<b>Concentration Requirements and STEM Electives</b>	21.0
Concentration Required Courses (3)	
STEM Electives (up to the 21 credit total)**	
<b>Total Credits</b>	185.5-186.5

\* General studies electives include all liberal arts electives plus additional subjects, such as business, which do not fall under the subject areas of science, math or engineering. See the Biomedical Engineering General and Liberal Studies List ([http://www.biomed.drexel.edu/new04/Content/ug\\_prog/gen\\_lib\\_studies\\_courses](http://www.biomed.drexel.edu/new04/Content/ug_prog/gen_lib_studies_courses)) for approved courses. A certain number of General Studies credits are required for graduation with this major.

\*\* STEM electives are defined as any 200-level or higher course offered by the College of Engineering, College of Computing and Informatics, School of Biomedical Engineering, Science and Health Systems, and the School of Public Health; any 200-level or higher course in BIO, CHEM, ENVS, HSCI, MATH, and PHYS; and selected PSY courses.

**Concentration Course Requirements**

Students must select one concentration and complete the listed required courses. The student also needs to take additional STEM electives, as described above. The credit total of the concentration required courses and the STEM electives must be at least 21.0 credits.

**Biomaterials**

CHEM 241 Organic Chemistry I	4.0
BMES 460 Biomaterials I	4.0
BMES 461 Biomaterials II	4.0
<b>Total Credits</b>	12.0

**Biomechanics**

MEM 201 Foundations of Computer Aided Design	3.0
BMES 441 Biomechanics I: Introduction to Biomechanics	4.0
BMES 442 Biomechanics II: Musculoskeletal Modeling and Human Performance	4.0
<b>Total Credits</b>	11.0

**Biomedical Imaging**

PHYS 201 Fundamentals of Physics III	4.0
BMES 421 Biomedical Imaging Systems I: Images	4.0
BMES 422 Biomedical Imaging Systems II: Ultrasound	4.0
<b>Total Credits</b>	12.0

**Biomedical Informatics**

BIO 219 [WI] Techniques in Molecular Biology	3.0
BMES 483 Quantitative Systems Biology	4.0
BMES 484 Genome Information Engineering	4.0
<b>Total Credits</b>	11.0

**Neuroengineering**

BIO 462 Biology of Neuron Function	3.0
BMES 477 Neuroengineering I: Neural Signals	3.0
BMES 478 Neuroengineering II: Principles of Neuroengineering	3.0
<b>Total Credits</b>	9.0

**Tissue Engineering**

BIO 219 [WI] Techniques in Molecular Biology	3.0
BMES 471 Cellular and Molecular Foundations of Tissue Engineering	4.0
BMES 472 Developmental and Evolutionary Foundations of Tissue Engineering	4.0
<b>Total Credits</b>	11.0

**Sample Plan of Study**

<b>Term 1</b>		<b>Credits</b>
BMES 124	Biomedical Engineering Freshman Seminar I	2.0
BMES 201	Programming and Modeling for Biomedical Engineers I	3.0
CHEM 101	General Chemistry I	3.5
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
MATH 121	Calculus I	4.0
UNIV R101	The Drexel Experience	1.0
	<b>Term Credits</b>	16.5
<b>Term 2</b>		
BMES 101	Introduction to BMES Design I – Defining Medical Problems	2.0
CHEM 102	General Chemistry II	4.5
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
MATH 122	Calculus II	4.0
PHYS 101	Fundamentals of Physics I	4.0
	<b>Term Credits</b>	17.5
<b>Term 3</b>		
BIO 122	Cells and Genetics	4.5
BMES 102	Introduction to BMES Design II – Evaluating Design Solutions	2.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
MATH 200	Multivariate Calculus	4.0
PHYS 102	Fundamentals of Physics II	4.0
CIVC 101	Introduction to Civic Engagement	1.0
	<b>Term Credits</b>	18.5
<b>Term 4</b>		
BMES 202	Programming and Modeling for Biomedical Engineers II	3.0
ECE 201	Foundations of Electric Circuits I	4.0
ENGR 220	Fundamentals of Materials	4.0
MATH 201	Linear Algebra	4.0
MEM 202	Statics	3.0
	<b>Term Credits</b>	18.0
<b>Term 5</b>		
BIO 218	Principles of Molecular Biology	4.0
BMES 238 or MEM 238	Dynamics of Biomedical Systems Dynamics	3.0
BMES 338	Biomedical Ethics and Law	3.0
BMES 241	Modeling in Biomedical Design I	2.0
MATH 210	Differential Equations	4.0
	<b>Term Credits</b>	16.0
<b>Term 6</b>		
BIO 201	Human Physiology I	4.0

BMES 345	Mechanics of Biological Systems	3.0
BMES 375	Computational Bioengineering	4.0
BMES 432	Biomedical Systems and Signals	3.0
CHEM 253	Thermodynamics and Kinetics	4.0
Term Credits		18.0
<b>Term 7</b>		
BMES 303	Laboratory III: Biomedical Electronics	2.0
BMES 310	Biomedical Statistics	4.0
BMES 341	Modeling in Biomedical Design II	2.0
BMES 451	Transport Phenomena in Living Systems	4.0
Bioscience Restricted Elective		3.0
Term Credits		15.0
<b>Term 8</b>		
BMES 315	Experimental Design in Biomedical Research	4.0
BMES 381	Junior Design Seminar I	2.0
General Studies Electives		6.0
Term Credits		12.0
<b>Term 9</b>		
BMES 302	Laboratory II: Biomeasurements	2.0
BMES 382	Junior Design Seminar II	2.0
BMES 337	Introduction to Physiological Control Systems	3.0
BMES 444	Biofluid Mechanics	3.0
Bioscience Elective		3.0
Concentration Required Course		3.0
Term Credits		16.0
<b>Term 10</b>		
BMES 491 [WI]	Senior Design Project I	3.0
Concentration Required Course		3.0
General Studies Elective		3.0
Lab Elective		2.0
STEM Elective		3.0
Term Credits		14.0
<b>Term 11</b>		
BMES 492	Senior Design Project II	2.0
Concentration Required Course		3.0
General Studies Elective		3.0
Lab Elective		2.0
STEM Elective		3.0
Term Credits		13.0
<b>Term 12</b>		
BMES 493	Senior Design Project III	3.0
General Studies Elective		3.0
STEM Electives		6.0
Term Credits		12.0
Total Credit: 186.5		

## Co-op/Career Opportunities

Metropolitan Philadelphia has one of the highest concentrations of medical institutions and pharmaceutical and biotechnology industries in the nation. The bachelor of science degree in biomedical engineering gives students access to a broad spectrum of career opportunities in medical device and equipment industry; prosthetics and assist devices industry; biomaterials and implants industry; and the telemedicine, pharmaceutical, biotechnology, and agricultural sectors.

Biomedical engineering graduates are also ideally prepared for professional education in medicine, dentistry, veterinary medicine, and law. Those who choose to pursue graduate education can aim for careers in research and development, biomedical technology innovation and transfer, as well as health care technology management.

Visit the Drexel Steinbright Career Development Center (<http://www.drexel.edu/scdc>) page for more detailed information on co-op and post-graduate opportunities.

## Biomedical Engineering, Science and Health Systems Faculty

Fred D. Allen, PhD (*University of Pennsylvania*) Associate Director, Undergraduate Education. Assistant Professor. Tissue engineering, cell engineering, orthopedics, bone remodeling, wound healing, mechanotransduction, signal transduction, adhesion, migration.

Hasan Ayaz, PhD (*Drexel University*) School of Biomedical Engineering, Science and Health Systems. Associate Professor. Optical brain imaging, cognitive neuroengineering, brain computer interface (BCI), functional near infrared (fNIR), and near infrared spectroscopy (NIRS).

Sriram Balasubramanian, PhD (*Wayne State University*). Assistant Professor. Structural characteristics of the pediatric thoracic cage using CT scans and developing an age-equivalent animal model for pediatric long bones.

Kenneth A. Barbee, PhD (*University of Pennsylvania*). Professor. Cellular biomechanics of neural and vascular injury, mechanotransduction in the cardiovascular system, mechanical control of growth and development for wound healing and tissue engineering.

Donald Buerk, PhD (*Northwestern University*). Research Professor. Biotechnology, physiology, systems biology, blood flow, microcirculation, nitric oxide, oxygen transport

Jamie Dougherty, PhD (*Drexel University*). Assistant Teaching Professor. Brain-computer interface, neural encoding, electrophysiological signal acquisition and processing.

Lin Han, PhD (*Massachusetts Institute of Technology*). Associate Professor. Nanoscale structure-property relationships of biological materials, genetic and molecular origins soft joint tissue diseases, biomaterials under extreme conditions, coupling between stimulus-responsiveness and geometry.

Uri Hershberg, PhD (*Hebrew University of Jerusalem, Israel*). Assistant Professor. Bioinformatics, immunology, neural computation, system biology, somatic selection, autoimmunity, genetic stability, germline diversity, dendritic cell, transcription elements, pathogens, computational and mathematical modeling, complex systems, cognition and inflammation.

Kurtulus Izzetoglu, PhD (*Drexel University*). Associate Research Professor. Cognitive neuroengineering, functional brain imaging, near infrared spectroscopy, medical sensor development, biomedical signal processing, human performance assessment, and cognitive aging

Andres Kriete, PhD (*University in Bremen Germany*) Associate Director for Graduate Studies and Academic Operations. Systems biology, bioimaging, control theory, biology of aging, skin cancer.

Steven Kurtz, PhD (*Cornell University*). Part-time Research Professor. Computational biomechanics of bone-implant systems and impact-related injuries, orthopaedic biomechanics, contact mechanics, orthopaedic biomaterials, large-deformation mechanical behavior and wear of polymers, and degradation and crosslinking of polyolefins in implant applications.

Ryszard Lec, PhD (*University of Warsaw Engineering College*). Professor. Biomedical applications of viscoelastic, acousto-optic and ultrasonic properties of liquid and solid media.

Peter Lewin, PhD (*University of Denmark, Copenhagen-Lyngby*) Richard B. Beard Professor, School Of Biomedical Engineering, Science & Health Systems. Professor. Biomedical ultrasonics, piezoelectric and polymer transducers and hydrophones; shock wave sensors.

Hualou Liang, PhD (*Chinese Academy of Sciences*). Professor. Neuroengineering, neuroinformatics, cognitive and computational neuroscience, neural data analysis and computational modeling, biomedical signal processing.

Donald L. McEachron, PhD (*University of California at San Diego*) Coordinator, Academic Assessment and Improvement. Teaching Professor. Animal behavior, autoradiography, biological rhythms, cerebral metabolism, evolutionary theory, image processing, neuroendocrinology.

Michael Neidrauer, PhD (*Drexel University*). Assistant Research Professor. Wound healing, near infrared, spectroscopy, cell culture, data analysis, optical coherence tomography (OCT), matlab, life sciences assay development, confocal microscopy, biomaterials, in-vivo, medical devices

Banu Onaral, PhD (*University of Pennsylvania*) H.H. Sun Professor; Senior Advisor to the President, Global Partnerships. Professor. Biomedical signal processing; complexity and scaling in biomedical signals and systems.

Kambiz Pourrezaei, PhD (*Rensselaer Polytechnic University*). Professor. Thin film technology; nanotechnology; near infrared imaging; power electronics.

Ahmet Sacan, PhD (*Middle East Technical University*). Assistant Professor. Indexing and data mining in biological databases; protein sequence and structure; similarity search; protein structure modeling; protein-protein interaction; automated cell tracking.

Joseph J. Sarver, PhD (*Drexel University*). Associate Professor. Neuromuscular adaptation to changes in the myo-mechanical environment.

Patricia A. Shewokis, PhD (*University of Georgia*). Professor. Roles of cognition and motor function during motor skill learning; role of information feedback frequency on the memory of motor skills, noninvasive neural imaging techniques of functional near infrared spectroscopy (fNIRS) and electroencephalography (EEG) and methodology and research design.

Adrian C. Shieh, PhD (*Rice University*). Assistant Professor. Contribution of mechanical forces to tumor invasion and metastasis, with a particular emphasis on how biomechanical signals may drive the invasive switch, and how the biomechanical microenvironment interacts with cytokine signaling and the extracellular matrix to influence tumor and stromal cell behavior.

Wan Y. Shih, PhD (*Ohio State University*). Professor. Piezoelectric microcantilever biosensors development, piezoelectric finger development, quantum dots development, tissue elasticity imaging, piezoelectric microcantilever force probes.

Kara Spiller, PhD (*Drexel University*). Associate Professor. Macrophage-biomaterial interactions, drug delivery systems, and chronic wound

healing. Cell-biomaterial interactions, biomaterial design, and international engineering education.

Marek Swoboda, PhD (*Drexel University*). Assistant Teaching Professor. Cardiovascular engineering, cardiovascular system, diagnostic devices in cardiology, piezoelectric biosensors, and pathogen detection.

Amy Throckmorton, PhD (*University of Virginia*). Associate Professor. Computational and experimental fluid dynamics; cardiovascular modeling, including transient, fluid-structure interaction, and patient-specific anatomical studies; bench-to bedside development of medical devices; artificial organs research; prediction and quantification of blood trauma and thrombosis in medical devices; design of therapeutic alternatives for patients with dysfunctional single ventricle physiology; human factors engineering of mechanical circulatory assist devices

Margaret Wheatley, PhD (*University of Toronto*) John M. Reid Professor. Ultrasound contrast agent development (tumor targeting and triggered drug delivery), controlled release technology (bioactive compounds), microencapsulated allografts (ex vivo gene therapy) for spinal cord repair.

Ming Xiao, PhD (*Baylor University*). Associate Professor. Nanotechnology, single molecule detection, single molecule fluorescent imaging, genomics, genetics, genome mapping, DNA sequencing, DNA biochemistry, and biophysics.

Yinghui Zhong, PhD (*Georgia Institute of Technology*). Assistant Professor. Spinal cord repair, and engineering neural prosthesis/brain interface using biomaterials, drug delivery, and stem cell therapy.

Leonid Zubkov, PhD, DSc (*St. Petersburg State University, Russia*). Research Professor. Physiology, wound healing, physiologic neovascularization, near-infrared spectroscopy, optical tomography, histological techniques, computer-assisted diagnosis, infrared spectrophotometry, physiologic monitoring, experimental diabetes mellitus, penetrating wounds, diabetes complications, skin, animal models, radiation scattering, failure analysis

Catherin von Reyn, PhD (*University of Pennsylvania*). Assistant Professor. Cell type-specific genetic engineering, whole-cell patch clamp in behaving animals, modeling, and detailed behavioral analysis to identify and characterize sensorimotor circuits.

## **Emeritus Faculty**

Dov Jaron, PhD (*University of Pennsylvania*) Calhoun Distinguished Professor of Engineering in Medicine. Professor Emeritus. Mathematical, computer and electromechanical simulations of the cardiovascular system.

Rahamim Seliktar, PhD (*University of Strathclyde, Glasgow*). Professor Emeritus. Limb prostheses, biomechanics of human motion, orthopedic biomechanics.

Hun H. Sun, PhD (*Cornell University*). Professor Emeritus. Biological control systems, physiological modeling, systems analysis.

# The School of Education

The School of Education offers Pennsylvania Department of Education-approved programs to certify students who want to become teachers. Undergraduate students have the option to choose from a variety of traditional full-time and non-traditional part-time on-campus and online programs. These programs are designed to meet the needs of a variety of diverse learners who wish to pursue a bachelor's degree and Pennsylvania State Certification in elementary (grades PreK-4), middle level (grades 4-8) and/or secondary (grades 7-12).

School of Education undergraduate students have the option to choose from the following program options: BS on-campus (full or part-time) taking day or evening courses, or the part-time Online BS Degree completion program. In addition, any Drexel non-education undergraduate student who is interested in becoming a teacher has the option to enroll in either the BS/MS or BA/MS Dual Degree programs (4 or 5 year options) regardless of their major.

The School of Education (<http://www.drexel.edu/soe>) seeks to enrich knowledge and practice related to lifespan learning, based on the most current and appropriate research and practice. Our goal is to improve human understanding through programs and activities that emphasize creative uses of human effort, technology, leadership, and problem solving.

## Majors

- Design of Learning Technologies (BS) (p. 407)
- Elementary Education (BS) (p. 410)
  - PK-4 (p. 423)
  - PK-4 and Special Education (p. 427)
  - Middle Level Math and English (p. 416)
  - Middle Level Science and Math (p. 413)
  - Middle Level Science and English (p. 420)
- Teacher Education (BS) (p. 430)
  - Biology (p. 432)
  - Chemistry (p. 436)
  - Earth and Space Science (p. 439)
  - English (p. 442)
  - General Science (p. 446)
  - Mathematics (p. 449)
  - Physics (p. 453)
  - Social Studies (p. 456)

## Minor

- Education (p. 459)
- Sport Coaching Leadership (p. 460)
- STEM Education (p. 460)

## Certificates

- Creativity and Innovation (p. 461)

## About the Curriculum

The School of Education's programs apply the most updated trends in theory, instruction, and leadership, with an emphasis on effective teaching integrating the sciences, enhancing teaching by using technology, two

central components of every Drexel Education. In addition, this is the only such program in the country to incorporate a six-month paid internship in industry related to the student's area of certification or individual interest.

Certification for classroom instruction is organized according to the two majors, the BS in Elementary Education and the BS in Secondary Education. Below is a list of all certification areas currently offered by the School of Education.

- Elementary education
  - Elementary: PK-4
  - Elementary: PK-4 and Special Education
  - Middle Level Math and English
  - Middle Level Science and English
  - Middle Level Science and Math
- Secondary education (grades 7-12)
  - Biology
  - Chemistry
  - Earth and Space Science
  - English
  - General Science
  - Mathematics
  - Physics
  - Social Studies
  - Environmental Education (grades K-12)

Students may acquire certification in more than one subject area.

The School of Education uses university-wide resources to prepare fully qualified teachers at both the elementary and secondary levels. The Teacher Education Program at Drexel University is closely aligned with National INTASC Teaching Standards as well as the Pennsylvania Department of Education's Four Domains for Professional Teaching. In addition, the Teacher Ed Program has identified seven **Program Outcomes**, which identify the specific qualities that set the Drexel Teacher Candidate apart from other candidates in the field. These program outcomes are directly aligned with the Drexel University Student Learning Priorities (DSLPL). It is expected that students exiting the Teacher Education Program at Drexel University will exhibit these seven standards in his/her professional teaching practice.

## Program Outcomes:

1. The teacher candidate demonstrates independent and creative academic leadership skills that can be applied in the classroom, school community and the profession.
2. The teacher candidate understands the changing role of the educator in an increasingly diverse society, and applies this understanding in the classroom, school community and profession.
3. The teacher candidate holds a global perspective on current issues in education, understands best pedagogical practices, and utilizes this knowledge in the classroom, school community and profession.
4. The teacher candidate recognizes the importance of the application of educational research as a tool to explore critical aspects of teaching and learning in PK-12 setting.
5. The teacher candidate demonstrates a strong academic background in all subject areas that meet PDE content requirements, with strong emphasis on mathematics and science.

6. The teacher candidate can effectively integrate tools of technology in curriculum, assessment and instruction to enhance PK-12 student learning.

7. The teacher candidate demonstrates the ability to reflect upon one's professional practice through the successful completion of course work and engagement in experiential learning to promote positive, transformative change within the profession.

### **Pennsylvania Instructional I Teaching Certifications**

There are multiple ways for Drexel University students to obtain their initial and add-on teaching certifications in Pennsylvania while pursuing their current major at Drexel. Education majors have the opportunity to achieve these certifications through the Bachelors of Science Education program, the BS/MS dual degree, the graduate level Post-baccalaureate (PBC) and Masters (MS) in Teaching Learning and Curriculum programs.

Non-teaching education majors may have the opportunity to build teacher certification into their program of study as electives, depending on their major. Those students who cannot manage the whole certification program may opt to participate in the (non-certification) education minor. Undergraduate students also have the option to enroll in as many content courses as can be managed in their undergraduate degree and then finish their teaching certification requirements through the Post-baccalaureate Teaching Certification or Masters in Teaching Learning and Curriculum programs. Additionally, undergraduate non-education majors can pursue a Master's degree in Teaching, Learning, and Curriculum with Teaching Certification through the BA/MS or BS/MS dual degree route while in their current major provided they meet and maintain the program's minimum criteria of a 3.0 cumulative GPA requirement and have completed no more than 90-120 credits at Drexel at the time of applying for the dual degree program.

\*Please note that during a Drexel student's senior year, undergraduate students have the option to take up to and including 9 graduate credits in core pedagogy education courses that can be applied to a future graduate level Post-baccalaureate Teacher Certification or MS degree program at Drexel provided that these graduate credits are not required for UG degree completion and the student received a minimum grade of a "B" in those graduate courses.

Please be advised that the Pennsylvania Department of Education requires that all teacher certification candidates must maintain a 3.0 GPA in their degree or certification program in order to be recommended for state certification.

Combination certifications are available from the School of Education. Sample combinations include:

- Grades PreK-4 certification, with certification in Special Education.
- Biology certification, with courses for additional certification in chemistry.
- Chemistry certification, with courses for additional certification in biology.
- Earth and space science certification, with courses for additional certification in chemistry.
- Earth and space science certification, with courses for additional certification in physics.
- Mathematics certification, with courses for additional certification in physics.

- Physics certification, with courses for additional certification in mathematics.

Students pursuing the appropriate majors in the College of Arts and Sciences may also complete the requirements for certification within their area of study.

For more information, please contact the Program Manager or the School of Education at 215.895.6770.

### **Post-Graduate Opportunities**

Students obtain employment in the School District of Philadelphia and neighboring school districts in Pennsylvania and such surrounding states as New Jersey, Delaware, Ohio, and New York. Often, students begin a graduate degree program in combination with their employment.

### **Writing-Intensive Course Requirements**

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List on the Drexel University Writing Center web page. Students scheduling their courses in Banner/DrexelOne can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

### **Cooperative Education**

Drexel University has long been known for its co-operative education program, through which students combine periods of full-time, career-related employment with their studies. Internship employment is a requirement for all teacher education majors.

The BS degree is completed in four years. In addition to the Pennsylvania Department of Education's (PDE) state mandated field experiences and 12 week student teaching, this program includes one six-month internship period of full-time employment related to the student's initial area of teacher certification. The goal of the co-op program in teacher education is to provide real-world experiences for future teachers to use in their classrooms.

Students typically participate in co-ops during their fall and winter terms of their sophomore year and pursue varied positions geared directly to their area(s) of certification. Candidates are asked to pursue a position that would allow them to see other areas of education that reach beyond K-12 teaching. This caveat to the requirement allows candidates to understand the broadness and extensive nature of the field of education both nationally and internationally.

Students have interned in a variety of institutions or museums such as the Philadelphia School District, the Philadelphia's Please Touch Museum, Drexel's Academy of Natural Science (<http://www.ansp.org>) Museum (<http://www.ansp.org>), the Philadelphia Dream Academy, Children's Hospital of Philadelphia, and the Franklin Institute Science Museum just to name a few.

While the BS/MS 5 year dual degree program offers both a co-op, PA state mandated field experiences and student teaching, the BS/MS 4 year dual degree program only requires the PA state mandated field experiences and student teaching, not a co-op experience.

## Facilities

The Drexel Center for the Prevention of School-aged Violence is located within the School of Education at Drexel University, 3141 Chestnut Street, Philadelphia, PA 19104. The mission of the center is to create public awareness around the need for youth-focused, evidence-based efforts aimed at preventing youth violence from occurring in environments where youth grow, learn, and recreate.

Our vision is to help ensure that all youth possess the requisite social and cognitive skills to prevent violence on their own, which includes developing conflict resolution and mediation skills. We also strive to inform policy leaders and stakeholders of the various types of evidence-based activities that prevent school-aged violence.

The Math Forum is a leading center for mathematics and mathematics education on the Internet. Operating under Drexel's School of Education, our mission is to provide resources, materials, activities, person-to-person interactions, and educational products and services that enrich and support teaching and learning in an increasingly technological world.

For more information about these and other School of Education centers, visit the School of Education (<http://www.drexel.edu/soe>) website.

## Design of Learning Technologies

*Major: Design of Learning Technologies*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 180.0*

*Co-op Options: One Co-op (Four years)*

*Classification of Instructional Programs (CIP) code: 13.0607*

*Standard Occupational Classification (SOC) code: 25-9099*

## About the Program

The Bachelor of Science major in Design of Learning Technologies (DLT) prepares students to build the next generation of information and computing technology for learning. Students learn interdisciplinary skills and knowledge necessary to design, develop, and implement technology-enhanced learning environments for a variety of settings.

Students in the major will be exposed to three major themes in their coursework:

- **Cognition and Learning:** Cognitive/mental processes and representations underlying knowledge and skill acquisition
- **Culture and Society:** Social, cultural, and organizational aspects of teaching and learning, in and outside of schools
- **Design and Technology:** Design and evaluation techniques to enable the development of new and emerging technologies to support learning and teaching

Work across these themes is coordinated to facilitate the development of expertise on the design of learning technologies grounded in strong theories of learning for a wide range of educational contexts (e.g., classrooms, museum exhibits, after-school, summer camps, etc.),

audiences (e.g., teachers, students, corporations, children, adults, etc.), and learning environments.

The curriculum combines knowledge of how people learn, learning technology design, and child/adolescent development from the School of Education with design courses in the Westphal College of Media Arts & Design and computational thinking courses in the College of Computing and Informatics. Co-op experiences may include work at software and design companies, non-profits, cultural institutions, or research environments where there are needs for individuals with training in both learning theories and computational design.

Graduates of the program will have strong skills in applying theory to the creation of educational and learning environments. With hands-on courses focused on human learning and technology design, the Design of Learning Technologies major combines expertise in the foundations of education with design and technical expertise that is central for best practices of the application, development, and use of technologies throughout our lifetimes.

### Degree Requirements

#### General Requirements

ANTH 101	Introduction to Cultural Diversity	3.0
BIO 100	Applied Cells, Genetics & Physiology	3.0
BIO 101	Applied Biological Diversity, Ecology & Evolution	3.0
CHEM 111	General Chemistry I	4.0
COM 111	Principles of Communication	3.0
CRTV 301	Foundations in Creativity	3.0
CRTV 303	Creativity in the Workplace	3.0
ECON 201	Principles of Microeconomics	4.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
Literature Requirement (Select one from ENGL 200 - ENGL 335)		3.0
American History Requirement (Select one from HIST 201 - HIST 203)		3.0
INFO 105	Introduction to Informatics	3.0
MATH 101	Introduction to Analysis I	4.0
MATH 102	Introduction to Analysis II	4.0
MUSC 130	Introduction to Music	3.0
PHYS 151	Applied Physics	3.0
PSY 101	General Psychology I	3.0
PSY 330	Cognitive Psychology	3.0
SOC 335	Sociology of Education	3.0

#### Education Requirements

EDUC 101	Foundations in Education I: A Historical and Philosophical Perspective	3.0
EDUC 102	Foundations in Education II: Contemporary Issues	3.0
EDLT 103	Foundation in Education III: Learning Sciences	3.0
EDUC 105	Freshman Pedagogy Seminar	3.0
EDUC 120	Child Development I: Typical Development	3.0
EDUC 123	Adolescent Development	3.0
EDUC 201	Instructional Issues	3.0
EDUC 316	Teaching in Urban Contexts	3.0
EDUC 322	Evaluation of Instruction	3.0
EDUC 324	Current Research in Curriculum & Instruction	3.0
EDUC 335	Engaging the Learner	3.0

#### Design of Learning Technologies Program Requirements

ANTH 370	Ethnographic Methods	3.0
CS 140	Computer Science Principles	3.0
DIGM 223	Creative Concept Design	3.0
EDLT 101	Learning, Culture & Technology Workshop I	3.0

EDLT 201	Learning, Culture and Technology Workshop II	3.0
EDLT 238	New Media Literacies	3.0
EDLT 250	Sociocultural Perspectives on Learning	3.0
EDLT 301	Learning, Culture & Technology Workshop III	3.0
EDLT 339	Future Pedagogies	3.0
EDLT 353	Play and Learning in Participatory Cultures	3.0
EDLT 354	Learning In and Out of Schools	3.0
EDLT 491	Senior Project I	3.0
EDLT 492	Senior Project II	3.0
EDLT 493	Senior Project III	3.0
EHRD 205	Organizational Learning & Strategy	3.0
INFO 110	Introduction to Human-Computer Interaction	3.0
INFO 240	Introduction to Data Science	3.0
WEST 465	Special Topics in Media, Arts and Design	3.0
<b>Electives **</b>		<b>24.0</b>
<b>Other University Requirements</b>		
CIVC 101	Introduction to Civic Engagement	1.0
COOP 101	Career Management and Professional Development	0.0
UNIV T101	The Drexel Experience	1.0
Total Credits		180.0

- \* Students enroll in EDUC 105 three times; Fall, Winter and Spring of Freshman Year.
- \*\* Students are encouraged to work with their advisor to select electives or a minor.

## Sample Plan of Study

Term		Credits
<b>Term 1</b>		
EDLT 101	Learning, Culture & Technology Workshop I	3.0
EDUC 101	Foundations in Education I: A Historical and Philosophical Perspective	3.0
EDUC 105	Freshman Pedagogy Seminar	1.0
EDUC 120	Child Development I: Typical Development	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
UNIV T101	The Drexel Experience	1.0

## Education Faculty

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) *Clinical Director and Research Fellow, A.J. Drexel Autism Institute*. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities.

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (*Indiana University*) *Associate Dean of Research*. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

Penny Hammrich, PhD (*University of Minnesota*) *Dean*. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development,

planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Assistant Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) *Senior Vice Provost for Faculty Affairs*. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) *Associate Dean of Research*. Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*). Assistant Clinical Professor. Coaching development, measuring coaching quality, self-insight and reflective practices. Coaching leadership.

Valerie Klein, PhD (*Amherst College*). Assistant Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children;

special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. thinking about school reform by drawing, Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (*Northwestern University*) *Senior Associate Dean of Academic Affairs*. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) *Associate Dean of Teacher Education and Undergraduate Affairs*. Associate Clinical Professor. Cross-cultural, language and academic development, school reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) *Program Director, Applied Behavior Analysis and Special Education*. Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

## Emeritus Faculty

Fredricka K. Reisman, PhD (*Syracuse University*) *Director of the Torrance Center for Creativity and Innovation*. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

## Elementary Education

*Major: Elementary Education*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 180.0 - 188.5*

*Co-op Options: One Co-op (Four years)*

*Classification of Instructional Programs (CIP) code: 13.1202; 13.1311; 13.1316*

*Standard Occupational Classification (SOC) code: 25-2022*

## About the Program

Elementary school teachers instruct classes of children in several subjects. Often they work as part of a team with other teachers who are jointly responsible for a group of students in at least one subject.

The BS in Elementary Education uses university-wide resources to prepare fully qualified teachers at the primary education levels. Students in the School of Education participate in one six-month cooperative education (co-op) experience in a professional position related to their area of certification.

Primary teacher certification options include:

- Pre-Kindergarten - Grade 4 (p. 423)
- Pre-Kindergarten - Grade 4 & Special Education (p. 427)
- Middle Level (grades 4-8) Mathematics and English (p. 416)
- Middle Level (grades 4-8) Science and English (p. 420)
- Middle Level (grades 4-8) Science and Mathematics (p. 413)

Students may acquire certification in more than one subject area.

The program requires that students have a B average (3.0 GPA) in content courses needed for teacher certification in addition to the grade of B or better in each EDEX, EDLT, EDUC and MTED course throughout their time in the program. These requirements must be satisfied in order for Drexel to recommend the student for teacher certification upon graduation and/or be considered to have completed the program.

A benchmark to assist students in meeting the GPA and B grade requirements is the formal review of each student's content and pedagogy coursework at the end of the sophomore year. Students who meet these requirements, as well as pass the *Pre-service Academic Performance Assessment (PAPA) Reading, Writing and Mathematics test modules of the Pennsylvania Educator Certification Tests (PECT) Exams* according to Pennsylvania standards at that time, are officially accepted into Drexel's Teacher Preparation Program. Students who do not meet the requirements work with their academic advisor to develop a plan of action to work toward meeting the requirements or continue in the program to

work toward the BS degree without being recommended for a teaching certificate, or explore another major.

Students participate in classroom observations and limited direct teaching experiences as a component of many of their pedagogy courses beginning in their freshman year. Students have the option of the following teacher certification/concentration tracks within their major which determines their individual program of study:

**Elementary Education, Pre-Kindergarten through Grade 4:** Focused study to work with children in pre-kindergarten, kindergarten, and grades 1-4 across subject areas (ages 3-9). The competencies for this concentration include child development (birth through age 5), language development, early literacy and math foundations for preschool years, early intervention, integrating the arts for the developing child and family and community partnerships.

**Elementary Education, Pre-Kindergarten through Grade 4 and Special Education:** Focused study to work with children in pre-kindergarten, kindergarten, and grades 1-4 across subject areas (ages 3-9) within the competencies listed previously as well as working with students with disabilities in pre-kindergarten, kindergarten and grades 1-8 (ages 3-14). The special education competencies emphasize the Response to Intervention process, working with students at risk for and with/without disabilities, progress monitoring techniques, research-based instructional practices and interventions.

**Elementary Education, Middle Level:** Focused study to work with students in grades 4-6 across subjects and with students in grades 7-8 in two core academic subject(s) the teacher education candidate chooses to pursue:

- Middle School Mathematics & English
- Middle School Science & English
- Middle School Science & Math

In the senior year, students who are officially accepted into the Teacher Preparation Program and maintain the 3.0 GPA and grade requirements, enroll and complete the 24-week, full-time, student-teaching experiences in their primary area of certification. Students must receive a grade of at least B in (and if applicable) and in all pedagogy (EDEX, EDLT, EDUC and MTED) coursework, as well as maintain an overall 3.0 GPA to be recommended for teacher certification.

Students who were not officially accepted into the Teacher Preparation Program and/or do not maintain the GPA and grade requirements but who are working towards the BS degree without being recommended for teacher certification take other courses as assigned by the Teacher Education Program Director and/or academic advisor to fulfill needed credits for the degree in lieu of pre-student teaching and student teaching.

Students pursuing the appropriate majors in the College of Arts and Sciences may also complete the requirements for certification within their area of study. For more information, contact the Program Coordinator for the School of Education at 215-895-6770.

## Additional Information

Additional information is available at the School of Education's (<http://www.drexel.edu/soe>) web site.

## Emeritus Faculty

Fredricka K. Reisman, PhD (*Syracuse University*) Director of the *Torrance Center for Creativity and Innovation*. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

## Elementary Education: Middle Level Science and Math

*Major: Elementary Education*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 180.0*

*Co-op Options: One Co-op (Four years)*

Classification of Instructional (CIP) code: 13.1202

Standard Occupational Classification (SOC) code: 25-2022

## About the Concentration

This certification option within the BS in Elementary Education (p. 410) enables to teachers to work with students in grades 4-6 across subjects, and with students in grades 7-8 in the core academic subjects of science and mathematics.

This program addresses the complexities of adolescent development, through discussion of theories. It explores the middle school environment, developmentally appropriate middle school programs, strategies for supporting students through the transition to middle school, and the impact of peer pressure on the middle school child.

In addition, this certification area provides: (1) training in how to effectively deliver standards-based academic math content, based on age-appropriate understanding, individual and groups needs; (2) training and methodology for teaching physical and life sciences (including using an inquiry-based model of learning, developing authentic assessments, drawing upon a variety of tools, creating and maintaining a safe laboratory) as well as other skills necessary to meet the needs of diverse learners in science education.

## Additional Information

For more information about the program, visit the School of Education (<http://drexel.edu/soe>) website.

MTED 418	Mathematics Methods and Content	3.0

### Student Teaching Experience

EDUC 410 [WI]	Student Teaching	9.0
Total Credits		180.0

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Middle Level Science and Math Concentration: Plan of Study

### 4 YR UG Co-op Concentration

Term 1		Credits
BIO 161	General Biology I	3.0
EDUC 101	Foundations in Education I: A Historical and Philosophical Perspective	3.0

## Education Faculty

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) *Clinical Director and Research Fellow, A.J. Drexel Autism Institute*. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities.

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (*Indiana University*) *Associate Dean of Research*. Professor. Studying the relative and long-range effects of early

schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

Penny Hammrich, PhD (*University of Minnesota*) *Dean*. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Assistant Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) *Senior Vice Provost for Faculty Affairs*. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) *Associate Dean of Research*. Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*). Assistant Clinical Professor. Coaching development, measuring coaching quality, self-insight and reflective practices. Coaching leadership.

Valerie Klein, PhD (*Amherst College*). Assistant Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student

development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. thinking about school reform by drawing, Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (*Northwestern University*) *Senior Associate Dean of Academic Affairs*. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) *Associate Dean of Teacher Education and Undergraduate Affairs*. Associate Clinical Professor. Cross-cultural, language and academic development, school

reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) *Program Director, Applied Behavior Analysis and Special Education*. Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

## Emeritus Faculty

Fredricka K. Reisman, PhD (*Syracuse University*) *Director of the Torrance Center for Creativity and Innovation*. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

## Elementary Education: Middle Level Math and English

*Major: Elementary Education*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 180.0*

*Co-op Options: One Co-op (Four years)*

Classification of Instructional (CIP) code: 13.1202

Standard Occupational Classification (SOC) code: 25-2022

## About the Concentration

This certification option within the BS in Elementary Education (p. 410) enables to teachers to work with students in grades 4-6 across subjects, and with students in grades 7-8 in the core academic subjects of mathematics and English.

This program addresses the complexities of adolescent development, through discussion of theories. It explores the middle school environment, developmentally appropriate middle school programs, strategies for supporting students through the transition to middle school, and the impact of peer pressure on the middle school child.

In addition, this certification area provides: (1) training in how to effectively deliver standards-based academic math content, based on age-appropriate understanding, individual and groups needs; (2) courses devoted to teaching; age-appropriate; reading skills, how to teach and assess writing effectively, as well as a specialized course in the genre of young adult fiction.

## Additional Information

For more information about the program, visit the School of Education (<http://drexel.edu/soe>) website.

Total Credits		180.0

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Middle Level Math and English: Plan of Study

### 4 YR UG Co-op Concentration /Middle Level Math & English

Term 1		Credits

## Education Faculty

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) *Clinical Director and Research Fellow, A.J. Drexel Autism Institute*. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (*Indiana University*) Associate Dean of Research. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

Penny Hamrlich, PhD (*University of Minnesota*) Dean. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) Director, Center for Labor Markets and Policy. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Assistant Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) Senior Vice Provost for Faculty Affairs. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) Associate Dean of Research. Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*). Assistant Clinical Professor. Coaching development, measuring coaching quality, self-insight and reflective practices. Coaching leadership.

Valerie Klein, PhD (*Amherst College*). Assistant Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Associate Clinical Professor. Experiences of students of African descent at predominantly

white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. thinking about school reform by drawing, Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (*Northwestern University*) Senior Associate Dean of Academic Affairs. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (Rtl); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) Associate Dean of Teacher Education and Undergraduate Affairs. Associate Clinical Professor. Cross-cultural, language and academic development, school

reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) Program Director, *Applied Behavior Analysis and Special Education*. Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

## Emeritus Faculty

Fredricka K. Reisman, PhD (*Syracuse University*) Director of the *Torrance Center for Creativity and Innovation*. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

# Elementary Education: Middle Level Science and English

Major: Elementary Education

Degree Awarded: Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: 180.0

Co-op Options: One Co-op (Four years)

Classification of Instructional (CIP) code: 13.1202

Standard Occupational Classification (SOC) code: 25-2022

## About the Concentration

This certification option within the BS in Elementary Education (p. 410) enables to teachers to work with students in grades 4-6 across subjects, and with students in grades 7-8 in the core academic subjects of science and English.

This program addresses the complexities of adolescent development, through discussion of theories. It explores the middle school environment, developmentally appropriate middle school programs, strategies for supporting students through the transition to middle school, and the impact of peer pressure on the middle school child.

In addition, this certification area provides: (1) training and methodology for teaching physical and life sciences (including using an inquiry-based model of learning, developing authentic assessments, drawing upon a variety of tools, creating and maintaining a safe laboratory) as well as other skills necessary to meet the needs of diverse learners in science education; (2) courses devoted to teaching age-appropriate reading skills, how to teach and assess writing effectively, as well as a specialized course in the genre of young adult fiction.

## Additional Information

For more information about the program, visit the School of Education (<http://drexel.edu/soe>) website.

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Education Faculty

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) *Clinical Director and Research Fellow, A.J. Drexel Autism Institute*. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities.

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (*Indiana University*) *Associate Dean of Research*. Professor. Studying the relative and long-range effects of early

schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

Penny Hammrich, PhD (*University of Minnesota*) *Dean*. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Assistant Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) *Senior Vice Provost for Faculty Affairs*. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) *Associate Dean of Research*. Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*). Assistant Clinical Professor. Coaching development, measuring coaching quality, self-insight and reflective practices. Coaching leadership.

Valerie Klein, PhD (*Amherst College*). Assistant Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student

development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. thinking about school reform by drawing, Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (*Northwestern University*) Senior Associate Dean of Academic Affairs. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) Associate Dean of Teacher Education and Undergraduate Affairs. Associate Clinical Professor. Cross-cultural, language and academic development, school

reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) Program Director, Applied Behavior Analysis and Special Education. Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

## Emeritus Faculty

Fredricka K. Reisman, PhD (*Syracuse University*) Director of the Torrance Center for Creativity and Innovation. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

## Elementary Education: PK-4

*Major: Elementary Education*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 180.0*

*Co-op Options: One Co-op (Four years)*

Classification of Instructional (CIP) code: 13.1202

Standard Occupational Classification (SOC) code: 25-2031

## About the Concentration

This certification option within the BS in Elementary Education (p. 410) enables teachers to work with children in pre-kindergarten, kindergarten, and grades 1 through 4 (ages 3-9) across subject areas. Required competencies are covered in areas such as child development, language development, early literacy and math foundations for preschool years, early intervention, integrating the arts for the developing child, and family and community partnerships.

## Additional Information

For more information about the program, visit the School of Education (<http://drexel.edu/soe>) website.

## Education Faculty

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) *Clinical Director and Research Fellow, A.J. Drexel Autism Institute*. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (*Indiana University*) *Associate Dean of Research*. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

Penny Hammrich, PhD (*University of Minnesota*) *Dean*. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development,

planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Assistant Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) *Senior Vice Provost for Faculty Affairs*. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) *Associate Dean of Research*. Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*). Assistant Clinical Professor. Coaching development, measuring coaching quality, self-insight and reflective practices. Coaching leadership.

Valerie Klein, PhD (*Amherst College*). Assistant Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children;

special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. thinking about school reform by drawing. Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (*Northwestern University*) *Senior Associate Dean of Academic Affairs*. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) *Associate Dean of Teacher Education and Undergraduate Affairs*. Associate Clinical Professor. Cross-cultural, language and academic development, school reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) *Program Director, Applied Behavior Analysis and Special Education*. Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

## Emeritus Faculty

Fredricka K. Reisman, PhD (*Syracuse University*) *Director of the Torrance Center for Creativity and Innovation*. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

## Elementary Education: PK-4 and Special Education

*Major: Elementary Education*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 184.0*

*Co-op Options: One Co-op (Four years)*

Classification of Instructional Programs (CIP) code: 13.1202

Standard Occupational Classification (SOC) code: 25-2022

## About the Concentration

This certification option within the BS in Elementary Education (p. 410) enables teachers to work with children in pre-kindergarten, kindergarten, and grades 1 through 4 (ages 3-9) across subject areas, with the addition of being specialized to work with students at risk for disabilities or with disabilities. As with the Elementary PK-4 certification, the program covers required competencies such as child development, language development, early literacy and math foundations for preschool years, early intervention, integration of the arts for the developing child, and family and community partnerships.

Improvements in the diagnosis of learning disabilities at earlier ages have resulted in an increase in the number of students requiring special education. This program is designed to provide the information necessary to: understand the complexities of the disabled learner's needs; modify a curriculum appropriately; provide remedial instruction; use technology to address the learner's needs/progress; manage instruction for students with special needs in the inclusive classroom; as well as additional approaches to assessment and special education teaching techniques.

## Additional Information

For more information about the program, visit the School of Education (<http://drexel.edu/soe>) website.

## Degree Requirements

### General Education/Content Requirements

BIO 100	Applied Cells, Genetics & Physiology	3.0
or BIO 161	General Biology I	
BIO 101	Applied Biological Diversity, Ecology & Evolution	3.0
or BIO 162	General Biology II	
CHEM 111	General Chemistry I	4.0
CIVC 101	Introduction to Civic Engagement	1.0
COM 111	Principles of Communication	3.0
ECON 201	Principles of Microeconomics	4.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0

ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
ENVS 260	Environmental Science and Society	3.0
HIST 275	History of Pennsylvania	3.0
MATH 181	Mathematical Analysis I	3.0
MATH 182	Mathematical Analysis II	3.0
MATH 183	Mathematical Analysis III	3.0
MUSC 130	Introduction to Music	3.0
NFS 100	Nutrition, Foods, and Health	2.0
NFS 101	Introduction to Nutrition & Food	1.0
PHYS 151	Applied Physics	3.0
PSY 101	General Psychology I	3.0
PSY 320 [WI]	Educational Psychology	3.0
PSY 330	Cognitive Psychology	3.0
SOC 335	Sociology of Education	3.0
UNIV T101	The Drexel Experience	1.0
English (Literature) elective: Select course between ENGL 200 - ENGL 360		3.0
Free Electives		3.0

### Pedagogy Requirements

EDEX 142	Special Education Foundations: Referral and Assessment	3.0
EDEX 244	Inclusionary Practices for Exceptional Students	3.0
EDEX 246 [WI]	Literacy and Content Skill Development PreK-8	3.0
EDUC 101	Foundations in Education I: A Historical and Philosophical Perspective	3.0
EDUC 105	Freshman Pedagogy Seminar	3.0
EDUC 120	Child Development I: Typical Development	3.0
EDUC 121	Child Development II: Atypical Development	3.0
EDUC 205	Sophomore Pedagogy Seminar	1.0
EDUC 216	Diversity and Today's Teacher	3.0
EDUC 236	Early Literacy I	3.0
EDUC 305 [WI]	Junior Pedagogy Seminar	1.0
EDUC 306	Assessment of Young Children	3.0
EDUC 308	Creating a Positive Classroom Climate	3.0
EDUC 312	Educational Policy, Law & Advocacy	3.0
EDUC 314	Science Teaching Methods	3.0
EDUC 316	Teaching in Urban Contexts	3.0
EDUC 324	Current Research in Curriculum & Instruction	3.0
EDUC 326 [WI]	Language Arts Processes	3.0
EDUC 335	Engaging the Learner	3.0
EDUC 336	Early Literacy II	3.0
EDUC 338	Expressive Arts for PK-4	3.0
EDUC 355	Social Studies Teaching Methods	3.0
EDUC 365	Foundations in Instructing English Language Learners	3.0
EDUC 405	Senior Pedagogy Seminar	1.0
EDUC 411	Family and Community Partnerships	3.0
MTED 417	Mathematics Methods and Content: Early Childhood	3.0
MTED 418	Mathematics Methods and Content	3.0

### Special Education Core Courses

EDEX 347	Special Education Processes PreK-8	3.0
EDEX 348	Emotional and Behavioral Support of Individuals with Disabilities	3.0
EDEX 349	High Incident Disabilities	3.0
EDEX 350	Teaching Individuals with Low Incident Disabilities	3.0
EDEX 351	Pervasive Developmental Disorders	3.0
EDEX 352	Integrating Technology for Learning & Achievement	3.0
EDEX 353	Special Education: Methods & Practices PreK-8	3.0

### Student Teaching Experience

EDUC 409	Student Teaching Seminar I	9.0
EDEX 414 [WI]	Special Education Student Teaching Seminar	9.0

Total Credits 184.0

\* UNIV T101 and CIVC 101 are not required for Education transfer students, instead these 2 credits are replaced with free electives.

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Elementary PK-4 and Special Education Concentration: Plan of Study

### 4 YR UG Co-op

Term 1		Credits
EDUC 101	Foundations in Education I: A Historical and Philosophical Perspective	3.0
EDUC 105	Freshman Pedagogy Seminar	1.0
EDUC 120	Child Development I: Typical Development	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
MATH 181	Mathematical Analysis I	3.0
UNIV T101	The Drexel Experience	1.0
	Term Credits	14.0
<b>Term 2</b>		
BIO 100	Applied Cells, Genetics & Physiology	3.0

Total Credit: 184.0

## Education Faculty

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) *Clinical Director and Research Fellow, A.J. Drexel Autism Institute*. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (*Indiana University*) *Associate Dean of Research*. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

Penny Hammrich, PhD (*University of Minnesota*) *Dean*. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Assistant Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) *Senior Vice Provost for Faculty Affairs*. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) *Associate Dean of Research*. Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*). Assistant Clinical Professor. Coaching development, measuring coaching quality, self-insight and reflective practices. Coaching leadership.

Valerie Klein, PhD (*Amherst College*). Assistant Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Associate Clinical Professor. Experiences of students of African descent at predominantly

white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. thinking about school reform by drawing, Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (*Northwestern University*) *Senior Associate Dean of Academic Affairs*. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) *Associate Dean of Teacher Education and Undergraduate Affairs*. Associate Clinical Professor. Cross-cultural, language and academic development, school

reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) *Program Director, Applied Behavior Analysis and Special Education*. Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

## Emeritus Faculty

Fredricka K. Reisman, PhD (*Syracuse University*) *Director of the Torrance Center for Creativity and Innovation*. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

## BS in Teacher Education

*Major: Teacher Education*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 180.0 - 191.5*

*Co-op Options: One Co-op (Four years)*

*Classification of Instructional Programs (CIP) code: 13.1205*

*Standard Occupational Classification (SOC) code: 25-2031*

## About the Program

The Bachelor of Science in Teacher Education program uses university-wide resources to prepare fully qualified teachers at the secondary education levels in various subjects of certification. The program applies the microcomputer in teaching and learning, and it is the only such program in the country to incorporate a six-month paid internship in industry related to the student's area of certification (for example, a prospective chemistry teacher might co-op at a chemical company). Students pursuing the appropriate majors in the College of Arts and Sciences may also complete the requirements for certification within their area of study.

The BS in Teacher Education, is focused on secondary education, and provides graduates with the background to work with students in grades 7-12\* in a specific subject area. Students may work with their academic advisor to satisfy teacher certification requirements for multiple areas if desired. Available certification areas include:

- Biology (p. 432)
- Chemistry (p. 436)
- Earth & Space Science (p. 439)
- English (p. 442)
- General Science (p. 446)
- Mathematics (p. 449)
- Physics (p. 453)
- Social Studies (p. 456)

The program requires that students have a B average (3.0 GPA) in content courses needed for teacher certification in addition to the grade of

B or better in each EDEX, EDLT, EDUC and MTED courses throughout their time in the program. These requirements must be satisfied in order for Drexel to recommend the student for teacher certification upon graduation and/or be considered to have completed the program.

A benchmark to assist students in meeting the GPA and B grade requirements is the formal review of each student's content and pedagogy coursework at the end of the sophomore year. Students who meet these requirements, as well as pass the *Pre-service Academic Performance Assessment* (PAPA Reading, PAPA Writing, PAPA Mathematics) of the Pennsylvania Educator Certification Test (PECT) *Exams* according to Pennsylvania standards at that time, are officially accepted into Drexel's Teacher Preparation Program. Students who do not meet the requirements work with their academic advisor to develop a plan of action to work toward meeting the requirements, continue in the program to work toward the BS degree without being recommended for a teaching certificate, or explore another major.

Students participate in classroom observations and limited direct teaching experiences as a component of many of their pedagogy courses beginning in their freshman year. In the senior year, students who are officially accepted into the Teacher Preparation Program and maintain the 3.0 GPA and grade requirements, enroll and complete the 24-week, full-time, student-teaching experiences in their primary area of certification. Students must receive a grade of at least B in (and if applicable) and in all pedagogy (EDEX, EDLT, EDUC and MTED) coursework, as well as maintain an overall 3.0 GPA to be recommended for teacher certification.

Students who were not officially accepted into the Teacher Preparation Program and/or do not maintain the GPA and grade requirements but who are working towards the BS degree without being recommended for teacher certification take other courses as assigned by the Teacher Education Program Director and/or academic advisor to fulfill needed credits for the degree in lieu of student teaching.

Students pursuing the appropriate majors in the College of Arts and Sciences may also complete the requirements for certification within their area of study. For more information, contact the Program Coordinator for the School of Education at 215-895-6770.

Additional information is available at the School of Education's (<http://www.drexel.edu/soe>) web site.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*). Assistant Clinical Professor. Coaching development, measuring coaching quality, self-insight and reflective practices. Coaching leadership.

Valerie Klein, PhD (*Amherst College*). Assistant Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. thinking about school reform by drawing, Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (*Northwestern University*) Senior Associate Dean of Academic Affairs. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) Associate Dean of Teacher Education and Undergraduate Affairs. Associate Clinical Professor. Cross-cultural, language and academic development, school reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) Program Director, Applied Behavior Analysis and Special Education. Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

## Emeritus Faculty

Fredricka K. Reisman, PhD (*Syracuse University*) Director of the Torrance Center for Creativity and Innovation. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

## Teacher Education: Biology

*Major: Teacher Education*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 184.5*

*Co-op Options: One Co-op (Four years)*

*Classification of Instructional Programs (CIP) code: 13.1205*

*Standard Occupational Classification (SOC) code: 25-2031*

## About the Biology Concentration

*Certification is for grades 7- 12*

This certification option within the BS in Teacher Education (p. 430) emphasizes coursework in the biological sciences, including genetics, morphology and physiology, biochemistry, microbiology, and ecology. Students may also choose to pursue a second certification in chemistry and/or environmental education.

## Additional Information

For more information about the program, visit the School of Education (<http://www.drexel.edu/soe>) website.

## Degree Requirements

### Degree Requirements

CIVC 101	Introduction to Civic Engagement	1.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
HIST 289	History of Science: Enlightenment to Modernity	4.0
MATH 121	Calculus I	4.0
MATH 122	Calculus II	4.0
MATH 123	Calculus III	4.0
PHIL 251	Ethics	3.0
PSY 101	General Psychology I	3.0
PSY 320 [WI]	Educational Psychology	3.0
UNIV T101	The Drexel Experience	1.0

### Science Requirements

BIO 122	Cells and Genetics	4.5
BIO 124	Evolution & Organismal Diversity	4.5
BIO 126	Physiology and Ecology	4.5
BIO 201	Human Physiology I	4.0
BIO 215	Techniques in Cell Biology	3.0
BIO 218	Principles of Molecular Biology	4.0
BIO 220	Essential Microbiology	3.0
BIO 228	Evolutionary Biology & Human Health	3.0
BIO 270	Development Biology	3.0
BIO 271	Developmental Biology Laboratory	2.0

## Education Faculty

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) *Clinical Director and Research Fellow, A.J. Drexel Autism Institute*. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Associate Clinical Professor.

Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (*Indiana University*) *Associate Dean of Research*. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

Penny Hammrich, PhD (*University of Minnesota*) *Dean*. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Assistant Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) *Senior Vice Provost for Faculty Affairs*. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) *Associate Dean of Research*. Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*). Assistant Clinical Professor. Coaching development, measuring coaching quality, self-insight and reflective practices. Coaching leadership.

Valerie Klein, PhD (*Amherst College*). Assistant Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. thinking about school reform by drawing, Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (*Northwestern University*) *Senior Associate Dean of Academic Affairs*. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) Associate Dean of *Teacher Education and Undergraduate Affairs*. Associate Clinical Professor. Cross-cultural, language and academic development, school reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) Program Director, *Applied Behavior Analysis and Special Education*. Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

## Emeritus Faculty

Fredricka K. Reisman, PhD (*Syracuse University*) Director of the *Torrance Center for Creativity and Innovation*. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

## Teacher Education: Chemistry

*Major: Teacher Education*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 195.5*

*Co-op Options: One Co-op (Four years)*

*Classification of Instructional Programs (CIP) code: 13.1205*

*Standard Occupational Classification (SOC) code: 25-2031*

## About the Concentration

*Certification is for grades 7 - 12*

This certification option within the BS in Teacher Education (p. 430) emphasizes coursework in such areas as organic chemistry, physical chemistry, biochemistry, analytical chemistry, and inorganic chemistry. Students may also choose to pursue a second certification in biology.

PHIL 251	Ethics	3.0
English (ENGL) course between 200-239		3.0
Term Credits		16.0
Total Credit: 195.5		

## Education Faculty

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) *Clinical Director and Research Fellow, A.J. Drexel Autism Institute*. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (*Indiana University*) *Associate Dean of Research*. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

Penny Hammrich, PhD (*University of Minnesota*) *Dean*. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Assistant Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) *Senior Vice Provost for Faculty Affairs*. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) *Associate Dean of Research*. Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*). Assistant Clinical Professor. Coaching development, measuring coaching quality, self-insight and reflective practices. Coaching leadership.

Valerie Klein, PhD (*Amherst College*). Assistant Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. Thinking about school reform by drawing, Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (*Northwestern University*) *Senior Associate Dean of Academic Affairs*. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) *Associate Dean of Teacher Education and Undergraduate Affairs*. Associate Clinical Professor. Cross-cultural, language and academic development, school reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) *Program Director, Applied Behavior Analysis and Special Education*. Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

## Emeritus Faculty

Fredricka K. Reisman, PhD (*Syracuse University*) *Director of the Torrance Center for Creativity and Innovation*. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

## Teacher Education: Earth and Space Science

*Major: Teacher Education*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 186.5*

*Co-op Options: One Co-op (Four years)*

*Classification of Instructional Programs (CIP) code: 13.1205*

*Standard Occupational Classification (SOC) code: 25-2031*

## About the Concentration

*Certification is for grades 7 - 12*

This option within the BS in Teacher Education (p. 430) emphasizes interdisciplinary study, involving coursework in biology, chemistry, geology, physics and atmospheric science. Students may also choose to pursue a second certification in chemistry or physics.

## Additional Information

For more information about the program, visit the School of Education (<http://www.drexel.edu/soe>) website.

## Degree Requirements

### General Education Requirements

CIVC 101	Introduction to Civic Engagement	1.0
ECON 201	Principles of Microeconomics	4.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
MATH 121	Calculus I	4.0
MATH 122	Calculus II	4.0
MATH 123	Calculus III	4.0
PHIL 251	Ethics	3.0
PSY 101	General Psychology I	3.0
PSY 320 [WI]	Educational Psychology	3.0
UNIV T101	The Drexel Experience	1.0
English elective course between 200-329		3.0

### Science Requirements

BIO 122	Cells and Genetics	4.5
---------	--------------------	-----

BIO 124	Evolution & Organismal Diversity	4.5
BIO 126	Physiology and Ecology	4.5
CHEM 101	General Chemistry I	3.5
CHEM 102	General Chemistry II	4.5
ENVS 230	General Ecology	3.0
ENVS 260	Environmental Science and Society	3.0
ENVS 284	Physiological and Population Ecology	3.0
ENVS 285 [WI]	Population Ecology Laboratory	2.0
ENVS 286	Community and Ecosystem Ecology	3.0
ENVS 287	Community Ecology Laboratory	2.0
ENVS 330	Aquatic Ecology	3.0
ENVS 390	Marine Ecology	3.0
ENVS 441 [WI]	Issues in Global Change I: Seminar	2.0
GEO 101	Physical Geology	4.0
GEO 102	History of the Earth	4.0
PHEV 145	Weather I: Climate and Global Change	4.0
PHEV 146	Weather II: Analysis and Forecasting	4.0
PHYS 101	Fundamentals of Physics I	4.0
PHYS 102	Fundamentals of Physics II	4.0
PHYS 131	Survey of the Universe	3.0
<b>Pedagogy Requirements</b>		
EDEX 142	Special Education Foundations: Referral and Assessment	3.0
EDEX 344	Inclusionary Practices for Exceptional Students	3.0
EDEX 366	Literacy and Content Skill Development 7-12	3.0
EDLT 325	Design for Learning with Digital Media	3.0
EDUC 101	Foundations in Education I: A Historical and Philosophical Perspective	3.0
EDUC 105	Freshman Pedagogy Seminar (To be taken 3 times)	3.0
EDUC 113	Organizational Structure of Secondary Schools	3.0
EDUC 123	Adolescent Development	3.0
EDUC 205	Sophomore Pedagogy Seminar	1.0
EDUC 216	Diversity and Today's Teacher	3.0
EDUC 223	Teaching the Middle School Child	3.0
EDUC 258	Reading in the Content Areas	3.0
EDUC 305 [WI]	Junior Pedagogy Seminar	1.0
EDUC 308	Creating a Positive Classroom Climate	3.0
EDUC 312	Educational Policy, Law & Advocacy	3.0
EDUC 315	Secondary Science Teaching Methods	3.0
EDUC 316	Teaching in Urban Contexts	3.0
EDUC 322	Evaluation of Instruction	3.0
EDUC 324	Current Research in Curriculum & Instruction	3.0
EDUC 365	Foundations in Instructing English Language Learners	3.0
EDUC 405	Senior Pedagogy Seminar	1.0
<b>Student Teaching Experiences</b>		
EDUC 409	Student Teaching Seminar I	9.0
EDUC 410 [WI]	Student Teaching	9.0
Total Credits		186.5

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Earth and Space Science Concentration: Plan of Study

### 4 YR UG Co-op Concentration

Term 1		Credits
BIO 122	Cells and Genetics	4.5
EDUC 101	Foundations in Education I: A Historical and Philosophical Perspective	3.0
EDUC 105	Freshman Pedagogy Seminar	1.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
MATH 121	Calculus I	4.0
UNIV T101	The Drexel Experience	1.0
Term Credits		16.5
Term 2		Credits
BIO 124	Evolution & Organismal Diversity	4.5
CIVC 101	Introduction to Civic Engagement	1.0
EDUC 105	Freshman Pedagogy Seminar	1.0
EDUC 113	Organizational Structure of Secondary Schools	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0

Total Credit: 186.5

## Education Faculty

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) *Clinical Director and Research Fellow, A.J. Drexel Autism Institute*. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (*Indiana University*) *Associate Dean of Research*. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

Penny Hammrich, PhD (*University of Minnesota*) *Dean*. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Assistant Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) *Senior Vice Provost for Faculty Affairs*. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) Associate Dean of Research. Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*). Assistant Clinical Professor. Coaching development, measuring coaching quality, self-insight and reflective practices. Coaching leadership.

Valerie Klein, PhD (*Amherst College*). Assistant Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. thinking about school reform by drawing, Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (*Northwestern University*) Senior Associate Dean of Academic Affairs. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) Associate Dean of Teacher Education and Undergraduate Affairs. Associate Clinical Professor. Cross-cultural, language and academic development, school reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) Program Director, Applied Behavior Analysis and Special Education. Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

## Emeritus Faculty

Fredricka K. Reisman, PhD (*Syracuse University*) Director of the Torrance Center for Creativity and Innovation. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

## Teacher Education: English

Major: Teacher Education

Degree Awarded: Bachelor of Science (BS)

*Calendar Type: Quarter*

*Total Credit Hours: 183.0*

*Co-op Options: One Co-op (Four years)*

*Classification of Instructional Programs (CIP) code: 13.1205*

*Standard Occupational Classification (SOC) code: 25-2031*

## About the Concentration

*Certification is for grades 7 - 12*

This certification option within the BS in Teacher Education (p. 430) emphasizes coursework in areas such as American and British Literature, young adult fiction, and techniques for effectively teaching reading and writing skills. Students may also choose to pursue a second certification in any of the other certification areas.

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

**English Concentration: Plan of Study****4 YR UG Co-op Concentration**

<b>Term 1</b>		<b>Credits</b>
EDUC 101	Foundations in Education I: A Historical and Philosophical Perspective	3.0
EDUC 105	Freshman Pedagogy Seminar	1.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
MATH 171	Introduction to Analysis A	3.0
PHYS 103 or CHEM 111	General Physics I General Chemistry I	4.0
UNIV T101	The Drexel Experience	1.0

**Education Faculty**

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) Clinical Director and Research Fellow, A.J. Drexel Autism Institute. Associate Professor. Identifying the variables that influence adult behavior change in

community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities.

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (*Indiana University*) *Associate Dean of Research*. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

Penny Hammrich, PhD (*University of Minnesota*) *Dean*. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Assistant Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) *Senior Vice Provost for Faculty Affairs*. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) *Associate Dean of Research*. Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*). Assistant Clinical Professor. Coaching development, measuring coaching quality, self-insight and reflective practices. Coaching leadership.

Valerie Klein, PhD (*Amherst College*). Assistant Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. Thinking about school reform by drawing, Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-

sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (*Northwestern University*) *Senior Associate Dean of Academic Affairs*. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) *Associate Dean of Teacher Education and Undergraduate Affairs*. Associate Clinical Professor. Cross-cultural, language and academic development, school reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) *Program Director, Applied Behavior Analysis and Special Education*. Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

## Emeritus Faculty

Fredricka K. Reisman, PhD (*Syracuse University*) *Director of the Torrance Center for Creativity and Innovation*. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

## Teacher Education: General Science

*Major: Teacher Education*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 181.0*

*Co-op Options:*

*Classification of Instructional Programs (CIP) code: 13.1205*  
*Standard Occupational Classification (SOC) code: 25-2031*

## About the Concentration

*Certification is for grades 7 - 12*

This certification option within the BS in Teacher Education (p. 430) is a well-rounded program incorporating biology, chemistry, mathematics, and physics. Students may also choose to pursue a second certification in any of the other certification areas. A sample plan of study is available.

## Additional Information

For more information about the program, visit the School of Education (<http://www.drexel.edu/soe>) website.

## Education Faculty

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) *Clinical Director and Research Fellow, A.J. Drexel Autism Institute*. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Associate Clinical Professor.

Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (*Indiana University*) *Associate Dean of Research*. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

Penny Hammrich, PhD (*University of Minnesota*) *Dean*. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Assistant Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) *Senior Vice Provost for Faculty Affairs*. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) *Associate Dean of Research*. Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*). Assistant Clinical Professor. Coaching development, measuring coaching quality, self-insight and reflective practices. Coaching leadership.

Valerie Klein, PhD (*Amherst College*). Assistant Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. thinking about school reform by drawing, Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (*Northwestern University*) *Senior Associate Dean of Academic Affairs*. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) *Associate Dean of Teacher Education and Undergraduate Affairs*. Associate Clinical Professor. Cross-cultural, language and academic development, school reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) *Program Director, Applied Behavior Analysis and Special Education*. Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

## Emeritus Faculty

Fredricka K. Reisman, PhD (*Syracuse University*) *Director of the Torrance Center for Creativity and Innovation*. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

## Teacher Education: Mathematics

*Major: Teacher Education*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 183.0*

*Co-op Options: One Co-op (Four years)*

*Classification of Instructional Programs (CIP) code: 13.1205*

*Standard Occupational Classification (SOC) code: 25-2031*

## About the Concentration

*Certification is for grades 7 - 12*

This certification option within the BS in Teacher Education (p. 430) emphasizes coursework in such areas of mathematics as calculus, linear algebra, differential equations, probability and statistics, techniques of mathematical proof, and discrete mathematics. Students may also choose to pursue a second certification in physics or one of the other sciences.

## Additional Information

For more information about the program, visit the School of Education (<http://www.drexel.edu/soe>) website.

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Education Faculty

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) *Clinical Director and Research Fellow, A.J. Drexel Autism Institute*. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (*Indiana University*) *Associate Dean of Research*. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

Penny Hammrich, PhD (*University of Minnesota*) *Dean*. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Assistant Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) *Senior Vice Provost for Faculty Affairs*. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) *Associate Dean of Research*. Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*). Assistant Clinical Professor. Coaching development, measuring coaching quality, self-insight and reflective practices. Coaching leadership.

Valerie Klein, PhD (*Amherst College*). Assistant Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. thinking about school reform by drawing. Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (*Northwestern University*) *Senior Associate Dean of Academic Affairs*. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) *Associate Dean of Teacher Education and Undergraduate Affairs*. Associate Clinical Professor. Cross-cultural, language and academic development, school reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) *Program Director, Applied Behavior Analysis and Special Education*. Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

## Emeritus Faculty

Fredricka K. Reisman, PhD (*Syracuse University*) *Director of the Torrance Center for Creativity and Innovation*. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

## Teacher Education: Physics

*Major: Teacher Education*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 190.0*

*Co-op Options: One Co-op (Four years)*

*Classification of Instructional Programs (CIP) code: 13.1205*

*Standard Occupational Classification (SOC) code: 25-2031*

## About the Concentration

*Certification is for grades 7- 12*

This certification option within the BS in Teacher Education (p. 430) emphasizes coursework in physics and atmospheric science, including such topics as classical mechanics, electromagnetic fields, quantum mechanics, and physics of high fidelity, and survey of the universe. Students may also choose to pursue a second certification in mathematics.

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) *Clinical Director and Research Fellow, A.J. Drexel Autism Institute*. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and

taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Arotis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (*Indiana University*) *Associate Dean of Research*. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

Penny Hammrich, PhD (*University of Minnesota*) *Dean*. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Assistant Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) *Senior Vice Provost for Faculty Affairs*. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) *Associate Dean of Research*. Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*). Assistant Clinical Professor. Coaching development, measuring coaching quality, self-insight and reflective practices. Coaching leadership.

Valerie Klein, PhD (*Amherst College*). Assistant Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. thinking about school reform by drawing, Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (*Northwestern University*) Senior Associate Dean of Academic Affairs. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) Associate Dean of Teacher Education and Undergraduate Affairs. Associate Clinical Professor. Cross-cultural, language and academic development, school reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) Program Director, Applied Behavior Analysis and Special Education. Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

## Emeritus Faculty

Fredricka K. Reisman, PhD (*Syracuse University*) Director of the Torrance Center for Creativity and Innovation. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

## Teacher Education: Social Studies

Major: Teacher Education

Degree Awarded: Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: 188.5

Co-op Options: One Co-op (Four years)

Classification of Instructional Programs (CIP) code: 13.1205

Standard Occupational Classification (SOC) code: 25-2031

## About the Concentration

Certification is for grades 7 - 12

This certification option within the BS in Teacher Education (p. 430) is designed to prepare students to teach social studies using appropriate

pedagogy strategies. Topics include history, geography, civics, economics and psychology.

## Additional Information

For more information about the program, visit the School of Education (<http://goodwin.drexel.edu/soe>) website.

## Degree Requirements

### General Education and Concentration Content Requirements

ANTH 101	Introduction to Cultural Diversity	3.0
ANTH 110	Human Past: Anthropology and Prehistoric Archeology	3.0
CIVC 101	Introduction to Civic Engagement	1.0
ECON 201	Principles of Microeconomics	4.0
ECON 202	Principles of Macroeconomics	4.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
ENGL 205 [WI]	American Literature I	3.0
Select two:		8.0
HIST 161	Themes in World Civilization I	
or HIST 162	Themes in World Civilization II	
or HIST 163	Themes in World Civilization III	
HIST 201	United States History to 1815	4.0
HIST 202	United States History, 1815-1900	4.0
HIST 203	United States History since 1900	4.0
HIST 212	Themes in African-American History	4.0
HIST 224	Women in American History	4.0

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Social Studies Concentration: Plan of Study

### 4 YR UG Co-op Concentration

Term 1		Credits
EDUC 101	Foundations in Education I: A Historical and Philosophical Perspective	3.0
EDUC 105	Freshman Pedagogy Seminar	1.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
HIST 161, 162, or 163	Themes in World Civilization I Themes in World Civilization II Themes in World Civilization III	4.0
MATH 171	Introduction to Analysis A	3.0

Total Credit: 187.5

## Education Faculty

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) *Clinical Director and Research Fellow, A.J. Drexel Autism Institute*. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*). Associate Professor. Mentoring and leader development, workplace incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Associate Clinical Professor.

Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (*Indiana University*) *Associate Dean of Research*. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

Penny Hammrich, PhD (*University of Minnesota*) *Dean*. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Assistant Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) *Senior Vice Provost for Faculty Affairs*. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) *Associate Dean of Research*. Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*). Assistant Clinical Professor. Coaching development, measuring coaching quality, self-insight and reflective practices. Coaching leadership.

Valerie Klein, PhD (*Amherst College*). Assistant Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. thinking about school reform by drawing, Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (*Northwestern University*) *Senior Associate Dean of Academic Affairs*. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) *Associate Dean of Teacher Education and Undergraduate Affairs*. Associate Clinical Professor. Cross-cultural, language and academic development, school reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) *Program Director, Applied Behavior Analysis and Special Education*. Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

## Emeritus Faculty

Fredricka K. Reisman, PhD (*Syracuse University*) *Director of the Torrance Center for Creativity and Innovation*. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

## Minor in Education

### About the Minor

The minor in education provides a structured academic opportunity for students who wish to add a fundamental understanding of the field of education as well as practical knowledge in the art and science of teaching and learning to their undergraduate experience.

Designed for students with a strong interest in education and training, the minor will not necessarily lead to the student being recommended for a state teaching certificate. However, should a student decide to also pursue a teaching certificate as a component of his or her major—or in post-baccalaureate work—the courses required for the minor are applicable to Pennsylvania State certification.

### Program Requirements

Required Courses		
EDEX 142	Special Education Foundations: Referral and Assessment	3.0
EDEX 246 [WI]	Literacy and Content Skill Development PreK-8	3.0
EDUC 101	Foundations in Education I: A Historical and Philosophical Perspective	3.0
	or EDUC 316 Teaching in Urban Contexts	
EDUC 120	Child Development I: Typical Development	3.0
	or EDUC 123 Adolescent Development	
	or EDUC 223 Teaching the Middle School Child	
EDUC 216	Diversity and Today's Teacher	3.0
EDUC 322	Evaluation of Instruction	3.0
EDUC 324	Current Research in Curriculum & Instruction	3.0
	or EDUC 365 Foundations in Instructing English Language Learners	
EDUC 325	Multimedia in Instructional Design	3.0
	or EDUC 308 Creating a Positive Classroom Climate	
Total Credits		24.0

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Sport Coaching Leadership

### About the Minor

The minor in Sport Coaching Leadership (SCL), open to all undergraduate students across the University, provides the foundation for the effective coaching and managing of athletes at various levels. The minor is complementary to a variety of degree programs.

Upon completion of the minor, students will have developed the ability to communicate and motivate athletes, enhance the social and emotional growth of athletes, develop sound physical training programs, use sport skills effectively, inform athletes about the principles of good nutrition, reduce injuries by managing roles better, effectively deal with equipment, facilities, scheduling and team logistics and understand the administrative facets of coaching.

### Program Requirements

#### Required Core Courses

SCL 101	Principles of Coaching	3.0
SCL 102	Principles of Coaching II	3.0
SCL 203	Sports Conditioning	3.0
SCL 210	Prevention and Care of Athletic Injuries	3.0
SCL 495	Coaching Practicum I	3.0
or SCL 496	Coaching Practicum II	

#### SCL Minor Electives

Select 9 credits from the following		9.0
PSY 245 [WI]	Sports Psychology	
SCL 201	Sport-Based Youth Development	
SCL 280	Kinesiology	
SCL 314	Sport Performance and Energy Systems	
SCL 315	Athletic Recruiting	
SCL 325	Athlete Leadership Development	
SCL 345	Evaluating Athletes and Teams	
SCL 401	Professional Coaching Portfolio	
SCL 419	Global Coaching Seminar	

SMT 152	Leadership in Sports & Society	
Total Credits		24.0

## Writing-Intensive Course Requirements

## Minor in STEM Education

### About the Minor

This minor can be coupled with a variety of STEM majors. It will provide an opportunity to explore STEM Education and to develop core knowledge and practices in secondary STEM Education. Successful STEM Education minor students may build upon the minor's course work which leads to recommendation for PA teaching certification as a secondary teacher (grades 7-12) in one or more STEM content areas. Additional course work for teacher certification includes Student Teaching and required Special Education and English Language Learner courses (an additional 2 courses + student teaching).

### Program Requirements

#### Introductory Courses

ESTM 201	DragonsTeach: Step 1	1.5
ESTM 210	DragonsTeach: Step 2	1.5

#### STEM Education Core Courses

ESTM 301	Knowing and Learning in Mathematics and Science	3.0
ESTM 302	Classroom Interactions	3.0
ESTM 350	Project-Based Instruction	4.0

#### History of Science or Mathematics Course \*

ESTM 362	Perspectives in Science and Mathematics Education	3.0
or MTED 428	Cultural and Historical Significance of Mathematics	
or HIST 285	Technology in Historical Perspective	

#### STEM Research Methods \*\*

ESTM 364	Methods of Research and Inquiry in Science and Mathematics	3.0
----------	--	-----

#### Special Education or English Language Learner Elective

EDEX 142	Special Education Foundations: Referral and Assessment	3.0
or EDEX 244	Inclusionary Practices for Exceptional Students	
or EDUC 365	Foundations in Instructing English Language Learners	

<b>STEM Education Elective (selected in consultation with a School of Education academic advisor)</b>	3.0
Total Credits	25.0

\* Specific course selected in consultation with a School of Education academic advisor and is dependent on student's aspirations for teacher certification.

\*\* A Research/Methods/Design course from a student's home department may be substituted in consultation with a School of Education academic advisor.

NOTE: If pursuing PA teaching certification requirements beyond the STEM Minor, all three Special Education or English Language Learner Elective courses listed above must be taken as well as ESTM 410. In addition, students specifically pursuing secondary level Mathematics PA Teacher Certification must also complete ESTM T380: Functions and Modeling.

## Certificate in Creativity and Innovation

*Certificate Level: Undergraduate*

*Admission Requirements: High school diploma*

*Certificate Type: Certificate*

*Number of Credits to Completion: 18.0*

*Instructional Delivery: Campus*

*Calendar Type: Quarter*

*Expected Time to Completion: 2 years*

*Financial Aid Eligibility: Not aid eligible*

*Classification of Instructional Program (CIP) Code: 30.9999*

*Standard Occupational Classification (SOC) Code: 11-9199*

### About the Program

The undergraduate certificate in Creativity and Innovation seeks to produce individuals who are equipped with the fundamental creative problem solving competencies that are indicative of creative leaders. The certificate is designed to provide knowledge of the major creativity theories, to enhance a student's latent creative strengths, to foster ability to apply creativity in the workplace, and to present methods for assessing creative strengths.

Students have the option of completing this undergraduate certificate as a stand-alone professional development credential or as a concentration within their baccalaureate degree.

### Program Requirements

#### Requirements

##### Core Courses

CRTV 301	Foundations in Creativity	3.0
CRTV 302	Tools and Techniques in Creativity	3.0
CRTV 303	Creativity in the Workplace	3.0

##### Electives

Select three of the following:		9.0
EDLT 101	Learning, Culture & Technology Workshop I	
EDLT 238	New Media Literacies	
EDLT 353	Play and Learning in Participatory Cultures	
PRST 450	Creative Leadership for Professionals	
WRIT 220 [WI]	Creative Nonfiction Writing	
WRIT 225 [WI]	Creative Writing	

Total Credits	18.0

# The Antoinette Westphal College of Media Arts & Design

---

*The Antoinette Westphal College of Media Arts & Design curricula include general studies in liberal arts and science, and experiential learning in studio, lab, and classroom settings within the disciplines.*

## Mission Statement

The Antoinette Westphal College of Media Arts & Design (<http://www.drexel.edu/westphal>) (The Westphal College) is a community of learning in the areas of media, design, fine arts, performing arts, and the management of creative enterprise that values experiential and immersive education. Students are encouraged to give form to ideas by learning to recognize invention and innovation in a rapidly changing world through creative, critical, and collaborative approaches. The Westphal College's diverse programs seek to foster innovation and leadership in progressively interconnected disciplines and areas of study.

The academic programs are rigorous, and provide the appropriate balance of a solid foundation with individual creative direction, cultural awareness, strong technical skills, and an understanding of management and professional practice. The College is committed to continual review of curricula, processes and outcomes to make those improvements and refinements necessary to further enrich our students' education, and to continue to foster independent thinkers, astute leaders, and creative problem solvers.

## Majors

- Animation & Visual Effects (BS) (p. 465)
- Architecture (BArch) (p. 467)
- Art History (BA, BS) (p. 474)
- Dance (BS) (p. 478)
- Design & Merchandising (BS) (p. 481)
- Entertainment (p. 486) & (p. 486) Arts Management (BS) (p. 486)
- Fashion Design (BS) (p. 496)
- **NEW:** Film & Television (BS)
- Game Design & Production (BS) (p. 503)
- Graphic Design (BS) (p. 506)
- Interactive Digital Media (BS) (p. 509)
- Interior Design (BS) (p. 512)
- Music Industry (BS) (p. )
- Photography (BS) (p. 520)
- Product Design (BS) (p. 523)
- Screenwriting & Playwriting (BS) (p. 525)
- **NEW:** Virtual Reality & Immersive Media (BS)
- Westphal Studies Program (BS) (p. 532)

## Accelerated Degrees

- **NEW:** Digital Media BS/MS
- Design and Merchandising BS/MBA (p. 485)

- Entertainment & Arts Management BS/MBA (p. 495)
- Music Industry BS/MBA (p. 518)

## Minors

- Animation & Visual Effects (p. 535)
- Architecture (p. 535)
- Art History (p. 536)
- Dance (p. 537)
- Digital Media (p. 537)
- Entertainment & Arts Management (p. 537)
- Film Studies (p. 538)
- Fine Arts (p. 538)
- **NEW:** Graphic Design
- Interactive Digital Media (p. 539)
- Interdisciplinary Smart Initiatives (p. 540)
- Jazz and African-American Music (p. 541)
- Music (p. 541)
- Music Performance (p. 541)
- Music Theory and Composition (p. 541)
- Performing Arts (p. 541)
- Photography (p. 542)
- **NEW:** Playwriting
- Product Design (p. 542)
- Retail (p. 543)
- Screenwriting (p. 543)
- Somatics (p. 544)
- Sports Media Production (p. 544)
- Sustainability in the Built Environment (p. 544)
- Television Industry and Enterprise (p. 545)
- TV Production & Media Management (p. 546)
- Theatre (p. 546)
- Video Production (p. 547)
- **NEW:** Virtual Reality & Immersive Media

## Certificates

- Dance Studies (p. 548)

## Undergraduate Co-operative Education

Westphal College students spend a minimum of six months (two terms) applying classroom and studio skills in positions within their chosen professions. Often referred to as "The Ultimate Internship," a co-op is a valuable, direct way to learn about a career, work with other professionals, and gain skills and experience that set Drexel graduates apart from students who complete their professional education in more traditional academic settings.

Visit the Drexel Steinbright Career Development Center (<http://www.drexel.edu/scdc>) page for more detailed information on co-op and post-graduate opportunities.

## Special Programs

*The Westphal College offers a number of special programs including Study Abroad, Accelerated Dual Degree, Accelerated Summer Courses, Enrichment Programs and Dance for Professionals.*

## Study Abroad

Many students in the College participate in study abroad ranging from ten days to two terms. Some of the more popular programs are in: Australia, Rome, France, Korea, Germany, Prague, Japan and Cuba as well as Drexel in London and Fashion in London. Students interested in study abroad should consult with their Program Director, Academic Advisor and the Study Abroad Office, 215-895-1704.

## Enrichment Programs

The Department of Architecture & Interiors runs summer study tours abroad to Rome and Paris as elective course offerings in history and theory. These programs focus the travel portion into three-week periods to accommodate student work commitments. The Department of Cinema & Television offers a summer term Westphal in Los Angeles program for Film & Television, Screenwriting & Playwriting and other Westphal majors. The Entertainment & Arts Management program offers a Study Abroad program at the Edinburgh Fringe Festival in Scotland.

## Accelerated Dual Degree Programs

Dual degree programs enable academically qualified students to earn both a bachelor's and an advanced degree in five years.

The following Accelerated Degree Programs are available to qualified High School students entering their freshman year in the Westphal College:

- **BS Music Industry/MBA:** This program offers the highly motivated and musically focused student an opportunity to combine music theory and technology with the MBA degree. The program is available to qualified Music Industry majors.
- **BS Entertainment & Arts Management/MBA:** This program allows high-achieving students preparing for leadership roles in media companies and arts organizations the opportunity to earn their MBA degree. The program is available to qualified Entertainment & Arts management majors.
- **BS in Design & Merchandising/MBA:** This program combines study in the area of fashion retail merchandising with the MBA degree. The program is available to qualified Design and Merchandising majors.

The following Accelerated Degree Programs are available to qualified matriculated students in the Westphal College:

- **BS/MS in Digital Media Programs:** This program allows highly motivated students to complete both the BS (Animation & Visual Effects, Game Design & Production, Interactive Digital Media) and MS degrees in Digital Media programs in five years.
- **BS Interior Design/MS in Interior Architecture & Design:** This program combines the Interior Design undergraduate and the graduate Interior Architecture & Design degrees in an intensive five-year program that provides an opportunity for the student to focus on an area of specialization.
- **BS Dance/MS in Elementary Education:** This career focus, dance in education, prepares students for jobs as elementary school teachers (grades Pre-Kindergarten through 4) who may also serve as school dance specialists. Students choosing this option will earn a BS degree in Dance through the Department of Performing Arts and may elect to continue for a fifth year of study to earn an MS in the Teaching, Learning and Curriculum-Teacher Certification through the School of Education.
- **BS Entertainment & Arts Management/MS in Arts Administration & Museum Leadership:** While not an accelerated program, students

who complete the EAM program may also choose to pursue a graduate degree at Drexel in Arts Administration & Museum Leadership. Students who apply for the graduate Arts Administration & Museum Leadership program and graduate with a 3.5 GPA in the last two years of the EAM degree program are automatically accepted into the program.

## Accelerated Summer Courses

With departmental permission, students may enroll in Visual Studies accelerated courses over the summer. These typically include courses in Accelerated Design I, II, III, Introductory Drawing and Figure Drawing I. These courses primarily are offered so that new undergraduate transfer students and pre-graduate students can complete their future programs in an economical time frame. Students with some experience in studio coursework may be eligible to take accelerated courses. A portfolio review is required to determine eligibility.

## Dance Part Time Professionals

The Part Time Professional Option of the Dance Major is designed for professional dancers interested in pursuing a BS degree in Dance while continuing their performance careers, or at the conclusion of their performing careers. This program grants "professional life experience" credits and an extended period of time to fulfill the remaining required courses.

## Ensembles

### Choral Ensembles

*University Chorus* (MUSC 101/001) Dr. Steven Powell, Director  
As auditioned, 60-voice group which performs concert choir literature, both a cappella and with instrumental accompaniment.

*Chamber Singers* (MUSC 102/001) Dr. Steven Powell, Director  
A select group of 18 singers chosen by audition from the University Chorus. They perform secular music from the Renaissance period (Madrigals).

*Vocal Jazz Ensemble* (MUSC 103/001) Dr. Steven Powell, Director  
A select group of 16 singers chosen by audition from the University Chorus. They perform "anything that swings," doing a variety of pieces from the 20's to the 10's with a three-piece back-up band.

*All College Choir* (MUSC 104/001) Scott Bacon, Director  
A large un-auditioned choir that performs a varied repertoire including light classics, spirituals, and popular music.

*Gospel Choir* (MUSC 115/001) Rev. Greg Ross, Director  
The Gospel Choir is a group of approximately 60 singers that is open to all Drexel Students. This ensemble performs contemporary gospel music with its own backup band.

### Instrumental Ensembles

*Concert Band* (MUSC 105/001) Dr. Wesley Broadnax, Director  
Students who are proficient on woodwind, brass, or percussion instruments may become members of this large instrumental ensemble by auditioning for the director. Membership is based on the student's ability and the instrumental needs of the ensemble.

*The Basketball Pep Band* (MUSC 116/001) Dr. Wesley Broadnax, Director  
This band is made up of brass players, saxophone players, and trap drummers drawn from the membership of the Concert Band.

*Jazz Orchestra* (MUSC 107/001) Dr. George Starks, Director  
Performs music which is associated with and/or inspired by acknowledged masters of the jazz tradition such as Duke Ellington, Count Basie, Charlie Parker, Dizzy Gillespie, Miles Davis, Charles Mingus, Thad Jones, and others.

*The Jazztet* (MUSC 108/001) Dr. George Starks, Director  
This ensemble performs small group masterpieces such as literature associated with Art Blakey, Horace Silver, Clifford Brown, John Coltrane, and others.

*University Orchestra* (MUSC 109/001)  
This is a full orchestra that performs concert repertoire of various periods from the 18th century to the present day. Wind, brass, and percussionists must be in the Concert Band in order to participate.

*Fusion Band* (MUSC 112/001) Lynn Riley, Director  
A small combo utilizing a rhythm section and any varying combination of saxes and brass. The repertoire includes music of the styles of jazz, Latin, funk, and rock.

*Percussion Ensemble* (MUSC 113/001) Mark Beecher, Director  
Students in this group will have the opportunity to play, improve and perform on many instruments of the percussion family including: snare drum, bass drum, xylophone, marimba, timpani- and even hands and feet.

*Mediterranean Ensemble* (MUSC 114/001) Bruce Kaminsky, Director  
Students perform traditional music from Southeastern Europe, the Middle East and Northern Africa. All traditional and Western instruments are welcomed including oud, bouzouki and saz along with guitar, violin and sax. Percussionists can play Drexel's wide assortment of traditional drums including doumbek, riq and djimbe. Students will have the opportunity to perform 7/8 and 9/8 rhythms from Greece, 10/8 rhythms from Turkey, learn songs in Greek, Turkish, Arabic and Hebrew. The ensemble also has a dance component.

*Guitar Ensemble II* (MUSC 106/002) Greg Wright, Director  
An auditioned group of approximately ten guitarists plus bass players and a drummer. Repertoire includes a side range of styles utilizing music reading ability and improvisation skills

*Guitar Ensemble I* (MUSC 106/001) Greg Wright, Director  
An un-auditioned group of ten to fifteen guitarists who use repertoire to sharpen their musical and technical skills.

*Keyboard Ensemble* (MUSC 110) Wanda Canfield, Director  
A group of twelve keyboardists who utilize acoustic and electronic pianos to play a variety of repertoire.

*Rock Ensemble* (MUSC 117) Lynn Riley, Director  
A small combo of vocalists, guitarists, bassists, keyboardist, and drummers who perform repertoire ranging from classic rock to alternative.

## Drexel University Dance Program

Dr. Miriam Giguere, Director, Dance Ensemble (DANC 131)  
Elegant, exciting, sophisticated, sleek are all words commonly used to describe the Drexel Dance Ensemble. Performing ballet, jazz, tap and modern dance, the Drexel Dancers are both versatile and original.

*The Drexel Dance Ensemble* (DANC 131)  
A professional caliber dance company presenting two fully-produced concerts in the Mandell Theater each year. Students participating in the 60 member ensemble are given the opportunity to explore their

artistry through working with professional choreographers, both faculty and guests artists, as well as a selection of student choreographers. The diversity of choreographic talent promises a show with dimension and unique perspectives on contemporary and classical dance forms. Entrance into this company is open to any dancers beyond their freshman year by audition twice yearly.

*The FreshDance Ensemble* (DANC 131 )  
Dance company open exclusively to freshmen at Drexel. The 30 dancers in the ensemble perform two fully produced concerts at the Mandell Theater each year. Works by both professional and student choreographers are performed in a variety of genres including ballet, modern, jazz and hip-hop. Entrance into the company is open twice yearly by audition.

