurse anesthesia programs may submit scores from the Miller Analogies Test (MAT) in lieu of the GRE.

For detailed admission requirements, visit the College's MSN in Nurse Anesthesia Admission Requirements (<http://www.drexel.edu/gradnursing/msn/nurseAnesthesia/admissions>) web page.

An application form and additional requirements and deadline information is available on the the Nurse Anesthesia (<http://www.drexel.edu/grad/programs/cnhp/nurse-anesthesia>) page of Drexel Admissions website.

Degree Requirements

MSN Core Courses

NURS 500 [WI]	Confronting Issues in Contemporary Health Care Environments	3.0
NURS 502	Advanced Ethical Decision Making in Health Care	3.0
NURS 526	Information, Innovation & Technology in Advanced Nursing Practice	3.0
NURS 527	Evidence Based Approaches to Practice	3.0
NURS 549	Advanced Pharmacology	3.0
RSCH 519	Introduction to Biostatistics	3.0
RSCH 523	Methods for Health Research	3.0

Nurse Anesthesia Core

NURS 503	Basic Principles of Nurse Anesthesia	3.0
NURS 504	Overview of Nurse Anesthesia	3.0
NURS 505	Chemistry and Physics	3.0
NURS 507	Nurse Anesthesia Pharmacology I	3.0
NURS 510	Advanced Principles of Nurse Anesthesia I	3.0
NURS 511	Nurse Anesthesia Pharmacology II	3.0

Nurse Anesthesia Faculty

Suzanne Ariza, CRNA, MSN (*Drexel University*). Assistant Clinical Professor.

Lew Bennett, DNP, CRNA (*Chatham University*) *Chair, Nurse Anesthesia Department*. Assistant Clinical Professor. Clinical and didactic education of nurse anesthesia students.

Ferne Cohen, CRNA, EdD (*Drexel University*) *Associate Chair, Nurse Anesthesia Department*. Assistant Clinical Professor. Clinical and didactic education of nurse anesthesia students.

MSN: Adult-Gerontology Acute Care Nurse Practitioner

Major: Nurse Practitioner, Adult-Gerontology Acute Care

Degree Awarded: Master of Science in Nursing (MSN)

Calendar Type: Quarter

Total Credit Hours: 57.0 quarter credits; 800 clinical hours

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.3801

Standard Occupational Classification (SOC) code: 29-1171

About the Program

The online Adult-Gerontology Acute Care Nurse Practitioner (AGACNP) program is designed to prepare practitioners for professional practice in the management of medical, surgical, and critical-care adult patient populations. Concurrent theory and clinical courses provide a knowledge base for the management of adult complex acute, critical, and chronic health care conditions. Clinical practicum rotations allow students to put the principles they have learned into practice in medical, surgical, and critical care settings. Upon completing the program, graduates pursue practice roles across the continuum of acute care services ranging from high-acuity hospital based emergency or intensive care settings to specialty based practices. Graduates are eligible to sit for the AACN and/or ANCC's Adult Gerontology Acute Care Nurse Practitioner Certification Examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulation, and evaluation. OCI visits occur 2-4 times during the clinical portion of the program and range from 2-3 days. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab. These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

For more information about this program, visit Drexel's MSN Nurse Practitioner Programs (<https://www.drexel.edu/cnhp/academics/graduate/MSN-Nurse-Practitioner-Adult-Gerontology-Acute-Care>) web page.

Degree Requirements

Core Courses

NURS 500 [WI]	Confronting Issues in Contemporary Health Care Environments	3.0
NURS 502	Advanced Ethical Decision Making in Health Care	3.0
NURS 544	Quality and Safety in Healthcare	3.0

RSCH 503	Research Methods and Biostatistics	3.0
RSCH 504	Evaluation and Translation of Health Research	3.0
Support Courses		
NURS 548	Advanced Pathophysiology	3.0
NURS 549	Advanced Pharmacology	3.0
NURS 550	Advanced Health Assessment & Diagnostic Reasoning	4.0
NURS 554	Pharmacology for Adult-Gerontology Acute Care Nurse Practitioners	3.0
NURS 664	Professional Issues for Nurse Practitioners	1.0
Clinical Courses		
NURS 570	Adult Gerontology Acute Care NP I: Introduction to Adult Gerontology Acute Care Medicine	5.0
NURS 571	Adult Gerontology Acute Care Nurse Practitioner II: Mgmt/Care of Patients in Acute/Crit Care Med Set	5.0
NURS 572	Adult Gerontology Acute Care Nurse Practitioner III: Mgmt/Care of Patients in Acute Surgical Setting	5.0
NURS 573	Adult Gerontology Acute Care NP IV: Management of Care of Patients in Critical Care Settings	5.0
NURS 580	Adult Gero Acute Care NP V: Mgmt/Care of Clients in Acute, Critical Care, Med or Surg Settings	5.0
Elective		3.0
Total Credits		57.0

Sample Plan of Study

MSN: Adult-Gerontology Primary Care Nurse Practitioner

Major: Nurse Practitioner, Adult-Gerontology Primary Care

Degree Awarded: Master of Science in Nursing (MSN)

Calendar Type: Quarter

Total Credit Hours: 52.0 quarter credits; 640 clinical hours

Co-op Option: None

Classification of Instructional Program (CIP) code: 51.3822

Standard Occupational Classification (SOC) code: 29-1171

About the Program

One of the major healthcare challenges of the 21st century will include the delivery of quality, comprehensive, cost effective care for a rapidly increasing number of older adults. With the elderly population in the U.S. expected to double, if not triple, by 2030 it is imperative that there is an educated workforce of health professionals able to deliver high-quality and appropriate care to the adult and older-adult population. In response to this need, Drexel University has developed an Adult-Gerontology Primary Care Nurse Practitioner (AGPC) program. The AGPC cares for individuals (aged 13 years and above) across the lifespan to promote maximal health, reduce risks and manage acute, chronic and complex health conditions. The AGPC is specifically trained to focus on health and wellness, disease prevention, and quality of life in the aging population. The purpose of our AGPC program is to educate and prepare competent and compassionate AGPC graduates to provide comprehensive, quality and cost effective care founded in evidence-based practice to adults across the lifespan on the continuum of health and illness. All graduates will be eligible to sit for the AANP and/or ANCC Adult Gerontology Primary Care Nurse Practitioner Board Certification examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulation, and evaluation. OCI visits occur 2-4 times during the clinical portion of

the program and range from 2-3 days. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab. These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

MSN: Clinical Nurse Leader Concentration

Major: Nursing: Clinical Nurse Leader Concentration

Degree Awarded: Master of Science in Nursing (MSN)

Calendar Type: Quarter

Total Credit Hours: 48.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.3801

Standard Occupational Classification (SOC) code: 29-1141

About the Program

The MSN Clinical Nurse Leader (CNL) track is designed to prepare nurses for an evolving advanced generalist role which incorporates advanced knowledge, skill, and clinical expertise in an evidence-and-quality-driven context. The CNL oversees care coordination of a distinct group of patients, is a resource for clinical decision making, and serves as lateral integrator of care. This clinical leader puts evidence-based practice into action to ensure that patients benefit from the latest innovations in care delivery. The CNL collects and evaluates patient outcomes, assess cohort risk, and has the decision-making authority to change care plans when necessary. This clinician functions as part of an interdisciplinary team by communicating, planning, and implementing care directly with other health care professionals including physicians, pharmacists, social workers, therapists, clinical nurse specialists, and nurse practitioners. The CNL is a leader in the health care delivery system across all settings in which health care is delivered. The program emphasizes the development of competencies related to the use of technology, evidence-based practice, customization of care, health team and interdisciplinary leadership, and outcome and risk assessment.

This online masters program prepares nurses to function effectively in a quickly changing, increasingly complex clinical care environment. Students have the opportunity to develop advanced competencies and depth of knowledge as clinical nurse leaders. The program emphasizes evidence-based approaches to solve clinical problems, assessment and evaluation of nursing and health care outcomes, clinical decision-making,

lateral care integration, clinically-based leadership and the design of nursing care for clinical populations at the clinical unit or similar small system level.

Clinical practicum experiences include development and management of a data driven project which provides opportunities for students to deepen evidenced base practice competencies in the management of clients' health care needs at the point-of-care. Precepted clinical experiences will include activities such as modeling of care, assessment and evaluation of aggregate patient outcomes, case management and service integration, unit and interdisciplinary team leadership, as well as teaching and mentoring of staff.

Full- and part-time enrollment options are available.

The program is accredited by the Commission on Collegiate Nursing Education.

Additional Information

For more information about this program, contact:

Mr. Redian Furxhiu
Student Services Manager
rf53@drexel.edu (fr53@drexel.edu)
267.359.5691

Additional information is also available on Drexel's College of Nursing and Health Professions MSN in Clinical Nurse Leader (<https://www.drexel.edu/cnhp/academics/graduate/MSN-Clinical-Nurse-Leader>) (<http://www.drexel.edu/gradnursing/msn/advancedRoleMSN/clinNurseLeader>) web page and on the Drexel University Online MSN Clinical Nurse Leader (<http://online.drexel.edu/online-degrees/nursing-degrees/msn-clinical>) web page.

Admission Requirements

- BSN from a program fully accredited by NLN and or CCNE.
- 3.0 or above on all previous coursework or the last 60 credits completed. Applications from RN's with GPA < 3.0 may be considered on an individual basis.
- Official transcripts from all previous educational institutions are required.
- Two professional references required from colleagues or supervisors who can attest to the applicant's knowledge, skill, and potential aptitude for graduate study.
- Personal Statement describing why the student is interested in this MSN Degree.
- Curriculum Vitae or Resume.
- Copy of Current US RN license required.
- Copies of any Advanced Practice Nursing Licensure and Certification Documents.
- While specific experience is not required for applicants to the track, previous related work experience may make an applicant more competitive.

International applicants must possess a BSN (or its equivalent) and current US RN license.

TOEFL Requirement

International Applicants, as well as Immigrants to the US and US Permanent Residents, whose native language is not English, and who have not received a Bachelor's degree or higher in the US, Australia,

Canada, Ireland, New Zealand or the United Kingdom, and must show proficiency in English speaking as well as listening, writing and reading. US citizens born on US military bases abroad may be waived from the TOEFL requirement after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

If you take the TOEFLiBT exam, you are required to have a minimum combined score for the listening, writing and reading sections of 79 Plus a speaking section score of 26 or higher.

If you take the TOEFL, you are required to have a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher.

Global Studies / Public Health Faculty

Amy Auchincloss, PhD, MPH (*University of Michigan*). Associate Professor. Department of Epidemiology and Biostatistics. Environmental determinants of health and the health effects of air pollution; contribution of resources in residential environments to health behaviors, obesity, diabetes and cardiovascular disease; the use of spatial analysis methods and agent-based mode

Sharrelle Barber, ScD, MPH (*Harvard T.H. Chan School of Public Health*). Assistant Research Professor. Racial/Ethnic Health Inequalities in Cardiovascular Disease; Social Determinants of Racial/Ethnic Health Inequalities in Cardiovascular Disease; Community-Engaged Research; Geography and Health; Multilevel Analysis; Spatial Analysis and GIS; Global Health; Urban Health

Scarlett Bellamy, ScD (*Harvard University*). Professor. Clinical Trials; Data Analysis Methods; Health Disparities; Infectious Disease; Mental health and Behavioral health; Reproductive or Sexual Health

Zekarias Berhane, PhD (*University of Pittsburgh*). Assistant Professor. Department of Epidemiology and Biostatistics. Modeling time-to-event data with single and multiple outcomes, mixed effect models and regression diagnostics.

Debjani Bhattacharyya, PhD (*Emory University*). Assistant Professor. Modern South Asian history; urban environmental history; history of economic thought; and post-colonial theory.

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; positive behavior interventions and supports (PBIS), response to intervention (RtI), systems-level change and performance feedback.

Sandra L. Bloom, MD (*Temple University School of Medicine*). Associate Professor. Department of Health Management and Policy. Psychological trauma and organizational stress.

Sherry Brand-Rauf, MPhil, JD (*Columbia University*). Associate Teaching Professor. Health Policy; Occupational Health; Environmental Exposures; Health Disparities; Public Health Law

Jennifer Breaux, DrPH, MPH, CHES (*Drexel University*). Assistant Teaching Professor. Maternal and child health, Child and maternal health, Community health, Human rights.

Darryl Brown, PhD (*Johns Hopkins University*). Assistant Teaching Professor. Department of Health Management and Policy. Health care research and planning; patient outcomes and applied health economic methods.

Robert J. Brulle, PhD (*George Washington University*). Professor. Environmental policy and politics, critical theory, marine risk, social movements, environmental sociology.

James W. Buehler, MD (*University of California, San Francisco*). Clinical Professor. Department of Health Management and Policy. Public health preparedness, e-health, health policy, building public health infrastructure and capacity, chronic diseases, behavioral health, data privacy, emergency preparedness and public health practice.

Igor Burstyn, PhD (*Utrecht University*). Associate Professor. Department of Environmental and Occupational Health. Occupational and environmental epidemiology, industrial hygiene, endocrine disruptors, environmental exposures, biomarkers, air quality, gene-environmental interaction, maternal and child health, Bayesian statistics, statistical modeling, etiology of autism.

Amy Carroll-Scott, PhD, MPH (*University of California at Los Angeles*). Assistant Professor. Asset mapping, Built environment, Chronic diseases, Community capacity building, Community health, Community health worker/promoters models, Community-based participatory research, Community resilience, Demography, Health disparities, Mixed methods, Neighborhood context, Obesity, School health, Social capital/social cohesion, Social determinants of health, Social epidemiology, Spatial data and analysis, Youth leadership development.

Esther Chernak, MD, MPH, FACP (*UMDNJ-Robert Wood Johnson Medical School*) Director of the Center for Public Health Readiness and Communication; Director of Joint Degree Programs. Associate Research Professor. Emergency preparedness, infectious disease, public health practice, crisis and emergency risk communication, medicine and public health.

Mariana Chilton, PhD, MPH (*University of Pennsylvania*) Director, Center for Hunger-Free Communities. Associate Professor. Department of Health Management and Policy. Nutrition, housing and health; chronic diseases; human rights, chronic diseases, community health, human rights and hunger.

Rebecca Clothey, PhD (*University of Pittsburgh*) Director, Global Studies major. Assistant Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

Theodore Corbin, MD, MPP (*Drexel University*) Joint Appointment between Dornsife School of Public Health and Drexel University College of Medicine. Associate Professor. Department of Health Management and Policy. Health policy; design of care systems; high risk youth; violence; healthcare services; injury prevention.

Anneclaire De Roos, PhD, MPH (*University of North Carolina at Chapel Hill*). Associate Professor. Department of Environmental and Occupational Health. Environmental and occupational epidemiology, exposure assessment, pesticides, persistent organic pollutants, drinking water quality, air pollution, urban environments, chemical risk assessment.

Ana Diez Roux, MD, PhD, MPH (*Johns Hopkins University*) Dean, Dornsife School of Public Health. Distinguished Professor. Department of Epidemiology and Biostatistics. Social determinants of health; neighborhoods and health; psychosocial factors; air pollution, cardiovascular disease epidemiology; multilevel and systems methods; urban health and health in Latin America.

Vincent Duclos, PhD (*University of Montreal*). Assistant Professor. Digital spaces/technologies; global health; development; and relations between India and Africa.

Mary Duden, MBA (*Drexel University*). Assistant Teaching Professor. Department of Health Management and Policy. Health care for the underserved and health disparities.

Jerome Dugan, PhD (*Rice University*) Primary appointment in Health Economics at the Drexel College of Nursing and Health Professions. Assistant Professor. Department of Health Management and Policy. Insurance markets and healthcare regulation.

Mary Ebeling, PhD (*University of Surrey*) Director, Women's and Gender Studies. Associate Professor. Science and technology studies; emerging technologies and biocapital; media and democratic cultures; radical social movements; sociology of markets; political sociology; and ethnographic methodologies.

Nancy Epstein, MPH, MAHL (*University of North Carolina at Chapel Hill*). Associate Professor. Health Disparities, Faith and Health.

Alison A. Evans, ScD (*Harvard University*). Associate Professor. Department of Epidemiology and Biostatistics. Epidemiology of infectious diseases and cancer; cohort studies; minority and immigrant health; chronic viral infections; hepatitis b; elimination of viral hepatitis; immunization; perinatal transmission.

Jerry Fagliano, MPH, PhD (*Johns Hopkins University*) Chair, Department of Environmental and Occupational Health. Associate Clinical Professor. Children's health and environmental exposures; health impacts of climate change; inequities in environmental exposure and disease; risks from transportation of hazardous materials; spatial distribution and clustering of disease.

Robert I. Field, PhD, JD, MPH (*Columbia University*) Joint Appointment in the Drexel University Kline School of Law. Professor. Health policy, public health law, health administration and management, public health ethics.

Janet Fleetwood, PhD, MPH (*University of Southern California*). Professor. Philosophy, bioethics, public health ethics, research ethics, social justice, ethical theory.

Dennis Gallagher, MA, MPA (*University of Pittsburgh*). Associate Teaching Professor. Department of Health Management and Policy. Health department structure and financing; health policy and law; Medicare/Medicaid and public health infrastructure.

Marla Gold, MD (*University of Medicine and Dentistry-New Jersey Medical School*) Dean Emerita. Professor. Department of Health Management and Policy. Design of HIV/AIDS care systems, treatment protocols, resource utilization, and epidemiology; CQI, managed care and systems of health care, health administration, behavioral health care and substance abuse treatment systems.

Neil Goldstein, PHD, MBI (*Drexel University, Oregon Health & Science University (OHSU) School of Medicine*). Assistant Research Professor. Data Analysis Methods; eHealth or mHealth; Infectious Disease; Maternal and Child Health; Reproductive or Sexual health; Spatial Analysis or GIS; Statistical Modeling; Vaccines and vaccinations; Electronic medical records/informatics; Translational epidemiology

Edward J. Gracely, PhD (*Temple University*) Joint Appointment in Drexel University College of Medicine. Associate Professor. Department of Epidemiology and Biostatistics. Statistics, experimental design/research methods and statistical analysis, clinical trials.

Ali Groves, PhD, MHS (*University of North Carolina; Johns Hopkins University*). Assistant Professor. Reproductive and Sexual Health, Maternal and Child Health, Global Health, Data Analysis Methods.

Jana A. Hirsch, PhD (*University of Michigan*). Assistant Research Professor. Health and place or built environment; health disparities; mental and behavioral health; urban health; active aging; age-friendly neighborhoods

Mary E. Hovinga, PhD, MPH (*University of Michigan*). Associate Professor. Department of Epidemiology and Biostatistics. Cancer, cognitive disabilities; PCBs and DDT, lead exposure; neurological disorders, environmental hazards, epidemiologic study design.

Tran Huynh, PhD, MPH, CIH (*University of Minnesota*). Assistant Professor. Community Engaged Research; Cardiovascular Disease; Statistical Modeling; Immigrant Health; Health Disparities; Occupational Health; Workplace Health Interventions; Industrial Hygiene; Bayesian Statistics; Exposure Assessment; Epidemiology

Gabriella Ibieta, PhD (*City University of New York*). Associate Professor. Comparative literature; Cuban and Latin American fiction.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Jessie Kemmick Pintor, PhD, MPH (*University of Minnesota*). Assistant Professor. Community-based participatory research; Immigrant health; Health disparities; Health services research; Health policy; Maternal & child health; Mixed methods; Immigration policy

Ann Klassen, PhD (*Johns Hopkins University*). Professor. HIV/AIDS, Food safety, Excess burden intervention, GIS-based and spatial analysis, Mixed methods, Qualitative methods, Social sciences.

Jennifer Kolker, MPH (*University of Michigan*) Associate Dean for Public Health Practice. Associate Clinical Professor. Department of Health Management and Policy. Maternal and child health; federally qualified health center program; urban health issues; health department structure and financing; health policy and law; legislative advocacy; Medicare/Medicaid; preterm birth; public health education and training; public health infrastructure; welfare economics; women's health.

Hiromi Koyama, MA (*Okayama University*). Teaching Instructor. Japanese language and literature; teaching writing; business Japanese; classical and modern Japanese literature

Shiriki Kumanyika, PhD, MS, MPH (*Cornell University; Columbia University; Johns Hopkins University*). Research Professor. Solutions to obesity and diet-related diseases in black Americans, 'Culture of health' approaches in black communities, Assessment of food environments, Environmental influences on lifestyle changes, Targeted marketing of unhealthy foods and beverages, Food and nutrition policy, Evidence-based public health, Nutrition epidemiologic methods, Social determinants of health and health equity, Systems science applications in public health.

Christopher A. Laincz, PhD (*Duke University*) Director, *LeBow College of Business PhD program*. Associate Professor. Economic development, technological change, and growth, industrial organization, macroeconomics and monetary economics.

Brent Langellier, PhD (*University of California, Los Angeles*). Assistant Professor. Department of Health Management and Policy. Health and health care disparities, Latino health, complex systems, quantitative methods, GIS.

Stephen E. Lankenau, PhD (*University of Maryland*). Professor. HIV/AIDS, Overdose prevention, Prescription drug misuse, Medical marijuana, Injection drug use, High risk youth, Homeless, Qualitative research.

Felice Le-Scherban, PhD, MPH (*University of Michigan*). Assistant Professor. Department of Epidemiology and Biostatistics. Life course approaches to socioeconomic, racial, and ethnic health disparities; social determinants of health among immigrants; causal links between education and health; analytic methods in social epidemiology.

Brian K. Lee, PhD (*Johns Hopkins University*). Associate Professor. Department of Epidemiology and Biostatistics. Environmental determinants and epidemiology of autism spectrum disorders; perinatal epidemiology; child and maternal health; neuropsychiatric epidemiology, causal inference; machine learning.

Nora L. Lee, PhD (*Johns Hopkins University*). Assistant Research Professor. Department of Epidemiology and Biostatistics. Perinatal epidemiology; preterm birth; infant mortality; autism spectrum disorders; maternal and child health; racial and ethnic health disparities; secondhand smoke; tobacco control; environmental exposures.

Longjian Liu, MD, PhD, MSc, FAHA (*The University of Hong Kong*). Associate Professor. Department of Epidemiology and Biostatistics. Pharmacoepidemiology; cardiovascular disease and diabetes epidemiology; drug-lifestyle interaction; environmental and global health disparities; hospital electronic health records for cardiovascular and diabetes risk assessment and prediction.

Gina Lovasi, PhD (*University of Washington*) Co-Director of the *Urban Health Collaborative*. Associate Professor. Cardiovascular Disease; Data Analysis Methods; Health and Place or Build Environment; Health Disparities; Spatial Analysis or GIS; Urban Health; Urban trees and greenspace; Local retail and urban design; Transportation, infrastructure and policies

Brent Luvaas, PhD (*UCLA*). Associate Professor. DIY and independent media production; transnational consumer culture; popular music; new media and mediated subjectivities; youth culture in the US and Indonesia.

Ilana Margolis Adjunct Professor.

Shannon Marquez, MEng, PhD (*University of North Carolina at Chapel Hill*) Director, *Office of Global Health*. Associate Professor. Department of Environmental and Occupational Health. Global health; water sanitation and hygiene; health disparities; environmental health.

Ana Martinez-Donate, PhD (*Universidad Autonoma de Madrid, Spain*). Associate Professor. HIV prevention, Tobacco control, Obesity prevention, Access to health services.

Philip Massey, PhD, MPH (*University of California, Los Angeles*). Assistant Professor. Digital Technologies in Public Health, Health Literacy, Health Communication, Global Health, Health Disparities, Health Promotion.

Nada Matta, PhD (*New York University*). Assistant Professor. Middle East Studies; political economy; social movements; gender studies; revolutions; inequality

Maria delacruz Matus-Mendoza, PhD (*Temple University*) Director of *Modern Languages*. Associate Professor. Spanish Linguistic variation in the US; the relationship between language variation and mobility (social and geographical) among the Mexican communities in Mexico and in the United States; second language acquisition; language variation in media.

Leslie McClure, PhD, MS (*University of Michigan*) Chair, *Department of Epidemiology and Biostatistics*. Professor. Design, management and analysis of randomized clinical trials; issues of multiplicity in clinical trials; environmental risk factors for cardiovascular disease and stroke; geographic and racial disparities in cardiovascular disease and stroke.

Ryan McKenna, PhD (*Stonybrook University*). Assistant Professor. Health disparities; Health economics; Health policy; Data analysis and methods; Statistical modeling; Health services research; Mental health and behavioral health

Usha Menon, PhD (*University of Chicago*). Professor. Self, identity & personhood, emotional functioning, Hindu morality, gender relations in Hindu society, adult development, popular Hinduism, post-colonial feminism, Hindu religious nationalism and Islamic radicalism.

Janel L. Mensinger, PhD (*City University of New York*) Director, *Biostatistics Service Center*. Associate Research Professor. Behavioral health promotion strategies, treating obesity, clinical research methods, statistics. Body perception, obesity and eating disorders.

Yvonne Michael, ScD (*Harvard School of Public Health*) Associate Dean for Academic and Faculty Affairs. Associate Professor. Department of Epidemiology and Biostatistics. Epidemiology of aging, social epidemiology, women's health, community-based participatory research; health disparities.

Amel Mili, PhD, JD (*Rutgers University, the University of Tunis*). Assistant Teaching Professor. The intersection between religion and law; gender and politics; constitutional transition; language education

Rogelio Minana, PhD (*Penn State*) *Department Head, Global Studies and Modern Languages*. Professor. The role of classic cultural icons, particularly Don Quixote, in 21st century political and social justice discourse; the interplay between the traditional humanities, youth organizations, and digital storytelling.

Craig J. Newschaffer, PhD (*Johns Hopkins University*) *Director, A.J. Drexel Autism Institute; Associate Dean for Research*. Professor. Department of Epidemiology and Biostatistics. Environmental determinants of autism spectrum disorders; gene-environment interaction; neurological disorders.

Joel E. Oestreich, PhD (*Brown University*) *Director of the Global Studies major*. Associate Professor. International organizations, international finance, development, and human rights.

Sunmi Oh, MA (*Graduate School of Hyosung Women's University*). Instructor.

Alex Ortega, PhD (*University of Michigan*) *Chair, Department of Health Management and Policy; Director, Center for Population Health and Community Impact*. Professor. Epidemiological methods in health services research; health needs of Latino children and families; health disparities intervention research; youth engagement in community interventions.

Ni Ou, MS (*University of Pennsylvania*). Assistant Teaching Professor. Chinese language grammar and writing; Chinese language pedagogy; intercultural communication

Jonathan Purtle, DRPH, MPH, MSC (*Drexel University*). Assistant Professor. Department of Health Management and Policy. Mental health policy and services research; policy dissemination and implementation research; traumatic stress in urban areas; trauma-informed system design; violence prevention; political institutions and health.

Harrison Quick, PhD (*University of Minnesota*). Assistant Professor. Occupational Health; Spatial Analysis or GIS; Statistical Modeling; Urban Health; Bayesian Inference; Data Confidentiality

Alex Quistberg, PhD (*University of Washington*). Assistant Research Professor. Data Analysis Methods; Global Health or International Health; Health and Place or Built Environment; Health Disparities; Spatial Analysis or GIS; Urban Health; Intentional/Violent Injury and Trauma; Unintentional Injury and Trauma

Rachel R. Reynolds, PhD (*University of Illinois at Chicago*). Associate Professor. Sociolinguistics, ethnography of communication, intercultural communication, globalization and the rhetoric of community, political economy of immigration, race and ethnicity, new African immigrants in the United States, Igbo studies.

John A. Rich, MD, MPH (*Duke University Medical School*) *Director, Center for Nonviolence and Social Justice*. Professor. Department of Health Management and Policy. Health disparities; men's health; violence; urban health issues; primary care.

Lucy Robinson, PhD (*Columbia University*). Assistant Professor. Department of Epidemiology and Biostatistics. Statistics, modeling and analysis of neuroimaging and CT image data, network modeling, spatio-temporal data, computational statistics, and functional data analysis.

John Rossi, VMD, MBE (*University of Pennsylvania*) *Director, M.S. in Public Health Ethics*. Assistant Professor. Public health ethics, research ethics, ethical theory, animal and environmental ethics, risk assessment and communication, public health history.

Alexis Roth, PhD, MPH (*Indiana University*). Assistant Professor. mHealth, Substance use, Reproductive or sexual health, Community engaged research, Infectious diseases, Health disparities, Urban health, Mixed methods, Women's health, Social determinants of health.

Leah Schinasi, PhD (*University of North Carolina*). Assistant Research Professor. Environmental Exposures; Cancer; Health and Place or Built Environment; Occupational Health; Urban Health; Community Based Participatory Research; Environmental Justice; Environmental Epidemiology; Climate Change

Simone Schlichting-Artur, EdD (*University of Pennsylvania*) *Senior Assistant Dean of Global Initiatives*. Teaching Professor. International business communication (Germany and the U.S.), public health policy and languages, German post-war history through film and literature, development of writing assessment tools for German minor.

Randall L. Sell, ScD (*Harvard University*). Associate Professor. Health Disparities, Experimental design/research methods, Gender and health, LGBT issues, Program evaluation, Survey methods.

Paul Shattuck, PhD (*University of Wisconsin-Madison*) *Director, Life Course Outcomes Research Program at the A.J. Drexel Autism Institute*. Associate Professor. Department of Health Management and Policy. Design and evaluation of services for people with disabilities; autism.

David Smith, PhD (*University of Michigan*). Research Professor. Health Administration and Management; Health Disparities; History of Public Health; Health Services Research; Health Policy; Spatial Analysis or GIS

Suruchi Sood, PhD (*University of New Mexico*). Associate Professor. Human rights and health, Nutrition, Poverty, Health Disparities, Innovation Diffusion, HIV/AIDS, Violence, Community-based participatory research, Application of statistics to behavioral, biological and medical sciences, Adolescent health, Child and maternal health, International health, Program evaluation, Women's health, Mixed methods, Qualitative methods.

Mark Stehr, PhD (*University of California at Berkeley*) *Interim Director, School of Economics*. Associate Professor. Health economics, health behaviors, public finance, public policy.

Thersa Sweet, PhD, MPH (*University of Michigan*). Assistant Professor. Department of Epidemiology and Biostatistics. Molecular and infectious disease epidemiology, including virology, cancer biology, hospital infection control and prevention; epidemiologic studies involving HIV risk in sexual minorities.

Loni Philip Tabb, PhD (*Harvard University*). Associate Professor. Department of Epidemiology and Biostatistics. Methods for categorical, missing and hierarchical data, spatial epidemiology/statistics.

Jennifer A. Taylor, PhD, MPH (*Johns Hopkins University*). Associate Professor. Department of Environmental and Occupational Health. Injury prevention, patient safety, healthcare quality, organizational culture, occupational safety, data policy and surveillance, first responders, healthcare workforce.

Renee M. Turchi, MD, MPH (*Johns Hopkins University*) *Joint appointment in the Drexel University College of Medicine*. Associate Professor. Health

care for children and youth with special health care needs, Child and maternal health.

Steve Vasquez Dolph, PhD (*University of Pennsylvania*). Assistant Teaching Professor. Early modern cultural production; ecology and representation; history and sociology of science; historical bibliography; politics and poetics of translation.

Nicole A. Vaughn, PhD (*Uniformed Services University*). Assistant Professor. Department of Health Management and Policy. Racial/ethnic disparities in health and health care; nutrition and chronic disease; community-based participatory research, community engagement dissemination and implementation research.

Augusta M. Villanueva, PhD (*University of Texas at Austin*). Associate Professor. Poverty, Health care for the underserved, Health Disparities, High risk youth, Urban health issues, Racial and ethnic disparities in health and health care, Community-based participatory research, Behavioral health, Community health, Immigrant communities, LGBT issues, Public health infrastructure, Qualitative research.

Sheldon Watts, PhD (*New York University*). Clinical Research Professor. Behavioral health; community engagement; community-based participatory research; chronic disease risk management; faith-based partnerships; health disparities; minority health; nutrition education; overweight/obesity prevention; participatory action research

Seth Welles, PhD, ScD (*Harvard University*). Professor. Department of Epidemiology and Biostatistics. Impact of HIV phenotypic and genotypic antiretroviral drug resistance on HIV disease progression and transmission; psychosocial risk for HIV infection and STDs among sexual minority adults and adolescents; correction of misclassification of sexuality and its impact on HIV/STI risk; surveys of sexual minority adults at community festivals and at health-clinics to assess demographic and psychosocial determinants of sexual risk-taking and HIV/STD infections; LGBT health disparities including excess risk for HIV and STIs, CVD and cancer; early life physical and sexual trauma, violence, mental health conditions and substance abuse.

Alden Young, PhD (*Princeton University*) *Director, Africana Studies*. Assistant Professor. African history; economic history and the history of Arab and African interactions.

Michael Yudell, MPH, PhD, MPhil (*Columbia University*) *Chair, Department of Community Health and Prevention*. Associate Professor. Public health genomics; bioethics; history of public health; addiction.

Issa Zakeri, PhD (*University of Illinois and Urbana-Champaign*). Professor. Department of Epidemiology and Biostatistics. Biostatistics, functional data analysis, longitudinal data analysis, multivariate analysis, statistical learning.

Emeritus Faculty

Raymond K. Lum, MPhil, MS (*University of Pennsylvania*) *Director of E-Learning*. Associate Teaching Professor Emeritus. Department of Health Management and Policy. Asian health; change management; e-health; health disparities; innovation diffusion; organization learning theory.

Marcia Polansky, ScD (*Harvard School of Public Health*). Associate Professor Emeritus. Statistics; Clinical trials; Chronic diseases; Epidemiology; Social and Psychiatric

MSN: Clinical Trials Research Concentration

Major: Clinical Trials Research

Degree Awarded: Master of Science in Nursing (MSN)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.3801

Standard Occupational Classification (SOC) code: 29-1141

About the Program

The Online Clinical Trials Research Program is designed for nurses who wish to be involved in clinical trials and research in a variety of roles and settings. Graduates of this program will be qualified to assume roles such as research coordinator, clinical scientist, developer and clinical trials manager or coordinator.

The program provides knowledge and skills in several critical areas:

- Applying Federal Drug Administration rules and regulations
- Phases of clinical research investigation
- New drug-approval processes
- Drug protocol development
- Budgeting for clinical trials
- Informed consent
- Patient and family issues
- Business management and marketing for clinical trials

The clinical trials field is a hot field for nursing employment — especially seasoned nurses who have expertise in one or more clinical areas. Many potential employers exist outside the hospital environment — in the community or private practices, with the pharmaceutical and other scientific companies that produce, test, and market new products.

Full- and part-time enrollment options are available. The program is accredited by the Commission on Collegiate Nursing Education (CCNE).

Additional Information

For more information about this program, contact:

Mr. Redian Furxhiu
Student Services Manager
rf53@drexel.edu (fr53@drexel.edu)
267.359.5691

Additional information is also available on Drexel's College of Nursing and Health Professions MSN in Clinical Trials Research (<https://www.drexel.edu/cnhp/academics/graduate/MSN-Clinical-Trials-Research>) web page and on the Drexel University Online MSN in Clinical Trials Research (<http://online.drexel.edu/online-degrees/nursing-degrees/msn-trials>) web page.

Admission Requirements

- BSN from a program fully accredited by NLN and or CCNE.
- 3.0 or above on all previous coursework or the last 60 credits completed. Applications from RN's with GPA < 3.0 may be considered on an individual basis.

- Official transcripts from all previous educational institutions are required.
- Two professional references required from colleagues or supervisors who can attest to the applicant's knowledge, skill, and potential aptitude for graduate study.
- Personal Statement describing why the student is interested in this MSN Degree.
- Curriculum Vitae or Resume.
- Copy of Current US RN license required.
- Copies of any Advanced Practice Nursing Licensure and Certification Documents.
- While specific experience is not required for applicants to the track, previous related work experience may make an applicant more competitive.

International applicants must possess a BSN (or its equivalent) and current US RN license.

TOEFL Requirement

International Applicants, as well as Immigrants to the US and US Permanent Residents, whose native language is not English, and who have not received a Bachelor's degree or higher in the US, Australia, Canada, Ireland, New Zealand or the United Kingdom, and must show proficiency in English speaking as well as listening, writing and reading. US citizens born on US military bases abroad may be waived from the TOEFL requirement after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

If you take the TOEFLiBT exam, you are required to have a minimum combined score for the listening, writing and reading sections of 79 Plus a speaking section score of 26 or higher.

If you take the TOEFL, you are required to have a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher.

Additional Information

For more information about this program, contact:

Mr. Redian Furxhiu
 Student Services Manager

 267-359-5691

Additional information is also available on Drexel University's College of Nursing and Health Professions MSN in Clinical Trials Research (<http://drexel.edu/cnhp/academics/graduate/MSN-Clinical-Trials-Research>) web page and on the Drexel University Online's MSN in Clinical Trials Research (<https://online.drexel.edu/online-degrees/nursing-degrees/msn-trials>) web page.

Degree Requirements

The curriculum is based on the following principles:

- All areas of specialization have in common a core of advanced nursing knowledge.
- Every graduate must have knowledge and skill in research and the ability to evaluate and apply research findings.
- The nursing profession anticipates and responds to changing societal, health care and professional needs.

- The foundation for specialization in professional nursing practice is graduate-level education that builds on undergraduate education.

Core Courses

NURS 500 [WI]	Confronting Issues in Contemporary Health Care Environments	3.0
NURS 502	Advanced Ethical Decision Making in Health Care	3.0
NURS 544	Quality and Safety in Healthcare	3.0
RSCH 503	Research Methods and Biostatistics	3.0
RSCH 504	Evaluation and Translation of Health Research	3.0

Major Courses

NURS 582	Foundation of Good Clinical Practice in Clinical Trials Mngmt	3.0
NURS 583	Operational Leadership in Clinical Trials Management	3.0
NURS 584	Current Topics in Clinical Trials	3.0
NURS 585	Clinical Trials Research Practicum	5.0

Support Courses

NURS 548	Advanced Pathophysiology	3.0
NURS 549	Advanced Pharmacology	3.0
NURS 550	Advanced Health Assessment & Diagnostic Reasoning	4.0
NURS 557	Leadership and Stewardship in the Health Professions	3.0

Elective		3.0
Total Credits		45.0

Additional Information

For more information about this program, contact:

Mr. Redian Furxhiu
 Student Services Manager
 rf53@drexel.edu (fr53@drexel.edu)
 267.359.5691

Additional information is also available on Drexel's College of Nursing and Health Professions MSN in Clinical Trials Research (<https://www.drexel.edu/cnhp/academics/graduate/MSN-Clinical-Trials-Research>) web page and on Drexel University Online's MSN in Clinical Trials Research (<http://www.drexel.com/online-degrees/nursing-degrees/msn-trials>) web page.

Sample Plan of Study

First Year

Term 1		Credits
NURS 500 [WI]	Confronting Issues in Contemporary Health Care Environments	3.0
NURS 557	Leadership and Stewardship in the Health Professions	3.0
Term Credits		6.0

Term 2

NURS 502	Advanced Ethical Decision Making in Health Care	3.0
NURS 548	Advanced Pathophysiology	3.0
Term Credits		6.0

Term 3

NURS 544	Quality and Safety in Healthcare	3.0
NURS 549	Advanced Pharmacology	3.0
Term Credits		6.0

Term 4

NURS 550	Advanced Health Assessment & Diagnostic Reasoning	4.0
Term Credits		4.0

Second Year

Term 5		
NURS 582	Foundation of Good Clinical Practice in Clinical Trials Mngmt	3.0

RSCH 503	Research Methods and Biostatistics	3.0
	Term Credits	6.0
Term 6		
NURS 583	Operational Leadership in Clinical Trials Management	3.0
RSCH 504	Evaluation and Translation of Health Research	3.0
	Term Credits	6.0
Term 7		
NURS 584	Current Topics in Clinical Trials	3.0
	Elective	3.0
	Term Credits	6.0
Term 8		
NURS 585	Clinical Trials Research Practicum	5.0
	Term Credits	5.0

Total Credit: 45.0

MPH/MBA Faculty

Orakwue B. Arinze, PhD (*London School of Economics*). Professor. Client/Server computing; Enterprise Application Software (EAS)/Enterprise Resource Planning Software (ERP); knowledge-based and decision support applications in operations management.

Amy Auchincloss, PhD, MPH (*University of Michigan*). Associate Professor. Department of Epidemiology and Biostatistics. Environmental determinants of health and the health effects of air pollution; contribution of resources in residential environments to health behaviors, obesity, diabetes and cardiovascular disease; the use of spatial analysis methods and agent-based mode

Avijit Banerjee, PhD (*The Ohio State University*) *Department of Decision Sciences*. Professor. Interface with Marketing, Pricing Revenue Management, Inventory Control, Operations Planning and Scheduling, Production Planning and Control, Supply Chain Management

Sharrelle Barber, ScD, MPH (*Harvard T.H. Chan School of Public Health*). Assistant Research Professor. Racial/Ethnic Health Inequalities in Cardiovascular Disease; Social Determinants of Racial/Ethnic Health Inequalities in Cardiovascular Disease; Community-Engaged Research; Geography and Health; Multilevel Analysis; Spatial Analysis and GIS; Global Health; Urban Health

Scarlett Bellamy, ScD (*Harvard University*). Professor. Clinical Trials; Data Analysis Methods; Health Disparities; Infectious Disease; Mental health and Behavioral health; Reproductive or Sexual Health

Zekarias Berhane, PhD (*University of Pittsburgh*). Assistant Professor. Department of Epidemiology and Biostatistics. Modeling time-to-event data with single and multiple outcomes, mixed effect models and regression diagnostics.

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; positive behavior interventions and supports (PBIS), response to intervention (Rti), systems-level change and performance feedback.

Sandra L. Bloom, MD (*Temple University School of Medicine*). Associate Professor. Department of Health Management and Policy. Psychological trauma and organizational stress.

Sherry Brand-Rauf, MPhil, JD (*Columbia University*). Associate Teaching Professor. Health Policy; Occupational Health; Environmental Exposures; Health Disparities; Public Health Law

Jennifer Breaux, DrPH, MPH, CHES (*Drexel University*). Assistant Teaching Professor. Maternal and child health, Child and maternal health, Community health, Human rights.

Darryl Brown, PhD (*Johns Hopkins University*). Assistant Teaching Professor. Department of Health Management and Policy. Health care research and planning; patient outcomes and applied health economic methods.

James W. Buehler, MD (*University of California, San Francisco*). Clinical Professor. Department of Health Management and Policy. Public health preparedness, e-health, health policy, building public health infrastructure and capacity, chronic diseases, behavioral health, data privacy, emergency preparedness and public health practice.

Igor Burstyn, PhD (*Utrecht University*). Associate Professor. Department of Environmental and Occupational Health. Occupational and environmental epidemiology, industrial hygiene, endocrine disruptors, environmental exposures, biomarkers, air quality, gene-environmental interaction, maternal and child health, Bayesian statistics, statistical modeling, etiology of autism.

Amy Carroll-Scott, PhD, MPH (*University of California at Los Angeles*). Assistant Professor. Asset mapping, Built environment, Chronic diseases, Community capacity building, Community health, Community health worker/promoters models, Community-based participatory research, Community resilience, Demography, Health disparities, Mixed methods, Neighborhood context, Obesity, School health, Social capital/social cohesion, Social determinants of health, Social epidemiology, Spatial data and analysis, Youth leadership development.

Suresh Chandran, PhD (*Vanderbilt University*). Associate Clinical Professor. Corporate entrepreneurship; corporate social responsibility; global management; intellectual property and employee rights; Sustainability; Technological Innovation.

Esther Chernak, MD, MPH, FACP (*UMDNJ-Robert Wood Johnson Medical School*) *Director of the Center for Public Health Readiness and Communication; Director of Joint Degree Programs*. Associate Research Professor. Emergency preparedness, infectious disease, public health practice, crisis and emergency risk communication, medicine and public health.

Mariana Chilton, PhD, MPH (*University of Pennsylvania*) *Director, Center for Hunger-Free Communities*. Associate Professor. Department of Health Management and Policy. Nutrition, housing and health; chronic diseases; human rights, chronic diseases, community health, human rights and hunger.

Theodore Corbin, MD, MPP (*Drexel University*) *Joint Appointment between Dornsife School of Public Health and Drexel University College of Medicine*. Associate Professor. Department of Health Management and Policy. Health policy; design of care systems; high risk youth; violence; healthcare services; injury prevention.

Lauren D'Innocenzo, PhD (*University of Connecticut*). Assistant Professor. Groups/Teams; Multi-Level Modeling; Shared Leadership.

Anneclaire De Roos, PhD, MPH (*University of North Carolina at Chapel Hill*). Associate Professor. Department of Environmental and Occupational Health. Environmental and occupational epidemiology, exposure assessment, pesticides, persistent organic pollutants, drinking water quality, air pollution, urban environments, chemical risk assessment.

Pia DiGirolamo, PhD (*Purdue University*). Assistant Clinical Professor. Macroeconomics, international finance.

Ana Diez Roux, MD, PhD, MPH (*Johns Hopkins University*) *Dean, Dornsife School of Public Health*. Distinguished Professor. Department of Epidemiology and Biostatistics. Social determinants of health; neighborhoods and health; psychosocial factors; air pollution, cardiovascular disease epidemiology; multilevel and systems methods; urban health and health in Latin America.

Boryana Dimitrova, PhD (*Drexel University*). Assistant Clinical Professor. Global marketing, inter-organizational, marketing channels, retailing and retail management.

Mary Duden, MBA (*Drexel University*). Assistant Teaching Professor. Department of Health Management and Policy. Health care for the underserved and health disparities.

Jerome Dugan, PhD (*Rice University*) *Primary appointment in Health Economics at the Drexel College of Nursing and Health Professions*. Assistant Professor. Department of Health Management and Policy. Insurance markets and healthcare regulation.

Nancy Epstein, MPH, MAHL (*University of North Carolina at Chapel Hill*). Associate Professor. Health Disparities, Faith and Health.

Alison A. Evans, ScD (*Harvard University*). Associate Professor. Department of Epidemiology and Biostatistics. Epidemiology of infectious diseases and cancer; cohort studies; minority and immigrant health; chronic viral infections; hepatitis b; elimination of viral hepatitis; immunization; perinatal transmission.

Jerry Fagliano, MPH, PhD (*Johns Hopkins University*) *Chair, Department of Environmental and Occupational Health*. Associate Clinical Professor. Children's health and environmental exposures; health impacts of climate change; inequities in environmental exposure and disease; risks from transportation of hazardous materials; spatial distribution and clustering of disease.

Robert I. Field, PhD, JD, MPH (*Columbia University*) *Joint Appointment in the Drexel University Kline School of Law*. Professor. Health policy, public health law, health administration and management, public health ethics.

Janet Fleetwood, PhD, MPH (*University of Southern California*). Professor. Philosophy, bioethics, public health ethics, research ethics, social justice, ethical theory.

Arthur L. Frank, MD, PhD (*City University of New York*) *Chair Emeritus*. Professor. Department of Environmental and Occupational Health. Environmental and occupational health, agricultural safety and health, pneumoconiosis, occupational toxicology, environmental pollution.

Christopher Gaffney, PhD (*Rutgers University, New Brunswick*). Assistant Clinical Professor. Applied Probability, Decision Theory, Risk Analysis

Dennis Gallagher, MA, MPA (*University of Pittsburgh*). Associate Teaching Professor. Department of Health Management and Policy. Health department structure and financing; health policy and law; Medicare/Medicaid and public health infrastructure.

Pamela Geller, PhD (*Kent State University*). Associate Professor. Stressful life events and physical and mental health outcomes, particularly in the area of women's reproductive health (e.g. pregnancy, pregnancy loss, infertility, medical education).

Marla Gold, MD (*University of Medicine and Dentistry-New Jersey Medical School*) *Dean Emerita*. Professor. Department of Health Management and Policy. Design of HIV/AIDS care systems, treatment protocols, resource utilization, and epidemiology; CQI, managed care and systems of health care, health administration, behavioral health care and substance abuse treatment systems.

Neil Goldstein, PHD, MBI (*Drexel University, Oregon Health & Science University (OHSU) School of Medicine*). Assistant Research Professor. Data Analysis Methods; eHealth or mHealth; Infectious Disease; Maternal and Child Health; Reproductive or Sexual health; Spatial Analysis or GIS; Statistical Modeling; Vaccines and vaccinations; Electronic medical records/informatics; Translational epidemiology

Cuneyt Gozu, PhD (*University of Albany*). Associate Clinical Professor. Attitudes; Groups/Teams; Leadership; Motivation; Power and Influence

Edward J. Gracely, PhD (*Temple University*) *Joint Appointment in Drexel University College of Medicine*. Associate Professor. Department of Epidemiology and Biostatistics. Statistics, experimental design/research methods and statistical analysis, clinical trials.

Ali Groves, PhD, MHS (*University of North Carolina; Johns Hopkins University*). Assistant Professor. Reproductive and Sexual Health, Maternal and Child Health, Global Health, Data Analysis Methods.

Jana A. Hirsch, PhD (*University of Michigan*). Assistant Research Professor. Health and place or built environment; health disparities; mental and behavioral health; urban health; active aging; age-friendly neighborhoods

Mary E. Hovinga, PhD, MPH (*University of Michigan*). Associate Professor. Department of Epidemiology and Biostatistics. Cancer, cognitive disabilities; PCBs and DDT, lead exposure; neurological disorders, environmental hazards, epidemiologic study design.

Michael Howley, PhD (*Arizona State University*). Clinical Professor. Investments in dissatisfied customers, service recovery, health-care marketing, marketing of service organizations, financial consequences of marketing actions.

Tran Huynh, PhD, MPH, CIH (*University of Minnesota*). Assistant Professor. Community Engaged Research; Cardiovascular Disease; Statistical Modeling; Immigrant Health; Health Disparities; Occupational Health; Workplace Health Interventions; Industrial Hygiene; Bayesian Statistics; Exposure Assessment; Epidemiology

Jessie Kemmick Pintor, PhD, MPH (*University of Minnesota*). Assistant Professor. Community-based participatory research; Immigrant health; Health disparities; Health services research; Health policy; Maternal & child health; Mixed methods; Immigration policy

Natalya V. Khimich, PhD (*University of California at Berkeley*). Assistant Professor. Equity valuation, earnings quality, and accounting for innovation and intangible assets.

Ann Klassen, PhD (*Johns Hopkins University*). Professor. HIV/AIDS, Food safety, Excess burden intervention, GIS-based and spatial analysis, Mixed methods, Qualitative methods, Social sciences.

Jennifer Kolker, MPH (*University of Michigan*) *Associate Dean for Public Health Practice*. Associate Clinical Professor. Department of Health Management and Policy. Maternal and child health; federally qualified health center program; urban health issues; health department structure and financing; health policy and law; legislative advocacy; Medicare/

Medicaid; preterm birth; public health education and training; public health infrastructure; welfare economics; women's health.

Shiriki Kumanyika, PhD, MS, MPH (*Cornell University; Columbia University; Johns Hopkins University*). Research Professor. Solutions to obesity and diet-related diseases in black Americans, 'Culture of health' approaches in black communities, Assessment of food environments, Environmental influences on lifestyle changes, Targeted marketing of unhealthy foods and beverages, Food and nutrition policy, Evidence-based public health, Nutrition epidemiologic methods, Social determinants of health and health equity, Systems science applications in public health.

David Kurz, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Business Education; Groups/Teams; Leadership; Supply Chain Leadership.

Brent Langellier, PhD (*University of California, Los Angeles*). Assistant Professor. Department of Health Management and Policy. Health and health care disparities, Latino health, complex systems, quantitative methods, GIS.

Stephen E. Lankenau, PhD (*University of Maryland*). Professor. HIV/AIDS, Overdose prevention, Prescription drug misuse, Medical marijuana, Injection drug use, High risk youth, Homeless, Qualitative research.

Felice Le-Scherban, PhD, MPH (*University of Michigan*). Assistant Professor. Department of Epidemiology and Biostatistics. Life course approaches to socioeconomic, racial, and ethnic health disparities; social determinants of health among immigrants; causal links between education and health; analytic methods in social epidemiology.

Brian K. Lee, PhD (*Johns Hopkins University*). Associate Professor. Department of Epidemiology and Biostatistics. Environmental determinants and epidemiology of autism spectrum disorders; perinatal epidemiology; child and maternal health; neuropsychiatric epidemiology, causal inference; machine learning.

Nora L. Lee, PhD (*Johns Hopkins University*). Assistant Research Professor. Department of Epidemiology and Biostatistics. Perinatal epidemiology; preterm birth; infant mortality; autism spectrum disorders; maternal and child health; racial and ethnic health disparities; secondhand smoke; tobacco control; environmental exposures.

Johnny Lee, PhD (*University of Utah*). Associate Clinical Professor. Accounting information systems; E-business; Managerial accounting; Supply chain management

Benjamin Lev, PhD (*Case Western Reserve University*). Trustee Professor. Inventory Control, Mathematical Programming, Operations Planning and Scheduling.

Merrill W. Liechty, PhD (*Duke University*). Clinical Professor. Bayesian statistics, portfolio selection, higher moment estimation, higher moment estimation, Markov Chain Monte Carlo

Longjian Liu, MD, PhD, MSc, FAHA (*The University of Hong Kong*). Associate Professor. Department of Epidemiology and Biostatistics. Pharmacoepidemiology; cardiovascular disease and diabetes epidemiology; drug-lifestyle interaction; environmental and global health disparities; hospital electronic health records for cardiovascular and diabetes risk assessment and prediction.

Gina Lovasi, PhD (*University of Washington*) Co-Director of the *Urban Health Collaborative*. Associate Professor. Cardiovascular Disease; Data Analysis Methods; Health and Place or Build Environment; Health

Disparities; Spatial Analysis or GIS; Urban Health; Urban trees and greenspace; Local retail and urban design; Transportation, infrastructure and policies

Dali Ma, PhD (*University of Chicago*). Associate Professor. Social hierarchy; Social networks; Sociology of entrepreneurship; Sociology of transitional China

Shannon Marquez, MEng, PhD (*University of North Carolina at Chapel Hill*) Director, Office of Global Health. Associate Professor. Department of Environmental and Occupational Health. Global health; water sanitation and hygiene; health disparities; environmental health.

Ana Martinez-Donate, PhD (*Universidad Autonoma de Madrid, Spain*). Associate Professor. HIV prevention, Tobacco control, Obesity prevention, Access to health services.

Philip Massey, PhD, MPH (*University of California, Los Angeles*). Assistant Professor. Digital Technologies in Public Health, Health Literacy, Health Communication, Global Health, Health Disparities, Health Promotion.

Leslie McClure, PhD, MS (*University of Michigan*) Chair, Department of Epidemiology and Biostatistics. Professor. Design, management and analysis of randomized clinical trials; issues of multiplicity in clinical trials; environmental risk factors for cardiovascular disease and stroke; geographic and racial disparities in cardiovascular disease and stroke.

Bruce D. McCullough, PhD (*University of Texas Austin*). Professor. Applied Econometrics, Data Mining, Econometric Techniques, Reliability of Statistical and Econometric Software.

Ryan McKenna, PhD (*Stonybrook University*). Assistant Professor. Health disparities; Health economics; Health policy; Data analysis and methods; Statistical modeling; Health services research; Mental health and behavioral health

Janell L. Mensinger, PhD (*City University of New York*) Director, Biostatistics Service Center. Associate Research Professor. Behavioral health promotion strategies, treating obesity, clinical research methods, statistics. Body perception, obesity and eating disorders.

Yvonne Michael, ScD (*Harvard School of Public Health*) Associate Dean for Academic and Faculty Affairs. Associate Professor. Department of Epidemiology and Biostatistics. Epidemiology of aging, social epidemiology, women's health, community-based participatory research; health disparities.

Jana M. Mossey, PhD, MPH, MSN (*University of North Carolina at Chapel Hill*). Professor. Department of Epidemiology and Biostatistics. Epidemiological methods; research design and methods including observational and clinical trials research; psychosocial aspects of health; epidemiology of aging and pain, psychiatric epidemiology including major depression; sub-threshold and minor depression.

Vadake Narayanan, PhD (*University of Pittsburgh*) Delloitte Touche Jones Stubbs Professor. Cognition and Strategy; Corporate Entrepreneurship; Organization design

Gordian Ndubizu, PhD (*Temple University*). Professor. Financial accounting.

Craig J. Newschaffer, PhD (*Johns Hopkins University*) Director, A.J. Drexel Autism Institute; Associate Dean for Research. Professor. Department of Epidemiology and Biostatistics. Environmental

determinants of autism spectrum disorders; gene-environment interaction; neurological disorders.

Alex Ortega, PhD (*University of Michigan*) Chair, Department of Health Management and Policy; Director, Center for Population Health and Community Impact. Professor. Epidemiological methods in health services research; health needs of Latino children and families; health disparities intervention research; youth engagement in community interventions.

Jonathan Purtle, DRPH, MPH, MSC (*Drexel University*). Assistant Professor. Department of Health Management and Policy. Mental health policy and services research; policy dissemination and implementation research; traumatic stress in urban areas; trauma-informed system design; violence prevention; political institutions and health.

Harrison Quick, PhD (*University of Minnesota*). Assistant Professor. Occupational Health; Spatial Analysis or GIS; Statistical Modeling; Urban Health; Bayesian Inference; Data Confidentiality

Alex Quistberg, PhD (*University of Washington*). Assistant Research Professor. Data Analysis Methods; Global Health or International Health; Health and Place or Built Environment; Health Disparities; Spatial Analysis or GIS; Urban Health; Intentional/Violent Injury and Trauma; Unintentional Injury and Trauma

Matthew Reindorp, PhD (*University of Maryland*). Associate Clinical Professor. Supply Chain Finance; Supply Chain Management; Stochastic Processes; Simulation; Real options

Christian Resick, PhD (*Wayne State University*). Associate Professor. Groups/Teams; Leadership; Organizational Culture and Fit; Personality.

John A. Rich, MD, MPH (*Duke University Medical School*) Director, Center for Nonviolence and Social Justice. Professor. Department of Health Management and Policy. Health disparities; men's health; violence; urban health issues; primary care.

Lucy Robinson, PhD (*Columbia University*). Assistant Professor. Department of Epidemiology and Biostatistics. Statistics, modeling and analysis of neuroimaging and CT image data, network modeling, spatio-temporal data, computational statistics, and functional data analysis.

John Rossi, VMD, MBE (*University of Pennsylvania*) Director, M.S. in Public Health Ethics. Assistant Professor. Public health ethics, research ethics, ethical theory, animal and environmental ethics, risk assessment and communication, public health history.

Alexis Roth, PhD, MPH (*Indiana University*). Assistant Professor. mHealth, Substance use, Reproductive or sexual health, Community engaged research, Infectious diseases, Health disparities, Urban health, Mixed methods, Women's health, Social determinants of health.

Leah Schinasi, PhD (*University of North Carolina*). Assistant Research Professor. Environmental Exposures; Cancer; Health and Place or Built Environment; Occupational Health; Urban Health; Community Based Participatory Research; Environmental Justice; Environmental Epidemiology; Climate Change

Randall L. Sell, ScD (*Harvard University*). Associate Professor. Health Disparities, Experimental design/research methods, Gender and health, LGBT issues, Program evaluation, Survey methods.

Paul Shattuck, PhD (*University of Wisconsin-Madison*) Director, Life Course Outcomes Research Program at the A.J. Drexel Autism Institute.

Associate Professor. Department of Health Management and Policy. Design and evaluation of services for people with disabilities; autism.

Wenjing Shen, PhD (*University of Michigan*). Associate Professor. The interface of operations management and marketing; inventory management; supply chain management.

David Smith, PhD (*University of Michigan*). Research Professor. Health Administration and Management; Health Disparities; History of Public Health; Health Services Research; Health Policy; Spatial Analysis or GIS

Suruchi Sood, PhD (*University of New Mexico*). Associate Professor. Human rights and health, Nutrition, Poverty, Health Disparities, Innovation Diffusion, HIV/AIDS, Violence, Community-based participatory research, Application of statistics to behavioral, biological and medical sciences, Adolescent health, Child and maternal health, International health, Program evaluation, Women's health, Mixed methods, Qualitative methods.

Prashant Srivastava, PhD (*Oklahoma State University*) Department of Marketing. Associate Clinical Professor. New product development, supply chain management, B2B marketing, sales, strategic alliances, organizational learning, market orientation, healthcare marketing, and database marketing.

Mark Stehr, PhD (*University of California at Berkeley*) Interim Director, School of Economics. Associate Professor. Health economics, health behaviors, public finance, public policy.

Theresa Sweet, PhD, MPH (*University of Michigan*). Assistant Professor. Department of Epidemiology and Biostatistics. Molecular and infectious disease epidemiology, including virology, cancer biology, hospital infection control and prevention; epidemiologic studies involving HIV risk in sexual minorities.

Loni Philip Tabb, PhD (*Harvard University*). Associate Professor. Department of Epidemiology and Biostatistics. Methods for categorical, missing and hierarchical data, spatial epidemiology/statistics.

Jennifer A. Taylor, PhD, MPH (*Johns Hopkins University*). Associate Professor. Department of Environmental and Occupational Health. Injury prevention, patient safety, healthcare quality, organizational culture, occupational safety, data policy and surveillance, first responders, healthcare workforce.

Renee M. Turchi, MD, MPH (*Johns Hopkins University*) Joint appointment in the Drexel University College of Medicine. Associate Professor. Health care for children and youth with special health care needs, Child and maternal health.

Daniel Tzabbar, PhD (*University of Toronto*). Associate Professor. Accessing and managing knowledge; Alliances; Human capital; Organizational learning and change; Social Capital; Technology Entrepreneurship; Technology Innovation

Nicole A. Vaughn, PhD (*Uniformed Services University*). Assistant Professor. Department of Health Management and Policy. Racial/ethnic disparities in health and health care; nutrition and chronic disease; community-based participatory research, community engagement dissemination and implementation research.

Augusta M. Villanueva, PhD (*University of Texas at Austin*). Associate Professor. Poverty, Health care for the underserved, Health Disparities, High risk youth, Urban health issues, Racial and ethnic disparities in health and health care, Community-based participatory research,

Behavioral health, Community health, Immigrant communities, LGBT issues, Public health infrastructure, Qualitative research.

Sheldon Watts, PhD (*New York University*). Clinical Research Professor. Behavioral health; community engagement; community-based participatory research; chronic disease risk management; faith-based partnerships; health disparities; minority health; nutrition education; overweight/obesity prevention; participatory action research

Seth Welles, PhD, ScD (*Harvard University*). Professor. Department of Epidemiology and Biostatistics. Impact of HIV phenotypic and genotypic antiretroviral drug resistance on HIV disease progression and transmission; psychosocial risk for HIV infection and STDs among sexual minority adults and adolescents; correction of misclassification of sexuality and its impact on HIV/STI risk; surveys of sexual minority adults at community festivals and at health-clinics to assess demographic and psychosocial determinants of sexual risk-taking and HIV/STD infections; LGBT health disparities including excess risk for HIV and STIs, CVD and cancer; early life physical and sexual trauma, violence, mental health conditions and substance abuse.

Issa Zakeri, PhD (*University of Illinois and Urbana-Champaign*). Professor. Department of Epidemiology and Biostatistics. Biostatistics, functional data analysis, longitudinal data analysis, multivariate analysis, statistical learning.

Emeritus Faculty

Raymond K. Lum, MPhil, MS (*University of Pennsylvania*) *Director of E-Learning*. Associate Teaching Professor Emeritus. Department of Health Management and Policy. Asian health; change management; e-health; health disparities; innovation diffusion; organization learning theory.

Marcia Polansky, ScD (*Harvard School of Public Health*). Associate Professor Emeritus. Statistics; Clinical trials; Chronic diseases; Epidemiology; Social and Psychiatric

MSN: Family/Individual Across the Lifespan Nurse Practitioner

Major: Nurse Practitioner, Family/Individual Across the Lifespan

Degree Awarded: Master of Science in Nursing (MSN)

Calendar Type: Quarter

Total Credit Hours: 56.0 quarter credits; 720 clinical hours

Co-op Option: None

Classification of Instructional (CIP) code: 51.3801

Standard Occupational Classification (SOC) code: 29-1171

About the Program

The Family/Individual Across the Lifespan Nurse Practitioner (FNP) online program focuses on the application of advanced-practice nursing knowledge—including physical, psychosocial, and environmental assessment skills—to manage common health and illness problems of clients of all ages and their families. It emphasizes health promotion and disease prevention. Family nurse practitioners primarily practice in ambulatory-care settings, such as primary care clinics, physician offices, HMOs, outpatient clinics, schools, nursing centers, emergency departments, long-term care facilities, industry, the armed services, public health departments, correctional institutions, and home health agencies. Graduates of the program are eligible to sit for the ANCC's

Family Nurse Practitioner Examination and/or the AANP's Family Nurse Practitioner Examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulation, and evaluation. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab. These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

For more information about this program, visit Drexel's MSN Nurse Practitioner Programs (<http://drexel.edu/cnhp/academics/graduate/MSN-Nurse-Practitioner-Family-Individual-Across-Lifespan>) web page.

Degree Requirements

Master of Science in Nursing (MSN): 56.0 quarter credits; 720 clinical hours

MSN - Family Nurse Practitioner Track

Core Courses		
NURS 500 [WI]	Confronting Issues in Contemporary Health Care Environments	3.0
NURS 502	Advanced Ethical Decision Making in Health Care	3.0
NURS 544	Quality and Safety in Healthcare	3.0
RSCH 503	Research Methods and Biostatistics	3.0
RSCH 504	Evaluation and Translation of Health Research	3.0
Support Courses		
NURS 548	Advanced Pathophysiology	3.0
NURS 549	Advanced Pharmacology	3.0
NURS 550	Advanced Health Assessment & Diagnostic Reasoning	4.0
NURS 556	Pharmacology for Family Nurse Practitioners	3.0
NURS 664	Professional Issues for Nurse Practitioners	1.0
Clinical Courses		
NURS 534	FNP I: Primary Care of the Emerging Family	5.0
NURS 535	FNP II: Primary and Episodic Care of Infants, Children and Adolescents	5.0
NURS 536	FNP III: Primary Care of Adults and Older Adults Across the Adult Age Spectrum I	5.0
NURS 537	FNP IV: Primary Care of Adults and Older Adults Across the Adult Age Spectrum II	5.0
NURS 538	FNP V: Integrative Practicum in Family Practice Across the Lifespan	4.0
Elective		3.0
Total Credits		56.0

MSN: Nursing Education Concentration

Major: Nursing Education

Degree Awarded: Master of Science in Nursing (MSN)

Calendar Type: Quarter

Total Credit Hours: 46.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.3817

Standard Occupational Classification (SOC) code: 25-1072

About the Program

The MSN: Nursing Education program prepares students to work as nursing educators, nursing faculty, or nursing professors in all types of programs, at all levels, in a variety of settings. This program has a special focus on preparing students with the required competencies to be successful on the nurse educator certification exam.

Currently, there is a severe and critical nursing faculty shortage in the United States. This program will prepare graduates to fill these faculty and educator positions in healthcare organizations through cutting-edge content and learning experiences that build the skills and competencies essential for today's nurse educators.

The program integrates theories specific to adult learning, curriculum design, evaluation of courses and programs, critical thinking, both clinical and classroom techniques, and the preparation for the role of the nursing professor. The program also includes opportunities to explore contemporary and leading-edge educational modalities. Knowledge and skills gained through this program are applicable in a variety of settings.

This unique program even instructs students on how to teach online and use technology to teach nursing in innovative ways. The culminating practicum, which runs over two terms, provides students with opportunities to put what has been learned into practice. Participants complete a role practicum experience in teaching, providing ample opportunity to apply theory to practice. In addition, students are required to attend an immersive on-campus intensive (OCI) simulation residency when taking practicum. The OCI hours will count as part of the required

160 total practicum hours (24 practicum hours earned). The OCI is offered biannually in January or July.

Full- and part-time enrollment options are available. The program is accredited by the Commission on Collegiate Nursing Education (CCNE).

Additional Information

For more information about this program, contact:

Mr. Redian Furxhiu
Student Services Manager
rf53@drexel.edu
267.359.5691

Additional information is also available on the Drexel's College of Nursing and Health Professions MSN in Nursing Education (<https://www.drexel.edu/cnhp/academics/graduate/MSN-Nursing-Education-Faculty-Role>) web page and on the Drexel University Online MSN in Nursing Education (<http://online.drexel.edu/online-degrees/nursing-degrees/msn-ed>) web page.

Admission Requirements

- BSN from a program fully accredited by NLN and or CCNE.
- 3.0 or above on all previous coursework or the last 60 credits completed. Applications from RN's with GPA < 3.0 may be considered on an individual basis.
- Official transcripts from all previous educational institutions are required.
- Two professional references required from colleagues or supervisors who can attest to the applicant's knowledge, skill, and potential aptitude for graduate study.
- Personal Statement describing why the student is interested in this MSN Degree.
- Curriculum Vitae or Resume.
- Copy of Current US RN license required.
- Copies of any Advanced Practice Nursing Licensure and Certification Documents.
- While specific experience is not required for applicants to the track, previous related work experience may make an applicant more competitive.

International applicants must possess a BSN (or its equivalent) and current US RN license.

TOEFL Requirement

International Applicants, as well as Immigrants to the US and US Permanent Residents, whose native language is not English, and who have not received a Bachelor's degree or higher in the US, Australia, Canada, Ireland, New Zealand or the United Kingdom, and must show proficiency in English speaking as well as listening, writing and reading. US citizens born on US military bases abroad may be waived from the TOEFL requirement after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

If you take the TOEFLiBT exam, you are required to have a minimum combined score for the listening, writing and reading sections of 79 Plus a speaking section score of 26 or higher.

If you take the TOEFL, you are required to have a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher.

* Two-term course (runs over 20 weeks)

Data Science MS Faculty

Yuan An, PhD (*University of Toronto, Canada*). Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

Mark Boady, PhD (*Drexel University*). Assistant Teaching Professor. Computer Algebra, complex symbolic calculations, automation of computation problems

David E. Breen, PhD (*Rensselaer Polytechnic Institute*). Associate Professor. Self-organization, biomedical image/video analysis, biological simulation, geometric modeling and visualization

Matthew Burlick, PhD (*Stevens Institute of Technology*). Assistant Teaching Professor. Image processing, machine learning, real-time video tracking, object detection and classification, statistics/probability, and acoustics

Chaomei Chen, PhD (*University of Liverpool*). Professor. Information visualization, visual analytics, knowledge domain visualization, network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Jane Greenberg, PhD (*University of Pittsburgh*) *Alice B. Kroeger Professor; Director, Metadata Research Center*. Metadata, ontological engineering, data science, knowledge organization, information retrieval

Xiaohua Tony Hu, PhD (*University of Regina, Canada*). Professor. Data mining, text mining, Web searching and mining, information retrieval, bioinformatics and healthcare informatics.

Jeremy R. Johnson, PhD (*Ohio State University*). Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Constantine Katsinis, PhD (*University of Rhode Island*). Teaching Professor. High-performance computer networks, parallel computer architectures with sustained teraflops performance, computer security, image processing.

Weimao Ke, PhD (*University of North Carolina at Chapel Hill*). Associate Professor. Information retrieval (IR), distributed systems, intelligent filtering/recommendation, information visualization, network science, complex systems, machine learning, text/data mining, multi-agent systems, the notion of information.

Xia Lin, PhD (*University of Maryland*) *Department Head, Information Science; Director of International Programs*. Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Geoffrey Mainland, PhD (*Harvard University*). Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD (*University of Toronto*). Professor. Software engineering; software security; code analysis; evolutionary computation.

William Mongan, MS (*Drexel University*) *Associate Department Head for Undergraduate Affairs, Computer Science*. Associate Teaching Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach

Santiago Ontañón, PhD (*University of Barcelona*). Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning

Jung-ran Park, PhD (*University of Hawaii at Manoa*). Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Alex Poole, PhD (*University of North Carolina*). Assistant Professor. Archives and records, digital humanities, digital curation, pedagogy, diversity and inclusivity in the LIS profession

Jeffrey L. Popyack, PhD (*University of Virginia*). Professor. Operations research, stochastic optimization, computational methods of Markov decision processes; artificial intelligence, computer science education.

Lori Richards, PhD (*University of North Carolina*). Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Ali Shokoufandeh, PhD (*Rutgers University*) *Senior Associate Dean of Research*. Professor. Theory of algorithms, graph theory, combinational optimization, computer vision.

Il-Yeol Song, PhD (*Louisiana State University*) *PhD in Information Studies Program Director*. Professor. Conceptual modeling, ontology and patterns, data warehouse and OLAP, object-oriented analysis and design with UML, medical and bioinformatics data modeling & integration,.

Julia Stoyanovich, PhD (*Columbia University*). Assistant Professor. Data and knowledge management, big data, biological data management, search and ranking.

Brian Stuart, PhD (*Purdue University*). Associate Teaching Professor. Machine learning, networking, robotics, image processing, simulation, interpreters, data storage, operating systems, computer science, data communications, distributed/operating systems, accelerated computer programming, computer graphics.

Jake Williams, PhD (*University of Vermont*). Assistant Professor. Data science, scientific programming, computational social science, computational linguistics and natural language processing, mathematics, machine learning, algorithms and scalability

Christopher C. Yang, PhD (*University of Arizona, Tucson*). Associate Professor. Web search and mining, security informatics, knowledge management, social media analytics, cross-lingual information retrieval, text summarization, multimedia retrieval, information visualization, information sharing and privacy, artificial intelligence, digital library, and electronic commerce.

MSN: Nursing Innovation Concentration

Major: Nursing Innovation

Degree Awarded: Master of Science in Nursing (MSN)

Calendar Type: Quarter

Total Credit Hours: 45.0 minimum

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.3801

Standard Occupational Classification (SOC) code: 29-1141

About the Program

The online MSN in Nursing Innovation is designed for the graduate nursing student who seeks to re-invent and transform nursing practice in today's tumultuous health care system. Graduates of this accredited program fill innovative and problem-solving roles as clinicians, educators, administrators and clinical scientists; some students choose to move toward and succeed in the business environment of healthcare.

This pioneering masters degree emphasizes problem-solving and creative approaches to advance nursing practice, improve and change healthcare delivery and focuses on models, methods, environments and processes that will give students the tools to transform ideas into reality. It offers a flexible, but rigorous, curriculum including a substantial capstone project that demonstrates innovation and pushing the creative boundaries to promote real and substantive change.

This program:

- Gives students the ability to make ideas a reality.
- Teaches students new skills to support changing ideas into reality.

- Develops students as creative and inventive nurses who can make meaningful and unique contributions to the healthcare industry.
- Is a good fit for students whose career objectives may not be met by a traditional graduate nursing curriculum or career paths.

Students may elect to use the 4-5 electives to obtain a post-baccalaureate certificate in a specialty area of interest including but not limited to the list below. Or may, with approval, design an individualized plan of study to meet the program requirements.

- Forensic Trends and Issues in Contemporary Healthcare
- Leadership in Health Systems Management
- Nursing Education
- Issues in Human Trafficking
- Substance Use Disorders Counseling
- Veterans' Healthcare
- Project Management
- Healthcare Informatics

Full- and part-time enrollment options are available. The program is accredited by the Commission on Collegiate Nursing Education (CCNE).

Degree Requirements

Core MSN Courses

NURS 500 [WI]	Confronting Issues in Contemporary Health Care Environments	3.0
NURS 502	Advanced Ethical Decision Making in Health Care	3.0
NURS 544	Quality and Safety in Healthcare	3.0
RSCH 503	Research Methods and Biostatistics	3.0
RSCH 504	Evaluation and Translation of Health Research	3.0

Required Track Courses

NURS 586	Innovation in Advanced Nursing Practice: Theory and Application	3.0
NURS 587	Case Studies in Intra/Entrepreneurship and Innovation in Nursing	3.0

Support Courses

NURS 564	The Business of Healthcare	3.0
PROJ 501	Introduction to Project Management	3.0

Practicum/Capstone Projects

NURS 652	Innovation Capstone Project	6.0
----------	-----------------------------	-----

Electives (by advisement with track coordinator or selected from concentrations listed below) 12.0-15.0

Total Credits		45.0-48.0
---------------	--	-----------

Healthcare Informatics Concentration

PROJ 502	Project Planning & Scheduling	3.0
INFO 648	Healthcare Informatics	3.0
INFO 731	Managing Health Informatics Projects	3.0

INFO 732	Healthcare Informatics: Planning & Evaluation	3.0
Total Credits		12.0

Service to Veterans Concentration

IPS 549	The Military and Veteran Culture	3.0
IPS 550	The Unique Health Care Needs of our Military and Veterans	3.0
IPS 551	Veteran Advocacy	3.0
IPS 552	Veteran Healthcare Policy	3.0
Total Credits		12.0

Complementary & Integrative Therapies Concentration

CIT 501	Foundations of Phytotherapy	3.0
CIT 502	Foundations of Complementary and Integrative Therapies	3.0
CIT 503	Holistic Living For The Caregiver	3.0
CIT Elective *		3.0
Total Credits		12.0

* One CIT 500 or 600 level course

Holistic Hospice & Palliative Care Concentration

CIT 503	Holistic Living For The Caregiver	3.0
CIT 621	Spirituality in Hospice and Palliative Care	3.0
CIT 622	Holistic Therapies in Hospice and Palliative Care	3.0
CIT 623	Cultural Perspectives in Hospice and Palliative Care	3.0
Total Credits		12.0

Leadership in Health Systems Management Concentration

NURS 557	Leadership and Stewardship in the Health Professions	3.0
NURS 558	Economics of Healthcare Management & Policy	3.0
NURS 559	Operations Management in Contemporary Healthcare Organizations	3.0
NURS 562	Workforce Management in Healthcare Organizations	3.0
or NURS 564	The Business of Healthcare	
or NURS 567	Strategic Management: Power, Politics and Influence in Healthcare Systems	
Total Credits		12.0

Forensic Trends & Issues in Contemporary Healthcare Concentration

PROJ 502	Project Planning & Scheduling	3.0
NURS 519	Forensic Science Foundations	3.0
NURS 528	Victimology – Contemporary Trend	3.0
NURS 533	Forensic Mental Health	3.0
Total Credits		12.0

Integrative Addiction Therapies

CIT 503	Holistic Living For The Caregiver	3.0
CIT 624	Foundations of Integrative Addiction Therapy	3.0
CIT 625	Spirituality, Empowerment, and Transformation	3.0
CIT 631	Introduction to Nutritional Neuroscience	3.0
Total Credits		12.0

Substance Use Disorder Concentration

BACS 534	Approaches to Substance Use Disorders	3.0
BACS 535	Motivational Enhancement Skills	3.0
BACS 540	Treatment Planning and Relapse Prevention	3.0
BACS 560	Preventing Substance Use Disorders	3.0
BACS 568	Substance Use Counseling with Special Populations	3.0
BACS 570	Clinical Supervision Skills	3.0
Total Credits		18.0

Health Care Compliance Concentration (Law School Semester Courses*)

LSTU 501S	Compliance Skills: Auditing, Investigation & Reporting	4.5
LSTU 504S	Health Care Rules and Regulations	4.5
LSTU 505S	Health Care Quality, Patient Safety and Risk Management	4.5

LSTU 506S	Patients and Privacy: HIPAA and Related Regulations	4.5
Total Credits		18.0

* Note: Law School Courses are offered on a semester calendar. Course credits listed above have been converted to quarter credits to more accurately present the credits earned

Global Health Concentration

PBHL 704	Proseminar in Global Health Ethics *	3.0
PBHL 705	Public Health in Developing Countries	3.0
PBHL 706	Globalization, Development and Comparative Health Systems	3.0
PBHL 707	Monitoring and Evaluation in Global Health	3.0
Total Credits		12.0

* This course is a 1 credit seminar that is taken over three terms to afford maximum in-depth learning opportunities for global health ethics

Arts Administration and Museum Leadership Faculty

Thomas Borrup, MA (*Gollard College*). Adjunct Instructor. The integration of the arts, economic development, urban planning and design, civic engagement, and animation of public space.

Jean Brody, DFA (*Yale School of Drama*) Program Director, *Online MS in Arts Administration*. Associate Teaching Professor. Arts administration.

Kimberly Camp, MS (*Drexel University*). Adjunct Instructor. Strategic planning, board development, architectural program planning, infrastructure planning and implementation, pro forma development, fundraising strategies, policy development and relationship building for non-profits.

Bettie-Ann Candelora, MA (*Goucher College*). Adjunct Instructor. Arts education

Lindsey Crane, MS (*Drexel University*). Adjunct Instructor. Promoting peace and social change through the arts

Mare Emery Adjunct Instructor.

Sharon Erwin, JD (*Temple University School of Law*). Adjunct Instructor. Copyright and insurance advice and litigation, contract drafting and negotiation, employment-related counseling, litigation and dispute resolution, issues of public art, cultural heritage, web site and database development, and licensing.

Derek Gillman, LL.M. (*University of East Anglia*) Senior Advisor to the President for University Collections. Distinguished Teaching Professor.

Julie Goodman, MFA (*Temple University*) Program Director, *MS in Arts Administration*. Associate Professor. Cultural policy, political activism in the arts, changes in economic and social policy, arts sector changes.

Catherine Hernandez, MS (*Drexel University*). Adjunct Instructor.

Jonathan Hummel, MS (*Drexel University*). Adjunct Instructor.

Jessica Jenkins

Susan Matyas, MS (*Drexel University*). Adjunct Instructor. Capacity building issues including strategic planning, board development, organizational development, donor development, marketing, and institutional relations.

Elizabeth Milroy, PhD (*University of Pennsylvania*) Department Head, *Visual Studies*. Professor. American art, Museum Studies.

Rachel Olenick Adjunct Instructor.

Richard Perkins Adjunct Instructor.

Jeffrey Ray, MAs (*University of Pennsylvania*). Adjunct Instructor.

Danielle Rice, PhD (*Yale University*) Program Director, *Museum Leadership*. Teaching Professor. Museum Studies.

Allison Trimarco-White, MAM (*Carnegie Mellon University*). Adjunct Instructor. Organizational development strategies in small, volunteer-led arts organizations.

Neville Vakharia, MS (*Drexel University*) Research Director. Associate Professor. Technology in the arts, strategic planning and evaluation, management and leadership, innovation and entrepreneurship.

John Walp, BS (*Cornell University*). Adjunct Instructor.

Brent Woods, MS (*Drexel University*). Adjunct Instructor.

Pamela Yau, MA (*City University, London*). Adjunct Instructor. Digital marketing of the arts

Andrew Zitcer, PhD (*Rutgers University*) Program Director, *Urban Strategy*. Assistant Professor. Arts and community development, community based organizations, governance modes, organizational planning, narrative and social theory.

MSN: Nursing Leadership in Health Systems Management Concentration

Major: Nursing: *Nursing Leadership in Health Systems Management Concentration*

Degree Awarded: *Master of Science in Nursing (MSN)*

Calendar Type: *Quarter*

Total Credit Hours: *48.0*

Co-op Option: *None*

Classification of Instructional Programs (CIP) code: *51.3801*

Standard Occupational Classification (SOC) code: *29-1141*

About the Program

The MSN in Nursing Leadership in Health Systems Management program, designed for part-time attendance by working nurses, prepares students to become nursing leaders in today's rapidly changing health care environment. This online master's degree program will prepare students for a senior role in a dynamic and increasingly demanding healthcare environment.

The MSN program focuses on the development of a leadership style and the skill set essential for individuals in or seeking administrative roles, including:

- fiscal and organizational management,
- strategic planning,
- integrated quality outcomes measurement,
- organizational structures,
- marketing, and
- management of human resources within organizations.

The program also provides the student with information and strategies to problem solve, make decisions, resolve conflict, address legal/ethical issues and operationalize the mission and goals of the health care delivery organization.

Coursework for the MSN program is completed online. The MSN also requires two practicum experiences that provide opportunities for students

to further develop leadership skills for complex healthcare organizations. Students will also have the option for an international study abroad experience in Costa Rica where they will explore the Costa Rican Health Care System through a series of site visits to health care facilities and meeting with health care professionals to learn firsthand about the success and challenges of delivery health care in Costa Rica.

Full and part-time enrollment options are available. The program is accredited by the Commission on Collegiate Nursing Education (CCNE).

Additional Information

For more information about this program, contact:

Ms. Jillian Randall
Academic Advisor
jnr56@drexel.edu
267.359.5692

Additional information is also available on the Drexel's College of Nursing and Health Professions Nursing Leadership in Health Systems Management (<https://www.drexel.edu/cnhp/academics/graduate/MSN-Nursing-Leadership-in-Health-Systems-Management>) web page and the Drexel University Online Nursing Leadership in Health Systems Management (<http://online.drexel.edu/online-degrees/nursing-degrees/msn-lead>) web page.

Admission Requirements

- BSN from a program fully accredited by NLN and or CCNE.
- 3.0 or above on all previous coursework or the last 60 credits completed. Applications from RN's with GPA < 3.0 may be considered on an individual basis.
- Official transcripts from all previous educational institutions are required.
- Two professional references required from colleagues or supervisors who can attest to the applicant's knowledge, skill, and potential aptitude for graduate study.
- Personal Statement describing why the student is interested in this MSN Degree.
- Curriculum Vitae or Resume.
- Copy of Current US RN license required.
- Copies of any Advanced Practice Nursing Licensure and Certification Documents.
- While specific experience is not required for applicants to the track, previous related work experience may make an applicant more competitive.

International applicants must possess a BSN (or its equivalent) and current US RN license.

TOEFL Requirement

International Applicants, as well as Immigrants to the US and US Permanent Residents, whose native language is not English, and who have not received a Bachelor's degree or higher in the US, Australia, Canada, Ireland, New Zealand or the United Kingdom, and must show proficiency in English speaking as well as listening, writing and reading. US citizens born on US military bases abroad may be waived from the TOEFL requirement after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

If you take the TOEFLiBT exam, you are required to have a minimum combined score for the listening, writing and reading sections of 79 Plus a speaking section score of 26 or higher.

If you take the TOEFL, you are required to have a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher.

Additional Information

Additional information is also available on the Drexel College of Nursing and Health Professions' Nursing Leadership in Health Systems Management web page (<http://drexel.edu/cnhp/academics/graduate/MSN-Nursing-Leadership-in-Health-Systems-Management>) and the Drexel University Online Nursing Leadership in Health Systems Management web page (<https://online.drexel.edu/online-degrees/nursing-degrees/msn-lead>).

Degree Requirements

The program content addresses the four key areas of organizations: leading the human side of the enterprise, managing resources, managing operations, and managing information. Two threads are incorporated throughout all courses: the importance of professional image in written and live presentations and the use of technology to support and enhance management and care delivery outcomes.

MSN Core Courses

NURS 500 [WI]	Confronting Issues in Contemporary Health Care Environments	3.0
NURS 502	Advanced Ethical Decision Making in Health Care	3.0
NURS 544	Quality and Safety in Healthcare	3.0
RSCH 503	Research Methods and Biostatistics	3.0
RSCH 504	Evaluation and Translation of Health Research	3.0

Support Course

Major Courses

INFO 526	Information, Innovation & Technology in Advanced Nursing Practice	3.0
or NURS 553	Data Analysis for Decision-Making in HC Management	
NURS 557	Leadership and Stewardship in the Health Professions	3.0
NURS 558	Economics of Healthcare Management & Policy	3.0
NURS 547	Communication and Self-Awareness for Leading and Managing in Healthcare	3.0
NURS 564	The Business of Healthcare	3.0
NURS 562	Workforce Management in Healthcare Organizations	3.0
NURS 559	Operations Management in Contemporary Healthcare Organizations	3.0
NURS 567	Strategic Management: Power, Politics and Influence in Healthcare Systems	3.0

Elective		3.0
----------	--	-----

Practicum Courses

NURS 568	Practicum and Symposium in Healthcare Operations Management	3.0
NURS 569	Practicum and Symposium in Technology and Management of Information in Healthcare Organizations	3.0

Total Credits		48.0
---------------	--	------

Architecture Faculty

David Ade, AIA, LEED A.P., NCARB, BArch (*Drexel University*). Adjunct Instructor. Principal, SMP Architects, sustainable design

Joanne Aitken, FAIA, LEED, AP, MArch (*University of Pennsylvania*). Adjunct Instructor. Senior associate, KiernanTimberlake; adaptive reuse, climate responsive design, civic engagement.

Ulrike Altenmuller-Lewis, AIA, Dr.-Ing. (*Bauhaus Universitat Weimar*) *Architecture Program Director*. Associate Professor. Research on educational environments; translations of architectural theory texts.

David Beker, RA, MArch (*University of Pennsylvania*). Adjunct Instructor. Principal, Bekerwerks Design, LLC; furniture design, product design.

Mark Brack, PhD (*University of California at Berkeley*). Associate Professor. British and American architecture from 1700 to the present; Hispanic colonial architecture in the American Southwest; vernacular architecture; historic preservation.

Katie Broh, AIA, MArch (*University of Pennsylvania*). Adjunct Instructor. Partner, MGA; performing arts and educational facilities.

Charles Capaldi, AIA, LEED, AP, MArch (*Colombia University*). Adjunct Instructor. Partner at CaVa Architects.

Daniel Chung, RA, PE, MArch, MSE (*Yale University, Princeton University*). Assistant Professor. Building performance and exterior envelope systems.

Jon Coddington, AIA, MArch (*University of Pennsylvania*). Professor. Architecture, urban design and planning.

Bradford Crowley, PE, LEED, AP, Master of Engineering (*Cornell University*). Adjunct Instructor. Associate Principal, Ballinger; campus infrastructure planning, life cycle cost analysis, HVAC design and energy analysis.

John DeFazio, AIA, BArch (*New York Institute of Technology*). Adjunct Instructor. Architecture in film. Partner at John DeFazio, AIA, NYC, Co-Director of Raymond Farm Center for Living Arts & Design.

Dyer Alfred "Lyndsay" Falck, RA, ARCUK, ARIBA, NCARB, M.URP (*University of Capetown, South Africa*). Adjunct Instructor. Building technology

Alexandra Fazio, MArch (*University of Pennsylvania*). Adjunct Instructor. COO Preminente College Counseling Owner at A. Fazio Design & Consulting.

Stephanie Feldman, AIA, MArch (*University of Pennsylvania*). Adjunct Instructor. Partner, ScF Designs.

Alan Greenberger, FAIA, BArch (*Rensselaer Polytechnic Institute*) *Department Head, Architecture, Design & Urbanism, Distinguished Visiting Lindy Institute for Urban Innovation Fellow*. Distinguished Teaching Professor. Urban planning and policy.

Adam Hayes, RA NCARB, LEED AP, MArch (*Colombia University*). Adjunct Instructor. Project Architect, HDR.

Don Jones, FAIA, LEED DD+C, MArch (*University of Pennsylvania*). Adjunct Instructor. Principal, Director of Sustainable Design, Ewing Cole; sports venues.

Uk Jung, RA; LEED AP, BArch (*Drexel University*). Adjunct Instructor. Architectural representation, digital explorations.

Tim Kearney, AIA, MArch (*University of Pennsylvania*). Adjunct Instructor. Principal, CuetoKEARNEY design; sustainable design

Marc Krawitz, BArch (*Temple University*). Adjunct Instructor. Designer, Ballinger.

Jeffrey Krieger, AIA, LEED AP, MArch (*Carnegie Mellon University*). Adjunct Instructor. President, Krieger and Associates Architects; residential design.

Joshua T. Lessard, BArch (*Drexel University*). Adjunct Instructor. Architectural and Exhibit Designer, University of Pennsylvania Museum; vernacular architecture.

Robert Nalls, AIA, NCARB, MArch (*University of Pennsylvania*). Adjunct Instructor. Owner/Partner, Nalls Architecture Inc.; institutional and educational buildings.

Jacklynn Niemiec, LEED BD+C, MArch (*University of Pennsylvania*). Assistant Teaching Professor. Graphic representation

Robert Piasecki, AIA, LEED AP, BArch (*Drexel University*). Adjunct Instructor. Project Manager, Design and Construction at University of Pennsylvania.

James Rowe, AIA, MArch (*University of Pennsylvania*). Adjunct Instructor. Principal, Studio Agoos Lovera; institutional, recreation, corporate, civic and residential design.

Paul Salvaggio, AIA, LEED AP, NCARB, BArch, BS Arch (*Pennsylvania State University*). Adjunct Instructor. Principal, Arcus Design Group; residential architecture.

Rachel Schade, AIA, MArch (*University of Pennsylvania*) *Program, Architecture, Associate Director for Student Placement*. Associate Teaching Professor. Principal, Rachel Simmons Schade Architect. Work-study placement; residential, graphic representation.

Alexander Stadel, MS (*Drexel University*). Adjunct Instructor. Structural Designer II at Keast & Hood Co., Philadelphia

Simon Tickell, AIA, MArch (*University of Pennsylvania*). Associate Teaching Professor. Principal, Simon J Tickell Architect; educational and museum buildings, residential design Associate Teaching Professor (Full-Time), AIA, LEED AP, Principal at Simon J. Tickell, Architect

Nancy Trainer, FAIA, AICP, LEED, AFAAR, MArch (*University of Pennsylvania*) Associate Vice President of Design & Planning at Drexel. Adjunct Instructor. Planning, institutional design.

Kelly Vresilovic, AIA, LEED AP, . Adjunct Instructor. Partner at CaVa Architects, Philadelphia

Adrienne Yancone, RA, LEED AP, . Adjunct Instructor. Project Designer at Eimer Design, Philadelphia

Michael Ytterberg, PhD, AIA. Adjunct Instructor. Owner at MY Architecture, Philadelphia

Max Zahniser, LEED AP, . Assistant Professor. Owner, Praxis - Building Solutions, Philadelphia

MSN: Pediatric Acute Care Nurse Practitioner

Major: Nurse Practitioner, Pediatric Acute Care
Degree Awarded: Master of Science in Nursing (MSN)
Calendar Type: Quarter
Total Credit Hours: 57.0; 800 clinical hours
Co-op Option: None
Classification of Instructional Programs (CIP) code: 51.3809
Standard Occupational Classification (SOC) code: 29-1171

About the Program

The online Pediatric Acute Nurse Practitioner (PNP-AC) program is designed to prepare practitioners for professional practice in the management of medical, surgical, and critical-care pediatric patient populations. Concurrent theory and clinical courses provide a knowledge base for the management of pediatric complex acute, critical, and chronic health care conditions. Clinical practicum rotations allow students to put the principles they have learned into practice in medical, surgical, and critical care settings. Upon completing the program, graduates pursue practice roles across the continuum of acute care services ranging from high-acuity hospital based emergency or intensive care settings to specialty based practices. Graduates are eligible to sit for the PNCB's Pediatric Acute Care Nurse Practitioner Certification Examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulation, and evaluation. OCI visits occur 2-4 times during the clinical portion of the program and range from 2-3 days. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab. These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

For more information about this program, visit Drexel's MSN Nurse Practitioner Programs (<http://drexel.edu/cnhp/academics/graduate/MSN-Nurse-Practitioner-Pediatric-Acute-Care>) web page.

MSN: Pediatric Primary Care and Pediatric Acute Care Dual Option

Major: Nurse Practitioner, Pediatric Primary Care and Pediatric Acute Care

Degree Awarded: Master of Science

Calendar Type: Quarter

Total Credit Hours: 62.0; 1000 clinical hours

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.3809

Standard Occupational Classification (SOC) code: 29-1171

About the Program

The Pediatric Primary Care and Pediatric Acute Care Nurse Practitioner Program at Drexel University will prepare the Pediatric Nurse Practitioner to perform acts of medical diagnosis and treatment through didactic lectures, problem-based learning, clinical practice hours, standardized patient experiences and high-fidelity simulation.

This innovative dual option track coincides with the new models of healthcare delivery and the increasing demand for PNP's to provide care for children and their families across the entire continuum of health and illness, including acute critical conditions. The clinical practice settings for the dual certification track options provides students with a mixed inpatient/outpatient experience ranging from specialty clinics and primary care settings. Diverse clinical settings provide supervised clinical hours to allow the student advance practitioner to perform advance physical assessment, critical thinking, diagnostic reasoning and management of care in collaboration with licensed physician and APN's in accredited institutions. Students graduating from this track will be eligible to sit for both the Pediatric Primary Care and the Pediatric Acute Care Board Certifications through the PNCB.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulation, and evaluation. OCI visits occur 2-4 times during the clinical portion of the program and range from 2-3 days. *Mandatory on-campus visits each quarter are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab. These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

Degree Awarded: Master of Science in Nursing (MSN)

Calendar Type: Quarter

Total Credit Hours: 52.0 quarter credits; 640 clinical hours

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.3809

Standard Occupational Classification (SOC) code: 29-1171

About the Program

The online Pediatric Primary Care Nurse Practitioner (PNP) program is directed toward preparing nurse practitioners who will take advanced nursing roles as clinicians, educators, researchers, and leaders in the rapidly changing, evidence-driven health care environment. The program emphasizes evidence-based practice, interdisciplinary collaboration, and critical use of evolving technology in the care of children and their families. While most pediatric nurse practitioners practice in primary care settings, the continuum of child healthcare spans the geographic settings of home care, ambulatory care, specialty care, urgent care, and rehabilitative care.

Pediatric primary care nurse practitioners provide advanced nursing care across the continuum of healthcare services to meet the specialized physiologic and psychological needs of patients from infancy through adolescence, and have competencies to manage well-child care as well as complex, acute, and chronic healthcare conditions within a family-centered healthcare model. Graduates are eligible to sit for the ANCC's

Pediatric Primary Care Nurse Practitioner Examination and/or the PNCB's Pediatric Primary Care Nurse Practitioner Examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulations and evaluation. OCI visits occur 2-4 times during the clinical portion of the program and range from 2-3 days. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

MSN: Psychiatric Mental Health Nurse Practitioner

Major: Nurse Practitioner, Psychiatric Mental Health Degree Awarded: Master of Science in Nursing (MSN) Calendar Type: Quarter

Total Credit Hours: 52.0 quarter credits; 640 clinical hours

Co-op Option: None

Classification of Instructional Programs (CIP) code: 58.3810

Standard Occupational Classification (SOC) code: 29-1123

About the Program

The online Psychiatric Mental Health Nurse Practitioner (PMHNP) program prepares practitioners to provide a wide range of services to patients across the lifespan and their families. The program of study is based on a biopsychosocial model of care and includes the study and application of diagnostic and treatment modalities, and theories and approaches to practice. Graduates of this program practice in a wide variety of settings as this program enables them to provide direct (assessment, intervention) and indirect (consultation, case management, and supervision) advanced practice services to individuals who are at risk and those who need mental health services. Graduates are eligible to sit for the ANCC's Psychiatric Mental Health Certification Examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On-Campus Intensive (OCI) learning experiences, simulation, and evaluation. OCI visits occur 2-4 times during the clinical portion of the program and range from 2-3 days. *Mandatory on-campus visits each quarter are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab.

These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

MSN: Women's Health/Gender Related Nurse Practitioner

Major: Nurse Practitioner, Women's Health/Gender Related

Degree Awarded: Master of Science in Nursing (MSN)

Calendar Type: Quarter

Total Credit Hours: 55.0 quarter credits; 640 clinical hours

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.3822

Standard Occupational Classification (SOC) code: 29-1171

About the Program

The online Women's Health/Gender Related Nurse Practitioner track offers didactic and clinical education via distance learning and concurrent clinical preceptorships. The courses offered throughout the track reflect the competencies and skill sets required for today's women's health nurse practitioner as knowledge expands, health care systems evolve, technology advances and practice changes in response to current needs and evidence-based research. Additionally, this track offers the opportunity for students to work in transdisciplinary simulated scenarios to promote a better understanding and respect of discipline-specific roles, improve existing communication and collaboration within disciplines, and initiate teamwork development in order to promote patient safety and high-quality patient care. Graduates are eligible to sit for the NCC's Women's Health/Gender Related Nurse Practitioner Examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulation, and evaluation. OCI visits occur 2-4 times during the clinical portion of the program and range from 2-3 days. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab. These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

For more information about this program, visit Drexel's MSN Nurse Practitioner Programs (<https://www.drexel.edu/cnhp/academics/graduate/MSN-Nurse-Practitioner-Womens-Health-Gender-Related>) web page.

Music Therapy and Counseling

Major: Music Therapy and Counseling

Degree Awarded: Master of Arts (MA)

Calendar Type: Quarter

Total Credit Hours: 90.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.2305

Standard Occupational Classification (SOC) code: 29-1129

About the Program

The two-year Music Therapy and Counseling program consists of a 90.0 quarter-credit curriculum that combines didactic, experiential and clinical learning experiences. Students develop advanced music therapy competencies based upon theoretical knowledge, practical skills and self-reflective processes within a framework of multicultural perspectives.

Music therapy students study alongside those in the art therapy and dance/movement therapy programs in counseling and psychotherapy core courses. Clinical training occurs in a variety of settings and integrates music therapy with current developmental, neuroscience, mental health and medical foundations. Theoretical and experiential music therapy courses draw upon current evidence-based literature for the development of foundational and advanced methods and techniques. All coursework is designed to assist students in cultivating awareness of the use of the self within the music therapy and counseling relationship.

The Music Therapy and Counseling Curriculum is approved by the American Music Therapy Association. Upon completion of the program, students are eligible to sit for the exam of the Certification Board for Music Therapists, to earn the MT-BC credential.

For additional information about program, visit the College of Nursing and Health Professions' Music Therapy (<https://www.drexel.edu/cnhp/academics/graduate/MA-Music-Therapy-Counseling>) web site.

Degree Requirements

Core Courses

ARTS 501	Introduction to Creative Arts Therapy I	2.0
ARTS 502	Introduction to Creative Arts Therapy II	2.0
ARTS 504	Human Psychological Development I	2.0
ARTS 505	Clinical Diagnosis of Psychopathology I	2.0
ARTS 506	Professional Orientation and Ethics I	1.0
ARTS 509	Human Psychological Development II	2.0
ARTS 513	Clinical Diagnosis of Psychopathology II	2.0
ARTS 519	Neuroscience: Concepts and Applications for Creative Arts Therapy	3.0
ARTS 604	Career Counseling	4.0

ARTS 606	Professional Orientation and Ethics II	3.0
ARTS 507	Group Dynamics in Counseling and Psychotherapy I	2.0
ARTS 508	Introduction to Behavioral Research I	2.0
ARTS 515	Introduction to Behavioral Research II	2.0
ARTS 601	Theories of Counseling and Psychotherapy I	2.0
ARTS 605	Theories of Counseling and Psychotherapy II	2.0
ARTS 602	Social and Cultural Foundations in Counseling and Psychotherapy I	2.0
ARTS 603	Clinical Appraisal and Assessment I	2.0
ARTS 607	Clinical Appraisal and Assessment II	2.0

Music Therapy Track Courses

ARTS 570	Clinical Musicianship I	2.0
ARTS 571	Clinical Musicianship II	2.0
ARTS 572	Clinical Musicianship III	2.0
ARTS 573	Clinical Musical Improvisation I	2.0
ARTS 574	Clinical Musical Improvisation II	2.0
ARTS 575	Theories in Music Therapy and Counseling I: Musical Development in Children	2.0
ARTS 577	Music Therapy and Counseling Approaches for Adult Populations	2.0
ARTS 578	Music Therapy Skills and Counseling Approaches for Child and Adolescent Populations	2.0
ARTS 579	Music Therapy Skills III: Technological Applications	2.0
ARTS 580	Psychology of Music	2.0
ARTS 670	Advanced Music Therapy and Counseling Skills I: Music and Imagery Approaches	2.0
ARTS 671	Advanced Music Therapy and Counseling Skills II: Group Processes	2.0
ARTS 672	Multicultural Perspectives in Music Therapy and Counseling	2.0
ARTS 676	Theories in Music Therapy and Counseling II: Theoretical Models	2.0
ARTS 677	Advanced Music Therapy Skills III: Wellness and Mind/Body Approaches	2.0
ARTS 678	Clinical Internship Laboratory: Musical Analysis	2.0

Clinical Education Courses

ARTS 510	Clinical Practicum I: Observation	1.0
ARTS 511	Clinical Practicum II	1.0
ARTS 512	Clinical Practicum III	1.0
ARTS 581	Music Therapy Group Supervision I	1.0
ARTS 582	Music Therapy Group Supervision II	1.0
ARTS 583	Music Therapy Group Supervision III	1.0
ARTS 610	Clinical Internship I	3.0
ARTS 611	Clinical Internship II	3.0
ARTS 612	Clinical Internship III	3.0

Thesis

ARTS 621	Thesis I	1.0
ARTS 622	Thesis II	1.0
ARTS 623	Thesis III	1.0
ARTS 624	Thesis IV	1.0

Additional Electives

As needed, in consultation with the program director students can select the following electives:

Creative Arts Therapies Department Faculty

Yasmine Awais, MAAT, ATR-BC, ATCS, LCAT, LPC (*Art Institute of Chicago*). Clinical Professor. Art therapy with diverse populations, art therapy in non-profit settings, clinical supervision.

Joke Bradt, PhD, MT-BC (*Temple University*). Associate Professor. Research in music therapy, chronic pain, systematic reviews.

Natalie Rae Carlton, PhD, ATR-BC, LPCC (*Leslie University*) *Director, Art Therapy MA Program*. Associate Clinical Professor. New media and art therapy, social justice in art activities, transgender and LGBTQ identity.

Nancy Gerber, PhD, ATR-BC (*Union Institute and University*) *Director, PhD Program in Creative Arts Therapies*. Associate Clinical Professor. Art therapy assessment and treatment of adolescents and adults; modern psychoanalysis and art therapy; arts therapy education and doctoral education; arts based research and mixed methods research.

Sharon W. Goodill, PhD, BC-DMT, NCC, LPC (*Union Institute and University*) *Chair, Department of Creative Arts Therapies*. Clinical Professor. Medical dance/movement, mind/body studies, movement assessment for DMT, CAT research and leadership.

Scott Horowitz, MA, MT-BC, LPC (*Drexel University*) *Director of Field Education*. Clinical Instructor. Interdisciplinary practice and education, developmental models of clinical and practicum supervision, music therapy and neurodevelopmental populations.

Florence Ierardi, MM, MT-BC, LPC (*Temple University*) *Director, Music Therapy and Counseling MA Program*. Associate Clinical Professor. Clinical improvisation, trauma-informed music therapy, multicultural music therapy perspectives.

Girija Kaimal, EdD, MA (*Harvard University*). Assistant Professor. Art therapy, educational research, program evaluation, art therapy.

Dawn Morningstar, MCAT, VC-DMT, LP (*Hahnemann University*). Associate Clinical Professor. Specialty in working with children and adolescents, Dance/movement therapist at Drexel's Parkway Health and Wellness faculty practice outpatient clinic.

Michele D. Rattigan, MA, ATR-BC, NCC, LPC (*MCP Hahnemann University*) *Coordinator of CAT Clinical Services*. Assistant Clinical Professor.

Ellen Schelly-Hill, MMT, BC-DMT, NCC, LPC (*Antioch NE Graduate School*) *Director of Dance/Movement Therapy and Counseling MA Program*. Associate Clinical Professor. Adults diagnosed with mood disorders, anxiety, chronic pain and with histories of trauma; clinical supervision; ethics.

Nutrition Sciences

Major: Nutrition Sciences

Degree Awarded: Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 90.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 30.1901

Standard Occupational Classification (SOC) code: 11-9121; 29-1031

About the Program

The program mission is to develop scientists who are able to contribute to the scholarly generation of nutrition science knowledge, spanning the overlapping disciplines of human nutrition, nutritional biochemistry, food safety, human physiology, exercise physiology and community nutrition; and the translation of this knowledge with respect to health, disease prevention and treatment.

Nutrition scientists who have a PhD can be involved in research, education, industry, community health, and/or clinical practice. With the current epidemic of obesity and type 2 diabetes mellitus, the need for PhD-educated nutritionists who can discover and design new treatment interventions is of major public health interest.

Admission Requirements

Applicants must possess a minimum of a Bachelor's of Science degree in biology, chemistry, nutrition, exercise physiology, food science or a similar area with a strong science base, and have taken an advanced undergraduate course in biochemistry, as well as a course in human nutrition and a course in basic statistics.

- College/University transcripts with a minimal overall grade point average (GPA) of 3.0 (on a 4.0 scale)
- Graduate Record Exam (GRE): minimum combined score of 308 on the Verbal and Math sections
- Two letters of recommendation from advisors, supervisors, professors, and/or mentors
- Curriculum vitae
- Personal statement outlining career plan, topic of research interest and preferred Nutrition Sciences faculty mentor with whom he/she would like to work

Degree Requirements

The PhD program consists of 90.0 quarter credits. The 90 credits include 45.0 credits of course work, 45.0 credits of research, as well as a research dissertation. Additionally, all PhD students will be required to obtain a minimum of 10 contact hours of nutrition-related teaching experience.

Required Nutrition Courses (18 credits):

NFS 525	Nutritional Assessment Through the Life Cycle	3.0
NFS 601	Research Methods	3.0
NFS 602	Methods of Nutrition Research	3.0
NFS 680	Special Topics	3.0
NFS 810	Topics in Metabolic Nutrition	3.0
NFS 811	Topics in Community Nutrition	3.0

Required Statistics Courses (9 credits):

RSCH 759	Foundations of Biostatistics	3.0
RSCH 811	Intermediate Biostatistics	3.0
RSCH 812	Interpretation of Data	3.0

Required Professional Skills Courses (9 credits):

RSCH 770	Foundations in Research Methods	3.0
RSCH 813	Measurement Theory in Healthcare	3.0
RSCH 815	Scientific Inquiry and Writing	3.0

Electives:

12.0 credits chosen from graduate nutrition, basic science or other courses, as determined by the faculty mentor and/or dissertation committee	12.0
--	------

Independent Research (30 credits):

NFS 997	Research	30.0
---------	----------	------

Dissertation Research (12 credits):

		12.0
--	--	------

NFS 999 Dissertation Research

Total Credits

90.0

Nutrition Sciences Faculty

Joseph I. Boullata, PharmD, RPh, BCSNP, FASPEN, VACN (*University of Maryland*). Clinical Professor. Nutrition-medication interactions; Vitamin D metabolism; Nutrition support.

Elizabeth Brooks, JD, IBCLC (*George Washington University*) *Human Lactation Program*. Instructor.

Charlene Compher, PhD, RD, CNSC, LDN, FAND, FASPEN (*Drexel University*) *Courtesy Appointment*. Visiting Research Professor.

Nyree Dardarian, MS, RDN, LDN, CSSD, FAND (*Drexel University*) *Director, Center for Nutrition & Performance*. Clinical Assistant Professor. Energy expenditure; Sports nutrition

Francesco De Luca, MD (*Catholic University of Sacred Heart, Rome, Italy*) *Courtesy Appointment*. Visiting Research Professor.

Angelo Del Parigi, MD (*University of Bari, Italy*) *Courtesy Appointment*. Visiting Research Professor.

Garrison L. Draper, MSc, CSCS, USAW, ISPAS (*Edith Cowan University, Perth, WA*) *Courtesy Appointment*. Visiting instructor

Susan Ettinger, PhD, RD, DABN, CDN (*Columbia University*) *Courtesy Appointment*. Visiting Research Professor.

Debi Page Ferrarello, RN, MSN, MS, IBCLC, RLC (*Jefferson University, Arcadia University*). Instructor. Human Lactation Certificate Program

Susan Fuchs, IBCLC (*Drexel University*). Instructor. Human Lactation Certificate Program

Andrea Judge, MPH, IBCLC, RLC (*University of North Carolina*). Clinical Instructor. Human Lactation Certificate Program

Joseph Kehayias, PhD (*Indiana University*). Professor. Body composition analyses; Measurement of sarcopenia; Osteoporosis; Energy expenditure.