*The Youth Performance Exchange Touring Ensemble* (DANC 131)  
This 8-10 member dance troupe performs assembly style lecture demonstration programs introducing student K-8 to the art of dance. Students learn the program each fall and perform for 15-20 elementary and middle school each Friday morning in winter and spring terms. Open by audition each fall term.

## Drexel University Theatre Program

Mr. Nick Anselmo, Director of Theatre Programs

*Introduction to Theater Production Practicum* (THTR 130)  
An introduction to the tools, basic skills and safety procedures that students must know in order to work on Theater Program shows.

*Theatre Performance Practicum* (THTR 131)  
Students perform in Mainstage productions in the URBAN Annex Black Box Theater or the Mandell Theater. An audition is required to participate in this ensemble.

*Theatre Production Practicum* (THTR 132)  
Students serve as the stage crew for all theatrical productions at the URBAN Annex Black Box Theater or the Mandell Theater and build all the sets, costumes, hang lights and run sound for all the shows.

*Theatre Management Practicum* (THTR 133)  
Students work as stage managers, production managers, and in administrative positions of Drexel's Co-op Theater Company.

*Open Mic Management Practicum* (THTR 134)  
Students manage and run all aspects of The Late Night Series, a free weekly open mic that strives to both champion and nurture performing artists with Philadelphia and the Drexel community.

*Theatre Performance Ensemble* (THTR 141)  
The Theatre Performance Ensemble focuses on a specific area of performance training, creation, and research to supplement the standard theatre curriculum in performance.

*Director's Lab Practicum* (THTR 142)  
Practical experience in acting for the stage through participation in a student directed one-act play in conjunction with the Play Directing Class. An audition is required to participate in this ensemble.

*Musical Theatre Cabaret* (THTR 143)  
Practical experience preparing a song for performance with an emphasis on applying acting techniques to the delivery, it concludes with a public Cabaret performance.

*New Works Festival Performance Practicum* (THTR 144)

Practical experience in acting and dramaturgy for the stage through participation, development, and performance of student written plays in conjunction with the Page-to-Stage class.

Students participate in all aspects of theatre performance and production, including; acting, directing, design, costumes, lighting, sets, sound, publicity, and box office.

## Facilities

Designed to be an incubator for tomorrow's creative leaders, The URBN Center is the award-winning home for many of the programs in the Antoinette Westphal College of Media Arts & Design, providing students with rigorous, studio intensive instruction and the latest technological resources. Majors that share this space include Animation & Visual Effects, Architecture, Design & Merchandising, Entertainment & Arts Management, Fashion Design, Game Design & Production, Graphic Design, Interactive Digital Media, Interior Design, Music Industry and Product Design.

The URBN Center also provides a black box theater (<http://drexel.edu/performingarts/about/facilities/URBN-center-black-box-theater>) for our performing arts, a 3,500 square foot Leonard Pearlstein Gallery (<http://www.drexel.edu/pearlsteingallery>), a Motion Capture studio, a Hybrid Making Lab ([http://drexel.edu/westphal/about/overview/making\\_spaces/HybridMakingLab](http://drexel.edu/westphal/about/overview/making_spaces/HybridMakingLab)) featuring Universal Laser Cutters and 3D printing and prototyping, Shima Seki high-tech knitting machines, the Robert and Penny Fox (<http://www.drexel.edu/foxcollection>) Historic Costume Collection (<http://www.drexel.edu/foxcollection>), the Charles Evans Fashion Design Library, a multi-use screening & lecture room, and offices for the College's administrative functions.

The Academic Building is home to our Photography major and Department of Art & Art History. Within this facility, the Westphal College occupies a 10,000- square-foot photography lab, lighting studios, digital imaging labs ([http://drexel.edu/westphal/about/overview/making\\_spaces/DarkroomFacility](http://drexel.edu/westphal/about/overview/making_spaces/DarkroomFacility)), as well as six lecture/ laboratory spaces for our Visual Studies courses.

In University Crossings, a 25,000 square foot space houses offices for Film & Video, Screenwriting & Playwriting and Television faculty. Also in this building are two state-of-the-art digital editing facilities, a shooting studio with special effects capability, two screening rooms, a digital audio post production studio, several multi-media classrooms, and a well-stocked equipment room, featuring state of the art cameras ARRIFLEX (Arri) Alexa XT Plus and the Amira Premiere 4K.

MacAlister Hall serves students in the Westphal College with: digital audio labs and recording studios for Music Industry; The Mandell Theater (<http://www.drexel.edu/performingarts/about/facilities/mandell-theater>), a 420-seat proscenium theater with scene shop and dressing rooms; the Ellen Forman Memorial Dance Studio (<http://drexel.edu/performingarts/about/facilities/ellen-forman-dance-studio>); and a high-definition studio space for our college-operated television station, DUTV, which reaches over 400,000 households.

The Music Industry program has a state-of-the-art recording studio and other music production facilities in One Drexel Plaza. These newly opened facilities were designed by noted acoustician Walter Storyk. Additionally, the Music Industry program has six recording studios located in University Crossings and MacAlister Hall.

## Animation and Visual Effects

*Major: Animation and Visual Effects*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 186.0*

*Co-op Options: One Co-op (Four years)*

*Classification of Instructional Programs (CIP) code: 10.0304*

*Standard Occupational Classification (SOC) code: 27-1014*

## About the Program

The Animation & Visual Effects major provides students with the artistic, technological, story-telling and design skills to succeed as animators and visual effects artists in the highly competitive entertainment, design and communications industries.

Animation and Visual Effects has grown beyond its traditional applications in entertainment, such as feature films, television and internet based programming. Today, these production techniques are widely used in feature films, medical research, engineering, virtual reality and augmented reality systems, immersive media, web content, the performing arts, interactive game systems, corporate communications and higher education. The depth and complexity of this field necessitates a rigorous course of study.

To best prepare students for the demands of careers in these cutting-edge disciplines, this program provides a foundational understanding of design and technology, with core courses in multiple aspects of digital media, completing a six month co-op and delving into rigorous coursework covering specialized aspects of digital animation, visual effects and immersive media. Students will learn the underlying principles of animation, along with advanced, industry-standard software and hardware technologies. The entire creative pipeline from storyboarding through modeling and animation is covered in depth, allowing students to experience all aspects of production.

## Additional Information

To find out more about this major, visit the Westphal College's Animation & Visual Effects Major (<http://www.drexel.edu/westphal/academics/undergraduate/ANIM>) web page.

## Degree Requirements

### General Education Requirements

COM 230	Techniques of Speaking	3.0
CIVC 101	Introduction to Civic Engagement	1.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
MATH 101	Introduction to Analysis I	4.0
PHYS 121	Physical Science for Design I	4.0
PHYS 122	Physical Science for Design II	4.0
UNIV A101	The Drexel Experience	2.0
Required Arts and Humanities-students elect a minimum of 9 credits		9.0
Required Social Science-students elect a minimum of 9.0 credits		9.0
Free electives		24.0

### Art and Art History Requirements

ARTH 102	History of Art II: Renaissance to Romanticism	3.0
ARTH 103	History of Art III: Modern Art	3.0
ARTH 300 [WI]	History of Modern Design	3.0
VSST 108	Design I for Media	3.0

VSST 109	Design II for Media	3.0
VSST 110	Introductory Drawing	3.0
VSST 111	Figure Drawing I	3.0
VSST 210	Painting Basics	3.0
<b>Media and Computer Science Requirements</b>		
ANIM 231	Scripting for Animation and Visual Effects	3.0
CS 171	Computer Programming I	3.0
FMVD 206	Audio Production and Post	3.0
SCRIP 270 [WI]	Screenwriting I	3.0
<b>Digital Media Core Requirements</b>		
ANIM 140	Computer Graphics Imagery I	3.0
ANIM 141	Computer Graphics Imagery II	3.0
ANIM 211	Animation I	3.0
DIGM 105	Overview of Digital Media	3.0
DIGM 223	Creative Concept Design	3.0
DIGM 350 [WI]	Digital Storytelling	3.0
DIGM 451 [WI]	Explorations in New Media	3.0
DIGM 475 [WI]	Seminar: The Future of Digital Media	3.0
DIGM 490	Digital Media Senior Project	9.0
DIGM 491	Digital Media Senior Project Studio	3.0
GMAP 260	Overview of Computer Gaming	3.0
IDM 100	Introduction to Web Development	3.0
<b>Animation Requirements</b>		
ANIM 100	Foundational Tools for Animation & VFX	3.0
ANIM 110	Digital Imaging for Animation & VFX	3.0
ANIM 212	Animation II	3.0
ANIM 215	History of Animation	3.0
ANIM 220	Digital Compositing I	3.0
ANIM 221	Digital Compositing II	3.0
ANIM 247	Organic Modeling I	3.0
ANIM 250	Professional Practices for Animation & VFX	3.0
ANIM 314	Character Animation I	3.0
<b>Animation Electives</b>		
Select four of the following:		12.0
ANIM 248	Advanced Lighting	
ANIM 315	Character Animation II	
ANIM 347	Organic Modeling II	
ANIM 388	Spatial Data Capture	
ANIM 410	Advanced Compositing	
ANIM 411	Advanced Animation	
ANIM T180	Special Topics in Animation	
ANIM T280	Special Topics in Animation	
ANIM T380	Special Topics in Animation	
ANIM T480	Special Topics in Animation	
DIGM 355	Overview of Immersive Media	
DIGM 359	Immersive Media Production & Post	
GMAP 345	Game Development Foundations	
GMAP 367	Character Animation for Gaming	
Total Credits		186.0

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Sample Plan of Study

Term 1		Credits
ANIM 100	Foundational Tools for Animation & VFX	3.0
DIGM 105	Overview of Digital Media	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
PHYS 121	Physical Science for Design I	4.0
UNIV A101	The Drexel Experience	1.0
VSST 110	Introductory Drawing	3.0
Term Credits		17.0
<b>Term 2</b>		
ANIM 110	Digital Imaging for Animation & VFX	3.0
ANIM 140	Computer Graphics Imagery I	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0

Term Credits		16.0

Total Credit: 186.0

\* See degree requirements (p. 465).

## Dual/Accelerated Degrees

The accelerated degree program enables academically qualified students to earn both their bachelor's degree and a master's degree in digital media — graduating sooner than they would in traditional programs.

Current Drexel animation and visual effects students may apply for the accelerated BS/MS degree through the Graduate College of Drexel University after completing 90.0 credits, but no more than 120.0 credits. Contact the Graduate College of Drexel University (<http://www.drexel.edu/graduatecollege>) for further information.

## Facilities

This major is based in the Westphal College's Digital Media Department, located in the Westphal College's URBN Center.

The central creative space for the department is the Animation Capture & Effects Lab (ACE-Lab), featuring a 1200-sq-ft open studio space dedicated to digital media production. The studio features include a 25-foot-by-17-foot green screen cyclorama, studio lighting and modifiers, HD/2k/4k camera systems, camera dolly, Vicon Vantage motion capture system, stereo-360 "VR Video" capture systems, room-scale VR tracking systems, and a full 360° Immersive Projection Dome among other resources.

Additional spaces surrounding the main studio include screening rooms, classrooms and computer labs featuring advanced graphics work stations, VR labs, research labs, meeting rooms and faculty offices.

## Animation and Visual Effects Faculty

Paul Diefenbach, PhD (*University of Pennsylvania*). Associate Professor. Game development, real-time rendering.

Nick Jushchyshyn, MFA (*Academy of Art University*) Program Director, VR & Immersive Media. Associate Professor. Visual effects, digital media and animation.

Frank J. Lee, PhD (*Carnegie Mellon University*). Professor. Human-computer interaction; cognitive engineering and science; intelligent software agents for games and education.

Robert Lloyd, MFA (*Temple University*) Program Director, Game Design & Production. Assistant Teaching Professor. Game development, themed entertainment and motion simulation.

David Mauriello, BA (*Lafayette College*). Assistant Professor. 3D modeling and animation.

Glen Muschio, PhD (*Temple University*). Associate Professor. Digital media, society, communication.

Stefan Rank, PhD (*Vienna University of Technology*). Associate Professor. Artificial intelligence, game design and human-computer interaction.

Jervis Thompson, BS (*Drexel University*). Teaching Professor. Digital media, interactive multimedia.

Michael Wagner, PhD (*Vienna University of Technology*) Program Director, Digital Media. Associate Professor. Educational use of digital media and computer games.

Jichen Zhu, PhD (*Georgia Institute of Technology*). Associate Professor. Developing humanistic and interpretive framework of computational technology, particularly artificial intelligence (AI), and constructing AI-based cultural artifacts; interactive storytelling, games and software studies.

## Emeritus Faculty

Theo Artz, BFA (*Tyler School of Art, Temple University*). Associate Professor. Digital media.

## Architecture

Major: Architecture

Degree Awarded: Bachelor of Architecture Degree (BArch)

Calendar Type: Quarter

Total Credit Hours: 227.0

Classification of Instructional Programs (CIP) code: 04.0201

Standard Occupational Classification (SOC) code: 17-1011

## About the Program

The practice of architecture requires a unique skill set—creative thinking and aesthetic sensitivity balanced with technical knowledge, cultural understanding, and social responsibility. Critical thinking and communication skills are needed. Drexel's Bachelor of Architecture program encompasses foundation courses in the applied and social sciences, the humanities, and a wide range of professional architecture courses to prepare students for careers in architecture and related fields. At the heart of the curriculum are the design studios where students are challenged to apply their knowledge acquired from the above disciplines to consequential design problems.

Drexel's work/study program is an experiential-based learning model that complements and provides an alternative to traditional full-time academic architecture programs. The Drexel model provides a practical, high-quality education to those students who seek early exposure to daily architectural practice as well as an affordable alternative to students who could not otherwise be able to enter the profession.

At Drexel there are two paths to an accredited Bachelor of Architecture degree, serving two distinct populations: the 2+4 option and the part-time evening option.

The Architecture Program's advising guidelines (<http://www.drexel.edu/westphal/undergraduate/ARCH/Curriculum/#c3>) include scheduling guidelines, studio advancement requirements, and general studio policies.

## Accreditation

In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (<http://www.naab.org>) (NAAB), which is the sole agency authorized to accredit US professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture programs may require a pre-professional undergraduate degree in architecture for admission. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Drexel University, Antoinette Westphal College of Media Arts & Design, Department of Architecture + Interiors offers the following NAAB-accredited degree program(s):

2+4 Option:	6 year program (2 years full-time, 4 years part-time)
	Bachelor of Architecture 227.0 undergraduate quarter-term credits
Part-Time Evening Option:	7 year part-time program
	Bachelor of Architecture 227.0 undergraduate quarter-term credits

Next accreditation visit for both tracks: 2018

## About the 2+4 Option

The 2+4 option is an accelerated route designed for well-prepared students entering the major directly after graduating from high school. In this program, two years of full-time coursework address the basic principles of architectural design and satisfy fundamental University core requirements in the arts and sciences as well as those job-related skills that are needed for entry-level professional positions in architecture or related fields. A comprehensive review of performance will take place after each year to ensure that students are making sufficient progress in all areas. After successfully completing the minimum requirements of the full-time phase, students find full-time employment in the building industry, including architecture firms, while continuing their academic program part-time in the evening for four additional years.

## About the Part-time Evening Program

The part-time evening option is one of only two part-time evening architectural programs in the United States, leading to an accredited Bachelor of Architecture degree. Designed for non-traditional and transfer students, this program offers all courses part-time in the evening, enabling students to work full-time. The evening program sequence is seven years, but transfer students with university-level design credits can reduce its length by meeting specific program requirements through transcript and portfolio review.

By combining work and study, all Drexel Architecture students may be able to simultaneously satisfy their required internship for licensure, now called the Architectural Experience Program (AXP) (<https://www.ncarb.org/gain-axp-experience>) while completing their professional degree, thus qualifying for the registration exam on graduation in most jurisdictions.

## Additional Information

For more information, visit the Architecture Program (<http://www.drexel.edu/westphal/academics/undergraduate/ARCH>) website. For advising and transfer information please review the Architecture Program's curriculum (<http://www.drexel.edu/westphal/academics/undergraduate/ARCH/Curriculum>) page.

In August of 2015, Drexel was approved by the National Council of Architectural Registration Boards (NCARB) (<http://www.ncarb.org>) for participation in the Integrated Path to Architectural Licensure (IPAL) (<https://www.ncarb.org/become-architect/ipal>) Program. Students seeking access to this track will be reviewed by the Program Director and Faculty starting in the Spring of 2017.

### Note: Architecture vs Architectural Engineering

Because Drexel University offers two programs with "architecture" in their titles, it is useful to point out the significant differences between them:

- **Architects** design buildings to meet people's spatial, organizational, and aesthetic needs; they also coordinate the building design process. All states, the District of Columbia, and three U.S. territories (Guam, Puerto Rico, and the U.S. Virgin Islands) require individuals to be licensed (registered) before they may call themselves architects or contract to provide architectural services. Many architecture school graduates work in the field even though they are not licensed or while they are in the process of becoming licensed. But they may not call themselves an architect.
- A licensed architect is required to take legal responsibility for all work. Licensure requirements usually include:

- A professional degree in architecture;
  - A period of practical training or internship; and
  - Passage of all divisions of the Architect Registration Examination (ARE).
- **Architectural engineers** specialize in the design of engineering systems within buildings. Architectural engineers earn Bachelor of Science degrees and become professional engineers with the required experience and state examinations. Students whose interests are focused on the technological and engineering aspects of buildings should review Drexel's major in Architectural Engineering (p. 208) offered by the College of Engineering.

## Degree Requirements (2 + 4 Option)

### General Education Requirements

CIVC 101	Introduction to Civic Engagement	1.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
MATH 101	Introduction to Analysis I	4.0
MATH 102	Introduction to Analysis II	4.0
PHIL 317	Ethics and Design Professions	3.0
PHYS 182	Applied Physics I	3.0
PHYS 183	Applied Physics II	3.0
UNIV A101	The Drexel Experience	2.0
Arts and Humanities-students elect a minimum of 6 credits		6.0
Natural Science-students elect a minimum of 3 credits		3.0
Social Science-students elect a minimum of 9 credits		9.0
Free electives		30.0

### Studios (must be taken in order)

ARCH 181	Architecture Studio 1A	4.0
ARCH 182	Architecture Studio 1B	4.0
ARCH 183	Architecture Studio 1C	4.0
ARCH 281	Architecture Studio 2A	4.0
ARCH 282	Architecture Studio 2B	4.0
ARCH 283	Architecture Studio 2C	4.0
ARCH 381	Architecture Studio 3A	4.0
ARCH 382	Architecture Studio 3B	4.0
ARCH 383	Architecture Studio 3C	4.0
ARCH 481	Architecture Studio 4A	4.0
ARCH 482	Architecture Studio 4B	4.0
ARCH 483	Architecture Studio 4C	4.0

ARCH 465	Energy and Architecture	
ARCH T180	Special Topics in Architecture	
ARCH T280	Special Topics in Architecture	
ARCH T380	Special Topics in Architecture	
ARCH T480	Special Topics in Architecture	
An approved Construction Management (CMGT) course		

Total Credits 227.0

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of

writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Sample Plan of Study (2 + 4) Option

### Freshman

Term 1		Credits

to take additional art history courses, develop special competencies and areas of interest (e.g., race and gender studies; the histories of technology, science and philosophy; Asian or Africana studies; writing, literature, and criticism; design history; museum studies, etc.), or gain competencies in various applied or technical areas. This BA program requires two 3-month co-ops.

## Bachelor of Science

The BS degree also requires 60.0 credit hours of art history, but it only requires 35.0-39.0 credit hours of General Education courses, thereby freeing up 85.0 credit hours of coursework to accommodate another major or to design a personalized curriculum. The 85.0 credit hours of free electives provided by the BS degree permits the student to simultaneously pursue a second major, one or more minors, or simply explore the life of the mind by taking courses, with faculty advisement, in diverse fields. This program does not require a co-op taken in addition to that which is required by the second major.

## Degree Requirements (BA)

### General education requirements

ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
Mathematics and Natural Science		12.0

## Co-op/Career Opportunities

### Co-op Opportunities

Drexel's enviable geographical location in the northeast corridor of the United States provides a distinct advantage for an art history program because of the proximity of many important Museums, galleries, and auction houses. The Philadelphia Museum of Art, Pennsylvania Academy of the Fine Arts, Barnes Foundation, Rodin Museum, Institute of Contemporary Art, and the Penn Museum of Archeology and Anthropology are all local and easily accessible. Museums, galleries and auction houses in New York, Washington, Baltimore and other east coast centers are all within a reasonable distance by train, bus, or car. These institutions will offer students an abundance of opportunities for first-hand study of the major collections of art, architecture, and design. Proximity to these institutions can also provide for many choice opportunities for cooperative education experiences.

Some possibilities include:

- Barnes Foundation
- Philadelphia Museum of Art
- Pennsylvania Academy of the Fine Arts
- American Philosophical Society
- Moderne Gallery
- Calderwood Gallery
- RagoArts Auction House, Lambertville, NJ
- Twelve Gates Gallery for Contemporary South Asian Art
- Newark Museum, NJ
- Metropolitan Museum of Art
- Brooklyn Museum
- Mural Arts Program
- Asia Society NY
- Christie's NY

## Career Opportunities

A major in art history can prepare students for a wide variety of careers, as well as preparation for graduate school.

Possible career paths:

- Museum Administrator
- Gallery Director
- Curator
- Museum Registrar
- Museum Educator
- Art Consultant
- Art Librarian
- Editor
- Art and/or Intellectual Property Law
- Artist Representative
- Non-profit and governmental organizations
- Teacher (K-12)
- Teacher/Researcher (college and university)

As a particularly broad humanities discipline, art history serves as an outstanding pre-professional degree, providing excellent preparation for a wide variety of professions, such as law, medicine, education and library science.

Visit the Drexel Steinbright Career Development Center (<http://www.drexel.edu/scdc>) page for more detailed information on co-op and post-graduate opportunities.

## Art History Faculty

Jennifer Blazina, MFA (*Cranbrook Academy of Art, Bloomfield Hills, MI*). Associate Professor. Coordinator of printmaking, fine arts.

Mark Brack, PhD (*University of California at Berkeley*). Associate Professor. British and American architecture from 1700 to the present; Hispanic colonial architecture in the American Southwest; vernacular architecture; historic preservation.

Pia Brancaccio, PhD (*Istituto Universitario Orientale, Naples, Italy*) *Art History Program Co-Director*. Associate Professor. South Asian art.

Lewis Colburn, MFA (*Syracuse University*) *Sculpture Area Coordinator*. Assistant Professor. Sculpture, 3D design.

Anda Dubinskis, MFA (*University of Pennsylvania*) *Drawing Area Coordinator*. Associate Teaching Professor. Drawing.

Joseph F. Gregory, PhD (*SUNY at Binghamton*). Associate Professor. Modern European art.

Lydia Hunn, MFA (*University of Pennsylvania*) *Multimedia Area Coordinator*. Professor. Installations, sculpture, painting and drawing.

Linda Kim, PhD (*University of California, Berkeley*). Assistant Professor. American art, African art.

Elizabeth Milroy, PhD (*University of Pennsylvania*) *Department Head, Art and Art History*. Professor. American art; history of museums and public spaces.

Charles Morscheck, PhD (*Bryn Mawr College*) *Art History Program Co-Director*. Professor. Italian Renaissance art.

Orlando Pelliccia, MFA *Director of the Leonard Perlestein Gallery; Materials Coordinator*. Teaching Professor. Multimedia.

Bruce W. Pollock, M.F.A. (*Tyler School of Art, Temple University*) *Painting Area Coordinator; Fine Arts minor advisor*. Associate Professor. Abstract painting and drawing.

Danielle Rice, PhD (*Yale University*) *Program Director, Museum Leadership*. Teaching Professor. Arts education

Clare Sauro, MA (*Fashion Institute of Technology*) *Curator, Historic Costume Collection*. Associate Teaching Professor. Costume history.

Delia Solomons, PhD (*Institute of Fine Arts, New York University*). Assistant Professor. Contemporary art, Latin American art.

Sara Steinwachs, MFA (*Yale University*) *Visual Studies Area Coordinator*. Associate Professor. Drawing, painting and design.

Mark Stockton, MFA (*Syracuse University*) *Design for Media Area Coordinator*. Assistant Teaching Professor. Drawing, painting, and design.

Blaise J. Tobia, MFA (*University of California, San Diego*) *Director of the Digital Media Program*. Professor. Photo-based works, design, art theory.

Joshua Weiss, MFA (*Yale University*). Associate Teaching Professor. Drawing, painting and design.

## Dance

*Major: Dance*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 185.0*

*Co-op Options: One Co-op (Four years)*

Classification of Instructional Program (CIP) code: 50.0399

Standard Occupational Classification (SOC) code: 25-1121; 27-2031; 27-2032

## About the Program

The dance program at Drexel University provides intensive exploration of dance in its physical, intellectual, creative and therapeutic aspects. The major is designed for students to focus on one of the following four tracks:

- Dance/Movement Therapy
- Dance in Education
- Physical Therapy
- Performance

The dance major at Drexel University has a unique curriculum design and focus. This program combines rigorous academic coursework with extensive stage and studio dance experiences to prepare students for four possible career paths within dance: dance/movement therapy, dance in education, physical therapy and performance. Students participating in this major will earn a BS degree in dance with an optional minor in psychology.

Students focused on **dance/movement therapy** will prepare for jobs as dance/movement therapists. These are psychological counselors working in a variety of settings including hospitals, out-patient clinics and residential treatment centers. Students pursuing this option will earn a

BS degree in dance at the Westphal College, through the Department of Performing Arts, for the first four years of study. They will then have the option to continue on to two years of study in the College of Nursing and Health Professions to earn an MA in Creative Arts in Therapy and become a licensed dance therapist.

The second career focus, **dance in education**, prepares students for jobs as elementary school teachers (grades Pre-K through 4) who may also serve as school dance specialists. Students choosing this option will earn a BS degree in dance through the Department of Performing Arts and may elect to continue for a fifth year of study to earn an MS in the Teaching, Learning & Curriculum through the School of Education. Students who successfully complete the five year BS/MS option in education will then be recommended to the State for a Pennsylvania Teaching Certificate in the area of Elementary Education for Pre-K to 4 certification, general education.

The third career focus, **physical therapy**, prepares students to work as physical therapists in a variety of settings, including hospitals, treatment centers, schools, and private practice. Students interested in the physical therapy option will complete the four-year BS degree in dance, along with a series of recommended electives in the physical sciences. After completion of the BS degree, students will continue their education for an additional three years in the College of Nursing and Health Professions to earn a DPT and become a licensed physical therapist.

The fourth option, **custom design**, allows students to work closely with faculty to create a personalized career in dance. Many students in this focus select **performance**, which prepares them to work as performers and/or choreographers in a variety of settings. Students interested in the performance option will complete the four-year BS degree in dance, with an emphasis on collaborative and interdisciplinary work.

The student who enters the dance major at Drexel University is an academically achieving student who has a deep curiosity for non-traditional careers in the field of dance. He or she is looking for extensive experiences to improve as a dancer, choreographer and performer while being stimulated academically. This student wants to study dance—both physically and cognitively—in college while being offered the possibility of gainful employment after graduation.

For more information about this major, visit the Westphal College's Dance (<http://www.drexel.edu/westphal/academics/undergraduate/DANC>) web page.

## Degree Requirements

### General Education Requirements

CIVC 101	Introduction to Civic Engagement	1.0
COOP 101	Career Management and Professional Development	0.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
MATH 171	Introduction to Analysis A	3.0
MATH 172	Introduction to Analysis B	3.0
PSY 101	General Psychology I	3.0
PSY 120	Developmental Psychology	3.0
PSY 240 [WI]	Abnormal Psychology	3.0
UNIV A101	The Drexel Experience	1.0
Two English (ENGL) electives		6.0
One Art or Humanities elective		3.0
Two Natural Science electives		8.0
Free electives		40.0

### Dance Major Requirements

#### Foundation and Theory Requirements

ARTH 103	History of Art III: Modern Art	3.0
NFS 100 & NFS 101	Nutrition, Foods, and Health and Introduction to Nutrition & Food	3.0
THTR 240	Theatre Production I	3.0
MUSC 331	World Musics	3.0
DANC 115	Introduction to Dance	3.0
DANC 215	Dance Appreciation	3.0
DANC 315	Twentieth Century Dance	3.0
DANC 415	Dance Aesthetics and Criticism	3.0
DANC 108	Dance Improvisation I	2.0
DANC 135	Rhythmic Study for Dance	3.0
DANC 235	Dance Composition I	3.0
DANC 335	Dance Composition II	3.0
DANC 116	Dance and Fitness	3.0
DANC 117	Foundations of Somatic Theory and Practice	3.0
DANC 216	Introduction to Laban Movement Analysis	3.0
DANC 316	Dance Kinesiology	3.0
DANC 221	Survey of Dance and Movement Therapy	3.0
DANC 222	Dance Pedagogy	3.0
DANC 481	Senior Seminar in Dance	1.0
DANC 491	Senior Project in Dance (1.0 credit course repeated for a total of 3.0 credits)	3.0

#### Performance Requirements

DANC 131	Dance Practicum in Performance (1.0 credit course repeated for a total of 11.0 credits) <sup>*</sup>	11.0
or DANC 133	Dance Practicum in Choreography	

#### Technique Requirements

DANC 104	Ballet Technique I (2.0 credit course repeated for a total of 12.0 credits)	12.0
or DANC 204	Ballet Technique II	
or DANC 304	Ballet Dance Technique III	
DANC 105	Modern Dance Technique I (2.0 credit course repeated for a total of 12.0 credits)	12.0
or DANC 205	Modern Dance Technique II	
or DANC 305	Modern Dance Technique III	
Select five of the following:		10.0
DANC 106	Jazz Dance Technique I	
DANC 206	Jazz Dance Technique II	
DANC 306	Jazz Dance Technique III	
DANC 107	Hip-Hop Dance Technique I	
DANC 207	Hip-Hop Dance Technique II	
DANC 208	Dance Improvisation II	
DANC 109	African Dance Technique I	
DANC 209	African Dance Technique II	

Total Credits 185.0

\* For DANC 131: Sections 001, 005, 006, 007, 008 ONLY

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of

writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Sample Plan of Study

Term 1		Credits
DANC 104	Ballet Technique I	2.0
DANC 105	Modern Dance Technique I	2.0

English (ENGL) elective		3.0
Free electives		6.0
Term Credits		13.0
Total Credit: 185.0		

## Co-op/Career Opportunities

The dance major is designed for students to focus on one of four career options. Several of the tracks lead to graduate study at Drexel or may be completed at the end of four years. Each also includes a co-op experience that allows for extended interaction with professionals in dance therapy, physical therapy, education, and performance. Students wishing to change career focus throughout the course of the undergraduate curriculum will have the option to do so.

Students focusing on **dance/movement therapy** participate in a six month co-op experience during the spring and summer terms of their junior year. These students may participate in co-op with a practicing dance/movement therapist, community dance artist, or mental health professional in a mental health, social service, rehabilitation, medical, special education or community arts setting.

Students focusing on **physical therapy**, will participate in a six month co-op in which they work in a setting with a physical therapist, such as a hospital, treatment center, school, or private practice. Co-op experiences where students are able to work with physical therapists working on dancers as clients will be encouraged.

Students focusing on **dance in education** participate in after school dance programs, artist in residence school partnerships and auditorium lecture demonstration programs as part of a touring dance company run by the dance program at Drexel, or other dance education focused activities in a school or studio setting, during the fall and winter of their junior year as their co-op experience.

Students focusing on **custom design** or **performance** may participate in a six month co-op including performance, administration, production, event planning and grant writing. Students interested in performance will

work with professional choreographers to experience multiple aspects of creating a sustainable life in performance and/or choreography.

Visit the Drexel Steinbright Career Development Center (<http://www.drexel.edu/scdc>) page for more detailed information on co-op and post-graduate opportunities.

## Dance Faculty

Lindsay Browning, BFA (*Bradford University*). Adjunct Professor. Yoga

Jim Bunting, BFA (*University of the Arts, Philadelphia*). Adjunct Instructor. Jazz dance.

Antoinette Coward-Gilmore, MA (*New York University*). Adjunct Instructor. African dance, modern dance.

Clyde Evans Adjunct Assistant Professor. Director of Chosen Dance Company; hip-hop.

Chris Farrell, MBA (*Fordham University*). Adjunct Instructor. Rhythmic studies; accompaniment.

Miriam Giguere, PhD (*Temple University*) *Department Head, Performing Arts*. Associate Professor. Professional modern dancer, choreographer and dance educator whose research centers on cognition during the creative process. She has published nationally and internationally and is a frequent presenter on the integration of dance and academics at national and international conferences.

Valerie Ifill, MFA (*University of Oregon*) *Program Director, Dance; Director of the Youth Performance Exchange and Dornsife Dance*. Assistant Teaching Professor. Intersections of dance and the community

Lucinda Lea, BA (*Indiana University*). Adjunct Assistant Professor. Ballet.

Jennifer Morley, MFA (*Temple University*). Assistant Teaching Professor. Master Pilates instructor and director of the Drexel Pilates Teaching Training program; modern dance, choreography.

Olive Prince, MFA (*Temple University*). Adjunct Assistant Professor. Choreography, creative process and improvisation; Director of Olive Prince Dance.

Meredith Rainey Adjunct Assistant Professor. Former soloist with Pennsylvania Ballet and director of Carbon Dance Theater. Ballet, choreography.

Heather Smalley, BS (*Drexel University*). Adjunct Assistant Professor. Arts administration.

Leah Stein, BA (*Wesleyan University*). Adjunct Assistant Professor. Modern technique; improvisation.

Lauren Stepanski, DPT (*Drexel University*). Adjunct Assistant Professor. Dance kinesiology

## Design & Merchandising

*Major: Design and Merchandising*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 181.0*

*Co-op Options: One Co-op (Four years)*

Classification of Instructional Programs (CIP) code: 50.0499

Standard Occupational Classification (SOC) code: 13-1022

## About the Program

Students in the Design & Merchandising program develop an appreciation for business, design and product quality. They learn to communicate verbally and visually about products across traditional and emerging media, and gain the business knowledge and skills required to promote and sell an aesthetically grounded point of view in the global marketplace.

The Design & Merchandising program at Drexel University's Antoinette Westphal College of Media Arts & Design educates and prepares students to effect change in the business of fashion via creative problem-solving in design and commerce. Through an interdisciplinary and experiential approach, we strive to graduate adaptable, creative, confident and passionate professionals who are technologically adept, creative thinkers, business minded and globally aware.

Through the dynamic classroom, co-op experience and study abroad opportunities (<http://www.drexel.edu/studyabroad>), the program prepares students to create, merchandise, market, promote and distribute products, based on a knowledge of visual/aesthetic and business considerations. Design & Merchandising students graduate with the knowledge and skills needed for success in traditional and emerging roles in the global marketplace, and as practical and responsible corporate citizens who will make the world a better place.

Design & Merchandising majors focus study in the areas of retail & wholesale operations, merchandise management, visual merchandising, textiles, and manufacturing along with trend forecasting, marketing & media, and public relations & event production.

For more information about this major, visit the College's Design & Merchandising (<http://www.drexel.edu/westphal/academics/undergraduate/DSMR>) page.

## Degree Requirements

Students pursuing the Bachelor of Science in Design & Merchandising may complete a concentration in an Retail Buying & Merchandising using free electives or use these electives toward focused study in Media Merchandising (D&M Magazine), Fashion Show Production or Visual Merchandising (D&M Shop).

### Concentration in Retail Buying & Merchandising

This concentration is designed to broaden students' practical and theoretical understanding of consumption as it relates to retail buying, management and merchandising. With the growth in omni-channel retail, students need to develop their skills not only for careers in traditional brick-and-mortar retailing establishments, but other retail models. These include: print and digital based retailing (catalog, television, and Internet). In this concentration, students explore all major retail merchandising and marketing channels and their requirements for buying, staffing, technology, logistics, distribution, and organizational behavior.

#### General Education Requirements

CIVC 101	Introduction to Civic Engagement	1.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
MATH 119	Mathematical Foundations for Design	4.0
PHYS 121	Physical Science for Design I	4.0
PHYS 122	Physical Science for Design II	4.0

UNIV A101	The Drexel Experience	2.0
Required Arts and Humanities - students elect a minimum of 9 credits. *		9.0
Required Social Science - students elect a minimum of 9 credits **		9.0
Free Electives		31.0
<b>Visual Studies Requirements</b>		
ARTH 101	History of Art I: Ancient to Medieval	3.0
ARTH 102	History of Art II: Renaissance to Romanticism	3.0
ARTH 103	History of Art III: Modern Art	3.0
PHTO 110	Photography	3.0
VSST 101	Design I	4.0
VSST 102	Design II	4.0
VSST 103	Design III	4.0
VSST 110	Introductory Drawing	3.0
VSST 111	Figure Drawing I	3.0
VSST 201	Multimedia: Performance	4.0
VSST 202	Multimedia: Space	4.0
VSST 203	Multimedia: Materials	4.0
<b>Professional Requirements</b>		
ACCT 110	Accounting for Professionals	4.0
ARTH 300 [WI]	History of Modern Design	3.0
DSMR 100	Computer Imaging I	3.0
DSMR 201	Analysis of Product	3.0
DSMR 210	Presentation Techniques Design and Merchandising	3.0
DSMR 211	Computer Design for Design and Merchandising	3.0
DSMR 230	Textiles for Design and Merchandising	3.0
DSMR 231	Retail Operations	3.0
DSMR 232	Merchandise Planning and Buying	4.0
DSMR 310	Merchandising Operations & Management	3.0
DSMR 311	Visual Merchandising	4.0
DSMR 333	Fashion Product Development	3.0
DSMR 477 [WI]	Design and Merchandising Seminar	3.0
DSMR 496 [WI]	Senior Problem in Design and Merchandising	3.0
ECON 201	Principles of Microeconomics	4.0
ECON 202	Principles of Macroeconomics	4.0
FASH 201	Survey of the Fashion Industry	3.0
MKTG 201	Introduction to Marketing Management	4.0
Art History Electives ***		6.0
Total Credits		181.0

\* Arts and humanities electives must equal a minimum of 9.0 credits. Suggested arts and humanities electives: ENGL 303 Science Fiction; ENGL 335 Mythology (Women in Literature); HIST 163 Themes in World Civilization III; ENGL 335 Mythology; any foreign language.

\*\* Social science electives must equal a minimum of 9.0 credits. Suggested social science electives: SOC 210 Race, Ethnicity and Social Inequality; SOC 215 Sociology of Work; SOC 240 Urban Sociology; SOC 345 Sociology for the Environment; SOC 340 Globalization; SOC I499 Independent Study in SOC.

\*\*\* Suggested art history electives: ARTH 335 History of Costume I: Preclassical to Directoire [WI] ; ARTH 336 History of Costume II: Directoire to World War I [WI] ; ARTH 477 Art History Seminar.

## Concentration Options

### Retail Buying & Merchandising Concentration

#### Required Courses

DSMR 233 [WI]	Retail Image Analysis	3.0
DSMR 313	International Fashion Merchandising	3.0
DSMR 324	Retail Intersections: Social & Cultural Issues	3.0
DSMR 325	Advanced Merchandise Planning and Buying	4.0
Select three from the following:		12.0

DSMR 326	Fashion Product Promotion	
DSMR 397	Retail Practicum	
MKTG 324	Marketing Channels and Distribution Systems	
MKTG 344	Professional Personal Selling	
MKTG 355	Interactive Marketing	
MKTG 356	Consumer Behavior	
Total Credits		25.0

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Sample Plans of Study

### Fall/Winter Co-op (Cycle A)

Term		Credits
<b>Term 1</b>		
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
FASH 201	Survey of the Fashion Industry	3.0

## Co-op/Career Opportunities

An education in Design & Merchandising prepares individuals for a wide variety of career paths. Graduates often pursue opportunities in buying, merchandising and retail operations; fashion and home product development; fashion product promotion; media merchandising; and public relations. More recently, graduates select careers in merchandising technologies, or customer relationship management. Students may elect to choose a minor opening up an unlimited number of options.

### Co-Op Experiences

Some past co-op employments of design and merchandising students include:

- Assistant Buyer, Urban Outfitters/Anthropologie, Philadelphia, PA
- Merchandising Co-op, TJX Companies, Framingham, MA
- Merchandising Assistant, Nation Design, New York, NY
- Product Development, Boathouse Sports, Philadelphia, PA
- Merchandising Co-op, Mundi Westport Group, New York, NY
- Creative and Digital Assistant, Article 22, Brooklyn, NY
- Public Relations Assistant, QVC, West Chester, PA
- Assistant Fashion Coordinator, Special Events Department, Saks Fifth Avenue
- Fashion Showroom Co-op, BCBG Max Azria, New York, NY
- Public Relations Assistant, Neiman Marcus, King of Prussia, PA

- Design/Market Co-op, Charlotte Ronson, New York, NY
- Public Relations Co-op, KB Brand Partners, New York, NY
- Production Co-op, Derek Lam, New York, NY
- Retail/Manufacturing/Merchandising Asst., Nicole Miller, Philadelphia PA

Visit the Drexel Steinbright Career Development Center (<http://www.drexel.edu/scdc>) page for more detailed information on co-op and post-graduate opportunities.

## Dual/Accelerated Degree Program

Only available to Design & Merchandising majors (4-year with co-op), this dual degree program combines study in the areas of fashion retail merchandising and product development with the MBA degree. The program is designed to allow students to complete both the bachelor's degree and the Master of Business Administration degree in five years.

Incoming freshmen selected for this program will generally have a minimum of 1350 on the SAT, a GPA of 3.5 or better, and rank in the top 10% of their high school graduating class. A strong candidate for this program will have taken significant AP coursework while in high school.

## Degree Requirements

The degree requirements for each program are located on the following pages:

- BS in Design & Merchandising Requirements (p. 482)
- MBA Requirements (<http://catalog.drexel.edu/graduate/collegeofbusiness/businessadministration/#degreerequirementstext>)

### Additional requirements for the dual degree program

- A cumulative GPA of at least 3.2 is required throughout the program.
- Students must take the GMAT examination and achieve a minimum score of 570 prior to the end of the tenth term in order to continue in the program. It is recommended that students take the GMAT examination late in the student's third year.
- Students must submit an acceptable plan of study at least three terms before anticipated start of graduate part of the program.

Students should visit the Westphal College of Media Arts and Design (<http://www.drexel.edu/westphal>) for more information.

## Fashion, Product Design & Merchandising Faculty

Kristen Ainscoe, BS (*Drexel University*). Assistant Teaching Professor. Visual merchandiser; merchandise management.

Catherine Byers, MA (*American University*). Assistant Teaching Professor. Journalism; marketing and communications.

Nick Cassway, BFA (*Tyler School of Art*). Assistant Teaching Professor. Curating; experimental portraiture; computer design.

Anne Cecil, MA (*University of the Arts*). Adjunct Instructor. Web designer, product designer, merchandising and artist.

Michael Glaser, MFA (*Ohio State University*) Program Director for Product Design, Westphal College of Media Arts & Design. Associate Professor. Quantifying the designer's intuition; the interplay between digital and physical forms; human desire to shape our surroundings.

Joseph H. Hancock, II, PhD (*Ohio State University*). Professor. Apparel merchandising, textiles and clothing, culture and marketing strategies.

Beth Phillips, MS (*Georgetown University*). Associate Teaching Professor. Business and international marketing, linguist, analysis of products.

## Entertainment & Arts Management

*Major: Entertainment & Arts Management*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 185.0*

*Co-op Options: One Co-op (Four years)*

Classification of Instructional Program (CIP) code: 50.1001

Standard Occupational Classification (SOC) code: 13-1011

### About the Program

The Entertainment & Arts Management (EAM) program at Drexel University is a nationally ranked, international leader in teaching the business of show business. Our unique program is a business degree, yet one that is based in the entertainment and arts sectors. Students in the Entertainment and Arts Management major choose an area of concentration from media, performing arts, or visual arts management disciplines. The curriculum is designed to prepare students to lead and manage in both commercial and non-profit areas of the field. Concentrations are available in: Cinema and Television, Performing Arts, Dance, Theatre, Visual Arts, Digital Media, and Sports Entertainment. Coursework in the EAM program includes general education, core requirements and features a built-in business minor. Students also enjoy a wide-selection of specialized coursework within their chosen area of concentration.

Unlike other undergraduate programs in this field, students are not required to choose commercial or nonprofit. Our philosophy is to prepare students for leadership careers in the vast world of arts and entertainment. This gives EAM students increased flexibility when choosing their career paths, and a distinct professional advantage in today's ever-changing arts and entertainment industries.

### Our Goal

Our overall goal in the EAM program is to prepare students for leadership careers in the entertainment and arts fields by giving them:

- a broad understand of the business of entertainment & the arts, from for-profit commercial entertainment companies to non-profit arts & culture organizations;
- real world work experience;
- creative skills development in the discipline that interests them, and
- expert advice and insight from practicing professionals.

### BS/MS Option

Students who complete the Entertainment & Arts Management program may also choose to pursue a graduate degree in Drexel University's Westphal College in television management or arts administration and museum leadership. Students who graduate with a 3.5 GPA in the last two years of the program who apply to the MS in Arts Administration and Museum Leadership (<http://catalog.drexel.edu/graduate/collegeofmediaartsanddesign/artsadministrationandmuseumleadership>) are automatically accepted into

the MS program. Other graduate degrees within the college are available to students as well.

### Dual Degree BS/MBA Option

Students majoring in Entertainment and Arts Management (4-year with co-op) may choose the BS Entertainment and Arts Management/MBA dual degree option. This highly attractive program option combines study in the management of the arts and entertainment industries along with the MBA degree. The program is designed to allow students to complete both the bachelor's degree and the MBA in five years.

#### Applying to the Dual Degree BS/MBA Option

Freshman applicants to the Entertainment & Arts Management program with a combined Math and Critical Reading SAT score of 1300 and a 3.5 GPA may apply for the BS/MBA program at the time of their initial application to Drexel University. Current students may choose to apply to the dual degree option once they have achieved between 90.0 and 120.0 credits. All students who are accepted into the accelerated program must maintain a 3.2 GPA as an EAM undergraduate, and must submit 2 letters of recommendation and meet minimum GMAT requirements at the time of the application to the MBA program.

For more information about this major, visit the College's Entertainment & Arts Management (<http://www.drexel.edu/westphal/academics/undergraduate/eam>) page.

### Degree Requirements

Coursework in the EAM program includes general education and core requirements as well as specialized coursework within the student's chosen area of concentration and, if applicable, within a specific arts or media discipline. For instance, within the media management concentration, students choose coursework in one of two disciplines: film, video, and screenwriting or digital media. In the performing arts management concentration, students choose coursework in a dance, performing arts, or theatre discipline.

The core requirements provide an overview of the student's future career field and its required key skills and abilities. The core requirements build a foundation for further advanced and specialized courses, taught in the student's area of concentration. At the end of their freshman year, students select one of the following concentrations:

- **(A) Visual Arts Management Concentration**
- **(B) Performing Arts Management**
  - a. Dance Concentration
  - b. Performing Arts Concentration
  - c. Theatre Concentration
- **(C) Media Management**
  - a. Digital Media Concentration
  - b. Cinema and Television Concentration
- **(D) Sports Entertainment Concentration**

#### General Education Requirements

Written Analysis and Communication Requirements		
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
Mathematics and Natural Sciences Requirements		
MATH 101	Introduction to Analysis I	4.0

MATH 102	Introduction to Analysis II	4.0
Select one of the following sequences:		6.0-8.0
<b>Biology</b>		
BIO 100	Applied Cells, Genetics & Physiology	
BIO 101	Applied Biological Diversity, Ecology & Evolution	
<b>Physics</b>		
PHYS 121	Physical Science for Design I	
PHYS 122	Physical Science for Design II	
<b>Arts/Humanities Requirements</b>		
COM 230	Techniques of Speaking	3.0
Required Arts and Humanities-students elect a minimum of 6 credits		6.0
<b>Social Science Requirements</b>		
Required Social Science-students elect a minimum of 9.0 credits		9.0
<b>University Seminar Requirements</b>		
CIVC 101	Introduction to Civic Engagement	1.0
COOP 101	Career Management and Professional Development	0.0
UNIV A101	The Drexel Experience	2.0
Free electives *		21.0
<b>Entertainment and Arts Management Core Requirements</b>		
ACCT 110	Accounting for Professionals	4.0
BLAW 201	Business Law I	4.0
DSMR 100	Computer Imaging I **	3.0
EAM 130	Overview of Entertainment and Arts Management	3.0
EAM 200	Introduction to the Music Industry	3.0
EAM 211	Strategic Management for Entertainment and Arts Management	3.0
EAM 261	Copyrights and Trademarks	3.0
EAM 312	Introduction to Fund Development for the Arts	3.0
EAM 340	Artist Representation and Management	3.0
EAM 350	Arts, Culture and Society	3.0
EAM 361	Law for Entertainment and Arts Management Managers	3.0
EAM 391 [WI]	Entertainment Promotion and Branding	3.0
EAM 491	Entertainment and Arts Management Senior Project ***	3.0
ECON 201	Principles of Microeconomics	4.0
HRMT 323	Principles of Human Resource Administration	4.0
MKTG 201	Introduction to Marketing Management	4.0
ORGB 300 [WI]	Organizational Behavior	4.0
TVIE 290	Introduction to Money and the Media	3.0
Select one of the following:		4.0
ACCT 116	Managerial Accounting Foundations	
MKTG 356	Consumer Behavior	
Select two of the following: †		8.0
ECON 202	Principles of Macroeconomics	
FIN 301	Introduction to Finance	
MIS 200	Management Information Systems	
OPM 200	Operations Management	
STAT 201	Introduction to Business Statistics	
STAT 202	Business Statistics II	
<b>Concentration Requirements *</b>		48.0
Total Credits		185.0-187.0

\* Minimum number of free electives depends on chosen concentration.

\*\* Digital Media track students should take DIGM 100 in place of DSMR 100

\*\*\* EAM 491 is a 1.0 credit course, taken 3 times during the senior year, for a total of 3.0 credits.

† BS/MBA students should take STAT 201 and FIN 301. Students who take STAT 201 and FIN 301 should not take BUSN 301.

## Concentration Requirements

### A. Visual Arts Management Concentration

ARTH 101	History of Art I: Ancient to Medieval	3.0
ARTH 102	History of Art II: Renaissance to Romanticism	3.0
ARTH 103	History of Art III: Modern Art	3.0
EAM 270	Audience Development for Arts	3.0
EAM 301	Gallery and Collection Management	3.0
EAM 302	Exhibition Design	3.0
EAM 401 [WI]	Writing for Arts Managers	3.0
EAM 471	Fine Arts Market Development	3.0
EAM 472	Trends in Visual Arts	3.0

**Visual Arts students select 21 additional credits from the following:** 21.0

ARTH 300 [WI]	History of Modern Design	
INTR 200	History of Modern Architecture and Interiors	
PHTO 110	Photography	
PHTO 210	Intermediate Photography	
PHTO 275	History of Photography I [WI]	
PHTO 276	History of Photography II	
VSST 100	Introduction to Art & Design	
VSST 101	Design I	
VSST 102	Design II	
VSST 103	Design III	
VSST 107	Introduction to Design for Media	
VSST 110	Introductory Drawing	
VSST 111	Figure Drawing I	
VSST 112	Figure Drawing II	
VSST 301	Painting I	
VSST 302	Painting II	
VSST 303	Painting III	

Total Credits 48.0

### B. Performing Arts Management

#### 1. Dance Concentration

DANC 104	Ballet Technique I	2.0
DANC 105	Modern Dance Technique I	2.0
DANC 106	Jazz Dance Technique I	2.0
or DANC 107 Hip-Hop Dance Technique I		
DANC 115	Introduction to Dance	3.0
DANC 135	Rhythmic Study for Dance	3.0
DANC 215	Dance Appreciation	3.0
DANC 235	Dance Composition I	3.0
DANC 315	Twentieth Century Dance	3.0
EAM 270	Audience Development for Arts	3.0
EAM 313	Volunteer and Board Management	3.0
EAM 321	Box Office and Venue Management	3.0
EAM 322	Performing Arts Touring	3.0
EAM 325	Producing for Live Entertainment	3.0
EAM 401 [WI]	Writing for Arts Managers	3.0
MUSC 130	Introduction to Music	3.0
THTR 240	Theatre Production I	3.0
Six terms of Dance ensembles (DANC 131 - DANC 132)		3.0
Total Credits		48.0

#### 2. Performing Arts Concentration

DANC 115	Introduction to Dance	3.0
DANC 215	Dance Appreciation	3.0
DANC 315	Twentieth Century Dance	3.0
EAM 270	Audience Development for Arts	3.0
EAM 313	Volunteer and Board Management	3.0

EAM 321	Box Office and Venue Management	3.0
EAM 322	Performing Arts Touring	3.0
EAM 325	Producing for Live Entertainment	3.0
EAM 401 [WI]	Writing for Arts Managers	3.0
MUSC 130	Introduction to Music	3.0
Choose 2 of the following 5 MUSC courses		6.0
MUSC 331	World Musics	
MUSC 333	Afro-American Music USA	
MUSC 338	American Popular Music [WI]	
MUSC 236	Rock Music Through the Mid-60s	
MUSC 238	Rock Music Since the Mid-60s	
THTR 115	Theatrical Experience	3.0
THTR 210	Acting: Fundamentals	3.0
THTR 240	Theatre Production I	3.0
Six terms of Performing Arts ensembles (3 classes must be taken for 1 credit each. One must be THTR 130)		3.0
<b>Total Credits</b>		<b>48.0</b>

### 3. Theatre Concentration

EAM 270	Audience Development for Arts	3.0
EAM 313	Volunteer and Board Management	3.0
EAM 321	Box Office and Venue Management	3.0
EAM 322	Performing Arts Touring	3.0
EAM 325	Producing for Live Entertainment	3.0
EAM 401 [WI]	Writing for Arts Managers	3.0
THTR 121 [WI]	Dramatic Analysis	3.0
THTR 210	Acting: Fundamentals	3.0
THTR 211	Acting: Scene Study	2.0
THTR 221 [WI]	Theatre History I	3.0
THTR 222 [WI]	Theatre History II	3.0
THTR 240	Theatre Production I	3.0
THTR 260	Production Design	3.0
THTR 320	Play Direction	3.0
One Theatre (THTR) elective		3.0
Six terms of Theatre Practicum Courses *		4.0
<b>Total Credits</b>		<b>48.0</b>

\* THTR 130, THTR 131, THTR 132

## C. Media Management

### 1. Digital Media Concentration

ANIM 140	Computer Graphics Imagery I	3.0
COM 111	Principles of Communication	3.0
COM 240	New Technologies In Communication	3.0
COM 270 [WI]	Business Communication	3.0
DIGM 105	Overview of Digital Media	3.0
EAM 365	Media and Entertainment Business	3.0
FMTV 110	Basic Cinematography	3.0
GMAP 260	Overview of Computer Gaming	3.0
IDM 100	Introduction to Web Development	3.0
IDM 211	User Interface Design I	3.0
IDM 221	Web Design I	3.0
MKTG 322	Advertising & Integrated Marketing Communications	4.0
VSST 110	Introductory Drawing	3.0
One Digital Media (ANIM, GMAP, WBDV) elective		3.0
Digital Media track students also select one course from the following:		3.0
ANIM 220	Digital Compositing I	
DIGM 350 [WI]	Digital Storytelling	
DIGM 451 [WI]	Explorations in New Media	

IDM 222	Web Design II	
<b>Total Credits</b>		<b>46.0</b>

### 2. Cinema and Television Concentration

COM 111	Principles of Communication	3.0
COM 240	New Technologies In Communication	3.0
COM 270 [WI]	Business Communication	3.0
EAM 365	Media and Entertainment Business	3.0
FMTV 110	Basic Cinematography	3.0
FMTV 115	Basic Editing	3.0
FMTV 120	Basic Sound	3.0
FMTV 285	Media Law and Ethics	3.0
MKTG 322	Advertising & Integrated Marketing Communications	4.0
SCRIP 270 [WI]	Screenwriting I	3.0
Select four from the following:		12.0
FMTV 130	Basic TV Studio	
FMTV 211	Intermediate Lighting	
FMTV 215	Intermediate Editing	
FMTV 230	Intermediate TV Studio	
FMTV 355	DNews	
FMTV T180	Special Topics in Film & TV	
FMTV T280	Special Topics in Film & TV	
FMTV T380	Special Topics in Film & TV	
FMTV T480	Special Topics in Film & TV	
FMVD 305	Special Effects Make-up	
FMVD T180	Special Topics in Game Film & Video	
FMVD T280	Special Topics in Game Film & Video	
FMVD T380	Special Topics in Game Film & Video	
FMVD T480	Special Topics in Game Film & Video	
SCRIP 241	Writing TV Comedy	
SCRIP 242	Writing TV Drama	
SCRIP 275	Screenwriting II [WI]	
SCRIP 280	Writing the Short Film [WI]	
SCRIP 310	Literature for Screenwriters	
SCRIP 370	Screenplay Story Development	
SCRIP 380	Screenwriting Workshop I	
SCRIP 381	Screenwriting Workshop II	
TVIE 280	Research, Sales and Programming	
TVPR 210	TV Studio: Narrative	
TVPR 230	Scripted TV Production	
TVPR 236	Reality TV Production	
TVPR 357	DNews II	
Choose 1 of 2 from the following:		3.0
FMTV 280	Basic Producing	
TVPR 240	Producing for Television	
<b>Total Credits</b>		<b>46.0</b>

### D. Sports Entertainment

COM 111	Principles of Communication	3.0
COM 270 [WI]	Business Communication	3.0
EAM 365	Media and Entertainment Business	3.0
FMVD 110	Basic Shooting and Lighting	3.0
or FMTV 110	Basic Cinematography	
FMVD 115	Basic Editing	3.0
or FMTV 115	Basic Editing	
FMVD 120	Basic Sound	3.0
or FMTV 120	Basic Sound	
SMT 110	The Business of Sport	4.0
SMT 201	Sports Marketing, Promotion, and Public Relations	4.0

SMT 205	Sport Media Relations	4.0
SMT 215	Sports Ticket Sales & Operations	3.0
TVPR 100	TV Studio: Basic Operations	3.0
or FMTV 130	Basic TV Studio	
TVPR 240	Producing for Television	3.0
TVIE 250	TV Sports Program Strategies	3.0
Sport Entertainment Concentration students also select any two of the following courses:		6.0
SMT 200	Introduction to Sport Facility and Event Management	
SMT 225	Sports Budgeting	
SMT 230	Sports and the Law	
SMT 240	Olympic Games	
SMT 260	Sports Agents & Labor Relations	
SMT 305	Fundraising in Sports	
SMT 307	Corporate Sponsorship in Sports	
SMT 309	Capital Campaigns in Athletics	
SMT 310	Sports Contracts	
SMT 315	Sports Publications & Graphics	
SMT 320	Sport Economics	
SMT 337	Risk Management in Sports	
SMT 345	Fan Experience Management	
SMT 347	Sport Tourism	
TVPR 200	TV Studio: Live Directing	
or FMTV 230	Intermediate TV Studio	
TVST 260	History of Television	
or TVST 10: TV History		
Total Credits		48.0

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Recommended Plans of Study

At the end of their freshman year, students select one of the following concentrations. Each concentration has its own unique Plan of Study:

### (A) Visual Arts Management Concentration

Term 1		Credits
EAM 130	Overview of Entertainment and Arts Management	3.0
ECON 201	Principles of Microeconomics	4.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
MATH 101	Introduction to Analysis I	4.0

UNIV A101	The Drexel Experience	1.0
	Term Credits	15.0
<b>Term 2</b>		
ACCT 110	Accounting for Professionals	4.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
MATH 102	Introduction to Analysis II	4.0
UNIV A101	The Drexel Experience	1.0
Free Elective		3.0
	Term Credits	15.0
<b>Term 3</b>		
CIVC 101	Introduction to Civic Engagement	1.0
EAM 211	Strategic Management for Entertainment and Arts Management	3.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
Arts and Humanities elective		3.0
Social science elective		3.0
Free Elective		3.0
	Term Credits	16.0
<b>Term 4</b>		
BLAW 201	Business Law I	4.0
COOP 101	Career Management and Professional Development	0.0
DSMR 100	Computer Imaging I	3.0
EAM 391 [WI]	Entertainment Promotion and Branding	3.0
PHYS 121	Physical Science for Design I	4.0
or BIO 100	Applied Cells, Genetics & Physiology	
Social science elective		3.0
	Term Credits	17.0
<b>Term 5</b>		
EAM 261	Copyrights and Trademarks	3.0
EAM 270	Audience Development for Arts	3.0
EAM 312	Introduction to Fund Development for the Arts	3.0
PHYS 122	Physical Science for Design II	4.0
or BIO 101	Applied Biological Diversity, Ecology & Evolution	
Visual Arts elective*		3.0
	Term Credits	16.0
<b>Term 6</b>		
COM 230	Techniques of Speaking	3.0
EAM 200	Introduction to the Music Industry	3.0

### Co-op/Career Opportunities

Entertainment & Arts Management prepares students for a variety of careers in both commercial and nonprofit organizations - from creative, hands-on positions to administrative and management roles.

The career possibilities in this field are extensive and include the following positions:

- Artistic or Creative Director
- Concert and Live Events Manager
- Gallery Owner or Museum Manager
- Special Events Planner
- Marketing or Social Media Director
- Film or TV Producer
- Venue Manager
- Artist Representative - Agent, Manager, or Publicist
- Creative Content Director - Media, TV or Online

## Examples of Past Co-op Jobs

EAM students work at many of the leading entertainment and arts companies in the country.

Examples of some of the co-op employers where EAM students have worked:

- Showtime
- A&E Network
- Live Nation - Midwest, Philadelphia, New York
- AEG Live - Los Angeles
- The Tonight Show Starring Jimmy Fallon
- Atlantic Records
- Sony Music Entertainment
- Disney
- Comcast
- NBC Universal - NYC
- The Onion
- Screen Actors Guild
- Sirius/XM Radio
- Abrams Artist Agency – NYC
- Red Light Management - NYC
- Fox News Channel
- Warner Music Group
- Nashville Casting
- Rain Management Group
- The Trocadero
- XFINITY Live! Philadelphia
- Asbury Lanes
- Cosi Television NY
- World Café Live!
- Kimmel Center for the Performing Arts
- Lincoln Center for the Performing Arts
- Sesame Workshop
- Upright Citizens Brigade
- Edinburgh Fringe Festival
- Webster Hall NYC
- Philadelphia Theatre Company
- Joffrey Ballet
- Pennsylvania Ballet
- Arden Theatre Company

Visit the Drexel Steinbright Career Development Center (<http://www.drexel.edu/scdc>) page for more detailed information on co-op and post-graduate opportunities.

## About the Accelerated Degree Program (BS/MBA)

Available to students majoring in entertainment and arts management (4-year with co-op), this dual degree program combines study in the management of the arts and entertainment industries along with the MBA degree. The program is designed to allow students to complete both the bachelor's degree and the Master of Business Administration degree in five years.

Incoming freshmen selected for this program will generally have a minimum of 1350 on the SAT, a GPA of 3.5 or better, and rank in the top 10% of their high school graduating class. A strong candidate for this program will have taken significant AP coursework while in high school.

## Degree requirements

BS in Entertainment & Arts Management (p. 486)

MBA Requirements (<http://catalog.drexel.edu/graduate/collegeofbusiness/businessadministration/#degreerequirementstext>)

BS/MBA students may be waived from three MBA Enterprise Management courses, assuming a grade of B or better is earned in specified undergraduate courses. Students can review the Waiver Policies for the Statement of Curriculum Standing on the LeBow College's web site for additional information. Students who complete MIS 200 in their undergraduate program will, in addition, be waived from a fourth MBA course (MIS 612).

The above conditions hold only for fully accepted BS/MBA students as identified by Enrollment Management.

### Additional requirements for the dual degree program

- A cumulative GPA of at least 3.2 is required throughout the program.
- Students must take the GMAT examination and achieve a minimum score of 570 prior to the end of the tenth term in order to continue in the program. It is recommended that students take the GMAT examination late in the student's third year.
- Students must submit an acceptable plan of study at least three terms before anticipated start of graduate part of the program.

Students should visit the Westphal College of Media Arts and Design (<http://www.drexel.edu/undergrad/academics/colleges-schools/westphal>) for more information.

## College of Media Arts and Design Facilities

Our college offers high-quality facilities and resources to its students including a state-of-the-art black-box theatre, HD film screening rooms, rehearsal studios, event venues, and more. The following are some links for more information about some of our facilities.

- Robert and Penny Fox Historic Costume Collection (<http://www.drexel.edu/westphal/resources/FHCC>)
- Design and Imaging Studios (<http://www.drexel.edu/westphal/student-resources/technology>)
- DUTV (<http://www.dutv.org>), (Paul F. Harron Studios) student-run cable television station
- Leonard Pearlstein Gallery (<http://www.drexel.edu/westphal/resources/LeonardPearlsteinGallery>)
- MAD Dragon Media Group (<http://maddragonrecords.com>)
- Mandell Theater (<http://www.drexel.edu/performingarts/about/facilities/mandell-theater>)
- Rudman Institute for Entertainment Industry Studies (<http://www.drexel.edu/westphal/resources/Rudman>)
- WKDU (<http://www.wkdu.org>), Drexel's student-run radio station

## Fashion Design

*Major: Fashion Design*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 183.0*

*Co-op Options: One Co-op (Four years)*

*Classification of Instructional Programs (CIP) code: 50.0407*

*Standard Occupational Classification (SOC) code: 27-1022*

## About the Program

The Fashion Design Program at Drexel University's Antoinette Westphal College (<http://www.drexel.edu/westphal/undergraduate/FASH>) of Media Arts & Design educates and trains visionary designers to use an integrated approach toward the creation of contemporary fashion within the context of an expanding, yet converging global economy and society. Through a series of courses offered freshman year, fashion students will explore the challenges facing our industry and learn how to implement sustainable solutions in their design process. The fusion of art, design,

science and technology serves as a springboard for the production of unique apparel for the 21st century, and represents a trans-disciplinary approach that requires flexibility and focus. Over the past two decades, Drexel's Fashion Design program has developed a stellar, international reputation and is ranked in the top five nationally and 16th worldwide. That is due in part, to a passionate and experienced faculty, novel approaches to pedagogy, and participation in national and international competitions. Faculty and alumni connections to industry leaders strongly augment and catalyze the program, the strength of which is closely linked to the philosophy that each student has a distinct vision and a unique aesthetic that must be cultivated on an individual basis.

Within the beautiful studios and specialized labs in the URBN Center, students learn to master skills and push the boundaries using those skills. In our new Shima Seiki knitwear studio students have access to state-of-the-art computerized flat knitting machines and Apex CAD/CAM design systems. This lab features the latest equipment for the design, simulation and production of fully fashioned knitwear. Students can engage in collaborative University wide research through the use of the exCITe Center (<http://drexel.edu/excite>) located next door and the Hybrid Making Lab ([http://www.drexel.edu/westphal/resources/making\\_spaces/HybridMakingLab](http://www.drexel.edu/westphal/resources/making_spaces/HybridMakingLab)) located on the URBN Center's first floor. They acquire detailed knowledge about industrial productions, advanced technologies in design, collaborative design, materials and processes, and the marketing and merchandising of clothing.

Accordingly, our future fashion designers, both undergraduates and graduates alike, develop an intuitive and practical understanding of design through a fine arts foundation, while studying the psychological, social and historical contexts of fashion through the world-renowned Robert and Penny Fox Historic Costume Collection (<http://www.drexel.edu/foxcollection>) (FHCC). Importantly, the students are provided with commercial studio/ atelier training that goes hand-in-hand with classroom instruction through the University's cooperative education program (<http://www.drexel.edu/westphal/forStudents/co-op>). Cooperative education offers invaluable opportunities for students to observe and participate in the fashion industry at the ground level. Critiques by visiting professionals are included in all upper level courses and provide valuable "real world" input, as well as future career connections. A large percentage of students spend a term studying abroad (<http://www.drexel.edu/studyabroad>) in the world's great fashion capitals, including London, England and Florence ([https://studyabroad.drexel.edu/index.cfm?FuseAction=Programs.ViewProgram&Program\\_ID=40220](https://studyabroad.drexel.edu/index.cfm?FuseAction=Programs.ViewProgram&Program_ID=40220)), Italy. Students can also choose from a range of fall break trips such as Drexel Fashion Break in South Korea: Korean Fashion Industry ([https://studyabroad.drexel.edu/index.cfm?FuseAction=Programs.ViewProgram&Program\\_ID=47802](https://studyabroad.drexel.edu/index.cfm?FuseAction=Programs.ViewProgram&Program_ID=47802)). Upon graduation, students show their collections (<http://www.drexel.edu/westphal/creative/fash>) in the annual fashion show.

For more information about this major, visit the College's Fashion Design (<http://drexel.edu/westphal/academics/undergraduate/FASH>) page.

## Degree Requirements

### General education requirements

CIVC 101	Introduction to Civic Engagement	1.0
COOP 101	Career Management and Professional Development	0.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
MATH 119	Mathematical Foundations for Design	4.0

PHYS 121	Physical Science for Design I	4.0
PHYS 122	Physical Science for Design II	4.0
UNIV A101	The Drexel Experience	2.0
Required Arts and humanities-students elect a minimum of 9.0 credits		9.0
Required Social science-students elect a minimum of 9.0 credits		9.0
Free electives		24.0
<b>Visual studies requirements</b>		
ARTH 101	History of Art I: Ancient to Medieval	3.0
ARTH 102	History of Art II: Renaissance to Romanticism	3.0
ARTH 103	History of Art III: Modern Art	3.0
VSST 101	Design I	4.0
VSST 102	Design II	4.0
VSST 103	Design III	4.0
VSST 110	Introductory Drawing	3.0
VSST 111	Figure Drawing I	3.0
VSST 113	Figure Drawing for Fashion	3.0
VSST 301	Painting I	4.0
VSST 304	Materials Exploration	4.0
Select one of the following Multimedia courses:		4.0
VSST 201	Multimedia: Performance	
VSST 202	Multimedia: Space	
VSST 203	Multimedia: Materials	
<b>Fashion design requirements</b>		
ARTH 335 [WI]	History of Costume I: Preclassical to Directoire	3.0
ARTH 336 [WI]	History of Costume II: Directoire to World War I	3.0
FASH 201	Survey of the Fashion Industry	3.0
FASH 211	Fashion Drawing I	3.0
FASH 212	Fashion Drawing II	3.0
FASH 230	Textiles for Fashion Design	3.0
FASH 241	Construction Skills	4.0
FASH 310	Presentation Techniques	3.0
FASH 311	Textile Design	3.0
FASH 313	Fashion Drawing for Industry	3.0

FASH 350	Fashion Design II	4.0
FASH 351	Fashion Design III	4.0
FASH 352	Fashion Design IV	4.0
FASH 464	Professional Portfolio	3.0
FASH 491	Collection I	4.0
FASH 492	Collection II	3.0
Total Credits		183.0

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing

Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Sample Plans of Study

### Standard Plan

(See below for Study Abroad plan of study)

Term 1		Credits
FASH 201	Survey of the Fashion Industry	3.0
PHYS 121	Physical Science for Design I	4.0
UNIV A101	The Drexel Experience	1.0
VSST 101	Design I	4.0
VSST 110	Introductory Drawing	3.0
Term Credits		15.0
Term 2		Credits
FASH 241	Construction Skills	4.0
PHYS 122	Physical Science for Design II	4.0
UNIV A101	The Drexel Experience	1.0
VSST 102	Design II	4.0
VSST 111	Figure Drawing I	3.0
Term Credits		16.0
Term 3		Credits
CIVC 101	Introduction to Civic Engagement	1.0
FASH 341	Flat Pattern Design	4.0
MATH 119	Mathematical Foundations for Design	4.0
VSST 103	Design III	4.0
VSST 113	Figure Drawing for Fashion	3.0
Term Credits		16.0
Term 4		Credits
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
FASH 211	Fashion Drawing I	3.0
FASH 310	Presentation Techniques	3.0
FASH 342	Draping Design	4.0
VSST 304	Materials Exploration	4.0
Term Credits		17.0
Term 5		Credits
ARTH 101	History of Art I: Ancient to Medieval	3.0
COOP 101	Career Management and Professional Development	0.0
FASH 212	Fashion Drawing II	3.0
FASH 230	Textiles for Fashion Design	3.0
FASH 311	Textile Design	3.0
FASH 349	Fashion Design I	4.0
Term Credits		16.0
Term 6		Credits
ARTH 102	History of Art II: Renaissance to Romanticism	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
FASH 313	Fashion Drawing for Industry	3.0
FASH 350	Fashion Design II	4.0
Free elective		3.0
Term Credits		16.0
Term 7		Credits
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0

VSST 301	Painting I	4.0
Select one of the following:		4.0
VSST 201	Multimedia: Performance	
VSST 203	Multimedia: Materials	
VSST 202	Multimedia: Space	
Social science elective		3.0
Term Credits		14.0
<b>Term 8</b>		
ARTH 103	History of Art III: Modern Art	3.0
ARTH 335 [WI]	History of Costume I: Preclassical to Directoire	3.0
FASH 343	Tailoring	4.0
Arts and Humanities elective		3.0
FASH 315	Computer Aided Design for Patternmaking (or elective)	3.0
Term Credits		16.0
<b>Term 9</b>		
ARTH 336 [WI]	History of Costume II: Directoire to World War I	3.0
FASH 314	Fashion Presentation Drawing	3.0
FASH 351	Fashion Design III	4.0
Arts and Humanities elective		3.0
Term Credits		13.0
<b>Term 10</b>		
FASH 352	Fashion Design IV	4.0
FASH 464	Professional Portfolio	3.0
Free elective		3.0
Arts and Humanities elective		3.0
Social science elective		3.0
Term Credits		16.0
<b>Term 11</b>		
FASH 491	Collection I	4.0
FASH 316	Computer Aided Design for Fashion Design (or elective)	3.0
Free elective		3.0
Social science elective		3.0
Term Credits		13.0
<b>Term 12</b>		
FASH 492	Collection II	3.0
Free electives		12.0
Term Credits		15.0
Total Credit: 183.0

## Co-op/Career Opportunities

Drexel Co-op is a renowned collegiate program. Students spend a minimum of 6 months either in the US (<http://www.drexel.edu/westphal/academics/co-op>) or abroad (<http://www.drexel.edu/scdc/co-op/international>) where they can apply their skills in the challenging and exciting fashion industry. Areas of opportunity include garment design, concept design, product development, production, textile design, costume design, technical design, CAD, publishing, curatorial work, promotion and marketing. During the cooperative education program students apply their industry knowledge and gain experience in the diverse, fast paced global world of fashion. Students forge long lasting relationships with alumni and other industry professionals.

## Co-op Experiences

Some past co-op employers of fashion design students include:

- A Wish Come True, Greater Philadelphia Area
- Abercrombie & Fitch, Ohio
- Althea Harper, New York
- Amsale, New York
- Austin Scarlett, New York
- Australian Internships - Bec & Bridge
- Beijing Yu Wen Hua Apparel Company
- BCBG Max Azria, California
- Bioko Biodiversity Protection Program, Equatorial Guinea
- Blazina International, Philadelphia
- Calvin Klein, New York
- Carole Hochman Design Group, New York
- Charlotte Ronson, New York
- Chico's FAS, Inc., Ft. Meyers FL
- Christian Soriano, New York, NY
- Dennis Basso/Stallion Inc., New York
- Derek Lam, New York
- Destination Maternity Corporation, Philadelphia, PA
- DYLANLEX, Philadelphia, PA
- Elite Sportswear, L.P., Reading, PA
- Elie Tahari, New York
- Elixir Fashion Apparel & Alicia Lee Designs, China
- Gelmart International, New York
- Hanky Panky, LTD, New York
- Haute Hippie, New York
- Jill Stuart International, New York
- Joe Fresh, New York
- Jordache Enterprises, New York
- Junko Yoshioka, New York
- Lilly Pulitzer, Greater Philadelphia Area
- LL Bean, Freeport, ME
- Lori Coulter, LLC, St. Louis, MO
- Maggie Norris Couture, New York
- Marchesa, New York, NY
- Marios Schwab Ltd., London, UK
- Michael Kors, New York
- Milly LLC, New York
- Naeem Khan LTD, New York
- Nanette Lepore, New York
- Ohne Titel, New York
- PARIGI Group, Greater Philadelphia Area
- Parker, New York
- Peter Pilotto, London, UK
- Priscilla Costa, Greater Philadelphia Area
- Sally Lapointe, New York
- Shehu, Philadelphia, PA
- Shima Seiki USA, Inc., South New Jersey
- SOTU Productions, New York
- Thakoon, New York
- The Tailory, Philadelphia, PA
- Timo Weiland, New York
- Top Hat Formal Wear, Puerto Rico
- Urban Outfitters, Philadelphia, PA
- Veda, New York
- VF Sportswear, New York
- Yes Master for IMAGO Creations, Ltd, Middlesex, UK
- Zac Posen, New York

Visit the Drexel Steinbright Career Development Center (<http://www.drexel.edu/scdc>) page for more detailed information on co-op and post-graduate opportunities.

## Facilities

Drexel University's Antoinette Westphal College of Media Arts & Design is located in the new URBN Center at 3501 Market Street in Philadelphia. The URBN Center is a 140,000 square foot state-of-the-art facility where the Fashion Design studios are located on the 3rd floor.

Classes are held in fully equipped studios for design and construction, pattern drafting, CAD design, and textile design including a dedicated senior and graduate design studio. Other studios on the 3rd floor include a specialty equipment lab, computer lab, knitwear studio, a fabric dyeing and research lab, fashion drawing studio, and the Charles Evans Library. In our state-of-the-art knitwear lab, students have access to Shima Seiki's computerized flat knitting machine, and APEX Design Systems.

The R (<http://www.drexel.edu/westphal/resources/FHCC>) Robert and Penny Fox Historic Costume Collection (<http://www.drexel.edu/foxcollection>) (FHCC), currently estimated to hold more than 12,000 objects, is located on the first floor and is an invaluable library, archive and educational tool for our students as well as scholars, historians, artists and designers in the national and international community. Also located on the first floor is the Hybrid Making Lab ([http://www.drexel.edu/westphal/about/overview/making\\_spaces/HybridMakingLab](http://www.drexel.edu/westphal/about/overview/making_spaces/HybridMakingLab)). This lab provides collaborative design and research opportunities both within Westphal College and University wide. The exCITe Center (<http://drexel.edu/excite>) (Expressive and Creative Interaction Technologies), located next door at 3401 Market Street, welcomes students and faculty from across the University as well as the community.

The open environment of the URBN Center provides opportunity for collaboration with all of the programs at the Westphal College. Design & Merchandising is on the first floor, opposite the main lobby where work from all of the College's students is regularly displayed. Digital Media, Animation & Visual Effects, Game Art & Production, Web Development & Interaction Design, Product Design, Graphic Design, Interiors, and Architecture's studios and labs are also located in the URBN Center. The Center encourages anyone interested to schedule a visit (<http://www.drexel.edu/westphal/about/contact>) to experience the creativity, technology, innovation and resulting excitement.

## Fashion Design Faculty

Anita Dennis, AST (*Art Institute of Philadelphia*) *Fashion Laboratory Technician*. Assistant Teaching Professor. Fashion designer and technician; construction skills.

Genevieve Dion, MFA (*University of the Arts*) *Director, Center for Functional Fabrics*. Associate Professor. Industrial designer, wearable artist, new materials technology research.

Ann Gerondelis, AIA, IDSA (*Georgia Institute of Technology*) *Design Department Head*. Teaching Professor. Embodied perception and its relationship to the design of human experiences, from the scale of the built environment to objects that surround us.

Cynthia Golembuski, MS (*Drexel University*) *Associate Program Director, Fashion Design*. Associate Teaching Professor. Fashion designer, illustrator, computer aided design.

Roberta Gruber, MS (*Drexel University*). Associate Professor. Fashion designer and illustrator; wearable artist, merchandiser, special events.

Lisa Hayes, BFA (*Syracuse University*) *Program Director, Fashion Design*. Associate Professor. Fashion designer, product designer, pattern design, sustainability specialist.

Jaeyoon Jeong, MS (*Drexel University*). Assistant Teaching Professor. Owner/Designer Jaeyoon Jeong Collection

Autumn Kietpongler, MS (*Drexel University*). Adjunct Professor. Designer at Autumnlin Atelier. Creative technologies specialist.

Jackie Kilmartin, MS (*University of the Sciences*). Assistant Professor. Owner/designer Lillian Jackson Textiles, bio-medical textile engineer.

Hyun-Ah Kim, BS (*Drexel University*). Adjunct Professor. Designer and design consultant

Jan Marshall, BA (*Long Island University*). Assistant Teaching Professor. Fashion designer, knitwear, product development, fashion analysis.

Kathi Martin, MSIS (*Drexel University*) *Associate Director of the Graduate Program in Fashion Design*. Associate Professor. Fashion and textile designer; textile artist; computer-aided design, best practices online databases and graphic interfaces for fashion and historic costume, virtual characters for fashion design.

Alphonso McClendon, MS (*Drexel University*) *Program Director, Design & Merchandising*. Associate Professor. Fashion designer, product and business development, computer aided planning and design.

Elizabeth Quinn, MS (*Drexel University*). Adjunct Professor. Fashion designer. Sustainability specialist.

Clare Sauro, MA (*Fashion Institute of Technology*) *Curator, Historic Costume Collection*. Associate Teaching Professor. Costume history.

Giulia Sebring, Masters (*Instituto Marangoni*). Adjunct Professor. Designer.

Domenica Vinci, BS (*Philadelphia University*). Adjunct Professor. Designer at Off da Wall Graffiti

## Film & Television

*Major: Film and TV Production*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 185.0*

*Co-op Options: One Co-op (Four years)*

Classification of Instructional Program (CIP) code: 50.0602

Standard Occupational Classification (SOC) code: 27-2012; 27-4031; 27-4032

## About the Program

The Film & Television major offers a balance of technical craft and artistic vision that prepares students to pursue professional careers in the Film and TV industries. The program is hands-on with core themes driving each year: Story, Voice, Professional Practice, and Implementation. There is also substantial coursework in screenwriting and film studies.

This highly competitive program, with only sixty-four freshmen accepted annually, features smaller classes that foster student-faculty interaction and mentoring, as well as ample access to excellent equipment. The unique Drexel co-op and Los Angeles Summer Programs enhance education by providing students with professional employment experience.

The Film & Television program also offers minors in Film Studies (p. 538) and Video Production (p. 547).

## Additional Information

For more information about this program, contact the program director:

Tom Quinn

TVST 364	Teen Drama	
TVST 368	Supernatural Drama	
TVST T380	Special Topics in TV Studies	
TVST T480	Special Topics in TV Studies	

Total Credits 185.0

\* Includes Film & TV as well as general electives.

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Sample Plan of Study

Term 1		Credits
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
FMTV 110	Basic Cinematography	3.0
SCRP 150	Entertainment Storytelling Fundamentals	3.0
UNIV A101	The Drexel Experience	1.0
VSST 107	Introduction to Design for Media	3.0
Term Credits		13.0

Total Credit: 185.0		

## Co-op/Career Opportunities

Students who study film and video can move on to careers as film or video directors, producers, video or film editors, directors of photography (film), camerawork, as well as grips and special effects coordinators.

## Co-Op Experiences

Some past co-op employers of film and video students include:

- USA Network, New York
- Comcast, Philadelphia
- Bad Robot, Los Angeles
- ICM, Los Angeles
- Focus Features, New York
- Law & Order, New York
- NFL Films, Mount Laurel, New Jersey
- Tribeca Film Center, New York
- National Geographic Television, Washington DC
- NBC, New York
- Paramount Studios, Los Angeles
- MTV, New York

Visit the Drexel Steinbright Career Development Center (<http://www.drexel.edu/scdc>) page for more detailed information on co-op and post-graduate opportunities.

## Facilities

Film and Video facilities include a shooting studio with green screen; two screening rooms; a fully equipped HD television studio; post-production labs for editing, color correction and audio recording & mixing; specially outfitted multimedia rooms; state of the art film production equipment including cameras, steadicams, lighting and audio equipment.

Additionally, the college operates DUTV (<http://www.dutv.org>), a HD cable television station reaching over 350,000 households.

## Film & Video Faculty

Ian Abrams, BA (*Duke University*). Associate Professor. Screenwriting, movies, film, Hollywood.

John Avarese, BS (*Drexel University*). Assistant Teaching Professor. Composer, film and video scores, mixing and sound design.

Alison Bagnall, BA (*Yale University*). Visiting Professor. Filmmaker

David Culver, AS (*Graham Junior College*) *Manager of the Paul F. Harron Studios/DUTV*. Associate Teaching Professor. Film, Video, Station Management, Emerging Media Technology

David Deneen, BFA (*Philadelphia College of Art*). Assistant Teaching Professor. Film & video.

Gerard M. Hooper, MFA (*Temple University*). Associate Teaching Professor. Film and video; European and non-western cinema.

D. B. Jones, PhD (*Stanford University*). Professor. Film and video; cinema studies.

Matthew Kaufhold, MA (*University of North Carolina*) Program Director, Screenwriting and Playwriting. Associate Teaching Professor. Screenwriter, Producer.

Karin P. Kelly, MFA (*New York University*) Department Head, Cinema and Television. Associate Professor. Film and video; filmmaker and author.

Yvonne D. Leach, MFA (*Temple University*). Associate Professor. Television studies.

Thomas Quinn, MFA (*Temple University*) Program Director, Film & Video. Assistant Professor. Writer, Director, filmmaker.

Philip W. Salas, BS (*Temple University*). Assistant Teaching Professor. Utilization of advanced set top box data to measure fragmented viewing behavior. Impact of new television distribution technologies on traditional broadcasters and multichannel program providers.

David A. Schwartz, BA (*Rider University*). Associate Teaching Professor. Steadicam operator; cameraman.

Andrew Susskind, BA (*Harvard University*) Program Director of TV Production & Media Management. Associate Teaching Professor. Producing for Television, The Sitcom, Directing Single and Multi-Camera

Jocelyn Tarquini, MFA (*American Film Institute*). Assistant Teaching Professor. Editing, post-production.

Albert S. Tedesco, MA (*University of Pennsylvania*) Director of the Paul F. Harron Graduate Program in Television Management. Teaching Professor. Media Management, Organizational Structure, Research Methods, Media Ethics, Media Law, The Regulatory Environment, Technology Assessment, Media Theory, Media Analytics

## Game Design & Production

Major: Game Design and Production

Degree Awarded: Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: 186.0

Co-op Options: One Co-op (Four years)

Classification of Instructional Programs (CIP) code: 36.0113

Standard Occupational Classification (SOC) code: 15-1131

### About the Program

Drexel's nationally-ranked Game Design & Production program combines a strong comprehension of animation and interactivity with an understanding of design, programming, production, and teamwork.

The major mirrors a sector that has seen an explosion in gaming, not just in personal entertainment, but throughout multiple industries and the corporate world. The gaming industry has matured into a source of large-budget AAA and smaller indie entertainment projects. It encompasses the use of serious gaming, where gaming technologies are used in education and training for practically any topic.

Fully immersive games use constantly evolving methods of presentation and interaction, such as personal data-trackers, Internet-of-Things (IoT), multi-touch displays, mediated-reality (augmented and virtual) motion and gesture capture, motion simulation, and haptic devices. To best prepare for the demands of careers in these rapidly changing disciplines, students pursue a foundation of design and technology, taking core courses in all aspects of digital media, completing a six-month co-op and delving into rigorous specialty coursework. Provided a robust foundation, students are prepared to adapt to shifting industry demands and maintain a fluency across the digital media spectrum.

Students begin making games in the first term as freshmen and continue making team-based game projects both small and large throughout their plan of study. Interdisciplinary teamwork is a core skill developed in teams of two to over eighteen, often spanning multiple programs including Computer Science, Music Industry, and more. Every project enables students to experiment and refine their experience in the many roles required to produce a finished game. Drexel University offers multiple opportunities to support the entrepreneurially minded student, from the Entrepreneurial Game Studio (<https://egs.excite.drexel.edu>) to the Close School of Entrepreneurship (<http://drexel.edu/close>) and the Baiada Institute for Entrepreneurship (<http://drexel.edu/baiada>).

To complement the creative focus of the Game Design & Production major, a minor in Computer Science is popular, and in many cases an ideal supplement for Game Design & Production students. This minor increases programming knowledge while maintaining a creative design and production focus. This or any of the over 100 minors available at Drexel would be easy to achieve within a plan of study using free electives. For the computer-engineering-focused, a sister concentration in game programming and development (<http://catalog.drexel.edu/undergraduate/collegeofcomputingandinformatics/gameprogramminganddevelopment>) is offered as part of Drexel's major in computer science (<http://catalog.drexel.edu/undergraduate/collegeofcomputingandinformatics/computerscience>).

### Additional Information

To find out more about this major, visit the Westphal College's Game Design & Production Major (<http://www.drexel.edu/westphal/undergraduate/GDAP>) page.

### Degree Requirements

General education requirements

CIVC 101	Introduction to Civic Engagement	1.0
COM 230	Techniques of Speaking	3.0
COOP 101	Career Management and Professional Development	0.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0

## Co-op/Career Opportunities

Drexel students have broad training in all areas of game design and production, and our students have career opportunities in both entertainment gaming and broader simulation/training industries, and anywhere interactive gaming technology is applied - a growing segment in all industries.

## Co-op Experiences

Building a career often begins with a few key contacts - especially through alumni already working in the industry - and the co-op program gives Drexel students the chance to meet professionals, making their skills known, and build their personal network. A recent co-op student at Microsoft Studios worked with producers on several different titles and

was offered a job in their junior year that was waiting for them after they completed their senior year.

In addition to small and large entertainment companies, students have opportunities to explore how game design is applicable to many local and international industries ranging from aerospace to pharmaceuticals to yacht design.

Recent co-op opportunities include game and digital media jobs in Philadelphia region companies like *eNable Games*, *Entrepreneurial Game Studio*, *iD Tech Game Design & Development Academy*, *IDEA*, *Penn Medicine*, *PHL Collective*, *Skyless Game Studios*, and *Virtual Health*.

Students also secured game and digital media co-ops at national and international companies, like *Rockstar Games* in San Diego and *Inter Media Japan* in Tokyo.

## Career Experiences

Our network of successful game development students work in leading entertainment companies including *343 Industries*, *Blizzard*, *Disney*, *EA Games*, *Ghost Story Games*, *Industrial Light & Magic*, *Irrational Games*, *Microsoft Studios*, *Microsoft Xbox*, *Midway*, *NCsoft*, *NeatherRealm Studios*, *Nexon*, *Oculus VR*, *Riot Games*, *Rockstar Games*, *Schell Games*, *Sony SCEA*, *Spry Fox*, *The Coalition*, *Turn 10 Studios*, *Volition*, and *Zynga*.