Tanya V.E. Kral, PhD (*Pennsylvania State University*) *Courtesy Appointment*. Visiting Research Professor.

Beth L. Leonberg, MS, MA, RDN, FAND (*Colorado State University, Rowan University*) *Director, Didactic Program in Dietetics*. Assistant Clinical Professor. Pediatric nutrition.

Rachelle Lessen, MS, RD, IBCLC, LDN (*Arcadia University*). Instructor. Human Lactation Certificate Program

Brandy-Joe Milliron, PhD (*Arizona State University*). Assistant Professor. Development and evaluation of modifications in the natural environment to promote healthier living; Farm to table school initiatives

Juan Muniz, PhD (*Oregon State University*) *Director, Nutritional Biochemistry Laboratory*. Assistant Clinical Professor. Food microbiology; Community-based research to assess pesticide levels in homes; Prevention of health effects of pesticides for indigenous farmworkers.

Jennifer A. Nasser, PhD, RD, FTOS (*Rutgers University*). Associate Professor. Dopamine-mediated mechanisms of food intake regulation in humans and its impact on metabolic homeostasis, especially as it applies to obesity, eating disorders and aging.

Irene E. Olsen, PhD, RD, LDN (*Tufts University*) *Courtesy Appointment*. Visiting Research Professor.

Jennifer J. Quinlan, PhD (*North Carolina State University*). Associate Professor. Food microbiology; Microbiological quality and safety of produce, dairy and meat products in markets in high vs. low socioeconomics areas; Bacillus and Clostridium spores in food processing.

Sobhana Ranjan, PhD, RD (*University of Delhi, India*) *Courtesy Appointment*. Visiting Research Professor.

Barry Ritz, PhD (*Drexel University*) *Courtesy Appointment*. Visiting Research Professor.

Vicki Schwartz, DCN, RD, LDN, CNSC, FAND (*Drexel University*) *Nutrition and Foods*. Assistant Clinical Professor. Standardized patients vs real patients in nutrition counseling

Patricia A. Shewokis, PhD (*University of Georgia*). Professor. Roles of cognition and motor function during motor skill learning; role of information feedback frequency on the memory of motor skills, noninvasive neural imaging techniques of functional near infrared spectroscopy(fNIR) and electroencephalography (EEG) and methodology and research design.

Deeptha Sukumar, PhD (*Rutgers University*). Assistant Professor. Vitamin D and magnesium and bone mineral density; Obesity and bone mineral density.

Alison Ventura, PhD (*Pennsylvania State University*) *Courtesy Appointment*. Visiting Research Professor. Factors that contribute to the development of eating behaviors and dietary preferences during infancy and early childhood.

Stella L. Volpe, PhD, RDN, LDN, ACSM-CEP, FACSM (*Virginia Polytechnic Institute and State University*) *Chair, Nutrition Sciences*. Professor. Prevention of obesity and diabetes across the lifespan; Mineral metabolism and exercise; Energy balance; Sports nutrition.

Emeritus Faculty

Donna H. Mueller, PhD, RD (*Temple University*). Associate Professor Emeritus. Clinical nutrition; Pediatric nutrition; Nutrition in pulmonary diseases, especially cystic fibrosis; Nutrition in developmental delay; Dental nutrition; Dietetic education and professional development.

Pediatric Acute Care Nurse Practitioner Post-Master's Certificate

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's

Number of Credits to Completion: 39.0; 800 clinical hours

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 51.3809

Standard Occupational Classification (SOC) Code: 29-1171

Gainful Employment Disclosure (<http://deptapp08.drexel.edu/gainfulemployment/Nursing-Certificate-PM/51.3801-Gedt.html>)

The Pediatric Acute Care Nurse Practitioner Certificate is an elite post-graduate program that prepares students to deliver advanced care to infants, children and adolescents with acute, critical, and complex health conditions. Students will build upon primary care experience through courses that emphasize evidence-based practice, interdisciplinary collaboration, and the critical use of new technology. The program's curriculum was developed and is taught by Drexel University's renowned faculty from the nationally ranked College of Nursing and Health Professions. Upon completing the program, graduates pursue practice roles across the continuum of acute care services ranging from high-acuity hospital based emergency or intensive care settings to specialty based practices. Graduates are eligible to sit for the PNCB's Pediatric Acute Care Nurse Practitioner Certification Examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulation, and evaluation. OCI visits occur 2-4 times during the clinical portion of the program and range from 2-3 days. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab. These visits provide guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

Pediatric Primary Care and Pediatric Acute Care Dual Nurse Practitioner Post-Master's Certificate

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's

Number of Credits to Completion: 44.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 51.3809

Standard Occupational Classification (SOC) Code: 29-1171

Gainful Employment Disclosure (<http://deptapp08.drexel.edu/gainfulemployment/Nursing-Certificate-PM/51.3801-Gedt.html>)

The online Pediatric Primary Care and Pediatric Acute Care Dual Nurse Practitioner Post Master's Certificate program prepares students for advanced nursing roles as clinicians, educators, researchers, and leaders in pediatric health and wellness. Students will also become experts in delivering care to infants, children, and adolescents with acute and complex health disorders. The program's curriculum was developed and is taught by Drexel University's renowned faculty from the nationally ranked College of Nursing and Health Professions (<http://drexel.edu/cnhp>).

The certificate's curriculum emphasizes evidence-based practice, interdisciplinary collaboration, and the critical use of new technology. Nurse practitioners specializing in pediatric primary and acute care will be able to meet the health care needs required by children and families with acute and chronic, complex care with a promotion of optimal wellness.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulations and evaluation. *Mandatory on-campus visits are essential to students transitioning into the NP role.* These **mandatory** on-campus visits occur during the following times:

- *2nd Year, Summer Term* – students come in during the first clinical course for 2-3 days for the On-Campus Intensives (OCI).
- *3rd Year, Fall Term* – students come in during the second clinical course for 2-3 days for the On-Campus Intensives (OCI).
- *3rd Year, Spring Term* – students come in during the fourth clinical course for 2-3 days for the On-Campus Intensives (OCI).

For more information about this program, visit Drexel's MSN Nurse Practitioner Programs (<https://www.drexel.edu/cnhp/academics/graduate/MSN-Nurse-Practitioner-Pediatric-Primary-Care>) web page.

Admission Requirements

- A completed application
- A masters degree in nursing from a CCNE or NLN accredited program with a Graduate GPA of 3.0 or above
- Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended. Transcripts must be supplied regardless of the number of credits earned or the type of school attended. Instead of hard copy transcripts, post-secondary institutions can supply official electronic transcripts directly to Drexel University Online through a password secured link or website (use our email address, customerservice@drexel.com (customerservice@drexel.com)). If all post-secondary institutions are not listed on the application and these appear on transcripts received from other institutions, applications will not be reviewed until the remaining transcripts have been submitted. Use Drexel's Transcript Lookup Tool to assist with contacting your previous institutions.
- Two letters of recommendation. Use Drexel's electronic letter of recommendation service. If a recommender prefers to submit an original, hard copy letter, it must include an ink signature and be submitted in a sealed envelope.
- Personal statement (800 - 1600 words) that will give the admissions committee a better understanding of:
 - Why this particular program of study is being chosen
 - Plans upon completion of the certificate
 - How current work experience will enhance program experience
- Resume/CV
- A copy of your current, unrestricted United States RN license or eligibility for licensure as a registered nurse and any advanced practice nursing licensure and certification documents. License verification from your nursing license registry website is acceptable.
- A copy of your current PALS certification
- Additional requirements for International Students

Pediatric Primary Care Nurse Practitioner Post-Master's Certificate

Certificate Level: Graduate
Admission Requirements: Master's degree
Certificate Type: Post-Master's
Number of Credits to Completion: 34.0; 640 clinical hours
Instructional Delivery: Online
Calendar Type: Quarter

Expected Time to Completion: 2 years
Financial Aid Eligibility: Aid eligible
Classification of Instructional Program (CIP) Code: 51.3809
Standard Occupational Classification (SOC) Code: 29-1171
Gainful Employment Disclosure (<http://deptapp08.drexel.edu/gainfulemployment/Nursing-Certificate-PM/51.3801-Gedt.html>)

The online Pediatric Primary Care Nurse Practitioner (PNP) program is directed toward preparing nurse practitioners who will take advanced nursing roles as clinicians, educators, researchers, and leaders in the rapidly changing, evidence-driven health care environment. This certificate is offered to those individuals who have earned a master's degree in nursing and seek further preparation to become a Pediatric Primary Care Nurse Practitioner. Graduates will be eligible to sit for the ANCC's Pediatric Primary Care Nurse Practitioner Certification Examination and/or for the PNCB's Pediatric Primary Care Certification Examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulations and evaluation. OCI visits occur 2-4 times during the clinical portion of the program and range from 2-3 days. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

PhD in Creative Arts Therapies

Major: Creative Arts Therapies

Degree Awarded: Doctor of Philosophy

Calendar Type: Quarter

Total Credit Hours: 48.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.2399

Standard Occupational Classification (SOC) code: 29-1129

About the Program

The PhD in Creative Arts Therapies is a research degree program for art therapists, dance/movement therapists, and music therapists who are interested in pursuing advanced scholarship and assuming academic leadership in their discipline. The primary mission of the program is the cultivation of scholars and academic leaders in the creative arts therapies who can:

- 1) generate and disseminate relevant, robust rigorous research;
- 2) contribute to theory evaluation and building;
- 3) develop evidence-based best clinical practices; and
- 4) cultivate academic proficiency in educating the next generation of art therapists, dance/movement therapists and music therapists.

The PhD program consists of four interactive learning modules.

- **Interdisciplinary-**The Interdisciplinary Seminars challenge students to study, explore, critically evaluate and synthesize areas of interdisciplinary knowledge relative that to creative arts therapies origins, philosophy, and theory.
- **Research-** The research module includes intensive study of multiple approaches to research. The purpose of the research module is to cultivate students' philosophical perspectives and develop research skill along a spectrum of traditional and innovative approaches. The research curriculum contributes to the generation and dissemination of robust and relevant research in the students' respective fields.
- **Self/Other Artistic Knowledge-** The self/other artistic learning module introduces a laboratory based pedagogical model in which students explore the intrinsic arts therapies intersubjective processes and transformative mechanisms that emerge through artistic inquiry and which parallels the actual arts therapies experience.
- **Practicum-** The Practicum emphasizes the transformation of theoretical knowledge to practical application and specialization. All students are required to complete a teaching practicum for one term.

Beyond that students select and complete two terms of a practicum of their choice in: 1) academia/teaching; 2) research; or 3) applied clinical practice. The practicum helps students position themselves as they prepare for graduation.

- **Dissertation-** The dissertation is an original robust research project that directly relates to the development of and contribution to the theory and practice of the student's creative arts therapy specialization. The dissertation is the culmination and representation of the students' doctoral work that not only advances knowledge in their field, but also positions them for career opportunities in academia and research.

Research

The professions of art therapy, dance/movement therapy, and music therapy have grown and have become increasingly integrated as interventions in healthcare, education, and human services. Implicit in the emergent growth and integration of these professions is our responsibility to evaluate existing and develop new evidence-based theories and clinical practices. The mission of the PhD Program in Creative Arts Therapies is to generate, critically evaluate, and disseminate research to address this need and ultimately to advance the knowledge and evidence bases for these professions. Consequently, we have identified the following core values central to our research agenda.

Stewardship and scholarship in the Creative Arts Therapies Includes:

1. Critical evaluation of the philosophical assumptions inherent in and essential to the understanding, preservation and advancement of theory and practice of the CATs.
2. Critical evaluation of the research approaches and methods best suited for the investigation of theories, processes, and mechanisms in the creative arts therapies.
3. Generation of knowledge that contributes to the construction, evaluation, and credibility of best evidence-based theory and clinical practices.
4. Translation, dissemination and application of rigorous research that contributes to the preservation and advancement of our fields and the health of society.

PhD in Creative Arts Therapies Admission Requirements

Applicants for the Doctor of Philosophy (PhD) program in Creative Arts Therapies are screened based upon the required application documents plus a personal interview by the faculty. The application documents and interview are designed to assess the applicant's aptitudes in scholarship and commitment to advanced academic achievement and the development. Admission into the PhD program includes both firm and malleable requirements. The firm requirements include a Master's degree in Art, Dance/Movement, Music or Expressive Therapy, a minimum of three years post master's clinical experience, certification in the creative arts therapies field, and at least one research course. We encourage prospective students to inquire about applying to the PhD program even if they are uncertain that they meet all of the admission requirements. In many cases applicants are considered on a very individual basis and assessment. For this reason we look forward to speaking with applicants regarding eligibility and answering any questions.

Degree Requirements

Master's Degree in Art Therapy, Dance/Movement Therapy, Music Therapy, or Expressive Therapies.

Prerequisites (in addition to or included in Master's degree)

- 6.0 semester (9.0 quarter) credits equivalent in graduate level research coursework.
- 3.0 semester (4.0 quarter) credits equivalent of graduate coursework in multiculturalism, anthropology, or sociology.

Research Education and Training

The PhD in Creative Arts Therapies is a research degree. Consequently it is essential that those entering the program demonstrate foundational education and experience in research.

- Documented research courses with a grade of no less than a 'B'.
- Documentation of having conducted one research project. This can be a master's thesis project or post-master's research.

Scores and GPA

- MGPA of 3.5 or above from the master's degree education
- GRE's are not required but recommended on a case-by-base basis at the discretion of the PhD Program

Clinical Experience and Credentials

- A minimum of 2 years full-time equivalent post-master's degree creative arts therapies clinical practice.
- Professional credentials including board certification and/or registration in the applicant's Creative Arts Therapies discipline. A professional license is preferred but not required.

Academic Writing Proficiency

Central to success in the PhD program is the ability to write at a professional scholarly level. Even though this ability will develop as a result of being a doctoral student, it is essential that the applicant demonstrate an interest in, commitment to, and aptitude for scholarly writing. Academic Writing Proficiency is evaluated based upon the following criteria and documentation:

- **Academic Writing Sample:** Demonstration of scholarly writing proficiency from an academic writing sample. This could be a graded graduate writing sample or an independently authored publication. Applicants are also invited to generate a new writing sample specifically for this application. All scholarly writing samples should be selected to best represent the applicant's scholarly accomplishments and potential.
- **Publication or manuscript for submission:** Documentation of having submitted an article for a peer reviewed publication. The documentation should be in the form of a manuscript that was submitted to a journal or as a chapter in an edited book. This manuscript can also be used for the academic writing sample if it was authored solely by the applicant. If it was co-authored, an additional independently authored sample is required to fulfill the requirement for demonstration of scholarly writing proficiency.

- **Admissions Essay:** The admissions essay is an important part of the application and writing proficiency assessment process. Since the PhD is the highest level of scholarly education, the expectation is for incoming students to possess and demonstrate competency in this area as reflected in their writing. The scholarly writing not only requires writing skill but also represents a thought process—the ability to review, organize, select and synthesize ideas of self and other. In addition, scholarly competence requires familiarity with acceptable writing styles. For those reasons we require an admissions essay which is in three parts:

- **Reasons for Application:** In this section briefly describe your professional background, your clinical practice and interests and how these experiences coalesced in your decision to apply to the PhD Program (1 page).
 - **Research Interests:** In this section describe 1) two areas of interest for your own research; 2) a summary of current research in these areas; and, 3) the direction you hope to take your research (3 pages).
 - **Academic and Career Goals:** Conclude your essay with a summary of your academic and career goals (1 page).
- **All writing samples should be submitted in APA format.**

Letters of Recommendation

Three letters of recommendation are required as a part of the application process. The letters should be from individuals who can knowledgeably address the applicant's aptitudes for scholarship and teaching. Recommenders should also address the applicant's maturity, initiative, self-directed motivation, and commitment to higher education.

Interview

When the application is completed it will be reviewed by the faculty admissions committee to determine if the applicant meets the admission criteria. Following the initial screening, a determination is made of whether or not the applicant meets the admission criteria. If the determination is made that the applicant does meet the admission criteria, the applicant is scheduled for an interview with the faculty in the PhD program in Creative Arts Therapies. The interview protocol includes:

- Review of application materials and associated questions to address scholarly competencies for the program.
- Discussion regarding the theory and practice of the creative arts therapies and the applicant's specific discipline.
- Discussion of the applicant's research interests, competencies, and ideas.
- Discussion of the applicant's reasons and motivation for applying for doctoral education.
- An on-site writing assignment may be included as part of the interview, on a case-by-case basis.

Please contact Ms. Kristen Scatton, Admissions Coordinator, for additional information about the admission requirements and the application process at kms558@drexel.edu or 267-359-5511.

Note: Admissions Schedule

The early priority deadline is January 15th, with rolling admissions through July 1st.

For additional information about how to apply, visit the Drexel Admissions page on PhD in Creative Arts Therapies (<http://www.drexel.edu/grad/programs/cnhp/creative-arts-in-therapy>).

Degree Requirements

The mission of the PhD in Creative Arts Therapies program is to cultivate stewards of the professions who can preserve the traditions of the disciplines, promote scholarly and clinical advancement, and contribute to the evidence base of the fields. In pursuit of the program mission, the curriculum includes four interactive learning modules and a dissertation research project that comprise a full-time degree program:

- Interdisciplinary module
- Research module
- Self/other artistic module
- Practicum module

Located within these four learning modules and within the dissertation research are the following educational constructs and objectives:

- 1. Learning Culture:** To create an innovative learning culture in which students can become advanced, critical, and creative thinkers, scholars and leaders in their field.
- 2. Epistemological Integrity:** To cultivate a learning culture respectful of the epistemology of the creative arts therapies disciplines and resulting in the generation of an indigenous to the Creative Arts Therapies disciplines.
- 3. Philosophy and Theory:** To identify and articulate the interdisciplinary philosophical assumptions which contribute to the worldview, indigenous epistemology, theory, and practice in the arts therapies.
- 4. Theory and Practice:** To systematically examine and assess existing theory, propose revisions as necessary, and develop new theoretical constructs that contribute to the evidence base for the creative arts therapies disciplines.
- 5. Research:** To expand the quality and quantity of original research while systematically and critically evaluating the traditional or innovative research paradigms most compatible with the epistemology, knowledge gaps, and research questions in the Creative Arts Therapies.
- 6. Research and Evidence Base:** To generate and disseminate research contributing to theory building and critical evaluation of epistemologically relevant evidence based practice in the fields of art therapy, dance/movement therapy, and music therapy.
- 7. Dissemination and Translation:** To expand the dissemination of knowledge and arts therapies services to both professional and public communities.
- 8. Leadership and Advocacy:** To prepare scholarly leaders, researchers and advocates in the professions of art therapy, dance/movement therapy and music therapy.

For additional information about the program, visit the College of Nursing and Health Professions' PhD in Creative Arts Therapies web site.

General Requirements

The following general requirements must be satisfied in order to complete the PhD in Creative Arts Therapies:

- 48.0 quarter credits of required and elective courses as designated
- Passage of the Candidacy/Qualifying exam (administered after the completion of one year)
- Approval of dissertation proposal
- Completion of one quarter of a Teaching Practicum and two quarters of additional Practicum of the student's choice in one of the following areas: teaching, research, or advanced clinical practice
- Completion and passage of the dissertation
- Passage of final oral exam/oral defense of dissertation

The required courses in the curriculum are organized into four essential learning modules: 1) interdisciplinary; 2) research; 3) self/other and artistic knowledge; and 4) practical application. These courses comprise the key components of the doctoral program, along with the dissertation.

Interdisciplinary Seminars

ARTS 703	Interdisciplinary Seminar I	3.0
ARTS 704	Interdisciplinary Seminar II	3.0
ARTS 706	Interdisciplinary Seminar IV	3.0

Research Courses

ARTS 712	Research I: Philosophy & Theory	3.0
ARTS 715	Innovative and Emergent Research Methods	3.0
RSCH 714	Qualitative Research Methods I	3.0
RSCH 759	Foundations of Biostatistics	3.0

ARTS 718	Studio Based Artistic Inquiry III	3.0

Practical Application Courses

Practica in either research, teaching, clinical supervision, or advanced clinical practice.

ARTS 812	Teaching Practicum	1.0
ARTS 809	Practicum II	2.0-9.0
ARTS 810	Practicum III	2.0-9.0

Dissertation Research - Minimum of 4 credits

		4.0
ARTS 804	Dissertation Research I	
ARTS 805	Dissertation Research II	
ARTS 806	Dissertation Research III	
ARTS 807	Dissertation Research IV	

Elective

Students, with advisement and in accordance with their educational plan, may choose a course in their content area.

Total Credits	48.0-62.0
---------------	-----------

- * The dissertation is an original research project, the content of which directly relates to the epistemology, theory, and/or practice of the student's creative arts therapy specialization.

All electives must be graduate courses and can be selected from those courses offered at Drexel University. In particular, doctoral level courses in the College of Nursing and Health Professions, School of Public Health, College of Arts and Sciences, and/or the School of Education may be the most relevant to students in this program. (The Creative Arts Therapies PhD program director will obtain permission for the student to take the

elective from the relevant Dean of the College or School, and the relevant program director and course instructor.)

Content areas that are acceptable for electives include the following: anthropology, biology, creativity, culture and communication, ethics, health psychology, literature, neuroanatomy, neuropsychology, philosophy, psychology, psychoanalysis, sociology, advanced statistics. Additional content areas may be added by special request as approved by the supervising faculty advisor and program director.

* The dissertation is an original research project, the content of which directly relates to the epistemology, theory, and/or practice of the student's creative arts therapy specialization.

Nanomaterials MS Faculty

Nicolas Alvarez, PhD (*Carnegie Mellon University*). Assistant Professor. Photonic crystal defect chromatography; extensional rheology of polymer/polymer composites; surfactant/polymer transport to fluid and solid interfaces; aqueous lubrication; interfacial instabilities.

Michel Barsoum, PhD (*Massachusetts Institute of Technology*). Distinguished Professor. Processing and characterization of novel ceramics and ternary compounds, especially the MAX and 2-D MXene phases.

Jason Baxter, PhD (*University of California, Santa Barbara*). Professor. Solar cells;- semiconductor nanomaterials and thin films;- ultrafast spectroscopy.

Hao Cheng, PhD (*Northwestern University*). Assistant Professor. Drug delivery, molecular self-assembly, cell-nanomaterial interactions, regenerative medicine and cell membrane engineering.

Aaron Fafarman, PhD (*Stanford University*). Assistant Professor. Photovoltaic energy conversion; solution-based semiconductor synthesis; colloidal nanocrystals; electrical and optical spectroscopies.

Yury Gogotsi, PhD (*Kiev Polytechnic Institute*) Director, A. J. Drexel Nanotechnology Institute. Distinguished University & Charles T. and Ruth M. Bach Professor. Nanomaterials; carbon nanotubes; nanodiamond; graphene; MXene; materials for energy storage, supercapacitors, and batteries.

Lin Han, PhD (*Massachusetts Institute of Technology*). Assistant Professor. Nanoscale structure-property relationships of biological materials, genetic and molecular origins soft joint tissue diseases, biomaterials under extreme conditions, coupling between stimulus-responsiveness and geometry.

Maher Harb, PhD (*University of Toronto*). Assistant Professor. Solid state physics, ultrafast electron diffraction, time-resolved X-ray diffraction, ultrafast lasers, nanofabrication, nano/microfluidics, instrument development, vacuum technologies.

Vibha Kalra, PhD (*Cornell University*). Associate Professor. Nanomaterials for energy storage devices; electrospinning of nanofibers; in-situ spectroscopy to understand energy storage mechanisms; molecular dynamics simulations.

Goran Karapetrov, PhD (*Oregon State University*). Associate Professor. Experimental solid state physics, scanning probe microscopy, nanoscale catalysis, mesoscopic superconductivity.

Richard Knight, PhD (*Loughborough University*) Associate Department Head and Undergraduate Advisor. Teaching Professor. Thermal plasma technology; thermal spray coatings and education; plasma chemistry and synthesis.

Kenneth K.S. Lau, PhD (*Massachusetts Institute of Technology*). Associate Professor. Polymer thin films and devices; solar cells, supercapacitors and batteries; superhydrophobic and superhydrophilic surfaces; surface science and engineering; chemical vapor deposition.

Christopher Y. Li, PhD (*University of Akron*). Professor. Soft and hybrid materials for optical, energy, and bio applications; polymeric materials, nanocomposites, structure and properties.

Andrew Magenau, PhD (*University of Southern Mississippi*). Assistant Professor. Structurally complex materials exhibiting unique physical properties designed and fabricated using an assortment of methodologies involving directed self-assembly, externally applied stimuli, structure-function correlation, and applied engineering principles suited for technologies in regenerative medicine, biological interfacing, catalytic, electronic, and optical applications

Michele Marcolongo, PhD, PE (*University of Pennsylvania*) Department Head. Professor. Orthopedic biomaterials; acellular regenerative medicine, biomimetic proteoglycans; hydrogels.

Steven May, PhD (*Northwestern University*). Associate Professor and Graduate Advisor. Synthesis of complex oxide films, superlattices, and devices; materials for energy conversion and storage; magnetic and electronic materials; x-ray and neutron scattering.

Ekaterina Pomerantseva, PhD (*Moscow State University, Russia*). Anne Stevens Assistant Professor. Solid state chemistry; electrochemical characterization, lithium-ion batteries, energy generation and storage; development and characterization of novel nanostructured materials, systems and architectures for batteries, supercapacitors and fuel cells.

Caroline L. Schauer, PhD (*SUNY Stony Brook*). Associate Professor. Polysaccharide thin films and nanofibers.

Wei-Heng Shih, PhD (*Ohio State University*). Professor. Colloidal ceramics and sol-gel processing; piezoelectric biosensors, optoelectronics, and energy harvesting devices; nanocrystalline quantum dots for bioimaging, lighting, and solar cells.

Joshua Snyder, PhD (*Johns Hopkins University*). Assistant Professor. Electrocatalysis (energy conversion/storage); heterogeneous catalysis corrosion (dealloying nanoporous metals); interfacial electrochemical phenomena in nanostructured materials; colloidal synthesis.

Jonathan E. Spanier, PhD (*Columbia University*) Associate Dean, Strategic Planning, College of Engineering. Professor. Light-matter interactions in electronic materials, including ferroelectric semiconductors, complex oxide thin film science; laser spectroscopy including Raman scattering.

Kara Spiller, PhD (*Drexel University*). Assistant Professor. Macrophage-biomaterial interactions, drug delivery systems, and chronic wound healing. Cell-biomaterial interactions, biomaterial design, and international engineering education.

Ying Sun, PhD (*University of Iowa*). Associate Professor. Transport processes in multi-component systems with fluid flow; heat and mass transfer; phase change; pattern formation.

Mitra Taheri, PhD (*Carnegie Mellon University*) Hoeganeas Associate Professor of Metallurgy. Associate Professor. Development of the ultrafast Dynamic Transmission Electron Microscope (DTEM) for the study of laser-induced microstructural evolution/phase transformations in nanostructured materials; use of various *in-situ* Transmission Electron Microscopy techniques.

Maureen Tang, PhD (*University of California, Berkeley*). Assistant Professor. Electrochemistry and electrochemical engineering; lithium-ion and beyond-Li batteries; electrocatalysis; passivation and charge transport.

Christopher Weyant, PhD (*Northwestern University*). Associate Teaching Professor.

Antonios Zavaliangos, PhD (*Massachusetts Institute of Technology*) A.W. Grosvenor Professor. Professor. Constitutive modeling; powder compaction and sintering; pharmaceutical tableting, X-ray tomography.

PhD in Nursing

Major: Nursing

Degree Awarded: Doctor of Philosophy

Calendar Type: Quarter

Total Credit Hours: 49.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.3801

Standard Occupational Classification (SOC) code: 29-1141

About the Program

The College of Nursing and Health Professions (CNHP) offers a Doctor of Philosophy in Nursing Science, a research-based program, which aims to prepare nurse researchers to design, conduct and lead research studies as emerging nurse scientists. The objective of the PhD in Nursing is to prepare professional nurses as scholars and researchers who will make a substantive contribution to the body of knowledge for the discipline of nursing and thereby improve health services for those who receive nursing care. Graduates are expected to plan and launch an independent program of research, seek needed support for initial phases of the research program, and begin to involve others (i.e., students, clinicians, and other researchers) in their activities.

The program of study builds on advanced preparation in nursing at the master's level (MSN to PhD). In addition to structured coursework, the program builds upon a research mentorship model which recognizes that research skills are learned most effectively by working with a faculty mentor, who provides opportunities to use the tools to conduct research and design, and execute an original research within a focused program of study.

Innovation, leadership, and interdisciplinary collaboration are strong educational values which are reflected in the Drexel University emerging strategic plan. The PhD in nursing program represents leadership in the fields, with interdisciplinary collaboration as core administrative and curricular values basic to its philosophy and epistemology. Innovation is also central to this doctoral program as evidenced in its curriculum and research philosophy.

The College of Nursing and Health Professions (CNHP), Graduate Nursing Division in which the Doctoral Nursing Program is housed, is regarded as a forward thinking, progressive, and interdisciplinary healthcare school within the university as well as in the larger context of advanced healthcare education.

Admission Requirements

Applicants must possess a master's degree in nursing for admission consideration. Criteria for admission include:

- GPA of 3.5
- GRE scores
- OREs (and TOEFLs, if international)
- Letters of recommendation (3)

- Articulation of research interests, career goals and insight into important issues in the profession in essays
- Professional accomplishments
- Fit with faculty research interests and expertise

Degree Requirements

The PhD curriculum requires 49.0 quarter credits of course work plus comprehensive examination and dissertation completion. Of the 49.0 credits, 15.0 credits are required interdisciplinary courses, and 21.0 credits in nursing science. In addition, there are three elective courses that form the student's field of concentration related to their dissertation research. These elective courses can be taken anywhere within the university but must be approved by the student's advisor and the Doctoral Curriculum Committee in advance of taking these courses. The student files a plan of Study outlining these courses in the winter of the first year which is approved by the Curriculum Committee.

Required Courses

NURS 800	Theoretical Foundations of Nursing Inquiry 1	3.0
NURS 801	Theoretical Foundations of Nursing Inquiry II	3.0
NURS 803	Doctoral Seminar: Scientific Integrity	1.0
NURS 804	Doctoral Seminar: Creating Intellectual Community	1.0
NURS 805	Doctoral Seminar: Grantsmanship	1.0
NURS 806	Scientific Appraisal and Knowledge Development	3.0
NURS 819	Qualitative Research Methods in Nursing Inquiry	3.0
NURS 820	The Science of Therapeutics	3.0
RSCH 759	Foundations of Biostatistics	3.0
RSCH 770	Foundations in Research Methods	3.0
RSCH 811	Intermediate Biostatistics	3.0
RSCH 812	Interpretation of Data	3.0
RSCH 813	Measurement Theory in Healthcare	3.0
Required Research Apprenticeship (total of 3 credits)		3.0
NURS 850	Research Apprenticeship (Must be repeated 2 times)	
Dissertation Research (minimum of 4 credits)		4.0
NURS 989	Dissertation (May be repeated up to 7 times)	
Electives		9.0
NURS 860	Integration of Genetics/Genomics in a Research Agenda	
NURS 861	Interdisciplinary Approaches in Aging Research	
NURS 862	Reproductive Epidemiology	
NURS 863	Mixed-Methods Research	
NURS 1899	Independent Study in Nursing	

Total Credits 49.0

Physician Assistant (PA)

Major: Physician Assistant

Degree Awarded: Master of Health Sciences (MHS)

Calendar Type: Quarter

Total Credit Hours: 117.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.0912

Standard Occupational Classification (SOC) code: 29-1071

About the Program

The Drexel University Physician Assistant Program provides graduates with a Master of Health Science degree and eligibility to sit for the PANCE (Physician Assistant National Certifying Examination).

The physician assistant (PA) is a primary health care provider who, when graduated from an accredited program and national certified and state-licensed, is eligible to practice medicine with the legal supervision of a physician.

PAs perform many duties including, but not limited to, physical examinations, diagnosis and treatment of illnesses, ordering and interpretation of lab tests, assist in surgery, perform procedures, perform hospital rounds, prescribe medicines and provide patient education.

The mission of this program is to:

- Educate qualified primary care physician assistants
- Improve health care delivery in rural and urban medically underserved areas
- Promote the physician assistant profession

Additional Information

For more information about this program, contact: paadmissions@drexel.edu

For more details about the program, visit the College of Nursing and Health Professions Physician Assistant (<https://www.drexel.edu/cnhp/academics/graduate/MHS-Physician-Assistant>) page.

Degree Requirements

The intensive curriculum consists of professionally related coursework taken during a continuous period (the part-time option requires an additional calendar year) and gives students an understanding of both the health care system within which they will work and the functions appropriate to the role of the physician assistant. The curriculum is divided into a full year of didactic courses followed by an additional 15 months of supervised clinical practice.

Training begins with four quarters of didactic education which integrates patient interaction throughout. The clinical training phase consists of six (6) five-credit, five week clinical rotations in medicine, surgery, women's health, pediatrics, emergency medicine, and psychiatry. The clinical phase of the curriculum is completed on a full-time basis for both full and part-time students.

The final portion of the curriculum consists of two, 10-credit quarter-long, primary care practica (preceptorships). During the preceptorship phase, each student is assigned to two primary care sites for individualized clinical training with physician preceptors. Training sites during the clinical year are located throughout Pennsylvania and in other states. Students are expected to relocate during the clinical phase and are responsible for all associated financial costs, including transportation and living expenses.

The program is intensely challenging, both intellectually and physically, and requires stamina as well as personal and financial sacrifice on the part of the students. The program demands a high degree of integrity, self-sufficiency, motivation, and self-discipline, and highly developed study skills.

The Physician Assistant program utilizes electronic documentation and communications. Therefore, all students are required to have laptop computers with Web access capability.

Contact the Physician Assistant Program (<https://www.drexel.edu/cnhp/academics/graduate/MHS-Physician-Assistant>) for more information on the sequencing for the part-time option.

Required Courses

First Year

Fall		Credits
PA 540	Clinical Anatomy	5.0
PA 545	Physician Assistant Practice	1.0
PA 543	Ethical Issues in Physician Assistant Practice	2.0
PA 542	Patient Communication	2.0
PA 544	Clinical Assessment	5.0
Term Credits		15.0

Winter

In this quarter, part-time students may take PA 546 Health Policy for Physician Assistance Practice and/or an elective in addition to the required courses. This will enable them to take the first summer quarter off. addition to the required courses.

PA 548	Principles of Medical Science I	2.0
PA 556	Clinical Medicine I	5.0
PA 551	Pharmacology and Therapeutics I	3.0
PA 559	Clinical Skills I	2.0
PA 547	Evidence Based Medicine for Physician Assistants	3.0
Term Credits		15.0

Spring

PA 549	Principles of Medical Science II	2.0
PA 557	Clinical Medicine II	5.0
PA 552	Pharmacology and Therapeutics II	2.0
PA 560	Clinical Skills II	2.0
PA 554	Biopsychosocial Issues in Patient Care	5.0
Term Credits		16.0

Summer

In this quarter, part-time students may take PA 546 Health Policy for Physician Assistant Practice plus an elective if they wish to attend during the summer quarter.

PA 550	Principles of Medical Science III	2.0
PA 558	Topics in Clinical Practice	5.0
PA 553	Pharmacology and Therapeutics III	2.0
PA 561	Clinical Skills III	4.0
PA 546	Health Policy for Physician Assistant Practice	2.0
Term Credits		15.0

Second Year

Fall

The Clinical Phase (Full-time for all students, 5 quarters)		
Rotation I		5.0
Rotation II		5.0
Term Credits		10.0

Winter

Rotation III		5.0
Rotation IV		5.0
Graduate Project I		3.0
Term Credits		13.0

Spring

Rotation V		5.0
Rotation VI		5.0
Term Credits		10.0

Third Year

Summer

PA 635	Primary Care Practicum I	10.0
PA 638	Graduate Project II	3.0-6.0
Term Credits		13.0-16.0

Fourth Year

Fall

PA 637	Primary Care Practicum II	10.0
Term Credits		10.0

Total Credit: 117.0-120.0

*Clinical Year Rotation Courses

The sequencing of the six clinical rotations will vary for individual students, but all students must take all six rotations.

PA 629	Medicine Rotation	5.0
PA 630	Pediatrics Rotation	5.0
PA 631	Obstetrics and Gynecology Rotation	5.0
PA 632	Psychiatry and Behavioral Health Rotation	5.0
PA 633	Surgery Rotation	5.0
PA 634	Emergency Medicine Rotation	5.0

Admission Requirements

The Drexel University Physician Assistant Program utilizes the Central Application Service for Physician Assistants (CASPA). All applicants must complete the CASPA application process no later than October 1st of the year prior to expected date of matriculation. Applications must be e-submitted, complete (including the receipt by CASPA of all transcripts, reference forms, and other supporting documentation such as foreign transcript evaluations and TOEFL score) and verified by CASPA by the October 1st deadline. Applicants may not apply directly to the Drexel University Physician Assistant Program. Applications made directly to the Office of Enrollment Management (Admissions) of Drexel University will not be processed.

- For the 2016-2017 admissions cycle, applications must be verified by CASPA no later than October 1st, 2016.
- Applications remaining unverified by CASPA for any reason after the October 1st deadline will not be processed.
- Effective with the 2017-2018 admissions cycle, all applications must be verified by CASPA no later than September 1st.
- Beginning with the 2017-2018 application cycle (open mid-April - October 1, 2017) all prerequisites must be completed at time of application.

For additional details about the application process, visit the Physician Assistant Program's Admissions (<https://www.drexel.edu/cnhp/academics/graduate/MHS-Physician-Assistant>) web page.

Application Prerequisites

- A minimum grade point average of 3.0 on a 4.0 grading scale from all colleges and universities attended is required for the following three (3) categories: non-science courses, natural science courses, and combined overall courses. Applications will not be reviewed unless the applicant has attained these minimum requirements at time of application.
- Meet the technical standards for admission, progression, and graduation from the Physician Assistant Program. Each applicant is expected to review completely the "Technical Standards for PA Program" PDF at the end of this page. Individuals unable to meet these technical standards, with or without reasonable accommodation, are counseled to pursue alternate careers.
- Official transcripts from all colleges and universities attended sent directly to CASPA.
- Non-United States-based educational institutional transcripts must be evaluated by an approved agency (see the listing of acceptable agencies on the CASPA website at https://portal.caspaonline.org/faq/foreign_transcripts.htm). Evaluation fees are the responsibility of the applicant. Evaluations must be sent directly to CASPA.

- Three completed reference forms with accompanying letters of recommendation attached and submitted as part of the official CASPA application. Preferred references are from individuals who have interacted with the applicant in a supervisory capacity or academic instructors who have personal knowledge of the applicant. Submission of references from friends, relatives, personal physicians, or instructors who do not possess a personal, supervisory knowledge of the applicants is discouraged.
- A personal statement recorded as part of the CASPA application.
- An applicant whose native language is not English must submit scores from the TOEFL iBT examination unless the applicant has graduated with a bachelor's degree from a U.S. college or university. The minimum required score for the iBT (Internet Based Testing) is 79 and a minimum score of 26 is required for the speaking component. Find more detailed information at <http://www.toeflgoanywhere.org/>. Scores must be submitted directly to CASPA.
- Meet the minimum prerequisite coursework as detailed in the "Admission Requirements and Process" PDF below.

A minimum of 500 hours of clearly documented volunteer/paid direct hands-on patient contact accrued by the time of application and recorded as part of the official CASPA application is required. Ensure that all hours are accurately reported. Applicants may list the same position in multiple sections in order to account for multiple experiences (patient contact, related health care, research, shadowing, etc.) accrued in the same position as long as each hour is not reported in more than one experience category. Please review the "Patient Contact" PDF below for more information regarding acceptable forms of patient contact.

- Graduate Record Examination (GRE) scores are not required.
- The Physician Assistant Program does not grant advanced standing.

Physician Assistant Faculty

Patrick C. Auth, PhD, PA-C (*Drexel University*) *Department Chair, Physician Assistant Department*. Clinical Professor. Clinical reasoning of physician assistant students.

Adrian Banning, MMS, PA-C (*Arcadia University*). Assistant Clinical Professor. Research Coordinator, Primary care and evidence-based medicine.

Geraldine A. Buck, DrPH, MHS, PA-C (*Drexel University*) *Director, Physician Assistant Post-Professional Master's Program*. Associate Teaching Professor. Public health.

Ryan Clancy, MSHS, MA, PA-C (*The George Washington University*) *Co-Director, Clinical Education*. Clinical Instructor. Primary care, behavioral and occupational health.

Ellen D. Feld, MD, FACP (*University of Cincinnati, College of Medicine*). Clinical Professor. Clinical medicine and ethical issues.

Gretchen L. Fox, MMSc, PA-C (*St. Francis College*) *Associate Program Director*. Associate Clinical Professor. Internal medicine/family practice.

Juanita Gardner, MPH, PA-C (*Drexel University*). Assistant Clinical Professor. Primary care and global health.

Julie Kinzel, MEd, PA-C (*Temple University*). Assistant Clinical Professor. Long term care experiences, geriatrics, gastroenterology and liver disease.

Daniela C. Livingston, PA-C, MD (*Medical School, Bucharest, Romania; University of Washington, Seattle*). Assistant Clinical Professor. Pediatrics, primary care and working with underserved populations, with a special emphasis on preventative pediatrics.

Ann McDonough Madden, MHS, BS, PA-C (*Drexel University*). Associate Clinical Professor. Primary care, behavioral health, urban health and health equity.

Nina Multak, MPAS, PA-C (*University of Nebraska*) *Director, Primary Care Practicum*. Associate Clinical Professor. Human patient simulators, standardized patients and healthcare informatics.

Catherine Nowak, MS, PA-C (*Mercy College*) *Director of Clinical Education*. Assistant Clinical Professor. Clinical education, primary care medicine, emergency medicine.

Clare Pisoni, MPAS, PA-C (*University of Nebraska*). Clinical Instructor. Critical Care Medicine, Surgery, Simulation.

Allison Rusgo, MHS, MPH, PA-C (*Drexel University*). Assistant Clinical Professor. Emergency medicine, global health.

Megan Schneider, MMS, MSPH, PA-C (*Arcadia University*). Clinical Instructor. Emergency medicine, pathophysiology, clinical medicine.

Diana D. Smith, MHS, PA-C (*Drexel University*) *Director, didactic curriculum*. Assistant Clinical Professor. Primary care, global health care; distance education.

Charles Stream, MPH, PA-C (*George Washington University*). Assistant Clinical Professor. Primary care, evidenced based medicine.

Justin Wolfe, MHS, PA-C (*Drexel University*). Clinical Instructor. Evidence-based medicine, patient communication strategies, bioethics and primary care practice.

Physician Assistant Post-Professional Master's Program

Major: Physician Assistant, Post-Professional Degree Awarded: Master of Health Sciences (MHS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.0912

Standard Occupational Classification (SOC) code: 29-1071

About the Program

The Master of Health Science (MHS) degree is awarded by the University through the College of Nursing and Health Professions' Physician Assistant Post-Professional Master's program. This program builds upon knowledge and skills learned in the PA professional training programs in areas of health policy, evidence-based practice, and leadership. The program is available totally online, and it may be completed on a part-time basis.

The Physician Assistant Post-Professional Master's program provides graduate education courses as a basis for personalized, professional development within the student's selected area of study. The goal of the program is to enhance basic physician assistant skills and to mentor students in areas of study beyond what is offered by entry-level physician assistant programs. The individually selected study concentration is

augmented by the expertise of seasoned faculty and the vast resources of the University.

Specifically, the Physician Assistant Post-Professional Master's program seeks to:

- Broaden the base and depth of analytical thinking by providing a foundation for scholarly inquiry
- Mentor physician assistants in personalized, professional development to enhance the PA profession, its members, and the communities they serve

Additional Information

For more information about this program, contact the the Business Manager:

Denise Mielechowski

Degree Requirements

All students in this program complete a total of 45.0 quarter credits for graduation. The program requires completion of 5 core courses (25.0 quarter credits). The cognate courses, 15.0 quarter credits, are courses in a student's area of interest, and 5.0 quarter credits for the capstone experience that deepens a student's understanding of chosen areas.

For the exceptional graduate student with significant professional credentials achieved as a physician assistant, preparation and presentation of the professional portfolio to a university-based multidisciplinary committee may substitute for all or portions of the credits required for the two graduate project courses.

Required Core Courses

PA 581	Research Methods and Designs	5.0
PA 582	Principles of Evidence-Based Practice	5.0
PA 583	Clinical Application of Epidemiology	5.0
PA 584	Health Policy	5.0
PA 585	Leadership and Stewardship	5.0

Study Concentration Courses

Cognate 1 *		5.0
Cognate 2 *		5.0
Cognate 3 *		5.0
PA 698	Capstone Project	5.0
Total Credits		45.0

* Students may select Cognate courses related to their areas of interest from one of the Study Tracks (<http://www.drexel.edu/catalog/masters/adv-pa.htm#Studytracks>) listed below.

Study Tracks

Clinical Practice

PA 641	Clinical Update	5.0
PA 642	Clinical Colloquium	5.0
or PA 640	Clinical Practicum	

PA 643	Clinical Practice Project Research	5.0
PA 698	Capstone Project	5.0

Health Promotion

PA 661	Tenets of Health Promotion	5.0
PA 662	Health Promotion Materials	5.0
PA 663	Health Promotion Project Research	5.0
PA 698	Capstone Project	5.0

Drexel e-Learning Certificate Options

Complementary and Integrative Therapies Certificate		12.0

Toxicology and Industrial Hygiene Certificate		12.0
PA 697	Independent Study	3.0
PA 698	Capstone Project	5.0

Certificate of Study in Clinical Research *		15.0
---	--	------

* PA 698 Capstone Project will be fulfilled with the completion of either CR 600S Designing the Clinical Trial or CR 609S Innovative Product Development.

Alternate Pathway

Cognate 1		5.0
Cognate 2		5.0
PA 695	Portfolio Preparation	1.0
PA 696	Portfolio Review	5.0-10.0
Total Credits		16.0-21.0

Post-Baccalaureate Certificate in Integrated Nursing Care of Autism Spectrum Disorder (ASD)

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post Baccalaureate

Number of Credits to Completion: 9.0 - 12.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 51.3801

Standard Occupational Classification (SOC) Code: 29-1141

Gainful Employment Disclosure (<http://deptapp08.drexel.edu/gainfulemployment/Integrated-Nursing-Care-ASD/51.3801-Gedt.html>)

Autism spectrum disorder (ASD) is a condition that has significant health implications across the lifespan for affected people and for family members.

This certificate program focuses specifically on the *integrated care* of the complex health problems of people affected by autism spectrum disorder, as well as the collaborations among patients, families, and healthcare providers. The program prepares students to pursue a highly innovative role in an area of practice in which the value of nursing care needs to be developed. Graduates of the certificate program will reshape how care is provided to people with ASD in multiple settings across the lifespan.

This post-baccalaureate certificate is designed for nurses already working in fields such as pediatrics, family practice, mental health, and school nursing. Students in master's programs may pursue this certificate as a graduate minor to achieve a specialization in autism spectrum disorder nursing care. Students in the master's programs may also take courses to fulfill elective requirements.

Goals and Objectives

- To provide nurses with information on the nursing care across the lifespan of people with autism spectrum disorders.
- To examine the prevalence, etiology, and clinical characteristics of autism spectrum disorder in the context of the family and team approach to care.
- To integrate scientific and evidence based knowledge of autism spectrum disorder with the clinical skills of the registered nurse working with this population across the lifespan.
- To integrate scientific and evidence based knowledge of autism spectrum disorder with the clinical skills of the registered nurse who specialized in the adult population.
- To formulate a practice philosophy and long term professional agenda in ASD care to include practice, education, and research.

Curriculum

Required course work for the Certificate in Integrated Nursing Care of Autism Spectrum Disorder is dependent upon the desired focus of study.

Admission Requirements

- Bachelor's Degree from a fully accredited program.
- 3.0 GPA or above on all previous coursework or last 60 credits completed.
- Official transcripts from all previous educational institutions required.
- Personal statement describing interest in certificate program.
- Curriculum Vitae or Resume.
- One professional letter of recommendation

TOEFL Requirement

International applicants, as well as immigrants to the United States and U.S. permanent residents whose native language is not English and who have not received a bachelor's degree or higher in the United States, Australia, Canada, Ireland, New Zealand, or the United Kingdom, must show proficiency in English speaking as well as listening, writing, and reading. American citizens born on U.S. military bases abroad may be waived from the TOEFL requirement after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

- If you take the TOEFLiBT exam, you must have a minimum combined score for the listening, writing, and reading sections of 79 plus a speaking section score of 26 or higher.
- If you take the TOEFL, you must have a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher.

Program Requirements

Select one Spectrum Disorder Focus

Across the Lifespan		12.0
NURS 540	ASD I: Introduction to Autism Spectrum Disorder

Post-Master's Certificate in Geriatrics

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's Certificate

Number of Credits to Completion: 20.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.0912

Standard Occupational Classification (SOC) Code: 29-1071

About the Program

The PA Post-Master's Certificate in Geriatrics consists of three didactic courses and one clinical practicum (20.0 quarter credit hours). The certificate program is offered part-time for working professionals and is one year in length; the program begins in the Winter Term of each

year (January), and runs through the Fall term of the following year (December).

The three didactic courses are offered online, and the clinical practicum in geriatrics is a supervised clinical practice experience. For students who desire more than one term of supervised clinical practice, the clinical practicum course may be taken (optionally) for an additional one or two terms.

The PA Post-Master's Certificate in Geriatrics program is designed to

- enhance the knowledge and skills of Physician Assistants in clinical geriatrics
- build competencies in patient-centered, evidence-based clinical practice
- improve access to high-quality geriatric care

Admission Requirements

Applicants to the PA Post-Master's Certificate (PMC) program in geriatrics must be/have:

- Master's degree (minimum GPA 3.0)
- Graduate of an ARC-PA accredited PA Program
- Current NCCPA certificate
- Active, unrestricted license for clinical practice as a Physician Assistant
- Minimum of one year of clinical practice as a PA
- Transcripts from all universities, colleges, post-secondary educational institutions
- Personal statement describing reasons for pursuing the PMC and professional goals/plans
- Two letters of reference

Program Requirements

PA 810	Clinical Applications of Geriatric Physiology	5.0
PA 811	Geriatrics I	5.0
PA 812	Geriatrics II	5.0
PA 819	Geriatrics Clinical Practicum	5.0
Total Credits		20.0

Sample Plan of Study

Term 1		Credits
PA 819	Geriatrics Clinical Practicum	5.0

Post-Master's Certificate in Music Therapy

Certificate Level: Graduate

Admissions Requirements: Master's degree

Certificate Type: Post-Master's Certificate

Number of Credits to Completion: 48.0

Instructional Delivery: Campus

Calendar Type: Quarter

Expected Time to Completion: 3 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 51.2305

Standard Occupational Classification (SOC) Code: 29-1129

Gainful Employment Disclosure (<http://deptapp08.drexel.edu/gainfulemployment/Music-Therapy/51.2305-Gedt.html>)

About the Program

The Post-Master's Certificate in Music Therapy combines didactic, experiential and clinical learning experiences. Students develop advanced music therapy competencies based upon theoretical knowledge, practical skills and self-reflective processes within a framework of multicultural perspectives. Music therapy students study alongside those in the art therapy and dance/movement therapy programs in counseling and psychotherapy core courses. Clinical training occurs in a variety of settings and integrates music therapy with current developmental, neuroscience, mental health and medical foundations. Theoretical and experiential music therapy courses draw upon current evidence-based literature for the development of foundational and advanced methods and techniques. All coursework is designed to assist students in cultivating awareness of the use of the self within the music therapy and counseling relationship.

About the Certificate

The certificate program is a 48.0 quarter credit course of study designed to meet the needs of qualified individuals who seek to become eligible to sit for the Board Certification Exam from the Certification Board for Music Therapists (<http://www.cbmt.org>) (CBMT). The Post-Master's Certificate in Music Therapy is designed for those with a Master's degree in another clinical mental health specialty who wish to add a specialization in music therapy with eligibility to sit for the exam of the Certification Board for Music Therapists, to earn the MT-BC credential. Each of the following courses addresses one or more competency areas delineated by the American Music Therapy Association. All are taught at the graduate level.

Admissions

Admission requirements for the certificate program are similar to those for the MA program in Music Therapy (p. 173). For additional information about admission to the program, visit the College of Nursing and Health Professions' Creative Arts Therapies (<https://www.drexel.edu/cnhp/academics/departments/Creative-Arts-Therapies>) web site.

Post-Master's Certificate in Nurse Anesthesia

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's Certificate

Number of Credits to Completion: 72.0

Instructional Delivery: Campus

Calendar Type: Quarter

Expected Time to Completion: 3 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 51.3804

Standard Occupational Classification (SOC) Code: 29-1151

Gainful Employment Disclosure (<http://deptapp08.drexel.edu/gainfulemployment/Nurse-Anesthesia/51.3804-Gedt.html>)

The Post Master's Certificate (PMC) in Nurse Anesthesia program is a full-time program that offers 7.0 theoretical nursing and research credits, 9.0 quarter credit basic science component, 31.0 quarter credits of a didactic anesthesia component and a 25.0 credits in a clinical component. Upon successful completion program outcomes student is awarded a post master's certificate in nurse anesthesia and is eligible to take the national certification examination offered by the NBCRNA - Council on Certification of Nurse Anesthetists.

The nurse anesthesia program is accredited by the:

Council on Accreditation of Nurse Anesthesia Educational Programs
 222 S. Prospect Ave, Suite 304
 Park Ridge, IL 60068
 847-692-7050

Admission Requirements

This certificate program is offered to those individuals who have earned a master's degree in nursing and seek further preparation in nurse anesthesia. Transcripts are reviewed and course work is determined on an individual basis. Contact the College of Nursing for more specific admission requirements (<https://www.drexel.edu/cnhp/academics/post-masters/Certificate-PM-Nurse-Anesthesia>).

Curriculum/Requirements

First Year

Term 1		Credits
Winter		
NURS 503	Basic Principles of Nurse Anesthesia	3.0
NURS 504	Overview of Nurse Anesthesia	3.0
NURS 550	Advanced Health Assessment & Diagnostic Reasoning	4.0
Term Credits		10.0

Term 2

Spring		
NURS 508	Nurse Anesthesia Clinical Practicum I	1.0
NURS 505	Chemistry and Physics	3.0
NURS 507	Nurse Anesthesia Pharmacology I	3.0
Term Credits		7.0

Term 3

Summer		
NURS 510	Advanced Principles of Nurse Anesthesia I	3.0
NURS 511	Nurse Anesthesia Pharmacology II	3.0
NURS 512	Nurse Anesthesia Clinical Practicum II	1.0
NURS 521	Advanced Pathophysiology I	3.0
Term Credits		10.0

Term 4

Fall		
NURS 515	Advanced Principles of Nurse Anesthesia II	3.0
NURS 516	Nurse Anesthesia Clinical Practicum III	2.0
NURS 522	Advanced Pathophysiology II	3.0
Term Credits		8.0

Second Year

Term 5

Winter		
NURS 517	Nurse Anesthesia Clinical Practicum IV	3.0
NURS 518	Advanced Principles of Nurse Anesthesia III	3.0
NURS 523	Advanced Pathophysiology III	3.0
NURS 530	Anesthesia Seminar	1.0
Term Credits		10.0

Term 6

Spring		
NURS 659	Advanced Principles of Nurse Anesthesia IV	3.0
NURS 683	Nurse Anesthesia Clinical Practicum V	3.0
Term Credits		6.0

Term 7

Summer		
NURS 684	Nurse Anesthesia Clinical Practicum VI	3.0
Term Credits		3.0

Term 8

Fall		
NURS 527	Evidence Based Approaches to Practice	3.0
NURS 687	Clinical Residency I	6.0
Term Credits		9.0

Third Year**Term 9**

Winter		
NURS 688	Clinical Correlative Seminars	3.0
NURS 689	Clinical Residency II	6.0
Term Credits		9.0

Total Credit: 72.0

* 1.0 credit Independent Study course may be substituted based upon review of MSN transcript.

Post-Master's Certificate in Nursing Education

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's

Number of Credits to Completion: 18.0

Instructional Delivery: Online, Campus

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 51-3817

Standard Occupational Classification (SOC) Code: 29-1171

Gainful Employment Disclosure (<http://deptapp08.drexel.edu/gainfulemployment/Nursing-Certificate-PM/51.3801-Gedt.html>)

The Graduate Certificate in Nursing Education program is offered to those individuals who have already earned a master's degree in nursing and seek further preparation in nursing education. The program can be completed through part-time study. Transcripts will be reviewed and course work will be determined on an individual basis.

The program prepares students to work as nursing educators, nursing faculty, or nursing professors in all types of programs, at all levels, in a variety of settings. This program has a special focus on preparing students with the required competencies to be successful on the new certified nursing educator exam. With such a severe and critical nursing faculty shortage in the United States (and even globally)—this program provides students with cutting-edge content essential for today's contemporary nurse educator.

The program integrates theories specific to adult learning, curriculum design and evaluation of courses and programs, critical thinking, both clinical and classroom techniques, and the preparation for the role of the nursing professor. This unique program even instructs students on how to teach online and use technology to teach nursing in innovative ways. The culminating practicum provides students with opportunities to put what has been learned into practice. Participants complete role practicum experiences in teaching, providing ample opportunity to apply theory to practice. In addition, students are required to attend an immersive on-campus simulation residency when taking Practicum. The residency hours will count as part of the required 160 total practicum hours (24 practicum hours earned). The residency is offered biannually in January or July.

Program Requirements

NURS 591	Foundations of Nursing Education	3.0
NURS 606	Curriculum Design for Higher Level Cognition	3.0
NURS 613	The Role and Responsibility of the Nursing Professor	3.0
or NURS 616	Teaching Methods in Nursing Education	
NURS 615	Assessment, Measurement and Evaluation	3.0
NURS 632	Nurse Educator and Faculty Role Practicum	6.0
Total Credits		18.0

Sample Plan of Study

Term 1		Credits
NURS 591	Foundations of Nursing Education	3.0

Post-Master's Certificate: Emergency/Trauma Nurse Practitioner

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Graduate Certificate

Number of Credits to Completion: 30.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.3816

Standard Occupational Classification (SOC) Code: 29-1171

The post-master concentration in emergency care online program prepares family and adult-gerontology primary care nurse practitioners, either currently working in this setting or who desire to make a change and work in the emergency care setting. This track within the nurse practitioner program in the College of Nursing Health Professions at Drexel University will provide the education and procedural skills necessary to competently and confidently work as a nurse practitioner in this unique setting. This rigorous program provides the education and skills necessary to function as a competent nurse practitioner and leader in the emergency care setting, the skills to perform the necessary diagnostic and therapeutic procedures, and to be eligible for board certification as an emergency nurse practitioner. The ENP program requires between 15.0 and 3.00 credits depending on the credit given for previously completed faculty supervised hours. Upon successful completion of credits and between 480 and 640 faculty supervised clinical hours graduates of the program are eligible to sit for the AANPCP Emergency Nurse Practitioner Board Certification Exam.

Admission Requirements

Master of Science in Nursing in Family Nurse Practitioner or Adult-Gerontology Primary Care Nurse Practitioner from program fully accredited by National League of Nursing American Association Colleges of Nursing (AACN.) The accrediting body for NLN is ACEN and the accrediting body for the American Association Colleges of Nursing is CCNE.

- GPA of 3.0 or above
- Current, unrestricted United States RN license

Required Documents

With multiple ways to submit documents, Drexel makes it easy to complete your application. Learn more by visiting our supporting document submission guide.

- A completed application
- Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended
- Two professional letters of recommendation from either previous or immediate supervisors or former nursing faculty members who can attest to your clinical knowledge, skill and potential aptitude for graduate study
- References will not be accepted from colleagues or family members
- Personal statement (800 to 1,600 words) that will give the admissions committee a better understanding of:
 - Why you are choosing this particular track
 - How your current work experience will enhance your experience in this program, and
 - Your plans upon completing the degree
- Resume including specific details of your responsibilities and job experiences
- A copy of your United States RN license (License verification from your nursing license registry website is acceptable)
- Additional requirements for International Students

Adult-Gerontology Primary Care Nurse Practitioners have the option to request a GAP Analysis completed for consideration of pediatric and adolescent hours to be applied to NURS 535 *FNP II Primary and Episodic Care of Infants, Children, and Adolescents*.

Program Requirements

NURS 535	FNP II: Primary and Episodic Care of Infants, Children and Adolescents	5.0
NURS 548	Advanced Pathophysiology	3.0
NURS 549	Advanced Pharmacology	3.0

Psychiatric Mental Health Nurse Practitioner Post-Master's Certificate

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's

Number of Credits to Completion: 34.0; 640 clinical hours

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional (CIP) Code: 51.3810

Standard Occupational Classification (SOC) Code: 29-1123

Gainful Employment Disclosure (<http://deptapp08.drexel.edu/gainfulemployment/Nursing-Certificate-PM/51.3801-Gedt.html>)

The online Psychiatric Mental Health Nurse Practitioner (PMHNP) program prepares practitioners to provide a wide range of services to patients across the lifespan and their families. This certificate is offered to those individuals who have earned a master's degree in nursing and seek further preparation as a Psychiatric Mental Health Nurse Practitioner. Once the certificate program is successfully completed, students will be

eligible to sit for the ANCC's Psychiatric and Mental Health Certification Examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On-Campus Intensive (OCI) learning experiences, simulation, and evaluation. OCI visits occur 2-4 times during the clinical portion of the program and range from 2-3 days. *Mandatory on-campus visits each quarter are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab. These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

Quality, Safety and Risk Management in Healthcare

Major: Quality, Safety and Risk Management in Healthcare

Degree Awarded: Master of Science (MS) or Master of Science in Nursing (MSN)

Calendar Type: Quarter

Total Credit Hours: 48 (MS); 46 (MSN)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.0701

Standard Occupational Classification (SOC) code: 11-9111

About the Program

This program is designed to prepare health professionals who can lead organizational efforts to improve and monitor quality metrics, improve safety for both patients and staff, and manage risks in a dynamic healthcare environment. Graduates of this program will be prepared to lead teams in a wide variety of quality and risk management initiatives including:

- Aligning the patient safety, risk, and quality functions within the organization.
- Ensuring that the patient safety, risk, and quality activities are aligned with the strategic goals of the organization.
- Assessing current activities in patient safety, risk, and quality to clarify responsibilities and reduce duplication of effort.
- Establishing a structure that ensures that patient care activities are addressed in a coordinated manner involving the patient safety, risk, and quality functions.
- Assembling a team to ensure that the structure for patient safety, risk, and quality activities maximizes legal protections while allowing for the flow of information across all functions.
- Coordinating process changes, data collection, data analysis, monitoring, and evaluation.
- Evaluating the roles of patient safety, risk, and quality as the organization's needs change.

This program has a mandatory 2-day on-campus intensive experience during the term prior to the capstone practicum.

Admission Requirements (MS)

Bachelor of Science from a regionally accredited institution of higher education

Grade Point Average (GPA): A GPA of 3.0 or above on all previous coursework or last 60 credits completed. Applications from individuals with GPA < 3.0 may be considered on individual basis.

Transcripts: Official transcripts from all previous educational institutions required. Transcripts must be submitted in sealed envelope directly from colleges/universities.

Prerequisites: N/A

References: Two professional references required from colleagues or supervisors who can attest to applicant's clinical knowledge, skill, and potential aptitude for graduate study. Recommendation letters must include address, phone number, and signature of recommender. The envelope must be submitted unopened.

Personal Statement/Essay: Personal statement describing interest in MS degree and particular specialty.

Interview/Portfolio: Admissions interview may be required

CV/Resume: Required.

Clinical/Work/Volunteer Experience: While specific experience not required, previous related work experience may make applicant more competitive.

International Students: International applicants, as well as immigrants to the United States and U.S. permanent residents whose native language is not English and who have not received a bachelor's degree or higher in the United States, Australia, Canada, Ireland, New Zealand, or the United Kingdom, must show proficiency in English speaking as well as listening, writing and reading. American citizens born on U.S. military bases abroad may be waived from the TOEFL requirement after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

If students take the TOEFLiBT exam, they must have:

- A minimum combined score for listening, writing, and reading sections of 79 plus a speaking section score of 26 or higher.
- a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher.

Degree Requirements

Core Courses

HSAD 530	Politics and Policy of Healthcare Resources	4.0
HSAD 505	Ethical and Legal Issues in Healthcare Management and Policy	4.0
IPS 544	Quality and Safety in Healthcare	3.0
RSCH 503	Research Methods and Biostatistics	3.0
RSCH 504	Evaluation and Translation of Health Research	3.0

Major Courses

IPS 501	Legal Compliance: Structure and Implementation	4.5
IPS 504	Regulations in Health Care	4.5
IPS 505	Health Care Quality and the Legal Context	4.5
IPS 506	HIPAA: A Patient's Legal Right to Privacy	4.5
IPS 584	Analysis of Performance Standards in Healthcare Quality	3.0
IPS 585	Science of Safety, Human Factors, and System Thinking	3.0
IPS 586	Creating a Culture of Safety	2.0

IPS 601	Quality, Safety and Risk Management Capstone	5.0
Total Credits		48.0

Rehabilitation Sciences

Major: Rehabilitation Sciences

Degree Awarded: Master of Health Sciences (MHS); Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MHS); 48.0 (post master's or clinical graduate degree)

Classification of Instructional Programs (CIP) code: 51.2308

Standard Occupational Classification (SOC) code: 29-1123

About the Programs

Master of Health Sciences Program

Individuals cannot enroll directly in the Master of Health Sciences in Rehabilitation Sciences program. Requirements for the degree completion include successful completion of 45.0 credit hours concluding with a case study or a clinical project.

Upon completion of the MHS program, graduates will be prepared to:

- Analyze the impact of injury or disease process on musculoskeletal or neuromuscular function within a specific population, including orthopedics, pediatrics, and hand rehabilitation.
- Improve their practice through clinical decision-making that is consistent with concepts of health promotion, client-centered care and current best evidence.
- Facilitate the transfer of health care policy and research findings into clinical practice.
- Evaluate methods of service delivery and intervention strategies and procedures at individual and program levels.
- Serve effectively as clinical educators and consultants to consumers and colleagues.
- Engage in professional life-long learning and contribute to the field of rehabilitation.

Additional Information

For more information, visit the Department of Physical Therapy and Rehabilitation Sciences (<https://www.drexel.edu/cnhp/academics/departments/Physical-Therapy>) web page.

PhD Program

Beginning in Fall 2018, this program is being renamed to "Health and Rehabilitation Sciences PhD."

The Doctor of Philosophy (PhD) is designed to prepare PhDs to be leaders as research scientists and educators in health and rehabilitation sciences.

Program Objectives

On completing the Doctor of Philosophy degree, graduates will be prepared to:

- Create innovative mechanisms, methods, interventions, and approaches for service delivery for health promotion and rehabilitation.
- Establish a research agenda that will impact health and rehabilitation sciences.
- Collaborate, integrate expertise, and conduct research within interprofessional teams.
- Write research proposals that are competitive for grant funding.
- Disseminate and translate research through presentations, publications, and contemporary media.
- Teach effectively and contribute to the academic community.
- Institute a plan for continued professional development as a research scientist.

Plan of Study

Student and faculty advisor collaboratively design an individualized plan of study based on common research interests. Prospective students are encouraged to explore our faculty research areas (<https://www.drexel.edu/cnhp/academics/departments/Physical-Therapy/Research>) and information on our PhD faculty mentors on our program website (<https://www.drexel.edu/cnhp/academics/doctoral/PHD-Rehabilitation-Sciences>).

Degree Requirements (MHS)

Master of Health Sciences (MHS): 45.0 quarter credits

Core Requirements

RSCH 519	Introduction to Biostatistics	3.0
RSCH 523	Methods for Health Research	3.0
PTRS 650	Motor Control and Learning Rehabilitation	3.0
PTRS 651	Applied Tissue Biomechanics	3.0
PTRS 721	Teaching Concepts in Rehabilitation	3.0
PTRS 758	Evidence-Based Rehabilitation	4.0

Concentration

Students select a minimum of 16-18 credits in one of the following concentrations. 16.0-18.0

Hand and Upper Quarter Rehabilitation Concentration Options

PTRS 767	Foundations in Hand Therapy	
PTRS 768	Upper Quarter Joint Pathology	
PTRS 769	Nerve Injuries of the Upper Quarter	
PTRS 770	Diseases That Affect the Hand	

Pediatrics Concentration Options *

PTRS 740	Issues in Pediatric Health & Rehabilitation	
PTRS 760	Pediatric Decision Making	
PTRS 761	Pediatric Clinical Application	
PTRS 772	Selected Topics in Pediatrics	

Orthopedics Concentration Options *

PTRS 590	Advanced Musculoskeletal Anatomy	
PTRS 765	Spinal Rehabilitation	

PTRS 766	Extremity Rehabilitation	
PTRS 767	Foundations in Hand Therapy	
PTRS 768	Upper Quarter Joint Pathology	
PTRS 769	Nerve Injuries of the Upper Quarter	
PTRS 770	Diseases That Affect the Hand	
PTRS 771	Work Injury Management	
RHAB 763	Biomechanics in Rehabilitation	
RHAB 764	Biomechanics in Human Movement	
RHAB 765	Introduction to Movement Science	
Electives *		8.0
PTRS 612	Pharmacotherapeutics	
RHAB 824	Teaching Practicum I	
RHAB 825	Teaching Practicum II	
RHAB 826	Teaching Practicum III	
RHAB 816	Special Topics	
RHAB 1899	Independent Study	
Final Project		
PTRS 786	MHS Final Project I	1.0-2.0
PTRS 787	MHS Final Project II	1.0-2.0
Total Credits		45.0-49.0

* Additional courses (as approved). Number of credits required for electives is dependent upon total credits in concentration selected. Contact the Rehabilitation Sciences Master of Health Science Program (<https://www.drexel.edu/cnhp/academics/departments/Physical-Therapy>) for more details.

Degree Requirements (PhD)

Beginning in Fall 2018, this program is being renamed to "Health and Rehabilitation Sciences PhD."

The core curriculum includes coursework in research and teaching. Additional courses are selected based on the student's area of interest, objective for doctoral study, and dissertation research. Students work individually with a faculty mentor to complete the required research and teaching practica.

Students must complete a minimum of 48.0 credits. A comprehensive examination and a dissertation research project are required. The PhD degree can be completed in 3.5 to 4 years of full-time study for students.

Additional Information

For more information, visit the Department of Physical Therapy and Rehabilitation Sciences web page.

Core Courses

NHP 762	Health Professional Education	3.0
RHAB 760	Academia for Rehabilitation Scientists	1.0
RHAB 761	Foundations of Rehabilitation Research	3.0
RHAB 830	Dissertation Research	6.0
RSCH 759	Foundations of Biostatistics	3.0
RSCH 770	Foundations in Research Methods	3.0
RSCH 811	Intermediate Biostatistics	3.0
RSCH 812	Interpretation of Data	3.0
RSCH 813	Measurement Theory in Healthcare	3.0
RSCH 815	Scientific Inquiry and Writing	3.0

Electives

In collaboration with advisor, students complete a minimum of 8.0 credits of electives, including independent study, to support their individualized research plan of study.

RHAB 1899	Independent Study	
Practica		9.0
Students are required to complete a minimum of 6.0 credits of research practicum and 3.0 credits of teaching practicum.		
NHP 822	Teaching Practicum	
RHAB 823	Research Practicum	
Total Credits		48.0

Sample Plan of Study (PhD)

Beginning in Fall 2018, this program is being renamed to "Health and Rehabilitation Sciences PhD."

Term		Credits
Term 1		
RHAB 761	Foundations of Rehabilitation Research	3.0
RSCH 759	Foundations of Biostatistics	3.0
RSCH 813	Measurement Theory in Healthcare	3.0
	Term Credits	9.0
Term 2		
RSCH 770	Foundations in Research Methods	3.0
RSCH 811	Intermediate Biostatistics	3.0
RSCH 823	Research Practicum	3.0
	Term Credits	9.0
Term 3		
NHP 762	Health Professional Education	3.0
RSCH 812	Interpretation of Data	3.0
Elective		3.0
	Term Credits	9.0
Term 4		
RHAB 760	Academia for Rehabilitation Scientists	1.0
RHAB 823	Research Practicum	1.0
	Term Credits	2.0
Term 5		
NHP 822	Teaching Practicum	1.0
RHAB 823	Research Practicum	1.0
RHAB 1899	Independent Study	2.0
Elective		3.0
	Term Credits	7.0
Term 6		
NHP 822	Teaching Practicum	2.0
RHAB 823	Research Practicum	1.0
RSCH 815	Scientific Inquiry and Writing	3.0
	Term Credits	6.0
Term 7		
RHAB 830	Dissertation Research	1.0
	Term Credits	1.0
Term 8		
RHAB 830	Dissertation Research	1.0
	Term Credits	1.0
Term 9		
RHAB 830	Dissertation Research	1.0
	Term Credits	1.0
Term 10		
RHAB 830	Dissertation Research	1.0
	Term Credits	1.0
Term 11		
RHAB 830	Dissertation Research	1.0
	Term Credits	1.0
Term 12		

RHAB 830	Dissertation Research	1.0
	Term Credits	1.0
Total Credit: 48.0		

Note: International students are required to maintain 9.0 credits per term except for summer terms.

Facilities

Teaching Facilities and Resources

Most classes are held in lecture halls, classrooms, or laboratories on the Center City (Health Sciences) Campus of Drexel University. The entire campus has wireless capability for easy internet access. The Department of Physical Therapy and Rehabilitation Sciences has two state-of-the-art dedicated laboratories. Our teaching resources also include supported distance learning technology. Instructional materials are provided through text, graphics, audio and video formats and are available online through a course management system 24 hours a day. Our online courses are highly interactive through the use of web discussion boards, audio chat tools, and video conferencing.

Research Facilities

The department's research facilities include over 9,000 square feet of well-equipped research laboratory space (Biomechanics, Gait, Pediatrics, and Neuromuscular Performance Labs), with equipment including force plates, EMG, motion analysis and human performance measurement equipment. This space includes conference rooms, PhD and post doc offices and is located next door to the Colleges 14,000 square feet, multi-disciplinary clinical practice.

The Department of Physical Therapy and Rehabilitation also values community partners as a central part of the research resources. Many faculty and students are involved in community-based research through collaborations with CanChild Centre, 11th Street Family Health Center, and numerous pediatric hospitals, out-patient facilities, and early intervention providers. Faculty are collaborating on research projects with nationally and internationally known researchers on several multi-site funded projects.

Physical Therapy and Rehabilitation Sciences Faculty

Maria Benedetto, DPT (*University of Puerto Rico; Columbia University*). Associate Clinical Professor. Pediatrics, Motor learning and motor control; yoga for children; dance prevention and injury rehabilitation

Lisa Ann Chiarello, PT, PhD, FAPTA (*Hahnemann University*) Director, PhD and Doctor of Health Science in Rehabilitation Sciences and Associate Director of Center for Family Intervention Science. Professor. Pediatric community-based practice; family-centered care; determinants of outcomes; and participation of children with physical disabilities.

David Ebaugh, PT, PhD (*Drexel University*). Clinical Professor. Identification and treatment of neuromusculoskeletal impairments associated with shoulder pain and dysfunction; differential diagnosis of shoulder problems; orthopedic examinations and interventions

Margaret Finley, PT, PhD (*University of Maryland*). Associate Professor. Upper extremity movement patterns in persons with chronic neuromuscular disorders.

Kevin E. Gard, PT, DPT, OCS (*Temple University*) Vice-Chair, Department of Physical Therapy and Rehabilitation Sciences and Director, Professional Doctor of Physical Therapy Program. Clinical Professor. Orthopedics; sports medicine.

Noel Goodstadt, PT, DPT, OCS, CSCS (*MCP Hahnemann University; Temple University*) Director of Residency Programs. Associate Clinical Professor. Orthopedic care of shoulder, knee and spine, residency training.

Margery A. Lockard, PT, PhD (*Hahnemann University*). Clinical Professor. Orthopedic/musculoskeletal physical therapy; management of patients using prosthetic and orthotic devices; and anatomy and physiology.

Robert Maschi, PT, DPT, OCS, CSCS (*Temple University*). Associate Clinical Professor. Orthopedics, musculoskeletal disorders, lower extremity biomechanics and movement analysis

Clare Milner, PhD, FACSM (*University of Leeds*) Research Lab Coordinator. Associate Professor. Biomechanics of lower extremity injury, injury prevention, and rehabilitation; overuse injuries in runners; gait in people with knee pathology

Kathryn D. Mitchell, PT, DPT, NCS (*Temple University*) Assistant Director of Clinical Education. Associate Clinical Professor. Adult neurologic rehabilitation; vestibular rehabilitation/concussion; balance and falls in Multiple Sclerosis.

Margaret O'Neil, PT, PhD, MPH (*MCP Hahnemann University; Duke University; University of North Carolina at Chapel Hill*). Associate Professor. Identification of psychometrically sound objective physical activity measures for use as outcomes in activity-based physical therapy interventions for children with chronic conditions (obesity) and those with physical disabilities (especially cerebral palsy) and designing flexible active video games to improve access and participation and increase fitness, physical activity, and functional mobility in youth with physical disabilities.

Robert J. Palisano, PT, ScD, FAPTA (*Boston University*) Associate Dean for Research, College of Nursing and Health Professions. Distinguished University Professor. Classification and prognosis for gross motor function in children and youth with cerebral palsy; interventions to improve activity and participation in children with physical disabilities; transition to adulthood for youth with disabilities.

Sheri Silfies, PT, PhD (*MCP Hahnemann University*). Associate Professor. Identification and treatment of impairments in neuromuscular control of trunk mobility and stability in patients with low back pain, focusing on mechanism of recurrent low back pain; core control in athletes.

Sinclair A. Smith, MS, DSc (*Boston University*) Chair, Health Sciences. Professor. The use of magnetic resonance spectroscopy and near infrared spectroscopy to non-invasively study neuromuscular metabolism in humans; creatine supplementation on mitochondrial respiration; weight training studies.

Sara Tomaszewski, PT, DPT, OCS (*Duke University*). Clinical Instructor. Orthopedics and sports physical therapy, injury prevention, and return-to-sport decision making.

Sarah Wenger, PT, DPT, OCS (*Arcadia University; Temple University*) Coordinator, Professional Practice Lab. Associate Clinical Professor.

Health and wellness in underserved populations, chronic care management, chronic pain.

Annette Willgens, PT, EdD, PCS (*Northcentral University*) Director of Clinical Education. Associate Clinical Professor. Qualitative and mixed methods research focus using survey data, phenomenology, and grounded theory to explore issues in clinical education including self-care and stress management. She is a yoga, mindfulness, and reiki practitioner. She teaches in the pediatrics and functional mobility courses as well as developing integrated clinical experiences during each term.

Glenn Williams, PT, PhD, ATC (*University of Delaware*) Chair, Department of Physical Therapy & Rehabilitation Sciences. Associate Professor. Neuromuscular plasticity after joint injury, orthopaedic-sports rehabilitation, human performance, post-traumatic osteoarthritis.

Emeritus Faculty

Margo Orlin, PT, PhD, FAPTA (*Drexel University*). Associate Professor Emeritus. Walking and running biomechanics and participation in children with developmental disabilities, evaluation of enhancing participation for children and adolescents with cerebral palsy.

Patricia Rubertone, PT, MPT, MSW, EdD (*Widener University*). Associate Professor Emeritus. Student learning; course design; judgment of physical therapy student clinic performance by novice vs. experienced clinical instructors.

Susan Smith, PT, PhD (*University of Connecticut, Texas Woman's University*). Associate Professor and Dean Emerita, College of Nursing and Health Professions. Geriatrics: health promotion and interventions for manifestations of low bone mass; assessment of fall risk and fall prevention interventions for older adults

Rehabilitation Sciences

Major: Rehabilitation Sciences

Degree Awarded: Doctor of Health Science (DHSc)

Calendar Type: Quarter

Total Credit Hours: 48.0

Classification of Instructional Programs (CIP) code: 51.2308

Standard Occupational Classification (SOC) code: 29-1123

About the Program

The Doctor of Health Science (DHSc) in Rehabilitation Sciences program is designed to be an advanced doctoral degree program open to physical and occupational therapists seeking leadership roles in education and/or clinical practice. The aim of the program is to prepare physical and occupational therapists to be leaders in Rehabilitation Sciences by acquiring skills and educators, members of research teams and advocates for best practice. The curriculum includes foundation courses in the health professions, teaching, and research.

Program Delivery

Coursework is predominantly online, with onsite components arranged on preset week days or weekends during the curriculum. Most of the coursework will be offered without pre- or co-requisites to maximize students' ability to balance their work and personal lives while completing the degree. Each student chooses an area of scholarship that matches the expertise of one of our faculty members; an arrangement that ensures optimal mentorship for the students.

Objectives

Graduates of the Doctor of Health Science in Rehabilitation Sciences program will be prepared to:

- Assume leadership positions in professional, academic, clinical and/or community organizations.
- Educate students and practitioners in rehabilitation sciences in academic, clinical, and community organizations.
- Consult with consumer groups and organizations to create interprofessional partnerships to foster healthy communities.
- Contribute to and disseminate scholarship for transfer of knowledge in the rehabilitation sciences to promote best practice and quality education.

Additional Information

For more information, visit the Department of Physical Therapy and Rehabilitation Sciences (<https://www.drexel.edu/cnhp/academics/departments/Physical-Therapy>) web page.

Admission Requirements

Applicants must possess a master's or clinical doctoral professional degree in physical therapy or a related field such as MPT, MSPT, MOT, DPT, or OTD or some other master's degree for admission consideration. In addition applicants must have a current, active US or Canadian license to practice their discipline. Applicants would complete a standard graduate application including submission of the following:

- Copy of professional license
- College/university transcripts with minimal overall GPA of 3.0
- GRE scores
- Two letters of recommendation from advisors, supervisors, professors, or mentors
- CV
- Personal statement outlining career plan and topic of research interest

Degree Requirements

Foundation Courses

NHP 680	Informatics in the Health Professions	3.0
NHP 766	Health Promotion, Fitness and Wellness	3.0
NHP 767	Leadership & Professional Issues	3.0
RHAB 768	Advancing the Practice of Rehabilitation	3.0
RSCH 758	Application of Evidence to Practice	3.0
RSCH 741	Foundations in Scholarly Inquiry & Writing	3.0

Teaching Courses

NHP 760	Academia for Health Professionals	1.0
NHP 762	Health Professional Education	3.0
NHP 822	Teaching Practicum	3.0

Research Courses

NHP 810	Biostatistical Applications	2.0
RSCH 519	Introduction to Biostatistics	3.0
RSCH 770	Foundations in Research Methods	3.0
RSCH 813	Measurement Theory in Healthcare	3.0

Elective Practicum Experience

NHP 822	Teaching Practicum	2.0
NHP 832	Leadership Practicum	
RSCH 823	Research Practicum	

Additional Elective Option

An Elective may be selected from courses and practica (including independent study) within and outside the program to support the student's plan of study.

Scholarship Experience *

NHP 818	Scholarship Question Development	1.0
NHP 827	Scholarship I	2.0
NHP 828	Scholarship II	2.0
NHP 829	Scholarship III	2.0
Total Credits		48.0

* Students must successfully complete comprehensive examination prior to enrolling in the Scholarship Experience series

Facilities

Teaching Facilities

The primary teaching resource for this program is supported distance learning technology. Instructional materials are provided through text, graphics, audio and video formats and are available online through a course management system 24 hours a day. The online courses are highly interactive through the use of web discussion boards, audio chat tools, and video conferencing. Program faculty share a belief that it is important to fully support distance learning students, and support will be offered via email, telephone, fax, and video-conferencing. The College of Nursing and Health Professions invests in state-of-the-art technology to foster an effective teaching and learning environment. The onsite portions of the program are held on the Center City (Health Sciences) Campus of Drexel University. The Department of Physical Therapy and Rehabilitation Sciences has two state-of-the-art dedicated teaching laboratories.

Research Facilities

The department's research facilities include over 9,000 square feet of well-equipped research laboratory space (Biomechanics, Gait, Pediatrics, and Neuromuscular Performance Labs), with equipment including force plates, EMG, motion analysis and human performance measurement equipment. This space includes conference rooms, PhD and post doc offices and is located next door to the College's 14,000 square feet, multi-disciplinary clinical practice.

The Department of Physical Therapy and Rehabilitation also values community partners as a central part of the research resources. Many faculty and students are involved in community-based research through collaborations with CanChild Centre, 11th Street Family Health Center, and numerous pediatric hospitals, out-patient facilities, and early intervention providers. Faculty are collaborating on research projects with nationally and internationally known researchers on several multi-site funded projects.

Physical Therapy and Rehabilitation Sciences Faculty

Maria Benedetto, DPT (*University of Puerto Rico; Columbia University*). Associate Clinical Professor. Pediatrics, Motor learning and motor control; yoga for children; dance prevention and injury rehabilitation

Susan Smith, PT, PhD (*University of Connecticut, Texas Woman's University*). Associate Professor and Dean Emerita, College of Nursing and Health Professions. Geriatrics: health promotion and interventions for manifestations of low bone mass; assessment of fall risk and fall prevention interventions for older adults

Service to Veterans

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 18.0 - 21.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.3818

Standard Occupational Classification (SOC) Code: 29-1141

About the Program

This online certificate marks achievement of advanced understanding, comprehension and application of the issues surrounding the veteran or veteran family member who has returned from military service and is entering or has entered civilian life. This combination of six courses provides the learner with the necessary knowledge to identify specific health and learning needs of veterans, and to provide advocacy resources to help meet those needs. These courses will all be delivered through online instruction. By completing this certificate, the learner will be able to identify, refer and advocate for the veteran and veteran family members with necessary specialized skills and knowledge, to address many health and educational needs of this unique group.

Admission Requirements

- Bachelor's Degree from a fully accredited program.
- 3.0 GPA or above on all previous coursework or last 60 credits completed.
- Official transcripts from all previous educational institutions required.
- Personal statement describing interest in certificate program.
- Curriculum Vitae or Resume.
- One professional letter of recommendation.

International Students: International applicants, as well as immigrants to the United States and U.S. permanent residents whose native language is not English and who have not received a bachelor's degree or higher in the United States, Australia, Canada, Ireland, New Zealand, or the United Kingdom, must show proficiency in English speaking as well as listening, writing, and reading. American citizens born on U.S. military bases abroad may be waived from the TOEFL requirement after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

- If you take the TOEFLiBT exam, you must have a minimum combined score for the listening, writing, and reading sections of 79 plus a speaking section score of 26 or higher.
- If you take the TOEFL, you must have a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher.

Program Requirements

Required Courses		
IPS 548	Foundations in Transdisciplinary Professional Collaboration	3.0
IPS 549	The Military and Veteran Culture	3.0
IPS 551	Veteran Advocacy	3.0
IPS 553	Neuroscience of Learning	3.0
Select one concentration from the list below		6.0
Health Professions		
IPS 552	Veteran Healthcare Policy	
IPS 550	The Unique Health Care Needs of our Military and Veterans	
Substance Use Disorders (select 2)		
BACS 534	Approaches to Substance Use Disorders	
BACS 535	Motivational Enhancement Skills	
BACS 540	Treatment Planning and Relapse Prevention	
Education		
EDAE 601	Foundations of Adult Education	
EDHE 660	Principles of Adult Education	
Legal Studies		
LSTU 502S	Ethics and Professional Standards	
LSTU 505S	Health Care Quality, Patient Safety and Risk Management	
Business (select 2)		
ORGB 625	Leadership and Professional Development	
ORGB 631	Leading Effective Organizations	
ORGB 640	Negotiations for Leaders	
Public Health (6 credits) *		
Total Credits		18.0

* Select 6.0 credits of PBHL 500 level or higher. Prior departmental approval is required.

Sexual Health and Wellness

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 12.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.0001

Standard Occupational Classification (SOC) Code: 21.1091

This program will prepare health professionals with the knowledge, skills, and attitudes required to provide comprehensive and sensitive sexual health care to their patients and their partners. Students who complete the certificate program will be able to discuss a wide range of patient sexual health issues, promote sexual wellness, and provide patient education on various sexual health topics.

This post-baccalaureate certificate should allow graduate students from various health-related programs of study to obtain a deeper knowledge base and improved skill set related to human sexuality. Not only can many sexual problems and dysfunctions be clinically managed to improve patient quality of life, but patient education, health promotion, and risk reduction counseling can reduce negative and unintended consequences of sex while enhancing overall patient health and sexual wellness. Issues such as unwanted pregnancy, HIV and other sexually transmitted diseases, sexual assault and abuse, and lack of access to family planning, along with increased incidences of breast, gynecological and prostate cancers challenge health professionals across disciplines to increase their knowledge and skills to appropriately address the sexual health needs of their patients. In addition, greater social acceptance and legal protection for lesbian, gay, bisexual, and transgender (LGBT) individuals has increased the need for health professionals to combat health disparities and discrimination within these populations and better serve these clients.

The intended audience of this post baccalaureate certificate program is health professionals – both clinical and non-clinical who seek to specialize in sexual health and medicine. This program is designed to enhance the graduate education of physicians; nurse practitioners; physician assistants; nurses in inpatient, outpatient, or school settings; social workers; health educators; behavioral health counselors; and other health professionals. It is important to note that this program prepares the healthcare professional as a sexual health educator not as a sex therapist.

Program Requirements

IPS 534	Introduction to Patient Sexuality	3.0
IPS 535	Sexual Function and Dysfunction	3.0
IPS 536	Sexuality Counseling & Interviewing	3.0
IPS 537	Medical Management of Sexual Health and Wellness Across the Continuum	3.0
or IPS 538	Foundations of Sexuality Education and Health Promotion	
Total Credits		12.0

Women's Health/Gender-Related Nurse Practitioner Post-Master's Certificate

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's

Number of Credits to Completion: 37.0; 640 clinical hours

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 51.3822

Standard Occupational Classification (SOC) Code: 29-1171 (<http://deptapp08.drexel.edu/gainfulemployment/Nursing-Certificate-PM/51.3801-Gedt.html>)

Gainful Employment Disclosure

The online Women's Health/Gender Related Nurse Practitioner program supplies nurses with the skills necessary to provide advanced care to women and their partners throughout the lifespan with a specialized emphasis on reproductive and gynecologic health needs. Graduates are also qualified to provide a myriad of gender related services focusing on health promotion and disease prevention that range from well-woman care, prenatal and postpartum care, and common and complex women's health issues in both primary settings and women's health specialty practices. Additionally, this track offers the opportunity for students to work in transdisciplinary simulated scenarios to promote a better understanding and respect of discipline-specific roles, improve existing communication and collaboration within disciplines, and initiate teamwork development in order to promote patient safety and high-quality patient care.

This certificate is offered to those individuals who have earned a master's degree in nursing and seek further preparation to become a Women's Health/Gender Related Nurse Practitioner (WH/GRNP). Graduates are eligible to sit for the NCC's Women's Health/Gender Related Nurse Practitioner Certification Examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulation, and evaluation. OCI visits occur 2-4 times during the clinical portion of the program and range from 2-3 days. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab. These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

Program Requirements

Required Courses

Support Courses		
NURS 548	Advanced Pathophysiology	3.0
NURS 549	Advanced Pharmacology	3.0
NURS 550	Advanced Health Assessment & Diagnostic Reasoning	4.0
NURS 664	Professional Issues for Nurse Practitioners	1.0
NURS 680	Primary Care for Women's Health	3.0
NURS 682	Pharmacology for the Women's Health Nurse Practitioner	3.0

Concentration Courses

NURS 690	WHNP I: Mngmnt & Care of the Common Gyn and Gender Related Issues throughout the Lifespan	5.0
NURS 691	WHNP II: Mngmnt & Care of the Complex Gyn and Gender Related Issues of Women throughout the Lifespan	5.0
NURS 692	WHNP III: Management & Care of the Low Risk Obstetrical and Post Partum Needs of Women and Families	5.0
NURS 693	WHNP IV: Mngmnt & Care of the High Risk Obstetrical and Post Partum Needs of Women and Families	5.0
Total Credits		37.0

About the Program

The MS in Professional Studies degree provides students with the highly valued interpersonal skills needed to collaborate, negotiate, and lead effectively in today's workplace by offering a blend of quantitative and qualitative courses. The interdisciplinary Workplace Competencies concentration allows students to apply their knowledge and learned skills across multiple industries. Our professors are career professionals who bring real-world workplace situations into our virtual classrooms to better prepare students to apply learned skills in the following industries: communications, human resources, finance, insurance, marketing, utilities, pharmaceuticals, among many others. This degree allows students to leverage themselves into various levels of middle and upper management with continued possibilities to climb the corporate ladder.

The MS in Professional Studies Program aims to equip students with the following demonstrable skills:

- Communication** - enhancing oral, written, and non-verbal communication skills to allow students to easily relate to, collaborate with, and lead others in the work place - both in person and virtually
- Leadership** - providing students with the necessary tool to lead people and organizations through the acts of negotiation, attracting and sustaining talent, and thinking and acting strategically to achieve results
- Critical Inquiry** - training students to conduct research and collect data using proven scientific methods and then evaluate and analyze that data to make profitable decisions in the workplace
- Ethics** - developing a moral and ethical framework from which organizational decisions can be made

This program is designed for the professional who has at least three years of working experience, and who is looking to **launch, change, or advance** his or her career.

Program Delivery

The Masters in Professional Studies is a part-time graduate degree program that is offered entirely online. Drexel University operates on a quarter schedule (four 10-week terms per academic year). Students will take two courses per quarter.

Additional Information

For additional information, please visit to Goodwin College Graduate Studies (<http://drexel.edu/goodwin/academics/graduate-programs>) webpage.

Admission Requirements

Acceptance to the program requires:

- Completed online application (<http://www.drexel.com/online-degrees/business-degrees/ms-prof-studies/apply.aspx>) form
- Bachelor's degree from an accredited institution
- Undergraduate GPA of 3.0 or higher (graduate degree GPAs will be considered along with the undergraduate GPA)
 - Applicants with a cumulative GPA below 3.0 may be considered
- Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended
 - Instead of hard copy transcripts, you may supply official electronic transcripts issued by a post-secondary institution directly to Drexel University Online (customerservice@drexel.com)
 - You must supply transcripts regardless of the number of credits earned or the type of school you attended
 - If you do not list all post-secondary institutions on your application and these are listed on transcripts received from other institutions, processing of your application will be delayed until you have submitted the remaining transcripts
 - Please use our Transcript Look-up Tool (<http://www.drexel.com/tools/transcript.aspx>) to assist you in contacting your previous institutions
- Two letters of recommendation (3 preferred)
 - Drexel University Online now accepts electronic letters of recommendation
 - Submission instructions are available at: <http://www.drexel.edu/apply/recommend>
 - If a recommender prefers to submit an original, hard copy letter of recommendation, please remind the recommender that it must be

signed and submitted in a sealed envelope signed across the flap by the recommender

- Personal Statement — 500-750 words, describing your interest in the program. Specifically, please discuss the following:
 - Your current line of work and career path until this point
 - How the program will help you facilitate your future career goals
 - Your role in building community in an online degree program
- Resume
- Optional: Students may elect to submit any of the following:
 - GRE/GMAT Scores
 - Example of a work project that demonstrates a specific skill or area of expertise
- International students must submit a TOEFL score of 550 or higher, please view additional International students requirements (<http://www.drexel.com/online-degrees/education-degrees/ms-humanresourcedevelopment/international.aspx>)
- Interviews are not required, but may be requested

Degree Requirements

Core Courses

PRST 501	Communication for Professionals	3.0
PRST 503	Ethics for Professionals	3.0
PRST 504	Introduction to Research Methods & Design	3.0
PRST 603	Communicating in Virtual Teams	3.0

Total Credits		45.0
---------------	--	------

Portfolio Requirement

All students will be required to maintain a portfolio as they progress through the program. Access to the portfolio platform is provided by the University at no charge to the student.

Over the course of their studies, students will add written assignments, projects, presentations, links to videos, and any other specimens to showcase learned skills, knowledge, or growth in one of 8 areas:

- Communication
- Creative and/or Critical Thinking & Information Literacy
- Ethical Reasoning & Responsible Citizenship
- Global Competence
- Leadership
- Personal Reflections
- Capstone
- Professional Documentation

Students will submit their portfolios as part of their Capstone experience. When students complete the program, they may choose to maintain their portfolios for a small annual fee.

About the Graduate Minor

Goodwin College's Professional Studies Graduate Minor allows students to develop and enhance the highly valued interpersonal skills needed to collaborate, negotiate, communicate, and make decisions in today's workplace.

The Professional Studies Graduate Minor is the perfect complement to a wide variety of graduate programs as the skills learned are applicable across multiple industries. It is offered to graduate students across Drexel University.

Admission Requirements

- A minimum of a 2.8 GPA
- Approval from the student's current academic advisor
- Approval from the Professional Studies Program Director or academic advisor

Program Requirements

PRST 501	Communication for Professionals	3.0
PRST 503	Ethics for Professionals	3.0
PRST 640	Policy Analysis	3.0
PRST 655	The Art & Science of Influencing Others	3.0
Total Credits		12.0

Graduate College

Established in 2015, the Graduate College of Drexel University is committed to the advancement of graduate education and ensuring graduate student success.

The Graduate College encompasses the more than 230 unique graduate programs, including the more than 30 doctoral programs, across the University, working closely with the colleges, schools, and departments to advocate for graduate students through the lifecycle of their graduate experience. We collaborate with deans, program directors, professional staff and faculty advisers as the central administrative unit for fostering interdisciplinary research and academic programs, offering professional development and academic support, and developing and disseminating changes in policies and procedures.

Furthermore, the Graduate College partners closely with the Graduate Student Association (GSA) and the more than 30 active graduate student organizations to develop academic, cultural and social programming that enhances the Drexel experience for our diverse graduate student community.

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 12.0

Instructional Delivery: On campus

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 13.0601

Standard Occupational Classification (SOC) Code:

About the Program

The post bachelor's certificate in Undergraduate STEM Education supports the professional development of graduate students from STEM disciplines. This program prepares STEM graduate students to implement evidence-based pedagogies that have been demonstrated to be effective for teaching undergraduate STEM courses. This interdisciplinary program provides a mechanism to allow doctoral students from a STEM discipline to learn about pedagogical approaches appropriate for teaching STEM undergraduates, and research, assessment and evaluation of STEM programs. Such skills, experiences and competencies will both diversify the career prospects of these graduate students as well as position them to participate more fully in programs with STEM Education and/or outreach as their "broader impact."

Admission Requirements

All students enrolled in full time STEM graduate programs or equivalent programs are eligible. Students must obtain prior approval of their program director.

Program Requirements

Required courses

GRAD 511	Foundations in Evidence-Based STEM Pedagogy	3.0
GRAD 512	Advanced Undergraduate STEM Pedagogical Techniques	3.0
GRAD 513	Improving STEM Education Through Research	3.0
GRAD 514	STEM Program Evaluation and Assessment	3.0
Total Credits		12.0

LeBow College of Business

About the College

LeBow College of Business (<http://www.lebow.drexel.edu>) is among just 25 percent of business schools nationwide accredited by the Association to Advance Collegiate Schools of Business (AACSB). Drexel LeBow offers a range of master's level degrees including the master of science (MS), master of business administration (MBA) and executive master of business administration (EMBA). LeBow also offers two doctoral degrees: a PhD in business and an executive doctorate in business administration (DBA). Additionally the School of Economics (<http://catalog.drexel.edu/graduate/schoolofeconomics>) offers master of science and doctoral degrees.

The MBA degree offers a variety of delivery formats – face-to-face or online, part-time or full-time and at a satellite campus in Malvern, Penn. Additionally, the Drexel LeBow MBA offers customization and specialization in areas such as finance, marketing, entrepreneurship/innovation and business analytics.

Prospective students interested in Drexel LeBow graduate programs are not required to have undergraduate degrees in business.

Majors

- Accounting (MSA) (p. 206)
- Business Administration (MBA) (p. 224)
 - Executive Program (p. 218)
 - Concentrations (p.)
- Business Administration (DBA) (p. 214)
- Business Administration (PhD) (p. 209)
- Business Analytics (MSBSAN) (p. 211)
- Finance (MSF) (p. 219)
- Marketing (MSM) (p. 222)
- Supply Chain Management and Logistics (MSSCML) (p. 226)

NEW: Minors

- Business (p. 208)
- Business Analytics Management (p. 213)
- Finance (p. 220)
- Marketing (p. 223)
- Operations Research (p. 221)
- Sustainable Operations Management (p. 222)

Certificates

- Advanced Business (p. 213)
- Leadership (p. 214)

About the Curriculum

Graduate business programs at Drexel University's LeBow College of Business provide a high-quality education that blends theory and practice. Students receive individualized attention to help them achieve short-term and long-term career goals.

The Drexel LeBow MBA enrolls approximately 800 students representing diverse backgrounds, 20 percent of whom are enrolled full-time. Approximately 50 percent of the full-time students are international. Drexel LeBow MBA students have come from more than 40 countries in Asia, Europe, South America and Canada.

The part-time MBA programs account for 60 percent of the enrolled students with another 20 percent enrolled in online MBA programs.

Following in the mission of the University's founder, A.J. Drexel, to provide practical applications of learning, the Drexel LeBow faculty have backgrounds in corporate management and scholarly research. Drexel LeBow faculty combine strengths in teaching and research. They also enjoy strong ties with the corporate community. Corporate and entrepreneurial leaders add to the full-time faculty by coming to campus as guest lecturers or as adjunct professors.

Centers and Facilities

This marriage of academic rigor and practical applications can also be seen in the development of the school's Centers of Excellence. Centers of Excellence are catalysts for research and innovation, think tanks for nationally significant trends and issues, and incubators for opportunities in business and integration among disciplines. LeBow's Centers of Excellence provide students with meaningful experiential learning and impact the performance of business in our region and around the world. As part of the curriculum Drexel LeBow MBA students will take courses which reside in the centers and will see firsthand how practical learning is applied.

The Centers are:

- Sovereign Institute for Strategic Leadership (<http://www.lebow.drexel.edu/academics/centers/strategic-leadership>)
- Center for Corporate Governance (<https://www.lebow.drexel.edu/academics/centers/corporate-governance>)
- Dana and David Dornsife Center for Experiential Learning (<https://www.lebow.drexel.edu/academics/centers/experiential-learning>)

Facilities

Accounting

Major: Accounting

Degree Awarded: Master of Science in Accounting (MSA)

Calendar Type: Quarter

Total Credit Hours: 45.0 quarter credits (for students entering with an undergraduate degree in accounting); 63.0 quarter credits (for students entering without an undergraduate degree in accounting)

Classification of Instructional Programs (CIP) code: 52.0301

Standard Occupational Classification (SOC) code: 13-2011; 13-2080

About the Program

The MS in Accounting program, which can be completed in a one-year or two-year format, is designed to meet the needs of those who plan careers in public accounting, corporate accounting, not-for-profit accounting, or governmental accounting.

The program offers students the opportunity to obtain the technical knowledge, analytical skills and communication proficiency required to serve as ethical and effective accounting professionals. Upon completion of the program, students will be eligible to be licensed in the state of Pennsylvania.

The one-year (45.0 quarter credit) option is for students already awarded an undergraduate degree in accounting from an AACSB accredited business school. Students who do not have an undergraduate degree in accounting can be considered for admission to the two-year (63.0 quarter credit) program, where prerequisite courses are completed in the first year of study.

The one-year program builds on knowledge equivalent to the requirements for a Drexel University baccalaureate degree in business with a major in accounting. Applicants must have earned a minimum grade of C in each of the following prerequisite courses and an overall GPA of 3.0 (B) or above. Appropriate syllabi to support transcripts must be submitted for admission consideration.

Prerequisite Requirements

ACCT 115	Financial Accounting Foundations	4.0
ACCT 116	Managerial Accounting Foundations	4.0
ACCT 321	Financial Reporting I	4.0
ACCT 322	Financial Reporting II	4.0
ACCT 323	Financial Reporting III	4.0
ACCT 331	Cost Accounting	4.0
ACCT 341	Principles of Auditing	4.0
TAX 341	Individual Income Taxes	4.0

Students with undergraduate degrees in accounting from non-US schools may be eligible for admission to the program. Completion of the program will not necessarily make them eligible to sit for the CPA examination. These students will be responsible for assessing whether their academic backgrounds make them eligible to sit for the CPA examination.

Students with undergraduate degrees in areas outside of accounting can be considered for admission to the two-year program or to the one-year program only after they acquire the necessary prerequisite undergraduate accounting and/or business courses. These students should contact the LeBow Graduate Student Services (<http://www.lebow.drexel.edu/academics/graduate/resources/advising>) to determine what courses are needed to gain admission to the MS in Accounting program.

State CPA Requirements

Students planning to take the CPA exam should review the educational requirements established by the State Board of Accountancy in the state in which they plan to sit for the examination. Students are qualified to sit for the examination in Pennsylvania by meeting the degree requirements above. Students planning to apply for a CPA license in Pennsylvania need to obtain 225.0 quarter credit hours, the equivalent to 150.0 semester hours. Students should contact the Accounting Department (<http://www.lebow.drexel.edu/faculty-and-research/disciplines/accounting>) for additional information.

One-Year Program: Degree Requirements

Required Core Courses

ACCT 600	Accounting Analysis & Theory	3.0
ACCT 604	International Financial Reporting	3.0
ACCT 605	Assurance Services	3.0

Business Administration

Major: Business Administration

Degree Awarded: Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 60.0 (Post-Master's) or 90.0 (Post-Bachelor's)

Classification of Instructional Programs (CIP) code: 52.0101

Standard Occupational Classification (SOC) code: 11-1021

About the Program

Drexel's PhD in Business program prepares candidates for careers in academic research and teaching. The PhD in Business includes specializations in accounting, decision sciences, finance, marketing and management (organizational behavior and strategy). PhD degrees are delivered as full-time, on-campus degrees and normally require about five years to complete. The LeBow faculty take a hands-on approach to research and mentoring students on a daily basis. The support of LeBow's collaborative, collegial research environment provides our doctoral students with tremendous research opportunities.

The program enables students to complete their doctoral coursework in two years. Students begin specializing in their chosen area during the first year of study. For information about doctoral work in economics, please visit the PhD in Economics (p. 231) web page.

PhD students complete a minimum of 60.0 quarter credits beyond the master's degree. Students who enter the program without a master's degree must complete 90.0 credits beyond the bachelor's degree. Degree Requirements describe the basic structure of the PhD in Business curriculum.

For additional information about the program visit the PhD Program in Business (<http://www.lebow.drexel.edu/Prospects/Doctorate>) page.

Admission Requirements/Financial Aid

The LeBow College of Business seeks applicants with exceptional ability and motivation who can succeed in a research-oriented program. Admission to this full-time program is competitive and highly selective. Applicants are only admitted for full-time status. Applicants must specify their proposed area of specialization, and their credentials are ultimately compared to the credentials of other applicants in the same specialization area. There may be relatively few openings in a given area. A master's degree is not a requirement, although most admitted students have one.

In reviewing an applicant's credentials, the faculty consider the following factors:

- *Prior Academic Accomplishments:* The faculty will examine all course work taken prior to application, paying particular attention to the specific courses that have been completed. Applicants should have attained a minimum grade point average of 3.0 (on a 4.0 scale) for all undergraduate course work completed. They also should have attained a minimum 3.3 average for any graduate-level course work taken. The faculty generally expect applicants to demonstrate a substantially higher level of accomplishment than these minimum requirements.
- *Graduate Management Admissions Test (GMAT) or Graduate Records Examination (GRE):* Applicants to all specializations within the PhD program are required to submit scores from either the GMAT or GRE. While all specializations will accept either one, applicants applying to the Accounting, Management (Organization or Strategy), Finance, or Marketing specializations should submit GMAT scores. Applicants to the specializations in Decision Sciences or Economics should submit the GREs. GMAT and GRE scores are not accepted if they are more than five years old.
- *Test of English as a Foreign Language (TOEFL):* Applicants whose native language is not English and who have not already received a degree from a U.S. university, must also submit scores from the Test of English as a Foreign Language (TOEFL).
- *Personal Statement/Essay:* Each applicant must submit a personal statement. The personal statement should explain the applicant's educational and personal experiences that have influenced the decision to pursue a PhD and should discuss the candidate's career plans and goals. The faculty are especially interested in learning about an applicant's prior research experience and the commitment to future research in the applicant's area of specialization.
- *Letters of Recommendation:* Two letters of recommendation must be submitted in support of the application. Applicants are strongly encouraged to seek recommendations from academics or other professionals who can assess the applicant's likelihood of success in a research-oriented PhD program.

Admission Procedures

The PhD Program in Business admits students each fall. To be considered for admission, the completed application must be received by the LeBow College of Business Office of Graduate Admissions no

later than January 15th. It is the applicant's responsibility to ensure that all transcripts, test scores and letters of recommendation, as well as the application form and the personal statement, are received by Drexel University no later than January 15th.

Assistantships and Financial Aid

LeBow generally provides 5 years of tuition and stipend support conditional on satisfactory progress throughout the program. PhD students are also provided with substantial support for traveling to academic conferences. Each applicant to the PhD program is automatically considered for a graduate assistantship as well as for admissions into the program. First-year graduate assistants are assigned to work with a faculty member on research and/or teaching activities. During the second and subsequent years, graduate assistants are generally assigned a combination of teaching and research responsibilities. Assistants receive a stipend and 27.0 credits of tuition remission per academic year. Doctoral students who are making satisfactory progress toward the degree can expect to be provided with an assistantship through the Spring Quarter of their fifth year from the date they start the program.

Additional Information

For questions about applying, please contact:

The LeBow PhD Program Office
Bennett S. LeBow College of Business
Drexel University

Degree Requirements

60 credits (Post-Master's degree)

90 credits (Post-Bachelor's degree)

- 15.0 credits of core courses
- 30.0 credits of specialization requirements
- 15.0 credits of dissertation research
- 30.0 credits for students without Master's degree

Core Program

PhD students in business select one of two broad streams of research:

- behavioral based research; or
- economics based research.

Within each stream all students pursue a common set of core courses during their first year of study. This core consists of course work in research methodology (three courses) and economics (two courses) or behavioral science (two courses). In addition to these core courses, students also take courses in their specializations during their first year in the program.

Each research stream consists of 5 core courses. All courses are 3.0 credits each.

Economics Stream Core Courses *

ECON 902	Mathematical Economics	3.0
ECON 910	Advanced Microeconomics I	3.0
ECON 940	Econometrics I	3.0
ECON 941	Econometrics II	3.0

STAT 931	Statistics for Economics	3.0
Total Credits		15.0

* Decision Sciences students may make substitutions for the econometrics series. Their research methodology sequences is comprised of Statistics, STAT 924 Multivariate Analysis I and OPR 922 Operations Research Methods I.

Economics Stream First Year Core Sequence

Fall		Credits
ECON 902	Mathematical Economics	3.0
STAT 931	Statistics for Economics	3.0
Term Credits		6.0
Winter		
ECON 910	Advanced Microeconomics I	3.0
ECON 940	Econometrics I	3.0
Term Credits		6.0
Spring		
ECON 941	Econometrics II	3.0
Term Credits		3.0
Total Credit: 15.0		

Behavioral Stream

Behavioral Stream Core Courses

STAT 924	Multivariate Analysis I	3.0
STAT 932	Statistics for Behavioral Science	3.0
MGMT 906	Foundations of Research in Behavioral Science	3.0
MGMT 907	Research Analysis in Behavioral Sciences	3.0
MKTG 940	Multivariate II	3.0
Total Credits		15.0

Behavioral Stream First Year Core Sequence

Fall		Credits
MGMT 906	Foundations of Research in Behavioral Science	3.0
STAT 932	Statistics for Behavioral Science	3.0
Term Credits		6.0
Winter		
MGMT 907	Research Analysis in Behavioral Sciences	3.0
STAT 924	Multivariate Analysis I	3.0
Term Credits		6.0
Spring		
MKTG 940	Multivariate II	3.0
Term Credits		3.0
Total Credit: 15.0		

First-Year Examination

After the completion of the core coursework, students are examined on their competence in the core material and their readiness to proceed to their specialization area.

Specialization

The PhD Program in Business offers specializations in six areas:

- Accounting
- Decision Sciences
- Finance
- Marketing

- Organizational Behavior (Management)
- Strategy (Management)

Each specialization area consists of 10 courses (30.0 credits) in addition to the 5 stream courses. The courses outside of the stream courses are either department requirements or electives selected by the student with the approval of their PhD coordinator. Up to 3 of the electives may be independent studies or dissertation research courses subject to the approval of the student's PhD coordinator and the Director of the LeBow PhD Program. The requirements of each area of specialization are discussed in detail on the Lebow College of Business PhD Program Areas of Specialization (<http://www.lebow.drexel.edu/academics/doctorate>) web page.

Candidacy Examination

At the completion of their coursework, students take written and oral candidacy examinations. These examinations test each student's preparation for dissertation research. Once the candidacy examinations are passed, the student is recognized as a PhD candidate.

Doctoral Dissertation

The doctoral dissertation is a piece of original research designed to make a contribution to the student's chosen discipline. Each candidate selects a dissertation adviser and an advisory committee of additional faculty members is formed. The candidate prepares a detailed dissertation proposal that is defended before the University community. After successfully defending the proposal, the candidate conducts the research (15.0 credit minimum) and prepares a written dissertation. The completed dissertation is then defended in a final oral examination.

Dissertation Format Review

In addition to meeting the Thesis Advisory Committee's standards of originality and scholarly content, all doctoral dissertations must conform to university format requirements. Students should obtain a copy of the Thesis Manual from the Graduate College of Drexel University (<http://www.drexel.edu/graduatecollege>) or from the Thesis Reviewer in 5038 MacAlister Hall.

Facilities

Selected Faculty Researchers

ACCOUNTING

Hsihui Chang, PhD (<http://www.lebow.drexel.edu/people/hsiuhichang>) (*University of Minnesota*) Department of Accounting and Tax, KPMG Endowed Chair and Department Head. Professor.

Anthony P. Curatola, PhD (<http://www.lebow.drexel.edu/people/anthonycuratola>) (*Texas A&M University*) Joseph F. Ford Professor of Accounting. Professor. Federal and state income tax policy, retirement income taxation, fringe benefits taxation, educational savings and tax incentives, federal and state income tax research.

DECISION SCIENCES

Avijit Banerjee, PhD (<http://www.lebow.drexel.edu/people/anthonycuratola>) (*The Ohio State University*) Department of Decision Sciences. Professor. Interface with Marketing, Pricing Revenue Management, Inventory Control, Operations Planning and Scheduling, Production Planning and Control, Supply Chain Management

Seung-Lae Kim, PhD (<http://www.lebow.drexel.edu/people/seung-laekim>) (*Penn State University*) Department of Decision Sciences. Professor. Inventory control, Production Planning and Control, Quality Management, Six-Sigma, Supply Chain Management

FINANCE

Michele Lowry, PHD (<http://www.lebow.drexel.edu/people/michellelowry>) (*University of Rochester*) Department of Finance. TD Bank Professor of Finance. Empirical Corporate Finance, including initial public offerings, mergers, and corporate governance.

Ralph Walkling, PhD (<http://www.lebow.drexel.edu/people/ralphwalkling>) (*University of Maryland*) Stratakis Professor of Corporate Governance, Department of Finance. Professor. Corporate governance, mergers and acquisitions.

MANAGEMENT

Jeffrey H. Greenhaus, PhD (<http://www.lebow.drexel.edu/people/jeffreygreenhaus>) (*New York University*) William A. Mackie Professor of Management. Professor. Work-Life Balance.

V. K. Narayanan, PhD (<http://www.lebow.drexel.edu/people/vadakenarayanan>) (*University of Pittsburgh*) Delloitte Touche Jones Stubbs Professor. Cognition and Strategy; Corporate Entrepreneurship; Organization design

MARKETING

Rolph E. Anderson, PhD (<http://www.lebow.drexel.edu/people/rolphanderson>) (*University of Florida*) Royal H. Gibson Sr. Professor of Marketing. Professor. Personal selling and sales management; multivariate data analysis; customer relationship management (CRM); customer satisfaction and customer loyalty.

Bert Rosenbloom, PhD (<http://www.lebow.drexel.edu/people/bertrosenbloom>) (*Temple University*) Rauth Chair of Electronic Commerce. Professor. Marketing channels and distribution systems, electronic commerce, inter-organizational marketing management, wholesale and retail distribution, marketing strategy and planning.

Business Analytics

Major: Business Analytics

Degree Awarded: Master of Science in Business Analytics (MSBSAN)

Calendar Type: Quarter

Total Credit Hours: 45.0

Classification of Instructional Programs (CIP) code: 52.1301

Standard Occupational Classification (SOC) code: 11-1021

About the Program

The MS in Business Analytics program is designed for students who have an interest in quantitative methods, data analysis, and using computer programs to solve business problems.

Students learn how to access and analyze data for the purpose of improved business decision-making. This program prepares students to make good business decisions with fact-based insights and an understanding of business performance from a systems view, using statistical and quantitative analysis of data as well as explanatory and predictive modeling.

The program draws upon three traditional areas of business intelligence:

- *statistics*, to explore and uncover relationships in data;
- *operations research*, to develop mathematical models for data-supported decision making; and
- *management information systems*, to access and create databases that support the other two areas.

Additional Information

For additional information about the program, students should contact the Department of Decision Sciences and MIS (<http://www.lebow.drexel.edu/Faculty/Departments/Decision>).

Degree Requirements

Operations Research

OPR 601	Managerial Decision Models and Simulation	3.0
OPR 620	Operations Research I	3.0

Statistics

STAT 610	Statistics for Business Analytics	3.0
STAT 630	Multivariate Analysis	3.0
STAT 642	Data Mining for Business Analytics	3.0

Management Information Systems

MIS 612	Aligning Information Systems and Business Strategies	3.0
MIS 633	Predictive Business Analytics with Relational Database Data	3.0
MIS 634	Advanced Business Analytics with Relational Database Data	3.0

Capstone Project

BUSN 710	Business Analytics Capstone Project	3.0
Students Select One Concentration**		9.0

Information Systems Concentration

Select three of the following

MIS 624	Systems Analysis & Design	
MIS 630	Inter-Active Decision Support Systems	
MIS 632	Database Analysis and Design for Business	
MIS 641	MIS Policy and Strategy	
MIS 650	Management of Health Care Info Systems	
MIS 651	Information Systems Outsourcing Management	
MIS 661	Managing with Enterprise Application Software using SAP - Logistics	
MIS 662	Managing with Enterprise Application Software using SAP- Accounting & Analytics	

Statistics Concentration

Select three of the following:

ECON 550	Econometrics	
ECON 560	Time Series Econometrics	
ECON 639	Applied Industrial Analysis	
FIN 642	Business Conditions and Forecasting	
MKTG 606	Customer Analytics	
STAT 626	Statistical Sampling	
STAT 628	Applied Regression Analysis	
STAT 634	Quality & Six-Sigma	
STAT 636	Experimental Design	
STAT 638	Advanced Statistical Quality Control	

Modeling Concentration

Select three of the following:

ECON 548	Mathematical Economics	
ECON 610	Microeconomics	
ECON 650	Business & Economic Strategy: Game Theory & Applications	
OPR 622	Operations Research II	
OPR 624	Advanced Mathematical Program	
OPR 626	System Simulation	
OPR 640	Decision Models for the Public Sector	

OPR 660	OR Models in Finance	
Functional Area of Business Concentration		
To complete a concentration in one of these fields, the student will develop a plan of study that is mutually approved by the student and the Department Head.		
Select three 600-level courses from either: ACCT, FIN, MKTG, POM or ECON		
Free Electives**		9.0
Select three 600-level courses within LeBow.		
Total Credits		45.0

* Students will need to have the prerequisite for this course waived with permission of the instructor.

** Courses outside LeBow can be substituted with permission from Department Head and/or Associate Dean.

Sample Plan of Study

First Year

Term 1		Credits
MIS 612	Aligning Information Systems and Business Strategies	3.0

Facilities

Business Analytics Faculty

Pramod Abichandani, PhD. Assistant Clinical Professor.

Murugan Anandarajan, PhD (*Drexel University*) *Department Chair, Management; Department Head, Decision Sciences and MIS.* Professor. Cyber crime, strategic management of information technology, unstructured data mining, individual internet usage behavior (specifically abuse and addiction), application of artificial intelligence techniques in forensic accounting and ophthalmology.

Orakwue B. Arinze, PhD (*London School of Economics*). Professor. Client/Server computing; Enterprise Application Software (EAS)/ Enterprise Resource Planning Software (ERP); knowledge-based and decision support applications in operations management.

Hande Benson, PhD (*Princeton University*) Assistant Department Head, *Decision Sciences & MIS*. Associate Professor. Interior-point methods, Large Scale Optimization, Mathematical Programming, Nonlinear Optimization, Operations and Supply Chain Optimization, Optimization Software, Portfolio Optimization

Qizhi Dai, PhD (*University of Minnesota*). Associate Professor. Business Value of Information Technology, eCommerce, Economics of Information Technology, Information System Management.

Michaela Draganska, PhD (*Kellogg School of Management, Northwestern University*) Department of Marketing. Associate Professor. Advertising strategy, product assortment decisions, new product positioning, distribution channels. Marketing analytics and big data, marketing communications, marketing research, marketing strategy, technology and innovation.

Elea Feit, PhD (*University of Michigan*) Department of Marketing. Assistant Professor. Bayesian hierarchical models, interactive (eCommerce), marketing research, missing data.

David Gefen, PhD (*Georgia State University*) Provost Distinguished Research Professor. Professor. Strategic IT management; IT development and implementation management; research methodology; managing the adoption of large IT systems, such as MRP II, ERP, and expert systems; research methodology, eCommerce; Online Auctions; Outsourcing; SAS; Technology Adoption.

Merrill W. Liechty, PhD (*Duke University*). Clinical Professor. Bayesian statistics, portfolio selection, higher moment estimation, higher moment estimation, Markov Chain Monte Carlo

Chuanren Liu, PhD (*Rutgers University*). Assistant Professor. Data Mining, Decision Models, Risk Assessment, Sequential Analysis.

Bruce D. McCullough, PhD (*University of Texas Austin*). Professor. Applied Econometrics, Data Mining, Econometric Techniques, Reliability of Statistical and Econometric Software.

Samir Shah, DPS (*Pace University*). Associate Clinical Professor. Drexel University's Provost Fellow India Partnerships

Chaojiang Wu, PhD (*University of Cincinnati*). Assistant Professor. Business Analytics, Computational Statistics, Healthcare Analytics, Semiparametric Regression, Statistical Data Mining.

Business Analytics Management

About the Minor

The graduate minor in Business Analytics provides students with a solid foundation in the management of Business analytics techniques, including but not limited to project management and decision making. These management techniques can be applied to a wide variety of fields including engineering, public health, medicine and finance. The minor consists of taking four courses that provide training in framing analytics problems, managing analytics projects and effective communication of the results.

This minor is open to all matriculated graduate students in any college at the university. This minor is not available to students pursuing an MS in Business Analytics.

Program Requirements

MGMT 685	Implementing Strategies Using Project Teams	3.0
MIS 612	Aligning Information Systems and Business Strategies	3.0
MIS 624	Systems Analysis & Design	3.0
MIS 630	Inter-Active Decision Support Systems	3.0
Total Credits		12.0

Certificate in Advanced Business

Certificate Level: Post-graduate

Admission Requirements: Master's degree or higher

Certificate Type: Post-Master's Certificate

Number of Credits to Completion: 12.0

Instructional Delivery: Campus, Online, Hybrid

Calendar Type: Quarter

Expected Time To Completion: 3 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 52.0201

Standard Occupational Classification (SOC) Codes: 11-1021, 13-0000

The Drexel LeBow Advanced Business Certificate (ABC) program is available to applicants possessing an earned master's degree or doctoral degree from a fully accredited university or college. The program is designed to permit qualified candidates the opportunity to update their skills in a professional field of specialization in which they have had previous academic experience, or to acquire competence in a new business discipline.

The post-master's ABC program requires completion of a four-course sequence and may include the following specialization areas:

- business analytics
- finance
- leadership
- marketing
- or a customized certificate option

The Advanced Business Certificate program is administered by the Krall Center Corporate Relations and Executive Education (<http://www.lebow.drexel.edu/corporate-services/corporate-and-executive-education>) Drexel LeBow College of Business. Participants in this part-time certificate program have a three-year maximum timeframe within which to complete the certificate requirements. ABC students are enrolled in courses in Drexel LeBow MBA sections pending availability.

Upon acceptance to the ABC program, students will meet with an advisor to review program/course prerequisites (if applicable), and create a plan of study within one of the programs specializations. Sample course sequences in the specialization areas are listed below.

The ABC program leads to a Post-Master's Certificate. The credits earned in the certificate are not applicable to any current or future degree program offered by Drexel University unless all applicable entrance criteria for the anticipated program are met.

Certificate Requirements

After completing the four-course series, and receiving at least a 3.0 GPA for the certificate courses, students will receive a Post-Master's

Certificate. Continuing Education Units (CEU) credits and/or Continuing Professional Educational (CPE) credits may be applicable.

Sample Sequences

All sample sequences are subject to change based on availability and individual student academic and professional background.

12.0 quarter credits

Sample Business Analytics sequence:

STAT 601	Business Statistics	3.0
FIN 642	Business Conditions and Forecasting	3.0
MIS 632	Database Analysis and Design for Business	3.0
STAT 632	Datamining for Managers	3.0

Sample Entrepreneurship sequence:

FIN 635	Entrepreneurial Finance	3.0
MGMT 650	Corporate Venturing	3.0
MGMT 652	New Venture Planning	3.0
MKTG 654	Corporate Brand & Reputation Management	3.0

Sample Finance sequence:

FIN 601	Corporate Financial Management	3.0
FIN 602	Advanced Financial Management	3.0
FIN 640	Mergers and Acquisitions	3.0
FIN 610	Corporate Governance	3.0

Sample Leadership sequence:

MGMT 602	Innovation Management	3.0
MGMT 780	Strategic Management	3.0
ORGB 625	Leadership and Professional Development	3.0
ORGB 631	Leading Effective Organizations	3.0

Sample Marketing sequence:

MKTG 601	Marketing Strategy & Planning	3.0
MKTG 622	Buyer Behavior Theory	3.0
MKTG 634	Integrated Marketing Communications Management	3.0
MKTG 638	New Product Planning, Strategy, and Development	3.0

Doctorate in Business Administration (DBA)

Major: Business Administration

Degree Awarded: Doctorate in Business Administration (DBA)

Calendar Type: Quarter

Total Credit Hours: 60.0

Classification of Instructional Programs (CIP) code: 52.0101

Standard Occupational Classification (SOC) code: 11-1021

About the DBA

The Doctorate in Business Administration (DBA) is a part-time executive doctoral program designed to equip executives and senior managers with scientific methods to address complex industry and organizational challenges. The program integrates and leverages Drexel's 120+ year history of experiential learning to provide a broad theoretical perspective of current business issues as well as a strong foundation in applied research and analysis to enrich critical knowledge, skills, and abilities. Through an integrative framework of empirical exploration and evidence-based decision making, executives learn the "science of business" and develop successful data driven strategies and solutions that can be applied to their respective organizations.

The DBA cohorted format enables candidates to complete the program in 2.5 years (10 consecutive quarters), using a lockstep executive residency and online model. DBA candidates complete a minimum of 60.0 credits beyond the Master's degree. As part of the accelerated nature of the program and focus on complex business challenges, the program employs a mentored dissertation model. It is expected that applicants will have a minimum of 10 years of industry and/or leadership experience.

Program Highlights

- 2.5 Year, Part-time, Cohorted Executive Program
- Executive Residency Format with Online Components
- 16 Courses, 60 Credits post-Masters
- Mentored Dissertation Model
- Integrated, Cross-Disciplinary Course Work

- Drexel DBA Faculty Collaboration from Management, Marketing, Decision Sciences and MIS, Accounting, Economics, Finance, Design, Biomedical Engineering, and Psychology

DBA Learning Outcomes

Upon degree completion, graduates of the DBA program will be able to...

- Demonstrate knowledge of both theoretical and applied business research methodology.
- Integrate knowledge from business and non-business disciplines to generate novel ideas, strategies, and practical approaches to address business issues faced by senior leadership in organizations.
- Demonstrate mastery of scientific inquiry methods that examine empirical support for theoretical frameworks as applied to business problems.
- Demonstrate an ability to address complex industry challenges using frameworks of empirical examination that build prescriptive conclusions and real world knowledge.

Admission Requirements

The DBA provides a broad theoretical and practical perspective on current business issues as well as a strong foundation in applied research and analysis. The LeBow College of Business seeks applicants with a minimum of 10 years of senior industry and/or leadership experience, exceptional ability and the motivation needed to successfully complete the DBA. Admission into this part-time cohorted program requires a Master's degree and is highly selective.

In reviewing an applicant's credentials, the DBA admissions committee will consider:

- Completed Application Form
- Prior Academic Accomplishments: All course work taken prior to application will be reviewed. Applicants should have attained a minimum grade point average of 3.3 (on a 4.0 scale) for all graduate course work completed.
- Graduate Management Admissions Test (GMAT) or Graduate Records Examination (GRE): DBA applicants are not required to submit scores from either the GMAT or GRE. However, individuals who have taken these exams prior may forward their scores in support of their application.
- Personal Statement: Explain how the applicant's educational and personal experiences have influenced the decision to pursue a DBA, professional objectives in attaining a DBA, and the applicant's strategy (time, effort, and organizational and family support) to excel in the program.
- Essay(s): Please reference the program webpage for specific essay(s) requirement for the application.
- Letters of Recommendation: Two letters of recommendation must be submitted in support of the application. Applicants are strongly encouraged to seek recommendations from professionals who can assess the applicant's likelihood of success in an executive doctoral program.
- Current Resume or CV: Include relevant industry positions, achievements or research.
- Interview: Upon request of the DBA admission committee, selected candidates will be requested to participate in an admissions interview.

Admission Procedures

The DBA Program admits students each fall. To be considered for admission, the completed application must be received by the LeBow College of Business Office of Graduate Admissions no later than **April 15th**. It is the applicant's responsibility to ensure that all transcripts, essays/personal statements and letters of recommendation, as well as the application form and fee, are received by Drexel University by this deadline.

Degree Requirements

Required Courses

BUSN 910	Applied Organizational Theory	4.0
BUSN 911	Challenges of Data Driven Economy	4.0
BUSN 912	Corporate Growth and Risk Strategies	4.0
BUSN 913	Driving Innovation and Design	4.0

BUSN 945	Dissertation Research, Data Analysis	4.0
BUSN 946	Dissertation Research, Discussion and Contribution Chapter	3.0
BUSN 947	Dissertation Research, Final Defense	1.0-9.0
Total Credits		60.0-68.0

Dissertation

DBA candidates are required to complete and submit doctoral dissertation for committee approval. The dissertation is an integral part of the DBA program and serves as a demonstration of academic excellence in applying the science of business with all its expected rigor to an important problem of interest to the industry, as well as providing insight based on theory and supported by appropriate methodological and statistical rigor.

The dissertation process is comprised of a series of lockstep courses, culminating in two major milestones: defense of the proposal and defense of the completed research. The dissertation will need to show relevance, be tied to appropriate scientific literature, and have appropriate methodology and analysis to support the conclusions. Each student will be assigned a dissertation chair, who will guide the student through the process starting in year one, and committee who will evaluate the proposal and the completed research. Both proposal defense and completed research defense must attain a passing grade for the degree to be conferred. There are no qualifying or candidacy exams.

Course Descriptions

BUSN 910 Applied Organizational Theory 4.0 Credits

The course provides an interdisciplinary and integrative understanding of various theoretical perspective on how to organize effectively. Theories, research and practice from the areas of strategic management, organizational behavior, human resource, management, MIS and marketing will be explored for ways to leverage both internal and external data to compete in the 21st century economy and build business strategy and translate that into organizational knowledge strategy.

College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit

BUSN 911 Challenges of Data Driven Economy 4.0 Credits

This course explores the growing role of data in Business. It examines the critical skills and capabilities an organization needs for success, including leadership, culture, methods and tools for becoming data driven, while also balancing human judgment. Lectures, readings, cases, and guest speakers consider the impact and challenges of gathering, storing, analyzing and providing access to data to facilitate effective decision making.

College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit

Prerequisites: BUSN 910 [Min Grade: B]

BUSN 912 Corporate Growth and Risk Strategies 4.0 Credits

This course will discuss competitive advantage aspects as they relate to organizational growth and risk management including in contexts related to intercompany relationships. Theories, research and practice from the areas of strategic management, organizational behavior, human resource, management, MIS and marketing will be explored to learn theories frameworks on corporate development and growth and risk management studies associated with such development and growth.

College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit

Prerequisites: BUSN 910 [Min Grade: B] and BUSN 911 [Min Grade: B]

BUSN 913 Driving Innovation and Design 4.0 Credits

This course explores the latest thinking on competitive strategies for innovation, innovation culture, product design & design thinking, creative insights and stimulating creativity behavior and such measurements using an interdisciplinary approach.

College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit

Prerequisites: BUSN 912 [Min Grade: B]

BUSN 914 Navigating the Changing Business 4.0 Credits

This course provides the foundation to apply current economic, consumer behavior and HR capital trends guided by scholarly based findings and analysis to apply to business issues in the new digital and global economy.

College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit

Prerequisites: BUSN 913 [Min Grade: B]

BUSN 921 Applied Behavioral Research 4.0 Credits

This course introduces behavioral research thinking. The course will provide an overview of applied behavioral research methodologies, including experimental, quasi-experimental, and survey research techniques. Students will learn the advantages of each methodology and when to apply it. Students will also be introduced to measurement theory, validity, reliability, and how to conduct research ethically. There will be detailed discussions on the data and how it was collected as well as hands-on demonstrations of the statistical methodologies that were applied. Students will learn what the statistical assumptions are, what the parameters mean, and how to practically interpret the results.

College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit

BUSN 922 Applied Statistical Analysis and Inference 4.0 Credits

This hands-on course provides an applied coverage of common statistics topics for students pursuing a doctorate in the behavioral sciences, demonstrated in the context of practical business decisions. It introduces different kinds of data and analysis options for the data. Focus is on a basic understanding of the theory behind common statistical techniques, knowing when and how to implement the techniques, and the ability to use statistical software where appropriate. Topics include descriptive statistics, probability theory, random variables, discrete and continuous probability distributions, sampling distributions, estimation, hypothesis testing, analysis of variance, & regression.

College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit

Prerequisites: BUSN 921 [Min Grade: B]

BUSN 923 Qualitative Inquiry Methods 4.0 Credits

This course introduces students to approaches in social science and humanistic research known as qualitative inquiry. These approaches include ethnography, grounded theory, phenomenology, case study, and narrative research, and employ methods of interviewing, discourse/content analysis, and participation observation. Students will explicate studies that employ these approaches; discuss assumptions of qualitative inquiry; discuss standards of sampling, ethics, and validity, and design a qualitative research proposal.

College/Department: LeBow College of Business

Repeat Status: Not repeatable for credit

Prerequisites: BUSN 921 [Min Grade: B]

BUSN 924 Qualitative Data 4.0 Credits

This course introduces students to approaches in social science and humanistic research known as qualitative inquiry. These approaches include ethnography, grounded theory, phenomenology, case study, and narrative research, and employ methods of interviewing, discourse/content analysis, and participation observation. Students will explicate studies that employ these approaches; discuss assumptions of qualitative inquiry; discuss standards of sampling, ethics, and validity, and design a qualitative research proposal.

College/Department: LeBow College of Business

Repeat Status: Not repeatable for credit

Prerequisites: BUSN 922 [Min Grade: B]

BUSN 941 Dissertation Research, Applied Methodology Workshop 4.0 Credits

This applied methodology workshop focuses candidates on development of well-defined research questions, appropriate methodology approaches, outline of the Hypotheses, and elucidation about the Importance of the research topics.

College/Department: LeBow College of Business

Repeat Status: Not repeatable for credit

BUSN 942 Dissertation Research, Data Collection Strategy 4.0 Credits

This applied dissertation research course focuses candidates on the development of well-defined data collection strategy. This may include, but is not limited to, analyzing archival data, designing the survey to be used, or determining how to use existing organizational changes in a quasi-experimental design to assess phenomena. This will include IRB permission as necessary.

College/Department: LeBow College of Business

Repeat Status: Not repeatable for credit

Prerequisites: BUSN 941 [Min Grade: B]

BUSN 943 Dissertation Research, Literature Review and Proposal Defense 4.0 Credits

This applied dissertation research course focuses candidates on the development of the literature review section that will be included in the dissertation. The literature review should present the theoretical background of the dissertation and support the propositions and hypotheses.

College/Department: LeBow College of Business

Repeat Status: Not repeatable for credit

Prerequisites: BUSN 942 [Min Grade: B]

BUSN 944 Dissertation Research, Data Collection Process 4.0 Credits

This applied dissertation research course focuses candidates on the development of the data collection process for the dissertation. The data can be collected through surveys, quasi-experimental designs, panel data, or any other source approved by the dissertation chair and committee.

College/Department: LeBow College of Business

Repeat Status: Not repeatable for credit

Prerequisites: BUSN 943 [Min Grade: B]

BUSN 945 Dissertation Research, Data Analysis 4.0 Credits

This applied dissertation research course focuses candidates on completing the data analysis for the dissertation. It is expected that the student will consult with the Dissertation Chair and professors on the appropriate analyses methods that should be applied.

College/Department: LeBow College of Business

Repeat Status: Not repeatable for credit

Prerequisites: BUSN 944 [Min Grade: B]

BUSN 946 Dissertation Research, Discussion and Contribution Chapter 3.0 Credits

This applied dissertation research course focuses candidates on completing the Discussion and Contribution chapter of the dissertation.

College/Department: LeBow College of Business

Repeat Status: Not repeatable for credit

Prerequisites: BUSN 945 [Min Grade: B]

BUSN 947 Dissertation Research, Final Defense 1.0 Credits

This applied dissertation research course focuses candidates on completing the Dissertation and after consultation and approval by the Dissertation Chair to submit it for Final Defense before the Committee.

College/Department: LeBow College of Business

Repeat Status: Repeatable for credit

Facilities

DBA Interdepartmental LeBow Faculty

Murugan Anandarajan, PhD (*Drexel University*) *Department Chair, Management; Department Head, Decision Sciences and MIS.* Professor. Cyber crime, strategic management of information technology, unstructured data mining, individual internet usage behavior (specifically abuse and addiction), application of artificial intelligence techniques in forensic accounting and ophthalmology.

Hasan Ayaz, PhD (*Drexel University*). Associate Research Professor. Optical brain imaging, cognitive neuroengineering, brain computer interface (BCI), functional near infrared (fNIR), and near infrared spectroscopy (NIRS).

Michaela Draganska, PhD (*Kellogg School of Management, Northwestern University*) *Department of Marketing.* Associate Professor. Advertising strategy, product assortment decisions, new product positioning, distribution channels. Marketing analytics and big data, marketing communications, marketing research, marketing strategy, technology and innovation.

David Gefen, PhD (*Georgia State University*) *Provost Distinguished Research Professor.* Professor. Strategic IT management; IT development and implementation management; research methodology; managing the adoption of large IT systems, such as MRP II, ERP, and

expert systems; research methodology, eCommerce; Online Auctions; Outsourcing; SAS; Technology Adoption.

Hubert Glover, PhD (*Texas A&M University*). Associate Clinical Professor. International financial reporting.

Michael Joseph Gombola, PhD (*University of South Carolina*) *Department Chair, Finance*. Professor. Stock offerings and repurchases, mergers, acquisitions, and restructuring; working capital management, time series analysis; options and derivatives, financial statement analysis.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Teresa D. Harrison, PhD (*University of Texas Austin*) *Associate Dean for Academic Affairs and Innovation, Academic Director of the Center for Nonprofit Governance*. Associate Professor. Econometrics, public finance, industrial organization, empirical microeconomics including health and nonprofit organizations.

Yanliu Huang, PhD (*The Wharton School, University of Pennsylvania*). Associate Professor. Consumer n-store decision making, consumer planning, health marketing, memory and learning.

John Kounios, PhD (*University of Michigan*) *Director, PhD Program in Applied Cognitive and Brain Sciences*. Professor. Cognitive neuroscience, especially creativity, problem solving, and cognitive enhancement.

Mary Mawritz, PhD (*University of Central Florida*). Assistant Professor. Management Department Abusive supervision; deviant behavior; leadership.

Vadake Narayanan, PhD (*University of Pittsburgh*) *Deloitte Touche Jones Stubbs Professor*. Cognition and Strategy; Corporate Entrepreneurship; Organization design

Prashant Srivastava, PhD (*Oklahoma State University*) *Department of Marketing*. Associate Clinical Professor. New product development, supply chain management, B2B marketing, sales, strategic alliances, organizational learning, market orientation, healthcare marketing, and database marketing.

Mark Stehr, PhD (*University of California at Berkeley*) *Interim Director, School of Economics*. Associate Professor. Health economics, health behaviors, public finance, public policy.

Rajneesh Suri, PhD (*University of Illinois at Urbana-Champaign*) *Associate Dean for Research, Marketing Department*. Professor. Pricing, promotions and branding.

George Tsetsekos, PhD (*The University of Tennessee*) *Dean Emeritus, LeBow College of Business; Francis Professor of Finance*. Professor. Valuation and corporate restructuring, treasury and risk/hedging operations, investment banking, securitization, emerging capital markets, multinational finance, bank asset-liability management.

Daniel Tzabbar, PhD (*University of Toronto*). Associate Professor. Accessing and managing knowledge; Alliances; Human capital; Organizational learning and change; Social Capital; Technology Entrepreneurship; Technology Innovation

Jonathan C. Ziegert, PhD (*University of Maryland*). Associate Professor. Management Department Attitudes; Diversity; Groups/Teams; Leadership; Organizational Culture and Fit.

Executive MBA Program

Major: Business Administration

Degree Awarded: Master of Business Administration (MBA)

Calendar Type: Quarter

Total Credit Hours: 49.0

Classification of Instructional Programs (CIP) code: 52.0101

Standard Occupational Classification (SOC) code: 11-1021

About the Program

The Executive MBA program is designed for highly recommended professionals with a minimum of seven years of experience and who are currently in a managerial or managerial-track position. Graduates of the Executive MBA program are extremely effective leaders who demonstrate mastery of problem solving and strategy development in an increasingly complex business environment.

Executive MBA students complete a strategic leadership module that includes comprehensive self-assessment tools and builds on the business curriculum. Students also work with an executive coach to design and implement a personal career development plan and reinforce leadership skills. Students have the flexibility to concentrate in finance or take other elective courses.

Executive MBA students learn in a carefully selected cohort (typically 15 – 25 students) of leaders with diverse experiences and backgrounds who begin and complete the program together. World-class faculty foster an environment where peer learning and discussion is an integral part of the experience. Highly engaged Executive MBA alumni further enhance this close-knit community.

Program Delivery

The Executive MBA Program begins each September with a three-day immersion phase in which students spend a concentrated period working with fellow students and laying the foundations for subsequent coursework and collaboration. The program meets one Friday and two Saturdays per month to minimize time away from the office and home. Online coursework supplements in-class learning to allow students to complete their degree in 20 months. The program ends in a capstone 10-day international residency. In 2017, graduating Executive MBA students studied the experience of doing business in Cuba.

Additional Information

For additional information about the program, visit the Executive MBA (<http://www.lebow.drexel.edu/academics/graduate/mba/executive-mba>) web page.

Admission Requirements

The Executive MBA program has separate admission procedures. A personal interview is required. Students admitted to the program have an average of 15 years work experience and significant potential for advancement in their organizations. A minimum of 7 years of professional experience (including 2 years of management) is required. Students must be admitted to the Executive MBA program to register for Executive MBA cohorted classes.

For further information, please contact:

Mark Dierkes
 Director of Recruitment
 Executive MBA Program
 484.595.0415
 med24@drexel.edu

About the Curriculum

A major strength of the LeBow Executive MBA program is the focus on leadership development. At the core of this instruction is a team-based learning approach. Designed to help enhance the transfer of experiences, each student will progress through the program in diverse teams. During orientation, students participate in team building exercises in which students work together to achieve common goals. Throughout the program, students earn credits towards a Leadership Certificate sponsored by the LeBow Institute for Strategic Leadership.

The Executive MBA is closely aligned with the needs of students and the business community and centers around four relevant and comprehensive modules. Starting with Enterprise Management, the program follows a sequential plan of study, building upon material learned from each of the previous modules. Students explore and apply the core business disciplines of finance, economics, and accounting. In the second year, students take strategy-based classes that require the application and synthesis of knowledge gained earlier in the program. At the end of the program the learning focuses on global business management, including a 10-day international residency.

Foundation Courses

This module is designed to orient students to business concepts, applications and decision making in accounting, finance and economics. Specific courses include:

- Managing the Total Enterprise (business simulation)
- Measuring and Maximizing Financial Performance
- Principles of Macro and Micro Economics

Functional Core

This module is designed to build a solid core of advanced business learning, and will expose students to the latest academic trends from our internationally recognized research faculty. Specific courses include:

- Managerial Accounting
- Corporate Finance
- Business Statistics
- Marketing Strategy and Planning
- Operations Management
- Managerial Economics

Technology Management & Business Analytics

This module is designed to develop planning skills and an understanding of constantly emerging technological trends. Specific courses include:

- Managing Technological Innovation
- MIS: Strategic Alignment
- Fundamentals of Business Analytics

Strategic Leadership

This module is designed to help professionals increase their leadership ability by exposing them to the latest self-assessment tools, industry best practices and strategies. Specific courses include:

- Mergers & Acquisitions and Corporate Governance
- Strategic Management
- International Business Management
- International Residency Seminar

Professional Leadership

- Leadership & Professional Development
- Students complete a Leadership Specialization program on topics as team dynamics, building and leveraging networks, ethics, and leading in dynamic environments. These "short courses" are integrated throughout the EMBA program.

Executive Coaching

Students work individually with an executive coach during and beyond the 20-month program to design and implement a personal career development plan and reinforce leadership skills.

Finance

Major: Finance
Degree Awarded: Master of Science in Finance (MSF)
Calendar Type: Quarter
Total Credit Hours: 54.0
Classification of Instructional Programs (CIP) code: 52.0801
Standard Occupational Classification (SOC) code: 11-3031;13-2052; 13-2041; 13-2051

About the Program

The MS in Finance program is designed to meet the needs of individuals who plan specialized careers in finance or financial consulting in business or industrial firms, investment management and advisory firms, consulting firms, public accounting firms, or banking and financial institutions.

The program has a more focused curriculum than the MBA, allowing students to expand their understanding of finance for advancement in the field. The program is for those interested in establishing a career in finance or financial services, seeking career advancement or making a career change to the field. Many students ultimately seek to achieve the Chartered Financial Analyst (CFA) designation.

Like the MBA program, the MS in Finance program can include an internship or consulting experience with an employer in the finance field.

Due to course sequencing, students enrolling in the MS in Finance program typically begin in the fall quarter.

Full-time, Part-Time and Online Options

Visit LeBow College's web site for information about additional MS Finance (<http://www.lebow.drexel.edu/academics/graduate/masters/ms-finance>) options.

Admission Requirements

The following items are required for admissions consideration:

- GMAT or GRE score (GMAT preferred)
- Official transcripts from all colleges/universities attended
- Two letters of recommendation
- Personal statement
- Resume
- TOEFL or IELTS score (for international students)

The admission committee will evaluate your candidacy based on test scores and undergraduate GPA, with some consideration given for work experience. Work experience is preferred and will enhance the composite admission score, but is not mandatory. There is no specific minimum score requirement for GMAT and/or TOEFL as admission is based on a composite score. However, the average GMAT for current graduate students is approximately 600 and TOEFL scores usually exceed 90.

Please contact Drexel LeBow's Graduate Admissions Office (<http://www.lebow.drexel.edu/academics/graduate/resources/admissions/admissions-standards>) directly with any questions concerning required entrance exams (such as the GMAT), evaluation of undergraduate or graduate records (grades, scores, total years and subjects studied, etc.), and any other issues regarding application to the College.

Degree Requirements

Foundation Courses

BUSN 501	Measuring and Maximizing Financial Performance	3.0
BUSN 502	Essentials of Economics	3.0

Required Core Courses

STAT 610	Statistics for Business Analytics	3.0
----------	-----------------------------------	-----

Required Finance Courses

FIN 601	Corporate Financial Management	3.0
FIN 602	Advanced Financial Management	3.0
FIN 622	Financial Institutions & Markets	3.0
FIN 624	Risk Management	3.0
FIN 626	Investment Management	3.0
FIN 642	Business Conditions and Forecasting	3.0
FIN 790	Seminar in Finance	3.0
or FIN 794	Seminar in Investments	

Elective Graduate Courses

Select eight (8) of which four (4) must be in Finance from the following: 24.0

ACCT 601	Managerial Accounting	
ECON 601	Managerial Economics	
ECON 610	Microeconomics	
ECON 614	Macroeconomics	
ECON 630	International Economics	
ECON 650	Business & Economic Strategy: Game Theory & Applications	
FIN 610	Corporate Governance	
FIN 635	Entrepreneurial Finance	
FIN 640	Mergers and Acquisitions	
FIN 648	International Financial Management	
FIN 649	Comparative Financial Analysis	
FIN 650	Derivative Securities	
FIN 660	Advanced Portfolio Management	
FIN 670	Applied Portfolio Management	
MIS 630	Inter-Active Decision Support Systems	
MIS 632	Database Analysis and Design for Business	
MIS 633	Predictive Business Analytics with Relational Database Data	
MIS 661	Managing with Enterprise Application Software using SAP - Logistics	
MIS 662	Managing with Enterprise Application Software using SAP - Accounting & Analytics	
OPR 601	Managerial Decision Models and Simulation	

OPR 620	Operations Research I	
POM 601	Operations Management	
STAT 626	Statistical Sampling	
STAT 622	Statistical Decision Theory I	
STAT 628	Applied Regression Analysis	
STAT 632	Datamining for Managers	
STAT 642	Data Mining for Business Analytics	
TAX 620	Individual Taxation	
TAX 630	Corporate Taxation	
TAX 790	Tax Policy Seminar	
Total Credits		54.0

- * At least four (4) electives must be finance courses. Courses other than those listed are acceptable with approval of the Finance Department Head or the MS Finance Advisor. Additional specialization can be achieved by concentrating the electives in one of the following fields: banking, investments, or systems management.

Facilities

Finance Faculty

David A. Becher, PhD (*Pennsylvania State University*) *Department of Finance*. Associate Professor. Mergers and acquisitions, corporate governance, financial institutions.

Gloria Bell Adjunct Instructor. Social Media. Over 30 years of successful business operations, communications, event management, and entrepreneurial experience; Co-Founder and Operations Director of The Women In Tech Summit and as an advisor to TechGirlz.

Jie Cai, PhD (*University of Iowa*) *Department of Finance*. Associate Professor. Investment banking, mergers and acquisitions, corporate finance and corporate governance.

Thomas Chi-Nan Chiang, PhD (*The Pennsylvania State University*) *Marshall M. Austin Professor of Finance*. Professor. International finance; time series analysis of financial data; econometric modeling & forecasting; financial markets; international risk management; monetary theory; macroeconomics; emerging markets; and global country funds.

Naveen Daniel, PhD (*Arizona State University*) *Denis O'Brien Research Scholar in Finance*. Associate Professor. Corporate governance, mutual funds, hedge funds, executive compensation

Daniel Dorn, PhD (*Columbia University*) *Department of Finance*. Associate Professor. Capital markets and investments; behavioral finance.

Casey Dougal, PhD (*University of North Carolina, Chapel Hill*). Assistant Professor. Empirical asset pricing, financial media, behavioral finance, and urban economics.

Eliezer M. Fich, PhD (*New York University*) *Department of Finance*. Associate Professor. Empirical topics in corporate finance.

Michael Joseph Gombola, PhD (*University of South Carolina*) *Department Chair, Finance*. Professor. Stock offerings and repurchases, mergers, acquisitions, and restructuring; working capital management, time series analysis; options and derivatives, financial statement analysis.

Amy Kratchman, MBA (*Drexel University*). Associate Clinical Professor. Investments; Portfolio Management

Michelle Lowry, PhD (*University of Rochester*) *TD Bank Endowed Professor*. Empirical corporate finance, including initial public offerings, mergers, and corporate governance

Edward Nelling, PhD, CFA (*University of Pennsylvania-Wharton*) *Department of Finance*. Professor. Investments; corporate finance; real estate finance.

Gregory Nini, PhD (*The Wharton School, University of Pennsylvania*). Assistant Professor. Creditor control rights, corporate governance, and firm value; insurance economics.

Patricia Robak, PhD (*Lehigh University*) *Department of Finance*. Associate Clinical Professor. Investments, money and banking, international finance.

Diana Sandberg, MS (*Drexel University*) *Department of Finance*. Associate Clinical Professor. Portfolio management, derivatives, investment management.

Samuel H. Szewczyk, PhD (*Pennsylvania State University*) *Department of Finance*. Associate Professor. Corporate governance, mergers and acquisitions, financial engineering, investment banking, financial institutions.

George Tsetsekos, PhD (*The University of Tennessee*) *Dean Emeritus, LeBow College of Business; Francis Professor of Finance*. Professor. Valuation and corporate restructuring, treasury and risk/hedging operations, investment banking, securitization, emerging capital markets, multinational finance, bank asset-liability management.

Ralph Walkling, PhD (*University of Maryland*) *Stratakis Professor of Corporate Governance, Department of Finance*. Professor. Corporate governance, mergers and acquisitions.

Graduate Minor in Operations Research

About the Graduate Minor

Operations research is a discipline that develops and uses advanced quantitative methods for decision making in business and engineering. Students in this minor will complete in-depth courses in stochastic modeling, optimization, and simulation, including theory, algorithms, and applications.

This minor is open to all matriculated graduate students in any college in the university.

Program Requirements

Required Courses		
OPR 620	Operations Research I	3.0
OPR 622	Operations Research II	3.0
Complete 6.0 additional credits from the following:		6.0
ECES 811	Optimization Methods for Engineering Design	
ECES 812	Mathematical Program Engineering Design	
EGMT 573	Operations Research	
MATH 613	Stochastic Processes I	
MATH 614	Stochastic Processes II	
MATH 615	Topics in Stochastic Processes	
MATH 672	Methods of Optimization III	
OPR 601	Managerial Decision Models and Simulation	
OPR 624	Advanced Mathematical Program	
OPR 640	Decision Models for the Public Sector	
OPR 660	OR Models in Finance	
Total Credits		12.0

Graduate Minor in Sustainable Operations Management

About the Graduate Minor

Sustainable Operations Management involves the design, analysis and operations of waste-free manufacturing system. Students in this minor will develop a through understanding of decision making within a manufacturing firm and a supply chain as a whole, while learning the principles of six sigma through hands-on applications.

This minor is open to all matriculated graduate students in any college in the university.

Program Requirements

Required Courses		
POM 620	Management of Manufacturing Firms	3.0
POM 625	Supply Chain Management	3.0
Select one of the following:		3.0
STAT 634	Quality & Six-Sigma	
ET 635	Engineering Quality Methods	
ET 730	Lean Manufacturing Principles	
Select one of the following:		3.0
ECES 811	Optimization Methods for Engineering Design	
EGMT 573	Operations Research	
MATH 670	Methods of Optimization I	
OPR 601	Managerial Decision Models and Simulation	
Total Credits		12.0

Marketing

Major: Marketing

Degree Awarded: Master of Science in Marketing (MSM)

Calendar Type: Quarter

Total Credit Hours: 45.0

Classification of Instructional Programs (CIP) code: 52.1401

Standard Occupational Classification (SOC) code: 11-2021

About the Program

The MS in Marketing provides students with a focused training in marketing science and it develops the technical skills necessary for success in today's business environment. Marketers require a higher level of technical capabilities to respond to today's dynamic marketing. At the same time, new tools such as neuroscience, analytics, and the proliferation of digital media empower marketers to better understand customers and respond to their needs and wants. These skills offer a higher level of training not typically available in graduate marketing education.

Admission Requirements

The LeBow College of Business seeks applicants with exceptional ability and motivation. Students who hold a bachelor's degree, either in Marketing or another discipline, may apply to the MS program. Students who lack some part of this preparation may be considered for admission conditional on their completing the appropriate undergraduate courses as non-matriculated students during the summer term before they begin the program in the fall.

In reviewing an applicant's credentials, the following factors will be considered:

- **Prior Academic Accomplishments:** All course work taken prior to application will be examined, paying particular attention to the specific courses that have been completed. Applicants should have attained a minimum grade point average (GPA) of 3.0 (on a 4.0) scale for all undergraduate course work completed.
- **Graduate Record Examination (GRE) or Graduate Management Aptitude Test (GMAT):** Applicants are required to submit GRE or GMAT scores. Scores of more than five years old are not accepted.
- **Test of English as a Foreign Language (TOEFL):** Applicants whose native language is not English and who have not already received a degree from a U.S. university must also submit scores from the Test of English as a Foreign Language (TOEFL).
- **Personal Statement/Essay:** Each applicant must submit a personal statement. The personal statement should explain the applicant's educational and personal experiences that have influenced the decision to pursue an MS and should discuss the candidate's career plans and goals.
- **Letters of Recommendation:** Two letters of recommendation must be submitted in support of the application. Applicants are strongly encouraged to seek recommendations from academics or other professionals who can assess the applicant's likelihood of success in the MS program.

Marketing Faculty

Rolph E. Anderson, PhD (*University of Florida*) *Royal H. Gibson Sr. Professor of Marketing*. Professor. Personal selling and sales

management; multivariate data analysis; customer relationship management (CRM); customer satisfaction and customer loyalty.

Trina Larsen Andras, PhD (*University of Texas at Austin*) *Head of the Department of Marketing; Academic Director, Center for Corporate Research Management*. Professor. International marketing, marketing channels management, cross-cultural communication.

Boryana Dimitrova, PhD (*Drexel University*). Assistant Clinical Professor. Global marketing, inter-organizational, marketing channels, retailing and retail management.

Michaela Draganska, PhD (*Kellogg School of Management, Northwestern University*) *Department of Marketing*. Associate Professor. Advertising strategy, product assortment decisions, new product positioning, distribution channels. Marketing analytics and big data, marketing communications, marketing research, marketing strategy, technology and innovation.

Lawrence Duke, MBA (*Harvard Business School*). Clinical Professor. International marketing and strategy, new product development, business-to-business marketing, marketing of financial services.

Elea Feit, PhD (*University of Michigan*) *Department of Marketing*. Assistant Professor. Bayesian hierarchical models, interactive (eCommerce), marketing research, missing data.

Michael Howley, PhD (*Arizona State University*). Clinical Professor. Investments in dissatisfied customers, service recovery, health-care marketing, marketing of service organizations, financial consequences of marketing actions.

Yanliu Huang, PhD (*The Wharton School, University of Pennsylvania*). Associate Professor. Consumer n-store decision making, consumer planning, health marketing, memory and learning.

Daniel Korschun, PhD (*Boston University*). Associate Professor. Brand and corporate reputation management, corporate social responsibility, internal marketing, marketing strategy, relationship marketing.

Hyokjin Kwak, PhD (*University of Georgia*) *Department of Marketing*. Professor. Advertising effects, consumer behaviors and e-commerce.

Bert Rosenbloom, PhD (*Temple University*) *Rauth Chair of Electronic Commerce*. Professor. Marketing channels and distribution systems, electronic commerce, inter-organizational marketing management, wholesale and retail distribution, marketing strategy and planning.

Prashant Srivastava, PhD (*Oklahoma State University*) *Department of Marketing*. Associate Clinical Professor. New product development, supply chain management, B2B marketing, sales, strategic alliances, organizational learning, market orientation, healthcare marketing, and database marketing.

Rajneesh Suri, PhD (*University of Illinois at Urbana-Champaign*) *Associate Dean for Research, Marketing Department*. Professor. Pricing, promotions and branding.

Srinivasan Swaminathan, PhD (*University of Texas-Austin*). Professor. Marketing research and strategy, pricing and promotions, loyalty and satisfaction.

Chen Wang, PhD (*University of British Columbia*). Assistant Professor. Consumer curiosity, self-regulation and goals, sensory perception.

MBA Programs

Major: Business Administration

Degree Awarded: Master of Business Administration (MBA)

Calendar Type: Quarter

Total Credit Hours: 49.0

Classification of Instructional Programs (CIP) code: 52.0101

Standard Occupational Classification (SOC) code: 11-1021; 11-2022; 11-9199

About the MBA

The Drexel LeBow MBA offers a customizable, cross-disciplinary plan of study that prepares students to solve complex business problems across industries. The rigorous, comprehensive degree program is designed to emphasize the broad perspective of business concepts through innovative coursework, experiential learning and career coaching.

Grounded by a strong academic foundation in business, the program offers several opportunities to specialize and align students' specific area of interest, including business concentrations and dual degree options. Graduate minors from schools throughout the University are also available, allowing students to tailor their plan of study to fit their specific career goals.

Learning Outcomes and Competencies

Leadership Skills

Leadership and Collaboration - Leads individuals, teams, and organizations to attain common business goals and manage change

Communication - Effectively communicates in writing and speaking in business settings

Professional Development and Advancement - Takes initiative and responsibility for one's professional development and career advancement

Business Acumen

Financial Acumen - Integrates quantitative and qualitative analyses to recommend financial decisions that support financial and strategic goals

Marketing Strategy - Applies marketing theories and tools to make sound marketing decisions and recommendations

Global Mindset - Integrates global perspectives to function effectively in diverse business contexts

Strategic Analysis - Provides the ability to develop a fine-grained analysis of the overall business situation of the firm

Information Systems and Analytics - Collects, manages, and analyzes data, and uses insights gained to set and achieve business goals

Business Operations - Applies quantitative and qualitative tools and operations knowledge to dissect, find structure in, and optimize operations

Business Law - Analyzes and applies the law in decision-making

Solving Business Problems

Identifying and Framing Relevant Complex Business Problems – Uses integrated problem solving and project management skills to identify, structure, and solve complex managerial problems

Structuring and Implementing Integrated Solutions - Integrates all business disciplines and uses decision-making tools to formulate an organization's strategic direction and implements solutions to emergent business problems

Students selecting a concentration can choose from the following options:

- Accounting
- Business Analytics
- Finance
- Entrepreneurship/Innovation Management
- Marketing
- Supply Chain Management and Logistics

Program Delivery

The College offers one MBA degree delivered in the format that best suits a student's lifestyle; full-time or part-time, on campus or online. The MBA can be completed at Drexel's main campus in Philadelphia or at a satellite campus in Malvern, Pa., in as little as 18-24 months. Professionals seeking more flexibility in earning the MBA at their own pace can personalize their studies by combining on-campus and online classes.

Please contact Drexel LeBow's Graduate Admissions Office directly to discuss which MBA delivery option (<http://www.lebow.drexel.edu/Prospects/MBA>) is best suited for you.

Degree Requirements

The Master of Business Administration (MBA) curriculum remains firmly grounded on the best features of the "traditional" MBA. Among these features is a broad overview of business, complemented by at least one area of concentration.

Students selecting a concentration can choose from the following options:

- Accounting
- Business Analytics
- Entrepreneurship/Innovation Management
- Finance
- Healthcare Management (See advisor for scheduling options)
- Marketing
- Supply Chain and Logistics

Program Requirements

REQUIRED COURSES

ACCT 510	Essentials of Financial Reporting	2.0
BLAW 510	Analyzing Legal Options in Decision-Making	1.0

Supply Chain Management and Logistics

Major: Supply Chain Management and Logistics
Degree Awarded: Master of Science in Supply Chain Management and Logistics (MS)
Calendar Type: Quarter
Total Credit Hours: 45.0
Classification of Instructional Programs (CIP) code: 52.0203
Standard Occupational Classification (SOC) code: 11-3071

About the Program

Today, companies worldwide are competing in very different ways and very different environments than they were in the past because of technological advances. Operations, Supply Chain Management, and Logistics are key functions through which companies can gain strategic advantage, and companies are hiring graduates to drive innovations for their new economic surroundings.

The Drexel MS Program in Supply Chain Management and Logistics is delivered in two tracks:

- For students in the **Industry Professional Track**, we are committed to increasing their supply chain competencies and leadership abilities. We work with organizations and leaders from around the world to help

shape strategies that inspire competitive advantage and business success.

- For students in the **Research Track**, we leverage industry relationships to inform the development of theory and models that advance the field. Research seminars led by our top-notch faculty prepare our MS students to enter PhD programs and become academic leaders.

Additional Information

For additional information about the program or to schedule an appointment, please contact the Department of Decision Sciences and MIS (<http://www.lebow.drexel.edu/Faculty/Departments/Decision>).

Degree Requirements

All students will be required to take a series of foundation courses in the management of operations and the quantitative methods that support analysis and decision making for supply chain management and logistics. After the common core, the students will choose one of the following tracks:

(1) *Industry Professional Track*: This track covers a range of topics for practical management decisions over multiple horizons for different types of supply chains and prepares the students for effective leadership in an increasingly complex, dynamic, global business environment.

(2) *Research Track*: This track goes deeper into the theoretical foundations of decision making in supply chains and prepares students for doctoral studies in the area.

Foundations:

POM 601	Operations Management	3.0
POM 602	Strategic Operations & Quality	3.0
POM 620	Management of Manufacturing Firms	3.0
POM 624	Management of Service Firms	3.0
POM 625	Supply Chain Management	3.0

Quantitative Methods

STAT 601	Business Statistics	3.0
OPR 601	Managerial Decision Models and Simulation	3.0

Select one of the following tracks: 24.0

Industry Professional Track

MIS 661	Managing with Enterprise Application Software using SAP - Logistics	
POM 622	Materials Management	
STAT 634	Quality & Six-Sigma

Supply Chain Management Faculty

Avijit Banerjee, PhD (*The Ohio State University*) *Department of Decision Sciences*. Professor. Interface with Marketing, Pricing Revenue Management, Inventory Control, Operations Planning and Scheduling, Production Planning and Control, Supply Chain Management

Hande Benson, PhD (*Princeton University*) *Assistant Department Head, Decision Sciences & MIS*. Associate Professor. Interior-point methods, Large Scale Optimization, Mathematical Programming, Nonlinear Optimization, Operations and Supply Chain Optimization, Optimization Software, Portfolio Optimization

Oben Ceryan, PhD (*University of Michigan Ann Arbor*) *Department of Decision Sciences*. Assistant Professor. Dynamic Pricing, Inventory Control, Revenue Management, Stochastic Optimization, Supply Chain Management

Christopher Gaffney, PhD (*Rutgers University, New Brunswick*). Assistant Clinical Professor. Applied Probability, Decision Theory, Risk Analysis

Seung-Lae Kim, PhD (*Penn State University*) *Department of Decision Sciences*. Professor. Inventory control, Production Planning and Control, Quality Management, Six-Sigma, Supply Chain Management

Jinwook Lee, PhD (*Rutgers University, New Brunswick*). Assistant Clinical Professor. Decision Models, Mathematical Programming, Risk Assessment Stochastic Optimization, Stochastic Processes.

Benjamin Lev, PhD (*Case Western Reserve University*). Trustee Professor. Inventory Control, Mathematical Programming, Operations Planning and Scheduling.

Chuanren Liu, PhD (*Rutgers University*). Assistant Professor. Data Mining, Decision Models, Risk Assessment, Sequential Analysis.

Fariborz Y. Partovi, PhD (*The Wharton School, University of Pennsylvania*) *Department of Decision Sciences*. Professor. Manufacturing Technology Development, Quality Implementation, Quality Management, Service Management, Six-Sigma

Wenjing Shen, PhD (*University of Michigan*). Associate Professor. The interface of operations management and marketing; inventory management; supply chain management.

Min Wang, PhD (*Columbia University*) *Department of Decision Sciences*. Assistant Professor. Healthcare Operations Management, Inventory Control, Production Planning and Control, Service Management, Supply Chain Management

Chaojiang Wu, PhD (*University of Cincinnati*). Assistant Professor. Business Analytics, Computational Statistics, Healthcare Analytics, Semiparametric Regression, Statistical Data Mining.

LeBow College of Business: School of Economics

The LeBow College of Business celebrated its strengths in economics teaching and research by elevating its economics department into a School of Economics in September 2013. The School of Economics continues LeBow's commitment to offering a curriculum that is current and challenging and to conducting research that aligns with business trends and informs policy makers.

Economics is at the root of business decisions, government policy making and global relations. As a course of study, it can lead to diverse career opportunities. A degree in economics provides students with a robust understanding of the workings of the market system and major economic institutions, economic policy and development. The School of Economics boasts an award-winning faculty who are leading researchers and dedicated teachers. The world-renowned faculty members take a hands-on approach to teaching, research and mentoring students.

Majors

- Economics (MSECON) (p. 229)
- Economics (PhD) (p. 231)

NEW: Minors

- Economic Data Analysis (p. 228)
- Economics (p. 230)

Economic Data Analysis

About the Graduate Minor

Integral to the application of economics to decision making is the gathering and interpretation of data for planning, forecasting, and policy-making purposes. The graduate minor in Economic Data Analysis gives students a solid foundation in quantitative methods, including but not limited to econometric and statistical techniques. These quantitative techniques can be applied to a wide variety of fields outside of the economics discipline, such as management and decision sciences, marketing, finance, engineering, public health, medicine and psychology. The minor consists of taking two courses that provide training in core statistical and econometric theory; students then choose from a variety of additional courses that provide the student with practical and hands on experience applying these tools to real life economic problems.

Admission Requirements

Student must be a matriculated graduate student. This minor is not available to students pursuing an MS in Economics. For more information on admissions, please contact the program manager for MS in Economics <http://www.lebow.drexel.edu/academics/graduate/current-students/advising/advisors>.

Economics

Major: Economics

Degree Awarded: Master of Science in Economics (MSECON)

Calendar Type: Quarter

Total Credit Hours: 45.0

Classification of Instructional Programs (CIP) code: 45.0603

Standard Occupational Classification (SOC) code: 19-3011

About the Program

The Master of Science program in Economics at Drexel University integrates training in core economics, rigorous quantitative methods and policy analysis. It prepares students for a career in industry, the financial sector, government or international organizations. The program also provides the necessary knowledge and the analytical skills to the students wishing to pursue a PhD degree in related areas.

Admission Requirements

The LeBow College of Business: School of Economics seeks applicants with exceptional ability and motivation. Students who hold a bachelor's degree, either in economics or another discipline, may apply to the MS program. All courses in the program expect a preparation of at least principles of economics and basic statistics. Students who lack some part of this preparation may be considered for admission conditional on their completing the appropriate undergraduate courses as non-matriculated students during the summer term before they begin the program in the fall.

In reviewing an applicant's credentials, the faculty will consider the following factors:

- **Prior Academic Accomplishments:** The faculty will examine all course work taken prior to application, paying particular attention to the specific courses that have been completed. Applicants should have attained a minimum grade point average of 3.0 (on a 4.0 scale) for all undergraduate course work completed.
- **Graduate Record Examination (GRE) or Graduate Management Aptitude Test (GMAT):** Applicants are required to submit GRE or GMAT scores. Scores of more than five years old are not accepted.
- **Test of English as a Foreign Language (TOEFL):** Applicants whose native language is not English and who have not already received a degree from a U.S. university must also submit scores from the Test of English as a Foreign Language (TOEFL).
- **Personal Statement/Essay:** Each applicant must submit a personal statement. The personal statement should explain the applicant's educational and personal experiences that have influenced the decision to pursue an MS and should discuss the candidate's career plans and goals.
- **Letters of Recommendation:** Two letters of recommendation must be submitted in support of the application. Applicants are strongly encouraged to seek recommendations from academics or other

professionals who can assess the applicant's likelihood of success in the MS program.

Admission Procedures

The MS in Economics program admits students each fall. To be considered for admission, the completed application must be received by the LeBow College of Business Office of Graduate Admissions. Admissions are considered on a rolling basis and will remain open until all available slots are filled. It is the applicant's responsibility to ensure that all transcripts, test scores and letters of recommendation, as well as the application form and the personal statement, are received by LeBow College Business, School of Economics.

Graduate Assistantships and Financial Aid

Financial assistance for the MS program may be available on a limited basis to highly qualified candidates.

Research Assistantships and Teaching Assistantships may be also be available on a limited basis for highly qualified candidates.

To obtain an application, please contact:

STAT 626	Statistical Sampling
Total Credits	45.0

* Students who complete ECON 911, ECON 921 and ECON 941 may take the following courses during their second year provided they have the required prerequisites and approval from the Program Coordinator: ECON 925, ECON 942, ECON 950, ECON 951, ECON 959, ECON 960, ECON 961, ECON 962, ECON 969, ECON 979

Centers and Facilities

This marriage of academic rigor and practical applications can also be seen in the development of the school's Centers of Excellence. Centers of Excellence are catalysts for research and innovation, think tanks for nationally significant trends and issues, and incubators for opportunities in business and integration among disciplines. LeBow's Centers of Excellence provide students with meaningful experiential learning and impact the performance of business in our region and around the world. As part of the curriculum Drexel LeBow MBA students will take courses which reside in the centers and will see firsthand how practical learning is applied.

The Centers are:

- Sovereign Institute for Strategic Leadership (<https://www.lebow.drexel.edu/academics/centers>)

- Center for Corporate Governance (<https://www.lebow.drexel.edu/academics/centers/corporate-governance>)
- Dana and David Dornsife Center for Experiential Learning (<https://www.lebow.drexel.edu/academics/centers/experiential-learning>)

Facilities

About the Graduate Minor

Economics addresses how resources and capabilities can be utilized to provide goods and services to society. As such, the study of economics will be valuable to any student whose area of study involves issues of decision making, resource allocation or social welfare. The graduate minor in Economics gives students a foundation in economic theory that can be applied to areas such as finance, marketing, public policy, public health, law, business, or medicine. After taking one course that provides training in core microeconomic theory, students can choose from a variety of courses that cover other areas such as macroeconomics, international trade, game theory, or public finance.

Program Requirements

ECON 601	Managerial Economics	3.0
Select three of the following additional courses		9.0
BUSN 502	Essentials of Economics	
ECON 548	Mathematical Economics	
ECON 550	Econometrics	
ECON 560	Time Series Econometrics	
ECON 610	Microeconomics	
ECON 614	Macroeconomics	
ECON 616	Public Finance and Cost Benefit Analysis	
ECON 621	Business, Government, and Global Macroeconomics	
ECON 630	International Economics	
ECON 631	International Macroeconomics	
ECON 634	History of Economic Analysis	
ECON 639	Applied Industrial Analysis	
ECON 644	Trade Policy: Theory and Evidence	
ECON 650	Business & Economic Strategy: Game Theory & Applications	
ECON 661	Health Economics	
ECON 662	Economic Analysis of Health Systems	
ECON 700	Economics Seminar	
Total Credits		12.0

School of Economics Faculty

Marco Airaud, PhD (*University of Pennsylvania Philadelphia*). Associate Professor. Computational economics, international economics, macroeconomics and monetary economics.

Patricia Awerbuch, MBA (*Drexel University*). Assistant Clinical Professor. Performance of on-campus students in an online classroom designed for distance learners; business professors.

Richard Barnett, PhD (*University of Minnesota*). Clinical Professor. Economic theory, macroeconomics.

Sebastien Bradley, PhD (*University of Michigan*). Associate Professor. Public finance, international economics, applied econometrics, real estate.

Mian Dai, PhD (*Northwestern University*). Associate Professor. Managerial economics and strategy, applied econometrics, industrial organization.

Pia DiGirolamo, PhD (*Purdue University*). Assistant Clinical Professor. Macroeconomics, international finance.

Shawkat M. Hammoudeh, PhD (*University of Kansas*). Professor. Applied econometrics, financial economics, international economics, and natural resource economics.

Teresa D. Harrison, PhD (*University of Texas Austin*) Associate Dean for Academic Affairs and Innovation, Academic Director of the Center for Nonprofit Governance. Associate Professor. Econometrics, public finance, industrial organization, empirical microeconomics including health and nonprofit organizations.

Paul E. Jensen, PhD (*Penn State University*) Dean, LeBow College of Business. Associate Professor. International trade. Primary research interest is international trade, particularly in empirical studies of international trade patterns.

Bang Nam Jeon, PhD (*Indiana University*) Department of Economics and International Business. Professor. Financial economics, world financial market linkages, foreign direct investment flows in the Asia-Pacific economies, the Korean economy: currency crisis, FDI, and macroeconomic issues, regional economic integration and newly industrializing economies: the

Stephen Joyce, MA (*Temple University*). Assistant Clinical Professor. Education and human capital.

Andre Kurmann, PhD (*University of Virginia*). Associate Professor. Computational economics, financial economics, labor economics, macroeconomics and monetary economics.

Christopher A. Laincz, PhD (*Duke University*) Director, LeBow College of Business PhD program. Associate Professor. Economic development, technological change, and growth, industrial organization, macroeconomics and monetary economics.

Vibhas Madan, PhD (*Michigan State University*) Senior Associate Dean, Academic Programs. Professor. International trade theory, applied microeconomics.

Roger A. McCain, PhD (*Louisiana State University*). Professor. Computational economics, game theory.

Bruce D. McCullough, PhD (*University of Texas Austin*). Professor. Applied Econometrics, Data Mining, Econometric Techniques, Reliability of Statistical and Econometric Software.

Irina Murtazashvili, PhD (*Michigan State University*). Assistant Professor. Applied econometrics.

Maria Olivero, PhD (*Duke University*). Associate Professor. Macroeconomics, international finance.

Eydis Olsen, MA (*American University*). Associate Clinical Professor. Macroeconomics, political economy.

Tristan Potter, PhD (*Boston College*). Assistant Professor. Macroeconomics, labor economics, search theory

Konstantinos Serfes, PhD (*University of Illinois at Champaign-Urbana*). Professor. Industrial organization, microeconomics, game theory.

Ricardo Serrano-Padial, PhD (*University of California at San Diego*). Assistant Professor. Microeconomics theory, information economics with applications in finance, macroeconomics and industrial organization.

Mark Stehr, PhD (*University of California at Berkeley*) Interim Director, School of Economics. Associate Professor. Health economics, health behaviors, public finance, public policy.

Constantinos Syropoulos, PhD (*Yale University*) Trustee Professor of International Economics. Professor. International trade, political economy, applied microeconomics.

Yoto Yotov, PhD (*Boston College*). Associate Professor. International trade, applied microeconomics, political economy.

Emeritus Faculty

Edward C. Koziara, PhD (*University of Wisconsin*). Professor Emeritus. Applied micro and macro economics.

Bijou Yang Lester, PhD (*University of Pennsylvania*). Professor Emeritus. Behavioral characteristics of shopping on-line, economic issues of electronic commerce, contingent employment and part-time work, the economy and suicide.

Andrew G. Verzilli, PhD (*Boston College*). Professor Emeritus. Teaching effectiveness in economics; economics and financial history.

Chiou-shuang Yan, PhD (*Purdue University*). Professor Emeritus. International economics, input-output analysis.

Economics

Major: Economics

Degree Awarded: Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 60.0 (Post-Master's degree) or 90.0 (Post-Bachelor's degree)

Classification of Instructional Programs (CIP) code: 45-0603

Standard Occupational Classification (SOC) code: 19-3011

About the Program

Drexel's PhD program in Economics prepares economists for academic research as well as careers in government or industry by providing a solid background in economic theory, quantitative analysis, and analytical tools at the advanced level. Each year a relatively small number of PhD students are accepted into the program, which allows for a collegial environment where the PhD students interact with faculty on a daily basis. Requirements for the MS in Economics program are satisfied if the coursework associated with the first and second years of the PhD program are complete.

The PhD program in Economics offers three fields of study:

- Industrial Organization
- International Trade
- Open Economy Macroeconomics

The PhD program in Economics is also particularly strong in applied microeconomics.

Students typically complete their coursework in two years and the PhD degree in five. Students work as research and teaching assistants under

the supervision of a faculty member. After their second year, students can teach independently.

Additional information can be found online at the PhD Program in Economics (<http://www.lebow.drexel.edu/Prospects/Doctorate/Econ>) page as well as in the LeBow College of Business LeBow PhD Handbook (<https://www.lebow.drexel.edu/sites/default/files/1457548154-lebowphdhandbook2016.pdf>).

To apply and for application information please check online at the LeBow PhD Admissions (<http://www.lebow.drexel.edu/resources/admissions/phd>) webpage.

Questions should be addressed to lebowphd@drexel.edu.

Admission Requirements

The LeBow College of Business: School of Economics seeks applicants with exceptional ability and motivation. For the PhD, the School places emphasis on applicants who can provide evidence of strong potential in a research-oriented program. In general, prior training at either the undergraduate or graduate level in economics and mathematics is strongly encouraged. All courses in the program expect a preparation of at least principles of economics and basic statistics. Students who lack some part of this preparation may be considered for admission conditional on their completing the appropriate undergraduate courses as non-matriculated students during the summer term before they begin the program in the fall.

Admission is competitive and highly selective.

In reviewing an applicant's credentials, the faculty will consider the following factors:

- **Prior Academic Accomplishments:** The faculty will examine all course work taken prior to application, paying particular attention to the specific courses that have been completed. Applicants should have attained a minimum grade point average of 3.0 (on a 4.0 scale) for all undergraduate course work completed. They also should have attained a minimum 3.3 average for any graduate-level course work taken. The faculty generally expects applicants to demonstrate a substantially higher level of accomplishment than these minimum requirements. A master's degree is not a requirement.
- **Graduate Record Examination (GRE):** Applicants are required to submit GRE scores. GRE scores are not accepted if they are more than five years old.
- **Test of English as a Foreign Language (TOEFL):** Applicants whose native language is not English and who have not already received a degree from a U.S. university must also submit scores from the Test of English as a Foreign Language (TOEFL).
- **Personal Statement/Essay:** Each applicant must submit a personal statement. The personal statement should explain the applicant's educational and personal experiences that have influenced the decision to pursue a PhD and should discuss the candidate's career plans and goals. The faculty are especially interested in learning about an applicant's prior research experience and the commitment to future research in the applicant's area of specialization.
- **Letters of Recommendation:** Two letters of recommendation must be submitted in support of the application. Applicants are strongly encouraged to seek recommendations from academics or other professionals who can assess the applicant's likelihood of success in a research-oriented PhD program.

Admission Procedures

The PhD Programs in Economics admits students each fall. To be considered for admission, the completed application must be received by the LeBow College of Business Office of Graduate Admissions no later than January 15th. It is the applicant's responsibility to ensure that all transcripts, test scores and letters of recommendation, as well as the application form and the personal statement, are received by Drexel University no later than January 15th.

Assistantships and Financial Aid

The LeBow College of Business strives to provide graduate assistantships to all entering PhD students. Each applicant to the PhD program is automatically considered for a graduate assistantship as well as for admission into the program. First-year graduate assistants are assigned to work with a faculty member on research activities. During the second and subsequent years, graduate assistants are generally assigned a combination of teaching and research responsibilities. Assistants receive a stipend and 27.0 credits of tuition remission per academic year. Doctoral students who are making satisfactory progress toward the degree can expect to be provided with an assistantship for at least four years.

Degree Requirements

The PhD in Economics program prepares economists for careers in research, teaching, business, and government. It is designed to provide students with not only a broad understanding of modern economics, but also the opportunity to conduct high quality research in a number of specific fields of study including industrial organization, international economics, and health economics.

In the second year of study, the PhD in Economics offers three fields of specialization: industrial organization, international trade, and open economy macroeconomics. Students complete courses in two of these fields of specialization.

Curriculum

60.0 credits (Post-Master's degree)

90.0 credits (Post-Bachelor's degree)

- 27.0 credits of first year core courses
- 18.0 credits of economics field requirements
- 15.0 credits (minimum) of dissertation research
- 30.0 additional dissertation research credits for students without a Master's degree

Core Program

All PhD students pursue a common set of core courses. The following courses are all completed during the first year, with the exception of ECON 941 Econometrics II, which is completed in the second year.

Core Courses

ECON 902	Mathematical Economics	3.0
ECON 910	Advanced Microeconomics I	3.0
ECON 911	Advanced Microeconomics II	3.0
ECON 920	Advanced Macroeconomics I	3.0
ECON 921	Advanced Macroeconomics II	3.0
ECON 940	Econometrics I	3.0
ECON 941	Econometrics II	3.0
ECON 942	Applied Microeconomics	3.0
ECON 980	Game Theory	3.0

STAT 931	Statistics for Economics	3.0
Total Credits		30.0

* Taken in the second year.

First-Year Examination

After the completion of the core coursework, students are examined on their competence in the core material and their readiness to proceed.

Fields of Specialization

Students are required to complete the coursework for at least two of the following fields/sequences.

Industrial Organization

ECON 950	Industrial Organization I
ECON 951	Industrial Organization II
ECON 959	Industrial Organization Seminar

International Trade

ECON 960	International Trade
ECON 961	Empirical International Trade
ECON 969	International Trade Seminar

Open Economy Macroeconomics

ECON 925	Macroeconomic Dynamics
ECON 962	Open Economy Macroeconomics
ECON 979	Open Economy Macro Seminar

Electives

In addition, students can take elective courses from the Economics Department, from any other departments in the College of Business, and from departments in other Colleges of Drexel University. The following is a set of sample electives:

ECON 930	Monetary Economics	3.0
ECON 952	Health Economics	3.0
ECON 955	Public Economics	3.0
ECON 964	Economic Development	3.0
ECON T980	Special Topics in ECON	0.5-9.0
Additional courses with the permission of the advisor		3.0

Dissertation Research

ECON 998	Dissertation Research in Economics	12.0

The Antoinette Westphal College of Media Arts & Design

About the College

The Antoinette Westphal College of Media Arts & Design (<http://www.drexel.edu/westphal>) (The Westphal College) offers graduate programs in Arts Administration, Design Research, Fashion Design, Interior Architecture & Design, Digital Media, Museum Leadership, and Television Management. The programs are distinctive in content and professionally oriented.

The Westphal College is a community of learning within the areas of media, design, the fine arts, the performing arts, and the management of creative enterprise that values experiential and immersive education; it is a place where students are encouraged to give form to ideas by learning to negotiate change in an ever-changing world. Through creative, critical, and collaborative approaches, the Westphal College's diverse programs seek to foster innovation and leadership in progressively interconnected professional disciplines and areas of study.

The academic programs are rigorous, and provide the appropriate balance of a solid foundation with individual creative direction, cultural awareness, strong technical skills, and an understanding of management and professional practice. The College is committed to a continual review of our curricula, processes and outcomes in order make those improvements and refinements necessary to further enrich our students' education, and to continue to foster independent thinkers, astute leaders, and creative problem solvers.

Majors

- Arts Administration (MS) (p. 235)
- Design Research (MS) (p. 237)
- Digital Media (MS, PhD) (p. 238)
- Fashion Design (MS) (p. 242)
- Interior Architecture & Design (MS) (p. 245)
- Museum Leadership (MS) (p. 247)
- **NEW:** Retail & Merchandising (MS) (p. 252)
- Television Management (MS and MS/MBA) (p. 249)
- **NEW:** Urban Strategy (MS)

NEW: Minors

- Arts Administration (p. 236)
- Museum Leadership (p. 248)

Full/Part-Time Options

- Graduate study in digital media, fashion design, interior architecture + design and design research includes two years of full-time graduate study. There are some programs that require prerequisite coursework before entering into the graduate level studies.
- Students may enroll in the arts administration and museum leadership programs on a full-time or part-time basis. Full-time arts administration students may complete the degree in five terms. The arts administration, television management and retail & merchandising graduate programs are also available as fully-online degrees through Drexel University Online (<https://online.drexel.edu>).
- Students may enroll in the Paul F. Harron Graduate Program in Television Management program on a full-time or part-time basis. Television management students enrolled full-time in either option should plan to take two full years to complete the program.
- The Digital Media PhD program is a full-time program. The post-MS version of the PhD program is 3-4 years and 4-5 years for the post-BS version of the PhD.

Facilities

Designed to be an incubator for tomorrow's creative leaders, The URBN Center is the award-winning home for many of the programs in the Antoinette Westphal College of Media Arts & Design, providing students with rigorous, studio intensive instruction with the latest technological resources. Majors that share this space include Animation & Visual Effects, Architecture, Design & Merchandising, Entertainment & Arts Management, Fashion Design, Game Design & Production, Graphic Design, Interactive Digital Media, Interior Design, Music Industry and Product Design.

The URBN Center also provides a black box theater (<http://www.drexel.edu/performingarts/about/facilities/URBN-center-black-box-theater>) for our Theatre program, a 3,500 square foot Leonard Pearlstein Gallery (<http://www.drexel.edu/pearlsteingallery>), two MIDI 1 ([http://www.drexel.edu/westphal/academics/undergraduate/MIP/Facilities\)abs](http://www.drexel.edu/westphal/academics/undergraduate/MIP/Facilities)abs) and MAD Dragon Records Suite, a Motion Capture studio, a Hybrid Making Lab (http://drexel.edu/westphal/about/overview/making_spaces/HybridMakingLab) featuring Universal Laser Cutters and 3D printing and prototyping, the Robert and Penny Fox Historic Costume Collection (<http://www.drexel.edu/westphal/resources/FHCC>), the Charles Evans Fashion

Design Library, a multi-use screening & lecture room, and offices for the College's administrative functions.

The Paul Peck Problem Solving & Research Building is home to our Photography major and Department of Art & Art History. Within this facility, the Westphal College occupies a 10,000- square-foot photography lab, lighting studios, digital imaging labs (http://www.drexel.edu/westphal/about/overview/making_spaces/DarkroomFacility), as well as six lecture/laboratory spaces for our Visual Studies courses.

In University Crossings, a 25,000 square foot space houses offices for Film & Video, Screenwriting & Playwriting and Television faculty. Also in this building are two state-of-the-art digital editing facilities, a shooting studio with special effects capability, two screening rooms, a digital audio post production studio, several multi-media classrooms, and a well-stocked equipment room featuring state of the art cameras ARRIFLEX (Arri) Alexa XT Plus and the Amira Premiere 4K.

MacAlister Hall serves students in the Westphal College with: digital audio labs and recording studios for Music Industry; The Mandell Theater (<http://drexel.edu/performingarts/about/facilities/mandell-theater>), a 420-seat proscenium theater with scene shop and dressing rooms; the Ellen Forman Memorial Dance Studio (<http://www.drexel.edu/performingarts/about/facilities/ellen-forman-dance-studio>); and a high-definition studio space for our college-operated television station, DUTV, which reaches over 400,000 households.

Arts Administration

Major: Arts Administration

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 50.0704

Standard Occupational Classification (SOC) code: 13-1011

About the Program

The MS in Arts Administration program is designed to provide academic preparation for leadership positions with creative enterprises, foundations, corporations, and government agencies involved in the arts and culture sector.

Students may enroll in the program on a full- or part-time basis. The program is designed to accommodate working students, so all classes are offered in the evening or online. Students must matriculate in either the campus or online program, but students in either program may take some courses in the other program.

Students should plan to enter the program at the start of the fall term. Full-time arts administration students may complete the degree in five consecutive terms when beginning in the fall term, and part-time students typically take seven to eight terms to complete the degree.

Professional Opportunities

Graduates of the program serve in various administrative capacities with museums, galleries, government agencies, performing arts organizations, arts centers, arts service organizations, historical societies, and philanthropic and corporate foundations.

Admission Requirements

Requirements for Admission

In addition to meeting the general requirements for admission to graduate studies, applicants should present a résumé demonstrating a strong affinity for the field through work, volunteer experiences, education, or special training. Undergraduate preparation must include at least one course in financial accounting, two courses in the history or literature of an art form, and/or two courses in the practical or creative aspects of an art. Applicants who lack this preparation (or the equivalent) must complete work in the above areas during the first two terms in the program.

An important part of the admissions process is a personal interview with the Program Director or other faculty member. Potential applicants will be contacted to schedule an interview through the Department of Arts & Entertainment Enterprise once the application is processed through Graduate Admissions.

Financial Assistance

A limited number of assistantships are available to students in the campus program. Students should have experience in gallery management, public relations or newsletter writing/editing, and should indicate their interest in these positions in their initial letters of inquiry. Students are also encouraged to explore other assistantships that may be available across the University. Awards are made annually on a competitive basis.

Students in the online program only may qualify for a tuition discount through Drexel's partnership with Americans for the Arts or other educational partners. Applicants to the online program should request information on educational partners through Drexel University Online during the application process.

Dean's Fellowship

Students in the campus program may be eligible for Dean's Fellowships, which significantly reduce tuition expenses. These highly competitive awards are granted during the admissions process. For additional information on requirements and how to apply, visit Graduate Admissions (<http://www.drexel.edu/grad/programs/westphal/arts-administration>) at Drexel University.

Degree Requirements

Each student is assisted with the planning and completion of a program of study in accordance with the student's needs and career goals. Each candidate for the MS in arts administration must complete 45.0 credits, including courses in entrepreneurship, management skills, and revenue development. To enable the student to tailor the program of study to meet his or her career goals, a variety of electives are offered. Electives will vary based on faculty and student interest.

Many of our students work in an arts-related job associated with a professional arts organization. In order to gain more experience, some students choose to complete as one of their electives an internship within the arts and cultural community. All students complete an original research study culminating in a formal written thesis.

Arts Administration Faculty

Jean Brody, DFA (*Yale School of Drama*) Program Director, Online MS in Arts Administration. Associate Teaching Professor. Arts administration.

Julie Goodman, MFA (*Temple University*) Program Director, MS in Arts Administration. Associate Professor. Cultural policy, political activism in the arts, changes in economic and social policy, arts sector changes.

Brea Heidelberg, MS, MA, PhD (*Villanova, The Ohio State University*) Associate Program Director. Assistant Professor. Arts management educator, consultant, and researcher focusing on the intersection of the arts and other fields of study.

Neville Vakharia, MS (*Drexel University*) *Research Director*. Associate Professor. Technology in the arts, strategic planning and evaluation, management and leadership, innovation and entrepreneurship.

Andrew Zitcer, PhD (*Rutgers University*) *Program Director, Urban Strategy*. Assistant Professor. Arts and community development, community based organizations, governance modes, organizational planning, narrative and social theory.

Design Research

Major: Master of Science in Design Research

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 46.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 50.0499

Standard Occupational Classification (SOC) code: 04.0401

About the Program

The Design Research program creates an arena for advanced students to explore and enhance their skills in areas that include Design and Technology and Environmental Design and Health, including Community Design. Driven by the interdisciplinary nature of design, the program addresses the future of design in response to the emerging and complex designed environment. Designers operate in a world of increasing intricacy; this degree gives candidates a greater depth of knowledge and experience in topics relevant to present and future challenges in design.

The program focuses on providing a forum for students to pursue paths of inquiry and investigation within Design and Technology and Environmental Design and Health. The program operates with a core curriculum that is built on, and augmented by, a customized set of electives, and the second year thesis sequence.

Admission Requirements

Undergraduate baccalaureate degree in or related to Design.

For additional information, see Graduate Admissions (<http://drexel.edu/grad>).

Degree Requirements

Core Requirements

ARTH 530 or VSST 501	History of Modern Design Contemporary Art Issues	3.0
DSRE 620	Design Problem Solving	3.0
DSRE 625	Technologies of Making	3.0
DSRE 630	Data Visualization for Design Professionals	3.0
DSRE 635	Translational Design Research	3.0
DSRE 640	Contemporary Design Theory	3.0
DSRE 645	Design Research Thesis Proposal	3.0
DSRE 650	Thesis Research and Practicum	1.0

Design Research Faculty

Maureen DeSimone, MBA, in progress (*Colorado State*). Adjunct Instructor. Wholesale business operations, marketing and line development.

Nick Jushchysyn, MFA (*Academy of Art University*) *Program Director, Animation and Visual Effects, VR/Immersive Media*. Associate Professor. Visual effects, digital media and animation.

Nicole Koltick, MArch (*University of California*) *Director, Design Futures Lab*. Assistant Professor. Researching possibilities for architecture and design through the use of unexpected and innovative interdisciplinary models. Foundation design studios, fabrication and technology seminars.

Kathi Martin, MSIS (*Drexel University*) *Associate Director of the Graduate Program in Fashion Design*. Professor. Fashion and textile designer; textile artist; computer-aided design, best practices online databases and graphic interfaces for fashion and historic costume, high resolution 3D interactive images for fashion design.

Alphonso McClendon, MS (*Drexel University*) *Program Director, Design & Merchandising*. Associate Professor. Fashion designer, product and business development, computer aided planning and design.

Diana S. Nicholas, RA, AIA, NCARB, MFA (*University of the Arts, Philadelphia*) Director of MS Design Research. Assistant Professor. Coordinator, Sustainability in the Built Environment

Debra Ruben, MS, IDEC, LEED AP, NCIDQ, MS (*Drexel University*) Director of BS and MS Interiors Programs. Associate Professor. Research on user participation and the design process.

Digital Media

Major: Digital Media

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS); 90.0 (PhD, post-bachelor's); or 45.0 (PhD, post-master's)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 11.0801

Standard Occupational Classification (SOC) code: 27-1027

About the Program

Digital Media is an exciting and rapidly expanding hybrid field of research, study and practice. Over the past two decades, it has grown from a highly specialized activity to an approachable subject that sparks global attention in areas of entertainment, business, engineering and health care.

Master of Science Program

The MS in Digital Media is a hybrid program created to offer students research as well as career opportunities in 21st century media applications. This two-year program offers comprehensive studies in advanced digital design including 3D modeling, animation, interactivity, gaming and digital media history, theory and methods. The curriculum for the MS in Digital Media offers a mix of academic course work and project-related activities. Projects consist of funded grant research opportunities, industry-sponsored projects and independent, student-generated and faculty-approved projects.

PhD Program

The Digital Media PhD program focuses on translational research in digital media within an experiential learning environment. It studies the application of digital media towards solving research problems in various disciplines including but not limited to engineering, education, cultural heritage, health or business. This doctoral program is built on a fundamentally interdisciplinary course structure and emphasizes an iterative and design based research philosophy.

Additional Information

For more information, visit Drexel's Graduate Studies in Digital Media (<http://www.drexel.edu/westphal/academics/graduate/DIGM>) web page.

Admission Requirements

Master of Science Program

The MS in Digital Media is an advance course of study. A successful applicant for admission will have a baccalaureate degree, a minimum 3.2 undergraduate GPA and assumed production skills in 3-D modeling, animation and interactivity.

Proof of basic competencies is demonstrated by undergraduate transcript and/or portfolio review. For qualified candidates lacking production skills, we offer a series of pre-graduate classes. Satisfactory completion of

the classes qualifies one to apply for graduate admission. Pre-graduate classes may include some or all for the following:

CS 171	Computer Programming I	3.0
CS 172	Computer Programming II	3.0
DIGM 100	Digital Design Tools	3.0
DIGM 505	Design and Interactivity	3.0
DIGM 506	Animation and Game Design	3.0

For additional information on requirements and how to apply, visit Graduate Admissions at Drexel University (<http://www.drexel.edu/grad/programs/westphal>).

MS in Digital Media

Degree Requirements

Students are required to take a Digital Media History, Theory and Methods course and an advanced seminar for a total of six credits, as well as a minimum of nine courses in advanced modeling animation and interactivity.

During the first year, students also take three New Media Project courses (9.0 credits); these courses provide opportunities to work on funded and unfunded research and industry projects under the guidance of a graduate faculty member. With faculty approval, students may also work on personally designed projects relevant to problem solving in a student's specific area of interest.

In addition, students are required to take 12.0 credits (a minimum of four courses) of directed studies in support of developing knowledge in an area—outside of media and design—to which digital media skills may be applied. The set of directed studies will be determined by the students and their graduate advisors. Possible areas for this focus include, but are not limited to, computer science, information science, bio-medical technology, social science, humanities and education.

Thesis Project

During the second year of study, each student develops and produces a master's thesis project. By the third week of the fall term students submit a proposal to the Digital Media Graduate Committee. Upon approval of the proposal, the student works toward thesis completion, including:

- an oral presentation to the college
- a written statement to the committee
- a copy of the completed media work for the graduate program archive

The thesis project must demonstrate domain knowledge of the agreed upon classes. The media component of the project must demonstrate expertise in 3D modeling/animation and/or interactivity.

Prerequisite Courses

Students without adequate background in digital media are required to take the following prerequisite courses, which are offered during the fall term of the first year of enrollment. These courses do not count towards the MS in Digital Media degree requirements.

DIGM 505	Design and Interactivity Bootcamp	3.0
DIGM 506	Animation and Game Design Bootcamp	3.0
Total Credits		6.0

Required Courses

DIGM 501	New Media: History, Theory and Methods	3.0
DIGM 520	Interactivity I	3.0
DIGM 521	Interactivity II	3.0
DIGM 525	Animation I	3.0
DIGM 526	Animation II	3.0
DIGM 530	Game Design I	3.0
DIGM 531	Game Design II	3.0
DIGM 540	New Media Project	6.0
DIGM 580	Thesis Preparation	3.0
Thesis		
DIGM 680	Thesis Development	6.0
Directed Studies		
		9.0
Total Credits		45.0

Sample Plan of Study

Students without adequate background in digital media must complete two prerequisite courses, which are offered during the fall term of the first year of enrollment: DIGM 505 *Design and Interactivity* and DIGM 506 *Animation and Game Design*.

First Year

Program Requirements Overview

Students applying for admission into the Digital Media PhD program are either post-baccalaureate or post-master's students. Those who are post-master's are required to take a minimum of 45.0 credits toward their PhD degree (Research Core). Post-baccalaureate PhD students are required

to take a minimum of 90.0 credits (45.0 credits Digital Media Core, and 45.0 credits Research Core).

Prerequisite Courses

Post-baccalaureate PhD students without adequate background in digital media are required to take the following prerequisite courses, which are offered fall term of the first year of enrollment. These courses do not count towards the Digital Media degree requirements.

DIGM 505	Design and Interactivity Bootcamp	3.0
DIGM 506	Animation and Game Design Bootcamp	3.0
Total Credits		6.0

Digital Media Core Courses

DIGM 501	New Media: History, Theory and Methods	3.0
DIGM 520	Interactivity I	3.0
DIGM 521	Interactivity II	3.0
DIGM 525	Animation I	3.0
DIGM 526	Animation II	3.0
DIGM 530	Game Design I	3.0
DIGM 531	Game Design II	3.0
DIGM 540	New Media Project	6.0
DIGM 580	Thesis Preparation	3.0
DIGM 680	Thesis Development	6.0
Directed Study		9.0
Total Credits		45.0

Research Core Courses

DIGM 701	Advanced New Media Topics	3.0
DIGM 710	Digital Media Research Methods I	3.0
DIGM 711	Digital Media Research Methods II	3.0
DIGM 810	Advanced Topics in Digital Media Research	3.0
DIGM 850	Public Venue Seminar	3.0
DIGM 851	Publication and Presentation	3.0
Dissertation		
DIGM 998	Digital Media Ph.D. Seminar	9.0
Directed Research		18.0
Total Credits		45.0

In addition to the course requirements, PhD students must progress through a series of steps leading to the PhD dissertation:

1. Doctoral candidacy exam
2. Dissertation proposal
3. Written dissertation and public dissertation defense

Dissertation Advisor

Every PhD student has to identify a dissertation advisor no later than the second term in the program. Post-master's students are expected to identify an advisor as soon as possible after joining the program or even before they are formally in the program. The expectation is that post-master's students are academically mature and have already focused on a research area and contacted potential advisors prior to their arrival. Dissertation advisors are not restricted to digital media faculty, but have to be approved by the Department of Digital Media under observation of college and university rules and regulations.

Directed Research Electives

Digital Media PhD students are required to take 18.0 PhD level credits of directed research electives, which have to be approved in advance by

the dissertation advisor. It is expected that students take at least 9.0 of these elective credits from other Drexel colleges outside the Antoinette Westphal College of Media Arts in Design in areas closely related to their respective dissertation projects. No more than 12.0 of the elective research credits can be independent study credits.

Doctoral Candidacy Committee

The Department of Digital Media has to establish a Doctoral Candidacy Committee conforming to established university and college rules for dissertation/candidacy committee membership. The purpose of this committee is to conduct and evaluate doctoral candidacy examinations.

Doctoral Candidacy Exam

The Doctoral Candidacy Exam consists of a preliminary proposal prepared by the student outlining the dissertation research plan with an oral defense before the Doctoral Candidacy Committee. A student may schedule the preliminary proposal portion whenever she/he and her/his advisor decide they are ready but no later than the end of the fall term of second year of study.

To be considered a doctoral candidate by the university, a student must have both passed the Doctoral Candidacy Exam and completed all 45.0 credits of master level coursework post-baccalaureate or 15.0 credits coursework post-master. Once the student has reached doctoral candidate status, the Department of Digital Media will review her/his progress annually.

Dissertation Committee

Within six months of successful completion of the Doctoral Candidacy Examination the Department of Digital Media has to appoint the student's Dissertation Committee based on a proposal submitted by the student and the dissertation advisor. The committee has to conform to established university and college rules for dissertation/candidacy committee membership. The committee must have at least five members, three of whom must be tenure-track faculty at Drexel. At least one member must be from outside the Antoinette Westphal College of Media Arts and Design. In addition, at least three members must be Digital Media core faculty. The chair of the committee must be a Digital Media core faculty member who is not also the dissertation advisor of the student.

Once the Dissertation Committee is established, it will continue on throughout the student's progress toward the PhD degree. The committee's function is to guide the research and to determine the student's general knowledge of the area, as well as the student's breadth and depth of the specific topic. The committee will also consider the scientific feasibility of the proposed research.

Dissertation Proposal

The Dissertation Proposal consists of a written proposal of the dissertation research, a public presentation, and oral proposal defense before the Dissertation Committee. To ensure that students are progressing towards completion of the PhD in a timely fashion, the proposal defense must take place no later than the end of the second year of study. A formal request for an extension of this deadline must be approved following a review of the student's progress.

The purpose of the Dissertation Proposal is to determine if the PhD student is able to initiate, organize, write and defend a scientific idea, which will lead to a PhD dissertation. The presentation will be based on

the formal written proposal submitted to the Dissertation Committee at least three weeks before the presentation.

Students who elect to complete the MS in Digital Media alongside the Digital Media PhD degree can submit a revised version of the Dissertation Proposal as a Master Thesis for the partial fulfillment of the MS in Digital Media degree.

Dissertation Defense

The written dissertation will be submitted with the dissertation advisor's approval to the Dissertation Committee. A title and abstract of the dissertation must also be provided to the Digital Media office at least three weeks prior to the defense to allow the time and place of the defense to be publicized. The PhD candidate's public defense consists of his or her presentation of dissertation research followed by an examination by the Dissertation Committee.

Sample Plan of Study

Post-Baccalaureate PhD Students

Students without adequate background in digital media must complete two prerequisite courses, which are offered during the fall term of the first year of enrollment: DIGM 505 *Design and Interactivity* and DIGM 506 *Animation and Game Design*.

Facilities

The Digital Media Program operates several labs including a state of the art combined green screen/motion capture studio as well as 2.5 ton 3-degree-of-freedom motion platform. All labs and classrooms are equipped with powerful Dell and Boxx Technologies Workstations running Windows and Unix operating systems and Mac computers running OS X. Software includes a host of Adobe products and Autodesk 3ds Max and Combustion; Alias Maya; Softimage XSI and Behavior, Pixar RenderMan Pro Server along with RenderMan Artist Tools for Maya and RenderMan for Maya; Pixologic Z-Brush; Apple Shake; MotionBuilder; GarageGames; NextLimit RealFlow, and SideEffect's Houdini.

Digital Media Faculty

Theo Artz, BFA (*Tyler School of Art, Temple University*). Associate Professor. Digital media.

John Berton Assistant Professor. Visual effects, lighting and rendering Computer-Generated Imagery (CGI)

Milady S. Bridges, BA (*Rutgers University*). Assistant Teaching Professor. Animation principles, modeling, texturing, rigging, enveloping, particle simulations, lighting, compositing, and editing.

Graham D. Clark, MFA (*Academy of Art University*). Assistant Teaching Professor. Animation and visual effects, stereography.

Paul Diefenbach, PhD (*University of Pennsylvania*). Assistant Professor. Game development, real-time rendering.

Jeremy Fernsler, BA (*Pennsylvania State University*) Program Director, *Game Design & Production*. Assistant Teaching Professor. Digital effects artist; compositor and animator for the feature film visual effects industry.

Troy Finamore, MS (*Drexel University*) Program Director, *Interactive Digital Media*. Assistant Teaching Professor. Advertising, design and interactivity.

Arotis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Nick Jushchyshyn, MFA (*Academy of Art University*) Program Director, *Animation and Visual Effects, VR/Immersive Media*. Associate Professor. Visual effects, digital media and animation.

Frank J. Lee, PhD (*Carnegie Mellon University*). Professor. Human-computer interaction; cognitive engineering and science; intelligent software agents for games and education.

Robert Lloyd, MFA (*Tyler School of Art, Temple University*) Program Director, *Game Design & Production*. Assistant Teaching Professor. Game development, themed entertainment and motion simulation.

David Mauriello, BA (*Lafayette College*). Assistant Professor. 3D modeling and animation.

Glen Muschio, PhD (*Temple University*). Associate Professor. Digital media, society, communication.

Santiago Ontañón, PhD (*University of Barcelona*). Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning

Stefan Rank, PhD (*Vienna University of Technology*). Assistant Professor. Artificial intelligence, game design and human-computer interaction.

Tony Rowe, AA (*Institute of Computer Technology*). Assistant Teaching Professor. Veteran AAA Game Designer, mentor at Drexel's Entrepreneurial Game Studio. Game history, writing, and level design.

Jervis Thompson, BS (*Drexel University*). Associate Teaching Professor. Digital media, interactive multimedia.

Michael Wagner, PhD (*Vienna University of Technology*) Department Head, *Digital Media*. Professor. Production management, educational use of video games.

Jichen Zhu, PhD (*Georgia Institute of Technology*). Associate Professor. Developing humanistic and interpretive framework of computational technology, particularly artificial intelligence (AI), and constructing AI-based cultural artifacts; interactive storytelling, games and software studies.

Fashion Design

Major: Fashion Design

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 63.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 50.0407

Standard Occupational Classification (SOC) code: 27-1022

About the Program

The MS in Fashion Design is a full-time program that stresses the development of the aesthetic and philosophical concepts of fashion design and the technical skills to support research and experimentation in these concepts. A typical graduate sequence may consist of seven terms of graduate courses and five terms of prerequisite coursework, beginning with the summer term accelerated design and drawing courses.

The goal of the MS program in fashion design is to integrate the understanding of design with the construction of clothing so that the final products answer physical, aesthetic, psychological, and social needs within the context of contemporary fashion and industrial limitations. The curriculum is structured so that studio, laboratory, and classroom work give the graduate student a directed experience in the study of aesthetics, criticism, and contemporary art concepts; contemporary and historic art and design; traditional and current fashion technology; the discipline of drawing; and the making of art. A required industry internship affords the graduate student direct experience in a workplace of their choice. This comprehensive approach provides the basis for a broad range of employment in the fashion industry and in education. Other professional opportunities lie in merchandising, costume design, curatorial work, and computer-aided design.

The faculty of the Department of Design includes art historians, CAD specialists, designers, fiber artists, merchandising specialists, new materials and processes researchers, painters, and sculptors. The department also draws on practicing professionals as adjunct professors for specialized coursework and for critique of student work.

A limited number of graduate assistantships are available to students after completing the first year.

The Fashion and Design & Merchandising programs produce a professionally juried annual fashion show which provides competitive fashion industry and department awards and excellent exposure for the graduate students' design thesis. Drexel students can participate in the activities of the Fashion Group of Philadelphia, the local chapter of an international fashion industry organization. The Fox Historic Costume Collection, a rich resource of inspiration, is located in the URBN Center. Philadelphia has many fine museums and galleries and is an affordable bus ride to New York City. Students are encouraged to attend local and regional fashion events.

The 63.0 graduate quarter credits does not include any of the required prerequisite coursework. See the Admission Requirements for a list of courses students are expected to have completed prior to beginning their graduate study.

Additional Information

For more information about this program, please contact the Program Director:

Kathi Martin

martink@drexel.edu

Admission Requirements

Students enter the program from diverse backgrounds, including liberal arts, fine arts, and business. A personal interview is required. The admission criteria for the graduate program consist of the requirements of the University for graduate admission plus satisfaction of undergraduate coursework in basic fashion design skills and concepts. These

prerequisites comprise 24.0 credits in design, drawing, and art history in addition to 20.0 credits in specific undergraduate fashion design professional courses, or their equivalent.

Prerequisite Undergraduate Coursework

ARTH 101	History of Art I: Ancient to Medieval	3.0
ARTH 102	History of Art II: Renaissance to Romanticism	3.0
ARTH 335 [WI]	History of Costume I: Preclassical to Directoire	3.0
ARTH 336 [WI]	History of Costume II: Directoire to World War I	3.0
FASH 201	Survey of the Fashion Industry	3.0
FASH 211	Fashion Drawing I	3.0
FASH 212	Fashion Drawing II	3.0
FASH 230	Textiles for Fashion Design	3.0
FASH 241	Construction Skills	4.0
FASH 341	Flat Pattern Design	4.0
VSST 104	Accelerated Design I *	2.0
VSST 105	Accelerated Design II *	2.0
VSST 106	Accelerated Design III *	2.0
VSST 110	Introductory Drawing *	3.0
VSST 111	Figure Drawing I *	3.0
Total Credits		44.0

* Or VSST 101, VSST 102, VSST 103 VSST 110, VSST 111 (18.0 credits).

Beginning in the summer term, the department offers a four-term prerequisite year to prepare candidates for the graduate coursework. A portfolio review and departmental evaluation determine what prerequisites have been satisfied. Contact the graduate advisor for specific information about prerequisites or to make an appointment for evaluation.

For additional information on requirements and how to apply, visit Graduate Admissions at Drexel University (<http://www.drexel.edu/grad/programs/westphal>).

Degree Requirements

The two years of full-time graduate coursework combine four terms of faculty-directed studio work in fashion design and two terms of student-directed independent studio work with required courses in design, aesthetics, and the art process. Elective coursework in fashion or specific topics; advanced studies in art, computer-aided design, art history, and fashion design; and independent studies allow individual flexibility in curriculum design.

Collection I and Collection II (FASH 685 and FASH 686) emphasize the development of an original statement of design intent, allowing students to synthesize their academic experiences and prepare for the marketplace. Each graduate student develops his or her personal collection which is then produced and presented in a professional fashion show.

Professional Portfolio (FASH 664) is a capstone course in which students create a professional quality collection of drawings geared to their market preferences.

Students are required to participate in at least three national and international fashion design competitions (FASH 899). These competitions provide awareness of world-wide design sensibilities and the overall level of competition in various facets of the marketplace.

The fashion industry internship (FASH 600) promotes spirit of entrepreneurship and provides perspective on success in the fashion

industry. A full-time ten week position in industry is required and provides experience in design and production processes.

Required Courses

Fashion Design Studios

ARTH 530	History of Modern Design	3.0
FASH 504	Materials Exploration	3.0
FASH 510	Presentation Techniques	3.0
FASH 511	Textile Design	3.0
FASH 514	Fashion Presentation	3.0
FASH 515	Computer Aided Design for Patternmaking	3.0
FASH 516	Computer Aided Design for Fashion Design	3.0
FASH 528	Draping Design	3.0
FASH 529	Fashion Design I	3.0
FASH 530	Fashion Design II	3.0
FASH 531	Fashion Design III	3.0
FASH 532	Fashion Drawing for Industry	3.0
FASH 543	Tailoring	3.0
FASH 550	Fashion Design IV	3.0
FASH 600	Fashion Industry Internship	0.0
FASH 633	Couture Techniques	3.0
FASH 666	Business of Fashion	3.0
FASH 664	Professional Portfolio	3.0
FASH 685	Collection I	3.0
FASH 686	Collection II	3.0
FASH 699	Comprehensive Examination in Fashion Design	0.0
Select two of the following:		6.0
FASH 517	Technical Design	
FASH 650	Machine Knitting	
FASH 651	Accessory Design	
FASH 752	Millinery Design	
FASH 767	Style and the Media	
FASH I599	Independent Study in Fashion Design	
FASH I699	Independent Study in Fashion Design	
FASH I799	Independent Study in Fashion Design	
FASH T580	Special Topics in Fashion Design	
FASH T680	Special Topics in Fashion Design	
FASH T780	Special Topics in Fashion Design	
Total Credits		63.0

Facilities

The open design of the URBN Center studio spaces fosters collaboration across our diverse design, media and art disciplines. It provides spaces where students can see what their classmates are creating; where making labs can be shared by students from many majors; and where creative connections can be made.

All majors in the college integrate use of discipline-specific and general use software in the 35 computer labs at Drexel's Westphal College of Media Arts & Design which house over 550 computers (Apple iMacs, Apple MacPros, BoxxTech, Dell, and HP). Also available within our college are five premier Music Industry recording studios and a motion capture/green screen compositing space. The Hybrid Lab contains traditional metal and woodworking machines as well as a rapid prototyper, a laser cutter, and access to a 3D router for multi-disciplinary design and product making. In The Shima Seiki Haute Technology Laboratory students experiment with production methods that advance the field of wearable technology using sixteen SDS-ONE APEX3 workstations, three state-of-the-art knitting machines. The CAD Fashion lab is equipped with digital fashion design and proprietary print design software

The Robert and Penny Fox Historic Costume Collection (<http://www.drexel.edu/westphal/resources/FHCC>) (FHCC), one of the finest teaching collections in the United States, is an educational resource for the students of Drexel University. Our mission as a University-based collection is to educate and inspire, while providing a significant resource for an ever-expanding community of historians, scholars, artists, and designers. Westphal College's new URBN Center facility has greatly improved the accessibility and visibility of the FHCC and allowed us to honor A. J. Drexel's original educational intent in taking a leadership role in research and scholarship, while preserving the collection for future generations. The Charles Evans Library contains books, periodicals, DVDs and other sources of inspiration for the fashion student.

The fourth floor of the Academic Building is occupied by a 10,000-square-foot photography lab, lighting studios, and two digital imaging labs. It offers professional-quality equipment in a comfortable working environment.

Film and video facilities include two fully equipped television studios; digital editing facilities; video-editing suites; film editors; and specially outfitted multimedia rooms for all courses. Loan equipment available to students includes digital video cameras; Bolex, Gizmo and Arriflex film cameras; and field lighting and audio equipment. Additionally, the college operates a cable television station reaching over 400,000 households.

The music industry major's digital audio labs and recording studios in MacAlister Hall and University Crossings offer opportunities for the creation, modification, analysis, and recording of sound and music using analog and digital media.

The Mandell Theater (<http://drexel.edu/performingarts/about/facilities/mandell-theater>) provides a 420-seat proscenium theater with scene shop, dressing rooms, and costume shop. Costume is taught with primary source material from Drexel's 7,000-piece Historic Costume Collection (<http://www.drexel.edu/westphal/resources/FHCC>).

The Ellen Forman Memorial Dance Studio, adjacent to the Mandell Theater is the primary studio for the Dance major.

In University Crossings, a 25,000 square foot space houses offices for film, video, screenwriting, and playwriting faculty as well as two state-of-the-art digital editing facilities, a shooting and motion capture studio with special effects capability, two screening rooms, several multi-media classrooms, a laboratory for game development and research, laboratories for other digital media purposes and for music industry, and a well-stocked equipment room.

Fashion Design Faculty

Renee Weiss Chase, MS (*Drexel University*). Professor. Fashion designer; computer-aided design systems for the fashion curriculum.

Maureen DeSimone, MBA, in progress (*Colorado State*). Adjunct Instructor. Wholesale business operations, marketing and line development.

Anita Dennis, AST (*Art Institute of Philadelphia*) *Fashion Laboratory Technician*. Assistant Teaching Professor. Fashion designer and technician; construction skills.

Genevieve Dion, MFA (*University of the Arts*) *Director, Shima Seiki Haute Technology Lab, ExCITe Center*. Associate Professor. Industrial designer, wearable artist, new materials technology research.

Cynthia Golebuski, MS (*Drexel University*) *Associate Program Director, Fashion Design*. Associate Teaching Professor. Fashion designer, illustrator, computer aided design.

Roberta Gruber, MS (*Drexel University*). Associate Professor. Fashion designer and illustrator; wearable artist, merchandiser, special events.

Lisa L. Hayes, BFA (*Syracuse University*) *Program Director, Fashion Design*. Associate Professor. Fashion designer, product designer, pattern design.

Jaeyoon Jeong, MS (*Drexel University*). Assistant Teaching Professor. Owner/Designer Jaeyoon Jeong Collection

Jackie Kilmartin, MS, BS (*Jefferson University, University of the Sciences*). Assistant Teaching Professor. Owner/Knitwear Designer Lillian Jackson Textiles.

Jan Marshall, BA (*Long Island University*). Assistant Teaching Professor. Fashion designer, knitwear, product development, fashion analysis.

Kathi Martin, MSIS (*Drexel University*) Associate Director of the Graduate Program in Fashion Design. Professor. Fashion and textile designer; textile artist; computer-aided design, best practices online databases and graphic interfaces for fashion and historic costume, high resolution 3D interactive images for fashion design.

Alphonso McClendon, MS (*Drexel University*) Program Director, Design & Merchandising. Associate Professor. Fashion designer, product and business development, computer aided planning and design.

Clare Sauro, MA (*Fashion Institute of Technology*) Curator, Historic Costume Collection. Associate Teaching Professor. Costume history.

Interior Architecture and Design

Major: Interior Architecture and Design

Degree Awarded: Master of Science

Calendar Type: Quarter

Total Credit Hours: 69.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 04.0501

Standard Occupational Classification (SOC) code: 27-1025

About the Program

The Master of Science program in Interior Architecture & Design at Drexel is an internationally recognized CIDA accredited First Professional MS degree that prepares students of diverse undergraduate backgrounds to become leaders in the field of interior design. Through an integrated studio approach, coursework incorporates application of design concepts, technical information and hands-on skills to create a range of public, commercial, residential and institutional spaces. Students learn to transform space to address aesthetic, social, physical and psychological needs. In conjunction with the integrated studio, the program emphasizes independent research culminating in a master's thesis. The Master of Science program in Interior Architecture & Design is ranked in the Top10 by DesignIntelligence, America's Best Architecture & Design Programs.

Comprised of 69.0 graduate credits, most students complete the MS Interior Architecture & Design program in two to three years, depending upon individual student backgrounds and the completion of all necessary prerequisites.

Student Background

MS Interior Architecture & Design students come to the program with undergraduate degrees in a wide variety of fields. With more than 90% of the applicants having backgrounds in a non-design related field and on average 10% being international students, the graduate student body brings rich and diverse life and cultural experiences to the Department and the College. Open mindedness and the desire and commitment to acquire knowledge through various avenues ensure that all students enrich the exchange of ideas and professional development.