Other students chose small-to-mid-size studios or launch their own digital media, like *Tom Fulp*, founder of *Newgrounds.com*, or indie game companies, like *Dan Fornace*, creator of *Rivals of Aether*, and *Greg Lobanov*, creator of *Wandersong*. Students also chose to work outside of entertainment by applying their game production skills to training, simulation, or marketing endeavors with companies including *Comcast*, *Lockheed Martin*, and *Vanguard*.

Jobs titles include *Art Director*, *Animator*, *Associate Producer*, *Character Animator*, *Cinematic Lead*, *Cinematics Animator*, *Community Manager*, *Digital Project Coordinator*, *Facial Capture Artist*, *Game Designer*, *Lead Cinematic Animator*, *Lead Technical Director*, *Lead Virtual Production Manager*, *Marketing Manager*, *Motion Capture Technician*, *Previsualization Supervisor*, *Program Manager*, *Programmer*, *Senior Animator*, *Senior Artist*, *Senior Community Manager*, *Simulation Developer*, *Technical Artist*, and *Virtual Production Engineer*.

Visit the Drexel Steinbright Career Development Center (<http://www.drexel.edu/scdc>) page for more detailed information on co-op and post-graduate opportunities, or Drexel's RePlay Lab careers (<http://www.replay.drexel.edu/careers.html>) page.

## Dual Accelerated Degrees

### BS/MS in Digital Media

The accelerated degree programs enable academically qualified students to earn both a bachelor's and a master's degree in five years instead of six — graduating sooner than they would in traditional programs. In addition, the graduate-level courses students take in their junior and senior years are included in their undergraduate tuition, which saves almost a year's worth of their MS tuition.

Current Drexel students may apply for an accelerated degree programs through the Graduate College of Drexel University (<http://drexel.edu/graduatecollege>) after completing 90.0 credits, but no more than 120.0 credits. Many of our accelerated students have gone on to careers at

leading companies including *Pixar, Microsoft Studios, Dreamworks, NCSoft, and Disney.*

## Game Design and Production Faculty

Milady S. Bridges, BA (*Rutgers University*) Program Director, *Animation and Visual Effects*. Assistant Teaching Professor. Animation and visual effects technical artist.

Paul Diefenbach, PhD (*University of Pennsylvania*). Associate Professor. Game development, real-time rendering.

Troy Finamore, MS (*Drexel University*) Program Director, *Interactive Digital Media*. Associate Teaching Professor. Advertising, design and interactivity.

Nick Jushchyshyn, MFA (*Academy of Art University*) Program Director, *VR & Immersive Media*. Associate Professor. Visual effects, digital media and animation.

Frank J. Lee, PhD (*Carnegie Mellon University*). Professor. Human-computer interaction; cognitive engineering and science; intelligent software agents for games and education.

Robert Lloyd, MFA (*Temple University*) Program Director, *Game Design & Production*. Assistant Teaching Professor. Game development, themed entertainment and motion simulation.

Natalie Mathe, PhD (*National School of Space and Aeronautics, France*) Program Director, *Digital Media Graduate*. Assistant Professor. VR, immersive film, and visual effects.

David Mauriello, BA (*Lafayette College*). Assistant Professor. 3D modeling and animation.

Glen Muschio, PhD (*Temple University*). Associate Professor. Digital media, society, communication.

Emil Polyak, MDCArtDes (*University of New South Wales*). Assistant Professor. Cross-disciplinary art and design

Stefan Rank, PhD (*Vienna University of Technology*). Associate Professor. Artificial intelligence, game design and human-computer interaction.

Daniel Rose, BS (*Purdue University*). Assistant Teaching Professor. AAA and freelance game developer and environmental artist

Tony Rowe Assistant Teaching Professor. AAA game developer, writer, level designer, and historian.

Jervis Thompson, BS (*Drexel University*). Teaching Professor. Digital media, interactive multimedia.

Michael Wagner, PhD (*Vienna University of Technology*) Program Director, *Digital Media*. Associate Professor. Educational use of digital media and computer games.

Jichen Zhu, PhD (*Georgia Institute of Technology*). Associate Professor. Developing humanistic and interpretive framework of computational technology, particularly artificial intelligence (AI), and constructing AI-based cultural artifacts; interactive storytelling, games and software studies.

## Emeritus Faculty

Theo Artz, BFA (*Tyler School of Art, Temple University*). Associate Professor. Digital media.

## Graphic Design

Major: *Graphic Design*

Degree Awarded: *Bachelor of Science (BS)*

Calendar Type: *Quarter*

Total Credit Hours: *183.0*

Co-op Options: *One Co-op (Four years)*

Classification of Instructional Programs (CIP) code: *50.0409*

Standard Occupational Classification (SOC) code: *27-1024*

## About the Program

Westphal College's graphic design curriculum provides a balance of theory and practice in rigorous design study enhanced by general education coursework in the humanities and the physical and social sciences. Students learn to conceptualize, visualize and realize visual communications through the rigor of project-based exploration and experimentation based on the formal foundations of typography, image-making, aesthetics and critical thinking. Graphic design students are immersed in all aspects of visual communications, such as books, magazines and publications (print and screen based), posters, advertising, packaging, web, motion and interactive design, exhibition design and data visualization. Working on two- and three-dimensional projects and electronic media, students utilize the latest applications and emerging technologies to stay current with the industry.

Graphic design students can also pursue advanced elective coursework in web and motion graphic design, environmental graphic design, experimental publication design and other interdisciplinary special topics projects.

## Additional Information

For more information about the major, visit the Graphic Design (<http://www.drexel.edu/westphal/academics/undergraduate/VSCM>) program web page or contact Program Director Bill Rees ([wbr24@drexel.edu](mailto:wbr24@drexel.edu)).

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Sample Plan of Study

### BS in Graphic Design: General Plan of Study

		Credits
<b>Term 1</b>		
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
PHYS 121	Physical Science for Design I	4.0
UNIV A101	The Drexel Experience	1.0
VSST 101	Design I	4.0
VSST 110	Introductory Drawing	3.0
Term Credits		15.0
<b>Term 2</b>		
ARTH 101	History of Art I: Ancient to Medieval	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
UNIV A101	The Drexel Experience	1.0
VSST 102	Design II	4.0
Natural science elective		4.0
Term Credits		15.0
<b>Term 3</b>		
ARTH 102	History of Art II: Renaissance to Romanticism	3.0
CIVC 101	Introduction to Civic Engagement	1.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
MATH 119	Mathematical Foundations for Design	4.0
VSCM 100	Computer Imaging I	3.0
VSST 103	Design III	4.0
Term Credits		18.0
<b>Term 4</b>		
ARTH 103	History of Art III: Modern Art	3.0
PHTO 110	Photography	3.0
VSCM 200	Computer Imaging II	3.0
VSCM 230	Visual Communication I	4.0
VSCM 240	Typography I	3.0
Term Credits		16.0
<b>Term 5</b>		
COOP 101	Career Management and Professional Development	0.0
PHTO 210	Intermediate Photography	3.0
VSCM 231	Visual Communication II	4.0
VSCM 242	Typography II	3.0
VSST 111	Figure Drawing I	3.0
Term Credits		13.0
<b>Term 6</b>		
VSCM 232	Visual Communication III	4.0
VSCM 241	Production	3.0
WMGD 220	Web Graphics I	4.0
Free elective		3.0
Term Credits		14.0
<b>Term 7</b>		
ARTH 300 [WI]	History of Modern Design	3.0
VSST 321	Screenprint I	4.0
WMGD 330	Web Graphics II	4.0
Arts and Humanities elective		3.0
Social Science elective		3.0
Term Credits		17.0
<b>Term 8</b>		
VSCM 340	Typography III	3.0
VSCM 332	Visual Communication IV	4.0
WMGD 210	Motion Graphics I	4.0
Visual Studies (VSST) elective		4.0
Arts and Humanities elective		3.0
Term Credits		18.0
<b>Term 9</b>		

VSCM 350 [WI]	Graphic Design: 20th Century and Beyond	3.0
VSCM 333	Visual Communication V	4.0
VSST 301	Painting I	4.0
Social science elective		3.0
Arts and Humanities elective		3.0
Term Credits		17.0
<b>Term 10</b>		
VSCM 430	Visual Communication VI	4.0
VSCM 440	Book Design	4.0
Social science elective		3.0
Free elective		3.0
Term Credits		14.0
<b>Term 11</b>		
VSCM 450	Professional Portfolio	3.0
Free electives		9.0
Term Credits		12.0
<b>Term 12</b>		
VSCM 460	Professional Practice	3.0
VSCM 496	Senior Thesis Graphic Design	3.0
Free electives		8.0
Term Credits		14.0

Total Credit: 183.0

See degree requirements (p. 506) for list of Graphic Design electives.

- \* Visual Studies (VSST) elective: choose from any upper-level VSST course.

## Co-op/Career Opportunities

Potential employers include advertising agencies, publishers, printers, independent and in-house design studios, museums and galleries, magazines and newspapers, and television. Training in visual communication prepares an individual for careers in many fields because the problem-solving methods and organizational skills it builds are widely applicable.

## Co-op Experiences

Following is a sampling of graphic design co-op employers:

- Comcast (<http://corporate.comcast.com>)
- Esquire (<http://www.esquire.com>)
- The Franklin Institute (<https://www.fi.edu>)
- Hasbro (<https://www.hasbro.com/en-us>)
- Intuitive Company (<http://intuitivecompany.com>)
- National Constitution Center (<https://constitutioncenter.org>)
- Philadelphia Museum of Art (<http://www.philamuseum.org>)
- Philadelphia Union (<http://www.philadelphiaunion.com>)
- Quirk Books (<http://www.quirkbooks.com>)
- Razorfish (<https://www.razorfish.com>)
- WebLinc (<https://www.weblinc.com>)

## Career Opportunities

Our graphic design alumni go on to successful careers in a range of positions including lead designer, creative director, art director, interaction designer, user experience director, and owner or partner of firms. Some of the companies where you will find our alumni include:

- AgileCat (<http://agilecat.com>)
- America's Test Kitchen (<https://www.americastestkitchen.com>)
- Ann Taylor Inc (<http://www.anninc.com>)
- Apple (<https://www.apple.com>)
- Bloomberg (<https://www.bloomberg.com>)
- Blue Cadet (<http://www.bluecadet.com>)
- Brooks Brothers (<http://www.brooksbrothers.com>)
- Comcast Corporation (<http://corporate.comcast.com>)
- Conde Nast (<http://www.condenast.com>)
- eCity Interactive (<http://www.ecityinteractive.com>)
- ESPN (<http://www.espn.com>)
- ex;it (<http://www.exploreexit.com>)
- Facebook (<https://www.facebook.com/careers/?ref=pf>)
- The Franklin Institute (<https://www.fi.edu>)
- Intuitive Company (<http://intuitivecompany.com>)
- Kikkerland (<https://kikkerland.com>)
- Longwood Gardens (<https://longwoodgardens.org>)
- Marvel Entertainment (<http://marvel.com>)
- Michael Graves Design Group (<https://michaelgraves.com>)
- National Constitution Center (<https://constitutioncenter.org>)
- QVC (<http://www.qvc.com>)
- Philadelphia Museum of Art (<http://www.philamuseum.org>)
- Saatchi & Saatchi (<http://saatchi.com/en-us>)
- Sesame Workshop (<http://www.sesameworkshop.org>)
- Time Inc. (<https://www.timeinc.com>)
- Under Armour (<https://www.underarmour.com/en-us>)
- Vera Bradley (<https://www.verabradley.com/us/Home>)

Visit the Drexel Steinbright Career Development Center (<http://www.drexel.edu/scdc>) page for more detailed information on co-op and post-graduate opportunities.

## Facilities

The graphic design studios are located on the fourth floor of the URBN Center in the Antoinette Westphal College of Media Arts and Design. There are five dedicated studios equipped with up-to-date electronic and traditional tools. Studios have work surfaces for traditional practices that will accommodate 15 students, and wall surfaces for critiques or posting examples of printed work. In addition, students have access to a dedicated, non-scheduled graphic design "open lab" equipped with all necessary technology and work surfaces.

## Graphic Design Faculty

Joshua Gdovin, BS (*Drexel University*). Visiting Teaching Professor. Graphic design; web graphics; motion graphics, and thesis.

Jody Graff, BS (*Drexel University*) Program Director, Graphic Design. Associate Professor. Graphic design; publication design, annual report design, three-dimensional graphics and packaging, environmental graphic design (exhibition and wayfinding), and thesis.

Eric Karnes, MFA (*Virginia Commonwealth University*). Assistant Professor. Graphic design; logo design, corporate identity, typography,

advanced typography, publication design, book design, professional portfolio, thesis.

David Raizman, PhD (*University of Pittsburgh*). Professor. Graphic design; History of Modern Design, Graphic Design; 20th Century & Beyond

William Rees, BS (*Drexel University*) Associate Program Director, *Graphic Design*. Associate Teaching Professor. Graphic design; logo design, corporate identity, publication design, electronic imaging, print production, professional portfolio, and thesis.

Sandra Stewart, BFA (*Tyler School of Art, Temple University*) Academic Associate Dean, *Antoinette Westphal College of Media Arts and Design*. Associate Professor. Graphic design; logo design, corporate identity, publication design, three-dimensional graphics and packaging, and thesis.

Mark Willie, MFA (*Boston Museum School of Fine Arts*). Teaching Professor. Graphic design; typography, logo design, corporate identity, publication design, book design, professional portfolio, and thesis.

Shushi Yoshinaga, BFA (*Philadelphia College of the Arts*). Associate Professor. Graphic design; letterform, typography, and thesis.

## Interactive Digital Media

*Major: Interactive Digital Media*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 186.0*

*Co-op Options: One Co-op (Four years)*

*Classification of Instructional Programs (CIP) code: 11.0801*

*Standard Occupational Classification (SOC) code: 15-1134; 27-1014*

### About the Major

Technology and your future career prospects are evolving at lightning speeds. Where it was once as simple as pursuing “website design” or “programming,” today’s world offers—and demands—more. To truly succeed in tech, you need creativity, versatility, and an interdisciplinary skillset. You need to be able to see through the eyes of the user and understand projects from start to finish. You need to be a unicorn.

Interactive Digital Media (IDM) helps you get there.

By combining principles from a range of disciplines, IDM gives you the tools not only to understand technology but also the human principles underpinning it. You’ll get exposure to:

- **User Experience Design (UX)**—Researching and advocating for the needs of people who will be using technologies, prototyping digital products, and working with agile methodologies
- **User Interface and Interaction Design (UI/IXD)**—Using tools like Adobe Creative Suite to create visual experiences for technology products
- **Development**—Programming the code (HTML/CSS, Javascript, PHP/MySQL, etc.) that makes products work in a variety of media (websites, apps, augmented and virtual reality, Internet of Things, etc.)
- **Information Architecture (IA) and Content Strategy**—Organizing and planning information systems for digital products
- **Project Management**—Managing workflows to keep teams on track

As a freshman, you learn the basics of design. In sophomore year, you learn the coding and development skills to bring those designs to life. Your junior and senior studies are focused on electives and interdisciplinary teamwork. You’ll spend six months working full-time within a company through Drexel’s Cooperative Education program, and your capstone project will result in a full-scale, industry-level product launch.

By the end of this program, you’ll have real-world experience, an enviable portfolio, and the highly adaptable skills to find your way in the uncertain, ever-evolving world of tech.

### Additional Information

To find out more, visit the Westphal College’s Interactive Digital Media major (<http://drexel.edu/westphal/academics/undergraduate/IDM>) web page to see student projects (<http://drexel.edu/westphal/academics/undergraduate/IDM/Creative-Work>) and successful alumni (<http://drexel.edu/westphal/academics/undergraduate/IDM/Alumni%20Spotlight>).

### Degree Requirements

#### General Education Requirements

CIVC 101	Introduction to Civic Engagement	1.0
COM 230	Techniques of Speaking	3.0
COOP 101	Career Management and Professional Development	0.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
MATH 119	Mathematical Foundations for Design	4.0
PHYS 121	Physical Science for Design I	4.0
PHYS 122	Physical Science for Design II	4.0
PSY 330	Cognitive Psychology	3.0
PSY 332	Human Factors and Cognitive Engineering	3.0
PSY 337	Human-Computer Interaction	3.0
UNIV A101	The Drexel Experience	2.0
Arts & Humanities-students elective		3.0
History (HIST) elective		3.0
Literature (ENGL) elective		3.0
Free electives		24.0

#### Art and Art History Requirements

ARTH 103	History of Art III: Modern Art	3.0
ARTH 300 [WI]	History of Modern Design	3.0
ARTH 314	Contemporary Art	3.0
VSST 108	Design I for Media	3.0
VSST 109	Design II for Media	3.0
VSST 110	Introductory Drawing	3.0

#### Business & Management Requirements

EAM 211	Strategic Management for Entertainment and Arts Management	3.0
---------	--	-----

#### Media Requirements

DIGM 220	Digital Still Imaging I	3.0
FMVD 206	Audio Production and Post	3.0
WEST 107	Maker Workshop	3.0

#### Digital Media Core Requirements

ANIM 115	Introduction to Production with Animation & VFX	3.0
DIGM 105	Overview of Digital Media	3.0
DIGM 223	Creative Concept Design	3.0
DIGM 350 [WI]	Digital Storytelling	3.0
DIGM 475 [WI]	Seminar: The Future of Digital Media	3.0
DIGM 490	Digital Media Senior Project	9.0
DIGM 491	Digital Media Senior Project Studio	3.0
GMAP 260	Overview of Computer Gaming	3.0

**Interactive Digital Media Requirements**

IDM 101	History of Web Development	3.0
IDM 211	User Interface Design I	3.0
IDM 212	User Interface Design II	3.0
IDM 213	Interaction Design	3.0

## Co-op/Career Opportunities

Students who study interactive digital media can move on to careers as web designers, graphic designers, digital media designers, user research & experience specialists, multimedia artists, interactive designers, web programmers, and web user interface designers.

## Co-op Experiences

Some past co-op employers of interactive digital media students include:

- Brownstein Group
- Comcast
- Digitas Health
- eCity Interactive
- Electronic Ink
- Happy Cog

Visit the Drexel Steinbright Career Development Center (<http://drexel.edu/scdc>) web page for more detailed information on co-op and post-graduate opportunities.

## Dual Accelerated Degree

The accelerated degree program enables academically qualified students to earn both their bachelor's degree and a master's degree in digital media — graduating sooner than they would in traditional programs.

Current Drexel digital media students may apply for the accelerated BS/MS degree through the Graduate College after completing 90.0 credits, but no more than 120.0 credits. Contact the Graduate College (<http://www.drexel.edu/graduatecollege>) for further information.

## Facilities

Digital media program facilities include a motion capture and green screen studio, a screening room, DSLR digital still cameras, HD video cameras and lighting equipment, triple boot PowerMac stations (Mac / Windows / Unix) with dual monitors, wacom tablets, game consoles, mobile devices, and 2 undergraduate open labs with 24/7 access.

Additionally, the program houses the RePlay Lab (<http://replay.drexel.edu/facilities.html>) in the URBN Center which is a collaborative effort between the Digital Media program and the Computer Science department (in the College of Computing & Informatics). At Drexel University, game development does not "live" in solely one department, and so mirrors the true nature of game development in commercial settings.

## Interactive Digital Media Faculty

Kurt Aspland, BFA (*Art Center College of Design*). Adjunct Instructor. Illustrator, graphic designer and creative director

Chester Cunan, BS (*Drexel University*). Adjunct Instructor.

Paul Diefenbach, PhD (*University of Pennsylvania*). Associate Professor. Game development, real-time rendering.

Christopher Fernandez, BS (*Drexel University*). Adjunct Instructor. Designer and illustrator in the world of interactive design creating innovative, exciting digital campaigns and solutions

Troy Finamore, MS (*Drexel University*) *Program Director, Interactive Digital Media*. Associate Teaching Professor. Advertising, design and interactivity.

Bernard Flakoff, BS (*Temple University*). Adjunct Instructor. Creative content and strategic analytics for innovative and advanced technology platforms

Kevin Gross, MS (*Drexel University*). Adjunct Instructor.

Nick Jushchyshyn, MFA (*Academy of Art University*) *Program Director, VR & Immersive Media*. Associate Professor. Visual effects, digital media and animation.

Jason Kirk, MS (*Drexel University*). Adjunct Instructor.

Frank J. Lee, PhD (*Carnegie Mellon University*). Professor. Human-computer interaction; cognitive engineering and science; intelligent software agents for games and education.

Robert Lloyd, MFA (*Temple University*) *Program Director, Game Design & Production*. Assistant Teaching Professor. Game development, themed entertainment and motion simulation.

David Mauriello, BA (*Lafayette College*). Assistant Professor. 3D modeling and animation.

Glen Muschio, PhD (*Temple University*). Associate Professor. Digital media, society, communication.

Kenneth Oum, MS (*Drexel University*). Professor. Computer interface gaming, web development, video production.

Mark Petrovich, MS (*Drexel University*). Adjunct Instructor.

Stefan Rank, PhD (*Vienna University of Technology*). Associate Professor. Artificial intelligence, game design and human-computer interaction.

Ryan Reed, BS (*Drexel University*). Adjunct Instructor.

Patrick Richardson, MS (*Drexel University*). Professor. Applied physics, electronics, software scripting, and physical computing.

Philip Sinatra, BS (*Drexel University*). Professor. Website/application programming.

Jervis Thompson, BS (*Drexel University*). Teaching Professor. Digital media, interactive multimedia.

Michael Wagner, PhD (*Vienna University of Technology*) *Program Director, Digital Media*. Associate Professor. Educational use of digital media and computer games.

Ed Yakovich, MS (*Philadelphia University*). Professor. HTML/CSS/JS architecture and best practices.

Kenneth Yanoviak, BA (*Temple University*). Adjunct Instructor. Digital photographer

Diane Zatz Adjunct Instructor.

Jichen Zhu, PhD (*Georgia Institute of Technology*). Associate Professor. Developing humanistic and interpretive framework of computational technology, particularly artificial intelligence (AI), and constructing AI-based cultural artifacts; interactive storytelling, games and software studies.

## Emeritus Faculty

Theo Artz, BFA (*Tyler School of Art, Temple University*). Associate Professor. Digital media.

## Interior Design

*Major: Interior Design*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 186.0*

*Co-op Options: One Co-op (Four years)*

*Classification of Instructional Programs (CIP) code: 50.0408*

*Standard Occupational Classification (SOC) code: 27-1025*

## About the Program

The undergraduate interior design program explores the behavioral, technological, environmental and aesthetic aspects of interior design within the context of increasingly more complex design projects. Combined with art and art history and general education requirements, a core of interior design courses creates a unique education at the forefront of design. Through academics grounded in problem-solving design studios, cooperative employment, and a dedicated faculty, the Interior Design program prepares students for leadership positions in the industry. The Interior Design program is consistently ranked among the top programs in the country, and in the survey by DesignIntelligence of "America's Best Design Schools."

The BS interior design program is CIDA (Council for Interior Design Accreditation) and NASAD (National Association of Schools of Art & Design) accredited.

## Program Philosophy and Mission

The mission of the Interior Design program is to prepare students to enter the field of interior design as skilled designers, creative thinkers, professional leaders and responsible citizens. We cultivate students who acknowledge their responsibilities to the safety and well-being of the public and the stewardship of the environment to lead a multifaceted profession in an ever-changing world. The curriculum combines a studio-based design sequence with broad liberal arts study and experiential learning. Paired with a well-established professional co-op, the coursework is structured to build upon the fundamentals of interior design and to anticipate and reflect change in a continually evolving industry. The program encourages exploration and experimentation that fosters life-long learners who will contribute to the profession and the discipline's body of knowledge.

For more information about this major, visit the College's Interior Design (<http://www.drexel.edu/westphal/academics/undergraduate/INTR>) page.

## Degree Requirements

### General education requirements

CIVC 101	Introduction to Civic Engagement	1.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
MATH 101	Introduction to Analysis I	4.0
PHYS 182	Applied Physics I	3.0

Total Credits		186.0

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Sample Plans of Study

### Interior Design: Cycle A

(See Below for Cycle B plan of study)

Term 1		Credits
ARTH 101	History of Art I: Ancient to Medieval	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
MATH 101	Introduction to Analysis I	4.0
UNIV A101	The Drexel Experience	1.0
VSST 101	Design I	4.0
Term Credits		15.0
<b>Term 2</b>		
ARTH 102	History of Art II: Renaissance to Romanticism	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
UNIV A101	The Drexel Experience	1.0
VSST 102	Design II	4.0
VSST 110	Introductory Drawing	3.0

Arts & Humanities Elective		3.0
Term Credits		17.0
<b>Term 3</b>		
ARTH 103	History of Art III: Modern Art	3.0
CIVC 101	Introduction to Civic Engagement	1.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
INTR 160	Visualization I: Computer Imaging	3.0
INTR 200	History of Modern Architecture and Interiors	3.0
VSST 103	Design III	4.0
Term Credits		17.0
<b>Term 4</b>		
INTR 220	Visualization II: Orthographic	3.0
INTR 225	Environmental Design Theory	3.0
INTR 231	Structure	4.0
INTR 250	Interior Materials	3.0
Free Elective		3.0
Term Credits		16.0
<b>Term 5</b>		
COOP 101	Career Management and Professional Development	0.0
INTR 232	Interior Studio I	4.0
INTR 241	Visualization III: Digital	3.0
INTR 300 [WI]	Visual Culture: Interiors	3.0
PHYS 182	Applied Physics I	3.0
SOC 101	Introduction to Sociology	3.0
Term Credits		16.0
<b>Term 6</b>		
INTR 211	Textiles for Interiors	3.0
INTR 233	Interior Studio II	4.0
INTR 245	Visualization IV: 3D Modeling	3.0
Natural science elective		4.0
Free elective		3.0
Term Credits		17.0
<b>Term 7</b>		
INTR 305 [WI]	Visual Culture: Furniture	3.0
INTR 331	Residential Design Studio	4.0
INTR 341	Visualization V: Methods	3.0
INTR 350	Interior Detailing	3.0
VSST 202 or 201	Multimedia: Space Multimedia: Performance	4.0
Term Credits		17.0
<b>Term 8</b>		
INTR 351	Interior Lighting	3.0
INTR 430	Commercial Design Studio	4.0
INTR 451	Interior Systems	3.0
VSST 203	Multimedia: Materials	4.0
Arts and humanities elective		3.0
Term Credits		17.0
<b>Term 9</b>		
Arts and humanities elective		3.0
Social science elective		3.0
Free electives		9.0
Term Credits		15.0
<b>Term 10</b>		
INTR 442	Hospitality Design Studio	4.0
INTR 445	Contract Documentation for Interior Design	3.0
INTR 491	Senior Project I	3.0
VSST 301 or 311	Painting I Sculpture I	4.0
Term Credits		14.0
<b>Term 11</b>		
INTR 441	Furniture Design	4.0
INTR 450 [WI]	Professional Practice	3.0

INTR 492	Senior Project II	3.0
Free electives		3.0
Term Credits		13.0
<b>Term 12</b>		
INTR 493	Senior Project III	3.0
Free electives		6.0
Social Science Elective		3.0
Term Credits		12.0
Total Credit: 186.0		

## Interior Design: Cycle B

Term		Credits
<b>Term 1</b>		
ARTH 101	History of Art I: Ancient to Medieval	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
MATH 101	Introduction to Analysis I	4.0
UNIV A101	The Drexel Experience	1.0
VSST 101	Design I	4.0
Term Credits		15.0
<b>Term 2</b>		
ARTH 102	History of Art II: Renaissance to Romanticism	3.0

## Co-op/Career Opportunities

Interior design is a multi-faceted field and includes careers with interior design firms, architectural firms, and facilities management organizations; in governmental agencies; and in the furniture and textile industries. Full-time paid employment in the profession is an integral component of the program at Drexel. The six-month co-operative education, undertaken in the junior year, provides project-based experience as well as the daily operation of a design firm. Students may opt to do their co-op in Philadelphia or in another location of their choosing. Through a required course and career advisement services offered by the Steinbright Career Development Center, students develop the ability to market themselves and obtain jobs in leading firms, worldwide.

## Co-op Experiences

Some past co-op employers of interior design students include:

- Ballinger
- Children's Hospital of Philadelphia Facilities
- Daroff Design
- DAS
- Disney
- Eberlein Design Consultants
- Ewing Cole
- Floss Barber Inc.

- Gensler
- Hillier Lewis
- Herman Miller
- HOK
- Jacobs Associates
- Knoll International
- L2 Partridge
- Marguerite Rogers
- Nelson
- Perkins Eastman
- RJMJ
- Stantec
- University of Pennsylvania
- West Chester University

Visit the Drexel Steinbright Career Development Center (<http://www.drexel.edu/scdc>) page for more detailed information on co-op and post-graduate opportunities.

## About the Accelerated Degree Program

Qualified students in Interior Design have the option of continuing into the graduate Interior Architecture + Design program to obtain a dual BS/MS degree. This program allows highly motivated students to graduate with both degrees in a total of five years. Students apply for this accelerated program when they complete 90.0 credits of coursework, and before completing 120.0 credits.

Additional requirements for acceptance into the Dual Degree Program:

- Overall GPA of undergraduate coursework – 3.2 minimum
- Overall GPA of interior design studio coursework – 3.5 minimum
- Portfolio Review: interior studio work and foundation visual work
- Essay: reason for application, professional goals and leadership qualities you possess
- Two letters of recommendation speaking to your work ethic and leadership skills

## Evaluation Process

A committee of interiors faculty reviews the applications and discusses the merits of the student to undergo the intensity and rigor of the final two years of the program. The Committee consists of no less than three members – Director of the Interiors programs, Associate Director BS Interior Design program and the Associate Director MS Interior Architecture & Design program.

Students should visit the Westphal College of Media Arts and Design (<http://www.drexel.edu/westphal>) for more information.

## Facilities

The Interior Architecture program is housed in URBN Center, an original Venturi Scott Brown building enhanced by an award-winning retrofit by MS&R Design, including a skylight covered atrium, exposed beams and open spaces. There is a dedicated 24-hour graduate student studio, with storage space, computers, and a small lounge area. We have a materials library that is continually updated with samples from major manufacturers and local design offices and showrooms; two computer labs and in-house printing for the use of our students; a Hybrid Making Lab ([http://drexel.edu/westphal/about/overview/making\\_spaces/HybridMakingLab](http://drexel.edu/westphal/about/overview/making_spaces/HybridMakingLab))

with laser cutters, 3D printers, a CNC router and small-scale power tools for student use; and a larger shop facility which offers larger wood, metal, casting, CNC, and fabrication equipment.

The URBN Annex houses a black box theater, screening room and the Leonard Pearlstein Gallery (<http://www.drexel.edu/pearlsteingallery>). Additional studio and classroom space in the Academic Building and the Design Arts Annex accommodate photography, basic design, painting, sculpture and a full woodworking shop with industrial-quality equipment.

Philadelphia, one of the nation's major design centers, gives interior design students the vitality of the contemporary arts at local galleries; easy access to many museums, libraries, renowned buildings, as well as design centers located in Philadelphia, New York City and Washington, D.C.

## Architecture & Interiors Faculty

David Ade, AIA, LEED A.P., NCARB, BArch (*Drexel University*). Adjunct Associate Professor. Principal, SMP Architects, sustainable design

Ulrike Altenmuller-Lewis, AIA, Dr.-Ing. (*Bauhaus Universitat Weimar*). Associate Professor. Research on educational environments; translations of architectural theory texts.

Stephen Bonitatibus, AIA, MArch (*University of Pennsylvania*). Adjunct Professor. Principal, Bonitatibus Associates; traditional residential architecture.

Anthony Bracali, AIA, LEED A.P., BArch (*Drexel University*). Adjunct Associate Professor. President, Friday Architects; civic, non-profit and community-based architecture.

Mark Brack, PhD (*University of California at Berkeley*). Associate Professor. British and American architecture from 1700 to the present; Hispanic colonial architecture in the American Southwest; vernacular architecture; historic preservation.

Daniel Chung, RA, PE, MArch, MSE (*Yale University, Princeton University*). Assistant Professor. Building performance and exterior envelope systems.

Jon Coddington, AIA, MArch (*University of Pennsylvania*). Professor. Architecture, urban design and planning.

Rena Cumby, BArch, MS (*Drexel University*) *Department Head, Department of Architecture & Interiors*. Associate Professor. Interior designer; foundation studies and design education.

John DeFazio, AIA, BArch (*New York Institute of Technology*). Adjunct Professor. Architecture in film.

Katherine Dowdell, AIA, BS Interior Design (*Drexel University*). Adjunct Assistant Professor. Principal, Farragut Street Architects; historic preservation

Eugenia Ellis, RA, PhD (*Virginia Polytechnic State University*). Associate Professor. Extended-care facilities design, research on spatial visualization, perception and imagination.

Dyer Alfred "Lyndsay" Falck, RA, ARCUK, ARIBA, NCARB, M.URP (*University of Capetown, South Africa*). Adjunct Professor. Building technology

Jeff Fama, MArch (*State University of New York at Buffalo*). Adjunct Associate Professor. Retail, entertainment, and theater design.

Susan Feenan, BArch (*Temple University*). Adjunct Assistant Teaching Professor. Institutional and commercial architecture.

Gary Garofalo, BS Arch Eng (*Pennsylvania State University*). Adjunct Assistant Professor. Principal Lighting Design Collaborative; lighting expert, lighting design.

Alan Greenberger, FAIA (*Rensselaer Polytechnic Institute*) Department Head, *Architecture, Design & Urbanism*. Distinguished Teaching Professor. Urban planning, economic development, urban governance

Don Jones, FAIA, LEED DD+C, MArch (*University of Pennsylvania*). Adjunct Professor. Principal, Director of Sustainable Design, Ewing Cole; sports venues.

Tim Kearney, AIA, MArch (*University of Pennsylvania*). Adjunct Professor. Principal, CuetoKEARNEY design; sustainable design

Nicole Koltick, MArch (*University of California*) Director, *Design Futures Lab*. Assistant Professor. Researching possibilities for architecture and design through the use of unexpected and innovative interdisciplinary models. Foundation design studios, fabrication and technology seminars.

Jeffrey Krieger, AIA, LEED AP, MArch (*Carnegie Mellon University*). Adjunct Associate Professor. President, Krieger and Associates Architects; residential design.

Karin Kuenstler, MS (*Bank Street College of Education and Parsons*) Associate Dean for Research and Graduate Studies. Associate Professor. Interior design for corporate and commercial facilities.

Maria Kuttruff, MS (*Drexel University*). Adjunct Assistant Professor. Owner/Principal, Viola Interior Design, LLC. Residential interior design.

Robert Nalls, AIA, NCARB, MArch (*University of Pennsylvania*). Adjunct Professor. Principal, Nalls Architecture Inc.; institutional and educational buildings.

Diana S. Nicholas, RA, AIA, NCARB, MFA (*University of the Arts, Philadelphia*) Associate Director of MS Interior Architecture and Design, Director, Sustainability in the Built Environment minor. Assistant Professor. Coordinator, Sustainability in the Built Environment

Jacklynn Niemiec, LEED BD+C, MArch (*University of Pennsylvania*). Assistant Teaching Professor. Graphic representation

Karen Pelzer, NCIDQ, BS Interior Design (*Drexel University*). Assistant Teaching Professor. President, Karen Pelzer Interiors; hospitality design.

Marilynne L. Rose, NCIDQ, MS (*Drexel University*). Associate Teaching Professor. Residential and commercial design.

James Rowe, AIA, MArch (*University of Pennsylvania*). Adjunct Associate Professor. Principal, Studio Agoos Lovera; institutional, recreation, corporate, civic and residential design.

Debra Ruben, MS, IDEC, LEED AP, NCIDQ (*Drexel University*) Director of Interiors Programs. Associate Professor. Research on user participation and the design process.

Paul Salvaggio, AIA, LEED AP, NCARB, BArch, BS Arch (*Pennsylvania State University*). Adjunct Assistant Professor. Principal, Arcus Design Group; residential architecture.

Rachel Schade, AIA, MArch (*University of Pennsylvania*) Program, *Architecture, Associate Director for Student Placement*. Associate Teaching Professor. Principal, Rachel Simmons Schade Architect. Work-study placement; residential, graphic representation.

Harris Steinberg, FAIA, MArch (*University of Pennsylvania*) Executive Director, *Lindy Institute for Urban Innovation*. Distinguished Teaching Professor. Urban design and civic engagement.

Simon Tickell, AIA, MArch (*University of Pennsylvania*). Associate Teaching Professor. Principal, Simon J Tickell Architect; educational and museum buildings, residential design

Nancy Trainer, FAIA, AICP, LEED, AFAAR, MArch (*University of Pennsylvania*) Associate Vice President of Design & Planning at Drexel. Adjunct Teaching Professor. Planning, institutional design.

Ada Tremonte, NCIDQ, BS (*Drexel University*) Associate Director, *BS Interior Design*. Associate Teaching Professor. President, ada Design Associates; corporate/commercial design.

## Emeritus Faculty

Judith Bing, MArch (*Yale University*). Professor Emeritus. Research on traditional architecture of the Balkans and Anatolia

Sylvia Clark, MArch (*University of Pennsylvania*). Professor Emeritus.

Paul M. Hirshorn, FAIA, MArch, MCP, (*University of Pennsylvania*). Professor Emeritus.

Marjorie Kriebel, BArch (*University of Pennsylvania*). Professor Emeritus.

## Music Industry

Major: Music Industry

Degree Awarded: Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: 187.0

Co-op Options: Two Co-ops (Four years)

Classification of Instructional Programs (CIP) code: 50.1003

Standard Occupational Classification (SOC) code: 27-2041; 25-1121

## About the Program

The degree in music industry offers the highly motivated student a program of study that combines education in music, music industry practices, and music technology with career preparation. Two concentrations are offered—Music Industry Business and Recording Arts (MIBU) and Music Production (RAMP)—providing hands-on experience and a strong academic foundation in relevant areas of this rapidly changing industry. The music industry curriculum is divided into four areas which are combined with cooperative experience: general education, music core, music industry core, and concentration requirements.

In an industry where the process of career building often begins with a few key contacts, the cooperative education program provides Drexel students the opportunity to meet industry professionals and network. The program prepares students for careers in the music industry in such diverse positions as recording engineer, music producer, sound designer, music lawyer, business manager or music publisher. The co-op experience during the sophomore and junior year summer terms involves full-time career-related employment, during which students gain valuable insight into how the entertainment industry works.

## About the Concentrations

The major offers two concentrations: Music Industry Business and Recording Arts (MIBU) and Music Production (RAMP):

- The **Music Industry Business (MIBU)** concentration provides a rigorous academic foundation complemented by a real-world hands-on, highly-intensive business experience. This mission is realized through the students' participation in the MAD Dragon Music Group, a group of student-run enterprises including: MAD Dragon Records, MAD Dragon Live, MAD Dragon Publishing, and MAD Dragon Marketing.
- The **Recording Arts and Music Production (RAMP)** concentration focuses on the techniques and technologies of music and audio production. As well as providing the technology-oriented student with the necessary skills to perform as an audio engineer or record producer, the concentration teaches students a full range of industry functions including post-production audio, live sound engineering, and music and audio freelancing skills. The concentration encourages the technology student to interact with the students in the business concentration by recording, mixing and mastering the music for MAD Dragon Music Group projects, and engaging in live performance production.

All Music Industry students qualify to apply for a minor in business administration after completing their music industry core requirements. This emphasis on business courses as part of the core requirements is one of the foundations of the program.

## Special Admissions Considerations

Students wishing to be admitted to the music industry major must meet or exceed the general requirements for admission to the University and the College of Media Arts and Design.

The program no longer accepts hard-copy portfolios. However, when applying to the Music Industry program, applicants are encouraged to use the portfolio portal provided on the Admissions Instructions webpage to upload electronic examples of pertinent activities (music and/or business and entrepreneurial), as well as a resume of music industry related experience.

In their major-specific essays, applicants should address their reasons for selecting the music industry major at Drexel and share their passion for this unique area of study.

For more information about this major, visit the College's Music Industry (<http://www.drexel.edu/westphal/academics/undergraduate/MIP>) page.

## Degree Requirements

All students take the same general education, music industry core and business courses. Students choose their concentration at the time of admission; however it is possible to switch as late as the beginning of junior year.

Concentrations:

- Music Industry: Business (MIBU) Concentration
- Music Industry: Recording Arts & Music Production (RAMP) Concentration

Students are also able to take courses in any other concentration as long as they fulfill the prerequisite requirement(s) and there is room in the class to accommodate the student.

### Requirements

ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
COM 230	Techniques of Speaking	3.0
MATH 101 or MATH 121	Introduction to Analysis I Calculus I	4.0
MATH 102 or MATH 122	Introduction to Analysis II Calculus II	4.0
CIVC 101	Introduction to Civic Engagement	1.0
UNIV A101	The Drexel Experience	1.0
Required Arts and Humanities-students elect a minimum of 9 credits		9.0
Required Natural Science-students elect a minimum of 3 credits *		3.0
Required Social Science-students elect a minimum of 9 credits		9.0
Music core requirements		15.0
Music Industry core requirements		63.0
Concentration requirements		33.0-34.0
Concentration electives		9.0
Free electives **		24.0
Total Credits		187.0-188.0

\* PHYS 107 - Acoustics is recommended.

\*\* MKTG 301, PHIL 301, PSY 101 and/or PSY 150 are recommended.

### Music Core Requirements

MUSC 121 or MUSC 122	Music Theory I Music Theory II	3.0
MUSC 125	Ear Training I	1.0
MUSC 130	Introduction to Music	3.0
MUSC 190 or MUSC 191	Class Piano I Class Guitar I	2.0
MUSC 323	Songwriting	3.0
<b>Music Elective (Select one)</b>		3.0
MUSC 231	Music History I	
MUSC 232	Music History II	
MUSC 234	The Beatles	
MUSC 236	Rock Music Through the Mid-60s	
MUSC 238	Rock Music Since the Mid-60s	
MUSC 331	World Musics	
MUSC 333	Afro-American Music USA	
MUSC 336	History of Jazz	
MUSC 338 [WI]	American Popular Music	
MUSC T380	Special Topics in Music	
Total Credits		15.0

### Music Industry Core Requirements

ACCT 110	Accounting for Professionals	4.0
BLAW 201	Business Law I	4.0
ECON 201	Principles of Microeconomics	4.0
ECON 202	Principles of Macroeconomics	4.0
FIN 301	Introduction to Finance	4.0
MIP 132	Survey of the Recording Industry	3.0
MIP 133	Digital Audio Workstations I	3.0
MIP 161	Copyrights in the Music Industry	3.0
MIP 179	Introduction to Sound Recording	2.0
MIP 227	Listening Techniques	1.0
MIP 270	Live Music Industry	3.0

MIP 293 [WI]	Survey of Music Production	3.0
MIP 361	Music Publishing	3.0
MIP 374	Entrepreneurship in the Music Industry	3.0
MIP 375 [WI]	Marketing and Promo in Music Industry	3.0
MIP 491	Senior Project in Music Industry *	9.0
STAT 201	Introduction to Business Statistics	4.0
WEST 100	Introduction to Digital Design Tools	3.0
Total Credits		63.0

\* Repeated over three terms.

#### Music Industry: Business Concentration Requirements

MIP 276	Sound Recording for Business Concentration *	3.0
MIP 336	Contracts and Legal Issues in the Music Industry	3.0
MIP 376	MAD Dragon Music Group (Taken three terms)	9.0
MIP 394	Big Data In The Music Industry	3.0
MIP 395	Digital Revenue & Creative Destruction	3.0
MIP 396	Global Recording Business	3.0
MIP 426	Global Trends in the Music Industry	3.0
MIP 467	Artist Representation	3.0
MIP 468	Music Industry E-Commerce	3.0
<b>Select Three of the following Business Concentration Electives</b>		9.0

MIP 170	Radio Management	
MIP 263	Media Promotion	
MIP 318	Music Merchandising	
MIP 331	Music Venues and Concerts	
MIP 341	Touring and Booking	
MIP 365	Cities of Music and Culture	
MIP 366	Music Supervision	
Total Credits		42.0

\* MUSI Business Concentration Students who would like to continue taking more advanced recording studio and music production courses should take MIP 279 *Sound Recording I* instead of MIP 276 *Sound Recording for Business Concentration*. Take MIP 233 in Term 3 instead of MIP 276, which is a prerequisite to MIP 279, which you will take in Terms 5 or 6.

#### Music Industry: Recording Arts & Music Production (RAMP) Concentration Requirements

MIP 233	Digital Audio Workstations II	3.0
MIP 279	Sound Recording I	3.0
MIP 333	Digital Audio Workstations III	3.0
MIP 338	Audio Seminar	2.0
MIP 379	Sound Recording II	3.0
MIP 381	Audio for Video	3.0
MIP 388	Music and Audio Freelancing	2.0
MIP 389	Sound Reinforcement	3.0
MIP 477	Music Production	3.0
MIP 481	Mixing and Mastering	3.0
MUSC 122	Music Theory II	3.0
MUSC 229	Modern Arranging Techniques	3.0

<b>Select Three of the following RAMP Concentration electives:</b>		9.0
MIP 358	Electronic Music Production	
MIP 382	Scoring to Picture	
MIP 384	Synthesis and Sampling	
MIP 386	Commercial Music Production	
MIP 387	Studio Maintenance	
MIP 390	Video Game Music and Audio	
MIP 391	Analog Recording	
MIP 392	Music Production Master Class	

MIP 433	Digital Audio Workstations IV	
Total Credits		43.0

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## About the Accelerated Degree Program

The BS in Music Industry/MBA program offers students a program that combines an undergraduate degree in music business and technology with an MBA degree awarded by the Drexel LeBow College of Business. The program is designed to allow students to complete both the bachelor's degree and the Master of Business Administration degree in five years.

The program is offered to qualified students who apply for this option prior to the end of freshmen year or prior to the completion of 90 credits. All students who apply for this option must take the GMAT entrance exam.

Students selected for this program will generally have a minimum of 1350 on the SAT, a GPA of 3.5 or better, and rank in the top 10% of their high school graduating class. A strong candidate for this program will have taken significant AP coursework while in high school.

BS/MBA students may be waived from two MBA Enterprise Management courses, assuming a grade of B or better is earned in specified undergraduate courses. Students can review the Waiver Policies for the Statement of Curriculum Standing on the LeBow College's website for additional information.

The above conditions hold only for fully accepted BS/MBA students as identified by Enrollment Management.

#### Additional requirements for the dual degree program:

- A minimum of 3.2 cumulative GPA must be maintained throughout the entire undergraduate portion of this program or the student will not be able continue on to the MBA.
- Students must take the GMAT examination and achieve a minimum score of 570 prior to the end of the tenth term in order to continue in the program. It is recommended that students take the GMAT examination late in the student's third year.
- Students must submit an acceptable plan of study at least three terms before anticipated start of graduate part of the program.

## Sample Plans of Study

### Music Industry: Recording Arts & Music Production Concentration

Term 1		Credits
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
MIP 132	Survey of the Recording Industry	3.0
MIP 179	Introduction to Sound Recording	2.0
MIP 227	Listening Techniques	1.0
MUSC 121	Music Theory I	3.0
MUSC 190 or 191	Class Piano I Class Guitar I	2.0
UNIV A101	The Drexel Experience	1.0
Term Credits		15.0
Term 2		
CIVC 101	Introduction to Civic Engagement	1.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
MIP 133	Digital Audio Workstations I	3.0
MIP 161	Copyrights in the Music Industry	3.0
MUSC 130	Introduction to Music	3.0
WEST 100	Introduction to Digital Design Tools	3.0
Term Credits		16.0
Term 3		
ACCT 110	Accounting for Professionals	4.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
MIP 233	Digital Audio Workstations II	3.0
MIP 270	Live Music Industry	3.0
MUSC 122	Music Theory II	3.0
MUSC 125	Ear Training I	1.0
Term Credits		17.0
Term 4		
COOP 101	Career Management and Professional Development	0.0
MATH 101 or 121	Introduction to Analysis I Calculus I	4.0
MIP 333	Digital Audio Workstations III	3.0
MIP 361	Music Publishing	3.0
MIP 375 [WI]	Marketing and Promo in Music Industry	3.0
Free elective		3.0
Term Credits		16.0
Term 5		
ECON 201	Principles of Microeconomics	4.0
MATH 102 or 122	Introduction to Analysis II Calculus II	4.0
MIP 279 <sup>*</sup>	Sound Recording I	3.0
MIP 293 [WI]	Survey of Music Production	3.0
Free electives		3.0
Term Credits		17.0
Term 6		
BLAW 201	Business Law I	4.0
MIP 279 <sup>**</sup>	Sound Recording I	3.0
MUSC 229	Modern Arranging Techniques	3.0
MUSC 323	Songwriting	3.0
STAT 201	Introduction to Business Statistics	4.0
Term Credits		17.0
Term 7		
ECON 202	Principles of Macroeconomics	4.0
FIN 301	Introduction to Finance	4.0
MIP 379	Sound Recording II	3.0
MIP 381	Audio for Video	3.0

Arts & Humanities elective		3.0
Term Credits		17.0
Term 8		
MIP 374	Entrepreneurship in the Music Industry	3.0
MIP 389	Sound Reinforcement	3.0
Social Science elective		3.0
MIP 388	Music and Audio Freelancing	2.0
MIP 481	Mixing and Mastering	3.0
Term Credits		14.0
Term 9		
COM 230	Techniques of Speaking	3.0
PHYS 107 <sup>***</sup>	Acoustics	3.0
MIP 338	Audio Seminar	2.0
MIP 477	Music Production	3.0
Social Science elective		3.0
Term Credits		14.0
Term 10		
MIP 491	Senior Project in Music Industry	3.0
MIP RA&MP Concentration elective		3.0
Arts and Humanities elective		3.0
MUSC elective		3.0
Free elective		3.0
Term Credits		15.0
Term 11		
MIP 491	Senior Project in Music Industry	3.0
Free electives		6.0
MIP RA&MP Concentration elective		3.0
Social Science elective		3.0
Term Credits		15.0
Term 12		
MIP 491	Senior Project in Music Industry	3.0
MIP RA&MP Concentration elective		3.0
Arts and Humanities elective		3.0
Free elective		6.0
Term Credits		15.0

Total Credit: 188.0

\* Can substitute with free elective.

\*\* Can substitute with Natural Science elective

\*\*\* Can substitute with Social Science elective

### Music Industry: Business Concentration

Term 1		Credits
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
MIP 132	Survey of the Recording Industry	3.0
MIP 179	Introduction to Sound Recording	2.0
MIP 227	Listening Techniques	1.0
MUSC 121	Music Theory I	3.0

MIP 491	Senior Project in Music Industry	3.0
Arts and Humanities elective		3.0
MUSC elective		3.0
Free elective		3.0
Term Credits		15.0
<b>Term 11</b>		
MIP 491	Senior Project in Music Industry	3.0
MIP Business Concentration elective		3.0
Social science elective		3.0

Free electives		6.0
Term Credits		15.0
<b>Term 12</b>		
MIP 491	Senior Project in Music Industry	3.0
MIP Business Concentration elective		3.0
Arts and Humanities elective		3.0
Free electives		3.0
Term Credits		12.0

Total Credit: 187.0

\* See degree requirements (p. 517).

\*\* MUSI Business Concentration Students who would like to continue taking more advanced recording studio and music production courses should take MIP 279 *Sound Recording I* instead of MIP 276 *Sound Recording for Business Concentration*. Take MIP 233 in Term 3 instead of MIP 276, which is a prerequisite to MIP 279, which you will take in Terms 5 or 6.

## Music Industry Faculty

James L. Klein, BA (*Oberlin College*). Associate Professor. Music technologist, sound and recording engineer, songwriter for film, TV and radio music.

Marc Offenback, BA (*CUNY*). Assistant Teaching Professor. Recognized leader and innovator in label management, digital and traditional marketing and artist development.

Ryan Schwabe, BA (*Drexel University*). Assistant Teaching Professor. Musician, producer, sound engineer, programmer and upright bass player. Owner of RareMP3s LLC and guest lecturer at Curtis Institute of Music.

Toby Seay, BMus (*James Madison University*) *Department Head, Arts & Entertainment Enterprise*. Professor. Sound and recording engineer, music technologist, music producer and studio technician.

Cyrille Taillandier Associate Teaching Professor. Recording engineer, music producer and digital editor.

Darren Walters, BA (*University of Delaware*). Associate Teaching Professor. General Manager of Mad Dragon Records and co-owner and President of Jade Tree, an independent record label.

Robert Weitzner, MBA (*Harvard Business School*). Assistant Professor. Has over 20 years of industry experience at the nexus of music, digital media, and technology. Founding Director of the American Association of Independent Music (A2IM) and currently the Head of North America for Consolidated Independent (CI) a London based digital supply chain and asset management solutions provider for the global independent music industry.

## Photography

*Major: Photography*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 180.0*

*Co-op Options: One Co-op (Four years)*

*Classification of Instructional Programs (CIP) code: 50.0605*

*Standard Occupational Classification (SOC) code: 27-4021*

## About the Program

The Drexel University Photography program teaches students how to develop a unique photographic vision using a combination of aesthetics and technology. Using both applied and theoretical teaching methods and blending traditional processes with current digital technologies, the photography curriculum provides aspiring photographers with the breadth of experience and knowledge required to succeed in today's marketplace.

The photography foundation courses are the same for each student until their third year, at which point they design a custom path of study that culminates in their senior thesis portfolio. Our alumni's achievements reflect the diversity built into our program. They own successful photography studios, teach in high school and college programs, serve as curators, work as magazine photo editors and operate their own digital illustration firms.

The College's extensive photographic facilities (<http://www.drexel.edu/westphal/undergraduate/PHTO/Facilities>) are available to every photography major at Drexel.

### Additional Information

For more information about this major, visit the College's Photography (<http://www.drexel.edu/westphal/undergraduate/PHTO>) website.

## Degree Requirements

### General education requirements

ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
MATH 119	Mathematical Foundations for Design	4.0
PHYS 121	Physical Science for Design I	4.0
COOP 101	Career Management and Professional Development	0.0
UNIV A101	The Drexel Experience	2.0
Required Arts and Humanities-students elect a minimum of 9 credits		9.0
Required Natural Science-students elect a minimum of 3 credits		3.0
Required Social Science-students elect a minimum of 9 credits		9.0
<b>Free electives</b>		<b>27.0</b>

### Visual Studies requirements

ARTH 101	History of Art I: Ancient to Medieval	3.0
ARTH 102	History of Art II: Renaissance to Romanticism	3.0
ARTH 103	History of Art III: Modern Art	3.0
VSST 101	Design I	4.0
VSST 102	Design II	4.0
VSST 110	Introductory Drawing	3.0
VSST 111	Figure Drawing I	3.0
<b>Visual Studies electives</b>		<b>12.0</b>

Students select three additional visual studies (VSST) courses as electives.

### Photography requirements

PHTO 110	Photography	3.0
PHTO 140	Digital Photography I	4.0
PHTO 210	Intermediate Photography	3.0
PHTO 231	Color Photography	4.0
PHTO 233	Large Format Photography	4.0
PHTO 234	Studio Photography	4.0
PHTO 236	Photojournalism	4.0
PHTO 240	Digital Photography II	4.0
PHTO 253	Fine Black & White Printing	3.0
PHTO 275 [WI]	History of Photography I	3.0
PHTO 276	History of Photography II	3.0
PHTO 334	Advanced Studio Photography	4.0

PHTO 340	Digital Photography III	4.0
PHTO 361	Advanced Photography	4.0
PHTO 392	Junior Project in Photography	3.0
PHTO 451	Photography and Business	3.0
PHTO 452 [WI]	History of Contemporary Photography	3.0
PHTO 492	Senior Thesis in Photography I	3.0
PHTO 493	Senior Thesis in Photography II	3.0
PHTO 495	Senior Thesis in Photography III	3.0
<b>Photography electives</b>		<b>9.0</b>

Students select three courses from the following:

PHTO 335	Portraiture
PHTO 453	Photography Production
PHTO 455	Landscape Photography
PHTO 456	Fashion Photography
PHTO 457	Palladium Printing
PHTO 458	Advertising Portfolio Development
PHTO 459	Marketing for Photographers

Total Credits 180.0

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Sample Plan of Study

Term 1		Credits
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
PHYS 121	Physical Science for Design I	0.0-4.0
PHTO 140	Digital Photography I	4.0
VSST 101	Design I	0.0-4.0
UNIV A101	The Drexel Experience	1.0
Term Credits		8.0-16.0
Term 2		Credits

Term Credits	13.0
Total Credit: 168.0-181.0	

\* See degree requirements (p. 521).

## Co-op/Career Opportunities

Photographers pursue careers in a wide variety of fields. Primary choices among Drexel graduates include journalism, illustration, fashion and advertising, and fine arts.

Recent co-op placements have included:

- Micheal Creagh, New York City
- The Edywnn Houk Gallery, New York City
- Jonathan Pushnik, Advertising Photographer, Philadelphia, PA
- Philadelphia Magazine, Philadelphia, PA
- Jason Varney, Editorial Photographer, Philadelphia
- Saturday Night Live, New York City

Visit the Drexel Steinbright Career Development Center (<http://www.drexel.edu/scdc>) page for more detailed information on co-op and post-graduate opportunities.

## Photography Faculty

Noah Addis, BS (*Drexel University*). Adjunct Instructor. Photographing informal settlements and unplanned growth in the world's major cities

Julia Cybularz, MFA (*The School of Visual Arts*). Adjunct Instructor. Photography; color photography, junior project in photography, advanced DSLR.

Michael Froio, BS (*Drexel University*). Adjunct Instructor. Photography; intermediate photography and fine black and white printing.

Niko Kallianiotis, MFA (*School of Visual Arts*). Adjunct Instructor. Photography; intermediate photography and photojournalism.

George McCardle, BS (*Drexel University*). Adjunct Instructor. Digital Photography III

Andrea Modica, MFA (*Yale University*). Professor. Photography; portraiture, photojournalism, palladium printing, and thesis.

Joy Moody, BS (*Drexel University*). Adjunct Instructor. Portraits

Eddy Rhenals, MFA (*University of Delaware*). Adjunct Instructor.

Stuart Rome, MFA (*Arizona State University*). Professor. Photography; color photography, junior project, and thesis.

Diana Rossi, M.Ed (*Arcadia University*). Adjunct Instructor. Photography and intermediate photography.

Paul Runyon, BFA (*The University of New Mexico*) Program Director, *Photography*. Associate Professor. Studio photography, view-camera photography, studio lighting, business aspects of photography.

Ashley Smith, MFA (*School of Visual Arts*). Adjunct Instructor. Photography

Amanda Tinker, MFA (*Temple University*). Assistant Teaching Professor. Photography, history of photography, historical and alternative processes, and intermediate photography.

Bruce Wartman, MS (*Saint Joseph's University*). Adjunct Instructor. Photography

L. Kylie Wright, BA (*University of Virginia*). Assistant Teaching Professor. Photography; digital photography, and master printing.

## Product Design

*Major: Product Design*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 187.0*

*Co-op Options: One Co-op (Four years)*

*Classification of Instructional Programs (CIP) code: 50.0404*

*Standard Occupational Classification (SOC) code: 27-1021; 25-1121; 27-1024; 27-1029*

## About the Program

Product design combines the fields of art, business, and engineering to design the products people use every day. The program in product design focuses creativity and intellect, and prepares students for careers in a range of product design fields including corporate product design, design consulting, entrepreneurial endeavors, sustainable product development, and global design initiatives.

The major in product design is centered on teaching students the skills to develop and design products for a vast array of industries, specializing in multidisciplinary design research focused on product development and commercialization. It will also encourage collaboration in green design, sustainability and innovation in product development, facilitating and combining the fields of art, business, engineering and technology.

Students have the opportunity to create products ranging from furniture and toys to medical devices and consumer electronics in design competitions and *charrettes*. Students learn in state-of-the-art facilities that include a modeling shop and studio, laser cutters, 3D printers, rapid prototypers and molding clays and tools. The modeling shop and studio are large design-centered spaces, built to promote and sustain the studio culture students will enter upon graduation.

Students enrolled in the product design major will be expected to pursue a minor outside of product design that will allow them to apply their design capabilities toward a specific area of expertise.

For more information about this major, visit the College's Product Design (<http://www.drexel.edu/westphal/academics/undergraduate/PROD>) page.

## Degree Requirements

In addition to the following requirements for graduation, students enrolled in the Product Design major will be expected to pursue a minor outside of product design that will allow them to apply their design capabilities toward a specific area of expertise.

### General education requirements

ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
CHEM 201	Why Things Work: Everyday Chemistry	3.0

COM 220	Qualitative Research Methods	3.0
MATH 101	Introduction to Analysis I	4.0
PHYS 103	General Physics I	4.0
PSY 101	General Psychology I	3.0
PSY 332	Human Factors and Cognitive Engineering	3.0
CIVC 101	Introduction to Civic Engagement	1.0
UNIV A101	The Drexel Experience	1.0
Required Arts and Humanities-students elect a minimum of 6 credits		6.0
Required Social Science-students elect a minimum of 3 credits		3.0
Free electives		27.0

### Visual studies requirements

ARTH 102	History of Art II: Renaissance to Romanticism	3.0
ARTH 103	History of Art III: Modern Art	3.0
ARTH 300 [WI]	History of Modern Design	3.0
DIGM 100	Digital Design Tools	3.0
PHTO 110	Photography	3.0
PHTO 234	Studio Photography	4.0
VSCM 230	Visual Communication I	4.0
VSCM 240	Typography I	3.0
VSST 101	Design I	4.0
VSST 102	Design II	4.0
VSST 103	Design III	4.0
VSST 110	Introductory Drawing	3.0
VSST 111	Figure Drawing I	3.0
Select one of the following:		4.0
VSST 201	Multimedia: Performance	
VSST 202	Multimedia: Space	
VSST 203	Multimedia: Materials	

### Product Design requirements

ECON 201	Principles of Microeconomics	4.0
DSMR 201	Analysis of Product	3.0
MATE 120	Modern Materials in Your World	3.0
MATE 121	Mechanical Behavior of Materials for Product Design	1.0
MEM 201	Foundations of Computer Aided Design	3.0
MGMT 260	Introduction to Entrepreneurship	4.0
PROD 101	History and Analysis of Product Design	3.0
PROD 205	Applied Making I	3.0
PROD 210	Introduction to Product Design	3.0
PROD 220	Product Design Form Studio	4.0
PROD 225	Computer Aided Imagining in Product Design	3.0
PROD 230	Product Design Process Studio	4.0
PROD 235	Applied Design Visualization	3.0
PROD 245	Seminar Professional Landscape	3.0
PROD 255	Applied Materials in Product Design	3.0
PROD 340	Interdisciplinary Product Design Studio	4.0
PROD 345	Applied Human Centered Design	3.0
PROD 425	Applied Design Research	3.0
PROD 460	Research Synthesis Studio	4.0
PROD 470	Create Build Studio	4.0
PROD 475	Professional Practice in Product Design	3.0
PROD 480	Exhibition Studio	4.0

### Optional Product Design electives

PROD 215	Design Thinking in Product Design	
PROD 350	Sponsored Product Design Studio	
PROD T180	Special Topics in Product Design	
PROD T280	Special Topics in Product Design	
PROD T380	Special Topics in Product Design	
PROD T480	Special Topics in Product Design	
PROD I199	Independent Study in Product Design	
PROD I299	Independent Study in Product Design	
PROD I399	Independent Study in Product Design	

PROD I499	Independent Study in Product Design	
Total Credits		187.0

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Sample Plan of Study

Term 1		Credits
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
PROD 101	History and Analysis of Product Design	3.0
UNIV A101	The Drexel Experience	1.0
VSST 101	Design I	4.0
VSST 110	Introductory Drawing	3.0
	Term Credits	14.0
<b>Term 2</b>		
ARTH 102	History of Art II: Renaissance to Romanticism	3.0
CIVC 101	Introduction to Civic Engagement	1.0
DIGM 100	Digital Design Tools	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
VSST 102	Design II	4.0
	Arts and Humanities elective	3.0
	Term Credits	17.0
<b>Term 3</b>		
ARTH 103	History of Art III: Modern Art	3.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
MATH 101	Introduction to Analysis I	4.0
VSST 103	Design III	4.0
VSST 111	Figure Drawing I	3.0
	Term Credits	17.0
<b>Term 4</b>		
PROD 205	Applied Making I	3.0
PROD 210	Introduction to Product Design	3.0
PROD 235	Applied Design Visualization	3.0
VSCM 240	Typography I	3.0
	Arts & Humanities elective	3.0
	Term Credits	15.0
<b>Term 5</b>		
COOP 101	Career Management and Professional Development	0.0
MATE 120	Modern Materials in Your World	3.0
MATE 121	Mechanical Behavior of Materials for Product Design	1.0

MEM 201	Foundations of Computer Aided Design	3.0
PROD 220	Product Design Form Studio	4.0
VSCM 230	Visual Communication I	4.0
	Term Credits	15.0

<b>Term 6</b>		
CHEM 201	Why Things Work: Everyday Chemistry	3.0
DSMR 201	Analysis of Product	3.0
ECON 201	Principles of Microeconomics	4.0
PROD 230	Product Design Process Studio	4.0
	Select one of the following:	4.0
	VSST 201 Multimedia: Performance	
	VSST 202 Multimedia: Space	
	VSST 203 Multimedia: Materials	
	Term Credits	18.0

<b>Term 7</b>		
PHTO 110	Photography	3.0
PROD 225	Computer Aided Imagining in Product Design	3.0
PROD 245	Seminar Professional Landscape	3.0
PROD 255	Applied Materials in Product Design	3.0
	Free elective	3.0
	Term Credits	15.0

<b>Term 8</b>		
PHYS 103	General Physics I	4.0
PROD 340	Interdisciplinary Product Design Studio	4.0
PSY 101	General Psychology I	3.0
	Free elective	3.0
	Social science elective	3.0
	Term Credits	17.0

<b>Term 9</b>		
COM 220	Qualitative Research Methods	3.0
PHTO 234	Studio Photography	4.0
PROD 345	Applied Human Centered Design	3.0
PSY 332	Human Factors and Cognitive Engineering	3.0
	Free elective	3.0
	Term Credits	16.0

<b>Term 10</b>		
ARTH 300 [WI]	History of Modern Design	3.0
PROD 425	Applied Design Research	3.0
PROD 460	Research Synthesis Studio	4.0
	Free electives	6.0
	Term Credits	16.0

<b>Term 11</b>		
MGMT 260	Introduction to Entrepreneurship	4.0
PROD 470	Create Build Studio	4.0
	Free electives	6.0
	Term Credits	14.0

<b>Term 12</b>		
PROD 475	Professional Practice in Product Design	3.0
PROD 480	Exhibition Studio	4.0
	Free electives	6.0
	Term Credits	13.0

Total Credit: 187.0

## Co-op/Career Opportunities

Product designers have careers in a wide range of industries including consumer electronics, housewares, furniture, fashion accessories, medical devices, toys, automotive and transportation. The work of product designers improves the usefulness and appearance of countless products that contribute to the quality of our work and personal lives.

Visit the Drexel Steinbright Career Development Center (<http://www.drexel.edu/scdc>) page for more detailed information on co-op and post-graduate opportunities.

## Product Design Faculty

Ann Gerondelis, AIA, IDSA (*Georgia Institute of Technology*) *Design Department Head*. Teaching Professor. Embodied perception and its relationship to the design of human experiences, from the scale of the built environment to objects that surround us.

Michael Glaser, MFA (*Ohio State University*) *Program Director for Product Design, Westphal College of Media Arts & Design*. Associate Professor. Quantifying the designer's intuition; the interplay between digital and physical forms; human desire to shape our surroundings.

Josh Longo, BA (*Pratt Institute*) *Fabrication Shop Manager, Department of Design*.

Erik Sundquist, MA (*Florida International University*) *Hybrid Making Lab Director*. Assistant Teaching Professor. Product design

## Screenwriting and Playwriting

*Major: Screenwriting and Playwriting*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 183.0*

*Co-op Options: One Co-op (Four years)*

*Classification of Instructional Programs (CIP) code: 50.0504*

*Standard Occupational Classification (SOC) code: 27-3043*

## About the Program

The Westphal College Screenwriting & Playwriting program guides students in their pursuit of a career writing for the stage or screen. The program emphasizes the principles of dramatic writing through a practical hands-on approach to instruction in small classes. Our graduates take away the skills, experience, and confidence to gain an edge in a rewarding and competitive field.

Students first acquire the essential skills of dramatic story telling, then apply those abilities to the creation of scripts that conform to professional standards. Drexel's pioneering co-op affords hands-on experience in the field, working alongside professional artists. Drexel marks the beginning of the life-long process of developing a writer's eye that sees the world from a different angle and allows writers to tell their own uniquely compelling stories.

The Screenwriting & Playwriting Program also offers a Minor in Screenwriting (p. 543).

For more information about this major, visit the College's Screenwriting & Playwriting (<http://www.drexel.edu/westphal/academics/undergraduate/SCRIP>) page, or contact the Program Director:

Matthew J. Kaufhold (<http://drexel.edu/westphal/about/directory/KaufholdMatthew>)

## Degree Requirements

### General education requirements

CIVC 101	Introduction to Civic Engagement	1.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
MATH 119	Mathematical Foundations for Design	4.0
UNIV A101	The Drexel Experience	2.0
Required Arts and Humanities (excluding ENGL courses) - students elect a minimum of 9.0 credits		9.0
Required Natural Science-students elect a minimum of 8.0 credits		8.0
Required Social Science-students elect a minimum of 9.0 credits		9.0
Electives		31.0

### Visual Studies Requirements

ARTH 102	History of Art II: Renaissance to Romanticism	3.0
VSST 107	Introduction to Design for Media	3.0

### Screenwriting and Playwriting Requirements

#### Literature requirements

ENGL 315 [WI]	Shakespeare	3.0
Select one of the following:		3.0
ENGL 200 [WI] Classical to Medieval Literature		
or ENGL 201 Renaissance to the Enlightenment		
or ENGL 202 Romanticism to Modernism		
Select one of the following:		3.0
ENGL 203 [WI] Post-Colonial Literature I		
or ENGL 204 Post-Colonial Literature II		
Literature (ENGL) electives		6.0

#### Cinema studies/Theatre studies requirements

ENGL 216 [WI]	Readings in Drama	3.0
THTR 121 [WI]	Dramatic Analysis	3.0
FMST 105	Film History & Theory I	3.0
FMST 205	Film History & Theory II	3.0
Theatre (THTR) choice elective (any advanced acting, directing or production course)		3.0
Cinema studies (FMST Film Studies or TVST Television Studies) elective		3.0

#### Methods requirements

FMTV 110	Basic Cinematography	3.0
FMTV 115	Basic Editing	3.0
FMTV 120	Basic Sound	3.0
FMTV 240	Narrative Film	3.0
THTR 210	Acting: Fundamentals	3.0
THTR 211	Acting: Scene Study	2.0
THTR 240	Theatre Production I	3.0
THTR 320	Play Direction	3.0
or FMTV 270 Basic Directing		

#### Writing requirements

SCRIP 150	Entertainment Storytelling Fundamentals	3.0
SCRIP 220	Playwriting I	3.0
SCRIP 225	Playwriting II	3.0
SCRIP 230	Page to Stage	3.0
SCRIP 270 [WI]	Screenwriting I	3.0
SCRIP 275 [WI]	Screenwriting II	3.0
SCRIP 280 [WI]	Writing the Short Film	3.0
SCRIP 310	Literature for Screenwriters	3.0
SCRIP 370	Screenplay Story Development	3.0
SCRIP 495	Senior Project in Dramatic Writing I	3.0
SCRIP 496	Senior Project in Dramatic Writing II	3.0
SCRIP 497	Senior Project in Dramatic Writing III	3.0
WRIT 225 [WI]	Creative Writing	3.0
Writing Choice: select one of the following courses:		3.0

COM 160	Introduction to Journalism	
COM 181	Public Relations Principles and Theory	
WRIT 220 [WI]	Creative Nonfiction Writing	
Select one of the following two-course sequences:		6.0
SCRP 382 & SCR 383	Playwriting Workshop I and Playwriting Workshop II	
SCRP 380 & SCR 381	Screenwriting Workshop I and Screenwriting Workshop II	
Total Credits		183.0

## CONCENTRATION OPTIONS

### Concentration in Writing Comics & Graphic Novels

SCRP 260	Writing Comics	3.0
SCRP 263	Comic Book Editing	3.0
SCRP 266	Graphic Novel Art and Industry	3.0
SCRP 384	Comic/Graphic Novel Writing Workshop I	3.0
SCRP 385	Comic/Graphic Novel Writing Workshop II	3.0

### Concentration in Narrative Game Writing

GMAP 260	Overview of Computer Gaming	3.0
SCRP 290	Game: Universe & Story	3.0
SCRP 295	Future of Narrative Games	3.0
SCRP 377	Game Writing Workshop I	3.0
SCRP 378	Game Writing Workshop II	3.0

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Sample Plan of Study

Term 1		Credits
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
FMTV 120	Basic Sound	3.0

## Co-op/Career Opportunities

Dramatic writing is writing for production — work intended for performance on the stage or screen. These days, “screen” can mean movie, TV, or computer, and the work can be anything from full stage plays to 15-second commercials to video game scripts. As the entertainment industry changes, so do the outlets for our students and graduates.

## Co-op Experiences

By working for film and television production companies, theater organizations, entertainment management companies, magazines, advertising and public relations firms, and other professional writers, Screenwriting & Playwriting students gain valuable insights into how the entertainment industry works. In an industry where the process of building a career often begins with a few key contacts, the co-op program gives Drexel students the chance to begin shaping their own professional networks.

Screenwriting and Playwriting students secured Co-op or post-graduation positions with:

- IM Global
- Disney Video Animation
- Marvel Comics
- Lionsgate Films
- Skyless Games
- Arden Theater Company
- Campbell's Soup
- Marvel Studios
- SyFy Network
- Nickelodeon
- Dynamite Entertainment
- prominent Hollywood talent managers
- The Playwright's Center
- Valiant Entertainment

- Sciencefiction.com
- Major League Baseball Productions
- Panels.net
- Voice of America
- Fantagraphics
- the production office of "Star Trek: Enterprise"

Visit the Drexel Steinbright Career Development Center (<http://www.drexel.edu/scdc>) page for more detailed information on co-op and post-graduate opportunities.

## Screenwriting and Playwriting Faculty

Ian Abrams, BA (*Duke University*). Associate Professor. Screenwriting, movies, film, Hollywood.

Bruce Graham, BA (*Indiana University of Pennsylvania*). Associate Teaching Professor. Playwright.

Matthew Kaufhold, MA (*University of North Carolina*) Program Director, Screenwriting and Playwriting. Associate Teaching Professor. Screenwriter, Producer.

Thomas Quinn, MFA (*Temple University*) Program Director, Film & Video. Assistant Professor. Writer, Director, filmmaker.

Andrew Susskind, BA (*Harvard University*) Program Director of TV Production & Media Management. Associate Teaching Professor. Producing for Television, The Sitcom, Directing Single and Multi-Camera

## Virtual Reality & Immersive Media

Major: Virtual Reality and Immersive Media

Degree Awarded: Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: 186.0

Co-op Options: One Co-op (Four years)

Classification of Instructional Programs (CIP) code: 09.0702

Standard Occupational Classification (SOC) code: 11-9199

## About the Program

The design and production of Virtual Reality (VR), Augmented Reality (AR), 360° Video and other Immersive Media formats requires a unique skill set—creative thinking, understanding of design, aesthetic sensitivity, and storytelling are balanced with technical knowledge in areas such as 3D Computer Graphics, Animation, Visual Effects, interactivity, digital camera and image processing technologies. Additionally, critical thinking, the ability to collaborate effectively and communication skills are also integral to success in this rapidly expanding industry.

Drexel's Bachelor of Science in Virtual Reality & Immersive Media program encompasses foundation courses in the applied and social sciences, the humanities, and a wide range of professional digital media coursework to prepare students for careers in VR/AR and related Immersive Media fields. At the heart of the curriculum are the design and production labs and workshops where students are challenged to apply their knowledge acquired from the above disciplines to consequential design problems.

## Admission Requirements

In addition to standard application requirements (<http://drexel.edu/admissions/overview>), VRIM requires program director review of an additional, major specific essay question and applicant portfolio.

## Degree Requirements

General Education		
CIVC 101	Introduction to Civic Engagement	1.0
COM 230	Techniques of Speaking	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
MATH 101	Introduction to Analysis I	4.0
PHYS 121	Physical Science for Design I	4.0
PHYS 122	Physical Science for Design II	4.0
UNIV A101	The Drexel Experience	0.0-2.0
Required Arts and Humanities-students elect a minimum of 9.0 credits		
Required Social Science-students elect a minimum of 9.0 credits		
Free electives		24.0
Art and Art History Requirements		
ARTH 102	History of Art II: Renaissance to Romanticism	3.0
ARTH 103	History of Art III: Modern Art	3.0
ARTH 300 [WI]	History of Modern Design	3.0
VSST 108	Design I for Media	3.0
VSST 109	Design II for Media	3.0
VSST 110	Introductory Drawing	3.0
VSST 111	Figure Drawing I	3.0
VSST 210	Painting Basics	3.0
Media and Computer Science Requirements		
CS 171	Computer Programming I	3.0
FMVD 206	Audio Production and Post	3.0
Digital Media Requirements		
ANIM 140	Computer Graphics Imagery I	3.0
ANIM 141	Computer Graphics Imagery II	3.0
ANIM 211	Animation I	3.0
ANIM 212	Animation II	3.0
ANIM 215	History of Animation	3.0
ANIM 220	Digital Compositing I	3.0
DIGM 105	Overview of Digital Media	3.0
DIGM 223	Creative Concept Design	3.0
DIGM 350 [WI]	Digital Storytelling	3.0
DIGM 451 [WI]	Explorations in New Media	3.0
DIGM 475 [WI]	Seminar: The Future of Digital Media	3.0
DIGM 490	Digital Media Senior Project *	9.0
DIGM 491	Digital Media Senior Project Studio **	3.0
GMAP 260	Overview of Computer Gaming	3.0
IDM 100	Introduction to Web Development	3.0
Immersive Media Requirements		
VRIM 100	Digital Tools for VR/AR Media	3.0
VRIM 110	Digital Imaging for VR/AR Media	3.0
VRIM 120	VR/AR Production Lab I	3.0
VRIM 220	VR/AR Production Lab II	3.0
VRIM 250	Professional Practices for Immersive Media	3.0
VRIM 310	Immersive Media Workshop I	3.0
VRIM 320	Immersive Media Workshop II	3.0
<b>Immersive Media Electives (Choose 5 of the following classes)</b>		<b>15.0</b>
ANIM 247	Organic Modeling I	
ANIM 248	Advanced Lighting	
ANIM 314	Character Animation I	
ANIM 315	Character Animation II	

ANIM 347	Organic Modeling II	
ANIM 388	Spatial Data Capture	
ANIM 410	Advanced Compositing	
ANIM 411	Advanced Animation	
CS 172	Computer Programming II	
CS 265	Advanced Programming Tools and Techniques	
GMAP 345	Game Development Foundations	
GMAP 367	Character Animation for Gaming	
Total Credits		184.0-186.0

\* DIGM 490 is taken 3 times for a total of 9.0 credits.

\*\* DIGM 491 is taken 3 times for a total of 3.0 credits.

## Sample Plan of Study

Term		Credits
<b>Term 1</b>		
DIGM 105	Overview of Digital Media	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0

## Facilities

This major is based in the Westphal College's Digital Media Department, located in the Westphal College's URBN Center.

The central creative space for the department is the Animation Capture & Effects Lab (ACE-Lab), featuring a 1200-sq-ft open studio space dedicated to digital media production. The studio features include a 25-foot-by-17-foot green screen cyclorama, studio lighting and modifiers, HD/2k/4k camera systems, camera dolly, Vicon Vantage motion capture system, stereo-360 "VR Video" capture systems, room-scale VR tracking systems, and a full 360° Immersive Projection Dome among other resources.

Additional spaces surrounding the main studio include screening rooms, classrooms and computer labs featuring advanced graphics work stations, VR labs, research labs, meeting rooms and faculty offices.

## MBA Program Faculty

Marco Airaud, PhD (*University of Pennsylvania Philadelphia*). Associate Professor. Computational economics, international economics, macroeconomics and monetary economics.

Murugan Anandarajan, PhD (*Drexel University*) *Department Chair, Management; Department Head, Decision Sciences and MIS*. Professor. Cyber crime, strategic management of information technology, unstructured data mining, individual internet usage behavior (specifically abuse and addiction), application of artificial intelligence techniques in forensic accounting and ophthalmology.

Trina Larsen Andras, PhD (*University of Texas at Austin*) *Head of the Department of Marketing; Academic Director, Center for Corporate Research Management*. Professor. International marketing, marketing channels management, cross-cultural communication.

Orakwue B. Arinze, PhD (*London School of Economics*). Professor. Client/Server computing; Enterprise Application Software (EAS)/ Enterprise Resource Planning Software (ERP); knowledge-based and decision support applications in operations management.

Jie Cai, PhD (*University of Iowa*) *Department of Finance*. Associate Professor. Investment banking, mergers and acquisitions, corporate finance and corporate governance.

Suresh Chandran, PhD (*Vanderbilt University*). Clinical Professor. Corporate entrepreneurship; corporate social responsibility; global management; intellectual property and employee rights; Sustainability; Technological Innovation.

Lauren D'Innocenzo, PhD (*University of Connecticut*). Assistant Professor. Team effectiveness, contextual influences, emergent team dynamics, shared leadership, multi-level modeling, and groups/teams.

Qizhi Dai, PhD (*University of Minnesota*). Associate Professor. Business Value of Information Technology, eCommerce, Economics of Information Technology, Information System Management.

Pia DiGirolamo, PhD (*Purdue University*). Assistant Clinical Professor. Macroeconomics, international finance.

Boryana Dimitrova, PhD (*Drexel University*). Assistant Clinical Professor. Global marketing, inter-organizational, marketing channels, retailing and retail management.

Michaela Draganska, PhD (*Kellogg School of Management, Northwestern University*) *Department of Marketing*. Associate Professor. Advertising strategy, product assortment decisions, new product positioning, distribution channels. Marketing analytics and big data, marketing communications, marketing research, marketing strategy, technology and innovation.

Elea Feit, PhD (*University of Michigan*) *Department of Marketing*. Assistant Professor. Bayesian hierarchical models, interactive (eCommerce), marketing research, missing data.

Christopher Gaffney, PhD (*Rutgers University, New Brunswick*). Assistant Clinical Professor. Applied Probability, Decision Theory, Risk Analysis

Cuneyt Gozu, PhD (*University of Albany*). Associate Clinical Professor. Attitudes; Groups/Teams; Leadership; Motivation; Power and Influence

Michael Howley, PhD (*Arizona State University*). Clinical Professor. Investments in dissatisfied customers, service recovery, health-care

marketing, marketing of service organizations, financial consequences of marketing actions.

Yanliu Huang, PhD (*The Wharton School, University of Pennsylvania*). Associate Professor. Consumer n-store decision making, consumer planning, health marketing, memory and learning.

Daniel Korschun, PhD (*Boston University*). Associate Professor. Brand and corporate reputation management, corporate social responsibility, internal marketing, marketing strategy, relationship marketing.

Rosalie S. Kreider, JD (*Villanova University*) *Department of Legal Studies*. Clinical Professor. Business law, international business law.

David Kurz, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Business Education; Groups/Teams; Leadership; Supply Chain Leadership.

Jeongsik Lee, PhD (*University of California Los Angeles*). Assistant Professor. Economics of Innovation; Social networks; Technology management

Johnny Lee, PhD (*University of Utah*). Associate Clinical Professor. Accounting information systems; e-business; managerial accounting; supply chain management

Benjamin Lev, PhD (*Case Western Reserve University*). Trustee Professor. Inventory Control, Mathematical Programming, Operations Planning and Scheduling.

Merrill W. Liechty, PhD (*Duke University*). Clinical Professor. Bayesian statistics, portfolio selection, higher moment estimation, higher moment estimation, Markov Chain Monte Carlo

Dali Ma, PhD (*University of Chicago*). Assistant Professor. Social hierarchy; Social networks; Sociology of entrepreneurship; Sociology of transitional China

Mary Mawritz, PhD (*University of Central Florida*). Associate Professor. Abusive supervision; deviant behavior; leadership.

Bruce D. McCullough, PhD (*University of Texas Austin*). Professor. Applied Econometrics, Data Mining, Econometric Techniques, Reliability of Statistical and Econometric Software.

V. K. Narayanan, PhD (*University of Pittsburgh*). Delloitte Touche Jones Stubbs Professor. Cognition and Strategy; Corporate Entrepreneurship; Organization design

Gordian Ndubizu, PhD (*Temple University*). Professor. Financial accounting.

Edward Nelling, PhD, CFA (*University of Pennsylvania-Wharton*) *Department of Finance*. Professor. Investments; corporate finance; real estate finance.

Gregory Nini, PhD (*The Wharton School, University of Pennsylvania*). Assistant Professor. Creditor control rights, corporate governance, and firm value; insurance economics.

Fariborz Y. Partovi, PhD (*The Wharton School, University of Pennsylvania*) *Department of Decision Sciences*. Professor. Manufacturing Technology Development, Quality Implementation, Quality Management, Service Management, Six-Sigma

Natalie Pedersen, JD (*Harvard University*) *Department of Legal Studies*. Associate Professor. American law, contract law, labor and employment law.

Christian Resick, PhD (*Wayne State University*). Associate Professor. Groups/Teams; Leadership; Organizational Culture and Fit; Personality.

Patricia Robak, PhD (*Lehigh University*) *Department of Finance*. Associate Clinical Professor. Investments, money and banking, international finance.

Konstantinos Serfes, PhD (*University of Illinois at Champaign-Urbana*). Professor. Industrial organization; microeconomics; game theory

Samir Shah, DPS (*Pace University*). Clinical Professor. Drexel University's Provost Fellow India Partnerships

Prashant Srivastava, PhD (*Oklahoma State University*). Associate Clinical Professor. New product development, supply chain management, B2B marketing, sales, strategic alliances, organizational learning, market orientation, healthcare marketing, and database marketing.

Srinivasan Swaminathan, PhD (*University of Texas-Austin*). Professor. Marketing research and strategy, pricing and promotions, loyalty and satisfaction.

Samuel H. Szewczyk, PhD (*Pennsylvania State University*) *Department of Finance*. Associate Professor. Corporate governance, mergers and acquisitions, financial engineering, investment banking, financial institutions.

George Tsetsekos, PhD (*The University of Tennessee*) *Dean Emeritus, LeBow College of Business; Francis Professor of Finance*. Professor. Valuation and corporate restructuring, treasury and risk/hedging operations, investment banking, securitization, emerging capital markets, multinational finance, bank asset-liability management.

Daniel Tzabbar, PhD (*University of Toronto*). Associate Professor. Accessing and managing knowledge; Alliances; Human capital; Organizational learning and change; Social Capital; Technology Entrepreneurship; Technology Innovation

Chen Wang, PhD (*University of British Columbia*). Assistant Professor. Consumer curiosity, self-regulation and goals, sensory perception.

Joan Weiner, PhD (*The Wharton School, University of Pennsylvania*). Professor. Business ethics, leadership, communication and decision making; educational innovation; health system management design.

Jonathan C. Ziegert, PhD (*University of Maryland*) *Management Department*. Associate Professor. Attitudes; Diversity; Groups/Teams; Leadership; Organizational Culture and Fit.

## Westphal Studies Program

*Major: Westphal Studies*

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 180.0*

*Classification of Instructional Programs (CIP) code: 50.0101*

*Standard Occupational Classification (SOC) code: 27-1019*

## About the Program

The Westphal Studies program provides an individualized course of study initiated by a student. The student must have completed two terms of the junior year in an Antoinette Westphal College of Media Arts and Design major to be eligible for admission into this major.

A small number of students in the Antoinette Westphal College of Media Arts and Design decide that their goals lie at the periphery of the major or the intersection between several majors and would be served by more latitude than offered in the highly specified courses in their major. For these students, the Westphal Studies program major broadens future career goals and allows exploration combined with a focused exposure to a second field. It acknowledges the specialization that is characteristic of the majors in the College and the expectations of the professional fields for which our students are being prepared. Simultaneously, it recognizes the breadth and rapidly changing nature of many disciplines and permits a student who has acquired a basic working knowledge of a specific aspect of media arts and design to investigate a clearly defined alternative.

Admission to the program is limited to currently matriculated College of Media Arts and Design students who have completed the major-intensive sophomore year and experienced a co-op placement or completed their junior-year courses. The following items are required as part of the application:

- A student-generated, individualized plan of study, developed with and signed by a member of the Westphal Studies Program Advisors Committee
- A statement in writing of the student's goals in applying to the major and the rationale of how the proposed plan of study addresses those goals
- A definition of appropriate co-operative education placement if the student has not completed a six-month employment in the field of his or her major
- A letter from the student's current program director

Approval by the Westphal Studies Program Advisors Committee is required for admission to the major; it is not automatic upon request. The committee must be convinced by the validity of the applicant's reasons for applying, the proposed study plan, and accompanying documentation. Details about the application procedure may be obtained from the director of Westphal Studies Program.

## Recommended Plan of Study

This program requires an individualized plan of study. Students sign off on this agreed-upon plan with the Director of the Studies of the Westphal Studies program. A student must have completed two terms of junior year in a College of Media Arts and Design major to be eligible for admission into this major.

The student, in consultation with her/his advisor and the director of the program, devises a personalized interdisciplinary study plan. The approved plan of study provides a rationale for the concentration and how the elective credits are to be used. This plan of study must be completed and approved before admission into the major.

## Degree Requirements

### General Education Requirements

#### General Education Requirements

ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
UNIV A101	The Drexel Experience	2.0
Arts and humanities electives		9.0
Mathematics and natural science electives **		12.0
Social science electives		9.0
Co-operative education ***		0.0
<b>Total Credits</b>		<b>41.0</b>

\* Students taking the Architecture Part-Time Evening program do not have this requirement.

\*\* At least one course in mathematics and one course in natural science are required.

\*\*\* Not required if prior major did not require co-operative education experience.

## Other Requirements

Requirements	Hours
Unrestricted electives	max of 75.0
Professional requirements*	min of 51.0
Concentration or minor**	min of 24.0

\* All professional and visual studies courses required in prior major through winter term of junior year must be successfully completed.

\*\* Up to 9 credits of general education and professional requirements may be included in this minimum.

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Digital Media BS/MS

*Major: Digital Media*

*Degrees Awarded: Bachelor of Science (BS) and Master of Science (MS)*

*Calendar Type: Quarter*

*Total Credit Hours: 180.0 (BS) and 45.0 (MS)*

*Co-op Options: Graduate Co-op*

*Classification of Instructional Programs (CIP) code: 11.0801*

*Standard Occupational Classification (SOC) code: 15-1134*

## About the Program

Your undergraduate work gives you the tools to succeed in digital media, and our graduate program will give you the tools to shape it.

As natural extension of our Animation and Visual Effects, Game Design and Production, Interactive Digital Media and Virtual Reality and Immersive Media undergraduate programs, our accelerated Masters of Science (MS) program challenge to push beyond what's known and into what's possible.

You'll combine research with applicable skills in 21st century media applications. Our curriculum offers a mix of academic coursework and project-related activities in advanced digital design, including 3D modeling, animation, interactivity, gaming and digital media history, theory and methods.

## Admission Requirements

Review by Digital Media Graduate Admissions committee and Digital Media Program Director approval.

## Additional Information

For more information, visit the Digital Media (<http://drexel.edu/westphal/academics/graduate/DIGM>) web page.

## Degree Requirements

The accelerated program in Digital Media can be combined with any BS program at Drexel. Students who are not undergraduate students in the Department of Digital Media need to complete the following two bootcamp courses in addition to the regular BSMS course requirements.

Bootcamps		
DIGM 505	Design and Interactivity Bootcamp	3.0
DIGM 506	Animation and Game Design Bootcamp	3.0
<b>Total Credits</b>		<b>6.0</b>

## Required Courses

Digital Media Core		
DIGM 501	New Media: History, Theory and Methods	3.0
DIGM 510	Designing for Interactivity	3.0
DIGM 511	Research Methods for Digital Media	3.0
DIGM 580	Thesis Preparation	3.0
Digital Media Specialization		
Select 15.0 credits from the list below:		15.0
ANIM 588	Spatial Data Capture	
DIGM 508	Digital Cultural Heritage	
DIGM 520	Interactivity I	
DIGM 521	Interactivity II	
DIGM 525	Animation I	
DIGM 526	Animation II	
DIGM 530	Game Design I	
DIGM 531	Game Design II	
DIGM 591	Digital Media Skills Intensive	
DIGM I599	Independent Study in Digital Media	
DIGM I699	Independent Study in Digital Media	
DIGM T580	Special Topics in Digital Media	
DIGM T680	Special Topics in Digital Media	
GMAP 545	Game Development Foundations	
GMAP 547	Serious Games	

GMAP 548	Experimental Games	
GMAP 560	Game Design from the Player's Perspective	
<b>New Media Project</b>		
DIGM 540	New Media Project *	6.0
<b>Thesis Development</b>		
DIGM 680	Thesis Development *	6.0
<b>Directed Studies</b>		
		6.0
Total Credits		45.0

\* DIGM 540 and DIGM 680 are each taken 2 times.

## Sample Plan of Study

The plan of study shown is a sample plan. It is the responsibility of students to satisfy all prerequisites. Students approved to pursue the BS/MS option must work with their primary academic advisor and the Digital Media program to develop a plan of study that fits their respective degree requirements. The minimum number of credits for graduation is 225 but the total number of credits for the program depends on the undergraduate major. The sample program below requires 231 credits for graduation.

Term 1		Credits
DIGM 105	Overview of Digital Media	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
PHYS 121	Physical Science for Design I	4.0
UNIV A101	The Drexel Experience	1.0
VRIM 100	Digital Tools for VR/AR Media	3.0
VSST 110	Introductory Drawing	3.0
Term Credits		17.0
<b>Term 2</b>		
ANIM 140	Computer Graphics Imagery I	3.0
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
PHYS 122	Physical Science for Design II	4.0
UNIV A101	The Drexel Experience	1.0
VRIM 110	Digital Imaging for VR/AR Media	3.0
VSST 108	Design I for Media	3.0
Term Credits		17.0
<b>Term 3</b>		
ANIM 141	Computer Graphics Imagery II	3.0
CIVC 101	Introduction to Civic Engagement	1.0
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
MATH 101	Introduction to Analysis I	4.0
VRIM 120	VR/AR Production Lab I	3.0
VSST 109	Design II for Media	3.0
Term Credits		17.0
<b>Term 4</b>		
ANIM 211	Animation I	3.0
CS 171	Computer Programming I	3.0
DIGM 223	Creative Concept Design	3.0
GMAP 260	Overview of Computer Gaming	3.0
VSST 111	Figure Drawing I	3.0
Term Credits		15.0
<b>Term 5</b>		
ANIM 212	Animation II	3.0

ANIM 215	History of Animation	3.0
ARTH 101	History of Art I: Ancient to Medieval	3.0
IDM 100	Introduction to Web Development	3.0
VSST 210	Painting Basics	3.0
Term Credits		15.0
<b>Term 6</b>		
ANIM 220	Digital Compositing I	3.0
ARTH 103	History of Art III: Modern Art	3.0
VRIM 220	VR/AR Production Lab II	3.0
Elective		3.0
Immersive Media Elective		3.0
Term Credits		15.0
<b>Term 7</b>		
COM 230	Techniques of Speaking	3.0
COOP 101	Career Management and Professional Development	0.0
DIGM 350 [WI]	Digital Storytelling	3.0
FMVD 206	Audio Production and Post	3.0
VRIM 250	Professional Practices for Immersive Media	3.0
Immersive Media Elective		3.0
Term Credits		15.0
<b>Term 8</b>		
ARTH 300 [WI]	History of Modern Design	3.0
DIGM 451 [WI]	Explorations in New Media	3.0

Term Credits		9.0

Total Credit: 231.0

## Digital Media Faculty

Paul Diefenbach, PhD (*University of Pennsylvania*). Associate Professor. Game development, real-time rendering.

Troy Finamore, MS (*Drexel University*) *Program Director, Interactive Digital Media*. Associate Teaching Professor. Advertising, design and interactivity.

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Nick Jushchysyn, MFA (*Academy of Art University*) *Program Director, VR & Immersive Media*. Associate Professor. Visual effects, digital media and animation.

Frank J. Lee, PhD (*Carnegie Mellon University*). Professor. Human-computer interaction; cognitive engineering and science; intelligent software agents for games and education.

Robert Lloyd, MFA (*Temple University*) *Program Director, Game Design & Production*. Assistant Teaching Professor. Game development, themed entertainment and motion simulation.

David Mauriello, BA (*Lafayette College*). Assistant Professor. 3D modeling and animation.

Glen Muschio, PhD (*Temple University*). Associate Professor. Digital media, society, communication.

Santiago Ontañón, PhD (*University of Barcelona*). Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning

Stefan Rank, PhD (*Vienna University of Technology*). Associate Professor. Artificial intelligence, game design and human-computer interaction.

Jervis Thompson, BS (*Drexel University*). Teaching Professor. Digital media, interactive multimedia.

Michael Wagner, PhD (*Vienna University of Technology*) *Program Director, Digital Media*. Associate Professor. Educational use of digital media and computer games.

Jichen Zhu, PhD (*Georgia Institute of Technology*). Associate Professor. Developing humanistic and interpretive framework of computational technology, particularly artificial intelligence (AI), and constructing AI-based cultural artifacts; interactive storytelling, games and software studies.

## Emeritus Faculty

Theo Artz, BFA (*Tyler School of Art, Temple University*). Associate Professor. Digital media.

## Minor in Animation and Visual Effects

### About the Minor

The Animation and Visual Effects Minor requires the completion of eight courses (minimum 24.0 credits). The minor provides basic foundation in the technological, story-telling and design skills used by animators and visual effects artists in the highly competitive entertainment and design worlds, with the opportunity for individualized tailoring according to the student's interests.

#### Required Courses:

ANIM 100	Foundational Tools for Animation & VFX	3.0
or DIGM 100	Digital Design Tools	
or PHTO 141	Digital Photographic Post Production	
or VSCM 200	Computer Imaging II	
ANIM 110	Digital Imaging for Animation & VFX	3.0
ANIM 140	Computer Graphics Imagery I	3.0
ANIM 211	Animation I	3.0
Select four of the following:		12.0
ANIM 141	Computer Graphics Imagery II	
ANIM 212	Animation II	
ANIM 215	History of Animation	
ANIM 220	Digital Compositing I	
ANIM 221	Digital Compositing II	
ANIM 247	Organic Modeling I	
ANIM 248	Advanced Lighting	
ANIM 314	Character Animation I	
ANIM 315	Character Animation II	
ANIM 388	Spatial Data Capture	
ANIM 410	Advanced Compositing	
ANIM 411	Advanced Animation	
Total Credits		24.0

## Minor in Architecture

### About the Minor

A minor in architecture gives students majoring in other disciplines an opportunity to explore architecture through a coherent sequence of coursework. The minor in architecture can also be used for preparation towards professional graduate study in this field. Interested students should consult the Architecture Program Director for course selection and scheduling.

The minor requires design studio courses, courses in architectural history, and architectural elective courses. No more than 9.0 credits from a student's major can be used to fulfill the minor requirements.

**Required Courses**

Required Architectural History	9.0
Choice of Three	
ARCH 141 Architecture and Society I	
ARCH 142 Architecture and Society II	
ARCH 143 Architecture and Society III	
ARCH 144 Architecture and Society IV	
Required Architecture Studios *	12.0
ARCH 107 Foundation Design I (Non Design Majors)	
ARCH 108 Foundation Design II	
ARCH 109 Foundation Design III	
ARCH 211 Architectural Representation I	
ARCH 181 Architecture Studio 1A	
OR	
ARCH 181 Architecture Studio 1A	
ARCH 182 Architecture Studio 1B	
ARCH 183 Architecture Studio 1C	
OR	
ARCH 183 Architecture Studio 1C	
ARCH 281 Architecture Studio 2A	
ARCH 282 Architecture Studio 2B	
Elective Architecture Courses **	3.0-6.0
Total Credits	24.0-27.0

\* Non-Design Majors will be required to take the following studios: ARCH 107, ARCH 108, ARCH 109, ARCH 211 & ARCH 181  
Students who have successfully completed ARCH 192 or VSST 103 should start the studio sequence with ARCH 181  
Students who have successfully completed INTR 233 should start the studio sequence with ARCH 183

\*\* Electives can be chosen from the ARCH rubric if the prerequisite is satisfied.

## Minor in Art History

### About the Minor

The minor in art history provides a broad humanistic background not only for students planning to attend graduate and professional schools in the fields of applied, media and design arts, social and information sciences, education, business and medicine, but also for those entering a more general job market. The minor is designed to be flexible enough to appeal to Antoinette Westphal College of Media Arts and Design majors as well as majors from the other colleges throughout the university.

**Required Courses**

ARTH 101 History of Art I: Ancient to Medieval	3.0
ARTH 102 History of Art II: Renaissance to Romanticism	3.0
ARTH 103 History of Art III: Modern Art	3.0
Select five of the following:	15.0

**Art History**

ARTH 300 [WI] History of Modern Design	
ARTH 301 Asian Art and Culture	
ARTH 302 Art of India	
ARTH 303 Art of China	
ARTH 304 Art of Japan

PHTO 276	History of Photography II	
PHTO 452 [WI]	History of Contemporary Photography	
Total Credits		24.0

**Writing-Intensive Course Requirements**

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

**Minor in Dance****About the Minor**

The minor in dance offers students an opportunity to explore dance in the studio through technique classes, and in the classroom through academic classes in dance. Participation in the dance ensemble class(s) is required, although performance with the ensemble is not. There is no audition for the dance minor program.

**Required Courses**

DANC 104	Ballet Technique I	2.0
DANC 105	Modern Dance Technique I	2.0
DANC 106	Jazz Dance Technique I	2.0
or DANC 107	Hip-Hop Dance Technique I	
DANC 115	Introduction to Dance	3.0
DANC 235	Dance Composition I	3.0
DANC 315	Twentieth Century Dance	3.0
DANC 135	Rhythmic Study for Dance	3.0
THTR 240	Theatre Production I	3.0
Electives in Dance (DANC 104-DANC 495)		3.0
Dance Practicum (6 terms from DANC 131-DANC 133)		0.0
Total Credits		24.0

**Minor in Digital Media****About the Minor**

The Digital Media Minor requires the completion of eight courses (minimum 24.0 credits). The minor provides basic foundations in digital

media, including; 3D animation, game art, and interactivity with the opportunity for individualized tailoring according to the student's interests.

The Digital Media Minor is open to all University students.

**Program Requirements****Required Courses:**

DIGM 100	Digital Design Tools	3.0
DIGM 105	Overview of Digital Media	3.0
ANIM 140	Computer Graphics Imagery I	3.0
GMAP 260	Overview of Computer Gaming	3.0
IDM 100	Introduction to Web Development	3.0
Select any three courses in ANIM, DIGM, GMAP or WBDV		9.0
Total Credits		24.0

**Minor in Entertainment & Arts Management****About the Minor**

Drexel's Entertainment & Arts Management (EAM) minor program gives students an introduction to the challenging industry of entertainment and arts business. The selected curriculum gives students a basis in entertainment finance, promotion, business planning, intellectual property rights, cultural literacy, and artist representation. Students in Drexel's EAM minor do not choose concentrations but rather take a core selection of classes and then select nine hours of electives in order to customize their learning.

The EAM minor is open to all undergraduate students in the Drexel University system; no prerequisites are required but departmental approval is needed. Interested students should contact EAM professor Dr. Brea Heidelberg at [bmh29@drexel.edu](mailto:bmh29@drexel.edu) to schedule a meeting to discuss adding the EAM minor.

EAM 130	Overview of Entertainment and Arts Management	3.0
EAM 211	Strategic Management for Entertainment and Arts Management	3.0
EAM 261	Copyrights and Trademarks	3.0
EAM 340	Artist Representation and Management	3.0
EAM 391 [WI]	Entertainment Promotion and Branding	3.0
Select three courses from the following:		9.0
EAM 200	Introduction to the Music Industry	
EAM 270	Audience Development for Arts	
EAM 301	Gallery and Collection Management	
EAM 302	Exhibition Design	
EAM 310	Social Media in Entertainment	
EAM 312	Introduction to Fund Development for the Arts	
EAM 313	Volunteer and Board Management	
EAM 321	Box Office and Venue Management	
EAM 322	Performing Arts Touring	
EAM 325	Producing for Live Entertainment	
EAM 350	Arts, Culture and Society	
EAM 361	Law for Entertainment and Arts Management Managers	
EAM 365	Media and Entertainment Business	
EAM 401 [WI]	Writing for Arts Managers	
EAM 461	Entertainment Publishing	
EAM 471	Fine Arts Market Development	
EAM 472	Trends in Visual Arts	
EAM T380	Special Topics in Entertainment & Arts Management	
EAM T480	Special Topics in Entertainment & Arts Management	
Total Credits		24.0

## Minor in Film Studies

### About the Minor

The Minor in Film Studies comprises courses that cover the major artistic and institutional developments in cinema from its late-nineteenth-century origins to the present. As these courses cover a variety of critical topics that are essential to any film studies curriculum - such as the study of major genres and auteurs, the technologies and techniques contributing to the development of the medium, as well as the historical circumstances that influenced the cinema's evolution since its inception - they will establish a sound critical foundation for students to choose and to flourish in the subsequent courses required for the minor.

The Minor in Film Studies is open to all University students.

### Program Requirements

Required Courses:

FMST 101	Film History I: Emergence	3.0
or FMST 105	Film History & Theory I	
FMST 102	Film History II: New Waves	3.0
or FMST 205	Film History & Theory II	
FMST 250	The Documentary Tradition	3.0
Select five of the following:		15.0
FMST 103	Film History III: Trends	
FMST 255	Hitchcock	
FMST 260	The Western	
FMST 262	Film Comedy	
FMST 266	The Cinematographer's Art	
FMST 270	Controversial Films	
FMST 275	Breakthroughs of Contemporary Film Directors	
FMST 276	Great Years in Cinema: 1999	
FMST 290	Hollywoodland I	
FMST 291	Hollywoodland II	
FMST 340	French New Wave	
FMST 345	Italian Neo Realism	
FMST 352	The Horror Film	
FMST 355	Contemporary Cinema	

FMST T180	Special Topics in Film Studies	
FMST T280	Special Topics in Film Studies	
FMST T380	Special Topics in Film Studies	
FMST T480	Special Topics in Film Studies	

Total Credits 24.0

## Minor in Fine Arts

### About the Minor

The Fine Arts minor enables students to develop skills and concepts in the studio arts. Students in studio courses learn to combine skills in using tools and materials, visual theoretical concepts, and new technologies, all of which are necessary for design professionals.

To be eligible for the minor in Fine Arts, a student must have completed a minimum of 30.0 undergraduate credits, have a declared major, and have a minimum GPA of 2.7. The academic credit requirements for the minor must be completed at or before the time of graduation.

Basic design prerequisite courses are required for many programs in Westphal College and some of these may already have been taken for a student's major. However, only 9.0 credits of major-related coursework can be applied to the credits required for the minor in fine arts. Students with design credits from other schools or departments may be allowed to apply them to their prerequisite requirements only upon review by the fine arts minor faculty advisor.

#### Required Courses

VSST 101	Design I	4.0
or VSST 108	Design I for Media	
VSST 110	Introductory Drawing	3.0
Select a minimum of an additional 17.0 credits from the following:		17.0
PHTO 110	Photography	
PHTO 210	Intermediate Photography	
PHTO 233	Large Format Photography	
PHTO 253	Fine Black & White Printing	
VSST 102	Design II	
VSST 103	Design III	
VSST 111	Figure Drawing I	
VSST 109	Design II for Media	
VSST 112	Figure Drawing II	
VSST 201	Multimedia: Performance	
VSST 202	Multimedia: Space	
VSST 203	Multimedia: Materials	
VSST 301	Painting I	
VSST 302	Painting II	
VSST 303	Painting III	
VSST 304	Materials Exploration	
VSST 310	Sculpture: Metal Fabrication	
VSST 311	Sculpture I	
VSST 312	Sculpture II	
VSST 313	Sculpture III	
VSST 321	Screenprint I	
VSST 322	Printmaking I	
VSST 323	Printmaking II	
VSST 324	Advanced Printmaking	
VSST 325	Screenprint II	
VSST I399	Independent Study in Visual Studies	
VSST T480	Special Topics in Visual Studies	

Total Credits 24.0

## Minor in Graphic Design

### About the Minor

The Graphic Design minor features individualized investigation of medium, content, context, and technology. It places emphasis on critical thinking, analytical reasoning, written and oral communication skills, integrity, and ethics while instructing technology as a tool.

The minor offers course work with a focus on the connection between graphic design and technology with instruction in Digital Design Tools, Composition, Corporate Identity, Typography, Publication Design, and Photography. Recommended electives include Computer Imaging 2, Web Graphics, Drawing, and Design History.

The Graphic Design minor is available to all Drexel University students, and requires the completion of seven courses for a minimum of 24.0 credits. For more information contact Program Director Bill Rees (wbr24@drexel.edu).

### Program Requirements

Select one VSST course *		3.0
VSST 100	Introduction to Art & Design	
VSST 102	Design II	
VSST 107	Introduction to Design for Media	
VSST 109	Design II for Media	
PHTO 110	Photography	3.0
VSCM 230	Visual Communication I	4.0
VSCM 231	Visual Communication II	4.0
VSCM 232	Visual Communication III	4.0
VSCM 240	Typography I	3.0
WEST 100	Introduction to Digital Design Tools	3.0
Recommended Electives:		
VSCM 200	Computer Imaging II	
VSCM 242	Typography II	
VSCM 332	Visual Communication IV	
VSCM 350	Graphic Design: 20th Century and Beyond [WJ]	
WMGD 220	Web Graphics I	
Total Credits		24.0

\* Westphal students and others who have taken VSST 102, VSST 107 or VSST 109 should complete a recommended elective.

### Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>)

Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Minor in Interactive Digital Media

### About the Minor

The Interactive Digital Media Minor requires the completion of eight courses (minimum 24.0 credits). The minor provides basic foundations in user interface design (UI), user experience design (UX), and interaction design (IXD), including: design and development of websites and mobile applications with the opportunity for individualized tailoring according to the student's interests. It is open to all University students and is administered and advised by the Interactive Digital Media program.

### Program Requirements

Required Courses		
IDM 100	Introduction to Web Development	3.0
IDM 211	User Interface Design I	3.0
Select six of the following:		18.0
ANIM 115	Introduction to Production with Animation & VFX	
DIGM 100	Digital Design Tools	
DIGM 308	Digital Cultural Heritage	
DIGM 451 [WJ]	Explorations in New Media	
EAM 315	Content Strategies for Digital Products	
IDM 101	History of Web Development	
IDM 212	User Interface Design II	
IDM 213	Interaction Design	
IDM 215	User Experience Design I

## Minor in Interdisciplinary Smart Initiatives

### About the Minor

The Interdisciplinary Smart Initiatives Minor provides students across the University an experience of both breadth and depth through multi-disciplinary practices and learning. Students will develop skills and knowledge in the topics associated with problem solving, innovative technology, leadership and immersive participatory experiences. Skills and knowledge will be delivered through collaborative teaching and coursework, skill building, experimentation, experiential learning, and engaging research initiatives.

This minor provides the opportunities to engage in a variety of University venues and initiatives that places students on the leading edge of their chosen paths. The Interdisciplinary Smart Initiatives Minor is intended to build on experiential learning that is the foundation of a Drexel education.

### Admission Requirements

The Interdisciplinary Smart Initiatives Minor is open to all University students that meet the criteria for acceptance. Because of the nature of the minor, success is dependent upon students showing self-discipline, being highly motivated and self-reliant. All applications for the minor will be submitted to the director of the minor.

Please contact Dr. Ulrike Altenmüller-Lewis at [ua27@drexel.edu](mailto:ua27@drexel.edu) with questions concerning the INSI Minor.

The following are the requirements that students must meet to be considered:

- **Required Essay:** Student statement of interest and desired goals
- **Required Recommendation:** Two letters of recommendation from faculty that speaks to the student's ability to be collegial and collaborative, exhibit initiative and resourcefulness and ability to work independently.

### Program Requirements

## Minor in Jazz and African-American Music

### About the Minor

The minor in jazz and African-American music takes advantage of Drexel faculty expertise in those areas. This minor can include course work in jazz history, African-American music, jazz theory, private study in jazz performance, and ensemble work in several ensembles devoted to jazz.

MUSC 121	Music Theory I	3.0
MUSC 125	Ear Training I	1.0
MUSC 126	Ear Training II	1.0
MUSC 196	Jazz Class Piano	2.0
MUSC 241	Private Lesson (3 terms)	6.0
MUSC 300	Improvisation	3.0
MUSC 331	World Musics	3.0
MUSC 333	Afro-American Music USA	3.0
MUSC 336	History of Jazz	3.0
Ensembles*		
Total Credits		25.0

\* 6 terms of MUSC 107 and/or MUSC 108, MUSC 112, MUSC 115

## Minor in Music

### About the Minor

The minor in music requires 26.0 credits, including work in music theory, history, applied music (class or private lessons), and ensemble performance, and 6.0 credits of music electives.

MUSC 121	Music Theory I	3.0
MUSC 125	Ear Training I	1.0
MUSC 126	Ear Training II	1.0
MUSC 331	World Musics	3.0
MUSC 231	Music History I	3.0
MUSC 232	Music History II	3.0
MUSC 241	Private Lesson (Students take 3 terms)	6.0
Music electives		6.0
Ensembles (Six terms from MUSC 101 to MUSC 118)		0.0
Total Credits		26.0

## Minor in Music Performance

### About the Minor

The minor in music performance requires two years of private lessons study with our artist faculty, culminating in a recital. The Music Program will provide support for the recital venue and accompanist. Students must audition and be approved to pursue this minor.

#### Required Courses

MUSC 121	Music Theory I	3.0
MUSC 125	Ear Training I	1.0
MUSC 126	Ear Training II	1.0
MUSC 241	Private Lesson (5 terms)	10.0
MUSC 231	Music History I	3.0
MUSC 232	Music History II	3.0
MUSC 331	World Musics	3.0
MUSC 342	Applied Music-Recital	2.0

Ensembles (six terms from MUSC 101 to MUSC 118))	0.0
Total Credits	26.0

## Minor in Music Theory and Composition

### About the Minor

The minor in music theory and composition is aimed at people who are writing their own music or who would like to begin doing so. Students will take courses in music theory, arranging, composition, and digital composition, and end with a portfolio of several completed pieces.

#### Requirements

MUSC 121	Music Theory I	3.0
MUSC 122	Music Theory II	3.0
MUSC 229	Modern Arranging Techniques	3.0
MUSC 125	Ear Training I	1.0
MUSC 249	Digital Music Composition	3.0
MUSC 231	Music History I	3.0
MUSC 232	Music History II	3.0
MUSC 252	Music Composition	3.0
MUSC 331	World Musics	3.0
MUSC 241	Private Lesson (*)	2.0
Ensembles (**)		
Total Credits		27.0

\* Students are strongly encouraged to register for the section designated for composition.

\*\* Ensembles (6 terms from MUSC 101 to MUSC 118)

## Minor in Performing Arts

### About the Minor

Designed for the student who wishes to explore the fields of dance, music and theater rather than specialize in one area, the minor in performing arts provides motivated students the opportunity to learn about all three areas while performing for two years in one or more of the department's performing groups.

### Program Requirements

#### Required Courses

DANC 115	Introduction to Dance	3.0
MUSC 130	Introduction to Music	3.0
Applied music (two terms selected from MUSC 241 / MUSC 242)		4.0
THTR 115	Theatrical Experience	3.0
Theatre Elective		3.0
Dance Elective		3.0
Performing Arts Electives		7.0
Performing Arts Practicum *		0.0
Total Credits		26.0

\* Performing arts practicum (6 terms from MUSC 101 - MUSC 115, THTR 130 , and/or DANC 131 - DANC 133).

## Minor in Photography

### About the Minor

The minor in photography gives students a thorough understanding of photographic practices using a combination of aesthetics and technology. This flexible minor has been developed to accommodate both Antoinette Westphal College of Media Arts and Design majors as well as majors from any other college. It is an excellent choice for students who are majoring in marketing, communications and journalism. Many employers in these fields are now routinely request that candidates have a good working knowledge of Photoshop and photographic practices.

PHTO 110	Photography	3.0
PHTO 140	Digital Photography I	4.0
PHTO 210	Intermediate Photography	3.0
PHTO 231	Color Photography	4.0
PHTO 240	Digital Photography II	4.0
PHTO 234	Studio Photography	4.0
PHTO 236	Photojournalism	4.0
Additional Suggested Electives (Optional)		
PHTO 275 [W]	History of Photography I	
PHTO 276	History of Photography II	
PHTO 451	Photography and Business	
PHTO 452 [W]	History of Contemporary Photography	
Total Credits		26.0

### Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Minor in Playwriting

### About the Minor

The minor in playwriting is intended to guide students from the acquisition of foundational playwriting skills through the completion of a full-length stage play. Fifteen of the credits are directly craft-oriented, teaching students what they need to know to translate their ideas into a format suitable for production on the stage; the other nine credits are dedicated

to background knowledge intended to inform creative thinking and develop a student's individual voice.

Students pursuing a theater minor should note that common courses in the playwriting minor make this course of study a relatively simple addition to their education.

The playwriting minor is open to all students in the university.

### Program Requirements

SCRP 220	Playwriting I	3.0
SCRP 225	Playwriting II	3.0
SCRP 230	Page to Stage	3.0
SCRP 382	Playwriting Workshop I	3.0
SCRP 383	Playwriting Workshop II	3.0
THTR 121 [W]	Dramatic Analysis	3.0
<b>Choice of 2 classes from:</b>		6.0
ENGL 216 [W]	Readings in Drama	
ENGL 315 [W]	Shakespeare	
THTR 209	Improvisation for the Theatre	
THTR 210	Acting: Fundamentals	
THTR 212	Sketch Comedy	
Total Credits		24.0

### Writing-Intensive Course Requirements

(<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Minor in Product Design

### About the Minor

Students in this minor—through a combination of three studio courses and four applied lecture courses—learn to combine skills in creative problem solving with a visual product design process. Students develop product concepts and collaborate on the development of product ideas, including the creation and integration of new technologies, sustainability, health-care and socially responsible design, all of which are beneficial for design professionals.

The minor is specifically created to offer students a unique multi-disciplinary studio experience. Students will develop skills in the rapid visualization of ideas, creative problem solving, transformative design

thinking and an understanding of the product development process in a collaborative setting. This minor is offered to all students having an interest in developing product ideas, including students from the College of Engineering, the LeBow College of Business, and the School of Biomedical Engineering as well as College of Media Arts and Design students who would like to add a product focus to their design degree.

## Academic requirements

To be eligible for the minor in product design, a student must have completed a minimum of 30.0 undergraduate credits, have declared a major, and have a minimum GPA of 2.7. No prerequisite courses are required. Students may be encouraged to augment or prepare for this minor. Only upon review by the faculty advisor for the minor will students with design credits from other institutions or departments be allowed to apply these to the requirements.

## Program Requirements

### Required courses

PROD 101	History and Analysis of Product Design	3.0
PROD 205	Applied Making I	3.0
PROD 210	Introduction to Product Design	3.0
PROD 215	Design Thinking in Product Design	4.0
PROD 230	Product Design Process Studio	4.0
PROD 235	Applied Design Visualization	3.0
PROD 340	Interdisciplinary Product Design Studio	4.0
Total Credits		24.0

## Minor in Retail

### About the Minor

The retail minor, administered by the Design & Merchandising Program, provides basic foundations in retail operations, buying and merchandise planning and e-commerce. The curriculum allows the opportunity for individualized tailoring according to a student's interests. The minor is open to all Drexel University students, and requires the completion of eight or nine courses for a minimum of 24.0 credits.

### Required Courses:

DSMR 231	Retail Operations *	3.0
DSMR 232	Merchandise Planning and Buying *	4.0
DSMR 233 [WI]	Retail Image Analysis	3.0
DSMR 324	Retail Intersections: Social & Cultural Issues	3.0
DSMR 325	Advanced Merchandise Planning and Buying	4.0
Select 2-3 courses:		7.0
DSMR 205	Digital Promotion Strategies	
DSMR I299	Independent Study in Design & Merchandising	
DSMR 305	Digital Commerce	
DSMR 313	International Fashion Merchandising	
DSMR 326	Fashion Product Promotion	
DSMR 397	Retail Practicum	
Total Credits		24.0

\* All courses are currently open to all DSMR students. DSMR 231 and DSMR 232 are required for all students enrolled in DSMR and the retail minor. The three elective courses can be delivered during other quarters as required. All courses will be restricted to appropriately include the students enrolled in the retail minor. As the industry and curriculum change, courses will be added and adapted accordingly.

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Minor in Screenwriting

### About the Minor

The minor in screenwriting is intended to guide students from the acquisition of foundational screenwriting skills through the completion of a full-length script for film or television. Fifteen of the credits are directly craft-oriented, teaching students what they need to know to translate their ideas into a format suitable for production; the other nine credits are dedicated to background knowledge intended to inform creative thinking and develop a student's individual voice.

Film & video majors should note that they will be taking half of the courses in the screenwriting minor as part of their degree requirements, making this minor a relatively simple addition to their education.

### Required courses

FMST 105	Film History & Theory I	3.0
FMST 205	Film History & Theory II	3.0
SCRP 270 [WI]	Screenwriting I	3.0
SCRP 275 [WI]	Screenwriting II	3.0
SCRP 310	Literature for Screenwriters	3.0
SCRP 370	Screenplay Story Development	3.0
SCRP 380	Screenwriting Workshop I	3.0
SCRP 381	Screenwriting Workshop II	3.0
Total Credits		24.0

## Minor in Somatics

### About the Minor

An understanding of movement and body language has become increasingly important across many fields; in communication, corporate training, movement therapy, education, performance, rehabilitation, sport and fitness. Physical health, clear communication and effective leadership all rely on an awareness of how we carry our bodies through our lives. The Somatics Minor provides an in-depth study of the body, building from an understanding of its functional/structural basis, to its patterns and habits. We focus on how to interpret, analyze, and articulate somatic concepts and develop strategies for application.

### Admission requirements

Admission on consultation with Somatics Coordinator:

Jennifer Morley  
jsm76@drexel.edu  
215.895.2018

### Program Requirements

#### Minor Requirements

DANC 102	Yoga	3.0
DANC 108	Dance Improvisation I	2.0
DANC 116	Dance and Fitness	3.0
DANC 117	Foundations of Somatic Theory and Practice	3.0
DANC 216	Introduction to Laban Movement Analysis	3.0
DANC 316	Dance Kinesiology	3.0
DANC 416	Survey of Somatic Practices	3.0

Complete two of the following courses: 4.0-5.0

DANC 104	Ballet Technique I
DANC 204	Ballet Technique II
DANC 304	Ballet Dance Technique III
DANC 105	Modern Dance Technique I
DANC 205	Modern Dance Technique II
DANC 305	Modern Dance Technique III
DANC 106	Jazz Dance Technique I
DANC 206	Jazz Dance Technique II
DANC 306	Jazz Dance Technique III
DANC 107	Hip-Hop Dance Technique I
DANC 207	Hip-Hop Dance Technique II
DANC 208	Dance Improvisation II
DANC 109	African Dance Technique I
DANC 209	African Dance Technique II

Total Credits 24.0-25.0

## Minor in Sports Media Production

### About the Minor

The Sports Media Production Minor is a gateway for students committed to pursuing a career and a meaningful introduction for those who are intrigued but uncertain about sports media as a profession. Students are required to take the same foundational shooting & lighting, editing, sound, and studio operations courses as the TV Production and Media Management and Film and Video majors and minors. They are also required to take a TVIE sports media strategy course as well as SMT digital and sports media history courses that will provide a greater academic and contextual understanding of the profession. With additional courses in actual physical production, on-air performance, and technology courses.

### Program Requirements

FMVD 110	Basic Shooting and Lighting	3.0
or FMTV 110	Basic Cinematography	
FMVD 115	Basic Editing	3.0
or FMTV 115	Basic Editing	
FMVD 120	Basic Sound	3.0
or FMTV 120	Basic Sound	
SMT 110	The Business of Sport	4.0
SMT 290	Digital Media in Sport	4.0
TVIE 250	TV Sports Program Strategies	3.0
TVPR 100	TV Studio: Basic Operations	3.0
or FMTV 130	Basic TV Studio	
TVPR 356	DNews	3.0
or FMTV 355	DNews	
Choose one of the following		3.0
TVPR 200	TV Studio: Live Directing	
or FMTV 23	Intermediate TV Studio	
TVPR 242	TV On-Camera Performance	
TVPR T280	Special Topics in TV Production	
TVPR T380	Special Topics in TV Production	
TVPR T480	Special Topics in TV Production	
SMT T280	Special topics in SMT	
SMT T380	Special topics in SMT	
SMT T480	Special topics in SMT	
Total Credits		29.0

## Minor in Sustainability in the Built Environment

### About the Minor

The intent of this minor is to prepare students to engage and analyze future design challenges from a sustainability perspective. Students completing this program will be able to approach these challenges in a resourceful and insightful way, with a solid foundation of sustainability principles. The emphasis on collaboration and trans-disciplinary teamwork will allow students to serve as agile leaders in their future careers and be active participants in the critical discourse of their field.

In addition to the 15.0 credits of core courses, students select 9.0 credits of electives. The list below will be updated as new courses in sustainability become available. Students having a question about the inclusion of a course not currently listed as a possible elective should check with the coordinator for this minor.

## Additional Information

For additional information about this program, visit the College's Sustainability in the Built Environment web page. Or contact the program's advisor:

Diana Nicholas  
URBN Center, Suite 410  
Phone: 215.571.4432  
dsn35@drexel.edu

### Required Courses

ARCH 315	Sustainable Built Environment I	3.0
ARCH 320	Sustainable Built Environment II	3.0
INTR 310	Sustainability: History, Theory and Critic	3.0
INTR 410	Collaborative Research in Sustainability	3.0

### Arts and Sciences Course 3.0

Students must select one of the following courses from the Arts and Science College or an approved substitute with the permission of the advisor for this minor:

ANTH 360	Culture and the Environment
ENVS 260	Environmental Science and Society
PHIL 341	Environmental Philosophy
SOC/ENVP 345	Sociology of the Environment

### Additional Electives 9.0

Students select three of the following (or alternative options with the permission of the advisor for this minor):

ANTH 360	Culture and the Environment
ARCH 348	Studies in Vernacular Architecture [W]
ARCH 463	Emerging Architectural Technology
ARCH 465	Energy and Architecture
COM 317 [W]	Environmental Communication
INTR 465/ ENVP 360	Special Topics in Interior Design
ENVS 260	Environmental Science and Society
PHIL 341	Environmental Philosophy
SOC 341	Environmental Movements in America
SOC/ENVP 345	Sociology of the Environment

Total Credits 24.0

\* The elective list will be updated as new courses in sustainability become available. If a student has questions regarding inclusion of a course not on this list, he or she should see the Advisor for the Sustainability in the Built Environment Minor Program.

## Minor in Television Industry and Enterprise

### About the Minor

Students with a 3.0 or higher G.P.A. may apply for the TV Industry & Enterprise minor program. Once accepted, they take 21.0 credits of required courses that provide a basic foundation in the historical, financial, and programming elements of the television industry. The remaining 6.0 credits of study provide students the opportunity to have more hands-on production experience and/or to delve more deeply into the academic study of a specific area of interest.

### Program Requirements

#### Required Courses

TVIE 180	TV Industry Overview	3.0
or FMTV 185	TV Industry	
TVIE 280	Research, Sales and Programming	3.0
TVIE 285	Media Law and Ethics	3.0
or FMTV 285	Media Law and Ethics	
TVIE 290	Introduction to Money and the Media	3.0
TVST 260	History of Television	3.0
TVST 261	History of TV Journalism	3.0
or TVST 361	Art of TV Comedy	
or TVST 362	Art of TV Drama	
Three of the following courses:		9.0
EAM 211	Strategic Management for Entertainment and Arts Management	
EAM 365	Media and Entertainment Business	
EAM 391 [WI]	Entertainment Promotion and Branding	
FMVD 110	Basic Shooting and Lighting	
or FMTV 11	Basic Cinematography	
FMVD 115	Basic Editing	
or FMTV 11	Basic Editing	
FMVD 120	Basic Sound	
or FMTV 12	Basic Sound	
SCRIP 270	Screenwriting I [WI]	
TVPR 100	TV Studio: Basic Operations	
or FMTV 13	Basic TV Studio	
TVIE T180	Special Topics in TV Industry & Enterprise	
TVIE T280	Special Topics in TV Industry & Enterprise	
TVIE T380	Special Topics in TV Industry & Enterprise	
TVIE T480	Special Topics in TV Industry & Enterprise	
TVPR 200	TV Studio: Live Directing	
or FMTV 230	Intermediate TV Studio	
TVPR 201	TV Studio: Comedy	
TVPR 202	TV Studio: Drama	
TVPR 205	TV Studio: Advanced Live Directing	
TVPR 240	Producing for Television	

Total Credits 27.0

## Minor in Theatre

### About the Minor

The minor in theatre consists of two distinct, yet closely integrated components: academics and performance. The intertwining of foundation studies and practical application empowers students to discover and develop their own voice and style in their art.

### Program Requirements

#### Required Course

THTR 121 [WI]	Dramatic Analysis	3.0
Theatre History Requirement		
Select 6.0 credits from any combination of approved 3.0 credit Theatre courses listed below with Historical Perspectives (these include 3.0 credit special topics courses with a historical theater perspective as well)		6.0
THTR 221 [WI]	Theatre History I	
THTR 222 [WI]	Theatre History II	
THTR 231	Introduction to Musical Theatre	
THTR 232	Contemporary Musical Theatre	
Select 3.0 credits total from any combination of the following 1.0 credit courses:		3.0
THTR 130	Introduction to Theater Production Practicum	
THTR 131	Theatre Performance Practicum	
THTR 132	Theatre Production Practicum	
THTR 133	Theatre Management Practicum	
THTR 134	Open Mic Management Practicum	
THTR 141	Theatre Performance Ensemble

THTR T280	Special Topics in Theatre
THTR T380	Special Topics in Theatre
THTR T480	Special Topics in Theatre

Total Credits 24.0

## Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses>) at the University Writing Program (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program>). (<http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center>) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

## Minor in Video Production

### About the Minor

The Minor in Video Production provides a thorough foundation in film-making craft. Once core required courses are completed, students have the opportunity to apply newly acquired skills in their choice of several advanced film production courses or to explore television studio production.

The Minor in Video Production is open to all University students.

### Required Courses

FMVD 110	Basic Shooting and Lighting	3.0
or FMTV 110	Basic Cinematography	
FMVD 115	Basic Editing	3.0
or FMTV 115	Basic Editing	
FMVD 120	Basic Sound	3.0
or FMTV 120	Basic Sound	
SCRIP 270 [WI]	Screenwriting I	3.0
<b>Four of the following courses:</b>		<b>12.0</b>
FMVD 210	Documentary Video Production	
or FMTV 250	Documentary Film	
FMVD 215	Narrative Video Production	
or FMTV 240	Narrative Film	
FMVD 220	Experimental Video Production	
or FMTV 260	Experimental Film	
FMVD 235	Intermediate Lighting	
or FMTV 210	Intermediate Lighting	
FMVD 305	Special Effects Make-up	
FMVD T180	Special Topics in Game Film & Video	
or FMTV T10	Special Topics in Film & TV	
FMVD T280	Special Topics in Game Film & Video	
or FMTV T200	Special Topics in Film & TV	
FMVD T380	Special Topics in Game Film & Video	
or FMTV T300	Special Topics in Film & TV	
FMVD T480	Special Topics in Game Film & Video	
or FMTV T400	Special Topics in Film & TV	
SCRIP 280 [WI]	Writing the Short Film	
TVPR 100	TV Studio: Basic Operations	
or FMTV 130	Basic TV Studio	
TVPR 200	TV Studio: Live Directing	
or FMTV 230	Intermediate TV Studio	

Total Credits 24.0

## Minor in Virtual Reality & Immersive Media

### About the Minor

The design and production of Virtual Reality (VR), Augmented Reality (AR), 360° Video and other Immersive Media formats requires a unique skill set—creative thinking, understanding of design, aesthetic sensitivity, and story telling are balanced with technical knowledge in areas such as 3D Computer Graphics, Animation, Visual Effects, interactivity, digital camera and image processing technologies. Additionally, critical thinking, the ability to collaborate effectively and communication skills are also integral to success in this rapidly expanding industry.

Drexel's Minor in Virtual Reality & Immersive Media provides a foundation in the principles, techniques and tools used in the design and production of virtual reality, augmented reality (VR/AR) and other forms of Immersive Media, with the opportunity for individualized tailoring according to the student's interests.

### Admission Requirements

Open to students with a 3.0 GPA.

### Program Requirements

ANIM 100	Foundational Tools for Animation & VFX	3.0
ANIM 110	Digital Imaging for Animation & VFX	3.0
ANIM 140	Computer Graphics Imagery I	3.0
VRIM 100	Digital Tools for VR/AR Media	3.0
VRIM 110	Digital Imaging for VR/AR Media	3.0
VRIM 120	VR/AR Production Lab I	3.0
Select two of the following:		6.0
ANIM 141	Computer Graphics Imagery II	
ANIM 211	Animation I	
ANIM 220	Digital Compositing I	
ANIM 221	Digital Compositing II	
ANIM 388	Spatial Data Capture	
GMAP 345	Game Development Foundations	
GMAP 367	Character Animation for Gaming	
Total Credits		24.0

## Dance Studies

### Professional Dance Certificate Program

*Certificate Level: Undergraduate*

*Admission Requirements: High school diploma or GED equivalency*

*Certificate Type: Certificate*

*Number of Credits of Completion: 18.0*

*Instructional Delivery: Campus*

*Calendar Type: Quarter*

*Maximum Time Frame: 1 year*

*Financial Aid Eligibility: Not aid eligible*

*Classification of Instructional Program (CIP) Code: 50.0301*

*Standard Occupational Classification (SOC) Code: 27-2031*

### About the Program

The certificate in dance studies is a 1-year option for any qualified professional dancer to assess whether they have the interest and aptitude for entering an undergraduate dance program. The certificate program has no entrance requirement beyond possession of a high school diploma

or GED equivalency. All credits earned in the certificate of study in dance will be transferable into the part-time or full time BS degree in Dance (p. 478).

### Program Requirements

#### General Requirements

DANC 101	Introduction to Dance Studies	3.0
DANC 115	Introduction to Dance	3.0
DANC 116	Dance and Fitness	3.0
DANC 135	Rhythmic Study for Dance	3.0
DANC 215	Dance Appreciation	3.0
DANC 216	Introduction to Laban Movement Analysis	3.0
Total Credits		18.0

# Accounting

## Courses

### ACCT 110 Accounting for Professionals 4.0 Credits

The course is open only to non-business students. A nontechnical introduction to the principles of financial and managerial accounting with emphasis on the use and interpretation of financial reports, managerial planning and control. The course would also provide an overview of business entities and taxation for businesses and individuals. The course is for the individual who seeks a basic knowledge of accounting and its uses. It is designed for the user of accounting information rather than the preparer. This course cannot be substituted for ACCT 115 or 116. Students graduating with a major in the School of Business cannot receive credit for this course.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**ACCT 115 Financial Accounting Foundations 4.0 Credits**

Introduces preparation of the income statement and the balance sheet. Covers analysis and recording of business transactions and a detailed study of accounting for assets, liabilities, and equity.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**ACCT 116 Managerial Accounting Foundations 4.0 Credits**

Introduces the managerial accounting tools and models available for planning and projecting, controlling, and business analysis with an emphasis on decision-making. Covers budgeting, product costing, and analysis and projection of financial statements for internal purposes.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ACCT 115 [Min Grade: D] or ACCT 110 [Min Grade: D]

**ACCT 120 Accounting Essentials for New Ventures 4.0 Credits**

The course covers essential accounting topics specific to new entrepreneurial ventures. Topics include: Financial Statement, cash flow issues, cost accounting, tax calculations, and choice of business entity.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**ACCT 320 Fundamentals of Accounting for New Ventures 4.0 Credits**

This course helps students develop an understanding of the key elements of designing an accounting system and support policies and procedures for a new business venture.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Pre-Junior or Senior.

**Prerequisites:** ACCT 115 [Min Grade: C] and ACCT 116 [Min Grade: C]

**ACCT 321 Financial Reporting I 4.0 Credits**

Provides intensive review of preparation of the income statement and balance sheet. Covers current accounting practice in light of authoritative pronouncements and critical study of theory and practice relating to accounting for current assets.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ACCT 115 [Min Grade: C]

**ACCT 322 Financial Reporting II 4.0 Credits**

Continues critical study of accounting theory and practice relating to financial statement items. The emphasis is on accounting principles underlying the measurement, recognition and reporting of long-lived tangible and intangible assets and long-term liabilities including bonds, pensions, and leases.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ACCT 321 [Min Grade: C]

**ACCT 323 Financial Reporting III 4.0 Credits**

Provides a detailed analysis of higher level financial accounting topics including equity transactions, accounting for income taxes, investments, and the statement of cash flows. Connects topics learned in all financial reporting classes and requires successful completion of a senior project on financial reporting.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ACCT 322 [Min Grade: C]

**ACCT 329 Advanced Accounting 4.0 Credits**

Study of accounting theory and practice in advanced topics including investments, consolidations, foreign currency transactions, and other current accounting topics.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** ACCT 322 [Min Grade: C]

**ACCT 331 Cost Accounting 4.0 Credits**

Continues and expands the study of managerial accounting with an emphasis on cost accounting, internal reporting, analyzing accounting information for planning and projecting and making strategic short and long term business decisions through the use of case studies and/or projects.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ACCT 116 [Min Grade: C]

**ACCT 341 Principles of Auditing 4.0 Credits**

Covers auditing standards and professional ethics, auditing theory and concepts, audit evidence and procedures, and auditors' reports.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ACCT 322 [Min Grade: C]

**ACCT 344 Internal Auditing 4.0 Credits**

Internal Auditing brings a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control and governance processes. It is designed to add value and improve an organization's operations. Topics covered include: The Institute of Internal Auditors' International Professional Practices Framework; risk assessment, including internal control system evaluation; and the relationship of management and employee fraud to the internal audit process. Outside speakers and case studies will be used to demonstrate the application of internal auditing practices in the real world.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**ACCT 360 Lead & Learn: Financial Accounting 4.0 Credits**

This course supports, enhances and expands your knowledge of financial accounting through collaborative learning and delivery of workshops. The course provides a variety of study strategies and employs professional development exercises to assist in improving your understanding of financial accounting, assimilating fundamental learning competencies, and building critical thinking and presentation skills while you lead and facilitate workshops on specific financial accounting topics.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ACCT and classification is Junior or Senior.

**Prerequisites:** ACCT 321 [Min Grade: B] and ACCT 322 [Min Grade: B]

**ACCT I199 Independent Study in ACCT 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**ACCT I299 Independent Study in ACCT 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**ACCT I399 Independent Study in ACCT 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**ACCT I499 Independent Study in ACCT 0.5-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**ACCT T180 Special Topics in ACCT 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**ACCT T280 Special Topics in ACCT 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**ACCT T380 Special Topics in ACCT 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**ACCT T480 Special Topics in ACCT 0.5-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

# Advertising Design

## Courses

**ADGD 310 Television and Web Advertising 4.0 Credits**

A concept-focused exploration of the creative process essential to creating effective ads for TV and new media.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is GRDS.

**Prerequisites:** WMGD 210 [Min Grade: D]

**ADGD 320 Print Advertising II 4.0 Credits**

Advanced advertising design class instruction that will result in a portfolio of design work that demonstrates innovative solutions and visual systems.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is GRDS.

**Prerequisites:** VSCM 230 [Min Grade: D] and VSCM 240 [Min Grade: D]

**ADGD I199 Independent Study in ADGD 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ADGD I299 Independent Study in ADGD 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ADGD I399 Independent Study in ADGD 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ADGD I499 Independent Study in ADGD 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ADGD T180 Special Topics in Advertising Design 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ADGD T280 Special Topics in Advertising Design 0.0-12.0 Credits**

**ADGD T480 Special Topics in Advertising Design 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

## Africana Studies

### Courses

**AFAS 101 Introduction to Africana Studies 3.0 Credits**

Provides an overview of the experience, culture, and political practices of African descendants in the Americas and the Caribbean. The course uses a multidisciplinary approach to introduce students to the history, art, music, and literature of the African Diaspora.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**AFAS 201 Cross Currents in Africana Studies 3.0 Credits**

With a temporal focus on the 20th century, this course critically explores and analyzes the cultural, political and intellectual practices of blacks in North, Central, and South America as well as in the Caribbean.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**AFAS 210 Topics in Africana Arts 1.0-12.0 Credit**

This course will focus on the literatures/music/or culture of the Africana Diaspora. The topics covered in this course will change from quarter to quarter and will often be offered in collaboration with other departments on campus.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 3 times for 48 credits

**AFAS 220 Topics in Africana Society 1.0-12.0 Credit**

This course will take a social science approach to the study of the societies of the African Diaspora inside of the US or internationally. The topics covered in this course will change from quarter to quarter and will often be offered in collaboration with other departments on campus.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 3 times for 48 credits

**AFAS 230 Topics in African History 1.0-12.0 Credit**

This course will provide students with a historical understanding of African Societies from the medieval period to the present. The topics covered in this course will change from quarter to quarter and will often be offered in collaboration with other departments on campus.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 3 times for 48 credits

**AFAS 240 Topics in Africana Current Events 1.0-12.0 Credit**

This topical course will offer students the chance to focus on current events in the global Africana Diaspora. The topics covered in this course will change from quarter to quarter and will often be offered in collaboration with other departments on campus.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 3 times for 48 credits

**AFAS 255 Gender & Black Popular Culture 3.0 Credits**

This course critically examines the media's role in the social construction of "Blackness." Paying particular attention to images of race, culture and gender, this course examines representations of Black women and men in "popular culture" (film, television, music, advertising, etc.).

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**AFAS 260 Race, Politics and Religion 3.0 Credits**

An examination of race and religion as in liberal tradition. How has liberal theory purported the state will confront issues of race and religion? Have the political realities of race and religion in the modern state lived up to the promises laid out by liberalism?.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**AFAS 301 Politics of Hip Hop 3.0 Credits**

This class is an interdisciplinary, socio-historical introduction to rap music and hip hop culture. Several themes will be explored including the origins of rap music as well as the role of urban youth and their notions of race and gender. Record industry practices will also be investigated together with the impact of commercialism on hip hop. We will also consider sexism, misogyny, and violence in both the music and culture.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**AFAS 310 Women, Crime, & History 3.0 Credits**

This class will examine gender, race and crime in US history. Specifically, we will explore the experience of female criminals from the colonial period to the present. We will conduct primary research into this subject at the Philadelphia City Archive (PCA), located at 3101 Market Street. Students will be responsible for a final research paper based on their research findings.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**AFAS 385 Rum, Rice and Revolution: Caribbean History 3.0 Credits**

Course provides a broad, interdisciplinary and socio-historical introduction to the Caribbean. Several themes are covered including empire and the making of the Caribbean; slavery and emancipation; labor formation and race; revolution and resistance; gender oppression and women's experiences; and cultural expressions.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**AFAS 401 Urban Social Justice Practicum I 3.0 Credits**

The Urban Social Justice Practicum offers Drexel students an exciting opportunity to work on-site at a variety of community based organizations that address issues relevant to the African Diaspora. Students can work as mentors, teaching assistants, and interns and inner-city schools, governmental agencies, judicial offices and health care facilities. Working 5 hours per week at a site of their choosing, students also participate in weekly seminars, maintain journals, and complete a final paper. Course runs over two quarters.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**AFAS 402 Urban Social Justice Practicum II 3.0 Credits**

The Urban Social Justice Practicum offers Drexel students an exciting opportunity to work on-site at a variety of community based organizations that address issues relevant to the African Diaspora. Students can work as mentors, teaching assistants, and interns and inner-city schools, governmental agencies, judicial offices and health care facilities. Working 5 hours per week at a site of their choosing, students also participate in weekly seminars, maintain journals, and complete a final paper. Course runs over two quarters.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** AFAS 401 [Min Grade: CR]

**AFAS I199 Independent Study in AFAS 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**AFAS I299 Independent Study in AFAS 0.5-3.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 2 times for 6 credits

**AFAS I399 Independent Study in AFAS 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**AFAS I499 Independent Study in AFAS 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**AFAS T180 Special Topics in Africana Studies 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**AFAS T280 Special Topics in Africana Studies 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**AFAS T380 Special Topics in Africana Studies 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**AFAS T480 Special Topics in Africana Studies 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

# Anatomy

## Courses

**ANAT 101 Anatomy & Physiology I 5.0 Credits**

This course is a general study of the structures and physiology of the human body. Fundamental concepts of microscopic tissue structure, gross structures of organs and body system organization are taught. The course consists of both lecture and lab material. The lecture portion deals with the general principles. In the lab, the student participates with practical examination of microscopic sections, tissues and organs, and the anatomical layout of human cadavers. The cell, tissues and musculoskeletal system will be covered in this course, as well as muscle and nerve physiology.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**ANAT 102 Anatomy & Physiology II 5.0 Credits**

This course is a continuation of ANAT 101. This course is a general study of the structures & physiology of the human body. Fundamental concepts of microscopic tissue structure, gross structures of organs and body system organization are taught. The course consists of both lab and lecture material. The lecture deals with the general principles. In the lab, the student participates with practical examination of microscopic sections, tissues and organs, and the anatomical layout of various animal cadavers. The nervous, endocrine and digestive system will be covered in this course.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ANAT 101 [Min Grade: D]

**ANAT 103 Anatomy & Physiology III 5.0 Credits**

This course is a continuation of ANAT 101 & 102. This course is a general study of the structures and physiology of the human body. Fundamental concepts of microscopic tissue structure, gross structures of organs and body system organization are taught. The course consists of both lab and lecture material. The lecture deals with the general principles. While in the lab, the student participates with practical examination of microscopic sections, tissues, organs and the anatomical layout of various animal cadavers. The cardiovascular, lymphatic, respiratory, urinary and reproductive systems will be covered.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ANAT 102 [Min Grade: D]

**ANAT 202 Sectional Anatomy 3.0 Credits**

This course is designed to bridge the gap between Anatomy & Physiology and Advanced Anatomy. Anatomy of the head, neck, thorax, abdomen and pelvis is reviewed. Relationships of surface and internal structures from different bodily systems are emphasized. The analysis is supported by illustrations, CT scans, and MRI images.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ANAT 103 [Min Grade: D]

**ANAT 420 Advanced Anatomy I 4.0 Credits**

This course introduces the fundamentals of gross anatomy. Emphasis is placed on the regional study of the head, neck, back and upper extremity. Special attention is directed to study of the brain and spinal cord. Laboratory materials include human cadavers, models, radiographs, CT scans, MRI images and relevant web sites.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ANAT 103 [Min Grade: D]

**ANAT 421 Advanced Anatomy II 4.0 Credits**

This course is a continuation of ANAT 420. Emphasis is placed on the regional study of the thorax, abdomen, pelvis and lower extremity. Laboratory material include human cadavers, models, radiographs, CT scans, MRI images and relevant web sites.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ANAT 420 [Min Grade: D]

## Animation

### Courses

**ANIM 100 Foundational Tools for Animation & VFX 3.0 Credits**

Students will learn fundamentals of core tools in Digital Animation & Visual Effects related disciplines. Tools introduced include pixel based image manipulation tools (such as Photoshop), vector based graphics tools (such as Illustrator), video and animation compositing tools (such as After Effects and Nuke) and 3D CGI tools (such as Maya). Animation and visual effects related applications introduced include digital image alteration, digital matte painting, three dimensional type creation, and other foundational animation and visual effects tasks.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ANIM 110 Digital Imaging for Animation & VFX 3.0 Credits**

Students learn foundational image acquisition, lighting and processing techniques and principles utilized in Animation & VFX disciplines. Topics covered include digital still and video imaging and lighting fundamentals for reference and background gathering, texture creation, normal map sampling, spherical and high dynamic range acquisition, location survey and more.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ANIM 100 [Min Grade: D] or DIGM 100 [Min Grade: D] or PHTO 141 [Min Grade: D] or VSCM 200 [Min Grade: D] or GMAP 101 [Min Grade: D]

**ANIM 115 Introduction to Production with Animation & VFX 3.0 Credits**

This course introduces students to many of the core principles, techniques and technologies employed in the creation of media incorporating animation and visual effects. The basics of planning and shooting live action, greenscreen and still image media are introduced in conjunction with design, creation, animation and compositing of both 2D and 3D assets.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** IDM 211 [Min Grade: D] or ANIM 100 [Min Grade: D] or PHTO 141 [Min Grade: D] or VSCM 200 [Min Grade: D] or DIGM 100 [Min Grade: D]

**ANIM 140 Computer Graphics Imagery I 3.0 Credits**

Students learn to represent 3D objects and spaces in 2D media using a variety of drawing and computer graphic techniques. This course lays important foundations for subsequent courses in 3D computer modeling and animation.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** DIGM 100 [Min Grade: D] or VSCM 200 [Min Grade: D] or ANIM 100 [Min Grade: D] or PHTO 141 [Min Grade: D] or VRIM 100 [Min Grade: D] or GMAP 101 [Min Grade: D]

**ANIM 141 Computer Graphics Imagery II 3.0 Credits**

This course will introduce students to the principles and techniques of 3D virtual scene building for animation, visualization and game development.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** DIGM 110 [Min Grade: D] or ANIM 140 [Min Grade: D]

**ANIM 152 Multimedia Timeline Design 3.0 Credits**

Introduces basic design concepts and tools to create time based 2D and 3D multimedia. Addresses issues from pre-production planning, through, post-production and delivery; emphasis on time-based multimedia.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ANIM 100 [Min Grade: D] or DIGM 100 [Min Grade: D] or PHTO 141 [Min Grade: D] or VSCM 200 [Min Grade: D] or GMAP 101 [Min Grade: D]

**ANIM 211 Animation I 3.0 Credits**

Explores computer animation with an introduction to concepts of 3D animation. Includes narrative structure, storyboarding, and development. Emphasizes aesthetic, technical and conceptual issues. Requires students to create shorty animations in timeline based software.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ANIM 140 [Min Grade: D]

**ANIM 212 Animation II 3.0 Credits**

Builds on topics introduced in ANIM 211 Animation I, incorporating advanced animation techniques such as inverse kinematics and dynamics. Requires students to propose, design, and produce a short animation.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ANIM 211 [Min Grade: D]

**ANIM 215 History of Animation 3.0 Credits**

Students learn the pre-cursors to modern animation and the evolution of the art since the beginning of the 20th century. Concepts in both 2D and 3D animation will be covered.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ANIM 220 Digital Compositing I 3.0 Credits**

Examines digital compositing possibilities through the manipulation and recombination of acquired and produced digital imagery, including study of digital image and video formats, color space, live action digital matte painting, Greenscreen/Bluescreen compositing, rotoscope masking and 2D tracking.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ANIM 100 [Min Grade: D] or DIGM 100 [Min Grade: D] or PHTO 141 [Min Grade: D] or VSCM 200 [Min Grade: D] or VRIM 100 [Min Grade: D]

**ANIM 221 Digital Compositing II 3.0 Credits**

Examines 2D and 3D digital compositing possibilities through the manipulation and recombination of acquired and produced digital imagery, including 2D/3D Integration, 3D Matchmoving, and High Dynamic Range Imagery.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ANIM 110 [Min Grade: D] and ANIM 211 [Min Grade: D] and ANIM 220 [Min Grade: D]

**ANIM 231 Scripting for Animation and Visual Effects 3.0 Credits**

This course explores modern scripting languages utilized in Animation and Visual Effects operating systems and software tools that are integral to artist productivity and production pipeline scalability.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 140 [Min Grade: D] or CS 171 [Min Grade: D]

**ANIM 247 Organic Modeling I 3.0 Credits**

This course presents an intensive exploration of human character modeling and rigging for animation, with emphasis on human anatomy and articulation. Through lectures, demonstrations, class critiques and individual feedback from peers and the instructor, students will learn best practices for modeling human forms for animation and why these approaches are valid. Although the focus is on humans, the concepts and techniques presented for organic modeling, sculpting and rigging apply to all organic characters.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ANIM 212 [Min Grade: D]

**ANIM 248 Advanced Lighting 3.0 Credits**

Students will learn to integrate production-oriented lighting techniques into animation. Techniques utilizing both point-based and raytraced global illumination will be covered, and how to optimize pipelines for animation. Basic shader development will also be covered.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ANIM 141 [Min Grade: D] or DIGM 141 [Min Grade: D]

**ANIM 250 Professional Practices for Animation & VFX 3.0 Credits**

Provides a professional orientation to the animation and visual effects industry through an exploration of a variety of projects and studies. In addition to lecture and discussions, students learn to take active part in role plays and presentations to achieve an understanding of the importance of team building, team work, and team management in all phases of animation and visual effects productions from proposals to final delivery, as well as personal development and promotion through personal learning, development of work demonstration materials.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ANIM 212 [Min Grade: C] or ANIM 221 [Min Grade: C] or ANIM 247 [Min Grade: C]

**ANIM 314 Character Animation I 3.0 Credits**

In this course, students learn humanoid rigging, body mechanics, body language and theories of acting with emphasis on having characters emote and perform with deliberateness of action. The course will culminate with a two character pantomime animation that students will create with a partner.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ANIM 247 [Min Grade: D]

**ANIM 315 Character Animation II 3.0 Credits**

Students learn human facial deformation and movement as it's applied to thought driven character performance.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ANIM 314 [Min Grade: B]

**ANIM 321 Immersive Animation 3.0 Credits**

Students will explore and experiment with non-planar multi-perspective projection to develop a unique and powerful immersive animation experience. Focus will be on the production of animations for both irregular architectural surfaces and conventional projection environments such as fulldome.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ANIM 212 [Min Grade: D] or DIGM 212 [Min Grade: D]

**ANIM 347 Organic Modeling II 3.0 Credits**

In this course, students will learn organic modeling of creatures, both real and imagined, for animation, taking into consideration anatomy, articulation and the fundamentals of creature design. In addition, we'll look at various concepts and techniques for rigging animals and creatures as you'll develop and present your own creature, modeled, sculpted, rigged, and posed in a final animation.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ANIM 247 [Min Grade: B] and ANIM 315 [Min Grade: B]

**ANIM 350 Experimental Animation Lab 3.0 Credits**

In this lab course, students explore Animation as an art form. Animation's characteristic of being a malleable art form opens the possibility of limitless, novel expressions of ideas. Students explore how Animation can uniquely affect the human spirit toward higher levels of conceptual consideration and comprehension as a multi-sensory language that can speak to audiences universally and post-linguistically.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ANIM 314 [Min Grade: D]

**ANIM 388 Spatial Data Capture 3.0 Credits**

Students learn about the tools available to integrate components from the physical environment into computer animations and games. Aspects covered will be 3D scanning, motion capture and imaging techniques.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** DIGM 212 [Min Grade: D] or ANIM 212 [Min Grade: D]

**ANIM 410 Advanced Compositing 3.0 Credits**

Students learn to create detailed visual effects, and the best methods to integrate them into live-action plates. Drawing on existing compositing and animation knowledge, students will work in groups to produce short visual effects sequences.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**Prerequisites:** (ANIM 219 [Min Grade: D] or ANIM 221 [Min Grade: D]) and ANIM 212 [Min Grade: D]

**ANIM 411 Advanced Animation 3.0 Credits**

This course explores a wide range of visual effects assets, both practical and synthetic. Projects focus on the creation of a comprehensive short animation.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**Prerequisites:** ANIM 410 [Min Grade: D] or DIGM 302 [Min Grade: D] or ANIM 219 [Min Grade: D]

**ANIM 435 Technical Directing for Animation 3.0 Credits**

Students learn the necessary toolsets for technical direction of animated films and visual effects. The topics covered include Pythos scripting, pipeline development and integration and creation of custom shaders to streamline production processes.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ANIM 219 [Min Grade: D] or DIGM 302 [Min Grade: D]

**ANIM I199 Independent Study in Animation 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ANIM I299 Independent Study in Animation 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ANIM I399 Independent Study in Animation 0.5-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ANIM I499 Independent Study in Animation 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ANIM T180 Special Topics in Animation 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ANIM T280 Special Topics in Animation 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ANIM T380 Special Topics in Animation 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ANIM T480 Special Topics in Animation 3.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

## Anthropology

### Courses

**ANTH 101 Introduction to Cultural Diversity 3.0 Credits**

Examines the diversity that exists in human culture. Uses lectures, films, and discussions to examine and illustrate the relationship between humans and their social/cultural systems.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 110 Human Past: Anthropology and Prehistoric Archeology 3.0 Credits**

Examines human origins from the australopithecines to the present, including both the physiological and archaeological records. Discusses new finds and new interpretations of evolution.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 111 Introduction to Biological Anthropology 3.0 Credits**

Anthropology is the holistic study of the human condition. Biological anthropology is a subfield of the larger discipline that studies humankind as a zoological species. As biological anthropology is firmly rooted in evolutionary theory, the evolutionary biology of humans is the central focus of the course. Basic concepts of genetics, geology, paleontology, comparative anatomy, primate biology and material culture provide the foundation for understanding humanity's place in nature.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 112 Language, Culture & Cognition 3.0 Credits**

This course is an introductory survey of three ways language is understood as a central element that glues together human culture; language around categories and taxonomies as shared perception; language origins and evolution; and language as socialization. An additional fourth unit on fieldwork methods in cross-cultural understanding and language starts to prepare you for future qualitative research.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 117 Introduction to World Religions 3.0 Credits**

This course is meant to be a foundational course for the minor in religious studies. It introduces students to the world religions from an anthropological perspective. Hence the basic concerns of an anthropological approach – worldview, ritual, myth, and so forth – are introduced early and applied to each of the religions studied.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 120 Biblical Archaeology: The Archaeology of Israel and Jordan 3.0 Credits**

Examines the archaeology of Israel and Jordan from the earliest human occupation until the Persian Conquest in 535 B.C. Discusses many places described in the Old Testament in an archaeological context.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 140 Anthropology of Food 3.0 Credits**

Food impacts almost every part of human existence. Anthropologists study our relationship with food and how we use it to bond with others, celebrate or mourn, and keep our bodies going. In this course we will explore food from the first fire cooked meal through domestication, consumption, preparation, genetic modification, and the privatization of food production today. We will also view food through cultural eyes by learning how people throughout the world produce, consume, and enjoy food. We will reflect upon how our personal and cultural choices concerning food impact many aspects of our lives including our mental and physical health, self- image, social life, and identity.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 205 Imagining Africa 3.0 Credits**

This course introduces students to Africa by exploring how Africa and Africans have been viewed, perceived or imagined by non-Africans; how such images and stories have affected Africans' roles in global politics, economy, and media; and how images and stories generated by Africans are used creatively to express a sense of African lives in public life, in the arts and in the sciences. The course includes multiple video screenings.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 210 [WI] Worldview: Science, Religion and Magic 3.0 Credits**

Examines anthropological and archaeological evidence of the worldviews of non-literate people, as shown in the practice of ceremony, magic, sorcery, and witchcraft, and the role of shamans and priests. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ANTH 212 [WI] Topics in World Ethnography 3.0 Credits**

Examines the peoples and cultures of the selected cultural areas. Emphasizes indigenous cultures and the effects of modernization on these cultures.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ANTH 215 Anthropology of Gender 3.0 Credits**

This course takes an ethnographic approach to the study of gender socializations and gender roles. We will address issues of sex roles, the cultural construction of gender categories, the forms of gender inequality, and the ways cultures engage in gender based power relationships. While these issues will be dealt with in specific and local ethnographic contexts, students will be encouraged to make comparisons across the contexts and to compare these works with their own experience.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 217 Anthropology of Interfaith Relations 3.0 Credits**

This course aims to introduce students to how anthropological and ethnographic analyses can help us understand the variety of ways in which people of different faiths both conflict with and work amicably together.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 220 Aging In Cross-Cultural Perspective 3.0 Credits**

Examines the status, roles, and treatments of elderly people in various societies throughout the world and among minority groups in the United States.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 225 Anthropology of Youth 3.0 Credits**

What is youth? Is it a universal, biological phase of human life somewhere between childhood and adulthood, or a cultural category, socially constructed and historically contingent? Does it mean the same thing to be young today in the US, Samoa, Indonesia, Nepal, or Japan, or do place, culture, history, media, and politics dramatically influence the feeling and experience of being young? This course addresses these and other questions raised by anthropologists about the culture and nature of "youth." We will be analyzing youth as an idea, an identity, a moral panic, a branding distinction, and an obsession.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 240 Urban Anthropology 3.0 Credits**

This course will give students the opportunity to familiarize themselves with the major themes in urban anthropology and how they relate to other areas of research in anthropology and the social sciences in general. Students will focus on the research methods used by urban anthropologists as well as read different ethnographic cases of urban life.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 245 Reflecting on Work Identity 3.0 Credits**

Reflecting on Work Identity is an online course developed for students to take during their first co-op cycle. The first phase of the course will focus on the "self"; the student will participate in self-categorization and evaluation of personal expectations in regard to their co-op and future professional life. The second phase will consist of an analysis of power dynamics at the workplace, focusing on the "other" rather than the "self." The final phase is a synthesis of the "self" and the "other," in which the student will combine knowledge acquired from the readings and personal experiences in order to address issues facing the modern workplace, as well as reflect on their individual work identity.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ANTH 250 Anthropology of Immigration 3.0 Credits**

By examination of key ethnographical texts, the course covers basic theoretical and topical approaches to the anthropology of immigration, including: immigration and emigration; transnationalism and globalization; reception contexts; ethnic economies, enclaves and ethnic businesses; global economic strategies for migrant households; refugees, the state and immigration; culture, identity, and adaptation and assimilation.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 255 Psychological Anthropology 3.0 Credits**

The course is an overview of the field of Psychological Anthropology. It examines issues live nature vs. nurture; personality and "madness"; ethnopsychologies; and cognition. The attempt is to always recognize the salience and significance of culture when considering these issues.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ANTH 265 Health & Healing Practices in Cross-Cultural Perspective 3.0 Credits**

This course examines the key concepts and research methodologies of medical anthropology. It will explore the various metaphors about health, and their meanings, that can be found across a range of cultural contexts. Students will learn that the distinctive feature of the anthropological approach to the study of health, disease and healthcare is the use of ethnography.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 270 Comparative Religious Ethics 3.0 Credits**

The eternal teaching of the different religions and how they address such issues as war, sexuality and economics.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 310 Societies In Transition: The Impact of Modernization and the Third World 3.0 Credits**

Looks at the impact of 20th-century technology on traditional societies. Uses area studies from Africa, Asia, and elsewhere to explore institutions such as the family, the polity, the economy, and religion.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ANTH 312 Approaches to Intercultural Behavior 3.0 Credits**

Examines theory and case studies related to working and living outside the United States. Includes topics such as culture shock, cultural relativity, and ethnocentrism. Selects specific geographic culture areas for case studies.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 325 DIY Culture 3.0 Credits**

Home-recorded albums, self-published books, personal style blogs, and YouTube cat videos. These are just a small portion of the do-it-yourself cultural products we encounter — and perhaps even make ourselves — everyday. This course is a survey of DIY culture in the digital age, from cutting and pasting, to photoshopping, digital video posting, and blogging. Using critical theory, poststructuralist critique, and recent anthropological work in the studies of media production, we will be analyzing the cultural, historical, and political significance of DIY movements and cultures, as well as assessing the theoretical frameworks put forward by social theorists to make sense of them.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 330 Media Anthropology 3.0 Credits**

This course will introduce students to the anthropological study of media including traditional forms of mass media as well as new media such as the Internet. Students will be exposed to the theories and methodologies of media study from an anthropological perspective. Students will also engage in their own ethnographic studies of media to gain first hand experience with the methods of anthropology.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 335 Anthropology of Education 3.0 Credits**

This course will look at key works of anthropologists as they look at educational institutions from a cultural perspective. The course will consider some of the more critical issues of the field, such as issues of class, race and gender relations in schooling by focusing on some more contemporary ethnographies.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 340 Crete Through The Looking Glass 3.0 Credits**

Students are guided through the techniques of fieldwork and participant observation to attend several customs and practices through various fieldtrips. Traveling is a course requirement used toward the completion of a research project. While "at home", students reflect on their experiences through a looking-glass process.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ANTH 345 Visual Anthropology 3.0 Credits**

Introduces students to the subdiscipline of visual anthropology through an overview of visual theory and a survey of ethnographic photography and film. Students will learn to evaluate ethnographic visual representation as well as develop their own skills as visual anthropologists through documenting and representing cultural phenomena.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ANTH 101 [Min Grade: D]

**ANTH 350 Anthropology of Language 3.0 Credits**

Explores how humans organize cultural activities through language and vice versa. After covering a short history of linguistic anthropological study and method, materials include ethnographic study of language and socialization, verbal art and linguistic performance, language and cultural categories, writing and literacy, and language ideologies.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 355 Digital Culture 3.0 Credits**

This course will focus on how the internet, new and social media have changed the way we think about space and time. It will look at the ways we work and engage in leisure activities. We will bring the approach of anthropology to the study of these new media in order to ask key questions about social life.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 360 Culture and the Environment 3.0 Credits**

This course explores the interplay between culture and the environment by examining both ethnographic accounts from around the world and archeological materials from the last 14,000 years. Special attention is paid to the changing cultural view of the environment over the last two centuries.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 363 Sacred Traditions of the East 3.0 Credits**

This course introduces the student to sacred traditions of Asia: Hinduism, Buddhism and Confucianism. It will attempt a historical-comparative investigation of these traditions. It will emphasize the practice and philosophical underpinnings of these traditions, as well as the interplay between integration of the folk or popular aspects and the abstracts or esoteric.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 365 Family and Kinship 3.0 Credits**

The course investigates the concepts of family and kinship from an anthropological perspective. It looks at the family as a critical and contradictory location at the intersection of global and transnational forces. Using anthropological concepts such as status and role, it will explore changing gender relationships, sexual expression, parenting and aging.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ANTH 370 Ethnographic Methods 3.0 Credits**

The course introduces students to ethnographic research methods through eight hands-on assignments: 1) selecting a site; 2) establishing rapport; 3) operationalizing hypotheses; 4) using qualitative and quantitative data gathering techniques; 5) taking field notes ; 6) analyzing data collected; 7) synthesizing these data; and 8) writing an ethnographic report.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ANTH 375 Digital Ethnography 3.0 Credits**

This course is the second part in the ethnographic methods series. It introduces students to the research methodologies employed by anthropologists to study online environments, digital communities, and virtual worlds. Students will gain practical, firsthand experience carrying out digital ethnographies and learn to evaluate the quality of digital ethnographic research.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 380 Special Topics in Anthropology 3.0 Credits**

This course will explore current issues and debates in Anthropology. It will be conducted as a seminar. The topic will vary each term.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ANTH 385 Community Engaged Anthropology 3.0 Credits**

Community engaged anthropology is a form of anthropology that employs participatory action research. As such, it is less research done on a community, as research done with the community as an equal partner.

This course introduces students to that technic and approach, its philosophical underpinnings and principles. It is a writing intensive course involving the development and assessment of anthropological fieldnotes.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH 390 Seminar in Ethnography 2.0 Credits**

The Seminar in Ethnography is a course for anthropology majors. This is a peer-mentoring practicum where students are given the opportunity to present their own ethnographic fieldwork and get feedback from other students in the seminar. All anthropology majors will be in the seminar together. Juniors and seniors will be presenting mature research as well as mentoring the freshmen and sophomores.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 3 times for 8 credits

**Restrictions:** Can enroll if major is ANTH.

**ANTH 410 Cultural Theory I 3.0 Credits**

The course is the first of a two part core cultural theory sequence. It tracks the development of anthropological theory beginning in the mid-19th century until the 1980's. Students are expected to understand the foundational role played by cultural evolution, historical particularism, structural functionalism, structuralism and cultural ecology within the discipline.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ANTH 411 Cultural Theory II 3.0 Credits**

This course is the second part of a two-part core in cultural theory that begins with Anthropology 410. It tracks the major theoretical streams of anthropological thought from the early 1980s to the present and challenges students to begin to place their own thinking within, and in opposition, to these streams of thought. Theoretical frameworks covered in this course include practice theory, post-structural theory, feminist theory, neo-Marxism, affect theory, and critiques of globalization and neoliberalism.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ANTH I199 Independent Study in ANTH 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ANTH I299 Independent Study in ANTH 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ANTH I399 Independent Study in ANTH 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ANTH I499 Independent Study in ANTH 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ANTH T180 Special Topics in Anthropology 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ANTH T280 Special Topics in Anthropology 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ANTH T380 Special Topics in Anthropology 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ANTH T480 Special Topics in Anthropology 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

## Arabic

### Courses

**ARBC 101 Arabic I 4.0 Credits**

Introductory Arabic includes listening, speaking, reading and writing. Offered all terms.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ARBC 102 Arabic II 4.0 Credits**

Continues ARBC 101. Offered all terms.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARBC 101 [Min Grade: C]

**ARBC 103 Arabic III 4.0 Credits**

Continues ARBC 102. Offered all terms.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARBC 102 [Min Grade: C]

**ARBC 201 Arabic IV 4.0 Credits**

This course includes listening, speaking, reading, and writing practice, with a focus on cultural competency and conversational skills. Builds on Arabic 103.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARBC 103 [Min Grade: C]

**ARBC 202 Arabic V 4.0 Credits**

This course includes listening, speaking, reading, and writing practice, with a focus on cultural competency and conversational skills. Builds on Arabic 201.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARBC 201 [Min Grade: C]

**ARBC 310 Advanced Writing and Speaking 4.0 Credits**

Provides advanced practice in written and oral communication, including journalistic, professional and creative writing. Examines contemporary cultural contexts through media and news. Taught in Arabic.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARBC 202 [Min Grade: C]

**ARBC 320 Introduction to Language for the Professions 3.0 Credits**

This course covers Introduction to Arabic communication skills in areas such as contemporary business, health, and law in a culturally sensitive fashion. The content of this course may change every term it is offered and is repeatable for credit. Taught in Arabic.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 8 times for 27 credits

**Prerequisites:** ARBC 310 [Min Grade: C]

**ARBC 410 Advanced Grammar and Translation 3.0 Credits**

This course provides advanced grammar instruction and fosters translation and communication skills within a contemporary cultural context. The content of this course may change every term it is offered and is repeatable for credit. Taught in Arabic.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 8 times for 27 credits

**Prerequisites:** ARBC 310 [Min Grade: C]

**ARBC 411 Arabic - Introduction to Arabic Stylistics 3.0 Credits**

Fourth year of Arabic -- provides advanced practice in translation, comprehension, and written and oral communication.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 8 times for 24 credits

**Prerequisites:** ARBC 303 [Min Grade: C]

**ARBC 420 Advanced Studies in Language for the Professions 3.0 Credits**

This course provides advanced communication skills in areas such as contemporary business, health, and law in a culturally sensitive fashion. The content of this course may change every term it is offered and is repeatable for credit. Taught in Arabic.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 8 times for 27 credits

**Prerequisites:** ARBC 310 [Min Grade: C]

**ARBC 450 Advanced Studies in Language, Media, and Society 3.0 Credits**

Advanced analysis of the role of language and media in society, including sociolinguistics, gender, media studies, and communication. Taught in Arabic.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 8 times for 27 credits

**Prerequisites:** ARBC 310 [Min Grade: C]

**ARBC 471 Arabic Civilization 3.0 Credits**

ARBC 471 presents an integrated approach in Arabic to the civilization, culture, history, and literature specific to the areas in which the language is spoken, with emphasis on the development and evaluation of cultural values.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 8 times for 24 credits

**Prerequisites:** ARBC 303 [Min Grade: C]

**ARBC 480 Arabic Minor Thesis Course 0.5-4.0 Credits**

Independent research study on a topic selected by the student.

Independent study is supervised by a faculty member and guided by a plan of study. At the end of the course, the student is required to produce a paper and oral defense on the topic of his paper.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ARBC I199 Independent Study in ARBC 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ARBC I299 Independent Study in ARBC 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ARBC I399 Independent Study in ARBC 0.5-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ARBC I499 Independent Study in ARBC 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ARBC T180 Special Topics in Arabic 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ARBC T280 Special Topics in Arabic 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ARBC T380 Special Topics in Arabic 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ARBC T480 Special Topics in Arabic 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

# Architectural Engineering

## Courses

### AE 220 Introduction to HVAC 3.5 Credits

This course includes a review of thermodynamics, moist air properties and processes, basic heat transfer, solar radiation, heating and cooling losses and load calculation, types of air conditioning systems, infiltration and ventilation, air motion and distribution.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** (CAEE 202 [Min Grade: D] and CAEE 203 [Min Grade: D]) or ENGR 210 [Min Grade: D] or CHE 206 [Min Grade: D]

### AE 340 Architectural Illumination and Electrical Systems 3.0 Credits

This course covers building electrical systems, including power demand, distribution and control; building illumination techniques, including lighting demand, layout and energy analysis.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** (CAEE 202 [Min Grade: D] and PHYS 102 [Min Grade: D]) or ENGR 210 [Min Grade: D] or CHE 206 [Min Grade: D]

### AE 390 Architectural Engineering Design I 4.0 Credits

Establishes a base of building systems design concepts, knowledge and performance criteria, with emphasis on the thermal, electrical, illumination and structural aspects of buildings.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** AE 220 [Min Grade: D] and AE 340 [Min Grade: D] and ARCH 192 [Min Grade: D] and MEM 202 [Min Grade: D]

### AE 391 Architectural Engineering Design II 4.0 Credits

Emphasizes the development of insight into the solution of building system design problems, development of in-depth understanding of building systems design synthesis, and integration in a single building of modest scale and complexity.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** AE 390 [Min Grade: D]

### AE 410 Intelligent Buildings 3.0 Credits

An overview of the present and future role of Information Technology in the construction industry with emphasis on the computer tools used throughout the building life cycle by all stakeholders, primarily Building Information Modeling (BIM) and the role of networked-linked sensors and actuators.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

### AE 430 Control Systems for HVAC 3.0 Credits

This course introduces basic control concepts with applications to HVAC systems; direct digital control, control loops; system modeling; transfer functions; selecting and locating sensors and actuators; design and tuning control algorithms; design and programming of HVAC control systems.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** AE 220 [Min Grade: D] or MEM 413 [Min Grade: D]

### AE I199 Independent Study in AE 0.0-12.0 Credits

Independent study on a topic selected by the student. Independent study is supervised by a faculty member and guided by a plan of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

### AE I299 Independent Study in AE 0.0-12.0 Credits

Independent study on a topic selected by the student. Independent study is supervised by a faculty member and guided by a plan of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

### AE I399 Independent Study in AE 0.0-12.0 Credits

Independent study on a topic selected by the student. Independent study is supervised by a faculty member and guided by a plan of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

### AE I499 Independent Study in AE 0.0-12.0 Credits

Independent study on a topic selected by the student. Independent study is supervised by a faculty member and guided by a plan of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

### AE T180 Special Topics in AE 0.0-12.0 Credits

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

### AE T280 Special Topics in AE 0.0-12.0 Credits

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

### AE T380 Special Topics in AE 0.0-12.0 Credits

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

### AE T480 Special Topics in AE 0.0-12.0 Credits

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

# Architecture

## Courses

### ARCH 101 Studio 1-A 4.0 Credits

2+4 Option Architecture Majors only. Introduces basic architectural design principles. Elementary concepts of space, surface, and form will be explored in two- and three-dimensional abstract exercises. Incorporates observational analysis and graphic skills.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

### ARCH 102 Studio 1-B 4.0 Credits

2+4 Option Architecture Majors only. Transitions from abstract principles to simple architectural exercises, considering function, scale, user and ordering strategies in relationship to form-making in three-dimensional space. Exercises heighten observation and graphic skills while developing an architectural vocabulary.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 101 [Min Grade: C] and ARCH 131 [Min Grade: C]

### ARCH 103 Studio 2-A 4.5 Credits

2+4 Option architecture majors only. Continues ARCH 102. Introductory architectural design studio in which simple architectural problems develop issues of context and the use of materials with issues of space and human activity.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 102 [Min Grade: C-] and (ARCH 132 [Min Grade: C-] or ARCH 152 [Min Grade: C-])

### ARCH 104 Studio 2-B 4.5 Credits

2+4 Option architecture majors only. Continues ARCH 103. Introductory architectural design studio in which issues of architectural form are balanced with site and programmatic concerns.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 103 [Min Grade: C-] and (ARCH 133 [Min Grade: C-] or ARCH 150 [Min Grade: C-])

**Corequisite:** ARCH 161

### ARCH 105 Studio 3-A 4.5 Credits

2+4 Option architecture majors only. Continues ARCH 104. Covers intermediate architectural design problems of increasing complexity that emphasize the nature of function, structure, and material and their impact on the design process.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 104 [Min Grade: C-] and ARCH 161 [Min Grade: C-]

**Corequisite:** ARCH 134

### ARCH 106 Studio 3-B 4.5 Credits

2+4 Option architecture majors only. Continues ARCH 105. Continues exploration of intermediate architectural design problems that present a full range of challenges in the areas of organization, context, and expression.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 105 [Min Grade: C-] and (ARCH 134 [Min Grade: C-] or ARCH 153 [Min Grade: C-])

### ARCH 107 Foundation Design I 2.0 Credits

Introduces basic design principles through investigation of abstract and applied design projects using two-dimensional media. Exercises heighten observation and graphic skills.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

### ARCH 108 Foundation Design II 2.0 Credits

Investigates basic design principles through abstract and applied design projects in two-dimensional and three-dimensional media. Design exercises will advance understanding of the design process by exploring conceptual ideas through graphic and oral communication.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 107 [Min Grade: C]

### ARCH 109 Foundation Design III 2.0 Credits

Investigates basic design principles that emphasize the inter-relationship between the scale of the human body and its movement within three-dimensional space. More in-depth design exercises will address the design process, development of a conceptual idea and a higher-level graphic and oral presentation.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 108 [Min Grade: C]

### ARCH 111 Studio 1-1 4.0 Credits

Introduces basic architectural design principles and concepts of space, surface and form explored in two and three-dimensional abstract exercises. Exercises incorporate observational analysis and graphic skills while developing architectural vocabulary.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 109 [Min Grade: C] or ARCH 192 [Min Grade: C]

### ARCH 112 Studio 1-2 4.0 Credits

Emphasizes the nature of function, structure, and material and their impact on the design process, and therefore their solutions to architectural problems.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (ARCH 111 [Min Grade: C] or INTR 233 [Min Grade: C]) and ARCH 131 [Min Grade: C]

**ARCH 113 Studio 1-3 4.0 Credits**

Investigates the interrelationships of scale, context, and building elements and the nature of materials and structure and their impact on the process of creating spaces for human activity through simple architectural problems.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**Prerequisites:** (ARCH 112 [Min Grade: C] and ARCH 132 [Min Grade: C]) or (INTR 233 [Min Grade: C] and INTR 220 [Min Grade: C])

**ARCH 121 Studio 2-1 3.0 Credits**

Stresses the impact of function, materials, and the issue of building image on the design process. Fall.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 113 [Min Grade: C-] and (ARCH 133 [Min Grade: C-] or ARCH 150 [Min Grade: C-]) and ARCH 161 [Min Grade: C-]

**Corequisite:** ARCH 141

**ARCH 122 Studio 2-2 3.0 Credits**

Continues ARCH 121. Investigates projects of greater programmatic complexity and more stringent site constraints. Projects begin to deal with buildings in an urban context. Winter.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 121 [Min Grade: C-]

**Corequisite:** ARCH 142

**ARCH 123 Studio 2-3 3.0 Credits**

Continues ARCH 122. Poses design problems of increased complexity to enable students to explore in greater detail the issues presented in the previous term. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 122 [Min Grade: C-]

**Corequisite:** ARCH 143

**ARCH 131 Architectural Representation I-Drawing Basics 3.0 Credits**

Introduces the basic skills of architectural representation through drawing, including drafted and freehand techniques in a variety of media. Also introduces techniques of digital documentation.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**ARCH 132 Architectural Representation II-Drawing 3.0 Credits**

Continues ARCH 131 Architectural Representation I. Introduces advanced skills of architectural representation through drawing, including drafted and freehand techniques in a variety of media. Also introduces advanced techniques of digital documentation.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 101 [Min Grade: C-] or ARCH 111 [Min Grade: C-]) and ARCH 131 [Min Grade: C-]

**ARCH 133 Architectural Representation III-Digital 4.0 Credits**

Continues ARCH 132 Architectural Representation II. Introduces basic digital representation skills in 2D and 3D, the creation and manipulation of three-dimensional architectural models and the resultant two-dimensional drawings as well as renderings using various computer techniques and software programs.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 102 [Min Grade: C-] or ARCH 113 [Min Grade: C-]) and ARCH 132 [Min Grade: C-]

**ARCH 134 Architectural Representation IV-3D Modeling 4.0 Credits**

Continues ARCH 133. Further investigates and demonstrates the computer's capabilities in architectural design, 3D modeling and representation using various computer techniques and software programs. May also introduce digital fabrication techniques.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 104 [Min Grade: C-] or ARCH 113 [Min Grade: C-]) and (ARCH 133 [Min Grade: C-] or ARCH 150 [Min Grade: C-])

**ARCH 135 Architectural Representation V-Advanced Methods 3.0 Credits**

Continues ARCH 134. Examines advanced techniques of architectural representation and visual communications for use in the architectural design process. Emphasizes presentation methods to describe design concepts. Content may vary. Contact Architecture program for details. Professional elective.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 106 [Min Grade: C-] or ARCH 233 [Min Grade: C-]) and (ARCH 134 [Min Grade: C-] or ARCH 153 [Min Grade: C-])

**ARCH 141 Architecture and Society I 3.0 Credits**

Examines the evolution of Western architectural thought, form, space, and structures in light of changing human values and institutions. Covers Western architecture from the prehistoric era through the Romanesque, and contemporary architecture in Asia and Central America as well as Islamic architecture in the Middle East and Spain.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**ARCH 142 Architecture and Society II 3.0 Credits**

Examines the evolution of Western architectural thought, form, space and structures in light of changing human values and institutions. Course covers early monumental architecture of the Western Hemisphere and then considers the evolution of Western architecture from the "Dark Ages" through the development and spread of Renaissance architecture across Europe and Latin America.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**ARCH 143 Architecture and Society III 3.0 Credits**

Examines the evolution of Western architectural thought, form, space and structures in light of changing human values and institutions. Covers Western architecture and urbanism from the 16th C through the early 20th C. Also considered is the architecture of the Aztec and Inca empires, Islamic architecture and architecture and landscape designs of 16th C and 17th C Japan.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 142 [Min Grade: D]

**ARCH 144 Architecture and Society IV 3.0 Credits**

Examines the evolution of architectural thought, form, space and structures in light of changing human values and institutions. Surveys the crucial buildings and thematic development of modern architecture and urbanism beginning in the late 19th C. through the mid-20th C.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: D]

**ARCH 161 Architectural Construction 3.0 Credits**

Architecture majors only. Covers basic construction principles and the use of materials in developing architectural assemblies, providing a conceptual framework to integrate construction and design.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 103 [Min Grade: C-] or ARCH 112 [Min Grade: C-]) and (ARCH 132 [Min Grade: C-] or ARCH 152 [Min Grade: C-] or ARCH 156 [Min Grade: C-])

**ARCH 170 Architectural Technology I 3.0 Credits**

Introduction to the fundamental aspects of building technology with exposure to materials, structure and building systems that are frequently used in building construction. Provides a framework for the exploration of construction in the context of design.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** PHYS 182 [Min Grade: C-] and (MATH 102 [Min Grade: C-] or MATH 183 [Min Grade: C-])

**ARCH 172 Architectural Technology II 3.0 Credits**

Further exploration of materials, structure and building systems and their influence on passive systems and sustainable design principles. Begins the development of systematic thinking regarding architectural technology.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 170 [Min Grade: C-]

**ARCH 173 Architectural Technology III 3.0 Credits**

Introduction to the technical building analysis including the organizing principles for materials, structure and systems. Includes envelope assembly, thermal comfort, structural and passive building systems.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 172 [Min Grade: C-]

**ARCH 181 Architecture Studio 1A 4.0 Credits**

Introduces basic architectural design principles. Elementary concepts of space, surface and form will be explored in two and three dimensional abstract exercises. Exercises incorporate observational analysis and graphic skills.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**ARCH 182 Architecture Studio 1B 4.0 Credits**

Transitions from abstract design principles to simple architectural exercises, considering function, scale, user and ordering strategies in relation to form-making in three-dimensional space. Exercises heighten observation and graphic skills while developing an architectural vocabulary.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 181 [Min Grade: C-]

**ARCH 183 Architecture Studio 1C 4.0 Credits**

Focuses on a series of basic architectural problems developed around issues of context and material use in relationship to the organization of space and human activity. Design exercises will cultivate the design process through developing a conceptual idea through graphic and oral communication.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 182 [Min Grade: C-] or INTR 233 [Min Grade: C-]

**ARCH 191 Studio 1-AE 3.0 Credits**

Architectural engineering majors only. Covers basic design principles using three-dimensional abstract and applied projects. Exercises heighten observation skills.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is AE.