Professional Opportunities

Alumni are principals of their own interior design firms, project managers in major design and architectural firms, facilities managers, and design coordinators. About one-third of the students obtain entry-level employment before graduation from the program; within five years, many hold managerial positions.

Professional exposure occurs in exchanges with practitioners through professional jurying of all major student projects. Students are also encouraged to become members of local, national, and international interior design professional organizations.

For more information, visit Drexel's Graduate Studies in Interior Architecture & Design (<http://www.drexel.edu/westphal/academics/graduate/interiordesign>) web page.

Admission Requirements

Admission criteria for the graduate program consists of the requirements of the University for graduate admission plus satisfaction of basic interior design undergraduate coursework. These prerequisites include courses in design, drawing, and art history.

Prerequisite Undergraduate Coursework

ARTH 103	History of Art III: Modern Art	3.0
VSST 104	Accelerated Design I *	2.0
VSST 105	Accelerated Design II *	2.0
VSST 106	Accelerated Design III *	2.0
VSST 110	Introductory Drawing	3.0
INTR 160	Visualization I: Computer Imaging	3.0
INTR 200	History of Modern Architecture and Interiors	3.0
INTR 220	Visualization II: Orthographic	3.0
INTR 231	Structure	4.0
INTR 232	Interior Studio I	4.0
INTR 241	Visualization III: Digital	3.0
INTR 300 [WI]	Visual Culture: Interiors	3.0
INTR 305 [WI]	Visual Culture: Furniture	3.0

* Or VSST 101, VSST 102, VSST 103 (Design I, II, III; 12.0 credits).

For students needing all prerequisite coursework, the program begins in the summer term with an accelerated sequence of foundational coursework and two quarters of undergraduate interior design courses. These prerequisites prepare candidates for the graduate coursework. Applicants who have a background in art, architecture or design may be able to complete the program in less time. A portfolio review or evaluation by the Associate Director of the Interior Architecture & Design program determines what prerequisites have been satisfied. Contact Graduate Studies in Interior Architecture & Design for specific information about prerequisites or to make an appointment for review and evaluation.

For additional information on requirements and how to apply, visit Graduate Admissions (<http://www.drexel.edu/grad/programs/westphal/interior-architecture-and-design>) at Drexel University.

Degree Requirements

The full-time graduate coursework combines seven terms of faculty-directed coursework in interior design, including a student-initiated thesis.

The 69.0 credits that make up the graduate requirement include a visual studies sequence as well as elective coursework in the following areas: interior design seminars on specific topics; advanced studies in art, art history, and interior design; and independent studies. This allows individual flexibility in curriculum design.

Required Courses

Studios		
INTR 722	Graduate Studio A	4.0
INTR 723	Studio A Seminar	2.0
INTR 732	Graduate Studio B	4.0

INTR 733	Studio B Seminar	2.0
INTR 742	Graduate Studio C	4.0

Facilities

The interior design program is housed in the URBN Center, a state of the art design and arts facility on Drexel's campus. The URBN Center officially opened in September 2012. A hub for creative minds to gather, share ideas and work together to bring those ideas from the mind to the page, and into the world of tomorrow, interiors students benefit from a wide-range of resources including interior design studios, the interior design resource library, a hybrid making lab, wood shop and computer laboratories. The Hybrid Making Lab (http://drexel.edu/westphal/about/overview/making_spaces/HybridMakingLab) is open to all Westphal students and has state-of-the-art fabricating equipment including 3-d printers, laser cutters and CNC Router. The Westphal Print Center (http://drexel.edu/westphal/about/overview/making_spaces/WestphalPrintCenter) is a full-service, low-cost facility and is accessible to students from on and off campus.

The URBN Annex houses a black box theater, screening room and the Leonard Pearlstein Gallery (<http://www.drexel.edu/pearlsteingallery>). Additional studio and classroom space in the Peck Problem Solving and Research Center and the Design Arts Annex accommodate photography, basic design, painting, sculpture and a full woodworking shop with industrial-quality equipment.

Philadelphia, one of the nation's major design centers, gives interior design students the vitality of the contemporary arts at local galleries; easy access to many museums, libraries, renowned buildings, as well as design centers located in Philadelphia, New York City and Washington, D.C.

Interior Design Faculty

Graham Bailer, RA MArch (*University of Pennsylvania*). Adjunct Instructor. Graham Bailer Architecture. Technology and foundations.

Rena Cumby, BArch, MS (*Drexel University*) *Department Head, Department of Architecture & Interiors*. Associate Professor. Interior designer; foundation studies and design education.

Eugenia Ellis, RA, PhD (*Virginia Polytechnic State University*). Associate Professor. Extended-care facilities design, research on spatial visualization, perception and imagination.

Jeff Fama, MArch (*State University of New York at Buffalo*). Adjunct Instructor. Retail, entertainment, and theater design.

Susan Feenan, BArch (*Temple University*). Adjunct Instructor. Institutional and commercial architecture.

Gary Garofalo, BS Arch Eng (*Pennsylvania State University*). Adjunct Instructor. Principal Lighting Design Collaborative; lighting expert, lighting design.

Alan Greenberger, FAIA, BArch (*Rensselaer Polytechnic Institute*) *Department Head, Architecture, Design & Urbanism, Distinguished Visiting Lindy Institute for Urban Innovation Fellow*. Distinguished Teaching Professor. Urban planning and policy.

Carla Heikiin, MS (*Drexel University*). Adjunct Instructor. Workplace Strategy.

Peter Johnston, RA, AIA, MArch (*University of California*). Assistant Teaching Professor. Hospitality and institutional architecture and interior design.

Nicole Koltick, MArch (*University of California*) *Director, Design Futures Lab*. Assistant Professor. Researching possibilities for architecture and design through the use of unexpected and innovative interdisciplinary models. Foundation design studios, fabrication and technology seminars.

Maria Kuttruff, MS (*Drexel University*). Adjunct Instructor. Owner/Principal, Viola Interior Design, LLC. Residential interior design.

William Mangold, NCIDQ, MPhil (*City University Graduate Center, NY*) *Associate Director MS Interior Architecture & Design*. Assistant Teaching Professor. Research on theories of space and place.

Diana S. Nicholas, RA, AIA, NCARB, MFA (*University of the Arts, Philadelphia*) *Director of MS Design Research*. Assistant Professor. Coordinator, Sustainability in the Built Environment

Karen Pelzer, NCIDQ, BS Interior Design (*Drexel University*). Assistant Teaching Professor. President, Karen Pelzer Interiors; hospitality design.

Debra Ruben, MS, IDEC, LEED AP, NCIDQ, MS (*Drexel University*) *Director of BS and MS Interiors Programs*. Associate Professor. Research on user participation and the design process.

Eric Rymshaw, RA, BArch (*Drexel University*). Adjunct Instructor. Vice President and Design Principal of Fury Design, Philadelphia.

Elena Sabinson, MS (*Drexel University*). Assistant Teaching Professor. Technology and visualization methods.

Frances Temple-West, RA, AIA, MArch (*Virginia Tech*). Adjunct Instructor.

Ada Tremonte, NCIDQ, BS (*Drexel University*) *Associate Director, BS Interior Design*. Associate Teaching Professor. President, ada Design Associates; corporate/commercial design.

Emeritus Faculty

Sylvia Clark, MArch (*University of Pennsylvania*). Professor Emeritus.

Marjorie Kriebel, BArch (*University of Pennsylvania*). Professor Emeritus.

Karin Kuenstler, MS (*Bank Street College of Education and Parsons*). Professor Emeritus.

Marilynne L. Rose, NCIDQ, MS (*Drexel University*). Professor Emeritus.

Museum Leadership

Major: Museum Leadership

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 30.1401

Standard Occupational Classification (SOC) code: 25-4011; 25-4012; 25-4013

About the Program

At the beginning of the 20th century museums were primarily keepers of things—their collections—and were thought of primarily as repositories of knowledge. Over the course of the century the American museum has changed. While collections remain at the core of their missions, museums have focused more and more on their educational roles, their communities and their audiences. The internet and digital technology are challenging museums to rethink how they operate and re-evaluate how they use their collections and the nature of their audiences.

Drexel University's MS in Museum Leadership program prepares students for a range of management and leadership roles that are essential to the integrity and health of today's museums. Students study the philosophy and history of leadership in cultural institutions, incorporating theory and practice from the museum field as well as business, government, and other non-profit organizations. The program examines the process of creating new museums as well as expanding existing museums. Students learn the variety of roles required to run the contemporary museum, including curators, conservators, registrars, educators, programmers, audience development, fundraising, board members and volunteers.

Taking advantage of various departments and programs across Drexel University, such as The Academy of Natural Sciences of Drexel University (<http://www.ansp.org>), as well as other regional museums, the program includes hands-on participation in learning laboratories during practicum experiences and other opportunities. Importantly, the program encompasses the full range of museums—art, history, science, archaeology, zoos, aquariums, arboretums, historic houses, children's, and folklore— as well as covering both USA and international museum practices.

Goals and Objectives

Drexel's Museum Leadership program will prepare leaders who enable museums to fulfill their missions of stewardship and education. These leaders will develop a knowledge and skill base to steer tomorrow's museums.

Graduates of the program will be prepared:

- To lead museums that preserve, present and critically interpret the knowledge and heritage of diverse human societies and identities;
- To lead museums that will achieve financial security and stability;
- To address the changing nature of museums, including expanding new technologies, educational and community outreach goals, changing demographics, and a changing political and funding environment;
- To build museums that address changing public expectations of the museum experience, including responsiveness to their diverse communities as well as a more participatory visitor experience;
- To contribute to a museum workforce that is culturally rich, representing the full diversity of each museum's surrounding community;
- To engage with the full spectrum of their local communities as well as a national and international community of museums and museum-goers.

Additional Information

For additional information about this program, contact:

Dr. Danielle Rice
Director, Museum Leadership Program
URBN Center, 210G

Danielle.rice@drexel.edu

Admission Requirements

In addition to meeting the general requirements for admission to graduate studies at Westphal College of Media Arts and Design, applicants should present a resume demonstrating a strong affinity for the field through work, volunteer experiences, education or special training.

Preparation must include at least one undergraduate level course in financial accounting, two courses in any field related to museum practice, and/or two years' professional or board level experience with a museum. Students entering the program without the required undergraduate accounting course must complete the pre-requisite within the first two terms of matriculation.

Applicants must have a minimum 3.0 GPA in their undergraduate work, and for international students whose first language is not English, the minimum TOEFL score is 90/577.

For additional information on requirements and how to apply, visit Graduate Admissions at Drexel University (<http://www.drexel.edu/grad/programs/westphal>).

About the Graduate Minor

Museums encompass many disciplines including art, history, science, anthropology and archaeology. The Museum Leadership graduate minor enables students pursuing an MS degree in another discipline to get a basic understanding of how museums function in contemporary society in preparation for entering a museum career.

Admission Requirements

Students must be in good standing (3.0 grade point average) in their major field.

Museum Leadership Faculty

Jacqueline Genovesi, PhD (*Drexel University*). Assistant Clinical Professor. Museum education, STEM learning, early childhood STEM experiences in informal environments, autism access and increasing women involvement in STEM.

Derek Gillman, LL.M. (*University of East Anglia*) Senior Advisor to the President for University Collections. Distinguished Teaching Professor.

Bruce Katsiff, MFA (*Oxford University*). Adjunct Professor.

Laura Lenhart, BS (*Mankato State University*). Adjunct Professor. Financial Accounting.

Elizabeth Milroy, PhD (*University of Pennsylvania*) Department Head, Visual Studies. Professor. American art, Museum Studies.

Danielle Rice, PhD (*Yale University*) Program Director, Museum Leadership. Teaching Professor. Museum Studies.

Clare Sauro, MA (*Fashion Institute of Technology*) Curator, Historic Costume Collection. Associate Teaching Professor. Costume history.

Dennis Wint, PhD (*Case Western Reserve University*). Teaching Professor.

Paul F. Harron Television Management Program

Major: Television Management

Degree Awarded: Master of Science (MS); Master of Science/Master of Business Administration (MBA)

Calendar Type: Quarter

Total Credit Hours: 49.0 (MS) or 79.0 (MS/MBA)

Calendar Type: Quarter

Co-op Option: None

Classification of Instructional Programs (CIP) code: 09.0701

Standard Occupational Classification (SOC) code: 27-2012

About the Program

The Paul F. Harron Graduate Program in Television Management is in its 12th year. The program draws a global student body, and its graduates hold responsible positions in top media companies around the world.

In September 2015 we launched the online version (<http://online.drexel.edu/online-degrees/business-degrees/television-management>) of the graduate on-campus program.

The Paul F. Harron Television Management program offers two approaches to graduate study: the MS in Television Management and the dual MS/MBA degree option. Both are online and on-campus; the

on-campus program may be taken full-time or part-time while the online program is offered part-time only.

The stand-alone MS degree prepares students with a solid grounding in business management and specialized courses in the management of television and converged media. The program integrates business course content with current practice in the television industry. Students interact with working professionals on campus and in the field through internships. Course content includes programming analysis and strategy, media analytics and audience measurement, structural analysis of media industries, scope and methods of the field, media finance, social media and television, social television, media sales models and practice, media law and ethics, telecommunications policy and public interest law, global television, field internships, and topical electives.

The dual degree option includes a full MBA. Students in both programs gain hands-on management experience through internships in broadcast television stations and networks, cable companies, independent production companies and evolving media hybrids that operate in the region and beyond. The program combines practical and academic experience, including courses designed to challenge students to discover the critical interplay between creative process and the business skills required to manage successful media companies.

About the Curriculum

The television industry is undergoing a radical transformation, the signs of which are everywhere to be found. You don't have to search the trades, academic, or popular press for very long to discover that the converged world of television has undergone a sea change in the face of new revenue models, rapidly changing telecommunications policy, transformative technology, shifting audience loyalties, dynamic delivery platforms, and a volatile national and global marketplace; Big Data, Netflix, Roku, Apple TV, Amazon Prime, the challenge of OTT, spectrum auctions, mobile platforms, and changing audience demographics, legacy media transformations, social media begetting social television, retransmission consent, net neutrality, backbone networks, edge and broadband providers, end users, neuromarketing and biometrics, VR and AR, Google Glass, Oculus Rift, wearable technologies, The Internet of Things, OLED screens, 4k and 8k video projection, streaming media, WiMAX and Wi-Fi...the list of change agents affecting the legacy television industry is much longer than this. But the impact is clear: television has changed, is changing and will continue to change; and our students will become the next generation of change agents.

Today's television and media industries are some of the most competitive and fastest growing in the world, and this has created new opportunities for those who can manage, market and create for the world of converged media. The Paul F. Harron Graduate Program in Television Management offers two graduate study options to prepare students for the demanding television and media industries: the MS in Television Management and the dual MS/MBA.

The stand-alone MS degree offers a solid grounding in business management and specialized courses in the management of television and evolving media hybrids. The dual MS/MBA option allows students to integrate business course content with the practices of television and new media industries, and provides graduates the advantages of also having the renowned Drexel MBA.

Ultimately, we believe the way people learn is by doing. Students engage in hands-on management experience through internships at broadcast television stations and networks, multi-channel video programming distributors, streaming media and evolving web companies, independent

production companies, and emerging media hybrids in the region and beyond. The program combines practical and academic experience in courses such as Audience Measurement, TV Programming, Structure of TV Organizations, Media Law, Media Sales, Media Ethics, Money and the Medias, Social TV, Emerging TV Technologies and TV Production. Students gain hands-on management insights through simulations in retransmission consent negotiation, technology management, contract negotiation, and debate around technology assessment. These courses challenge participants to discover the critical interplay between creative process and the business skills required to manage successful media companies.

Program Features

Features of the program include the availability of Fellowships and Graduate Assistantships, flexible scheduling with part-time and full-time options, evening classes, rolling admissions (allowing students to start in any term, including summer) as well as professional internships. Philadelphia is the fourth largest television market and home to Comcast, Center City Video, Shooters, broadcast network affiliates and O&O's, three public television organizations, Harmelin Media, and innovative web-streaming and specialized digital content producers and online agencies.

Students find internships and employment with major broadcast, multichannel, and new media companies in Philadelphia, New York, Washington, Los Angeles, London, Beijing, and beyond, including:

- CNN
- NBC/Universal
- Sony
- NBC SportsChannel
- China Central TV
- Time, Inc.
- University of Pennsylvania
- Nielsen
- Harmelin Media
- SMG Shanghai
- Disney
- Katz Media Group
- Discovery Channel
- Raycom Media
- Shanghai Media Group
- Game Show Network
- USA Networks
- Bounce TV
- Reign Deer Entertainment
- PBS/Sprout
- Philly.com
- Comcast SportsNet
- NBC Sports
- MTV Networks
- Sesame Workshop
- Pro Mobile Productions
- Sony
- PHL 17
- NBC10
- CBS3/CW

- WPVI6
- WYBE35
- Center City Video
- CCTV
- CNBC International
- Princeton University
- QVC
- National Geographic Channel
- Univision
- Nancy Glass Productions
- Telemundo
- Dreamworks
- and many others.

Additional Information

For information about Television Management students, faculty, alumni, internships and the structure and operation of the program, please visit the Graduate Television Management (<http://www.drexel.edu/westphal/academics/graduate/TVMN>) website.

Admission Requirements

For information regarding admission to the program, contact:

Facilities

Facilities and opportunities for the program include:

- Field trips to broadcast stations and networks in Philadelphia, Washington, DC, and New York
- Civic engagement projects in Philadelphia and internationally (<http://www.drexel.edu/westphal/graduate/TVMN/civicengagement>)
- The LeBow College of Business (<http://www.lebow.drexel.edu>)
- The Laurence A. Baiada Institute for Entrepreneurship
- Close School of Entrepreneurship
- Professional social media groups (<https://www.linkedin.com/groups?home=&gid=6613646>)
- Business planning courses
- Incubator competitions sponsored by the The Close School of Entrepreneurship
- Civic Engagement Outreach
- The Henderson Challenge (business plan competition)
- The Rudman Institute for Entertainment Industry Studies

- DUTV (<http://dutv.drexel.edu/television>), Drexel's educational cable access channel
- The URBN Center labs and maker spaces

As part of their MS/MBA course of study, students take full advantage of the new Gerri C. LeBow Hall and the Leonard Pearlstein Business Learning Center, which includes The George and Lois Krall Center for Executive Education, state-of-the-art classrooms, learning facilities, conference rooms, and technology upgrades to meet the needs of MBA students so they can compete aggressively in the global marketplace.

Cinema and Television Faculty

Doug Bailey, MA (*Ohio University*). Adjunct Instructor. Audience-Driven Creative Content, Audience Research, Video Production, Content Acquisition and Development

Peter J. Bernbaum, JD (*University of Pennsylvania*). Adjunct Professor. Media Law, Regulatory Environment, Negotiation, Mediation, Arbitration

Chris Blackman, BA (*Stanford University*). Adjunct Professor.

Jackie Borock, LLB (*Widener University*). Adjunct Instructor. Media law, intellectual property, first amendment

Michelle Bradsher-McHugh, MS (*Quinnipiac University*) *Associate Director, Graduate Program in Television Management*. Interactive Media, Television News Management, PR and Promotion, Media Ethics, Marketing Communications

Perry Casciato, BA (*Newhouse School, Syracuse University*). Adjunct Professor. Programming and Audience Strategies, Data Analytics

Mary Cavallaro, JD (*Villanova University*). Adjunct Instructor. Media Law, Media Ethics, Collective Bargaining

Susan Cohen-Dickler, BA (*Oberlin College*). Adjunct Professor. Reality TV Programming

David Culver, AS (*Graham Junior College*) *Manager of the Paul F. Harron Studios/DUTV*. Associate Teaching Professor. Film, Video, Station Management, Emerging Media Technology

Karen Curry, BA (*Fordham University*) *Executive Director, Kal and Lucille Rudman Institute for Entertainment Industry Studies*. Adjunct Instructor. Global media, news production and management.

Lawrence Epstein, MBA (*Cornell University*) *Interim Department Head, Arts & Entertainment Enterprise*. Teaching Professor. Media Finance, Station Group Management Media Analytics, Financial, Technical and Strategic Planning. Technology Assessment and Management, New Venture Management

Heather Foster, BA (*Earlham College*). Adjunct Assistant Professor. Big Data Analytics, Audience Measurement, Media Planning and Buying, Social TV, Cross-Platform Advertising Strategies

Princell Hair, MBA (*Emory University*). Adjunct Associate Professor. Management of News and Sports Programming, Network Management

Terrence T. Maher, MBA (*Boston College*). Adjunct Associate Professor. Media Research, Audience Analysis, Big Data Analysis, Media Strategy and Planning

Joe Marsini, BS, CPA (*University of Delaware*). Adjunct Instructor. Media finance, strategic planning, financial reporting, contract negotiations, collective bargaining agreements.

John Mussoni, BA (*University of Missouri-Columbia*). Adjunct Professor. News Management, Cross-Platform Content Delivery, Public Media Management

Rich Paleski, BS (*New Jersey Institute of Technology*). Adjunct Professor. Broadcast Operations and Engineering, Technology Assessment, Emerging Media Technologies, Collective Bargaining

Allen Sabinson Network Production and Programming, Content Acquisition and Development, Network Management

Derrick Savage, MFA (*American Film Institute*). Directing for Film and Television, Global Media, Cross-Platform Production and Distribution, Cinematography

Janice Selinger, MFA (*Rutgers University*). Public Media, Network Management, News Production and Management, Programming and Production

Mike Sheehey, LLM (*Temple University*). Adjunct Associate Professor. Media Finance, Financial Analysis, Taxation, Business Development, Operations, Sports Programming, MVPD Management

Wilson Surratt, MA (*University of North Carolina*). Adjunct Assistant Professor. News Production and Management, Directing, Special, Project Development

Andrew Susskind, BA (*Harvard University*) *Program Director of TV Production & Media Management*. Associate Teaching Professor. Producing for Television, The Sitcom, Directing Single and Multi-Camera

Albert S. Tedesco, MA (*University of Pennsylvania*) *Director of the Paul F. Harron Graduate Program in Television Management*. Teaching Professor. Media Management, Organizational Structure, Research Methods, Media Ethics, Media Law, The Regulatory Environment, Technology Assessment, Media Theory, Media Analytics

Retail & Merchandising

Major: Retail & Merchandising

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 52.0212

Standard Occupational Classification (SOC) code: 41-1011

About the Program

The MS in Retail & Merchandising is designed for early to mid-career professionals in retail and merchandising and for those who are looking to make a career change into the industry. Students will develop advanced skills to think critically, consider theoretical perspectives, research and solve problems, and implement innovative solutions in a dynamic global marketplace inclusive of lifestyle areas such as home, beauty and personal care, health and wellness, prepared foods, and pet products.

The 2-year program is structured with a year of core curriculum followed by a year of in-depth research, data collection, and completion of a project or thesis. Program content will challenge and engross students in the areas of analytical and critical-thinking, retail data analysis, visual

and retail communication, technological movements, social media, and merchandising and retail “future” strategies through academic and applied learning online and in the field. Graduates will pursue leadership roles and career growth in the areas of retail, merchandising, supply-chain, and brand industries.

Admission Requirements

- A bachelor's degree from a regionally accredited institution, with a GPA of 3.0 or above, GRE test scores may be required for applicants with less than a 3.0 cumulative undergraduate GPA.
- A completed application
- Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended
- Two letters of recommendation (professional references preferred)
- Personal statement (500 words) that addresses:
 - Why do you want to pursue a graduate degree in retail & merchandising at Drexel?
 - What do you consider to be the most important problem facing the retail industry today, and how will it affect the industry you will manage in the future?
 - What are the short-term and long-term plans for your career in the retail industry, and how will a degree in retail & merchandising at Drexel further those objectives?

Degree Requirements

Core Requirements

RMER 500	Retail Merchandising	3.0
RMER 510	Research Methods in Retail & Merchandising	4.0

Complementary and Integrative Health Faculty

Megan Carrier, MS (*Drexel University*). Assistant Professor. Nutrition, Fitness, Food insecurity, and Auto-immune disease.

Rita Carroll, PhD (*Capella University*). Assistant Professor. Cognitive and functional rehabilitation, Mindfulness.

Diane Fahey, MSN, MFA (*Rowen University, Catholic University of America*). Assistant Professor. Integration of holistic healthcare strategies into clinical setting.

Mary Beth Kealy, MSN (*Drexel University*). Assistant Professor. Complementary and Integrative Therapies; Therapeutic Yoga; Stress Management.

Stephanie Ross, MH, HT, CNC (*University of Calgary*) Director of the *Complementary and Integrative Therapy Program*. Assistant Clinical Professor. Botanical medicine; women's natural health and complementary and integrative therapies.

Judith White, MA, CEHP (*Ohio State University*). Assistant Professor. Energy-based therapies; Stress reduction.

Urban Strategy

Major: Urban Strategy

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 48.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 45.1201

Standard Occupational Classification (SOC) code: 19-3051

About the Program

The MS in Urban Strategy program is a cross-disciplinary 2-year, 48.0 credit master's degree designed to prepare students to become 21st century urbanists equipped to collaboratively and creatively solve complex multi-faceted urban challenges on all levels: locally, nationally and globally. The program boasts a cross-disciplinary curriculum focused on strategy, problem solving, and collaboration in the domains of urban planning, design, health, engineering, policy, community and economic development and sociology.

Admission Requirements

Transcripts: Provide official transcripts from all colleges and universities attended

Standardized Test Scores: GRE/MAT test scores are accepted and appreciated, but not required. TOEFL scores are required for international applicants or applicants who earned a degree outside the U.S. (minimum scores: 100/577/233). Scores will be reviewed based on section scores and total scores. IELTS scores may be submitted in lieu of TOEFL scores.

Essay: Please write approximately 500 words explaining your reasons for pursuing a degree from Drexel; your short-term and long-term career plans; and how your background, experience, interest, and/or values, when combined with a Drexel degree, will enable you to pursue these goals successfully.

Résumé: Please submit a resume electronically

Letters of Recommendation: Two letters of recommendation are required. To electronically request recommendations, you must list your recommenders and their contact information on your application. We advise that you follow up with your recommenders to ensure they received your recommendation request — they may need to check their junk mail folder. Additionally, it is your responsibility to confirm that your recommenders will submit letters by your application deadline and follow up with recommenders who have not completed their recommendations.

Academic Experience: You must have a minimum undergraduate GPA of 3.0 in your major.

Degree Requirements

ECON 616	Public Finance and Cost Benefit Analysis	3.0

Urban Strategy Faculty

Debjeni Bhattacharyya, PhD (*Emory University*). Assistant Professor. Modern South Asian history; urban environmental history; history of economic thought; and post-colonial theory.

Richardson Dilworth, PhD (*Johns Hopkins University*) *Director, Center for Public Policy*. Professor. American political development, urban politics, public policy.

Alan Greenberger, FAIA, BArch (*Rensselaer Polytechnic Institute*) *Department Head, Architecture, Design & Urbanism, Distinguished Visiting Lindy Institute for Urban Innovation Fellow*. Distinguished Teaching Professor. Urban planning and policy.

Charles N. Haas, PhD (*University of Illinois-Urbana*) *L. D. Betz Professor and Department Head, Civil, Architectural and Environmental Engineering*. Professor. Control of human exposures to and risk assessment of pathogenic organisms; water and waste treatment; homeland security.

Jana A. Hirsch, PhD (*University of Michigan*). Assistant Research Professor. Health and place or built environment; health disparities; mental and behavioral health; urban health; active aging; age-friendly neighborhoods

Scott G. Knowles, PhD (*Johns Hopkins University*) *Interim Department Head, History*. Professor. Urban history, history of technology, history of disasters, modern history.

Harris Steinberg, FAIA, MArch (*University of Pennsylvania*) Executive Director, *Lindy Institute for Urban Innovation*. Distinguished Teaching Professor. Urban design and civic engagement.

Andrew Zitcer, PhD (*Rutgers University*) Program Director, *Urban Strategy*. Assistant Professor. Arts and community development, community based organizations, governance modes, organizational planning, narrative and social theory.

The College of Arts and Sciences

About the College

By pursuing excellence in research and scholarship, we train our graduate students to become ethical professionals with expertise in particular areas of inquiry and an appreciation for the fundamental interactions among disciplines in a fast-changing, challenging and diverse world.

Drexel University's College of Arts and Sciences (<http://www.drexel.edu/coas>) (CoAS) stands unafraid in the face of change. We recognize that our ever-evolving, fast-paced culture required a new approach to education, one that understands the world is malleable and can be molded by minds inspired to lead society's evolution.

But innovation requires more than an ambitious personality. It requires versatility -- we must not only be experts in our field, but also agile enough to engage in the cross-disciplinary work needed to address modern problems resourcefully. That's why our faculty challenge students to see past their own perspectives and establish a deeper understanding of humanity's needs. It's why our co-op program inserts students within a professional culture, introducing them to the expectations of the job while offering hands-on practical application of coursework. And it's why, starting as early as early as freshman year, students team with faculty members as peers, conducting research that affects the world now.

Here at CoAS, we are committed to implementing in-the-moment change, not for personal glory, but because it's what the world needs.

Majors

- Biological Sciences (MS, PhD) (p. 255)
- Chemistry (MS, PhD) (p. 258)
- Communication (MS) (p. 261)
- Communication, Culture and Media (MS, PhD) (p. 264)
- Environmental Policy (MSEP) (p. 267)
- Environmental Science (MSES, PhD) (p. 268)

- Psychology (MS, PhD) (p. 278)
- Psychology-Law (PhD/JD) (p. 270)
- Public Policy (MS) (p. 283)
- Publishing (MA) (p. 285)
- Science, Technology and Society (MS) (p. 286)

English Language Center

As part of the College of Arts and Sciences, Drexel's English Language Center (<http://www.drexel.edu/elc>) offers an accredited intensive English program throughout the year. In addition to classes in academic skills such as essay writing and oral presentations, the Center offers the language of STEM (Science Technology Engineering and Math), Language of Media and Design, Global Business English program

(GLOBE), English for academic purposes, TOEFL and IELTS preparation, ESL Teaching enhancement programs, and other subjects.

Many graduate students begin their studies at Drexel in the English Language Center and the Graduate Preparation summer program for a rigorous and supportive environment to develop or enhance their academic English language knowledge and skills. International Teaching Assistants are oriented through a summer course in the language, culture, and pedagogy of the US classroom. All Drexel international students have access to tutoring and other academic skills workshops throughout the academic year.

Some graduate programs within the College of Arts and Sciences may accept who are academically admissible but need further English language study.

For more information, see the ELC website (<http://www.drexel.edu/elc>) or contact the Center at:

Biological Sciences

Major: Biological Sciences
Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)
Calendar Type: Quarter
Total Credit Hours: 45.0 (MS) or 90.0 (post-bachelor's) or 45.0 (post-master's)
Co-op Option: Available for full-time on-campus master's-level students
Classification of Instructional Programs (CIP) code: 26.0101
Standard Occupational Classification (SOC) code: 19-1029

About the Program

The Department of Biology (<http://drexel.edu/coas/academics/departments-centers/biology>) offers graduate programs in biological sciences leading to the doctorate degree and to the thesis or non-thesis master of science degree. The curricula and research programs are designed to help students achieve success in their degree programs and pursue positions of leadership in their respective fields of research.

The intellectual life of the department relies heavily on the participation, creativity and the energy of graduate students; therefore the department expects students to be vigorously involved in courses, seminars, journal clubs, research, informal discussions, and departmental functions.

MS in Biological Sciences

Degree Requirements

Soon after matriculation the student completes a plan of study with the advisor, outlining his or her specific program. Both thesis and non-thesis options are available. Conducting formal research necessary for the thesis is dependent upon the student finding a faculty member whom will serve as their faculty advisor and supervise a mutually agreed upon research project.

Students registering for an MS with graduate co-op will gain 6 months of work experience in the summer/fall term (year 1/year 2). The Steinbright Career Development Center (<http://drexel.edu/scdc>) will provide students with an overview of professionalism, resume writing, and the job search process. Students will not earn academic credit for the co-op but will earn 9.0 non-academic co-op units per term.

Students wishing to pursue PhD candidacy are encouraged to elect the MS with thesis. After all other requirements are completed, the research MS student defends the thesis at a final oral examination. Alternatively, all non-thesis students must pass a comprehensive examination as a condition of their degree completion.

Requirements for the MS Curriculum with Thesis

BIO 500	Biochemistry I	3.0
BIO 532	Advanced Cell Biology	3.0
BIO 540	Readings in Molecular and Cellular Bioscience and Biotechnology	3.0
BIO 601	Research Methods	3.0
BIO 635	Advanced Genetics and Molecular Biology	3.0
BIO 997	Research in Bioscience	12.0
ENVS 506	Biostatistics	3.0
GRAD 600	An Introduction to the Responsible Conduct of Research (RCR): A Short Course for Investigators	1.0
Bioscience electives		14.0
Total Credits		45.0

Requirements for the Non-Thesis MS with Graduate Co-op

BIO 500	Biochemistry I	3.0
COOP 500	Career Management and Professional Development for Master's Degree Students	1.0
BIO 635	Advanced Genetics and Molecular Biology	3.0
BIO 532	Advanced Cell Biology	3.0
ENVS 506	Biostatistics	3.0
GRAD 600	An Introduction to the Responsible Conduct of Research (RCR): A Short Course for Investigators	1.0
Bioscience electives*		31.0
Total Credits		45.0

Requirements for the Non-thesis MS Curriculum

BIO 500	Biochemistry I	3.0
BIO 532	Advanced Cell Biology	3.0
BIO 635	Advanced Genetics and Molecular Biology	3.0
ENVS 506	Biostatistics	3.0
Bioscience electives*		33.0
Total Credits		45.0

* *Non-thesis students may elect to take up to 4.0 credits of BIO 997 Research in Bioscience.

Bioscience Electives Include:

BIO 534	Bioinformatics I	3.0
BIO 535	Bioinformatics II	3.0
BIO 562	Biology of Neuron Function	3.0
BIO 565	Neurobiology of Disease	3.0
BIO 610	Biochemistry of Metabolism	3.0
BIO 613	Genomics	3.0
BIO 614	Behavioral Genetics	3.0
BIO 615	Proteins	3.0
BIO 616	Biochemistry of Major Diseases	3.0
BIO 620	Biomembranes	3.0
BIO 630	Cell Biology of Disease	3.0
BIO 644	Human Genetics	3.0

BIO 646	Stem Cell Research	3.0
BIO 650	Virology	3.0
BIO 661	Neurobiology of Autism Disorders	3.0
BIO 663	Molecular Mechanisms of Neurodegeneration	3.0

PhD in Biological Sciences

The Doctor of Philosophy in Biological Sciences is conferred in recognition of breadth of scholarship and scientific attainment plus demonstrated ability to complete original research.

The following general requirements must be satisfied in order to complete the PhD program in Biological Sciences:

- 90.0 (post-bac) or 45.0 (post-MS) credit hours total
- establishing a plan of study
- 7 core courses
- additional courses dependent on advisor or committee recommendations
- candidacy exam/approval of dissertation proposal
- dissertation/thesis
- defense of dissertation/thesis
- a graduate research seminar presentation once a year for students in their second year and beyond.

Thesis Advisor/Plan of Study

For students admitted without an identified thesis advisor, the thesis advisor must be selected by the end of winter term in the first year. All students are asked to submit a plan of study by the end of the winter quarter first year. It is anticipated that the graduate coursework will be completed during the first two years or less. Students should check with the department for a list of available electives.

Core Requirement Courses:

BIO 540	Readings in Molecular and Cellular Bioscience and Biotechnology	3.0
BIO 601	Research Methods	3.0
GRAD 600	An Introduction to the Responsible Conduct of Research (RCR): A Short Course for Investigators	1.0

Distribution Required Courses (Must choose 3)

BIO 500	Biochemistry I	3.0
BIO 532	Advanced Cell Biology	3.0
BIO 613	Genomics	3.0
BIO 635	Advanced Genetics and Molecular Biology	3.0
BIO 636	Population Genetics	3.0
ENVS 626	Molecular Ecology	3.0

Computational Requirement Courses (Must choose 1)

BIO 534	Bioinformatics I	3.0
ENVS 506	Biostatistics	3.0

Research and Research Seminars

BIO 864	Graduate Research Seminar	3.0
BIO 997	Research in Bioscience	3.0
Total Credits		90.0-91.0

* BIO 864 and BIO 997 are taken multiple times to reach 90.0 credits.

Sample Sequence/Sample Plan of Study

First Year		Credits
Fall		
BIO 540	Readings in Molecular and Cellular Bioscience and Biotechnology	3.0
BIO 500 or ENVS 526	Biochemistry I Molecular Ecology	3.0
Term Credits		6.0

BIO 864	Graduate Research Seminar	1.5
BIO 997	Research in Bioscience	6.5
Term Credits		8.0
Total Credit: 90.0		

Contact the Department of Biology (<http://www.drexel.edu/biology>) at (215) 895-2624 for more information.

Biological Sciences Faculty

Michael Akins, PhD (*Yale University*). Assistant Professor. The neural mechanisms underlying how organisms interact with the environment; circuit formation, particularly of sensory circuits, and neural diseases including autism and Fragile X syndrome (FXS).

Shivanthi Anandan, PhD (*University of California, Los Angeles*). Associate Professor. Microbial genetics, in particular the analysis of light-regulated signal transduction pathways and the regulation of gene expression in photosynthesizing organisms.

John R. Bethea, PhD (*University of Alabama at Birmingham*) Department Head. Professor. Neuroscience and immunology.

Valerie Bracchi-Ricard, PhD (*University Joseph Fourier, Grenoble, France*). Research Assistant Professor. Role of TNF and TNF receptors in neuroinflammation and remyelination following spinal cord injury.

Laura Duwel, PhD (*University of Cincinnati*) Assistant Department Head, Department of Biology. Teaching Professor. Immunology and microbiology.

Felice Elephant, PhD (*Temple University*). Associate Professor. Understanding the roles of two classes of chromatin regulatory proteins termed histone acetyltransferases (HATs) and histone de-methylases.

Denise Garcia, PhD (*UCLA*). Assistant Professor. Neuroscience, the role of astrocytes in the central nervous system.

Tali Gidalevitz, PhD (*University of Chicago*). Assistant Professor. Genetic and molecular pathways regulating protein folding homeostasis, and their role in protein conformation diseases, aging, and development.

Mary Katherine Gonder, PhD (*The City University of New York*) Director, *Bioko Biodiversity Protection Program Co-Founder, Central African Biodiversity Alliance*. Associate Professor. Deciphering spatial patterns of biodiversity across the Gulf of Guinea and Congo Basin region; Conservation measures to mitigate the effects of habitat loss and climate change in western equatorial Africa.

Susan Gurney, PhD (*Westfälische Wilhelms-Universität Münster (Germany)*). Assistant Teaching Professor. Evolutionary genetics (human and equids); stem cell biology; forensic science

Meshagae Hunte-Brown, PhD (*Drexel University*). Associate Teaching Professor. Stable isotopes in aquatic food webs, ecosystem ecology, STEM education.

Jiu Jiang, MD, PhD (*Shanghai Second Medical University*). Research Associate Professor. T cell immune response to virus infection in aged mice.

Karen Kabnick, PhD (*Massachusetts Institute of Technology*). Associate Teaching Professor. Molecular and genetic mechanisms of cellular biology, human disease, host/parasite interactions.

Robert Loudon, PhD (*Thomas Jefferson University*). Associate Teaching Professor. Rho GTPases, regulation of actin cytoskeleton, Regulation of G protein-coupled receptors by receptor kinases and arrestins.

Daniel Marena, PhD (*Syracuse University*) Director of the *Biology Graduate Program, Co-Director of the Cell Imaging Center*. Associate Professor. Developmental neurobiology and behavior; CHARGE syndrome; Pitt-Hopkins syndrome; Alzheimer's disease.

Donna Murasko, PhD (*Penn State Hershey Medical Center*) Dean, *College of Arts and Sciences*. Professor. The effects of aging on the adaptive immune response to influenza virus and retrovirus latency and reactivation.

Michael O'Connor, MD, PhD (*MD, Johns Hopkins University; PhD, Colorado State*). Associate Professor. Biophysical and physiological ecology, thermoregulation of vertebrates, ecological modeling.

Sean O'Donnell, PhD (*University of Wisconsin-Madison*). Professor. Tropical ecology, focusing on geographic variation and elevation effects on ecology and behavior of army ants and ant-bird interactions; neurobiology, focusing on brain plasticity and brain evolution in social insects.

Ryan Petrie, PhD (*McGill University*). Assistant Professor. Mechanisms of cell movement through three-dimensional extracellular matrix.

Jerome Ricard, PhD (*University Joseph Fourier, Grenoble, France*). Research Assistant Professor. Inflammation and cell death after spinal cord injury. Regulation of cell death by Eph receptors.

Jacob Russell, PhD (*University of Arizona*). Associate Professor. Microbiomes and metagenomics; ecology and evolution of symbiosis.

Nianli Sang, MB, PhD (*M.B., Fudan University Shanghai Medical College; Ph.D., Thomas Jefferson University*) Co-Director of the *Cell Imaging Center*. Associate Professor. Molecular and cellular biology of cancer; posttranslational modification, folding and quality control of proteins and their implication in cell physiology and human diseases.

Aleister Saunders, PhD (*University of North Carolina, Chapel Hill*) Senior Vice Provost for Research, Director of the *RNAi Resource Center*. Associate Professor. Identification and characterization of genes and proteins involved in Alzheimer's disease.

Kevin P.W. Smith, PhD (*Drexel University*). Assistant Teaching Professor. Linking behavioral ecology and organismal diversity, neonate behavior in herpetological models, STEM education.

Elias T. Spiliotis, PhD (*The Johns Hopkins University*) Director of the *Cell Imaging Center*. Associate Professor. Cell polarity and cell division: regulation of cytoskeleton-dependent motility.

Jennifer Stanford, PhD (*Harvard University*). Assistant Professor. Evaluating and improving approaches to teach STEM content in higher education environments to promote student learning, engagement in STEM courses, and STEM student retention.

Monica M. Togna, PhD (*New Jersey Institute of Technology*). Assistant Teaching Professor. Examination of the structure and function of living organisms from the cellular to the organismal level in order to better understand common physiological processes.

Emeritus Faculty

Jospeh Bentz, PhD (*State University of New York (SUNY) at Buffalo*). Professor. Biophysics, biochemistry and biopharmaceutics, focused on the molecular basis of biological membrane transport and fusion.

Cecilie Goodrich, PhD (*Harvard University*). Professor Emeritus. Neuroscience and systems physiology, postnatal maturation of physiology and behavior in relation to brain immunocytochemistry.

Chemistry

Major: Chemistry

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS); 90.0 (PhD)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 40.0501

Standard Occupational Classification (SOC) code: 19-2031

About the Program

The Department of Chemistry (<http://drexel.edu/coas/academics/departments-centers/chemistry>) offers graduate programs in analytical chemistry, atmospheric chemistry, inorganic chemistry, organic chemistry, materials chemistry, physical chemistry, educational chemistry, and polymer chemistry. The curriculum is designed to prepare students for the research and practical application of chemistry to challenges facing mankind. The department also encourages interdisciplinary activities. Faculty members are active participants in the environmental engineering and science and biomedical science and engineering programs; others work with physicists and biologists in areas such as atmospheric science, biochemistry, and biophysical chemistry.

The chemistry faculty wants graduate students to understand the purpose of, and need for, fundamental research while working on problems of practical interest and application to the challenges facing mankind in the modern world. Areas of research include the use of digital electronic methods to analyze trace constituents of air and water, a study of the molecules of living systems, the effects of toxic chemicals and carcinogens, synthesis and characterization of compounds of medicinal and industrial interest, methods for studying macromolecules, and characterization of transient species using lasers.

The Department of Chemistry strives to maintain a community of research scholars (faculty, postdoctoral fellows, and graduate and undergraduate students) that is large enough to provide a variety of experiences within chemistry, yet small enough to give each student individual attention. Both full- and part-time study are available.

Admission/Financial Assistance

Requirements for Admission

For admission to graduate study, the department requires a BS in chemistry or the equivalent. This requirement applies to full-time and part-time students working toward either the MS or PhD. Generally, in order to be considered for admission, a successful applicant should have taken two semester courses of Organic, Analytical and Physical Chemistry with corresponding laboratory courses. In addition, he/she should have taken an upper level Inorganic Chemistry course. All entering MS and PhD students are required to take a series of two-hour exams in analytical, inorganic, organic, and physical chemistry to help assess their preparation for graduate work in chemistry. The scores obtained on these exams are used as a basis for course selection.

Applicants for admission to PhD level graduate studies must submit Graduate Record Examination (GRE) results with their application. GRE scores are helpful to the Chemistry Department and the Office of Admissions, and are required for those students requesting financial support, i.e., a teaching assistantship (TA) and/or would like to be considered for a Dean's Scholarship or a Provost's Fellowship. Applicants

for admission to MS level graduate studies are also encouraged to submit their GRE results with their application.

Financial Assistance

Graduate students at Drexel can obtain two main types of financial support: teaching assistantships and research assistantships. Teaching assistantships are available on a competitive basis to incoming students and are normally renewable for several years. All those requesting financial assistance must submit GRE scores.

Forms, details about requirements, and information about application deadlines are all available on the Chemistry (<http://www.drexel.edu/grad/programs/coas/chemistry>) page of Drexel's Graduate Admissions website.

Master of Science in Chemistry

Degree Requirements

The MS degree is awarded after satisfactory completion of a minimum of 45.0 credit hours in chemistry and related fields, at least 30.0 credits of which must be taken at Drexel. Both thesis and nonthesis options are available.

Course Requirements

The course requirements for both thesis and non-thesis options are one complete sequence in the major area of interest; one of the sequence courses from each of analytical, organic, polymer, and inorganic chemistry; and two courses in physical chemistry. The remaining credits may be chosen from graduate courses within the department or from other departments offering courses related to the student's major areas.

Major Sequence	9.0
Select one of the following sequences:	
Inorganic Chemistry	
CHEM 521	Inorganic Chemistry I
CHEM 522	Inorganic Chemistry II
CHEM 523	Inorganic Chemistry III
Analytical Chemistry	
CHEM 530	Analytical Chemistry I
CHEM 531	Analytical Chemistry II
CHEM 755	Mass Spectrometry
Organic Chemistry	
CHEM 541	Organic Chemistry I
CHEM 542	Organic Chemistry II
CHEM 543	Organic Chemistry III
Physical Chemistry	
CHEM 557	Physical Chemistry I
CHEM 558	Physical Chemistry II
CHEM 555	Quantum Chemistry Of Molecules I
Polymer Chemistry	
CHEM 561	Polymer Chemistry I
CHEM 562	Polymer Chemistry II
CHEM 563	Polymer Chemistry III
Additional Sequence Courses *	15.0
Electives	21.0
Total Credits	45.0

* One of which must be chosen from CHEM 554, CHEM 555, CHEM 557, CHEM 558 or CHEM 752.

Thesis Option

Up to nine credits of CHEM.997 Graduate Research may be counted towards a master's thesis. No later than the spring term of the first year of coursework, a student should choose a research advisor with whom to work in carrying out an original investigation in chemistry. The results will be written up in thesis form and submitted to an MS thesis committee consisting of the research advisor and two other departmental faculty appointed by the advisor. The acceptance by this committee of the MS thesis completes the thesis option requirements for the MS degree. Students in the MS program receiving financial aid from the department must elect the thesis option if they do not pursue the PhD program at Drexel.

PhD in Chemistry

Degree Requirements

The PhD degree is awarded in any of eight main areas of chemistry: analytical, atmospheric, inorganic, organic, materials, physical, educational or polymer chemistry. The degree recipient must demonstrate scholastic breadth in chemistry and contribute significantly to scientific advancement in a chosen major area. Requirements of the program include coursework, candidacy examinations, a chemical information retrieval or technical writing course, and successful completion of a publishable PhD thesis.

Course Requirements

Ninety credits of graduate-level work must be completed for the PhD degree. The Chemistry Department requires 30.0 credits of coursework in chemistry (outlined in the Course Requirements (p. 259) section of the MS program). The balance can be made up of advanced special topics courses and research credits.

Candidacy Requirements

To become a candidate for the PhD in chemistry at Drexel, a student must pass a prescribed set of cumulative examinations.

Cumulative Examinations

Written examinations designed to test a student's background in his or her major area are given monthly during the academic year and occasionally during the summer at the discretion of the faculty. Students should begin taking these examinations after having completed three courses in the major area (usually the main sequence courses), though beginning these exams earlier is possible for well-prepared students. Students normally begin taking these examinations in the fall term of their second year.

Research Seminar

The thesis proposal seminar is designed to help the student conduct his/her research more efficiently by (i) promoting a greater fundamental understanding about the student's own specific research project and (ii) providing context and perspective about previous accomplishments in the field by other research groups as well as her/his own. The subject of the seminar will be a literature review and a description/defense of the student's research project including results of experiments and investigations already conducted as well as future work. The examination at which the thesis proposal is defended is held no later than the end of the *winter* term of the *second* year for *full-time* students or the end of the *spring* term of the *second* year for *part-time* students. A written report is submitted to the committee no later than two weeks before

the examination. A passing grade on this examination is required for continuation in the PhD program.

Thesis

A PhD thesis — the heart of the PhD degree — must be written, accepted by the research supervisor, presented to a PhD Thesis Examining Committee, and defended orally to the satisfaction of the Examining Committee. It is the responsibility of the student, not the research supervisor, to submit an acceptable thesis. It is expected that the student will have at least one peer-reviewed research article accepted for publication by the time of the thesis defense.

Facilities

There are seven undergraduate teaching laboratories in the department: three freshman Chemistry Laboratories, two advanced Organic Chemistry Laboratories, a Physical Chemistry Laboratory, an Analytical Instrumentation Laboratory and a combined Analytical/Inorganic Chemistry Laboratory.

Mass Spectrometry Laboratory

A Waters Autospec M high resolution mass spectrometer, a Sciex API triple quadrupole mass spectrometer, and a Bruker Autoflex III MALDI Time-of-Flight mass spectrometer.

Magnetic Resonance Laboratory

Varian INNOVA 300 MHz superconducting FT-NMR spectrometer, Varian INNOVA 500 MHz superconducting FT-NMR spectrometer, and a Varian X-band 12" EPR spectrometer.

Analytical Instrumentation Laboratory

The open-access departmental Analytical Instrumentation Laboratory includes two Perkin-Elmer (PE) Spectrum One Fourier-transform infrared absorption spectrometers each with a universal diamond ATR accessory, a PE Lambda-35 UV/visible spectrometer, a PE Lambda-950 UV/visible/NIR spectrometer with a 60-mm-diameter diffuse reflectance integrating sphere, a PE model 343 polarimeter, a PE LS55B luminescence spectrometer, a PE Clarus 500 capillary-column GC with dual FID detectors, a BioAnalytical Systems Epsilon Electrochemistry System equipped with a rotating disk electrode, Clarus 500 capillary-column GC/MS system (with electron impact capability), a PE Series 200 Quaternary HPLC development system with UV/visible photodiode array detector, a PE Series 200 binary HPLC system interfaced to a Sciex 2000 triple quadrupole MS detector, a PE Series 2000 binary gel permeation chromatography system with refractive index detector, and a Varian AA240FS flame atomic absorption spectrometer equipped with a GTA 120 graphite furnace accessory.

Atomic Force Microscopy

The department has a Veeco multimode Atomic force microscopy (AFM) for research and education. AFM, also called scanning force microscopy (SFM), is one of the foremost tools for imaging, measuring, and manipulating matter at the nanoscale. It is when a fine tip is scanned across a surface the tip-surface force is measured to provide topographic, frictional, and adhesion information of a surface. With the ability to perform non-invasive, high-resolution surface imaging and force measurement, AFM has become an essential characterization tool in multiple disciplines in life science, biomedical engineering, nanoengineering, chemistry, materials science, and other related fields.

Other Departmental Facilities

The department has a VEECO INNOVA N3 Multimode scanning probe microscope and also maintains a computational chemistry laboratory equipped with nine Dell Optiplex 620 computers running Hyperchem v 8.0. Research laboratories for each of the department faculty members are located in Disque and Stratton Halls. Instrumentation available in the research laboratories is described on individual faculty web pages. Additional full-time support includes an instrument specialist (for NMR and MS), a glassblower (Chemistry Department), two electronics specialists (College of Arts & Sciences Electronics Shop), and four machinists (Drexel University Machine Shop).

Chemistry Faculty

Anthony W. Addison, PhD (*University of Kent at Canterbury, England*). Professor. Design and synthesis of novel biomimetic and oligonuclear chelates of copper, nickel, iron, ruthenium and vanadium; their interpretation by magnetochemical, electrochemical and spectroscopic methods, including electron spin resonance; CD and ESR spectroscopy and kinetics for elucidation of molecular architecture of derivatives (including NO) of oxygen-binding and electron-transfer heme- and non-heme iron metalloproteins of vertebrate and invertebrate origins; energy-transfer by Ru, Ir and lanthanide-containing molecules and assemblies.

Jason Cross, PhD (*University of Surrey (UK)*). Assistant Teaching Professor. Luminescent lanthanide complexes

Peter DeCarlo, PhD (*University of Colorado*) *Graduate Studies Advisor*. Associate Professor. Outdoor air quality, particulate matter size and composition instrumentation and measurements, source apportionment of ambient particulate matter, climate impacts of particulate matter.

Aaron Fafarman, PhD (*Stanford University*). Assistant Professor. Photovoltaic energy conversion; solution-based semiconductor synthesis; colloidal nanocrystals; electrical and optical spectroscopies.

Fraser Fleming, PhD (*University of British Columbia (Canada)*) *Department Head, Chemistry*. Professor. Nitriles, Isonitriles, Stereochemistry, Organometallics

Joe P. Foley, PhD (*University of Florida*) *Associate Department Head*. Professor. Separation science, especially the fundamentals and biomedical/pharmaceutical applications of the following voltage- or pressure-driven separation techniques: capillary electrophoresis (CE), electrokinetic chromatography, supercritical fluid chromatography, and high-performance and two-dimensional liquid chromatography (LC). Within these techniques, we explore novel separation modes (e.g., dual-opposite-injection CE and sequential elution LC), novel surfactant aggregate pseudophases, and chiral separations.

Lee Hoffman, PhD (*Flinders University, Adelaide, South Australia*). Assistant Teaching Professor. Interfacial studies on the self-assembly of natural organic materials, understanding the nature of each component, and development of a mechanism describing this process; Dendrimer/metal nanocomposite design and synthesis hosting metal nanoparticles, utilizing the multivalent dendritic polymer architecture for further exploitation with other molecules such as antibodies and other targeting species.

Monica Ilies, PhD (*Polytechnic University of Bucharest*). Assistant Teaching Professor.

Hai Feng Frank Ji, PhD (*Chinese Academy of Sciences*). Professor. *Chemistry* Micromechanical sensors for biological and environmental applications; Nanomechanical drug screening technology.

Daniel B. King, PhD (*University of Miami*). Associate Professor. Assessment of active learning methods and technology in chemistry courses; incorporation of environmental data into chemistry classroom modules; development of hands-on activities and laboratory experiments.

Daniel A. Kleier, PhD (*University of Notre Dame*). Associate Teaching Professor.

Molly O'Connor, PhD (*Drexel University*). Assistant Teaching Professor. Synthesis and characterization of chiral and achiral metal complexes with novel multidentate ligands.

Kevin G. Owens, PhD (*Indiana University*). Associate Professor. Mass spectrometry research, including the development of sample preparation techniques for quantitative analysis and mass spectrometric imaging using matrix-assisted laser desorption/ionization (MALDI) time-of-flight mass spectrometry (TOFMS) techniques for both biological and synthetic polymer systems, the development of laser spectroscopic techniques for combustion analysis, and the development of correlation analysis and other chemometric techniques for automating the analysis of mass spectral information.

Lynn S. Penn, PhD (*Bryn Mawr College*). Professor. Surface modification for specific applications: chemically derivatize metal and ceramic solid surfaces; designing and executing sequential chemical processes, building complex and layered structures on surfaces, with specific focus on behavior of polymer brushes (investigating the fundamental transport-selective behavior of polymer brushes because of potential in drug delivery, biomedical devices and as an explanation of some biological processes).

Reinhard Schweitzer-Stenner, PhD (*Universitat Bremen (Germany)*). Professor. Exploring conformational ensembles of unfolded or partially folded peptides and proteins; determining the parameters governing peptide self-aggregation; structure and function of heme proteins; investigating protein-membrane interactions; use of IR, VCD, Raman, NMR and absorption spectroscopy for structure analysis.

Karl Sohlberg, PhD (*University of Delaware*). Associate Professor. *Chemistry* Computational and theoretical materials-related chemistry: (1) complex catalytic materials; (2) mechanical and electrical molecular devices.

Peter A. Wade, PhD (*Purdue University*). Associate Professor. Exploration of a newly discovered [3,3]-sigmatropic rearrangement in which O-allyl nitronic esters are thermally converted to α,β -unsaturated nitro compounds; development and exploitation of a carbon-based hemiacetal mimic; and exploration of cycloaddition reactions involving nitroethylene derivatives and novel nitrile oxides.

Anthony Wambsgans, PhD (*Rice University*). Associate Teaching Professor.

Jun Xi, PhD (*Cornell University*). Associate Teaching Professor. Biomacromolecular interactions both in solution and in confined environment; mechanisms of DNA replication and DNA repair; structure and function of molecular chaperones; drug target identification and new therapeutic development; single molecule enzymology; DNA directed organic synthesis.

Emeritus Faculty

Amar Nath, PhD (*Moscow State University, Moscow USSR*). Professor Emeritus.

Communication

Major: Communication

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 09.9999

Standard Occupational Classification (SOC) code: 11-2011; 11-2031; 25-1122

About the Program

Drexel's Master of Science in Communication program prepares students for careers in a wide range of professional activities. The program specializes in three areas:

- public communication
- technical communication
- science and health communication

Public Communication

Public Communication has much to offer those looking to work in journalism, public relations and nonprofit organizations. Students can choose from courses such as Event Planning, Sports Journalism, and Public Relations Writing.

Technical Communication

Technical Communication provides skills in technical writing, computer documentation and training to prepare students for careers in a wide range of industries, from social networking to publishing to health insurance. Students choose from courses such as Technical Writing, and Technical and Science Editing.

Science and Health Communication

Science and Health Communication leads to careers in medical, science and pharmaceutical communication. Students can choose from courses such as Science Writing, Medical Writing, and Ethics for Science and Technical Communication.

In addition, the program provides a strong foundation in ethics and theoretical approaches to communication. This theoretical basis is designed to ensure that, as the field changes, students will continue to have an intellectual framework for evaluating and implementing new technology and changing media.

The program emphasizes flexibility, encouraging each student, in consultation with a faculty advisor, to craft a particular course of study. Throughout the curriculum students may use electives to increase communication skills or to further develop areas of specialization.

Students can attend classes on campus or online, full-time or part-time, they can begin the program in any academic quarter, and they can complete all required coursework in the evening. The degree requires 45.0 credits of graduate coursework, and can be completed part-time in approximately three years or full-time in five quarters (just over a year).

The program accommodates students from widely varying educational backgrounds; many have backgrounds in science and mathematics, and an equal number come from humanities-related disciplines. Some students pursue their degrees while already working at demanding jobs.

For additional, visit the MS in Communication (<http://drexel.edu/coas/academics/graduate-programs/communication>) web page.

Admission Requirements

Applicants must meet the general requirements for admission to graduate studies. Prospective students must also submit:

- A 750-1,000 word statement explaining why they want to enter the program. The statement will be reviewed to evaluate each applicant's writing skills and sense of purpose.
- Two letters of recommendation from professional or academic references
- Transcripts of all college-level coursework
- A current resume

For international students where English is not the official language, a TOEFL score of 100 (iBT) or equivalent IELTS score is required. For more information regarding international application, please see the International Students Admissions Information (<http://drexel.edu/grad/resources/international>) page.

Visit the Graduate Admissions (<http://drexel.edu/grad>) website for more information about requirements and deadlines, as well as instructions for applying online.

Degree Requirements

Requirements

The MS degree requires 45.0 credits of coursework and six months of internship for those who lack significant experience in communication related fields.

Internship

An internship is required and may be completed at any time during the student's tenure at Drexel. Students who already have the equivalent of six months of professional experience may waive this requirement at the discretion of the Department's Graduate Director.

Required Courses

COM 500	Reading & Res Communication	3.0
COM 610	Theories of Communication and Persuasion	3.0
COM 698	Creating and Managing Communication Professional Identities	3.0
Electives *		21.0

Required Concentration Courses 15.0

Students must select and complete one of the following concentration options:

Technical Communication

COM 510	Technical Writing	
COM 525	Document Design and Usability	
COM 535	Digital Publishing	
COM 570	Technical, Science and Health Editing	
COM 612	Ethics for Technical, Science and Health Communication	

Science and Health Communication

CHP 672	Theory and Practice in Health Communication	
COM 520	Science Writing	
COM 570	Technical, Science and Health Editing	
COM 612	Ethics for Technical, Science and Health Communication	

COM 670 Medical Writing
or COM 673 Medical Journalism

Public Communication

COM 613	Ethics for Public Communication	
---------	---------------------------------	--

Choose four of the following:

COM 535	Digital Publishing	
COM 536	Strategic Social Media Communication	
COM 541	Foundations of Public Relations	
COM 542	Public Relations Writing **	
COM 543	Public Relations Planning **	
COM 563	Event Planning	
COM 575	Grant Writing	
COM 576	Nonprofit Communications	
COM 650	Telecommunications Regulation and Policy	
COM 660	Investigative Journalism	
Total Credits		45.0

* Any appropriate graduate course offered in the University can serve as an elective if the student has sufficient background to take the course. In addition, the program offers its own elective courses including special topics (COM T680 (p. 264)). Qualified students may also pursue independent study for elective credit in special cases.

** To enroll in this class you must first earn a grade of "B" or better in COM 541 Introduction to Public Relations or get permission from the MS COM advisor to waive this requirement.

Communication Faculty

Ronald Bishop, III, PhD (*Temple University*) *Undergraduate Director*. Professor. Investigative reporting, sports journalism, journalism history, journalism sourcing patterns, textual narrative and ideological analysis, cultural history of fame.

Joan W. Blumberg, BA (*Pennsylvania State University*). Instructor. Publishing, electronic publishing, publishing and communications, publishing and mass-media.

Karen Cristiano, MS (*Temple University*) *Assistant Department Head of Communication*. Teaching Professor. Journalism, medical writing, feature writing, copy editing, mass media and society.

Richard Forney Assistant Teaching Professor. Broadcast journalism technology and the effects of new technologies on personal and corporate communication skills.

Alexander Friedlander, PhD (*Carnegie Mellon University*) *Associate Dean for Undergraduate Education, College of Arts and Sciences*. Associate Professor. Rhetorical theory and practice, document design, writing and technology.

Ernest A. Hakanen, PhD (*Temple University*). Professor. Telecommunications policy, adolescent media use, communication theory and history, global media, semiotics.

Barbara Hoekje, PhD (*University of Pennsylvania*). Associate Professor. Sociolinguistic theory, discourse analysis, applied linguistics (language teaching, learning, and testing).

Julia May, PhD (*Drexel University*) *Graduate Director*. Assistant Teaching Professor. Political communication, international politics and news coverage thereof, public opinion, transatlantic relations, war, torture and human rights, debate in the public sphere.

Alexander Nikolaev, PhD (*Florida State University*). Associate Professor. Public relations, political communication, organizational communication, mass communication, international communications and negotiations, communications theory.

Rosemary Rys, MA (*Rowan University*). Assistant Teaching Professor. Public relations and marketing.

Lawrence Souder, PhD (*Temple University*). Associate Teaching Professor. Science and technical writing, communication ethics, nonprofit communication.

Allan Stegeman, MA (*University of Houston*). Teaching Professor. Communication, technology and mass media, video.

Susan Stein, PhD (*University of Wisconsin*). Associate Teaching Professor. Science, environmental, and health communication

Scott Tattar, BA (*York College*). Instructor. Public relations, media relations, technical communication, strategic communication.

Asta Zelenkauskaite, PhD (*Indiana University*). Assistant Professor. Social media, user-generated content, computer-mediated communication, interactivity, active audience analysis, mobile communication, gender and online identity, prosumer culture, internet of things, quantitative/qualitative research.

Communication, Culture and Media

Major: *Communication, Culture and Media*

Degrees Awarded: *Master of Science (MS) or Doctor of Philosophy (PhD)*

Calendar Type: *Quarter*

Total Credit Hours: *45.0 (Masters); 90.0 (PhD Post-Bachelors) or 45.0 (PhD Post-Masters)*

Co-op Option: *None*

Classification of Instructional Programs (CIP) code: *09.0102*

Standard Occupational Classification (SOC) code: *25-1122*

About the Program

MS in Communication, Culture & Media

The Master's Program (MS) in Communication, Culture & Media is a great choice for academically oriented students who wish to learn the basics of research and theory in communication and media studies, possibly to test the waters for further study, or to explore a personal fascination with mass media, mediated communication, cultural studies, social change and media. The program also encourages interdisciplinary approaches to the study of communication and media through faculty strengths in anthropology, communication, linguistics and sociology.

The MS degree requires 45.0 credits of graduate level coursework and the review by two faculty members of a major research or critical paper that has come out of the student's work while in the program.

The program can be completed part time in approximately three years, or full time in five terms (just under a year and a half).

PhD in Communication, Culture & Media

The PhD program in Communication, Culture & Media develops innovative scholar-teachers who know how to impart theories and studies on the interaction of social forces and communication. Our graduates are trained as committed researchers in quantitative and qualitative approaches to communication study. The program also encourages interdisciplinary approaches to the study of communication and media through faculty strengths in anthropology, communication, linguistics and sociology.

Click here for more information about the Graduate Programs in Communication, Culture and Media (<http://drexel.edu/coas/academics/graduate-programs/communication-culture-media>).

Admission Requirements

MS program admission requirements

Applicants to the MS program will be evaluated based on:

- A 1,000 word statement of purpose
- Two letters of recommendation
- Transcripts of all college-level coursework
- GRE scores are recommended (especially for students whose GPAs are below 3.2)
- For international students where English is not the official language, a TOEFL score of 100 (iBT) or equivalent score in IELTS, or Cambridge CPE.

PhD program admission requirements

Applicants to the PhD program will be evaluated by the Department's Graduate Committee for admission to the program. Prospective students must submit with their application:

- a 1,500 word statement of purpose
- three letters of recommendation
- transcripts of all college-level coursework
- GRE scores
- for international students where English is not the official language, TOEFL or other English language proficiency scores are also required. For more information regarding international applicant requirements, view the International Students Admissions Information (<http://drexel.edu/grad/resources/international>) page.

Minimum criteria include:

- Completion of a BA or BS degree in an appropriate field
- GPA of 3.0 or higher (preferred GPA 3.5 for courses in the major)
- For international students, a TOEFL score of 100 (iBT) or equivalent score in IELTS, or Cambridge CPE.

Students entering the program with a Master's degree or with some graduate credit will be evaluated by the Graduate Committee as to how many of their courses could possibly be counted toward the PhD. Students entering with an MS in an appropriate field are required by the university to take a minimum of 15 credit hours in the PhD program before being eligible to take qualifying exams.

For additional information on how to apply, visit the Drexel University Requirements for Admissions (<http://www.drexel.edu/grad/programs/coas>) page.

Degree Requirements

Core Requirements

COM 610	Theories of Communication and Persuasion	3.0
CCM 704	Research Methods in Communication, Culture and Media	3.0

Required Electives. Choose three of the following:

CCM 710	Mass Communication and American Social Thought	9.0
CCM 715	Media, Advocacy and Public Spaces	
CCM 725	Political Communication	
CCM 740	Consumer Culture	
CCM 745	Digital Subjectivities	
CCM 750	Political Economy of Media	

Additional Electives *

Three courses from the CCM rubric at 500 level or above	9.0
---	-----

Free Electives **

Seven Additional Graduate Level Electives	21.0
Total Credits	45.0

* There are several possible electives in CCM, including special seminars at the 800 level.

** Any appropriate graduate course offered in the University can serve as an elective if the student has sufficient background to take the course. Suggested courses for free electives might also include: CCM, COM, STS, PLCY, AADM, TVMN, and ENVP.

Sample Plan of Study

Term 1		Credits
CCM 704	Research Methods in Communication, Culture and Media	3.0
CCM 745	Digital Subjectivities	3.0
Graduate Level Elective		3.0
Term Credits		9.0
Term 2

CCM 740	Consumer Culture	3.0
Graduate Level CCM Electives		6.0
Term Credits		9.0
Term 4		
Graduate Level Electives		9.0
Term Credits		9.0
Term 5		
Graduate Level Electives		9.0
Term Credits		9.0

Total Credit: 45.0

Degree Requirements

The PhD requires a minimum of 90.0 credits beyond a Bachelor's degree, including 45.0 credit hours of coursework prior to taking qualifying exams, 15.0 credit hours of coursework after exams, and 30.0 hours of research credits.

The PhD coursework is structured around a set of required core courses, a set of required seminars with rotating topics, and electives in graduate communication lecture courses, independent study work, and dissertation credit.

All students in the program take five common core courses. They then take no less than five courses chosen from CCM 800 level seminar offerings. Students are encouraged to take additional seminars after meeting that requirement, since seminar courses enable collaborative relationships with professors and introduce students to the scholarly community. In addition to course work, students will be assigned required teaching and research duties, in the fall, winter and spring terms.

After completing the core requirements and a sequence of seminars, students are expected to take a minimum of 10 additional courses from existing graduate level lecture courses (depending on their interests and research needs). Students may take up to two graduate courses (six credits) outside the department. Additional credits to meet the 90.0 credit requirements will come from independent study and dissertation credits.

Student advising will include appointments with both graduate director and an assigned mentor during the first two weeks of fall courses, where an individualized plan of study (University form D1) will be completed and approved by the program director.

Core Courses

CCM 701	Contemporary Social Theory	3.0
CCM 702	Communication Theory I: Persuasion and Media Effects	3.0
CCM 703	Communication Theory II: Discourse and Semiotics	3.0
CCM 704	Research Methods in Communication, Culture and Media	3.0
CCM 705	Data Analysis in Communication	3.0

Seminars

Students select 15 credits from the five categories of seminars *		15.0
CCM 801	Seminar in Contemporary Theory	
CCM 802	Seminar in Discourse and Semiotics	
CCM 803	Seminar in Structural and Cultural Dynamics	
CCM 804	Seminar in Research Methodology	
CCM 805	Seminar in Communication Ethics	
Communication, Culture & Media Electives		30.0
Ten courses are required, for a total of 30.0 credit hours of electives. These may be chosen from CCM 500 to CCM 800 level courses, including 800 level seminars that are a different topic from earlier courses taken.		
Dissertation Credits/Additional Electives **		30.0
CCM 998	PhD Dissertation Research in Communication, Culture & Media	1.0-12.0
For the dissertation, students work with a principal advisor, one of the Communication, Culture and Media Program grad faculty, and no less than two additional faculty from within the department. Students must find one additional outside reader, and students may bring in up to two outside readers.		
Total Credits		91.0-102.0

* There are five categories of seminar: one in which students learn advanced work and influences on a specific theorist or theoretical school; one in which students learn about theories of language, discourse and the sign; one that teaches the paradigm of structural dynamics central to social sciences theory and research; one in which students study a research methods approach; and one that deals with approaches to research ethics. Students must take a seminar in each area (CCM 801, CCM 802, CCM 803, CCM 804, CCM 805). Seminars can be repeated, with a maximum of three courses taken in each area, as long as the subject covered is different each time.

** Students may take up to six graduate-level courses outside of the Communication, Culture and Media program rubric.

Qualifying Examinations

After students have completed 45.0 credits, which will usually be at the end of their 6th term, they will be required to take a qualifying examination. The qualifying exam includes of three parts: theory, methods and a content area. Students will be given the grade of fail, pass or high pass on the exam. A grade of pass in all three sections of the exam will be required to qualify for the PhD. Students who do not pass one out of three sections of the exam on the first attempt may retake the section that they failed one time to qualify for the PhD. If they do not pass the second time they take the failed section of the exam they will be dismissed from the program. When a student passes all three sections of the exam, the proper paperwork will be filed with the university graduate office and they will be advanced to candidacy.

Dissertation Defense

Students should defend the dissertation and graduate towards the end of their fourth or fifth year, depending on whether they entered the program with a Masters degree.

Visit the Graduate programs in Communication, Culture, and Media (<http://www.drexel.edu/coas/academics/graduate-programs/communication-culture-media>) website for more information.

Communication, Culture and Media Faculty

Mary Ebeling, PhD (*University of Surrey*) Director, *Women's and Gender Studies*. Associate Professor. Science and technology studies; emerging technologies and biocapital; media and democratic cultures; radical social movements; sociology of markets; political sociology; and ethnographic methodologies.

Ernest A. Hakanen, PhD (*Temple University*). Professor. Telecommunications policy, adolescent media use, communication theory and history, global media, semiotics.

Barbara Hoekje, PhD (*University of Pennsylvania*). Associate Professor. Sociolinguistic theory, discourse analysis, applied linguistics (language teaching, learning, and testing).

Alexander Jenkins, PhD (*Drexel University*). Assistant Teaching Professor. Digital games, digital game players, fan discourses on the Internet, and emerging and converging media, moral discourse in America, emotion and morality in digital games, and online fan communities.

Chalice Jenkins, PhD, LPC, NCC (*Capella University*). Assistant Clinical Professor. Child, adolescent, marriage and family therapy, women's issues, forensic psychology, co-occurring disorders treatment, trauma and resilience, spirituality, chronic pain, the impact of medical disease on mind, body, and spirit.

Emmanuel F. Koku, PhD (*University of Toronto*). Associate Professor. Social network analysis; qualitative/quantitative research; medical sociology; social epidemiology; social demography; sociology of development; communication and information technology; community and urban sociology.

David Kutzik, PhD (*Temple University*). Professor. Social and cultural theory; political economy; gerontology; materialisms; semiotic realisms; activity theory; reflection theories; communities of practice and labor theories of culture.

Hyunmin Lee, PhD (*University of Missouri*). Assistant Professor. Social media strategies for relationship and reputation management in public relations, examining media messages of public health issues and its psychological and behavioral effects on the public, communication theory and research methods.

Brent Luvaas, PhD (*UCLA*). Associate Professor. DIY and independent media production; transnational consumer culture; popular music; new media and mediated subjectivities; youth culture in the US and Indonesia.

Rakhmiel Peltz, PhD (*Columbia University, Linguistics; University of Pennsylvania, Biological Sciences*) Director of *Judaic Studies Program*. Professor. Sociolinguistics, ethnography of communication, social history of Yiddish language and culture, Yiddish culture of Eastern Europe, language planning, language and ethnic identity, language and group memory, aging and ethnicity, history of urban neighbors.

Douglas V. Porpora, PhD (*Temple University*) Director of *Graduate Program in Communication, Culture, and Media*. Professor. International political economy, culture, social theory, and philosophy of social science.

Rachel R. Reynolds, PhD (*University of Illinois at Chicago*). Associate Professor. Sociolinguistics, ethnography of communication, intercultural communication, globalization and the rhetoric of community, political economy of immigration, race and ethnicity, new African immigrants in the United States, Igbo studies.

Mimi Sheller, PhD (*New School for Social Research*) Director, *Center for Mobilities Research and Policy*. Professor. Sustainable mobility and mobility justice: new cultures and infrastructures of travel, transport, mobile communication, and urbanism; Caribbean Studies: history, culture and political theory of the region, including intersections of race, ethnicity, gender, sexuality and class.

Wesley Shumar, PhD (*Temple University*) Department Head, *Anthropology*. Professor. Ethnography of cyberspace, online learning communities, political economy of higher education, globalization, activity theory, semiotics, critical realism, psychoanalysis, identity and the self.

Asta Zelenkauskaitė, PhD (*Indiana University*). Assistant Professor. Social media, user-generated content, computer-mediated communication, interactivity, active audience analysis, mobile communication, gender and online identity, prosumer culture, internet of things, quantitative/qualitative research.

Environmental Policy

Major: Environmental Policy

Degree Awarded: Master of Science in Environmental Policy (MSEP)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 03.0201

Standard Occupational Classification (SOC) code: 19-1031

About the Program

The Master of Science in Environmental Policy spans the disciplines of law, sociology, engineering, business, public health and more. With only three core classes and 12 electives, students can select courses tailored to their interests and schedules. Personalized advising helps students find the classes and opportunities that will best serve their professional goals.

Our graduates:

- **Know the basics.** Courses in a wide range of disciplines offer students a solid understanding of the complexity of environmental issues.
- **See all sides.** In one of the program's core courses, Environmental Policy, students learn how to analyze competing perspectives on the environment, enabling them to be constructive problem solvers in environmental controversies.
- **Care about equity.** Environmental policies have different impacts on different populations, including the rich and poor, and current and future generations. Students learn to spot these differences and design policies that promote greater equality.
- **Communicate.** Writing projects across the curriculum teach students to express highly specialized ideas from multiple domains in a way that non-specialists can understand and use to guide their actions.
- **Collaborate effectively.** Students from different backgrounds work together, learning to problem-solve in groups where not everyone sees eye-to-eye.

For more information about this program, visit the MS in Environmental Policy (<http://drexel.edu/coas/academics/graduate-programs/environmental-policy>) page.

Admission Requirements

Applications are accepted year-round, and applicants can expect a decision within one month. Entering students may begin study fall, winter, or spring quarter. Full-time students can complete the program in two years. Part-time students can complete the degree at their own pace.

For additional information on how to apply, visit Drexel's Admissions page for Environmental Policy (<http://www.drexel.edu/grad/programs/coas/environmental-policy>).

Degree Requirements

Students take three required classes and 12 electives from Drexel's diverse array of environmental offerings. No thesis is required. Students wishing to delve deeper into a subject can choose to complete a 9.0 credit master's project as part of their 45.0 required credits.

Core Courses *

ENVP 502	Research Methods	3.0
ENVP 650	Political Economy of Resources & the Environment	3.0

ENVP 572	Environmental Policy	3.0
Environmental Policy Electives		36.0
Recommended Courses:		
COM 705	Data Analysis in Communication	
ENVP 522	Environmental Law	
ENVP 523	Environmental Regulations	
ENVP 550	International Climate Finance	
ENVP 552	Political Economy of Climate Change	
ENVP T580	Special Topics in ENVP	
ENVP 720	Environmental Cost-Benefit Analysis	
ENVP 760	Social Change & Environment	
ENVP 798	Master's Project	
ENVP I799	Independent Study in ENVP	
ENVP 865	Special Topics	
ENVP 870	Human Dimensions of Global Climate Change	
ENVP 875	Environmental Justice	
ENVP 880	Environment and Society	
ENVS 501	Chemistry of the Environment	
ENVS 506	Biostatistics	
ENVS 528	Conservation Biology	
ENVS 708	Environmental GIS	
ENVS 726	Environmental Assessment	
ENVP T880

ENVP 798	Master's Project	3.0
SCTS 571	Science and Technology Policy	3.0
Term Credits		9.0

Total Credit: 42.5-45.0

Environmental Policy Faculty

Robert J. Brulle, PhD (*George Washington University*). Professor. Environmental policy and politics, critical theory, marine risk, social movements, environmental sociology.

Christian Hunold, PhD (*University of Pittsburgh*). Associate Professor. Environmental policy; comparative politics; urban wildlife; political theory.

Alison Kenner, PhD (*Rensselaer Polytechnic Institute*). Assistant Professor. Science, technology, and health; environmental health problems; cities and place; feminist theory; medical anthropology; digital humanities

Gwen Ottinger, PhD (*University of California, Berkeley*). Assistant Professor. Social studies of science and technology, environmental justice, science and engineering ethics, citizen science, environmental ethics.

Mimi Sheller, PhD (*New School for Social Research*) Director, *Center for Mobilities Research and Policy*. Professor. Sustainable mobility and mobility justice: new cultures and infrastructures of travel, transport, mobile communication, and urbanism; Caribbean Studies: history, culture and political theory of the region, including intersections of race, ethnicity, gender, sexuality and class.

Diane Sicotte, PhD (*Arizona State University*). Associate Professor. Sociology of environmental injustice: inequalities in the citing of environmental hazards; community-based research in neighborhoods dealing with industrial hazards; sociology of the environment; urban sociology; social inequalities.

Chloe Silverman, PhD (*University of Pennsylvania*). Associate Professor. Parent advocacy for autism, neurodiversity, and pollinator health research.

Environmental Science

Major: *Environmental Science*

Degree Awarded: *Master of Science in Environmental Science (MSES)* or *Doctor of Philosophy (PhD)*

Calendar Type: *Quarter*

Total Credit Hours: *45.0 (MSES); 90.0 (PhD)*

Co-op Option: *None*

Classification of Instructional Programs (CIP) code: *03.0104*

Standard Occupational Classification (SOC) code: *19-2041*

About the Program

Environmental science is a multidisciplinary field in which we try to understand environmental problems and find solutions to them. This field requires understanding of a number of disciplines.

The program's areas of focus include: ecology, biodiversity, conservation, environmental chemistry and assessment, and paleoecology-geology. A student may alternatively craft a specialized plan of study outside of these strength areas under the guidance of an academic advisor.

The master's degree may be completed with either a thesis or non-thesis option. Those choosing to prepare a thesis must complete 45.0 credits (up to 12.0 credits may be research). Students choosing the non-thesis option must complete coursework totaling 45.0 credits (6.0 of which may be research). Most courses carry three credits.

Part-time Study

The MS degree may be completed on a part-time basis. Most courses are scheduled in the late afternoon and evening, usually on a rotating basis from year to year. Part-time students should plan to take courses in the appropriate sequence to comply with the necessary prerequisites. Scheduling of course is dependent on student demand and faculty resources; however, most prescribed courses are offered at least once every other year (schedules are published each term). Required courses should be taken at the first opportunity.

Additional Information

For more information, visit the Department of Biodiversity, Earth & Environmental Science (<http://drexel.edu/coas/academics/departments-centers/bees>) website.

Susan Cole is the Graduate Coordinator for Environmental Science. Susan Cole can be reached by telephone at 215.895.2905 or e-mail at coless@drexel.edu.

Admission Requirements

In addition to the general entrance requirements for all applicants, entrance to the MS Program in Environmental Science requires a bachelor of science degree in science, mathematics, or engineering. Minimally, students must have completed a year each of general biology and general chemistry, and one semester of calculus. Organic chemistry and physics preferred depending on student interest.

PhD Program

Applicants to the doctoral program are judged on the basis of academic excellence and the alignment of their research interests with those of the faculty in the department. Prospective PhD students are welcome to contact the program to discuss their research interests.

Additional information about how to apply is available on the Graduate Admissions at Drexel University (<http://www.drexel.edu/grad/programs/coas/environmental-science>) website.

Degree Requirements: MS in Environmental Science

The Master of Science in Environmental Science (MSES) program requires three core courses that form the basis for further specialization. Students choose to complete the remainder of the program with elective courses based on interest. 45.0 total credits are required for program completion.

Core Courses

ENVS 501	Chemistry of the Environment	3.0
ENVS 506	Biostatistics	3.0
ENVS 511	Evolutionary Ecology	3.0
ENVS electives		36.0
Total Credits		45.0

Elective Areas

Please see Course Descriptions for a list of Environmental Science (ENVS) electives. Students may also take Environmental Policy (ENVP) and Environmental Engineering (ENVE) courses with prerequisites. Other departmental courses with approval.

Degree Requirements: PhD in Environmental Science

The following general requirements must be satisfied in order to complete the PhD program in Environmental Science:

- 90.0 (post-bachelor's) or 45.0 (post-master's) quarter credits
- qualifying exam
- establishing a plan of study
- 3 core courses recommended, not required
- additional courses dependent on advisor or committee recommendations
- candidacy exam/approval of dissertation proposal
- dissertation/thesis
- defense of dissertation/thesis
- a graduate research seminar presentation once a year for second, third, and fourth-year students.

Thesis Advisor/Plan of Study

For students admitted without an identified Thesis Advisor, the Thesis Advisor must be selected by the end of Winter term in the first year. All students are asked to submit a Plan of Study (that has been agreed upon by Thesis Advisor and student) by the end of Winter term first year. It is anticipated that the graduate coursework will be completed during the first two years or less. Generally there is no prescribed coursework -- students must take courses needed to complete their research under guidance of an faculty advisor.

Curriculum

The following courses are *recommended*, but not required:

ENVS 501 Chemistry of the Environment
 ENVS 506 Biostatistics
 ENVS 511 Evolutionary Ecology

Candidacy Examination

The function of the Candidacy Examination is to test the breadth and the depth of the student's capabilities in their chosen area of study. The graduate student becomes a PhD *candidate* only after successfully completing the Candidacy Examination and completing 15 or 45 credits (for post-master's or post-bachelor's degree students, respectively). The candidacy exam is comprised of three parts whose order will be determined by the Candidacy Committee: written examination (or qualifying exam), dissertation research proposal, and oral examination.

Students entering the program with a master's degree are expected to complete the candidacy examination by the end of the summer quarter of their first year. Students entering the PhD program with a bachelor's degree are expected to complete this examination by the end of the summer quarter of their second year.

Thesis/Dissertation and Defense of Thesis/Dissertation

The student will finalize their dissertation only after approval to write is granted by the Dissertation Research Committee. Approval is based upon an evaluation of the breadth and depth of original research being conducted by the student. The dissertation must follow the format specifications set forth in the Drexel's Office of Research and Graduate College of Drexel University (<http://drexel.edu/graduatecollege>). Research conducted for the dissertation must be presented in a lecture open to the public and then defended, privately, before the student's Dissertation Research Committee.

Facilities

Facilities include fully equipped research laboratories in microbiology, ecology, hydrology, and chemistry. Field ecology research augments lab facilities with field-specific equipment, including two boats (14- and 25-foot) and vans with towing capacity. A full range of sampling equipment exists in the department from seine nets, sediment dredges and coring devices, water sampling bottles, flow meters and acoustic tracking devices. Some additional research facilities in environmental biotechnology, chemistry and atmospheric engineering are located in other locations on Drexel's campus.

Among the equipment available for student research are atomic absorption spectrophotometers, UV-visible spectrophotometers, gas-liquid chromatographs, ion chromatograph, ICP-Mass Spectrometer, GC-Mass Spectrometer, high performance liquid chromatographs, total organic carbon analyzer, elemental analyzer for carbon and nitrogen, stable isotope mass spectrometer, high-speed refrigerated centrifuge, nutrient analyzers, and UV photochemical reactor. In addition, the department and university have various microscopes including a scanning electron microscope (SEM). Within the department and in the Department of Biology there is a large capacity for genomics including preparatory equipment for DNA extraction and enhancement.

Drexel University is a national leader in the use of computers for educational and research functions. Several facilities on campus are available for student use.

Environmental Science Faculty

Walter F. Bien, PhD (*Drexel University*) *Director, Laboratory of Pinelands Research*. Research Professor. Natural resource management, restoration ecology, conservation biology, and New Jersey Pinelands community dynamics.

Carol Collier, FAICP, FAWRA, MRP (*University of Pennsylvania*) *Sr. Advisor, Watershed Management and Policy at the Academy of Natural Sciences; Director, Environmental Studies and Sustainability Program*. Water resources management, environmental planning, climate change policy, the intersection of science, policy and decision making.

Ted Daeschler, PhD (*University of Pennsylvania*) *Associate Curator of Vertebrate Zoology; Vice President for Systematic Biology and the Library: Academy of Natural Sciences*. Associate Professor. Vertebrate fauna of the Late Devonian Period in eastern North America; fossil collecting; systematic work focusing on freshwater vertebrates; nature of early non-marine ecosystems.

Daniel P. Duran, PhD (*Vanderbilt University*). Associate Teaching Professor. Phylogeography, systematics and taxonomy, population and conservation genetics, ecological niche modeling, focusing on insect

systems to better understand fundamental evolutionary processes and maintain biodiversity.

Jon Gelhaus, PhD (*University of Kansas*) *Curator, Department of Entomology; Academy of Natural Sciences*. Professor. Systematic expertise in crane flies (Tipuloidea); phylogenetic reconstruction; historical and ecological biogeography; biodiversity measures and evolution of morphological character systems.

Richard J. Horwitz, PhD (*University of Chicago*) *Senior Scientist; Fisheries Section Leader; Ruth Patrick Chair of Environmental Sciences*. Associate Professor. Reproductive ecology, life history and distribution of freshwater fishes; effects of land use, habitat structure and hydrology on population dynamics and species composition in aquatic systems; ecological modeling and biometry; anthropogenic contaminants in fishes.

Susan S. Kilham, PhD (*Duke University*). Professor. Aquatic ecology: phytoplankton; physiological ecology, especially of diatoms in freshwater and marine systems; large lakes; food webs; biogeochemistry.

Danielle Kreeger, PhD (*Oregon State University*). Research Associate Professor. Trophic interactions in aquatic ecosystems.

Tatyana Livshultz, PhD (*Cornell University*) *Assistant Curator of Botany*. Assistant Professor. Expertise of the milkweed and dogbane family (Apocynaceae); evolution and species diversity of the genus *Dischidia*; differences in floral form and function.

Richard McCourt, PhD (*University of Arizona*) *Associate Curator of Botany, Academy of Natural Sciences of Drexel University; 2010-2012: Program Director, Division of Graduate Education, National Science Foundation*. Professor. Biodiversity, evolution, ecology, and systematic of green algae, specifically charophyte algae.

Michael O'Connor, MD, PhD (*MD, Johns Hopkins University; PhD, Colorado State*). Associate Professor. Biophysical and physiological ecology, thermoregulation of vertebrates, ecological modeling.

Sean O'Donnell, PhD (*University of Wisconsin-Madison*). Professor. Tropical ecology, focusing on geographic variation and elevation effects on ecology and behavior of army ants and ant-bird interactions; neurobiology, focusing on brain plasticity and brain evolution in social insects.

Marina Potapova, PhD (*Russian Academy of Sciences*) *Assistant Curator*. Assistant Professor. Taxonomy, ecology, and biogeography of freshwater diatoms; methods of quantifying morphological characters of diatom frustules based on geometric morphometrics; systematic of monoraphid freshwater diatoms.

Gary Rosenberg, PhD (*Harvard University*) *Pilsbry Chair of Malacology*. Professor. Magnitude and origin of species-level diversity in the Mollusca.

Jacob Russell, PhD (*University of Arizona*). Associate Professor. Microbiomes and metagenomics; ecology and evolution of symbiosis.

James R. Spotila, PhD (*University of Arkansas*) *L. D. Betz Chair Professor*. Professor. Physiological and biophysical ecology, thermoregulation of aquatic vertebrates, biology of sea turtles.

Loyc Vanderkluysen, PhD (*University of Hawaii*). Assistant Professor. The cyclicity of volcanic eruptions, volcanic degassing processes, and large igneous provinces.

David J. Velinsky, PhD (*Old Dominion University*) *Department Head, Biodiversity, Earth and Environmental Science*. Professor. Geochemical

cycling of organic and inorganic constituents of sediments and waters; Sedimentary diagenesis of major and minor elements; Isotope biogeochemistry of carbon, nitrogen and sulfur in marine and freshwater systems.

Elizabeth B. Watson, PhD (*University of California, Berkeley*). Assistant Professor. The implications of global and regional environmental change, and unraveling the interacting effects of multiple anthropogenic stressors on coastal ecosystems to promote more informed management, conservation, and restoration.

Jason Weckstein, PhD (*Louisiana State University*) *Associate Curator of Ornithology*. Associate Professor. Avian phylogenetics, comparative biology and evolutionary history; biodiversity surveys of birds and their parasites and pathogens; coevolutionary history of birds and their parasites.

Emeritus Faculty

Joseph Bentz, PhD (*State University of New York (SUNY) at Buffalo*). Professor. Biophysics, biochemistry and biopharmaceutics, focused on the molecular basis of biological membrane transport and fusion.

John G. Lundberg, PhD (*University of Michigan*). Professor Emeritus. Diversity and diversification of fishes; documenting and interpreting the morphological, molecular, and taxonomic diversity of living and fossil fishes in the interrelated fields of systematic, faunistics and biogeography and paleobiology; exploration and collecting in poorly-known tropical freshwater habitats and regions.

Daniel Otte, PhD (*University of Michigan*) *Senior Curator, Systematics and Evolutionary Biology*. Professor Emeritus. Taxonomy and biogeography of Orthoptera (grasshoppers, crickets, katydids and their relatives).

Joint JD/PhD Law-Psychology Program

Major: Law and Psychology

Degree Awarded: Juris Doctor (JD) and Doctor of Philosophy (PhD)

Calendar Type: Semester and Quarter

Total Credit Hours: 85.0 Semester (JD) and 91.0 Quarter (PhD)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 22.0208

Standard Occupational Classification (SOC) code: 11-9199; 23-1011

About the Program

The Kline School of Law (<http://drexel.edu/law>) and the Department of Psychology (<http://drexel.edu/coas/academics/departments-centers/psychology>) in the College of Arts and Sciences offer a joint and integrated JD/PhD Program in Law and Psychology. The program melds two already ongoing successful endeavors, the JD degree in the School of Law and the PhD in clinical psychology in the Department of Psychology. See the JD-PhD Program webpage (<http://drexel.edu/coas/academics/graduate-programs/psychology-law>) for more information.

Students in the program complete all 85.0 semester credits required for graduation from the law school and all 91.0 quarter credits required to complete the doctorate. The program allows those students who wish to pursue professional degrees in both law and psychology a more efficient plan of study. The program is designed to be completed in seven (7) years, including required psychology practica, a year's internship in an

American Psychological Association accredited predoctoral mental health/forensic setting, a master's thesis, a doctoral dissertation, and 20 hours per week of cooperative training and 50 hours of pro bono service in law.

Students who are accepted into the JD/PhD program will receive full tuition remission for all psychology coursework, plus a guaranteed annual stipend that is currently at least \$15,000 per year for all six years they are at the university prior to completing the clinical internship. Students with outstanding LSAT scores are eligible for full tuition remission from the School of Law.

For information on the Admissions process, visit the JD/PhD Application Instructions (<http://drexel.edu/coas/academics/graduate-programs/psychology-law/application-instructions>) page.

Philosophy

The program bridges the gap between legal and psychological training. By and large, lawyers and social scientists come from different cultures, with different interests, different cognitive approaches to solving problems, different research methodologies, and different attitudes toward confrontation and argument. Each profession arrives at the “truth” in different ways, and its members are exposed to different styles of education during their post-baccalaureate training. Legal education develops an understanding of case analysis, statutory interpretation, the evolution of legal traditions, and methods for resolving disputes. Education in psychology develops research and clinical skills and understanding of behavioral theories, techniques, and statistical methods. Law, which has special rules concerning evidence and proof, relies heavily on precedent and the application of legal principles to specific facts toward the goal of settling conflicts that need immediate resolution. By contrast, psychology looks at problems through an empirical lens, using psychometrically-based tools and techniques to systematically evaluate questions, but rarely reaching a “final verdict.” Because the limits of evidence and the meaning of “proof” in psychological research may differ sharply from the limits of evidence and proof in law, conflict may result when the two disciplines interact.

Goals

Within the broad framework of the program's philosophy, the JD/PhD Program in Law & Psychology has three specific goals:

- Develop scientist-practitioners who will produce legally sophisticated social science research to aid the legal system to make better empirically-based decisions;
- Produce lawyer-psychologists who will participate in the development of more empirically and theoretically sophisticated mental health policy by legislatures, administrative tribunals, and the courts; and
- Educate highly trained clinicians who can contribute to the advancement of forensic psychology in such areas as criminal law, domestic relations, and civil commitment.

In fulfilling these goals, the program trains students in an integrated and conceptually unified curriculum so they acquire a mature understanding of the interaction between the two disciplines.

Curriculum

Students attend the School of Law and the Department of Psychology simultaneously for six years, integrating course work in both disciplines each year. Students maintain continuous contact with the faculties of both schools and the developments in both disciplines over the course of each year.

In the seventh year, after obtaining the JD, students undertake a year-long supervised internship and complete their doctoral dissertation. They are awarded the PhD at the end of their seventh year.

Training consists of seven elements:

- The required existing core program in law and psychology at both schools;
- Interdisciplinary courses; e.g., Mental Health Law, Behavioral Sciences and the Law, Expert Witnesses, Law and the Mind Sciences;
- Supervised psycholegal research experience on teams of students' faculty mentors;
- Legal clinics and psychology practica and internships that combine knowledge from both fields in a practical setting;
- Electives in both fields, e.g., bioethics, education law, health law, health psychology, employment discrimination, neuropsychology;
- Cooperative experience and pro bono service in legal settings; and
- Employment for at least one summer in a legal setting, e.g., public interest law firm, governmental agency, private law firm, nonprofit association.

Mathematics

Major: Mathematics

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS) or 90.0 (PhD)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 27.0101

Standard Occupational Classification (SOC) code: 15-2021; 15-2041

About the Program

The Department of Mathematics is a broadly based academic unit offering instructional programs and carrying on research activities in mathematics. Doctor of Philosophy and Master of Science degrees are offered.

Areas of research specialty among the faculty include applied mathematics, algebraic combinatorics, biomathematics, discrete mathematics, optics, analysis, number theory, numerical analysis, probability and statistics, matrix and operator theory, fluid mechanics, and partial differential equations.

Additional Information

For more information about these graduate programs, visit Department of Mathematics (<http://drexel.edu/coas/academics/graduate-programs/mathematics>) webpage.

Admission Requirements

Applicants should hold a BS degree in mathematics or the equivalent and meet the University's graduate admission standards. In particular, the student should have had intensive exposure to proof oriented courses, such as real analysis and abstract algebra. Students requesting financial aid are required to take the Graduate Record Examination General Test. Because many of the core courses are two- or three-term sequences beginning in the fall, new students are typically admitted to the programs only in the fall term. Admissions standards for the MS and PhD programs are equivalent.

For additional information on how to apply, visit Drexel University's Graduate Admissions (<http://www.drexel.edu/grad/programs/coas/mathematics>) website.

Master of Science in Mathematics

Students must complete a minimum of 45.0 graduate credits for the MS degree. Of these 15 courses, the following six are required:

Required Courses

MATH 504	Linear Algebra & Matrix Analysis	3.0
MATH 505	Principles of Analysis I	3.0
MATH 506	Principles of Analysis II	3.0
MATH 533	Abstract Algebra I	3.0
MATH 630	Complex Variables I	3.0
MATH 633	Real Variables I	3.0

The remaining 9 courses may be any graduate mathematics courses. In some cases, course substitutions may be made with courses from other departments. Elective courses taken outside the department must receive prior departmental approval in order to be counted toward the degree.

There are no thesis, language, or special examination requirements for the master's degree.

Students seeking a dual MS must satisfy core requirements for both degree programs.

Students should note that some departmental courses, such as Advanced Engineering Mathematics, are foundation courses and do not contribute to the departmental requirements for the degree. They do count toward the University requirements for a degree.

PhD in Mathematics

Students must complete a minimum of 45 graduate credits for the PhD degree, in addition to the 45.0 required by the MS program for a total of 90.0 credits. Of the 45.0 credits of MS program courses, the following six are required:

Required Courses

MATH 504	Linear Algebra & Matrix Analysis	3.0
MATH 505	Principles of Analysis I	3.0
MATH 506	Principles of Analysis II	3.0
MATH 533	Abstract Algebra I	3.0
MATH 630	Complex Variables I	3.0
MATH 633	Real Variables I	3.0

The remaining 27.0 credits, comprising the MS segment of the PhD program, may be any graduate mathematics courses. In some cases, course substitutions may be made with courses from other departments. Elective courses taken outside the department must receive prior departmental approval in order to be counted toward the degree.

The student must pass a written qualifying exam. The student is allowed two attempts. Students must take exam at the end of their first year, and have a second opportunity in September of their second year.

Students must take a PhD candidacy exam at the end of their second year. Additional coursework to reach the 90.0 credits required for the PhD will be agreed upon with the student's Graduate Advisor. Students should note that some departmental courses, such as MATH 544 Advanced Engineering Mathematics, are foundation courses and do not contribute to

the departmental requirements for the degree. They do count toward the University requirements for a degree.

Facilities

The computing resources of the Mathematics Department include servers dedicated to administrative, research and computation functions. The research server has 4 VCPS's with 8 GB RAM and 40 GB disk space; the computational server pi has the CPU 2.6 GHZ (16 core) AMD Operon with 32 GB RAM and 500 GB disk.

Graduate students and faculty have access to the main Drexel high-performance cluster: Proteus. The university block is available for general purpose computing. Overall, the facility has 2496 computer cores, 9.8 TB RAM (4 GB RAM per core).

In addition to the primary university library, the department itself has a small collection of texts and research books. It is housed in a comfortable room that lends itself to informal research meetings.

Mathematics Faculty

David M. Ambrose, PhD (*Duke University*) Associate Department Head. Professor. Applied analysis and computing for systems of nonlinear partial differential equations, especially free-surface problems in fluid dynamics.

Jason Aran, MS (*Drexel University*). Assistant Teaching Professor.

Jonah D. Blasiak, PhD (*University of California at Berkeley*). Assistant Professor. Algebraic combinatorics, representation theory, and complexity theory.

Robert P. Boyer, PhD (*University of Pennsylvania*). Professor. Functional analysis, C*-algebras and the theory of group representations.

Patrick Clarke, PhD (*University of Miami*). Associate Professor. Homological mirror symmetry, Landau-Ginzburg models, algebraic geometry, symplectic geometry.

Ilker Colak, PhD (*Universitat Autònoma de Barcelona*). Visiting Assistant Professor. ODE's. Dynamical Systems, Evolution of Social Behavior.

Daryl Falco, MS (*Drexel University*). Associate Teaching Professor. Discrete mathematics and automata theory.

Raymond Favocci, MS (*Drexel University*). Associate Teaching Professor.

Pavel Grinfeld, PhD (*Massachusetts Institute of Technology*). Associate Professor. Intersection of physics, engineering, applied mathematics and computational science.

Anatolii Grinshpan, PhD (*University of California at Berkeley*). Assistant Teaching Professor. Function theory and operator theory, harmonic analysis, matrix theory.

Yixin Guo, PhD (*University of Pittsburgh*). Associate Professor. Biomathematics, dynamical systems, ordinary and partial differential equations and math education.

R. Andrew Hicks, PhD (*University of Pennsylvania*). Professor. Geometry; optics; computer vision.

Pawel Hitczenko, PhD (*Warsaw University*). Professor. Probability theory and its applications to analysis, combinatorics, wavelets, and the analysis of algorithms.

Robert Immordino, MS (*Drexel University*). Associate Teaching Professor.

Dmitry Kaliuzhnyi-Verbovetskyi, PhD (*Kharkov University*). Professor. Operator theory, systems theory, complex analysis, C^* -algebras and harmonic analysis.

Hwan Yong Lee, PhD (*University of Utah*). Assistant Teaching Professor. Electromagnetic wave propagation in composite media, optimization and inverse problem.

Georgi S. Medvedev, PhD (*Boston University*). Associate Professor. Ordinary and partial differential equations, mathematical neuroscience.

Shari Moskow, PhD (*Rutgers University*) *Department Head*. Professor. Partial differential equations and numerical analysis, including homogenization theory, numerical methods for problems with rough coefficients, and inverse problems.

Marna A. Mozeff, MS (*Drexel University*). Teaching Professor.

Oksana P. Odintsova, PhD (*Omsk State University*). Teaching Professor. Math education; geometrical modeling.

Dimitrios Papadopoulos, EdD (*Drexel University*). Assistant Teaching Professor.

Joel Pereira, PhD (*University of North Carolina*). Assistant Teaching Professor. Commutative Algebra.

Ronald K. Perline, PhD (*University of California at Berkeley*) *Undergraduate Advisor*. Associate Professor. Applied mathematics, numerical analysis, symbolic computation, differential geometry, mathematical physics.

Marci A. Perlstadt, PhD (*University of California at Berkeley*). Associate Professor. Applied mathematics, computed tomography, numerical analysis of function reconstruction, signal processing, combinatorics.

Brianna Pezzato, MEd (*Millersville University*). Instructor.

Anna Pun, PhD (*University of Pennsylvania*). Visiting Assistant Professor. Algebraic Combinatorics, Discrete Mathematics, Finite Geometry.

Adam C. Rickert, MS (*Drexel University*). Associate Teaching Professor.

Valerie Sarris, PhD (*Yale University*). Instructor.

Eric Schmutz, PhD (*University of Pennsylvania*). Professor. Probabilistic combinatorics, asymptotic enumeration.

Li Sheng, PhD (*Rutgers University*). Associate Professor. Discrete optimization, combinatorics, operations research, graph theory and its application in molecular biology, social sciences and communication networks, biostatistics.

Gideon Simpson, PhD (*Columbia University*). Associate Professor. Partial differential equations, scientific computing and applied mathematics.

Xiaoming Song, PhD (*University of Kansas*). Assistant Professor. Stochastic Calculus, Large Deviation Theory, Theoretical Statistics, Data Network Modeling and Numerical Analysis.

Kenneth P. Swartz, PhD (*Harvard University*). Assistant Teaching Professor. Applied statistics, data analysis, calculus, discrete mathematics, biostatistics.

Vaishalee T. Wadke, MS (*Columbia University*). Instructor.

Richard D. White, MS (*Penn State University*). Assistant Teaching Professor.

Hugo J. Woerdeman, PhD (*Vrije Universiteit, Amsterdam*). Professor. Matrix and operator theory, systems theory, signal and image processing, and harmonic analysis.

J. Douglas Wright, PhD (*Boston University*) *Graduate Advisor. Associate Department Head*. Professor. Partial differential equations, specifically nonlinear waves and their interactions.

Dennis G. Yang, PhD (*Cornell University*). Assistant Teaching Professor. Dynamical systems, neurodynamics.

Thomas (Pok-Yin) Yu, PhD (*Stanford University*). Professor. Multiscale mathematics, wavelets, applied harmonic analysis, subdivision algorithms, nonlinear analysis, applied differential geometry and data analysis.

Matthew Ziemke, PhD (*University of South Carolina*). Assistant Teaching Professor. Functional Analysis, Operator Algebras, Semigroups, Mathematical Physics.

Emeritus Faculty

Loren N. Argabright, PhD (*University of Washington*). Professor Emeritus. Functional analysis, wavelets, abstract harmonic analysis, the theory of group representations.

Robert C. Busby, PhD (*University of Pennsylvania*). Professor Emeritus. Functional analysis, C^* -algebras and group representations, computer science.

Ewaugh Finney Fields, EdD (*Temple University*) *Dean Emeritus*. Professor Emeritus. Mathematics education, curriculum and instruction, minority engineering education.

William M.Y. Goh, PhD (*Ohio State University*). Associate Professor Emeritus. Number theory, approximation theory and special functions, combinatorics, asymptotic analysis.

Bernard Kolman, PhD (*University of Pennsylvania*). Professor Emeritus. Lie algebras; theory, applications, and computational techniques; operations research.

Charles J. Mode, PhD (*University of California at Davis*). Professor Emeritus. Probability and statistics, biostatistics, epidemiology, mathematical demography, data analysis, computer-intensive methods.

Chris Rorres, PhD (*Courant Institute, New York University*). Professor Emeritus. Applied mathematics, scattering theory, mathematical modeling in biological sciences, solar-collection systems.

Patricia Henry Russell, MS (*LaSalle University*). Teaching Professor.

Justin R. Smith, PhD (*Courant Institute, New York University*). Professor. Homotopy theory, operad theory, quantum mechanics, quantum computing.

Jet Wimp, PhD (*University of Edinburgh*). Professor Emeritus. Applied mathematics, special factors, approximation theory, numerical techniques, asymptotic analysis.

Physics

Major: Physics

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS); 90.0 (PhD)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 40.0801

Standard Occupational Classification (SOC) code: 19-2010

About the Program

The Department of Physics offers opportunities for students to study with leading researchers in astrophysics, biophysics, condensed matter, particle physics, and physics education research, as well as to participate in international collaborations. Coursework for the MS and PhD degrees includes advanced training in core areas of physics and in topics of current research. PhD students begin research early in the program, commencing thesis work in their second year of study.

To learn more about the graduate program in physics visit the Department of Physics (<http://drexel.edu/coas/academics/graduate-programs/physics>) webpage.

Admission Requirements

For admission to the graduate programs, a bachelor's degree in an approved program is required with a minimum undergraduate GPA of 3.0/4.0.

The GRE general exam is required from all applicants (minimum scores 150 Verbal, 150 Quantitative, 3.5 Analytic Writing). The GRE Physics Subject Test is required for PhD applicants to be considered for assistantships (no minimum score).

TOEFL scores are required for international applicants or applicants who earned a degree outside the US (minimum score 100). IELTS scores may be submitted in lieu of TOEFL scores. The minimum IELTS band score is 7.0. TOEFL or IELTS scores below these levels may be considered, but may require an interview.

Visit the Graduate Admissions (<http://www.drexel.edu/grad/programs/coas/physics>) website for more information about requirements and deadlines, as well as instructions for applying online.

Degree Requirements (MS)

The Department of Physics offers a Master of Science degree that provides advanced training in core areas of fundamental physics and exposure to the application of physics in areas of current research.

This program is suitable as both a means for professional development and preparation for further graduate study. Students who wish to complete only the MS degree are welcomed, and will find that the learning environment will allow them to broaden their professional understanding by exploring current topics and trends of physics in an interdisciplinary setting.

Students who intend to pursue the Physics PhD degree should apply directly to that program. The requirements for the Physics PhD include the coursework required for the MS degree, thus PhD students can earn the MS degree during their PhD study. Students should apply to the program that best aligns with their goals. MS students who wish to continue study

toward the PhD degree must apply for the PhD program on a competitive basis.

Satisfactory completion of a minimum of 45.0 credits of approved physics courses is required. Core courses (among the 30.0 credits listed below) must be passed with a grade of B or higher and the student must maintain a cumulative GPA average for all courses of at least 3.00.

There are no thesis, language, or special examination requirements for the master's degree.

The degree requires 45.0 graduate credits, with at least 30.0 credits from the following:

PHYS 501	Mathematical Physics I	3.0
PHYS 502	Mathematical Physics II	3.0
PHYS 506	Dynamics I	3.0
PHYS 511	Electromagnetic Theory I	3.0
PHYS 512	Electromagnetic Theory II	3.0
PHYS 516	Quantum Mechanics I	3.0
PHYS 517	Quantum Mechanics II	3.0
PHYS 518	Quantum Mechanics III	3.0
PHYS 521	Statistical Mechanics I	3.0
PHYS 522	Statistical Mechanics II	3.0

Elective Courses:

PHYS 531	Galactic Astrophysics	3.0
PHYS 532	Cosmology	3.0
PHYS 553	Nanoscience	3.0
PHYS 561	Biophysics	3.0
PHYS 562	Computational Biophysics	3.0
PHYS 576	Introduction to Particle Physics	3.0
PHYS 626	Solid State Physics I	3.0
PHYS 627	Solid State Physics II	3.0
PHYS 631	Relativity Theory I	3.0
PHYS T580	Special Topics in Physics	3.0
PHYS T780	Special Topics in Physics	3.0

Degree Requirements (PhD)

90.0 quarter credits

The Department of Physics offers opportunities for students to study with leading researchers in astrophysics, biophysics, condensed matter, particle physics, and physics education research, as well as to participate in international collaborations. Coursework for the PhD degree includes advanced training in core areas of physics and topics of current research. PhD students begin research early in the program, commencing thesis work in their second year of study.

The usual schedule for physics graduate students consists of two years of coursework, qualifying exams, and research training, followed by dissertation research. All PhD students follow a common set of eight core courses during their first two years of study. In addition to these core courses, students also take four special topics courses.