**ARCH 192 Studio 2-AE 3.0 Credits**

Architectural engineering majors only. Continues ARCH 191. Uses design exercises to emphasize the nature of function, structure, and material and their impact on the design process.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is AE.

**Prerequisites:** ARCH 191 [Min Grade: D]

**ARCH 211 Architectural Representation I 2.0 Credits**

Introductory course that will provide a survey of drawing types with an emphasis on process and visual literacy.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**ARCH 212 Architectural Representation II 2.0 Credits**

Emphasis on craft and composition in the architectural representation of the built environment.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 211 [Min Grade: C-]

**ARCH 213 Architectural Representation III 2.0 Credits**

Exploration of digital representation with an emphasis on making combining process drawing, digital fabrication and analog craft to develop three-dimensional representation skills.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 212 [Min Grade: C-]

**ARCH 224 Architectural Representation IV 2.0 Credits**

Emphasizes the communication of design through perspective, view-making and rendering. Through the use of digital and analog techniques, the ability to select the proper media to visually convey a design concept will be developed.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 213 [Min Grade: C-] and ARCH 183 [Min Grade: C-]

**ARCH 225 Architectural Representation V 2.0 Credits**

Emphasizes the tools to complete a final quality architectural presentation in a variety of venues including portfolios, digital representations and online media.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 224 [Min Grade: C-] and ARCH 281 [Min Grade: C-]

**ARCH 226 Architectural Representation VI 2.0 Credits**

Explores parametric thinking and the iterative design process while reinforcing critical skills in detailing and design development through various software programs.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 225 [Min Grade: C-] and ARCH 282 [Min Grade: C-]

**ARCH 231 Studio 3-1 3.0 Credits**

Investigates specific building types to help students reach a basic level of competence in the language of architecture, problem-solving, and the means of communicating design solutions.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 123 [Min Grade: C-] and ARCH 143 [Min Grade: C-] and ARCH 161 [Min Grade: C-] and ARCH 134 [Min Grade: C-]

**ARCH 232 Studio 3-2 3.0 Credits**

Continues ARCH 231. Design projects expand students' vocabulary and understanding of the process of creating solutions to the problems of architecture.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 231 [Min Grade: C-]

**ARCH 233 Studio 3-3 3.0 Credits**

Continues ARCH 232. Addresses the interaction and coordination between the language of architecture and the languages of the other disciplines that influence the process of design. More complex programs are assigned.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 232 [Min Grade: C-]

**ARCH 241 Studio 4-1 4.0 Credits**

Investigates the design relationship between the man-made and the natural environment in a study of large-scale site design and building development in relation to natural forces. Fall.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 106 [Min Grade: C-] or ARCH 233 [Min Grade: C-]) and (PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-])

**ARCH 242 Studio 4-2 4.0 Credits**

Continues ARCH 241. Studies the relationship between building and site. A series of smaller-scale problems in site design investigates the architecture of the exterior. Winter.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 241 [Min Grade: D] and CIVE 261 [Min Grade: C-]

**ARCH 243 Studio 4-3 4.0 Credits**

Addresses architectural problems with specific environmental and site restraints and criteria. Issues of sustainable design will also be explored. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 242 [Min Grade: D] and CIVE 262 [Min Grade: C-]

**Corequisite:** CIVE 263

**ARCH 261 Environmental Systems I 3.0 Credits**

Introduces heating, ventilation, and air conditioning systems and site utility planning. Fall.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]

**ARCH 262 Environmental Systems II 3.0 Credits**

Introduces plumbing systems, including site distribution, water distribution, and waste systems. Fire protection is also covered. Winter.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]

**ARCH 263 Environmental Systems III 3.0 Credits**

Covers application of electrical systems and lighting to architectural design and construction. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]

**ARCH 271 Materials & Structural Behavior I 3.0 Credits**

Introduces the basics of construction (timber, masonry, steel, and concrete). Covers their behavior as ingredients of the structural system.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 184 [Min Grade: D] or PHYS 104 [Min Grade: D]

**ARCH 272 Materials & Structural Behavior II 3.0 Credits**

Second part of a three course sequence that introduces students to building structures and materials. The course will introduce structural design methodologies and students will learn how to design wood floor systems, beams, columns, steel beams and tension elements.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 271 [Min Grade: C] or CIVE 261 [Min Grade: D]

**ARCH 273 Materials & Structural Behavior III 3.0 Credits**

Third part of a three course sequence that introduces students to building structures and materials. The course will introduce masonry and foundation design. Students will learn how to design concrete beams and columns.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 272 [Min Grade: C] or CIVE 262 [Min Grade: D]

**ARCH 274 Architectural Technology IV 3.0 Credits**

Intermediate development of architectural technology with a focus on application of analysis of primary materials, structure and systems. Depth and range of analytical tools are addressed.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 173 [Min Grade: C-] and PHYS 183 [Min Grade: C-]

**ARCH 275 Architectural Technology V 3.0 Credits**

Further development of analytical skills for building technology. Case studies and real world precedents examine materials, structure and systems in the support of larger architectural objectives.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 274 [Min Grade: C-]

**ARCH 276 Architectural Technology VI 3.0 Credits**

Examination of technical analysis and design in support of iterative architectural concepts. Materials, structure and systems are utilized to develop strong design synergies.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 275 [Min Grade: C-]

**ARCH 281 Architecture Studio 2A 4.0 Credits**

Introduces issues of architectural form, site and programmatic concerns. Design exercises will explore simple issues of structure, building and material systems and sustainability.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 183 [Min Grade: C-] and (ARCH 213 [Min Grade: C-] or INTR 245 [Min Grade: C-])

**ARCH 282 Architecture Studio 2B 4.0 Credits**

Covers architectural design problems of incremental complexity that emphasizes the nature of function, structure, and material and their impact on the design process.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 281 [Min Grade: C-] and (ARCH 224 [Min Grade: C-] or INTR 341 [Min Grade: C-]) and (ARCH 170 [Min Grade: C-] or INTR 351 [Min Grade: C-])

**ARCH 283 Architecture Studio 2C 4.0 Credits**

Explores architectural design problems that introduce the full range of challenges in the areas of organization, program, context, systems and formal expression.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 282 [Min Grade: C-] and ARCH 225 [Min Grade: C-] and ARCH 172 [Min Grade: C-]

**ARCH 315 Sustainable Built Environment I 3.0 Credits**

Provides an overview of contemporary sustainable design principles and systems involved to posit novel solutions to various design challenges. Combining theoretical knowledge, field trips and case studies enabling students to critically assess sustainability as it relates to the built environment through five key subsystems: materials, air, water, energy and life.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ARCH 320 Sustainable Built Environment II 3.0 Credits**

Students will examine the work of scientists, designers, authors, artists, architects, engineers, planners, etc to gain a deeper conceptual understanding of current and emerging strategies in sustainability and the complex and integrated systems approach to the built environment in the present and near future.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ARCH 315 [Min Grade: C-]

**ARCH 335 Professional Practice I 3.0 Credits**

This seminar is the first of a two-course sequence that introduces students to varying topics related to architectural practice in today's society. It addresses the following issues: Community and Social Responsibility, Leadership, Ethics & Professional Judgment, Client Role in Architecture, Basic Principles of Architectural Practice.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH or major is INTR.

**Prerequisites:** ARCH 243 [Min Grade: C-] or ARCH 383 [Min Grade: C-]

**ARCH 336 Professional Practice II 3.0 Credits**

This seminar is the second of a two-course sequence that introduces students to varying topics related to architectural practice in today's society. It addresses the following issues: Practice Management, Project Management, Financial Considerations, Legal Responsibilities, Ethics & Professional Judgment.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH or major is INTR.

**Prerequisites:** ARCH 335 [Min Grade: C-]

**ARCH 340 American Architecture & Urbanism 3.0 Credits**

Surveys the development of American architecture and urbanism from its Native American origins through the arrival of early Modernism in the 1930s and 1940s. Writing Intensive.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 341 [WI] Theories of Architecture I 3.0 Credits**

Seminar that examines theories and principles of Western architecture before 1700. History/theory elective. Fall. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 342 [WI] Theories of Architecture II 3.0 Credits**

Continues ARCH 341. Seminar that examines theories and principles of Western architecture from the Baroque era of the 17th century to the beginning of Modernism in the 20th century. History/theory elective. Winter. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 343 Theories of Architecture III 3.0 Credits**

Seminar that examines 20th-century theories of architecture, including analysis and discussion of current theoretical positions. History/theory elective. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 344 [WI] History of Modern Architecture I 3.0 Credits**

Surveys the crucial buildings and thematic development of modern architecture and urbanism beginning in the late nineteenth Century continuing through the mid-20th Century. History/theory elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-]

**ARCH 345 [WI] History of Modern Architecture II 3.0 Credits**

Continuation of ARCH 344. Surveys the crucial buildings and thematic development of modern architecture and urbanism from the mid-20th Century to the present. History/theory elective. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-]

**ARCH 346 [WI] History of Philadelphia Architecture 3.0 Credits**

Covers the architecture of the city of Philadelphia from 1682, examining its architects, styles, and sources through lectures, walking tours, and student reports. History/theory elective. Fall. Alternate years. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 347 [WI] Architectural Study Tour 1.0-6.0 Credit**

An intensive study tour of selected domestic and foreign destinations focusing on architecture and related design disciplines. Combines lecture, site visits, sketching and individual research. History/Theory Elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or INTR 200 [Min Grade: C-] or ARTH 103 [Min Grade: C-]

**ARCH 348 [WI] Studies in Vernacular Architecture 3.0 Credits**

A topical survey of world traditions of vernacular architecture, with emphasis on houses and dwelling environments. The survey topics include basics of shelter, construction methods, response to climate, patterns of settlement, social and economic organization, cultural expression, and methods of research and analysis.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 350 Contemporary Architecture 3.0 Credits**

Survey and analysis of significant developments in architecture and urbanism over the past 50+ years. Writing Intensive.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 351 Studio 5-1 4.0 Credits**

Poses problems that address the relationship of form, site, program, and theory within the constraints of the basic systems (structural, mechanical, etc.).

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (CIVE 263 [Min Grade: D] or ARCH 273 [Min Grade: C]) and ARCH 243 [Min Grade: C]

**ARCH 352 Studio 5-2 4.0 Credits**

Continues ARCH 351. Emphasizes the strengthening of students' ability to solve complex problems in architecture. Expects students to demonstrate understanding and control of basic architectural systems.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 351 [Min Grade: C] and ARCH 261 [Min Grade: C-]

**ARCH 353 Studio 5-3 4.0 Credits**

Continues ARCH 352. Stresses the coordination of all architectural criteria in a large scale and complex architectural problem.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 352 [Min Grade: C] and ARCH 262 [Min Grade: C-]

**ARCH 361 Studio 6-1 4.0 Credits**

Introduces problems of urban design. Case studies demonstrate the relationship between the manmade environment and the natural environment as well as the relationship between many buildings and other manmade environments and the natural environment. Fall.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 353 [Min Grade: D] and ARCH 263 [Min Grade: C-]

**Corequisite:** ARCH 335

**ARCH 362 Studio 6-2 4.0 Credits**

Continues ARCH 361. A large urban-design project is undertaken to learn the design process required to solve problems of such magnitude. Winter.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 361 [Min Grade: D]

**Corequisite:** ARCH 336

**ARCH 363 Studio 6-3 4.0 Credits**

Continues ARCH 362. Requires students to develop architectural solutions for a portion of the problem addressed in Studio 6-2, demonstrating an understanding of the relationship between buildings and the exterior environment established in the previous course. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 362 [Min Grade: D]

**Corequisite:** PHIL 317

**ARCH 377 Architectural Technology VII 3.0 Credits**

Advanced building technology concepts are explored through case studies and focused design examples. Materials, construction, methods, structure, systems and envelope are studied as integrated aspect of larger iterative design processes.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 276 [Min Grade: C-]

**ARCH 378 Architectural Technology VIII 3.0 Credits**

Building technology and analysis are explored through design precedents and sketch problems to develop integrated design and analytical skills. Focuses on large and small scale elements that can become generative and performative aspects of major design decisions.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 377 [Min Grade: C-]

**ARCH 379 Architectural Technology IX 3.0 Credits**

Advanced building technology design and analysis is utilized in iterative and integrated design methods to support comprehensive design processes. Materials, structure and systems are developed qualitatively and quantitatively through design and analysis exercises.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 378 [Min Grade: C-]

**ARCH 381 Architecture Studio 3A 4.0 Credits**

Investigates the design relationship between man-made and the natural environment. Cultivates advanced analysis methods and the development of informed and resolved design solutions.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 283 [Min Grade: C-] and ARCH 226 [Min Grade: C-] and ARCH 173 [Min Grade: C-]

**ARCH 382 Architecture Studio 3B 4.0 Credits**

Studies the relationship between building, site and context. Architectural design problems emphasize concept development that translates careful analysis into the building ideas with a progressing understanding of architectural concerns.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 381 [Min Grade: C-] and ARCH 274 [Min Grade: C-]

**ARCH 383 Architecture Studio 3C 4.0 Credits**

Focuses on architectural problems with intermediate complexity. Integrates issues of context, site, program, function, and architectural systems into advanced design proposals.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 382 [Min Grade: C-] and ARCH 275 [Min Grade: C-]

**ARCH 421 [WI] Environmental Psychology and Design Theory 3.0 Credits**

Examines the relationship between human behavior and architecture from the perspective of environmental psychology. Topics include aesthetics, environmental experience, social interaction, social organization, and culture. This is a writing intensive course. History/Theory Elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 431 [WI] Architectural Programming 3.0 Credits**

Introduces current techniques of building programming and their relationship to building design. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 353 [Min Grade: C-] or ARCH 483 [Min Grade: C-]

**ARCH 432 The Development Process 3.0 Credits**

Introduces the process of land development. Explores traditional and emerging development models (the architect as the equity participant and developer) in relation to new construction and rehabilitation. Covers various methods of initiating building projects and financing and tax issues. Professional elective. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARCH 441 Urban Design Seminar 3.0 Credits**

Expands the concept of architecture to urban design scale and presents the principles of city planning through a series of case studies. History/Theory Elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 451 Advanced Drawing 3.0 Credits**

Covers advanced architectural rendering, concentrating on the effects of light, shade, and color using the techniques of water-color rendering. Professional elective. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 134 [Min Grade: C-] or ARCH 226 [Min Grade: C-] or INTR 341 [Min Grade: C-]

**ARCH 455 Computer Applications in Architecture I 3.0 Credits**

Covers two-dimensional and three-dimensional computer representations and applications. Professional elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 134 [Min Grade: C-] or ARCH 226 [Min Grade: C-]

**ARCH 456 Computer Applications in Architecture II 3.0 Credits**

Further investigates and demonstrates the computer's capabilities in architectural design and representation. Professional elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 134 [Min Grade: C-] or ARCH 226 [Min Grade: C-]

**ARCH 463 Emerging Architectural Technology 3.0 Credits**

A holistic study of design and construction technology of significant buildings by leading architects.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 161 [Min Grade: C-] or ARCH 173 [Min Grade: C-]

**ARCH 464 Building Enclosure Design 3.0 Credits**

Examines the integrations of aesthetics, building science, and technology in the design of building enclosures. Professional Elective. Summer.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 161 [Min Grade: C-] or ARCH 173 [Min Grade: C-]

**ARCH 465 Energy and Architecture 3.0 Credits**

Creates an awareness of the availability of energy resources and their effect on the built environment. Discusses alternative sources of energy. Professional elective. Summer.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 161 [Min Grade: C-] or ARCH 173 [Min Grade: C-]

**ARCH 481 Architecture Studio 4A 4.0 Credits**

Focuses on more complex architectural challenges through analysis of case studies that address the relationship between the man-made built environment and the natural environment.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 383 [Min Grade: C-] and ARCH 276 [Min Grade: C-]

**ARCH 482 Architecture Studio 4B 4.0 Credits**

Further the understanding of context and design and the application of solutions and strategies surrounding more complex architectural and environmental problems.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 481 [Min Grade: C-] and ARCH 377 [Min Grade: C-]

**ARCH 483 Architecture Studio 4C 4.0 Credits**

Challenges to develop and refine architectural solutions through an advanced understanding of the relationship between buildings and environment.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 482 [Min Grade: C-] and ARCH 378 [Min Grade: C-]

**ARCH 487 Architecture Studio 5A 4.0 Credits**

Addresses the complex relationship through analysis and synthesis of form, site, program, building technology and theory within specific building context.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 483 [Min Grade: C-] and ARCH 379 [Min Grade: C-]

**ARCH 488 Architecture Studio 5B 4.0 Credits**

Emphasizes complex architectural problems while demonstrating understanding and appropriate application.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 487 [Min Grade: C-]

**ARCH 489 Architecture Studio 5C 4.0 Credits**

Integrates in-depth application and coordination of all architectural building criteria in a large scale and complex architectural problem.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 488 [Min Grade: C-]

**ARCH 493 Senior Project I 4.0 Credits**

Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part one of three.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 363 [Min Grade: C-] or ARCH 489 [Min Grade: C-]) and ARCH 431 [Min Grade: C-]

**ARCH 494 Senior Project II 4.0 Credits**

Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part two of three.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 493 [Min Grade: C-]

**ARCH 495 Senior Project III 4.0 Credits**

Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part three of three.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 494 [Min Grade: C-]

**ARCH 496 Thesis I 8.0 Credits**

An individually structured year-long design problem that enables students to work independently and explore complex issues in depth. Periodic individual review sessions are scheduled with faculty adviser. Fall.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 363 [Min Grade: D] and ARCH 143 [Min Grade: C-] and (ARCH 134 [Min Grade: C-] or ARCH 153 [Min Grade: C-]) and ARCH 263 [Min Grade: C-] and CIVE 263 [Min Grade: C-]

**ARCH 497 Thesis II 8.0 Credits**

Continues ARCH 496. Winter.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 496 [Min Grade: C-]

**ARCH 498 Thesis III 8.0 Credits**

Continues ARCH 497. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 497 [Min Grade: C-]

**ARCH 499 [WI] Special Topics in Architecture 1.0-6.0 Credit**

Covers special topics in architectural history, theory, or technology that satisfy history/theory or professional elective requirements.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** ARCH 143 [Min Grade: C]

**ARCH I199 Independent Study in Architecture 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH I299 Independent Study in Architecture 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH I399 Independent Study in Architecture 0.5-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH I499 Independent Study in Architecture 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** ARCH 143 [Min Grade: C]

**ARCH T180 Special Topics in Architecture 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH T280 Special Topics in Architecture 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH T380 Special Topics in Architecture 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH T480 Special Topics in Architecture 1.0-6.0 Credit**

Covers special topics in architectural history, theory, or technology that satisfy history/theory or professional elective requirements.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** ARCH 143 [Min Grade: C]

## Courses

**ARCH 101 Studio 1-A 4.0 Credits**

2+4 Option Architecture Majors only. Introduces basic architectural design principles. Elementary concepts of space, surface, and form will be explored in two- and three-dimensional abstract exercises. Incorporates observational analysis and graphic skills.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**ARCH 102 Studio 1-B 4.0 Credits**

2+4 Option Architecture Majors only. Transitions from abstract principles to simple architectural exercises, considering function, scale, user and ordering strategies in relationship to form-making in three-dimensional space. Exercises heighten observation and graphic skills while developing an architectural vocabulary.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 101 [Min Grade: C] and ARCH 131 [Min Grade: C]

**ARCH 103 Studio 2-A 4.5 Credits**

2+4 Option architecture majors only. Continues ARCH 102. Introductory architectural design studio in which simple architectural problems develop issues of context and the use of materials with issues of space and human activity.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 102 [Min Grade: C-] and (ARCH 132 [Min Grade: C-] or ARCH 152 [Min Grade: C-])

**ARCH 104 Studio 2-B 4.5 Credits**

2+4 Option architecture majors only. Continues ARCH 103. Introductory architectural design studio in which issues of architectural form are balanced with site and programmatic concerns.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 103 [Min Grade: C-] and (ARCH 133 [Min Grade: C-] or ARCH 150 [Min Grade: C-])

**Corequisite:** ARCH 161

**ARCH 105 Studio 3-A 4.5 Credits**

2+4 Option architecture majors only. Continues ARCH 104. Covers intermediate architectural design problems of increasing complexity that emphasize the nature of function, structure, and material and their impact on the design process.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 104 [Min Grade: C-] and ARCH 161 [Min Grade: C-]

**Corequisite:** ARCH 134

**ARCH 106 Studio 3-B 4.5 Credits**

2+4 Option architecture majors only. Continues ARCH 105. Continues exploration of intermediate architectural design problems that present a full range of challenges in the areas of organization, context, and expression.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 105 [Min Grade: C-] and (ARCH 134 [Min Grade: C-] or ARCH 153 [Min Grade: C-])

**ARCH 107 Foundation Design I 2.0 Credits**

Introduces basic design principles through investigation of abstract and applied design projects using two-dimensional media. Exercises heighten observation and graphic skills.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARCH 108 Foundation Design II 2.0 Credits**

Investigates basic design principles through abstract and applied design projects in two-dimensional and three-dimensional media. Design exercises will advance understanding of the design process by exploring conceptual ideas through graphic and oral communication.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 107 [Min Grade: C]

**ARCH 109 Foundation Design III 2.0 Credits**

Investigates basic design principles that emphasize the inter-relationship between the scale of the human body and its movement within three-dimensional space. More in-depth design exercises will address the design process, development of a conceptual idea and a higher-level graphic and oral presentation.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 108 [Min Grade: C]

**ARCH 111 Studio 1-1 4.0 Credits**

Introduces basic architectural design principles and concepts of space, surface and form explored in two and three-dimensional abstract exercises. Exercises incorporate observational analysis and graphic skills while developing architectural vocabulary.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 109 [Min Grade: C] or ARCH 192 [Min Grade: C]

**ARCH 112 Studio 1-2 4.0 Credits**

Emphasizes the nature of function, structure, and material and their impact on the design process, and therefore their solutions to architectural problems.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (ARCH 111 [Min Grade: C] or INTR 233 [Min Grade: C]) and ARCH 131 [Min Grade: C]

**ARCH 113 Studio 1-3 4.0 Credits**

Investigates the interrelationships of scale, context, and building elements and the nature of materials and structure and their impact on the process of creating spaces for human activity through simple architectural problems.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (ARCH 112 [Min Grade: C] and ARCH 132 [Min Grade: C]) or (INTR 233 [Min Grade: C] and INTR 220 [Min Grade: C])

**ARCH 121 Studio 2-1 3.0 Credits**

Stresses the impact of function, materials, and the issue of building image on the design process. Fall.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 113 [Min Grade: C-] and (ARCH 133 [Min Grade: C-] or ARCH 150 [Min Grade: C-]) and ARCH 161 [Min Grade: C-]

**Corequisite:** ARCH 141

**ARCH 122 Studio 2-2 3.0 Credits**

Continues ARCH 121. Investigates projects of greater programmatic complexity and more stringent site constraints. Projects begin to deal with buildings in an urban context. Winter.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 121 [Min Grade: C-]

**Corequisite:** ARCH 142

**ARCH 123 Studio 2-3 3.0 Credits**

Continues ARCH 122. Poses design problems of increased complexity to enable students to explore in greater detail the issues presented in the previous term. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 122 [Min Grade: C-]

**Corequisite:** ARCH 143

**ARCH 131 Architectural Representation I-Drawing Basics 3.0 Credits**

Introduces the basic skills of architectural representation through drawing, including drafted and freehand techniques in a variety of media. Also introduces techniques of digital documentation.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**ARCH 132 Architectural Representation II-Drawing 3.0 Credits**

Continues ARCH 131 Architectural Representation I. Introduces advanced skills of architectural representation through drawing, including drafted and freehand techniques in a variety of media. Also introduces advanced techniques of digital documentation.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 101 [Min Grade: C-] or ARCH 111 [Min Grade: C-]) and ARCH 131 [Min Grade: C-]

**ARCH 133 Architectural Representation III-Digital 4.0 Credits**

Continues ARCH 132 Architectural Representation II. Introduces basic digital representation skills in 2D and 3D, the creation and manipulation of three-dimensional architectural models and the resultant two-dimensional drawings as well as renderings using various computer techniques and software programs.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 102 [Min Grade: C-] or ARCH 113 [Min Grade: C-]) and ARCH 132 [Min Grade: C-]

**ARCH 134 Architectural Representation IV-3D Modeling 4.0 Credits**

Continues ARCH 133. Further investigates and demonstrates the computer's capabilities in architectural design, 3D modeling and representation using various computer techniques and software programs. May also introduce digital fabrication techniques.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 104 [Min Grade: C-] or ARCH 113 [Min Grade: C-]) and (ARCH 133 [Min Grade: C-] or ARCH 150 [Min Grade: C-])

**ARCH 135 Architectural Representation V-Advanced Methods 3.0 Credits**

Continues ARCH 134. Examines advanced techniques of architectural representation and visual communications for use in the architectural design process. Emphasizes presentation methods to describe design concepts. Content may vary. Contact Architecture program for details. Professional elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 106 [Min Grade: C-] or ARCH 233 [Min Grade: C-]) and (ARCH 134 [Min Grade: C-] or ARCH 153 [Min Grade: C-])

**ARCH 141 Architecture and Society I 3.0 Credits**

Examines the evolution of Western architectural thought, form, space, and structures in light of changing human values and institutions. Covers Western architecture from the prehistoric era through the Romanesque, and contemporary architecture in Asia and Central America as well as Islamic architecture in the Middle East and Spain.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARCH 142 Architecture and Society II 3.0 Credits**

Examines the evolution of Western architectural thought, form, space and structures in light of changing human values and institutions. Course covers early monumental architecture of the Western Hemisphere and then considers the evolution of Western architecture from the "Dark Ages" through the development and spread of Renaissance architecture across Europe and Latin America.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**ARCH 143 Architecture and Society III 3.0 Credits**

Examines the evolution of Western architectural thought, form, space and structures in light of changing human values and institutions. Covers Western architecture and urbanism from the 16th C through the early 20th C. Also considered is the architecture of the Aztec and Inca empires, Islamic architecture and architecture and landscape designs of 16th C and 17th C Japan.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** ARCH 142 [Min Grade: D]

**ARCH 144 Architecture and Society IV 3.0 Credits**

Examines the evolution of architectural thought, form, space and structures in light of changing human values and institutions. Surveys the crucial buildings and thematic development of modern architecture and urbanism beginning in the late 19th C. through the mid-20th C.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** ARCH 143 [Min Grade: D]

**ARCH 161 Architectural Construction 3.0 Credits**

Architecture majors only. Covers basic construction principles and the use of materials in developing architectural assemblies, providing a conceptual framework to integrate construction and design.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is ARCH.  
**Prerequisites:** (ARCH 103 [Min Grade: C-] or ARCH 112 [Min Grade: C-]) and (ARCH 132 [Min Grade: C-] or ARCH 152 [Min Grade: C-] or ARCH 156 [Min Grade: C-])

**ARCH 170 Architectural Technology I 3.0 Credits**

Introduction to the fundamental aspects of building technology with exposure to materials, structure and building systems that are frequently used in building construction. Provides a framework for the exploration of construction in the context of design.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is ARCH.  
**Prerequisites:** PHYS 182 [Min Grade: C-] and (MATH 102 [Min Grade: C-] or MATH 183 [Min Grade: C-])

**ARCH 172 Architectural Technology II 3.0 Credits**

Further exploration of materials, structure and building systems and their influence on passive systems and sustainable design principles. Begins the development of systematic thinking regarding architectural technology.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is ARCH.  
**Prerequisites:** ARCH 170 [Min Grade: C-]

**ARCH 173 Architectural Technology III 3.0 Credits**

Introduction to the technical building analysis including the organizing principles for materials, structure and systems. Includes envelope assembly, thermal comfort, structural and passive building systems.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is ARCH.  
**Prerequisites:** ARCH 172 [Min Grade: C-]

**ARCH 181 Architecture Studio 1A 4.0 Credits**

Introduces basic architectural design principles. Elementary concepts of space, surface and form will be explored in two and three dimensional abstract exercises. Exercises incorporate observational analysis and graphic skills.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is ARCH.

**ARCH 182 Architecture Studio 1B 4.0 Credits**

Transitions from abstract design principles to simple architectural exercises, considering function, scale, user and ordering strategies in relation to form-making in three-dimensional space. Exercises heighten observation and graphic skills while developing an architectural vocabulary.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is ARCH.  
**Prerequisites:** ARCH 181 [Min Grade: C-]

**ARCH 183 Architecture Studio 1C 4.0 Credits**

Focuses on a series of basic architectural problems developed around issues of context and material use in relationship to the organization of space and human activity. Design exercises will cultivate the design process through developing a conceptual idea through graphic and oral communication.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is ARCH.  
**Prerequisites:** ARCH 182 [Min Grade: C-] or INTR 233 [Min Grade: C-]

**ARCH 191 Studio 1-AE 3.0 Credits**

Architectural engineering majors only. Covers basic design principles using three-dimensional abstract and applied projects. Exercises heighten observation skills.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is AE.

**ARCH 192 Studio 2-AE 3.0 Credits**

Architectural engineering majors only. Continues ARCH 191. Uses design exercises to emphasize the nature of function, structure, and material and their impact on the design process.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is AE.  
**Prerequisites:** ARCH 191 [Min Grade: D]

**ARCH 211 Architectural Representation I 2.0 Credits**

Introductory course that will provide a survey of drawing types with an emphasis on process and visual literacy.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**ARCH 212 Architectural Representation II 2.0 Credits**

Emphasis on craft and composition in the architectural representation of the built environment.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 211 [Min Grade: C-]

**ARCH 213 Architectural Representation III 2.0 Credits**

Exploration of digital representation with an emphasis on making combining process drawing, digital fabrication and analog craft to develop three-dimensional representation skills.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 212 [Min Grade: C-]

**ARCH 224 Architectural Representation IV 2.0 Credits**

Emphasizes the communication of design through perspective, view-making and rendering. Through the use of digital and analog techniques, the ability to select the proper media to visually convey a design concept will be developed.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 213 [Min Grade: C-] and ARCH 183 [Min Grade: C-]

**ARCH 225 Architectural Representation V 2.0 Credits**

Emphasizes the tools to complete a final quality architectural presentation in a variety of venues including portfolios, digital representations and online media.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 224 [Min Grade: C-] and ARCH 281 [Min Grade: C-]

**ARCH 226 Architectural Representation VI 2.0 Credits**

Explores parametric thinking and the iterative design process while reinforcing critical skills in detailing and design development through various software programs.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 225 [Min Grade: C-] and ARCH 282 [Min Grade: C-]

**ARCH 231 Studio 3-1 3.0 Credits**

Investigates specific building types to help students reach a basic level of competence in the language of architecture, problem-solving, and the means of communicating design solutions.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 123 [Min Grade: C-] and ARCH 143 [Min Grade: C-] and ARCH 161 [Min Grade: C-] and ARCH 134 [Min Grade: C-]

**ARCH 232 Studio 3-2 3.0 Credits**

Continues ARCH 231. Design projects expand students' vocabulary and understanding of the process of creating solutions to the problems of architecture.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 231 [Min Grade: C-]

**ARCH 233 Studio 3-3 3.0 Credits**

Continues ARCH 232. Addresses the interaction and coordination between the language of architecture and the languages of the other disciplines that influence the process of design. More complex programs are assigned.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 232 [Min Grade: C-]

**ARCH 241 Studio 4-1 4.0 Credits**

Investigates the design relationship between the man-made and the natural environment in a study of large-scale site design and building development in relation to natural forces. Fall.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 106 [Min Grade: C-] or ARCH 233 [Min Grade: C-]) and (PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-])

**ARCH 242 Studio 4-2 4.0 Credits**

Continues ARCH 241. Studies the relationship between building and site. A series of smaller-scale problems in site design investigates the architecture of the exterior. Winter.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 241 [Min Grade: D] and CIVE 261 [Min Grade: C-]

**ARCH 243 Studio 4-3 4.0 Credits**

Addresses architectural problems with specific environmental and site restraints and criteria. Issues of sustainable design will also be explored. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 242 [Min Grade: D] and CIVE 262 [Min Grade: C-]

**Corequisite:** CIVE 263

**ARCH 261 Environmental Systems I 3.0 Credits**

Introduces heating, ventilation, and air conditioning systems and site utility planning. Fall.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]

**ARCH 262 Environmental Systems II 3.0 Credits**

Introduces plumbing systems, including site distribution, water distribution, and waste systems. Fire protection is also covered. Winter.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]

**ARCH 263 Environmental Systems III 3.0 Credits**

Covers application of electrical systems and lighting to architectural design and construction. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]

**ARCH 271 Materials & Structural Behavior I 3.0 Credits**

Introduces the basics of construction (timber, masonry, steel, and concrete). Covers their behavior as ingredients of the structural system.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 184 [Min Grade: D] or PHYS 104 [Min Grade: D]

**ARCH 272 Materials & Structural Behavior II 3.0 Credits**

Second part of a three course sequence that introduces students to building structures and materials. The course will introduce structural design methodologies and students will learn how to design wood floor systems, beams, columns, steel beams and tension elements.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 271 [Min Grade: C] or CIVE 261 [Min Grade: D]

**ARCH 273 Materials & Structural Behavior III 3.0 Credits**

Third part of a three course sequence that introduces students to building structures and materials. The course will introduce masonry and foundation design. Students will learn how to design concrete beams and columns.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 272 [Min Grade: C] or CIVE 262 [Min Grade: D]

**ARCH 274 Architectural Technology IV 3.0 Credits**

Intermediate development of architectural technology with a focus on application of analysis of primary materials, structure and systems. Depth and range of analytical tools are addressed.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 173 [Min Grade: C-] and PHYS 183 [Min Grade: C-]

**ARCH 275 Architectural Technology V 3.0 Credits**

Further development of analytical skills for building technology. Case studies and real world precedents examine materials, structure and systems in the support of larger architectural objectives.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 274 [Min Grade: C-]

**ARCH 276 Architectural Technology VI 3.0 Credits**

Examination of technical analysis and design in support of iterative architectural concepts. Materials, structure and systems are utilized to develop strong design synergies.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 275 [Min Grade: C-]

**ARCH 281 Architecture Studio 2A 4.0 Credits**

Introduces issues of architectural form, site and programmatic concerns. Design exercises will explore simple issues of structure, building and material systems and sustainability.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 183 [Min Grade: C-] and (ARCH 213 [Min Grade: C-] or INTR 245 [Min Grade: C-])

**ARCH 282 Architecture Studio 2B 4.0 Credits**

Covers architectural design problems of incremental complexity that emphasizes the nature of function, structure, and material and their impact on the design process.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 281 [Min Grade: C-] and (ARCH 224 [Min Grade: C-] or INTR 341 [Min Grade: C-]) and (ARCH 170 [Min Grade: C-] or INTR 351 [Min Grade: C-])

**ARCH 283 Architecture Studio 2C 4.0 Credits**

Explores architectural design problems that introduce the full range of challenges in the areas of organization, program, context, systems and formal expression.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 282 [Min Grade: C-] and ARCH 225 [Min Grade: C-] and ARCH 172 [Min Grade: C-]

**ARCH 315 Sustainable Built Environment I 3.0 Credits**

Provides an overview of contemporary sustainable design principles and systems involved to posit novel solutions to various design challenges. Combining theoretical knowledge, field trips and case studies enabling students to critically assess sustainability as it relates to the built environment through five key subsystems: materials, air, water, energy and life.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ARCH 320 Sustainable Built Environment II 3.0 Credits**

Students will examine the work of scientists, designers, authors, artists, architects, engineers, planners, etc to gain a deeper conceptual understanding of current and emerging strategies in sustainability and the complex and integrated systems approach to the built environment in the present and near future.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ARCH 315 [Min Grade: C-]

**ARCH 335 Professional Practice I 3.0 Credits**

This seminar is the first of a two-course sequence that introduces students to varying topics related to architectural practice in today's society. It addresses the following issues: Community and Social Responsibility, Leadership, Ethics & Professional Judgment, Client Role in Architecture, Basic Principles of Architectural Practice.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH or major is INTR.

**Prerequisites:** ARCH 243 [Min Grade: C-] or ARCH 383 [Min Grade: C-]

**ARCH 336 Professional Practice II 3.0 Credits**

This seminar is the second of a two-course sequence that introduces students to varying topics related to architectural practice in today's society. It addresses the following issues: Practice Management, Project Management, Financial Considerations, Legal Responsibilities, Ethics & Professional Judgment.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH or major is INTR.

**Prerequisites:** ARCH 335 [Min Grade: C-]

**ARCH 340 American Architecture & Urbanism 3.0 Credits**

Surveys the development of American architecture and urbanism from its Native American origins through the arrival of early Modernism in the 1930s and 1940s. Writing Intensive.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 341 [WI] Theories of Architecture I 3.0 Credits**

Seminar that examines theories and principles of Western architecture before 1700. History/theory elective. Fall. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 342 [WI] Theories of Architecture II 3.0 Credits**

Continues ARCH 341. Seminar that examines theories and principles of Western architecture from the Baroque era of the 17th century to the beginning of Modernism in the 20th century. History/theory elective. Winter. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 343 Theories of Architecture III 3.0 Credits**

Seminar that examines 20th-century theories of architecture, including analysis and discussion of current theoretical positions. History/theory elective. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 344 [WI] History of Modern Architecture I 3.0 Credits**

Surveys the crucial buildings and thematic development of modern architecture and urbanism beginning in the late nineteenth Century continuing through the mid-20th Century. History/theory elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-]

**ARCH 345 [WI] History of Modern Architecture II 3.0 Credits**

Continuation of ARCH 344. Surveys the crucial buildings and thematic development of modern architecture and urbanism from the mid-20th Century to the present. History/theory elective. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-]

**ARCH 346 [WI] History of Philadelphia Architecture 3.0 Credits**

Covers the architecture of the city of Philadelphia from 1682, examining its architects, styles, and sources through lectures, walking tours, and student reports. History/theory elective. Fall. Alternate years. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 347 [WI] Architectural Study Tour 1.0-6.0 Credit**

An intensive study tour of selected domestic and foreign destinations focusing on architecture and related design disciplines. Combines lecture, site visits, sketching and individual research. History/Theory Elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or INTR 200 [Min Grade: C-] or ARTH 103 [Min Grade: C-]

**ARCH 348 [WI] Studies in Vernacular Architecture 3.0 Credits**

A topical survey of world traditions of vernacular architecture, with emphasis on houses and dwelling environments. The survey topics include basics of shelter, construction methods, response to climate, patterns of settlement, social and economic organization, cultural expression, and methods of research and analysis.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 350 Contemporary Architecture 3.0 Credits**

Survey and analysis of significant developments in architecture and urbanism over the past 50+ years. Writing Intensive.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 351 Studio 5-1 4.0 Credits**

Poses problems that address the relationship of form, site, program, and theory within the constraints of the basic systems (structural, mechanical, etc.).

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (CIVE 263 [Min Grade: D] or ARCH 273 [Min Grade: C]) and ARCH 243 [Min Grade: C]

**ARCH 352 Studio 5-2 4.0 Credits**

Continues ARCH 351. Emphasizes the strengthening of students' ability to solve complex problems in architecture. Expects students to demonstrate understanding and control of basic architectural systems.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 351 [Min Grade: C] and ARCH 261 [Min Grade: C-]

**ARCH 353 Studio 5-3 4.0 Credits**

Continues ARCH 352. Stresses the coordination of all architectural criteria in a large scale and complex architectural problem.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 352 [Min Grade: C] and ARCH 262 [Min Grade: C-]

**ARCH 361 Studio 6-1 4.0 Credits**

Introduces problems of urban design. Case studies demonstrate the relationship between the manmade environment and the natural environment as well as the relationship between many buildings and other manmade environments and the natural environment. Fall.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 353 [Min Grade: D] and ARCH 263 [Min Grade: C-]

**Corequisite:** ARCH 335

**ARCH 362 Studio 6-2 4.0 Credits**

Continues ARCH 361. A large urban-design project is undertaken to learn the design process required to solve problems of such magnitude. Winter.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 361 [Min Grade: D]

**Corequisite:** ARCH 336

**ARCH 363 Studio 6-3 4.0 Credits**

Continues ARCH 362. Requires students to develop architectural solutions for a portion of the problem addressed in Studio 6-2, demonstrating an understanding of the relationship between buildings and the exterior environment established in the previous course. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 362 [Min Grade: D]

**Corequisite:** PHIL 317

**ARCH 377 Architectural Technology VII 3.0 Credits**

Advanced building technology concepts are explored through case studies and focused design examples. Materials, construction, methods, structure, systems and envelope are studied as integrated aspect of larger iterative design processes.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 276 [Min Grade: C-]

**ARCH 378 Architectural Technology VIII 3.0 Credits**

Building technology and analysis are explored through design precedents and sketch problems to develop integrated design and analytical skills. Focuses on large and small scale elements that can become generative and performative aspects of major design decisions.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 377 [Min Grade: C-]

**ARCH 379 Architectural Technology IX 3.0 Credits**

Advanced building technology design and analysis is utilized in iterative and integrated design methods to support comprehensive design processes. Materials, structure and systems are developed qualitatively and quantitatively through design and analysis exercises.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 378 [Min Grade: C-]

**ARCH 381 Architecture Studio 3A 4.0 Credits**

Investigates the design relationship between man-made and the natural environment. Cultivates advanced analysis methods and the development of informed and resolved design solutions.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 283 [Min Grade: C-] and ARCH 226 [Min Grade: C-] and ARCH 173 [Min Grade: C-]

**ARCH 382 Architecture Studio 3B 4.0 Credits**

Studies the relationship between building, site and context. Architectural design problems emphasize concept development that translates careful analysis into the building ideas with a progressing understanding of architectural concerns.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 381 [Min Grade: C-] and ARCH 274 [Min Grade: C-]

**ARCH 383 Architecture Studio 3C 4.0 Credits**

Focuses on architectural problems with intermediate complexity. Integrates issues of context, site, program, function, and architectural systems into advanced design proposals.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 382 [Min Grade: C-] and ARCH 275 [Min Grade: C-]

**ARCH 421 [WI] Environmental Psychology and Design Theory 3.0 Credits**

Examines the relationship between human behavior and architecture from the perspective of environmental psychology. Topics include aesthetics, environmental experience, social interaction, social organization, and culture. This is a writing intensive course. History/Theory Elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 431 [WI] Architectural Programming 3.0 Credits**

Introduces current techniques of building programming and their relationship to building design. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 353 [Min Grade: C-] or ARCH 483 [Min Grade: C-]

**ARCH 432 The Development Process 3.0 Credits**

Introduces the process of land development. Explores traditional and emerging development models (the architect as the equity participant and developer) in relation to new construction and rehabilitation. Covers various methods of initiating building projects and financing and tax issues. Professional elective. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARCH 441 Urban Design Seminar 3.0 Credits**

Expands the concept of architecture to urban design scale and presents the principles of city planning through a series of case studies. History/Theory Elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 451 Advanced Drawing 3.0 Credits**

Covers advanced architectural rendering, concentrating on the effects of light, shade, and color using the techniques of water-color rendering. Professional elective. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 134 [Min Grade: C-] or ARCH 226 [Min Grade: C-] or INTR 341 [Min Grade: C-]

**ARCH 455 Computer Applications in Architecture I 3.0 Credits**

Covers two-dimensional and three-dimensional computer representations and applications. Professional elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 134 [Min Grade: C-] or ARCH 226 [Min Grade: C-]

**ARCH 456 Computer Applications in Architecture II 3.0 Credits**

Further investigates and demonstrates the computer's capabilities in architectural design and representation. Professional elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 134 [Min Grade: C-] or ARCH 226 [Min Grade: C-]

**ARCH 463 Emerging Architectural Technology 3.0 Credits**

A holistic study of design and construction technology of significant buildings by leading architects.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 161 [Min Grade: C-] or ARCH 173 [Min Grade: C-]

**ARCH 464 Building Enclosure Design 3.0 Credits**

Examines the integrations of aesthetics, building science, and technology in the design of building enclosures. Professional Elective. Summer.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 161 [Min Grade: C-] or ARCH 173 [Min Grade: C-]

**ARCH 465 Energy and Architecture 3.0 Credits**

Creates an awareness of the availability of energy resources and their effect on the built environment. Discusses alternative sources of energy. Professional elective. Summer.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 161 [Min Grade: C-] or ARCH 173 [Min Grade: C-]

**ARCH 481 Architecture Studio 4A 4.0 Credits**

Focuses on more complex architectural challenges through analysis of case studies that address the relationship between the man-made built environment and the natural environment.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 383 [Min Grade: C-] and ARCH 276 [Min Grade: C-]

**ARCH 482 Architecture Studio 4B 4.0 Credits**

Further the understanding of context and design and the application of solutions and strategies surrounding more complex architectural and environmental problems.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 481 [Min Grade: C-] and ARCH 377 [Min Grade: C-]

**ARCH 483 Architecture Studio 4C 4.0 Credits**

Challenges to develop and refine architectural solutions through an advanced understanding of the relationship between buildings and environment.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 482 [Min Grade: C-] and ARCH 378 [Min Grade: C-]

**ARCH 487 Architecture Studio 5A 4.0 Credits**

Addresses the complex relationship through analysis and synthesis of form, site, program, building technology and theory within specific building context.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 483 [Min Grade: C-] and ARCH 379 [Min Grade: C-]

**ARCH 488 Architecture Studio 5B 4.0 Credits**

Emphasizes complex architectural problems while demonstrating understanding and appropriate application.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 487 [Min Grade: C-]

**ARCH 489 Architecture Studio 5C 4.0 Credits**

Integrates in-depth application and coordination of all architectural building criteria in a large scale and complex architectural problem.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 488 [Min Grade: C-]

**ARCH 493 Senior Project I 4.0 Credits**

Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part one of three.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 363 [Min Grade: C-] or ARCH 489 [Min Grade: C-]) and ARCH 431 [Min Grade: C-]

**ARCH 494 Senior Project II 4.0 Credits**

Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part two of three.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 493 [Min Grade: C-]

**ARCH 495 Senior Project III 4.0 Credits**

Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part three of three.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 494 [Min Grade: C-]

**ARCH 496 Thesis I 8.0 Credits**

An individually structured year-long design problem that enables students to work independently and explore complex issues in depth. Periodic individual review sessions are scheduled with faculty adviser. Fall.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 363 [Min Grade: D] and ARCH 143 [Min Grade: C-] and (ARCH 134 [Min Grade: C-] or ARCH 153 [Min Grade: C-]) and ARCH 263 [Min Grade: C-] and CIVE 263 [Min Grade: C-]

**ARCH 497 Thesis II 8.0 Credits**

Continues ARCH 496. Winter.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 496 [Min Grade: C-]

**ARCH 498 Thesis III 8.0 Credits**

Continues ARCH 497. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 497 [Min Grade: C-]

**ARCH 499 [WI] Special Topics in Architecture 1.0-6.0 Credit**

Covers special topics in architectural history, theory, or technology that satisfy history/theory or professional elective requirements.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** ARCH 143 [Min Grade: C]

**ARCH I199 Independent Study in Architecture 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH I299 Independent Study in Architecture 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH I399 Independent Study in Architecture 0.5-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH I499 Independent Study in Architecture 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** ARCH 143 [Min Grade: C]

**ARCH T180 Special Topics in Architecture 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH T280 Special Topics in Architecture 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH T380 Special Topics in Architecture 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH T480 Special Topics in Architecture 1.0-6.0 Credit**

Covers special topics in architectural history, theory, or technology that satisfy history/theory or professional elective requirements.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** ARCH 143 [Min Grade: C]

## Courses

**ARCH 101 Studio 1-A 4.0 Credits**

2+4 Option Architecture Majors only. Introduces basic architectural design principles. Elementary concepts of space, surface, and form will be explored in two- and three-dimensional abstract exercises. Incorporates observational analysis and graphic skills.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**ARCH 102 Studio 1-B 4.0 Credits**

2+4 Option Architecture Majors only. Transitions from abstract principles to simple architectural exercises, considering function, scale, user and ordering strategies in relationship to form-making in three-dimensional space. Exercises heighten observation and graphic skills while developing an architectural vocabulary.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 101 [Min Grade: C] and ARCH 131 [Min Grade: C]

**ARCH 103 Studio 2-A 4.5 Credits**

2+4 Option architecture majors only. Continues ARCH 102. Introductory architectural design studio in which simple architectural problems develop issues of context and the use of materials with issues of space and human activity.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 102 [Min Grade: C-] and (ARCH 132 [Min Grade: C-] or ARCH 152 [Min Grade: C-])

**ARCH 104 Studio 2-B 4.5 Credits**

2+4 Option architecture majors only. Continues ARCH 103. Introductory architectural design studio in which issues of architectural form are balanced with site and programmatic concerns.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 103 [Min Grade: C-] and (ARCH 133 [Min Grade: C-] or ARCH 150 [Min Grade: C-])

**Corequisite:** ARCH 161

**ARCH 105 Studio 3-A 4.5 Credits**

2+4 Option architecture majors only. Continues ARCH 104. Covers intermediate architectural design problems of increasing complexity that emphasize the nature of function, structure, and material and their impact on the design process.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 104 [Min Grade: C-] and ARCH 161 [Min Grade: C-]

**Corequisite:** ARCH 134

**ARCH 106 Studio 3-B 4.5 Credits**

2+4 Option architecture majors only. Continues ARCH 105. Continues exploration of intermediate architectural design problems that present a full range of challenges in the areas of organization, context, and expression.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 105 [Min Grade: C-] and (ARCH 134 [Min Grade: C-] or ARCH 153 [Min Grade: C-])

**ARCH 107 Foundation Design I 2.0 Credits**

Introduces basic design principles through investigation of abstract and applied design projects using two-dimensional media. Exercises heighten observation and graphic skills.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARCH 108 Foundation Design II 2.0 Credits**

Investigates basic design principles through abstract and applied design projects in two-dimensional and three-dimensional media. Design exercises will advance understanding of the design process by exploring conceptual ideas through graphic and oral communication.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 107 [Min Grade: C]

**ARCH 109 Foundation Design III 2.0 Credits**

Investigates basic design principles that emphasize the inter-relationship between the scale of the human body and its movement within three-dimensional space. More in-depth design exercises will address the design process, development of a conceptual idea and a higher-level graphic and oral presentation.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 108 [Min Grade: C]

**ARCH 111 Studio 1-1 4.0 Credits**

Introduces basic architectural design principles and concepts of space, surface and form explored in two and three-dimensional abstract exercises. Exercises incorporate observational analysis and graphic skills while developing architectural vocabulary.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 109 [Min Grade: C] or ARCH 192 [Min Grade: C]

**ARCH 112 Studio 1-2 4.0 Credits**

Emphasizes the nature of function, structure, and material and their impact on the design process, and therefore their solutions to architectural problems.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (ARCH 111 [Min Grade: C] or INTR 233 [Min Grade: C]) and ARCH 131 [Min Grade: C]

**ARCH 113 Studio 1-3 4.0 Credits**

Investigates the interrelationships of scale, context, and building elements and the nature of materials and structure and their impact on the process of creating spaces for human activity through simple architectural problems.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (ARCH 112 [Min Grade: C] and ARCH 132 [Min Grade: C]) or (INTR 233 [Min Grade: C] and INTR 220 [Min Grade: C])

**ARCH 121 Studio 2-1 3.0 Credits**

Stresses the impact of function, materials, and the issue of building image on the design process. Fall.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 113 [Min Grade: C-] and (ARCH 133 [Min Grade: C-] or ARCH 150 [Min Grade: C-]) and ARCH 161 [Min Grade: C-]

**Corequisite:** ARCH 141

**ARCH 122 Studio 2-2 3.0 Credits**

Continues ARCH 121. Investigates projects of greater programmatic complexity and more stringent site constraints. Projects begin to deal with buildings in an urban context. Winter.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 121 [Min Grade: C-]

**Corequisite:** ARCH 142

**ARCH 123 Studio 2-3 3.0 Credits**

Continues ARCH 122. Poses design problems of increased complexity to enable students to explore in greater detail the issues presented in the previous term. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 122 [Min Grade: C-]

**Corequisite:** ARCH 143

**ARCH 131 Architectural Representation I-Drawing Basics 3.0 Credits**

Introduces the basic skills of architectural representation through drawing, including drafted and freehand techniques in a variety of media. Also introduces techniques of digital documentation.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**ARCH 132 Architectural Representation II-Drawing 3.0 Credits**

Continues ARCH 131 Architectural Representation I. Introduces advanced skills of architectural representation through drawing, including drafted and freehand techniques in a variety of media. Also introduces advanced techniques of digital documentation.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 101 [Min Grade: C-] or ARCH 111 [Min Grade: C-]) and ARCH 131 [Min Grade: C-]

**ARCH 133 Architectural Representation III-Digital 4.0 Credits**

Continues ARCH 132 Architectural Representation II. Introduces basic digital representation skills in 2D and 3D, the creation and manipulation of three-dimensional architectural models and the resultant two-dimensional drawings as well as renderings using various computer techniques and software programs.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 102 [Min Grade: C-] or ARCH 113 [Min Grade: C-]) and ARCH 132 [Min Grade: C-]

**ARCH 134 Architectural Representation IV-3D Modeling 4.0 Credits**

Continues ARCH 133. Further investigates and demonstrates the computer's capabilities in architectural design, 3D modeling and representation using various computer techniques and software programs. May also introduce digital fabrication techniques.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 104 [Min Grade: C-] or ARCH 113 [Min Grade: C-]) and (ARCH 133 [Min Grade: C-] or ARCH 150 [Min Grade: C-])

**ARCH 135 Architectural Representation V-Advanced Methods 3.0 Credits**

Continues ARCH 134. Examines advanced techniques of architectural representation and visual communications for use in the architectural design process. Emphasizes presentation methods to describe design concepts. Content may vary. Contact Architecture program for details. Professional elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 106 [Min Grade: C-] or ARCH 233 [Min Grade: C-]) and (ARCH 134 [Min Grade: C-] or ARCH 153 [Min Grade: C-])

**ARCH 141 Architecture and Society I 3.0 Credits**

Examines the evolution of Western architectural thought, form, space, and structures in light of changing human values and institutions. Covers Western architecture from the prehistoric era through the Romanesque, and contemporary architecture in Asia and Central America as well as Islamic architecture in the Middle East and Spain.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARCH 142 Architecture and Society II 3.0 Credits**

Examines the evolution of Western architectural thought, form, space and structures in light of changing human values and institutions. Course covers early monumental architecture of the Western Hemisphere and then considers the evolution of Western architecture from the "Dark Ages" through the development and spread of Renaissance architecture across Europe and Latin America.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARCH 143 Architecture and Society III 3.0 Credits**

Examines the evolution of Western architectural thought, form, space and structures in light of changing human values and institutions. Covers Western architecture and urbanism from the 16th C through the early 20th C. Also considered is the architecture of the Aztec and Inca empires, Islamic architecture and architecture and landscape designs of 16th C and 17th C Japan.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 142 [Min Grade: D]

**ARCH 144 Architecture and Society IV 3.0 Credits**

Examines the evolution of architectural thought, form, space and structures in light of changing human values and institutions. Surveys the crucial buildings and thematic development of modern architecture and urbanism beginning in the late 19th C. through the mid-20th C.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: D]

**ARCH 161 Architectural Construction 3.0 Credits**

Architecture majors only. Covers basic construction principles and the use of materials in developing architectural assemblies, providing a conceptual framework to integrate construction and design.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 103 [Min Grade: C-] or ARCH 112 [Min Grade: C-]) and (ARCH 132 [Min Grade: C-] or ARCH 152 [Min Grade: C-] or ARCH 156 [Min Grade: C-])

**ARCH 170 Architectural Technology I 3.0 Credits**

Introduction to the fundamental aspects of building technology with exposure to materials, structure and building systems that are frequently used in building construction. Provides a framework for the exploration of construction in the context of design.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** PHYS 182 [Min Grade: C-] and (MATH 102 [Min Grade: C-] or MATH 183 [Min Grade: C-])

**ARCH 172 Architectural Technology II 3.0 Credits**

Further exploration of materials, structure and building systems and their influence on passive systems and sustainable design principles. Begins the development of systematic thinking regarding architectural technology.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 170 [Min Grade: C-]

**ARCH 173 Architectural Technology III 3.0 Credits**

Introduction to the technical building analysis including the organizing principles for materials, structure and systems. Includes envelope assembly, thermal comfort, structural and passive building systems.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 172 [Min Grade: C-]

**ARCH 181 Architecture Studio 1A 4.0 Credits**

Introduces basic architectural design principles. Elementary concepts of space, surface and form will be explored in two and three dimensional abstract exercises. Exercises incorporate observational analysis and graphic skills.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**ARCH 182 Architecture Studio 1B 4.0 Credits**

Transitions from abstract design principles to simple architectural exercises, considering function, scale, user and ordering strategies in relation to form-making in three-dimensional space. Exercises heighten observation and graphic skills while developing an architectural vocabulary.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 181 [Min Grade: C-]

**ARCH 183 Architecture Studio 1C 4.0 Credits**

Focuses on a series of basic architectural problems developed around issues of context and material use in relationship to the organization of space and human activity. Design exercises will cultivate the design process through developing a conceptual idea through graphic and oral communication.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 182 [Min Grade: C-] or INTR 233 [Min Grade: C-]

**ARCH 191 Studio 1-AE 3.0 Credits**

Architectural engineering majors only. Covers basic design principles using three-dimensional abstract and applied projects. Exercises heighten observation skills.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is AE.

**ARCH 192 Studio 2-AE 3.0 Credits**

Architectural engineering majors only. Continues ARCH 191. Uses design exercises to emphasize the nature of function, structure, and material and their impact on the design process.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is AE.

**Prerequisites:** ARCH 191 [Min Grade: D]

**ARCH 211 Architectural Representation I 2.0 Credits**

Introductory course that will provide a survey of drawing types with an emphasis on process and visual literacy.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**ARCH 212 Architectural Representation II 2.0 Credits**

Emphasis on craft and composition in the architectural representation of the built environment.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 211 [Min Grade: C-]

**ARCH 213 Architectural Representation III 2.0 Credits**

Exploration of digital representation with an emphasis on making combining process drawing, digital fabrication and analog craft to develop three-dimensional representation skills.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 212 [Min Grade: C-]

**ARCH 224 Architectural Representation IV 2.0 Credits**

Emphasizes the communication of design through perspective, view-making and rendering. Through the use of digital and analog techniques, the ability to select the proper media to visually convey a design concept will be developed.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 213 [Min Grade: C-] and ARCH 183 [Min Grade: C-]

**ARCH 225 Architectural Representation V 2.0 Credits**

Emphasizes the tools to complete a final quality architectural presentation in a variety of venues including portfolios, digital representations and online media.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 224 [Min Grade: C-] and ARCH 281 [Min Grade: C-]

**ARCH 226 Architectural Representation VI 2.0 Credits**

Explores parametric thinking and the iterative design process while reinforcing critical skills in detailing and design development through various software programs.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 225 [Min Grade: C-] and ARCH 282 [Min Grade: C-]

**ARCH 231 Studio 3-1 3.0 Credits**

Investigates specific building types to help students reach a basic level of competence in the language of architecture, problem-solving, and the means of communicating design solutions.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 123 [Min Grade: C-] and ARCH 143 [Min Grade: C-] and ARCH 161 [Min Grade: C-] and ARCH 134 [Min Grade: C-]

**ARCH 232 Studio 3-2 3.0 Credits**

Continues ARCH 231. Design projects expand students' vocabulary and understanding of the process of creating solutions to the problems of architecture.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 231 [Min Grade: C-]

**ARCH 233 Studio 3-3 3.0 Credits**

Continues ARCH 232. Addresses the interaction and coordination between the language of architecture and the languages of the other disciplines that influence the process of design. More complex programs are assigned.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 232 [Min Grade: C-]

**ARCH 241 Studio 4-1 4.0 Credits**

Investigates the design relationship between the man-made and the natural environment in a study of large-scale site design and building development in relation to natural forces. Fall.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 106 [Min Grade: C-] or ARCH 233 [Min Grade: C-]) and (PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-])

**ARCH 242 Studio 4-2 4.0 Credits**

Continues ARCH 241. Studies the relationship between building and site. A series of smaller-scale problems in site design investigates the architecture of the exterior. Winter.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 241 [Min Grade: D] and CIVE 261 [Min Grade: C-]

**ARCH 243 Studio 4-3 4.0 Credits**

Addresses architectural problems with specific environmental and site restraints and criteria. Issues of sustainable design will also be explored. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 242 [Min Grade: D] and CIVE 262 [Min Grade: C-]

**Corequisite:** CIVE 263

**ARCH 261 Environmental Systems I 3.0 Credits**

Introduces heating, ventilation, and air conditioning systems and site utility planning. Fall.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]

**ARCH 262 Environmental Systems II 3.0 Credits**

Introduces plumbing systems, including site distribution, water distribution, and waste systems. Fire protection is also covered. Winter.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]

**ARCH 263 Environmental Systems III 3.0 Credits**

Covers application of electrical systems and lighting to architectural design and construction. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]

**ARCH 271 Materials & Structural Behavior I 3.0 Credits**

Introduces the basics of construction (timber, masonry, steel, and concrete). Covers their behavior as ingredients of the structural system.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 184 [Min Grade: D] or PHYS 104 [Min Grade: D]

**ARCH 272 Materials & Structural Behavior II 3.0 Credits**

Second part of a three course sequence that introduces students to building structures and materials. The course will introduce structural design methodologies and students will learn how to design wood floor systems, beams, columns, steel beams and tension elements.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 271 [Min Grade: C] or CIVE 261 [Min Grade: D]

**ARCH 273 Materials & Structural Behavior III 3.0 Credits**

Third part of a three course sequence that introduces students to building structures and materials. The course will introduce masonry and foundation design. Students will learn how to design concrete beams and columns.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 272 [Min Grade: C] or CIVE 262 [Min Grade: D]

**ARCH 274 Architectural Technology IV 3.0 Credits**

Intermediate development of architectural technology with a focus on application of analysis of primary materials, structure and systems. Depth and range of analytical tools are addressed.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 173 [Min Grade: C-] and PHYS 183 [Min Grade: C-]

**ARCH 275 Architectural Technology V 3.0 Credits**

Further development of analytical skills for building technology. Case studies and real world precedents examine materials, structure and systems in the support of larger architectural objectives.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 274 [Min Grade: C-]

**ARCH 276 Architectural Technology VI 3.0 Credits**

Examination of technical analysis and design in support of iterative architectural concepts. Materials, structure and systems are utilized to develop strong design synergies.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 275 [Min Grade: C-]

**ARCH 281 Architecture Studio 2A 4.0 Credits**

Introduces issues of architectural form, site and programmatic concerns. Design exercises will explore simple issues of structure, building and material systems and sustainability.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 183 [Min Grade: C-] and (ARCH 213 [Min Grade: C-] or INTR 245 [Min Grade: C-])

**ARCH 282 Architecture Studio 2B 4.0 Credits**

Covers architectural design problems of incremental complexity that emphasizes the nature of function, structure, and material and their impact on the design process.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 281 [Min Grade: C-] and (ARCH 224 [Min Grade: C-] or INTR 341 [Min Grade: C-]) and (ARCH 170 [Min Grade: C-] or INTR 351 [Min Grade: C-])

**ARCH 283 Architecture Studio 2C 4.0 Credits**

Explores architectural design problems that introduce the full range of challenges in the areas of organization, program, context, systems and formal expression.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 282 [Min Grade: C-] and ARCH 225 [Min Grade: C-] and ARCH 172 [Min Grade: C-]

**ARCH 315 Sustainable Built Environment I 3.0 Credits**

Provides an overview of contemporary sustainable design principles and systems involved to posit novel solutions to various design challenges. Combining theoretical knowledge, field trips and case studies enabling students to critically assess sustainability as it relates to the built environment through five key subsystems: materials, air, water, energy and life.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ARCH 320 Sustainable Built Environment II 3.0 Credits**

Students will examine the work of scientists, designers, authors, artists, architects, engineers, planners, etc to gain a deeper conceptual understanding of current and emerging strategies in sustainability and the complex and integrated systems approach to the built environment in the present and near future.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ARCH 315 [Min Grade: C-]

**ARCH 335 Professional Practice I 3.0 Credits**

This seminar is the first of a two-course sequence that introduces students to varying topics related to architectural practice in today's society. It addresses the following issues: Community and Social Responsibility, Leadership, Ethics & Professional Judgment, Client Role in Architecture, Basic Principles of Architectural Practice.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH or major is INTR.

**Prerequisites:** ARCH 243 [Min Grade: C-] or ARCH 383 [Min Grade: C-]

**ARCH 336 Professional Practice II 3.0 Credits**

This seminar is the second of a two-course sequence that introduces students to varying topics related to architectural practice in today's society. It addresses the following issues: Practice Management, Project Management, Financial Considerations, Legal Responsibilities, Ethics & Professional Judgment.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH or major is INTR.

**Prerequisites:** ARCH 335 [Min Grade: C-]

**ARCH 340 American Architecture & Urbanism 3.0 Credits**

Surveys the development of American architecture and urbanism from its Native American origins through the arrival of early Modernism in the 1930s and 1940s. Writing Intensive.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 341 [WI] Theories of Architecture I 3.0 Credits**

Seminar that examines theories and principles of Western architecture before 1700. History/theory elective. Fall. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 342 [WI] Theories of Architecture II 3.0 Credits**

Continues ARCH 341. Seminar that examines theories and principles of Western architecture from the Baroque era of the 17th century to the beginning of Modernism in the 20th century. History/theory elective. Winter. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 343 Theories of Architecture III 3.0 Credits**

Seminar that examines 20th-century theories of architecture, including analysis and discussion of current theoretical positions. History/theory elective. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 344 [WI] History of Modern Architecture I 3.0 Credits**

Surveys the crucial buildings and thematic development of modern architecture and urbanism beginning in the late nineteenth Century continuing through the mid-20th Century. History/theory elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-]

**ARCH 345 [WI] History of Modern Architecture II 3.0 Credits**

Continuation of ARCH 344. Surveys the crucial buildings and thematic development of modern architecture and urbanism from the mid-20th Century to the present. History/theory elective. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-]

**ARCH 346 [WI] History of Philadelphia Architecture 3.0 Credits**

Covers the architecture of the city of Philadelphia from 1682, examining its architects, styles, and sources through lectures, walking tours, and student reports. History/theory elective. Fall. Alternate years. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 347 [WI] Architectural Study Tour 1.0-6.0 Credit**

An intensive study tour of selected domestic and foreign destinations focusing on architecture and related design disciplines. Combines lecture, site visits, sketching and individual research. History/Theory Elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or INTR 200 [Min Grade: C-] or ARTH 103 [Min Grade: C-]

**ARCH 348 [WI] Studies in Vernacular Architecture 3.0 Credits**

A topical survey of world traditions of vernacular architecture, with emphasis on houses and dwelling environments. The survey topics include basics of shelter, construction methods, response to climate, patterns of settlement, social and economic organization, cultural expression, and methods of research and analysis.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 350 Contemporary Architecture 3.0 Credits**

Survey and analysis of significant developments in architecture and urbanism over the past 50+ years. Writing Intensive.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 351 Studio 5-1 4.0 Credits**

Poses problems that address the relationship of form, site, program, and theory within the constraints of the basic systems (structural, mechanical, etc.).

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (CIVE 263 [Min Grade: D] or ARCH 273 [Min Grade: C]) and ARCH 243 [Min Grade: C]

**ARCH 352 Studio 5-2 4.0 Credits**

Continues ARCH 351. Emphasizes the strengthening of students' ability to solve complex problems in architecture. Expects students to demonstrate understanding and control of basic architectural systems.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 351 [Min Grade: C] and ARCH 261 [Min Grade: C-]

**ARCH 353 Studio 5-3 4.0 Credits**

Continues ARCH 352. Stresses the coordination of all architectural criteria in a large scale and complex architectural problem.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 352 [Min Grade: C] and ARCH 262 [Min Grade: C-]

**ARCH 361 Studio 6-1 4.0 Credits**

Introduces problems of urban design. Case studies demonstrate the relationship between the manmade environment and the natural environment as well as the relationship between many buildings and other manmade environments and the natural environment. Fall.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 353 [Min Grade: D] and ARCH 263 [Min Grade: C-]

**Corequisite:** ARCH 335

**ARCH 362 Studio 6-2 4.0 Credits**

Continues ARCH 361. A large urban-design project is undertaken to learn the design process required to solve problems of such magnitude. Winter.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 361 [Min Grade: D]

**Corequisite:** ARCH 336

**ARCH 363 Studio 6-3 4.0 Credits**

Continues ARCH 362. Requires students to develop architectural solutions for a portion of the problem addressed in Studio 6-2, demonstrating an understanding of the relationship between buildings and the exterior environment established in the previous course. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 362 [Min Grade: D]

**Corequisite:** PHIL 317

**ARCH 377 Architectural Technology VII 3.0 Credits**

Advanced building technology concepts are explored through case studies and focused design examples. Materials, construction, methods, structure, systems and envelope are studied as integrated aspect of larger iterative design processes.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 276 [Min Grade: C-]

**ARCH 378 Architectural Technology VIII 3.0 Credits**

Building technology and analysis are explored through design precedents and sketch problems to develop integrated design and analytical skills. Focuses on large and small scale elements that can become generative and performative aspects of major design decisions.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 377 [Min Grade: C-]

**ARCH 379 Architectural Technology IX 3.0 Credits**

Advanced building technology design and analysis is utilized in iterative and integrated design methods to support comprehensive design processes. Materials, structure and systems are developed qualitatively and quantitatively through design and analysis exercises.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 378 [Min Grade: C-]

**ARCH 381 Architecture Studio 3A 4.0 Credits**

Investigates the design relationship between man-made and the natural environment. Cultivates advanced analysis methods and the development of informed and resolved design solutions.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 283 [Min Grade: C-] and ARCH 226 [Min Grade: C-] and ARCH 173 [Min Grade: C-]

**ARCH 382 Architecture Studio 3B 4.0 Credits**

Studies the relationship between building, site and context. Architectural design problems emphasize concept development that translates careful analysis into the building ideas with a progressing understanding of architectural concerns.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 381 [Min Grade: C-] and ARCH 274 [Min Grade: C-]

**ARCH 383 Architecture Studio 3C 4.0 Credits**

Focuses on architectural problems with intermediate complexity. Integrates issues of context, site, program, function, and architectural systems into advanced design proposals.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 382 [Min Grade: C-] and ARCH 275 [Min Grade: C-]

**ARCH 421 [WI] Environmental Psychology and Design Theory 3.0 Credits**

Examines the relationship between human behavior and architecture from the perspective of environmental psychology. Topics include aesthetics, environmental experience, social interaction, social organization, and culture. This is a writing intensive course. History/Theory Elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 431 [WI] Architectural Programming 3.0 Credits**

Introduces current techniques of building programming and their relationship to building design. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 353 [Min Grade: C-] or ARCH 483 [Min Grade: C-]

**ARCH 432 The Development Process 3.0 Credits**

Introduces the process of land development. Explores traditional and emerging development models (the architect as the equity participant and developer) in relation to new construction and rehabilitation. Covers various methods of initiating building projects and financing and tax issues. Professional elective. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARCH 441 Urban Design Seminar 3.0 Credits**

Expands the concept of architecture to urban design scale and presents the principles of city planning through a series of case studies. History/Theory Elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 451 Advanced Drawing 3.0 Credits**

Covers advanced architectural rendering, concentrating on the effects of light, shade, and color using the techniques of water-color rendering. Professional elective. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 134 [Min Grade: C-] or ARCH 226 [Min Grade: C-] or INTR 341 [Min Grade: C-]

**ARCH 455 Computer Applications in Architecture I 3.0 Credits**

Covers two-dimensional and three-dimensional computer representations and applications. Professional elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 134 [Min Grade: C-] or ARCH 226 [Min Grade: C-]

**ARCH 456 Computer Applications in Architecture II 3.0 Credits**

Further investigates and demonstrates the computer's capabilities in architectural design and representation. Professional elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 134 [Min Grade: C-] or ARCH 226 [Min Grade: C-]

**ARCH 463 Emerging Architectural Technology 3.0 Credits**

A holistic study of design and construction technology of significant buildings by leading architects.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 161 [Min Grade: C-] or ARCH 173 [Min Grade: C-]

**ARCH 464 Building Enclosure Design 3.0 Credits**

Examines the integrations of aesthetics, building science, and technology in the design of building enclosures. Professional Elective. Summer.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 161 [Min Grade: C-] or ARCH 173 [Min Grade: C-]

**ARCH 465 Energy and Architecture 3.0 Credits**

Creates an awareness of the availability of energy resources and their effect on the built environment. Discusses alternative sources of energy. Professional elective. Summer.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 161 [Min Grade: C-] or ARCH 173 [Min Grade: C-]

**ARCH 481 Architecture Studio 4A 4.0 Credits**

Focuses on more complex architectural challenges through analysis of case studies that address the relationship between the man-made built environment and the natural environment.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 383 [Min Grade: C-] and ARCH 276 [Min Grade: C-]

**ARCH 482 Architecture Studio 4B 4.0 Credits**

Further the understanding of context and design and the application of solutions and strategies surrounding more complex architectural and environmental problems.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 481 [Min Grade: C-] and ARCH 377 [Min Grade: C-]

**ARCH 483 Architecture Studio 4C 4.0 Credits**

Challenges to develop and refine architectural solutions through an advanced understanding of the relationship between buildings and environment.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 482 [Min Grade: C-] and ARCH 378 [Min Grade: C-]

**ARCH 487 Architecture Studio 5A 4.0 Credits**

Addresses the complex relationship through analysis and synthesis of form, site, program, building technology and theory within specific building context.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 483 [Min Grade: C-] and ARCH 379 [Min Grade: C-]

**ARCH 488 Architecture Studio 5B 4.0 Credits**

Emphasizes complex architectural problems while demonstrating understanding and appropriate application.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 487 [Min Grade: C-]

**ARCH 489 Architecture Studio 5C 4.0 Credits**

Integrates in-depth application and coordination of all architectural building criteria in a large scale and complex architectural problem.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 488 [Min Grade: C-]

**ARCH 493 Senior Project I 4.0 Credits**

Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part one of three.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 363 [Min Grade: C-] or ARCH 489 [Min Grade: C-]) and ARCH 431 [Min Grade: C-]

**ARCH 494 Senior Project II 4.0 Credits**

Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part two of three.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 493 [Min Grade: C-]

**ARCH 495 Senior Project III 4.0 Credits**

Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part three of three.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 494 [Min Grade: C-]

**ARCH 496 Thesis I 8.0 Credits**

An individually structured year-long design problem that enables students to work independently and explore complex issues in depth. Periodic individual review sessions are scheduled with faculty adviser. Fall.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 363 [Min Grade: D] and ARCH 143 [Min Grade: C-] and (ARCH 134 [Min Grade: C-] or ARCH 153 [Min Grade: C-]) and ARCH 263 [Min Grade: C-] and CIVE 263 [Min Grade: C-]

**ARCH 497 Thesis II 8.0 Credits**

Continues ARCH 496. Winter.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 496 [Min Grade: C-]

**ARCH 498 Thesis III 8.0 Credits**

Continues ARCH 497. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 497 [Min Grade: C-]

**ARCH 499 [WI] Special Topics in Architecture 1.0-6.0 Credit**

Covers special topics in architectural history, theory, or technology that satisfy history/theory or professional elective requirements.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** ARCH 143 [Min Grade: C]

**ARCH I199 Independent Study in Architecture 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH I299 Independent Study in Architecture 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH I399 Independent Study in Architecture 0.5-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH I499 Independent Study in Architecture 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** ARCH 143 [Min Grade: C]

**ARCH T180 Special Topics in Architecture 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH T280 Special Topics in Architecture 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH T380 Special Topics in Architecture 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH T480 Special Topics in Architecture 1.0-6.0 Credit**

Covers special topics in architectural history, theory, or technology that satisfy history/theory or professional elective requirements.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** ARCH 143 [Min Grade: C]

## Courses

**ARCH 101 Studio 1-A 4.0 Credits**

2+4 Option Architecture Majors only. Introduces basic architectural design principles. Elementary concepts of space, surface, and form will be explored in two- and three-dimensional abstract exercises. Incorporates observational analysis and graphic skills.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**ARCH 102 Studio 1-B 4.0 Credits**

2+4 Option Architecture Majors only. Transitions from abstract principles to simple architectural exercises, considering function, scale, user and ordering strategies in relationship to form-making in three-dimensional space. Exercises heighten observation and graphic skills while developing an architectural vocabulary.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 101 [Min Grade: C] and ARCH 131 [Min Grade: C]

**ARCH 103 Studio 2-A 4.5 Credits**

2+4 Option architecture majors only. Continues ARCH 102. Introductory architectural design studio in which simple architectural problems develop issues of context and the use of materials with issues of space and human activity.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 102 [Min Grade: C-] and (ARCH 132 [Min Grade: C-] or ARCH 152 [Min Grade: C-])

**ARCH 104 Studio 2-B 4.5 Credits**

2+4 Option architecture majors only. Continues ARCH 103. Introductory architectural design studio in which issues of architectural form are balanced with site and programmatic concerns.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 103 [Min Grade: C-] and (ARCH 133 [Min Grade: C-] or ARCH 150 [Min Grade: C-])

**Corequisite:** ARCH 161

**ARCH 105 Studio 3-A 4.5 Credits**

2+4 Option architecture majors only. Continues ARCH 104. Covers intermediate architectural design problems of increasing complexity that emphasize the nature of function, structure, and material and their impact on the design process.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 104 [Min Grade: C-] and ARCH 161 [Min Grade: C-]

**Corequisite:** ARCH 134

**ARCH 106 Studio 3-B 4.5 Credits**

2+4 Option architecture majors only. Continues ARCH 105. Continues exploration of intermediate architectural design problems that present a full range of challenges in the areas of organization, context, and expression.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 105 [Min Grade: C-] and (ARCH 134 [Min Grade: C-] or ARCH 153 [Min Grade: C-])

**ARCH 107 Foundation Design I 2.0 Credits**

Introduces basic design principles through investigation of abstract and applied design projects using two-dimensional media. Exercises heighten observation and graphic skills.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARCH 108 Foundation Design II 2.0 Credits**

Investigates basic design principles through abstract and applied design projects in two-dimensional and three-dimensional media. Design exercises will advance understanding of the design process by exploring conceptual ideas through graphic and oral communication.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 107 [Min Grade: C]

**ARCH 109 Foundation Design III 2.0 Credits**

Investigates basic design principles that emphasize the inter-relationship between the scale of the human body and its movement within three-dimensional space. More in-depth design exercises will address the design process, development of a conceptual idea and a higher-level graphic and oral presentation.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 108 [Min Grade: C]

**ARCH 111 Studio 1-1 4.0 Credits**

Introduces basic architectural design principles and concepts of space, surface and form explored in two and three-dimensional abstract exercises. Exercises incorporate observational analysis and graphic skills while developing architectural vocabulary.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 109 [Min Grade: C] or ARCH 192 [Min Grade: C]

**ARCH 112 Studio 1-2 4.0 Credits**

Emphasizes the nature of function, structure, and material and their impact on the design process, and therefore their solutions to architectural problems.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (ARCH 111 [Min Grade: C] or INTR 233 [Min Grade: C]) and ARCH 131 [Min Grade: C]

**ARCH 113 Studio 1-3 4.0 Credits**

Investigates the interrelationships of scale, context, and building elements and the nature of materials and structure and their impact on the process of creating spaces for human activity through simple architectural problems.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (ARCH 112 [Min Grade: C] and ARCH 132 [Min Grade: C]) or (INTR 233 [Min Grade: C] and INTR 220 [Min Grade: C])

**ARCH 121 Studio 2-1 3.0 Credits**

Stresses the impact of function, materials, and the issue of building image on the design process. Fall.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 113 [Min Grade: C-] and (ARCH 133 [Min Grade: C-] or ARCH 150 [Min Grade: C-]) and ARCH 161 [Min Grade: C-]

**Corequisite:** ARCH 141

**ARCH 122 Studio 2-2 3.0 Credits**

Continues ARCH 121. Investigates projects of greater programmatic complexity and more stringent site constraints. Projects begin to deal with buildings in an urban context. Winter.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 121 [Min Grade: C-]

**Corequisite:** ARCH 142

**ARCH 123 Studio 2-3 3.0 Credits**

Continues ARCH 122. Poses design problems of increased complexity to enable students to explore in greater detail the issues presented in the previous term. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 122 [Min Grade: C-]

**Corequisite:** ARCH 143

**ARCH 131 Architectural Representation I-Drawing Basics 3.0 Credits**

Introduces the basic skills of architectural representation through drawing, including drafted and freehand techniques in a variety of media. Also introduces techniques of digital documentation.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**ARCH 132 Architectural Representation II-Drawing 3.0 Credits**

Continues ARCH 131 Architectural Representation I. Introduces advanced skills of architectural representation through drawing, including drafted and freehand techniques in a variety of media. Also introduces advanced techniques of digital documentation.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 101 [Min Grade: C-] or ARCH 111 [Min Grade: C-]) and ARCH 131 [Min Grade: C-]

**ARCH 133 Architectural Representation III-Digital 4.0 Credits**

Continues ARCH 132 Architectural Representation II. Introduces basic digital representation skills in 2D and 3D, the creation and manipulation of three-dimensional architectural models and the resultant two-dimensional drawings as well as renderings using various computer techniques and software programs.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 102 [Min Grade: C-] or ARCH 113 [Min Grade: C-]) and ARCH 132 [Min Grade: C-]

**ARCH 134 Architectural Representation IV-3D Modeling 4.0 Credits**

Continues ARCH 133. Further investigates and demonstrates the computer's capabilities in architectural design, 3D modeling and representation using various computer techniques and software programs. May also introduce digital fabrication techniques.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 104 [Min Grade: C-] or ARCH 113 [Min Grade: C-]) and (ARCH 133 [Min Grade: C-] or ARCH 150 [Min Grade: C-])

**ARCH 135 Architectural Representation V-Advanced Methods 3.0 Credits**

Continues ARCH 134. Examines advanced techniques of architectural representation and visual communications for use in the architectural design process. Emphasizes presentation methods to describe design concepts. Content may vary. Contact Architecture program for details. Professional elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 106 [Min Grade: C-] or ARCH 233 [Min Grade: C-]) and (ARCH 134 [Min Grade: C-] or ARCH 153 [Min Grade: C-])

**ARCH 141 Architecture and Society I 3.0 Credits**

Examines the evolution of Western architectural thought, form, space, and structures in light of changing human values and institutions. Covers Western architecture from the prehistoric era through the Romanesque, and contemporary architecture in Asia and Central America as well as Islamic architecture in the Middle East and Spain.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARCH 142 Architecture and Society II 3.0 Credits**

Examines the evolution of Western architectural thought, form, space and structures in light of changing human values and institutions. Course covers early monumental architecture of the Western Hemisphere and then considers the evolution of Western architecture from the "Dark Ages" through the development and spread of Renaissance architecture across Europe and Latin America.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARCH 143 Architecture and Society III 3.0 Credits**

Examines the evolution of Western architectural thought, form, space and structures in light of changing human values and institutions. Covers Western architecture and urbanism from the 16th C through the early 20th C. Also considered is the architecture of the Aztec and Inca empires, Islamic architecture and architecture and landscape designs of 16th C and 17th C Japan.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 142 [Min Grade: D]

**ARCH 144 Architecture and Society IV 3.0 Credits**

Examines the evolution of architectural thought, form, space and structures in light of changing human values and institutions. Surveys the crucial buildings and thematic development of modern architecture and urbanism beginning in the late 19th C. through the mid-20th C.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: D]

**ARCH 161 Architectural Construction 3.0 Credits**

Architecture majors only. Covers basic construction principles and the use of materials in developing architectural assemblies, providing a conceptual framework to integrate construction and design.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 103 [Min Grade: C-] or ARCH 112 [Min Grade: C-]) and (ARCH 132 [Min Grade: C-] or ARCH 152 [Min Grade: C-] or ARCH 156 [Min Grade: C-])

**ARCH 170 Architectural Technology I 3.0 Credits**

Introduction to the fundamental aspects of building technology with exposure to materials, structure and building systems that are frequently used in building construction. Provides a framework for the exploration of construction in the context of design.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** PHYS 182 [Min Grade: C-] and (MATH 102 [Min Grade: C-] or MATH 183 [Min Grade: C-])

**ARCH 172 Architectural Technology II 3.0 Credits**

Further exploration of materials, structure and building systems and their influence on passive systems and sustainable design principles. Begins the development of systematic thinking regarding architectural technology.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 170 [Min Grade: C-]

**ARCH 173 Architectural Technology III 3.0 Credits**

Introduction to the technical building analysis including the organizing principles for materials, structure and systems. Includes envelope assembly, thermal comfort, structural and passive building systems.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 172 [Min Grade: C-]

**ARCH 181 Architecture Studio 1A 4.0 Credits**

Introduces basic architectural design principles. Elementary concepts of space, surface and form will be explored in two and three dimensional abstract exercises. Exercises incorporate observational analysis and graphic skills.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**ARCH 182 Architecture Studio 1B 4.0 Credits**

Transitions from abstract design principles to simple architectural exercises, considering function, scale, user and ordering strategies in relation to form-making in three-dimensional space. Exercises heighten observation and graphic skills while developing an architectural vocabulary.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 181 [Min Grade: C-]

**ARCH 183 Architecture Studio 1C 4.0 Credits**

Focuses on a series of basic architectural problems developed around issues of context and material use in relationship to the organization of space and human activity. Design exercises will cultivate the design process through developing a conceptual idea through graphic and oral communication.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 182 [Min Grade: C-] or INTR 233 [Min Grade: C-]

**ARCH 191 Studio 1-AE 3.0 Credits**

Architectural engineering majors only. Covers basic design principles using three-dimensional abstract and applied projects. Exercises heighten observation skills.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is AE.

**ARCH 192 Studio 2-AE 3.0 Credits**

Architectural engineering majors only. Continues ARCH 191. Uses design exercises to emphasize the nature of function, structure, and material and their impact on the design process.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is AE.

**Prerequisites:** ARCH 191 [Min Grade: D]

**ARCH 211 Architectural Representation I 2.0 Credits**

Introductory course that will provide a survey of drawing types with an emphasis on process and visual literacy.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**ARCH 212 Architectural Representation II 2.0 Credits**

Emphasis on craft and composition in the architectural representation of the built environment.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 211 [Min Grade: C-]

**ARCH 213 Architectural Representation III 2.0 Credits**

Exploration of digital representation with an emphasis on making combining process drawing, digital fabrication and analog craft to develop three-dimensional representation skills.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 212 [Min Grade: C-]

**ARCH 224 Architectural Representation IV 2.0 Credits**

Emphasizes the communication of design through perspective, view-making and rendering. Through the use of digital and analog techniques, the ability to select the proper media to visually convey a design concept will be developed.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 213 [Min Grade: C-] and ARCH 183 [Min Grade: C-]

**ARCH 225 Architectural Representation V 2.0 Credits**

Emphasizes the tools to complete a final quality architectural presentation in a variety of venues including portfolios, digital representations and online media.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 224 [Min Grade: C-] and ARCH 281 [Min Grade: C-]

**ARCH 226 Architectural Representation VI 2.0 Credits**

Explores parametric thinking and the iterative design process while reinforcing critical skills in detailing and design development through various software programs.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 225 [Min Grade: C-] and ARCH 282 [Min Grade: C-]

**ARCH 231 Studio 3-1 3.0 Credits**

Investigates specific building types to help students reach a basic level of competence in the language of architecture, problem-solving, and the means of communicating design solutions.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 123 [Min Grade: C-] and ARCH 143 [Min Grade: C-] and ARCH 161 [Min Grade: C-] and ARCH 134 [Min Grade: C-]

**ARCH 232 Studio 3-2 3.0 Credits**

Continues ARCH 231. Design projects expand students' vocabulary and understanding of the process of creating solutions to the problems of architecture.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 231 [Min Grade: C-]

**ARCH 233 Studio 3-3 3.0 Credits**

Continues ARCH 232. Addresses the interaction and coordination between the language of architecture and the languages of the other disciplines that influence the process of design. More complex programs are assigned.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 232 [Min Grade: C-]

**ARCH 241 Studio 4-1 4.0 Credits**

Investigates the design relationship between the man-made and the natural environment in a study of large-scale site design and building development in relation to natural forces. Fall.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 106 [Min Grade: C-] or ARCH 233 [Min Grade: C-]) and (PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-])

**ARCH 242 Studio 4-2 4.0 Credits**

Continues ARCH 241. Studies the relationship between building and site. A series of smaller-scale problems in site design investigates the architecture of the exterior. Winter.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 241 [Min Grade: D] and CIVE 261 [Min Grade: C-]

**ARCH 243 Studio 4-3 4.0 Credits**

Addresses architectural problems with specific environmental and site restraints and criteria. Issues of sustainable design will also be explored. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 242 [Min Grade: D] and CIVE 262 [Min Grade: C-]

**Corequisite:** CIVE 263

**ARCH 261 Environmental Systems I 3.0 Credits**

Introduces heating, ventilation, and air conditioning systems and site utility planning. Fall.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]

**ARCH 262 Environmental Systems II 3.0 Credits**

Introduces plumbing systems, including site distribution, water distribution, and waste systems. Fire protection is also covered. Winter.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]

**ARCH 263 Environmental Systems III 3.0 Credits**

Covers application of electrical systems and lighting to architectural design and construction. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]

**ARCH 271 Materials & Structural Behavior I 3.0 Credits**

Introduces the basics of construction (timber, masonry, steel, and concrete). Covers their behavior as ingredients of the structural system.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 184 [Min Grade: D] or PHYS 104 [Min Grade: D]

**ARCH 272 Materials & Structural Behavior II 3.0 Credits**

Second part of a three course sequence that introduces students to building structures and materials. The course will introduce structural design methodologies and students will learn how to design wood floor systems, beams, columns, steel beams and tension elements.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 271 [Min Grade: C] or CIVE 261 [Min Grade: D]

**ARCH 273 Materials & Structural Behavior III 3.0 Credits**

Third part of a three course sequence that introduces students to building structures and materials. The course will introduce masonry and foundation design. Students will learn how to design concrete beams and columns.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 272 [Min Grade: C] or CIVE 262 [Min Grade: D]

**ARCH 274 Architectural Technology IV 3.0 Credits**

Intermediate development of architectural technology with a focus on application of analysis of primary materials, structure and systems. Depth and range of analytical tools are addressed.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 173 [Min Grade: C-] and PHYS 183 [Min Grade: C-]

**ARCH 275 Architectural Technology V 3.0 Credits**

Further development of analytical skills for building technology. Case studies and real world precedents examine materials, structure and systems in the support of larger architectural objectives.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 274 [Min Grade: C-]

**ARCH 276 Architectural Technology VI 3.0 Credits**

Examination of technical analysis and design in support of iterative architectural concepts. Materials, structure and systems are utilized to develop strong design synergies.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 275 [Min Grade: C-]

**ARCH 281 Architecture Studio 2A 4.0 Credits**

Introduces issues of architectural form, site and programmatic concerns. Design exercises will explore simple issues of structure, building and material systems and sustainability.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 183 [Min Grade: C-] and (ARCH 213 [Min Grade: C-] or INTR 245 [Min Grade: C-])

**ARCH 282 Architecture Studio 2B 4.0 Credits**

Covers architectural design problems of incremental complexity that emphasizes the nature of function, structure, and material and their impact on the design process.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 281 [Min Grade: C-] and (ARCH 224 [Min Grade: C-] or INTR 341 [Min Grade: C-]) and (ARCH 170 [Min Grade: C-] or INTR 351 [Min Grade: C-])

**ARCH 283 Architecture Studio 2C 4.0 Credits**

Explores architectural design problems that introduce the full range of challenges in the areas of organization, program, context, systems and formal expression.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 282 [Min Grade: C-] and ARCH 225 [Min Grade: C-] and ARCH 172 [Min Grade: C-]

**ARCH 315 Sustainable Built Environment I 3.0 Credits**

Provides an overview of contemporary sustainable design principles and systems involved to posit novel solutions to various design challenges. Combining theoretical knowledge, field trips and case studies enabling students to critically assess sustainability as it relates to the built environment through five key subsystems: materials, air, water, energy and life.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ARCH 320 Sustainable Built Environment II 3.0 Credits**

Students will examine the work of scientists, designers, authors, artists, architects, engineers, planners, etc to gain a deeper conceptual understanding of current and emerging strategies in sustainability and the complex and integrated systems approach to the built environment in the present and near future.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ARCH 315 [Min Grade: C-]

**ARCH 335 Professional Practice I 3.0 Credits**

This seminar is the first of a two-course sequence that introduces students to varying topics related to architectural practice in today's society. It addresses the following issues: Community and Social Responsibility, Leadership, Ethics & Professional Judgment, Client Role in Architecture, Basic Principles of Architectural Practice.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH or major is INTR.

**Prerequisites:** ARCH 243 [Min Grade: C-] or ARCH 383 [Min Grade: C-]

**ARCH 336 Professional Practice II 3.0 Credits**

This seminar is the second of a two-course sequence that introduces students to varying topics related to architectural practice in today's society. It addresses the following issues: Practice Management, Project Management, Financial Considerations, Legal Responsibilities, Ethics & Professional Judgment.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH or major is INTR.

**Prerequisites:** ARCH 335 [Min Grade: C-]

**ARCH 340 American Architecture & Urbanism 3.0 Credits**

Surveys the development of American architecture and urbanism from its Native American origins through the arrival of early Modernism in the 1930s and 1940s. Writing Intensive.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 341 [WI] Theories of Architecture I 3.0 Credits**

Seminar that examines theories and principles of Western architecture before 1700. History/theory elective. Fall. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 342 [WI] Theories of Architecture II 3.0 Credits**

Continues ARCH 341. Seminar that examines theories and principles of Western architecture from the Baroque era of the 17th century to the beginning of Modernism in the 20th century. History/theory elective. Winter. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 343 Theories of Architecture III 3.0 Credits**

Seminar that examines 20th-century theories of architecture, including analysis and discussion of current theoretical positions. History/theory elective. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 344 [WI] History of Modern Architecture I 3.0 Credits**

Surveys the crucial buildings and thematic development of modern architecture and urbanism beginning in the late nineteenth Century continuing through the mid-20th Century. History/theory elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-]

**ARCH 345 [WI] History of Modern Architecture II 3.0 Credits**

Continuation of ARCH 344. Surveys the crucial buildings and thematic development of modern architecture and urbanism from the mid-20th Century to the present. History/theory elective. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-]

**ARCH 346 [WI] History of Philadelphia Architecture 3.0 Credits**

Covers the architecture of the city of Philadelphia from 1682, examining its architects, styles, and sources through lectures, walking tours, and student reports. History/theory elective. Fall. Alternate years. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 347 [WI] Architectural Study Tour 1.0-6.0 Credit**

An intensive study tour of selected domestic and foreign destinations focusing on architecture and related design disciplines. Combines lecture, site visits, sketching and individual research. History/Theory Elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or INTR 200 [Min Grade: C-] or ARTH 103 [Min Grade: C-]

**ARCH 348 [WI] Studies in Vernacular Architecture 3.0 Credits**

A topical survey of world traditions of vernacular architecture, with emphasis on houses and dwelling environments. The survey topics include basics of shelter, construction methods, response to climate, patterns of settlement, social and economic organization, cultural expression, and methods of research and analysis.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 350 Contemporary Architecture 3.0 Credits**

Survey and analysis of significant developments in architecture and urbanism over the past 50+ years. Writing Intensive.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 351 Studio 5-1 4.0 Credits**

Poses problems that address the relationship of form, site, program, and theory within the constraints of the basic systems (structural, mechanical, etc.).

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (CIVE 263 [Min Grade: D] or ARCH 273 [Min Grade: C]) and ARCH 243 [Min Grade: C]

**ARCH 352 Studio 5-2 4.0 Credits**

Continues ARCH 351. Emphasizes the strengthening of students' ability to solve complex problems in architecture. Expects students to demonstrate understanding and control of basic architectural systems.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 351 [Min Grade: C] and ARCH 261 [Min Grade: C-]

**ARCH 353 Studio 5-3 4.0 Credits**

Continues ARCH 352. Stresses the coordination of all architectural criteria in a large scale and complex architectural problem.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 352 [Min Grade: C] and ARCH 262 [Min Grade: C-]

**ARCH 361 Studio 6-1 4.0 Credits**

Introduces problems of urban design. Case studies demonstrate the relationship between the manmade environment and the natural environment as well as the relationship between many buildings and other manmade environments and the natural environment. Fall.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 353 [Min Grade: D] and ARCH 263 [Min Grade: C-]

**Corequisite:** ARCH 335

**ARCH 362 Studio 6-2 4.0 Credits**

Continues ARCH 361. A large urban-design project is undertaken to learn the design process required to solve problems of such magnitude. Winter.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 361 [Min Grade: D]

**Corequisite:** ARCH 336

**ARCH 363 Studio 6-3 4.0 Credits**

Continues ARCH 362. Requires students to develop architectural solutions for a portion of the problem addressed in Studio 6-2, demonstrating an understanding of the relationship between buildings and the exterior environment established in the previous course. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 362 [Min Grade: D]

**Corequisite:** PHIL 317

**ARCH 377 Architectural Technology VII 3.0 Credits**

Advanced building technology concepts are explored through case studies and focused design examples. Materials, construction, methods, structure, systems and envelope are studied as integrated aspect of larger iterative design processes.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 276 [Min Grade: C-]

**ARCH 378 Architectural Technology VIII 3.0 Credits**

Building technology and analysis are explored through design precedents and sketch problems to develop integrated design and analytical skills. Focuses on large and small scale elements that can become generative and performative aspects of major design decisions.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 377 [Min Grade: C-]

**ARCH 379 Architectural Technology IX 3.0 Credits**

Advanced building technology design and analysis is utilized in iterative and integrated design methods to support comprehensive design processes. Materials, structure and systems are developed qualitatively and quantitatively through design and analysis exercises.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 378 [Min Grade: C-]

**ARCH 381 Architecture Studio 3A 4.0 Credits**

Investigates the design relationship between man-made and the natural environment. Cultivates advanced analysis methods and the development of informed and resolved design solutions.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 283 [Min Grade: C-] and ARCH 226 [Min Grade: C-] and ARCH 173 [Min Grade: C-]

**ARCH 382 Architecture Studio 3B 4.0 Credits**

Studies the relationship between building, site and context. Architectural design problems emphasize concept development that translates careful analysis into the building ideas with a progressing understanding of architectural concerns.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 381 [Min Grade: C-] and ARCH 274 [Min Grade: C-]

**ARCH 383 Architecture Studio 3C 4.0 Credits**

Focuses on architectural problems with intermediate complexity. Integrates issues of context, site, program, function, and architectural systems into advanced design proposals.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 382 [Min Grade: C-] and ARCH 275 [Min Grade: C-]

**ARCH 421 [WI] Environmental Psychology and Design Theory 3.0 Credits**

Examines the relationship between human behavior and architecture from the perspective of environmental psychology. Topics include aesthetics, environmental experience, social interaction, social organization, and culture. This is a writing intensive course. History/Theory Elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 431 [WI] Architectural Programming 3.0 Credits**

Introduces current techniques of building programming and their relationship to building design. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 353 [Min Grade: C-] or ARCH 483 [Min Grade: C-]

**ARCH 432 The Development Process 3.0 Credits**

Introduces the process of land development. Explores traditional and emerging development models (the architect as the equity participant and developer) in relation to new construction and rehabilitation. Covers various methods of initiating building projects and financing and tax issues. Professional elective. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARCH 441 Urban Design Seminar 3.0 Credits**

Expands the concept of architecture to urban design scale and presents the principles of city planning through a series of case studies. History/Theory Elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 143 [Min Grade: C-] or ARCH 144 [Min Grade: C-]

**ARCH 451 Advanced Drawing 3.0 Credits**

Covers advanced architectural rendering, concentrating on the effects of light, shade, and color using the techniques of water-color rendering. Professional elective. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 134 [Min Grade: C-] or ARCH 226 [Min Grade: C-] or INTR 341 [Min Grade: C-]

**ARCH 455 Computer Applications in Architecture I 3.0 Credits**

Covers two-dimensional and three-dimensional computer representations and applications. Professional elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 134 [Min Grade: C-] or ARCH 226 [Min Grade: C-]

**ARCH 456 Computer Applications in Architecture II 3.0 Credits**

Further investigates and demonstrates the computer's capabilities in architectural design and representation. Professional elective.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 134 [Min Grade: C-] or ARCH 226 [Min Grade: C-]

**ARCH 463 Emerging Architectural Technology 3.0 Credits**

A holistic study of design and construction technology of significant buildings by leading architects.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 161 [Min Grade: C-] or ARCH 173 [Min Grade: C-]

**ARCH 464 Building Enclosure Design 3.0 Credits**

Examines the integrations of aesthetics, building science, and technology in the design of building enclosures. Professional Elective. Summer.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 161 [Min Grade: C-] or ARCH 173 [Min Grade: C-]

**ARCH 465 Energy and Architecture 3.0 Credits**

Creates an awareness of the availability of energy resources and their effect on the built environment. Discusses alternative sources of energy. Professional elective. Summer.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 161 [Min Grade: C-] or ARCH 173 [Min Grade: C-]

**ARCH 481 Architecture Studio 4A 4.0 Credits**

Focuses on more complex architectural challenges through analysis of case studies that address the relationship between the man-made built environment and the natural environment.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 383 [Min Grade: C-] and ARCH 276 [Min Grade: C-]

**ARCH 482 Architecture Studio 4B 4.0 Credits**

Further the understanding of context and design and the application of solutions and strategies surrounding more complex architectural and environmental problems.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 481 [Min Grade: C-] and ARCH 377 [Min Grade: C-]

**ARCH 483 Architecture Studio 4C 4.0 Credits**

Challenges to develop and refine architectural solutions through an advanced understanding of the relationship between buildings and environment.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 482 [Min Grade: C-] and ARCH 378 [Min Grade: C-]

**ARCH 487 Architecture Studio 5A 4.0 Credits**

Addresses the complex relationship through analysis and synthesis of form, site, program, building technology and theory within specific building context.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 483 [Min Grade: C-] and ARCH 379 [Min Grade: C-]

**ARCH 488 Architecture Studio 5B 4.0 Credits**

Emphasizes complex architectural problems while demonstrating understanding and appropriate application.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 487 [Min Grade: C-]

**ARCH 489 Architecture Studio 5C 4.0 Credits**

Integrates in-depth application and coordination of all architectural building criteria in a large scale and complex architectural problem.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 488 [Min Grade: C-]

**ARCH 493 Senior Project I 4.0 Credits**

Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part one of three.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** (ARCH 363 [Min Grade: C-] or ARCH 489 [Min Grade: C-]) and ARCH 431 [Min Grade: C-]

**ARCH 494 Senior Project II 4.0 Credits**

Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part two of three.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 493 [Min Grade: C-]

**ARCH 495 Senior Project III 4.0 Credits**

Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part three of three.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 494 [Min Grade: C-]

**ARCH 496 Thesis I 8.0 Credits**

An individually structured year-long design problem that enables students to work independently and explore complex issues in depth. Periodic individual review sessions are scheduled with faculty adviser. Fall.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 363 [Min Grade: D] and ARCH 143 [Min Grade: C-] and (ARCH 134 [Min Grade: C-] or ARCH 153 [Min Grade: C-]) and ARCH 263 [Min Grade: C-] and CIVE 263 [Min Grade: C-]

**ARCH 497 Thesis II 8.0 Credits**

Continues ARCH 496. Winter.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 496 [Min Grade: C-]

**ARCH 498 Thesis III 8.0 Credits**

Continues ARCH 497. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARCH 497 [Min Grade: C-]

**ARCH 499 [WI] Special Topics in Architecture 1.0-6.0 Credit**

Covers special topics in architectural history, theory, or technology that satisfy history/theory or professional elective requirements.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** ARCH 143 [Min Grade: C]

**ARCH I199 Independent Study in Architecture 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH I299 Independent Study in Architecture 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH I399 Independent Study in Architecture 0.5-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH I499 Independent Study in Architecture 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** ARCH 143 [Min Grade: C]

**ARCH T180 Special Topics in Architecture 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH T280 Special Topics in Architecture 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH T380 Special Topics in Architecture 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARCH T480 Special Topics in Architecture 1.0-6.0 Credit**

Covers special topics in architectural history, theory, or technology that satisfy history/theory or professional elective requirements.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** ARCH 143 [Min Grade: C]

## Art History

### Courses

**ARTH 101 History of Art I: Ancient to Medieval 3.0 Credits**

Traces the rise of Western civilization from ancient Egypt and Mesopotamia, through Greek and Roman culture to the late Middle Ages, with an emphasis on the evolution of style and symbolism in art.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARTH 102 History of Art II: Renaissance to Romanticism 3.0 Credits**

Surveys painting and sculpture created between the 15th century and the mid-19th century, placing artists such as Donatello, Michelangelo, Rubens, and Rembrandt in the context of the evolution of style and symbolism in Western culture.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARTH 103 History of Art III: Modern Art 3.0 Credits**

Examines the history of modern painting and sculpture from 1850 to the present and the phenomenon of Modernism in terms of individual artists, movements, attitudes, and values. Movements to be covered include Impressionism, Symbolism, Expressionism, Cubism, Surrealism, Non-figurative Abstraction, the New York School, and Postmodernism.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARTH 150 Art History Research Methods 3.0 Credits**

This course introduces students to research methods that guide the physical, contextual and interpretive analysis of objects categorized by design and/or use as "works of art." Students will learn how to identify materials and media, as well as how to conduct archival and library research. From these foundations, students will explore the circumstances of artifact production and function as well as histories of excavation and/or preservation, documentation, display and interpretation. The course includes mandatory on-campus and off-campus field trips. Students will gain valuable skills that may be required for co-ops in museums or galleries as well as to honing their skills for writing research papers.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ARTH 101 [Min Grade: B-], ARTH 102 [Min Grade: B-], ARTH 103 [Min Grade: B-] (Can be taken Concurrently)

**ARTH 200 Principles and Methods of Art History 3.0 Credits**

This course will critically examine the interpretive principles and methods that have been used in the discourse of art history from the Renaissance to the present day.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARTH 300 [WI] History of Modern Design 3.0 Credits**

Examines the products of applied design during the past 150 years, including examples of furnishings, industrial design, fashion, and graphic design, in relation to demand, technology and production, standards, fine art, social reform, and the dynamics of consumption. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ARTH 301 Asian Art and Culture 3.0 Credits**

Explores the diverse visual languages and cultures of Asia including the Buddhist and Hindu traditions from India and Southeast Asia, the imperial art of China with its refined taste for ceramics and painting, and the Japanese.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARTH 302 Art of India 3.0 Credits**

This course explores the diverse artistic traditions of the Indian subcontinent from ancient times to the modern period, focusing on the art of the Buddhist, Hindu and Islamic communities. The survey ends with an examination of the colonial, post-colonial and contemporary art scene.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARTH 303 Art of China 3.0 Credits**

From the first empires to modern times, this course explores the art of painting ceramics, as well as the sculptural and architectural traditions of China.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARTH 304 Art of Japan 3.0 Credits**

This course examines the art of Japan from the Shinto traditional forms to the creation of a Buddhist Japanese idiom, from the courtly and military art to the Zen aesthetics and the establishment of a modern urban culture.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARTH 310 Early American Art 3.0 Credits**

This course will survey paintings, sculpture, graphic arts, and material culture of North America from the moment of Columbus's "discovery" to the mid-nineteenth century. It will trace a wide range of artistic and visual works from the Colonial, Federal and Antebellum periods, including some works that were made during and after the Civil War. Along with the study of art emerging out of a European tradition, we will simultaneously be studying the art and culture of the indigenous peoples of Latin and North America, paying special attention to the interactions between indigenous and immigrant visual cultures.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARTH 311 Twentieth-Century American Art 3.0 Credits**

This course tracks the development of select artistic movements and the careers of notable American artists, from 1900-1939. This course will study the impact of immigration, WWI, industrialization and mechanization, urbanization, economic crisis, and radical politics on American art, and also how American art contributed to the production of specific racial, classed, and gendered American subjects.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**ARTH 312 Early Modernism (1850-1900) 3.0 Credits**

This course is an introduction to European art of the late nineteenth century, from roughly 1850 to 1900—the decades when modernism exploded. Beginning with a close look at the Realist and Impressionist movements in Paris, we will study the artistic styles, techniques, and materials characteristic of the modern era, as well as the changing social, historical and political circumstances that helped shaped artistic production.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**ARTH 313 20th Century Modernism (1900-1955) 3.0 Credits**

This course will critically examine the development of Modernism in Western art during the first half of the 20th century in light of socio-economic and political factors, philosophical and scientific ideas, technological developments, stylistic movements, and art theories.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**ARTH 314 Contemporary Art 3.0 Credits**

This course will survey current global art production in light of socio-economic and political factors, philosophical and scientific theories, and new approaches to media and technology.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**ARTH 315 History of African-American Art 3.0 Credits**

This course traces the history of African American art, beginning with the African-inspired material culture of slaves, and, later, encompassing the works of formally-trained as well as self-taught painters, sculptors, photographers, and artists working in multimedia up to the present. These works will be situated within the contexts of critical race theory, social and political movements, collectors and patrons, early critics and theorists of the black avant garde, influential exhibitions, and the opposition between elite and popular cultures.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**ARTH 316 African Art 3.0 Credits**

This course will explore historical and contemporary African sculpture, textiles, painting, drawing, photography and mixed media in relationship to particular themes such as religion, trade, political power and healing. With emphasis on select objects from West and Central Africa, the course will also consider the visual arts in relationship to ideas of improvisation, aesthetics, identity and self-representation.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**ARTH 317 Modern Art Theory and Criticism 3.0 Credits**

This course will critically examine the development of art theory and criticism in the discourse of Western art from the early 20th century to the present day. Specific theories will be analyzed in relation to stylistic developments as well as the socio-economic, political, scientific, and technological developments that have determined these changes.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**ARTH 320 Art in the Age of Technology 3.0 Credits**

An inquiry into the ideas, concerns, and values that constitute the worldview of modern Western science and technology and the impact that this view, as well as specific technologies, have had upon the visual arts.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**ARTH 325 Ancient Greek and Roman Art 3.0 Credits**

This course will survey the art produced by the ancient cultures of Greece and Rome, from the archaic period to the fall of the Roman Empire. The art will be considered as an expression of the social, political, economic and intellectual histories of these two civilizations.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**ARTH 326 Medieval Art 3.0 Credits**

This course is a survey of Medieval Art between the 3rd and 14th centuries C.E.. Architecture, mural painting, stained glass, sculpture, illuminated manuscripts, enamel, tapestry and other objects of ceremonial and everyday use will be studied as expressions of the political, social, and religious contexts of the time. Emphasis will be placed upon Christian art, but Islamic, Jewish, and secular traditions in the arts will also be examined.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**ARTH 327 Italian Renaissance Art 3.0 Credits**

This course will survey paintings, sculpture, architecture and graphic art from Italy during the 15th and 16th centuries. Artworks will be analyzed not only in terms of their formal characteristics, but also as expressions of concurrent social, political, economic, religious, and philosophical developments.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**ARTH 328 Northern Renaissance 3.0 Credits**

This course will survey paintings, sculpture, and graphic arts from Northern Europe during the 15th and 16th centuries. Artworks will be analyzed not only in terms of their formal characteristics, but also as expressions of concurrent social, political, economic, religious, and philosophical developments.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**ARTH 329 Art of the 17th and 18th Centuries 3.0 Credits**

This course will examine the history of European art and architecture from the late 1500s to approximately 1800—a period that bridges the gap from the Renaissance to the earliest days of the Modern era. Beginning with the Baroque in Counter-Reformation Italy and concluding with Neoclassicism in the late 18th century, the course will trace the stylistic developments in Europe and America through a variety of religious, political, and philosophical movements.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARTH 335 [WI] History of Costume I: Preclassical to Directoire 3.0 Credits**

Examines costumes of the ancient world and Western civilization through the Directoire period, including political, economic, and social influence on aesthetic development in dress. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ARTH 101 [Min Grade: D] or ARTH 102 [Min Grade: D]

**ARTH 336 [WI] History of Costume II: Directoire to World War I 3.0 Credits**

Examines political, social, and economic influences on costume. Uses the Drexel Historic Costume collection as primary source material. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ARTH 335 [Min Grade: D]

**ARTH 337 History of Costume: Post World War I to Present 3.0 Credits**

Examines major trends in mid-to-late 20th-century fashionable apparel in their sociocultural, political, and economic contexts. Also examines counter-fashion movements and explores current media and marketing influences.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ARTH 103 [Min Grade: D]

**ARTH 340 Women in Art 3.0 Credits**

A historical survey of the art created by women in Western civilization, with a special focus upon the art created since the women's movement of the 1970s. Images are analyzed in relation to the sociopolitical and psychological context of Western, patriarchal culture.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARTH 356 Understanding Museum Audiences 3.0 Credits**

This course will introduce students to the variety of ways that museums think about their diverse audiences and the programs that they develop to meet audience needs. Our society is changing. Learning is no longer confined to the classroom and museums have become an important resource for this lifelong, self-directed learning. This course will introduce students to educational theory, research and practice in museums. Students will experience different techniques for teaching with and interpreting art in the museum setting.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARTH 400 Art History Senior Thesis 3.0 Credits**

A scholarly research project written during the senior year under the advisement of a thesis director chosen from among the art history faculty. The thesis student will meet at least once every week with the advisor who will provide direction for their research by helping them to develop a topic, identify appropriate resources, discuss interpretive strategies, determine the expository structure of the paper, and provide clarity on specific requirements for bibliography, illustrations, and a citation system.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**ARTH 465 [WI] Special Topics in Art History 3.0 Credits**

Provides study in art history on a special topic or on an experimental basis. May be repeated for credit. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ARTH 477 Art History Seminar 3.0 Credits**

Provides reading, discussion, and research on pertinent topics in art history.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**ARTH I199 Independent Study in Art History 0.5-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARTH I299 Independent Study in Art History 0.5-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARTH I399 Independent Study in Art History 0.5-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARTH I499 Independent Study in Art History 0.5-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARTH T180 Special Topics in Art History 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARTH T280 Special Topics in Art History 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARTH T380 Special Topics in Art History 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**ARTH T480 Special Topics in Art History 3.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

## Arts & Sciences-Interdisp Stud

### Courses

**AS-I 100 Community-Engaged Learning 1.0-4.0 Credit**

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**AS-I 103 AIDS 101 3.0 Credits**

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**AS-I 180 Interdisciplinary Study in the Arts & Sciences 1.0-3.0 Credit**

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 3 times for 9 credits

**AS-I 265 Special Interdisciplinary Study in Arts & Sciences 0.5-6.0 Credits**

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

**AS-I T180 Special Topic in Arts & Sciences-Interdisp Stud 0.0-12.0 Credits**

## Behavioral & Addictions Couns

### Courses

**BACS 100 Life Span Human Development 3.0 Credits**

This course introduces students to the physical, cognitive and psychological aspects of human development from birth through advanced old age. Topics include: environmental influences, perception, gender roles and sexuality, spirituality, motivation, life styles, and psychiatric disorders.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 200 Foundation of Behavioral Health Care 3.0 Credits**

This course introduces the students to the historical and current contexts of program components that comprise community-based behavioral health systems. Topics include: work-force roles; regulatory policies and program practices; federal, state, and county program organizations; advocacy issues; and managed care systems issues.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 205 Strategies for Academic Success 1.0 Credit**

This course helps students to explore the learning process, to gain essential skills needed to achieve academic success and to develop the ability to make effective use of university resources. Discussion, personal reflection, and relevant electronic resources are used to foster students' development as self-directed learners. Specific attention will be given to the following topics: study skills, learning strategies, time management, academic planning, test-taking techniques, and goal-setting. The goal of this course is to help improve students' efficacy in the areas of academic self-management, self-direction, and resource utilization.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 210 Behavioral Disorders 3.0 Credits**

Clinical characteristics and diagnostic features of major psychiatric disorders are reviewed within the contexts of community-based treatment approaches. Topics include: etiological models, differential symptoms, diagnostic/functional assessment and treatment interventions.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 220 Counseling Theory and Practice 3.0 Credits**

Surveys major counseling theories with emphasis upon study and practice of basic counseling competencies. Topics include: relationship building, effective communication and helping skills, common stages in counseling process, and helping skills with special populations.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 230 Genetics and Mental Health 3.0 Credits**

This course explores genetic concepts and principles as they pertain to human variation in behavioral and general health disorders. Students obtain a firm grounding in the basic science and the tools used by researchers to explore the contribution of the genes (and their essential counterpart, the environment) to behavior.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 232 Ethics and Professional Responsibility 3.0 Credits**

This course discusses the philosophical, legal and moral responsibilities of professionals in behavioral health and human services setting with a strong emphasis on counseling relationships. A wide array of ethical issues are presented and discussed. Moral dilemmas comprised of competing moral obligations are examined.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 234 Introduction to Addictive Disorders 3.0 Credits**

This course introduces the nature of addictions and the impairment in individuals who suffer from addictions. It includes a review of theories on substance disorders and approaches to identification, prevention and treatment. Topics include: historical perspectives, diagnosis, types of addictive behaviors, treatment, and current research.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 236 Psychiatric Rehabilitation Principles and Practices 3.0 Credits**

This is an introductory survey courses which acquaints the student with the principles and practices of Psychiatric (or Psychosocial) Rehabilitation. It provides the student with an understanding of the manner in which Psychiatric Rehabilitation approaches, understands and assists the person with serious and persistent mental illness.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 250 Behavioral Health Informatics 3.0 Credits**

This course introduces students to the uses and importance of computer technologies in transforming behavioral health care practice. Course sections cover both the science and practice applications of emerging technologies from psychotherapies, to medication management, and to quality care management.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 255 Multicultural Counseling 3.0 Credits**

This course provides didactic information for use in the development of awareness and skills necessary for effective therapeutic relationships with clients of diverse cultural backgrounds.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 301 Group Counseling I 3.0 Credits**

This course is an introduction to the theoretical base and skills used in conducting group counseling. Included are theories of group work, facilitation techniques, types and styles of groups and models of group functioning. Students participate in a group as a group member and to act as a group co-leader in order to practice leadership skills.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 304 Cognitive and Behavioral Counseling I 3.0 Credits**

This course familiarizes the student with key cognitive-behavioral models used in therapy today. Differences and similarities are explored. Students are exposed to the philosophical models and the related techniques stemming from these models. Skills on how to conceptualize and work with a client are taught.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 310 Recovery and Relapse Prevention 3.0 Credits**

The goal of recovery and relapse preventions is the development personal strategies that will help the person restructure their life in a way that will prevent a return to active addiction. This course helps define the role of professional counselor in understanding the dynamic of recovery from a clinical perspective.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 312 Case Management Methods 3.0 Credits**

This course is an in-depth explorations of the definitions and methodologies of case management services. The course is designed to provide students with the most up to date research and clinical applications of services management in the practice of addictions counseling.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 320 Crisis and Brief Intervention 3.0 Credits**

This course introduces student to the fundamental concepts, theories, strategies, and skills needed to understand and conduct effective crisis and brief intervention counseling. Particular attention is given to several types of crises commonly encountered in working within settings serving people who have long-term disabling psychiatric disorders.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 325 Psychopharmacology for Counselors 3.0 Credits**

This course focuses on the mechanisms of action of psychiatric medications, and uses and limitations of psychopharmacology in the overall management of serious mental illness. The student will learn to work collaboratively with the consumer, and others, and the importance of integrating the use of medications with psychiatric rehabilitation approaches.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 345 Careers in Behavioral Health 3.0 Credits**

There are numerous career choices available within the field of Behavioral Health. In order to help you prepare for the future, this course explores the roles, responsibilities, and healthcare settings associated with careers such as counselor, psychiatric rehabilitation practitioner, social worker, therapist, psychologist, psychiatrist, advocate, and others. We explore opportunities to work with children, adults, and seniors in hospital and community treatments settings as well as in schools and in the community at large. We also examine the educational requirements of different fields of professional practice and review graduate schools options. Students explore their strengths and preferences related to future employment and begin to formulate personal plans for academic and professional success.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 350 Child Psychopathology 3.0 Credits**

This course provides an understanding of childhood-onset behavioral, emotional, developmental, and learning disorders. Review of theories on the development of child psychopathology and approaches to identification, prevention and treatment of disorders. Students learn about assessment and ethical treatment of children.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 360 Preventing Substance Abuse 3.0 Credits**

This course provides a comprehensive overview of prevention theories and prevention programming applications as regards substance use disorders. Course topics include: theories and models basic to prevention, science-based prevention strategies and model programs, strategic planning and outcome evaluation.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 367 Advanced Counseling Intervention 3.0 Credits**

This course introduces students to current best practices when counseling clients with behavioral health disorders. Students are provided with training in the advanced counseling skills of Motivational Interviewing and Solution-Focused Therapy as well as introduced to experimental approaches to counseling this population.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BACS 220 [Min Grade: C]

**BACS 368 Addictions Counseling with Special Populations 3.0 Credits**

This course involves the student in examinations of challenges for addictions counselors in working with frequently underserved populations represented by adolescents and elderly persons. Effective approaches to assessing and treating both youthful and older adult individuals with addiction disorders are explored and defined.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 370 Problem Gambling Interventions 3.0 Credits**

This course covers basic areas of treatment knowledge and counseling skills necessary to effectively diagnose and assess the pathological gambler and define the necessary components for effective counseling interventions with problem gamblers.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 380 Trauma-Informed Care 3.0 Credits**

This is an introduction to the psychophysiology of complex trauma in children and adolescents, and an overview of assessment and treatment modalities in both youth and adults. The course focuses on neurobiology and how trauma impairs brain development and the life domains of children, adolescents, and adults. It also covers various issues of assessment, diagnosis, and treatment. The stages of stabilization, reprocessing and reintegration, and the multiple models helpers utilize when working with survivors of trauma are explored. Course work will culminate with students reviewing and presenting case studies of assessment and treatment interventions for children and adolescents experiencing traumatic effects.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 390 Special Topics in Mental Health 3.0 Credits**

This course covers topics of particular interest to students in health sciences. In different terms, a variety of topics will be presented to the students. May be repeated twice for credit.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Can be repeated 2 times for 6 credits

**BACS 401 Assessment and Treatment Planning 3.0 Credits**

The focus of this course is learning the systematic, multi-disciplinary approach for gathering, interpreting, applying and recording data regarding clients in addictions and other behavioral health treatment settings. The most current screening, assessment, treatment planning and documentation approaches are covered.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 404 Cognitive and Behavioral Counseling II 3.0 Credits**

This course extends BACS 304 by deepening the exploration of cognitive-behavioral therapy theory and methods. More emphasis on developing skills in conceptualization and treatment. Some focus on how clients can manage anger better and how therapists can take care of themselves appropriately.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BACS 304 [Min Grade: C]

**BACS 405 Family-Focused Interventions 3.0 Credits**

This course gives students the knowledge, skills and attitudes to: identify and overcome the barriers that prevent family members from being full partners in the mental health treatment of their family member; define family from a culturally competent perspective; and provide mental health intervention in full partnership with families.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 410 Child and Adolescent Support 3.0 Credits**

This course is based on the principles of Child and Adolescent Service System Program (CASSP). The course gives students the knowledge, skills important to implementing a comprehensive care system for families and their children endorsed by the Commonwealth of Pennsylvania.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 411 Forensic Behavior Health Service 3.0 Credits**

The intersection between law and behavioral health services in the focus of this course. Topics include: the criminal justice system, criminal thinking, community and ethical barriers, biopsychosocial models that are specific to the forensic client and the growing base of knowledge about community corrections.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 412 Group Counseling II 3.0 Credits**

This is an advanced course in the facilitation of group processes, with an emphasis on group counseling. The course provide skills in group facilitation including application of theory, tracking process and initiating interventions, working with special populations, incident management, treatment planning processes, and recording progress.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 414 Co-Occurring Disorders 3.0 Credits**

This course introduces an integrated treatment approach for working with individuals who have both mental illness and substance use disorders. Topics include: assessment and treatment planning, strategies for coordinating dual interventions.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 420 Psychiatric Rehabilitation Competencies 3.0 Credits**

The purpose of this advanced course is to help students develop the competencies necessary to implement the principles and practices of Psychiatric Rehabilitation. This is accomplished by engaging the student in an in-depth analysis of the tools and processes used to bring about outcomes related to community integration and the life quality.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 430 Behavioral Health and Aging 3.0 Credits**

Students will explore concepts, issues, and research pertaining to the psycho-social and behavioral health aspects of working with older adults. Students will learn about and practice interventions, competencies, and strategies designed to improve the quality of life of older adults.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**BACS 490 Senior Research Project 3.0 Credits**

The students, with faculty supervision, plan and execute a term project that will integrate the academic and practical knowledge the students have acquired in their curriculum. The students develop objectives relevant to the project, critique the literature, present a plan for implementation, and complete the term project. May be repeated twice for credit.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Can be repeated 2 times for 6 credits

**BACS 499 Readings in Behavioral Health 1.0-6.0 Credit**

This course is designed to allow upper-class students to pursue specialized interest in specific topics in behavioral health science. May be repeated three times for credit.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Can be repeated 3 times for 9 credits

# Biomedical Engineering & Sci

## Courses

**BMES 101 Introduction to BMES Design I – Defining Medical Problems 2.0 Credits**

This course is part one in a two-part series meant to instruct students on the unique challenges of designing solutions for biomedical needs. Part one will focus on defining the problem which includes: 1) understanding the medical need, 2) evaluating existing solutions, 3) defining requirements, identifying constraints and 4) choosing tests to verify requirements have been met.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**BMES 102 Introduction to BMES Design II – Evaluating Design Solutions 2.0 Credits**

This course is part two in a two-part series meant to instruct students on the unique challenges in designing solutions for biomedical needs. Part two will focus on developing solutions that include: 1) generating multiple solution pathways, 2) refining solution choices based on requirements and constraints, 3) conducting experimental verification tests and 4) finally concluding if the solution was a success.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BMES 101 [Min Grade: D]

**BMES 124 Biomedical Engineering Freshman Seminar I 2.0 Credits**

This course is intended to introduce freshman biomedical engineering students in the School of biomedical Engineering, Science and Health Systems at Drexel University to academic programs and opportunities, ongoing research projects and University resources to ensure a successful educational experience at Drexel and beyond. Through class discussions and guest lecture presentations, the students are provided with information and contacts necessary to begin a plan of academic study.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**BMES 125 Foundations of Biomedical Engineering 2.0 Credits**

This course is intended to introduce new transfer biomedical engineering students in the School of biomedical Engineering, Science and Health Systems at Drexel University academic programs and opportunities, ongoing research projects and University resources to ensure a successful educational experience at Drexel and beyond. Through class discussions and guest lecture presentations, the students are provided with information and contact necessary to begin a plan of academic study.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**BMES 126 Biomedical Engineering Freshman Seminar II 1.0 Credit**

This course is intended to introduce freshman biomedical engineering students to the career embodied by the School's current concentration areas. Each area will be discussed in terms of the current state of the art, research possibilities and career opportunities. The curricula for each concentration will be discussed in detail so as to facilitate students' knowledge of how each curriculum relates to the research and employment opportunities in that field.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**BMES 130 Problem Solving in Biomedical Engineering 2.0 Credits**

This course integrates fundamental principles of biology, chemistry, engineering, mathematics and physics into a framework for the study of biomedical engineering. In this course, students will use both engineering and scientific approaches to problem-solving. They will learn about the differences between engineering design and biological evolution. They will also learn to apply basic principles of chemistry, physics and mathematics to specific biological and physiological problems.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**BMES 201 Programming and Modeling for Biomedical Engineers I 3.0 Credits**

This course aims to introduce students with some fundamental concepts about programming in MATLAB to give the ability to solve basic bioengineering problems. The course introduces the basics of programming using Matlab, including programming environment and tools. Fundamental programming techniques and concepts such as loops, switches and logical operators, functions and file handling are covered. Applications in bioengineering for basic numerical problem solving are discussed.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**BMES 202 Programming and Modeling for Biomedical Engineers II 3.0 Credits**

The course aims to introduce students to advanced programming concepts and tools to solve numerical problems in bioengineering. It provides the foundation for biosimulation and biocomputation classes. This course introduces advanced programming methods and computational tools for numerical analysis, model design and graphics. Higher level level functionality in Matlab such as SIMULINK, symbolic processing and CAD related tools are discussed.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BMES 201 [Min Grade: D]

**BMES 212 The Body Synthetic 3.0 Credits**

The Body Synthetic introduces concepts underlying biological and engineering principles involved in the design and construction of prosthetic devices used to replace various parts of the human body.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 122 [Min Grade: D]

**BMES 235 Living Systems Engineering 4.0 Credits**

This course introduces the biomedical engineering students to engineering principles applied to biological and physiological systems. This course focuses on evolution, adaptation, energy, thermodynamics, fluid dynamics and control systems in living organisms.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 122 [Min Grade: D] and CHEM 102 [Min Grade: D] and MATH 200 [Min Grade: D] and PHYS 102 [Min Grade: D] and BIO 201 [Min Grade: D]

**BMES 238 Dynamics of Biomedical Systems 3.0 Credits**

Covers kinematic (linear and angular momentum) and kinetic (forces and moments) analysis of biomedical systems in two and three dimensional space with rotating coordinate systems.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** MATH 201 [Min Grade: D], ENGR 231 [Min Grade: D], MATH 261 [Min Grade: D] (Can be taken Concurrently) MEM 202 [Min Grade: D]

**BMES 241 Modeling in Biomedical Design I 2.0 Credits**

This course is part 1 in a 2 part series meant to instruct students on how to leverage year appropriate skills while designing solutions to biomedical problems. Students will: a) evaluate mathematical model(s) meant to solve biomedical problem(s), b) write software to simulate these solution(s), c) construct a solution based on simulation specifications, d) employ laboratory standards to verification testing, e) review test results and propose further refinement (written document and oral presentation).

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** MATH 200 [Min Grade: D] and PHYS 102 [Min Grade: D] and BIO 122 [Min Grade: D] and BMES 201 [Min Grade: D] and (BMES 102 [Min Grade: D] or ENGR 103 [Min Grade: D])

**BMES 301 Laboratory I: Experimental Biomechanics 2.0 Credits**

This course deals with experimental aspects of biomechanics, specifically with the testing mechanical properties of biological tissues.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** (MATH 201 [Min Grade: D] or MATH 261 [Min Grade: D] or ENGR 231 [Min Grade: D]) and MEM 202 [Min Grade: D]

**BMES 302 Laboratory II: Biomeasurements 2.0 Credits**

This course introduces students to the measurement of physiological/biological/functional signals. Four specific signals will be collected and analyzed. Students are expected to analyze type of signal to be collected, possible measurement techniques and potential data analysis and then collect and analyze each signal.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**Prerequisites:** ECE 201 [Min Grade: D] (Can be taken Concurrently) BIO 201 [Min Grade: D]

**BMES 303 Laboratory III: Biomedical Electronics 2.0 Credits**

This course introduces students to the widespread application of electronics and electronic devices in biomedical engineering. The course reinforces concepts learned in ECE 201 with hands-on experimentation related to biomedical applications such as telemedicine and medical devices.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECE 201 [Min Grade: D] and (MATH 210 [Min Grade: D] or ENGR 232 [Min Grade: D] or MATH 262 [Min Grade: D])

**BMES 304 Laboratory IV: Ultrasound Images 2.0 Credits**

This course introduces students to the engineering principles of acoustical measurements by combining hands-on laboratory experiences with lectures. Students will learn the engineering/physical principles of measuring sound velocity in different materials, attenuation, and directivity of a circular transducers.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**Prerequisites:** BIO 201 [Min Grade: D] and ECE 201 [Min Grade: D]

**BMES 305 Laboratory V: Musculoskeletal Anatomy for Biomedical Engineers 2.0 Credits**

This course provides an opportunity for students to study the anatomy and biomechanics of select articulations of the human body. While the main emphasis will be on the musculoskeletal structures associated with each articulation, major neural and vascular structures will be studied as well.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (BIO 201 [Min Grade: D] or BMES 235 [Min Grade: D]) and MEM 202 [Min Grade: D]

**BMES 310 Biomedical Statistics 4.0 Credits**

This course is designed to introduce biomedical engineering students to the fundamentals of biostatistics necessary for medical research. Topics covered include measurements, sampling, basic hypothesis testing, analysis of variance and regression. Medical applications are emphasized.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGR 231 [Min Grade: D] or MATH 261 [Min Grade: D] or MATH 201 [Min Grade: D]

**BMES 315 Experimental Design in Biomedical Research 4.0 Credits**

This course is designed to introduce students to the fundamental principles of experimental design and statistical analysis as applied to biomedical research with animals and humans. Topics to be covered include experimental design, clinical design, and protocol submission and review.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BMES 310 [Min Grade: D]

**BMES 325 Principles of Biomedical Engineering I 3.0 Credits**

This course is the first part of a two-term sequence which introduces biomedical engineering students to engineering principles applied to biological and physiological systems. This course focuses on bioethical questions, biomechanics, human performance engineering, biomaterials and tissue engineering.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** MEM 202 [Min Grade: D] (Can be taken Concurrently) BIO 122 [Min Grade: D] and (ENGR 232 [Min Grade: D] or MATH 262 [Min Grade: D] or MATH 210 [Min Grade: D])

**BMES 326 Principles of Biomedical Engineering II 3.0 Credits**

This course is the second part of a two-term sequence which introduces biomedical engineering students to engineering principles applied to biological and physiological systems. This course focuses on bioinformatics, neuroengineering, biosignal processing, biosensors, and medical imaging.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECE 201 [Min Grade: D] (Can be taken Concurrently) BMES 325 [Min Grade: D]

**BMES 330 Biological Rhythm in Pharmacology and Toxicology 3.0 Credits**

This course covers the fundamentals of biological rhythms with particular emphasis on the influence these cycles have on the susceptibility of organism to physical, chemical, and/or toxic agents.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 203 [Min Grade: D] or BMES 235 [Min Grade: D]

**BMES 331 Computers in Health Systems I 3.0 Credits**

Introduces the allied health professional to basic computer applications on personal computers. Includes word processing, spreadsheets, databases, and networking (e.g., e-mail and information search and retrieval) in a primarily Windows environment. Designed for individuals with little or no computer background. Students are encouraged to bring in their own work-related problems or projects to provide immediate application of knowledge learned to the student's professional healthcare environment.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**BMES 332 Computers in Health Systems II 3.0 Credits**

Continues the general overview of computers for people in the allied health professions, using specific examples from health care. Offers further study of and practice with special scientific (e.g., statistics, graphing) and medical clinical decision-support software. Introduces algorithms and formal programming methods.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**BMES 335 Biomedical Informatics I 3.0 Credits**

Introduces information and information handling systems for people in the allied health professions, with specific examples drawn from health care. Covers locating, manipulating, and displaying information in the health system setting.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**BMES 336 Biomedical Informatics II: Hospital and Patient Information 3.0 Credits**

Continues BMES 335. Emphasizes medical records and hospital and patient information handling. Examines the problems of patient information flow within the health care system. Introduces conventional and proposed patient and hospital information systems.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BMES 335 [Min Grade: D]

**BMES 337 Introduction to Physiological Control Systems 3.0 Credits**

Introduces the basic concepts of control theory as it is applied to biomedical systems including electrical, mechanical, physiological and cellular systems.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (MATH 210 [Min Grade: D] or ENGR 232 [Min Grade: D] or MATH 262 [Min Grade: D]) and (BMES 432 [Min Grade: D] or ECES 302 [Min Grade: D]) and BMES 375 [Min Grade: D] and BIO 201 [Min Grade: D] and BMES 451 [Min Grade: D] and (BMES 238 [Min Grade: D] or MEM 238 [Min Grade: D])

**BMES 338 Biomedical Ethics and Law 3.0 Credits**

Introduces the wide spectrum of ethical, regulatory, and legal issues facing health care practitioners and health-related research workers. Helps students become aware of the ethical and legal issues involved in their work. Helps students understand how legal and ethical decisions should be made in health-related matters, as well as what sources of help and guidance are available.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**BMES 340 Health Care Administration 3.0 Credits**

This course provides students with an analysis of health care administration process, including: planning, organizing, designing, decision-making, leading, and controlling. Presents methods and techniques that can contribute to the effective performance of administrative duties.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**BMES 341 Modeling in Biomedical Design II 2.0 Credits**

This course is part 2 in a 2 part series meant to instruct students on how to leverage year appropriate skills while designing solutions to biomedical problems. Students will: a) develop mathematical model(s) to solve a biomedical problem(s), b) write software to simulate these solution(s), c) fabricate a solution based on simulation specifications, d) verify design solution according to identified engineering standards, f) review test results and propose further refinement (written document and oral presentation).

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BMES 241 [Min Grade: D] and (MATH 210 [Min Grade: D] or ENGR 232 [Min Grade: D] or MATH 262 [Min Grade: D]) and (BMES 238 [Min Grade: D] or MEM 238 [Min Grade: D]) and ECE 201 [Min Grade: D] and ENGR 220 [Min Grade: D] and BMES 202 [Min Grade: D]

**BMES 345 Mechanics of Biological Systems 3.0 Credits**

This course introduces the fundamentals of mechanics of deformable bodies relevant to biological tissues and biomaterials. Major topics include stress and strain, mechanical properties of biological tissues and biomaterials, axial loading, torsion, bending, and viscoelasticity. These concepts will be applied to biological examples such as long bones, the heart, blood vessels, and orthopaedic implants.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** MEM 202 [Min Grade: D] and BIO 201 [Min Grade: D] and ENGR 220 [Min Grade: D]

**BMES 350 Med & Bio Effects Of Light 3.0 Credits**

Examines the role of environmental lighting in human physiological and psychological processes. Topics include vitamin D synthesis and calcium regulation; light effects on bilirubin in newborns; photoactivation and DNA in skin; effects of nonionizing radiation on the immune systems; environmental lighting and human vision; light effects on biological rhythms and sleep; photosensitivity diseases related to interior lighting; the therapeutic uses of light; and light and the aging eye.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 203 [Min Grade: D] or BMES 235 [Min Grade: D]

**BMES 363 Robotics in Medicine I 3.0 Credits**

This course provides an introduction to the use of haptics (the use of somatosensory information) in the design of robotic devices in surgery. Topics covered include actuators, sensors, nonportable feedback, portable force feedback, tactile feedback interfaces, haptic sensing and control systems.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** MEM 238 [Min Grade: D]

**BMES 365 Robotics in Medicine II 3.0 Credits**

This course covers the use of robots in surgery and included aspects of safety, robot kinematics, analysis of surgical performance using robotic devices, inverse kinematics, velocity analysis and acceleration analysis. Various types of surgeries in which robotic devices are or could be used are presented on a case study basis.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BMES 363 [Min Grade: D]

**BMES 372 Biosimulation 3.0 Credits**

This course provides the foundation for the mathematical analysis of biomedical engineering systems. It focuses on the essential mathematical methods necessary for further development of modeling and simulation skills in other courses (materials, mechanics, fluids/transport, signals/control system, etc). The course applies calculus, differential equations and linear algebra to developing analytical techniques for biomedical applications.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 201 [Min Grade: D] and (ENGR 232 [Min Grade: D] or MATH 262 [Min Grade: D] or MATH 210 [Min Grade: D]) and BMES 202 [Min Grade: D]

**BMES 375 Computational Bioengineering 4.0 Credits**

This course introduces undergraduate students to the mathematical and computational analysis of biological systems. The systems analyzed include the genome, protein and gene networks, cell division cycles, and cellular level disease. Mathematical tools include matrix algebra, differential equations, cellular automata, cluster analysis, etc.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 201 [Min Grade: D] and BMES 202 [Min Grade: D] and (MATH 210 [Min Grade: D] or ENGR 232 [Min Grade: D] or MATH 262 [Min Grade: D])

**BMES 381 Junior Design Seminar I 2.0 Credits**

This is the first course in a two-course sequence intended to present the basics of engineering design, project management, product development and translational research. This first course focuses on engineering design and product development. A case-study approach is used to illustrate best practices and common mistakes in engineering design.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Pre-Junior or Sophomore

**BMES 382 Junior Design Seminar II 2.0 Credits**

This is the second course in a two-course sequence intended to present the basics of engineering design, project management, product development and translational research. This second course focuses on project management and quality control. A case-study approach is used to illustrate best practices and common mistakes in management and evaluation of engineering projects.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Pre-Junior or Sophomore

**Prerequisites:** BMES 381 [Min Grade: D]

**BMES 391 Biomedical Instrumentation I 3.0 Credits**

This course introduces the student to the medical instrumentation and provides background on the physical, chemical, electronic and computational fundamentals by which medical instrumentation operates. It is an analytical course exploring the design, operation, safety aspects and calibration of primary electronic instruments.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECE 201 [Min Grade: D] and (ENGR 210 [Min Grade: D] or CHEM 253 [Min Grade: D]) and (ENGR 232 [Min Grade: D] or MATH 210 [Min Grade: D] or MATH 262 [Min Grade: D]) and BIO 201 [Min Grade: D]

**BMES 392 Biomedical Instrumentation II 3.0 Credits**

Continues BMES 391. Explores the operation, safety aspects, and calibration of primarily optical and acoustical instruments, as well as those involving ionizing radiation. Also examines instrumentation primarily intended for particular departments and areas, such as anesthesia and infusion.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**Prerequisites:** BMES 391 [Min Grade: D]

**BMES 401 Biosensors I 4.0 Credits**

Introduces the general topic of microsensors, discusses basic sensing mechanisms for microsensors, and presents various types of conductometric, acoustic, silicon, and optical microsensors. Uses two case studies that include an acoustic immunosensor and silicon glucose sensor to provide students with in-depth knowledge and hands-on experience. Provides additional experience through three laboratory sessions that support the lectures and familiarize students with practical aspects of microsensors. Also discusses applications of microsensors in the medical, chemical, pharmaceutical, environmental, aeronautical, and automotive industries.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**Prerequisites:** (CHEM 253 [Min Grade: D] or ENGR 210 [Min Grade: D]) and ECE 201 [Min Grade: D] and (ENGR 232 [Min Grade: D] or MATH 262 [Min Grade: D] or MATH 210 [Min Grade: D])

**BMES 402 Biosensors II 4.0 Credits**

Investigates modern biosensor design methods and addresses the challenges associated with fabrication technologies and instrumentation techniques. Topics include theory and modeling of biosensors, biosensor fabrication steps, and electronic and clinical testing methods. Discusses local and distant sensor data acquisition techniques. Students will design, fabricate and test a biosensor. Essential stages of biosensor manufacturing processes will be outlined. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**Prerequisites:** BMES 401 [Min Grade: D] (Can be taken Concurrently)

**BMES 403 Biosensors III 4.0 Credits**

Covers recent advances in biosensor technology and applications, business aspects, and technology transfer issues. Topics include new sensing mechanisms, new technologies, new biomedical applications, the starting of small sensor companies, and the introduction of new sensor technologies into industrial settings. Requires students to develop a technical proposal in the area of biosensors and to review proposals written by their peers. Presentations by regular faculty and industrial and government researchers form an integral part of the course.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**Prerequisites:** BMES 402 [Min Grade: D]

**BMES 405 Physiological Control Systems 3.0 Credits**

Introduces the basic concepts of feedback and feed forward controls systems, including characterizations in terms of prescribed constraints, study of input and output relationships for various types of physiological systems, and stability and time-delay problems. Covers mathematical models of physiological systems, with emphasis on non-linear and adaptive systems study.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 201 [Min Grade: D] and BMES 202 [Min Grade: D] and (BMES 337 [Min Grade: D] or ECES 356 [Min Grade: D])

**BMES 409 Entrepreneurship for BMES 3.0 Credits**

This course serves as the foundation course in entrepreneurship and is designed to provide students with a complete working knowledge of the modern entrepreneurial and business planning process.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**BMES 411 Chronoengineering I: Biological Rhythms in Health and Performance 3.0 Credits**

Introduces students to the concepts of biological, and especially circadian, rhythmicity. Advances students' knowledge of biological time-keeping and adaptive functions of biological clocks. Topics include biochemical and physiological models of biological clocks, adjustment to environmental cycles, rhythms in behavior and physiological functions, sleep-wake cyclicity, adaptability of circadian systems, and influences of rhythms on human physiology and behavior. Designed to give students a thorough understanding of the role rhythms play in animal and human behavior, physiology, and medicine.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**Prerequisites:** BIO 201 [Min Grade: D]

**BMES 412 Chronoengineering II: Sleep Functions in Health and Performance 3.0 Credits**

Continues BMES 411. Enhances students' education in the concepts of biological, and especially circadian, rhythmicity. Focuses on sleep patterns, rhythms, evolution, neurology, psychology, and overall function.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**Prerequisites:** BMES 411 [Min Grade: D]

**BMES 421 Biomedical Imaging Systems I: Images 4.0 Credits**

Provides an overview of the field of medical imaging. Covers aspects of light imaging; systems theory, convolutions, and transforms; photometry, lenses, and depth of field; image perception and roc theory; three-dimensional imaging; image acquisition and display; and image processing operations, including scanning and segmentation.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** (ECES 302 [Min Grade: D] or ECES 303 [Min Grade: D] or BMES 432 [Min Grade: D]) and PHYS 201 [Min Grade: D] and (MATH 311 [Min Grade: D] or BMES 310 [Min Grade: D])

**BMES 422 Biomedical Imaging Systems II: Ultrasound 4.0 Credits**

Intended for students who would like to gain an adequate understanding of diagnostic ultrasound imaging principles and become familiar with developments in this rapidly expanding field. Introduces medical visualization techniques based on ultrasound propagation in biological tissues. Topics include generation and reception of ultrasound, imaging techniques (A-mode, B-mode, M-mode, and Doppler), typical and emerging diagnostic applications, elements of ultrasound dosimetry, and safety aspects from the clinical point of view.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** BMES 421 [Min Grade: D]

**BMES 423 Biomedical Imaging Systems III 4.0 Credits**

Covers volumetric and functional imaging systems. Discusses the principles and algorithms of projection tomography, XCAT, SPECT, PET; the principles of MRI: Bloch equation, slice selection, K-space scanning, volumetric MRI; biochemical imaging; chemical equilibrium equations and Scatchard plots, specific and nonspecific labeling; autoradiography; and flow and dynamical systems: Doppler, mass transport, and phase (MRI) measurement of flow.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** BMES 422 [Min Grade: D]

**BMES 430 Neural Aspects of Posture and Locomotion 3.0 Credits**

Students will study the physiology of sensory/motor systems, with emphasis on modeling of neural systems and biomechanical aspects of functional tasks. Combines information on basic nerve cell activities, synaptic communication and structure/function relationships of skeletal muscle with basic mechanics to study spinal, vestibular and ocular reflexes. Culminates with the study of the control of motor systems with respect to bipedal motion.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 201 [Min Grade: D] and BMES 202 [Min Grade: D] and MEM 202 [Min Grade: D]

**BMES 432 Biomedical Systems and Signals 3.0 Credits**

Introduces various aspects of biomedical signals, systems, and signal processing. Covers topics in the origin and acquisition of biomedical signals; discrete-time signals and linear systems; frequency analysis of discrete-time signals, spectral estimation, data records and digital filters; and compression of biomedical signals through time-domain and frequency-domain coding.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Pre-Junior or Sophomore

**Prerequisites:** MATH 210 [Min Grade: D] or ENGR 232 [Min Grade: D] or MATH 262 [Min Grade: D]

**BMES 440 Introduction to Biodynamics 3.0 Credits**

The objective of the course is to prepare students for biomechanical modeling, modeling methods, formulation of equations of motion and methods of determination of strength will be applied to human body dynamics. Particular emphasis is placed on the use of Rigid Body and Multi-Body Dynamics.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 201 [Min Grade: D] and (MEM 238 [Min Grade: D] or BMES 238 [Min Grade: D]) and (MATH 210 [Min Grade: D] or ENGR 232 [Min Grade: D] or MATH 262 [Min Grade: D])

**BMES 441 Biomechanics I: Introduction to Biomechanics 4.0 Credits**

Teaches students to use mechanical tools to get an introductory appreciation for solving biomechanical problems. Models human performance by using static, quasi-static, and dynamic approaches. Assesses overall loading of the musculoskeletal system during functional activities. Demonstrates introductory methods of estimation of forces in the joints and muscles and evaluates the endurance of the human tissues under traumatic loading conditions. Builds on existing knowledge in mechanics to illustrate the practical application of mechanical tools in the determination of human systems performance.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** (MEM 230 [Min Grade: D] or BMES 345 [Min Grade: D]) and (MEM 238 [Min Grade: D] or BMES 238 [Min Grade: D]) and BIO 201 [Min Grade: D]

**BMES 442 Biomechanics II: Musculoskeletal Modeling and Human Performance 4.0 Credits**

Teaches students to think biomechanically. Reviews and categorizes the various functional components (tissues) of the musculoskeletal system. Considers constraints of the joints and action of the soft and hard tissues, along with corresponding models. Computes joint and muscle forces. Discusses some aspect of postural stability of the whole musculoskeletal structure and reviews various methods of task performance.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** BMES 441 [Min Grade: D]

**BMES 443 Biomechanics III: Mechanics of Biological Tissues, Implant Technology and Prosthetics 4.0 Credits**

Provides more advanced knowledge of mechanics of materials and offers a general description of mechanical behavior of the variety of the soft and hard tissues of the human body. Considers some prosthetic replacements of tissues as well as entire bone, joint, soft tissue, and system prosthetics. Reviews some specific orthopedic appliances and covers limb prosthetics if time permits. Students plan design projects.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** BMES 442 [Min Grade: D]

**BMES 444 Biofluid Mechanics 3.0 Credits**

This course introduces flow-related anatomy and pathophysiology, and biomedical flow devices and their design challenges. Analysis methods to solve biological fluid mechanics design problems will be introduced and several interdisciplinary team projects will be assigned to apply fluid mechanics to practical biological or medical problems.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BMES 451 [Min Grade: D] and BIO 201 [Min Grade: D]

**BMES 451 Transport Phenomena in Living Systems 4.0 Credits**

Introduces students to applications of chemical engineering concepts in biological systems. Shows that chemical engineering approaches to problem solving are ideally suited to investigation of biology. Approaches include material and energy balances, transport phenomena, and kinetics.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Pre-Junior or Sophomore

**Prerequisites:** BIO 201 [Min Grade: D] and (CHEM 253 [Min Grade: D] or ENGR 210 [Min Grade: D]) and (ENGR 232 [Min Grade: D] or MATH 262 [Min Grade: D] or MATH 210 [Min Grade: D])

**BMES 452 Transport Phenomena in Living Systems II 3.0 Credits**

Continues BMES 451. Advances students' understanding of the engineering principles of membrane transport and its consequences at the subcellular (mitochondria), cellular (neuron), and organ (kidney) level. Introduces concepts associated with pharmacokinetics. Provides students with a kinetic approach to analysis of receptors, including the kinetics of ligand-receptor binding, rate constants, and signal transduction.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Pre-Junior or Sophomore

**Prerequisites:** BMES 451 [Min Grade: D]

**BMES 460 Biomaterials I 4.0 Credits**

First course in a three-quarter sequence designed to acquaint students with the behavior of materials used in biomedical application under load (i.e., mechanical properties), their modes of failure and as a function of their environment. This course provides students with the fundamentals needed to proceed with Biomaterials II.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** (MEM 230 [Min Grade: D] or BMES 345 [Min Grade: D]) or (MATE 221 [Min Grade: D] and MATE 370 [Min Grade: D]) and CHEM 241 [Min Grade: D]

**BMES 461 Biomaterials II 4.0 Credits**

Second course in a three-quarter sequence in biomaterials. The goal of this course is with an understanding of, and ability to select, appropriate materials for specific applications taking into account mechanical, thermal, and rheological properties taught in Biomaterials I and combining them with the biocompatibility issues covered in the present course.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** BMES 460 [Min Grade: D]

**BMES 466 Robotics in Medicine III 3.0 Credits**

This course covers topics in the design of medical robotic systems, including force and movement analysis for robotic arms, dynamics, computer vision and vision-based control. Thus use of haptics, vision systems and robot dynamics are examined in a cohesive framework.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BMES 365 [Min Grade: D]

**BMES 471 Cellular and Molecular Foundations of Tissue Engineering 4.0 Credits**

Course is designed to familiarize students with the advanced concepts of cellular and molecular biology and physiology relevant to tissue engineering. The initial part of a two-quarter sequence combining material from cellular/molecular biology, evolutionary/developmental biology with engineering design and biomaterials to educate students in the principles, methods, and technology of tissue engineering.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** BIO 218 [Min Grade: D] and BIO 219 [Min Grade: D] and (MEM 230 [Min Grade: D] or BMES 345 [Min Grade: D])

**BMES 472 Developmental and Evolutionary Foundations of Tissue Engineering 4.0 Credits**

Familiarizes students with advanced concepts of developmental and evolutionary biology relevant to tissue engineering. This second part of the two-quarter sequence combines material from cellular/molecular biology and evolutionary design and biomaterials to educate students in the principles, methods, and technology of tissue engineering.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** BMES 471 [Min Grade: D]

**BMES 475 Biomaterials and Tissue Engineering III 4.0 Credits**

This course provides students with in-depth knowledge of factor-mediated tissue engineering and regenerative medicine. Students learn about fundamental repair and regenerative processes and gain an understanding of specific biomaterials being used to mimic and/or enhance such processes. Students also learn about the delivery methods of agents which promote the proper functional development of specialized tissues.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** BMES 461 [Min Grade: D] and BMES 472 [Min Grade: D]

**BMES 477 Neuroengineering I: Neural Signals 3.0 Credits**

Introduces the theory of neural signaling. Students will learn the fundamental theory of cellular potentials and chemical signaling, the Hodgkin Huxley description of action potential generation, circuit representations of neurons and be able to derive and integrate equations describing the circuit as well as design computer models.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** (BMES 337 [Min Grade: D] or ECES 356 [Min Grade: D]) and BIO 201 [Min Grade: D] and (BIO 462 [Min Grade: D] or BMES 430 [Min Grade: D] or BIO 348 [Min Grade: D])

**BMES 478 Neuroengineering II: Principles of Neuroengineering 3.0 Credits**

This course investigates cutting edge technologies in neuroengineering in a seminar-style format with faculty from the School of Biomedical Engineering and College of Medicine. Three modules cover topics, which vary from year to year. Students are expected to submit written and oral presentations covering each topic.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** BMES 477 [Min Grade: D]

**BMES 483 Quantitative Systems Biology 4.0 Credits**

This course uses a data-driven systems engineering approach to provide a foundation in systems biology. Topics covered include the organization of robust networks of genes and proteins; intercellular communication; and cells as basic units of life.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** (TDEC 222 [Min Grade: D] or ENGR 232 [Min Grade: D]) and (BIO 203 [Min Grade: D] or BMES 235 [Min Grade: D]) and (BMES 202 [Min Grade: D] or ENGR 202 [Min Grade: D]) and BMES 372 [Min Grade: D] and BMES 375 [Min Grade: D] and CS 172 [Min Grade: D]

**BMES 484 Genome Information Engineering 4.0 Credits**

This course is designed to provide students with hands-on experience in the application of genomic, proteomic, and other large-scale information to biomedical engineering. The underlying goal is to develop an understanding of high-throughput technologies, biological challenges, and key mathematical and computational methods relevant to biomedical engineering.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** BMES 375 [Min Grade: D] and BIO 218 [Min Grade: D]

**BMES 488 Medical Device Development 3.0 Credits**

Medical device product development must take into account a diverse set of disciplines to achieve a safe and successful product. This course exposes the student to several of these disciplines with the objective of raising the student's awareness of safety throughout the product development life cycle. Students will learn to appreciate the complex engineering decisions that support development of a safe medical device through an examination of risk management, regulatory processes, human factors and clinical studies.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**BMES 491 [WI] Senior Design Project I 3.0 Credits**

This is the first course in a three-quarter capstone design experience for senior biomedical engineering students.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**BMES 492 Senior Design Project II 2.0 Credits**

Continues senior design activities begun in BMES 492.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**BMES 493 Senior Design Project III 3.0 Credits**

Continues the design project begun in BMES 491 and continued through BMES 492.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**BMES 494 Clinical Practicum I 3.0 Credits**

This course provides biomedical engineering students with an extensive exposure to live clinical cardiology procedures, including cardiac catheterization, electrophysiology, echocardiography and nuclear stress testing. Emphasis is placed on identifying important interfaces between engineering and clinical medicine, particularly in areas where clinical needs may be addressed by advances in biomedical engineering.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is BME.

**BMES 495 Clinical Practicum II 3.0 Credits**

This course provides biomedical engineering students with an extensive exposure to live operations in an emergency department and intensive care unit. The students are expected to analyze specific operations within these environments and develop a solution to a process problem within one of these environments. System analysis, design and evaluation are emphasized.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is BME.

**BMES 496 Clinical Practicum III 3.0 Credits**

This course provides biomedical engineering students with an opportunity to observe basic operative and postoperative procedures with the idea of both learning about such procedures and identifying the role of biomedical engineering in these clinical settings.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is BME.

**BMES I199 Independent Study in BMES 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Can be repeated multiple times for credit

**BMES I299 Independent Study in BMES 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Can be repeated multiple times for credit

**BMES I399 Independent Study in BMES 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Can be repeated multiple times for credit

**BMES I499 Independent Study in BMES 0.5-6.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Can be repeated multiple times for credit

**BMES T180 Special Topics in BMES 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Can be repeated multiple times for credit

**BMES T280 Special Topics in BMES 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Can be repeated multiple times for credit

**BMES T380 Special Topics in BMES 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Can be repeated multiple times for credit

**BMES T480 Special Topics in BMES 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** School of Biomedical Engineering, Science Health Systems

**Repeat Status:** Can be repeated multiple times for credit

## Biomedical Engineering Tech

### Courses

**BET 301 Healthcare Technology 3.0 Credits**

An overview of medical equipment used in hospitals and other medical environments to diagnose and treat patients. Sensors and physiological signals will be explained. Equipment found in various hospital departments and medical specialties will also be discussed. Patient safety and regulations will be emphasized.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EET 201 [Min Grade: D] and EET 202 [Min Grade: D]

**BET 302 Biomedical Electronics 4.0 Credits**

This course is an introduction to the fundamentals of analog electronics with an emphasis on biomedical applications. Students will be introduced to solid state devices including diodes, transistors, operational amplifiers, oscillators, and mixers and their use in power supplies, amplifiers and active filters.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EET 201 [Min Grade: D] and EET 202 [Min Grade: D]

**BET 303 Medical Imaging Systems 3.0 Credits**

The fundamentals of medical imaging equipment will be explored. The principles of x-ray, computed tomography, ultrasonic, and magnetic resonance imaging systems will be discussed. Focus will be on principles of operation, applications, safety, and quality.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BET 301 [Min Grade: D]

**BET 305 Clinical Laboratory Equipment 3.0 Credits**

Clinical laboratory instrumentation and automation is described with emphasis on the demands of clinicians for diagnostic information. Special attention is given to reliability, ease of training, and cost effectiveness.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EET 201 [Min Grade: D] and EET 202 [Min Grade: D] and BET 301 [Min Grade: D]

**BET 307 Applied Biomedical Instrumentation 3.0 Credits**

The course introduces students to the engineering design process and provides design experience through hands-on design and implementation of biomedical instruments. Using a generalized step-by-step approach that consists of (1) understanding the physiological sources, (2) selecting appropriate transducers, (3) designing analog processing electronics, and (4) implementing digital signal processing, student will gain extensible knowledge and skills to design and implement various biomedical instruments.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EET 201 [Min Grade: D] and EET 202 [Min Grade: D] and BET 301 [Min Grade: D] and BMES 391 [Min Grade: D]

**BET I199 Independent Study in BET 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**BET I299 Independent Study in BET 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**BET I399 Independent Study in BET 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**BET I499 Independent Study in BET 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**BET T180 Special Topics in BET 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**BET T280 Special Topics in BET 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**BET T380 Special Topics in BET 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**BET T480 Special Topics in BET 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

# Bioscience & Biotechnology

## Courses

**BIO 100 Applied Cells, Genetics & Physiology 3.0 Credits**

This course is designed to provide a topical and interactive introduction to biology for non-majors. Students will learn how trillions of tiny cells of our bodies work together in organ systems to use food for energy, to keep us alive, moving and healthy, and how information passes to subsequent generations. This course is identical to BIO 107.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is BIO

**Corequisite:** EXAM 080

**BIO 101 Applied Biological Diversity, Ecology & Evolution 3.0 Credits**

An interactive course for the non-major that discusses the variety of living things and how we ended up with them and what makes them unique.

This course also explores how living things affect each other and the world as well as the impacts that humans have on the living world. This course is identical to BIO 109.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is BIO

**Corequisite:** EXAM 080

**BIO 107 Cells, Genetics & Physiology 3.0 Credits**

This course is designed to provide a topical and interactive introduction to biology for non-majors. Students will learn how trillions of tiny cells of our bodies work together in organ systems to use food for energy, to keep us alive, moving and healthy, and how information passes to subsequent generations. This course is identical to BIO 100.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is BIO

**Corequisites:** BIO 108, EXAM 080

**BIO 108 Cells, Genetics and Physiology Laboratory 1.0 Credit**

This course is designed to be a companion course to the BIO 107 lecture. Labs are focused on providing students with a hands-on approach to science. Topics include how cells generate energy from food, how certain characteristics are genetically encoded and the physiology of human systems and diseases.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is BIO

**Corequisite:** BIO 107

**BIO 109 Biological Diversity, Ecology & Evolution 3.0 Credits**

An interactive course for the non-major that discusses the variety of living things and how we ended up with them and what makes them unique.

This course also explores how living things affect each other and the world as well as the impacts that humans have on the living world. This course is identical to BIO 101.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is BIO

**Corequisites:** BIO 110, EXAM 080

**BIO 110 Biological Diversity, Ecology and Evolution Laboratory 1.0 Credit**

A companion course to BIO 109 that provides a hands on exploration of the diversity of life including microbes, plants and animals as well as the processes that give rise to this diversity. The labs also provide practical exploration of the impacts of human beings on the planet.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is BIO

**Corequisite:** BIO 109

**BIO 112 Biotechnology for Society 3.0 Credits**

In Biotechnology for Society, students will become familiar with the fundamentals of genomic and cellular-based biotechnologies to begin to understand the roles that biotechnology is currently playing and is poised to play in society. Students will appreciate the complexity of those roles by investigating both the intended consequences and the potential and inadvertent ethical, legal and social implications of these technologies. This course is intended for non-science majors.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is BIO or major is BME or major is CHEM or major is ENVS or major is HSCI

**BIO 114 Climate Change and Human Health 3.0 Credits**

This inquiry based open enrollment course is designed to provide a topical and interactive exposure to the human health hazards associated with global climate change. Despite the burden of evidence of global climate change, it is not uncommon for the members of the general public to express apathy because the consequences seem so far removed in distance and time. The goal of this course is to bring climate change closer to home through a discussion of the imminent threat posed to human health.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**BIO 116 How Your Body Works-Or Not 3.0 Credits**

How Your body Works-or Not is geared for non-major students hoping to explore the workings of their bodies. Students will explore why we evolved to have various organ systems, and how some systems accomplish their roles. We will explore how these systems can malfunction or fail, resulting in disease.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is BIO or major is BME or major is CHEM or major is ENVS or major is HSCI

**BIO 118 Basics of Cancer 3.0 Credits**

This course provides an opportunity for students with little or no biology background to learn about cancer. Students can expect to learn what cancer is from a biological perspective, and how it is caused and treated. Students will also gain a basic understanding of how tumors form, and metastasize.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is BIO or major is BME

**BIO 120 Phage Phinder's Research 1.0 Credit**

This supplemental discovery based lab course has been designed to discover and analyze new bacteriophage viruses. Students will isolate unique bacteriophages, annotate the genes of selected bacteriophage genomes, and develop independent projects using hypothesis driven experimental planning.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**BIO 122 Cells and Genetics 4.5 Credits**

An introduction to the concepts of cell and function, cell and reproduction, cell communication, genetic inheritance, and population genetics. The relevance of genetics to society and ethical issues are included.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Corequisite:** EXAM 080

**BIO 124 Evolution & Organismal Diversity 4.5 Credits**

Students will learn about the theory of evolution and the mechanisms of how organisms change. Using this knowledge, students will explore the diversity of organisms on Earth that is a hallmark of biology and the result of evolution by examining the representative members from the five major kingdoms of life. This course has a lecture, lab and recitation component.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Corequisite:** EXAM 080

**BIO 126 Physiology and Ecology 4.5 Credits**

The first half of the course will survey physiological systems, including the respiratory, circulatory, homeostatic, excretory, and digestive systems in animals. The second half of the course will emphasize the relationships between organisms and the environment, including how humans impact ecosystems and the biosphere. This course has a lecture, lab and recitation component.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Corequisite:** EXAM 080

**BIO 128 Bacteriophage Discovery Laboratory 2.0 Credits**

In this course, students will design and perform independent research projects in order to learn more about bacteriophages. Students can work independently or in groups to develop a research question and hypothesis, and to perform either wet-lab experiments or bioinformatics analysis to draw conclusions about a novel aspect of bacteriophage biology. At the end of this course, students will present their results in the form of a poster presentation.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 124 [Min Grade: D]

**BIO 141 Essential Biology 4.5 Credits**

Introduces essential biological concepts to engineering students. Content covers five core topics: cells, genetics, evolution, ecology and physiology with application to societal concerns about biotechnology, health, conservation biodiversity and bioethics. Evolution will be woven throughout the course as a unifying theme in understanding all aspects of biology.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is CS

**Prerequisites:** CHEM 101 [Min Grade: D]

**Corequisite:** EXAM 080

**BIO 161 General Biology I 3.0 Credits**

Covers structure and function of the cell and the organ-system plan of organization of the human body.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is BIO or classification is Freshman

**BIO 162 General Biology II 3.0 Credits**

Continues BIO 161. Covers the mechanics of heredity, including growth, differentiation, and development. Winter.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 161 [Min Grade: D]

**BIO 163 General Biology III 3.0 Credits**

Continues BIO 162. Covers the plant and animal kingdoms, radiobiology, evolution, and ecology. Spring.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 162 [Min Grade: D]

**BIO 164 General Biology Laboratory I 1.0 Credit**

In this course students will perform computer simulations of laboratory exercises related to photosynthesis, enzyme activity and kinetics, the cardiovascular, muscle and bone systems, regulation of human organ systems as well as plant growth and development.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Corequisite:** BIO 161

**BIO 165 General Biology Laboratory II 1.0 Credit**

In this course students will perform computer simulations of laboratory exercises related to cell division, mendelian genetics, DNA replication, translation and mutations. They will work with simulated microscopes to observe viral and microbial specimens. Additionally, students will learn and simulate biotechnology techniques such as DNA fingerprinting.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 161 [Min Grade: D]

**Corequisite:** BIO 162

**BIO 166 General Biology Laboratory III 1.0 Credit**

Involves experiments demonstrating the key principles in ecology and evolution including: population parameters, food webs, species interactions, succession, eutrophication, natural selection, sexual selection and evolutionary trees.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 162 [Min Grade: D]

**Corequisite:** BIO 163

**BIO 177 Mentorship in STEM 0-1 Credits**

This course is designed to develop and enhance student mentorship and leadership skills, emphasizing communication among undergraduate peers in STEM disciplines. The course will focus on the mentor-mentee relationship, professionalism, respect for diversity, and mentorship skill development.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**BIO 200 Connections in Biology 3.0 Credits**

Connections in Biology is an open enrollment course which will give students the opportunity to make exactly that: connections. Building upon a new theme in biology each week, students will connect that material to their current Philadelphia community as well as to their future professional and personal pursuits. The course is designed on the Community Based Learning platform (CBL) and is scheduled to meet twice a week: one meeting will be a formal lecture on campus and one meeting will be at a partnered middle school with the instructor and Drexel students leading an 9 week after school science club. Students will gain volunteer hours, get an introduction to civic engagement, benefit from community based learning practices and connect their Drexel course material to the bigger picture in their lives.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**BIO 201 Human Physiology I 4.0 Credits**

Intensive survey of the basic physiological mechanisms of cellular and human electrophysiology and the physiology of the muscular, cardiovascular, respiratory, renal, and gastrointestinal systems.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 141 [Min Grade: D] or BIO 122 [Min Grade: D]

**BIO 202 Human Physiology Laboratory 2.0 Credits**

Laboratory course in human physiology. Designed to accompany BIO 201 and 203 Human Physiology I and II. Uses simulation, experimenters and data acquisition techniques to provide practical experience in the design and execution of physiological experiments and analysis of physiological data. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 201 [Min Grade: D] (Can be taken Concurrently)

**BIO 203 Human Physiology II 4.0 Credits**

Intensive survey of the control mechanisms of cellular and human physiology including introductions to control theory, neurophysiology, endocrine control, and control mechanisms in locomotion, cardiovascular, respiratory, renal, acid/base, gastrointestinal, and reproductive physiology.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 201 [Min Grade: D]

**BIO 204 The Privilege of Aging 3.0 Credits**

The Privilege of Aging is a Hybrid Community-Based Course that is open to students that have completed BIO 122. Aging is often thought of as a negative process, however there are important benefits that are largely uncelebrated. Students in this course will explore the privilege of aging and ways to do it well with senior members of the Philadelphia community. There will be 2 class meetings each week, one on campus and one at a designated senior citizen facility. In addition to the academic underpinnings of the biology of aging, the course will provide the students with intergenerational interactions, as well as opportunities to connect the experience with their academic path at Drexel and their future professional plans.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 122 [Min Grade: D]

**BIO 205 Mobilizing the Scientific Method 3.0 Credits**

The main intent of this STEM Connections Course is for Drexel students and the Robeson students with whom we will be partnering to experience the Scientific Method. Both sets of students, Drexel and high school partners, will be instructed with active learning pedagogical methodologies to enhance student understanding. Students in both cohorts will learn to apply the scientific method to questions about plants. This course is a Community-Based Learning Course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** BIO 100 [Min Grade: D] or BIO 101 [Min Grade: D] or BIO 107 [Min Grade: D] or BIO 108 [Min Grade: D] or BIO 122 [Min Grade: D] or BIO 141 [Min Grade: D]

**BIO 207 Applications in Biology I 1.0 Credit**

The aim of this course is to allow students to apply knowledge from biology courses to understand important articles from the frontiers of biology research, in order to develop critical thinking and problem solving skills. Students will learn to read primary research, to think critically about research and interpret data.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 122 [Min Grade: D]

**BIO 208 Applications in Biology II 1.0 Credit**

In this course, students will further develop and practice skills introduced in the Applications in Biology I course by reading and interpreting research from primary articles. This will include historical experiments and controversial research. This will help students develop critical thinking, scientific reasoning and problem solving skills.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 207 [Min Grade: D]

**BIO 209 Cell, Molecular & Developmental Biology I 4.0 Credits**

In this course, students will cover essential topics in cell, molecular, and developmental biology. Topics, such as protein structure function relationships, enzymes, structural & functional properties of nucleic acids, transcription & translation, regulation of gene expression, eukaryotic cell structure, cell membranes and membrane transport. Commonly used techniques in biochemistry, molecular & cellular biology will be discussed.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 122 [Min Grade: D]

**BIO 211 Cell, Molecular & Developmental Biology II 4.0 Credits**

In this course, students will learn about molecular, cellular and developmental biology at a higher level than in introductory coursework. This second course in the sequence will focus on cell biological processes such as: vesicular trafficking, signaling, cytoskeletal dynamics, cell cycle, cell death, tissue organization, stem cells and development. At the end of this course, students should have a strong foundation in cell and developmental biology.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 209 [Min Grade: D]

**BIO 212 Biotechnology 3.0 Credits**

Covers the use of recombinant DNA techniques in biotechnology.

Explores the many uses of biotechnology in the biological, agricultural and medical field. Also covers the social, ethical and environmental issues involved in this discipline.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 122 [Min Grade: D]

**BIO 213 Drosophila Neural Research 3.0 Credits**

In this course, you will be introduced to the basics of performing directed research in Drosophila genetics and neurobiology. This research will be informed by its relevance to disease. You will be working on one of a variety of diseases that is related to neurodevelopmental and/or neurodegenerative diseases. Diseases include (but are not limited to) CHARGE syndrome, Alzheimer's disease, Pitt-Hopkins disease, and schizophrenia. In this course, you will be testing for potential genetic modifiers and/or drugs that modify disease phenotypes associated with an established models of these diseases.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Freshman or Sophomore .

**Prerequisites:** BIO 122 [Min Grade: D]

**BIO 214 Principles of Cell Biology 4.0 Credits**

The course familiarizes students with the basic fundamentals and principles of cell biology. Topics include protein and enzymes as metabolic facilitators, the source and function of cellular energy, cell structure and function, cellular protein transport, cell communication, cell cycle control, apoptosis, and cell differentiation.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is BIO

**Prerequisites:** BIO 122 [Min Grade: D] or BIO 141 [Min Grade: D] or BIO 100 [Min Grade: D] or BIO 107 [Min Grade: D]

**BIO 215 Techniques in Cell Biology 3.0 Credits**

A course designed to introduce students to the lab techniques used by cell biologists. The lab is project-based focusing on various assays to assess cell viability/survival and fluorescence microscopy is used for cell structure and their organelles, apoptosis, cytoskeletal structure, muscle contraction and cell motility. Other topics include protein separation and quantification, and gel electrophoresis. Analytical thinking and data analysis are emphasized to help foster the development of a project built on multiple experiments. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** or BIO 122 [Min Grade: D] or BIO 141 [Min Grade: D]

**BIO 218 Principles of Molecular Biology 4.0 Credits**

The course is designed to familiarize students with the details and concepts revolving around molecular biology's "central dogma." Specifically the chemical nature of DNA and RNA, the molecular structure of DNA and chromosomes, the definition of a gene, how DNA is replicated, and how genes are expressed and regulated.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is BIO

**Prerequisites:** BIO 122 [Min Grade: D] or BIO 141 [Min Grade: D]

**BIO 219 [WI] Techniques in Molecular Biology 3.0 Credits**

Designed to familiarize student with laboratory techniques utilized in molecular biology, specifically DNA isolation, characterization, and manipulation. Students work in teams to collect and analyze data and explain results in laboratory reports. Weekly recitations preview and review theory and techniques used in the lab. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 122 [Min Grade: D] or BIO 141 [Min Grade: D]

**BIO 220 Essential Microbiology 3.0 Credits**

Covers morphological, physiological, and biochemical characteristics of bacteria, fungi, algae, and protozoa, and viruses. Introduces the principles of microbial genetics, disease, and control of microorganisms. This course is identical to BIO 221.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is BIO

**Prerequisites:** BIO 122 [Min Grade: D] or BIO 141 [Min Grade: D]

**BIO 221 Microbiology 3.0 Credits**

Covers morphological, physiological, and biochemical characteristics of bacteria, fungi, algae, protozoa, and viruses. Introduces the principles of microbial genetics, disease, and control of microorganisms.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 122 [Min Grade: D] or BIO 141 [Min Grade: D]

**Corequisite:** BIO 222

**BIO 222 Microbiology Laboratory 2.0 Credits**

An introduction to microbiological techniques, and culture of prokaryotic and eukaryotic organisms. Includes sterile techniques, and use of specialized microscopic techniques. Classical and molecular techniques of microbial identification are also covered.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 122 [Min Grade: D] or BIO 141 [Min Grade: D]

**Corequisite:** BIO 221

**BIO 223 Parasitology 3.0 Credits**

Parasitology explores the most predominant lifestyle on earth, parasitism. Students will learn how parasites invade and exploit their hosts, the resultant damage to the hosts, and the mechanisms by which hosts defend and protect themselves from these invaders.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 122 [Min Grade: D] or BIO 124 [Min Grade: D]

**BIO 224 Form, Function & Evolution of Vertebrates 4.0 Credits**

This course is an introduction to principles of organismal biology from the perspective of form, function and evolution of fish, amphibians, reptiles, mammals and birds. Many biological principles are well known in this group of animals. Data from areas as diverse as paleontology, ecology and molecular biology will be presented.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 121 [Min Grade: D] or BIO 122 [Min Grade: D] or BIO 124 [Min Grade: D] or BIO 126 [Min Grade: D]

**BIO 225 Vertebrate Biology and Evolution Laboratory 2.0 Credits**

A hands-on laboratory course that complements BIO 224: Form, Function & Evolution of Vertebrates. Students use the comparative approach to learn about the anatomy, physiology and evolution of vertebrates. Laboratory work will be on campus and in the field trips to observe vertebrates in nature.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 224 [Min Grade: D] (Can be taken Concurrently)

**BIO 226 Microbiology for Health Professionals 5.0 Credits**

An introduction to microbiology for students in the health professions. Covers the diversity of microorganisms, their growth and how to control them. An introduction to the principles of disease and pathogenicity, host interaction and immunological response. Laboratories focus on the basic techniques to culture and student microorganisms.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**BIO 227 Exploring Parasites 2.0 Credits**

Exploring Parasites Laboratory will safely introduce students to hands-on experiences with a vast diversity of human parasites to understand their evolutionary adaptations. Students will learn to culture *Giardia lamblia*, an enteric parasite, and design a term-long research project to study an aspect of *Giardia* biology of student interest.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 223 [Min Grade: C] (Can be taken Concurrently)

**BIO 228 Evolutionary Biology & Human Health 3.0 Credits**

This course illustrates the importance and utility of evolutionary perspectives on various topics related to human health. In addition to the "how" questions, this course also introduces the "why" questions. Various evolutionary hypotheses are examined. Arguments for and counter-arguments against each hypothesis are presented to foster understanding of each topic. Selected topics include infectious diseases, pathogen virulence, allergies/asthma, mental health/addiction, genetic disorders, diseases of civilization, sex, pregnancy, aging, and public health concerns.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 122 [Min Grade: D] and BIO 124 [Min Grade: D]

**BIO 229 Dictyostelium Research 3.0 Credits**

We will be developing and progressing molecular and cellular projects to study cellular function in *Dictyostelium discoideum* as a model to investigate human cellular dysfunction. This exploratory and experimental course is designed to provide opportunities for students to experience authentic laboratory investigation in the context of a course which runs like a research group. Projects progress from term to term so students are welcome to continue in subsequent terms to further progress their projects or switch to other ongoing projects.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** BIO 209 [Min Grade: C], BIO 219 [Min Grade: C] (Can be taken Concurrently)

**BIO 231 Cell Physiology 3.0 Credits**

Molecular biology of the cell, including regulation of function, genetic mechanisms, chemistry and structure of cellular components, and cell-to-cell interactions.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D]

**BIO 232 Discovering Antibiotics 3.0 Credits**

The focus of this course is the process of research and inquiry that leads to the isolation, characterization and identification of potential antibiotic producing microbial strains and species from soil. Students will work in small groups to collaboratively design and carry out their own experiments that will isolate these microorganisms. During this course, you will learn about the structure, metabolism, nutrition, and diversity of soil microorganisms.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 122 [Min Grade: D]

**BIO 244 Genetics I 3.0 Credits**

Surveys Mendelian, microbial, molecular, and population genetics. Discusses model systems and analytical methods used by geneticists to understand gene functions at cellular, organismal, and population levels.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 122 [Min Grade: D]

**BIO 256 Vertebrate Morphology and Physiology 3.0 Credits**

Provides comparative study of the major vertebrate groups, relationships between physiology and organismal structure, evolutionary history, comparative anatomy, and development.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 224 [Min Grade: D] or ENV5 212 [Min Grade: D]

**Corequisite:** BIO 257

**BIO 257 Vertebrate Morphology & Physiology Lab 2.0 Credits**

A hands-on laboratory course that complements BIO 256: Vertebrate Morphology and Physiology. Students will use comparative dissections of representative vertebrates to understand the anatomy and evolution of major vertebrate groups.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 224 [Min Grade: D] or ENV5 212 [Min Grade: D]

**Corequisite:** BIO 256

**BIO 264 Ethnobotany 3.0 Credits**

This course explores the relation between ancient/cultural botanical knowledge and its current application in modern pharmacology and alternative forms of medicine. It provides an interdisciplinary approach to the study of plants for food, medicine, stimulation, religious rituals and death.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**BIO 270 Development Biology 3.0 Credits**

Covers molecular, cellular and physiological mechanisms underlying development of animals from gametes to adults. Covers the major stages and selected aspects of vertebrate development in importance animal model systems. Particular focus in on the importance of differential gene expression and its regulation in development.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (BIO 214 [Min Grade: D] and BIO 218 [Min Grade: D]) or BIO 211 [Min Grade: D]

**BIO 271 Developmental Biology Laboratory 2.0 Credits**

Includes observations into development processes in a diverse group of organisms including developmental principles in simple multicellular protists, gametogenesis in diverse animal, fertilization in sea urchins, embryonic development of vertebrates, regeneration of planarians, and the role of gene regulation in fruit fly development. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 270 [Min Grade: D] (Can be taken Concurrently)

**BIO 284 Biology of Stress 3.0 Credits**

This course focuses on the biological responses to the physical and psychological stress, discussing in turn stress responses in various organ systems. Emphasis is given to the analysis and evaluation of conflicting biological evidence on stress effects.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 100 [Min Grade: D] or BIO 101 [Min Grade: D] or BIO 107 [Min Grade: D] or BIO 109 [Min Grade: D] or BIO 122 [Min Grade: D] or BIO 141 [Min Grade: D]

**BIO 285 Forensic Biology 3.0 Credits**

This course will introduce students to the fascinating subject of forensic science, and specifically the role that biology can play in solving crimes.