PhD students Admitted with Post-Master's Status

Students who are admitted for PhD study with "post-masters" status must take 15.0 credits of graduate coursework with a minimum GPA of 3.0 to become doctoral candidates. Courses are to be chosen in consultation with the Director of Graduate Studies. Post-masters students are expected to pass the written and oral qualifying exams by the end of

the Spring quarter of their first year of study. Ordinarily, this means taking the written qualifying exam in September before the start of classes. To be prepared for the oral exam, post-masters students should begin research as soon as possible.

Program Requirements

Doctoral candidates are required to complete a minimum of 45.0 credits of coursework and research work beyond the master's requirement of 45.0 credits while maintaining a minimum of 3.0 GPA.

Core Courses

First Year		
PHYS 501	Mathematical Physics I	3.0
PHYS 506	Dynamics I	3.0
PHYS 502	Mathematical Physics II	3.0
PHYS 516	Quantum Mechanics I	3.0
PHYS 521	Statistical Mechanics I	3.0
PHYS 517	Quantum Mechanics II	3.0
Second Year		
PHYS 522	Statistical Mechanics II	3.0
PHYS 518	Quantum Mechanics III	3.0
PHYS 511	Electromagnetic Theory I	3.0
PHYS 512	Electromagnetic Theory II	3.0
PHYS 997	Research	3.0
Select four of the following:		12.0
PHYS 531	Galactic Astrophysics	
PHYS 532	Cosmology	
PHYS 561	Biophysics	
PHYS 553	Nanoscience	
PHYS 562	Computational Biophysics	
PHYS 563	Single Molecule Methods	
PHYS 571	Nonlinear Dynamics	
PHYS 576	Introduction to Particle Physics	
PHYS 626	Solid State Physics I	
PHYS T780	Special Topics in Physics	
Total Credits		45.0

Research Training

Students begin research in the first year with two small projects. In the spring quarter, this project culminates in a talk presented to the other students and Associate Department Head for Graduate Studies. In the summer quarter, the project requires a written report to the research advisor. Research during the second year is toward the oral qualifying exam, described below.

Candidacy Examination

PhD candidates must pass a Candidacy Examination, which consist of two parts: written and oral:

- The written portion of the qualifying examination is given twice a year, during the week before the fall quarter begins and during the first week of classes of the winter term. Students must pass the written qualifying examination no later than the winter quarter of their second year. At most two attempts may be made at passing the exam. The qualifying examination covers four general areas at the advanced undergraduate level: classical mechanics, electricity and magnetism, quantum mechanics, and statistical physics.
- The oral portion of the qualifying exam is based on original research performed by the student, which consists in an oral presentation and a written report of no less than 15 pages, submitted to the examination committee and the Director of Graduate Studies at least one week

prior to the exam. Immediately after the public presentation, the Examination Committee will privately conduct an oral examination. This exam must be passed by the end of the second year of study.

Dissertation Defense

This dissertation defense includes a final public presentation and defense of the dissertation. The dissertation must be submitted to the Examination Committee at least two weeks prior to the oral defense. The oral presentation involves a public 45-60 minute presentation by the candidate followed by an unspecified period during which the Examination Committee will ask questions. All doctoral dissertations, in addition to originality and scholarly content, must conform to University format requirements.

Sample Plan of Study (PhD)

The following sample plan of study lists required courses and electives for the first two years of the full-time PhD program, for a minimum of 45.0 credits. During the third year and thereafter, PhD program students must take a minimum of 45.0 additional credits of research (PHYS 998 Dissertation Research).

The following sample plan of study contains the required courses for full-time PhD students entering without a previous Master's degree. Post-master's students should consult the Director of the Graduate College.

First Year		
Fall		Credits
PHYS 501	Mathematical Physics I	3.0
PHYS 506	Dynamics I	3.0
Special Topics Course*		3.0
Term Credits		9.0
Winter		
PHYS 502	Mathematical Physics II	3.0
PHYS 516	Quantum Mechanics I	3.0
Special Topics Course*		3.0
Term Credits		9.0
Spring		
PHYS 521	Statistical Mechanics I	3.0
PHYS 517	Quantum Mechanics II	3.0
Term Credits		6.0
Second Year		
Fall		
PHYS 522	Statistical Mechanics II	3.0
PHYS 518	Quantum Mechanics III	3.0
Special Topics Course*		3.0
Term Credits		9.0
Winter		
PHYS 511	Electromagnetic Theory I	3.0
Special Topics Course*		3.0
Term Credits		6.0
Spring		
PHYS 512	Electromagnetic Theory II	3.0
PHYS 997	Research	3.0
Term Credits		6.0
Total Credit: 45.0		

* Special topics courses are an introduction to current topics of experimental and theoretical interest. They are offered in alternate years.

Academic Year 2015/2016 (odd)

Fall		Credits
PHYS 531	Galactic Astrophysics	3.0
PHYS 561	Biophysics	3.0
Term Credits		6.0
Winter		
PHYS 532	Cosmology	3.0
PHYS 562	Computational Biophysics	3.0
Term Credits		6.0
Spring		
PHYS 563	Single Molecule Methods	3.0
PHYS T780	Special Topics in Physics	3.0
Term Credits		6.0
Total Credit: 18.0		

Academic Year 2016/2017 (even)

Fall		Credits
PHYS 626	Solid State Physics I	3.0
PHYS 576	Introduction to Particle Physics	3.0
Term Credits		6.0
Winter		
PHYS 553	Nanoscience	3.0
PHYS 571	Nonlinear Dynamics	3.0
Term Credits		6.0
Spring		
To be announced		
Term Credits		0.0
Total Credit: 12.0		

Additional information for graduate students is available at the Department of Physics (<http://drexel.edu/coas/academics/departments-centers/physics>).

Facilities

Astrophysics Facilities:

- The Numerical Astrophysics Facility emphasizes theoretical and numerical studies of stars, star formation, planetary systems, star clusters, galaxy distributions, cosmological modeling, gravitational lensing, and the early universe. The facility employs a high-performance Graphics Processing Unit (GPU) compute cluster, each node containing two 6-core, 2.7 GHz Intel Xeon CPUs and 96 Gbytes of RAM, accelerated by 4–6 Nvidia Fermi/Titan GPUs, and connected by QDR infiniband, affording computational speeds of up to 50 trillion floating point operations per second.
- The Joseph R. Lynch Observatory houses a 16-inch Mead Schmidt-Cassegrain telescope equipped with an SBIG CCD camera. Drexel was a member of the original Sloan Digital Sky Survey (SDSS) collaboration; faculty and students remain active in analyzing data from the SDSS. Drexel is currently an institutional member of the Large Synoptic Survey Telescope (LSST), currently under construction in Chile; faculty and students are developing LSST-related machine learning tools and analyzing simulated LSST data to prepare for "first light" in 2022.

Biophysics Facilities:

- Bio-manipulation and microscopy laboratories. Four optical tables and six research grade microscopes are configured to perform microscopic spectroscopy and manipulation on solutions and individual cells. A spatial light modulator allows spatial patterns to be encoded on samples and explored; all microscopes are

temperature controlled with state of the art cameras, including a 2,000 frame per second high speed system. Each optical table is also equipped with high power lasers for photolysis or fluorescence spectroscopy. Microfluidic attachments are present on one table, and in an adjacent laboratory, a small microfluidic fabrication facility has been established.

- Experimental biophysics lab for studies of proteins and biomimetic lipids, including a fluorescence spectrometer.
- The Computational Biophysics facility also includes: (i) a Beowulf cluster with 46 dual Quad-core hyperthreaded Xeon CPU (736 cores) and 12Gb of RAM nodes plus a master with 1Tb of storage and 24Gb of RAM, (ii) a Beowulf cluster with 44 dual-core Xeon CPU (344 cores), (iii) a dual Quad-core hyperthreaded Xeon CPU workstation with 24Gb RAM and 3Tb disk with two Tesla C2050 GPU CUDA-accelerated graphics card, (iv) a dual Quad-core hyperthreaded Xeon CPU workstation with 8Gb RAM and 4Tb disk with an NVIDIA N280 GPU CUDA-accelerated graphics card, (v) a quad 8-core hyperthreaded Xeon CPU workstation with 128Gb RAM and 16Tb total disk, (vi) a 72Tb file server with 12Gb RAM, (vii) a 96Tb quad 6-core file server with 64Gb RAM, (viii) and several Linux workstations connected through a gigabit network.

Condensed Matter Facilities:

- The Ultrafast Electron Diffraction laboratory investigates structural dynamics in nanoscale materials at timescales that are fundamental to materials science and condensed matter physics. The techniques are based on exciting matter with light and probing the response of the lattice with electrons. The research interests of the lab are in a range of phenomena and systems including phase transformations induced by strong laser excitation, phase transformations in strongly correlated systems, generation and detection of coherent lattice vibrations, and characterization of materials properties of graphene, few-layer-graphene, ultra-thin graphite & nanocrystalline diamond.
- The research at Energy Materials Research Laboratory is devoted to atomic scale investigations of materials for energy. As the size of the system shrinks, conventional bulk thermodynamics becomes irrelevant and we enter the realm of mesoscopic physics. The equilibrium behavior of small systems is governed by the prevailing number of surface atoms that behave differently from the bulk ones. The electronic properties are also subject to reduced number of available electronic states. We take advantage of different scanning probe microscopy and spectroscopy techniques to elucidate the local electronic properties of materials that are relevant to solving energy problems. The laboratory research is funded by grants from NSF and DOE.
- The Ultra-low Temperature Laboratory includes a dilution refrigerator, 3He and 4He cryostats and microwave sources to study quantum phenomena in nano and microscale devices, superconducting qubits, nanostructures and quantum fluids and solids.

Particle Physics Facilities:

- The Drexel particle physics group contributes to neutrino oscillation experiments at different baselines, including the DUNE long baseline experiment hosted by Fermilab, the Double Chooz experiment in France, and the PROSPECT short baseline experiment at Oak Ridge National Laboratory. We are also active in the IceCube neutrino telescope located at the geographic South Pole, the EXO-200 experiment located in NM, and the PICO dark matter experiment located at SNOLAB in Canada.

- The Bubble Chamber Laboratory develops superheated-liquid detectors for rare-interaction searches.

Laboratory for High-Performance Computational Physics:

- In addition to the department computing cluster (15 linux workstations), high-performance computing resources include a dual-processor server with two Xeon E5-2650 processors (16 cores), 128 GB of RAM, and two Xeon Phi P5110 co-processor cards (480 cores). Department researchers also have access to a cluster of 18 Dell PowerEdge C6145 servers (AMD Opteron 6378 Piledriver CPU's, 64 cores/server, 256 GB RAM/server) with a total of 1152 cores and 4.5TB RAM.

Physics Faculty

Alexey Aprelev, PhD (*St Petersburg State University*). Assistant Teaching Professor. Experimental biophysics.

Eric Brewe, PhD (*Arizona State University*). Associate Professor. Physics Education Research, introductory course reform, network analysis in learning, neuromechanisms of learning.

Luis R. Cruz Cruz, PhD (*MIT*). Associate Professor. Computational studies of confinement effects on the folding of amyloidogenic proteins, spatial correlations of neurons in the brain, firing dynamics of neuronal networks, fluid flow through porous media.

N. John DiNardo, PhD (*University of Pennsylvania*) *Special Advisor to the Provost*. Professor. Vibrational and electron dynamics at semiconductor surfaces and interfaces, metal-semiconductor interfaces, polymer surfaces and interfaces, diamond-like carbon thin films, and protein and cell interactions with biomaterials surfaces.

Michelle Dolinski, PhD (*University of California, Berkeley*). Associate Professor. Neutrino physics, rare nuclear decays, cryogenic detector technologies.

Frank A. Ferrone, PhD (*Princeton University*). Professor. Experimental and theoretical protein dynamics, kinetics of biological self-assembly, including sickle cell and Alzheimer's disease, sickle cell testing and diagnostic devices.

David M. Goldberg, PhD (*Princeton University*) *Associate Dean for Research and Graduate Education, Associate Department Head for Undergraduate Studies*. Professor. Theoretical and computational cosmology, extragalactic astrophysics, gravitational lensing.

Maher Harb, PhD (*University of Toronto*). Assistant Professor. Solid state physics, ultrafast electron diffraction, time-resolved X-ray diffraction, ultrafast lasers, nanofabrication, nano/microfluidics, instrument development, vacuum technologies.

Goran Karapetrov, PhD (*Oregon State University*). Associate Professor. Experimental solid state physics, scanning probe microscopy, nanoscale catalysis, mesoscopic superconductivity.

Rachael M. Kratzer, PhD (*Drexel University*). Assistant Teaching Professor. Quasars, active galactic nuclei

Charles Lane, PhD (*California Institute of Technology*). Professor. Experimental tests of invariance principles and conservation laws, neutrino oscillations and properties.

Christina Love, PhD (*Temple University*). Assistant Teaching Professor. Educational methods and technology, STEM education, science literacy and outreach, particle physics, astrophysics.

Stephen L. W. McMillan, PhD (*Harvard University*) *Department Head*. Professor. Stellar dynamics, large-scale computations of stellar systems, and high-performance special-purpose computers.

Naoko Kurahashi Neilson, PhD (*Stanford University*). Assistant Professor. Neutrino physics, high energy astro-particle physics.

Russell Neilson, PhD (*Stanford University*). Assistant Professor. Dark matter, neutrino physics.

Gordon Richards, PhD (*University of Chicago*). Professor. Quasars, active galactic nuclei, supermassive black holes, galaxy evolution, sky surveys, infrared/X-ray/radio astronomy

Somdev Tyagi, PhD (*Brigham Young University*) *Associate Head of Non-Major Studies in Physics*. Professor. Nanobiophysics, Raman spectroscopy, magnetic materials.

Brigita Urbanc, PhD (*University of Ljubljana, Slovenia*). Associate Professor. Computational and experimental biophysics of protein folding and assembly, relevant to Alzheimer's and Parkinson's disease; discrete molecular dynamics of coarse-grained protein and lipid models.

Michael Vogeley, PhD (*Harvard University*) *Associate Department Head for Graduate Studies*. Professor. Cosmology; galaxy formation and evolution; statistical analysis of large data sets; active galactic nuclei.

Jian-Min Yuan, PhD (*University of Chicago*). Professor. Protein folding, signal transduction pathways, computational biophysics, nonlinear dynamics and chaos in atomic and molecular systems, protein folding.

Emeritus Faculty

Shyamalendu Bose, PhD (*University of Maryland*). Professor. Nanoscience, high-temperature superconductivity, theory of surfaces and interfaces, disordered systems, electron and X-ray spectroscopies of solids.

Leonard D. Cohen, PhD (*University of Pennsylvania*). Professor Emeritus.

Leonard X. Finegold, PhD (*University of London*). Professor Emeritus.

Robert Gilmore, PhD (*Massachusetts Institute of Technology*). Professor. Applications of compact and non-compact Lie algebras for problems in nuclear, atomic, and molecular physics; nonlinear dynamics and chaos and the analysis of chaotic data.

Richard D. Haracz, PhD (*Wayne State University*). Professor Emeritus.

Frederick House, PhD (*University of Wisconsin*). Professor Emeritus.

Arthur P. Joblin, PhD (*Drexel University*). Professor Emeritus.

Donald C. Larson, PhD (*Harvard University*). Professor Emeritus.

Teck-Kah Lim, PhD (*University of Adelaide*). Professor. Structures and dynamics of small nuclear and molecular systems, spin-polarized quantum systems, physics in two dimensions. Physics education.

Arthur E. Lord, PhD (*Columbia University*). Professor Emeritus.

James McCray, PhD (*California Institute of Technology*). Professor Emeritus.

Richard I Steinberg, PhD (*Yale University*). Professor. Neutrino physics.

Michel Vallières, PhD (*University of Pennsylvania*). Professor. Shell-model and mean field studies of nuclei on and off beta-stability, chaotic scattering, computational physics.

T. S. Venkataraman, PhD (*Worcester Polytechnic Institute*). Professor Emeritus.

Programs in Psychology and Clinical Psychology

Major: Psychology

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS) or 91.0 (PhD)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 42.0101

Standard Occupational Classification (SOC) code: 19-3031; 19-3032; 19-3039

About the Programs

The MS in Psychology program is designed for students interested in advanced education in scientific psychology in order to obtain further educational or career opportunities.

The PhD in Psychology with the specialization in Clinical Psychology program places equal emphasis on clinical research and the application of scientific principles.

The PhD in Psychology with a specialization in Applied Cognitive and Brain Science program is designed for students who wish to pursue a research based career in human experimental psychology with a concentration in applied cognitive and brain science.

For more information, visit the Department of Psychology (<http://drexel.edu/coas/academics/departments-centers/psychology>) website.

Master of Science in Psychology

The master of science degree in the Department of Psychology, College of Arts & Sciences, is ideal for students interested in pursuing graduate education in scientific psychology and research methods.

The program is an opportunity for students to take their first step into graduate education, and to begin a path toward further educational and career opportunities. These opportunities may include further graduate-level training leading to a PhD, a career in research, or other educational and administrative opportunities. The curriculum is focused on training in a range of research experience in neurocognitive and behavioral sciences. In addition to required coursework, students are required to complete a minimum of eight hours per week with a research mentor in laboratory activities. These activities culminate with the successful completion of an empirical thesis.

Requirements for Admission

Applicants must meet the general University requirements for admission, including a minimum 3.0 GPA (on a 4.0 scale) for the last two years of undergraduate study. Applicants to the graduate program in psychology

are also required to submit scores from the Graduate Record Examination (GRE) general tests. Only applications for full-time status are considered.

Various factors are considered in choosing students. These include background in psychology, undergraduate (and, if applicable, graduate) GPA, GRE scores, a personal essay, and letters of recommendation. The minimum expected combined GRE score is 302, with scores 150 on each section (verbal, quantitative) of the GRE.

For additional information on how to apply, visit Drexel's Admissions Requirements for Psychology (<http://www.drexel.edu/grad/programs/coas/psychology>) page.

Degree Requirements

The general requirements for earning the MS degree in psychology are as follows:

- Completion of all required coursework with a minimum grade point average of 3.0, with no grade lower than a B in any required (non-elective) course and no more than two course grades of C or lower.
- Successful completion of a minimum of 45.0 course credits. Students take required courses and select additional electives.
- Successful completion of required research laboratory hours (8 hours per week for 2 years).
- Completion of an empirical thesis.

For more information on specific requirements, consult the Master's of Science in Psychology (<http://drexel.edu/coas/academics/graduate-programs/psychology>) website.

PSY 510	Research Methods I	3.0
PSY 511	Research Methods II	3.0
PSY 512	Cognitive Psychology	3.0
PSY 610	Data Analysis in Psychology	3.0
PSY 624	Behavior Analysis	3.0
PSY 710	Data Analysis II	3.0
PSY 898	Master's Thesis in Psychology	0.0-3.0
PSY 898	Master's Thesis in Psychology	0.0-3.0
PSY 898	Master's Thesis in Psychology	0.0-3.0
Additional Electives		18.0
Total Credits		36.0-45.0

PhD in Psychology: Clinical Psychology

The Ph.D. Program in Clinical Psychology program is a scientist-practitioner-oriented program that is fully accredited by the American Psychological Association (APA). It encompasses five years of full-time study and provides graduate students with a strong foundation in relevant psychological theory, experience in the practice of psychological assessment and intervention, experience in conducting meaningful clinical research, and opportunities to develop teaching competencies. See the Clinical Psychology Program's website (<http://drexel.edu/coas/academics/graduate-programs/psychology-clinical>) for more information.

Requirements for Admission

All students are admitted with the expectation that they intend to complete the PhD degree. However, before advancing to doctoral-level studies, students must earn the MS, including completion of a master's thesis. Admitted students who hold a bachelor's degree are expected to complete both the master's degree and post-master's portions of the Drexel curriculum. Applicants who already hold a master's from another university may be admitted with post-master's status if their graduate-level

preparation is deemed equivalent to the master's portion of the Drexel curriculum.

Requirements for Students Enrolling with a Bachelor's Degree

For those entering with a bachelor's degree, the PhD program requires approximately five years to complete. The first two years of training correspond to the master's-level studies: focusing on clinical areas such as entry-level assessment and intervention skills, psychopathology, and specialized study in Clinical Neuropsychology, Clinical Health psychology, Cognitive and Behavioral Psychology, Clinical Child Psychology and/or Forensic Psychology. These two years also include a major focus on research skills, involving statistics, research design, and supervised research experience with the mentor. Entry-level assessment, intervention, and teaching skills are also developed.

By the end of the first two years of study, students should have completed 45.0 credits of coursework, maintained a GPA of at least 3.5, developed and defended a thesis, passed comprehensive examinations and completed practicum experience, both internally (Psychological Service Center) and external clinical practicum experiences. Students demonstrating satisfactory performance in these areas will be admitted to post-master's status.

Requirements for Students Who Already Hold a Master's Degree

Students entering with a master's degree from another university complete the PhD requirements in 4-5 years. The master's degree should have included an experimental thesis. Students lacking this prerequisite will still be considered for admission, but such students will be required to complete a research project equivalent to the Drexel master's thesis. In addition, students must demonstrate a GPA of at least 3.5 in master's-level courses in order to be accepted for post-master's status.

For additional information on how to apply, visit Drexel's Admissions Requirements for Psychology (<http://www.drexel.edu/grad/programs/coas/psychology-phd>) page.

Curriculum

The program in Clinical Psychology curriculum follows the scientist-practitioner model and APA guidelines on accreditation of doctoral clinical psychology programs. It also considers state licensing guidelines and various publications that have been written on the topic of doctoral education, training, and credentialing in clinical psychology, as well as the specialty areas of Clinical Neuropsychology, Clinical Health Psychology, Cognitive and Behavioral Psychology, Clinical Child Psychology and/or Forensic Psychology.

The following section outlines the courses required for graduation for entering Bachelor's-level students. The PhD program curriculum requires the student to earn a minimum of 90.0 credits. Typically, students enroll in 27.0 credits during the first year, 22.0 credits during the second and third years, 12.0 credits in the fourth year, and 8.0 credits during the fifth/final internship year. Drexel University operates on a calendar of four eleven-week terms. Students in the program do not take courses during summer term in order to complete research projects and continue clinical practicum training.

All coursework can be divided into two major components: (1) foundations of psychology, which is the evolving body of knowledge in the discipline of psychology, and (2) clinical and professional training, which focuses on the application of theory and empirical research to the practice of psychology. Listed below are all required and elective courses offered within the Drexel psychology curriculum followed by specific requirements

for each major area of study. Credit levels listed are set at the minimum required.

Required Courses

Foundations of Psychology		
PSY 516	Developmental Psychology	3.0
PSY 712	History and Systems	3.0
Statistics/Research Methods		
PSY 510	Research Methods I	3.0
PSY 610	Data Analysis in Psychology	3.0
PSY 710	Data Analysis II	3.0
PSY 711	Data Analysis III: Advanced Topics	3.0
PSY 898	Master's Thesis in Psychology	3.0
PSY 998	Ph.D. Dissertation in Psychology	4.0
Biological Bases of Behavior		
PSY 630	Biological Basis of Behavior and Treatment	3.0
Select one of the following: 3.0		
PSY 530	Neuroanatomy and Behavior	
PSY T880	Special Topics in Psychology	
Cognitive/Affective Bases of Behavior		
PSY 812	Cognitive Neuroscience	3.0
Select one of the following: 3.0		
PSY 512	Cognitive Psychology	
PSY 614	Problem Solving & Creativity	
PSY 616	Motivation and Emotion	
Social Bases of Behavior		
PSY 518	Social Psychology	3.0
PSY 550	Multicultural Perspectives in Psychology	3.0
Clinical and Professional Training General Foundations of Practice		
PSY 520	Psychopathology	3.0
PSY 524	Professional Issues and Ethics	3.0
PSY 560	Teaching, Consultation and Supervision in Psychology	3.0
Foundations of Psychological Evaluation/Measurement		
PSY 515	Clinical Case Conceptualization	3.0
PSY 522	Psychological and Intellectual Assessment	3.0
PSY 620	Personality Assessment	3.0
Foundations of Intervention		
PSY 721	Principles of Psychotherapy	3.0
PSY 722	Theories of Intervention	3.0
PSY 820	Cognitive-Behavioral Therapy	3.0
PSY 897	Clinical Psychology Practicum Seminar	3.0
PSY 899	Practicum	1.0
PSY 999	Internship	4.0
Advanced Professional Training Electives		
Select five of the following: 15.0		
PSY 542	Neuropsychological Assessment	
PSY 642	Neuropsychological Case Analysis and Integration	
PSY 646	Neuropsychological Assessment of Children and Adolescents	
PSY 648	Forensic Assessment I	
PSY 649	Forensic Assessment II	
PSY 650	Child Psychopathology & Treatment	
PSY 720	Health Psychology	
PSY 730	Criminal Law and Psychology	
PSY 734	Social Science Applications to the Law	
PSY 811	Multilevel Regression	
PSY 815	Evidence-Based Psychotherapy	
PSY 822	Pediatric Psychology	
PSY 823	Substance Use	
PSY 827	Behavioral Stress Management	
PSY 828	Weight and Eating Disorders	
PSY 830	Advanced Topics in Health Psychology	
PSY 840	Advanced Cognitive-Behavioral Therapy	

PSY 854	Psychology of Rehabilitation
PSY T880	Special Topics in Psychology
Total Credits	
	93.0

* Taken for 1 credit in Fall and 2 credits in Spring.

Major Areas of Study

Clinical Neuropsychology

The clinical neuropsychology concentration includes courses, research, and clinical experiences designed to train the students for professional practice in neuropsychology. Clinical neuropsychology involves the application of psychological assessment and intervention to the problems encountered by people with brain injury or illness. The knowledge of brain-behavior functioning and the incorporation of neuropsychological conceptualizations with traditional clinical conceptualizations of functioning are aimed at providing the student with a wider perspective regarding the range of human functioning and disability. The student is able to pursue specific interests in geriatrics, pediatrics, traumatic brain injury, and rehabilitation.

In addition to the core curriculum:

- One neuropsychology practicum
- A neuropsychology-focused thesis and dissertation
- Required classes: Neuroanatomy and Behavior, Neuropsychological Assessment, Neuropsychological Case Analysis and Integration
- At least two neuropsychology electives: Learning and Memory, Rehabilitation, Psychology, Principles of Neuroscience, Advanced Neuropsychological Assessment and Intervention: Children and Adolescents, Neuropsychology and Brain Imaging

Forensic Psychology

Forensic psychology involves the application of assessment and intervention techniques to informing legal decision-makers and attorneys on questions in criminal, civil, and family law. Those who concentrate in forensic psychology will be trained in relevant law, behavioral science research, and assessment and intervention approaches with a particular focus on juvenile and criminal issues.

In addition to the core curriculum:

- One forensic psychology practicum
- A forensic psychology-focused thesis and dissertation
- At least two years of research in an area related to forensic psychology
- Required classes: Forensic Assessment I and II, Mental Health Law
- At least two forensic psychology electives.

Clinical Health Psychology

Health psychology adopts a broad-based, biopsychosocial perspective in order to: (1) better understand the interplay among behavioral, emotional, cognitive, social, and biological factors regarding health, wellness, and physical disease; (2) promote and maintain wellness and positive physical health; (3) prevent, treat, and rehabilitate illness and disability, and (4) improve the health care delivery system. The health psychology concentration aims to provide specialty training in order to prepare graduate students for academic and/or clinical positions where the primary focus is on physical health problems.

In addition to the core curriculum:

- One health psychology practicum
- A health psychology-focused thesis and dissertation
- Required classes: Health Psychology, Evidence-Based Assessment and Psychotherapy, Behavioral Stress Management
- At least three Health Psychology electives

Cognitive and Behavioral Psychology

Cognitive behavior therapy (CBT) represents a broad family of psychological interventions that are grounded in scientific theories and principles derived from psychology and related disciplines, and that stress the empirical validation of intervention methods. Various theories, principles, models, and techniques fall under the general rubric of CBT, and these approaches have been applied to the full range of human experience, from the assessment and treatment of severe psychopathology and profound developmental delays to primary prevention efforts to enhancing peak performance among athletes.

Common features of the various CBT approaches include a focus primarily on the present rather than the past, an emphasis on parsimony in theoretical explanations, grounding in learning principles (including principles related to how we interpret the world and/or how we related to our own experience), and the emphasis on epistemological empiricism. The aim of this major area of study is to provide pre-specialty training in order to prepare graduate students for academic and/or clinical positions in which CBT is a primary focus.

Additional requirements beyond the core curriculum include:

- One Cognitive and Behavioral Psychology-oriented practicum
- A Cognitive and Behavioral Psychology--focused thesis and/or dissertation
- Required classes: Advanced Cognitive Behavioral Therapy, Evidence Based Assessment and Treatment, Acceptance Based Behavioral Therapy
- At least two Cognitive and Behavioral Psychology electives

Clinical Child Psychology

The clinical child psychology major area of study is designed for students who have strong clinical and/or research interests in working with children and adolescents. Students in this major area of study will complete the required courses taken by all clinical psychology students and will also enroll in child-related elective courses designed to help them develop a greater degree of expertise in working with child and adolescent populations. It is expected that students completing this specialization will develop an appreciation of the research literature in the clinical child area and will possess specialty skills that enable them to function as competent practitioners in the child/ adolescent area upon graduation.

Additional requirements beyond the core curriculum include:

- One Clinical Child Psychology oriented practicum
- A Clinical Child Psychology focused thesis and/or dissertation
- Required classes: Child Psychopathology, Pediatric Psychology, Neuropsychological Evaluation and Intervention of Children and Adolescents
- At least two Clinical Child Psychology electives

For more information on the PhD program requirements, contact the Clinical Psychology PhD Program (<http://drexel.edu/coas/academics/graduate-programs/psychology-clinical/contact>).

PhD in Psychology: Applied Cognitive and Brain Science (ACBS)

The Department of Psychology's program in Applied Cognitive and Brain Sciences (ACBS) program is a research-oriented, non-clinical program in experimental psychology and/or cognitive neuroscience. The program places equal emphasis on basic research and the application of scientific principles. Please visit the ACBS website (<http://drexel.edu/coas/academics/graduate-programs/psychology-applied-cognitive-brain-science>) for more information.

Admissions

Drexel University is seeking applicants with a strong academic record, as evidenced by their GRE scores (a quantitative plus verbal sum of 1250 or greater is desirable), strength of undergraduate institution and GPA (3.5 or greater is preferred). In addition, applicants should have outstanding letters of recommendation (from doctoral-level academic, research oriented psychologists, if possible), high-quality research experience, and include a statement of purpose that convinces Drexel that a potential student is an excellent "match" for one or more of our research groups.

For more details on how to apply to this program, please visit the Graduate Admissions Psychology (<http://www.drexel.edu/grad/programs/coas/psychology-phd-applied-cognitive-and-brain-sciences>) page.

Curriculum

The PhD program curriculum requires student to earn a minimum of 90.0 credits. Students completing the concentration in Applied Cognitive and Brain Science take all or most of their core courses within the first two years. The third and fourth years, following the receipt of the master's degree, successful passing of the qualifying examinations, and advancement to doctoral candidacy, will be spent in enrichment or specialization courses negotiated with their research supervisor and in research activities.

The following section outlines the courses required for graduation for entering Bachelor's-level students.

First Year		
Fall		
BMES 510	Biomedical Statistics	4.0
PSY 512	Cognitive Psychology	3.0
PSY 530	Neuroanatomy and Behavior	3.0
PSY 560	Teaching, Consultation and Supervision in Psychology	1.0
Term Credits		11.0
Winter		
BMES 515	Experimental Design in Biomedical Research	4.0
PSY 560	Teaching, Consultation and Supervision in Psychology	1.0
PSY 812	Cognitive Neuroscience	3.0
PSY 898	Master's Thesis in Psychology	3.0
Term Credits		11.0
Spring		
BMES 518	Interpretation of Biomedical Data	3.0
PSY 560	Teaching, Consultation and Supervision in Psychology	1.0
PSY 614	Problem Solving & Creativity	3.0
PSY 865		3.0
Term Credits		10.0

Second Year

For the second year and beyond the student's academic schedule will be determined jointly by the student and their primary mentor/advisor. Pre and Post Master's coursework will be partly shaped to suit the student's goals and may be drawn from the following list of courses. (Additional courses may be added as appropriate and with the approval of the program director.)

Term	Credits	
		0.0
Total Credit: 32.0		

Sample Electives

PSY 510	Research Methods I
PSY 511	Research Methods II
PSY 516	Developmental Psychology
PSY 517	Social Cognition
PSY 562	Consciousness
PSY 610	Data Analysis in Psychology
PSY 612	Psychology of Human-Computer Interaction Design
PSY 616	Motivation and Emotion
PSY 617	Empirical Unconscious Process
PSY 621	Theories of Personality
PSY 630	Biological Basis of Behavior and Treatment
PSY 632	Sensory and Motor Systems
PSY 648	Forensic Assessment I
PSY 649	Forensic Assessment II
PSY 710	Data Analysis II
PSY 711	Data Analysis III: Advanced Topics
PSY 712	History and Systems
PSY 720	Health Psychology
PSY 730	Criminal Law and Psychology
PSY 746	Neuropsychological Evaluation and Intervention of Children and Adolescents
PSY 812	Cognitive Neuroscience
PSY 840	Advanced Cognitive-Behavioral Therapy
PSY 898	Master's Thesis in Psychology
PSY 998	Ph.D. Dissertation in Psychology

Enrichment Courses from other Disciplines

Computer Science		
CS 510	Introduction to Artificial Intelligence	3.0
CS 530	Developing User Interfaces	3.0
CS 610	Advanced Artificial Intelligence	3.0
Information Systems		
INFO 608	Human-Computer Interaction	3.0
INFO 610	Analysis of Interactive Systems	3.0
INFO 611	Design of Interactive Systems	3.0
Biomedical Engineering and Sciences

For more information on the PhD program requirements, consult Department of Psychology's (<http://psychology.drexel.edu>) web site.

For more information on the PhD program requirements, consult Department of Psychology's (<http://drexel.edu/coas/academics/departments-centers/psychology>) web site.

Facilities

Computers

Computer resources for student use include more than 20 personal computers (IBM, Macintosh) available in the library and 10 IBM PCs available in the computer laboratory. Both facilities are near the

department. In both locations, word processing and biostatistics software is available.

By using computers from their homes or in the library, students have free access to e-mail and a wide array of online services (e.g., the Internet, World Wide Web, and literature databases such as PsychLit and Medline).

Library

Psychology books and journals are located at the Center City Hahnemann Campus library, Moore Campus Library on Henry Avenue, Queen Lane Library on the Queen Lane Campus, and the W. W. Hagerty Library on the University City Campus. The combined holdings represent one of the best psychology libraries on the East Coast.

Equipment

Testing equipment for classroom instruction is available to psychology graduate students. The program also has videotape and audiotape equipment available for classroom instruction and research activities.

Psychology Faculty

Cathy Bolton, PhD (*Drexel University*). Assistant Teaching Professor. Program Evaluation in healthcare, supportive housing, and government-based social services; Design of performance metrics for quality assessment and clinical outcomes; Implementing Systems and Change Leadership to sustain Compliance with Regulatory Bodies.

Meghan Butryn, PhD (*Drexel University*). Associate Research Professor. Treatment and prevention of obesity and eating disorders, behavioral treatment, acceptance and commitment therapy.

Dorothy Charbonnier, PhD (*SUNY Stony Brook*). Assistant Teaching Professor. The nature of the creative process and writing.

Douglas L. Chute, PhD (*University of Missouri*) *Louis and Bessie Stein Fellow; Faculty coordinator of ePsychology*. Professor. Neuropsychology and rehabilitation; technological applications for the cognitively compromised and those with acquired brain injuries.

Brian Daly, PhD (*Loyola University, Chicago*) *Director, Practicum Training*. Assistant Professor. Pediatric neuropsychology, intervention with at-risk youth.

Paige Davis, PhD (*Durham University, England*). Assistant Teaching Professor. The development of imagination in children; private speech; theory of mind and executive functioning; mental state commentary and mind minded parenting; audio verbal hallucinations.

David DeMatteo, PhD, JD (*MCP Hahnemann University; Villanova University School of Law*) *Director of the JD-PhD Program in Law and Psychology*. Associate Professor. Psychopathy, forensic mental health assessment, drug policy; offender diversion.

Evan M. Forman, PhD (*University of Rochester*) *Director of Graduate Studies*. Professor. Clinical psychology: mechanisms and measurement of psychotherapy outcome, cognitive-behavioral and acceptance based psychotherapies, the development and evaluation of acceptance-based interventions for health behavior change (for problems of obesity and cardiac disease) as well as mood and anxiety disorders; neurocognition of eating.

Jennifer Gallo, PhD (*Drexel University*) *Director, Neuropsychology Concentration*. Associate Teaching Professor. Neuropsychology of

aging and dementia; neurocognitive correlates of goal-directed activities; behavioral and psychological symptoms associated with dementia

Pamela Geller, PhD (*Kent State University*). Associate Professor. Stressful life events and physical and mental health outcomes, particularly in the area of women's reproductive health (e.g. pregnancy, pregnancy loss, infertility, medical education).

Maureen Gibney, PsyD (*Widener University*). Associate Teaching Professor. Clinical psychopathology; neuropsychological evaluation and intervention with the elderly.

Naomi Goldstein, PhD (*University of Massachusetts*) *Co-Director of the JD-PhD Program; Stoneleigh Foundation Fellow*. Associate Professor. Forensic psychology; juvenile justice; Miranda rights comprehension; false confessions; juvenile justice treatment outcome research; anger management intervention development; child and adolescent behavior problems.

Kirk Heilbrun, PhD (*University of Texas at Austin*) *Interim Department Head*. Professor. Forensic psychology, juvenile and adult criminality, violence risk assessment, forensic psychological assessment, treatment of mentally disordered offenders, academic-sports mentoring.

James D. Herbert, PhD (*University of North Carolina*) *Dean, Graduate College; Executive Vice Provost*. Professor. Assessment and treatment of anxiety disorders; acceptance and mindfulness-based psychotherapies; the role of empiricism in clinical psychology; evidence-based practice in behavioral health.

Adrienne Juarascio, PhD (*Drexel University*). Assistant Research Professor. Enhancing treatment outcomes for eating disorders and obesity; Acceptance-based behavioral treatments; Evaluating mechanisms of action in behavioral treatments

Marlin Killen, PhD (*Trident University International*) *Faculty Coordinator of ePsychology; Online Learning Council Fellow*. Associate Teaching Professor. Authentic teaching methods in Psychology as well as student persistence behavior.

John Kounios, PhD (*University of Michigan*) *Director, PhD Program in Applied Cognitive and Brain Sciences*. Professor. Cognitive neuroscience, especially creativity, problem solving, and cognitive enhancement.

Michael Lowe, PhD (*Boston College*). Professor. Prevention and treatment of eating disorders and obesity; effects of appetitive responsiveness and dietary restraint on eating regulation; psychobiology of obesity-proneness; empirical foundations of unconscious processes.

Dan Mirman, PhD (*Carnegie Mellon University*). Assistant Professor. Recognition, comprehension, and production of spoken words; organization and processing of semantic knowledge; computational models of brain and behavior; statistical methods for analysis of time course data

Danette Morrison, PhD (*University of Maryland-College Park*). Assistant Teaching Professor. Social relationships, identity development and achievement motivation of ethnic minorities.

Arthur Nezu, PhD, DHLL, ABPP (*State University of New York at Stony Brook*). Distinguished Professor. Behavioral medicine applications of problem-solving therapy and other cognitive-behavior therapies (e.g., to decrease emotional and psychosocial risk factors; improve

adherence), particularly with regard to patients with cardiovascular disease; assessment.

Christine Maguth Nezu, PhD (*Fairleigh Dickinson University*). Professor. Cognitive-behavioral assessment and treatment for mood, anxiety, personality disorders, and coping with chronic illness; mind/body studies; stress and coping; developmental disabilities and comorbid behavioral and emotional disorders; spirituality and psychology.

Karol Osipowicz, PhD (*Thomas Jefferson University*) Assistant Director of Undergraduate Studies. Assistant Teaching Professor. The application of advanced neuroimaging to the study of human brain function and anatomy.

Nancy Raitano Lee, PhD (*University of Denver*). Assistant Professor. Neuropsychological and neuroanatomic correlates of intellectual and developmental disabilities; Verbal memory and language difficulties in Down syndrome and other genetic disorders; Comorbid autism spectrum disorder symptoms in youth with genetic disorders; Neuroanatomic correlates of individual differences in typical and atypical cognition

Diana Robins, PhD (*University of Connecticut*) Research Program Leader, *Early Detection and Intervention Program, AJ Drexel Autism Institute*. Associate Professor. Autism screening, early detection of autism

Ludo Scheffer, PhD (*University of Pennsylvania*) Director of Undergraduate Studies; Chair Senate Committee on Academic Affairs. Teaching Professor. Meta-cognitive development, writing, and computers; Language and literacy development in the early years in the context of family and schooling; Youth-at-risk; School violence and bullying; Program/intervention effectiveness

Maria Schultheis, PhD (*Drexel University*) Interim Dean, College of Arts and Sciences. Professor. Clinical Neuropsychology and rehabilitation following neurological compromise (brain injury, stroke, multiple sclerosis), application of technologies in psychology. Specialization in the use of virtual reality (VR) simulation, and evaluation of the demands of driving after disability.

Jennifer Schwartz, PhD (*Idaho State University*) Director of Psychological Services Center. Associate Teaching Professor. Adult psychopathology; evidence-based clinical practice; competency-based training; competency-based clinical supervision.

Chris Sims, PhD (*Rensselaer Polytechnic Institute*). Assistant Professor. Learning and decision-making under uncertainty; visual memory and perceptual expertise; sensorimotor control and motor learning; computational models of cognition.

Julia Sluzenski, PhD (*Temple University*). Assistant Teaching Professor. Spatial and episodic memory, memory loss across the lifespan, developmental psychology.

Mary Spiers, PhD (*University of Alabama at Birmingham*) Director MS and BS/MS Programs. Associate Professor. Clinical neuropsychology and medical psychology; memory and practical applications for memory disorders in the elderly; cognitive health of women.

J. Michael Williams, PhD (*University of Vermont*). Associate Professor. Memory disorder; traumatic brain injury; auditory neglect; neuropsychological assessment; recovery and rehabilitation of brain function; functional magnetic resonance imaging.

Fengqing (Zoe) Zhang, PhD (*Northwestern University*). Assistant Professor. Neuroimaging data analysis; Data mining; Bayesian inference; High dimensional data analysis

Eric A Zillmer, PsyD (*Florida Institute of Technology*) Carl R. Pacifico Professor of Neuropsychology and the Director of Athletics. Professor. Psychological assessment (neuropsychological, cognitive, personality), psychiatric and neurological disorders, behavioral medicine, neurogerontology, mathematical modeling, sports psychology, psychology of genocide.

Emeritus Faculty

Donald Bersoff, JD, PhD (*Yale University, New York University*). Professor Emeritus. Law and psychology; mental health law.

Thomas T. Hewett, PhD (*University of Illinois at Urbana-Champaign*). Professor Emeritus. Human computer interaction and cognitive engineering; development of computing environments to support knowledge, workers, and high performance experts.

Myrna Shure, PhD (*Cornell University*). Professor Emeritus. Child development, problem-solving interventions with children, prevention programs.

Public Policy

Major: Public Policy

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 44.0501

Standard Occupational Classification (SOC) code: 11-1031; 19-3094

About the Program

Drexel's MS in Public Policy is similar in its core curriculum to a Master of Public Administration (MPA) and a Master of Public Policy (MPP) program, as it is designed for people who work, or who would like to work, for government or a nonprofit organization. It is innovative and distinct in at least two key respects: focus on case study research and distinct track of specialization.

Case Study Research: The program has a required core curriculum of nine courses, specifically designed for students to:

- develop an understanding of the social, political and ethical context of policy research, and how this understanding can be applied to an applied practice of policy analysis;
- conceptualize, design and conduct social research for policy purposes, as well as comprehensively analyze existing social research data;
- recognize the history of public policy institutions in America and the management and governance of nonprofit organizations; and
- understand the concept of sustainability as it relates to policy planning, design, and implementation.

In addition to the core courses, the program has a focus on case study research as a unifying element of the curriculum. The curriculum reinforces coursework with a series of accompanying 1-credit, online, Case Study Research co-requisites. Students are required to choose a specific case study topic that they will work on for the duration of their time in the program. In each subsequent Case Study Research course,

students continue further research and writing on their chosen case study topic. Thus by the end of the program students will have produced a polished, in-depth analysis of a specific case that they can use to demonstrate expertise in a given policy area.

Specialization Tracks: With the approval and support of the program director, students can craft a specialized course of study with their three electives, or they can take courses in the following:

- Economic Policy
- Education Policy
- Environmental Policy
- Information Policy
- Science and Technology Policy

For additional information, view the Center for Public Policy (<http://drexel.edu/coas/academics/departments-centers/public-policy>) page on the College of Arts and Sciences' website. Current Drexel Thomas Kline School of Law students, please see the page on joint JD-MS Public Policy degrees (<http://drexel.edu/law/academics/jointDegrees/JD-MSPP>) for more information.

Admission Requirements

Acceptance for graduate study at Drexel University requires a four-year bachelor's degree from an accredited institution in the United States or an equivalent international institution. There is no pre-requisite undergraduate major or specific coursework. Although admission requirements vary by program, regular acceptance typically requires a minimum grade point average (GPA) of 3.0 for the last two years of undergraduate work. The GPA for any graduate work must be at least 3.0.

The admission committee evaluates all credentials submitted by applicants to determine a student's ability and potential to succeed in graduate study. Applicants to this program should also include their intended area of focus (see the admissions page for the essay prompt) and are often contacted for an information interview. The committee is interested in the applicant's ability to contribute to his/her program of study and to the University community as a whole.

Drexel is extending the same scholarship opportunities to Master of Science in Public Policy students who enroll in 8.0 credits that are usually only available for full-time programs (minimum enrollment of nine credits for full-time status).

Visit the Graduate Admissions (<http://www.drexel.edu/grad/programs/coas>) website for more information about requirements and deadlines, as well as instructions for applying online.

Degree Requirements

Students take required courses for the MS in Public Policy from multiple schools within Drexel University, including the Center for Public Policy in the College of Arts and Sciences, the LeBow College of Business, and the College of Computing and Informatics.

Students are required to receive a grade of "B" or better in all core coursework in order to fulfill the requirements of the MS in Public Policy degree and be eligible for graduation. This policy is in addition to the Drexel University Graduate College policy that requires all graduate students to maintain a minimum cumulative 3.0 GPA per term as well as an overall 3.0 GPA for graduation purposes.

Required Courses

BUSN 502	Essentials of Economics	3.0
ECON 550	Econometrics	3.0
ECON 616	Public Finance and Cost Benefit Analysis	3.0
INFO 680	US Government Information	3.0
PLCY 503	Theory and Practice of Policy Analysis	3.0
PLCY 504	Methods of Policy Analysis	3.0
PLCY 506	Institutional Dynamics of the Policy Process	3.0
PLCY 507	Nonprofit Organizations	3.0
STAT 601	Business Statistics	3.0
or STAT 610	Statistics for Business Analytics	

Case Study Courses

9.0

The curriculum reinforces coursework with a series of accompanying 1-credit, online, Case Study Research courses. In the first, students are introduced to case study methodology and practice, and required to choose a specific case that they will work on for the duration of the core curriculum. In each subsequent Case Study Research course, students continue further research and writing on their chosen case study topic. Thus by the end of the program students have produced a polished, in-depth analysis of a specific case that they can use to demonstrate expertise in a given policy area.

PLCY 510	Introduction to Case Study Research	
PLCY 511	Case Study Literature Review	
PLCY 512	Case Study Document Review	
PLCY 513	Case Study Interviews	
PLCY 515	Case Study Colloquium	
PLCY 516	Case Study Research II (1-credit course taken 3 times)	
PLCY 517	Case Study Final Project	

Elective Courses *

PLCY T580	Special Topics in Public Policy	0.0-9.0
Total Credits		36.0-45.0

* Elective courses are taught under the PLCY T580 Special Topics in Public Policy, or one of the participating departments. Students are required to take three 3-credit graduate level courses to fulfill the electives requirement. Public Policy students are able to select any graduate level courses (pending department approval) to create an electives "track" based on their own interests. Students have taken this opportunity to explore areas such as Education Policy, Environmental Policy and Urban Systems.

Sample Plan of Study

First Year

Fall		Credits
BUSN 502	Essentials of Economics	3.0
PLCY 504	Methods of Policy Analysis	3.0
PLCY 506	Institutional Dynamics of the Policy Process	3.0

Term Credits		8.0
Spring		
PLCY 517	Case Study Final Project	1.0
Approved Elective		3.0
Term Credits		4.0
Total Credit: 45.0		

Public Policy Faculty

Brendan Boyle, MPP (*Harvard University*). Adjunct Professor. Pennsylvania State Representative, District 170

Rebecca Clothey, PhD (*University of Pittsburgh*) Director, *Global Studies major*. Assistant Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

Richardson Dilworth, PhD (*Johns Hopkins University*) Director, *Center for Public Policy*. Professor. American political development, urban politics, public policy.

Christian Hunold, PhD (*University of Pittsburgh*). Associate Professor. Environmental policy; comparative politics; urban wildlife; political theory.

Franco Montalto, PhD (*Cornell University*). Associate Professor. Effects of built infrastructure on societal water needs, ecohydrologic patterns and processes, ecological restoration, green design, water interventions.

Mark Stehr, PhD (*University of California at Berkeley*) Interim Director, *School of Economics*. Associate Professor. Health economics, health behaviors, public finance, public policy.

Joseph Torsella, BA (*University of Pennsylvania*) Distinguished Visiting Fellow.

Publishing

Major: Publishing

Degree Awarded: Master of Arts (MA)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 09.1001

Standard Occupational Classification (SOC) code: 27-3041

About the Program

Students are given a broad scope view of the Publishing Industry via courses taught by publishing professionals and experts in their fields. In addition to the ten required courses, students will take an additional five courses in the aspect of publishing that best suits their interests. Courses will be taught in traditional classrooms, as well as online in both synchronized and asynchronous sessions; special projects can occur in day and evening hours.

The required course list contains seven courses specific to the Publishing program, and three by other disciplines (Law, Business, and Digital

Design). The elective list contains three courses specific to the program, and then a wide-range of courses from Communication, Visual Arts and Design, Business, and Law.

Independent Projects are encouraged and are limited only by the student's imagination or area of interest. Opportunities abound at Drexel itself, as well as many other area publishers with whom we've built relationships.

Science, Technology, and Society

Major: Science, Technology, and Society

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 30.1501

Standard Occupational Classification (SOC) code: 11-9121

About the Program

The Science, Technology, and Society (STS) program systemically investigates the social dimensions of science, technology and medicine. Faculty from a range of disciplines contribute to a curriculum that features a broad set of perspectives, all grounded in a foundation of social theory, research methods, and writing and presentation skills. The STS program emphasizes three interrelated areas: environment and sustainability; health and medicine; and information, identities and networks. The STS Lab course is a unique feature of the curriculum—it prepares students to work as a team to address meaningful science and technology related topics. Working with a faculty adviser, graduate students develop an individualized plan of study that allows them to pursue their interests in-depth.

STS students are independent thinkers who are dedicated to understanding the intersections of society, science, medicine and technology. While STS students vary widely in their professional and educational backgrounds and career ambitions, they share a common commitment to a critical approach to our world's most pressing technoscientific challenges.

Prospective students for the MS in STS see this educational opportunity as a crucial factor in their skill development and career advancement. They are college graduates in engineering, the humanities, social sciences, and natural sciences; professionals in businesses, city and state government offices, and area hospitals; and middle and high school teachers. Students can attend full or part time and complete all coursework in the evening.

For additional information, visit the Master's Program in Science, Technology, and Society (<http://drexel.edu/coas/academics/graduate-programs/science-technology-society>) web page.

Admission Requirements

Applicants to the program must meet the general requirements for admission to graduate studies at Drexel University.

Prospective students must also submit a 500-word essay explaining why they want to enter the program and some of the issues related to science, technology and society that they would like to study. These statements are read carefully by the faculty screening committee to evaluate each applicant's sense of purpose. Entering students typically begin during the fall quarter. Students are able, though, to start the program during any quarter.

Visit the Graduate Admissions (<http://www.drexel.edu/grad/programs/coas/science-technology-society>) website for more information about requirements and deadlines, as well as instructions for applying online.

Degree Requirements

The program requires 45.0 credits of coursework. Required courses total 24.0 credits. Remaining credits are chosen from a list of electives.

Basic Requirements

SCTS 501	Introduction to Science, Technology and Society	3.0
SCTS 502	Research Methods	3.0
SCTS 503	Advanced Research Methods	3.0
SCTS 504	Science, Technology & Society Theories	3.0

Advanced Requirements

Ethics, Values, Identities, and Culture	6.0
---	-----

Select two of the following:

CHP 807	Public Health Ethics	
INFO 679	Information Ethics	
SCTS 600	Contemporary Feminist Theory	
SCTS 610	Material Culture	
SCTS 612	Medical and Healthcare Ethics	
SCTS 614	Technology, Progress, and Determinism	
SCTS 615	The Biopolitics of Health	
SCTS 620	Medicine, Technology and Science	
SCTS 650	Global Subjects of Biocapital	
SCTS 651	Transnational Science, Technology & Capitalism	

Science and Technology Policy	3.0
-------------------------------	-----

Select one of the following:

COM 650	Telecommunications Regulation and Policy	
INFO 725	Information Policy	
PLCY 509	Sustainability & Public Policy	
SCTS 570	Environmental Policy	
SCTS 571	Science and Technology Policy	
SCTS 641	Risk and Disaster Policy	
SCTS 643	Contemporary Stem Workforces: Organizations of Labor in Lab, Shop and Clinic	
SCTS 645	War and Technoscience	

Science, Technology & Society Lab	3.0
-----------------------------------	-----

Select one of the following:

SCTS 550	Special Topics in STS Lab	
SCTS 561	Mobilities Lab	
SCTS 562	Identity and Intersectionality Lab	

Thesis and Electives *	21.0

Science, Technology and Society Faculty

Lloyd Ackert, PhD (*Johns Hopkins University*). Teaching Professor. History of science and technology; ecology; Russian science.

Peter Amato, PhD (*Fordham University*) Director, *Philosophy*. Teaching Professor. Ethics, Marxism, Continental philosophy

Jesse Ballenger, PhD (*Case Western Reserve University*). Associate Teaching Professor. Healthcare, medicine and ethics; aging and neurodegenerative diseases; Science and Technology Studies.

Merritt Brockman, DHA, FACHE (*Medical University of South Carolina*). Assistant Professor. Patient Centered Medical Home, Improvements in Health Care Delivery.

Robert J. Brulle, PhD (*George Washington University*). Professor. Environmental policy and politics, critical theory, marine risk, social movements, environmental sociology.

Chalmers Clark, PhD (*Graduate Center of the City University of New York*). Associate Professor. Wittgenstein (the contextual grounds of human language), Holism in the Naturalized Epistemology of WV Quine, Trust relations in the medical profession (physician-patient, biomedical research, and public health), the professions and public trusts.

Robert D'Ovidio, PhD (*Temple University*) Associate Dean for Humanities and Social Science Research and Graduate Education. Associate Professor. The intersection of computer technology, crime, and the criminal justice system; criminological theory; policing; transnational crime.

Mary Ebeling, PhD (*University of Surrey*) Director, *Women's and Gender Studies*. Associate Professor. Science and technology studies; emerging technologies and biocapital; media and democratic cultures; radical social movements; sociology of markets; political sociology; and ethnographic methodologies.

Christian Hunold, PhD (*University of Pittsburgh*). Associate Professor. Environmental policy; comparative politics; urban wildlife; political theory.

Krik Jalbert, PhD (*Rensselaer Polytechnic Institute*). Visiting Research Professor. Social studies of science and technology, citizen science, environmental justice, information transparency, knowledge infrastructures, energy policy

Kelly Joyce, PhD (*Boston College*) Director, *Master's Program in Science Technology & Society*. Professor. Science, medicine and technology; aging and technology; qualitative social science methods; healthcare and medicine.

Alison Kenner, PhD (*Rensselaer Polytechnic Institute*). Assistant Professor. Science, technology, and health; environmental health problems; cities and place; feminist theory; medical anthropology; digital humanities

Scott G. Knowles, PhD (*Johns Hopkins University*) Interim Department Head, *History*. Professor. Urban history, history of technology, history of disasters, modern history.

Brent Luvaas, PhD (*UCLA*). Associate Professor. DIY and independent media production; transnational consumer culture; popular music; new media and mediated subjectivities; youth culture in the US and Indonesia.

Jonson Miller, PhD (*Virginia Tech*). Associate Teaching Professor. Science and technology, American history, military history.

Kevin Mitchell, PhD, MBA (*Walden University*). Assistant Professor. Health disparities in vulnerable populations, strategic healthcare management, evidenced based medicine and clinical pharmacology and therapeutics.

Gwen Ottinger, PhD (*University of California, Berkeley*). Assistant Professor. Social studies of science and technology, environmental justice, science and engineering ethics, citizen science, environmental ethics.

Flavia Padovani, PhD (*University of Geneva*). Assistant Professor. Philosophy of science, epistemology, logic

Rosalind Remer, PhD (*University of California*) Vice Provost and Executive Director, *Lenfest Center for Cultural Partnerships*. History of the book, early American economic and business history, public history, museum planning, non-profit management.

Jody A. Roberts, PhD (*Virginia Polytechnic Institute and State University*) *Director, Center for Contemporary History and Policy, Chemical Heritage Foundation*. Assistant Professor. Intersections of emerging molecular sciences and public policy and the ways in which tensions brought about between the two get resolved.

John Rossi, VMD, MBE (*University of Pennsylvania*) *Director, M.S. in Public Health Ethics*. Assistant Professor. Public health ethics, research ethics, ethical theory, animal and environmental ethics, risk assessment and communication, public health history.

Tiago Saraiva, PhD (*Universidad Autónoma de Madrid*). Associate Professor. History of science and technology; transnational history; environmental history

Jonathan Seitz, PhD (*University of Wisconsin*) *Assistant Department Head, History*. Teaching Professor. History of religion, science, medicine, witchcraft, early modern Europe, Italy.

Nicholas Shapiro, PhD (*University of Oxford*). Visiting Research Professor. Everyday infrastructure; DIY scientific instrumentation; biopolitics; critical theory; multispecies ethnography.

Mimi Sheller, PhD (*New School for Social Research*) *Director, Center for Mobilities Research and Policy*. Professor. Sustainable mobility and mobility justice: new cultures and infrastructures of travel, transport, mobile communication, and urbanism; Caribbean Studies: history, culture and political theory of the region, including intersections of race, ethnicity, gender, sexuality and class.

Chloe Silverman, PhD (*University of Pennsylvania*). Associate Professor. Parent advocacy for autism, neurodiversity, and pollinator health research.

Amy Slaton, PhD (*University of Pennsylvania*). Professor. History of science and technology; history of standards and metrology; intersectionality, race, labor.

Andrew Smith, PhD (*SUNY, Stony Brook*). Assistant Professor. Social and political philosophy, ethics, American philosophy

Kathryn Steen, PhD (*University of Delaware*). Associate Professor. History of technology, history of industry and business, and comparative history.

Michael Yudell, MPH, PhD, MPhil (*Columbia University*) *Chair, Department of Community Health and Prevention*. Associate Professor. Public health genomics; bioethics; history of public health; addiction.

The College of Engineering

About the College

The College of Engineering prepares a new generation of engineers dedicated to discovery and the application of technology to promote economic development and improve quality of life.

Drexel University's College of Engineering is guided by five core values that shape the curriculum and experience for all students: excellence in academics and research; personal, intellectual and professional development; diversity; innovation and exploration; internal and external collaborations and partnerships. We provide a research agenda for our PhD students that addresses society's most pressing challenges regionally, nationally and globally. Our Master of Science students are

trained in strategic leadership and entrepreneurial risk-taking to address the opportunities and challenges of a rapidly changing industry.

The graduate programs at Drexel College of Engineering integrate evolving engineering science with the growing fields of engineering applications and processes. As Drexel moves through the 21st century, the College of Engineering will continue to offer students a diverse academic learning and research environment, while continuing to build on its national reputation for excellence in engineering and research.

Majors

- Architectural Engineering (MSAE, PhD) (p. 289)
- Chemical Engineering (MS, PhD) (p. 293)
- Civil Engineering (MS, PhD) (p. 298)
- Computer Engineering (MS, PhD) (p. 301)
- Construction Management (MS) (p. 306)
- Cybersecurity (MS) (p. 307)
- Electrical Engineering (MS, PhD) (p. 311)
- Electrical/Telecommunications Engineering (MS) (p. 317)
- Engineering (ME) (p. 332)
- Engineering Management (MS) (p. 322)
- Engineering Technology (MS) (p. 327)
- Environmental Engineering (MS, PhD) (p. 328)
- Materials Science and Engineering (MS, PhD) (p. 332)
- Mechanical Engineering and Mechanics (MS, PhD) (p. 336)
- **NEW:** Peace Engineering (MS)
- Project Management (MS, PhD) (p. 342)
- Property Management (MS) (p. 347)
- Systems Engineering (MS) (p. 348)

Minors

- Computational Engineering (p. 331)
- **NEW:** Project Management

Certificates

- Construction Management (p. 292)
- Engineering Management (p. 324)
- Project Management (p. 330)
- Real Estate (p. 293)
- Sustainability and Green Construction (p. 293)
- Systems Design and Development (p. 351)
- Systems Engineering (p. 352)
- Systems Engineering Analysis (p. 352)
- Systems Engineering Integrated Logistics (p. 353)
- Systems Reliability Engineering (p. 354)

About Graduate Co-op

Drexel University's long tradition in the field of experiential learning has now been extended into many of its master's programs in science, business, and engineering.

This option, called the Graduate Co-op Program (<http://www.drexel.edu/scdc/co-op/graduate>) (GCP), provides students with the opportunity to gain work experience directly related to their career goals. Employment typically lasts six months. It is important to note that the GCP program

does not guarantee a job. It is a market-driven process for the candidates as well as employers. GCP provides the tools and contacts; the student must qualify for the job on the basis of merit, qualifications, and skills.

Further information on the GCP program is available at the Drexel Steinbright Career Development Center. (<http://www.drexel.edu/scdc>)

Architectural Engineering

Major: Architectural Engineering

Degree Awarded: Master of Science in Architectural Engineering (MSAE) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MSAE); 90.0 (PhD)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 14.0401

Standard Occupational Classification (SOC) code: 11-9041

About the Program

Architectural Engineering is inherently an interdisciplinary enterprise that is centered on the design, construction, and operation of the built environment. Architectural Engineering MS or PhD graduates may include students with expertise in one or more of the following sub-disciplines (usually housed in civil/environmental engineering and elsewhere in traditional disciplinary constructs or newly developing fields of focus or expertise):

- Building energy efficiency and alternative energy
- Indoor environmental quality

Our graduates are engineers and researchers trained in integrated building design and operation practices, who can work on interdisciplinary teams that are able to develop creative solutions combined with technological advances to produce functional, efficient, attractive and sustainable building infrastructure.

Admission Requirements

Applicants to the MS or PhD in Architectural Engineering must meet the following requirements:

- A BS in Engineering OR
- For students without an Engineering degree, the following courses, or their approved equivalents from other departments, will meet these requirements:
 - Fundamental Fluids – CIVE 320
 - Thermodynamics – ENGR 210
 - Heat Transfer – MEM 345 – for Building Energy students
 - Basic Chemistry – CHEM 102 – for Indoor Environmental Quality students

The application package will include:

- undergraduate and graduate transcripts;
- three letters of recommendation from faculty or professionals who can evaluate the applicant's promise as a graduate student;
- GRE scores;
- a written statement of career and educational goals.

Competitive applicants will possess an undergraduate GPA of 3.30 or higher and GRE scores above the 60th percentile.

Degree Requirements (MS)

The goal of the MS in Architectural Engineering (AE) is to produce graduates who have a solid understanding of the Architectural Engineering discipline as well as an understanding of the interrelationships between the major AE sub-disciplines. Graduates will have demonstrated the ability and capacity to apply that understanding and skill, and the curriculum and project requirements are designed to provide to the students and then ask them to demonstrate the ability to effectively engage in professional-level performance.

Required Courses

Core Courses for all AE students		
AE 510	Intelligent Buildings	3.0
AE 550	Comfort Analysis and Indoor Air Quality	3.0
AE 544	Building Envelope Systems	3.0
AE 551	Building Energy Systems I	3.0
MEM 591	Applied Engr Analy Methods I	3.0
MEM 592	Applied Engr Analy Methods II	3.0

Building Energy Theme

Complete three of the following:		
9.0		
AE 552	Building Energy Systems II	
CHE 513	Chemical Engineering Thermodynamics I	
CHE 525	Transport Phenomena I	
MEM 611	Conduction Heat Transfer	
MEM 612	Convection Heat Transfer	
MEM 621	Foundations of Fluid Mechanics	

Indoor Air Quality (IAQ) Theme

Complete three of the following:		
9.0		
AE T780	Special Topics in AE	
CHE 525	Transport Phenomena I	
ENVE 560	Fundamentals of Air Pollution Control	
ENVE 660	Chemical Kinetics in Environmental Engineering	
ENVS 501	Chemistry of the Environment	
MEM 621	Foundations of Fluid Mechanics	

Additional Electives **		9.0
Total Credits		45.0

* Indoor Modeling and Field Measurements.

** The balance of the required 45.0 credits, a maximum of 18.0 credits, will be electives approved by the student's advisor and the departmental graduate advisor.

Degree Requirements (PhD)

The following general requirements must be satisfied in order to complete the PhD in Architectural Engineering:

- 90.0 quarter credit hours total (or 45 credit hours post-MS)
- Plan of study established with Advisor
- Qualifying courses
- Candidacy exam
- Approval of dissertation proposal
- Defense of dissertation
- Full-time residency for one continuous academic year is usually desired for the PhD degree to ensure students the opportunity for intellectual association with other scholars.

Students entering with a master's degree may be exempted from some or all of the courses in the breadth requirement; however, they are still required to meet all milestones of the program. Individual courses may also be transferred with approval of the Graduate Advisor. The total credit

amount, candidacy exam, and dissertation are University Requirements. Additional requirements are determined by the department offering the degree.

MSAE coursework plus research and courses defined by the dissertation Committee 90.0

Qualifying Courses

To satisfy the qualifying requirements, students must earn a grade of B+ or better in the first 6 Architectural Engineering graduate courses taken at Drexel, and must earn an overall GPA of 3.5 or better in these courses. Normally these courses comprise at least 4 "core" courses and either 2 more courses, either "core" or in one of the Architectural Engineering themes taken as part of the PhD program; however, they may in some cases include more advanced courses (e.g., if the student has received transfer credit for a core course).

Undergraduate courses, independent studies, research credits, and courses from other departments cannot be counted toward the qualifying requirements. Student progress toward these requirements will be assessed in the Annual Review following the student's first year in the PhD program. For more information visit the Department's PhD Program Requirements page.

Candidacy Exam

After approximately one year of study beyond the master's degree, doctoral students take a candidacy examination, consisting of written and oral parts. The Architectural Engineering candidacy examination serves to define the student's research domain and to evaluate the student's knowledge and understanding of various fundamental and seminal results in that domain. At this point the student is expected to be able to read, understand, analyze, and explain advanced technical results in a specialized area of Architectural Engineering at an adequate level of detail. The candidacy examination will evaluate those abilities using a defined set of published manuscripts. The student will prepare a written summary of the contents of the material, present the summary orally, and answer questions about the material. The examination committee will evaluate the written summary, the oral presentation, and the student's answers.

Thesis Proposal

After completing the candidacy examination successfully, the PhD candidate must prepare a thesis proposal that outlines, in detail, the specific problems that will be solved in the PhD dissertation. The quality of the research proposal should be at the level of, for example, a peer-reviewed proposal to a federal funding agency, or a publishable scientific paper. The candidate is responsible for sending the research proposal to the PhD committee two weeks before the oral presentation. The PhD committee need not be the same as the candidacy exam committee, but it follows the same requirements and must be approved by the Office of Graduate Studies. The oral presentation involves a 30-40-minute presentation by the candidate followed by an unspecified period during which the committee will ask questions.

After the question and answer period, the candidate will be asked to leave the room and the committee will determine if the research proposal has been accepted. The research proposal can be repeated at most once. A thesis proposal must be approved within two years of becoming a PhD candidate.

After approval of the proposal, the committee meets from time to time to review the progress of the research.

Thesis Defense

After completing the research proposal successfully, the PhD candidate must conduct the necessary research and publish the results in a PhD dissertation. The dissertation must be submitted to the PhD committee two weeks prior to the oral defense and at least 90 days before the graduation date. The oral presentation involves a 45-minute presentation by the candidate, open to the public, followed by an unspecified period during which the committee will ask questions. The question and answer period is not open to the public.

After the question and answer period, the candidate will be asked to leave the room and the committee will determine if the candidate has passed or failed the examination. The candidate will be granted one more chance to pass the final defense if he or she fails it the first time. Paperwork selecting the thesis committee and indicating the results of the thesis defense must be filed with the Department of Civil, Architectural and Environmental Engineering and the Office of Graduate Studies.

The PhD degree is awarded for original research on a significant Architectural Engineering problem. Graduate students who have an MS degree or have completed work equivalent to that required for of an MS degree will continue to work closely with individual faculty members to pursue the PhD degree (see Faculty Research Interests on the department website). PhD dissertation research is usually supported by a research grant from a government agency or an industrial contract.

Many doctoral students take three to five years of full-time graduate study to complete their degrees.

Sample Plan of Study (MSAE)

Indoor Air Quality - Sample Plan of Study

First Year		
Term 1		Credits
AE 544	Building Envelope Systems	3.0
AE 550	Comfort Analysis and Indoor Air Quality	3.0
MEM 591	Applied Engr Analy Methods I	3.0
Term Credits		9.0
Term 2		
AE 510	Intelligent Buildings	3.0
AE 551	Building Energy Systems I	3.0
MEM 592	Applied Engr Analy Methods II	3.0
Term Credits		9.0
Term 3		
AE T780	Special Topics in AE	3.0
Free Electives		6.0
Term Credits		9.0
Second Year		
Term 1		
ENVS 501	Chemistry of the Environment	3.0
MEM 621	Foundations of Fluid Mechanics	3.0
Free Elective		3.0
Term Credits		9.0
Term 2		
CHE 525	Transport Phenomena I	3.0
ENVE 560	Fundamentals of Air Pollution Control	3.0

ENVE 660	Chemical Kinetics in Environmental Engineering	3.0
Term Credits		9.0

Total Credit: 45.0

Undergraduate Course Prerequisites for students without an Engineering Degree:

The following courses, or their approved equivalents from other departments, will meet these requirements:

- CIVE 320 - Fundamental Fluids
- CHEM 102 - Basic Chemistry
- ENGR 210 - Thermodynamics

Building Energy - Sample Plan of Study

Term Credits		9.0

Term 2

CHE 525	Transport Phenomena I	3.0
ENVE 727	Risk Assessment	3.0
AE 552	Building Energy Systems II	3.0
Term Credits		9.0

Total Credit: 45.0

Undergraduate Course Prerequisites for students without an Engineering Degree

The following courses, or their approved equivalents from other departments, will meet these requirements:

- CIVE 320 - Fundamental Fluids
- MEM 345 - Heat Transfer
- ENGR 210 - Thermodynamics

Plan of Study (PhD)

Upon entering the PhD program, each student will be assigned an academic advisor, and with the help of the advisor will develop and file a plan of study (which can be brought up to date when necessary). The plan of study should be filed with the Graduate Coordinator no later than the end of the first term.

Civil, Architectural and Environmental Engineering Faculty

Abieyuwa Aghayere, PhD (*University of Alberta*). Professor. Structural design - concrete, steel and wood; structural failure analysis; retrofitting of existing structures; new structural systems and materials; engineering education.

A. Emin Aktan, PhD (*University of Illinois at Urbana-Champaign*) *John Roebling Professor of Infrastructure Studies*. Professor. Structural engineering; health monitoring of large infrastructure systems; infrastructure evaluation; intelligent systems.

Ivan Bartoli, PhD (*University of California, San Diego*). Associate Professor. Non-destructive evaluation and structural health monitoring; dynamic identification, stress wave propagation modeling.

Robert Brehm, PhD (*Drexel University*). Associate Teaching Professor. International infrastructure delivery; response to natural catastrophes; risk assessment and mitigation strategies; project management techniques.

S.C. Jonathan Cheng, PhD (*West Virginia University*). Associate Professor. Soil mechanics; geosynthetics; probabilistic design; landfill containments; engineering education.

Peter DeCarlo, PhD (*University of Colorado*) *Graduate Studies Advisor*. Associate Professor. Outdoor air quality, particulate matter size and composition instrumentation and measurements, source apportionment of ambient particulate matter, climate impacts of particulate matter.

Eugenia Ellis, RA, PhD (*Virginia Polytechnic State University*). Associate Professor. Extended-care facilities design, research on spatial visualization, perception and imagination.

Patricia Gallagher, PhD (*Virginia Polytechnic Institute*). Associate Professor. Soil mechanics; geoenvironmental; ground improvement; sustainability.

Patrick Gurian, PhD (*Carnegie-Mellon University*). Associate Professor. Risk analysis of environmental and infrastructure systems; novel adsorbent materials; environmental standard setting; Bayesian statistical modeling; community outreach and environmental health.

Charles N. Haas, PhD (*University of Illinois-Urbana*) *L. D. Betz Professor and Department Head, Civil, Architectural and Environmental Engineering*. Professor. Control of human exposures to and risk assessment of pathogenic organisms; water and waste treatment; homeland security.

Ahmad Hamid, PhD (*McMaster University*). Professor. Engineered masonry; seismic behavior, design and retrofit of masonry structures; development of new materials and building systems.

Y. Grace Hsuan, PhD (*Imperial College*). Professor. Director, Center for Family Intervention Science, a multidisciplinary research program focused on developing and testing family centered care models across the life span and in a variety of health care settings. Developer of Attachment Based Family Therapy (ABFT) focused on youth with depression, suicide trauma, and youth in the LGBTQ community. Behavioral health integration into primary care

Joseph B. Hughes, PhD (*University of Iowa*) *Dean of the College of Engineering and Distinguished Professor*. Biological processes and applications of nanotechnology in environmental systems.

L. James Lo, PhD (*University of Texas at Austin*). Assistant Professor. Computational Fluid Dynamics (CFD) and airflow simulation; Indoor Environmental Quality; Building control integration with building information management systems.

Roger Marino, PhD (*Drexel University*). Associate Teaching Professor. Fluid mechanics; water resources; engineering education; land development.

Joseph P. Martin, PhD (*Colorado State University*). Professor. Geotechnical and geoenvironmental engineering; hydrology; transportation; waste management.

James E. Mitchell, MArch (*University of Pennsylvania*) *Associate Dean for Undergraduate Affairs*. Professor. Architectural engineering design; building systems; engineering education.

Franco Montalto, PhD (*Cornell University*). Associate Professor. Effects of built infrastructure on societal water needs, ecohydrologic patterns and processes, ecological restoration, green design, water interventions.

Michael Ryan, PhD (*Drexel University*). Assistant Teaching Professor. Microbial Source Tracking (MST); Quantitative Microbial Risk Assessment (QMRA); Dynamic Engineering Systems Modeling; Molecular Microbial Biology; Environmental Statistics; Engineering Economics; Microbiology

Christopher Sales, PhD (*University of California, Berkeley*). Assistant Professor. Environmental microbiology and biotechnology; biodegradation of environmental contaminants; microbial processes for energy and resource recovery from waste.

Yared Shifferaw, PhD (*Johns Hopkins University*). Assistant Professor. Computational and experimental mechanics; structural stability; optimization; health monitoring and hazard mitigation; sustainable structures; emerging materials; thin-walled structures and metallic structures.

Kurt Sjoblom, PhD (*Massachusetts Institute of Technology*). Assistant Teaching Professor. Laboratory testing of geomaterials, geotechnical engineering, foundation engineering.

Sabrina Spatari, PhD (*University of Toronto*). Associate Professor. Research in industrial ecology; development and application of life cycle assessment (LCA) and material flow analysis (MFA) methods for guiding engineering and policy decisions; specific interest in biomass and bioenergy, biofuels, and urban infrastructure.

Robert Swan Associate Teaching Professor. Geotechnical and Geosynthetic Engineering; soil/geosynthetic interaction and performance; laboratory and field geotechnical/geosynthetic testing.

Michael Waring, PhD (*University of Texas-Austin*) *Associate Department Head for Undergraduate Programs; Director of Architectural Engineering Program*. Associate Professor. Indoor air quality and building sustainability; indoor particulate matter fate and transport; indoor chemistry and particle formation; secondary impacts of control technologies and strategies.

Jin Wen, PhD (*University of Iowa*). Professor. Architectural engineering; Building Energy Efficiency; Intelligent Building; Net-zero Building; and Indoor Air Quality.

Aspasia Zerva, PhD (*University of Illinois*). Professor. Earthquake engineering; mechanics; seismology; structural reliability; system

identification; advanced computational computational methods in structural analysis.

Emeritus Faculty

Harry G. Harris, PhD (*Cornell University*). Professor Emeritus. Structural models; dynamics of structures, plates and shells; industrialized building construction.

Joseph V. Mullin, PhD (*Pennsylvania State University*) *Associate Department Head*. Professor Emeritus. Structural engineering; failure analysis; experimental stress analysis; construction materials; marine structures.

Richard Weggel, PhD (*University of Illinois*) *Samuel S. Baxter Professor Emeritus; Civil and Environmental Engineering*. Professor Emeritus. Coastal engineering; hydraulics engineering; hydrology.

Richard Woodring, PhD (*University of Illinois*) *Dean of Engineering Emeritus*. Professor Emeritus. Structural engineering, reinforced concrete.

Certificate in Construction Management

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 18.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 52.2001

Standard Occupational Classification (SOC) Code: 11-9021

The certificate in Construction Management program teaches professionals the multidisciplinary skills required of effective senior construction managers. The program produces industry leaders that exhibit strong technical and managerial skills, apply scientific methodologies to problem solving, are critical thinkers, exercise creativity, and inject innovation into the process.

Students have the option of completing this 18.0 credit certificate in construction management as a stand-alone professional development credential, or as a step toward the MS in Construction Management program (<http://drexel.edu/engmgmt/cmgt/academics/ms>).

The admissions process for this program is the same as for the MS in Construction Management (<http://www.drexel.edu/grad/apply/overview>).

Depending on the experience and background of individual students, a prerequisite course of CMGT 501 "Leadership in Construction" may be required, or, at the discretion of the faculty, can be waived.

Requirements

CMGT 510	Construction Control Techniques	3.0
CMGT 512	Cost Estimating and Bidding Strategies	3.0
CMGT 515	Risk Management in Construction	3.0
CMGT 525	Applied Construction Project Management	3.0
CMGT 528	Construction Contract Administration	3.0
CMGT 538	Strategic Management in Construction	3.0
Total Credits		18.0

Certificate in Real Estate

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 18.0

Instructional Delivery: Campus, Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 52.1501

Standard Occupational Classification (SOC) Code: 11-9141

This graduate certificate seeks to produce professionals with the knowledge, skills, and perspective required to be successful in the real estate development process and the industry as a whole. Students explore the knowledge and skills required to create, maintain, and build environments for living, working and entertainment purposes.

Relevant issues include project finance, real estate as investments, design and construction, operations, development law, environmental remediation, public policy, market analysis, and architecture.

Students wishing to complete this certificate in the context of a master's degree should consider the MS in Construction Management (<http://drexel.edu/engmgmt/cmgt/academics/ms>) with a concentration in Real Estate.

Requirements

REAL 568	Real Estate Development	3.0
REAL 571	Advanced Real Estate Investment & Analysis	3.0
REAL 572	Advanced Market Research & Analysis	3.0
REAL 575	Real Estate Finance	3.0
REAL 577	Legal Issues in Real Estate Development	3.0
Select one of the following:		
REAL 573	Sales & Marketing of Real Estate	3.0
REAL 574	Real Estate Economics in Urban Markets	3.0
REAL 576	Real Estate Valuation & Analysis	3.0
Total Credits		18.0

Certificate in Sustainability and Green Construction

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 15.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 52.2001

Standard Occupational Classification (SOC) Code: 11-9021

The architectural, engineering, and construction community faces the daunting task of providing a built environment which is in harmony with the natural environment—meeting the current needs of society without jeopardizing the ability of future generations to meet their needs. Sustainable development means integrating the decision-making process across the project team, so that every decision is made with an eye to the greatest long-term benefits.

The certificate in Sustainability and Green Construction is a flexible, part-time post-baccalaureate program, focused on the sustainable aspects of the construction process. Students have the opportunity to complete all requirements within one and a half years.

Currently, in the Leadership in Energy and Environmental Design (LEED) green building rating system, the construction process represents a significant portion of the effort required to achieve high performance building programs. This certificate program is intended to explore these concepts in detail. Credits from this certificate will transfer toward a Master of Science in Construction Management.

Requirements

CMGT 535	Community Impact Analysis	3.0
CMGT 545	Sustainable Principles & Practices	3.0
CMGT 546	Sustainable Technologies	3.0
CMGT 547	LEED Concepts	3.0
CMGT 558	Community Sustainability	3.0
Total Credits		15.0

Chemical Engineering

Major: Chemical Engineering

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS); 90.0 (PhD)

Co-op Option: Available for full-time on-campus master's-level students

Classification of Instructional Programs (CIP) code: 14.0701

Standard Occupational Classification (SOC) code: 17-2041

About the Program

The graduate program in the Chemical and Biological Engineering Department integrates current chemical engineering science with the growing fields of engineering applications and processes, emphasizing engineering design and scientific analysis. The department intends to develop broadly educated individuals who are knowledgeable in modern theories, cognizant of the behavior of engineering systems, and aware of current mathematical and engineering tools that are useful for the solution of problems in complex processes and systems, especially those in the fields of chemical, environmental, biochemical, and materials process engineering. Areas of particular strength include biological engineering, energy and the environment, multiscale modeling and process systems engineering, and polymer science and engineering.

Programs are arranged to meet the needs and interests of individual students. The plan of study is initially formulated in consultation with the departmental graduate advisor and subsequently guided by the thesis advisor.

A graduate co-op is available for the Master of Science program. For more information, visit the Steinbright Career Development Center's website (<http://www.drexel.edu/scdc/co-op/graduate>).

Graduates have pursued a variety of careers, ranging from faculty positions in academia to research and development in industry, in the U.S. and overseas.

Additional Information

For more information about this program, visit Drexel University's Department of Chemical and Biological Engineering (<http://drexel.edu/cbe>) web page.

Admission Requirements

Students should fulfill Drexel University's general requirements for admission to graduate studies. The subjects normally included in an undergraduate program in chemical engineering provide a satisfactory background. Decisions regarding prerequisite qualifications for students who may be deficient in some areas are made after consultation with the departmental graduate advisor.

The core courses are designed for students with undergraduate training in chemical engineering. However, students with a background in biological sciences and engineering can also enroll in the core courses after completing the necessary basic engineering courses and disciplinary chemical engineering courses. Programs for such students are determined on an individual basis after consultation with the departmental graduate advisor.

Graduate study in chemical engineering is offered on a regular full-time basis and on a part-time basis. Details not covered in the following information may be obtained by contacting the departmental graduate advisor. The General (Aptitude) Test of the Graduate Record Examination (GRE) is required for applicants pursuing full-time study.

Financial Assistance

Financial aid in the form of teaching assistantships, research assistantships, and fellowship grants is available to qualified full-time PhD students. Awards are made annually on a competitive basis.

For additional information on how to apply, visit Drexel's Admissions page for Chemical Engineering (<http://www.drexel.edu/grad/programs/coe/chemical-engineering>).

Master of Science in Chemical Engineering

Degree Requirements

In general, each program leading to the Master of Science in Chemical Engineering must meet the following requirements: total, 45.0 credits; core chemical engineering, 15.0 credits; area of concentration, at least 15.0 credits; free electives, at most 6.0 credits; research, at most 21.0 credits. Core courses in the chemical engineering Master's program are listed below. A Master's Thesis is optional.

Thesis option: The thesis may be based on either a theoretical or an experimental investigation, or both, of limited scope but involving a significant degree of originality. The nature of the research may involve multidisciplinary areas such as biological engineering, materials processing and engineering, energy and the environment, and other topics. The scope and content of the thesis is guided by the thesis advisor. All students pursuing a Master's with Thesis must complete 9.0 credits of thesis research (CHE 898) and, at the discretion of the research advisor, up to 12.0 credits of independent study (CHE I799).

Coursework-only (non-Thesis) option: Students not pursuing Master's with Thesis may take up to 21.0 credits of independent study (CHE I799) although independent study is **not** required for a non-thesis Master's. Non-thesis students may also take additional concentration electives

beyond the required 15.0-credit series. Non-thesis students may **not** register for thesis research.

Concentration: All Master's students must complete a 15-credit series of concentration electives. Concentration electives may be chosen from course offerings in chemical engineering, mathematics, science, and other engineering disciplines, and are subject to approval by the departmental graduate advisor. Sample concentration series courses are listed below; there are many other possibilities. Free (non-concentration) electives need only be graduate-level.

Co-op: Students have the option to pursue a co-op as part of their Master's program. In conjunction with the Steinbright Career Development Center (<http://drexel.edu/scdc/co-op/graduate>), students will be provided an overview of professionalism, resume writing, and the job search process. Co-op will be for a six-month position running in the summer/fall terms. Students will not earn academic credit for the co-op but will earn 9.0 non-academic co-op units per term.

Full-time students usually take the core courses in the first year. Other courses may be substituted for the core courses, if equivalent courses are available and if the substitution is approved by the graduate advisor. Full-time students normally require a minimum of one calendar year to complete their study and research.

Curriculum

CHE 502	Mathematical Methods in Chemical Engineering	3.0
CHE 513	Chemical Engineering Thermodynamics I	3.0
CHE 525	Transport Phenomena I	3.0
CHE 543	Kinetics & Catalysis I	3.0
CHE 554	Process Systems Engineering	3.0
Area of Concentration		15.0
Thesis/Research		9.0
Electives		6.0

Sample Areas of Concentration

Biochemical Engineering

Sample Courses

BIO 500	Biochemistry I
BIO 610	Biochemistry of Metabolism
BMES 501	Medical Sciences I
CHE 562	Bioreactor Engineering
CHE 564	Unit Operations in Bioprocess Systems

Computer Science

Sample Courses

CS 543	Operating Systems
CS 551	Compiler Construction I
CS 552	Compiler Construction II
CS 550	Programming Languages

Engineering Management

Sample Courses

EGMT 501	Leading and Managing Technical Workers
EGMT 502	Analysis and Decision Methods for Technical Managers
EGMT 504	Design Thinking for Engineering Communications
EGMT 531	Engineering Economic Evaluation & Analysis
EGMT 581	Meeting Engineering Leadership Challenges

Environmental Engineering

Sample Courses

ENVS 501	Chemistry of the Environment
ENVS 608	Fate of Pollutants in Air and Water
ENVE 661	Env Engr Op-Chem & Phys
ENVE 662	Enviro Engr Unit Oper-Bio
ENVE 865	Benefit-Cost Analysis for Infrastructure

Materials Science and Engineering

Sample Courses

MATE 500	Structure and Properties of Metals
MATE 501	Structure and Properties of Polymers
MATE 502	Structure and Properties of Ceramic and Electronic Materials
MATE 505	Phase Equilibria
MATE 507	Kinetics
Total Credits	
	45.0

PhD in Chemical Engineering

Superior students with MS or BS degrees will be considered for the doctoral program in chemical engineering. Students joining with a Master's degree may satisfy up to 45.0 credit hours of the PhD course/research credit requirements depending on the courses taken and/or research carried out in their Master's programs, subject to approval by the graduate program advisor.

Degree Requirements

The following general requirements must be satisfied in order to complete the PhD in chemical engineering:

- 90 credit hours total
- 18 core credits
- 15 credit hours of specialized plan of study
- 57 credit hours of research (including a 3 credit research practice course)
- Qualifying exam (2nd term)
- Establishing a plan of study (2nd term)
- Candidacy exam (5th term)
- Dissertation/Thesis
- Defense of Dissertation/Thesis
- GPA requirements: 3.0 overall; 3.0 graduate chemical engineering (CHE) courses; 3.0 core graduate chemical engineering (CHE) courses

Qualifying Exam

The qualifying exam is administered once a year in January at the start of the 2nd term. The objective of the exam is to evaluate proficiency in core undergraduate chemical engineering material. The format is made up of seven problems, each covering a separate core topic from the undergraduate curriculum, including thermodynamics, heat transfer, mass transfer, fluid mechanics, kinetics, control, and separations. Students must display mastery of five out of the seven topics to pass the qualifying exam. A student can appeal to take a second-chance exam at the end of the 2nd term if the qualifying exam was not satisfactory in the first instance. However, the appeal is not guaranteed and will depend on student's overall performance in coursework, research and teaching assistant duties.

Plan of Study

All students must meet with their research advisor in their 2nd term to work out a plan of study.

Core Requirements

CHE 502	Mathematical Methods in Chemical Engineering	3.0
CHE 513	Chemical Engineering Thermodynamics I	3.0
CHE 525	Transport Phenomena I	3.0
CHE 543	Kinetics & Catalysis I	3.0
CHE 614	Chemical Engineering Thermodynamics II	3.0
CHE 626	Transport Phenomena II	3.0

Specialized Plan of Study Courses 15.0

15.0 credit hours of courses approved by research advisor. All students are expected to develop competence in their area(s) of specialization.

Research 57.0

57.0 credit hours of research, which may include up to 6.0 credit hours of electives.

CHE 590	Research Methods and Practices
CHE 998	Ph.D. Dissertation

Total Credits 90.0

Candidacy Exam

The components of the candidacy exam are as follows:

- Proposal Document (Written): The student is required to write a research proposal of about 15 pages, including background, preliminary results, and a research plan (with his/her advisor's input). The proposal must be submitted to each member of the student's thesis committee and to the graduate program advisor on the first day of the student's 5th term.
- Proposal Defense (Oral): The student provides a formal defense of his/her proposal to his/her thesis committee before the end of the student's 5th term.

Preliminary Exam

A preliminary exam is targeted at least 6 months prior to the thesis defense, with this scheduling subject to the research advisor's discretion. This preliminary exam is to ensure that the student has made adequate progress in his/her project. The components of the preliminary exam include:

- Exam Documents (Written): The student is required to write an abstract of the preliminary defense talk, a one-page document describing the plan for completing the thesis, a tentative list of the thesis chapter titles, and a current list of publications/presentations. These must be submitted to each member of the student's thesis committee and to the graduate program advisor in advance of the oral exam date.
- Preliminary Defense (Oral): The student provides a formal defense of the work to date and the anticipated work to be completed for the thesis to his/her thesis committee.
- Publications: At a minimum, at least one manuscript (original article) must have been submitted to a refereed journal prior to the oral exam date.

Thesis/Dissertation and Defense

As the culmination of intensive study and independent research, the doctoral dissertation represents a major scholarly endeavor; accordingly, it is recognized as the most important requirement of the degree. All doctoral candidates must present an acceptable dissertation based on significant work. The dissertation must represent a unique contribution to chemical engineering or biochemical engineering knowledge. A final oral examination is conducted, in part, as a defense of the dissertation. The requirements of the thesis/dissertation and defense are:

- Thesis (Written): The student is required to write a thesis detailing the entire PhD project, including background, methods, results, discussion, conclusions and bibliography.
- Defense (Oral): The student provides a formal defense of his/her PhD thesis in an oral examination to his/her thesis committee.
- Publications: At a minimum, at least one original article must be published in a refereed journal (department's minimum requirement).

At the discretion of the research advisor, further publication requirements may be imposed above this minimum.

For more information, visit the Chemical and Biological Engineering Department (<http://drexel.edu/cbe>) web page.

Facilities

Abrams Laboratory (ABRAMS)

Software:

- The Abrams group Github repository (<https://github.com/cameronabrams>)

Computational resources:

- Proteus, Drexel's high-performance cluster (www.drexel.edu/research/urcf/services/cluster)
- NSF XSEDE (www.xsede.org) (<http://www.xsede.org>)
- DoD HPCMP (www.hpc.mil) (<https://www.hpc.mil>)

Alvarez Research Group (Alvarez)

- Rheo Filament- VADER1000 - Filament Extensional Rheometer with forced convection oven
- TA DHR3 – Controlled Stress Rheometer with Electronic Heated Platesx
- TA ARES G2 – Controlled Strain Rheometer with Forced Convection Oven
- Controlled Film Coater
- Gel Spinning Apparatus for continuous filament and fiber formation
- Microtensiometer for measurement of dynamic transport of surfactant to fluid-fluid interfaces, including dilatational rheology of equilibrated surfaces.
- Supercritical Microtensiometer for measurement of surfactant transport to fluid-fluid interfaces at elevated pressures
- Nikon TE microscope with 3MP camera and various objectives.
- Fluigent - 4 port continuous pressure fluid pump

Nanomaterials for Energy Applications and Technology Laboratory (BAXTER)

- Amplified Ti:Sapphire laser with time-resolved terahertz spectroscopy and femtosecond UV/vis/NIR transient absorption spectroscopy (Bossone 106)
- Solar simulator with monochromator and photovoltaic/ photoelectrochemical test station
- Electrochemical impedance spectroscopy
- Layer-by-layer deposition robot
- Dip coater
- Spin coater
- Electrodeposition station
- Continuous flow microreactors

Biofuels Laboratory (CAIRNCROSS)

- Bubble column biodiesel reactors
- Recirculating heated oil baths
- Quartz crystal microbalance / heat conduction calorimeter (Masscal G1)

- Maxtek quartz crystal microbalance with phase lock oscillator
- Parr reactor

Nanocrystal Solar Laboratory (FAFARMAN)

- Two chamber fabrication glove box with separate air-purification for wet-chemical synthesis and dry-process fabrication steps, featuring HEPA filtered laminar flow air handling for class-1 cleanroom conditions in an inert atmosphere. In the wet-chemical fabrication chamber there are a spincoater, centrifuge, hot-plates and solid and liquid reagents. On the dry chamber side, there is an integrated thermal evaporator for depositing metal, and a UV-ozone cleaner.
- Custom built Schlenk vacuum/gas manifold, all necessary glassware, J-Kem precision temperature controllers and heating mantles
- Perkin Elmer Lambda 35 UV-vis spectrometer
- ThermoFisher Nicolet iS50R Fourier-transform vis-NIR-MIR absorption spectrometer covering spectral ranges 13000 – 600 and 25000 – 8000 1/cm
- Keithley dual-channel precision source-meter
- Crystalaser Q-switch laser, 300 mW at 532 nm
- Home-built 4-point probe station for thin film electrical conductivity
- 80 MHz digital oscilloscope
- Stanford Research Systems lock-in amplifier

Nanofibers for Energy Storage and Conversion Laboratory (KALRA)

- Four Electrospinning Stations (with core-shell spinning capability)
- Tube Furnaces/Convection Ovens/Vacuum Ovens
- Mbraun Dual User Glove Box
- Carver Heat Press
- Gamry Ref 3000 Potentiostat
- 32-channel Maccor Battery Cycler

Access to:

- Drexel's Centralized Research Facilities (SEM, TEM, Ultramicrotome, FTIR, XPS, XRD, Multi-angle x-ray scattering)
- XSEDE Compute Hours Allocation
- Synchrotron at Brookhaven National Lab
- BET Surface area and Porosity Analyzer

Thin Films and Devices Laboratory (LAU)

- Chemical Vapor Deposition Thin Film Reactor System I
- Chemical Vapor Deposition Thin Film Reactor System II
- Chemical Vapor Deposition Rotating Bed Reactor System
- Gamry Reference 600 Electrochemical Testing Station
- Solar Illuminator
- Nicolet 6700 FTIR Spectrometer
- Laurell Technologies Spin Coater

Access to:

- Centralized Research Facilities (SEM, TEM, XRD, SAXS, XPS, Raman, Profilometer)
- Thermogravimetric Analyzer
- Differential Scanning Calorimeter

- Dynamic Mechanical Analyzer
- UV-Vis Spectrophotometer

Biosensor and Bioanalytics Laboratory (MUTHARASAN)

- Custom-built bio-analytical flow apparatus for conducting in situ surface chemistry and detection assays of pathogens, biomarkers, DNA and RNA
- Impedance Analyzers Agilent 4294A and Agilent HP4192A with bridge circuits for device characterization
- Electrochemical Impedance Spectrometer, Gamry Interface 1000 with three electrode cells, and interfaces to biosensor flow cell; Ag/AgCl and Pt electrodes
- Stanford Research System QCM200 and flow cells
- Signal Recovery 875 Lock-In amplifier (plus computer-interface)
- Function/Arbitrary Waveform Generator, 80 MHz Agilent 33250A
- Agilent precision Giga-ohmmeter
- Bausch & Lomb optical Microscopes interfaced with image acquisition system
- Olympus OM-10 Fluorescence Microscope, coupled to Canon digital imaging and video systems
- PTI SS Fluorescence Spectrometer with PMT 750 detector
- UV-VIS spectrometer – Shimadzu UV-1800
- Denton Desktop high vacuum sputtering system; 6-inch target, one or two cathode configuration, Base vacuum 10^{-6}
- Harrick RF Plasma Reactor (Model PDC-001, 200 W) modified for conducting plasma-assisted surface reactions
- UVP UV Radiation Oven, Model OG-1. Radiation at 185 and 254 nm
- 1550 nm DFB laser (Anritsu GB5A016) and 1310 nm DFB laser (QPhotonics), and associated power supplies
- High speed micro-centrifuge (200 – 15000 rpm)
- Vacuum ovens
- Incubators, 9 ft³, 20-70°C
- Spectrum analyzer (ANDO AQ-6310B), LabView interface
- Ericsson FSU 975 fusion splicer
- Laminar Flow Hoods, Precision CO₂ Incubators, Spinners, bioreactors (0.1L to 1L)

Access to:

- Bruker Daltonics Autoflex III Smartbeam TOF-MALDI mass spectrometer
- 8 M#, Milli-Q system
- Autoclave
- Hot room 37°C, 100 ft²
- Refrigerated room 4°C, 100 ft²

Polymers and Composites Laboratory (PALMESE)

- TA Instruments TGA Q50 Thermogravimetric Analyzer
- KSV Instruments CAM 200 Contact Angle and Surface Tension Meter
- TA Instruments DSC Q2000 Differential Scanning Calorimeter
- Instron 8872
- Thermo Nicolet Nexus 870 FTIR

- TA Instruments DMA Dynamic Mechanical Analysis
- Perkin Elmer DSC7 Differential Scanning Calorimeter
- Waters GPC/HPLC (RI, UV Detectors)
- Electrospinning station
- TA Instruments AR Rheometer
- Thinky planetary centrifugal mixer ARE-250
- Melt Press
- Portable Near Infrared Spectrometer
- Brookfield digital viscometer
- Glove Box
- Supercritical Dryer (2x)
- Dielectric Barrier Discharge (DBD) plasma reactor

Process Systems Engineering Laboratory (SOROUSH)

- Shimadzu GPC
- Mini-Reactors
- Agilent GC/MS
- Fluidized Sand Bath
- IKA-RCT Stirred Hotplate Reactors

Access to:

- Drexel's Centralized Research Facilities (SEM, TEM, Ultramicrotome, FTIR, XPS, XRD, Multi-angle x-ray scattering)
- TOF-MALDI Mass Spectrometer

Snyder Laboratory (SNYDER)

- Millipore DI water system
- 302N Autolab Potentiostats (x2)
- Mettler Toledo Micro-Balance
- Ultracentrifuge
- 4 port Schlenk line
- 4 kW Ambrell Radio Frequency Induction Furnace

Tang Laboratory (TANG)

- Six-channel Bio-Logic SP-300 potentiostat with electrochemical impedance spectroscopy
- LC Technology dual-user glovebox with argon atmosphere. Includes oxygen and water analyzers, electronic feedthroughs, and integrated vacuum oven
- Coin cell crimper /decrimper for battery fabrication (TOB Battery)
- Automatic electrode film coater (TOB Battery)
- Tube furnace
- Vacuum oven
- Karl-Fischer titration apparatus (Mettler Toledo)
- Two rotating disk electrode test station (Pine Instruments) with rotating ring-disk accessories
- 32-channel battery cycler (Arbin)

Wrenn Laboratory (WRENN)

- PTI, Inc. C-71 Time-Resolved Fluorescence Spectrometer (pulsed nitrogen and dye lasers)
- PTI, Inc. A-710 Steady State Fluorescence Spectrometer
- Brookhaven 90Plus Dynamic Light Scattering Apparatus

- Brookhaven Goniometer-based, Static Light Scattering Apparatus
- Perkin-Elmer BUV40XW0 UV-Visible Absorbance Spectrometer
- Zeiss Axioskop2 Fluorescence microscope
- Zeiss Ultraviolet Digital Image Analysis System (contains Orca Camera, Sony 17" monitor, and Axiovision II software)
- Beckman Coulter Allegra64 Centrifuge
- Misonix, Inc. XL2020 Sonicator
- Lipex Biomembranes, Inc. Lipid Extruder (10 mL)

Chemical Engineering Faculty

Cameron F. Abrams, PhD (*University of California, Berkeley*) *Department Head, Chemical and Biological Engineering*. Professor. Molecular simulations in biophysics and materials; HIV drug design and molecular virology; thermoset molecular modeling and design.

Nicolas Alvarez, PhD (*Carnegie Mellon University*). Assistant Professor. Photonic crystal defect chromatography; extensional rheology of polymer/polymer composites; surfactant/polymer transport to fluid and solid interfaces; aqueous lubrication; interfacial instabilities.

Jason Baxter, PhD (*University of California, Santa Barbara*). Professor. Solar cells;- semiconductor nanomaterials and thin films;- ultrafast spectroscopy.

Richard A. Cairncross, PhD (*University of Minnesota*). Associate Professor. Effects of microstructure on transport and properties of polymers; moisture transport and degradation on biodegradation on biodegradable polymers; production of biofuel.

Nily R. Dan, PhD (*University of Minnesota*). Associate Professor. Design of synthetic gene and drug carriers; design of polymeric drug carriers; metal cluster formation in polymeric matrices; colloidal absorption in patterned surfaces.

Aaron Fafarman, PhD (*Stanford University*). Assistant Professor. Photovoltaic energy conversion; solution-based semiconductor synthesis; colloidal nanocrystals; electrical and optical spectroscopies.

Vibha Kalra, PhD (*Cornell University*). Associate Professor. Nanomaterials for energy storage devices; electrospinning of nanofibers; in-situ spectroscopy to understand energy storage mechanisms; molecular dynamics simulations.

Kenneth K.S. Lau, PhD (*Massachusetts Institute of Technology*). Associate Professor. Polymer thin films and devices; solar cells, supercapacitors and batteries; superhydrophobic and superhydrophilic surfaces; surface science and engineering; chemical vapor deposition.

Raj Mutharasan, PhD (*Drexel University*) *Frank A. Fletcher Professor*. Biochemical engineering; cellular metabolism and bioreactors; biosensors.

Giuseppe R. Palmese, PhD (*University of Delaware*). Professor. Reacting polymer systems; nanostructured polymers; radiation processing of materials; composites and interfaces.

Joshua Snyder, PhD (*Johns Hopkins University*). Assistant Professor. Electrocatalysis (energy conversion/storage); heterogeneous catalysis corrosion (dealloying nanoporous metals); interfacial electrochemical phenomena in nanostructured materials; colloidal synthesis.

Masoud Soroush, PhD (*University of Michigan*). Professor. Process systems engineering; polymer engineering.

John H. Speidel, BCHE, MCHE (*University of Delaware; Illinois Institute of Technology*). Teaching Professor. Chemical process safety; process design engineering; integrated case studies.

Maureen Tang, PhD (*University of California, Berkeley*). Assistant Professor. Electrochemistry and electrochemical engineering; lithium-ion and beyond-Li batteries; electrocatalysis; passivation and charge transport.

Michael Walters, PhD (*Drexel University*). Assistant Teaching Professor. Undergraduate laboratory.

Steven P. Wrenn, PhD (*University of Delaware*). Professor. Biological colloids; microbubbles; ultrasound in complex fluids with theranostic applications.

Emeritus Faculty

Charles B. Weinberger, PhD (*University of Michigan*). Professor Emeritus. Suspension rheology; fluid mechanics of multi-phase systems.

Civil Engineering

Major: Civil Engineering

Degree Awarded: Master of Science in Civil Engineering (MSCE) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MSCE); 90.0 (PhD)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 14.0801

Standard Occupational Classification (SOC) code: 17-2015

About the Program

Objectives

The graduate program in civil engineering offers students the opportunity to develop a more fundamental and complete understanding of the principles that govern their field as well as current design methodology. Students are encouraged to be innovative and imaginative in their quest for recognizing, stating, analyzing, and solving engineering problems.

The goal of the Master's program is to develop technical depth of expertise for a professional career in the planning, design, construction, and operation of large-scale infrastructure systems, built facilities, and water resources management. The goal of the PhD program is to develop the abilities to discover, pursue, and apply basic knowledge. PhD recipients are prepared to engage in teaching and research or in an industrial career in the development of new concepts and innovative systems.

General Information

The civil engineering programs comprise the following areas of specialization: building systems, geotechnical engineering, hydraulic and coastal engineering, structural engineering, and water resources.

For more information, visit the Department of Civil, Architectural and Environmental Engineering (<http://www.drexel.edu/cae>) web page.

Admission Requirements

MS admission is based on an academic record demonstrating adequate preparation and potential for successful graduate study. This typically includes a BS from an engineering curriculum accredited by the

Accrediting Board for Engineering and Technology (ABET) or the equivalent from a non-U.S. institution. Submission of results from the Graduate Record Exam (GRE) is required. A grade point average (GPA) of 3.0 is usually required. Graduates who do not have a bachelor's degree in either Civil, Architectural or Environmental Engineering may be required to take preparatory undergraduate courses.

For additional information on how to apply, visit Drexel's Admissions page for Civil Engineering (<http://www.drexel.edu/grad/programs/coe/civil-engineering>).

Master of Science in Civil Engineering

The programs of study at the master's level continue the specialization developed at the senior level of the undergraduate program or newly developed interests. The Master of Science in Civil Engineering program may be elected by graduates of ABET-accredited undergraduate programs in civil engineering and related fields. Admission and prerequisites are determined on the basis of a student's undergraduate transcript.

Most MSCE graduates work as professional engineers in consulting firms, industry, or governmental agencies. A number of our graduates have started consulting and construction firms in the Philadelphia area and have been very successful. Other former students hold prominent positions in public utilities, local government agencies, and industry.

The full-time graduate academic program is closely associated with the research efforts of the faculty. Full-time master's degree candidates are encouraged to base their master's thesis on some aspect of faculty research. The one-to-one relationship between student and faculty member provides an invaluable learning experience. The General (Aptitude) Test of the Graduate Record Examination (GRE) is required for applicants pursuing full-time study.

The master's degree requires a total of 45.0 credits, of which 24.0 credits must be in the major field of interest and 6.0 credits are to fulfill math requirements. The remaining credits are taken as electives in related areas. The choice of core and elective courses is made in consultation with the student's graduate advisor.

Areas of concentration include:

- Structural
- Geotechnical/geoenvironmental/geosynthetics
- Water resources
- Building systems/energy

Dual graduate degrees are possible. Among the more popular programs are combining the MS in Civil Engineering with an MS in Environmental Engineering, or Engineering Management. The required credits must meet all civil engineering program requirements and will be determined on the basis of the student's proposed program of study.

PhD in Civil Engineering

The PhD degree is awarded for original research on a significant civil engineering problem. Graduate students who have completed their MS degrees work closely with individual faculty members (see Faculty Research Interests below). PhD dissertation research is usually supported by a research grant from a government agency or an industrial contract.

The full-time graduate academic program is closely associated with the research efforts of the faculty. The General (Aptitude) Test of the

Graduate Record Examination (GRE) is required for applicants pursuing full-time study.

Doctoral students normally take at least 45.0 credits, including research credits, beyond the master's degree requirements. Full-time residency for one continuous academic year is required for the PhD degree to ensure students the opportunity for intellectual association with other scholars. Many doctoral students take two, three, or four years of full-time graduate study to complete their degrees. Involvement in the teaching activity of the Civil, Architectural and Environmental Engineering Department is required of all PhD applicants.

After approximately one year of study beyond the master's degree, doctoral students take a candidacy examination, consisting of written and oral parts. Each PhD candidate is supervised by a major professor and a doctoral committee chaired by the major professor.

PhD candidates submit a detailed proposal for dissertation research to the doctoral committee. The students then take a proposal examination; successful completion of this examination is required to become a PhD candidate. After approval of the proposal, the committee meets from time to time to review the progress of the research. The dissertation must be submitted to the doctoral committee at least 90 days before the graduation date. The committee schedules and conducts a final oral examination before approval of the dissertation.

Areas of research include:

- Structural
- Geotechnical/geoenvironmental/geosynthetics
- Water resources
- Sustainable engineering
- Building systems/energy

Dual Degree Programs

Civil Engineering students may find it useful to pursue dual MS degrees. Such programs have been pursued in concert with Environmental Engineering/Science, Mechanical Engineering, Information Studies and Engineering Management. A dual degree student must complete the required coursework for each degree. Depending upon the concentration, up to 15.0 credits from another program may count as electives for the MSCE, with the advisor's approval. The student is responsible for obtaining approval of MSCE courses that apply to the second degree.

Bachelor's/Master's Dual Degree Program

Exceptional undergraduate students can also pursue a master of science degree in the same period as the bachelor of science. Many students deepen their knowledge with a Master's degree in Civil Engineering, while others have broadened their knowledge with a Master's degree in related areas such as Environmental Science, Engineering Management, Software Engineering and Information Technology.

For more information about this program, visit the Department's BS/MS Dual Degree Program (<http://www.drexel.edu/cae/academics/bs-environmental-engineering/Accelerated%20and%20Dual%20Degree%20Programs%20CAEE>) web page.

Facilities

Construction Materials Laboratory

This laboratory contains facilities for the study of concrete, asphalt, mortar, soil-cement, and timber materials, and moist cure facilities.

Geosynthetics Laboratory

This laboratory contains a complete suite of physical, mechanical, hydraulic, endurance, and environmental test devices for assessing behavior of geotextiles, geogrids, geonets, geomembranes, and geocomposites.

HVAC and Refrigeration Laboratory

This laboratory contains complete models of heating, ventilation, air conditioning, refrigeration, and pumping system models.

Hydromechanics Laboratory

This laboratory contains a wave channel tilting flume, pipe friction equipment, bench demonstration equipment, and a beach erosion model.

Soil Mechanics and Geoenvironmental Laboratory

This laboratory contains triaxial and direct shear equipment, controlled environmental chambers, consolidation tests, flexwall permeameters, and a test bed.

Structural Testing Laboratory

This laboratory contains universal testing machines with 150,000- and 300,000-pound capacity and test beds with MTS dynamic load equipment.

Civil, Architectural and Environmental Engineering Faculty

Abieyuwa Aghayere, PhD (*University of Alberta*). Professor. Structural design - concrete, steel and wood; structural failure analysis; retrofitting of existing structures; new structural systems and materials; engineering education.

A. Emin Aktan, PhD (*University of Illinois at Urbana-Champaign*) *John Roebling Professor of Infrastructure Studies*. Professor. Structural engineering; health monitoring of large infrastructure systems; infrastructure evaluation; intelligent systems.

Ivan Bartoli, PhD (*University of California, San Diego*). Associate Professor. Non-destructive evaluation and structural health monitoring; dynamic identification, stress wave propagation modeling.