Topics being covered will include examining a crime scene, and the analysis of biological materials such as fingerprints, blood, plant material and human remains. During the course students will have to play the role of a forensic scientist, applying the knowledge that they will learn each week to see if they can determine who committed the crime. Case studies from real crimes will also be used to illustrate the points being made.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 122 [Min Grade: D]

**BIO 286 Forensic Toxicology 3.0 Credits**

In this online course students will study forensic toxicology, the study of chemicals- drugs, alcohol and poisons (to name a few), in relation to legal cases. These cases may involve identification of a powder, or examination of an envelope for traces of poisons, or the analysis of a blood samples to identify and quantify the presence of a substance which may have results in intoxication or even death.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 285 [Min Grade: D]

**BIO 306 Biochemistry Laboratory 2.0 Credits**

Covers biochemical techniques ranging from basic laboratory preparatory work such as making solutions to the measurement of enzyme kinetics and substrate specificity.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 242 [Min Grade: D] or CHEM 248 [Min Grade: D]

**BIO 310 Comparative Physiology 3.0 Credits**

Provides comparative study of the physiology of vertebrate and invertebrate animals. Examines physiological principles by studying cardiovascular adaptations, water balance, respiratory adaptations, and other homeostatic mechanisms in model systems, including fish, amphibians, mammals, birds, and invertebrates.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 201 [Min Grade: D] or BIO 224 [Min Grade: D] or ENVS 284 [Min Grade: D]

**BIO 311 Biochemistry 4.0 Credits**

Covers bioenergetics and metabolism; enzymes, substrates, products, coenzymes, transporters, pathways (catabolic and anabolic for carbohydrates, lipids, amino acids, and nucleotides). Intracellular regulation, intercellular regulation, and how all this serves to meet the need of the cell and organism.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 242 [Min Grade: D] or CHEM 248 [Min Grade: D]

**BIO 312 Genetically Modified Foods 2.0 Credits**

Covers the application of recombinant DNA techniques in the creation of genetically modified foods. Explores the many uses of these food. Also covers the social, ethical and environmental issues involved in the use of genetically modified foods.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 100 [Min Grade: D] or BIO 107 [Min Grade: D] or BIO 122 [Min Grade: D] or BIO 141 [Min Grade: D]

**BIO 313 Comparative Physiology Laboratory 2.0 Credits**

Computational laboratory examining quantitative facets of vertebrate physiology through simulation experiments. Complements BIO 310 Comparative Physiology. Example systems examined include gas and solute exchangers, open vs closed circulations, and thermoregulatory controllers. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 310 [Min Grade: D] (Can be taken Concurrently)

**BIO 314 Pharmacology 3.0 Credits**

In this course, students will apply their studies of chemistry and biology to understand how drugs: are designed, affect the body, and are affected by the body. Students can expect to learn the fundamentals of pharmacology, and to discuss current topics and novel approaches being used to design new therapeutics.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]

**BIO 318 Biology of Cancer 3.0 Credits**

In this course, students will apply their studies of cell and molecular biology to understand cancer pathology. Starting with a fundamental knowledge of normal cellular processes, students will learn how normal processes go awry in tumor development and metastasis, and the current approaches being used to develop new cancer therapeutics.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** (BIO 214 [Min Grade: D] and BIO 218 [Min Grade: D]) or BIO 211 [Min Grade: D]

**BIO 320 Microbial Pathogenesis 3.0 Credits**

Covers mechanisms of pathogenesis in microbial disease: transmission, prevention, public health. Also covers molecular basis of microbial pathogenesis.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** (BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]) and BIO 221 [Min Grade: D]

**BIO 322 Mycology 4.5 Credits**

Covers morphology, taxonomy, and physiology of yeasts and molds, with emphasis on species of economic importance; plant and animal pathogens; industrial fermentations; toxin production; decomposition of organic materials; and fungal morphogenesis.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 221 [Min Grade: D]

**BIO 331 Bioinformatics I 3.0 Credits**

This course uses a combination of lecture and hands-on exercises to develop computational, algorithmic, and database navigation skills used in the analysis of genes and genomes. Topics include genomic databases, genome assembly and annotation, sequence alignment, phylogenetics, and comparative genomics.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 122 [Min Grade: D] or BIO 141 [Min Grade: D]

**BIO 332 Bioinformatics II 3.0 Credits**

This course uses a combination of lecture and hands-on exercises to develop programming and software skills used in the study of functional genomics. Topics include genetics, transcriptomics, proteomics, and metabolomics.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 331 [Min Grade: D]

**BIO 333 Bioinformatics Laboratory 2.0 Credits**

In this course, students develop and apply computational skills in bioinformatics to address a quarter-long research project. Topics generally focus on the ecology and evolution of microbes, which have become much easier to study thanks to the advent of molecular tools and software for the analysis of DNA sequences.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 122 [Min Grade: D] (Can be taken Concurrently) or BIO 141 [Min Grade: D]

**BIO 346 Stem Cell Research 3.0 Credits**

This course will focus on recent and important topics relevant to stem cell research and development. Topics will include nuclear reprogramming and epigenetics, environmental influences on stem cell differentiation, stem cells and cancer, stem-cell-based therapies for heart and neurodegenerative disorders, stem cells and ageing, and politics of stem cell research.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]

**BIO 348 Neuroscience: From Cells to Circuits 3.0 Credits**

This course provides an introduction to the biological basis of human and animal behavior. This course will emphasize fundamental aspects of neuroscience including how individual neurons respond to stimuli, how these neurons connect to form circuits during development, and how ensembles of neurons work together to mediate simple tasks.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 122 [Min Grade: D] or BIO 100 [Min Grade: D] or BIO 107 [Min Grade: D]

**BIO 349 Behavioral Neuroscience 3.0 Credits**

This course provides an introduction to the biological basis of human and animal behavior. This course will emphasize fundamental aspects of neuroscience with a focus on the principles of how circuits function in the nervous system. Topics covered will include how neural circuits mediate sensory perception, drive behavioral output, and generate thoughts and emotions.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 122 [Min Grade: D] or BIO 100 [Min Grade: D] or BIO 107 [Min Grade: D]

**BIO 368 Embryology 4.0 Credits**

This course surveys general features of developing systems, and focuses on the developmental history of adult structures and functions in humans. Human developmental defects are also discussed.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 214 [Min Grade: D] or BIO 224 [Min Grade: D] or BIO 211 [Min Grade: D]

**BIO 370 Teratology 3.0 Credits**

This course will expand on the concepts of developmental biology by examining the agents that interfere with normal development. We will be exploring these agents through presentations and discussion of current peer reviewed literature. The focus will be on an understanding of mechanisms of action and how they are influenced by dose pharmacology and genetics.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 270 [Min Grade: D] or BIO 368 [Min Grade: D]

**BIO 372 Histology 4.0 Credits**

This course is designed to give students an understanding of the established fundamentals and principles of histology. Histology lies at the interface between cell biology and physiology: here we examine how cells work together as tissues and organs to create a functional pump (the heart), filters (the kidneys), and bellows (the lungs). While considerable focus will be on the structural details of select systems, there are recurring patterns that emerge in tissue construction. These patterns reflect regional variations in the functional role of the assembled tissue; studying these principles offers us a view of how small differences in cell number, type, and interaction can lead to the wide variety of tissue/organ properties seen in the human body.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D]

**BIO 386 Gross Anatomy I 2.0 Credits**

This course is to give students an understanding of Human Anatomy in a clinical format. Anatomy will be studied in a regional manner with an emphasis placed on landmarks and relationships of structure within a region. Regions covered to include the back, upper limb, thorax, and abdomen.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**Prerequisites:** (BIO 214 [Min Grade: D] and BIO 218 [Min Grade: D]) or BIO 211 [Min Grade: D]

**Corequisite:** BIO 387

**BIO 387 Gross Anatomy I Laboratory 2.0 Credits**

This course is to accompany the Gross Anatomy lecture course and complements the students study of human anatomy by allowing the student to hone their dissection skills through dissection of a preserved mammalian specimen.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**Prerequisites:** (BIO 214 [Min Grade: D] and BIO 218 [Min Grade: D]) or BIO 211 [Min Grade: D]

**Corequisite:** BIO 386

**BIO 388 Gross Anatomy II 2.0 Credits**

This course is a continuation of the clinically focused study of Human Anatomy begun in BIO 386 (Gross Anatomy I). Anatomy will be studied in a regional fashion, with a focus on the pelvis, lower limb, head, and neck.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (BIO 386 [Min Grade: D])

**Corequisite:** BIO 389

**BIO 389 Gross Anatomy II Lab 2.0 Credits**

This course is to accompany the Gross Anatomy lecture course and complements the students study of human anatomy by allowing the student to hone their dissection skills through dissection of a preserved mammalian specimen. This course is a direct continuation of BIO 387 (Gross Anatomy I Lab).

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 387 [Min Grade: D]

**Corequisite:** BIO 388

**BIO 404 Structure and Function of Biomolecules 4.0 Credits**

Covers the weak interactions which govern structure and function of biomolecules, including amino acids, proteins (structural organization, isolation, and methods of analysis). Enzymes (structure, catalytic mechanisms, kinetics), lipids and biomembranes, and DNA and RNA folding.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 242 [Min Grade: D]

**BIO 406 Computational Biochemistry Laboratory 2.0 Credits**

This course uses kinetic analysis of biochemical data to increase the computational and numerical sophistication used to build sound models of the underlying biological processes. Students start with Excel as the analytical tool. MATLAB is then used as the complexity of the problems demands it.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 242 [Min Grade: D]

**BIO 410 Advanced Molecular Biology 3.0 Credits**

This course will provide students the opportunity to learn about molecular mechanisms of gene expression and control, genome analysis and manipulation, and the use of advanced tools and techniques in molecular biology. The principles of molecular biology and techniques will be discussed in the context of model organisms commonly used for molecular biology research. The course will have a strong focus on experimental approaches, problem solving and on understanding literature in the field. At the conclusion of the course, students should have the background to design experiments, and read and discuss papers from the primary literature regarding different aspects of molecular biology.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 211 [Min Grade: D]

**BIO 412 Biology of Aging 3.0 Credits**

Discusses ageing at the organismal, organ, cellular, and molecular levels. Discussions include chronological versus biological aging, normal and abnormal human physiology of aging, current theories of aging, the effect of caloric restriction on aging, and the molecular mechanisms that underlie normal and abnormal aging.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]

**BIO 413 Genomics 3.0 Credits**

This course aims to elucidate current technologies, theory, and applications of genomic research. Though a large emphasis will be placed on the use of genomic tools to study human health, we will also study the genomes, transcriptomes, and proteomes of bacteria, fungi, plants, and other animals.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]

**BIO 414 Behavioral Genetics 3.0 Credits**

This course explores the role of genetics in determining variation in animal (including human) behavior, and the role of gene expression in regulating behavioral development. The course surveys techniques for quantifying and analyzing genetic variation, behavioral effects, and gene expression.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**Prerequisites:** BIO 122 [Min Grade: D] or BIO 107 [Min Grade: D]

**BIO 415 Proteins 3.0 Credits**

Discusses protein structure, function, and isolation. Emphasizes biochemical, biophysical, and molecular biological techniques.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D]

**BIO 416 Biochemistry of Major Diseases 3.0 Credits**

This course focuses on the biochemical bases of several selected human disorders including neoplasm, cardiovascular disorders, diabetes and obesity. Biochemical changes and their regulation by signaling pathways under the disease conditions will be examined. The relevance of diagnosis and treatment will be discussed.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 203 [Min Grade: C] or BIO 311 [Min Grade: C]

**BIO 420 Virology 3.0 Credits**

Discusses the major viral groups, including biochemistry and molecular genetics of viral replication, structure, gene expression, latency, and role in disease.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]

**BIO 421 Biomembranes 3.0 Credits**

The experimental and theoretical basis for the structure and function of biological membranes will be surveyed. Topics include membrane self assembly, bilayer phase behavior and dynamics, membrane protein structure, passive and active transport, membrane fusion and trafficking.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D]

**BIO 424 Microbial Physiology 3.0 Credits**

Covers physiology and metabolism of microorganisms with emphasis on aspects unique to prokaryotes, including envelope structure, transport systems, modes of nutrition, biosynthesis, growth, and mechanisms of action of antibiotics.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 221 [Min Grade: D]

**BIO 426 Immunology 3.0 Credits**

Covers the fundamental concepts of innate and adaptive immunity, including the molecular and cellular mechanisms that generate responses to a broad spectrum of infectious threats, self-non-self recognition, immune regulation.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D]

**BIO 427 Immunology Laboratory 2.0 Credits**

Students will gain a more thorough understanding of the complexities of the mammalian immune system and will receive hands on experience with common models used in immunology labs. This course complements the Immunology lecture course (BIO 426). Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 426 [Min Grade: D] (Can be taken Concurrently)

**BIO 430 Cell Biology of Disease 3.0 Credits**

An introduction to the pathobiology of human disease as it relates to principles of cytoskeleton and membrane biology. The course reviews basic intracellular mechanisms and examines how they go awry in respiratory, heart and kidney diseases, diabetes, cancer, neurodegeneration and during viral and microbial infections.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D]

**BIO 433 Advanced Cell Biology 3.0 Credits**

Course covers chemical composition and cellular function of organelles and other cellular structures, intra- and inter- cellular regulatory processes, intercellular communication, genetic mechanisms and analytical techniques.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is BIO.

**Prerequisites:** BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D]

**BIO 434 [WI] Advanced Cell Biology Laboratory 2.0 Credits**

Course covers fundamentals of growth, division and homeostasis of mammalian cells grown in culture. Students perform experiments on cells to monitor cellular morphology, including subcellular structures and specific regulatory proteins. Techniques include fluorescent microscopy, cell transfection and subcellular fractionation. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is BIO and classification is Senior.

**Prerequisites:** BIO 433 [Min Grade: D] (Can be taken Concurrently)

**BIO 435 Immunobiology of Disease 3.0 Credits**

This course will expand on the concepts of molecular immunology focusing on emerging concepts in immunology research, immunopathologies, failure of host defense and current clinical concepts.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 426 [Min Grade: D]

**BIO 436 Population Genetics 4.0 Credits**

This course surveys population genetics theory as applied to studies of micro-evolutionary changes. We will examine the forces of evolution—mutation, selection, inbreeding, gene flow, genetic drift—and how they can (and cannot) change allele frequencies in populations over time. We will apply the theory that you have learned by also examining current primary literature on human evolutionary history, population genetics and patterns of adaptation.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 122 [Min Grade: D] and BIO 124 [Min Grade: D] and (BIO 211 [Min Grade: D] or BIO 217 [Min Grade: D] or BIO 218 [Min Grade: D] or ENV5 212 [Min Grade: D])

**BIO 442 Modeling Methods in Biology I 3.0 Credits**

Offers practical experience in the modeling of simple biological systems, including the applications of linear, trigonometric, and exponential functions in biology and the use of differential and integral calculus, simple differential equations, and the Eulerian approach to simulation.

Emphasizes practical computational use of such tools in biological problems. Offered in alternate years.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**BIO 443 Modeling Methods in Biology II 3.0 Credits**

Offers a practical introduction to the modeling of dynamic biological processes, including deterministic and stochastic processes. Emphasizes the development and construction of working models and the interpretation of results. Discusses both mechanistic and empirical/predictive models. Students develop their own model of a real-world biological process. Offered in alternate years.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 442 [Min Grade: D]

**BIO 444 Human Genetics 3.0 Credits**

Covers the fundamentals and principles of genetics with an emphasis on their relevance to human genetics and disease. Topics include human genetic disorders, pedigree analysis and genetic testing, cytogenetics, epigenetics, genetics of cancer, gene therapy, stem cell research, human genomics and biotechnology.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]

**BIO 445 Microbial Genetics 3.0 Credits**

Covers genetic organization and regulation in bacteriophage and bacteria, techniques of genetic manipulation of microbial genomes, genetic interactions of microbes under natural conditions and the use of microbial genome modification in industry.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** (BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]) and BIO 221 [Min Grade: D]

**BIO 447 Advanced Genetics and Molecular Biology 3.0 Credits**

Covers classical prokaryotic and eukaryotic genetics; DNA/RNA structure; DNA replication, transcription, translation and regulation of these processes. Also covers major molecular techniques used for characterizing prokaryotic and eukaryotic genes, tools for analysis of genomes, and applications of molecular genetics research.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** (BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]) and (BIO 244 [Min Grade: D] or BIO 444 [Min Grade: D])

**BIO 449 Recombinant DNA Laboratory 5.0 Credits**

Covers procedures of DNA isolation and purification, insertion of DNA sequences into plasmid cloning vectors, introduction of plasmids into appropriate host cells, and methods of recovering and analyzing cloned DNA.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]

**BIO 451 Genetic Reg Development 3.0 Credits**

Covers molecular and genetic control of morphogenesis and cellular differentiation. Focuses on differential gene function and the interaction between the nucleus and the cytoplasm.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 270 [Min Grade: D]

**BIO 453 Protein Dysfunction in Disease 3.0 Credits**

Proteins are essential for the function and health of the cell. Misfolded and damaged proteins are at the root of numerous human diseases, known collectively as conformational diseases. In this course we will examine cellular mechanisms involved in biosynthesis, folding and maintenance of proteins, and discuss how the failure of these mechanisms contributes to disease.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D]

**BIO 461 Neurobiology of Autism Disorders 3.0 Credits**

Autism disorders arise from changes in neurodevelopment that deeply affect how individuals interact with the world around them. As study of autism has increased over the past several decades, it has become clear that autism actually comprises a large, heterogeneous set of similar disorders, most of which are genetic in origin. In this class, we will study how neuronal cell biology is disrupted in known forms of autism, and how distinct forms of autism can arise from alterations in common cellular pathways. Further, we will discuss how these discoveries may lead to eventual treatments or cures.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D] or BIO 348 [Min Grade: D] or BIO 349 [Min Grade: D]

**BIO 462 Biology of Neuron Function 3.0 Credits**

Covers molecular and cellular mechanisms underlying neuron function. Topics include: molecular and cellular biology of neurons and neural development; molecular biology and physiology of sensory and motor neurons; molecular biology of muscle function; molecular and cellular basis of learning and memory in model organisms.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 201 [Min Grade: D] or BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D] or BIO 348 [Min Grade: D] or BIO 349 [Min Grade: D]

**BIO 463 Molecular Mechanisms of Neurodegeneration 3.0 Credits**

This is an advanced course on the current, primary literature in the area of neurodegeneration. Students are expected to be conversant in areas of Genetics, Cell Biology, Molecular Biology, Biochemistry, and Neurobiology. This is a discussion course based on reading current manuscripts from the primary literature. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D] or BIO 348 [Min Grade: D] or BIO 349 [Min Grade: D]

**BIO 465 Neurobiology of Disease 3.0 Credits**

The objective of the course is to provide a basic understanding of molecular and cellular biology of disorders of the human nervous system. Advances developed from experimental models that have armed clinicians and basic scientists with new tools for diagnosis and treatment of disease and injury will be presented.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 462 [Min Grade: D] or BIO 211 [Min Grade: D] or BIO 348 [Min Grade: D] or BIO 349 [Min Grade: D]

**BIO 466 Endocrinology 4.0 Credits**

Describes the classical hormones, their regulation and major clinical abnormalities. New directions in endocrinology, such as cellular regulation and cellular mediators of hormonal action are also considered. The major focus of the course will be on mammals, although some examples involving other vertebrates are included.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D]

**BIO 468 Pathophysiology 4.0 Credits**

This course is designed to give students an appreciation of the many ways to think about the diseased organism, with an emphasis on the cellular- and systems-level malfunctions that contribute to the disease state. Having established an understanding of the normal physiology of the system in question, we will investigate the underlying cause, origin, and symptoms of the pathophysiology, as well as exploring the successes and limitations of available treatment options. Considerable emphasis will be placed on the importance of model systems that mimic aspects of the diseased state, as well as the role epidemiological data plays in helping to clarify the genetic and environmental contributors.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D]) and BIO 201 [Min Grade: D]

**BIO 471 Seminar in Biological Sciences 2.0 Credits**

Discusses and evaluates selected current topics in bioscience and biotechnology. Includes presentations by outside speakers.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is BIO and classification is Senior.

**Prerequisites:** BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]

**BIO 472 Seminar in Biological Sciences 2.0 Credits**

In the second term of senior seminar, we will continue to host professional seminars with speakers presenting current research in the various biological disciplines. Professional development sessions will be available that will be helpful to the student's maturation.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is BIO and classification is Senior.

**Prerequisites:** BIO 471 [Min Grade: D]

**BIO 473 [WI] Seminar in Biological Sciences 2.0 Credits**

This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is BIO and classification is Senior.

**Prerequisites:** BIO 472 [Min Grade: D]

**BIO 474 Thesis in Biology 2.0 Credits**

Through this course, research-active students will engage in activities intended to help them develop a written thesis, and learn how to present their research effectively in both written and oral formats. Students will be encouraged to improve their skills in reading and analyzing the literature and their own data. Students will communicate their ideas through the development of a formal thesis, an in-class oral presentation, and a poster presentation. Seminar attendance will be a part of this course. Students must complete BIO 471 and 473 before registering for this course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is BIO and classification is Senior.

**Prerequisites:** BIO 473 [Min Grade: D] (Can be taken Concurrently)

**BIO 497 Research 0.5-12.0 Credits**

Provides guided research in biology, molecular biology, microbiology, cell or human physiology, genetics, biochemistry, or biotechnology.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

**BIO I199 Independent Study in BIO 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**BIO I299 Independent Study in BIO 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**BIO I399 Independent Study in BIO 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**BIO I499 Independent Study in BIO 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**BIO T180 Special Topics in Bioscience & Biotechnology 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**BIO T280 Special Topics in Bioscience & Biotechnology 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**BIO T380 Special Topics in Bioscience & Biotechnology 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**BIO T480 Special Topics in Bioscience & Biotechnology 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

# Business Statistics

## Courses

**STAT 201 Introduction to Business Statistics 4.0 Credits**

This introductory first course in business statistics focuses on applications of data analysis and statistics in business and economics. Topics covered include descriptive statistics and graphical presentation, probability, statistical inference, and simple regression analysis.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** MATH 102 [Min Grade: D] or MATH 121 [Min Grade: D] or MATH 183 [Min Grade: D]

**STAT 202 Business Statistics II 4.0 Credits**

This second course in business statistics focuses on widely used data analysis techniques in business and economics. Topics include two sample procedures, categorical data analysis, analysis of variance, regression analysis and other statistical applications as time permits. Applications are covered through practical data analysis examples.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** STAT 201 [Min Grade: C]

**STAT 205 Statistical Inference I 4.0 Credits**

Commerce and Engineering students only. Covers descriptive statistics, elementary probability theory, discrete and continuous random variables and probability distributions, joint distribution functions, expected values, statistical measures, sampling distributions, and point and interval estimation.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Prerequisites:** MATH 122 [Min Grade: D]

**STAT 206 Statistical Inference II 4.0 Credits**

Commerce and Engineering students only. Topics include hypothesis testing, two sample procedures, analysis of variance models, regression analysis, use of computer statistical programs and other statistical applications as time permits.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** STAT 205 [Min Grade: D]

**STAT 261 Statistics I 3.0 Credits**

Studies methods for organizing and summarizing data, elementary probability concepts, and important probability distributions and sampling distributions. Introduces confidence interval estimation. Fall, Winter.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** MATH 183 [Min Grade: D]

**STAT 262 Statistics II 3.0 Credits**

Studies the principles and techniques of interval estimation and hypotheses testing, and testing for means and proportions. Winter, Spring.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** STAT 261 [Min Grade: D]

**STAT 263 Statistics III 3.0 Credits**

Covers linear regression and correlation models, anova, statistical quality control, non-parametric statistics, and applications of the chi-square distribution. Fall, Spring.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** STAT 262 [Min Grade: D]

**STAT 325 Six-Sigma Quality Implementation 4.0 Credits**

Focuses on current theory and practice in Six-Sigma implementation for quality monitoring and improvement. Topics include the dynamic nature of quality, Six-Sigma implementation, and the roles of management in planning and guiding quality efforts. The fundamentals of managerial and statistical methods for quality monitoring and improvements are covered.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Prerequisites:** STAT 201 [Min Grade: C-] or STAT 205 [Min Grade: C-]

**STAT 331 Introduction to Data Mining for Business 4.0 Credits**

This course introduces students to the fundamental ideas of data mining methods, including dimension reduction, cluster, classification and regression trees, and logistic regression. The emphasis is understanding the application of methods rather than on mathematical and computational foundations. All applications are business-oriented.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Prerequisites:** STAT 202 [Min Grade: C-] or STAT 206 [Min Grade: C-]

**STAT 335 Introduction to Experimental Design 4.0 Credits**

The purpose of this course is to introduce the student to the fundamentals of experimental design, including the planning, conducting, and analysis of statistically designed experiments. Randomized, factorial, fractional and Plackett-Burman designs are covered with an emphasis on business applications.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Prerequisites:** STAT 202 [Min Grade: C-] or STAT 206 [Min Grade: C-]

**STAT I199 Independent Study in STAT 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**STAT I299 Independent Study in STAT 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**STAT I399 Independent Study in STAT 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**STAT I499 Independent Study in STAT 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**STAT T180 Special Topics in STAT 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**STAT T280 Special Topics in STAT 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**STAT T380 Special Topics in STAT 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**STAT T480 Special Topics in STAT 0.5-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

## Chemical Engineering

### Courses

**CHE 206 Basic Chemical Engineering Thermodynamics 3.0 Credits**

First and second laws of thermodynamics, use of state functions to solve macroscopic problems, distinction between solving ideal gas and real fluid problems. An introduction to phase equilibrium and mixtures. Concepts of fugacity and activity as measures of nonideality.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is CHE.

**Prerequisites:** CHE 201 [Min Grade: D] and MATH 200 [Min Grade: D]

**Corequisite:** CHE 202

**CHE 211 Material and Energy Balances I 4.0 Credits**

Covers elementary principles of chemical engineering, use of stoichiometry and material and energy balances to analyze chemical processing operations, and application to specific commercial processes.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 102 [Min Grade: D]

**Corequisite:** CHE 220

**CHE 212 Material and Energy Balances II 4.0 Credits**

Covers application of material and energy balances to analyze chemical processing operations, with application to both small-scale and commercial processes. Emphasis is on simultaneous solution of material and energy balances and on time-dependent analysis.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHE 211 [Min Grade: D] and CHE 220 [Min Grade: D]

**Corequisite:** CHE 230

**CHE 220 Computational Methods in Chemical Engineering I 3.0 Credits**

Introduces computational approaches and software applied to solve problems in chemical engineering. Software includes spreadsheet programs (Excel), high level computing languages (MATLAB), and chemical process simulation tools (Aspen, HYSYS).

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGR 122 [Min Grade: D]

**Corequisite:** CHE 211

**CHE 230 Chemical Engineering Thermodynamics I 4.0 Credits**

First and second laws of thermodynamics, use of state functions to solve macroscopic problems, distinction between solving ideal gas and real fluid problems. An introduction to phase equilibrium and mixtures. Concepts of fugacity and activity as measures of nonideality.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** MATH 200 [Min Grade: D] and CHE 211 [Min Grade: D] and CHE 220 [Min Grade: D]

**Corequisite:** CHE 212

**CHE 301 Process Thermodynamics 3.0 Credits**

Covers mixture thermodynamics, multi-component, multi-phase equilibrium calculations, and chemical equilibrium calculations for real fluids.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (ENGR 210 [Min Grade: D] or CHE 206 [Min Grade: D]) and (CHE 201 [Min Grade: D] or CHE 211 [Min Grade: D]) and (CHE 202 [Min Grade: D] or CHE 212 [Min Grade: D])

**CHE 302 Process Fluid Mechanics 4.0 Credits**

Within the context of processes previously introduced, introduces fluid flow of gases, liquids, and particulates; momentum transport; skin friction; drag; piping networks; filtration; and fluidization.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** TDEC 221 [Min Grade: D] or MATH 210 [Min Grade: D] or MATH 262 [Min Grade: D] or ENGR 232 [Min Grade: D]

**CHE 303 Process Heat Transfer 3.0 Credits**

Covers, within the context of processes previously introduced, transfer of energy by conduction, convection, and radiation; continuation of transport phenomena; design of heat exchangers; and applications in industry and in nature.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CHE 302 [Min Grade: D] and (CHE 201 [Min Grade: D] or CHE 211 [Min Grade: D]) and (CHE 202 [Min Grade: D] or CHE 212 [Min Grade: D])

**CHE 304 Process Mass Transfer 4.0 Credits**

Covers, within the context of processes previously introduced, mass transfer in mixtures; diffusion, convection, and continuation of transport phenomena; component separation in continuous contractors; gas absorption; liquid-liquid extraction; and simultaneous heat and mass transfer.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CHE 303 [Min Grade: D] and (CHE 201 [Min Grade: D] or CHE 211 [Min Grade: D]) and (CHE 202 [Min Grade: D] or CHE 212 [Min Grade: D])

**CHE 305 Process Separations 4.0 Credits**

Covers, within the context of processes previously introduced, the application of thermodynamics and equilibrium stage concepts to the unit operations involved in chemical processing.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CHE 301 [Min Grade: D] and (CHE 201 [Min Grade: D] or CHE 211 [Min Grade: D]) and (CHE 202 [Min Grade: D] or CHE 212 [Min Grade: D])

**CHE 307 Process Modeling I 4.0 Credits**

Models simple chemical and biochemical processes such as heating, cooling, and separation systems. Covers analytical and numerical methods for solving algebraic and ordinary differential equations.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** (CHE 201 [Min Grade: D] or CHE 211 [Min Grade: D]) and (CHE 202 [Min Grade: D] or CHE 212 [Min Grade: D]) and (ENGR 232 [Min Grade: D] or MATH 262 [Min Grade: D])

**CHE 308 Process Modeling II 4.0 Credits**

Covers mathematical modeling of chemical and biochemical processes such as chemical and biochemical reactors and heating and cooling systems, analytical methods for solving algebraic and ordinary-differential equations.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHE 305 [Min Grade: D] and CHE 307 [Min Grade: D]

**CHE 320 Computational Methods in Chemical Engineering II 3.0 Credits**

This course introduces computational approaches and software applied to solve problems in chemical engineering. The course includes finite element software for solving differential equations (COMSOL Multiphysics) and computer programming.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHE 341 [Min Grade: D]

**CHE 330 Chemical Engineering Thermodynamics II 4.0 Credits**

Covers mixture thermodynamics, multi-component, multi-phase equilibrium calculations, and chemical equilibrium calculations for real fluids.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHE 230 [Min Grade: D]

**CHE 331 Separation Processes 3.0 Credits**

Covers application of thermodynamics and equilibrium stage concepts to separation unit operations in chemical processing.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHE 330 [Min Grade: D] and CHE 343 [Min Grade: D]

**CHE 332 [WI] Chemical Engineering Laboratory 2.0 Credits**

Requires students to perform experiments illustrating the fundamentals of chemical engineering process analysis. This is a writing intensive course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CHE 302 [Min Grade: D] (Can be taken Concurrently) CHE 301 [Min Grade: D]

**CHE 333 [WI] Chemical Engineering Laboratory II 2.0 Credits**

Offers laboratory experiments illustrating the fundamentals of chemical engineering process analysis. This is a writing intensive course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CHE 303 [Min Grade: D] (Can be taken Concurrently)

**CHE 334 [WI] Chemical Engineering Laboratory III 2.0 Credits**

Offers laboratory experiments illustrating the fundamentals of chemical engineering process analysis. This is a writing intensive course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CHE 304 [Min Grade: D] (Can be taken Concurrently) CHE 303 [Min Grade: D]

**CHE 341 Fluid Mechanics 4.0 Credits**

Introduces, within the context of processes, transport phenomena, fluid flow, momentum transport, skin friction, drag, and piping networks.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHE 212 [Min Grade: D] and CHE 230 [Min Grade: D] and MATH 210 [Min Grade: D]

**CHE 342 Heat Transfer 4.0 Credits**

Covers, as a continuation of transport phenomena and within the context of processes, transfer of energy by conduction, convection, and radiation and design of heat exchangers.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHE 341 [Min Grade: D]

**Corequisite:** CHE 343

**CHE 343 Mass Transfer 4.0 Credits**

Covers, within the context of processes previously introduced, mass transfer in mixtures; diffusion, convection, and continuation of transport phenomena; component separation in continuous contactors; gas absorption; liquid-liquid extraction; and simultaneous heat and mass transfer.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHE 341 [Min Grade: D]

**Corequisite:** CHE 342

**CHE 344 Transport Phenomena in Bioengineering Processes 3.0 Credits**

Covers gas-liquid mass transfer in microbial systems, mass transfer in cells and biofilms, membrane transport, fluid mechanics of fermentation broth, power consumption in agitated vessels, heat transfer, and scale-up of mass transfer equipment.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (CHE 343 [Min Grade: D] or CHE 304 [Min Grade: D]) and (CHE 341 [Min Grade: D] or CHE 302 [Min Grade: D])

**CHE 350 Statistics and Design of Experiments 3.0 Credits**

Provides statistical treatment of engineering data including application of statistical techniques to process model formulation, statistical designs of engineering experiments, and analysis of probabilistic systems.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** MATH 210 [Min Grade: D] or ENGR 232 [Min Grade: D] or MATH 262 [Min Grade: D]

**CHE 351 Chemical Engineering Laboratory I 2.5 Credits**

Offers laboratory experience in chemical engineering processes, requiring both experimental design and analysis. This is a writing intensive course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHE 341 [Min Grade: D] and CHE 330 [Min Grade: D]

**CHE 352 Chemical Engineering Laboratory II 2.5 Credits**

Offers laboratory experience in chemical engineering processes, requiring both experimental design and analysis. This is a writing intensive course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHE 343 [Min Grade: D] and CHE 331 [Min Grade: D]

**CHE 360 BioProcess Principles 3.0 Credits**

This course is concerned with manufacturing processes involving biological substances. Students gain detailed knowledge in the design and operation of bioreactors and learn about biomolecules produced therein. Specific topics covered include: Cells (type, organization, function and growth); Protein and Enzymes; Bioreactor Process Principles (active vs. passive immobilization, fermentation and scale-up, recovery and purification); Special consideration for animal and plant cell cultures.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHE 211 [Min Grade: D] or CHE 201 [Min Grade: D]

**CHE 362 Chemical Kinetics and Reactor Design 4.0 Credits**

Covers isothermal and non-isothermal reactor design, series and parallel reactions, and heterogeneous catalysis.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHE 330 [Min Grade: D] and CHE 342 [Min Grade: D] and CHE 343 [Min Grade: D]

**CHE 364 Bioprocess Unit Operations 3.0 Credits**

Covers separation processes applicable to bio-systems, including liquid-liquid extractions, membrane separations, chromatographic separations, filtration, and centrifugation.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHE 305 [Min Grade: D] or CHE 331 [Min Grade: D]

**CHE 371 Engineering Economics and Professional Practice 3.0 Credits**

Provides techniques for making engineering project decisions. Topics include the time value of money, key decision criteria, risk analysis, and ethical considerations and consequences of business decisions.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHE 211 [Min Grade: D] and CHE 220 [Min Grade: D]

**CHE 372 Integrated Case Studies in Chemical Engineering 3.0 Credits**

This course reviews selected cases (market, processes, equipment sets and incidents) from chemical engineering practice whose analysis requires integration of concepts from previous Chemical Engineering courses such as mass and energy transport, thermodynamics, separations and reaction engineering.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHE 342 [Min Grade: D] and CHE 343 [Min Grade: D]

**CHE 373 The Brewing Process 3.0 Credits**

This course will focus on the critical process steps which make up the brewing process on any scale with special attention to the chemistry and biochemistry of the involved process steps. The lecture material includes the brewing process steps from raw materials to fill/finish including: raw materials, malting, mashing, lautering, boiling, hopping, fermentation, clarification (filtration/centrifugation/flocculation), and fill/finish, as well as a discussion of the fundamentals, impurities chemistry, health concerns and practical knowledge.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 242 [Min Grade: D]

**CHE 399 Special Problems in Chemical Engineering 1.0-12.0 Credit**

Covers individual research problems of a non-routine nature. Requires report.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

**CHE 420 Process Systems Engineering 3.0 Credits**

Covers the application of automatic control theory to chemical processes within the context of processes previously introduced.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** (CHE 201 [Min Grade: D] or CHE 211 [Min Grade: D]) and (CHE 202 [Min Grade: D] or CHE 212 [Min Grade: D]) and CHE 303 [Min Grade: D]

**CHE 424 Chemical Kinetics and Reactor Design 4.0 Credits**

Covers isothermal and non-isothermal reactor design, series and parallel reactions, and heterogeneous catalysis.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CHE 304 [Min Grade: D] and (CHE 201 [Min Grade: D] or CHE 211 [Min Grade: D]) and (CHE 202 [Min Grade: D] or CHE 212 [Min Grade: D])

**CHE 430 Introduction to Sustainable Engineering 3.0 Credits**

This course introduces students to sustainability in an engineering context. Sustainable engineering encompasses the relationships between technology, society, the environment, and economic prosperity. A variety of systematic approaches will be used for multivariable design and analysis of the sustainability of engineering systems.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**CHE 431 Fundamentals of Solar Cells 3.0 Credits**

This course focuses on the fundamentals of solar cells. It will cover semiconductor materials, basic semiconductor physics, optical and electronic phenomena, and case studies of crystalline silicon, thin film, and nanostructured photovoltaics.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** MATH 200 [Min Grade: D] and CHEM 102 [Min Grade: D] and PHYS 201 [Min Grade: D]

**CHE 432 Electrochemical Engineering 3.0 Credits**

This course introduces principles and application of electrochemical equilibria, kinetics, and transport processes.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHE 330 [Min Grade: D] and CHE 343 [Min Grade: D]

**CHE 433 Introduction to Rheology 3.0 Credits**

Introduces the concepts of how science defines and conceptualizes the behavior of "real" fluids. Covers concepts such as how to characterize, quantify, and simulate non-newtonian behavior in real fluids.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHE 341 [Min Grade: D] or CHE 302 [Min Grade: D]

**CHE 450 Chemical Process Industries 3.0 Credits**

Chemical engineering juniors and seniors. Combines process heuristics and design strategies with case studies of the industrial manufacture of a variety of materials, including petrochemicals, polymers, and ammonia. Discusses operational and design problems as well as the interactions of process principles.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Pre-Junior or Sophomore

**CHE 451 Safety Engineering 3.0 Credits**

Covers selected topics such as safeguarding systems, fault trees, risk analysis, explosions, fires, and building safety.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** CHE 482 [Min Grade: D]

**CHE 452 Polymer Process Technology 3.0 Credits**

Covers chemistry of chain and stepwise polymerization, industrial reactor systems, polymer melt rheology, processing of thermoplastic resins, and plastics properties.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**CHE 453 Chemical Engineering Laboratory III 2.5 Credits**

Offers laboratory experience in chemical engineering processes, requiring both experimental design and analysis.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHE 362 [Min Grade: D], CHE 464 [Min Grade: D] (Can be taken Concurrently)

**CHE 460 Biochemical Engineering 3.0 Credits**

Introduces underlying biological and engineering principles in an integrate fashion for biopharmaceutical production systems.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is BME or major is CHE and classification is Junior or Senior.

**CHE 461 Principles of Colloid Science 3.0 Credits**

This course focuses on fundamental principles of colloid science from a biological perspective. It will cover surface active agents, thermodynamics of self-assembly of surfactants, surface chemistry and physics of monolayers and bilayers, microstructures and phase behavior, specific biological colloids (micelles, liposomes, and lipoproteins), and colloidal stability.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**Prerequisites:** BIO 141 [Min Grade: C] or BIO 122 [Min Grade: C]

**CHE 464 Process Dynamics and Control 3.0 Credits**

Covers the application of automatic control theory to chemical processes within the context of processes.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** MATH 210 [Min Grade: D] and CHE 212 [Min Grade: D]

**CHE 466 Chemical Process Safety 3.0 Credits**

Covers selected topics such as safeguarding systems, fault trees, risk analysis, explosions, fires, and process safety.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHE 472 [Min Grade: D]

**CHE 471 Process Design I 4.0 Credits**

Within the context of previously introduced processes, covers economic feasibility of projects and optimization of equipment and production in the design of process plants.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHE 331 [Min Grade: D], CHE 362 [Min Grade: D] (Can be taken Concurrently) CHE 371 [Min Grade: D] and CHE 372 [Min Grade: D]

**CHE 472 Process Design II 3.0 Credits**

Within the context of previously introduced processes, covers execution of feasibility study and preliminary design of process plants. This is a writing intensive course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHE 471 [Min Grade: D]

**CHE 473 Process Design III 3.0 Credits**

Within the context of previously introduced processes, covers completion of feasibility study and preliminary design of process plants. This is a writing intensive course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHE 472 [Min Grade: D]

**CHE 481 Process Design I 3.0 Credits**

Within the context of previously introduced processes, covers economic feasibility of projects and optimization of equipment and production in the design of process plants.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is CHE and classification is Senior.

**Prerequisites:** CHE 304 [Min Grade: D] and CHE 308 [Min Grade: D]

**Corequisite:** CHE 424

**CHE 482 [WI] Process Design II 3.0 Credits**

Within the context of previously introduced processes, covers execution of feasibility study and preliminary design of process plants. This is a writing intensive course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** CHE 481 [Min Grade: D]

**CHE 483 [WI] Process Design III 3.0 Credits**

Within the context of previously introduced processes, covers completion of feasibility study and preliminary design of process plants. This is a writing intensive course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** CHE 482 [Min Grade: D]

**CHE I199 Independent Study in CHE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CHE I299 Independent Study in CHE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CHE I399 Independent Study in CHE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CHE I499 Independent Study in CHE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CHE T180 Special Topics in CHE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CHE T280 Special Topics in CHE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CHE T380 Special Topics in CHE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CHE T480 Special Topics in CHE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

# Chemistry

## Courses

**CHEM 050 Preparatory Chemistry 0.0 Credits**

This online course covered general chemical principles, such as stoichiometry, atomic and molecular structure, and characterization of chemical reactions.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CHEM 100 Chemistry 2.0 Credits**

Chemistry and its significance to industry and life, with discussions revolving around synthesis and use of polymers and biologically significant molecules.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CHEM 101 General Chemistry I 3.5 Credits**

Covers fundamental principles of chemistry, stoichiometry, atomic and molecular structure, chemical bonding, states of matter, thermochemistry, and periodicity.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** APCH 12 or CHEM 111 [Min Grade: D] or CHEM 050 [Min Grade: D]

**Corequisite:** EXAM 080

**CHEM 102 General Chemistry II 4.5 Credits**

Covers chemical equilibrium, including acid-base equilibria in solution; electrochemistry; organic chemistry; polymers; and petroleum.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 101 [Min Grade: D] or CHEM 121 [Min Grade: D] or CHEM 161 [Min Grade: D]

**Corequisite:** EXAM 080

**CHEM 103 General Chemistry III 5.0 Credits**

Covers organic functional groups, biochemistry, inorganic and coordination compounds, chemical kinetics, thermodynamics, and nuclear chemistry.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 102 [Min Grade: D] or CHEM 122 [Min Grade: D] or (CHEM 162 [Min Grade: D] and CHEM 164 [Min Grade: D])

**Corequisite:** EXAM 080

**CHEM 108 Health Chemistry I 3.0 Credits**

Covers physical and chemical properties of substances used in medical areas and related principles: atomic structure, bonding, gases, solutions, acids and bases, oxidation-reduction and the chemistry of hydrocarbon compounds and polymers. Examples are taken from pharmacology, nutrition and other allied health fields.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Corequisite:** EXAM 080

**CHEM 110 Environmental Chemistry 2.0 Credits**

Chemistry of the environment; the ecological aspects. Discussion of problems related to the pollution of the atmosphere, natural waters, and soil from a chemist's point of view.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CHEM 111 General Chemistry I 4.0 Credits**

Not open to engineering or science majors. Introduces the principles of general chemistry. Covers SI units, unit factor calculations, states of matter, elements and compounds, energy, atoms, electronic configurations, ionic and covalent bonds, Lewis dot structures, shapes of molecules, chemical equations, stoichiometry, molarity, gas laws, nuclear chemistry, equilibrium between different states of matter, and some colligative properties of solutions.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Corequisite:** EXAM 080

**CHEM 112 General Chemistry II 4.0 Credits**

Introduces organic chemistry. Covers some classes of organic compounds from alkanes to amines, basic reactions of important functional groups, uses of some compounds, stereochemistry, synthetic and natural polymers (carbohydrates, protein, DNA), and briefly acids and bases.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 111 [Min Grade: D]

**CHEM 113 General Chemistry I Laboratory 1.5 Credit**

Covers chemical and physical properties and techniques for inorganic, organic, and polymeric compounds, including distillation, crystallization, chromatography, separation.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 111 [Min Grade: D] (Can be taken Concurrently)

**CHEM 114 General Chemistry II Laboratory 1.5 Credit**

Continuation of CHEM 113.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 112 [Min Grade: D] (Can be taken Concurrently)

**CHEM 121 Majors Chemistry I 5.0 Credits**

Part I in an introductory sequence for chemistry majors. Covers fundamental principles of atomic and molecular nature of matter, electronic structure, physic-chemical properties, periodicity, chemical reactions, stoichiometry, thermochemistry, chemical bonding, properties of gases, and nuclear chemistry. Course includes weekly lab experiments.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is CHEM.

**Prerequisites:** APCH 12 or CHEM 111 [Min Grade: D] or CHEM 050 [Min Grade: D]

**CHEM 122 Majors Chemistry II 5.0 Credits**

Part II in an introductory sequence for chemistry majors. Covers physical properties of liquids and solids, kinetics, equilibrium, solutions, acids and bases, thermodynamics, and electrochemistry. Course includes weekly lab experiments.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is CHEM.

**Prerequisites:** CHEM 101 [Min Grade: C-] or CHEM 121 [Min Grade: C-]

**CHEM 123 Majors Chemistry III 5.5 Credits**

Part III in an introductory sequence for chemistry majors. Course covers physical and chemical properties of substances used in consumer products through an introduction to fundamental structures, nomenclature and properties of hydrocarbons, organic functional groups, polymers and biomolecules. Course includes weekly lab experiments.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is CHEM.

**Prerequisites:** CHEM 102 [Min Grade: C-] or CHEM 122 [Min Grade: C-]

**CHEM 151 Applied Chemistry 3.0 Credits**

For business majors. Covers physical and chemical properties of substances used in consumer products. Provides qualitative introduction to required principles, including atomic structure and the elements, bonding and compounds, and the chemistry of carbon compounds and polymers. Uses examples from the areas of food and nutrition, pharmacology, and the petrochemical industry.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Corequisite:** EXAM 080

**CHEM 161 General Chemistry I 3.0 Credits**

Covers atomic structure, stoichiometry, gases, valence theory, and thermochemistry.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** MATH 003 [Min Grade: D] or (MATH 001 [Min Grade: D] and MATH 002 [Min Grade: D])

**CHEM 162 General Chemistry II 3.0 Credits**

Covers solutions, colligative properties, chemical equilibrium, and electrochemistry. Introduces organic chemistry.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 161 [Min Grade: D] or CHEM 101 [Min Grade: D]

**CHEM 163 General Chemistry III 3.0 Credits**

Continues organic chemistry. Introduces thermodynamics, molecular biology, inorganic chemistry, chemical kinetics, and nuclear chemistry.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 164 [Min Grade: D] and CHEM 162 [Min Grade: D]

**CHEM 164 General Chemistry Laboratory I 2.0 Credits**

Involves experiments demonstrating the principles of gas behavior, thermochemistry, colligative properties, chemical equilibrium, and electrochemistry. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 162 [Min Grade: D] (Can be taken Concurrently)

**CHEM 165 General Chemistry Laboratory II 2.5 Credits**

Involves experiments illustrating the principles of organic separations, transition metal chemistry, complex ions, chemical kinetics, and qualitative analysis. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 163 [Min Grade: D] (Can be taken Concurrently)

**CHEM 201 Why Things Work: Everyday Chemistry 3.0 Credits**

Course will cover chemical explanations of everyday materials and phenomena. The focus will be conceptual understanding, as opposed to a detailed quantitative treatment.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CHEM 230 Quantitative Analysis 4.0 Credits**

Covers chemical analysis and data treatment, including chemical equilibrium, acid-base and redox reactions, and applications to gravimetric and titrimetric methods.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 102 [Min Grade: D] or CHEM 122 [Min Grade: D] or (CHEM 162 [Min Grade: D] and CHEM 164 [Min Grade: D])

**CHEM 231 [WI] Quantitative Analysis Laboratory 2.0 Credits**

Provides laboratory studies in quantitative analysis. This is a writing intensive course. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 230 [Min Grade: D] (Can be taken Concurrently)

**CHEM 241 Organic Chemistry I 4.0 Credits**

Covers structure, reactions, and stereochemistry of organic compounds, especially alkanes, cycloalkanes, haloalkanes, and alkenes. Also covers SN1, SN2, E1, and E2 compound.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 102 [Min Grade: D] or CHEM 122 [Min Grade: D] or (CHEM 162 [Min Grade: D] and CHEM 164 [Min Grade: D])

**CHEM 242 Organic Chemistry II 4.0 Credits**

Covers structure, reactivity, and stereochemistry of organic compounds, especially alkanes, alkynes, alcohols, ethers, dienes, and aromatic compounds. IR, MS, and NMR spectral techniques are introduced and applied to the identification of organic compounds.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 241 [Min Grade: D]

**CHEM 243 Organic Chemistry III 3.0 Credits**

Covers structure, preparation, reactivity, and stereochemistry of organic compounds, especially substituted aromatics, aldehydes, ketones, carboxylic acids, carboxylic acid halides, anhydrides, amides, polypeptides, esters, amines, phenols, and carbohydrates.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 242 [Min Grade: D]

**CHEM 244 Organic Chemistry Laboratory I 3.0 Credits**

Introduces simple recrystallization, distillation, extraction, and chromatography techniques and applies them to several organic reactions illustrative of topics covered in CHEM 241. Provides opportunity to take and interpret IR and GC spectra.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 241 [Min Grade: D]

**CHEM 245 Organic Chemistry Laboratory II 3.0 Credits**

Provides experiments illustrating a number of organic reactions covered in CHEM 242 as well as more advanced organic techniques. Provides opportunity to take and interpret IR and GC scans. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 242 [Min Grade: D] (Can be taken Concurrently) CHEM 244 [Min Grade: D]

**CHEM 246 Organic Chemistry for Majors I 6.5 Credits**

This course offers a basic foundation for modern organic chemistry. Lecture topics include: the chemistry of alkanes, cycloalkanes, alkyl halides, alkenes, cycloalkenes, and alkynes, free radical substitution, nucleophilic substitution, elimination, ionic addition, and free radical addition reactions. Lab topics include recrystallization, distillation, chromatography, liquid-liquid extraction, and simple chemical reactions, including an elimination reaction to prepare an alkene and several substitution reactions to prepare alkyl halides. Introduction to the use of IR and <sup>1</sup>H NMR as structure identification tools.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is CHEM.

**Prerequisites:** CHEM 103 [Min Grade: D] or CHEM 123 [Min Grade: D]

**CHEM 248 Organic Chemistry for Majors II 6.5 Credits**

This course continues developing the basic foundation of modern organic chemistry started in CHEM 246. Lecture topics include the chemistry of alcohols, ethers, conjugated systems, aromatic compounds and thiols. The principles of IR, MS, <sup>1</sup>H and <sup>13</sup>C NMR will be taught in lecture and put to use in identifying products in the lab. Other lab topics include the preparation of alcohols, a Grignard synthesis, an alkene addition reaction, an aromatic nitration, a Friedel-Crafts reaction, the preparation of ferrocene, and how to safely handle water-sensitive chemicals.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is CHEM.

**Prerequisites:** CHEM 246 [Min Grade: D] or (CHEM 241 [Min Grade: D] and CHEM 244 [Min Grade: D])

**CHEM 249 Organic Chemistry for Majors III 7.0 Credits**

This course completes development of the basic foundation of modern organic chemistry started in CHEM 246. Lecture topics include the chemistry of aldehydes, ketones, amines, carboxylic acids & their derivatives, carbohydrates, organometallic compounds, and multi-step organic synthesis. Asymmetric synthesis and C-C bond forming reactions will also be covered. Lab topics include the multi-step syntheses of benzocaine and DEET, stereochemical inversion, diazonium coupling, Aldol condensation, sequential Diels-Alder and lactonization reactions, and the principles of functional group protection.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is CHEM.

**Prerequisites:** CHEM 248 [Min Grade: D] or (CHEM 242 [Min Grade: D] and CHEM 245 [Min Grade: D])

**CHEM 251 Physical Chemistry I 3.0 Credits**

Introduces physical chemistry. Topics include quantum chemistry, operators, the uncertainty principle, deBroglie wavelength, particle in a box, hydrogen-like atoms, aufbau principle, commutators, normalization, LCAO-MO, variation principle, diatomic molecules, Hecke approximation, harmonic oscillator, conjugated systems, electronic and vibrational spectroscopy, and selection rules.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (CHEM 102 [Min Grade: D] and MATH 200 [Min Grade: D]) or TDEC 121 [Min Grade: D] or (CHEM 162 [Min Grade: D] and CHEM 164 [Min Grade: D])

**CHEM 253 Thermodynamics and Kinetics 4.0 Credits**

Covers gas properties, gas laws, state functions, first, second, and third laws of thermodynamics, phase transformations, phase diagrams, chemical equilibrium, spontaneous reactions, Gibbs free energy, molecular motion, diffusion, rates of chemical reactions, rate laws, molecular reaction dynamics, transition states, electron transfer.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 102 [Min Grade: D] or CHEM 122 [Min Grade: D] or (CHEM 162 [Min Grade: D] and CHEM 164 [Min Grade: D]) and MATH 200 [Min Grade: D]

**CHEM 256 Physical Chemistry for Biological Sciences 4.5 Credits**

Covers elementary chemical thermodynamics and homogeneous reaction kinetics as bases for experiment and phenomenology in biology and biochemistry, including properties of molecules in solution.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 102 [Min Grade: D] or CHEM 122 [Min Grade: D] or (CHEM 162 [Min Grade: D] and CHEM 164 [Min Grade: D])

**CHEM 270 Software Skills for Chemists 3.0 Credits**

Course covers mathematical, computational, and professional skills useful to chemists. Representation of chemical problems in mathematical language; use of software to: solve mathematical problems that arise in chemistry; process, analyze and present data; visualize and analyze molecular structures. Also covers the American Chemical Society guidelines for professionalism in chemistry.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 102 [Min Grade: D] or CHEM 122 [Min Grade: D] and (PHYS 201 [Min Grade: D] or PHYS 211 [Min Grade: D])

**CHEM 346 Qualitative Organic Chemistry 5.5 Credits**

Covers identification of pure organic compounds, physical constants, solubilities by semi-micro techniques, infrared and nuclear magnetic resonance spectroscopy, and separation and identification of mixtures.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CHEM 243 [Min Grade: D] and CHEM 245 [Min Grade: D]

**CHEM 355 Physical Chemistry IV 3.0 Credits**

Computational methods of modeling molecules; Covers potential energy functions and surfaces, molecular conformations, failures of classical physics, the quantum hypothesis, the classical wave equation and the origins of the Schrodinger equation, particle-in-a-box, linear variation functions, molecular orbitals from linear combinations of atomic orbitals, Pauli principle, molecular calculations and their interpretation.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (CHEM 252 [Min Grade: D] or CHEM 253 [Min Grade: D]) and (CHEM 270 [Min Grade: D] or PHYS 160 [Min Grade: D]) and (MATH 201 [Min Grade: D] or MATH 210 [Min Grade: D]) and CHEM 352 [Min Grade: D]

**CHEM 356 Physical Chemistry Laboratory 2.0 Credits**

Provides experiments in physical chemistry for engineering students. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 241 [Min Grade: D] (Can be taken Concurrently)

**CHEM 357 [WI] Physical Chemistry Laboratory I 2.5 Credits**

Provides experiments illustrative of topics included in CHEM 251 and CHEC 352. This is a writing intensive course. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** (CHEM 252 [Min Grade: D] or CHEM 253 [Min Grade: D]) and (PHYS 211 [Min Grade: D] or PHYS 201 [Min Grade: D]) or CHEC 352 [Min Grade: D]

**CHEM 358 Physical Chemistry Laboratory II 2.5 Credits**

Continues CHEM 357.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CHEM 357 [Min Grade: D] and (CHEM 252 [Min Grade: D] or CHEM 253 [Min Grade: D] or CHEC 352 [Min Grade: D])

**CHEM 359 Atomic and Molecular Spectroscopy 3.0 Credits**

Emission and absorption of light, laser principles, optical spectrometers, atomic spectroscopy. LS-coupling, Zeeman effect, magnetic resonance spectroscopy, EPR, NMR, ENDOR, molecular spectroscopy of diatomic and polyatomic molecules, rotational, vibrational and electronic, fluorescence spectroscopy, two-photon spectroscopy, time resolved spectroscopy, photo-electron spectroscopy.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 355 [Min Grade: D]

**CHEM 361 Advanced Organic Chemistry Laboratory 2.5 Credits**

Emphasizes experimental design, data collection, and interpretation in such areas as reaction mechanism and molecular structure determination. Not offered every year.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CHEM 243 [Min Grade: D] and CHEM 245 [Min Grade: D]

**CHEM 364 Spectroscopic Analysis 3.0 Credits**

Covers interpretation of spectra for the determination of structure of organic molecules. Stresses use of infrared, nuclear magnetic resonance, and mass spectrometry. Fall. Not offered every year.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CHEM 243 [Min Grade: D]

**CHEM 367 Chemical Information Retrieval 3.0 Credits**

This course examines methods for retrieving literature information, via standard tabulations, journals, and abstracts, using both hard-copy and electronic sources. Includes techniques for online searching of databases such as Chemical Abstracts, Beilstein, and crystallographic depositories.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CHEM 371 Chemistry of Biomolecules 3.0 Credits**

This course is a chemistry-based approach to understanding the basic structure, chemical reactivity, and biological function of biomolecules – including amino acids, peptides, proteins, carbohydrates, nucleic acids, and lipids. A special emphasis will be given to topics in the frontiers of biomolecular research at the interface between chemistry and biology.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 243 [Min Grade: D]

**CHEM 420 Molecular Symmetry and Group Theory Applied Chemistry 3.0 Credits**

Applies the principles of simple group theory to molecular structure and to electronic and motional properties of molecules, including crystal field and molecular orbital methods.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CHEM 421 [Min Grade: D]

**CHEM 421 Inorganic Chemistry I 3.0 Credits**

Covers crystal, atomic, and molecular structure; modern chemical bonding; and magnetic properties of inorganic systems.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CHEM 253 [Min Grade: D] (Can be taken Concurrently) CHEM 252 [Min Grade: D] or ENGR 210 [Min Grade: D]

**CHEM 422 Inorganic Chemistry II 3.0 Credits**

Covers organometallic and coordination compounds, substitution mechanisms, and bio-inorganic chemistry.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CHEM 420 [Min Grade: D]

**CHEM 424 Special Chemistry Problems 0.5-12.0 Credits**

Allows theoretical and laboratory investigations of a particular problem of interest to the individual student. A written report may be required.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

**CHEM 425 Inorganic Chemistry Laboratory 4.0 Credits**

Covers synthesis of properties of inorganic compounds, magnetic measurements, spectroscopic properties, and interpretations of complex ion structure. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CHEM 422 [Min Grade: D] (Can be taken Concurrently)

**CHEM 430 Analytical Chemistry I 3.0 Credits**

Provides an introduction to statistics (particularly the development and use of analytic calibration curves), basic electronics, and the principles of spectroscopic methods of analysis, including the interaction of light with matter and basic instrument design.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CHEM 253 [Min Grade: D] (Can be taken Concurrently) (CHEM 230 [Min Grade: D] and CHEM 242 [Min Grade: D]) or CHEC 352 [Min Grade: D])

**CHEM 431 [WI] Analytical Chemistry II 4.0 Credits**

Continues CHEM 430. Covers principles of chromatographic methods of analysis. Lab includes experiments on atomic absorption, fluorescence, infrared absorption, UV/visible absorption, gas chromatography, high performance liquid chromatography, basic electronics, and potentiometry/coulometry. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CHEM 430 [Min Grade: D] or ENGR 210 [Min Grade: D]

**CHEM 465 Synthetic Polymer Chemistry 3.0 Credits**

Explores scope of polymer science; structure-property relations; step, free radical, cationic, group-transfer, metathesis, coordination, and ring-opening polymerizations; and stereochemistry of polymerizations and reactions of polymers.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CHEM 242 [Min Grade: D]

**CHEM 466 Physical Chemistry of Polymers 3.0 Credits**

Covers kinetics and thermodynamics of polymerizations; control of polymerization processes; gelation theory; copolymerization; and determination of polymer molecular weight and distribution by membrane osmometry, light-scattering, solution viscosity, and other techniques.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CHEM 242 [Min Grade: D] and (CHEM 252 [Min Grade: D] or CHEM 253 [Min Grade: D])

**CHEM 467 Polymer Chemistry III 3.0 Credits**

Covers spectroscopy of polymers; rubber elasticity; morphology; viscoelasticity; thermal analysis; computational methods; testing, fabrication, and processing; and magnetic and mechanical properties of polymers.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CHEM 252 [Min Grade: D] or CHEM 253 [Min Grade: D] or CHEC 352 [Min Grade: D] or ENGR 210 [Min Grade: D]

**CHEM 493 Senior Research Project 0.5-12.0 Credits**

Provides individualized research with a faculty member in any number of chemical disciplines. Requires written report. May be repeated three times for credit.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 3 times for 12 credits

**Restrictions:** Can enroll if major is CHEM and classification is Junior or Senior.

**CHEM 497 Research 0.5-12.0 Credits**

Covers research problems in several areas of chemistry. Requires written report.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Can enroll if major is CHEM.

**CHEM I199 Independent Study in CHEM 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**CHEM I299 Independent Study in CHEM 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**CHEM I399 Independent Study in CHEM 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**CHEM I499 Independent Study in CHEM 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**CHEM T180 Special Topics in Chemistry 0.0-5.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 3 times for 15 credits

**CHEM T280 Special Topics in Chemistry 0.0-5.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 3 times for 15 credits

**CHEM T380 Special Topics in Chemistry 0.0-5.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 3 times for 15 credits

**CHEM T480 Special Topics in Chemistry 0.0-5.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 3 times for 15 credits

## Chinese

### Courses

**CHIN 101 Chinese I 4.0 Credits**

Introductory Mandarin Chinese. Includes listening, speaking, and reading, with individual audiolingual practice. Offered all terms.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CHIN 102 Chinese II 4.0 Credits**

Continues CHIN 101. Offered all terms.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHIN 101 [Min Grade: C]

**CHIN 103 Chinese III 4.0 Credits**

Continues CHIN 102. Offered all terms.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHIN 102 [Min Grade: C]

**CHIN 104 Chinese Speaking, Level II (Pinyin Only Track Option) 4.0 Credits**

Chinese Speaking, Level II (Pinyin Only Track Option) includes listening, speaking, reading, and some writing solely using the Chinese phonetic system: pinyin. This course will continue to introduce standard (Mandarin) Chinese to students who have had little or no previous knowledge of the language. The course is designed to help students to continue acquiring the rudimentary knowledge of Chinese and develop basic skills in listening and speaking in the language. In this class, more emphasis will be given to the training of standard pronunciation and listening comprehension as well as some basic grammar and vocabulary usage. Students will be expected to work solely in recognizing and writing pinyin, placing a much heavier emphasis on learning Chinese as a spoken language.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHIN 101 [Min Grade: C]

**CHIN 105 Chinese Speaking, Level III (Pinyin Only Track Option) 4.0 Credits**

Chinese Speaking, Level III (Pinyin Only Track Option) includes listening, speaking, reading, and some writing solely using the Chinese phonetic system: pinyin. This course will continue to introduce standard (Mandarin) Chinese to students who have had little or no previous knowledge of the language. The course is designed to help students to continue acquiring the rudimentary knowledge of Chinese and develop basic skills in listening and speaking in the language. Students will be expected to work solely in recognizing and writing pinyin, placing a much heavier emphasis on learning Chinese as a spoken language. This course is specifically designed for spoken language acquisition. Students who take Chinese Speaking, Level III will not be able to continue on to Chinese 201.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHIN 104 [Min Grade: C]

**CHIN 201 Chinese IV 4.0 Credits**

This course includes listening, speaking, reading, and writing practice, with a focus on cultural competency and conversational skills. Builds on CHIN 103.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHIN 103 [Min Grade: C]

**CHIN 202 Chinese V 4.0 Credits**

This course includes listening, speaking, reading, and writing practice, with a focus on cultural competency and conversational skills. Builds on CHIN 201.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHIN 201 [Min Grade: C]

**CHIN 310 Advanced Writing and Speaking 4.0 Credits**

Provides advanced practice in written and oral communication, including journalistic, professional, and creative writing. Examines contemporary cultural contexts through media and news. Taught in Chinese.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHIN 202 [Min Grade: C]

**CHIN 320 Introduction to Language for the Professions 3.0 Credits**

Introduction to communication skills in areas such as contemporary business, health, and law in a culturally sensitive fashion. Taught in Chinese.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 8 times for 27 credits

**Prerequisites:** CHIN 310 [Min Grade: C]

**CHIN 340 Introduction to Power and Resistance 3.0 Credits**

Introduction to the analysis of power relations and issues of (in)equality rooted in contemporary political and socio-economic systems. Taught in Chinese.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 8 times for 27 credits

**Prerequisites:** CHIN 310 [Min Grade: C]

**CHIN 350 Introduction to Language, Media, and Society 3.0 Credits**

Introduction to the role of language and media in society, including sociolinguistics, gender, media studies, and communication. Taught in Chinese.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 8 times for 27 credits

**Prerequisites:** CHIN 310 [Min Grade: C]

**CHIN 420 Advanced Topics in Language for the Professions 3.0 Credits**

Advanced communication skills in areas such as contemporary business, health, and law in a culturally sensitive fashion. Taught in Chinese. Topics will vary according to the instructor's expertise.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 8 times for 27 credits

**Prerequisites:** CHIN 310 [Min Grade: C]

**CHIN 440 Advanced Topics in Power and Resistance 3.0 Credits**

Advanced analysis of power relations and issues of (in)equality rooted in contemporary political and socio-economic systems. Taught in Chinese. Topics will vary according to the instructor's expertise.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 8 times for 27 credits

**Prerequisites:** CHIN 310 [Min Grade: C]

**CHIN 450 Advanced Topics in Language, Media, and Society 3.0 Credits**

Advanced analysis of the role of language and media in society, including sociolinguistics, gender, media studies, and communication. Taught in Chinese. Topics will vary according to the instructor's expertise.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 8 times for 27 credits

**Prerequisites:** CHIN 310 [Min Grade: C]

**CHIN 480 Chinese Minor Thesis Course 0.5-4.0 Credits**

Independent research study on a topic selected by the student. Independent study is supervised by a faculty member and guided by a plan of study. At the end of the course, the student is required to produce a paper and oral defense on the topic of his paper.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CHIN I199 Independent Study in CHIN 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**CHIN I299 Independent Study in CHIN 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**CHIN I399 Independent Study in CHIN 0.5-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**CHIN I499 Independent Study in CHIN 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**CHIN T180 Special Topics in Chinese 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**CHIN T280 Special Topics in Chinese 0.0-12.0 Credits**

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**CHIN T380 Special Topics in Chinese 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**CHIN T480 Special Topics in Chinese 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

## Civic Engagement

### Courses

**CIVC 100 Foundations of Civic Engagement 3.0 Credits**

This course is designed to help students develop skills as active participants in a pluralistic democratic society through direct service, education, and reflection opportunities. It will cover key concepts and frameworks for understanding civic engagement, including: models of civic life through American history; critiques of philanthropy, volunteerism, community service, public service, and political activism; and university-community relations.

**College/Department:** Center for Civic Engagement

**Repeat Status:** Not repeatable for credit

**CIVC 101 Introduction to Civic Engagement 1.0 Credit**

This course is designed to help students develop skills as active participants in a pluralistic, democratic society through direct service, education and reflection opportunities.

**College/Department:** Center for Civic Engagement

**Repeat Status:** Not repeatable for credit

**CIVC 200 Active Citizenship and Community-Based Learning 3.0 Credits**

By exploring the conceptions of active citizenship and taking part in civic engagement activities, this course will examine issues regarding community-based learning experiences for today's university students.

**College/Department:** Center for Civic Engagement

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CIVC 100 [Min Grade: D]

**CIVC 201 Civic Engagement Leadership 3.0 Credits**

This course provides experiential learning in community settings as students observe, define, analyze, and practice leadership skills.

**College/Department:** Center for Civic Engagement

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CIVC 100 [Min Grade: D]

**CIVC 202 University-Community Partnerships 3.0 Credits**

This course will examine the university as a social institution and community actor.

**College/Department:** Center for Civic Engagement

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CIVC 100 [Min Grade: D]

**CIVC 490 Capstone Project in Civic Engagement 3.0 Credits**

Under faculty supervision, students plan and execute a term project that integrates the academic and community-based knowledge acquired in their curriculum. Students define an issue and set learning objectives relevant to the project, develop a plan for implementation, and complete the term project.

**College/Department:** Center for Civic Engagement

**Repeat Status:** Not repeatable for credit

**CIVC I199 Independent Study in CIVC 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Center for Civic Engagement

**Repeat Status:** Can be repeated multiple times for credit

**CIVC I299 Independent Study in CIVC 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Center for Civic Engagement

**Repeat Status:** Can be repeated multiple times for credit

**CIVC I399 Independent Study in CIVC 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Center for Civic Engagement

**Repeat Status:** Can be repeated multiple times for credit

**CIVC I499 Independent Study in CIVC 1.0-3.0 Credit**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Center for Civic Engagement

**Repeat Status:** Not repeatable for credit

**CIVC T180 Special Topics in CIVC 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Center for Civic Engagement

**Repeat Status:** Can be repeated multiple times for credit

**CIVC T280 Special Topics in CIVC 3.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Center for Civic Engagement

**Repeat Status:** Can be repeated 2 times for 6 credits

**CIVC T380 Special Topics in CIVC 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Center for Civic Engagement

**Repeat Status:** Can be repeated multiple times for credit

**CIVC T480 Special Topics in CIVC 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Center for Civic Engagement

**Repeat Status:** Can be repeated multiple times for credit

## Civil & Arch Engineering

### Courses

**CAE 491 [WI] Senior Design Project I 3.0 Credits**

Introduces the design process, including information retrieval, problem definition, proposal writing, patents, and design notebooks. Includes presentations on problem areas by experts from industry, government, and education. This is a writing intensive course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** CIVE 330 [Min Grade: D] and CIVE 303 [Min Grade: D]

and (AE 391 [Min Grade: D] or CIVE 310 [Min Grade: D])

**CAE 492 [WI] Senior Design Project II 3.0 Credits**

Continues CAE 491. Requires written and oral progress reports. This is a writing intensive course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CAE 491 [Min Grade: D]

**CAE 493 [WI] Senior Design Project III 3.0 Credits**

Continues CAE 492. Requires written and oral final reports, including oral presentations by each design team at a formal Design Conference open to the public and conducted in the style of a professional conference. This is a writing intensive course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CAE 492 [Min Grade: D]

## Civil Engineering

### Courses

**CIVE 240 [WI] Engineering Economic Analysis 3.0 Credits**

Techniques for project decisions: benefit cost and present worth analysis, rate of return, capital budgeting, risk analysis, environmental impact, and depreciation. This is a writing intensive course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**CIVE 250 Construction Materials 4.0 Credits**

Construction Materials.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** MEM 202 [Min Grade: D] and CAEE 202 [Min Grade: D] and ENGR 220 [Min Grade: D]

**CIVE 261 Materials and Structural Behavior I 3.0 Credits**

Introduces the basic materials of construction (timber, masonry, steel, and concrete). Covers their behavior as ingredients of the structural system. Required for architecture and construction management students. Fall.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is AE or major is CIVE or classification is Freshman

**Prerequisites:** PHYS 182 [Min Grade: D]

**CIVE 262 Materials and Structural Behavior II 3.0 Credits**

Continues CIVE 261. Required for architecture and construction management students. Winter.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is AE or major is CIVE or classification is Freshman

**Prerequisites:** CIVE 261 [Min Grade: D]

**CIVE 263 Materials and Structural Behavior III 3.0 Credits**

Continues CIVE 262. Required for architecture and construction management students. Spring.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is AE or major is CIVE or classification is Freshman

**Prerequisites:** CIVE 262 [Min Grade: D]

**CIVE 300 Structural Analysis I 4.0 Credits**

Covers analysis of statically determinate structures: equilibrium, compatibility, boundary conditions, complimentary and virtual work, energy theorems, reactions, member forces and deflection of trusses, beams and frames, and influence lines. The laboratory portion will make use of structural analysis computer programs to construct analytical models of various structural systems. Calculate reactions and deflections of statically determinate and indeterminate structures and check reliability of results.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CIVE 250 [Min Grade: D] and MEM 230 [Min Grade: D]

**CIVE 301 Structural Design I 3.0 Credits**

This course will provide a general overview of engineering design (20%) and then a specific treatment of the structural design process (80%).

The key topics to be covered include the determination of system-level loads/demands, the estimation of element-level demands and demand envelopes, and the sizing of beams and columns constructed of both reinforced concrete and structural steel.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CIVE 300 [Min Grade: D]

**CIVE 302 Structural Analysis I 4.0 Credits**

Covers analysis of statically determinate structures: equilibrium, compatibility, boundary conditions, complimentary and virtual work, energy theorems, reactions, member forces and deflection of trusses, beams and frames, and influence lines. The laboratory portion will make use of structural analysis computer programs to construct analytical models of various structural systems. Calculate reactions and deflections of statically determinate and indeterminate structures and check reliability of results.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CIVE 250 [Min Grade: D] and MEM 230 [Min Grade: D]

**CIVE 303 Structural Design I 3.0 Credits**

This course will provide a general overview of engineering design (20%) and then a specific treatment of the structural design process (80%).

The key topics to be covered include the determination of system-level loads/demands, the estimation of element-level demands and demand envelopes, and the sizing of beams and columns constructed of both reinforced concrete and structural steel.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CIVE 302 [Min Grade: D]

**CIVE 310 Soil Mechanics I 4.0 Credits**

Gives an overview of types of problems encountered in geotechnical engineering: index, mechanical, hydraulic and environmental properties of soils; earth mass stability, deformation, and groundwater seepage; laboratory measurements.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** (EGEO 220 [Min Grade: D] or CAEE 211 [Min Grade: D]) and CIVE 250 [Min Grade: D]

**CIVE 312 Soil Mechanics I 4.0 Credits**

Overview of geotechnical engineering; principles and practices. Exploration methods and soil profile preparation. Index properties used in engineering and agricultural classification systems. Description and modification of three phase particulate and void descriptions and modification. Laminar liquids flow as per d/Arçy's law.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CAEE 212 [Min Grade: D] and CIVE 320 [Min Grade: D]

**CIVE 315 Soil Mechanics II 4.0 Credits**

This course covers stress-strain and stability behavior of porous particulate soil. Effective stress and laminar flow are combined in one-dimensional consolidation. Stress distribution from applied loads and the resulting deformation are addressed in elastic and plastic equilibrium stages. Failure theory and measurement of strength properties are included, along with basic application to slopes, retaining structures, and both shallow and deep foundations.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** MEM 230 [Min Grade: D] and CIVE 250 [Min Grade: D] and CIVE 312 [Min Grade: D]

**CIVE 320 Introduction to Fluid Flow 3.0 Credits**

Covers fundamentals of fluid flow, fluid properties, hydrostatic forces, kinematics of flow, the Bernoulli equation, linear momentum, dimensional analysis, Froude and Reynolds similarity and hydraulic models and an introduction to pipe flows and friction.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** TDEC 202 [Min Grade: D] or ENGR 210 [Min Grade: D]

**CIVE 330 Hydraulics 4.0 Credits**

Covers pipe flow, friction losses, multiple pipe systems, water demand and distribution network design, pumps and pumping systems, air flow in ducts and fans, open channel flows, hydraulic jumps and energy dissipation, gravity pipe networks and the design of storm and sanitary sewer systems.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CIVE 320 [Min Grade: D]

**CIVE 375 Structural Material Behavior 3.0 Credits**

Study of deformation, fracture and fatigue of structural materials used in infrastructure. Includes basic failure modes, yielding and plasticity, and fracture mechanics. Emphasis on analytical and predictive methods that designers use to avoid failure. Metals, ceramic and composites are considered, as is time-dependent behavior.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** MEM 230 [Min Grade: D] and CIVE 250 [Min Grade: D] and (MATH 201 [Min Grade: D] or MATH 261 [Min Grade: D] or ENGR 231 [Min Grade: D])

**CIVE 400 First Principles of Structural Design 3.0 Credits**

Covers analysis of statically indeterminate structures: force methods for trusses, beams and frames, slope-deflection and equilibrium methods, moment distribution, stiffness matrices of truss and beam elements, and stiffness matrix method of analysis.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** CIVE 303 [Min Grade: C]

**CIVE 401 Structural Design II 3.0 Credits**

Covers principles of design of reinforced concrete structural systems, including beams, slabs, columns, and footings.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CIVE 400 [Min Grade: D]

**CIVE 402 Structural Design III 3.0 Credits**

Covers elastic and plastic design of structural steel members, including beams, columns, tension members, beam columns, and plate girders; design of welded and high-strength bolted connections; and design of steel trusses, bridges, and buildings.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CIVE 401 [Min Grade: D]

**CIVE 410 Foundation Engineering 3.0 Credits**

Covers shear strength, bearing capacity, and lateral earth pressure; design of shallow foundations (footings, mats) and deep foundations (piles, drilled shafts); and excavation and slope stability.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CIVE 310 [Min Grade: D]

**CIVE 430 Hydrology 3.0 Credits**

Covers the relationship between precipitation and runoff, unit hydrographs, flood routing, and water supply principles and applications.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CAEE 212 [Min Grade: D] and CIVE 320 [Min Grade: D]

**CIVE 431 Hydrology-Ground Water 3.0 Credits**

Covers geologic and hydrologic occurrence of groundwater, underground flow, and groundwater supply. Winter.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CIVE 330 [Min Grade: D]

**CIVE 432 Water Resources Design 3.0 Credits**

Covers planning and design of basin and developments for requirements of various water use purposes. Spring.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CIVE 430 [Min Grade: D]

**CIVE 477 [WI] Seminar 2.0 Credits**

Covers professional development and ethics. Requires preparation of a technical paper. This is a writing intensive course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**CIVE 478 [WI] Seminar 1.0 Credit**

Requires preparation and presentation of a technical paper. This is a writing intensive course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**CIVE I199 Independent Study in CIVE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CIVE I299 Independent Study in CIVE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CIVE I399 Independent Study in CIVE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CIVE I499 Independent Study in CIVE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CIVE T180 Special Topics in CIVE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CIVE T280 Special Topics in CIVE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CIVE T380 Special Topics in CIVE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

**CIVE T480 Special Topics in CIVE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

## Civil, Arch & Envr Engr

### Courses

**CAEE 202 Introduction to Civil, Architectural & Environmental Engineering 3.0 Credits**

This course introduces the planning, design, construction, operation, maintenance and documentation of engineering projects that are in unique social, topographic, environmental and geologic settings. The scope and principles of Civil, Architectural and Environmental engineering practice are each presented as well as the relationships between the three disciplines. The concepts are illustrated through laboratory projects, case studies, field trips and field measurement exercises. The course also addresses professional ethics, practice and licensure.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**CAEE 203 System Balances and Design in CAEE 3.0 Credits**

Based on fundamental science and mathematics preparation, this course for students in Civil, Architectural and Environmental Engineering covers delineation of system boundaries, analysis of mass, energy and force balances that support system integration; life cycle and uncertainty analysis; and formulation of problem solutions using these balances.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CAEE 202 [Min Grade: D] and ENGR 220 [Min Grade: D] and (ENGR 231 [Min Grade: D] or MATH 201 [Min Grade: D] or MATH 261 [Min Grade: D])

**CAEE 212 Geologic Principles for Infrastructure & Environmental Engineering 4.0 Credits**

This course focuses on geological principles and their relationships to engineering properties and behavior of soil and rock materials. Topics include formation of minerals, igneous, sedimentary, and metamorphic rocks, plate tectonics, structural geology, rock mechanics, landforms and geological hazards. Labs focus on mineral and rock identification, map skills, and rock mechanics.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGR 220 [Min Grade: D] and CAEE 202 [Min Grade: D]

**CAEE 301 Community-Based Design 3.0 Credits**

This course evaluates the weight of evidence for community-based design practices as related to peacebuilding, conflict management and sustainable development. A case-study-based approach will enable students to study participatory theory, informed design and adaptive management.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**CAEE 361 Statistical Analysis of Engineering Systems 3.0 Credits**

This class covers probability and statistics with applications to civil, architectural, and environmental engineering. Students will learn probability theory, distributions of random variables, and statistical hypothesis testing.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**CAEE I199 Independent Study in CAEE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CAEE I299 Independent Study in CAEE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CAEE I399 Independent Study in CAEE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CAEE I499 Independent Study in CAEE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CAEE T180 Special Topics in CAEE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CAEE T280 Special Topics in CAEE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CAEE T380 Special Topics in CAEE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CAEE T480 Special Topics in CAEE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

## Common Exams

### Courses

**EXAM 080 Common Exam Period - I 0.0 Credits**

**College/Department:** University Courses

**Repeat Status:** Can be repeated multiple times for credit

**EXAM 081 Common Exam Period - II 0.0 Credits**

**College/Department:** University Courses

**Repeat Status:** Can be repeated multiple times for credit

**EXAM 082 Common Exam Period - III 0.0 Credits**

**College/Department:** University Courses

**Repeat Status:** Can be repeated multiple times for credit

## Communication

### Courses

**COM 101 Human Communication 3.0 Credits**

This course explores the elements of basic human communication - what does it mean to communicate? What makes communication good or bad? What is the nature of verbal and non-verbal messages? What does it mean to communicate in a group? How does culture affect communication?.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**COM 111 Principles of Communication 3.0 Credits**

Explores the importance of communication in organizational settings. Includes assessment of appropriate modes of communication, including written, spoken, and electronic.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**COM 150 Mass Media and Society 3.0 Credits**

Provides an overview of the history, economic structure, regulation, and impact of the mass media in the United States.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**COM 160 Introduction to Journalism 3.0 Credits**

This course is designed to acquaint students with various forms of basic news writing and interview techniques. Students will learn how to write leads and short articles under deadline pressure. This is a writing-intensive course. Although writing is the main emphasis of this class, students also will learn newsroom organization, ethics and press law.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**COM 181 Public Relations Principles and Theory 3.0 Credits**

This course focuses on the principles of public relations. It introduces students to the theory and practice of PR taught in the context of real life material and situations. The course also covers main public relations techniques, tools, and types of publics.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**COM 200 Current Events in Media and Communication 3.0 Credits**

Media are not only the channels through which we learn about current events—they are also, often, event makers themselves. This course will explore the collaborative relationships between media and current events, while exploring the topics of contemporary interest from the last 2-3 months.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**COM 210 Theory and Models of Communication 3.0 Credits**

Surveys historical and contemporary attempts to understand the process of human communication, using examples from the literature of interpersonal, group, organizational, and mass communication.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**COM 211 Children and Media 3.0 Credits**

This course examines the effects of media on the well-being and development of children and adolescents from a number of perspectives, including: emotional, intellectual, and physical. Through research, discussion and writing, students consider the effects of not only the “legacy” media (television, radio, music and print), but also those of “new” media, including social media.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**COM 220 Qualitative Research Methods 3.0 Credits**

This course provides a detailed investigation of the nature, application, analysis and write up of qualitative research in communication and the social sciences, including such topics as ethnography, in-depth interviews, focus groups, participant observation, and narrative analysis.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**COM 221 Quantitative Research Methods in Communication 3.0 Credits**

This course introduces students to quantitative methods used in the study of communication. The course will help student develop techniques to understand research problems in communication settings. Students will consider applications, including survey research, content analysis, usability testing, and experimental design, and will discuss procedures for developing, operationalizing, and testing questions within communication environments.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**COM 230 Techniques of Speaking 3.0 Credits**

A workshop course in improving public speaking skills. Provides experience in speeches of explanation, persuasion, and argument.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** HUM 102 [Min Grade: D] or HUM 105 [Min Grade: D] or HUM 107 [Min Grade: D] or ENGL 102 [Min Grade: D] or ENGL 105 [Min Grade: D]

**COM 240 New Technologies In Communication 3.0 Credits**

Provides an overview and survey of the changes taking place in the technologies of information production, distribution, storage, and display, including the interaction of these changes with legal, social, cultural, and communications systems.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**COM 246 Media and Identity 3.0 Credits**

This course focuses on the central role that identity plays in popular culture, exploring how media reflect diverse identities and how, in turn, we use media to construct our own identities.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**COM 261 Advanced Journalism 3.0 Credits**

This course is designed for students interested in advancing their knowledge of news reporting and writing. Students will learn how to cover meetings, speeches, public affairs, such as courts, and to write for digital media. In addition, students will learn how to write human-interest stories, called features.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** COM 160 [Min Grade: D]

**COM 265 Audio Journalism 3.0 Credits**

This course will familiarize students with the creation of audio news and editorial content that is used not only in traditional radio broadcasting, but also in web-delivered programming such as podcasts and streamed audio. Students will learn the unique characteristics of audio journalism, practice "writing for the ear" and will record and edit digital audio.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** COM 160 [Min Grade: D] or COM 260 [Min Grade: D]

**COM 266 Copy Editing for the Media 3.0 Credits**

This course is designed to acquaint students with the necessary skills to prepare written materials for the media. It will cover traditional print media, magazines and online media, such as websites and blogs. The importance of accuracy, consistency, and credibility in handling written copy will be emphasized. Skills to write captivating headlines, captions and other accompaniments to visuals will be a large focus of this class.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** COM 160 [Min Grade: D] or COM 260 [Min Grade: D]

**COM 270 [WI] Business Communication 3.0 Credits**

Covers the writing of business letters, resumes, memos, proposals, and reports. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** HUM 103 [Min Grade: D] or HUM 105 [Min Grade: A] or HUM 108 [Min Grade: D] or ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**COM 282 [WI] Public Relations Writing 3.0 Credits**

In this writing-intensive course, students will develop the professional-level writing skills expected of public relations practitioners. The objectives include building an understanding of PR writing styles and genres as a persuasive influence and learning how to use basic information in different PR media kits, memos, letter, and other external and internal communications.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** COM 181 [Min Grade: D] or COM 280 [Min Grade: D]

**COM 284 Public Relations Research, Measurement and Evaluation 3.0 Credits**

Public Relations research is the first essential element in the process of Public Relations. The purpose of this course is to introduce students to the methods of quantitative and qualitative research most widely used to assess an organization's public relations efforts.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** COM 181 [Min Grade: D] or COM 280 [Min Grade: D]

**COM 286 Public Relations Strategies and Tactics 3.0 Credits**

This course helps students better understand the advanced concepts, strategies, and tactics practiced in public relations today. It combines real-life case studies with core theoretical ideas to help students relate theory to the actual practice of the profession. This intermediate-level course connects scholarship with time-honored real-life PR strategies and tactics.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** COM 282 [Min Grade: D]

**COM 290 Sports and the Mass Media 3.0 Credits**

To explore the interrelationships between professional and college sports and the mass media. Students will look at how news media coverage has changes sports, the conventions found in sports journalism, promotion and marketing of sports teams and leagues, and how sponsorship of sporting events changes the nature of these events.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** HUM 103 [Min Grade: D] or HUM 105 [Min Grade: A] or HUM 107 [Min Grade: D] or ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**COM 305 Sports Journalism 3.0 Credits**

To gain a deeper appreciation for and understanding of the meaning-making power of sports journalism. We will explore the history of sports journalism, review and critique examples of historically significant sports writing and write game stories and columns based on actual coverage of local and on-campus sporting events.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** COM 260 [Min Grade: D] or COM 160 [Min Grade: D]

**COM 310 [WI] Technical Communication 3.0 Credits**

Develops skills in communicating technical information. Focuses on writing letters, resumes, proposals, reports, and instructions. Offers extensive writing practice along with exercises and presentations. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** HUM 103 [Min Grade: D] or HUM 105 [Min Grade: A] or HUM 108 [Min Grade: D] or ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**COM 311 Dynamics of Interpersonal Communication 3.0 Credits**

This course provides the student with a more thorough understanding of the communication dynamics between individuals. By reviewing scholarly writing on the subject and performing direct observations and analyses, students will acquire an appreciation of the complexities of interpersonal communication and enhanced communication skills.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** COM 210 [Min Grade: D]

**COM 315 Investigative Journalism 3.0 Credits**

Mastery of investigative reporting tactics and strategies enables student to explore and write about issues of great importance to the community.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** COM 260 [Min Grade: D] or COM 261 [Min Grade: D]

**COM 316 Campaigns for Health & Environment 3.0 Credits**

This seminar-style course explores theories and practical aspects of environmental and health campaigns and community-based social marketing campaigns. This course has a strong applied component.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**COM 317 [WI] Environmental Communication 3.0 Credits**

This reading and writing intensive course will explore communication about environmental issues. Topics can include advocacy campaigns, social marketing, environmental journalism, media coverage of environmental issues, green marketing, the environment in popular culture, risk communication, and public participation.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**COM 318 Film, Celebrity and the Environmental Movement 3.0 Credits**

Using the framework of mass media and behavioral change theories, we will look at the environmental movement through the lens of “eco celebrities” and mainstream environmental films and will discuss how Hollywood shapes our perceptions of the environment and whether this has helped or hurt the environmental movement.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**COM 320 [WI] Science Writing 3.0 Credits**

A workshop course in writing on scientific subjects. Includes analysis of the current market for science writing; examination of exemplary pieces of science writing; instruction in finding article ideas, interviewing, and working with editors; and production of feature-length articles. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**Prerequisites:** HUM 103 [Min Grade: D] or HUM 105 [Min Grade: A] or HUM 108 [Min Grade: D] or ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**COM 325 The Cultural Significance of Fame 3.0 Credits**

We will explore why fame is so important to us. Why do so many of us want it so badly? Why do we envy those who have it? What does the pursuit of fame say about us and about society? You will explore your own perception of fame, dissect your fame-related experiences, and analyze how the mass media keep us thinking and talking about fame.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** COM 150 [Min Grade: D]

**COM 330 Professional Presentations 3.0 Credits**

A workshop course in the theory and practice of making effective professional presentations for the technical and business professional. Provides a systems approach to the planning, production, and presentation of visual/aural programs.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** COM 230 [Min Grade: D]

**COM 335 Electronic Publishing 3.0 Credits**

Electronic Publishing gives students applied and theoretical knowledge of professional electronic publishing. Students will focus on issues relating to writing and integrating text and graphics to create websites and on-line publications. Students will also consider how issues in document design and usability can be used to evaluate websites.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: D] or HUM 103 [Min Grade: D] or HUM 105 [Min Grade: D] or HUM 108 [Min Grade: D]

**COM 340 Desktop Publishing 3.0 Credits**

Covers production of publications using desktop publishing software, including planning, writing, designing, and budgeting of institutional magazines, newsletters, manuals, and brochures. Requires students to design several pieces (letterheads and flyers).