Robert Brehm, PhD (*Drexel University*). Associate Teaching Professor. International infrastructure delivery; response to natural catastrophes; risk assessment and mitigation strategies; project management techniques.

S.C. Jonathan Cheng, PhD (*West Virginia University*). Associate Professor. Soil mechanics; geosynthetics; probabilistic design; landfill containments; engineering education.

Peter DeCarlo, PhD (*University of Colorado*) *Graduate Studies Advisor*. Associate Professor. Outdoor air quality, particulate matter size and composition instrumentation and measurements, source apportionment of ambient particulate matter, climate impacts of particulate matter.

Eugenia Ellis, RA, PhD (*Virginia Polytechnic State University*). Associate Professor. Extended-care facilities design, research on spatial visualization, perception and imagination.

Patricia Gallagher, PhD (*Virginia Polytechnic Institute*). Associate Professor. Soil mechanics; geoenvironmental; ground improvement; sustainability.

Patrick Gurian, PhD (*Carnegie-Mellon University*). Associate Professor. Risk analysis of environmental and infrastructure systems; novel adsorbent materials; environmental standard setting; Bayesian statistical modeling; community outreach and environmental health.

Charles N. Haas, PhD (*University of Illinois-Urbana*) *L. D. Betz Professor and Department Head, Civil, Architectural and Environmental Engineering*. Professor. Control of human exposures to and risk assessment of pathogenic organisms; water and waste treatment; homeland security.

Ahmad Hamid, PhD (*McMaster University*). Professor. Engineered masonry; seismic behavior, design and retrofit of masonry structures; development of new materials and building systems.

Y. Grace Hsuan, PhD (*Imperial College*). Professor. Director, Center for Family Intervention Science, a multidisciplinary research program focused on developing and testing family centered care models across the life span and in a variety of health care settings. Developer of Attachment Based Family Therapy (ABFT) focused on youth with depression, suicide trauma, and youth in the LGBTQ community. Behavioral health integration into primary care

Joseph B. Hughes, PhD (*University of Iowa*) *Dean of the College of Engineering and Distinguished Professor*. Biological processes and applications of nanotechnology in environmental systems.

L. James Lo, PhD (*University of Texas at Austin*). Assistant Professor. Computational Fluid Dynamics (CFD) and airflow simulation; Indoor Environmental Quality; Building control integration with building information management systems.

Roger Marino, PhD (*Drexel University*). Associate Teaching Professor. Fluid mechanics; water resources; engineering education; land development.

Joseph P. Martin, PhD (*Colorado State University*). Professor. Geotechnical and geoenvironmental engineering; hydrology; transportation; waste management.

James E. Mitchell, MArch (*University of Pennsylvania*) *Associate Dean for Undergraduate Affairs*. Professor. Architectural engineering design; building systems; engineering education.

Franco Montalto, PhD (*Cornell University*). Associate Professor. Effects of built infrastructure on societal water needs, ecohydrologic patterns and processes, ecological restoration, green design, water interventions.

Michael Ryan, PhD (*Drexel University*). Assistant Teaching Professor. Microbial Source Tracking (MST); Quantitative Microbial Risk Assessment (QMRA); Dynamic Engineering Systems Modeling; Molecular Microbial Biology; Environmental Statistics; Engineering Economics; Microbiology

Christopher Sales, PhD (*University of California, Berkeley*). Assistant Professor. Environmental microbiology and biotechnology; biodegradation of environmental contaminants; microbial processes for energy and resource recovery from waste.

Yared Shifferaw, PhD (*Johns Hopkins University*). Assistant Professor. Computational and experimental mechanics; structural stability; optimization; health monitoring and hazard mitigation; sustainable structures; emerging materials; thin-walled structures and metallic structures.

Kurt Sjoblom, PhD (*Massachusetts Institute of Technology*). Assistant Teaching Professor. Laboratory testing of geomaterials, geotechnical engineering, foundation engineering.

Sabrina Spatari, PhD (*University of Toronto*). Associate Professor. Research in industrial ecology; development and application of life cycle assessment (LCA) and material flow analysis (MFA) methods for guiding engineering and policy decisions; specific interest in biomass and bioenergy, biofuels, and urban infrastructure.

Robert Swan Associate Teaching Professor. Geotechnical and Geosynthetic Engineering; soil/geosynthetic interaction and performance; laboratory and field geotechnical/geosynthetic testing.

Michael Waring, PhD (*University of Texas-Austin*) Associate Department Head for Undergraduate Programs; Director of Architectural Engineering Program. Associate Professor. Indoor air quality and building sustainability; indoor particulate matter fate and transport; indoor chemistry and particle formation; secondary impacts of control technologies and strategies.

Jin Wen, PhD (*University of Iowa*). Professor. Architectural engineering; Building Energy Efficiency; Intelligent Building; Net-zero Building; and Indoor Air Quality.

Aspasia Zerva, PhD (*University of Illinois*). Professor. Earthquake engineering; mechanics; seismology; structural reliability; system identification; advanced computational computational methods in structural analysis.

Emeritus Faculty

Harry G. Harris, PhD (*Cornell University*). Professor Emeritus. Structural models; dynamics of structures, plates and shells; industrialized building construction.

Joseph V. Mullin, PhD (*Pennsylvania State University*) Associate Department Head. Professor Emeritus. Structural engineering; failure analysis; experimental stress analysis; construction materials; marine structures.

Richard Weggel, PhD (*University of Illinois*) Samuel S. Baxter Professor Emeritus; Civil and Environmental Engineering. Professor Emeritus. Coastal engineering; hydraulics engineering; hydrology.

Richard Woodring, PhD (*University of Illinois*) Dean of Engineering Emeritus. Professor Emeritus. Structural engineering, reinforced concrete.

Computer Engineering

Major: Computer Engineering

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS); 90.0 (PhD)

Co-op Option: Available for full-time on-campus master's-level students

Classification of Instructional Programs (CIP) code: 14.0901

Standard Occupational Classification (SOC) code: 15-1132; 15-1133;

15-1143; 17-2031

About the Program

The computer engineering curriculum is designed to: (1) address the needs of students with a variety of different backgrounds; (2) ensure that graduates will have adequate knowledge and skills in at least one area of specialization; (3) meet the immediate needs of working students as well

as to adequately prepare full-time students for a real-world technological environment; and (4) equip students with tools to grasp and develop new technologies and trends.

The Master of Science in Computer Engineering degree requires a minimum of 45.0 approved credits chosen in accordance with a plan of study arranged in consultation with the student's advisor and the departmental graduate advisor. Up to but not exceeding 9.0 research/thesis credits may be taken by students who choose to write a master's thesis. Students who elect a non-thesis option are also encouraged to engage in research, by registering for supervised research credits (not to exceed 9.0 credits).

A graduate co-op is available for this program. For more information, visit the Steinbright Career Development Center's website (<http://www.drexel.edu/scdc/co-op/graduate>).

For more information, visit the Department of Electrical and Computer Engineering (<http://www.ece.drexel.edu>) web site.

Admission Requirements

Applicants should preferably have an undergraduate degree equivalent to a US bachelor's degree in computer engineering, computer science, or electrical engineering. Students holding degrees in other engineering and science disciplines with appropriate coursework or training will also be considered.

Appropriate coursework includes experience with all of the following: Software (advanced programming and operating systems); Computer Architecture (digital systems design, computer organization and architecture); Algorithms and Data Structures; Computer Networks. Students must have a minimum 3.0 GPA (on a 4.0 scale) for the last two years of undergraduate studies, as well as for any subsequent graduate-level work.

The GRE General Test is required of applicants to full-time MS and PhD programs. Students whose native language is not English and who do not hold a degree from a US institution must take the Test of English as a Foreign Language (TOEFL).

For additional information on how to apply, visit Drexel's Admissions page for Computer Engineering (<http://www.drexel.edu/grad/programs/coe/computer-engineering>).

Degree Requirements (MS)

The Master of Science in Computer Engineering curriculum encompasses 45.0 approved credit hours, chosen in accordance with the following requirements and a plan of study arranged with the departmental graduate advisor in consultation with the student's research advisor, if applicable. Before the end of the first quarter in the Department of Electrical and Computer Engineering, for a full-time student, or by the end of the first year for a part-time student, said plan of study must be filed and approved with the departmental graduate advisor.

A total of at least 30.0 credit hours must be taken from among the graduate course offerings of the Department of Electrical and Computer Engineering. These credits must be taken at Drexel University. No transfer credit may be used to fulfill these requirements, regardless of content equivalency.

The remaining courses needed to reach the minimum credit hour requirement for the degree program are considered elective courses. Elective courses can be chosen from among the graduate course

offerings of the Department of Electrical and Computer Engineering; other departments within the College of Engineering; the School of Biomedical Science, Engineering and Health Systems; the Department of Mathematics; the Department of Physics; the Department of Chemistry, the Department of Biology, and the Department of Computer Science. In order to have courses outside of these departments and schools count towards degree completion, they must be approved by the departmental graduate advisors prior to registration for said courses.

Please note that ECEC 500 (Fundamentals of Computer Hardware) and ECEC 600 (Fundamentals of Computer Networks) do **not** count toward the credit requirements to complete the MS in Electrical Engineering degree program.

Computer Engineering (ECEC) Courses	21.0
General Electrical and Computer Engineering (ECEC, ECEE, ECEP, ECES, ECET) Courses	9.0
Elective Courses	15.0
Total Credits	45.0

Options for Degree Fulfillment

Although not required, students are encouraged to complete a Master's Thesis as part of the MS studies. Those students who choose the thesis option may count up to 9.0 research/thesis credits as part of their required credit hour requirements.

Students may choose to participate in the Graduate Co-Op Program working on curriculum related projects. Graduate Co-op enables graduate students to alternate class terms with a six-month period of hands-on experience, gaining access to employers in their chosen industries. Whether co-op takes students throughout the United States or abroad, they are expanding their professional networks, enhancing their resumes, and bring that experience back to the classroom and their peers.

For more information on curricular requirements, visit the Department of Electrical and Computer Engineering (<http://drexel.edu/ece>)' (<http://www.ece.drexel.edu>)s web site.

PhD in Electrical Engineering

General Requirements

The following general requirements must be satisfied in order to complete the PhD in Electrical Engineering:

- 90.0 credit hours total
- candidacy examination
- research proposal
- dissertation defense

Students entering with a master's degree in electrical or computer engineering or a related field will be considered a post-masters PhD student and will only be required to complete a total of 45.0 credit hours, in accordance with University policy.

Curriculum

Appropriate coursework is chosen in consultation with the student's research advisor. A plan of study must be developed by the student to encompass the total number of required credit hours. Both the departmental graduate advisor and the student's research advisor must approve this plan.

Candidacy Examination

The candidacy examination explores the depth of understanding of the student in his/her specialty area. The student is expected to be familiar with, and be able to use, the contemporary tools and techniques of the field and to demonstrate familiarity with the principal results and key findings.

The student, in consultation with his/her research advisor, will declare a principal technical area for the examination. The examination includes the following three parts:

- A self-study of three papers from the archival literature in the student's stated technical area, chosen by the committee in consultation with the student.
- A written report (15 pages or less) on the papers, describing their objectives, key questions and hypotheses, methodology, main results and conclusions. Moreover, the student must show in an appendix independent work he/she has done on at least one of the papers – such as providing a full derivation of a result or showing meaningful examples, simulations or applications.
- An oral examination which takes the following format:
 - A short description of the student's principal area of interest (5 minutes, by student).
 - A review of the self-study papers and report appendix (25-30 minutes, by students).
 - Questions and answers on the report, the appendix and directly related background (40-100 minutes, student and committee).

In most cases, the work produced during the candidacy examination will be a principal reference for the student's PhD dissertation; however, this is not a requirement.

Research Proposal

Each student, after having attained the status of PhD Candidate, must present a research proposal to a committee of faculty and industry members, chosen with his/her research advisor, who are knowledgeable in the specific area of research. This proposal should outline the specific intended subject of study; i.e., it should present a problem statement, pertinent background, methods of study to be employed, expected difficulties and uncertainties and the anticipated form, substance and significance of the results.

The purpose of this presentation is to verify suitability of the dissertation topic and the candidate's approach, and to obtain the advice and guidance of oversight of mature, experienced investigators. It is not to be construed as an examination, though approval by the committee is required before extensive work is undertaken. The thesis proposal presentation must be open to all; announcements regarding the proposal presentation must be made in advance.

The thesis advisory committee will have the sole responsibility of making any recommendations regarding the research proposal. It is strongly recommended that the proposal presentation be given as soon as possible after the successful completion of the candidacy examination.

Dissertation Defense

Dissertation Defense procedures are described on the Graduate College's webpage (<http://drexel.edu/graduatecollege/academics/thesis-and->

dissertation). The student must be a PhD candidate for at least one year before he/she can defend his/her doctoral thesis.

Dual Degree

The ECE Department offers outstanding students the opportunity to receive two diplomas (BS and MS) at the same time. The program requires five (5) years to complete. Participants, who are chosen from the best undergraduates students, work with a faculty member on a research project and follow a study plan that includes selected graduate classes. This program prepares individuals for careers in research and development; many of its past graduates continued their studies toward a PhD.

For more information on eligibility, academic requirements, and tuition policy visit the Engineering Combined BS/MS (<http://www.ece.drexel.edu/undergrad/bsms.html>) page.

Facilities

Drexel University and the Electrical and Computer Engineering Department are nationally recognized for a strong history of developing innovative research. Research programs in the ECE Department prepare students for careers in research and development, and aim to endow graduates with the ability to identify, analyze, and address new technical and scientific challenges. The ECE Department is well equipped with state-of-the-art facilities in each of the following ECE Research laboratories:

Research Laboratories at the ECE Department

Adaptive Signal Processing and Information Theory Research Group

The Adaptive Signal Processing and Information Theory Research Group (<http://www.ece.drexel.edu/walsh/aspitrg/home.html>) conducts research in the area of signal processing and information theory. Our main interests are belief/expectation propagation, turbo decoding and composite adaptive system theory. We are currently doing projects on the following topics:

- i) Delay mitigating codes for network coded systems,
- ii) Distributed estimation in sensor networks via expectation propagation,
- iii) Turbo speaker identification,
- iv) Performance and convergence of expectation propagation,
- v) Investigating bounds for SINR performance of autocorrelation based channel shorteners.

Applied Networking Research Lab

Applied Networking Research Lab (ANRL) projects focus on modeling and simulation as well as experimentation in wired, wireless and sensor networks. ANRL is the home of MuTANT, a Multi-Protocol Label Switched Traffic Engineering and Analysis Testbed composed of 10 high-end Cisco routers and several PC-routers, also used to study other protocols in data networks as well as automated network configuration and management. The lab also houses a sensor network testbed.

Bioimage Laboratory (<http://bioimage.coe.drexel.edu/info>)

Uses computer gaming hardware for enhanced and affordable 3-D visualization, along with techniques from information theory and machine learning to combine the exquisite capabilities of the human visual system with computational sensing techniques for analyzing vast quantities of image sequence data.

Data Fusion Laboratory

The Data Fusion Laboratory investigates problems in multisensory detection and estimation, with applications in robotics, digital communications, radar, and target tracking. Among the projects in progress: computationally efficient parallel distributed detection architectures, data fusion for robot navigation, modulation recognition and RF scene analysis in time-varying environments, pattern recognition in biological data sequences and large arrays, and hardware realizations of data fusion architectures for target detection and target tracking.

Drexel Network Modeling Laboratory

The Drexel Network Modeling Laboratory investigates problems in the mathematical modeling of communication networks, with specific focus on wireless ad hoc networks, wireless sensor networks, and supporting guaranteed delivery service models on best effort and multipath routed networks. Typical methodologies employed in our research include mathematical modeling, computer simulation, and performance optimization, often with the end goal of obtaining meaningful insights into network design principles and fundamental performance tradeoffs.

Drexel University Nuclear Engineering Education Laboratory

The field of nuclear engineering encompasses a wide spectrum of occupations, including nuclear reactor design, medical imaging, homeland security, and oil exploration. The Drexel University Nuclear Engineering Education Laboratory (DUNEEL) provides fundamental hands on understanding for power plant design and radiation detection and analysis. Software based study for power plant design, as well as physical laboratory equipment for radiation detection, strengthen the underlying concepts used in nuclear engineering such that the student will comprehend and appreciate the basic concepts and terminology used in various nuclear engineering professions. Additionally, students use the laboratory to develop methods for delivering remote, live time radiation detection and analysis. The goal of DUNEEL is to prepare students for potential employment in the nuclear engineering arena.

Drexel VLSI Laboratory

The Drexel VLSI Laboratory (http://ece.drexel.edu/faculty/taskin/wiki/vlsilab/index.php/Main_Page) investigates problems in the design, analysis, optimization and manufacturing of high performance (low power, high throughput) integrated circuits in contemporary CMOS and emerging technologies. Suited with industrial design tools for integrated circuits, simulation tools and measurement beds, the VLSI group is involved with digital and mixed-signal circuit design to verify the functionality of the discovered novel circuit and physical design principles. The Drexel VLSI laboratory develops design methodologies and automation tools in these areas, particularly in novel clocking techniques, featuring resonant clocking, and interconnects, featuring wireless interconnects.

Drexel Wireless Systems Laboratory

The Drexel Wireless Systems Laboratory (DWSL) contains an extensive suite of equipment for constructing, debugging, and testing prototype wireless communications systems. Major equipment within DWSL includes:

- three software defined radio network testbeds (HYDRA, USRP, and WARP) for rapidly prototyping radio, optical and ultrasonic communications systems,
- a TDK RF anechoic chamber and EMSCAN desktop antenna pattern measurement system,

- a materials printer and printed circuit board milling machine for fabricating conformal antennas and
- wireless protocol conformance testing equipment from Aeroflex.

The lab is also equipped with network analyzers, high speed signal generators, oscilloscopes, and spectrum analyzers as well as several Zigbee development platforms for rapidly prototyping sensor networks.

DWSL personnel also collaborate to create wearable, fabric based transceivers through collaboration with the Shima Seiki Haute Laboratory in the Drexel ExCITe Center. The knitting equipment at Drexel includes sixteen SDS-ONE APEX3 workstations and four state-of-the-art knitting machines. The workstations accurately simulate fabric construction and provide researchers and designers the opportunity to program, create and simulate textile prototypes, import CAD specifications of final products, and produce made-to-measure or mass-produced pieces on Shima Seiki knitting machines. For testing smart textiles for biomedical, DWSL personnel also have collaborators in the Center for Interdisciplinary Clinical Simulation and Practice (CICSP) in the Drexel College of Medicine which provides access to medical mannequin simulators.

Ecological and Evolutionary Signal-processing and Informatics Laboratory

The Ecological and Evolutionary Signal-processing and Informatics Laboratory (EESI) (<http://www.ece.drexel.edu/gailr/EESI>) seeks to solve problems in high-throughput genomics and engineer better solutions for biochemical applications. The lab's primary thrust is to enhance the use of high-throughput DNA sequencing technologies with pattern recognition and signal processing techniques. Applications include assessing the organism content of an environmental sample, recognizing/classifying potential and functional genes, inferring environmental factors and inter-species relationships, and inferring microbial evolutionary relationships from short-read DNA/RNA fragments. The lab also investigates higher-level biological systems such as modeling and controlling chemotaxis, the movement of cells.

Electric Power Engineering Center

This newly established facility makes possible state-of-the-art research in a wide variety of areas, ranging from detailed theoretical model study to experimental investigation in its high voltage laboratories. The mission is to advance and apply scientific and engineering knowledge associated with the generation, transmission, distribution, use, and conservation of electric power. In pursuing these goals, this center works with electric utilities, state and federal agencies, private industries, nonprofit organizations and other universities on a wide spectrum of projects. Research efforts, both theoretical and experimental, focus on the solution of those problems currently faced by the electric power industry. Advanced concepts for electric power generation are also under investigation to ensure that electric power needs will be met at the present and in the future.

Electronic Design Automation Facility

Industrial-grade electronic design automation software suite and integrated design environment for digital, analog and mixed-signal systems development. Field Programmable Gate Array (FPGA) development hardware. Most up-to-date FPGA/embedded system development hardware kits. Printed circuit board production facility. Also see Drexel VLSI Laboratory.

Microwave-Photonics Device Laboratories

The laboratory is equipped with test and measurement equipment for high-speed analog and digital electronics and fiber optic systems. The test equipment includes network analyzers from Agilent (100kHz- 1.3 GHz and 45 MHz-40 GHz), and Anritsu (45 MHz-6 GHz); spectrum analyzers from Tektronix, HP, and Agilent with measurement capability of DC to 40 GHz and up to 90 GHz using external mixers; signal generators and communication channel modulators from HP, Rhode-Schwartz, Systron Donner, and Agilent; microwave power meter and sensor heads, assortment of passive and active microwave components up to 40 GHz ; data pattern generator and BER tester up to 3Gb/s; optical spectrum analyzer from Anritsu and power meters from HP; single and multimode fiber optic based optical transmitter and receiver boards covering ITU channels at data rates up to 10Gb/s; passive optical components such as isolator, filter, couplers, optical connectors and fusion splicer; LPKF milling machine for fabrication of printed circuit boards; wire-bonding and Cascade probe stations; Intercontinental test fixtures for testing of MMIC circuits and solid-state transistors; state-of-the-art microwave and electromagnetic CAD packages such as Agilent ADS, ANSYS HFSS, and COMSOL multi-physics module.

Music and Entertainment Technology Laboratory

The Music and Entertainment Technology Laboratory (MET-lab) is devoted to research in digital media technologies that will shape the future of entertainment, especially in the areas of sound and music. We employ digital signal processing and machine learning to pursue novel applications in music information retrieval, music production and processing technology, and new music interfaces. The MET-lab is also heavily involved in outreach programs for K-12 students and hosts the Summer Music Technology program, a one-week learning experience for high school students. Lab facilities include a sound isolation booth for audio and music recording, a digital audio workstation running ProTools, two large multi-touch display interfaces of our own design, and a small computing cluster for distributed processing.

NanoPhotonics+ Lab

Our research is primarily in the area of nanophotonics with a focus on the nanoscale interaction of light with matter. Interests include: liquid crystal/polymer composites for gratings, lenses and HOEs; liquid crystal interactions with surfaces and in confined nanospaces; alternative energy generation through novel photon interactions; ink-jet printed conducting materials for RF and photonic applications; and the creation and development of smart textiles technologies including soft interconnects, sensors, and wireless implementations.

Opto-Electro-Mechanical Laboratory

This lab concentrates on the system integration on optics, electronics, and mechanical components and systems, for applications in imaging, communication, and biomedical research. Research areas include: Programmable Imaging with Optical Micro-electrical-mechanical systems (MEMS), in which microscopic mirrors are used to image light into a single photodetector; Pre-Cancerous Detection using White Light Spectroscopy, which performs a cellular size analysis of nuclei in tissue; Free-space Optical Communication using Space Time Coding, which consists of diffused light for computer-to-computer communications, and also tiny lasers and detectors for chip-to-chip communication; Magnetic Particle Locomotion, which showed that particles could swim in a uniform field; and Transparent Antennas using Polymer, which enables antennas to be printed through an ink-jet printer.

Plasma and Magnetics Laboratory

Research is focused on applications of electrical and magnetic technologies to biology and medicine. This includes the subjects of non-thermal atmospheric pressure plasma for medicine, magnetic manipulation of particles for drug delivery and bio-separation, development of miniature NMR sensors for cellular imaging and carbon nanotube cellular probes.

Power Electronics Research Laboratory

The Power Electronics Research Laboratory (PERL) is involved in circuit and design simulation, device modeling and simulation, and experimental testing and fabrication of power electronic circuits. The research and development activities include electrical terminations, power quality, solar photovoltaic systems, GTO modeling, protection and relay coordination, and solid-state circuit breakers. The analysis tools include EMPT, SPICE, and others, which have been modified to incorporate models of such controllable solid-state switches as SCRs, GTOs, and MOSFETs. These programs have a wide variety and range of modeling capabilities used to model electromagnetics and electromechanical transients ranging from microseconds to seconds in duration. The PERL is a fully equipped laboratory with 42 kVA AC and 70 kVA DC power sources and data acquisition systems, which have the ability to display and store data for detailed analysis. Some of the equipment available is a distribution and HV transformer and three phase rectifiers for power sources and digital oscilloscopes for data measuring and experimental analysis. Some of the recent studies performed by the PERL include static VAR compensators, power quality of motor controllers, solid-state circuit breakers, and power device modeling which have been supported by PECO, GE, Gould, and EPRI.

Computer Engineering Faculty

Juadelice Cavalcante de Oliveira, PhD (*Georgia Institute of Technology*). Associate Professor. Software-defined networking; social and economic networks; network security; design and analysis of protocols, algorithms and architectures in computer networks, particularly solutions for the Internet of Things

Tom Chmielewski, PhD (*Drexel University*). Teaching Professor. Modeling and simulation of electro-mechanical systems; optimal, adaptive and non-linear control; DC motor control; system identification; kalman filters (smoothing algorithms, tracking); image processing; robot design; biometric technology and design of embedded systems for control applications utilizing MATLAB and SIMULINK

Fernand Cohen, PhD (*Brown University*). Professor. Surface modeling; tissue characterization and modeling; face modeling; recognition and tracking.

Andrew Cohen, PhD (*Rensselaer Polytechnic Institute*). Associate Professor. Image processing; multi-target tracking; statistical pattern recognition and machine learning; algorithmic information theory; 5-D visualization

Kapil Dandekar, PhD (*University of Texas-Austin*) Director of the Drexel Wireless Systems Laboratory (DWSL); Associate Dean of Research, College of Engineering. Professor. Cellular/mobile communications and wireless LAN; smart antenna/MIMO for wireless communications; applied computational electromagnetics; microwave antenna and receiver development; free space optical communication; ultrasonic communication; sensor networks for homeland security; ultrawideband communication.

Afshin Daryoush, ScD (*Drexel University*). Professor. Digital and microwave photonics; nonlinear microwave circuits; RFIC; medical imaging.

Anup Das, PhD (*National University of Singapore*). Assistant Professor. Design of algorithms and architecture for neuromorphic computing; machine learning particularly unsupervised learning using spiking neural networks; in-memory computing using non-volatile memories

Bruce A. Eisenstein, PhD (*University of Pennsylvania*) Vice Dean, College of Engineering; Arthur J. Rowland Professor. Professor. Pattern recognition; estimation; decision theory.

Adam K. Fontecchio, PhD (*Brown University*) Director, Center for the Advancement of STEM Teaching and Learning Excellence (CASTLE). Professor. Electro-optics; remote sensing; active optical elements; liquid crystal devices.

Gary Friedman, PhD (*University of Maryland-College Park*) Associate Department Head for Graduate Affairs. Professor. Biological and biomedical applications of nanoscale magnetic systems.

Allon Guez, PhD (*University of Florida*). Professor. Intelligent control systems; robotics, biomedical, automation and manufacturing; business systems engineering.

Peter R. Herczfeld, PhD (*University of Minnesota*) Lester A. Kraus Professor/Director, Center for Microwave/Lightwave Engineering. Professor. Lightwave technology; microwaves; millimeter waves; fiberoptic and integrated optic devices.

Leonid Hrebien, PhD (*Drexel University*). Professor. Tissue excitability; acceleration effects on physiology; bioinformatics.

Nagarajan Kandasamy, PhD (*University of Michigan*) Associate Department Head for Undergraduate Affairs. Professor. Embedded systems, self-managing systems, reliable and fault-tolerant computing, distributed systems, computer architecture, and testing and verification of digital systems.

Youngmoo Kim, PhD (*MIT*). Professor. Audio and music signal processing, voice analysis and synthesis, music information retrieval, machine learning.

Fei Lu, PhD (*University of Michigan-Ann Arbor*). Assistant Professor. Power electronics.

Karen Miu, PhD (*Cornell University*). Professor. Power systems; distribution networks; distribution automation; optimization; system analysis.

Bahram Nabet, PhD (*University of Washington*) Associate Dean for Special Projects, College of Engineering; Electrical and Computer Engineering. Professor. Optoelectronics; fabrication and modeling; fiber optic devices; nanoelectronics; nanowires.

Prawat Nagvajara, Ph.D. (*Boston University*). Associate Professor. System on a chip; embedded systems; power grid computation; testing of computer hardware; fault-tolerant computing; VLSI systems; error control coding.

Dagmar Niebur, PhD (*Swiss Federal Institute of Technology*). Associate Professor. Intelligent systems; dynamical systems; power system monitoring and control.

Christopher Peters, PhD (*University of Michigan-Ann Arbor*). Teaching Professor. Nuclear reactor design; ionizing radiation detection; nuclear forensics; power plant reliability and risk analysis; naval/marine power and propulsion; directed energy/high power microwaves; nonstationary signal processing; radar; electronic survivability/susceptibility to harsh environments; electronic warfare

Gail L. Rosen, PhD (*Georgia Institute of Technology*). Associate Professor. Signal processing, signal processing for biological analysis and modeling, bio-inspired designs, source localization and tracking.

Ionnis Savidis, PhD (*University of Rochester*). Assistant Professor. Analysis, modeling, and design methodologies for high performance digital and mixed-signal integrated circuits; Emerging integrated circuit technologies; Electrical and thermal modeling and characterization, signal and power integrity, and power and clock delivery for 3-D IC technologies

Kevin J. Scoles, PhD (*Dartmouth College*). Associate Professor. Microelectronics; electric vehicles; solar energy; biomedical electronics.

Harish Sethu, PhD (*Lehigh University*). Associate Professor. Protocols, architectures and algorithms in computer networks; computer security; mobile ad hoc networks; large-scale complex adaptive networks and systems.

James Shackleford, PhD (*Drexel University*). Assistant Professor. Medical image processing, high performance computing, embedded systems, computer vision, machine learning

P. Mohana Shankar, PhD (*Indian Institute of Technology*) *Allen Rothwarf Professor of Electrical and Computer Engineering*. Professor. Wireless communications; biomedical ultrasonics; fiberoptic bio-sensors.

Matthew Stamm, PhD (*University of Maryland-College Park*). Assistant Professor. Information Security; multimedia forensics and anti-forensics; information verification; adversarial dynamics; signal processing

Baris Taskin, PhD (*University of Pittsburgh*). Professor. Electronic Design Automation (EDA) of VLSI Circuits; high-performance circuits; resonant clocking; integrated circuit (IC) physical design; nanoarchitectures; and wireless IC interconnects

John Walsh, PhD (*Cornell University*). Associate Professor. Bounding the region of entropic vectors and its implications for the limits of communication networks, big data distributed storage systems, and graphical model based machine learning; efficient computation and analysis of rate regions for network coding and distributed storage: code construction, polyhedral computation, enumeration, hierarchy, and symmetry

Steven Weber, PhD (*University of Texas-Austin*) *Interim Department Head*. Professor. Mathematical modeling of computer and communication networks, specifically streaming multimedia and ad hoc networks.

Jaudelice Cavalcante de Oliveira, PhD (*Georgia Institute of Technology*). Associate Professor. Software-defined networking; social and economic networks; network security; design and analysis of protocols, algorithms and architectures in computer networks, particularly solutions for the Internet of Things

Construction Management

Major: Construction Management

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 52.2001

Standard Occupational Classification (SOC) code: 11-9021

About the Program

The Master of Science in Construction Management program gives professionals the opportunity to develop the multidisciplinary skills required of effective construction managers. The program focuses on training professionals to meet the challenge of increasing owner demands, tighter project delivery times and increasing regulation. The program provides the leadership skills professionals need to navigate the many daily challenges construction organizations face in successfully managing construction operations.

Three concentrations are available: construction project management, real estate, and sustainability and green construction.

Program Goals

The program is designed to increase the students' breadth and depth of knowledge in the principles and practices of construction management. The program serves as an excellent platform to develop senior management for the region's construction industry.

Graduates of the Master of Science in Construction Management program will:

- exhibit strong technical and managerial skills
- apply scientific methodologies to problem solving
- think critically
- exercise creativity and inject innovation into the process
- operate at the highest level of ethical practice
- employ principles of transformational leadership

Concentrations

Three concentrations are available:

Construction Project Management

This concentration provides the knowledge and skills required to successfully manage complex construction projects. Topics include the hard skills of project management, such as estimating and budgeting, time management, and planning. Other topics include managerial and legal aspects of construction contract administration, international construction practices, strategic planning, quality management, and productivity analysis.

Real Estate

In this concentration students explore the knowledge and skills required to create, maintain, and build environments for living, working and entertainment purposes. Relevant issues include project finance, real estate as investments, design and construction, operations, development law, environmental remediation, public policy, market analysis, and architecture.

Sustainability and Green Construction

Sustainable development means integrating the decision-making process across the project team, so that every decision is made with an eye to the greatest long-term benefits. Currently, in the Leadership in Energy and Environmental Design (LEED) green building rating system, the construction process represents a significant portion of the effort required

to achieve high performance building programs. This concentration is intended to explore these concepts in detail.

For additional information, view the College of Engineering's Construction Management (<http://drexel.edu/engineering/areas-of-study/construction-management>) web page.

Admissions Requirements

Admission to the program requires:

- A bachelor's degree in construction management or engineering, or a baccalaureate business or non-technical degree.
- A completed application
- Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended. Potential students must supply transcripts regardless of the number of credits earned or the type of school attended. If a potential student does not list all post-secondary institutions on his or her application, and these are listed on transcripts received from other institutions, processing of the application will be delayed until the remaining transcripts have been submitted.
- GPA of 3.0 or higher
- Two letters of recommendation (professional or academic)
- Up-to-date resume
- 500 word essay on why the applicant wishes to pursue graduate studies in this program
- International Students must submit a TOEFL score indicating a minimum of 600 (paper exam) or 250 (CBT exam). For more information regarding international applicant requirements, view the International Students Admissions Information (<http://drexel.edu/grad/resources/international>) page.

Visit the Graduate Admissions (<http://www.drexel.edu/grad/programs/coe/construction-management>) website for more information about requirements and deadlines, as well as instructions for applying online.

Degree Requirements

The Master of Science in Construction Management curriculum includes a core of 5 required courses (15.0 credits), a concentration (24.0 credits), and 6.0 credits of culminating experience. The culminating experience includes a capstone project in construction management.

Core Foundation Courses

CMGT 501	Leadership in Construction	3.0
CMGT 505	Construction Accounting and Financial Management	3.0
CMGT 510	Construction Control Techniques	3.0
CMGT 512	Cost Estimating and Bidding Strategies	3.0
CMGT 515	Risk Management in Construction	3.0

Concentrations 15.0-24.0

Students pursue a concentration in one of the following areas:

Construction Management Project Management Concentration

CMGT 525	Applied Construction Project Management
CMGT 528	Construction Contract Administration
CMGT 530	Equipment Applications and Economy
CMGT 532	International Construction Practices
CMGT 538	Strategic Management in Construction
CMGT 540	Schedule Impact Analysis
CMGT 548	Quality Management and Construction Performance
CMGT 550	Productivity Analysis and Improvement

Real Estate Concentration

Select eight of the following:

CMGT 535	Community Impact Analysis
REAL 568	Real Estate Development
REAL 571	Advanced Real Estate Investment & Analysis
REAL 572	Advanced Market Research & Analysis
REAL 573	Sales & Marketing of Real Estate
REAL 574	Real Estate Economics in Urban Markets
REAL 575	Real Estate Finance
REAL 576	Real Estate Valuation & Analysis
REAL 577	Legal Issues in Real Estate Development

Sustainability and Green Construction Concentration

CMGT 535	Community Impact Analysis
CMGT 545	Sustainable Principles & Practices
CMGT 546	Sustainable Technologies
CMGT 547	LEED Concepts
CMGT 558	Community Sustainability

Culminating Experience 6.0

CMGT 696	Capstone Project in Construction Management I
CMGT 697	Capstone Project in Construction Management II

Total Credits 45.0

Construction Management Faculty

Robert Beard, PhD (*Georgia Institute of Technology*). Associate Clinical Professor. Project and Program Management; Entrepreneurship in design and construction; Integrated project delivery systems; History of engineering and construction; Sustainable design and construction.

Douglas Carney, MBA, AIA (*Eastern University*). Clinical Professor. Architecture; Contract management; Master planning; Site analysis; Feasibility and zoning issues; Space needs and program development; Code analysis and compliance studies; project scheduling.

Charles Cook, PhD (*New York University*). Assistant Clinical Professor. Construction management; project management; leadership and teambuilding; oral and written communication.

Christine M. Fiori, PhD (*Drexel University*) *Program Director*. Clinical Professor. Improving the delivery of safety education in construction curriculum; Ancient construction techniques; Design and construction in developing countries; Leadership in construction; Workforce development

Kenneth S. Sands, PhD (*Virginia Tech*). Associate Clinical Professor. Workforce development and lifelong learning; ethics and construction education; transformative safety leadership for construction education; sustainable facilities and infrastructure.

Richard Sievert, PhD (*Northwestern University*). Associate Clinical Professor. Project management and construction management; value engineering; cost reduction and waste minimization; facilities planning and management; marketing and selling professional services; quality management, engineering and construction business administration.

Cybersecurity

Major: Cybersecurity

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: Available for full-time on-campus master's-level students

Classification of Instructional Programs (CIP) code: 11.1003

Standard Occupational Classification (SOC) code: 15-1122

About the Program

As a greater percentage of people worldwide use computers, there is a marked increase in cybersecurity concerns. Motivated through discussions with the National Security Agency (NSA), Drexel University's MS in Cybersecurity program prepares students with both academic and practical training to be competitive in today's rapidly changing technical landscape. The program provides deeply technical and specialized training and enables graduates to understand, adapt, and develop new techniques to confront emerging threats in cybersecurity.

Administered by the Electrical & (<http://www.drexel.edu/ece>) Computer Engineering Department in the College of Engineering, this program is interdisciplinary in nature and includes courses from Drexel University's College of Computing & Informatics. Topics covered include computer networking, probability concepts, techniques for analyzing algorithms, dependable software design, reverse software engineering, intrusion detection, ethics, privacy, confidentiality, authenticity, and social networking.

The program offers multidisciplinary "research rotations" as an independent study component of the degree program and a graduate co-op option for credit.

Additional Information

For additional information about this program, please visit the ECE Department's Cybersecurity degree page (<http://www.drexel.edu/ece/academics/grad/ms/cybr>).

Degree Requirements

The Master of Science in Cybersecurity program encompasses a minimum of 45.0 approved credit hours, chosen in accordance with the requirements listed below. A plan of study should be arranged with the departmental graduate advisors, and in consultation with the student's research advisor, if applicable.

The required core courses provide students with a theoretical foundation in the field of cybersecurity and a framework to guide the application of knowledge gained in technical electives to the practice of cybersecurity.

Core Courses

CST 510	Ethics, Privacy and Legal Issues	3.0
INFO 517	Principles of Cybersecurity	3.0
INFO 725	Information Policy	3.0
Networking Foundation		3.0
CS 544	Computer Networks	
	or ECEC 63 Principles of Computer Networking	
Mathematical Foundations		3.0
CS 521	Data Structures and Algorithms I	
	or ECES 52 Probability & Random Variables	
Cybersecurity Technical Electives *		18.0
General Electives **		12.0
Total Credits		45.0

* Cybersecurity technical electives are used to build a deep understanding of one or more areas of technical expertise within the field of cybersecurity. All students are required to take a minimum of 18.0 credits of cybersecurity technical electives from the graduate course offerings of the Department of Computer Science, the Department of Computing and Security Technology, and the Department of Electrical and Computer Engineering [ECE]. A list of pre-approved technical electives can be found on the ECE Department website.

** General electives are the remaining courses needed to reach the minimum credit hour requirement for the degree program. General electives can be chosen from among the graduate course offerings of the College of Computing & Informatics; the Department of Computer Science; the Department of Computing and Security Technology; the Department of Electrical and Computer Engineering, and the Department of Mathematics. In order to have courses outside of these departments and schools count towards degree completion, they must be approved by the departmental graduate advisors prior to registration for said courses.

Graduate Co-op/Career Opportunities

Graduate Co-Op

Students may choose to participate in the Graduate Co-op Program, working on curriculum related projects. Graduate Co-op enables graduate students to alternate class terms with a six-month period of hands-on experience, gaining access to employers in their chosen industries. Whether co-op takes students throughout the United States or abroad, they are expanding their professional networks, enhancing their resumes, and bringing that experience back to the classroom and their peers.

Further information on the Graduate Co-Op Program (<http://www.drexel.edu/scdc/coop/graduate>) is available at the Drexel Steinbright Career Development Center. (<http://www.drexel.edu/scdc>)

Career Opportunities

The program was deliberately designed to address needs of the Federal Cyber Service, the Department of Defense, and the National Security Agency. The program strengthens ties between these agencies and Drexel University and will provide professional opportunities for students pursuing this degree.

Research

Students in the MS in Cybersecurity program have opportunities to perform research-oriented coursework for academic credit. Research-oriented coursework can be divided into three categories: research rotations, master's thesis, and independent research.

A total of 9.0 credits of research-oriented coursework may be counted towards the minimum credit hour requirement of the degree program. These credits are considered general electives.

Facilities

Drexel University and the Electrical and Computer Engineering Department are nationally recognized for a strong history of developing innovative research. Research programs in the ECE Department prepare students for careers in research and development, and aim to endow graduates with the ability to identify, analyze, and address new

technical and scientific challenges. The ECE Department is well equipped with state-of-the-art facilities in each of the following ECE Research laboratories:

Research Laboratories at the ECE Department

Adaptive Signal Processing and Information Theory Research Group

The Adaptive Signal Processing and Information Theory Research Group (<http://www.ece.drexel.edu/walsh/aspitrg/home.html>) conducts research in the area of signal processing and information theory. Our main interests are belief/expectation propagation, turbo decoding and composite adaptive system theory. We are currently doing projects on the following topics:

- i) Delay mitigating codes for network coded systems,
- ii) Distributed estimation in sensor networks via expectation propagation,
- iii) Turbo speaker identification,
- iv) Performance and convergence of expectation propagation,
- v) Investigating bounds for SINR performance of autocorrelation based channel shorteners.

Applied Networking Research Lab

Applied Networking Research Lab (ANRL) projects focus on modeling and simulation as well as experimentation in wired, wireless and sensor networks. ANRL is the home of MuTANT, a Multi-Protocol Label Switched Traffic Engineering and Analysis Testbed composed of 10 high-end Cisco routers and several PC-routers, also used to study other protocols in data networks as well as automated network configuration and management. The lab also houses a sensor network testbed.

Bioimage Laboratory

Uses computer gaming hardware for enhanced and affordable 3-D visualization, along with techniques from information theory and machine learning to combine the exquisite capabilities of the human visual system with computational sensing techniques for analyzing vast quantities of image sequence data.

Data Fusion Laboratory

The Data Fusion Laboratory investigates problems in multisensory detection and estimation, with applications in robotics, digital communications, radar, and target tracking. Among the projects in progress: computationally efficient parallel distributed detection architectures, data fusion for robot navigation, modulation recognition and RF scene analysis in time-varying environments, pattern recognition in biological data sequences and large arrays, and hardware realizations of data fusion architectures for target detection and target tracking.

Drexel Network Modeling Laboratory

The Drexel Network Modeling Laboratory investigates problems in the mathematical modeling of communication networks, with specific focus on wireless ad hoc networks, wireless sensor networks, and supporting guaranteed delivery service models on best effort and multipath routed networks. Typical methodologies employed in our research include mathematical modeling, computer simulation, and performance optimization, often with the end goal of obtaining meaningful insights into network design principles and fundamental performance tradeoffs.

Drexel Power-Aware Computing Laboratory

The Power-Aware Computing Lab (<http://dpac.ece.drexel.edu>) investigates methods to increase energy efficiency across the boundaries of circuits, architecture, and systems. Our recent accomplishments include the Sigil profiling tool, scalable modeling infrastructure for accelerator implementations, microarchitecture-aware VDD gating algorithms, an accelerator architecture for ultrasound imaging, evaluation of hardware reference counting, hardware and operating system support for power-agile computing, and memory systems for accelerator-based architectures.

Drexel University Nuclear Engineering Education Laboratory

The field of nuclear engineering encompasses a wide spectrum of occupations, including nuclear reactor design, medical imaging, homeland security, and oil exploration. The Drexel University Nuclear Engineering Education Laboratory (DUNEEL) provides fundamental hands on understanding for power plant design and radiation detection and analysis. Software based study for power plant design, as well as physical laboratory equipment for radiation detection, strengthen the underlying concepts used in nuclear engineering such that the student will comprehend and appreciate the basic concepts and terminology used in various nuclear engineering professions. Additionally, students use the laboratory to develop methods for delivering remote, live time radiation detection and analysis. The goal of DUNEEL is to prepare students for potential employment in the nuclear engineering arena.

Drexel VLSI Laboratory

The Drexel VLSI Laboratory (http://ece.drexel.edu/faculty/taskin/wiki/visilab/index.php/Main_Page) investigates problems in the design, analysis, optimization and manufacturing of high performance (low power, high throughput) integrated circuits in contemporary CMOS and emerging technologies. Suited with industrial design tools for integrated circuits, simulation tools and measurement beds, the VLSI group is involved with digital and mixed-signal circuit design to verify the functionality of the discovered novel circuit and physical design principles. The Drexel VLSI laboratory develops design methodologies and automation tools in these areas, particularly in novel clocking techniques, featuring resonant clocking, and interconnects, featuring wireless interconnects.

Drexel Wireless Systems Laboratory

The Drexel Wireless Systems Laboratory (DWSL) contains an extensive suite of equipment for constructing, debugging, and testing prototype wireless communications systems. Major equipment within DWSL includes:

- three software defined radio network testbeds (HYDRA, USRP, and WARP) for rapidly prototyping radio, optical and ultrasonic communications systems,
- a TDK RF anechoic chamber and EMSCAN desktop antenna pattern measurement system,
- a materials printer and printed circuit board milling machine for fabricating conformal antennas and
- wireless protocol conformance testing equipment from Aeroflex.

The lab is also equipped with network analyzers, high speed signal generators, oscilloscopes, and spectrum analyzers as well as several Zigbee development platforms for rapidly prototyping sensor networks.

DWSL personnel also collaborate to create wearable, fabric based transceivers through collaboration with the Shima Seiki Haute Laboratory in the Drexel ExCITe Center. The knitting equipment at Drexel includes sixteen SDS-ONE APEX3 workstations and four state-of-the-art knitting

machines. The workstations accurately simulate fabric construction and provide researchers and designers the opportunity to program, create and simulate textile prototypes, import CAD specifications of final products, and produce made-to-measure or mass-produced pieces on Shima Seiki knitting machines. For testing smart textiles for biomedical, DWSL personnel also have collaborators in the Center for Interdisciplinary Clinical Simulation and Practice (CICSP) in the Drexel College of Medicine which provides access to medical mannequin simulators.

Ecological and Evolutionary Signal-processing and Informatics Laboratory

The Ecological and Evolutionary Signal-processing and Informatics Laboratory (EESI) (<http://www.ece.drexel.edu/gailr/EESI>) seeks to solve problems in high-throughput genomics and engineer better solutions for biochemical applications. The lab's primary thrust is to enhance the use of high-throughput DNA sequencing technologies with pattern recognition and signal processing techniques. Applications include assessing the organism content of an environmental sample, recognizing/classifying potential and functional genes, inferring environmental factors and interspecies relationships, and inferring microbial evolutionary relationships from short-read DNA/RNA fragments. The lab also investigates higher-level biological systems such as modeling and controlling chemotaxis, the movement of cells.

Electric Power Engineering Center

This newly established facility makes possible state-of-the-art research in a wide variety of areas, ranging from detailed theoretical model study to experimental investigation in its high voltage laboratories. The mission is to advance and apply scientific and engineering knowledge associated with the generation, transmission, distribution, use, and conservation of electric power. In pursuing these goals, this center works with electric utilities, state and federal agencies, private industries, nonprofit organizations and other universities on a wide spectrum of projects. Research efforts, both theoretical and experimental, focus on the solution of those problems currently faced by the electric power industry. Advanced concepts for electric power generation are also under investigation to ensure that electric power needs will be met at the present and in the future.

Electronic Design Automation Facility

Industrial-grade electronic design automation software suite and integrated design environment for digital, analog and mixed-signal systems development. Field Programmable Gate Array (FPGA) development hardware. Most up-to-date FPGA/embedded system development hardware kits. Printed circuit board production facility. Also see Drexel VLSI Laboratory.

Microwave-Photonics Device Laboratories

The laboratory is equipped with test and measurement equipment for high-speed analog and digital electronics and fiber optic systems. The test equipment includes network analyzers from Agilent (100kHz- 1.3 GHz and 45 MHz-40 GHz), and Anritsu (45 MHz-6 GHz); spectrum analyzers from Tektronix, HP, and Agilent with measurement capability of DC to 40 GHz and up to 90 GHz using external mixers; signal generators and communication channel modulators from HP, Rhode-Schwartz, Systron Donner, and Agilent; microwave power meter and sensor heads, assortment of passive and active microwave components up to 40 GHz ; data pattern generator and BER tester up to 3Gb/s; optical spectrum analyzer from Anritsu and power meters from HP; single and multimode fiber optic based optical transmitter and receiver boards covering ITU

channels at data rates up to 10Gb/s; passive optical components such as isolator, filter, couplers, optical connectors and fusion splicer; LPKF milling machine for fabrication of printed circuit boards; wire-bonding and Cascade probe stations; Intercontinental test fixtures for testing of MMIC circuits and solid-state transistors; state-of-the-art microwave and electromagnetic CAD packages such as Agilent ADS, ANSYS HFSS, and COMSOL multi-physics module.

Music and Entertainment Technology Laboratory

The Music and Entertainment Technology Laboratory (MET-lab) is devoted to research in digital media technologies that will shape the future of entertainment, especially in the areas of sound and music. We employ digital signal processing and machine learning to pursue novel applications in music information retrieval, music production and processing technology, and new music interfaces. The MET-lab is also heavily involved in outreach programs for K-12 students and hosts the Summer Music Technology program, a one-week learning experience for high school students. Lab facilities include a sound isolation booth for audio and music recording, a digital audio workstation running ProTools, two large multi-touch display interfaces of our own design, and a small computing cluster for distributed processing.

NanoPhotonics+ Lab

Our research is primarily in the area of nanophotonics with a focus on the nanoscale interaction of light with matter. Interests include: liquid crystal/polymer composites for gratings, lenses and HOEs; liquid crystal interactions with surfaces and in confined nanospaces; alternative energy generation through novel photon interactions; ink-jet printed conducting materials for RF and photonic applications; and the creation and development of smart textiles technologies including soft interconnects, sensors, and wireless implementations.

Opto-Electro-Mechanical Laboratory

This lab concentrates on the system integration on optics, electronics, and mechanical components and systems, for applications in imaging, communication, and biomedical research. Research areas include: Programmable Imaging with Optical Micro-electrical-mechanical systems (MEMS), in which microscopic mirrors are used to image light into a single photodetector; Pre-Cancerous Detection using White Light Spectroscopy, which performs a cellular size analysis of nuclei in tissue; Free-space Optical Communication using Space Time Coding, which consists of diffused light for computer-to-computer communications, and also tiny lasers and detectors for chip-to-chip communication; Magnetic Particle Locomotion, which showed that particles could swim in a uniform field; and Transparent Antennas using Polymer, which enables antennas to be printed through an ink-jet printer.

Plasma and Magnetics Laboratory

Research is focused on applications of electrical and magnetic technologies to biology and medicine. This includes the subjects of non-thermal atmospheric pressure plasma for medicine, magnetic manipulation of particles for drug delivery and bio-separation, development of miniature NMR sensors for cellular imaging and carbon nanotube cellular probes.

Power Electronics Research Laboratory

The Power Electronics Research Laboratory (PERL) is involved in circuit and design simulation, device modeling and simulation, and experimental testing and fabrication of power electronic circuits. The research and

development activities include electrical terminations, power quality, solar photovoltaic systems, GTO modeling, protection and relay coordination, and solid-state circuit breakers. The analysis tools include EMPT, SPICE, and others, which have been modified to incorporate models of such controllable solid-state switches as SCRs, GTOs, and MOSFETs. These programs have a wide variety and range of modeling capabilities used to model electromagnetics and electromechanical transients ranging from microseconds to seconds in duration. The PERL is a fully equipped laboratory with 42 kVA AC and 70 kVA DC power sources and data acquisition systems, which have the ability to display and store data for detailed analysis. Some of the equipment available is a distribution and HV transformer and three phase rectifiers for power sources and digital oscilloscopes for data measuring and experimental analysis. Some of the recent studies performed by the PERL include static VAR compensators, power quality of motor controllers, solid-state circuit breakers, and power device modeling which have been supported by PECO, GE, Gould, and EPRI.

RE Touch Lab

The RE Touch Lab is investigating the perceptual and mechanical basis of active touch perception, or haptics, and the development of new technologies for stimulating the sense of touch, allowing people to touch, feel, and interact with digital content as seamlessly as we do with objects in the real world. We study the scientific foundations of haptic perception and action, and the neuroscientific and biomechanical basis of touch, with a long-term goal of uncovering the fundamental perceptual and mechanical computations that enable haptic interaction. We also create new technologies for rendering artificial touch sensations that simulate those that are experienced when interacting with real objects, inspired by new findings on haptic perception.

Testbed for Power-Performance Management of Enterprise Computing Systems

This computing testbed is used to validate techniques and algorithms aimed at managing the performance and power consumption of enterprise computing systems. The testbed comprises a rack of Dell 2950 and Dell 1950 PowerEdge servers, as well as assorted desktop machines, networked via a gigabit switch. Virtualization of this cluster is enabled by VMWare's ESX Server running the Linux RedHat kernel. It also comprises of a rack of ten Apple Xserve machines networked via a gigabit switch. These servers run the OS X Leopard operating systems and have access to a RAID with TBs of total disk capacity.

Cybersecurity Faculty

Kapil Dandekar, PhD (*University of Texas-Austin*) Director of the Drexel Wireless Systems Laboratory (DW/SL); Associate Dean of Research, College of Engineering. Professor. Cellular/mobile communications and wireless LAN; smart antenna/MIMO for wireless communications; applied computational electromagnetics; microwave antenna and receiver development; free space optical communication; ultrasonic communication; sensor networks for homeland security; ultrawideband communication.

Rachel Greenstadt, PhD (*Harvard University*). Associate Professor. Artificial intelligence, privacy, security, multi-agent systems, economics of electronic privacy and information security.

Constantine Katsinis, PhD (*University of Rhode Island*). Teaching Professor. High-performance computer networks, parallel computer

architectures with sustained teraflops performance, computer security, image processing.

Christopher C. Yang, PhD (*University of Arizona, Tucson*). Associate Professor. Web search and mining, security informatics, knowledge management, social media analytics, cross-lingual information retrieval, text summarization, multimedia retrieval, information visualization, information sharing and privacy, artificial intelligence, digital library, and electronic commerce.

Electrical Engineering

Major: Electrical Engineering

Degree Awarded: Master of Science (MS): or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 - 48.0 (MS) or 90.0 (PhD)

Co-op Option: Available for full-time on-campus master's-level students

Classification of Instructional Programs (CIP) code: 14.1001

Standard Occupational Classification (SOC) code: 17-2071

About the Program

The program in electrical engineering prepares students for careers in research and development, and aims to endow graduates with the ability to identify, analyze and address new technical and scientific challenges. At present, the department offers graduate coursework in six general areas: (1) computer engineering; (2) control, robotics and intelligent systems; (3) electrophysics; (4) image and signal processing and interpretation; (5) power engineering and energy; and (6) telecommunications and networking.

The Master of Science in Electrical Engineering degree requires a minimum of 45.0 approved credits chosen in accordance with a plan of study arranged with the permission of a student's advisor and the departmental graduate advisor. Students who complete a six-month period of internship through Drexel's Graduate Co-op Program (GCP) (<http://www.ece.drexel.edu/grad/cie.html>) must complete 48.0 credits including 6.0 GCP credits.

The plan must contain a selection of core courses from the department's offerings and may include appropriate graduate elective courses from other engineering departments or from physics or mathematics. Further information can be obtained from the department website or from the graduate advisor.

All students also are encouraged to engage in thesis research. The combined thesis and research cannot exceed 9.0 credits. The program is organized so that a student may complete the degree requirements in two years of full-time study or three years of part-time study.

For more information about the programs, including information about teaching and research assistantships, visit the Department's Electrical and Computer Engineering (<http://drexel.edu/ece>) web site. For additional information about the Graduate Co-op, visit the Steinbright Career Development Center's website (<http://www.drexel.edu/scdc/co-op/graduate>).

Admission Requirements

Applicants must satisfy general requirements for graduate admission, including a minimum 3.0 GPA (on a 4.0 scale) for the last two years of undergraduate studies, as well as for any subsequent graduate work, and hold a bachelor's degree or the equivalent in electrical engineering, computer engineering, or the equivalent from an accredited college or

university. A degree in science (physics, mathematics, computer science, etc.) is also acceptable. Applicants with degrees in sciences may be required to take a number of undergraduate engineering courses. An undergraduate degree earned abroad must be deemed equivalent to a US bachelor's.

Applicants for full-time MS and PhD programs must take the GRE general test. Students whose native language is not English and who do not hold a degree from a US institution must take the TOEFL within two years before application.

For additional information on how to apply, visit Drexel's Admissions page for Electrical Engineering (<http://www.drexel.edu/grad/programs/coe/electrical-engineering>).

Degree Requirements (MS)

The Master of Science in Electrical Engineering curriculum encompasses 45.0 or 48.0 (with the Graduate Co-op option) approved credit hours, chosen in accordance with the following requirements and a plan of study arranged with the departmental graduate advisor in consultation with the student's research advisor, if applicable. Before the end of the first quarter in the Department of Electrical and Computer Engineering, for a full-time student, or by the end of the first year for a part-time student, said plan of study must be filed and approved with the departmental graduate advisor.

A total of at least 30.0 credit hours must be taken from among the graduate course offerings of the Department of Electrical and Computer Engineering. These credits must be taken at Drexel University. No transfer credit may be used to fulfill these requirements, regardless of content equivalency.

The remaining courses needed to reach the minimum credit hour requirement for the degree program are considered elective courses. Elective courses can be chosen from among the graduate course offerings of the Department of Electrical and Computer Engineering; other departments within the College of Engineering; the School of Biomedical Science, Engineering and Health Systems; the Department of Mathematics; the Department of Physics; the Department of Chemistry and the Department of Biology. In order to have courses outside of these departments and schools count towards degree completion, they must be approved by the departmental graduate advisors prior to registration for said courses.

Please note that ECEC 500 *Fundamentals of Computer Hardware* and ECEC 600 *Fundamentals of Computer Networks* do **not** count toward the credit requirements to complete the MS in Electrical Engineering degree program.

Required Courses	
Electrical Engineering (ECEE, ECEP, ECES, ECET) Courses	21.0
General Electrical and Computer Engineering (ECEC, ECEE, ECEP, ECES, ECET) Courses	9.0
Elective Courses	15.0
Total Credits	45.0

Options for Degree Fulfillment

Although not required, students are encouraged to complete a Master's Thesis as part of the MS studies. Those students who choose the thesis option may count up to 9.0 research/thesis credits as part of their required credit hour requirements.

Students may choose to participate in the Graduate Co-Op Program, where 6.0 credit hours can be earned for a six month cooperative

education experience in industry, working on curriculum related projects. The total number of required credit hours is increased to 48.0 for those students who choose to pursue the Graduate Co-op option. This change represents an increase in non-departmental required credit hours to a total of 18.0 credit hours, 6.0 of which are earned from the cooperative education experience.

For more information on curricular requirements, visit the Department of Electrical and Computer Engineering' (<http://www.ece.drexel.edu>)s web site.

PhD in Electrical Engineering

General Requirements

The following general requirements must be satisfied in order to complete the PhD in Electrical Engineering:

- 90.0 credit hours total
- candidacy examination
- research proposal
- dissertation defense

Students entering with a master's degree in electrical or computer engineering or a related field will be considered a post-masters PhD student and will only be required to complete a total of 45.0 credit hours, in accordance with University policy.

Curriculum

Appropriate coursework is chosen in consultation with the student's research advisor. A plan of study must be developed by the student to encompass the total number of required credit hours. Both the departmental graduate advisor and the student's research advisor must approve this plan.

Candidacy Examination

The candidacy examination explores the depth of understanding of the student in his/her specialty area. The student is expected to be familiar with, and be able to use, the contemporary tools and techniques of the field and to demonstrate familiarity with the principal results and key findings.

The student, in consultation with his/her research advisor, will declare a principal technical area for the examination. The examination includes the following three parts:

- A self-study of three papers from the archival literature in the student's stated technical area, chosen by the committee in consultation with the student.
- A written report (15 pages or less) on the papers, describing their objectives, key questions and hypotheses, methodology, main results and conclusions. Moreover, the student must show in an appendix independent work he/she has done on at least one of the papers – such as providing a full derivation of a result or showing meaningful examples, simulations or applications.
- An oral examination which takes the following format:
 - A short description of the student's principal area of interest (5 minutes, by student).
 - A review of the self-study papers and report appendix (25-30 minutes, by student).
 - Questions and answers on the report, the appendix and directly related background (40-100 minutes, student and committee).

In most cases, the work produced during the candidacy examination will be a principal reference for the student's PhD dissertation; however, this is not a requirement.

Research Proposal

After having attained the status of PhD Candidate, each student must present a research proposal to a committee of faculty and industry members, chosen with his/her research advisor, who are knowledgeable in the specific area of research. This proposal should outline the specific intended subject of study, i.e., it should present a problem statement, pertinent background, methods of study to be employed, expected difficulties and uncertainties and the anticipated form, substance and significance of the results.

The purpose of this presentation is to verify suitability of the dissertation topic and the candidate's approach, and to obtain the advice and guidance of oversight of mature, experienced investigators. It is not to be construed as an examination, though approval by the committee is required before extensive work is undertaken. The thesis proposal presentation must be open to all; announcements regarding the proposal presentation must be made in advance.

The thesis advisory committee will have the sole responsibility of making any recommendations regarding the research proposal. It is strongly recommended that the proposal presentation be given as soon as possible after the successful completion of the candidacy examination.

Dissertation Defense

Dissertation Defense procedures are described in the Graduate College of Drexel University (<http://www.drexel.edu/graduatecollege>) policies regarding Doctor of Philosophy Program Requirements. The student must be a PhD candidate for at least one year before he/she can defend his/her doctoral thesis.

Dual Degree

The Department of Electrical and Computer Engineering offers outstanding students the opportunity to receive two diplomas (BS and MS) at the same time. The program requires five (5) years to complete. Participants, who are chosen from the best undergraduates students, work with a faculty member on a research project and follow a study plan that includes selected graduate classes. This program prepares individuals for careers in research and development; many of its past graduates continued their studies toward a PhD.

For more information on eligibility, academic requirements, and tuition policy visit the Engineering Combined BS/MS (<http://www.ece.drexel.edu/undergrad/bsms.html>) page.

Facilities

Drexel University and the Electrical and Computer Engineering Department are nationally recognized for a strong history of developing innovative research. Research programs in the ECE Department prepare students for careers in research and development, and aim to endow graduates with the ability to identify, analyze, and address new technical and scientific challenges. The ECE Department is well equipped with state-of-the-art facilities in each of the following ECE Research laboratories:

Research Laboratories at the ECE Department

Adaptive Signal Processing and Information Theory Research Group

The Adaptive Signal Processing and Information Theory Research Group (<http://www.ece.drexel.edu/walsh/aspitrg/home.html>) conducts research in the area of signal processing and information theory. Our main interests are belief/expectation propagation, turbo decoding and composite adaptive system theory. We are currently doing projects on the following topics:

- i) Delay mitigating codes for network coded systems,
- ii) Distributed estimation in sensor networks via expectation propagation,
- iii) Turbo speaker identification,
- iv) Performance and convergence of expectation propagation,
- v) Investigating bounds for SINR performance of autocorrelation based channel shorteners.

Applied Networking Research Lab

Applied Networking Research Lab (ANRL) projects focus on modeling and simulation as well as experimentation in wired, wireless and sensor networks. ANRL is the home of MuTANT, a Multi-Protocol Label Switched Traffic Engineering and Analysis Testbed composed of 10 high-end Cisco routers and several PC-routers, also used to study other protocols in data networks as well as automated network configuration and management. The lab also houses a sensor network testbed.

Bioimage Laboratory

Uses computer gaming hardware for enhanced and affordable 3-D visualization, along with techniques from information theory and machine learning to combine the exquisite capabilities of the human visual system with computational sensing techniques for analyzing vast quantities of image sequence data.

Data Fusion Laboratory

The Data Fusion Laboratory investigates problems in multisensory detection and estimation, with applications in robotics, digital communications, radar, and target tracking. Among the projects in progress: computationally efficient parallel distributed detection architectures, data fusion for robot navigation, modulation recognition and RF scene analysis in time-varying environments, pattern recognition in biological data sequences and large arrays, and hardware realizations of data fusion architectures for target detection and target tracking.

Drexel Network Modeling Laboratory

The Drexel Network Modeling Laboratory investigates problems in the mathematical modeling of communication networks, with specific focus on wireless ad hoc networks, wireless sensor networks, and supporting guaranteed delivery service models on best effort and multipath routed networks. Typical methodologies employed in our research include mathematical modeling, computer simulation, and performance optimization, often with the end goal of obtaining meaningful insights into network design principles and fundamental performance tradeoffs.

Drexel Power-Aware Computing Laboratory

The Power-Aware Computing Lab (<http://dpac.ece.drexel.edu>) investigates methods to increase energy efficiency across the boundaries of circuits, architecture, and systems. Our recent accomplishments include the Sigil profiling tool, scalable modeling infrastructure for

accelerator implementations, microarchitecture-aware VDD gating algorithms, an accelerator architecture for ultrasound imaging, evaluation of hardware reference counting, hardware and operating system support for power-agile computing, and memory systems for accelerator-based architectures.

Drexel University Nuclear Engineering Education Laboratory

The field of nuclear engineering encompasses a wide spectrum of occupations, including nuclear reactor design, medical imaging, homeland security, and oil exploration. The Drexel University Nuclear Engineering Education Laboratory (DUNEEL) provides fundamental hands on understanding for power plant design and radiation detection and analysis. Software based study for power plant design, as well as physical laboratory equipment for radiation detection, strengthen the underlying concepts used in nuclear engineering such that the student will comprehend and appreciate the basic concepts and terminology used in various nuclear engineering professions. Additionally, students use the laboratory to develop methods for delivering remote, live time radiation detection and analysis. The goal of DUNEEL is to prepare students for potential employment in the nuclear engineering arena.

Drexel VLSI Laboratory

The Drexel VLSI Laboratory (http://ece.drexel.edu/faculty/taskin/wiki/vsilab/index.php/Main_Page) investigates problems in the design, analysis, optimization and manufacturing of high performance (low power, high throughput) integrated circuits in contemporary CMOS and emerging technologies. Suited with industrial design tools for integrated circuits, simulation tools and measurement beds, the VLSI group is involved with digital and mixed-signal circuit design to verify the functionality of the discovered novel circuit and physical design principles. The Drexel VLSI laboratory develops design methodologies and automation tools in these areas, particularly in novel clocking techniques, featuring resonant clocking, and interconnects, featuring wireless interconnects.

Drexel Wireless Systems Laboratory

The Drexel Wireless Systems Laboratory (DWSL) contains an extensive suite of equipment for constructing, debugging, and testing prototype wireless communications systems. Major equipment within DWSL includes:

- three software defined radio network testbeds (HYDRA, USRP, and WARP) for rapidly prototyping radio, optical and ultrasonic communications systems,
- a TDK RF anechoic chamber and EMSCAN desktop antenna pattern measurement system,
- a materials printer and printed circuit board milling machine for fabricating conformal antennas and
- wireless protocol conformance testing equipment from Aeroflex.

The lab is also equipped with network analyzers, high speed signal generators, oscilloscopes, and spectrum analyzers as well as several Zigbee development platforms for rapidly prototyping sensor networks.

DWSL personnel also collaborate to create wearable, fabric based transceivers through collaboration with the Shima Seiki Haute Laboratory in the Drexel ExCITE Center. The knitting equipment at Drexel includes sixteen SDS-ONE APEX3 workstations and four state-of-the-art knitting machines. The workstations accurately simulate fabric construction and

provide researchers and designers the opportunity to program, create and simulate textile prototypes, import CAD specifications of final products, and produce made-to-measure or mass-produced pieces on Shima Seiki knitting machines. For testing smart textiles for biomedical, DWSL personnel also have collaborators in the Center for Interdisciplinary Clinical Simulation and Practice (CICSP) in the Drexel College of Medicine which provides access to medical mannequin simulators.

Ecological and Evolutionary Signal-processing and Informatics Laboratory

The Ecological and Evolutionary Signal-processing and Informatics Laboratory (EESI) (<http://www.ece.drexel.edu/gair/EESI>) seeks to solve problems in high-throughput genomics and engineer better solutions for biochemical applications. The lab's primary thrust is to enhance the use of high-throughput DNA sequencing technologies with pattern recognition and signal processing techniques. Applications include assessing the organism content of an environmental sample, recognizing/classifying potential and functional genes, inferring environmental factors and inter-species relationships, and inferring microbial evolutionary relationships from short-read DNA/RNA fragments. The lab also investigates higher-level biological systems such as modeling and controlling chemotaxis, the movement of cells.

Electric Power Engineering Center

This newly established facility makes possible state-of-the-art research in a wide variety of areas, ranging from detailed theoretical model study to experimental investigation in its high voltage laboratories. The mission is to advance and apply scientific and engineering knowledge associated with the generation, transmission, distribution, use, and conservation of electric power. In pursuing these goals, this center works with electric utilities, state and federal agencies, private industries, nonprofit organizations and other universities on a wide spectrum of projects. Research efforts, both theoretical and experimental, focus on the solution of those problems currently faced by the electric power industry. Advanced concepts for electric power generation are also under investigation to ensure that electric power needs will be met at the present and in the future.

Electronic Design Automation Facility

Industrial-grade electronic design automation software suite and integrated design environment for digital, analog and mixed-signal systems development. Field Programmable Gate Array (FPGA) development hardware. Most up-to-date FPGA/embedded system development hardware kits. Printed circuit board production facility. Also see Drexel VLSI Laboratory.

Microwave-Photonics Device Laboratories

The laboratory is equipped with test and measurement equipment for high-speed analog and digital electronics and fiber optic systems. The test equipment includes network analyzers from Agilent (100kHz- 1.3 GHz and 45 MHz-40 GHz), and Anritsu (45 MHz-6 GHz); spectrum analyzers from Tektronix, HP, and Agilent with measurement capability of DC to 40 GHz and up to 90 GHz using external mixers; signal generators and communication channel modulators from HP, Rhode-Schwartz, Systron Donner, and Agilent; microwave power meter and sensor heads, assortment of passive and active microwave components up to 40 GHz ; data pattern generator and BER tester up to 3Gb/s; optical spectrum

analyzer from Anritsu and power meters from HP; single and multimode fiber optic based optical transmitter and receiver boards covering ITU channels at data rates up to 10Gb/s; passive optical components such as isolator, filter, couplers, optical connectors and fusion splicer; LPKF milling machine for fabrication of printed circuit boards; wire-bonding and Cascade probe stations; Intercontinental test fixtures for testing of MMIC circuits and solid-state transistors; state-of-the-art microwave and electromagnetic CAD packages such as Agilent ADS, ANSYS HFSS, and COMSOL multi-physics module.

Music and Entertainment Technology Laboratory

The Music and Entertainment Technology Laboratory (MET-lab) is devoted to research in digital media technologies that will shape the future of entertainment, especially in the areas of sound and music. We employ digital signal processing and machine learning to pursue novel applications in music information retrieval, music production and processing technology, and new music interfaces. The MET-lab is also heavily involved in outreach programs for K-12 students and hosts the Summer Music Technology program, a one-week learning experience for high school students. Lab facilities include a sound isolation booth for audio and music recording, a digital audio workstation running ProTools, two large multi-touch display interfaces of our own design, and a small computing cluster for distributed processing.

NanoPhotonics+ Lab (<http://drexelnanophotonics.com>)

Our research is primarily in the area of nanophotonics with a focus on the nanoscale interaction of light with matter. Interests include: liquid crystal/polymer composites for gratings, lenses and HOEs; liquid crystal interactions with surfaces and in confined nanospaces; alternative energy generation through novel photon interactions; ink-jet printed conducting materials for RF and photonic applications; and the creation and development of smart textiles technologies including soft interconnects, sensors, and wireless implementations.

Opto-Electro-Mechanical Laboratory

This lab concentrates on the system integration on optics, electronics, and mechanical components and systems, for applications in imaging, communication, and biomedical research. Research areas include: Programmable Imaging with Optical Micro-electrical-mechanical systems (MEMS), in which microscopic mirrors are used to image light into a single photodetector; Pre-Cancerous Detection using White Light Spectroscopy, which performs a cellular size analysis of nuclei in tissue; Free-space Optical Communication using Space Time Coding, which consists of diffused light for computer-to-computer communications, and also tiny lasers and detectors for chip-to-chip communication; Magnetic Particle Locomotion, which showed that particles could swim in a uniform field; and Transparent Antennas using Polymer, which enables antennas to be printed through an ink-jet printer.

Plasma and Magnetics Laboratory

Research is focused on applications of electrical and magnetic technologies to biology and medicine. This includes the subjects of non-thermal atmospheric pressure plasma for medicine, magnetic manipulation of particles for drug delivery and bio-separation, development of miniature NMR sensors for cellular imaging and carbon nanotube cellular probes.

Power Electronics Research Laboratory

The Power Electronics Research Laboratory (PERL) is involved in circuit and design simulation, device modeling and simulation, and experimental testing and fabrication of power electronic circuits. The research and development activities include electrical terminations, power quality, solar photovoltaic systems, GTO modeling, protection and relay coordination, and solid-state circuit breakers. The analysis tools include EMPT, SPICE, and others, which have been modified to incorporate models of such controllable solid-state switches as SCRs, GTOs, and MOSFETs. These programs have a wide variety and range of modeling capabilities used to model electromagnetics and electromechanical transients ranging from microseconds to seconds in duration. The PERL is a fully equipped laboratory with 42 kVA AC and 70 kVA DC power sources and data acquisition systems, which have the ability to display and store data for detailed analysis. Some of the equipment available is a distribution and HV transformer and three phase rectifiers for power sources and digital oscilloscopes for data measuring and experimental analysis. Some of the recent studies performed by the PERL include static VAR compensators, power quality of motor controllers, solid-state circuit breakers, and power device modeling which have been supported by PECO, GE, Gould, and EPRI.

RE Touch Lab

The RE Touch Lab is investigating the perceptual and mechanical basis of active touch perception, or haptics, and the development of new technologies for stimulating the sense of touch, allowing people to touch, feel, and interact with digital content as seamlessly as we do with objects in the real world. We study the scientific foundations of haptic perception and action, and the neuroscientific and biomechanical basis of touch, with a long-term goal of uncovering the fundamental perceptual and mechanical computations that enable haptic interaction. We also create new technologies for rendering artificial touch sensations that simulate those that are experienced when interacting with real objects, inspired by new findings on haptic perception.

Testbed for Power-Performance Management of Enterprise Computing Systems

This computing testbed is used to validate techniques and algorithms aimed at managing the performance and power consumption of enterprise computing systems. The testbed comprises a rack of Dell 2950 and Dell 1950 PowerEdge servers, as well as assorted desktop machines, networked via a gigabit switch. Virtualization of this cluster is enabled by VMWare's ESX Server running the Linux RedHat kernel. It also comprises of a rack of ten Apple Xserve machines networked via a gigabit switch. These servers run the OS X Leopard operating systems and have access to a RAID with TBs of total disk capacity.

Electrical Engineering Faculty

Juadeline Cavalcante de Oliveira, PhD (*Georgia Institute of Technology*). Associate Professor. Software-defined networking; social and economic networks; network security; design and analysis of protocols, algorithms and architectures in computer networks, particularly solutions for the Internet of Things

Tom Chmielewski, PhD (*Drexel University*). Teaching Professor. Modeling and simulation of electro-mechanical systems; optimal, adaptive and non-linear control; DC motor control; system identification; kalman filters (smoothing algorithms, tracking); image processing; robot design;

biometric technology and design of embedded systems for control applications utilizing MATLAB and SIMULINK

Fernand Cohen, PhD (*Brown University*). Professor. Surface modeling; tissue characterization and modeling; face modeling; recognition and tracking.

Andrew Cohen, PhD (*Rensselaer Polytechnic Institute*). Associate Professor. Image processing; multi-target tracking; statistical pattern recognition and machine learning; algorithmic information theory; 5-D visualization

Kapil Dandekar, PhD (*University of Texas-Austin*) *Director of the Drexel Wireless Systems Laboratory (DWSL); Associate Dean of Research, College of Engineering*. Professor. Cellular/mobile communications and wireless LAN; smart antenna/MIMO for wireless communications; applied computational electromagnetics; microwave antenna and receiver development; free space optical communication; ultrasonic communication; sensor networks for homeland security; ultrawideband communication.

Afshin Daryoush, ScD (*Drexel University*). Professor. Digital and microwave photonics; nonlinear microwave circuits; RFIC; medical imaging.

Anup Das, PhD (*National University of Singapore*). Assistant Professor. Design of algorithms and architecture for neuromorphic computing; machine learning particularly unsupervised learning using spiking neural networks; in-memory computing using non-volatile memories

Bruce A. Eisenstein, PhD (*University of Pennsylvania*) *Vice Dean, College of Engineering; Arthur J. Rowland Professor*. Professor. Pattern recognition; estimation; decision theory.

Adam K. Fontecchio, PhD (*Brown University*) *Director, Center for the Advancement of STEM Teaching and Learning Excellence (CASTLE)*. Professor. Electro-optics; remote sensing; active optical elements; liquid crystal devices.

Gary Friedman, PhD (*University of Maryland-College Park*) *Associate Department Head for Graduate Affairs*. Professor. Biological and biomedical applications of nanoscale magnetic systems.

Allon Guez, PhD (*University of Florida*). Professor. Intelligent control systems; robotics, biomedical, automation and manufacturing; business systems engineering.

Peter R. Herczfeld, PhD (*University of Minnesota*) *Lester A. Kraus Professor/Director, Center for Microwave/Lightwave Engineering*. Professor. Lightwave technology; microwaves; millimeter waves; fiberoptic and integrated optic devices.

Leonid Hrebien, PhD (*Drexel University*). Professor. Tissue excitability; acceleration effects on physiology; bioinformatics.

Nagarajan Kandasamy, PhD (*University of Michigan*) *Associate Department Head for Undergraduate Affairs*. Professor. Embedded systems, self-managing systems, reliable and fault-tolerant computing, distributed systems, computer architecture, and testing and verification of digital systems.

Youngmoo Kim, PhD (*MIT*). Professor. Audio and music signal processing, voice analysis and synthesis, music information retrieval, machine learning.

Fei Lu, PhD (*University of Michigan-Ann Arbor*). Assistant Professor. Power electronics.

Karen Miu, PhD (*Cornell University*). Professor. Power systems; distribution networks; distribution automation; optimization; system analysis.

Bahram Nabet, PhD (*University of Washington*) *Associate Dean for Special Projects, College of Engineering; Electrical and Computer Engineering*. Professor. Optoelectronics; fabrication and modeling; fiber optic devices; nanoelectronics; nanowires.

Prawat Nagvajara, Ph.D. (*Boston University*). Associate Professor. System on a chip; embedded systems; power grid computation; testing of computer hardware; fault-tolerant computing; VLSI systems; error control coding.

Dagmar Niebur, PhD (*Swiss Federal Institute of Technology*). Associate Professor. Intelligent systems; dynamical systems; power system monitoring and control.

Christopher Peters, PhD (*University of Michigan-Ann Arbor*). Teaching Professor. Nuclear reactor design; ionizing radiation detection; nuclear forensics; power plant reliability and risk analysis; naval/marine power and propulsion; directed energy/high power microwaves; nonstationary signal processing; radar; electronic survivability/susceptibility to harsh environments; electronic warfare

Gail L. Rosen, PhD (*Georgia Institute of Technology*). Associate Professor. Signal processing, signal processing for biological analysis and modeling, bio-inspired designs, source localization and tracking.

Ionnis Savidis, PhD (*University of Rochester*). Assistant Professor. Analysis, modeling, and design methodologies for high performance digital and mixed-signal integrated circuits; Emerging integrated circuit technologies; Electrical and thermal modeling and characterization, signal and power integrity, and power and clock delivery for 3-D IC technologies

Kevin J. Scoles, PhD (*Dartmouth College*). Associate Professor. Microelectronics; electric vehicles; solar energy; biomedical electronics.

Harish Sethu, PhD (*Lehigh University*). Associate Professor. Protocols, architectures and algorithms in computer networks; computer security; mobile ad hoc networks; large-scale complex adaptive networks and systems.

James Shackelford, PhD (*Drexel University*). Assistant Professor. Medical image processing, high performance computing, embedded systems, computer vision, machine learning

P. Mohana Shankar, PhD (*Indian Institute of Technology*) *Allen Rothwarf Professor of Electrical and Computer Engineering*. Professor. Wireless communications; biomedical ultrasonics; fiberoptic bio-sensors.

Matthew Stamm, PhD (*University of Maryland-College Park*). Assistant Professor. Information Security; multimedia forensics and anti-forensics; information verification; adversarial dynamics; signal processing

Baris Taskin, PhD (*University of Pittsburgh*). Professor. Electronic Design Automation (EDA) of VLSI Circuits; high-performance circuits; resonant clocking; integrated circuit (IC) physical design; nanoarchitectures; and wireless IC interconnects

John Walsh, PhD (*Cornell University*). Associate Professor. Bounding the region of entropic vectors and its implications for the limits of communication networks, big data distributed storage systems, and

graphical model based machine learning; efficient computation and analysis of rate regions for network coding and distributed storage; code construction, polyhedral computation, enumeration, hierarchy, and symmetry

Steven Weber, PhD (*University of Texas-Austin Interim Department Head*). Professor. Mathematical modeling of computer and communication networks, specifically streaming multimedia and ad hoc networks.

Jaudelice Cavalcante de Oliveira, PhD (*Georgia Institute of Technology*). Associate Professor. Software-defined networking; social and economic networks; network security; design and analysis of protocols, algorithms and architectures in computer networks, particularly solutions for the Internet of Things

Electrical Engineering/ Telecommunications Engineering

Major: Electrical/Telecommunications Engineering

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 - 48.0 (MS) or 90.0 (PhD)

Co-op Option: Available for full-time on-campus master's-level students

Classification of Instructional Programs (CIP) code: 14.1001; 14.1004

Standard Occupational Classification (SOC) code: 15-1143; 17-2071

About the Program

Fueled by the rapid spread of technologies such as electronic mail, cellular and mobile phone systems, interactive cable television, and the information superhighway, Drexel's program in Telecommunications Engineering responds to the growing demand for engineers with telecommunications expertise. The program combines a strong foundation in telecommunications engineering with training in other important issues such as global concerns, business, and information transfer and processing.

Drexel University's program in Telecommunications Engineering combines the expertise of its faculty in electrical and computer engineering, business, information systems, and humanities. Through its interdisciplinary approach, Drexel's Telecommunications Engineering program trains and nurtures the complete telecommunications engineer.

The MS in Electrical Engineering/Telecommunications Engineering degree is awarded to students who demonstrate in-depth knowledge of the field. The average time required to complete the master's degree is two year of full-time or three years of part-time study.

A graduate co-op is available for the Master of Science program. For more information, visit the Steinbright Career Development Center's website (<http://www.drexel.edu/scdc/co-op/graduate>).

For more information, visit the Department of Electrical and Computer Engineering' (<http://www.ece.drexel.edu>)s web site.

Admission Requirements

Applicants must meet the general requirements for graduate admission, which include at least a 3.0 GPA for the last two years of undergraduate study and for any graduate level study undertaken, and are required to hold a bachelor of science degree in electrical engineering or a related field. Applicants whose undergraduate degrees are not in the field of electrical engineering may be required to take a number of undergraduate

courses. The GRE General Test is required of applicants for full-time MS and PhD programs. Applicants whose native language is not English and who do not have a previous degree from a US institution are required to take the Test of English as a Foreign Language (TOEFL).

For additional information on how to apply, visit Drexel's Admissions page for Electrical-Telecommunications Engineering (<http://www.drexel.edu/grad/programs/coe/electrical-telecommunications>).

MS in Electrical and Telecommunications Engineering

The Master of Science in Electrical and Telecommunications Engineering curriculum encompasses 45.0 or 48.0 (with the Graduate Co-Op) approved credit hours, chosen in accordance with the following requirements and a plan of study arranged with the departmental graduate advisor in consultation with the student's research advisor (if applicable). This plan of study must be filed in the Department of Electrical and Computer Engineering and approved with the departmental graduate advisor before the end of the first quarter for a full-time student, or by the end of the first year for a part-time student.

Degree Requirements

A total of at least 30.0 credit hours must be taken from among the graduate course offerings of the Department of Electrical and Computer Engineering. These credits must be taken at Drexel University. No transfer credit may be used to fulfill these requirements, regardless of content equivalency.

Telecommunications Engineering (ECET) Courses	6.0
Telecommunications Engineering Elective (ECEC, ECEE, ECES, ECET) Courses	15.0
General Electrical and Computer Engineering (ECEC, ECEE, ECEP, ECES, ECET) Courses	9.0
Elective Courses	15.0
Total Credits	45.0

With the remaining required 15.0 credit hours, students may take graduate coursework, subject to the approval of the departmental graduate advisor, in electrical and computer engineering, mathematics, physics or other engineering disciplines.

In addition, students pursuing an MS in Electrical and Telecommunications Engineering are allowed and strongly encouraged to take the following course as part of their required 15.0 credit hours:

- COM 650 *Telecommunications Policy in the Information Age*

Although not required, students are encouraged to complete a master's thesis as part of the MS studies. Those students who choose the thesis option may count up to 9.0 research/thesis credits as part of their required credit hour requirements.

Graduate Co-Op Program

Students may choose to participate in the Graduate Co-Op Program, where 6.0 credit hours can be earned for a six month cooperative education experience in industry, working on curriculum related projects. The total number of required credit hours is increased to 48 for those students who choose to pursue the Graduate Co-Op option. This change represents an increase in non-departmental required credit hours to a total of 18.0 credit hours, 6.0 of which are earned from the cooperative education experience.

Please note that ECEC 500 (*Fundamentals of Computer Hardware*) and ECEC 600 (*Fundamentals of Computer Networks*) do **not** count toward the credit requirements to complete the MS in Electrical Engineering degree program.

For more information on curricular requirements, visit the Department of Electrical and Computer Engineering (<http://www.ece.drexel.edu>)'s web site.

PhD in Electrical Engineering

General Requirements

The following general requirements must be satisfied in order to complete the PhD in Electrical Engineering:

- 90.0 credit hours total
- candidacy examination
- research proposal
- dissertation defense

Students entering with a master's degree in electrical or computer engineering or a related field will be considered a post-masters PhD student and will only be required to complete a total of 45.0 credit hours, in accordance with University policy.

Curriculum

Appropriate coursework is chosen in consultation with the student's research advisor. A plan of study must be developed by the student to encompass the total number of required credit hours. Both the departmental graduate advisor and the student's research advisor must approve this plan.

Candidacy Examination

The candidacy examination explores the depth of understanding of the student in his/her specialty area. The student is expected to be familiar with, and be able to use, the contemporary tools and techniques of the field and to demonstrate familiarity with the principal results and key findings.

The student, in consultation with his/her research advisor, will declare a principal technical area for the examination. The examination includes the following three parts:

- A self-study of three papers from the archival literature in the student's stated technical area, chosen by the committee in consultation with the student.
- A written report (15 pages or less) on the papers, describing their objectives, key questions and hypotheses, methodology, main results and conclusions. Moreover, the student must show in an appendix independent work he/she has done on at least one of the papers – such as providing a full derivation of a result or showing meaningful examples, simulations or applications.
- An oral examination which takes the following format:
 - A short description of the student's principal area of interest (5 minutes, by student).
 - A review of the self-study papers and report appendix (25-30 minutes, by student).
 - Questions and answers on the report, the appendix and directly related background (40-100 minutes, student and committee).

In most cases, the work produced during the candidacy examination will be a principal reference for the student's PhD dissertation; however, this is not a requirement.

Research Proposal

After having attained the status of PhD Candidate, each student must present a research proposal to a committee of faculty and industry members, chosen with his/her research advisor, who are knowledgeable in the specific area of research. This proposal should outline the specific intended subject of study, i.e., it should present a problem statement, pertinent background, methods of study to be employed, expected difficulties and uncertainties and the anticipated form, substance and significance of the results.

The purpose of this presentation is to verify suitability of the dissertation topic and the candidate's approach, and to obtain the advice and guidance of oversight of mature, experienced investigators. It is not to be construed as an examination, though approval by the committee is required before extensive work is undertaken. The thesis proposal presentation must be open to all; announcements regarding the proposal presentation must be made in advance.

The thesis advisory committee will have the sole responsibility of making any recommendations regarding the research proposal. It is strongly recommended that the proposal presentation be given as soon as possible after the successful completion of the candidacy examination. The student must be a PhD candidate for at least one year before he/she can defend his/her doctoral thesis.

Dissertation Defense

Dissertation Defense procedures are described in the Graduate College of Drexel University (<http://www.drexel.edu/graduatecollege>) policies regarding Doctor of Philosophy Program Requirements. The student must be a PhD candidate for at least one year before he/she can defend his/her doctoral thesis.

Dual Degree

The ECE Department offers outstanding students the opportunity to receive two diplomas (BS and MS) at the same time. The program requires five (5) years to complete. Participants, who are chosen from the best undergraduates students, work with a faculty member on a research project and follow a study plan that includes selected graduate classes. This program prepares individuals for careers in research and development; many of its past graduates continued their studies toward a PhD.

For more information on eligibility, academic requirements, and tuition policy visit the Engineering Combined BS/MS (<http://www.ece.drexel.edu/undergrad/bsms.html>) page.

Facilities

Drexel University and the Electrical and Computer Engineering Department are nationally recognized for a strong history of developing innovative research. Research programs in the ECE Department prepare students for careers in research and development, and aim to endow graduates with the ability to identify, analyze, and address new technical and scientific challenges. The ECE Department is well equipped with state-of-the-art facilities in each of the following ECE Research laboratories:

Research Laboratories at the ECE Department

Adaptive Signal Processing and Information Theory Research Group

The Adaptive Signal Processing and Information Theory Research Group (<http://www.ece.drexel.edu/walsh/aspitrg/home.html>) conducts research in the area of signal processing and information theory. Our main interests are belief/expectation propagation, turbo decoding and composite adaptive system theory. We are currently doing projects on the following topics:

- i) Delay mitigating codes for network coded systems,
- ii) Distributed estimation in sensor networks via expectation propagation,
- iii) Turbo speaker identification,
- iv) Performance and convergence of expectation propagation,
- v) Investigating bounds for SINR performance of autocorrelation based channel shorteners.

Applied Networking Research Lab

Applied Networking Research Lab (ANRL) projects focus on modeling and simulation as well as experimentation in wired, wireless and sensor networks. ANRL is the home of MuTANT, a Multi-Protocol Label Switched Traffic Engineering and Analysis Testbed composed of 10 high-end Cisco routers and several PC-routers, also used to study other protocols in data networks as well as automated network configuration and management. The lab also houses a sensor network testbed.

Bioimage Laboratory

Uses computer gaming hardware for enhanced and affordable 3-D visualization, along with techniques from information theory and machine learning to combine the exquisite capabilities of the human visual system with computational sensing techniques for analyzing vast quantities of image sequence data.

Data Fusion Laboratory

The Data Fusion Laboratory investigates problems in multisensory detection and estimation, with applications in robotics, digital communications, radar, and target tracking. Among the projects in progress: computationally efficient parallel distributed detection architectures, data fusion for robot navigation, modulation recognition and RF scene analysis in time-varying environments, pattern recognition in biological data sequences and large arrays, and hardware realizations of data fusion architectures for target detection and target tracking.

Drexel Network Modeling Laboratory

The Drexel Network Modeling Laboratory investigates problems in the mathematical modeling of communication networks, with specific focus on wireless ad hoc networks, wireless sensor networks, and supporting guaranteed delivery service models on best effort and multipath routed networks. Typical methodologies employed in our research include mathematical modeling, computer simulation, and performance optimization, often with the end goal of obtaining meaningful insights into network design principles and fundamental performance tradeoffs.

Drexel Power-Aware Computing Laboratory

The Power-Aware Computing Lab (<http://dpac.ece.drexel.edu>) investigates methods to increase energy efficiency across the boundaries of circuits, architecture, and systems. Our recent accomplishments include the Sigil profiling tool, scalable modeling infrastructure for accelerator implementations, microarchitecture-aware VDD gating

algorithms, an accelerator architecture for ultrasound imaging, evaluation of hardware reference counting, hardware and operating system support for power-agile computing, and memory systems for accelerator-based architectures.

Drexel University Nuclear Engineering Education Laboratory

The field of nuclear engineering encompasses a wide spectrum of occupations, including nuclear reactor design, medical imaging, homeland security, and oil exploration. The Drexel University Nuclear Engineering Education Laboratory (DUNEEL) provides fundamental hands on understanding for power plant design and radiation detection and analysis. Software based study for power plant design, as well as physical laboratory equipment for radiation detection, strengthen the underlying concepts used in nuclear engineering such that the student will comprehend and appreciate the basic concepts and terminology used in various nuclear engineering professions. Additionally, students use the laboratory to develop methods for delivering remote, live time radiation detection and analysis. The goal of DUNEEL is to prepare students for potential employment in the nuclear engineering arena.

Drexel VLSI Laboratory

The Drexel VLSI Laboratory (http://ece.drexel.edu/faculty/taskin/wiki/vsilab/index.php/Main_Page) investigates problems in the design, analysis, optimization and manufacturing of high performance (low power, high throughput) integrated circuits in contemporary CMOS and emerging technologies. Suited with industrial design tools for integrated circuits, simulation tools and measurement beds, the VLSI group is involved with digital and mixed-signal circuit design to verify the functionality of the discovered novel circuit and physical design principles. The Drexel VLSI laboratory develops design methodologies and automation tools in these areas, particularly in novel clocking techniques, featuring resonant clocking, and interconnects, featuring wireless interconnects.

Drexel Wireless Systems Laboratory

The Drexel Wireless Systems Laboratory (DWSL) contains an extensive suite of equipment for constructing, debugging, and testing prototype wireless communications systems. Major equipment within DWSL includes:

- three software defined radio network testbeds (HYDRA, USRP, and WARP) for rapidly prototyping radio, optical and ultrasonic communications systems,
- a TDK RF anechoic chamber and EMSCAN desktop antenna pattern measurement system,
- a materials printer and printed circuit board milling machine for fabricating conformal antennas and
- wireless protocol conformance testing equipment from Aeroflex.

The lab is also equipped with network analyzers, high speed signal generators, oscilloscopes, and spectrum analyzers as well as several Zigbee development platforms for rapidly prototyping sensor networks.

DWSL personnel also collaborate to create wearable, fabric based transceivers through collaboration with the Shima Seiki Haute Laboratory in the Drexel ExCITE Center. The knitting equipment at Drexel includes sixteen SDS-ONE APEX3 workstations and four state-of-the-art knitting machines. The workstations accurately simulate fabric construction and provide researchers and designers the opportunity to program, create and simulate textile prototypes, import CAD specifications of final products, and produce made-to-measure or mass-produced pieces on Shima Seiki knitting machines. For testing smart textiles for biomedical, DWSL

personnel also have collaborators in the Center for Interdisciplinary Clinical Simulation and Practice (CICSP) in the Drexel College of Medicine which provides access to medical mannequin simulators.

Ecological and Evolutionary Signal-processing and Informatics Laboratory

The Ecological and Evolutionary Signal-processing and Informatics Laboratory (EESI) (<http://www.ece.drexel.edu/gailr/EESI>) seeks to solve problems in high-throughput genomics and engineer better solutions for biochemical applications. The lab's primary thrust is to enhance the use of high-throughput DNA sequencing technologies with pattern recognition and signal processing techniques. Applications include assessing the organism content of an environmental sample, recognizing/classifying potential and functional genes, inferring environmental factors and interspecies relationships, and inferring microbial evolutionary relationships from short-read DNA/RNA fragments. The lab also investigates higher-level biological systems such as modeling and controlling chemotaxis, the movement of cells.

Electric Power Engineering Center

This newly established facility makes possible state-of-the-art research in a wide variety of areas, ranging from detailed theoretical model study to experimental investigation in its high voltage laboratories. The mission is to advance and apply scientific and engineering knowledge associated with the generation, transmission, distribution, use, and conservation of electric power. In pursuing these goals, this center works with electric utilities, state and federal agencies, private industries, nonprofit organizations and other universities on a wide spectrum of projects. Research efforts, both theoretical and experimental, focus on the solution of those problems currently faced by the electric power industry. Advanced concepts for electric power generation are also under investigation to ensure that electric power needs will be met at the present and in the future.

Electronic Design Automation Facility

Industrial-grade electronic design automation software suite and integrated design environment for digital, analog and mixed-signal systems development. Field Programmable Gate Array (FPGA) development hardware. Most up-to-date FPGA/embedded system development hardware kits. Printed circuit board production facility. Also see Drexel VLSI Laboratory.

Microwave-Photonics Device Laboratories

The laboratory is equipped with test and measurement equipment for high-speed analog and digital electronics and fiber optic systems. The test equipment includes network analyzers from Agilent (100kHz- 1.3 GHz and 45 MHz-40 GHz), and Anritsu (45 MHz-6 GHz); spectrum analyzers from Tektronix, HP, and Agilent with measurement capability of DC to 40 GHz and up to 90 GHz using external mixers; signal generators and communication channel modulators from HP, Rhode-Schwartz, Systron Donner, and Agilent; microwave power meter and sensor heads, assortment of passive and active microwave components up to 40 GHz ; data pattern generator and BER tester up to 3Gb/s; optical spectrum analyzer from Anritsu and power meters from HP; single and multimode fiber optic based optical transmitter and receiver boards covering ITU channels at data rates up to 10Gb/s; passive optical components such as isolator, filter, couplers, optical connectors and fusion splicer; LPKF milling machine for fabrication of printed circuit boards; wire-bonding and Cascade probe stations; Intercontinental test fixtures for testing of MMIC circuits and solid-state transistors; state-of-the-art microwave and

electromagnetic CAD packages such as Agilent ADS, ANSYS HFSS, and COMSOL multi-physics module.

Music and Entertainment Technology Laboratory

The Music and Entertainment Technology Laboratory (MET-lab) is devoted to research in digital media technologies that will shape the future of entertainment, especially in the areas of sound and music. We employ digital signal processing and machine learning to pursue novel applications in music information retrieval, music production and processing technology, and new music interfaces. The MET-lab is also heavily involved in outreach programs for K-12 students and hosts the Summer Music Technology program, a one-week learning experience for high school students. Lab facilities include a sound isolation booth for audio and music recording, a digital audio workstation running ProTools, two large multi-touch display interfaces of our own design, and a small computing cluster for distributed processing.

NanoPhotonics+ Lab (<http://drexelnanophotonics.com>)

Our research is primarily in the area of nanophotonics with a focus on the nanoscale interaction of light with matter. Interests include: liquid crystal/polymer composites for gratings, lenses and HOEs; liquid crystal interactions with surfaces and in confined nanospaces; alternative energy generation through novel photon interactions; ink-jet printed conducting materials for RF and photonic applications; and the creation and development of smart textiles technologies including soft interconnects, sensors, and wireless implementations.

Opto-Electro-Mechanical Laboratory

This lab concentrates on the system integration on optics, electronics, and mechanical components and systems, for applications in imaging, communication, and biomedical research. Research areas include: Programmable Imaging with Optical Micro-electrical-mechanical systems (MEMS), in which microscopic mirrors are used to image light into a single photodetector; Pre-Cancerous Detection using White Light Spectroscopy, which performs a cellular size analysis of nuclei in tissue; Free-space Optical Communication using Space Time Coding, which consists of diffused light for computer-to-computer communications, and also tiny lasers and detectors for chip-to-chip communication; Magnetic Particle Locomotion, which showed that particles could swim in a uniform field; and Transparent Antennas using Polymer, which enables antennas to be printed through an ink-jet printer.

Plasma and Magnetics Laboratory

Research is focused on applications of electrical and magnetic technologies to biology and medicine. This includes the subjects of non-thermal atmospheric pressure plasma for medicine, magnetic manipulation of particles for drug delivery and bio-separation, development of miniature NMR sensors for cellular imaging and carbon nanotube cellular probes.

Power Electronics Research Laboratory

The Power Electronics Research Laboratory (PERL) is involved in circuit and design simulation, device modeling and simulation, and experimental testing and fabrication of power electronic circuits. The research and development activities include electrical terminations, power quality, solar photovoltaic systems, GTO modeling, protection and relay coordination, and solid-state circuit breakers. The analysis tools include EMPT, SPICE, and others, which have been modified to incorporate models of such controllable solid-state switches as SCRs, GTOs, and MOSFETs. These

programs have a wide variety and range of modeling capabilities used to model electromagnetics and electromechanical transients ranging from microseconds to seconds in duration. The PERL is a fully equipped laboratory with 42 kVA AC and 70 kVA DC power sources and data acquisition systems, which have the ability to display and store data for detailed analysis. Some of the equipment available is a distribution and HV transformer and three phase rectifiers for power sources and digital oscilloscopes for data measuring and experimental analysis. Some of the recent studies performed by the PERL include static VAR compensators, power quality of motor controllers, solid-state circuit breakers, and power device modeling which have been supported by PECO, GE, Gould, and EPRI.

RE Touch Lab

The RE Touch Lab is investigating the perceptual and mechanical basis of active touch perception, or haptics, and the development of new technologies for stimulating the sense of touch, allowing people to touch, feel, and interact with digital content as seamlessly as we do with objects in the real world. We study the scientific foundations of haptic perception and action, and the neuroscientific and biomechanical basis of touch, with a long-term goal of uncovering the fundamental perceptual and mechanical computations that enable haptic interaction. We also create new technologies for rendering artificial touch sensations that simulate those that are experienced when interacting with real objects, inspired by new findings on haptic perception.

Testbed for Power-Performance Management of Enterprise Computing Systems

This computing testbed is used to validate techniques and algorithms aimed at managing the performance and power consumption of enterprise computing systems. The testbed comprises a rack of Dell 2950 and Dell 1950 PowerEdge servers, as well as assorted desktop machines, networked via a gigabit switch. Virtualization of this cluster is enabled by VMWare's ESX Server running the Linux RedHat kernel. It also comprises of a rack of ten Apple Xserve machines networked via a gigabit switch. These servers run the OS X Leopard operating systems and have access to a RAID with TBs of total disk capacity.

Electrical Engineering Faculty

Juadelice Cavalcante de Oliveira, PhD (*Georgia Institute of Technology*). Associate Professor. Software-defined networking; social and economic networks; network security; design and analysis of protocols, algorithms and architectures in computer networks, particularly solutions for the Internet of Things

Tom Chmielewski, PhD (*Drexel University*). Teaching Professor. Modeling and simulation of electro-mechanical systems; optimal, adaptive and non-linear control; DC motor control; system identification; kalman filters (smoothing algorithms, tracking); image processing; robot design; biometric technology and design of embedded systems for control applications utilizing MATLAB and SIMULINK

Fernand Cohen, PhD (*Brown University*). Professor. Surface modeling; tissue characterization and modeling; face modeling; recognition and tracking.

Andrew Cohen, PhD (*Rensselaer Polytechnic Institute*). Associate Professor. Image processing; multi-target tracking; statistical pattern recognition and machine learning; algorithmic information theory; 5-D visualization

Kapil Dandekar, PhD (*University of Texas-Austin*) Director of the Drexel Wireless Systems Laboratory (DWSL); Associate Dean of Research, College of Engineering. Professor. Cellular/mobile communications and wireless LAN; smart antenna/MIMO for wireless communications; applied computational electromagnetics; microwave antenna and receiver development; free space optical communication; ultrasonic communication; sensor networks for homeland security; ultrawideband communication.

Afshin Daryoush, ScD (*Drexel University*). Professor. Digital and microwave photonics; nonlinear microwave circuits; RFIC; medical imaging.

Anup Das, PhD (*National University of Singapore*). Assistant Professor. Design of algorithms and architecture for neuromorphic computing; machine learning particularly unsupervised learning using spiking neural networks; in-memory computing using non-volatile memories

Bruce A. Eisenstein, PhD (*University of Pennsylvania*) Vice Dean, College of Engineering; Arthur J. Rowland Professor. Professor. Pattern recognition; estimation; decision theory.

Adam K. Fontecchio, PhD (*Brown University*) Director, Center for the Advancement of STEM Teaching and Learning Excellence (CASTLE). Professor. Electro-optics; remote sensing; active optical elements; liquid crystal devices.

Gary Friedman, PhD (*University of Maryland-College Park*) Associate Department Head for Graduate Affairs. Professor. Biological and biomedical applications of nanoscale magnetic systems.

Allon Guez, PhD (*University of Florida*). Professor. Intelligent control systems; robotics, biomedical, automation and manufacturing; business systems engineering.

Peter R. Herczfeld, PhD (*University of Minnesota*) Lester A. Kraus Professor/Director, Center for Microwave/Lightwave Engineering. Professor. Lightwave technology; microwaves; millimeter waves; fiberoptic and integrated optic devices.

Leonid Hrebien, PhD (*Drexel University*). Professor. Tissue excitability; acceleration effects on physiology; bioinformatics.

Nagarajan Kandasamy, PhD (*University of Michigan*) Associate Department Head for Undergraduate Affairs. Professor. Embedded systems, self-managing systems, reliable and fault-tolerant computing, distributed systems, computer architecture, and testing and verification of digital systems.

Youngmoo Kim, PhD (*MIT*). Professor. Audio and music signal processing, voice analysis and synthesis, music information retrieval, machine learning.

Fei Lu, PhD (*University of Michigan-Ann Arbor*). Assistant Professor. Power electronics.

Karen Miu, PhD (*Cornell University*). Professor. Power systems; distribution networks; distribution automation; optimization; system analysis.

Bahram Nabet, PhD (*University of Washington*) Associate Dean for Special Projects, College of Engineering; Electrical and Computer Engineering. Professor. Optoelectronics; fabrication and modeling; fiber optic devices; nanoelectronics; nanowires.

Prawat Nagvajara, Ph.D. (*Boston University*). Associate Professor. System on a chip; embedded systems; power grid computation; testing of computer hardware; fault-tolerant computing; VLSI systems; error control coding.

Dagmar Niebur, PhD (*Swiss Federal Institute of Technology*). Associate Professor. Intelligent systems; dynamical systems; power system monitoring and control.

Christopher Peters, PhD (*University of Michigan-Ann Arbor*). Teaching Professor. Nuclear reactor design; ionizing radiation detection; nuclear forensics; power plant reliability and risk analysis; naval/marine power and propulsion; directed energy/high power microwaves; nonstationary signal processing; radar; electronic survivability/susceptibility to harsh environments; electronic warfare

Gail L. Rosen, PhD (*Georgia Institute of Technology*). Associate Professor. Signal processing, signal processing for biological analysis and modeling, bio-inspired designs, source localization and tracking.

Ionnis Savidis, PhD (*University of Rochester*). Assistant Professor. Analysis, modeling, and design methodologies for high performance digital and mixed-signal integrated circuits; Emerging integrated circuit technologies; Electrical and thermal modeling and characterization, signal and power integrity, and power and clock delivery for 3-D IC technologies

Kevin J. Scoles, PhD (*Dartmouth College*). Associate Professor. Microelectronics; electric vehicles; solar energy; biomedical electronics.

Harish Sethu, PhD (*Lehigh University*). Associate Professor. Protocols, architectures and algorithms in computer networks; computer security; mobile ad hoc networks; large-scale complex adaptive networks and systems.

James Shackelford, PhD (*Drexel University*). Assistant Professor. Medical image processing, high performance computing, embedded systems, computer vision, machine learning

P. Mohana Shankar, PhD (*Indian Institute of Technology*) *Allen Rothwarf Professor of Electrical and Computer Engineering*. Professor. Wireless communications; biomedical ultrasonics; fiberoptic bio-sensors.

Matthew Stamm, PhD (*University of Maryland-College Park*). Assistant Professor. Information Security; multimedia forensics and anti-forensics; information verification; adversarial dynamics; signal processing

Baris Taskin, PhD (*University of Pittsburgh*). Professor. Electronic Design Automation (EDA) of VLSI Circuits; high-performance circuits; resonant clocking; integrated circuit (IC) physical design; nanoarchitectures; and wireless IC interconnects

John Walsh, PhD (*Cornell University*). Associate Professor. Bounding the region of entropic vectors and its implications for the limits of communication networks, big data distributed storage systems, and graphical model based machine learning; efficient computation and analysis of rate regions for network coding and distributed storage: code construction, polyhedral computation, enumeration, hierarchy, and symmetry

Steven Weber, PhD (*University of Texas-Austin*) *Interim Department Head*. Professor. Mathematical modeling of computer and communication networks, specifically streaming multimedia and ad hoc networks.

Jauelice Cavalcante de Oliveira, PhD (*Georgia Institute of Technology*). Associate Professor. Software-defined networking; social and economic

networks; network security; design and analysis of protocols, algorithms and architectures in computer networks, particularly solutions for the Internet of Things

Engineering Management

Major: Engineering Management

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 15.1501

Standard Occupational Classification (SOC) code: 11-9041

About the Program

In our increasingly complex, technologically oriented economy, demand has risen for professionals with the expertise to manage both human and technological resources; a combination of talents crucial to organizations competing in the global marketplace. Students graduating with the master's in engineering management are significantly better positioned to meet the challenge.

The Engineering Management Program (<http://www.drexel.edu/egmt>) is designed to provide the background in management science necessary to advance from purely technical positions to supervisory responsibilities in such areas as research and development, production, engineering, design, and technical marketing. Study can be on a part-time or full-time basis, and all courses are offered online.

Engineering management is a multidisciplinary program offering a core curriculum and specialization in a selected area of technology or management. Majors in engineering management should hold a bachelor's degree in engineering, basic science, or a related field. The program is open to those professionals who aspire to be engineering or technically based managers.

Accelerated Degree (BS/MS) Option

Note: Currently and until further notice, the program will not be accepting applications to BS/MS with Engineering Management.

Engineers often require more technical skills. Particularly upon acquiring leadership and managerial positions, they must be equipped to immediately contribute to their organization.

The College of Engineering offers an accelerated degree program to undergraduate degree students in any discipline who have:

- Completed between 90 and 120 credits in their major
- Maintain a minimum GPA of 3.2
- Submit a professional resume
- Submit a personal statement explaining why they wish to pursue the degree

The MS is offered entirely online, making it convenient and flexible. Students will be prepared for early success and leadership positions within the industry. They will have the additional advantage of attending classes with traditional MS students who will provide a unique professional perspective to supplement their undergraduate co-op experiences.

Dual-Degree Requirements

Students may simultaneously pursue the master's in engineering management and another master's degree. Students must satisfy program requirements for each degree, with a maximum of 15.0 credits transferred from one program to the other. (The master's in engineering management requires 45.0 credits; if the other degree requires 45.0 credits, then 60.0 credits are required under the dual degree program.) Approval for the dual degree program must be obtained from the program advisor in each department or program.

Certificate Opportunity

The Engineering Management Program offers a five-course Graduate Certificate in Engineering Management (p. 324).

Students can pursue the Graduate Certificate in Engineering Management, earn the credential, and subsequently apply those credits toward completion of a master's in engineering management. However, current students in pursuit of the master's in engineering management may not simultaneously pursue the graduate certificate.

Non-engineering management graduate students in the College of Engineering (including those in the accelerated bachelor's/master's program) are welcome to apply for the certificate with advisor approval, and they can do so while simultaneously pursuing their primary degree.

Additional Information

For more information about the program, visit the Engineering Management (<http://online.drexel.edu/online-degrees/engineering-degrees/ms-egmt>) program page.

Admission Requirements

Admission to this program requires:

- A four-year bachelor of science degree in engineering from an ABET-accredited institution in the United States or an equivalent international institution. Bachelor's degrees in math or the physical sciences may also be considered for admission.
- Minimum cumulative undergraduate GPA of 3.0. If any other graduate work has been completed, the average GPA must be at least 3.0.
- Complete graduate school application.
- Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended.
- Two letters of recommendation, professional or academic (professional preferred).
- Resume
- A 750-word essay on one of two prompts: technical analysis problem or human resource problem (details of each problem are included in the essay tab of the online application).
- International students must submit an Internet-based TOEFL (IBT = score of 100 or higher).

At least three years of relevant professional work experience are recommended but not required.

Interested students should complete the Drexel University Online admission application (<http://online.drexel.edu/online-degrees/engineering-degrees/ms-egmt/#admissionscriteria>) for admission into this online program.

Degree Requirements

The master's in engineering management degree requires 45.0 credits: 30.0 credits in required core courses and 15.0 graduate elective credits.

Students may take their required elective credits from any graduate-level course(s) in engineering, business, or another college for which they have adequate preparation and can obtain approvals from the college and the engineering management program.

All candidates are encouraged to discuss areas of interest with the program advisor and to develop a proposed plan of study during the early stages of the program.

Note: Specific course requirements may be waived for students who have taken equivalent courses elsewhere.

Engineering Management

EGMT 501	Leading and Managing Technical Workers	3.0
EGMT 502	Analysis and Decision Methods for Technical Managers	3.0
EGMT 504	Design Thinking for Engineering Communications	3.0
EGMT 581	Meeting Engineering Leadership Challenges	3.0

Quantitative Analysis

EGMT 571	Engineering Statistics	3.0
EGMT 572	Statistical Data Analysis *	3.0
EGMT 573	Operations Research	3.0

Economics and Financial Management

EGMT 531	Engineering Economic Evaluation & Analysis	3.0
EGMT 535	Financial Management	3.0

Engineering Management Capstone

EGMT 692	Engineering Management Capstone	3.0
----------	---------------------------------	-----

Electives

Select five of the following electives: ** 15.0

EGMT 536	Advanced Financial Management for Engineers
EGMT 650	Systems Thinking for Leaders

Marketing & Business Development

EGMT 614	Marketing: Identifying Customer Needs
EGMT 615	New Product Conceptualization, Justification, and Implementation
EGMT 616	Value Creation through New Product Development
EGMT 660	Sustainable Business Practices for Engineers

Project Management

EGMT 620	Engineering Project Management
EGMT 625	Project Planning, Scheduling and Control
EGMT 630	Global Engineering Project Management

Systems Engineering & Systems Thinking

EGMT 635	Visual System Mapping
SYSE 685	Systems Engineering Management
SYSE 688	Systems Engineering Analysis
SYSE 690	Modeling and Simulation

Engineering Law & Ethics

EGMT 610	Ethics & Business Practices for Engineers
EGMT 652	Engineering Law

Other Approved Electives

SYSE 510	Systems Engineering Process
SYSE 511	Systems Engineering Tools
SYSE 520	Global Sustainment and Integrated Logistics
SYSE 521	Integrated Risk Management
SYSE 522	Engineering Supply Chain Systems
SYSE 523	Systems Reliability Engineering
SYSE 524	Systems Reliability, Availability & Maintainability Analysis
SYSE 525	Statistical Modeling & Experimental Design
SYSE 530	Systems Engineering Design
SYSE 531	Systems Architecture Development

SYSE 532	Software Systems Engineering	
SYSE 533	Systems Integration and Test	
Total Credits		45.0

* EGMT 572 Statistical Data Analysis requires as a prerequisite EGMT 571 Managerial Statistics or approval from the program administration to complete a waiver and request to take then pass the STAT Placement Exam in place of EGMT 571. If approved for the waiver of EGMT 571, students will be eligible to complete an upper level course substitution to satisfy the degree requirements.

More information on this option is available on the Engineering Management website (<http://www.drexel.edu/egmt/programs/onlinemasters/EGMT%20571>).

** Students may select electives from other disciplines outside of Engineering Management with prior approval from their advisor.

Sample Plan of Study

Term 1		Credits
EGMT 501	Leading and Managing Technical Workers	3.0
EGMT 504	Design Thinking for Engineering Communications	3.0
Term Credits		6.0

Certificate in Engineering Management

Certificate Level: Graduate

Admissions Requirements: Undergraduate degree in engineering or the sciences

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 15.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 15.1501

Standard Occupational Classification (SOC) Code: 11-9040

This program is a superb training ground for engineers and scientists who want to obtain a solid foundation in critical areas in management, communications, economics and finance without having to commit to the entire graduate program. After completing the program, students have the option of applying the earned credits toward a master's degree in engineering management.

Admission Requirements

Admission to this program requires:

- A four-year bachelor of science degree in engineering from an ABET-accredited institution in the United States or an equivalent international institution. Bachelor's degrees in math or the physical sciences may also be considered for admission.
- Minimum cumulative undergraduate GPA of 3.0. If any other graduate work has been completed, the average GPA must be at least 3.0.
- Complete graduate school application.
- Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended.
- Two letters of recommendation, professional or academic (professional preferred).
- Resume
- A 750-word essay on one of two prompts: technical analysis problem or human resource problem (details of each problem are included in the essay tab of the online application).

- International students must submit an Internet-based TOEFL (IBT = score of 100 or higher).

At least three years of relevant professional work experience are recommended, but not required.

Continuing master's students pursuing other technical disciplines may also complete the certificate courses as electives with approval from their advisor (e.g., electrical engineering master's students may complete these four courses to satisfy four of their five elective requirements).

Program Requirements

Required Courses

EGMT 501	Leading and Managing Technical Workers	3.0
EGMT 504	Design Thinking for Engineering Communications	3.0
EGMT 531	Engineering Economic Evaluation & Analysis	3.0
EGMT 535	Financial Management	3.0

Additional Information

To learn more about the certificate or to apply for admission, please visit the Engineering Management (<http://drexel.edu/engmgmt/egmt/academics/certificates>) program page.

Accelerated/Dual Degree

Note: Currently and until further notice, the program will not be accepting applications to BS/MS with Engineering Management.

About the Program

The Engineering Management Program is designed to provide the background in management science necessary to advance from purely technical positions to supervisory responsibilities in such areas as research and development, production, engineering, design, and technical

marketing. Study can be on a part-time or full-time basis, and all courses are offered online.

In our increasingly complex, technologically-oriented economy, demand has risen for professionals with the expertise to manage both human and technological resources — a combination of talents crucial to organizations competing in the global marketplace. Students graduating with the master's in engineering management are significantly better positioned to meet the challenge.

Engineering management is a multidisciplinary program offering a core curriculum and specialization in a selected area of technology or management. Majors in engineering management must hold a bachelor's degree in engineering, basic science, or a related field. The program is open to those professionals who aspire to be engineering or technically based managers.

Students in the following majors can apply to pursue the MS portion of the BS/MS in Engineering Management:

- BS Architectural Engineering
- BS Biomedical Engineering
- BS Chemical Engineering
- BS Civil Engineering
- BS Computer Engineering
- BS Electrical Engineering
- BS Environmental Engineering
- BS Materials Science and Engineering
- BS Mechanical Engineering

Admission Requirements

Admission to the BS/MS in Engineering Management requires the following:

- Must be between 90-120 credits
- Must have 3.2 GPA or higher
- Student in College of Engineering or BMES
- Submission of professional resume

Degree Requirements

Required		
EGMT 501	Leading and Managing Technical Workers	3.0
EGMT 502	Analysis and Decision Methods for Technical Managers	3.0

Engineering Management Faculty

James Breen, MBA, PE (*Drexel University*). Adjunct Instructor. Vice President of Manufacturing Network Strategy at Johnson & Johnson.

James C. Deiner, MBA (*Cornell University*). Adjunct Instructor. IT projects in the pharmaceutical, logistics and financial services industries.

James Lill, MS, PE (*Drexel University*). Adjunct Instructor. Director of Facilities, Planning and Management for the Downtown Area School District.

Carole Mablekos, PhD (*Purdue University*). Adjunct Instructor. Public speaking, technical writing, organizational behavior, and business writing courses.

Miray Pereira, MBA (*Rutgers University*). Adjunct Instructor. Manages a team of consultants responsible for development, facilitation and implementation of fundamental demand management systems and capabilities for DuPont, most recently with the DuPont Safety & Protection Platform in strategic planning, mergers & acquisitions.

Fredric Plotnick, PhD, JD, PE (*Drexel University; Widener University*). Adjunct Professor. CEO and principal consultant of Engineering & Property Management Consultants, Inc.

Stephen Smith, PhD (*Drexel University*). Associate Teaching Professor. Development of online learning and distance teaching/learning techniques for engineering.

Walter Sobkiw, BS (*Drexel University*). Adjunct Faculty. Author of "Systems Engineering Design Renaissance" and "Systems Practices as Common Sense."

Fernando Tovia, PhD (*University of Arkansas*). Adjunct Instructor. Core quantitative analysis, strategic planning, supply chain management and manufacturing systems.

John Via, DEngr (*Southern Methodist University*) Director of Engineering Management; Associate Dean for Online Programs. Teaching Professor.

Engineering Technology

Major: Engineering Technology

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 15.0000

Standard Occupational Classification (SOC) code: 17-3029

About the Program

The Master of Science in Engineering Technology offers courses focused on the technologies used in today's modern emerging industries. The program is designed to provide specialized engineering technology education to those who currently hold an accredited baccalaureate degree in engineering technology or has relevant work or class experience in science, technology, engineering, or mathematics (STEM) fields. The primary goal of the Master of Science in Engineering Technology is to develop advanced-level practitioners who are capable in resolving technical problems through the application of engineering principles and technology.

The program can be pursued on a part-time or full-time basis. Courses will be delivered in several modes: face-to-face, on-line, or real-time videoconferencing, and allows practicing professionals the opportunity to update knowledge and skills based on the latest technological developments in the industrial environment and therefore advance in their chosen careers. The flexibility of the program curriculum permits students to select a combination of courses relevant to their individual career goals or to provide the foundation for further advanced study.

Program Goals

Graduates of the Master of Science in Engineering Technology will be expected to:

- Apply scientific and technological concepts to solving technological problems.

- Apply concepts and skills developed in a variety of technical and professional disciplines including computer applications and networking, materials properties and production processes, and quality control to improve production processes and techniques.
- Plan, facilitate, and integrate technology and problem solving techniques in the leadership functions of the industrial enterprise system.
- Engage in applied technical research in order to add to the knowledge of the discipline and to solve problems in an industrial environment.
- Apply theories, concepts, and principles of related disciplines to develop the communication skills required for technical-managers.

For additional information, view the College of Engineering's Engineering Technology program (<http://drexel.edu/engtech>) web page or contact Gerry Willis at 215-895-6253 or gtm23@drexel.edu.

Admission Requirements

Applicants must have a 3.0 grade point average in their undergraduate or upper division (junior and senior year) coursework.

International students who have their undergraduate degree from a country whose language is not English can be admitted with a Test of English as a Foreign Language (TOEFL) test score of 550 or better. For more information regarding international applicant requirements, view the International Students Admissions Information (<http://drexel.edu/grad/resources/international>) page.

Prerequisite courses

The following prerequisite courses must be completed at the undergraduate level with a minimum grade of C:

- Calculus I
- Calculus II
- Physics I (can be algebra-based)
- Physics II (can be algebra-based)
- AC/DC Circuit Analysis
- Digital Electronics
- Chemistry I or Materials
- Business Statistics

Visit the Graduate Admissions (<http://www.drexel.edu/grad/programs/coe/engineering-technology>) website for more information about requirements and deadlines, as well as instructions for applying online.

Degree Requirements

Candidates for the MS in Engineering Technology must complete a minimum of 45.0 quarter credits. A minimum grade of B is required in all core courses and no more than two C grades in electives.

Of the 45.0 quarter credits required for the degree, 30.0 must be earned at Drexel University, including 24.0 credits of Engineering Technology (ET) courses. A maximum of 15.0 transfer credits may be allowed for graduate courses taken at other institutions, if they are appropriate to the student's plan of study.

Core Courses

ET 605	Materials for Emerging Technologies	3.0
ET 610	Networks for Industrial Environments	3.0
ET 615	Rapid Prototyping and Product Design	3.0
ET 619	Programmable Devices and Systems	3.0
ET 620	Microsystems and Microfabrication	3.0

ET 725	Sensors and Measurement Systems	3.0
ET 732	Modern Energy Conversion Technologies	3.0
EGMT 571	Engineering Statistics	3.0
EGMT 610	Ethics & Business Practices for Engineers	3.0
Electives		9.0
Select three of the following:		
ET 635	Engineering Quality Methods	
ET 675	Reliability Engineering	
ET 730	Lean Manufacturing Principles	
ET 755	Sustainable and Green Manufacturing	
PROJ 501	Introduction to Project Management	
EGMT 572	Statistical Data Analysis	
SYSE 685	Systems Engineering Management	
Capstone Course		9.0
ET 775	Master's Project and Thesis in Engineering Technology *	
Total Credits		45.0

* This is a three (3) credit course that is repeated three (3) times.

Engineering Technology Faculty

M. Eric Carr, MsCpE (*Drexel University*). Instructor. Computer Engineering, Digital Design, Programmable Devices, Genetic Algorithms, Programming, Additive Manufacturing, Maker Movement.

Yalcin Ertekin, PhD (*University of Missouri-Rolla*). Associate Clinical Professor. High speed machining with micromachining applications, machining process optimization and condition monitoring using multiple sensors, FEA simulation with 3D solid modeling applications, rapid prototyping and reverse engineering, quality and reliability improvement through statistically designed experiments, neural networks and data mining and Taguchi methods, CNC machine tool calibration characterization of cold fastening, clinching and self-pierced riveting processes, non-invasive surgical tool design, student learning enhancement using online simulation tools.

Vladimir Genis, PhD (*Kiev State University, Ukraine*) Department Head, *Engineering Technology*. Professor. Ultrasound wave propagation and scattering, ultrasound imaging, electronic instrumentation, piezoelectric transducers, and engineering education. Designed and developed diagnostic and therapeutic equipment for medical applications and electronic systems and techniques for defense-related and industrial applications.

Irina Ciobanescu Husanu, PhD (*Drexel University*). Assistant Clinical Professor. Microgravity combustion, thermal-fluid science with applications in micro-combustion, fuel cells and research of alternative and green fuels, energy conversion and renewable energy, industrial experience in aerospace engineering areas (theoretical analysis, numerical simulations and experimental investigations), design and testing of propulsion systems, mechanical instrumentation, and developing industrial applications of aircraft engines.

Lunal Khuon, PhD (*Massachusetts Institute of Technology*). Clinical Associate Professor. Radio frequency, analog, and biomedical integrated circuits, biomedical instrumentation, neural interfaces, wireless systems, and engineering education. Research topics include area-efficient and power-efficient integrated circuits, plasmonics, adiabatic circuits, rotary clocks, and medical cyber-physical systems.

Michael Mauk, PhD, PE (*University of Delaware*). Assistant Clinical Professor. Rapid prototyping, microfluidics, alternative energy including

solar energy and photovoltaics, semiconductor materials science, nanotechnology.

Environmental Engineering

Major: Environmental Engineering

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS); 90.0 (PhD)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 14.1401

Standard Occupational Classification (SOC) code: 17-2081

About the Program

Programs in environmental engineering are available with specializations in air pollution, hazardous and solid waste, subsurface contaminant hydrology, water resources, water and wastewater, and sustainability treatment.

Environmental engineering is concerned with protecting human, animal, and plant populations from the effects of adverse environmental factors, including toxic chemicals and wastes, pathogenic bacteria, and global warming.

Environmental engineers also try to minimize the effect of human activities on the physical and living environment so that we can all live more healthy and sustainable lives. This field builds on other branches of engineering, especially civil, chemical, and mechanical engineering. It also builds on information from many of the sciences, such as chemistry, physics, hydrology, geology, atmospheric science, and several specializations of biology (ecology, microbiology) and public health. Students who elect to study environmental engineering will become familiar with many of these areas because maintaining and improving the environment requires that problems be evaluated and solutions found using a multidisciplinary approach.

For more information about this program, visit the MS in Environmental Engineering (<http://www.drexel.edu/cae/academics/grad-doctoral-programs>) web page.

Admission Requirements

In addition to the general entrance requirements for all environmental engineering applicants, entrance to the MS in Environmental Engineering program requires an undergraduate engineering degree from an ABET-approved institution. Students lacking this credential will be required to complete additional undergraduate courses to incorporate related elements of the functional equivalent of the ABET engineering BS degree. Typically, courses must be taken in computer programming, differential equations, linear algebra and fluid mechanics.

For additional information on how to apply, visit Drexel's Admissions page for Environmental Engineering (<http://www.drexel.edu/grad/programs/coe/environmental-engineering>).

Degree Requirements (MS)

The MS in Environmental Engineering program requires 45.0 credits of coursework. Both a theses and a non-thesis option are available. It is possible to finish the MS degree on either a part-time or full-basis. The degree consists of a set of core courses, a sequence in one of several areas of emphasis (treatment process, human risks, water resources, environmental modeling, and air quality) and completion of cognate and

elective sequences. After the first term of study, a detailed plan of study is developed with the student's graduate advisor.

Students entering the program without an ABET accredited BS degree in engineering will be required to take additional undergraduate coursework depending on their background and their career objectives.

Core Courses

ENVE 660	Chemical Kinetics in Environmental Engineering	3.0
ENVS 501	Chemistry of the Environment	3.0
An approved course in statistics such as ENVE 750, ENVS 506 or BMES 510		3.0
An approved policy course such as EOH 560, PLCY 503 or ENVP 774		3.0
An approved life science course such as ENVE 516 or ENVS 511		3.0
Specialization Courses *		10.0-13.0
Cognate Discipline **		12.0
Electives or Thesis		8.0-11.0
Total Credits		45.0-51.0

* Students must take 4 courses in an approved specialization, such as environmental treatment processes, human risks, water resources, environmental modeling, or air quality.

** Students must complete a course sequence aside from their specialization. This might include a second specialization or a sequence within engineering, an applicable science, public health, or other as approved by the graduate advisor.

Degree Requirements (PhD)

Applicants to the doctoral program are judged on the basis of academic excellence and the alignment of their research interests with those of the faculty in the School. To be awarded the PhD, students must complete a major research project publishable in peer-reviewed journals. The degree requires a total of 90.0 credits; credits earned toward a master's degree may apply toward the 90.0 credits. There is no prescribed coursework—students must take courses needed to complete their research under guidance of an academic advisor. There is a one-year residency requirement. Students must successfully pass the candidacy examination, the proposal defense, and a PhD dissertation and oral defense.

Prospective PhD student are welcome to contact the Department (<http://www.drexel.edu/cae>) to discuss their research interests.

Dual Degree

Dual MS Degree

The university encourages students with broad interest to consider a dual-master's option. Students can simultaneously work on two master's degree, applying to both programs a limited number of credits (a maximum of 15.0 to each). Applicants interested in a dual degree should apply for just one program; once enrolled at Drexel, the student may then request admission to the second program. The graduate advisors from both degree programs must approve the student's enrollment, and they must approve the transfer of credits from one program to another. Applicants considering two degrees are encouraged to contact the appropriate academic departments.

Bachelor's/Master's Dual Degree Program

The BS/MS dual degree is an accelerated program providing the academically qualified student an opportunity to simultaneously earn both BS and MS degrees (two diplomas are awarded) in program areas of his/her choice in five years, the time normally required to finish a bachelor's degree alone. Because both degrees are completed in the time usually

required for the bachelor's degree, both degrees may be completed at the undergraduate tuition rate.

The five-year completion period is possible because fewer undergraduate credits are required for the combined degrees (180.0 credits instead of 192.0 credits). Also, co-op experience may be adjusted (two co-op periods instead of three) giving the BS/MS student two additional quarters to take courses. If needed, students may also take evening courses while on co-op.

The program combines the practical work experience of Drexel undergraduate cooperative education with the graduate credentials of an advanced degree. Students may earn both degrees in the same major, or may complete their master's degree in a different field. With both an undergraduate and graduate degree and practical work experience, BS/MS graduates enter the work force with specialized knowledge and training.

Students interested in the Environmental Engineering BS/MS program, may contact Dr. Charles N. Haas at haas@drexel.edu for more information.

Facilities

The Department of Civil, Architectural, and Environmental Engineering is well equipped with state-of-the-art facilities:

- Analytical instrumentation for measuring biological and chemical contaminants in air, water and land
- Field sampling equipment for water and air measurements
- Molecular biology capability
- Computational facilities including access to multi-processor clusters, and advanced simulation and data analysis software

Civil, Architectural and Environmental Engineering Faculty

Abieyuwa Aghayere, PhD (*University of Alberta*). Professor. Structural design - concrete, steel and wood; structural failure analysis; retrofitting of existing structures; new structural systems and materials; engineering education.

A. Emin Aktan, PhD (*University of Illinois at Urbana-Champaign*) *John Roebling Professor of Infrastructure Studies*. Professor. Structural engineering; health monitoring of large infrastructure systems; infrastructure evaluation; intelligent systems.

Ivan Bartoli, PhD (*University of California, San Diego*). Associate Professor. Non-destructive evaluation and structural health monitoring; dynamic identification, stress wave propagation modeling.

Robert Brehm, PhD (*Drexel University*). Associate Teaching Professor. International infrastructure delivery; response to natural catastrophes; risk assessment and mitigation strategies; project management techniques.

S.C. Jonathan Cheng, PhD (*West Virginia University*). Associate Professor. Soil mechanics; geosynthetics; probabilistic design; landfill containments; engineering education.

Peter DeCarlo, PhD (*University of Colorado*) *Graduate Studies Advisor*. Associate Professor. Outdoor air quality, particulate matter size and composition instrumentation and measurements, source apportionment of ambient particulate matter, climate impacts of particulate matter.

Eugenia Ellis, RA, PhD (*Virginia Polytechnic State University*). Associate Professor. Extended-care facilities design, research on spatial visualization, perception and imagination.

Patricia Gallagher, PhD (*Virginia Polytechnic Institute*). Associate Professor. Soil mechanics; geoenvironmental; ground improvement; sustainability.

Patrick Gurian, PhD (*Carnegie-Mellon University*). Associate Professor. Risk analysis of environmental and infrastructure systems; novel adsorbent materials; environmental standard setting; Bayesian statistical modeling; community outreach and environmental health.

Charles N. Haas, PhD (*University of Illinois-Urbana*) *L. D. Betz Professor and Department Head, Civil, Architectural and Environmental Engineering*. Professor. Control of human exposures to and risk assessment of pathogenic organisms; water and waste treatment; homeland security.

Ahmad Hamid, PhD (*McMaster University*). Professor. Engineered masonry; seismic behavior, design and retrofit of masonry structures; development of new materials and building systems.

Y. Grace Hsuan, PhD (*Imperial College*). Professor. Director, Center for Family Intervention Science, a multidisciplinary research program focused on developing and testing family centered care models across the life span and in a variety of health care settings. Developer of Attachment Based Family Therapy (ABFT) focused on youth with depression, suicide trauma, and youth in the LGBTQ community. Behavioral health integration into primary care

Joseph B. Hughes, PhD (*University of Iowa*) *Dean of the College of Engineering and Distinguished Professor*. Biological processes and applications of nanotechnology in environmental systems.

L. James Lo, PhD (*University of Texas at Austin*). Assistant Professor. Computational Fluid Dynamics (CFD) and airflow simulation; Indoor Environmental Quality; Building control integration with building information management systems.

Roger Marino, PhD (*Drexel University*). Associate Teaching Professor. Fluid mechanics; water resources; engineering education; land development.

Joseph P. Martin, PhD (*Colorado State University*). Professor. Geotechnical and geoenvironmental engineering; hydrology; transportation; waste management.

James E. Mitchell, MArch (*University of Pennsylvania*) *Associate Dean for Undergraduate Affairs*. Professor. Architectural engineering design; building systems; engineering education.

Franco Montalto, PhD (*Cornell University*). Associate Professor. Effects of built infrastructure on societal water needs, ecohydrologic patterns and processes, ecological restoration, green design, water interventions.

Michael Ryan, PhD (*Drexel University*). Assistant Teaching Professor. Microbial Source Tracking (MST); Quantitative Microbial Risk Assessment (QMRA); Dynamic Engineering Systems Modeling; Molecular Microbial Biology; Environmental Statistics; Engineering Economics; Microbiology

Christopher Sales, PhD (*University of California, Berkeley*). Assistant Professor. Environmental microbiology and biotechnology; biodegradation of environmental contaminants; microbial processes for energy and resource recovery from waste.

Yared Shifferaw, PhD (*Johns Hopkins University*). Assistant Professor. Computational and experimental mechanics; structural stability; optimization; health monitoring and hazard mitigation; sustainable structures; emerging materials; thin-walled structures and metallic structures.

Kurt Sjoblom, PhD (*Massachusetts Institute of Technology*). Assistant Teaching Professor. Laboratory testing of geomaterials, geotechnical engineering, foundation engineering.

Sabrina Spatari, PhD (*University of Toronto*). Associate Professor. Research in industrial ecology; development and application of life cycle assessment (LCA) and material flow analysis (MFA) methods for guiding engineering and policy decisions; specific interest in biomass and bioenergy, biofuels, and urban infrastructure.

Robert Swan Associate Teaching Professor. Geotechnical and Geosynthetic Engineering; soil/geosynthetic interaction and performance; laboratory and field geotechnical/geosynthetic testing.

Michael Waring, PhD (*University of Texas-Austin*) *Associate Department Head for Undergraduate Programs; Director of Architectural Engineering Program*. Associate Professor. Indoor air quality and building sustainability; indoor particulate matter fate and transport; indoor chemistry and particle formation; secondary impacts of control technologies and strategies.

Jin Wen, PhD (*University of Iowa*). Professor. Architectural engineering; Building Energy Efficiency; Intelligent Building; Net-zero Building; and Indoor Air Quality.

Aspasia Zerva, PhD (*University of Illinois*). Professor. Earthquake engineering; mechanics; seismology; structural reliability; system identification; advanced computational computational methods in structural analysis.

Emeritus Faculty

Harry G. Harris, PhD (*Cornell University*). Professor Emeritus. Structural models; dynamics of structures, plates and shells; industrialized building construction.

Joseph V. Mullin, PhD (*Pennsylvania State University*) *Associate Department Head*. Professor Emeritus. Structural engineering; failure analysis; experimental stress analysis; construction materials; marine structures.

Richard Weggel, PhD (*University of Illinois*) *Samuel S. Baxter Professor Emeritus; Civil and Environmental Engineering*. Professor Emeritus. Coastal engineering; hydraulics engineering; hydrology.

Richard Woodring, PhD (*University of Illinois*) *Dean of Engineering Emeritus*. Professor Emeritus. Structural engineering, reinforced concrete.

Graduate Certificate in Project Management

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 18.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 52.0211

Standard Occupational Classification (SOC) Code: 11-9199

Gainful Employment Disclosure

While project management has been around since the 1950s, the field has experienced an explosion of growth, both in the number of project managers being employed and in the expectations of the industry. Not only is work becoming more “projectized,” but also more organizations are using project management to achieve business results. This requires a solid foundation in business fundamentals, communication, and leadership, as well as skills in program management and portfolio management.

The graduate certificate in Project Management is designed to support the growing need for project management graduate education. It provides students with the knowledge and skills necessary for successful professional and leadership careers in the rapidly-expanding field of project management and will prepare students to pursue the Certified Associate in Project Management (CAPM)[®] or Project Management Professional (PMP)[®] credential from the Project Management Institute (PMI).

Program Requirements

Required Courses

PROJ 501	Introduction to Project Management	3.0
PROJ 502	Project Planning & Scheduling	3.0
PROJ 510	Project Quality Management	3.0
PROJ 515	Project Estimation & Cost Management	3.0
PROJ 603	Project Leadership & Teamwork	3.0

Elective courses 3.0

Select 1 of the following:		
PROJ 520	Project Risk Assessment & Management	
PROJ 530	Managing Multiple Projects	
PROJ 535	International Project Management	
PROJ 540	Project Procurement Management	
PROJ 645	Project Management Tools	
PROJ 650	Project Stakeholder Management	
PROJ 665	Managing Project Knowledge	
Other graduate-level courses, with approval of student's Academic Advisor and the Project Management program (must be 5XX or higher)		

Total Credits 18.0

Additional Information

Interested candidates should visit Drexel University Online (<http://online.drexel.edu/online-degrees/business-degrees/project-management>) for admissions requirements and more information about how to apply.

Current Drexel graduate students and alumni should contact Mercedes Moultrie, Program Manager, at 215-571-3939 or mm342@drexel.edu, for admissions information for the Graduate Certificate in Project Management.

CAPM, PMP, and PMBOK are registered marks of the Project Management Institute, Inc.

Graduate Minor in Computational Engineering

About the Graduate Minor

The graduate minor in computational engineering gives students pursuing a graduate degree in the College of Engineering an opportunity to develop

core computational and mathematical competencies to complement their coursework in engineering.

Successful completion of the minor requires that students take five courses (15.0 credits). At least three courses must come from the three of core subject areas; the student must take at least one course in each of the three core subject areas. The remaining two courses may be either core courses or elective courses.

The distinction between core and elective courses is that core courses are intended to be accessible to any College of Engineering graduate student without prerequisites. Elective courses, on the other hand, may require additional prerequisites, and may be suitable only for students in certain academic disciplines or with certain academic backgrounds.

Admission Requirements

Admission to the minor requires enrollment in a College of Engineering graduate program. All College of Engineering graduate students, including BS/MS students, may pursue the minor.

Program Requirements

Programming, Data Structures, Algorithms Requirement

Complete 1 of the following courses: 3.0

BMES 546	Biocomputational Languages
CS 520	Computer Science Foundations
CS 521	Data Structures and Algorithms I
CS 540	High Performance Computing
CS 550	Programming Languages
CS 571	Advanced Programming Techniques
CS 575	Software Design
CS 576	Dependable Software Systems

Numerical Methods, Linear Algebra, Modeling and Simulation, Optimization Requirement

Complete 1 of the following courses: 3.0

BMES 672	Biosimulation I
CHE 626	Transport Phenomena II
ECES 811	Optimization Methods for Engineering Design
ENVE 681	Analytical and Numerical Techniques in Hydrology
HMP 815	Cost Benefit Analysis for Health Services
MATE 535	Numerical Engineering Methods
MATH 504	Linear Algebra & Matrix Analysis
MATH 520	Numerical Analysis I
MATH 521	Numerical Analysis II
MATH 540	Numerical Computing
MATH 544	Advanced Engineering Mathematics I
MEM 591	Applied Engr Analy Methods I
MEM 681	Finite Element Methods I
MEM 711	Computational Fluid Mechanics and Heat Transfer I
OPR 620	Operations Research I
OPR 624	Advanced Mathematical Program
OPR 922	Operations Research Methods I
OPR 992	Applied Math Programming

Probability, Statistics, Machine Learning Requirement

Complete 1 of the following courses: 3.0

BMES 510	Biomedical Statistics
CS 510	Introduction to Artificial Intelligence
ECEC T680	Special Topics in ECEC (Pattern Recognition)
ECES 521	Probability & Random Variables
EGMT 571	Engineering Statistics
ENVE 727	Risk Assessment
ENVE 750	Data-based Engineering Modeling
MATH 510	Applied Probability and Statistics I

STAT 601	Business Statistics
STAT 610	Statistics for Business Analytics
STAT 924	Multivariate Analysis I
STAT 931	Statistics for Economics
STAT 932	Statistics for Behavioral Science
Additional Elective Courses	
Complete 2 courses from the following list (or any 2 courses from the above lists): 6.0	
AE 551	Building Energy Systems I
BMES 517	Intermediate Biostatistics
BMES 518	Interpretation of Biomedical Data
BMES 673	Biosimulation II
BST 551	Statistical Inference I
BST 558	Applied Multivariate Analysis
BST 701	Advanced Statistical Computing
CS 522	Data Structures and Algorithms II
CS 610	Advanced Artificial Intelligence
CS 613	Machine Learning
CS 620	Advanced Data Structure and Algorithms
CS 621	Approximation Algorithms
CS 623	Computational Geometry
CS 630	Cognitive Systems
CS 650	Program Generation and Optimization
CS 676	Parallel Programming
ECEC 622	Parallel Programming
ECES 522	Random Process & Spectral Analysis
ECES 523	Detection & Estimation Theory
EGMT 572	Statistical Data Analysis
EGMT 573	Operations Research
MATH 511	Applied Probability and Statistics II
MATH 512	Applied Probability and Statistics III
MATH 522	Numerical Analysis III
MEM 592	Applied Engr Analy Methods II
MEM 593	Applied Engr Analy Methods III
MEM 682	Finite Element Methods II
MEM 712	Computational Fluid Mechanics and Heat Transfer II
OPR 601	Managerial Decision Models and Simulation
OPR 622	Operations Research II
OPR 626	System Simulation
OPR 924	Operations Research Methods II
OPR 991	Simulation Theory and Applications
STAT 622	Statistical Decision Theory I
STAT 624	Statistical Decision Theory II
STAT 626	Statistical Sampling
STAT 628	Applied Regression Analysis
STAT 630	Multivariate Analysis
Total Credits 15.0	

Master of Engineering

Major: Engineering

Degree Awarded: Master of Engineering (ME)

Calendar Type: Quarter

Total Credit Hours: 48.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 14.0101

Standard Occupational Classification (SOC) code: 17.2199

About the Program

This ME program is a highly customizable program primarily used for international and visiting students studying engineering at Drexel whose plan of study must be customized. This program may be offered by any

department and will be reviewed by the department Advisor to make certain the plan of study meets degree requirements.

The ME program offers wide flexibility for those students who wish to combine technical and nontechnical study with hands-on experience in industry and laboratory research. This degree program may not be the best choice for those who wish to earn a PhD in Engineering.

Admission Requirements

This program allows for maximum flexibility for international visiting students and students on study abroad. In addition to meeting requirements for graduate admission, which include at least a 3.0 GPA for the last two years of undergraduate study and for any graduate study, applicants must hold a bachelor's degree in engineering from an accredited institution or an equivalent. Students whose background is in science or mathematics may be accepted to the program, but they will be required to take undergraduate engineering courses.

Although the Graduate Record Examination (GRE) is not required for admission, it may be required of students interested in a teaching or research assistantship. Applicants whose native language is not English and who do not have previous degrees from a U.S. institution are required to submit scores of at least 550 on the Test of English as a Foreign Language (TOEFL).

Degree Requirements

Students take a series of core and elective courses. Students work closely with and advisor to develop an individualized plan of study. This is a highly customizable degree program and may include a mix of courses, Co-op, research and thesis. The average time required to complete the master's degree is two years of full-time study or three years of part-time study. This is primarily used for visiting students.

Degree Requirements

The degree requires a total of 48.0 credits, including at least 18.0 credits from an engineering discipline core. This core may be from any engineering department: Civil and Architectural, Chemical, Electrical and Computer, Materials, or Mechanical Engineering and Mechanics. (Please refer to the appropriate departmental description in this catalog for more information about each department.) The department Advisor will work closely with the student to develop an plan of study that meets the program requirements.

Materials Science and Engineering

Major: Materials Science and Engineering

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS); 90.0 (PhD)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 14.1801

Standard Occupational Classification (SOC) code: 17-2131

About the Program

The graduate program in Materials Science and Engineering aims to provide an education which encompasses both the breadth and depth of the most recent knowledge base in the materials science and engineering

fields in a format suitable for individuals seeking careers in academia and/or industry.

In addition, the program provides students with research training through their courses and thesis research at the MS and PhD levels.

The graduate student body reflects a broad spectrum of undergraduate backgrounds. Because of the expansion into interdisciplinary areas, qualified physical and biological science graduates may also join the program. Non-engineering graduates are required to take MATE 503 Introduction to Materials Engineering.

Graduate work in materials science and engineering is offered both on a regular full-time and on a part-time basis. The General (Aptitude) Test of the Graduate Record Examination (GRE) is required for applicants pursuing full-time study.

Career Opportunities

Graduates go on to careers in engineering firms, consulting firms, law firms, private industry, business, research laboratories, academia, and national laboratories. Materials scientists and materials engineers find employment in such organizations as Hewlett-Packard, Intel, IBM, 3M, DuPont, Lockheed-Martin, Johnson and Johnson, Merck, AstraZeneca, Arkema, Army Research Laboratory, Los Alamos National Laboratory, Air Products, Micron, Xerox, Motorola, Monsanto, Corning, and Eastman Kodak.

For more information about Materials Science and Engineering, visit the Department of Materials Science and Engineering (<http://www.materials.drexel.edu>) web page.

Admission Requirements

Applicants must meet the graduate requirements for admission to Drexel University. The graduate student body reflects a broad spectrum of undergraduate backgrounds. Because of the expansion into interdisciplinary areas, qualified non-MSE engineering, physical and biological science graduates may also join the program.

For specific information on how to apply to this program, visit Drexel University's Materials Science and Engineering Graduate Admissions (<http://www.drexel.edu/grad/programs/coe/materials-science-engineering>) page.

Degree Requirements (MS)

The 45.0 quarter credits required for the MS degree include two required core courses on MATE 510 Thermodynamics of Solids and MATE 512 Introduction to Solid State Materials. Students choose four additional core courses.

Thesis Options

All full-time students are required to undertake a 9.0 credit thesis on a topic of materials research supervised by a faculty member. MS students can select the Non-thesis Option if carrying out research is not possible, in which case, the thesis may be replaced by either (a) a 6.0 credit Thesis Proposal and 3.0 credit coursework, or (b) 9.0 credits of coursework.

All students in the Thesis Option are required to propose an advisor supported research thesis topic during their first year. Students are urged to make a choice of topic as early as possible and to choose appropriate graduate courses in consultation with their advisor.

The program is organized so that part-time students may complete the degree requirements in two to four years. Full-time students may complete the program in two years.

MS to PhD Program

There is no general exam required for MS students. If an MS student wishes to continue for a PhD then: (a) the student must be admitted to the PhD program (there is no guarantee that an MS student will be admitted to the PhD program), and (b) the student must take the Candidacy Exam during the first term after being admitted to the PhD program.

Materials Science and Engineering (MSMSE) Core Courses^{*}

Required core courses:		
MATE 510	Thermodynamics of Solids	3.0
MATE 512	Introduction to Solid State Materials	3.0
Select four additional core courses from the following:		12.0
MATE 501	Structure and Properties of Polymers	
MATE 507	Kinetics	
MATE 515	Experimental Technique in Materials	
MATE 535	Numerical Engineering Methods	
MATE 610	Mechanical Behavior of Solids	
MATE 661	Biomedical Materials I	
Any additional related courses if approved by the graduate advisor/thesis advisor (such as MATE 514 and MATE 573)		
Optional Core Courses^{**}		18.0
Thesis and Alternatives		9.0
9.0 credits MS thesis OR 6.0 credits of thesis proposal (literature review) + 3.0 credit course OR 9.0 credits of electives		
Total Credits		45.0

* PhD candidates must achieve a minimum B- grade in each of the core courses. Waiver of any of the 6 core courses must be approved by the MSE Department Graduate Advisor and the student's Thesis Advisor in Advance.

** Of the 18 technical elective credits, at least 9 credits must be taken as Materials Science and Engineering (MATE) courses, while the rest may be taken within the College of Engineering, College of Arts and Sciences, or at other colleges if consistent with the student's plan of study (and given advance written approval by his/her advisor). At least 9 of these 18 technical electives must be exclusive of independent study courses or research credits.

Degree Requirements (PhD)

Curriculum

A student must have at least the required 90.0 quarter credits for the PhD degree. An MS degree *is not* a prerequisite for the PhD degree, but can count for 45.0 quarter credits if the courses are approved by the Graduate Advisor. For students without an MS degree, but with previous graduate course work, they may transfer no more than 15.0 credits (equivalent to 12 semester-credits) from approved institutions, provided they follow the rules and regulations described in the Materials Requirements of Graduate Degrees (<http://mse.drexel.edu/media/49885/mse-graduate-program.pdf>).

The required 90.0 credits for a PhD degree are tabulated below:

- Required Core Courses: 6.0 credits
- Additional Required Courses: 7.0 credits (MATE 504 & MATE 536 [1.0 credit for first 6 terms])
- Selected Core Courses: 12.0 credits

- Optional Courses: 9.0 credits
- Research or additional option courses: 47.0 credits
- Dissertation: 9.0 credits (MATE 998)

Total: 90.0 credits

Required Core Courses: *

MATE 510	Thermodynamics of Solids	3.0
MATE 512	Introduction to Solid State Materials	3.0

Additional Required Courses:

MATE 504	The Art of Being a Scientist	2.0
MATE 536	Materials Seminar Series	6.0
MATE 998	Ph.D. Dissertation	9.0

Selected Core Courses: Choose 4 *

MATE 501	Structure and Properties of Polymers	12.0
MATE 507	Kinetics	
MATE 514	Structure, Symmetry, and Properties of Materials	
MATE 515	Experimental Technique in Materials	
MATE 535	Numerical Engineering Methods	
MATE 610	Mechanical Behavior of Solids	
MATE 661	Biomedical Materials I	

Related courses as approved by the Graduate Advisor/Thesis Advisor

Optional Courses: 55.0

MATE 541	Introduction to Transmission Electron Microscopy and Related Techniques	
MATE 542	Nuclear Fuel Cycle & Materials	
MATE 543	Thermal Spray Technology	
MATE 544	Nanostructured Polymeric Materials	
MATE 563	Ceramics	
MATE 572	Materials for High Temperature and Energy	
MATE 573	Electronic, Magnetic and Optical Characterization of Energy Materials	
MATE 576	Recycling of Materials	
MATE T580	Special Topics in MATE	
MATE 582	Materials for Energy Storage	
MATE 583	Environmental Effects on Materials	
MATE 585	Nanostructured Carbon Materials	
MATE 602	Soft Materials	
MATE 702	Natural Polymers	
MATE 897	Research	

Other MSE courses that may be available

Out-of-department courses, as approved by the Graduate Advisor/Thesis Advisor

Total Credits 90.0

* PhD students must achieve a minimum "B-" grade in each of the core courses. Waiver of any of the six (6) core courses must be approved by the MSE Department Graduate Advisor and the student's Thesis Advisor in advance. MATE 536 is a 1.0 credit course that must be repeated 6 times.

An introductory course, MATE 503, is required for students without an undergraduate materials science and engineering degree.

Additional courses are encouraged for students entering the department with an MS degree. Students entering the department at the BS level must satisfy the course requirements for the MS degree. Students choose a doctoral thesis topic after consultation with the faculty. Students are required to consider topics early in the program. An oral thesis presentation and defense are scheduled at the completion of the thesis work.

In addition to the graduate seminar, which is required of all graduate students, doctoral program students must pass an oral candidacy examination and a thesis proposal defense. The exam is designed to

improve and assess the communication skills and the analytical abilities of the student. The following procedures should be followed to complete the PhD.

Candidacy Exam Requirement

All MSE PhD students are required to take the PhD Candidacy Examinations administered by the MSE Department.

For more information, visit the Department of Materials Science and Engineering (<http://www.materials.drexel.edu>) web page.

Facilities

Biomaterials and Biosurfaces Laboratory

This laboratory contains 10 kN biaxial and 5 kN uniaxial servo-hydraulic mechanical testing machines, a Fluoroscan X-ray system, a microscopic imaging system, a spectra fluorometer, a table autoclave, centrifuge, vacuum oven, CO₂ incubators, biological safety cabinet, thermostatic water baths, precision balance and ultrasonic sterilizer.

Nanobiomaterials and Cell Engineering Laboratory

This laboratory contains fume hood with vacuum/gas dual manifold, vacuum pump and rotary evaporator for general organic/polymer synthesis; gel electrophoresis and electroblotting for protein characterization; bath sonicator, glass homogenizer and mini-extruder for nanoparticle preparation; centrifuge; ultrapure water conditioning system; precision balance; pH meter and shaker.

Ceramics Processing Laboratory

This laboratory contains a photo-resist spinner, impedance analyzer, Zeta potential meter, spectrofluorometer, piezoelectric d33 meter, wire-bonder, and laser displacement meter.

Dynamic Characterization Laboratory

This laboratory contains metallographic sample preparation (sectioning, mounting and polishing) facilities; inverted metallograph; microhardness tester; automated electropolishing for bulk and TEM sample preparation; SEM tensile stage for EBSD; magneto-optical Kerr effect (MOKE) magnetometer.

MAX Phase Ceramics Processing Laboratory

This laboratory contains a vacuum hot-press; cold isostatic press (CIP) and hot isostatic press (HIP) for materials consolidation and synthesis; precision dilatometer; laser scattering particle size analyzer; impedance analyzer, creep testers, and assorted high temperature furnaces.

Mechanical Testing Laboratory

This laboratory contains mechanical and closed-loop servo-hydraulic testing machines, hardness testers, impact testers, equipment for fatigue testing, metallographic preparation facilities and a rolling mill with twin 6" diameter rolls.

Mesoscale Materials Laboratory

This laboratory contains instrumentation for growth, characterization, device fabrication, and design and simulation of electronic, dielectric, ferroelectric and photonic materials. Resources include physical and chemical vapor deposition and thermal and plasma processing of thin films, including oxides and metals, and semiconductor nanowire growth.

Facilities include pulsed laser deposition, atomic layer deposition, chemical vapor deposition, sublimation growth, and resistive thermal evaporation. Variable-temperature high-vacuum probe station and optical cryostats including high magnetic field, fixed and tunable-wavelength laser sources, several monochromators for luminescence and Raman

scattering spectroscopies, scanning electron microscopy with electron beam lithography, and a scanning probe microscope.

Nanomaterials Laboratory

This laboratory contains instrumentation for testing and manipulation of materials under microscope, high-temperature autoclaves, Sievert's apparatus; glove-box; high-temperature vacuum and other furnaces for the synthesis of nano-carbon coatings and nanotubes; electro-spinning system for producing nano-fibers.

Oxide Films and Interfaces Laboratory

This laboratory contains an oxide molecular beam epitaxy (MBE) thin film deposition system; physical properties measurement system for electronic transport and magnetometry measurements from 2 – 400K, up to 9 T fields; 2 tube furnaces.

Powder Processing Laboratory

This laboratory contains vee blenders, ball-mills, sieve shaker + sieves for powder classification, several furnaces (including one with controlled atmosphere capability); and a 60-ton Baldwin press for powder compaction.

Soft Matter Research and Polymer Processing Laboratories

These laboratories contain computerized thermal analysis facilities including differential scanning calorimeters (DSC), dynamic mechanical analyzer (DMA) and thermo-gravimetric analyzer (TGA); single-fiber tensile tester; strip biaxial tensile tester; vacuum evaporator; spincoater; centrifuge; optical microscope with hot stage; liquid crystal tester; microbalance; ultrasonic cleaner; laser holographic fabrication system; polymer injection molder and single screw extruder.

Natural Polymers and Photonics Laboratory

This laboratory contains a spectroscopic ellipsometer for film characterization; high purity liquid chromatography (HPLC) system; lyophilizer; centrifuge; refractometer; electro-spinning system for producing nano-fibers.

X-ray Tomography Laboratory

This laboratory contains a high resolution X-ray tomography instrument and a cluster of computers for 3D microstructure reconstruction; mechanical stage, a positioning stage and a cryostage for in-situ testing. For more information on departmental facilities, please visit the Department's Facilities web page (<http://www.materials.drexel.edu/research/facilities>).

Centralized Research Facilities

The Department of Materials Science & Engineering relies on Core Facilities within the University for materials characterization and micro- and nano-fabrication. These facilities contain state-of-the-art materials characterization instruments, including environmental and variable pressure field-emission scanning electron microscopes with Energy Dispersive Spectroscopy (EDS) for elemental analysis, and Orientation Image Microscopy (OIM) for texture analysis; a Transmission Electron Microscope (TEM) with STEM capability and TEM sample preparation equipment; a dual beam focused ion beam (FIB) system for nano-characterization and nano fabrication; a femtosecond/ terahertz laser Raman spectrometer; visible and ultraviolet Raman micro spectrometers with a total of 7 excitation wavelengths for non-destructive chemical and structural analysis and Surface Enhanced Raman (SERS); a Fourier Transform Infrared (FTIR) spectrometer with a microscope and full array of accessories; a Nanoindenter; an X-ray Photoelectron Spectrometer (XPS)/Electron Spectroscopy for Chemical Analysis (ESCA) system; and X-Ray Diffractometers (XRD), including small angle/wide angle X-Ray scattering (SAX/WAX).

More details of these instruments, information how to access them and instrument usage rates can be found on the Core Facilities web page (<http://crf.coe.drexel.edu>).

Materials Science and Engineering Faculty

Michel Barsoum, PhD (*Massachusetts Institute of Technology*).

Distinguished Professor. Processing and characterization of novel ceramics and ternary compounds, especially the MAX and 2-D MXene phases.

Hao Cheng, PhD (*Northwestern University*). Assistant Professor.

Drug delivery, molecular self-assembly, cell-nanomaterial interactions, regenerative medicine and cell membrane engineering.

Yury Gogotsi, PhD (*Kiev Polytechnic Institute*) Director, A. J. Drexel

Nanotechnology Institute. Distinguished University & Charles T. and Ruth M. Bach Professor. Nanomaterials; carbon nanotubes; nanodiamond; graphene; MXene; materials for energy storage, supercapacitors, and batteries.

Maheer Harb, PhD (*University of Toronto*). Assistant Professor. Solid state

physics, ultrafast electron diffraction, time-resolved X-ray diffraction, ultrafast lasers, nanofabrication, nano/microfluidics, instrument development, vacuum technologies.

Richard Knight, PhD (*Loughborough University*) Associate Department

Head and Undergraduate Advisor. Teaching Professor. Thermal plasma technology; thermal spray coatings and education; plasma chemistry and synthesis.

Christopher Y. Li, PhD (*University of Akron*). Professor. Soft and hybrid

materials for optical, energy, and bio applications; polymeric materials, nanocomposites, structure and properties.

Andrew Magenau, PhD (*University of Southern Mississippi*). Assistant

Professor. Structurally complex materials exhibiting unique physical properties designed and fabricated using an assortment of methodologies involving directed self-assembly, externally applied stimuli, structure-function correlation, and applied engineering principles suited for technologies in regenerative medicine, biological interfacing, catalytic, electronic, and optical applications

Michele Marcolongo, PhD, PE (*University of Pennsylvania*) Department

Head. Professor. Orthopedic biomaterials; acellular regenerative medicine, biomimetic proteoglycans; hydrogels.

Steven May, PhD (*Northwestern University*). Associate Professor and

Graduate Advisor. Synthesis of complex oxide films, superlattices, and devices; materials for energy conversion and storage; magnetic and electronic materials; x-ray and neutron scattering.

Ekaterina Pomerantseva, PhD (*Moscow State University, Russia*). Anne

Stevens Assistant Professor. Solid state chemistry; electrochemical characterization, lithium-ion batteries, energy generation and storage; development and characterization of novel nanostructured materials, systems and architectures for batteries, supercapacitors and fuel cells.

Caroline L. Schauer, PhD (*SUNY Stony Brook*). Associate Professor.

Polysaccharide thin films and nanofibers.

Wei-Heng Shih, PhD (*Ohio State University*). Professor. Colloidal

ceramics and sol-gel processing; piezoelectric biosensors,

optoelectronics, and energy harvesting devices; nanocrystalline quantum dots for bioimaging, lighting, and solar cells.

Jonathan E. Spanier, PhD (*Columbia University*) Associate Dean, *Strategic Planning, College of Engineering*. Professor. Light-matter interactions in electronic materials, including ferroelectric semiconductors, complex oxide thin film science; laser spectroscopy including Raman scattering.

Mitra Taheri, PhD (*Carnegie Mellon University*) *Hoeganeas Associate Professor of Metallurgy*. Associate Professor. Development of the ultrafast Dynamic Transmission Electron Microscope (DTEM) for the study of laser-induced microstructural evolution/phase transformations in nanostructured materials; use of various *in-situ* Transmission Electron Microscopy techniques.

Christopher Weyant, PhD (*Northwestern University*). Associate Teaching Professor.

Antonios Zavaliangos, PhD (*Massachusetts Institute of Technology*) *A.W. Grosvenor Professor*. Professor. Constitutive modeling; powder compaction and sintering; pharmaceutical tableting, X-ray tomography.

Emeritus Faculty

Roger D. Corneliussen, PhD (*University of Chicago*). Professor Emeritus. Fracture, blends and alloys, as well as polymer compounding.

Roger D. Doherty, PhD (*Oxford University*). Professor Emeritus. Metallurgical processing; thermo-mechanical treatment.

Ihab L. Kamel, PhD (*University of Maryland*). Professor Emeritus. Nanotechnology, polymers, composites, biomedical applications, and materials-induced changes through plasma and high energy radiation.

Jack Keverian, PhD (*Massachusetts Institute of Technology*). Professor Emeritus. Rapid parts manufacturing, computer integrated manufacturing systems, strip production systems, technical and/or economic modeling, melting and casting systems, recycling systems.

Mechanical Engineering and Mechanics

Major: Mechanical Engineering and Mechanics

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS) or 90.0 (PhD)

Co-op Option: Available for full-time on-campus master's-level students

Classification of Instructional (CIP) code: 14.1902

Standard Occupational Classification (SOC) code: 17-2141

About the Program

The Mechanical Engineering and Mechanics (MEM) Department (<http://drexel.edu/mem>) offers MS and PhD degrees. The courses often associate with one or more areas of specialization: design and manufacturing, mechanics, systems and control, and thermal and fluid sciences. The mechanical engineering field is rapidly changing due to ongoing advances in modern science and technology. Effective mechanical engineers must possess expertise in mechanical engineering core subjects, interdisciplinary skills, teamwork skills, as well as entrepreneurial and managerial abilities. The degree programs are designed so students can learn the state-of-the-art knowledge now, and

have the foundation to acquire new knowledge as they develop in future.

The MS degree program is offered on both a full-time and a part-time basis. The General (Aptitude) Test of the Graduate Record Examination (GRE) is required for applicants pursuing full-time study. Graduate courses are often scheduled in the late afternoon and evening, so full-time students and part-time students can take the same courses. The department has recently adopted the Graduate Co-op program at the master's level as an option.

The PhD degree program is offered for full-time students only and is a research intensive program. The research areas include, but are not limited to, bio-engineering, energy systems, high performance materials, nanotechnology, plasma science and engineering, and robotics.

Admission Requirements

Applicants must meet the graduate requirements for admission to Drexel University. Students holding a bachelor's degree in a science or engineering discipline other than mechanical engineering are advised to take several undergraduate courses as preparation for graduate studies. Though these courses are not counted toward the required credits for the degree, they also must be listed in the student's plan of study. Outstanding students with a GPA of at least 3.5 in their master's program will be considered for admission to the program leading to the doctor of philosophy degree in mechanical engineering.

Degree Requirements (MS) Requirements

The MS program has a two-fold mission: to prepare some students for continuation of their graduate studies and research toward a PhD degree, and to prepare other students for a career in industry upon graduation with the MS degree. The MS program has a non-thesis option and a thesis option. Students who plan to continue to the PhD degree are advised to select the thesis-option.

The MS program is structured so that students have the opportunity to specialize in areas of interest while also obtain the broadest engineering education possible. Of the required 45.0 credits (15 courses) MS students are required to complete two core-course sequences (two terms each) from two different core areas. Students can take eight technical elective courses of which up to four courses can be from outside the Mechanical Engineering and Mechanics Department if they are approved in the students' plan of study. MS students have opportunity to apply to the optional graduate Co-op program. Students in the MS program should consult with the department graduate adviser at the beginning of their program and must file a plan of study prior to the third quarter of study. Further details can be obtained from the department's Graduate Programs Manual.

Typical MS Program

Two Core-Course Sequences (required)	12.0
Three Mathematics Courses (required)	9.0
Eight Technical Electives (including 9 credits for thesis option)	24.0
Total Credits	45.0

* Mathematics courses: MEM 591, MEM 592, MEM 593.

Core Areas

All students take core courses in the department's areas of specialization as part of a comprehensive and flexible program. Further details can

be obtained from the department's Graduate Programs Manual (<http://www.drexel.edu/mem/academics/graduate/grad-manual>).

The core courses in each area are listed below:

Mechanics Area

Theory of Elasticity

MEM 660	Theory of Elasticity I	3.0
MEM 661	Theory of Elasticity II	3.0

Solid Mechanics

MEM 663	Continuum Mechanics	3.0
MEM 664	Introduction to Plasticity	3.0

Advanced Dynamics

MEM 666	Advanced Dynamics I	3.0
MEM 667	Advanced Dynamics II	3.0

Systems and Control Area

Robust Control Systems

MEM 633	Robust Control Systems I	3.0
MEM 634	Robust Control Systems II	3.0

Non-Linear Control Theory

MEM 636	Theory of Nonlinear Control I	3.0
MEM 637	Theory of Nonlinear Control II	3.0

Real-Time Microcomputer Control

MEM 639	Real Time Microcomputer Control I	3.0
MEM 640	Real Time Microcomputer Control II	3.0

Thermal and Fluid Sciences Area

Advanced Thermodynamics

MEM 601	Statistical Thermodynamics I	3.0
MEM 602	Statistical Thermodynamics II	3.0

Heat transfer

MEM 611	Conduction Heat Transfer	3.0
MEM 612	Convection Heat Transfer	3.0
or MEM 613	Radiation Heat Transfer	

Fluid Mechanics

MEM 621	Foundations of Fluid Mechanics	3.0
MEM 622	Boundary Layers-Laminar & Turbulent	3.0

* Consult the Thermal and Fluid Sciences area advisor for other options.

Degree Requirements (PhD)

Outstanding students with a GPA of at least 3.5 in their master's program will be considered for admission to the program leading to the Doctor of Philosophy degree in mechanical engineering.

PhD Course Requirements

At least 90.0 credits are required for the PhD degree. The master's degree is not a prerequisite for the PhD, but does count as 45.0 credits toward the 90.0 credit requirement.

For students entering the PhD program with a prior MS degree:

- 45.0 credits of graduate courses out of which 18.0 credits are graduate courses exclusive of independent study and dissertation. If the MS degree was not from Drexel's Mechanical Engineering and Mechanics (MEM) Department, 12.0 of these 18.0 credits must be MEM graduate courses (600-level or above). The remaining 27.0 credits consist of a combination of dissertation, independent study, and additional advanced coursework consistent with the approved plan of study.

For students entering the PhD program with a BS degree but without a prior master's degree:

- 90.0 credits of graduate courses. 45.0 of these 90.0 credits must satisfy the MS in Mechanical Engineering degree requirements. The remaining 45.0 credits must satisfy the requirements above.

PhD Candidacy Examination

A graduate student in the PhD program needs be nominated by his/her supervising adviser to take the candidacy examination. A student who enters the PhD program with a prior MS degree must take the Candidacy Examination within the first year after entry to the PhD program. A student who enters the PhD program without a prior MS degree must take the Candidacy Examination within 2 years after entry to the PhD program.

The Candidacy Examination consists of two components: A course-component examination and a research-component examination. The student must demonstrate excellence in both components. The research-component examination consists of a written report and an oral presentation. The Candidacy Committee selects three or more research papers in the student's declared research area for student to conduct a critical review. In three weeks the student submits a written report. One week after the written report is submitted the student makes an oral presentation. The presentation is followed by questions by the Committee. The goals of the questions: To evaluate the student's knowledge in the scientific fields related to the research area, including related background and fundamental material, and the student's ability to integrate information germane to success in research. Additional details are given in the Mechanical Engineering and Mechanics Graduate Program Manual.

Thesis Proposal

At least one year prior to graduation, the PhD candidate must give a thesis proposal to the dissertation advisory committee. The student must submit a written proposal and make a presentation. The written proposal normally includes: abstract, introduction, detailed literature review, preliminary results, proposed research tasks and timetable. The committee will approve/reject the thesis topic, the scope of work and the general method of attack.

Thesis Defense

A final examination consisting of a presentation and defense of the research dissertation is required, before the PhD degree is granted.

Further details can be obtained from the department's Graduate Programs Manual (<http://drexel.edu/mem/academics/graduate/grad-manual>).

Facilities

Advanced Design and Manufacturing Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=6)

This laboratory provides research opportunities in design methodology, computer-aided design, analysis and manufacturing, and materials processing and manufacturing. Facilities include various computers and software, I-DEAS, Pro/E, ANSYS, MasterCAM, Mechanical DeskTop, SurfCAM, Euclid, Strim, ABQUS, and more. The machines include two Sanders Model Maker rapid prototyping machines, a BridgePort CNC Machining Center, a BOY 220 injection molding machine, an Electra high-temperature furnace for metal sintering, infiltration, and other heat treatment.

Biofabrication Laboratory

Utilizes cells or biologics as basic building blocks in which biological models, systems, devices and products are manufactured. Biofabrication techniques encompass a broad range of physical, chemical, biological,

and/or engineering processes, with various applications in tissue science and engineering, regenerative medicine, disease parthenogenesis and drug testing studies, biochips and biosensors, cell printing, patterning and assembly, and organ printing.

The Biofabrication Lab at Drexel University integrates computer-aided tissue engineering, modern design and manufacturing, biomaterials and biology in modeling, design and biofabrication of tissue scaffolds, tissue constructs, micro-organ, tissue models. The ongoing research focuses on bio-tissue modeling, bio-blueprint modeling, scaffold informatics modeling, biomimetic design of tissue scaffold, additive manufacturing of tissue scaffolds, cell printing and organ printing.

Biological Systems Analysis Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=5)

The research in the Laboratory for Biological Systems Analysis involves the integration of biology with systems level engineering analysis and design, with an emphasis on: (1) the development of robotic systems that borrow from nature's designs and use novel technologies to achieve superior performance and function; and (2) the use of system identification techniques to evaluate the functional performance of animal physiological systems under natural, behavioral conditions. Facilities include rapid prototyping machines, compliant material manufacturing, mold making facilities, and a traditional machine shop and electronics workshop.

Biomechanics Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=2)

Emphasis in this laboratory is placed on understanding the mechanical properties of human joints, characterization of the mechanical properties of biological materials, studies of human movements, and design and development of artificial limbs. Facilities include a 3-D kinematic measuring system, Instron testing machine, and microcomputers for data acquisition and processing. Additional biomechanical laboratory facilities are available at Moss Rehab Hospital.

Combustion Diagnostics Laboratory

High-speed cameras, spectrometers, and laser systems are used to conduct research in low temperature hydrocarbon oxidation, cool flames, and plasma-assisted ignition and combustion. Research in optical diagnostic development is conducted in this lab with a specific focus on tools to measure small peroxy radicals.

Combustion, Fuel Chemistry, and Emissions Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=1)

Emphasis in this laboratory is placed on developing an understanding of both the chemical and physical factors that control and, hence, can be used to tailor combustion processes for engineering applications. Facilities include two single cylinder research engines, a pressurized flow reactor (PFR) facility, flat flame and slot burner systems, and complete analytical and monitoring instrumentation. The engine systems are used to study the effects of operating variables, fuel type, ambient conditions, and control devices on engine performance and emissions. The PFR facility is used for detailed kinetic studies of hydrocarbon pyrolysis and oxidation processes.

Complex Fluids and Multiphase Transport Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=1)

The research focus of this lab lies at the interface of thermal-fluid sciences, nano materials, and colloid and surface sciences. We apply these fundamental sciences to advance energy conversion and storage systems, to provide effective thermal management solutions, and to enable scalable additive nanomanufacturing. Facilities include materials

printing systems, fluorescence microscope and imaging systems, complex fluid characterization, microfluidics and heat transfer testers, coating and solar cell testing devices, electrochemical characterization, and high performance computing facilities.

Dynamic Multifunctional Materials Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=1)

The focus of the Dynamic Multifunctional Materials Laboratory (DMML) is mechanics of materials; namely fracture and failure mechanisms under extreme conditions and their correlation to meso- and microstructural characteristics. Utilizing highly integrated experimental facilities such as a Kolsky (split-Hopkinson pressure bar), single-stage, and two stage light-gas gun, complex material behavior is deconstructed into dominant time and length scales associated with the energetics of damage evolution. In-situ laser and optical diagnostics such as caustics, interferometry techniques, schlieren visualization and virtual grid method, are used to investigate coupled field properties of multifunctional materials with the goal of not only analyzing and understanding behavior, but ultimately tailoring material properties for specific applications.

Electrochemical Energy Systems Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=1)

The Electrochemical Energy Systems Laboratory (ECSL) is specializes in the design, diagnostics and characterization of next generation electrochemical energy conversion and storage systems. Current areas of research include flow-assisted supercapacitors, next generation flow battery technology and fuel cells for transportation, stationary and portable applications. ECSL utilizes a comprehensive approach, including: advanced diagnostics, system design, materials characterization, and computational modeling of electrochemical energy systems. The core mission of ECSL is to develop novel diagnostic and computational tools to understand critical issues in flow-assisted electrochemical systems and enable better system design. Due to the complex nature of these systems, our research is highly interdisciplinary and spans the interface of transport phenomena, materials characterization, electrochemistry and system engineering.

Heat Transfer Laboratory

The heat transfer laboratory is outfitted with an array of instrumentation and equipment for conducting single- and multi-phase heat transfer experiments in controlled environments. Present efforts are studying the heat and mass transfer processes in super-critical fluids and binary refrigerants.

Lab-on-a-Chip and BioMEMS Lab (<http://mems.mem.drexel.edu>)

Develops miniature devices for biological and medical applications using microfabrication and microfluidics technologies. Our research projects have highly multidisciplinary nature and thus require the integration of engineering, science, biology and medicine. Projects are conducted in close collaboration with biologists and medical doctors. Our research methodology includes design and fabrication of miniature devices, experimental characterization, theoretical analysis, and numerical simulation.

Microcomputer Controls Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=7)

This laboratory provides an environment conducive to appreciating aspects of systems and control through hands-on experiments. They range from data acquisition and processing to modeling of dynamical systems and implementing a variety of controllers to control systems, such as DC motors and the inverted pendulum. Active research is being

conducted on control reconfiguration in the event of actuator failures in aircrafts.

Multiscale Thermofluidics Laboratory

Develops novel scalable nanomanufacturing techniques using biological templates to manipulate micro- and nano- scale thermal and fluidic phenomena. Current work includes enhancing phase-change heat transfer with super-wetting nanostructured coatings and transport and separation through nanoporous membranes.

Nyheim Plasma Institute (<http://drexel.edu/NyheimInstitute>)

The Nyheim Plasma Institute (NPI) was formed in 2002 (originally the A.J. Drexel Plasma Institute) to stimulate and coordinate research projects related to plasma and other modern high-energy engineering techniques. Today the NPI is an active multidisciplinary organization involving 23 faculty members from 6 engineering departments working in close collaboration with the School of Biomedical Engineering, College of Arts and Sciences, and the College of Nursing and Health Professions.

Precision Instrumentation and Metrology Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=7)

This laboratory is focused on activities related to precision measurement, computer-aided inspection, and precision instrument design. Facilities include 3D Coordinate Measuring Machine (Brown & Sharpe) with Micro Measurement and Reverse engineering software, Surface Profilometer, and Laser Displacement Measuring System.

Space Systems Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=1)

The objective of the Space Systems Laboratory (SSL) is to inspire future generations to advance aerospace engineering. It provides research opportunities in orbital mechanics, rendezvous and docking maneuvers, mission planning, and space environment. The lab provides facilities for activities in High Altitude Balloons, construction of air-vehicles and nano-satellites, 0-g flights, and STK simulation package for satellite flights and trajectories.

Theoretical and Applied Mechanics Group (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=1)

Research in the Theoretical and Applied Mechanics Group (TAMG) focuses on using experimental, analytical and computational tools to understand deformation and failure of materials, components and structures in a broad range of time and length scales. To accomplish this goal, TAMG develops procedures that include mechanical behavior characterization coupled with non-destructive testing and modern computational tools. This information is used both for understanding the role of important material scales in the observed bulk behavior and for the formulation of constitutive laws that can model the response including damage initiation and progression according to prescribed loading conditions. Equipment and facilities used by TAMG include a range of mechanical testing equipment for testing in tension, compression, fatigue and fracture.

Vascular Kinetics Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=1)

The Vascular Kinetics Laboratory (VKL) uses engineering methods to understand how biomechanics and biochemistry interact in cardiovascular disease. In particular, we study fluid flow and blood vessel stiffness impact cellular response to glucose, growth factors, and inflammation to lead to atherosclerosis and metabolic syndrome. We then apply these discoveries to novel biomaterials and therapies, with a particular focus on treating cardiovascular disease in under-served populations. This research is at the interface of engineering and medicine, with close

collaborations with biologists and physicians and a strong emphasis on clinical applications.

Mechanical Engineering Faculty

Hisham Abdel-Aal, PhD (*University of North Carolina*). Associate Teaching Professor. Bio-tribology; biomimetics and bio-inspired design; high-speed machining; metrology of biological surfaces; mechano-biology thermodynamics

Jonathan Awerbuch, DSc (*Technion, Israel Institute of Technology*). Professor. Mechanics of composites; fracture and fatigue; impact and wave propagation; structural dynamics.

Nicholas P. Cernansky, PhD (*University of California-Berkeley*) *Hess Chair Professor of Combustion*. Professor. Combustion chemistry and kinetics; combustion generated pollution; utilization of alternative and synthetic fuels.

Bor-Chin Chang, PhD (*Rice University*). Professor. Computer-aided design of multivariable control systems; robust and optimal control systems.

Young I. Cho, PhD (*University of Illinois-Chicago*). Professor. Heat transfer; fluid mechanics; non-Newtonian flows; biofluid mechanics; rheology.

Alisa Clyne, PhD (*Harvard-Massachusetts Institute of Technology*). Associate Professor. Cardiovascular biomechanics.

Bakhtier Farouk, PhD (*University of Delaware*) *Billings Professor of Mechanical Engineering*. Professor. Heat transfer; combustion; numerical methods; turbulence modeling; materials processing.

Alexander Fridman, DSc, PhD (*Moscow Institute of Physics and Technology*) *John A. Nyheim Endowed University Chair Professor, Director of the C. & J. Nyheim Plasma Institute at Drexel University*. Professor. Plasma science and technology; pollutant mitigation; super-adiabatic combustion; nanotechnology and manufacturing.

Andrei Jablokow, PhD (*University of Wisconsin, Madison*) *Associate Department Head for Undergraduate Affairs, Mechanical Engineering and Mechanics*. Associate Teaching Professor. Kinematics; geometric modeling.

Antonios Kontsos, PhD (*Rice University*). Associate Professor. Applied mechanics; probabilistic engineering mechanics; modeling of smart multifunctional materials.

E. Caglan Kumbur, PhD (*Pennsylvania State University*). Associate Professor. Next generation energy technologies; flow battery design and development.

John Lacontora, PhD (*New Jersey Institute of Technology*). Associate Research Professor. Service engineering; industrial engineering.

Leslie Lamberson, PhD (*California Institute of Technology*) *P.C. Chou Assistant Professor of Mechanical Engineering*. Assistant Professor. Dynamic behavior of materials, dynamic fracture, damage micromechanics, active materials.

Alan Lau, PhD (*Massachusetts Institute of Technology*). Professor. Deformation and fracture of nano-devices and macroscopic structures; damage-tolerant structures and microstructures.

Matthew McCarthy, PhD (*Columbia University*) Associate Department Head for Graduate Affairs, Mechanical Engineering and Mechanics. Assistant Professor. Micro- and nanoscale thermofluidic systems, bio-inspired cooling, smart materials and structures for self-regulated two-phase cooling, novel architectures for integrated energy conversion and storage.

David L. Miller, PhD (*Louisiana State University*) Department Head, Mechanical Engineering and Mechanics. Professor. Gas-phase reaction kinetics; thermodynamics; biofuels.

Ahmad R. Najafi, PhD (*University of Illinois-Urbana-Champaign*). Assistant Professor. Microscale Computational Solid Mechanics, Design Optimization, Fracture Mechanics, Mechanics of Biological Composites and Biomaterials, Bone Biomechanics and Bone Fracture, Computational Biology and Biophysics

Hongseok (Moses) Noh, PhD (*Georgia Institute of Technology*). Associate Professor. MEMS; BioMEMS; lab-on-a-chip; microfabrication; microfluidics.

Sorin Siegler, PhD (*Drexel University*). Professor. Orthopedic biomechanics; robotics; dynamics and control of human motion; applied mechanics.

Wei Sun, PhD (*Drexel University*) Albert Soffa Chair Professor of Mechanical Engineering. Professor. Computer-aided tissue engineering; solid freeform fabrication; CAD/CAM; design and modeling of nanodevices.

Ying Sun, PhD (*University of Iowa*). Associate Professor. Transport processes in multi-component systems with fluid flow; heat and mass transfer; phase change; pattern formation.

Tein-Min Tan, PhD (*Purdue University*). Associate Professor. Mechanics of composites; computational mechanics and finite-elements methods; structural dynamics.

James Tangorra, PhD (*Massachusetts Institute of Technology*). Associate Professor. Analysis of human and (other) animal physiological systems; head-neck dynamics and control; balance, vision, and the vestibular system; animal swimming and flight; robotics; system identification; bio-inspired design.

Ajmal Yousuff, PhD (*Purdue University*). Associate Professor. Optimal control; flexible structures; model and control simplifications.

Jack G. Zhou, PhD (*New Jersey Institute of Technology*). Professor. CAD/CAM; computer integrated manufacturing systems; rapid prototyping; system dynamics and automatic control.

Emeritus Faculty

Leon Y. Bahar, PhD (*Lehigh University*). Professor Emeritus. Analytical methods in engineering, coupled thermoelasticity, interaction between analytical dynamics and control systems.

Gordon D. Moskowitz, PhD (*Princeton University*). Professor Emeritus. Biomechanics, dynamics, design, applied mathematics.

Donald H. Thomas, PhD (*Case Institute of Technology*). Professor Emeritus. Biocontrol theory, biomechanics, fluidics and fluid control, vehicle dynamics, engineering design.

Albert S. Wang, PhD (*University of Delaware*) Albert and Harriet Soffa Professor. Professor Emeritus. Treatment of damage evolution processes

in multi-phased high-temperature materials, including ceramics and ceramic-matrix composites.

Peace Engineering

Major: Peace Engineering

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 48.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 14.0401

Standard Occupational Classification (SOC) code: 17-2081

About the Program

Peace Engineering will educate a new generation of professionals who are able to address challenges and implement solutions at the intersection of peacebuilding and engineering. The program is the result of a partnership between the U.S. Institute of Peace's PeaceTech Lab and Drexel's College of Engineering that aims to transform conflict management using education and research efforts that integrate innovative technologies, approaches, and policies with the studies and practices of peacebuilders.

Peace Engineering will cultivate a new skillset in students by combining disciplines of study from engineering, the social dimensions of conflict, and the applied sciences. Students will learn to conduct conflict analyses and to develop ethically and technically just solutions. These solutions will be based in the understanding that conflict, and the ability to resolve conflict non-violently, emerge from the dynamics and interactions of social, technical, and environmental systems. A one-year and a two-year M.S. are offered and combine online and classroom courses with experiential learning at partners such as the PeaceTech Lab, the U.S. Institute of Peace, and Drexel's Dornsife Center.

Peace Engineering will be educating students to serve in fields that are growing rapidly due to the confluence of the increased awareness of conflicts and its causes (e.g., climate change), the widespread availability of technology that connects communities and economies, and the strong desire in current generations to have a positive impact on humanity. Extraordinary opportunities exist for graduates to work in the multinational, government, and non-governmental organizations that have historically led peacebuilding, stabilization, relief, and development efforts. These include the UN, WHO, World Bank, the World Food Programme, FEMA, DOS, DOD, NGOs and a host of public services within any community. Perhaps more impressive are the opportunities that are being created by the birth of the Peace Tech Industry. Engineers with a deep understanding of conflict are well suited to organizations that range from contractors involved in stabilization and development efforts, to extraction and consumer product companies working in conflict prone communities, to social entrepreneurs and their venture philanthropists developing technologies that do good.

Degree Requirements

Core Peacebuilding Requirements		12.0
PENG 501	Peace Engineering Seminar - Fall	
PENG 502	Peace Engineering Seminar - Winter	
PENG 503	Peace Engineering Seminar - Spring	
PENG 545	Introduction to Peacebuilding for Engineers	
PENG 550	Conflict Management for Engineers	
PENG 560	Peacebuilding Skills	
Core Engineering Requirements		9.0

ENVE 727	Risk Assessment	
PROJ 501	Introduction to Project Management	
Research Methods		9.0
SCTS 502	Research Methods	
ENVE 750	Data-based Engineering Modeling	
CAEE 501	Community-Based Design	
Experiential Learning		6.0
PENG 600	Peace Engineering Experiential Learning	
Social Dimensions of Conflict Electives *		6.0
Technical Focus Sequences **		6.0
Total Credits		48.0

*** Social Dimensions of Conflict Electives**

Students must complete a minimum of six credits, at the graduate level, from the following approved courses.

- **Public Health electives:** PBHL 704, PBHL 705, PBHL 706, PBHL 707
- **Science, Technology and Society electives:** SCTS 501, SCTS 570, SCTS 571, SCTS 615, SCTS 620, SCTS 641, SCTS 645, ENVP 760
- **Politics electives:** PSCI 510, PSCI 553, ENVP 552
- **Communication, Culture, and Media electives:** COM 704, COM 705
- **Education electives:** EDGI 530, EDGI 533, EDGI 536

**** Technical Focus Sequences**

Students must complete one sequence of at least 2 courses (6 credits) from the following approved sequences.

- **Systems Analysis:** SYSE 688, SYSE 690, EGMT 660 (optional)
- **Software Development:** CS 520, CS 570, CS 571 (optional)
- **Machine Learning and AI:** CS 510, CS 613, CS 610 (optional).
- **Information Security:** INFO 517, INFO 712, INFO 710 (optional)
- **Database Management:** INFO 605, INFO 606, INFO 607 (optional).
- **Information Retrieval:** INFO 605, INFO 624, INFO 633 (optional)
- **Data Mining:** INFO 605, INFO 634, INFO 633 (optional)
- **Web and Mobile Development:** INFO 552, INFO 655
- **Game Design:** DIGM 505, DIGM 506
- **Serious gaming:** DIGM 530, DIGM 531
- **Interactivity:** DIGM 520, DIGM 521
- **WASH:** PBHL 707, CIVE 564, CIVE 567 (optional), CIVE 561 (optional)
- **Power systems and Distribution:** ECEP 501, ECEP 502, ECEP 601 (optional)

* Technical Focus Courses must both be part of the same sequence, while Social Dimensions of Conflict Electives can be any two of the courses listed in the Program Requirements.

Public Health Ethics Faculty

Jennifer Breaux, DrPH, MPH, CHES (*Drexel University*). Assistant Teaching Professor. Maternal and child health, Child and maternal health, Community health, Human rights.

Amy Carroll-Scott, PhD, MPH (*University of California at Los Angeles*). Assistant Professor. Asset mapping, Built environment, Chronic diseases, Community capacity building, Community health, Community health worker/promoters models, Community-based participatory research, Community resilience, Demography, Health disparities, Mixed methods, Neighborhood context, Obesity, School health, Social capital/social

cohesion, Social determinants of health, Social epidemiology, Spatial data and analysis, Youth leadership development.

Esther Chernak, MD, MPH, FACP (*UMDNJ-Robert Wood Johnson Medical School*) Director of the Center for Public Health Readiness and Communication; Director of Joint Degree Programs. Associate Research Professor. Emergency preparedness, infectious disease, public health practice, crisis and emergency risk communication, medicine and public health.

Nancy Epstein, MPH, MAHL (*University of North Carolina at Chapel Hill*). Associate Professor. Health Disparities, Faith and Health.

Robert I. Field, PhD, JD, MPH (*Columbia University*) Joint Appointment in the Drexel University Kline School of Law. Professor. Health policy, public health law, health administration and management, public health ethics.

Janet Fleetwood, PhD, MPH (*University of Southern California*). Professor. Philosophy, bioethics, public health ethics, research ethics, social justice, ethical theory.

Ali Groves, PhD, MHS (*University of North Carolina; Johns Hopkins University*). Assistant Professor. Reproductive and Sexual Health, Maternal and Child Health, Global Health, Data Analysis Methods.

Ann Klassen, PhD (*Johns Hopkins University*). Professor. HIV/AIDS, Food safety, Excess burden intervention, GIS-based and spatial analysis, Mixed methods, Qualitative methods, Social sciences.

Shiriki Kumanyika, PhD, MS, MPH (*Cornell University; Columbia University; Johns Hopkins University*). Research Professor. Solutions to obesity and diet-related diseases in black Americans, 'Culture of health' approaches in black communities, Assessment of food environments, Environmental influences on lifestyle changes, Targeted marketing of unhealthy foods and beverages, Food and nutrition policy, Evidence-based public health, Nutrition epidemiologic methods, Social determinants of health and health equity, Systems science applications in public health.

Stephen E. Lankenau, PhD (*University of Maryland*). Professor. HIV/AIDS, Overdose prevention, Prescription drug misuse, Medical marijuana, Injection drug use, High risk youth, Homeless, Qualitative research.

Ana Martinez-Donate, PhD (*Universidad Autonoma de Madrid, Spain*). Associate Professor. HIV prevention, Tobacco control, Obesity prevention, Access to health services.

Philip Massey, PhD, MPH (*University of California, Los Angeles*). Assistant Professor. Digital Technologies in Public Health, Health Literacy, Health Communication, Global Health, Health Disparities, Health Promotion.

John Rossi, VMD, MBE (*University of Pennsylvania*) Director, M.S. in Public Health Ethics. Assistant Professor. Public health ethics, research ethics, ethical theory, animal and environmental ethics, risk assessment and communication, public health history.

Alexis Roth, PhD, MPH (*Indiana University*). Assistant Professor. mHealth, Substance use, Reproductive or sexual health, Community engaged research, Infectious diseases, Health disparities, Urban health, Mixed methods, Women's health, Social determinants of health.

Randall L. Sell, ScD (*Harvard University*). Associate Professor. Health Disparities, Experimental design/research methods, Gender and health, LGBT issues, Program evaluation, Survey methods.

Suruchi Sood, PhD (*University of New Mexico*). Associate Professor. Human rights and health, Nutrition, Poverty, Health Disparities, Innovation Diffusion, HIV/AIDS, Violence, Community-based participatory research, Application of statistics to behavioral, biological and medical sciences, Adolescent health, Child and maternal health, International health, Program evaluation, Women's health, Mixed methods, Qualitative methods.

Renee M. Turchi, MD, MPH (*Johns Hopkins University*) Joint appointment in the Drexel University College of Medicine. Associate Professor. Health care for children and youth with special health care needs, Child and maternal health.

Augusta M. Villanueva, PhD (*University of Texas at Austin*). Associate Professor. Poverty, Health care for the underserved, Health Disparities, High risk youth, Urban health issues, Racial and ethnic disparities in health and health care, Community-based participatory research, Behavioral health, Community health, Immigrant communities, LGBT issues, Public health infrastructure, Qualitative research.

Michael Yudell, MPH, PhD, MPhil (*Columbia University*) Chair, Department of Community Health and Prevention. Associate Professor. Public health genomics; bioethics; history of public health; addiction.

Project Management

Major: Project Management

Degree Awarded: Master of Science (MS) and Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS); 90.0 (PhD)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 52.0211

Standard Occupational Classification (SOC) code: 11-9199

About the Program

Modern project management is a field that began in the 1950s in the defense industry. In the 1980s, the field gained critical mass in a broad range of industries, including, but not limited to building/construction, IT/systems development, defense, engineering, film and video, financial services, healthcare, and government contracting. Organizations are using project management concepts, tools, and techniques to achieve their objectives and gain a competitive advantage.

Master of Science in Project Management

The Master of Science (MS) in Project Management, a part-time online program, is designed to equip professionals with the knowledge and skills expected of project managers in any field. The course content is mapped to the internationally-recognized Project Management Institute's (PMI)[®] *A Guide to the Project Management Body of Knowledge (PMBOK[®] Guide)*.

Interested candidates should visit Drexel University Online (<http://online.drexel.edu/online-degrees/business-degrees/project-management>) for admissions requirements and more information about how to apply.

Doctor of Philosophy in Project Management

The Doctor of Philosophy (PhD) in Project Management is designed to support the growing need for project management researchers and educators with PhD degrees. It provides students with the skills necessary for successful academic, research, teaching, training, and consulting careers in the rapidly expanding field of project management. It builds

upon the highly-successful MS in Project Management, which has grown rapidly in global stature, internal and external reputation, and student enrollment. The PhD in Project Management is open to individuals of all disciplines.

Interested candidates should visit the Graduate Admissions (<http://www.drexel.edu/grad/programs/coe/project-management>) website for a full list of the requirements and more information about how to apply.

Questions about the MS in Project Management and the PhD in Project Management should be directed to:

Mercedes Moultrie

Program Manager

Project Management Program

Tel: 215.571.3939

E-mail: mm342@drexel.edu

CAPM, PMP, and PMBOK are registered marks of the Project Management Institute, Inc.

Degree Requirements

The Master of Science in Project Management requires completion of 45 credit hours (quarter) of study. The curriculum includes a core of 10 required courses (30 credits), a culminating capstone project experience (PROJ 695 (<http://catalog.drexel.edu/coursedescriptions/quarter/grad/proj>)) integrating the knowledge and skills acquired during the program (3.0 credits) and 12.0 credits of electives.

Electives

Students should use electives to increase project management, creativity, communication, or leadership skills or to develop areas of specialization. Any appropriate graduate course offered in the University can serve as an elective if the student has sufficient background to take the course. In addition, the program will offer its own elective courses including special topics (PROJ T580 (<http://catalog.drexel.edu/coursedescriptions/quarter/grad/proj>)); PROJ T680; (<http://catalog.drexel.edu/coursedescriptions/quarter/grad/proj>) or PROJ T780 (<http://catalog.drexel.edu/coursedescriptions/quarter/grad/proj>)). Qualified students may also pursue independent study (PROJ I599 (<http://catalog.drexel.edu/coursedescriptions/quarter/grad/proj>)); PROJ I699 (<http://catalog.drexel.edu/coursedescriptions/quarter/grad/proj>); or PROJ I799 (<http://catalog.drexel.edu/coursedescriptions/quarter/grad/proj>)) for elective credit in special cases.

Curriculum

Core Courses

PROJ 501	Introduction to Project Management	3.0
PROJ 502	Project Planning & Scheduling	3.0
PROJ 510	Project Quality Management	3.0
PROJ 515	Project Estimation & Cost Management	3.0
PROJ 520	Project Risk Assessment & Management	3.0
PROJ 530	Managing Multiple Projects	3.0
PROJ 535	International Project Management	3.0
PROJ 540	Project Procurement Management	3.0
PROJ 603	Project Leadership & Teamwork	3.0
PROJ 645	Project Management Tools	3.0

Free Electives 12.0

Capstone Project

PROJ 695	Capstone Project in Project Management	3.0
Total Credits		45.0

Degree Requirements

The following general requirements must be satisfied to complete the PhD in Project Management:

- 90.0 quarter credit hours total (or 45 credit hours post-MS)
- Plan of study established with Advisor
- Qualifying courses
- Candidacy exam
- Approval of dissertation proposal
- Defense of dissertation
- Full-time residency is desired for the PhD degree to ensure students the opportunity for intellectual association with other scholars.

Students entering with a master's degree may be exempted from some or all of the courses in the breadth requirement; however, they are still required to meet all milestones of the program. Individual courses may also be transferred with approval of the Project Management program. The total credit amount, candidacy exam, and dissertation are University Requirements. Additional requirements are determined by the Project Management program.

To be enrolled into the PhD in Project Management program, students must be accepted by the program and the faculty member with whom they will be working.

Required Qualifying Project Management Courses		33.0
PROJ 501	Introduction to Project Management	
PROJ 502	Project Planning & Scheduling	
PROJ 510	Project Quality Management	
PROJ 515	Project Estimation & Cost Management	
PROJ 520	Project Risk Assessment & Management	
PROJ 530	Managing Multiple Projects	
PROJ 535	International Project Management	
PROJ 540	Project Procurement Management	
PROJ 603	Project Leadership & Teamwork	
PROJ 645	Project Management Tools	
PROJ 695	Capstone Project in Project Management	
Free Electives		12.0
Research and Candidacy Courses		15.0
Students must complete 15.0 credit hours of research courses as approved by their faculty/research advisor. Courses will include study in research methodologies, research design, data analysis; and writing for research, publication, and funding.		
Required Candidacy Courses		21.0
Students must complete 21.0 credit hours of courses in consultation with their faculty/research advisor/committee. Courses will include study in applied research and dissertation research.		
Professional Electives		9.0
PROJ 650	Project Stakeholder Management	
PROJ 665	Managing Project Knowledge	
PROJ 670	Project Management Methodologies: Managing Project Lifecycles	
Other electives approved by faculty advisor and the Project Management program (must be 6XX or higher)		
Total Credits		90.0

Candidacy Exam

After approximately one year of study beyond the master's degree, doctoral students will take a candidacy examination, consisting of written and oral parts. The Project Management candidacy examination serves

to define the student's research domain and to evaluate the student's knowledge and understanding of various fundamental and seminal results in that domain. At this point the student is expected to be able to read, understand, analyze, and explain advanced results in a specialized area of Project Management at an adequate level of detail. The candidacy examination will evaluate those abilities using a defined set of published manuscripts. The student will prepare a written summary of the contents of the material, present the summary orally, and answer questions about the material. The examination committee will evaluate the written summary, the oral presentation, and the student's answers.

Thesis Proposal

After successfully completing the candidacy examination, the PhD candidate must prepare a thesis proposal that outlines, in detail, the specific problems that will be solved in the PhD dissertation. The quality of the research proposal should be at the level of, for example, a peer-reviewed proposal to a federal funding agency, or a publishable scientific paper. The candidate is responsible for sending the research proposal to the PhD committee two weeks before the oral presentation. The PhD committee need not be the same as the candidacy exam committee, but it follows the same requirements and must be approved by the Graduate College. The oral presentation involves a 30-40-minute presentation by the candidate followed by an unspecified period during which the committee will ask questions.

After the question and answer period, the candidate will be asked to leave the room and the committee will determine if the research proposal has been accepted. The research proposal can be repeated at most once. A thesis proposal must be approved within two years of becoming a PhD candidate.

After approval of the proposal, the committee meets from time to time to review the progress of the research.

Thesis Defense

After completing the research proposal successfully, the PhD candidate must conduct the necessary research and publish the results in a PhD dissertation. The dissertation must be submitted to the PhD committee two weeks prior to the oral defense and at least 90 days before the graduation date. The oral presentation involves a 45-minute presentation by the candidate, open to the public, followed by an unspecified period during which the committee will ask questions. The question and answer period is not open to the public.

After the question and answer period, the candidate will be asked to leave the room and the committee will determine if the candidate has passed or failed the examination. If the candidate fails the defense the first time, he or she will be granted one more chance to pass the final defense. Paperwork selecting the thesis committee and indicating the results of the thesis defense must be filed with the Department of Engineering Management Studies and the Graduate College.

The PhD in Project Management degree will be awarded for original research on a significant Project Management issue. Graduate students who have an MS degree or who have completed work equivalent to that required for an MS degree will continue to work closely with individual faculty members to pursue the PhD in Project Management degree. Dissertation research for the PhD in Project Management degree may be supported by a research grant from a government agency or an industrial contract.

Sample Plan of Study (PhD)

Upon entering the PhD in Project Management program, each student will be assigned an advisor, and with the help of the advisor will develop and file a plan of study (which can be brought up to date when necessary). The plan of study must be filed with the Project Management program; the student's advisor; and Graduate College no later than the end of the student's first term in the program.

BS (in any discipline)/MS in Project Management

Note: Effective Fall term, September 2017, and until further notice, the Project Management program will not be accepting applications to this program.

Motivated Drexel undergraduate students from any discipline considering the BS/MS option have the opportunity to add the MS in Project Management to their curriculum. Students approved to pursue this option will work with advisors to develop a plan of study that will allow them to graduate with a BS in their undergraduate field of study and an MS in Project Management.

BS/MS students who complete an MS in Project Management will be equipped with the fundamental competencies expected of project

managers in virtually any field. They will also be prepared to pursue the Certified Associate in Project Management (CAPM)[®] or Project Management Professional (PMP)[®] credentials from the Project Management Institute (PMI). Course content, which is the same as that of the MS in Project Management degree, is aligned with the internationally recognized Project Management Institute's (PMI)[®] *A Guide to the Project Management Body of Knowledge (PMBOK[®] Guide)*.

Eligible Students

Current Drexel undergraduate students who have completed between 90.0 and 120.0 credits of their respective undergraduate degree with a minimum cumulative GPA of 3.2 and who have successfully completed at least 1 co-op experience or have at least 1 year of professional experience should contact their undergraduate advisor about this option.

Application Requirements

- Signed Accelerated Degree Program Application (<http://drexel.edu/graduatecollege/forms-policies/forms>) (approved by the student's primary academic advisor)
- Current resume
- Personal essay discussing the following:
 - Why you are pursuing a BS in your chosen discipline/the MS in Project Management
 - How you feel having a BS in your chosen discipline/the MS in Project Management will set you apart from your peers

ECE 493	Senior Design Project III	4.0
PROJ 603	Project Leadership & Teamwork	3.0
PROJ 695	Capstone Project in Project Management	3.0
ECEC 4XX (CE Elective)		3.0
Gen Ed Elective		3.0
Free Elective		3.0
Term Credits		19.0
Total Credit: 226.5		

* Graduate-level electives must be approved by the Project Management program.

Questions about the BS/MS option featuring a BS in any discipline and the MS in Project Management, as well as the materials requested for those wishing to pursue the option, should be directed to:

Mercedes Moultrie
Program Manager
 Project Management Program
 Tel: 215.571.3939
 E-mail: mm342@drexel.edu

CAPM, PMP, and PMBOK are registered marks of the Project Management Institute, Inc.

About the Graduate Minor

The Graduate Minor in Project Management is designed to enhance the studies of graduate students in any major throughout Drexel. It provides students with the knowledge necessary for successful professional and leadership careers in the rapidly expanding field of project management. The Graduate Minor in Project Management will help interested students prepare for the Certified Associate in Project Management (CAPM)® or Project Management Professional (PMP)® credentials from the Project Management Institute (PMI).

Requirements

- Be a current Drexel student enrolled in a graduate-level or BS/MS program
- Be in good academic standing
- Have a cumulative graduate GPA of at least 3.0
- A minimum grade of "B" (3.0) must be earned in each course in the minor for the course to be counted

Application Requirements

- Change of Curriculum/Status form (approved by the student's primary academic advisor)

- Essay/Statement discussing your interest in project management and how the Graduate Minor in Project Management will help you in your studies and/or future career path
- Current resume

Program Requirements

Required Courses	9.0
PROJ 501 Introduction to Project Management (Required Courses)	
PROJ 502 Project Planning & Scheduling	
PROJ 515 Project Estimation & Cost Management	
Elective Courses	3.0
Select 1 of the following:	
PROJ 510 Project Quality Management	
PROJ 520 Project Risk Assessment & Management	
PROJ 530 Managing Multiple Projects	
PROJ 535 International Project Management	
PROJ 540 Project Procurement Management	
PROJ 603 Project Leadership & Teamwork	
Other graduate-level courses (must be 5XX or higher) with approval of student's academic advisor and the Project Management program.	
Total Credits	12.0

Additional Information

Questions about the Graduate Minor in Project Management and the materials requested for those wishing to add the Graduate Minor in Project Management, should be directed to:

Mercedes Moultrie

Program Manager

Project Management Program

E-mail: mm342@drexel.edu

CAPM, PMP, and PMBOK are registered marks of the Project Management Institute, Inc.

Project Management Faculty

Frank Anbari, PMP, PhD (*Drexel University*) *Program Director, Project Management*. Clinical Professor. Transportation engineering; project scheduling; project cost management; earned value management; project quality management; project leadership; project management education; Six Sigma.

Jon Boyle, PhD (*Virginia Polytechnic Institute and State University*). Adjunct Associate Professor. Cognitive neurosciences; industrial/organizational psychology; knowledge management; group processes; human resources and workforce development; business strategy; technology-enabled learning; research and development; process improvement

Xiaoyi "Christine" Dai, PhD (*George Washington University*). Adjunct Instructor. The Role of the Project Management Office in Achieving Project Success.

Marcos DeArruda, MBA (*Drexel University*). Adjunct Instructor. Project risk; project management education; project cost management; project scheduling; project finance; project leadership.

James C. Deiner, MBA (*Cornell University*). Adjunct Instructor. IT projects in the pharmaceutical, logistics and financial services industries.

LTC (Ret.) Ronnie L. Prowell, PMP, MA (*Webster University*). Adjunct Instructor. Project Management; industrial engineering; capital project

management; leadership development; software development project management; Project Management Profession (PMP#169); certification instruction and coaching (boot camp instruction); pharmaceutical engineering; FDA Compliance management

Michael Scheuermann, PhD (*Drexel University*). Adjunct Instructor. Project management fundamentals; project leadership

Scott Serich, JD, PhD (*University of Michigan*). Adjunct Associate Professor. Procurement management; information technology project management

John Via, DEngr (*Southern Methodist University*). Teaching Professor.

Tiffani A. Worthy, PMP, EdD (*George Washington University*). Adjunct Instructor. Project management fundamentals; project leadership; project communications; cross cultural communications; project management education; Myers-Briggs Type Indicator

Property Management

Major: Property Management

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 52.1501

Standard Occupational Classification (SOC) code: 11-9141

Note: Effective Winter Term, January 2017, students are no longer being accepted into this program.

About the Program

The only online program of its kind in the nation, Drexel's Master of Science in Property Management prepares graduate students to drive innovation and lead the real estate management industry. Graduates with an MS in Property Management benefit from a transdisciplinary, comprehensive education in the real estate industry. The rigorous curriculum is designed to challenge and engage students. Students have access to courses anytime, anywhere.

The Master of Science in Property Management is a part-time online program with a structured plan of study. The curriculum stresses strategic decision-making, critical thinking, independent research, and analysis and synthesis of issues and concepts from all disciplines associated with the built environment. Students review case studies, exchange best practices, and discuss the latest industry strategies and benchmarks. All students complete a capstone project which is the major project of a student's master's degree experience.

For additional information, visit the Master of Science in Property Management (<http://www.drexel.edu/engmgmt/propmgt/academics/ms>) page.

Admission Requirements

- Completed application
- Current resume or CV
- Bachelor's degree from a regionally accredited, top-tier institution
- Undergraduate GPA of 3.0 or higher out of a 4.0 scale

- Applicants with a cumulative Undergraduate GPA below 3.0 with extensive related experience **and** relevant industry credentials (e.g. CPM®) may be considered.
- Graduate degree GPAs will be considered along with the Undergraduate GPA.
- Official transcripts from all universities or colleges and other post-secondary educational institutions attended. Email official electronic transcripts issued by a post-secondary institution directly to Drexel University Online (applyDUonline@drexel.edu). All transcripts must be supplied, regardless of the number of credits earned or the type of school attended. If all post-secondary institutions are not listed on the application, and then listed on transcripts received from other institutions, application processing will be delayed until the remaining transcripts are submitted. Use Drexel's Transcript Lookup Tool (<http://online.drexel.edu/support/supporting-documents.aspx>) to assist you in contacting your previous institutions.
- Two letters of recommendation, professional or academic. Drexel University Online now accepts electronic letters of recommendation (<http://www.drexel.edu/apply/recommend>). If a recommender prefers to submit an original, hard copy letter of recommendation, please remind the recommender that it must be signed and submitted in a sealed envelope signed across the flap by the recommender.
- An essay of at least 1,000 words describing your interest in the program. Your essay should include discussion of the following:
 - The degree's connection to your Bachelor's degree and/or other graduate coursework
 - The extent your past experiences (personal and professional) will enhance your classroom engagement, complement your coursework, and strengthen your performance
 - The program's relationship to current employment and potential for career growth
 - Your plan to apply the degree to future goals
 - If this is a change to your academic plans and/or career, explain the catalyst and your expectations
- International students must submit a TOEFL score indicating a minimum of 600 (paper exam) or 250 (CBT exam). For more information regarding international applicant requirements, view the International Students Admissions Information (<http://www.drexel.edu/grad/resources/international>) web page.
- An interview may be requested

Visit the MS in Property Management Online Application (<http://online.drexel.edu/online-degrees/business-degrees/ms-property-management/#apply>) page for more information about requirements and deadlines, as well as instructions for applying online.

Vince and Judy Vidas Program in Systems Engineering

Major: Systems Engineering

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 48.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 14.2701

Standard Occupational Classification (SOC) code: 17-2199

About the Program

The Master of Science in Systems Engineering is an interdisciplinary curriculum which integrates systems thinking with, and financial management and planning. The degree enables engineering leaders to perform, lead, and manage systems development throughout the life cycle, from conceptual development and engineering design through the

operation and sustainment phases. Study can be on a part-time or full-time basis, and all courses are offered online.

The curriculum features the following:

- Include models relevant to sustainable, high performance systems as they relate to effective systems engineering
- Expose students to model-based systems engineering using SysML and DODAF, also covering major aspects of the systems domain.
- Teach systems engineering processes and skills to integrate user needs, manage requirements, conduct technological evaluation, and build elaborate system architectures, assess risk and establish financial and schedule constraints.
- Prepare students to intelligently manage and contribute to any engineering challenge, including concept development, technology assessment, architecture selection, and proposal development. The courses stimulate and challenge students as they consider sustainability-oriented projects and become serious systems engineering managers and practitioners.

Program Outcomes

Graduates of the Drexel University Master of Science in Systems Engineering will be competent in their ability to:

- develop and implement models and tools to enhance and optimize complex systems;
- develop and manage processes relevant to complex systems development;
- architect, design, implement, integrate, verify, validate, support and decommission complex systems;
- use systems engineering tools and practices to identify and execute effective technical solutions;
- manage system-intensive projects within cost and schedule constraints;
- consider financial elements in all complex systems solutions.

Certificate Opportunity

Students may complete a Graduate Certificate as a standalone pursuit or as a gateway to the full Master of Science in Systems Engineering. Students may apply for admission to the Masters of Science in Systems Engineering degree program at any point in a certificate series. Upon admission, graduate courses successfully completed in the certificate series may be applied toward the Master's degree as applicable. Certificate opportunities include:

- Certificate in Systems Design and Development (p. 351)
- Certificate in Systems Engineering (p. 352)
- Certificate in Systems Engineering Analysis (p. 352)
- Certificate in Systems Engineering Integrated Logistics (p. 353)
- Certificate in Systems Reliability Engineering (p. 354)

Accelerated Degree (BS/MS) Option

Systems engineering is a critical discipline and the essence of our modern, high-technology world. As a result systems engineers are in high demand in industry.

The College of Engineering offers an accelerated degree program to undergraduate degree students in any discipline who have:

- Completed between 90 and 120 credits in their major
- Maintain a minimum GPA of 3.2
- Submit a professional resume
- Submit a personal statement explaining why they wish to pursue the degree

The College of Engineering's Engineering Management Department offers the MS in Systems Engineering as a degree option for undergraduate students enrolled in the following programs:

- BS in Architectural Engineering (<http://catalog.drexel.edu/undergraduate/collegeofengineering/architecturalengineering>)
- BS in Biomedical Engineering (<http://catalog.drexel.edu/undergraduate/schoolofbioengscienceandhealthsystems/biomedicalengineering>)
- BS in Chemical Engineering (<http://catalog.drexel.edu/undergraduate/collegeofengineering/chemicalengineering>)
- BS in Civil Engineering (<http://catalog.drexel.edu/undergraduate/collegeofengineering/civilengineering>)
- BS in Computer Engineering (<http://catalog.drexel.edu/undergraduate/collegeofengineering/computerengineering>)
- BS in Electrical Engineering (<http://catalog.drexel.edu/undergraduate/collegeofengineering/electricalengineering>)
- BS in Materials Science and Engineering (<http://catalog.drexel.edu/undergraduate/collegeofengineering/materialsscienceandengineering>)
- BS in Mechanical Engineering (<http://catalog.drexel.edu/undergraduate/collegeofengineering/mechanicalengineering>)

The MS is offered entirely online, making it convenient and flexible. Students will be introduced to the critical concepts in systems engineering and with the distinct advantage of bachelor's in a different, will be fully prepared to obtain a position as a systems engineer upon graduation.

Admission Requirements

Degree and GPA Requirement

A bachelor's degree in an Engineering discipline from an ABET-accredited college or university is required. A bachelor's degree in science (Physics, Mathematics, Computer Science, etc.) may also be acceptable. An undergraduate degree earned abroad must be deemed equivalent to a U.S. bachelor's degree. A minimum 3.0 GPA (on a 4.0 scale) for a bachelor's degree as well as for any subsequent graduate-level work is required.

GRE Requirement

The GRE General Test is only required of applicants for full-time studies; part-time applicants do not need to take the GRE. Official documents of the exam must be submitted directly to the Graduate Admissions Office. Unofficial photocopies will not be accepted. The GRE can be waived for students who have successfully completed a Master's degree or a Drexel certificate in the systems curriculum.

TOEFL Requirement

For students whose native language is not English and who do not hold a degree from a US institution, the Test of English as a Foreign Language (TOEFL) is required. TOEFL scores must be less than two years old to be considered. Minimum of 600 (paper-based), 250 (computer-based), or 100 (internet-based). Official documents of this exam must be submitted

directly to the Graduate Admissions Office. Unofficial photocopies will not be accepted.

Other Requirements

- Submission of an application
- Official, sealed college transcripts
- An essay
- Two or more letters of recommendation

Degree Requirements

The master of science in systems engineering degree requires 48.0 credits, including 36.0 credits in required core courses and 12.0 graduate elective credits.

Students may take their required elective credits from any graduate-level course(s) in engineering, business, or another college for which they have adequate preparation and can obtain approvals from the college and the systems engineering program.

All candidates are encouraged to discuss areas of interest with the program advisor and to develop a proposed plan of study during the early stages of the program.

Note: Specific course requirements may be waived for students who have taken equivalent courses elsewhere.

Engineering Management Required Courses

EGMT 531	Engineering Economic Evaluation & Analysis	3.0
EGMT 572	Statistical Data Analysis	3.0
EGMT 573	Operations Research	3.0

Systems Engineering Required Courses

SYSE 510	Systems Engineering Process	3.0
SYSE 520	Global Sustainment and Integrated Logistics	3.0
SYSE 521	Integrated Risk Management	3.0

Dual Degree Opportunity

Students may pursue the Master of Science in Systems Engineering as part of a dual degree option with approval from the graduate advisors of both programs. Students may transfer as many as 15.0 credits from one program to the other, usually in the form of electives. Examples of permissible dual pursuits with the MS Systems Engineering include the MS Engineering Management, MS Electrical Engineering, and MS Project Management.

Fast Second Master's Degree Opportunity

Students with a previously completed master's degree at Drexel may pursue a second master's degree in a different major without the need to go through the admission process again or to complete another 45.0 credits of graduate coursework. Up to 15.0 credits from the first master's may be transferred into the second master's degree program, enabling students to complete the second master's degree with a minimum of 33.0 new graduate credits.

Readmission into the second master's degree program is requested through the new departmental graduate advisor, with final approval by the Graduate College. During the term in which the student expects to complete the second master's degree, he/she must file an application for degree form through DrexelOne.

Career Opportunities

The MS Systems Engineering prepares students to become effective systems engineers, leaders, managers, and future executives. With a systems engineering background, students are able to tackle a wide array of engineering challenges from the entire systems life cycle, including concept development, technology assessment, architecture selection, and proposal development.

Systems engineers are highly valued in industry because their skills complement those in traditional engineering fields. Whereas other engineering disciplines usually focus deeply in only one area, systems engineers must integrate all of those areas into a comprehensive and effective system. This is a versatile skill-set that allows for a flexible career path, as systems engineering expertise is sought by a wide range of industries such as healthcare, defense, communications, aerospace, government, transportation, finance, and more. Drexel University's MS

Systems Engineering will prepare students from any of these fields to lead large, complex projects in their organizations.

Systems Engineering Faculty

Richard Grandrino, MBA (*Drexel University*). Teaching Faculty. Manager for advanced logistics operations at Lockheed Martin

Steven Mastro, PhD (*Drexel University*). Adjunct Faculty. Machinery Research and Silencing Division of NAVSEA Philadelphia. Work focuses on advanced sensor and control technologies for condition-based maintenance, damage control, and automation.

Miray Pereira, MBA (*Rutgers University*). Adjunct Instructor. Manages a team of consultants responsible for development, facilitation and implementation of fundamental demand management systems and capabilities for DuPont, most recently with the DuPont Safety & Protection Platform in strategic planning, mergers & acquisitions.

Walter Sobkiw, BS (*Drexel University*). Adjunct Faculty. Author of "Systems Engineering Design Renaissance" and "Systems Practices as Common Sense."

Fernando Tovia, PhD (*University of Arkansas*). Adjunct Instructor. Core quantitative analysis, strategic planning, supply chain management and manufacturing systems.

John Via, DEngr (*Southern Methodist University*) Director of Engineering Management; Associate Dean for Online Programs. Teaching Professor.

Certificate in Systems Design and Development

Certificate Level: Graduate

Admission Requirements: Bachelor's degree in engineering or other science

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 15.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 14.2701

Standard Occupational Classification (SOC) Code: 17-2199

About the Program

The courses in this certificate focus on teaching students engineering design and management of large complex systems, including software intensive systems. By exposing the students to the systems engineering design body of knowledge and allowing them to develop systems skills in stimulating and challenging environments, they will be prepared to become industry leaders who can make a significant difference. Upon completion of this certificate, the students will be able to design, lead, and manage any systems engineering effort -- regardless of size, complexity, technologies, or engineering emphasis.

Admission Requirements

Degree and GPA Requirement

A bachelor's degree in an engineering discipline from an ABET-accredited college or university is required. A bachelor's degree in the sciences

(physics, mathematics, computer science, etc.) may also be acceptable. Applicants with degrees in the sciences may be required to take a number of undergraduate or post-baccalaureate courses. An undergraduate degree earned abroad must be deemed equivalent to a US bachelor's degree. A minimum 3.0 GPA (on a 4.0 scale) for a bachelor's degree as well as for any subsequent graduate-level work is required.

TOEFL Requirement

For students whose native language is not English and who do not hold a degree from a US institution, the Test of English as a Foreign Language (TOEFL) is required. TOEFL scores must be less than two years old to be considered. Minimum of 600 (paper-based), 250 (computer-based) or 100 (internet-based). Official documents of this exam must be submitted directly to the Graduate Admissions Office. Unofficial photocopies will not be accepted.

Other Requirements

- Submission of an application
- Official, sealed college transcripts
- An essay
- Two or more letters of recommendation

Calendar Type: Quarter

Expected Time to Completion: 1.5 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 14.2701

Standard Occupational Classification (SOC) Code: 17-2199

About the Program

This certificate focuses on teaching students the process and the art of systems engineering. Students will learn systems engineering tools and skills to integrate user needs, manage requirements, conduct technological evaluation, and build elaborate system architectures. The courses devote particular attention to knowledge, skills, mindset, and leadership qualities needed to be a successful systems engineering leader in the field.