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** HUM 103 [Min Grade: D] or HUM 105 [Min Grade: A] or HUM 108 [Min Grade: D] or ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**COM 342 English Worldwide 3.0 Credits**

This course provides an overview of the spread of English globally, by examining English as a language of trade, diplomacy, and education, as well as its status as an aesthetic and market force. For a final project, students research how English is utilized for social, economic, and political purposes in a single area of the world.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** HUM 103 [Min Grade: D] or HUM 105 [Min Grade: A] or HUM 108 [Min Grade: D] or ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**COM 345 Intercultural Communication 3.0 Credits**

This course introduces students to the theory and practice of intercultural communication. Drawing from traditions in anthropology and communication, intercultural communication is the study of the effect of differing cultural norms and beliefs upon communication between speakers. Through a wide range of readings, journal writing assignments, and participative and experiential activities, students will develop both their understanding of and skills in inter-cultural communication. A final project and presentation draws together participative experiences and the readings and class discussions.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**COM 350 [WI] Document Design and Evaluation 3.0 Credits**

Introduces the principles and practice of designing documents and measuring their effectiveness with audiences. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**COM 351 Computer Mediated Communication 3.0 Credits**

We focus on practices and affordances of Computer Mediated Communication (CMC). We consider how computer technology is used in social interaction and its practical consequences. We focus on social practices and uses of technology. We use qualitative methods of analysis to understand the practices of CMC.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** COM 220 [Min Grade: D]

**COM 352 Social Media and Communication 3.0 Credits**

Social Media provide a communication system for connecting, collaborating and building community. We will examine how these functions may be applied in personal, professional and political contexts. Activities will include readings, case studies and discussions. Students will create a strategic plan for using social media for personal, organizational or political purposes.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**COM 355 Ethnography of Communication 3.0 Credits**

Examines theories and methods of qualitative language and communication studies. Topics include story telling, greetings, gossip, self-presentation in talk, language of ritual and religion, men and women's roles in communication, and communicative events and competence. Case student in literature will be analyzed and will form a basis for the students' own ethnographic fieldwork.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** HUM 103 [Min Grade: D] or HUM 105 [Min Grade: A] or HUM 108 [Min Grade: D] or ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**COM 360 International Communication 3.0 Credits**

Examines the political, cultural, technological, and economic processes and effects of international communication flow.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**COM 362 International Negotiations 3.0 Credits**

This course is designed to give students a comprehensive overview of the field including different theoretical points of view on the process of international negotiations; the role of perceptions in this process; the role of internal politics and cultural variables in the process of international negotiations.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Pre-Junior or Senior.

**COM 363 Event Planning 3.0 Credits**

This course will provide the student with the theoretical and practical fundamentals in understanding the complexities of producing Special Events across all major industries. Special Events addresses all elements of the communication process.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**COM 365 Journalists, the Courts, and the Law 3.0 Credits**

Students explore and apply techniques for covering the court system, and explore case law and recent key legal developments that have reshaped how journalists do their jobs.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** COM 260 [Min Grade: D] or COM 160 [Min Grade: D]

**COM 375 [WI] Grant Writing 3.0 Credits**

Students explore the grant writing process, from the development of an idea and researching appropriate contributors, to writing a fully realized grant proposal, complete with budget. Course topics also include surveying the political and social climate before developing an idea, assessing an organization's capabilities to handle a project, and performing through literature reviews. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** COM 270 [Min Grade: D] or COM 310 [Min Grade: D] or SOC 260 [Min Grade: D]

**COM 376 Nonprofit Communication 3.0 Credits**

All nonprofit organizations must develop and maintain effective communication strategies in order to survive in a competitive economy. Nonprofits have unique needs and limitations in their longterm goals and short-term operations that relate to communication. This course introduces students to the ways nonprofits communicate with both their constituents and their benefactors and the ways researchers have examined these practices. Students will explore these two perspectives on nonprofit communication through a combination of scholarly readings, dialogues with local representatives in the nonprofit sector, and direct contact and work for a local nonprofit organization (as coordinated by the Drexel Center for the Support of Nonprofit Communication).

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**COM 377 Communication for Civic Engagement 3.0 Credits**

Extremist rhetoric and divisive politics seem to go hand-in-hand in today's public deliberations. The media so often pair the word rhetoric itself with the pejorative adjectives mere, empty, and deceptive, that anything rhetorical becomes vilified. This course draws from the ancient accounts of rhetoric and the contemporary studies on rhetoric to rehabilitate it as a way to inform our efforts towards a more civil public discourse. This course also will host guest speakers from local civic and political organizations who engage in rhetorical practices in the service of civic engagement, which includes the discourse both of people who exercise political power and of citizens who debate over public policies and cultural identity.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**COM 378 Public Service Campaigns 3.0 Credits**

Public communication campaigns are a familiar and essential part of American civic culture. Campaign topics range from personal issues, such as health, to social issues, such as equal opportunity, energy conservation, and environmental protection. Campaigns are regarded as public service programs if their goals are widely supported by the public and policymakers. If their goals are controversial, however, then they are regarded as advocacy strategies.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**COM 384 Free Speech & Censorship 3.0 Credits**

In this course, students will explore the various forms --some obvious, some not-- that censorship takes. Also explored will be what those who hold dissenting views endure as they try to contribute to the national dialogue. Historical and legal perspective on censorship will also be considered.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**COM 385 Media Effects 3.0 Credits**

Some people believe that the mass media rule our lives, making us fat, violent, sexist, etc. Some think that media are irrelevant. Of course these arguments are extreme and simplifications. In this course, we ask: What are the facts regarding media effects research?.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**COM 386 Public Relations Campaign Planning 3.0 Credits**

This capstone course will focus on the advanced aspects of public relations: how to analyze, plan, conduct, and implement successful public relations campaigns systematically and scientifically. Students will create full-scale PR campaigns, including budget, media materials, and social media tools, for their real-world "clients," and implement key activities.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** COM 284 and COM 286

**COM 390 [WI] Global Journalism 3.0 Credits**

Explores the issues facing journalists covering foreign affairs. Students will research and write news stories on issues of global import and will examine the work of foreign correspondents from historical and critical perspectives. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** COM 260 [Min Grade: D] or COM 261 [Min Grade: D]

**COM 391 Critiques of Journalism and News Media 3.0 Credits**

This course examines the role of journalism and news media in the social construction of our world. Focusing on key topics like framing and agenda setting in media research, we will critically consider how stories are routinely emphasized, excluded, organized, made sense of, and accumulate, plus more. We will discuss such topics in regard to various media (from newspapers to new media), various methods (qualitative and quantitative), and various public issues (including politics, music, sports, and representation of race/gender/sexuality/etc.).

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** COM 150 [Min Grade: D]

**COM 400 Seminar in Communication 3.0 Credits**

This is an upper-level seminar in various topics in Communication, including but not limited to Rhetoric. Students will undertake an in-depth examination of critical texts or themes in Communication. The course is intended for upper-level majors in Communication and can be repeated for credit with a different topic.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 4 times for 12 credits

**Restrictions:** Cannot enroll if classification is Freshman or Pre-Junior or Sophomore

**Prerequisites:** COM 210 [Min Grade: D]

**COM 410 [WI] Advanced Technical Writing 3.0 Credits**

Continues COM 310. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**Prerequisites:** COM 310 [Min Grade: D]

**COM 420 Technical, Science and Health Editing 3.0 Credits**

Introduces the theory and practice of technical editing, including project and copy editing.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**Prerequisites:** COM 270 [Min Grade: D] or COM 310 [Min Grade: D] or COM 375 [Min Grade: D] or COM 410 [Min Grade: D]

**COM 491 Senior Project in Communication I 3.0 Credits**

Covers planning and execution of a professional project that integrates the academic and practical knowledge the student has acquired in his or her major.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is COMM and classification is Senior.

**Prerequisites:** COM 210 [Min Grade: D] and (COM 220 [Min Grade: D] or SOC 250 [Min Grade: D])

**COM 492 Senior Project in Communication II 3.0 Credits**

Requires completion and evaluation of the project begun in COM 491.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is COMM and classification is Senior.

**Prerequisites:** COM 491 [Min Grade: D]

**COM I199 Independent Study in COM 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**COM I299 Independent Study in COM 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**COM I399 Independent Study in COM 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**COM I499 Independent Study in COM 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**COM T180 Special Topics in Communication Theory 3.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**COM T280 Special Topics in Communication Theory 3.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

**COM T380 Special Topics in Communication Theory 1.0-5.0 Credit**

Provides advanced communication studies covering various subjects in interpersonal, group, organizational, and mass communication. May be taken for credit twice.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

**COM T480 Special Topics in Communication Theory 3.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

## Complementary and Integrative Therapies

### Courses

**CIT 338 Introduction to Complementary & Integrative Health 3.0 Credits**

This course provides an introduction to the underpinning philosophy, and practice of complementary and integrative health (CIH). It presents an evidence-based review of the major categories including: phytomedicine, clinical aromatherapy, mind-body interventions, and the role of spirituality in health and healing. In addition, students explore effective relaxation techniques that help to integrate the mind-body-spirit connection, which support health and well-being.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**CIT 345 Holistic Self-Care 3.0 Credits**

Holistic Self-Care provides students with an A-Z approach to "living" a holistic, balanced life, complete with step-by-step guidelines necessary to incorporate dietary and lifestyle changes and effective stress reduction and stress management techniques to assist in navigating through the common challenges associated with student life and beyond. Students will be required to purchase a "Holistic Student Stress Reduction Kit", complete with specific essential oils, Meditation DVD, and guided stress reduction techniques.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Not repeatable for credit

**CIT 480 Special Topics in Complementary and Integrative Therapies 3.0 Credits**

This course consists of content that faculty or students have requested to meet undergraduate special needs or interests. Content is variable and is offered on a one-time, infrequent, or trial basis. Actual course description will be determined by the course director. May be repeated for credit if the topics vary.

**College/Department:** College of Nursing Health Professions

**Repeat Status:** Can be repeated 2 times for 9 credits

## Computer Science

### Courses

**CS 140 Introduction to Multimedia Programming 3.0 Credits**

Introduction to structured computer programming in a language designed for working with media (images, sound, video), e.g. Python/Jython.

Topics include: variables, input and output, expressions, assignment statements, conditionals and branching, files, repetition, functions and parameter passing, one-dimensional and two-dimensional arrays, and media manipulation. Stresses good programming style, documentation, debugging, and testing.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**CS 143 Computer Programming Fundamentals 3.0 Credits**

Introduction to structured computer programming in language of instruction (e.g. C++). Topics include: variables, input and output, expressions, assignment statements, conditionals and branching, files, repetition, functions and parameter passing, arrays, and string manipulation. Stresses good programming style, documentation, debugging and testing.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**CS 150 Computer Science Principles 3.0 Credits**

An introduction to computer science principles: the big ideas and computational thinking practices central to computer science, and the societal impact of computing and information technology. Exposure to algorithms, big data, machine learning, privacy, security and digital citizenship while introducing and reinforcing the importance of programming.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**CS 161 Introduction to Computing 3.0 Credits**

Introduction to the computer as a tool for productivity and communications. Provides fluency in the use of industry-standard software for professional communications and presentations, data analysis, and telecommunication. Introduce automation and programming to enhance the effective use of computers and computer applications.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Corequisite:** EXAM 080

**CS 164 Introduction to Computer Science 3.0 Credits**

An introduction to the field of computer science. Exposure to core areas (selected from algorithms, artificial intelligence, computer architecture, databases, graphics, human-computer interaction, programming languages, scientific computation, software engineering) while introducing and reinforcing the importance of programming.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Corequisite:** EXAM 080

**CS 171 Computer Programming I 3.0 Credits**

Introduces fundamental concepts of computing including memory, instructions, function calls, and activation records. Covers fundamentals of structured computer programming in the language of instruction: variables, input and output, expressions, assignment statements, conditionals and branching, subprograms, parameter passing, repetition, arrays, top-down design, testing, and debugging.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Corequisite:** EXAM 080

**CS 172 Computer Programming II 3.0 Credits**

Covers object-oriented design, inheritance hierarchies, information hiding principles, string processing, recursion, good programming style, documentation, debugging, and testing.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 171 [Min Grade: C] or CS 132 [Min Grade: C] or CS 175 [Min Grade: C]

**Corequisite:** EXAM 080

**CS 175 Advanced Computer Programming I 3.0 Credits**

Advanced programming in language of instruction at an accelerated pace: introduces fundamental concepts of computing including memory, instructions, function calls, and activation records. Covers fundamentals of structured computer programming in the language of instruction: conditionals and branching, subprograms, parameter passing, repetition, arrays, top-down design, testing, and debugging. Supplements basic topics with deeper presentation of advanced techniques for those with some incoming programming experience.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**CS 176 Advanced Computer Programming II 3.0 Credits**

Enhanced presentation of object-oriented design, inheritance hierarchies, information hiding principles, string processing, recursion, good programming style, documentation, debugging and testing. Includes special focus on language facilities and use of libraries.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 171 [Min Grade: C] or CS 175 [Min Grade: C]

**CS 190 Selected Computer Language 3.0 Credits**

Focuses on programming in a selected language of interest. Course content, language, and prerequisites may vary according to instructor, with emphasis on applications for which the language is designed. May be repeated for credit.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Can be repeated multiple times for credit

**CS 260 Data Structures 3.0 Credits**

Covers stacks, queues, linked allocation, binary trees, internal searching and sorting, hashing, and applications.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 265 [Min Grade: D]

**CS 265 Advanced Programming Tools and Techniques 3.0 Credits**

Introduction to the basic principles of programming practice: testing, debugging, portability, performance, design alternatives, and style. Application in a variety of programming languages, programming environments, and operating systems. Introduction to tools used in the software development process for improving program functionality, performance, and robustness.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 172 [Min Grade: D] or CS 176 [Min Grade: D] or CS 133 [Min Grade: D] or SE 103 [Min Grade: D] or ECEC 301 [Min Grade: D] or ECEC 201 [Min Grade: D]

**CS 270 Mathematical Foundations of Computer Science 3.0 Credits**

Introduces formal logic and its connections to Computer Science. Students learn to translate statements about the behavior of computer programs into logical claims and to prove such assertions using both traditional techniques and automated tools. Considers approaches to proving termination, correctness, and safety for programs. Discusses propositional and predicate logic, logical inference, recursion and recursively defined sets, mathematical induction, and structural induction.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 172 [Min Grade: D] or CS 176 [Min Grade: D] or CS 265 [Min Grade: D] or SE 103 [Min Grade: D] or ECEC 301 [Min Grade: D] or ECEC 201 [Min Grade: D]

**CS 275 Web and Mobile App Development 3.0 Credits**

This course introduces students to web-based and mobile development technologies and practices, including tiered application development, Service-Oriented Architectures and associated exchange protocols, and web-database programming. This course explores development and integration of web services from well-known providers as well as services created by the student, using a mobile platform as a vehicle for interactions with the services.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 265 [Min Grade: D] or (CS 164 [Min Grade: D] and CI 103 [Min Grade: D]) and (CS 172 [Min Grade: D] or CS 176 [Min Grade: D])

**CS 281 Systems Architecture 4.0 Credits**

Covers internal function and organization of digital computers, including instruction sets, addressing methods, input-output architectures, central processor organization, machine language, and assembly language.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (CS 270 [Min Grade: D] or ECE 200 [Min Grade: D]) and (CS 172 [Min Grade: D] or CS 176 [Min Grade: D] or SE 103 [Min Grade: D] or ECEC 301 [Min Grade: D])

**CS 283 Systems Programming 3.0 Credits**

This course introduces computer systems, including interaction of hardware and software through the operating system, from the programmer's perspective. Three fundamental abstractions are emphasized: processes, virtual memory, and files. These abstractions provide programmers a common interface to a wide variety of hardware devices. Topics covered include linking, system level I/O, concurrent programming, and network programming.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 265 [Min Grade: D]

**CS 300 Applied Symbolic Computation 3.0 Credits**

This course covers the fundamentals of symbolic mathematical methods as embodied in symbolic mathematics software systems, including: fundamental techniques, simplification of expressions, solution of applications problems, intermediate expressions swell, basic economics of symbolic manipulation, efficient solution methods for large problems, hybrid symbolic/numeric techniques.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 260 [Min Grade: D] and CS 270 [Min Grade: D] and MATH 200 [Min Grade: D] and MATH 201 [Min Grade: D]

**CS 303 Algorithmic Number Theory and Cryptography 3.0 Credits**

Covers fundamental algorithms for integer arithmetic, greatest common divisor calculation, modular arithmetic, and other number theoretic computations. Algorithms are derived, implemented and analyzed for primality testing and integer factorization. Applications to cryptography are explored including symmetric and public-key cryptosystems. A cryptosystem will be implemented and methods of attack investigated.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 260 [Min Grade: D] and (MATH 221 [Min Grade: D] or MATH 222 [Min Grade: D]) and (MATH 201 [Min Grade: D] or ENGR 231 [Min Grade: D])

**CS 338 Graphical User Interfaces 3.0 Credits**

This course covers the design and implementation of graphical user interfaces. Topics include: event-driven programming, application programmer interfaces, widgets, callback functions, windowing systems and desktops, rapid prototyping languages, multithreaded GUI's. A term project involving implementation of a complex application will be undertaken.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 350 [Min Grade: D] or SE 310 [Min Grade: D] or CS 275 [Min Grade: D]

**CS 341 Serious Game Development 3.0 Credits**

The goal of this course is to learn more about serious games, that is games used in a non-entertainment context, such as games for health, education, and persuasion, through readings and through the design, development, and implementation of serious games.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**CS 342 Experimental Game Development 3.0 Credits**

The goal of this course is to develop new ideas and innovations in games through the design, development, and implementation of games using short development cycles and creative thematic constraints.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 345 [Min Grade: D], GMAP 345 [Min Grade: D] (Can be taken Concurrently)

**CS 345 Computer Game Design and Development 3.0 Credits**

This course introduces students to the computer game design process. Students also learn how the individual skills of modeling, animation, scripting, interface design and story telling are coordinated to produce interactive media experiences for various markets, devices and purposes.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (DIGM 260 [Min Grade: D] or GMAP 260 [Min Grade: D]) and (CS 265 [Min Grade: D] or DIGM 141 [Min Grade: D])

**CS 350 [WI] Software Design 3.0 Credits**

Covers software design methods and implementation. Good design and implementation approaches will be motivated through software examples and reinforced through programming projects. Topics include architectural styles, code reuse, modularity and information hiding principles, object-oriented design patterns, design specification and formal methods, good coding and documentation practices. This is a writing intensive course.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**Prerequisites:** CS 260 [Min Grade: D] and CS 265 [Min Grade: D]

**CS 352 Processor Architecture & Analysis 3.0 Credits**

This course covers performance evaluation and benchmarking, pipelining, superscalar processors, multiprocessors, and interfacing processors and peripherals. The memory hierarchy, including cache and virtual memory, are also explored from a programmer's perspective with high-performance computing techniques in mind.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 281 [Min Grade: D] or ECEC 355 [Min Grade: D]

**CS 360 Programming Language Concepts 3.0 Credits**

Introduces the design and implementation of modern programming languages: formal theory underlying language implementation; concerns in naming, binding, storage allocation and typing; semantics of expressions and operators, control flow, and subprograms; procedural and data abstraction; functional, logic, and object-oriented languages. Students will construct an interpreter for a nontrivial language.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 260 [Min Grade: D] and CS 265 [Min Grade: D] and CS 270 [Min Grade: D]

**CS 361 Concurrent Programming 3.0 Credits**

Covers programming of concurrent, cooperating sequential processes. Studies race conditions, critical sections, mutual exclusion, process synchronization, semaphores, monitors, message passing, the rendezvous, deadlock, and starvation.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CS 260 [Min Grade: D] and (CS 281 [Min Grade: D] or ECEC 355 [Min Grade: D])

**CS 365 System Administration 3.0 Credits**

Fundamentals of system administration featuring hands-on practice with an industry standard operating system. Focus on installation, maintenance and management of several systems for multi-user environments.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 260 [Min Grade: D] and CS 265 [Min Grade: D]

**CS 370 Operating Systems 3.0 Credits**

Explores the internal algorithms and structures of operating systems: CPU scheduling, memory management, file systems, and device management.

Considers the operating system as a collection of cooperating sequential processes (servers) providing an extended or virtual machine that is easier to program than the underlying hardware. Topics include virtual memory, input/output devices, disk request scheduling, deadlocks, file allocation, and security and protection.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CS 283 [Min Grade: D] or ECEC 353 [Min Grade: D]

**CS 377 Software Security 3.0 Credits**

Examines ways to avoid and correct programming flaws that lead to software security vulnerabilities in web applications, code implementation, user interfaces, use of cryptography, concurrency and exception handling. It also exposes students to testing processes that are specifically targeted to uncovering security flaws.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 283 [Min Grade: D] or ECEC 353 [Min Grade: D]

**CS 380 Artificial Intelligence 3.0 Credits**

Explores the foundations of artificial intelligence: production systems, heuristic programming, knowledge representation, and search algorithms. Also covers programming in an AI language. Additional topics chosen from game theory, decision support systems, pattern matching and recognition, image understanding, natural language, fuzzy and non-monotonic logic, machine learning, theorem proving, and common sense reasoning.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CS 260 [Min Grade: D] and CS 270 [Min Grade: D]

**CS 383 Machine Learning 3.0 Credits**

This course covers the fundamentals of modern statistical machine learning. Lectures will cover the theoretical foundation and algorithmic details of representative topics including probabilities and decision theory, regression, classification, graphical models, mixture models, clustering, expectation maximization, hidden Markov models, and weak learning.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 260 [Min Grade: D] and (MATH 201 [Min Grade: D] or ENGR 231 [Min Grade: D]) and (MATH 221 [Min Grade: D] or MATH 222 [Min Grade: D]) and (MATH 311 [Min Grade: D] or MATH 410 [Min Grade: D] or ENGR 361 [Min Grade: D])

**CS 385 Evolutionary Computing 3.0 Credits**

This course covers computational intelligence approaches to problem solving for classification, adaptation, optimization, and automated control. Methods covered will include evolutionary programming/genetic algorithms, genetic programming, neural networks, swarm optimization, and fuzzy logic.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 260 [Min Grade: D] and CS 380 [Min Grade: D]

**CS 387 Game AI Development 3.0 Credits**

This course focuses on artificial intelligence (AI) techniques for computer games. Students will learn both basic and advanced AI techniques that are used in a variety of game genres including first-person shooters, driving games, strategy games, platformers, etc. The course will emphasize the difference between traditional AI and game AI, the latter having a strong design component, focusing on creating games that are "fun to play." Topics include path-finding, decision-making, strategy and machine learning in games.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 260 [Min Grade: D] and CS 380 [Min Grade: D]

**CS 430 Computer Graphics 3.0 Credits**

The course presents the fundamental geometric representations and drawing algorithms of computer graphics through lectures and programming assignments. The representations include lines, curves, splines, polygons, meshes, parametric surfaces and solids. The algorithms include line drawing, curve and surface evaluation, polygon filling, clipping, 3D-to-2D projection and hidden surface removal.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 260 [Min Grade: D] and (MATH 201 [Min Grade: D] or MATH 261 [Min Grade: D] or ENGR 231 [Min Grade: D])

**CS 431 Advanced Rendering Techniques 3.0 Credits**

The creation of realistic images from 3D models is central to the development of computer graphics. The ray tracing algorithm has become one of the most popular and powerful techniques for creating photo-realistic images. This class explores the algorithmic components of ray tracing. Students implement many of these components in their class programming projects.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 430 [Min Grade: D] or CS 432 [Min Grade: D]

**CS 432 Interactive Computer Graphics 3.0 Credits**

This is a project-oriented class that covers the concepts and programming details of interactive computer graphics. These include graphics primitives, display lists, picking, shading, rendering buffers and transformations. Students will learn an industry-standard graphics system by implementing weekly programming assignments. The course culminates with a student-defined project.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 260 [Min Grade: D] and (MATH 201 [Min Grade: D] or MATH 261 [Min Grade: D] or ENGR 231 [Min Grade: D])

**CS 435 Computational Photography 3.0 Credits**

Fundamentals of computational photography, an interdisciplinary field at the intersection of computer vision, graphics, and photography. Covered topics include fundamentals of cameras, novel camera designs, image manipulation, single-view modeling, and image-based rendering with an emphasis on learning the computational methods and their underlying mathematical concepts through hands-on assignments.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 260 [Min Grade: D] and (MATH 201 [Min Grade: D] or MATH 261 [Min Grade: D] or ENGR 231 [Min Grade: D])

**CS 440 Theory of Computation 3.0 Credits**

Finite automata, regular sets, and regular expressions; pushdown automata, context-free languages, and normal forms for grammars; Turing machines and recursively enumerable sets; Chomsky hierarchy; computability theory.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**Prerequisites:** CS 270 [Min Grade: D] and (MATH 221 [Min Grade: D] or MATH 222 [Min Grade: D])

**CS 441 Compiler Workshop I 3.0 Credits**

Design and implementation of compiler for specified language. Practical application and in-depth study of parsing, scanning, run-time storage management, type analysis, code generation, and error recovery.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**Prerequisites:** CS 270 [Min Grade: D] and (CS 283 [Min Grade: D] or ECEC 353 [Min Grade: D]) and CS 360 [Min Grade: D] and CS 440 [Min Grade: D]

**CS 442 Compiler Workshop II 3.0 Credits**

Continuation of CS 441. Advanced topics in compilation, code generation, and optimization for various programming languages and paradigms.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**Prerequisites:** CS 441 [Min Grade: D]

**CS 445 Topics in Computer Gaming 3.0 Credits**

Contemporary topics in the design and implementation of computer games. Topics may include game genres, psychological and sociological aspects of games, software tools and game development engines, character and behavior modeling, physical models and realism, virtual reality, graphics and animation, network-based games, performance analysis and efficiency.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Can be repeated 3 times for 9 credits

**Prerequisites:** CS 345 [Min Grade: D] or DIGM 345 [Min Grade: D]

**CS 451 Software Engineering 3.0 Credits**

Covers requirements specification, system modeling, formal methods, architectural design, object-oriented design, programming for reliability, user interface design, functional and structural testing, software reuse, and configuration management.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CS 270 [Min Grade: D] and (MATH 221 [Min Grade: D] or MATH 222 [Min Grade: D]) and (CS 350 [Min Grade: D] or SE 310 [Min Grade: D])

**CS 457 Data Structures and Algorithms I 3.0 Credits**

This course covers techniques for analyzing algorithms, including: elementary combinatorics, recurrence relations, and asymptotic analysis; data structures such as hash tables, red-black trees, B-trees, binomial and Fibonacci heaps, union-find trees; sorting algorithms and elementary graph algorithms.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 260 [Min Grade: D] and CS 270 [Min Grade: D] and (MATH 221 [Min Grade: D] or MATH 222 [Min Grade: D])

**CS 458 Data Structures and Algorithms II 3.0 Credits**

This course presents algorithm design techniques such as dynamic programming, greedy methods, divide and conquer, amortized algorithms; more graph algorithms for minimum spanning trees, shortest paths, and network flows; string matching algorithms; algorithms for finding the convex hull of a discrete set of points; NP-Completeness and approximation algorithms.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 457 [Min Grade: D]

**CS 461 Database Systems 3.0 Credits**

Covers topics including structure and function of database systems, normal form theory, data models (relational, network, and hierarchical), query processing (ISBL), relational algebra and calculus, and file structures. Includes programming project using DBMS.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CS 260 [Min Grade: D]

**CS 465 Privacy and Trust 3.0 Credits**

This course will motivate the need for privacy protection and introduce basic privacy properties such as anonymity, unlinkability or unobservability. We will then discuss how these properties can be formalized, modeled and measured. The course will provide a broad overview of the state-of-the-art in privacy technologies, explain the main issues that these technologies address, what the current solutions are able to achieve, and the remaining open problems.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 303 [Min Grade: D]

**CS 467 Security and Human Behavior 3.0 Credits**

Humans are usually the weakest link in information security. Technical measures are easily thwarted by end-user decisions. How are end user decisions made? This course examines security decisions online from the distinct perspective of economics, psychology, anthropology, evolutionary biology, and criminology. We will address topics such as System I vs. System II, mental models, risk perceptions, safety engineering, groups behaviors in primates.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECON 201 [Min Grade: D] (Can be taken Concurrently) (INFO 110 [Min Grade: D] or INFO 310 [Min Grade: D]) and PSY 101 [Min Grade: D]

**CS 472 Computer Networks: Theory, Applications and Programming 3.0 Credits**

Introduction to computer networking theory, applications and programming, focusing on large heterogeneous networks. Broad topdown introductions to computer networking concepts including distributed applications, socket programming, operation system and router support, router algorithms, and sending bits over congested, noisy and unreliable communication links.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 361 [Min Grade: D] or CS 283 [Min Grade: D] or ECEC 353 [Min Grade: D]

**CS 475 Computer and Network Security 3.0 Credits**

The key objective of this course is to provide a thorough understanding of technologies and methodologies with which computer networks can be protected. Topics that are covered include: key management and credentials, steganography and watermarking, networking security (VPNs, firewalls, intrusion detection) and system security policies.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 472 [Min Grade: D] or CS 283 [Min Grade: D] or ECEC 353 [Min Grade: D]

**CS 476 High Performance Computing 3.0 Credits**

This course is an introduction to high performance computing, including concepts and applications. Course contents will include discussions of different types of high performance computer architectures (multi-core/multi-threaded processors, parallel computers, etc), the design, implementation, optimization and analysis of efficient algorithms for uni-processors, multi-threaded processors, parallel computers, and high performance programming.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (CS 281 [Min Grade: D] and CS 283 [Min Grade: D]) or (ECEC 353 [Min Grade: D] and ECEC 355 [Min Grade: D])

**CS 479 Advanced Network Security 3.0 Credits**

A study of what it takes to make a network secure, starting with an analysis of the sometimes conflicting goals (e.g. anonymity vs. traceability) through the mechanisms that can be used to achieve these goals. Covers in depth both the design options available and the design decisions made in various deployed systems, including Kerberos, IPsec, SSL, and X.509.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 475 [Min Grade: D]

**CS 481 Advanced Artificial Intelligence 3.0 Credits**

This course covers topics in representation, reasoning, and decision-making under uncertainty; learning; solving problems with time-varying properties. Assignments applying AI techniques toward building intelligent machines that interact with dynamic, uncertain worlds will be given.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 380 [Min Grade: D] and (MATH 311 [Min Grade: D] or MATH 410 [Min Grade: D] or ENGR 361 [Min Grade: D])

**CS I199 Independent Study in CS 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Can be repeated multiple times for credit

**CS I299 Independent Study in CS 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Can be repeated multiple times for credit

**CS I399 Independent Study in CS 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Can be repeated multiple times for credit

**CS I499 Independent Study in Computer Science 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Can be repeated multiple times for credit

**CS T180 Special Topics in Computer Science 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Can be repeated multiple times for credit

**CS T280 Special Topics in Computer Science 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Can be repeated multiple times for credit

**CS T380 Special Topics in Computer Science 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Can be repeated multiple times for credit

**CS T480 Special Topics in Computer Science 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Can be repeated multiple times for credit

# Computing Technology

## Courses

**CT 140 Network Administration I 3.0 Credits**

Students gain an understanding of terminology, technology, and issues involved in implementing networks. Topic include: understanding the OSI 7 layer model; concepts of servers and clients; network hardware/software functions; basics of TCP/IP protocol, main types of network topologies (bus, ring, star and mesh); and share and access network resources (files, printers, etc.).

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** INFO 101 [Min Grade: D]

**CT 200 Server I 3.0 Credits**

Introduces administration and management of Windows operating system. Topics include operating systems installation, configuration, directory services, data storage subsystems, troubleshooting and problem determination of server. In addition the course will cover redundancy, upgrading, and disaster recovery.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** INFO 101 [Min Grade: D]

**CT 201 Information Technology Security I 3.0 Credits**

Surveys information security topics; familiarizes students with the technologies and policies that support confidentiality, integrity and availability. Industry standards for security architecture, operational security, policy and governance are covered and provides the foundations for further study of information security.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**CT 210 Open Server I 3.0 Credits**

Introduces administration of open source operating systems and management of open servers. Topics covered include the boot process and fundamental server concepts related to processing, memory and storage. Addresses use of a command line interface to manage processes, modify file permissions, examine configuration settings, and run utilities for server administration.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**CT 212 Computer Forensics I: Fundamentals 3.0 Credits**

This course presents the theory, methodology and hands-on labs necessary for students to become competent in the basics of computer forensics. Topics covered include: understanding computer investigations, the investigators, laboratory, current forensics tools, digital evidence controls and processing crime.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**CT 214 Computer Forensics II: Forensics and Investigations 3.0 Credits**

Students will learn what computer forensics and investigation is as a profession and gain an understanding of the overall investigative process. Disk structures and operating system architectures are analyzed. Topics include the importance of the digital evidence control process and how to process crime and corporate scenes, data acquisition of single and RAID systems, computer forensics analysis, e-mail investigations, investigative report writing and expert witness requirements.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CT 212 [Min Grade: D]

**CT 215 Computer Forensics III: Advanced Computer Forensics 3.0 Credits**

This course provides a solid foundation and advanced topics for students who will soon be in the field conducting computer forensic investigations, public or private. This course will introduce computer forensics to non-traditional devices such as smart phones and other non-traditional devices. Advanced topics include live memory analysis, anti-forensic techniques and portable media analysis including iPhones, Blackberrys and other smart phones. This course will use current open source and commercial tools.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CT 214 [Min Grade: D]

**CT 250 IT Security Awareness 3.0 Credits**

This course explores the challenges IT security teams face when trying to mitigate threats targeting the human element within their organizations. IT Security Awareness introduces students to techniques and concepts that threaten security of organizations by targeting their human assets.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**CT 301 Information Technology Security II 3.0 Credits**

Focuses on securing digital infrastructure by examining threats, vulnerabilities, and technologies used to prevent cyber attacks such as: encryption, security devices, software, authentication and identity protocols. Hands-on labs demonstrate the use of tools and techniques discussed in the course.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CT 140 and CT 201

**CT 310 Open Server II 3.0 Credits**

Presents an in depth study of server administration utilizing the Linux Operating System. Topics covered include: shell environments, shell program structures, executions, variables, positional parameters, special shell variables, and shell programming statements. In addition the course will examine shell conditional statements, looping constructs, interrupt handling, and debugging tools.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CT 210 [Min Grade: D]

**CT 312 Access Control and Intrusion Detection Technology 3.0 Credits**

Fundamental theory and methodology of intrusion detection systems. Using intrusion detection systems to secure corporate and personal networks against attacks. Hands-on laboratory experience using an in-depth, open-source network intrusion detection system.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CT 420 [Min Grade: D] or CT 301 [Min Grade: D]

**CT 315 Security Management Practice 3.0 Credits**

Managerial issues involved in the daily operations of an IT Security department. Topics include staffing, budgets, job descriptions, long term planning, resource allocation, training of security personnel, motivational techniques, interaction with other departments including upper management.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Pre-Junior or Sophomore

**CT 320 Server II 3.0 Credits**

Presents an in depth study of Windows server operating system and active directory. Topics include installation, implementation, administration of resources, monitoring, troubleshooting techniques. In addition, the course will examine Windows based network management tools, high availability and disaster recovery.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CT 200 [Min Grade: D]

**CT 330 Network Administration II 3.0 Credits**

Course covers both theoretical knowledge and hands-on exercises for networking using CISCO hardware. Topics include: Extending Switched Networks with VLANs; Determining IP Traffic with Access Lists; Establishing Point-to-Point Connections; and Establishing Frame Relay Connections.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CT 140 [Min Grade: D]

**CT 335 Mobile Applications 3.0 Credits**

Provides students with an understanding of mobile technologies and the components for building and testing mobile applications. Topics covered include: mobile frameworks, plugins, mobile device storage, visual design and user interfaces for mobile applications, device sensors, and compression.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CT 230 [Min Grade: D] or INFO 152 [Min Grade: D] or CS 265 [Min Grade: D]

**CT 353 Virtual Environments and Cloud Security 3.0 Credits**

This course explores various models of virtual servers, storage, networks and levels of cloud computing. Students will learn how to apply best practice solutions to secure virtual environments and the different levels of cloud computing.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CT 200 [Min Grade: D] and CT 210 [Min Grade: D]

**CT 355 Wireless Network Security Technology 3.0 Credits**

Theory, methodology and hands-on labs relating to the unique security issues of Wireless Networks. Limitations and risks of Wireless Networks. Use of audit and exploit tools to discover security flaws. Protocol and signal vulnerabilities. Methods to secure such vulnerabilities.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CT 420 [Min Grade: D] or CT 301 [Min Grade: D]

**CT 362 Network Auditing Tools 3.0 Credits**

Theory, methodology and hands-on labs relating to Network Auditing. The course relies on advanced multi-functional network auditing tools to uncover Network Security problems, with the purpose of eliminating these vulnerabilities.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CT 420 [Min Grade: D] or CT 301 [Min Grade: D]

**CT 382 Applied Cryptography 3.0 Credits**

This course presents the theory, methods, strengths, weaknesses, and effective strategies necessary for students to acquire a fundamental knowledge of Cryptography and Stenography. This is a hands-on course utilizing several tools and software programs. Emphasis is placed on formulating effective strategies, such as when and how to protect computer data.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**CT 388 Topics in Computing Technology I 3.0 Credits**

This course will cover special topics of interest to students in the Computing Technology Major. May be repeated for credit.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Can be repeated 4 times for 12 credits

**CT 389 Topics in Computing Technology II 3.0 Credits**

This course will cover special topics of interest to students in the Computing Technology Major. May be repeated for credit.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Can be repeated 4 times for 12 credits

**CT 390 Server Side Programming 3.0 Credits**

This class is designed to provide students with intensive hands-on experience in using server-side technology to develop Web applications. Server-side programming, sometimes called servlets, is a powerful hybrid of the Common Gateway Interface (CGI) and lower-level server APU programming such as NSAPI from Netscape and ISAPI from Microsoft.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CT 290 [Min Grade: D]

**CT 393 Information Technology Security Risk Assessment 3.0 Credits**

This course addresses risk management methodology, the specific procedures for determining assets valuation, vulnerabilities, and threats. Risk migration methods that security professional use to protect valuable IT assets will also be studied. Issues, designed to foster critical thinking, are explored, as well as the standardized approaches to risk management.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**CT 400 Network Security 3.0 Credits**

This class focuses on the security aspects of networks. Topics covered: intrusion detection, VPN, and Firewalls. This course is designed to provide students with the necessary skills and information aligned with Securing Networks.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CT 330 [Min Grade: D]

**CT 402 Network Security II 3.0 Credits**

Theory, methodology of Security firewalls, Topics include: firewall models, user interfaces, feature sets, interfaces, routing, IP addressing services, IP multicast support, monitoring with SNMP, authentication, authorization, and accounting, address translation, traffic content filtering, application inspection, traffic shunning, and firewall failover.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**Prerequisites:** CT 400 [Min Grade: D]

**CT 412 Information Technology Security Policies 3.0 Credits**

This course presents the theory and legal issues necessary for students to acquire fundamental knowledge of Computer Policies for information Security. Topics covered include: E-mail, Employee Privacy, Labor Organization Activities (Fair Use), Avoiding Discrimination and Harassment, Copyright, Defamation, Spamming, Trade Secrets & Confidential Information, Attorney-Client communication via E-mail, Computer Security, Preventing Waste of a Computer Resources, Essentials for Good Policy, and Ensuring Compliance.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**CT 414 Ethical Hacking and Penetration Testing 3.0 Credits**

This course provides students with the opportunity to learn hands-on techniques to protect and secure their information-critical infrastructure against cyber-attacks, viruses, worms, and other system cyber vulnerability weaknesses that pose significant threat to organizational systems.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CT 140 [Min Grade: D] and CT 200 [Min Grade: D] and CT 210 [Min Grade: D]

**CT 415 Disaster Recovery and Continuity Planning 3.0 Credits**

Disaster Recovery & Continuity Planning specific to Emergency Recovery Procedures. Techniques for development of disaster recovery plans, procedures and testing methods. Strategies used by businesses to assure that sensitive data will not be lost in the event of a disaster. Techniques used to manage potential risk within multiple environments.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**CT 432 Information Technology Security Systems Audits 3.0 Credits**

This course presents the theory, methodology, procedures and hands-on labs necessary for students to acquire a fundamental working knowledge of IT System Audits. Students learn how to discover system vulnerabilities with proper audit procedures, and how to document their findings properly for upper management.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CT 420 [Min Grade: D] or CT 301 [Min Grade: D]

**CT 491 Senior Project I 3.0 Credits**

This course is an independent project which small student teams determines and scopes an appropriate computing technology project that can be completed within the constraints of time and resources under faculty guidance. The objective of the course is to provide specifications and requirements for the team project.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**CT 496 Senior Project II 3.0 Credits**

This course is a continuation of Senior Project I. In this course, student-teams are required to implement their project specifications and requirements developed in the previous course.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** CT 491 [Min Grade: D]

**CT I199 Independent Study in CST 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Can be repeated multiple times for credit

**CT I299 Independent Study in CST 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Can be repeated multiple times for credit

**CT I399 Independent Study in CST 0.5-9.0 Credits**

Provides individual study or research in computing and security technology with faculty supervision. This course may be repeated for credit.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Can be repeated 2 times for 6 credits

**CT I499 Independent Study in CST 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Can be repeated multiple times for credit

## Computing and Informatics

### Courses

**CI 101 Computing and Informatics Design I 2.0 Credits**

Introduces computing and informatics through a combination of lectures and hands-on laboratory exercises. Lectures emphasize an integrated view of topic areas and systems, spanning low-level software and implementation issues to high-level use and acceptance by individuals and communities. Lab exercises allow students to explore familiar systems in unique and novel ways to better understand how these systems are designed and used.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**CI 102 Computing and Informatics Design II 2.0 Credits**

Introduces computing and informatics through a combination of lectures and hands on laboratory exercises. Lectures emphasize an integrated view of topic areas and systems, spanning low level software and implementation issues to high level use and acceptance by individuals and communities. Lab exercises allow students to explore familiar systems in unique and novel ways to better understand how these systems are designed and used.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**CI 103 Computing and Informatics Design III 2.0 Credits**

Follows CI 102 in the Computing & Informatics design sequence.

Introduces computing and informatics through a combination of lectures and hands-on laboratory exercises. Lectures emphasize an integrated view of topic areas and systems, spanning low-level software and implementation issues to high-level use and acceptance by individuals and communities. Lab exercises allow students to explore familiar systems in unique and novel ways to better understand how these systems are designed and used.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CI 102 [Min Grade: D]

**CI 106 Computing & Informatics Design Project 4.0 Credits**

Introduces computing and informatics through a term-long design project.

Lectures emphasize an integrated view of topic areas and systems, spanning low-level software and implementation issues to high-level use and acceptance by individuals and communities. Lab exercises allow students to explore familiar systems in unique and novel ways to better understand how these systems are designed and used.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**CI 120 CCI Transfer Student Seminar 2.0 Credits**

Introduces students to the academic and co-curricular aspects of university life. Includes academic functions such as reflection papers, reading, and study skills, as well as co-curricular functions such as campus resources, activities, and social programs. Aids in the transition to student life at Drexel and is designed to help each student achieve academic and personal success through academic and career exploration.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**CI 491 [WI] Senior Project I 3.0 Credits**

Part of a multi-term capstone experience involving in-depth study and application of computing and informatics. Students work in teams to develop a significant product. Requires use of a development process that includes planning, specification, design, implementation, evaluation, and documentation. This course is writing intensive.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 451 [Min Grade: D] or INFO 324 [Min Grade: D] or INFO 442 [Min Grade: D] or SE 310 [Min Grade: D]

**CI 492 [WI] Senior Project II 3.0 Credits**

Part of a multi-term capstone experience involving in-depth study and application of computing and informatics. Students work in teams to develop a significant product. Requires use of a development process that includes planning, specification, design, implementation, evaluation, and documentation. This course is writing intensive.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CI 491 [Min Grade: D]

**CI 493 [WI] Senior Project III 3.0 Credits**

Part of a multi-term capstone experience involving in-depth study and application of computing and informatics. Students work in teams to develop a significant product. Requires use of a development process that includes planning, specification, design, implementation, evaluation, and documentation. This course is writing intensive.

**College/Department:** College of Computing and Informatics

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CI 492 [Min Grade: D]

# Construction Management

## Courses

**CMGT 101 Introduction to Construction Management 3.0 Credits**

This course will introduce the basic history and management concepts of the construction industry to students with the expectation that upon completion students will have an overview of the industry. Career choices, industry firms, and key players in the Construction Management process will be explored.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Junior or Senior

**CMGT 161 Building Materials and Construction Methods I 3.0 Credits**

This course is designed to explore the range of building materials in use today and their interrelationships in a construction project. Topics will include a study of the major components of construction materials, the selection process, specification, alternatives, procurement, placement and quality management for the building systems covered. Foundations, excavations, wood framing and steel construction and the role these materials play in the success of a project once chosen will be considered and evaluated.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is AE or major is CIVE

**CMGT 162 Building Materials and Construction Methods II 3.0 Credits**

Continues CMGT 161. Covers concrete, reinforced concrete, site cast and pre-cast concrete, brick and concrete masonry, reinforced masonry, and properties of these materials and construction methods associated with them.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is AE or major is CIVE

**Prerequisites:** CMGT 161 [Min Grade: D]

**CMGT 163 Building Materials and Construction Methods III 3.0 Credits**

Continues CMGT 162. Covers roofing systems, glass, glazing, windows, doors, cladding systems, interior finishes, the properties of these materials and construction methods associated with each of them.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is AE or major is CIVE

**Prerequisites:** CMGT 162 [Min Grade: D]

**CMGT 240 [WI] Economic Planning for Construction 3.0 Credits**

Covers techniques for economic decision making for building and infrastructure construction topics. Topics include cash flow, present worth analysis, equivalent annual worth, rate of return, risk analysis, and benefit/cost analysis.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is AE

**Prerequisites:** MATH 121 [Min Grade: D]

**CMGT 251 Construction Surveying 3.0 Credits**

Covers the theory and use of surveying instruments and principles of plane and topographic surveying. Introduces satellite positioning, geomatics, and other modern surveying techniques related to construction.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is AE

**Prerequisites:** MATH 121 [Min Grade: D]

**CMGT 261 Construction Safety 3.0 Credits**

Covers OSHA liability, general safety, hazard communication, fire, material handling, tools, welding, electricity, scaffolding, fall protection, cranes, heavy equipment, excavation, concrete, ladders and stairways, confined space entry, personal protective equipment, and health hazards. Course approved by the osha Training Institute.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is AE or major is ARCH or major is CIVE or major is CMGT or major is EE.

Cannot enroll if classification is Freshman

**CMGT 262 Building Codes 3.0 Credits**

Familiarizes students with the content of the boca International Building Code (emphasizing the non-structural provisions), the purpose and intent of code requirements, and how to apply the code to structures and occupancies. Examines how the code is used as a tool in design and construction and prepares students for the advent of a single model building code planned for the nation.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is AE or major is ARCH or major is CIVE or major is CMGT or major is EE.

Cannot enroll if classification is Freshman

**CMGT 263 Understanding Construction Drawings 3.0 Credits**

This course examines a variety of construction documents, including drawings, details, graphic standards, sections, and quantities for competitive bidding and execution of projects. Both residential and commercial construction documents will be examined.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CMGT 101 [Min Grade: D] and CMGT 161 [Min Grade: D]

**CMGT 265 Information Technologies in Construction 3.0 Credits**

The objective of this course is to expose students to a large variety of information technologies in construction and will discuss the impact of these technologies on work environments, processes, and work quality. Students will investigate a variety of issues surrounding IT in construction including implementation, standards, integration, knowledge management and the underlying technology.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**CMGT 266 Building Systems I 3.0 Credits**

This course covers construction management and design concepts relating to heating, ventilation, and air conditioning systems and the integration of these systems into the building design and construction process.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** PHYS 182 [Min Grade: D]

**CMGT 267 Building Systems II 3.0 Credits**

Continues CMGT 266. This course covers construction management concepts relating to electrical systems, wiring, lighting, signal and data systems, and transportation systems and the integration of these into the building design and construction process.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CMGT 266 [Min Grade: D]

**CMGT 270 Principles of Statics for Construction Management 3.0 Credits**

This algebra-based course is the study of forces acting upon structural elements. Analytic and graphic methods are used to illustrate resultants and reactions, equilibrium, centroids and moments of inertia applied to static structures. Analysis includes stress, strain, axial loading, bending, and deflection of beams.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** MATH 110 [Min Grade: C-] and (PHYS 151 [Min Grade: C-] or PHYS 101 [Min Grade: C-] or PHYS 182 [Min Grade: C-])

**CMGT 355 Introduction to Sustainability in Construction 3.0 Credits**

An overview of the design and construction of high performance buildings. Students will gain topical familiarity with the wide range of issues related to sustainable design and construction. The USGBC's green building certification program will be covered in detail. Both historical and contemporary case studies will be utilized.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**CMGT 361 Contracts And Specifications I 3.0 Credits**

Analyzes construction contracts, specifications, and practices with regard to business law and liability. Required for construction management students. Elective for others. Fall.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**CMGT 362 Contracts and Specifications II 3.0 Credits**

Continues CMGT 361. Examines contractor, architect, and engineer responsibilities through case studies and class discussions. Winter.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CMGT 361 [Min Grade: D]

**CMGT 363 Estimating I 3.0 Credits**

Covers discussion of the estimating function and review and applications of material quantity survey techniques used in estimating costs of construction projects. Includes types of approximate and precise methods of estimating and their uses, and computer applications. Required for construction management students.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** MATH 110 [Min Grade: D] and CMGT 263 [Min Grade: D]

**CMGT 364 Estimating II 3.0 Credits**

Covers pricing and bidding of construction work including cost factors, labor and equipment, productivity factors, prices databases, job direct and indirect costs, methods of estimating time, materials, equipment, subcontractors' work, general expenses, and profit, bid preparations and submission, and computer applications.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CMGT 363 [Min Grade: D]

**CMGT 365 Soil Mechanics in Construction 4.0 Credits**

Gives an overview of the types of problems encountered in geotechnical construction. Subjects covered will be composition, groundwater fundamentals, settlement and consolidation, stability of earth slopes, types of foundations and behavior of difficult soils.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**Prerequisites:** CMGT 161 [Min Grade: D] and MATH 121 [Min Grade: D] and PHYS 182 [Min Grade: D]

**CMGT 366 Construction Accounting and Financial Management 3.0 Credits**

This course brings together all of the key principles from general business accounting, financial management, and engineering economics needed by construction managers vis-a-vis the unique characteristics of the construction industry, and addresses how these principles are specifically applied in the construction industry, and how they should interact effectively to ensure the efficient and profitable management of construction projects and companies.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ACCT 116 [Min Grade: D] and CMGT 364 [Min Grade: D] and CIVE 240 [Min Grade: D]

**CMGT 371 Structural Aspects in Construction I 3.0 Credits**

The first of two course series designed specifically for construction management majors. The sequence addresses the interactions of different kinds of loads with common structural elements and design considerations for typical construction materials. This course places emphasis on the design of wood framed construction.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**Prerequisites:** CMGT 161 [Min Grade: D] and MATH 121 [Min Grade: D] and PHYS 182 [Min Grade: D]

**CMGT 372 Structural Aspects in Construction II 3.0 Credits**

The second part in a two-course sequence for Construction Management majors. The course places emphasis on the design and analysis of concrete and steel frame construction.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CMGT 371 [Min Grade: D]

**CMGT 375 Building Information Modeling in Construction 3.0 Credits**

This course is intended to provide students with a hands-on introduction to Building Information Modeling (BIM) in Construction. Emphasis will be placed on the use of BIM to support current construction activities such as design review, coordination, scheduling, logistics, estimating, and project close-out. Topics will include an introduction to 3D BIM modeling, 3D coordination and clash detection, 4D visual scheduling and logistics, 5D estimating, and BIM for Facility Management. Students will learn the fundamentals of the most widely used software applications in the construction industry: SketchUp, Revit and Navisworks.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CMGT 265 [Min Grade: D]

**CMGT 385 Selling and Negotiation Techniques in Construction 3.0 Credits**

Applies negotiation and marketing principles to the construction industry. Includes understanding the roles of market research, business development planning, negotiation and networking techniques. Students will acquire the skills and techniques to prepare a winning presentation and negotiations.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**CMGT 450 Management of Field Operations 3.0 Credits**

This course is intended to equip students with knowledge and skills required to successfully manage and support construction field operations. Knowledge areas include contract administration, project engineering, site superintendence, and other topics critical to field operations.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is AE or major is ARCH or major is CHE or major is CIVE or major is CMGT or major is CPM or major is EE or major is IAD or major is PRMT.

Cannot enroll if classification is Freshman or Sophomore

**CMGT 451 Heavy Construction Principles & Practices 3.0 Credits**

This course is intended to provide students an introduction to the principles and practices employed in heavy construction. The course content is presented from a practical perspective focusing on actual field applications.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is AE or major is ARCH or major is CHE or major is CIVE or major is CMGT or major is EE or major is IAD or major is INTR.

Cannot enroll if classification is Freshman or Pre-Junior or Sophomore

**CMGT 461 Construction Management 3.0 Credits**

Covers construction management concepts and practices, the management system, construction planning and programming, project control, environmental management, total quality management, and ethics in construction management. Winter.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is AE or major is ARCH or major is CIVE or major is CMGT or major is INTR and classification is Junior or Pre-Junior or Senior.

**CMGT 463 Value Engineering 3.0 Credits**

Covers the value concept, value engineering job plan, and techniques of project selection.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is AE or major is ARCH or major is CHE or major is CIVE or major is CMGT or major is EE or major is INTR or major is PRMT.

Cannot enroll if classification is Freshman or Pre-Junior or Sophomore

**CMGT 467 Techniques of Project Control 4.0 Credits**

This course covers construction planning, scheduling, network systems, and communications required for project control, diagram logic, and Earned Value Analysis.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is AE or major is ARCH or major is CIVE or major is CMGT or major is CPM or major is EE or major is ENGR or major is IAD or major is MECH or major is MSE or major is PRMT or major is PROJ.

**Prerequisites:** CMGT 363 [Min Grade: D]

**CMGT 468 Real Estate 3.0 Credits**

Overview of the development process including site selection, residential densities, market analysis and cash flow analysis.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**CMGT 469 Construction Seminar: Contemporary Issues 3.0 Credits**

This course is intended to prepare students for professional practice through a survey of the current and future state of the industry.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Junior or Pre-Junior or Sophomore

**CMGT 470 Productivity in Construction 3.0 Credits**

Explores the evaluation of construction management's effectiveness. Overview of techniques required for improvement of construction field efficiency including quality management, productivity measurements, method improvement, human factors, and communications.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**CMGT 485 Habits of Successful Design and Build Construction 3.0 Credits**

The course develops specific and essential skills necessary for success within the construction workforce and project environments. Students will learn to convert virtues to habits for life and career success in the challenges of the construction industry. Strategic skills in planning and scheduling, information handling, critical event completion, problem solving, negotiating, and team-building techniques crucial to the construction process will be analyzed and developed.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CMGT 385 [Min Grade: D]

**CMGT 486 Leading in the Construction Industry 3.0 Credits**

Leadership fundamentals for Constructors. Investigation of self mastery to include behavioral profiles and emotional intelligence quotients to establish a baseline for skill development and personal growth required in the construction industry. Engagement in team building and communication models. Examination of leadership traits and skills through analysis of theory and comparison of construction industry leaders.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CMGT 485 [Min Grade: D]

**CMGT 491 Senior Capstone I 3.0 Credits**

First component of a three-part capstone series. It is the initial problem proposal phase. Students meet with clients and establish project goals, budget, and timeline. Emphasis on proposal writing, defining customer needs, and effective presentation skills.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** CMGT 364 [Min Grade: D] and CMGT 385 [Min Grade: D]

**CMGT 492 Senior Capstone II 3.0 Credits**

Continues CMGT 491. This course requires preparation of options and alternative solutions to the problem defined in the proposal phase. It requires a written and oral progress report.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** CMGT 491 [Min Grade: D]

**CMGT 493 Senior Capstone III 3.0 Credits**

Continues CMGT 492. Requires presentation of alternative solutions to client representatives in both oral and written reports.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** CMGT 492 [Min Grade: D]

**CMGT I199 Independent Study in CMGT 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CMGT I299 Independent Study in CMGT 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CMGT I399 Independent Study in CMGT 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CMGT I499 Independent Study in CMGT 0.0-4.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Can enroll if classification is Senior.

**CMGT T180 Special Topics in CMGT 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CMGT T280 Special Topics in CMGT 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**CMGT T380 Special Topics in CMGT 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

**CMGT T480 Special Topics in CMGT 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

# Cooperative Education

## Courses

### COOP 001 Co-op Essentials 0.0 Credits

Co-op Essentials is an accelerated version of the required course for co-op students, COOP 101. It is designed for non-traditional students with significant work history. The course covers all of the essential job development topics including, introduction to the SCDC and SCDCOnline, resumes, interviewing, and workplace issues. The emphasis of Co-op Essentials is on integrating and adapting the student's previous experience to a co-op environment.

**College/Department:** University Courses

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if concentration is 4COP or concentration is 4TOP or concentration is 5COP or concentration is 5TOP.

### COOP 101 Career Management and Professional Development 0.0 Credits

Prepares new students to achieve success, personally and academically, in their first co-operative education experience. Topics covered include career exploration, resume skills, interview techniques, professional conduct in the job search, contemporary workplace issues, and job searching and the Internet.

**College/Department:** University Courses

**Repeat Status:** Not repeatable for credit

### COOP 201 Co-op Experience 16.0 Credits

**College/Department:** University Courses

**Repeat Status:** Can be repeated 6 times for 96 credits

### COOP 250 Professional Skills Enrichment 0.0 Credits

Professional Skills Enrichment is designed to enable the student to hone their job search skills. Taught as a series of workshops, each class focuses on a different career-related topic including Networking, Utilizing Social Networking Sites, and Mastering the Interview. Students are required to attend a mock interview and participate in a mock networking event.

**College/Department:** University Courses

**Repeat Status:** Not repeatable for credit

### COOP 301 Co-op/Internship Experience 16.0 Credits

**College/Department:** University Courses

**Repeat Status:** Can be repeated 2 times for 34 credits

# Creativity Studies

## Courses

### CRTV 301 Foundations in Creativity 3.0 Credits

This course provides a foundation in creativity including leading creativity theorists and their ideas, and introduction to creativity in many fields. Students will explore basic creative characteristics including originality, fluency, flexibility, elaboration, resistance to premature closure, and tolerance of ambiguity. Sets the foundation for acquiring tools and applying creativity.

**College/Department:** School of Education

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

### CRTV 302 Tools and Techniques in Creativity 3.0 Credits

This hands-on course provides tools for enhancing creative strengths including role-play, simulation, brainstorming together with synectics, and creative problem solving. A second focus is the role of inspiration in how creativity, personal maturity, and spirituality inter-relate and how this interaction expands our repertoire of tools and techniques in creativity.

**College/Department:** School of Education

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

### CRTV 303 Creativity in the Workplace 3.0 Credits

This course focuses on how creative ideas happen and how they become innovations to reveal a set of principles for infusing creativity into every aspect of an organization. Examples from a wide range of settings demonstrate how to build systemic creativity at the individual, team, and leadership levels.

**College/Department:** School of Education

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

### CRTV T180 Special topics in CRTV 0.0-12.0 Credits

Topics decided upon by faculty will vary within the area of study.

**College/Department:** School of Education

**Repeat Status:** Can be repeated multiple times for credit

### CRTV T280 Special topics in CRTV 0.0-12.0 Credits

Topics decided upon by faculty will vary within the area of study.

**College/Department:** School of Education

**Repeat Status:** Can be repeated multiple times for credit

### CRTV T380 Special topics in CRTV 0.0-12.0 Credits

Topics decided upon by faculty will vary within the area of study.

**College/Department:** School of Education

**Repeat Status:** Can be repeated multiple times for credit

### CRTV T480 Special topics in CRTV 0.0-12.0 Credits

Topics decided upon by faculty will vary within the area of study.

**College/Department:** School of Education

**Repeat Status:** Can be repeated multiple times for credit

# Criminology & Justice Studies

## Courses

### CJS 100 Freshman Seminar in Crime and Justice 3.0 Credits

This is an entry level course for CJS freshman that introduces them to the norms of academic writing and comprehension in the disciplines of criminology and criminal justice. During the course students will read a combination of classic and current volumes in criminology to initiate them into the academic discipline. The course will be mostly seminar-style, which means students will engage in active learning through reading, writing, and discussion.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 101 Introduction to Criminal Justice 3.0 Credits**

This course provides a survey of the criminal justice system with the primary goal of conveying an understanding of America's formal response to crime. We confront the long-standing struggle to balance due process with crime control through the lenses of the police, courts and corrections -- the core elements of the Criminal Justice system. We also examine major crime control paradigms (historic and current), and the tenuous relationship between race and justice. The course offers a variety of educational approaches in an effort to match (as much as is reasonable) students' individual learning styles and needs.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 200 Criminology 3.0 Credits**

This course examines the myriad factors that explain crime and criminal behavior. The course describes prevalences of different crime types across various populations and geographic areas to help students understand how and why crime often clusters within certain settings. The Course reviews major theories of crime developed over the past two hundred years to help explain crime and the labeling of criminal offenders. The course will draw on references from popular culture to help provide a context for crime and crime causation.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 210 Race, Crime, and Justice 3.0 Credits**

This course considers how race affects the behaviors of the major institutions of the justice process, as well as how the justice process affects social perceptions of race and crime. The course also describes the relationships among race, criminal offending, and victimization; and it explores how justice--related outcomes are often influenced by the quality and behaviors of local schools, access to housing, economic investment in majority--minority communities, crime control strategies, and the perceived fairness of the justice process itself.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 220 Crime and the City 3.0 Credits**

This course reviews the nature of crime and disorder in cities from the urban industrial revolution through the so-called "Crime Drop" of the early 2000s. The course opens with an overview of urbanization, contrasting the "best" with the "worst" aspects of the industrial revolution on human life. It then examines urban drug markets, violence, and policing before moving into a discussion of the crime "peak" of 1992. The course then follows the ensuing crime drop, examining demographic, economic, and cultural factors that may explain the national crime decline. The course then focuses on violence as a public health issue and on how crime, incarceration, health, housing, and education are all tied to urban crime policy.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 250 Research Methods & Analytics I 3.0 Credits**

This is the first of three integrated methods and analysis courses for CJS students that introduces them to the fundamentals of research design, the benchmarks of scientific quality, sampling, modes of observation, and units of measurement. The course also introduces students to the most relevant analytical procedures often used at each stage in the methodological process, such as developing a data set, performing descriptive (univariate) analyses, examining bivariate relationships, and testing hypotheses using both parametric and non-parametric statistical tests. The course culminates with students writing a research proposal that includes the major components of most grant applications: Statement of the Problem, Literature Review, Research Questions, and Research Methodology/Analytical Procedures.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 260 Justice in Our Community 4.0 Credits**

This course is a seminar style community-based learning course that will begin with an introduction to justice in urban communities and examine problems unique to cities. The course format will include lectures and on-site work with our community partners at UConnect. The synthesis of scholarship and community classroom experience will provide a holistic lens in which to explore issues in our urban community. Topics include urban economies, access to education and health care, digital divides and crime. Students who take this course will also register for one recitation section of CJS 260.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 261 Prison, Society and You 3.0 Credits**

This course utilizes the Inside--Out Prison Exchange Program to explore the relationship between individuals and the prison system. The Inside--Out Exchange Program is an evolving set of projects that creates opportunities for dialogue between those on the outside and those on the inside of the nation's correctional facilities. The program demonstrates the potential for dynamic collaborations between institutions of higher education and correctional institutions. Most importantly, through this unique exchange, Inside-Out, this course seeks to deepen the conversation and transform ways of thinking about crime and justice (Crabbe, Pompa, 2004).

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 265 Criminal Investigation 3.0 Credits**

This course introduces students to the broad field of criminal investigations. It examines the elements of an effective investigation, the equipment, technology and procedures used to complete successful investigations. It also covers note taking, crime scene photography and sketching, searching the crime scene, identifying and collecting physical evidence, and arresting and searching suspects.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 266 Crime Prevention Planning 3.0 Credits**

The course will explore the role of places and environments on criminal opportunities. By analyzing residential and business layouts, street networks, and routine activities of individuals, the course will seek ways in which situational crime prevention methods may then be applied for preventing criminal behavior in both the public and private settings.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 267 Introduction to Security Studies 3.0 Credits**

This course examines the private security industry. Substantive topics of interest include the historical development of the industry; its linkage to public forms of security (law enforcement and the regulatory state); its legal underpinnings; management issues; and the nature of internal and external threats faced by facilities and organizations. The philosophical and analytic paradigm for security -- risk analysis and prevention -- offers a framework for the study of problem solving models used in the field. This framework, along with the analytic models utilized by security professionals will be explored in depth.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 273 Surveillance, Technology, and the Law 3.0 Credits**

This course will examine current surveillance technologies used by criminal justice agencies and private sector organizations and the laws that regulate government surveillance and protect privacy.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 274 Sex, Violence, & Crime on the Internet 3.0 Credits**

This course explores how offenders are adopting computers to commit traditional crimes in a high-tech manner. Specific attention will be paid to the following types of crime: cyberstalking, online harassment, cyberbullying, sexting, and computer-facilitated sexual exploitation of children. Related legislation and current law enforcement practices to address these crimes will be examined.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 275 Issues in Domestic Violence 3.0 Credits**

Domestic Violence is a familiar phrase, but what does it really mean? How often does it occur? Is it a new phenomenon? Do other countries view domestic abuse as a problem? In our class we will examine these questions using broad conceptual frameworks. It will then explore the definitional aspects of domestic violence, common characteristics of victims and offenders, as well as the historic, current, and emerging criminal justice responses to domestic violence.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 276 Introduction to Computer Crime 3.0 Credits**

This course provides an overview of computer crime. Emphasis will be placed on the legislative responses and policy issues related to computer intrusions and cyberfraud. Issues encountered when informing laws in cyberspace and the public/private sector initiatives for dealing with computer crime will also be explored.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 277 Introduction to Correctional Practices 3.0 Credits**

This course provides insight into the Correctional component of the Criminal Justice System. Students will learn and understand correctional theory, over view of correctional facilities management and practice and contemporary issues in the field of corrections, including re-entry and alternatives to incarceration. Emphasis will be placed on actual real world experiences based upon the Philadelphia Prison System. Course material will be presented through the required textbook, court opinions from legal cases, handouts, classroom lecture and discussion, on-site visits and tours of the various Philadelphia Prison System facilities and guest lectures and demonstrations.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 278 Introduction to Law Enforcement 3.0 Credits**

This course examines the implications of maintaining an armed police force in a democratic society whose mandate requires it to enforce laws under the tacit threat of coercion. The course explores different styles of policing that are commonly found in urban, rural, and suburban locations; and it examines the rise and consequences of historic crime control paradigms, such as the War on Drugs, and the War on Terrorism. It offers an overview of Supreme Court decisions that have most affected police functions and authority. And it will highlight the police use of technology for the purposes of coercion, surveillance, and communication.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 280 Communities and Crime 3.0 Credits**

This course introduces students to the ecological study of crime. Crime varies in time, space, and populations as it reflects neighborhood structures and the routine social interactions that occur in daily life. Concentrations of crime can be found among locations, with antisocial activities like assaults and theft occurring at higher rates because of the demographic make-up of people (e.g., adolescents) or conflicts (e.g., competing gangs), for reasons examined by ecological criminology. We examine variations in socio-demographic structures (age, education ratios, and the concentration of poverty) and the physical environment (housing segregation, density of bars, street lighting) predicts variations between neighborhoods in the level of crime and disorder.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 289 Terrorism 3.0 Credits**

This course examines the varying types and purposes of terrorism and its application. It will discuss the problems with definitions, worldviews and ideologies, and how these affect both the perceptions and responses to terrorist events.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 290 Crime and Public Policy 3.0 Credits**

This course focuses on criminal justice and non-criminal justice policies used to combat crime. Students will use the most recent crime data and explanatory theories on crime to evaluate current policy. A multi-disciplinary approach will be used to develop new policies designed to have a long-lasting impact on crime.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 295 International Field Experience 1.0-3.0 Credit**

This course provides students the opportunity to process and contextualize their recent Intensive Course Abroad (taken through Drexel's Study Abroad Office). By keeping an extensive travel journal, participating in all activities while abroad, and through a series of written reflection assignments, students will link their travel experiences with assigned academic materials to help them make meaning from their observations while on tour in the relevant host countries.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**CJS 300 Research Methods and Analytics II 3.0 Credits**

This course builds on (and reviews) the fundamentals of research design introduced in Methods and Analysis I with the specific aim of teaching students how to construct, and analyze data generated from, surveys. Students will learn the "mechanics" of survey design, such as where to place demographic questions, as well as how to identify and include validated scales on the instrument, and how to avoid misleading or debilitating items (e.g., "double-barreled" questions, biased/leading questions, non-mutually exclusive or exhaustive response categories. Students will also learn the process (and importance) of pre-testing the survey prior to implementing it; and they will be trained to analyze survey results using SPSS and other software packages as needed.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CJS 250 [Min Grade: C]

**CJS 301 Methods and Analytics III 4.0 Credits**

The course focuses on the development of a community needs assessment as a platform for giving students the opportunity to work as part of a research team in the field, creating a data collection instrument, collecting and analyzing data, and reporting the findings. The course integrates the community needs assessment methodology with the urban disorder literature to educate students in the modes of observation required to reliably measure crime, disorder, surveillance gaps, and other sources of community risk. Students will map community demographic features, develop an assessment tool, make field observations, and analyze the findings as part of their culminating experience.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CJS 300 [Min Grade: C]

**CJS 302 Advanced Criminological Theorizing 3.0 Credits**

This course offers a detailed examination of several major theories of crime. Whereas CJS200/CJ204-Criminology represents a survey of many criminological theories, this advanced course focuses on three major perspectives in criminology: Life-course, genetics/bio-social, social disorganization (and specifically, subculture of violence) theories. The course also helps students understand how different criminological theories might integrate with each other to offer broad perspectives the causes of crime.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CJS 200 [Min Grade: C] or CJ 204 [Min Grade: C]

**CJS 320 Comparative Justice Systems 3.0 Credits**

This course offers students a transnational perspective on crime and justice institutions. As the world increasingly globalizes, it becomes increasingly important to understand how countries outside the United States undertake the processes of detecting crime, labeling people "criminal," and adjudicating criminal offenders. Is there a common threshold in other countries for determining guilt? Is there a universal standard that governs the presumption of guilt or innocence at the onset of the criminal justice process? How many other countries still use the death penalty? These are questions the course will address in addition to others related to policing, courts, and corrections.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 330 Crime Mapping I Using Geographic Information Systems 4.0 Credits**

This course introduces students to the fundamentals of crime mapping through both lecture and the use of geospatial software. The course opens with a history of crime mapping, then moves to an examination of several place-based theories of criminology that help explain why crime events often cluster in time and space. The course then uses scenario-based exercises to teach students to work with and manage geospatial data, conduct select spatial analyses, interpret the results of such analyses within the contexts of different criminological theories, and create maps that illustrate spatial patterns and relationships across different units of geography.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 331 Crime Mapping II Using Geographic Information Systems 4.0 Credits**

This course takes up where Crime Mapping I leaves off by teaching students some of the intermediate to advanced techniques of crime mapping using geospatial software. The course opens with a brief review of the fundamentals of crime mapping, then moves into some of the more advanced mapping/software applications that support complex analyses and visualizations. Students will learn to manipulate attribute tables, select by spatial locations, create spatial buffer and distance surfaces, convert vector data to raster data, and assess for spatial autocorrelation and clustering. They will also learn to detect and work with spatial outliers.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CJS 330 [Min Grade: C]

**CJS 360 Juvenile Justice 3.0 Credits**

Students will learn about the history, development and current status of the juvenile justice system. Philosophical, sociological, psychological, legal and political factors contributing to the changes in the manner in which society processes children and youth who violate social norms will be explored in research articles, legal decision, and theoretical analyses.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 362 Gender, Crime, and Justice 3.0 Credits**

This term will explore the historical roots of crime and how we study crime specifically; we will critically analyze female crime trends and statistics, gender and the law, and female offending. After laying a strong foundation, we will connect gender and crime by exploring rape, pornography, and domestic violence, sex trafficking and female gangs.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 364 Community Corrections 3.0 Credits**

This course is a comprehensive, up-to-date, coverage of evidence-based practices and research for probation, release from prisons and other community-based alternatives in their historical, philosophical, social and legal contexts illustrated with real life examples.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 365 Computer Investigations and the Law 3.0 Credits**

This course will examine the techniques used to investigate Internet crimes and extract evidence from digital storage devices. Specific attention will be paid to the procedural laws that govern digital forensic techniques and investigations involving electronic evidence.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 366 Technology and the Justice System 3.0 Credits**

This course will examine past and current technologies adopted in the field of criminal justice to assess their usefulness in identifying and preventing crime and advancing justice. We will also discuss technologies on the horizon that are likely to be adopted by criminal justice agencies. Additionally, methods for evaluating technology use will be examined.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 369 Forensic Science Survey Course 3.0 Credits**

This survey course introduces some principles and techniques of forensic science as they pertain to crime scene investigation and crime laboratory analysis. The course is designed to be accessible to those without a science background, but at the same time will provide a well-rounded introduction to some topics for those considering further studies in the field.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 372 Death Penalty - An American Dilemma 3.0 Credits**

Capital punishment is one of the most complex issues in Criminal Justice and one of the most controversial facing America. Everyone has an opinion about the death penalty but rarely is it grounded in hard evidence. This course will examine the history of the use of capital punishment in America by reviewing the relevant case law in this area and will explore in-depth the issues which rise from the use of the Death Penalty in this country. Is it ethical? Is it fairly administered? Is it effective? Should it be reformed? Can it be reformed?

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 373 Environmental Crime 3.0 Credits**

The objective of this course is to provide students with an introduction to and overview of the federal criminal enforcement program concerning the criminal prosecution of certain types of violations of federal environmental laws and regulations. Although the focus of the course will be on the federal government's environmental crimes program that is administered by the United States Environmental Protection Agency, general concepts concerning criminal law and procedure will also be discussed. More specifically, topics to be covered will include, among other things: the history of the federal environmental crimes program; the role of EPA-CID Special Agents and federal prosecutors in the investigation and prosecution of environmental crimes; environmental offenses under the federal Federal Acts.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 374 Restorative Justice 3.0 Credits**

Restorative justice is a paradigm shift in criminal justice in response to the failure of the traditional retributive model to meet the needs of victims, offenders and the community. This course offers an overview of Restorative Justice, including its definitions, history, theoretical and legal basis, principles and practices, controversial issues, and evaluative research as to its efficacy and reducing crime and restoring victims and communities.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 375 Criminal Procedure 3.0 Credits**

A solid understanding of constitutional criminal procedure is essential to any career in the law or law enforcement. Further, as America seeks to protect itself from terrorism, every citizen should understand the constitutional protections that Americans have historically enjoyed which have been and continue to be diminished by the courts and the legislature.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 376 Sentencing 3.0 Credits**

We explore the theoretical basis for sentencing, including the purposes of sentencing, and determination of the just sentence, including the consideration of the crime, as well as the offender's background and criminal history. We cover contemporary issues like prosecutorial misconduct, plea bargaining, sentencing guidelines, mandatory minimums, truth in sentencing and the impact of racial and gender disparities. We also spend time investigating special issues within the field such as the sentencing of juveniles and capital sentencing procedures.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 377 Intellectual Property Theft in the Digital Age 3.0 Credits**

This seminar focuses on the changing nature of intellectual property theft, piracy, and copyright infringement in the Digital Age. Attention will be paid to legislative and technical solutions for protecting copyrighted goods (including music, movies, and software) and the challenges faced when investigating the theft of intellectual property. Additionally, theoretical explanations to account for intellectual property theft will be explored.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 378 Science of Forensic Science 3.0 Credits**

Forensics is the application of science or other disciplines to the Legal System. Students will study the science of science in application of ethics and scientific method to evidence analysis and presentation of data to Court. Students will learn to recognize and deal with context, observer, expectancy, and experimenter effects. Data from actual cases will be discussed.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 379 Forensic DNA Analysis 3.0 Credits**

An introduction to DNA analysis methods in current forensic testing. Genetics, inheritance, DNA biochemistry are applied to a fluorescent detection technology to produce results using one or more manufactured DNA testing kits. Students will be exposed to actual casework data and as virtual analyst present results to juries and judges.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**CJS 400 Capstone in Criminology and Justice Policy 3.0 Credits**

The capstone course will be open only to Criminology and Justice Policy Seniors. This course serves as an opportunity for students to apply their cumulative knowledge in the Criminology and Justice Policy concentration to an identified crime, policy, and/or criminal justice deployment problem facing the field today. This may be a more global problem, such as mass incarceration across the United States, or a highly localized problem, such drug markets in an urban setting. Students will work in consultation with the professor and their class peers to identify a problem, and then develop an evidence-based solution to address the problem. The course culminates with students presenting their evidence-based solutions to the class at the end of the quarter.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is CJS and classification is Senior.

**CJS 401 Program Evaluation 3.0 Credits**

This course will examine research designs and statistical methods often used when evaluating criminal justice programs or policies. The course will focus mostly on the conceptual, rather than the applied, giving students an opportunity to begin to synthesize the methods and techniques to which they were exposed in the previous methods and analytics courses. During the course, students will develop a proposal to conduct an evaluation of a policy and/or program, using a research design that meets the benchmarks of scientific quality; and they will incorporate several research and analytics strategies they learned in previous courses.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CJS 250 [Min Grade: C] and CJS 300 [Min Grade: C] and CJS 330 [Min Grade: C]

**CJS 402 Capstone in Justice Informatics 3.0 Credits**

The Capstone in Justice Informatics course calls upon students to integrate the concepts covered in the informatics, computing, analytical, and methodological courses in their major to develop a informatics-driven plan that addresses a problem pertaining to crime, criminality, or criminal justice. The course will culminate with students making a professional presentation of their plan/project to the class.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is CJS and classification is Senior.

**CJS I199 Independent Study in CJS 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**CJS I299 Independent Study in CJS 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**CJS I399 Independent Study in CJS 0.5-12.0 Credits**

Provides a course of independent study in Criminology and Justice Studies. Topics for study must be approved in advance of registration by the advisor and the instructor involved.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**CJS I499 Independent Study in CJS 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**CJS T180 Special Topics in Criminology & Justice Studies 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**CJS T280 Special Topics in Criminology & Justice Studies 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**CJS T380 Special Topics in Criminology and Justice Studies 0.0-12.0 Credits**

This course will explore current issues and interests in Criminology and Justice Studies. The topic will vary each term.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**CJS T480 Special Topics in Criminology & Justice Studies 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

# Culinary Arts

## Courses

### **CULA 115 Culinary Fundamentals 3.0 Credits**

Introduces culinary principles and procedures used in commercial food preparation and practical application of classical culinary techniques.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

### **CULA 120 Techniques and Traditions I 3.0 Credits**

In this foundation culinary course, students will learn the fundamentals of a professional kitchen through lecture, demonstration and production. Classical and contemporary techniques are emphasized for development of cooking methods, knife skills, and food and kitchen safety and sanitation.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

### **CULA 121 Techniques and Traditions II 3.0 Credits**

A continuation of CULA 120. Students will further develop their kitchen skills with application to recipe and menu development and plate design. Service to the public will be executed through various preparation techniques and types of service.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 120 [Min Grade: D]

### **CULA 125 Foundations of Professional Baking 3.0 Credits**

This course will introduce students to the foundations needed to work in a pastry kitchen. This hands-on lab class will help build students sense of timing and a delicate touch needed to produce classic bakery items such as pies, cookies, muffins, biscuits, pastry cream, and basic breads.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 115 [Min Grade: D] (Can be taken Concurrently)

### **CULA 216 A la Carte 3.0 Credits**

This is a sophomore level course in dining operations designed around a weekly restaurant operation, which is marketed and delivered to the Drexel Community and general public.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 121 [Min Grade: D]

### **CULA 220 Patisserie I 3.0 Credits**

Students will be introduced to a variety of techniques that are the foundations to creating restaurant quality desserts, including mousses, sorbets, custards, ice creams, and frozen desserts. Along with learning techniques, applications, and utilization of products dessert plating will be part of the students development.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CULA 125 [Min Grade: D]

### **CULA 225 Patisserie II 3.0 Credits**

This course will further develop students sense of creativity, flavor, texture, color, and presentation skills. Building on knowledge and techniques already learned in previous courses, this course will provide students with knowledge and touch to produce professional quality desserts of all sizes from amuse bouche, petit fours, and sophisticated desserts.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CULA 220 [Min Grade: D]

### **CULA 226 Patisserie III 2.0 Credits**

This advanced pastry course is the third in a series of related topics. Culinary students will have the opportunity to work with techniques in cake decorating, sugar and chocolate work, and candy making. Attention to detail in pastry arts will be emphasized in this course.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 225 [Min Grade: D]

### **CULA 227 Wheat and Grains: Artisan Breads 3.0 Credits**

This course will introduce students to proper techniques in producing a variety of artisan breads. The course will allow students to create professional style breads and allow for fully developed yeast fermentation. Students will learn the skills, terminology, and calculations to produce artisan breads in volume.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 125 [Min Grade: D]

### **CULA 228 Design, Presentation, and Decorating in Pastry 3.0 Credits**

This course will give students the foundation to create a variety of cakes for many special occasions. Students will learn to produce and utilize different types of icings, fondant, and cake styles to build numerous flavor and texture combinations. Along with the skills learned in garnishing student will create a variety of professional quality cakes.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 125 [Min Grade: D]

### **CULA 229 Confectionery 3.0 Credits**

This course will give students an excellent foundation in understanding, taste, and usage of chocolate and its many forms. Students will learn to properly temper chocolate and then utilize it for creating garnishes and artisan candies. In addition the proper technique for sugar cookery will be learned and then applied for a variety of confections.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 125 [Min Grade: D]

### **CULA 235 Professional Dining Room Management 3.0 Credits**

Students will manage front-of-the house operations in a professional dining room setting with fine dining service to the public. Table side preparations and cookery will be strongly emphasized with weekly executions.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 121 [Min Grade: D]

**CULA 240 Fundamentals of Chinese Cuisine 3.0 Credits**

Students will explore traditional regional preparations with Chinese ingredients, such as beef, fowl, lamb, vegetables and various fish and seafood.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 115 [Min Grade: D] or CULA 120 [Min Grade: D]

**CULA 290 Culinary Arts Practicum I 3.0 Credits**

Students will gain work experience in culinary production while under faculty supervision. Students obtain industry jobs, work a minimum of 60 hours, log their experiences, and write a final analysis. The networking opportunities often lead to rewarding co-op, part time, or full time employment opportunities. Students take CULA 290 or CULA 291.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is CLSC or major is CULA.

**Prerequisites:** CULA 120 [Min Grade: D]

**CULA 291 Culinary Arts Practicum II 6.0 Credits**

Students will gain work experience in culinary production while under faculty supervision. Students obtain industry jobs, work a minimum of 120 hours, log their experiences, and write a final analysis. The networking opportunities often lead to rewarding co-op, part time, or full time employment opportunities. Students take either CULA 290 or CULA 291.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is CLSC or major is CULA.

**Prerequisites:** CULA 120 [Min Grade: D]

**CULA 300 Fundamentals of Vegetarian Cuisine 3.0 Credits**

Vegetarian cooking is explored by examining ethnic specific global cuisines. Vegetable based diets are a result of geography, economics, politics, culture, religion and choice. By understanding and appreciating diverse peoples and their foods, the student will expand not only his or her culinary repertoire, but also achieve a greater global and cultural awareness.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CULA 120 [Min Grade: D] or CULA 115 [Min Grade: D]

**CULA 303 Global Cuisine Studio 3.0 Credits**

This course will serve as the foundation for a variety of ethnic cuisine options including French, Italian, Chinese, Korean, Indian, Caribbean and Island Cuisine.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Can be repeated 4 times for 15 credits

**CULA 305 Fundamentals of Italian Cuisine 3.0 Credits**

Students will be presented with the philosophy of traditional Italian cooking as it is articulated in the culture of Italy. There will be a strong emphasis on regional ingredients and recipes. Topics include: basic menu language, terminology, preparation of various antipasti, pasta, and risotto.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CULA 120 [Min Grade: D] or CULA 115 [Min Grade: D]

**CULA 306 Advanced Italian Cuisine 3.0 Credits**

A continuation of CULA 305. Utilizing regional Italian products, students will produce classical and traditional recipes with opportunity to further develop personal style and creativity. Proper seasoning, handling of product, and family style and plated presentations will be emphasized.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 305 [Min Grade: D]

**CULA 310 Fundamentals of French Cuisine 3.0 Credits**

The course explores the history, culture and persistent influence of the French 'methode' and its relevancy to the contemporary kitchen. The major French regional classic dishes and techniques will be studied and produced; each week visiting a different geographic locality from Provence to Alsace.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CULA 120 [Min Grade: D] or CULA 115 [Min Grade: D]

**CULA 311 Advanced French Technique 3.0 Credits**

A continuation of CULA 310. This course more deeply explores the history persistent influence of the French 'methode' and its relevancy to the contemporary kitchen. Each week will examine on a single food category; Potages, Poisson, veau, volaille, Gibier. Patisserie, etc., as well as a significant figures in gastronomic history from Taillevent to Paul Bocuse and beyond — from the earliest origins of Haute Cuisine to Modernist and applications to evolving contemporary cuisine. Related topics of French art, culture and music will be included.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 310 [Min Grade: D]

**CULA 315 Fundamentals of American Cuisine 3.0 Credits**

The course provides a foundation in American regional cuisine by examining the history, diverse cultures and culinary traditions of the evolving United States from native Americans and first settlers to the present day. Students follow a culinary cultural journey through time and geography, preparing a variety of dishes from influential cuisines, in search of a definition for American Cuisine.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CULA 120 [Min Grade: D] or CULA 115 [Min Grade: D]

**CULA 316 Butchery Laboratory 2.0 Credits**

In this culinary lab course students will execute the fabrication of meat, fish and poultry products, skills necessary in any professional kitchen operation. Students will perform yield tests and calculate portion cost of fabricated items.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 115 [Min Grade: D] or CULA 120 [Min Grade: D]

**CULA 320 Advanced Culinary Studio 3.0 Credits**

Under the direction of culinary industry leaders and program faculty students will prepare and produce finished plates using a variety of previously learned skills. Finished products will reflect the style of a chosen culinary industry leader executed with the judgment and professionalism of the student.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 115 [Min Grade: D] or CULA 120 [Min Grade: D]

**CULA 325 Garde Manger Laboratory 3.0 Credits**

Introduces techniques used in the fabrication, selection and preparation of cold buffet production. Items include cold appetizers, canapes, garnishes, hors d'oeuvres, salads, and sandwiches. Additional focus on decoration, form, and presentation of cold food items.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CULA 120 [Min Grade: D] or CULA 115 [Min Grade: D]

**CULA 328 Brasserie Applied Baking 3.0 Credits**

This course will develop students ability to cross utilize the mediums of culinary arts and pastry arts. In almost every food service operation the techniques and products made by both the savory and sweet kitchen are seamlessly combined to create the menu. Students will focus on combining both of these disciplines to create contemporary and classic dishes.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 125 [Min Grade: D] and CULA 320 [Min Grade: D] and CULA 325 [Min Grade: D] and CULA 227 [Min Grade: D]

**CULA 330 Charcuterie 3.0 Credits**

Students learn about the chemistry and techniques of curing, brining, and smoking. Items covered include classic and modern, forcemeats, pates, galantines, terrines, and sausages (fresh and dry).

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 115 [Min Grade: D] or CULA 120 [Min Grade: D]

**CULA 335 Fundamentals of Indian Cuisine 3.0 Credits**

This course introduces students to the diverse cooking and cultures of India. Explores India's unique cooking methods and the varied use of herbs, spices, and condiments.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 120 [Min Grade: D] or CULA 115 [Min