Any students working or interested in the field of systems engineering should consider pursuing and completing this certificate.

Admission Requirements

Degree and GPA Requirement

A bachelor's degree in an engineering discipline from an ABET-accredited college or university is required. A bachelor's degree in the sciences (physics, mathematics, computer science, etc.) may also be acceptable. Applicants with degrees in the sciences may be required to take a number of undergraduate or post-baccalaureate courses. Certificate in Systems Engineering Analysis

Certificate Level: Graduate

Admission Requirements: Bachelor's degree in engineering or other science

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 15.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1.5 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 15.1501

Standard Occupational Classification (SOC) Code: 11-9041

About the Program

The courses in this certificate focus on teaching students statistical analysis and the use of mathematical models to solve a variety of problems. The courses are structured to discuss theory, process and application. The primary emphasis is application as the objectives of the courses are to provide students with skills to model problems, determine a quantitative solution, and perform sensitivity analysis. Theory and process

are also studied so students learn how the models work by understanding the underlying theory associated with a particular model. Understanding of theory also enforces skills to conduct sensitivity analyses and helps answer “what if” type questions. Upon successful completion of this certificate, students will be able to formulate mathematical models and solve quantitative problems.

Any students interested in decision sciences or advanced mathematical modeling and analysis should consider pursuing this certification.

Admission Requirements

Degree and GPA Requirement

A bachelor's degree in an engineering discipline from an ABET-accredited college or university is required. For students whose native language is not English and who do not hold a degree from a US institution, the Test of English as a Foreign Language (TOEFL) is required. TOEFL scores must be less than two years old to be considered. Minimum of 600 (paper-based), 250 (computer-based) or 100 (internet-based). Official documents of this exam must be submitted directly to the Graduate Admissions Office. Unofficial photocopies will not be accepted.

Other Requirements

- Submission of an application
- Official, sealed college transcripts
- An essay
- Two or more letters of recommendation

Requirements

EGMT 571	Engineering Statistics	3.0
EGMT 572	Statistical Data Analysis	3.0
EGMT 573	Operations Research	3.0
SYSE 525	Statistical Modeling & Experimental Design	3.0
SYSE 690	Modeling and Simulation	3.0
Total Credits		15.0

Certificate in Systems Engineering Integrated Logistics

Certificate Level: Graduate

Admission Requirements: Bachelor's degree in engineering or other science

Certificate Type: Graduate Certificate

Number of Credits to Completion: 18.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1.5 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 14.2701

Standard Occupational Classification (SOC) Code: 17-2199

About the Program

The courses in this certificate focus on teaching students to understand, analyze and enhance the performance of complex and dynamic global supply chains. The certificate is structured with three quantitative courses: EGMT 571, EGMT 572, and EGMT 573, that will provide the students with mathematical and statistical tools to analyze and evaluate the supply chain.

The remaining three courses (SYSE 520, SYSE 522, SYSE 690) allow students to understand the dynamic and complex nature of global supply chains from a systems engineering perspective. They also teach students to implement the quantitative tools learned during the first three courses to efficiently manage the supply chain. Students will evaluate and analyze diverse types of supply chains through case studies, and they will analyze and discuss the best practices in supply chains across the world.

All affiliated courses may be applied to the Master of Science in Systems Engineering (p. 348) and the Master of Science in Engineering Management (p. 322).

Admission Requirements

Degree and GPA Requirement

A bachelor's degree in an engineering discipline from an ABET-accredited college or university is required. A bachelor's degree in the sciences (physics, mathematics, computer science, etc.) may also be acceptable. Applicants with degrees in the sciences may be required to take a number of undergraduate or post-baccalaureate courses. An undergraduate degree earned abroad must be deemed equivalent to a US bachelor's degree. A minimum 3.0 GPA (on a 4.0 scale) for a bachelor's degree as well as for any subsequent graduate-level work is required.

TOEFL Requirement

For students whose native language is not English and who do not hold a degree from a US institution, the Test of English as a Foreign Language (TOEFL) is required. TOEFL scores must be less than two years old to be considered. Minimum of 600 (paper-based), 250 (computer-based) or 100 (internet-based). Official documents of this exam must be submitted directly to the Graduate Admissions Office. Unofficial photocopies will not be accepted.

Other Requirements

- Submission of an application
- Official, sealed college transcripts
- An essay
- Two or more letters of recommendation

Requirements

EGMT 571	Engineering Statistics	3.0
EGMT 572	Statistical Data Analysis	3.0
EGMT 573	Operations Research	3.0
SYSE 690	Modeling and Simulation	3.0
SYSE 520	Global Sustainment and Integrated Logistics	3.0
SYSE 522	Engineering Supply Chain Systems	3.0
Total Credits		18.0

Certificate in Systems Reliability Engineering

Certificate Level: Graduate

Admission Requirements: Bachelor's degree in engineering or other science

Certificate Type: Graduate Certificate

Number of Credits to Completion: 18.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1.5 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 14.2701

Standard Occupational Classification (SOC) Code: 17-2199

About the Program

The courses in this certificate focus on teaching students to design for sustainability and reliability of systems during the life cycle of an operation. The first three courses will teach students the analytical tools required to perform reliability and maintainability modeling and analysis. The final three courses will focus on systems reliability, maintainability, and availability analysis (RM&A) for systems. The courses have an application to all phases of the systems engineering process, including requirements definition through systems design and development.

The students will learn the process that starts with RM&A in the initial phases of development, conducting trade off analysis during the system development phase to optimize reliability and availability of the system. The students will also learn to improve the reliability and availability of a product or a system by modeling and analysis of systems reliability using probability models.

Upon completion of the courses, students will be able to understand RM&A and modeling and apply reliability models for a product or system during its life-cycle: design, production, and warranty. Additionally, students will learn to conduct trade off analysis to enhance availability and reliability of the system and to develop maintenance concepts that are cost effective and support sustainment of the system.

Admission Requirements

Degree and GPA Requirement

A bachelor's degree in an engineering discipline from an ABET-accredited college or university is required. A bachelor's degree in the sciences (physics, mathematics, computer science, etc.) may also be acceptable. Applicants with degrees in the sciences may be required to take a number of undergraduate or post-baccalaureate courses. An undergraduate degree earned abroad must be deemed equivalent to a US bachelor's degree. A minimum 3.0 GPA (on a 4.0 scale) for a bachelor's degree as well as for any subsequent graduate-level work is required.

TOEFL Requirement

For students whose native language is not English and who do not hold a degree from a US institution, the Test of English as a Foreign Language (TOEFL) is required. TOEFL scores must be less than two years old to be considered. Minimum of 600 (paper-based), 250 (computer-based) or 100 (internet-based). Official documents of this exam must be submitted directly to the Graduate Admissions Office. Unofficial photocopies will not be accepted.

Other Requirements

- Submission of an application
- Official, sealed college transcripts
- An essay
- Two or more letters of recommendation

Program Requirements

EGMT 571	Engineering Statistics	3.0
EGMT 572	Statistical Data Analysis	3.0
EGMT 573	Operations Research	3.0
SYSE 688	Systems Engineering Analysis	3.0
SYSE 523	Systems Reliability Engineering	3.0
SYSE 524	Systems Reliability, Availability & Maintainability Analysis	3.0
Total Credits		18.0

The College of Medicine

Overview

Renowned for its innovative, student-centered educational programs, Drexel University College of Medicine (<http://www.drexel.edu/medicine>) represents the consolidation of two venerable medical schools with rich and intertwined histories: Hahnemann Medical College and Woman's Medical College of Pennsylvania. Established in 1848 and 1850, respectively, they were two of the earliest medical colleges in the United States, and Woman's was the very first medical school for women in the nation.

Today, with more than 1,000 medical students, Drexel University College of Medicine is educating one in every 73 medical students in the nation. Graduate students number more than 700, and the College is the academic partner in the education of some 600 medical residents. There are more than 700 clinical and basic science faculty, and more than 1,700 affiliate and volunteer faculty.

Within the College of Medicine, The Graduate School of Biomedical Sciences and Professional Studies (p. 47) offers an additional 28 majors, 2 graduate minors, and 5 professional certificates.

Major

- Medicine (MD) (p. 355)

About the College of Medicine

Mission Statement

Drexel University College of Medicine excels and innovates in education, research, and delivery of compassionate care in our culture of diversity, spirited inquiry, collaboration, and opportunity.

About the College

The College of Medicine's main campus, Queen Lane, is in a suburban-like setting in the East Falls section of Philadelphia. Additional facilities are located at the Center City campus, adjacent to Hahnemann University Hospital. Our Pediatrics Department is at St. Christopher's Hospital for Children, and the Department of Psychiatry is based at Friends Hospital. Students can receive clinical education at 25 affiliated hospitals and ambulatory sites chosen for their commitment to teaching as well as medical excellence.

The College's clinical practice, Drexel Medicine[®], is a patient-focused practice emphasizing quality, innovation and community service, and enhanced by physician involvement in the research and educational programs.

The College of Medicine has established one of the largest centers for spinal cord research in the Mid-Atlantic Region, and founded one of the leading centers for malaria study in the nation. Collaborative projects leveraging Drexel University's technological expertise continue to push the frontiers of nanomedicine and neuroengineering.

Drexel University College of Medicine houses one of 21 National Centers of Excellence in Women's Health designated by the Department of Health & Human Services. Drexel Medicine's HIV/AIDS primary care practice is the largest in the Greater Philadelphia region. Faculty physicians are highly respected in numerous other specialties, including cardiology, pain management, sports medicine and toxicology.

The Doctor of Medicine (MD) Program

About the Program

Drexel University College of Medicine's MD program trains future physicians in the science and art of medicine. At Drexel, our medical students learn to combine cutting-edge technology with the lightest level of compassion in the practice of medicine. Our supportive educational environment emphasizes collaboration and gives students a comfort level that lets them learn and thrive. Faculty members are concerned first and foremost with teaching and helping students.

Recognizing that students have different learning styles, students choose between two innovative academic curricula for their first two years of study. Both options focus on professional medical education, preparing students to pursue a career as either a generalist or specialist. Both stress problem solving, lifelong learning skills and the coordinated teaching of basic science with clinical medicine.

Beginning in August 2017, Drexel will implement a new innovative MD curriculum called **Foundations and Frontiers**, designed to create physicians for the 21st century. The curriculum instills all of the enduring qualities essential to clinical excellence while also including essential emerging competencies such as understanding of population health, health informatics, quality and patient safety, and health care systems and financing.

Foundations and Frontiers Highlights

Foundations and Frontiers was created with input from current medical students, faculty, alumni and national medical education experts. The program builds on the College of Medicine's legacy in medical education and embraces Drexel University's reputation for innovation and collaboration.

The new curriculum is supported technologically by Drexel-developed iPad applications and a state-of-the-art simulation center and clinical education center where medical students can apply what they have learned in the classroom with hands-on training.

Other hallmarks of the distinctive Frontiers and Foundations curriculum include:

- Early and frequent clinical exposure
- Integrated basic science and clinical education
- Team learning
- Technology-enhanced education
- Cultural competence
- Community and civic engagement
- And award winning, nationally recognized Professional Formation program
- Enhanced opportunities for research and scholarly projects in basic science as well as other areas such as Women's Health, Population Health, Healthcare Economics, and Humanities

The Societies

Incoming medical students are placed into one of six learning communities, or "societies," each taking its name from a famous Philadelphia landmark: Athenaeum, Liberty Bell, Physick House, Rocky Statue, Reading Terminal, and Eakins House.

Each society is led by a faculty director and student representatives, all of whom are responsible for coordinating and planning society activities. In addition, society-associated faculty serve as advisors to small groups of medical students in the first two years of the educational program.

The society provides the framework for relationships among medical students and faculty. The society also provides a social structure for each student, giving a small-school feel while maintaining all of the advantages and amenities of a large institution.

The program helps promote a greater sense of community and connectedness among the medical students and faculty. The society serves as the core unit for a variety of valuable activities including:

- Small group learning
- A faculty advising/peer mentoring program
- Community service projects
- Activities to promote student wellness
- Social activities
- Society-based competitions culminating in the coveted "Dean's Cup"

The Foundations and Frontiers curriculum information presented is subject to revision. Last updated June 1, 2017.

For more information, including admissions details, visit the College of Medicine's MD Program (<http://drexel.edu/medicine/academics/md-program>) web site.

Three-Phase Curriculum

Foundations and Frontiers is a four-year curriculum that has been divided into three phases. Phase One (years 1 and 2) lays the groundwork for basic and clinical science. Phase Two (year 3) allows medical students to apply their patient care knowledge and skills to a variety of clinical settings. Phase Three (year 4) focuses on advanced clinical skills and preparation for residency.

Phase 1: Foundations

The 18-month "Foundations" phase includes basic and clinical science courses that integrate multiple disciplines. Medical students also spend time in non-traditional classroom settings working in teams to apply knowledge to clinical problems. This phase of the curriculum also includes multiple experiences in our state-of-the-art simulation center working with

high-fidelity mannequins and standardized patients. The basic science content begins with an introduction to cells and tissues and then proceeds into organ-based blocks with a focus on normal processes. During the second year, medical students revisit the major organ systems with a focus on abnormal processes.

Lectures, conferences, laboratory, simulation and other team-learning formats develop and extend the principles introduced in the case throughout the week.

A longitudinal practicum experience extends through the Foundations phase and exposes medical students to patients in varied community settings. It provides experiences in chronic care, service learning and inter-professional education, and is combined with a social justice and health disparities curriculum.

During four one-week blocks, medical students will be immersed in the "Frontiers" portion of the curriculum, providing cutting-edge study in such areas as healthcare informatics, population health, quality and patient safety, healthcare economics, and principles of translational research.

Phase 2: Applications

The one-year long "Applications" phase allows medical students to practice their patient care knowledge and skills in a variety of clinical settings. The year starts with participating in a two-week structured session, "*Intersession I: Transition to the Clinical Years*," which focuses on skills needed for medical students to function effectively on the wards.

During the third year, medical students rotate through clerkships in surgery, internal medicine, family medicine, pediatrics, psychiatry, neurology, ambulatory medicine, and obstetrics and gynecology. To enhance the diversity of their clinical experience, medical students work with faculty members at multiple sites in metropolitan centers, working-class neighborhoods, suburbs, inner city areas, and rural communities.

All third-year clerkships take place on Drexel's academic campuses. Assignments for third year are based on the results of a lottery system, although medical students can elect year-long assignments at our six regional campuses:

- Abington Memorial Hospital
- Allegheny General Hospital
- York Hospital
- Kaiser Permanente in Sacramento
- Monmouth Medical Center
- Crozer Chester Medical Center

Phase 3: Transitions

The "Transitions" phase focuses on advanced clinical skills and preparation for residency. The fourth year curriculum is structured within "Pathways" - an advising system that gives medical students a well-rounded educational experience and also prepares them for potential career. Medical students may choose a discipline-specific Pathway or one that provides more broad-based experiences. All medical students have a Pathway-specific advisor who works with the student to balance the structure and flexibility of their learning needs, helps prepare the student to enter postgraduate training with confidence, and works to maximize the guidance and counseling available from preceptors.

The Pathway advisors help medical students focus their preparation for graduate medical education and careers. The Pathway program also gives medical students experience in fields of interest other than the one

that is likely to be their career path. Medical students take both required courses and electives in the Pathway system. Six courses are required:

- Sub-internship in a core discipline
- Pathway-specific rotation
- Emergency medicine or critical care rotation
- Transition to residency
- Residency-immersion experience

Fourth-year medical students have opportunities to complete a variety of clinical elective rotations at hospitals and sites that are not Drexel clinical affiliates, including international rotations. In addition, during the fourth year, medical students may choose to leverage the expertise of one of Drexel's other colleges by studying for a graduate certificate in one of the Frontiers content areas. Alternatively, medical students may choose to conduct a scholarly project under the direction of a faculty member.

Dual Degree Programs

MD/PhD Program

The MD/PhD program is designed for a limited number of individuals who are strongly motivated toward a career in academic medicine and medically oriented research. The program trains individuals in the fundamental clinical aspects of medicine and offers advanced training in biochemistry, microbiology and immunology, molecular and cellular biology, neuroscience and pharmacology, as well as medical engineering. Physicians with extensive research training are uniquely positioned to advance medical care and to teach at the cutting edge of medical discovery. Tuition scholarships and stipends for medical school and graduate school are provided for a limited number of students.

MD/MPH

With Drexel's School of Public Health, the College of Medicine offers a joint five-year program for highly qualified students to pursue both the MD and the Master of Public Health degrees. Students are taught to be physicians with a public-health orientation to the development, planning, delivery, and evaluation of health care programs and policies.

MD/MBA

The MD/MBA degree meets a growing demand by physicians who wish to manage corporate medical practices, hospitals, and related organizations and contribute to the development of health policy. The joint program prepares physicians to apply management principles to individual or group practices or to move into management positions at many types of organizations. Students receive training at both the College of Medicine and at Drexel's A.A.C.S.B. -accredited LeBow College of Business. The program lets students earn both degrees in five years.

MD/Healthcare Ethics MA

Drexel medical students may enter a combined degree pathway to receive a master's degree in health care ethics through St. Joseph's University. Students spend a year in residence at St. Joseph's University, usually after their second medical school year. They receive two course credits toward the master's degree from their medical school coursework.

For additional information, visit the College's Dual Degrees (<http://www.drexelmed.edu/Home/AcademicPrograms/MDProgram/AdditionalOpportunities/DualDegree.aspx>) page.

The Dornsife School of Public Health

About the School

The Dornsife School of Public Health (<http://drexel.edu/dornsife>) at Drexel University provides education, conducts research, and partners with communities and organizations to improve the health of populations.

Founded on the principle of health as a human right, our school is especially committed to improving health in cities, eliminating health disparities, and promoting health in all policies.

Key to the school's mission is active engagement with the world of public health practice, with communities, and with a range of policies and sectors within and outside the health care system relevant to health.

The Dornsife School of Public Health is the only fully accredited school of public health in the Philadelphia region.

Educational programs

School educational programs combine rigorous training with hands-on practical experiences. Students benefit from engagement with a broad set of community partnerships and research collaborations. Graduates acquire the knowledge, skills and perspective necessary to make a difference in the health of communities in the United States and worldwide.

Research

Dornsife School of Public Health faculty and students conduct research on the drivers of population health and the impact of a range of practices and policies on health. Areas of emphasis include urban health, health disparities, food policy and health, neighborhood and community interventions, behavior change, health consequences of environmental and occupational exposures, aging and chronic diseases, infectious disease, public health history and ethics, the health consequences of trauma and violence, the social determinants of health, and public health needs assessment and practice, among others.

Majors

- Biostatistics (MS) (p. 357)
- Community Health and Prevention (MPH, DrPH) (p. 364)
- Environmental and Occupational Health (MPH) (p. 373)
- Epidemiology (MS, MPH, PhD, MD/MPH) (p. 379)
- Health Management and Policy (MPH, DrPH) (p. 397)
- Health Policy and Social Justice (DrPH) (p. 405)
- **NEW:** Health Services Research and Policy (PhD)
- Public Health (MPH) (p. 417)
- Public Health - Executive Program (MPH) (p. 388)

Joint Degrees

- Law/Public Health JD/MPH (p. 415)
- Public Health MD/MPH (p. 427)

NEW: Minors

- Environmental and Occupational Health (p. 375)
- Global Health (p. 393)

- Infectious Disease Prevention and Control (p. 393)
- Latino and Immigrant Health (p. 394)
- Lesbian, Gay, Bisexual and Transgender (LGBT) Health (p. 394)
- Maternal and Child Health (p. 395)
- Program Monitoring and Evaluation (p. 395)
- Public Health Ethics and History (p. 396)
- Substance Use and Misuse (p. 396)

Certificates

- Epidemiology and Biostatistics (p. 362)
- Global Health (p. 363)
- Lesbian, Gay, Bisexual and Transgender (LGBT) Health (p. 363)
- **NEW:** Maternal and Child Health

Biostatistics

Major: Public Health

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 47.0 (MS)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 26.1102

Standard Occupational Classification (SOC) code: 15-2041

About the Program

Biostatistics applies statistical, mathematical and computational techniques to scientific research in health-related fields, including medicine, epidemiology, and public health. Biostatistics has been an integral and indispensable tool in improving health and reducing illness. Biostatisticians play essential roles in designing studies and analyzing research data. Graduates with degrees in biostatistics are employed in public health research and service organizations, university research groups, hospitals, pharmaceutical companies, health-related industries and government. The demand for biostatisticians in the job market has been consistently strong. New technologies are generating an unprecedented amount of data which present exciting opportunities for biostatisticians with strong computational skills.

The goal of Drexel University's MS Program in Biostatistics is to provide students with a thorough understanding of biostatistical methods, strong computational skills, and the ability to apply this knowledge to research focusing on health related problems. The program prepares students for handling the quantitative and computational aspects of a research project, ranging from study design, data collection and management, developing analysis plans, conducting analyses and reporting findings both orally and in writing. The MS in Biostatistics program includes course work in statistical theory and methods, computing and data management, epidemiology, and general public health topics. Incorporated into the second year is a two quarter-long practicum experience working on a real academic, government, or industry project in a sponsoring organization setting. The practicum-based research project will involve the application of biostatistical analysis to a problem of significance to the sponsoring academic, government or industry organization with joint oversight provided by a Department faculty member and an on-site PhD level biostatistician.

Upon graduation MS students will attain competencies in the following three areas: general public health knowledge, biostatistics knowledge, data management and computing skills.

For additional information about the program, visit the Dornsife School of Public Health (<http://publichealth.drexel.edu>) web site.

Admission Requirements

Applicants to the MS in Biostatistics must meet the following requirements, having:

- a baccalaureate degree, ideally in a quantitative field such as mathematics, economics and computer science or a scientific area such as natural, biological, medical and environmental sciences
- at least two semesters of calculus in college
- at least one semester of linear algebra in college
- some familiarity with a programming language or a statistical package is desirable, as well as probability and multivariate calculus.

The application package will include:

- Completion of the Schools of Public Health Common Application (<http://sophas.org>)
- Undergraduate transcripts (international transcripts must be evaluated by World Education Services)
- A written statement of career and educational goals, professional experience, and area of research interest
- Three letters of recommendation from faculty or professionals who can evaluate the applicant's promise as a graduate student
- Resume or CV
- Test of English as a Foreign Language (TOEFL) for applicants whose first language is not English
- Official GRE scores (no other standardized test accepted for this program)

Please note: Drexel University's School code for submitting GRE scores is 7890

Degree Requirements

Completion of the MS in Biostatistics requires: (1) a minimum of 41.0 credit hours of course work; (2) a cumulative grade point average of 3.0 or higher; (3) a substantial data analysis project (6.0 credit hours) with a written report and oral presentation.

Required Biostatistics Courses

BST 551	Statistical Inference I	3.0
BST 553	Longitudinal Data Analysis	3.0
BST 555	Introduction to Statistical Computing	3.0
BST 557	Survival Data Analysis	3.0
BST 569	Linear Statistical Models	4.0
BST 570	Generalized Linear Models	3.0
BST 651	Statistical Inference II	4.0
BST 701	Advanced Statistical Computing	3.0

Required Epidemiology Courses

EPI 570	Introduction to Epidemiology	3.0
---------	------------------------------	-----

Master's Project Courses

Electives

Students must select 12.0 credits total. Some potential electives include the following: 12.0

BST 557	Survival Data Analysis	
BST 558	Applied Multivariate Analysis	
BST 561	Design & Analysis of Clinical Trials	
BST 565	Applied Bayesian Analysis	
BST 567	Statistical Consulting	

BST 568	Nonparametric and Semiparametric Models	
EPI 550	Applied Survey Research in Epidemiology	
EPI 552	Epidemiology for Public Health Practice	
EPI 553	Infectious Disease Epidemiology	
EPI 556	Perinatal Epidemiology	
EPI 557	Cardiovascular Disease Epidemiology & Prevention	
EPI 558	Making Sense of Data	
EPI 559	Pharmacoepidemiology	
EPI 561	Pathophysiologic Basis of Epidemiologic Research	
EPI 573	Autism as a Public Health Challenge	
Total Credits		41.0

Sample Plan of Study

Term 1		Credits
BST 551	Statistical Inference I	3.0
BST 555	Introduction to Statistical Computing	3.0
BST 569	Linear Statistical Models	4.0
Term Credits		10.0
Term 2		
BST 651	Statistical Inference II	4.0
BST 570	Generalized Linear Models	3.0

Total Credit: 47.0		

Dornsife School of Public Health Faculty

Amy Auchincloss, PhD, MPH (*University of Michigan*). Associate Professor. Department of Epidemiology and Biostatistics. Environmental determinants of health and the health effects of air pollution; contribution of resources in residential environments to health behaviors, obesity, diabetes and cardiovascular disease; the use of spatial analysis methods and agent-based mode

Sharrelle Barber, ScD, MPH (*Harvard T.H. Chan School of Public Health*). Assistant Research Professor. Racial/Ethnic Health Inequalities in Cardiovascular Disease; Social Determinants of Racial/Ethnic Health Inequalities in Cardiovascular Disease; Community-Engaged Research; Geography and Health; Multilevel Analysis; Spatial Analysis and GIS; Global Health; Urban Health

Scarlett Bellamy, ScD (*Harvard University*). Professor. Clinical Trials; Data Analysis Methods; Health Disparities; Infectious Disease; Mental health and Behavioral health; Reproductive or Sexual Health

Zekarias Berhane, PhD (*University of Pittsburgh*). Assistant Professor. Department of Epidemiology and Biostatistics. Modeling time-to-event

data with single and multiple outcomes, mixed effect models and regression diagnostics.

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; positive behavior interventions and supports (PBIS), response to intervention (RtI), systems-level change and performance feedback.

Sandra L. Bloom, MD (*Temple University School of Medicine*). Associate Professor. Department of Health Management and Policy. Psychological trauma and organizational stress.

Sherry Brand-Rauf, MPhil, JD (*Columbia University*). Associate Teaching Professor. Health Policy; Occupational Health; Environmental Exposures; Health Disparities; Public Health Law

Jennifer Breaux, DrPH, MPH, CHES (*Drexel University*). Assistant Teaching Professor. Maternal and child health, Child and maternal health, Community health, Human rights.

Darryl Brown, PhD (*Johns Hopkins University*). Assistant Teaching Professor. Department of Health Management and Policy. Health care research and planning; patient outcomes and applied health economic methods.

Robert J. Brulle, PhD (*George Washington University*). Professor. Environmental policy and politics, critical theory, marine risk, social movements, environmental sociology.

James W. Buehler, MD (*University of California, San Francisco*). Clinical Professor. Department of Health Management and Policy. Public health preparedness, e-health, health policy, building public health infrastructure and capacity, chronic diseases, behavioral health, data privacy, emergency preparedness and public health practice.

Igor Burstyn, PhD (*Utrecht University*). Associate Professor. Department of Environmental and Occupational Health. Occupational and environmental epidemiology, industrial hygiene, endocrine disruptors, environmental exposures, biomarkers, air quality, gene-environmental interaction, maternal and child health, Bayesian statistics, statistical modeling, etiology of autism.

Amy Carroll-Scott, PhD, MPH (*University of California at Los Angeles*). Assistant Professor. Asset mapping, Built environment, Chronic diseases, Community capacity building, Community health, Community health worker/promoters models, Community-based participatory research, Community resilience, Demography, Health disparities, Mixed methods, Neighborhood context, Obesity, School health, Social capital/social cohesion, Social determinants of health, Social epidemiology, Spatial data and analysis, Youth leadership development.

Esther Chernak, MD, MPH, FACP (*UMDNJ-Robert Wood Johnson Medical School*) Director of the Center for Public Health Readiness and Communication; Director of Joint Degree Programs. Associate Research Professor. Emergency preparedness, infectious disease, public health practice, crisis and emergency risk communication, medicine and public health.

Mariana Chilton, PhD, MPH (*University of Pennsylvania*) Director, Center for Hunger-Free Communities. Associate Professor. Department of Health Management and Policy. Nutrition, housing and health; chronic diseases; human rights, chronic diseases, community health, human rights and hunger.

Theodore Corbin, MD, MPP (*Drexel University*) Joint Appointment between Dornsife School of Public Health and Drexel University College of Medicine. Associate Professor. Department of Health Management and Policy. Health policy; design of care systems; high risk youth; violence; healthcare services; injury prevention.

Anneclaire De Roos, PhD, MPH (*University of North Carolina at Chapel Hill*). Associate Professor. Department of Environmental and Occupational Health. Environmental and occupational epidemiology, exposure assessment, pesticides, persistent organic pollutants, drinking water quality, air pollution, urban environments, chemical risk assessment.

Ana Diez Roux, MD, PhD, MPH (*Johns Hopkins University*) Dean, Dornsife School of Public Health. Distinguished Professor. Department of Epidemiology and Biostatistics. Social determinants of health; neighborhoods and health; psychosocial factors; air pollution, cardiovascular disease epidemiology; multilevel and systems methods; urban health and health in Latin America.

Mary Duden, MBA (*Drexel University*). Assistant Teaching Professor. Department of Health Management and Policy. Health care for the underserved and health disparities.

Jerome Dugan, PhD (*Rice University*) Primary appointment in Health Economics at the Drexel College of Nursing and Health Professions. Assistant Professor. Department of Health Management and Policy. Insurance markets and healthcare regulation.

Nancy Epstein, MPH, MAHL (*University of North Carolina at Chapel Hill*). Associate Professor. Health Disparities, Faith and Health.

Alison A. Evans, ScD (*Harvard University*). Associate Professor. Department of Epidemiology and Biostatistics. Epidemiology of infectious diseases and cancer; cohort studies; minority and immigrant health; chronic viral infections; hepatitis b; elimination of viral hepatitis; immunization; perinatal transmission.

Jerry Fagliano, MPH, PhD (*Johns Hopkins University*) Chair, Department of Environmental and Occupational Health. Associate Clinical Professor. Children's health and environmental exposures; health impacts of climate change; inequities in environmental exposure and disease; risks from transportation of hazardous materials; spatial distribution and clustering of disease.

Robert I. Field, PhD, JD, MPH (*Columbia University*) Joint Appointment in the Drexel University Kline School of Law. Professor. Health policy, public health law, health administration and management, public health ethics.

Janet Fleetwood, PhD, MPH (*University of Southern California*). Professor. Philosophy, bioethics, public health ethics, research ethics, social justice, ethical theory.

Arthur L. Frank, MD, PhD (*City University of New York*) Chair Emeritus. Professor. Department of Environmental and Occupational Health. Environmental and occupational health, agricultural safety and health, pneumoconiosis, occupational toxicology, environmental pollution.

Dennis Gallagher, MA, MPA (*University of Pittsburgh*). Associate Teaching Professor. Department of Health Management and Policy. Health department structure and financing; health policy and law; Medicare/Medicaid and public health infrastructure.

Pamela Geller, PhD (*Kent State University*). Associate Professor. Stressful life events and physical and mental health outcomes, particularly

in the area of women's reproductive health (e.g. pregnancy, pregnancy loss, infertility, medical education).

Marla Gold, MD (*University of Medicine and Dentistry-New Jersey Medical School*) *Dean Emerita*. Professor. Department of Health Management and Policy. Design of HIV/AIDS care systems, treatment protocols, resource utilization, and epidemiology; CQI, managed care and systems of health care, health administration, behavioral health care and substance abuse treatment systems.

Neil Goldstein, PHD, MBI (*Drexel University, Oregon Health & Science University (OHSU) School of Medicine*). Assistant Research Professor. Data Analysis Methods; eHealth or mHealth; Infectious Disease; Maternal and Child Health; Reproductive or Sexual health; Spatial Analysis or GIS; Statistical Modeling; Vaccines and vaccinations; Electronic medical records/informatics; Translational epidemiology

Edward J. Gracely, PhD (*Temple University*) *Joint Appointment in Drexel University College of Medicine*. Associate Professor. Department of Epidemiology and Biostatistics. Statistics, experimental design/research methods and statistical analysis, clinical trials.

Ali Groves, PhD, MHS (*University of North Carolina; Johns Hopkins University*). Assistant Professor. Reproductive and Sexual Health, Maternal and Child Health, Global Health, Data Analysis Methods.

Jana A. Hirsch, PhD (*University of Michigan*). Assistant Research Professor. Health and place or built environment; health disparities; mental and behavioral health; urban health; active aging; age-friendly neighborhoods

Mary E. Hovinga, PhD, MPH (*University of Michigan*). Associate Professor. Department of Epidemiology and Biostatistics. Cancer, cognitive disabilities; PCBs and DDT, lead exposure; neurological disorders, environmental hazards, epidemiologic study design.

Tran Huynh, PhD, MPH, CIH (*University of Minnesota*). Assistant Professor. Community Engaged Research; Cardiovascular Disease; Statistical Modeling; Immigrant Health; Health Disparities; Occupational Health; Workplace Health Interventions; Industrial Hygiene; Bayesian Statistics; Exposure Assessment; Epidemiology

Jessie Kemmick Pintor, PhD, MPH (*University of Minnesota*). Assistant Professor. Community-based participatory research; Immigrant health; Health disparities; Health services research; Health policy; Maternal & child health; Mixed methods; Immigration policy

Ann Klassen, PhD (*Johns Hopkins University*). Professor. HIV/AIDS, Food safety, Excess burden intervention, GIS-based and spatial analysis, Mixed methods, Qualitative methods, Social sciences.

Jennifer Kolker, MPH (*University of Michigan*) *Associate Dean for Public Health Practice*. Associate Clinical Professor. Department of Health Management and Policy. Maternal and child health; federally qualified health center program; urban health issues; health department structure and financing; health policy and law; legislative advocacy; Medicare/Medicaid; preterm birth; public health education and training; public health infrastructure; welfare economics; women's health.

Shiriki Kumanyika, PhD, MS, MPH (*Cornell University; Columbia University; Johns Hopkins University*). Research Professor. Solutions to obesity and diet-related diseases in black Americans, 'Culture of health' approaches in black communities, Assessment of food environments, Environmental influences on lifestyle changes, Targeted marketing of unhealthy foods and beverages, Food and nutrition policy, Evidence-

based public health, Nutrition epidemiologic methods, Social determinants of health and health equity, Systems science applications in public health.

Brent Langellier, PhD (*University of California, Los Angeles*). Assistant Professor. Department of Health Management and Policy. Health and health care disparities, Latino health, complex systems, quantitative methods, GIS.

Stephen E. Lankenau, PhD (*University of Maryland*). Professor. HIV/AIDS, Overdose prevention, Prescription drug misuse, Medical marijuana, Injection drug use, High risk youth, Homeless, Qualitative research.

Felice Le-Scherban, PhD, MPH (*University of Michigan*). Assistant Professor. Department of Epidemiology and Biostatistics. Life course approaches to socioeconomic, racial, and ethnic health disparities; social determinants of health among immigrants; causal links between education and health; analytic methods in social epidemiology.

Brian K. Lee, PhD (*Johns Hopkins University*). Associate Professor. Department of Epidemiology and Biostatistics. Environmental determinants and epidemiology of autism spectrum disorders; perinatal epidemiology; child and material health; neuropsychiatric epidemiology, causal inference; machine learning.

Nora L. Lee, PhD (*Johns Hopkins University*). Assistant Research Professor. Department of Epidemiology and Biostatistics. Perinatal epidemiology; preterm birth; infant mortality; autism spectrum disorders; maternal and child health; racial and ethnic health disparities; secondhand smoke; tobacco control; environmental exposures.

Longjian Liu, MD, PhD, MSc, FAHA (*The University of Hong Kong*). Associate Professor. Department of Epidemiology and Biostatistics. Pharmacoepidemiology; cardiovascular disease and diabetes epidemiology; drug-lifestyle interaction; environmental and global health disparities; hospital electronic health records for cardiovascular and diabetes risk assessment and prediction.

Gina Lovasi, PhD (*University of Washington*) *Co-Director of the Urban Health Collaborative*. Associate Professor. Cardiovascular Disease; Data Analysis Methods; Health and Place or Build Environment; Health Disparities; Spatial Analysis or GIS; Urban Health; Urban trees and greenspace; Local retail and urban design; Transportation, infrastructure and policies

Shannon Marquez, MEng, PhD (*University of North Carolina at Chapel Hill*) *Director, Office of Global Health*. Associate Professor. Department of Environmental and Occupational Health. Global health; water sanitation and hygiene; health disparities; environmental health.

Ana Martinez-Donate, PhD (*Universidad Autonoma de Madrid, Spain*). Associate Professor. HIV prevention, Tobacco control, Obesity prevention, Access to health services.

Philip Massey, PhD, MPH (*University of California, Los Angeles*). Assistant Professor. Digital Technologies in Public Health, Health Literacy, Health Communication, Global Health, Health Disparities, Health Promotion.

Leslie McClure, PhD, MS (*University of Michigan*) *Chair, Department of Epidemiology and Biostatistics*. Professor. Design, management and analysis of randomized clinical trials; issues of multiplicity in clinical trials; environmental risk factors for cardiovascular disease and stroke; geographic and racial disparities in cardiovascular disease and stroke.

Ryan McKenna, PhD (*Stonybrook University*). Assistant Professor. Health disparities; Health economics; Health policy; Data analysis and methods; Statistical modeling; Health services research; Mental health and behavioral health

Janel L. Mensinger, PhD (*City University of New York*) Director, *Biostatistics Service Center*. Associate Research Professor. Behavioral health promotion strategies, treating obesity, clinical research methods, statistics. Body perception, obesity and eating disorders.

Yvonne Michael, ScD (*Harvard School of Public Health*) Associate Dean for Academic and Faculty Affairs. Associate Professor. Department of Epidemiology and Biostatistics. Epidemiology of aging, social epidemiology, women's health, community-based participatory research; health disparities.

Jana M. Mossey, PhD, MPH, MSN (*University of North Carolina at Chapel Hill*). Professor. Department of Epidemiology and Biostatistics. Epidemiological methods; research design and methods including observational and clinical trials research; psychosocial aspects of health; epidemiology of aging and pain, psychiatric epidemiology including major depression; sub-threshold and minor depression.

Craig J. Newschaffer, PhD (*Johns Hopkins University*) Director, *A.J. Drexel Autism Institute*; Associate Dean for Research. Professor. Department of Epidemiology and Biostatistics. Environmental determinants of autism spectrum disorders; gene-environment interaction; neurological disorders.

Alex Ortega, PhD (*University of Michigan*) Chair, *Department of Health Management and Policy*; Director, *Center for Population Health and Community Impact*. Professor. Epidemiological methods in health services research; health needs of Latino children and families; health disparities intervention research; youth engagement in community interventions.

Jonathan Purtle, DRPH, MPH, MSC (*Drexel University*). Assistant Professor. Department of Health Management and Policy. Mental health policy and services research; policy dissemination and implementation research; traumatic stress in urban areas; trauma-informed system design; violence prevention; political institutions and health.

Harrison Quick, PhD (*University of Minnesota*). Assistant Professor. Occupational Health; Spatial Analysis or GIS; Statistical Modeling; Urban Health; Bayesian Inference; Data Confidentiality

Alex Quistberg, PhD (*University of Washington*). Assistant Research Professor. Data Analysis Methods; Global Health or International Health; Health and Place or Built Environment; Health Disparities; Spatial Analysis or GIS; Urban Health; Intentional/Violent Injury and Trauma; Unintentional Injury and Trauma

John A. Rich, MD, MPH (*Duke University Medical School*) Director, *Center for Nonviolence and Social Justice*. Professor. Department of Health Management and Policy. Health disparities; men's health; violence; urban health issues; primary care.

Lucy Robinson, PhD (*Columbia University*). Assistant Professor. Department of Epidemiology and Biostatistics. Statistics, modeling and analysis of neuroimaging and CT image data, network modeling, spatio-temporal data, computational statistics, and functional data analysis.

John Rossi, VMD, MBE (*University of Pennsylvania*) Director, *M.S. in Public Health Ethics*. Assistant Professor. Public health ethics, research

ethics, ethical theory, animal and environmental ethics, risk assessment and communication, public health history.

Alexis Roth, PhD, MPH (*Indiana University*). Assistant Professor. mHealth, Substance use, Reproductive or sexual health, Community engaged research, Infectious diseases, Health disparities, Urban health, Mixed methods, Women's health, Social determinants of health.

Leah Schinasi, PhD (*University of North Carolina*). Assistant Research Professor. Environmental Exposures; Cancer; Health and Place or Built Environment; Occupational Health; Urban Health; Community Based Participatory Research; Environmental Justice; Environmental Epidemiology; Climate Change

Randall L. Sell, ScD (*Harvard University*). Associate Professor. Health Disparities, Experimental design/research methods, Gender and health, LGBT issues, Program evaluation, Survey methods.

Paul Shattuck, PhD (*University of Wisconsin-Madison*) Director, *Life Course Outcomes Research Program at the A.J. Drexel Autism Institute*. Associate Professor. Department of Health Management and Policy. Design and evaluation of services for people with disabilities; autism.

David Barton Smith, PhD (*University of Michigan*). Research Professor. Department of Health Management and Policy. Healthcare; health disparities; history of public health; managed care.

David Smith, PhD (*University of Michigan*). Research Professor. Health Administration and Management; Health Disparities; History of Public Health; Health Services Research; Health Policy; Spatial Analysis or GIS

Suruchi Sood, PhD (*University of New Mexico*). Associate Professor. Human rights and health, Nutrition, Poverty, Health Disparities, Innovation Diffusion, HIV/AIDS, Violence, Community-based participatory research, Application of statistics to behavioral, biological and medical sciences, Adolescent health, Child and maternal health, International health, Program evaluation, Women's health, Mixed methods, Qualitative methods.

Mark Stehr, PhD (*University of California at Berkeley*) Interim Director, *School of Economics*. Associate Professor. Health economics, health behaviors, public finance, public policy.

Thersa Sweet, PhD, MPH (*University of Michigan*). Assistant Professor. Department of Epidemiology and Biostatistics. Molecular and infectious disease epidemiology, including virology, cancer biology, hospital infection control and prevention; epidemiologic studies involving HIV risk in sexual minorities.

Loni Philip Tabb, PhD (*Harvard University*). Associate Professor. Department of Epidemiology and Biostatistics. Methods for categorical, missing and hierarchical data, spatial epidemiology/statistics.

Jennifer A. Taylor, PhD, MPH (*Johns Hopkins University*). Associate Professor. Department of Environmental and Occupational Health. Injury prevention, patient safety, healthcare quality, organizational culture, occupational safety, data policy and surveillance, first responders, healthcare workforce.

Renee M. Turchi, MD, MPH (*Johns Hopkins University*) Joint appointment in the *Drexel University College of Medicine*. Associate Professor. Health care for children and youth with special health care needs, Child and maternal health.

Nicole A. Vaughn, PhD (*Uniformed Services University*). Assistant Professor. Department of Health Management and Policy. Racial/ethnic disparities in health and health care; nutrition and chronic disease; community-based participatory research, community engagement dissemination and implementation research.

Augusta M. Villanueva, PhD (*University of Texas at Austin*). Associate Professor. Poverty, Health care for the underserved, Health Disparities, High risk youth, Urban health issues, Racial and ethnic disparities in health and health care, Community-based participatory research, Behavioral health, Community health, Immigrant communities, LGBT issues, Public health infrastructure, Qualitative research.

Sheldon Watts, PhD (*New York University*). Clinical Research Professor. Behavioral health; community engagement; community-based participatory research; chronic disease risk management; faith-based partnerships; health disparities; minority health; nutrition education; overweight/obesity prevention; participatory action research

Seth Welles, PhD, ScD (*Harvard University*). Professor. Department of Epidemiology and Biostatistics. Impact of HIV phenotypic and genotypic antiretroviral drug resistance on HIV disease progression and transmission; psychosocial risk for HIV infection and STDs among sexual minority adults and adolescents; correction of misclassification of sexuality and its impact on HIV/STI risk; surveys of sexual minority adults at community festivals and at health-clinics to assess demographic and psychosocial determinants of sexual risk-taking and HIV/STD infections; LGBT health disparities including excess risk for HIV and STIs, CVD and cancer; early life physical and sexual trauma, violence, mental health conditions and substance abuse.

Michael Yudell, MPH, PhD, MPhil (*Columbia University*) *Chair, Department of Community Health and Prevention*. Associate Professor. Public health genomics; bioethics; history of public health; addiction.

Issa Zakeri, PhD (*University of Illinois and Urbana-Champaign*). Professor. Department of Epidemiology and Biostatistics. Biostatistics, functional data analysis, longitudinal data analysis, multivariate analysis, statistical learning.

Emeritus Faculty

Raymond K. Lum, MPhil, MS (*University of Pennsylvania*) *Director of E-Learning*. Associate Teaching Professor Emeritus. Department of Health Management and Policy. Asian health; change management; e-health; health disparities; innovation diffusion; organization learning theory.

Marcia Polansky, ScD (*Harvard School of Public Health*). Associate Professor Emeritus. Statistics; Clinical trials; Chronic diseases; Epidemiology; Social and Psychiatric

Certificate in Epidemiology and Biostatistics

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 9.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time To Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 26.1309

Standard Occupational Classification (SOC) Code: 19-1041

Drexel's online Certificate in Epidemiology and Biostatistics is a graduate level, interdisciplinary program designed for working professionals coming from a variety of backgrounds, including physicians, nurses, public health administrators, health educators, clinical research professionals, policy experts and more. Students will learn about concepts and methods in epidemiology and biostatistics, and how to apply them to real-world problems. Students will also learn techniques for describing, summarizing and analyzing data, assessing associations among variables, and determining the extent to which chance may or may not be influencing the observed results.

Never before has disease prevention and health promotion been more important. As public health issues arise in the US and globally, those who can apply knowledge gained through research to real-world problems are in great demand across all sectors: health care, pharmaceuticals, governmental and non-governmental agencies, business, and academia.

The certificate program is supervised by the Chair of the Department of Epidemiology and Biostatistics and is administered through Drexel University Online. Applications to the certificate program are managed by Drexel University Online. For the most current admission information, please visit Drexel University Online (<https://online.drexel.edu>).

About the Curriculum

The certificate program provides research-oriented training in the theory and tools of Epidemiology and Biostatistics, two of the core public health disciplines.

Students learn the principles of epidemiology and biostatistics and gain skills in using epidemiologic and biostatistical tools to describe, monitor, and investigate the drivers of population health. statistical background needed to conduct research, develop hypotheses, analyze data, and interpret and communicate results.

The certificate program consists of three sequential 3.0 credit courses. Each course is taught over a 10-week period, allowing completion of the certificate within a 30-week period. The curriculum reflects core epidemiological and biostatistical concepts and practices in a similar manner to the full-time and Executive MPH programs. Contact between faculty and students creates an intense experience over this exclusively online format. The online format allows asynchronous learning while providing flexibility for adult learners constrained by physical and time limitations.

Program Requirements

Requirements

EPI 570	Introduction to Epidemiology	3.0
EPI 572	Design and Analysis of Epidemiological Studies	3.0
Total Credits		6.0

Certificate in Global Health

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 18.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 51.2210

Standard Occupational Classification (SOC) Code: 21-1091

Gainful Employment Disclosure (<http://deptapp08.drexel.edu/gainfulemployment/Global-Health/51.2210-Gedt.html>)

This online certificate in global health is designed to train post-baccalaureate students and public health professionals for a career in global health and development, including in international settings. The program stresses the development of analytic and technical skills required for pursuing further work in the growing areas of global health and international development. The curriculum focuses on designing, implementing, and evaluating programs in under-served communities in the US and international/developing countries. Students will learn to translate theory into practical applications to current global health and developmental challenges. Course materials are designed for the adult-learner in an online, distributed format.

Admission Requirements

Admission requirements to the program include:

- a bachelor's degree
- completion of Certificate Program Application Form
- working knowledge of and access to a PC or Mac with DVD/CD-ROM drive, high speed connection to the Internet as well as MS Office.
- the ability to download free versions of Adobe Acrobat Reader, Skype, and/or VSee video conferencing applications.

Program Requirements

Required Courses

PBHL 704	Proseminar in Global Health Ethics (Offered as a series of three 1-credit seminar courses.)	3.0
PBHL 705	Public Health in Developing Countries	3.0
PBHL 706	Globalization, Development and Comparative Health Systems	3.0
PBHL 707	Monitoring and Evaluation in Global Health	3.0
PBHL 708	Global Health Integration Module and Field Practicum Experience	6.0
Total Credits		18.0

Certificate in Lesbian, Gay, Bisexual and Transgender (LGBT) Health

Certificate Level: Graduate

Admissions Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 9.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.2207

Standard Occupational Classification (SOC) Code: 21-1091

The Certificate in Lesbian, Gay, Bisexual and Transgender (LGBT) Health program is designed to address the complex issues confronting the health disparities and health-seeking behaviors of LGBT people. The sequence of courses examines health disparities, research, sampling and measurement methodologies involved in the study of LGBT populations, and the intersections of social identities/inequalities (such as those based on ethnicity, sexual orientation and sex/gender among others).

The program is offered entirely online, and in a flexible format to provide qualified students and health professionals with an opportunity to acquire these credentials regardless of restrictions in time and physical location. Those who successfully complete the certificate program and wish to broaden their scope of public health education could pursue an MPH degree program.

Required Courses

CHP 681	Research with Rare, Stigmatized and Hidden Populations	3.0
CHP 682	LGBT Health Disparities	3.0
CHP 683	Intersectional Perspectives	3.0
Total Credits		9.0

Sample Plan of Study

First Year

Fall		Credits
CHP 681	Research with Rare, Stigmatized and Hidden Populations	3.0
CHP 682	LGBT Health Disparities	3.0
CHP 683	Intersectional Perspectives	3.0
Term Credits		9.0

Total Credit: 9.0

Certificate in Maternal and Child Health

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 18.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time To Completion: 1-2 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.2209

Standard Occupational Classification (SOC) Code: 21-1094

The goal of the Maternal and Child Health Online Certificate is to provide Maternal and Child Health practitioners desiring accessible training in Maternal and Child Health with core knowledge and skills needed to effectively promote the health and well-being of mothers, children, and families in local, domestic, and global settings. The certificate will utilize the five Maternal and Child Health competencies for curriculum development and evaluation (ATMCH, 2001): scientific basis, methodological/analytical skills, management & communication skills, policy & advocacy skills, and values & ethics in Maternal and Child Health public health practice.

Admission Requirements

- Complete application form
- Working knowledge of and access to PC or Mac with DVD/CD-ROM drive, high speed connection to Internet, and MS Office applications
- Bachelor's Degree Required
- Ability to download free versions of Adobe Acrobat Reader, Skype, and/or VSee video conferencing applications
- Demonstrated interest or work experience in MCH

Program Requirements

Required courses

CHP 517	Overview of Maternal and Child Health	3.0
CHP 518	Global Issues in Maternal and Child Health	3.0
EPI 570	Introduction to Epidemiology	3.0
Electives (students should choose 3) *		9.0
CHP 681	Research with Rare, Stigmatized and Hidden Populations	
CHP 682	LGBT Health Disparities	
CHP 683	Intersectional Perspectives	
EPI 572	Design and Analysis of Epidemiological Studies	
HMP 652	Change Management in Public Health	
PBHL 705	Public Health in Developing Countries	
PBHL 706	Globalization, Development and Comparative Health Systems	
PBHL 707	Monitoring and Evaluation in Global Health	
PBHL 708	Global Health Integration Module and Field Practicum Experience	
Total Credits		18.0

* Students who choose PBHL 708 will need only one additional elective.

Sample Plan of Study

Term 1		Credits
CHP 517	Overview of Maternal and Child Health	3.0
EPI 570	Introduction to Epidemiology	3.0
Term Credits		6.0
Term 2		Credits
CHP 518	Global Issues in Maternal and Child Health	3.0
Elective *		3.0
Term Credits		6.0
Term 3		Credits

Electives *	6.0
Term Credits	6.0
Total Credit: 18.0	

* Please note that electives can be taken during any term. This is a sample plan of study that shows how students may choose to complete this certificate.

Community Health and Prevention

Major: Community Health and Prevention

Degree Awarded: Master of Public Health (MPH)

Calendar Type: Quarter

Total Credit Hours: 56.0 (MPH)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.2201

Standard Occupational Classification (SOC) code: 11-9111; 21-1091; 21-1094

About the Program (MPH)

Master of Public Health (MPH)

The Master of Public Health program is intended for individuals interested in careers as community educators; population health planners; policy analysts, evaluators, researchers; and managers of health service delivery organizations and systems, managed-care programs, and other population-based organizations.

The 64.0 quarter-credit program is interdisciplinary and requires students to complete a comprehensive, community-based master's project. The program prepares students to enter an array of fields related to public health or a range of doctoral programs. Drexel University's Master of Public Health (MPH) program provides practical skills and experience, with a unique focus on relevant community issues, challenges, and priorities.

Program Highlights

The first year of the program covers the five core disciplines offered within the context of culture and community. These include environmental and occupational health; health care systems organization, management, and policy; social and behavioral sciences for population health; epidemiology; biostatistics. Throughout the program, group case discussion sessions, case-related activities and didactic sessions are integrated into the experience.

These include:

- Skill development labs and workshops (year two)
- Population Health Spotlight (for all faculty, students, and community partners) provide access to scholars and their cutting-edge research and initiatives in public health

Curriculum

The MPH full-time educational program is structured on a quarter-term basis, with a total of 64.0 credit hours required. This is generally taken as

a two-year program; all coursework must be completed within five years of the date of matriculation for the full-time program.

The second-year curriculum is composed of four required courses, electives, and the Community-Based Master's Project (CBMP), the culminating experience required of full-time Dornsife MPH students.

In preparation for developing their final paper, students are required to identify an issue or problem of significance to the target community or agency, synthesize the literature, develop an approach or methodology to address the issue and either implement and test the validity of a proposed approach or set out a detailed prescription for addressing the problem. Students may also work with faculty in specific research areas.

Additional Information

Patience Ajoff-Foster, MS
Program Manager
pna24@drexel.edu
267-359-6036

Major: Community Health and Prevention

Degree Awarded: Doctor of Public Health (DrPH)

Calendar Type: Quarter

Total Credit Hours: 60.0

Classification of Instructional Programs (CIP) code: 51.2201

Standard Occupational Classification (SOC) code: 11-9111; 21-1091; 21-1094

About the Program (DrPH)

The Dornsife School of Public Health (<http://publichealth.drexel.edu>) offers a doctoral program in Community Health and Prevention, leading to the doctor of public health (DrPH) degree. The mission of the Dornsife School of Public Health is to provide education, conduct research, and partner with communities and organizations to improve the health of populations. We view health as a human right and have a special commitment to improving health in cities, eliminating health disparities, and promoting health in all policies. The doctoral program is committed to effecting meaningful change in the community and within public health systems. The CHP-DrPH program fosters research embedded in community settings in Philadelphia, across the US and internationally. CHP faculty focus on social and behavioral sciences as well as ethical perspectives in community and preventive health.

The goal of the DrPH program in Community Health and Prevention is to produce doctoral-level public health graduates who exhibit a broad-based, systemic understanding of public health and are committed to effecting meaningful change in public and/or community health systems. Integrating applied research, education, service and advocacy, the program emphasizes the application of interdisciplinary, theoretical, and applied research paradigms to the understanding and prevention of public health problems.

The DrPH program in Community Health and Prevention is structured as follows: *required courses*, which build core competencies in community health and prevention; *elective courses*, which develop specific areas of expertise; the *comprehensive exam*, which reassures student understanding and application of core public health competencies; the *practicum*, which structures the application of concepts and methods to solving public health problems; and the *dissertation*, which showcases the student's competency in applied research. This general framework

is infused with community public health practice, rigorous qualitative and quantitative applied research methods, and skilled advocacy.

Developing Core Competencies for Understanding and Solving Public Health Problems

Students in the DrPH program in Community Health and Prevention are expected to attain five core competencies for understanding and solving specific public health problems. The core competencies for the DrPH program integrate public health competencies developed by the Council on Linkages between Academia and Public Health Practice* with the unique characteristics of the faculty of the Department of Community Health and Prevention and the practice community.

The five core competencies are as follows:

- Understand the mission, goals, and strategies of community health and prevention
- Understand and assess community health status and needs
- Understand and assess individual and environmental determinants of health
- Design, implement, and evaluate public health programs and policies
- Translate findings into policy recommendations and advocate for change

*The Council on Linkages between Academia and Public Health Practice represents national public health academic and practice organizations including the American Public Health Association, the Association of Schools and Programs of Public Health, and the Centers for Disease Control and Prevention. The council has developed a list of public health competencies to guide curriculum development in public health education.

Additional Information

For more information, visit the Dornsife School of Public Health (<http://drexel.edu/dornsife>) website or contact:

Patience Ajoff-Foster, MS
Program Manager
pna24@drexel.edu
267-359-6036

Admission Requirements (MPH)

The School of Public Health seeks students with intellectual and interpersonal competencies as well as those with potential for leadership. The school has set a high priority on establishing a student body that is representative of the nation's population. We strive to recruit and to admit applicants from underrepresented minority groups who can contribute to the richness of our student population and to that of the nation's public health professionals.

Admissions Process

- The Admissions Committee carefully reviews applications and gives personal essays and letters of recommendation particular attention.
- The selection process weighs prior academic and personal accomplishments, emphasizing demonstrated leadership.
- Diversity of background and outside interests, depth of self-appraisal, commitment to public health, and working with individuals are highly valued.

- Prior work experience in a field related to public health is highly recommended.

Applicants should have:

- Satisfactorily completed an undergraduate bachelor degree program in an accredited US college or university, or its equivalent in another country
- A course in Statistics is highly recommended
- Six undergraduate or graduate credits in the social or behavioral sciences and three in the biological sciences are preferred, but not required
- Satisfactory results from one of the following taken within the past five years (the GRE or GMAT is preferred):
 - Graduate Record Examination (GRE)
 - Graduate Management Admission Test (GMAT)
 - Medical College Admission Test (MCAT)
 - Law School Admission Test (LSAT)
- Test of English as a Foreign Language (TOEFL) for applicants whose first language is not English

Please note: The Dornsife School of Public Health's code for submitting GRE scores is 2194. The SOPHAS GRE school code is 7890.

The Application Process also requires:

- Completion of the Schools of Public Health Common Application (<http://www.sophas.org>).
- A personal essay describing what you perceive to be pressing public health issues, why a career in the field appeals to you, and how it will use your strengths and commitment
- Three letters of recommendation
- Resume or CV

Applicants to the joint MD/MPH program must be accepted to both the Drexel College of Medicine (<http://www.drexelmed.edu>) and the Dornsife School of Public Health (<http://publichealth.drexel.edu>).

Total Credits		56.0

- * Students can take a methods class at the masters or doctoral level from across the university with approval of graduate and faculty advisor. 800-level courses may require professor's permission.
- ** Students have an additional 15.0 credits worth of electives and can use these to further focus their academic work by completing a graduate minor

Sample Plan of Study (MPH)

First Year		Credits
Fall		
CHP 500	Behavior and Social Change Theories	3.0
PBHL 510	Public Health Foundations and Systems I	4.0
PBHL 512	Methods for Public Health Research I	4.0
Term Credits		11.0
Winter		
CHP 501	Community Engagement in Public Health Practice & Research	3.0
PBHL 511	Public Health Foundations and Systems II	4.0
PBHL 513	Methods for Public Health Research II	4.0

Term Credits		12.0

Total Credit: 56.0

Admission Requirements (DrPH)

Admission to the doctor of public health (DrPH) program in Community Health and Prevention is competitive. Students who demonstrate an ability to integrate public health competencies and skills into public health practice are preferred.

Applicants to the DrPH program must meet the following requirements:

- A master's of public health degree (MPH) or a master's degree in a related field
- Documented evidence of applied research
- Potential for a high level of performance in the DrPH program and for significant contributions to the field of public health.

To qualify for admission, the applicant must present a portfolio that includes:

- Undergraduate and graduate transcripts;
- GRE General Test (verbal, quantitative, analytical writing);
- Evidence of applied research skills (master's thesis, master's research paper, or publication);
- Three letters of recommendation, including one from a public health practitioner; and
- A written statement of career and educational goals, professional experience, and area of interest for the dissertation.
- A current CV or resume
- An in-person or telephone interview is required of all finalists.

For more information about the admissions process, please contact:

Patience Ajoff-Foster, MS
 Program Manager
 pna24@drexel.edu
 267-359-6036

Forms, details about requirements, and information about application deadlines are all available on the DrPH Community Health and Prevention (<http://drexel.edu/dornsife/academics/departments/community-health-prevention>) page of the Dornsife School of Public Health website.

Degree Requirements

Completion of the DrPH program requires the following:

- 60.0 quarter credit hours of coursework beyond the master's degree (33.0 credits of required coursework; 6.0 credits of required electives; 9.0 credits of elective courses; a 3.0 credit practicum; and 9.0 credits for the dissertation). Coursework covers the theory and practice of community health and prevention, health and human rights, community health interventions, qualitative research methods, community epidemiology, statistical methods for prevention research,

program evaluation, health policy development and analysis, and leadership and advocacy;

- a minimum cumulative grade point average of 3.3;
- completion of the a practicum experience;
- passage of the doctoral comprehensive/candidacy examination; and
- completion of a dissertation that is highly relevant to community health practice and involves applied research, policy analysis, or management analysis.

All coursework is designed to develop the five core competencies (<http://drexel.edu/dornsife/academics/degrees/drph-degree-in-community-health>) of community health and prevention.

Electives

The 9 credits of elective coursework enable doctoral students to expand and enhance skills within specific areas of competency. New courses are developed and added regularly, based on interests of faculty and students.

School Required Courses	9.0
EPI 560 Intermediate Epidemiology	
BST 560 Intermediate Biostatistics I

Dornsife School of Public Health Faculty

Amy Auchincloss, PhD, MPH (*University of Michigan*). Associate Professor. Department of Epidemiology and Biostatistics. Environmental determinants of health and the health effects of air pollution; contribution of resources in residential environments to health behaviors, obesity,

diabetes and cardiovascular disease; the use of spatial analysis methods and agent-based mode

Sharrelle Barber, ScD, MPH (*Harvard T.H. Chan School of Public Health*). Assistant Research Professor. Racial/Ethnic Health Inequalities in Cardiovascular Disease; Social Determinants of Racial/Ethnic Health Inequalities in Cardiovascular Disease; Community-Engaged Research; Geography and Health; Multilevel Analysis; Spatial Analysis and GIS; Global Health; Urban Health

Scarlett Bellamy, ScD (*Harvard University*). Professor. Clinical Trials; Data Analysis Methods; Health Disparities; Infectious Disease; Mental health and Behavioral health; Reproductive or Sexual Health

Zekarias Berhane, PhD (*University of Pittsburgh*). Assistant Professor. Department of Epidemiology and Biostatistics. Modeling time-to-event data with single and multiple outcomes, mixed effect models and regression diagnostics.

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; positive behavior interventions and supports (PBIS), response to intervention (Rtl), systems-level change and performance feedback.

Sandra L. Bloom, MD (*Temple University School of Medicine*). Associate Professor. Department of Health Management and Policy. Psychological trauma and organizational stress.

Sherry Brand-Rauf, MPhil, JD (*Columbia University*). Associate Teaching Professor. Health Policy; Occupational Health; Environmental Exposures; Health Disparities; Public Health Law

Jennifer Breaux, DrPH, MPH, CHES (*Drexel University*). Assistant Teaching Professor. Maternal and child health, Child and maternal health, Community health, Human rights.

Darryl Brown, PhD (*Johns Hopkins University*). Assistant Teaching Professor. Department of Health Management and Policy. Health care research and planning; patient outcomes and applied health economic methods.

Robert J. Brulle, PhD (*George Washington University*). Professor. Environmental policy and politics, critical theory, marine risk, social movements, environmental sociology.

James W. Buehler, MD (*University of California, San Francisco*). Clinical Professor. Department of Health Management and Policy. Public health preparedness, e-health, health policy, building public health infrastructure and capacity, chronic diseases, behavioral health, data privacy, emergency preparedness and public health practice.

Igor Burstyn, PhD (*Utrecht University*). Associate Professor. Department of Environmental and Occupational Health. Occupational and environmental epidemiology, industrial hygiene, endocrine disruptors, environmental exposures, biomarkers, air quality, gene-environmental interaction, maternal and child health, Bayesian statistics, statistical modeling, etiology of autism.

Amy Carroll-Scott, PhD, MPH (*University of California at Los Angeles*). Assistant Professor. Asset mapping, Built environment, Chronic diseases, Community capacity building, Community health, Community health worker/promoters models, Community-based participatory research, Community resilience, Demography, Health disparities, Mixed methods, Neighborhood context, Obesity, School health, Social capital/social

cohesion, Social determinants of health, Social epidemiology, Spatial data and analysis, Youth leadership development.

Esther Chernak, MD, MPH, FACP (*UMDNJ-Robert Wood Johnson Medical School*) Director of the Center for Public Health Readiness and Communication; Director of Joint Degree Programs. Associate Research Professor. Emergency preparedness, infectious disease, public health practice, crisis and emergency risk communication, medicine and public health.

Mariana Chilton, PhD, MPH (*University of Pennsylvania*) Director, Center for Hunger-Free Communities. Associate Professor. Department of Health Management and Policy. Nutrition, housing and health; chronic diseases; human rights, chronic diseases, community health, human rights and hunger.

Theodore Corbin, MD, MPP (*Drexel University*) Joint Appointment between Dornsife School of Public Health and Drexel University College of Medicine. Associate Professor. Department of Health Management and Policy. Health policy; design of care systems; high risk youth; violence; healthcare services; injury prevention.

Anneclaire De Roos, PhD, MPH (*University of North Carolina at Chapel Hill*). Associate Professor. Department of Environmental and Occupational Health. Environmental and occupational epidemiology, exposure assessment, pesticides, persistent organic pollutants, drinking water quality, air pollution, urban environments, chemical risk assessment.

Ana Diez Roux, MD, PhD, MPH (*Johns Hopkins University*) Dean, Dornsife School of Public Health. Distinguished Professor. Department of Epidemiology and Biostatistics. Social determinants of health; neighborhoods and health; psychosocial factors; air pollution, cardiovascular disease epidemiology; multilevel and systems methods; urban health and health in Latin America.

Mary Duden, MBA (*Drexel University*). Assistant Teaching Professor. Department of Health Management and Policy. Health care for the underserved and health disparities.

Jerome Dugan, PhD (*Rice University*) Primary appointment in Health Economics at the Drexel College of Nursing and Health Professions. Assistant Professor. Department of Health Management and Policy. Insurance markets and healthcare regulation.

Nancy Epstein, MPH, MAHL (*University of North Carolina at Chapel Hill*). Associate Professor. Health Disparities, Faith and Health.

Alison A. Evans, ScD (*Harvard University*). Associate Professor. Department of Epidemiology and Biostatistics. Epidemiology of infectious diseases and cancer; cohort studies; minority and immigrant health; chronic viral infections; hepatitis b; elimination of viral hepatitis; immunization; perinatal transmission.

Jerry Fagliano, MPH, PhD (*Johns Hopkins University*) Chair, Department of Environmental and Occupational Health. Associate Clinical Professor. Children's health and environmental exposures; health impacts of climate change; inequities in environmental exposure and disease; risks from transportation of hazardous materials; spatial distribution and clustering of disease.

Robert I. Field, PhD, JD, MPH (*Columbia University*) Joint Appointment in the Drexel University Kline School of Law. Professor. Health policy, public health law, health administration and management, public health ethics.

Janet Fleetwood, PhD, MPH (*University of Southern California*). Professor. Philosophy, bioethics, public health ethics, research ethics, social justice, ethical theory.

Arthur L. Frank, MD, PhD (*City University of New York*) Chair Emeritus. Professor. Department of Environmental and Occupational Health. Environmental and occupational health, agricultural safety and health, pneumoconiosis, occupational toxicology, environmental pollution.

Dennis Gallagher, MA, MPA (*University of Pittsburgh*). Associate Teaching Professor. Department of Health Management and Policy. Health department structure and financing; health policy and law; Medicare/Medicaid and public health infrastructure.

Pamela Geller, PhD (*Kent State University*). Associate Professor. Stressful life events and physical and mental health outcomes, particularly in the area of women's reproductive health (e.g. pregnancy, pregnancy loss, infertility, medical education).

Marla Gold, MD (*University of Medicine and Dentistry-New Jersey Medical School*) Dean Emerita. Professor. Department of Health Management and Policy. Design of HIV/AIDS care systems, treatment protocols, resource utilization, and epidemiology; CQI, managed care and systems of health care, health administration, behavioral health care and substance abuse treatment systems.

Neil Goldstein, PHD, MBI (*Drexel University, Oregon Health & Science University (OHSU) School of Medicine*). Assistant Research Professor. Data Analysis Methods; eHealth or mHealth; Infectious Disease; Maternal and Child Health; Reproductive or Sexual health; Spatial Analysis or GIS; Statistical Modeling; Vaccines and vaccinations; Electronic medical records/informatics; Translational epidemiology

Edward J. Gracely, PhD (*Temple University*) Joint Appointment in Drexel University College of Medicine. Associate Professor. Department of Epidemiology and Biostatistics. Statistics, experimental design/research methods and statistical analysis, clinical trials.

Ali Groves, PhD, MHS (*University of North Carolina; Johns Hopkins University*). Assistant Professor. Reproductive and Sexual Health, Maternal and Child Health, Global Health, Data Analysis Methods.

Jana A. Hirsch, PhD (*University of Michigan*). Assistant Research Professor. Health and place or built environment; health disparities; mental and behavioral health; urban health; active aging; age-friendly neighborhoods

Mary E. Hovinga, PhD, MPH (*University of Michigan*). Associate Professor. Department of Epidemiology and Biostatistics. Cancer, cognitive disabilities; PCBs and DDT, lead exposure; neurological disorders, environmental hazards, epidemiologic study design.

Tran Huynh, PhD, MPH, CIH (*University of Minnesota*). Assistant Professor. Community Engaged Research; Cardiovascular Disease; Statistical Modeling; Immigrant Health; Health Disparities; Occupational Health; Workplace Health Interventions; Industrial Hygiene; Bayesian Statistics; Exposure Assessment; Epidemiology

Jessie Kemmick Pintor, PhD, MPH (*University of Minnesota*). Assistant Professor. Community-based participatory research; Immigrant health; Health disparities; Health services research; Health policy; Maternal & child health; Mixed methods; Immigration policy

Ann Klassen, PhD (*Johns Hopkins University*). Professor. HIV/AIDS, Food safety, Excess burden intervention, GIS-based and spatial analysis, Mixed methods, Qualitative methods, Social sciences.

Jennifer Kolker, MPH (*University of Michigan*) *Associate Dean for Public Health Practice*. Associate Clinical Professor. Department of Health Management and Policy. Maternal and child health; federally qualified health center program; urban health issues; health department structure and financing; health policy and law; legislative advocacy; Medicare/Medicaid; preterm birth; public health education and training; public health infrastructure; welfare economics; women's health.

Shiriki Kumanyika, PhD, MS, MPH (*Cornell University; Columbia University; Johns Hopkins University*). Research Professor. Solutions to obesity and diet-related diseases in black Americans, 'Culture of health' approaches in black communities, Assessment of food environments, Environmental influences on lifestyle changes, Targeted marketing of unhealthy foods and beverages, Food and nutrition policy, Evidence-based public health, Nutrition epidemiologic methods, Social determinants of health and health equity, Systems science applications in public health.

Brent Langellier, PhD (*University of California, Los Angeles*). Assistant Professor. Department of Health Management and Policy. Health and health care disparities, Latino health, complex systems, quantitative methods, GIS.

Stephen E. Lanckenau, PhD (*University of Maryland*). Professor. HIV/AIDS, Overdose prevention, Prescription drug misuse, Medical marijuana, Injection drug use, High risk youth, Homeless, Qualitative research.

Felice Le-Scherban, PhD, MPH (*University of Michigan*). Assistant Professor. Department of Epidemiology and Biostatistics. Life course approaches to socioeconomic, racial, and ethnic health disparities; social determinants of health among immigrants; causal links between education and health; analytic methods in social epidemiology.

Brian K. Lee, PhD (*Johns Hopkins University*). Associate Professor. Department of Epidemiology and Biostatistics. Environmental determinants and epidemiology of autism spectrum disorders; perinatal epidemiology; child and maternal health; neuropsychiatric epidemiology, causal inference; machine learning.

Nora L. Lee, PhD (*Johns Hopkins University*). Assistant Research Professor. Department of Epidemiology and Biostatistics. Perinatal epidemiology; preterm birth; infant mortality; autism spectrum disorders; maternal and child health; racial and ethnic health disparities; secondhand smoke; tobacco control; environmental exposures.

Longjian Liu, MD, PhD, MSc, FAHA (*The University of Hong Kong*). Associate Professor. Department of Epidemiology and Biostatistics. Pharmacoepidemiology; cardiovascular disease and diabetes epidemiology; drug-lifestyle interaction; environmental and global health disparities; hospital electronic health records for cardiovascular and diabetes risk assessment and prediction.

Gina Lovasi, PhD (*University of Washington*) *Co-Director of the Urban Health Collaborative*. Associate Professor. Cardiovascular Disease; Data Analysis Methods; Health and Place or Build Environment; Health Disparities; Spatial Analysis or GIS; Urban Health; Urban trees and greenspace; Local retail and urban design; Transportation, infrastructure and policies

Shannon Marquez, MEng, PhD (*University of North Carolina at Chapel Hill*) *Director, Office of Global Health*. Associate Professor. Department of

Environmental and Occupational Health. Global health; water sanitation and hygiene; health disparities; environmental health.

Ana Martinez-Donate, PhD (*Universidad Autonoma de Madrid, Spain*). Associate Professor. HIV prevention, Tobacco control, Obesity prevention, Access to health services.

Philip Massey, PhD, MPH (*University of California, Los Angeles*). Assistant Professor. Digital Technologies in Public Health, Health Literacy, Health Communication, Global Health, Health Disparities, Health Promotion.

Leslie McClure, PhD, MS (*University of Michigan*) *Chair, Department of Epidemiology and Biostatistics*. Professor. Design, management and analysis of randomized clinical trials; issues of multiplicity in clinical trials; environmental risk factors for cardiovascular disease and stroke; geographic and racial disparities in cardiovascular disease and stroke.

Ryan McKenna, PhD (*Stonybrook University*). Assistant Professor. Health disparities; Health economics; Health policy; Data analysis and methods; Statistical modeling; Health services research; Mental health and behavioral health

Janel L. Mensinger, PhD (*City University of New York*) *Director, Biostatistics Service Center*. Associate Research Professor. Behavioral health promotion strategies, treating obesity, clinical research methods, statistics. Body perception, obesity and eating disorders.

Yvonne Michael, ScD (*Harvard School of Public Health*) *Associate Dean for Academic and Faculty Affairs*. Associate Professor. Department of Epidemiology and Biostatistics. Epidemiology of aging, social epidemiology, women's health, community-based participatory research; health disparities.

Jana M. Mossey, PhD, MPH, MSN (*University of North Carolina at Chapel Hill*). Professor. Department of Epidemiology and Biostatistics. Epidemiological methods; research design and methods including observational and clinical trials research; psychosocial aspects of health; epidemiology of aging and pain, psychiatric epidemiology including major depression; sub-threshold and minor depression.

Craig J. Newschaffer, PhD (*Johns Hopkins University*) *Director, A.J. Drexel Autism Institute; Associate Dean for Research*. Professor. Department of Epidemiology and Biostatistics. Environmental determinants of autism spectrum disorders; gene-environment interaction; neurological disorders.

Alex Ortega, PhD (*University of Michigan*) *Chair, Department of Health Management and Policy; Director, Center for Population Health and Community Impact*. Professor. Epidemiological methods in health services research; health needs of Latino children and families; health disparities intervention research; youth engagement in community interventions.

Jonathan Purtle, DRPH, MPH, MSC (*Drexel University*). Assistant Professor. Department of Health Management and Policy. Mental health policy and services research; policy dissemination and implementation research; traumatic stress in urban areas; trauma-informed system design; violence prevention; political institutions and health.

Harrison Quick, PhD (*University of Minnesota*). Assistant Professor. Occupational Health; Spatial Analysis or GIS; Statistical Modeling; Urban Health; Bayesian Inference; Data Confidentiality

Alex Quistberg, PhD (*University of Washington*). Assistant Research Professor. Data Analysis Methods; Global Health or International Health;

Health and Place or Built Environment; Health Disparities; Spatial Analysis or GIS; Urban Health; Intentional/Violent Injury and Trauma; Unintentional Injury and Trauma

John A. Rich, MD, MPH (*Duke University Medical School*) Director, *Center for Nonviolence and Social Justice*. Professor. Department of Health Management and Policy. Health disparities; men's health; violence; urban health issues; primary care.

Lucy Robinson, PhD (*Columbia University*). Assistant Professor. Department of Epidemiology and Biostatistics. Statistics, modeling and analysis of neuroimaging and CT image data, network modeling, spatio-temporal data, computational statistics, and functional data analysis.

John Rossi, VMD, MBE (*University of Pennsylvania*) Director, *M.S. in Public Health Ethics*. Assistant Professor. Public health ethics, research ethics, ethical theory, animal and environmental ethics, risk assessment and communication, public health history.

Alexis Roth, PhD, MPH (*Indiana University*). Assistant Professor. mHealth, Substance use, Reproductive or sexual health, Community engaged research, Infectious diseases, Health disparities, Urban health, Mixed methods, Women's health, Social determinants of health.

Leah Schinasi, PhD (*University of North Carolina*). Assistant Research Professor. Environmental Exposures; Cancer; Health and Place or Built Environment; Occupational Health; Urban Health; Community Based Participatory Research; Environmental Justice; Environmental Epidemiology; Climate Change

Randall L. Sell, ScD (*Harvard University*). Associate Professor. Health Disparities, Experimental design/research methods, Gender and health, LGBT issues, Program evaluation, Survey methods.

Paul Shattuck, PhD (*University of Wisconsin-Madison*) Director, *Life Course Outcomes Research Program at the A.J. Drexel Autism Institute*. Associate Professor. Department of Health Management and Policy. Design and evaluation of services for people with disabilities; autism.

David Barton Smith, PhD (*University of Michigan*). Research Professor. Department of Health Management and Policy. Healthcare; health disparities; history of public health; managed care.

David Smith, PhD (*University of Michigan*). Research Professor. Health Administration and Management; Health Disparities; History of Public Health; Health Services Research; Health Policy; Spatial Analysis or GIS

Suruchi Sood, PhD (*University of New Mexico*). Associate Professor. Human rights and health, Nutrition, Poverty, Health Disparities, Innovation Diffusion, HIV/AIDS, Violence, Community-based participatory research, Application of statistics to behavioral, biological and medical sciences, Adolescent health, Child and maternal health, International health, Program evaluation, Women's health, Mixed methods, Qualitative methods.

Mark Stehr, PhD (*University of California at Berkeley*) Interim Director, *School of Economics*. Associate Professor. Health economics, health behaviors, public finance, public policy.

Theresa Sweet, PhD, MPH (*University of Michigan*). Assistant Professor. Department of Epidemiology and Biostatistics. Molecular and infectious disease epidemiology, including virology, cancer biology, hospital infection control and prevention; epidemiologic studies involving HIV risk in sexual minorities.

Loni Philip Tabb, PhD (*Harvard University*). Associate Professor. Department of Epidemiology and Biostatistics. Methods for categorical, missing and hierarchical data, spatial epidemiology/statistics.

Jennifer A. Taylor, PhD, MPH (*Johns Hopkins University*). Associate Professor. Department of Environmental and Occupational Health. Injury prevention, patient safety, healthcare quality, organizational culture, occupational safety, data policy and surveillance, first responders, healthcare workforce.

Renee M. Turchi, MD, MPH (*Johns Hopkins University*) Joint appointment in the *Drexel University College of Medicine*. Associate Professor. Health care for children and youth with special health care needs, Child and maternal health.

Nicole A. Vaughn, PhD (*Uniformed Services University*). Assistant Professor. Department of Health Management and Policy. Racial/ethnic disparities in health and health care; nutrition and chronic disease; community-based participatory research, community engagement dissemination and implementation research.

Augusta M. Villanueva, PhD (*University of Texas at Austin*). Associate Professor. Poverty, Health care for the underserved, Health Disparities, High risk youth, Urban health issues, Racial and ethnic disparities in health and health care, Community-based participatory research, Behavioral health, Community health, Immigrant communities, LGBT issues, Public health infrastructure, Qualitative research.

Sheldon Watts, PhD (*New York University*). Clinical Research Professor. Behavioral health; community engagement; community-based participatory research; chronic disease risk management; faith-based partnerships; health disparities; minority health; nutrition education; overweight/obesity prevention; participatory action research

Seth Welles, PhD, ScD (*Harvard University*). Professor. Department of Epidemiology and Biostatistics. Impact of HIV phenotypic and genotypic antiretroviral drug resistance on HIV disease progression and transmission; psychosocial risk for HIV infection and STDs among sexual minority adults and adolescents; correction of misclassification of sexuality and its impact on HIV/STI risk; surveys of sexual minority adults at community festivals and at health-clinics to assess demographic and psychosocial determinants of sexual risk-taking and HIV/STD infections; LGBT health disparities including excess risk for HIV and STIs, CVD and cancer; early life physical and sexual trauma, violence, mental health conditions and substance abuse.

Michael Yudell, MPH, PhD, MPhil (*Columbia University*) Chair, *Department of Community Health and Prevention*. Associate Professor. Public health genomics; bioethics; history of public health; addiction.

Issa Zakeri, PhD (*University of Illinois and Urbana-Champaign*). Professor. Department of Epidemiology and Biostatistics. Biostatistics, functional data analysis, longitudinal data analysis, multivariate analysis, statistical learning.

Emeritus Faculty

Raymond K. Lum, MPhil, MS (*University of Pennsylvania*) Director of *E-Learning*. Associate Teaching Professor Emeritus. Department of Health Management and Policy. Asian health; change management; e-health; health disparities; innovation diffusion; organization learning theory.

Marcia Polansky, ScD (*Harvard School of Public Health*). Associate Professor Emeritus. Statistics; Clinical trials; Chronic diseases; Epidemiology; Social and Psychiatric

Environmental & Occupational Health

Major: Environmental and Occupational Health

Degree Awarded: Master of Public Health (MPH)

Calendar Type: Quarter

Total Credit Hours: 56.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.2202

Standard Occupational Classification (SOC) code: 19-2041; 29-9011

About the Program

The Dornsife School of Public Health is pleased to unveil a new Master of Public Health (MPH) curriculum, beginning in the Fall quarter of 2017. The redesigned MPH program provides students with the knowledge and skills they need to make a difference in today's public health world.

The full-time program is structured on a quarter basis with 56.0 total credit hours required for completion of the degree over five quarters. Starting with the class entering in Fall 2017, full-time MPH students will select a major at the time of application.

Program Highlights

The new MPH curriculum incorporates several key elements:

- Solid training in state-of-the-art core competencies that students need to be effective
- Integration and interdisciplinary from the very beginning
- Flexibility to incorporate specialization in several public health areas
- Extensive opportunities for community, practice and research engagement
- Graduate in only 5 quarters, allowing a head start in the job market

As a student in Environmental and Occupational Health, you will learn how to assess and monitor environmental and occupational exposures and to understand their health consequences. You will work alongside our faculty to investigate and act on the environmental determinants of health including climate change and exposure to air pollution, pesticides or other substances. You will learn how to make housing healthier, to promote health and prevent injuries in the workplace, to enhance access to clean water, and to prepare for public health emergencies around the globe. Opportunities in this field include application of environmental and occupational health principles to protect and promote the health of populations in homes, communities and workplace settings.

Curriculum

Core Courses

All students will begin their studies in *Public Health Foundations* and *Public Health Research Methods*; two new multidisciplinary core courses which will be team-taught by faculty from each department. The courses are designed to run across the first two quarters and total 16.0 credits. This format ensures that course development is shaped by content/disciplinary experts and includes the breadth and depth of relevant skills that all MPH graduates will need regardless of their chosen discipline.

Discipline-Specific Courses

Students will take six discipline-specific courses in Environmental and Occupational Health over the five-quarter MPH program.

MPH Practical Experience

All MPH degree students must develop skills in basic public concepts and demonstrate capacity to apply these concepts through a practical experience relevant to their area of specialization. "Practice" refers to implementing (doing) public health, rather than understanding (studying/researching) public health.

The no-credit, practical experience is an applied, field-based requirement that gives students experience in the practice of public health requiring *depth* (120-240 hours in a field placement) and *breadth* (1 experience per month). Also included is participation in short-term volunteer opportunities and participation in on- or off-campus learning opportunities. The practical experience requirement can begin during the third quarter of year one and be completed during the summer of the second year of study.

Integrative Learning Experience

The integrative learning experience (ILE) is the culminating requirement for MPH students. Environmental and Occupational Health students will take 4.0 credits in the final 2 quarters of the program and will produce a high-quality written product that demonstrates mastery of core public health and discipline-specific competencies. The ILE can be coordinated with the field-based practical experience requirement.

Additional Information

For additional information about this program, contact:

Kristi Kao, MEd
Academic Program Coordinator
kk842@drexel.edu
267.359.6181

Admission Requirements

The Dornsife School of Public Health seeks students with intellectual and interpersonal competencies as well as those with potential for leadership. The school has set a high priority on establishing a student body that is representative of the nation's population. We strive to recruit and to admit applicants from underrepresented minority groups who can contribute to the richness of our student population and to that of the nation's public health professionals.

Admission Process

Admission to the program is based on the following criteria:

- Personal essays and letters of recommendation
- Academic and personal accomplishments with emphasis on demonstrated leadership
- Diversity of background and outside interests, depth of self-appraisal, commitment to public health, capacity to work with individuals

Applicants should have:

- Satisfactorily completed an undergraduate bachelor degree program in an accredited US college or university, or its equivalent in another country

- Previous coursework in statistics and the natural sciences (biology, chemistry, physics, etc.) is highly recommended
- Satisfactory results from one of the following taken within the past five years (the GRE or GMAT is preferred):
 - Graduate Record Examination (GRE)
 - Graduate Management Admission Test (GMAT)
 - Medical College Admission Test (MCAT)
 - Law School Admission Test (LSAT)
 - Dental Admissions Test (DAT)
- Test of English as a Foreign Language (TOEFL) for applicants whose first language is not English

Please note: The Dornsife School of Public Health's code for submitting GRE scores is 2194. The SOPHAS GRE school code is 7890.

The Application Process also requires:

- Completion of the Schools of Public Health Common Application (<http://www.sophas.org>).
- Essay describing what you perceive to be pressing public health issues, why a career in the field appeals to you, and how it will use your strengths and commitment
- Three letters of recommendation
- Resume or CV

Applicants to the joint MD/MPH program must be accepted to both the Drexel College of Medicine (<http://www.drexelmed.edu>) and the Dornsife School of Public Health (<http://publichealth.drexel.edu>).

Degree Requirements

MPH Foundation Courses	16.0
PBHL 510	Public Health Foundations and Systems I
PBHL 511	Public Health Foundations and Systems II
PBHL 512	Methods for Public Health Research I
PBHL 513	Methods for Public Health Research II
EOH Foundation Courses	18.0
EOH 510	Principles and Practice of Environmental and Occupational Health
EOH 610	Environmental and Occupational Toxicology
EOH 615	Environmental and Occupational Health Policy
EOH 620	Environmental Hazard Assessment
EOH 625	Occupational and Environmental Epidemiology
EOH 630	Environmental Health Risk and Impact Assessment
Integrative Learning Experience	4.0
EOH 750	Integrative Learning Experience: Environmental and Occupational Health I
EOH 751	Integrative Learning Experience: Environmental and Occupational Health II
Practical Experience	0.0
PBHL 500	Practical Experience for the Master of Public Health
Electives*	18.0
These courses may be within the Dornsife School of Public Health, or from other academic units within the University. Students may choose to use their elective credits to complete a graduate minor. Students must meet with their Graduate Advisor to select electives and/or a graduate minor. It is the responsibility of the student to determine course restrictions for electives. The following is a sample of some of the Dornsife School of Public Health electives offered by department:	
Community Health and Prevention Electives	
CHP 500	Behavior and Social Change Theories
CHP 501	Community Engagement in Public Health Practice & Research
CHP 503	Multi-Method Data Analysis in Community Health & Prevention
CHP 516	History of Public Health

CHP 517	Overview of Maternal and Child Health
CHP 518	Global Issues in Maternal and Child Health
CHP 540	Prevention Principles and Practices
CHP 550	Community Based Prevention Practices
CHP 605	Outcomes and Impact Evaluation
CHP 607	Public Health Ethics
CHP 608	Animals and Public Health
CHP 650	Drug Use and Public Health
CHP 670	Multicultural Competence in Community Health and Prevention
CHP 671	Community Organizing and Community Assessment for Health and Wellness
CHP 672	Theory and Practice in Health Communication
CHP 673	Outcomes Assessment of Community Health and Prevention
CHP 681	Research with Rare, Stigmatized and Hidden Populations
CHP 682	LGBT Health Disparities
CHP 683	Intersectional Perspectives
CHP 691	Public Health Practice in and with Latino Communities
CHP 692	Migration and Health
CHP 705	Religion, Spirituality, and Health
CHP 802	Theory & Practice of Community Health and Prevention II
CHP 803	Research Methods for Community Health and Prevention
CHP 804	Qualitative Research in Community Health
CHP 806	Community Based Participatory Research
CHP 808	Measuring Health
CHP 815	Advanced Topics in Qualitative Analysis & Manuscript Development

Environmental and Occupational Health Electives

EOH 560	Overview of Issues in Global Health
EOH 642	Healthy Housing & Built Environment
EOH 645	Exposure Assessment
EOH 646	Environmental Health in Vulnerable Populations
EOH 648	Public Health and Disaster Preparedness
EOH 649	Occupational and Environmental Cancers
EOH 654	Microbes and Public Health Practice
EOH 655	Infection Prevention and Control in the Healthcare Environment
EOH 657	Public Health Impacts of Global Climate Change
EOH 658	Crisis and Risk Communication in Public Health
EOH 663	Injury Prevention and Control
EOH 664	Safety in Healthcare
EOH 665	Quantitative Risk Analysis for Environmental Health
PBHL 704	Proseminar in Global Health Ethics
PBHL 705	Public Health in Developing Countries
PBHL 706	Globalization, Development and Comparative Health Systems
PBHL 707	Monitoring and Evaluation in Global Health
PBHL 708	Global Health Integration Module and Field Practicum Experience

Epidemiology/Biostatistics Electives

BST 555	Introduction to Statistical Computing
BST 559	Intermediate SAS
BST 567	Statistical Consulting
EPI 500	Introduction to Epidemiology and Biostatistics I
EPI 501	Introduction to Epidemiology and Biostatistics II
EPI 551	Epidemiology of Cancer
EPI 553	Infectious Disease Epidemiology
EPI 556	Perinatal Epidemiology
EPI 557	Cardiovascular Disease Epidemiology & Prevention
EPI 558	Making Sense of Data
EPI 559	Pharmacoepidemiology
EPI 561	Pathophysiologic Basis of Epidemiologic Research
EPI 564	Data Science Using R
EPI 573	Autism as a Public Health Challenge
EPI 677	Health and Design Research

Health Management and Policy Electives

HMP 500	Health Management and Policy I
HMP 501	Health Management and Policy II
HMP 510	Evolution of United States Health Policy
HMP 511	Legal Aspects of Public Health
HMP 512	The Business of Healthcare: Advanced Healthcare Financial Management
HMP 513	Healthcare Planning Principles and Practice
HMP 514	Policy Analysis for Population Health
HMP 515	Health Organizational Leadership
HMP 516	Health Care Organizations and Management
HMP 550	Health Disparities: Systemic, Structural, Environmental & Economic
HMP 551	Historical and Contemporary Developments in Social Justice
HMP 552	Perspectives on Gender, Race, Ethnicity, and Social Class
HMP 554	Issues in United States Health Policy
HMP 555	Violence, Trauma and Adversity in Public Health
HMP 556	Public Health Leadership
HMP 600	Public Health Advocacy and Activism
HMP 601	Seminar in Fire Arms and Public Health
HMP 602	The Politics of Food & Gender
HMP 603	Health Systems Policy Analysis
HMP 650	Management of Healthcare Outcomes
HMP 651	Managing a Public Health Agency
HMP 652	Change Management in Public Health
HMP 653	Fundamentals of Disaster Management
HMP 654	Public Health Funding & Program Development
HMP 655	Coordinating a Population's Care
HMP 656	Organizational Finance Seminar: Case Studies in Health Care
HMP 657	Health Care Strategy and Operations: Creating Change
HMP 701	Health Care Data Analytics
HMP 703	Introduction to GIS for Public Health
HMP 704	Using Data to Drive Policy and Practice
HMP 802	Health and Human Rights
HMP 810	Health Services Research
HMP 812	Qualitative Methods for Health Policy Research and Practice
HMP 815	Cost Benefit Analysis for Health Services
HMP 820	Methods in Implementation Science
HMP 852	Health Economics I
HMP 853	Health Economics II
<hr/>	
Total Credits	56.0

* 800 level courses may require professor's permission

About the Graduate Minor

Graduate Minors are open to all Drexel graduate students in all schools and colleges. The graduate minors are designed to complement student's training by providing basic knowledge in topics outside their primary discipline.

Students who minor in Environmental and Occupational Health will gain skills and knowledge to assess and prevent health impacts from air and drinking water pollutants, climate change, the built environment, and workplace hazards. Students will learn key concepts through structured coursework that will cover toxicology, epidemiology, exposure science, and risk communication. After completing the minor, students will understand the effects of major biological, chemical, and physical agents on human health and safety, and how genetic and socioeconomic factors affect a person's susceptibility to environmental hazards. The minor will deepen a student's learning experience and provide them with a distinctive skill set to help address complex, emerging environmental health issues.

Admission Requirements

The Graduate Minor in Environmental and Occupational Health is open to current Drexel graduate students.

Program Requirements

Required Courses		
EOH 510	Principles and Practice of Environmental and Occupational Health	3.0
EOH 610	Environmental and Occupational Toxicology	3.0
EOH 620	Environmental Hazard Assessment	3.0
Elective		3.0
Choose one of the following courses		
EOH 560	Overview of Issues in Global Health	
EOH 615	Environmental and Occupational Health Policy	
EOH 625	Occupational and Environmental Epidemiology	
EOH 630	Environmental Health Risk and Impact Assessment	
EOH 642	Healthy Housing & Built Environment	
EOH 645	Exposure Assessment	
EOH 646	Environmental Health in Vulnerable Populations	
EOH 648	Public Health and Disaster Preparedness	
EOH 649	Occupational and Environmental Cancers	
EOH 654	Microbes and Public Health Practice	
EOH 655	Infection Prevention and Control in the Healthcare Environment	
EOH 657	Public Health Impacts of Global Climate Change	
EOH 658	Crisis and Risk Communication in Public Health	
EOH 663	Injury Prevention and Control	
EOH 664	Safety in Healthcare	

Dornsife School of Public Health Faculty

Amy Auchincloss, PhD, MPH (*University of Michigan*). Associate Professor. Department of Epidemiology and Biostatistics. Environmental determinants of health and the health effects of air pollution; contribution of resources in residential environments to health behaviors, obesity, diabetes and cardiovascular disease; the use of spatial analysis methods and agent-based mode

Sharrelle Barber, ScD, MPH (*Harvard T.H. Chan School of Public Health*). Assistant Research Professor. Racial/Ethnic Health Inequalities in Cardiovascular Disease; Social Determinants of Racial/Ethnic Health Inequalities in Cardiovascular Disease; Community-Engaged Research; Geography and Health; Multilevel Analysis; Spatial Analysis and GIS; Global Health; Urban Health

Scarlett Bellamy, ScD (*Harvard University*). Professor. Clinical Trials; Data Analysis Methods; Health Disparities; Infectious Disease; Mental health and Behavioral health; Reproductive or Sexual Health

Zekarias Berhane, PhD (*University of Pittsburgh*). Assistant Professor. Department of Epidemiology and Biostatistics. Modeling time-to-event data with single and multiple outcomes, mixed effect models and regression diagnostics.

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; positive behavior interventions and supports (PBIS), response to intervention (Rtl), systems-level change and performance feedback.

Sandra L. Bloom, MD (*Temple University School of Medicine*). Associate Professor. Department of Health Management and Policy. Psychological trauma and organizational stress.

Sherry Brand-Rauf, MPhil, JD (*Columbia University*). Associate Teaching Professor. Health Policy; Occupational Health; Environmental Exposures; Health Disparities; Public Health Law

Jennifer Breaux, DrPH, MPH, CHES (*Drexel University*). Assistant Teaching Professor. Maternal and child health, Child and maternal health, Community health, Human rights.

Darryl Brown, PhD (*Johns Hopkins University*). Assistant Teaching Professor. Department of Health Management and Policy. Health care research and planning; patient outcomes and applied health economic methods.

Robert J. Brulle, PhD (*George Washington University*). Professor. Environmental policy and politics, critical theory, marine risk, social movements, environmental sociology.

James W. Buehler, MD (*University of California, San Francisco*). Clinical Professor. Department of Health Management and Policy. Public health preparedness, e-health, health policy, building public health infrastructure and capacity, chronic diseases, behavioral health, data privacy, emergency preparedness and public health practice.

Igor Burstyn, PhD (*Utrecht University*). Associate Professor. Department of Environmental and Occupational Health. Occupational and environmental epidemiology, industrial hygiene, endocrine disruptors, environmental exposures, biomarkers, air quality, gene-environmental

interaction, maternal and child health, Bayesian statistics, statistical modeling, etiology of autism.

Amy Carroll-Scott, PhD, MPH (*University of California at Los Angeles*). Assistant Professor. Asset mapping, Built environment, Chronic diseases, Community capacity building, Community health, Community health worker/promoters models, Community-based participatory research, Community resilience, Demography, Health disparities, Mixed methods, Neighborhood context, Obesity, School health, Social capital/social cohesion, Social determinants of health, Social epidemiology, Spatial data and analysis, Youth leadership development.

Esther Chernak, MD, MPH, FACP (*UMDNJ-Robert Wood Johnson Medical School*) Director of the Center for Public Health Readiness and Communication; Director of Joint Degree Programs. Associate Research Professor. Emergency preparedness, infectious disease, public health practice, crisis and emergency risk communication, medicine and public health.

Mariana Chilton, PhD, MPH (*University of Pennsylvania*) Director, Center for Hunger-Free Communities. Associate Professor. Department of Health Management and Policy. Nutrition, housing and health; chronic diseases; human rights, chronic diseases, community health, human rights and hunger.

Theodore Corbin, MD, MPP (*Drexel University*) Joint Appointment between Dornsife School of Public Health and Drexel University College of Medicine. Associate Professor. Department of Health Management and Policy. Health policy; design of care systems; high risk youth; violence; healthcare services; injury prevention.

AnneClaire De Roos, PhD, MPH (*University of North Carolina at Chapel Hill*). Associate Professor. Department of Environmental and Occupational Health. Environmental and occupational epidemiology, exposure assessment, pesticides, persistent organic pollutants, drinking water quality, air pollution, urban environments, chemical risk assessment.

Ana Diez Roux, MD, PhD, MPH (*Johns Hopkins University*) Dean, Dornsife School of Public Health. Distinguished Professor. Department of Epidemiology and Biostatistics. Social determinants of health; neighborhoods and health; psychosocial factors; air pollution, cardiovascular disease epidemiology; multilevel and systems methods; urban health and health in Latin America.

Mary Duden, MBA (*Drexel University*). Assistant Teaching Professor. Department of Health Management and Policy. Health care for the underserved and health disparities.

Jerome Dugan, PhD (*Rice University*) Primary appointment in Health Economics at the Drexel College of Nursing and Health Professions. Assistant Professor. Department of Health Management and Policy. Insurance markets and healthcare regulation.

Nancy Epstein, MPH, MAHL (*University of North Carolina at Chapel Hill*). Associate Professor. Health Disparities, Faith and Health.

Alison A. Evans, ScD (*Harvard University*). Associate Professor. Department of Epidemiology and Biostatistics. Epidemiology of infectious diseases and cancer; cohort studies; minority and immigrant health; chronic viral infections; hepatitis b; elimination of viral hepatitis; immunization; perinatal transmission.

Jerry Fagliano, MPH, PhD (*Johns Hopkins University*) Chair, Department of Environmental and Occupational Health. Associate Clinical Professor. Children's health and environmental exposures; health impacts of climate

change; inequities in environmental exposure and disease; risks from transportation of hazardous materials; spatial distribution and clustering of disease.

Robert I. Field, PhD, JD, MPH (*Columbia University*) *Joint Appointment in the Drexel University Kline School of Law*. Professor. Health policy, public health law, health administration and management, public health ethics.

Janet Fleetwood, PhD, MPH (*University of Southern California*). Professor. Philosophy, bioethics, public health ethics, research ethics, social justice, ethical theory.

Arthur L. Frank, MD, PhD (*City University of New York*) *Chair Emeritus*. Professor. Department of Environmental and Occupational Health. Environmental and occupational health, agricultural safety and health, pneumoconiosis, occupational toxicology, environmental pollution.

Dennis Gallagher, MA, MPA (*University of Pittsburgh*). Associate Teaching Professor. Department of Health Management and Policy. Health department structure and financing; health policy and law; Medicare/Medicaid and public health infrastructure.

Pamela Geller, PhD (*Kent State University*). Associate Professor. Stressful life events and physical and mental health outcomes, particularly in the area of women's reproductive health (e.g. pregnancy, pregnancy loss, infertility, medical education).

Marla Gold, MD (*University of Medicine and Dentistry-New Jersey Medical School*) *Dean Emerita*. Professor. Department of Health Management and Policy. Design of HIV/AIDS care systems, treatment protocols, resource utilization, and epidemiology; CQI, managed care and systems of health care, health administration, behavioral health care and substance abuse treatment systems.

Neil Goldstein, PHD, MBI (*Drexel University, Oregon Health & Science University (OHSU) School of Medicine*). Assistant Research Professor. Data Analysis Methods; eHealth or mHealth; Infectious Disease; Maternal and Child Health; Reproductive or Sexual health; Spatial Analysis or GIS; Statistical Modeling; Vaccines and vaccinations; Electronic medical records/informatics; Translational epidemiology

Edward J. Gracely, PhD (*Temple University*) *Joint Appointment in Drexel University College of Medicine*. Associate Professor. Department of Epidemiology and Biostatistics. Statistics, experimental design/research methods and statistical analysis, clinical trials.

Ali Groves, PhD, MHS (*University of North Carolina; Johns Hopkins University*). Assistant Professor. Reproductive and Sexual Health, Maternal and Child Health, Global Health, Data Analysis Methods.

Jana A. Hirsch, PhD (*University of Michigan*). Assistant Research Professor. Health and place or built environment; health disparities; mental and behavioral health; urban health; active aging; age-friendly neighborhoods

Mary E. Hovinga, PhD, MPH (*University of Michigan*). Associate Professor. Department of Epidemiology and Biostatistics. Cancer, cognitive disabilities; PCBs and DDT, lead exposure; neurological disorders, environmental hazards, epidemiologic study design.

Tran Huynh, PhD, MPH, CIH (*University of Minnesota*). Assistant Professor. Community Engaged Research; Cardiovascular Disease; Statistical Modeling; Immigrant Health; Health Disparities; Occupational

Health; Workplace Health Interventions; Industrial Hygiene; Bayesian Statistics; Exposure Assessment; Epidemiology

Jessie Kemmick Pintor, PhD, MPH (*University of Minnesota*). Assistant Professor. Community-based participatory research; Immigrant health; Health disparities; Health services research; Health policy; Maternal & child health; Mixed methods; Immigration policy

Ann Klassen, PhD (*Johns Hopkins University*). Professor. HIV/AIDS, Food safety, Excess burden intervention, GIS-based and spatial analysis, Mixed methods, Qualitative methods, Social sciences.

Jennifer Kolker, MPH (*University of Michigan*) *Associate Dean for Public Health Practice*. Associate Clinical Professor. Department of Health Management and Policy. Maternal and child health; federally qualified health center program; urban health issues; health department structure and financing; health policy and law; legislative advocacy; Medicare/Medicaid; preterm birth; public health education and training; public health infrastructure; welfare economics; women's health.

Shiriki Kumanyika, PhD, MS, MPH (*Cornell University; Columbia University; Johns Hopkins University*). Research Professor. Solutions to obesity and diet-related diseases in black Americans, 'Culture of health' approaches in black communities, Assessment of food environments, Environmental influences on lifestyle changes, Targeted marketing of unhealthy foods and beverages, Food and nutrition policy, Evidence-based public health, Nutrition epidemiologic methods, Social determinants of health and health equity, Systems science applications in public health.

Brent Langellier, PhD (*University of California, Los Angeles*). Assistant Professor. Department of Health Management and Policy. Health and health care disparities, Latino health, complex systems, quantitative methods, GIS.

Stephen E. Lankenau, PhD (*University of Maryland*). Professor. HIV/AIDS, Overdose prevention, Prescription drug misuse, Medical marijuana, Injection drug use, High risk youth, Homeless, Qualitative research.

Felice Le-Scherban, PhD, MPH (*University of Michigan*). Assistant Professor. Department of Epidemiology and Biostatistics. Life course approaches to socioeconomic, racial, and ethnic health disparities; social determinants of health among immigrants; causal links between education and health; analytic methods in social epidemiology.

Brian K. Lee, PhD (*Johns Hopkins University*). Associate Professor. Department of Epidemiology and Biostatistics. Environmental determinants and epidemiology of autism spectrum disorders; perinatal epidemiology; child and maternal health; neuropsychiatric epidemiology, causal inference; machine learning.

Nora L. Lee, PhD (*Johns Hopkins University*). Assistant Research Professor. Department of Epidemiology and Biostatistics. Perinatal epidemiology; preterm birth; infant mortality; autism spectrum disorders; maternal and child health; racial and ethnic health disparities; secondhand smoke; tobacco control; environmental exposures.

Longjian Liu, MD, PhD, MSc, FAHA (*The University of Hong Kong*). Associate Professor. Department of Epidemiology and Biostatistics. Pharmacoepidemiology; cardiovascular disease and diabetes epidemiology; drug-lifestyle interaction; environmental and global health disparities; hospital electronic health records for cardiovascular and diabetes risk assessment and prediction.

Gina Lovasi, PhD (*University of Washington*) *Co-Director of the Urban Health Collaborative*. Associate Professor. Cardiovascular Disease;

Data Analysis Methods; Health and Place or Build Environment; Health Disparities; Spatial Analysis or GIS; Urban Health; Urban trees and greenspace; Local retail and urban design; Transportation, infrastructure and policies

Shannon Marquez, MEng, PhD (*University of North Carolina at Chapel Hill*) Director, Office of Global Health. Associate Professor. Department of Environmental and Occupational Health. Global health; water sanitation and hygiene; health disparities; environmental health.

Ana Martinez-Donate, PhD (*Universidad Autonoma de Madrid, Spain*). Associate Professor. HIV prevention, Tobacco control, Obesity prevention, Access to health services.

Philip Massey, PhD, MPH (*University of California, Los Angeles*). Assistant Professor. Digital Technologies in Public Health, Health Literacy, Health Communication, Global Health, Health Disparities, Health Promotion.

Leslie McClure, PhD, MS (*University of Michigan*) Chair, Department of Epidemiology and Biostatistics. Professor. Design, management and analysis of randomized clinical trials; issues of multiplicity in clinical trials; environmental risk factors for cardiovascular disease and stroke; geographic and racial disparities in cardiovascular disease and stroke.

Ryan McKenna, PhD (*Stonybrook University*). Assistant Professor. Health disparities; Health economics; Health policy; Data analysis and methods; Statistical modeling; Health services research; Mental health and behavioral health

Janell L. Mensinger, PhD (*City University of New York*) Director, Biostatistics Service Center. Associate Research Professor. Behavioral health promotion strategies, treating obesity, clinical research methods, statistics. Body perception, obesity and eating disorders.

Yvonne Michael, ScD (*Harvard School of Public Health*) Associate Dean for Academic and Faculty Affairs. Associate Professor. Department of Epidemiology and Biostatistics. Epidemiology of aging, social epidemiology, women's health, community-based participatory research; health disparities.

Jana M. Mossey, PhD, MPH, MSN (*University of North Carolina at Chapel Hill*). Professor. Department of Epidemiology and Biostatistics. Epidemiological methods; research design and methods including observational and clinical trials research; psychosocial aspects of health; epidemiology of aging and pain, psychiatric epidemiology including major depression; sub-threshold and minor depression.

Craig J. Newschaffer, PhD (*Johns Hopkins University*) Director, A.J. Drexel Autism Institute; Associate Dean for Research. Professor. Department of Epidemiology and Biostatistics. Environmental determinants of autism spectrum disorders; gene-environment interaction; neurological disorders.

Alex Ortega, PhD (*University of Michigan*) Chair, Department of Health Management and Policy; Director, Center for Population Health and Community Impact. Professor. Epidemiological methods in health services research; health needs of Latino children and families; health disparities intervention research; youth engagement in community interventions.

Jonathan Purtle, DRPH, MPH, MSC (*Drexel University*). Assistant Professor. Department of Health Management and Policy. Mental health policy and services research; policy dissemination and implementation

research; traumatic stress in urban areas; trauma-informed system design; violence prevention; political institutions and health.

Harrison Quick, PhD (*University of Minnesota*). Assistant Professor. Occupational Health; Spatial Analysis or GIS; Statistical Modeling; Urban Health; Bayesian Inference; Data Confidentiality

Alex Quistberg, PhD (*University of Washington*). Assistant Research Professor. Data Analysis Methods; Global Health or International Health; Health and Place or Built Environment; Health Disparities; Spatial Analysis or GIS; Urban Health; Intentional/Violent Injury and Trauma; Unintentional Injury and Trauma

John A. Rich, MD, MPH (*Duke University Medical School*) Director, Center for Nonviolence and Social Justice. Professor. Department of Health Management and Policy. Health disparities; men's health; violence; urban health issues; primary care.

Lucy Robinson, PhD (*Columbia University*). Assistant Professor. Department of Epidemiology and Biostatistics. Statistics, modeling and analysis of neuroimaging and CT image data, network modeling, spatio-temporal data, computational statistics, and functional data analysis.

John Rossi, VMD, MBE (*University of Pennsylvania*) Director, M.S. in Public Health Ethics. Assistant Professor. Public health ethics, research ethics, ethical theory, animal and environmental ethics, risk assessment and communication, public health history.

Alexis Roth, PhD, MPH (*Indiana University*). Assistant Professor. mHealth, Substance use, Reproductive or sexual health, Community engaged research, Infectious diseases, Health disparities, Urban health, Mixed methods, Women's health, Social determinants of health.

Leah Schinasi, PhD (*University of North Carolina*). Assistant Research Professor. Environmental Exposures; Cancer; Health and Place or Built Environment; Occupational Health; Urban Health; Community Based Participatory Research; Environmental Justice; Environmental Epidemiology; Climate Change

Randall L. Sell, ScD (*Harvard University*). Associate Professor. Health Disparities, Experimental design/research methods, Gender and health, LGBT issues, Program evaluation, Survey methods.

Paul Shattuck, PhD (*University of Wisconsin-Madison*) Director, Life Course Outcomes Research Program at the A.J. Drexel Autism Institute. Associate Professor. Department of Health Management and Policy. Design and evaluation of services for people with disabilities; autism.

David Barton Smith, PhD (*University of Michigan*). Research Professor. Department of Health Management and Policy. Healthcare; health disparities; history of public health; managed care.

David Smith, PhD (*University of Michigan*). Research Professor. Health Administration and Management; Health Disparities; History of Public Health; Health Services Research; Health Policy; Spatial Analysis or GIS
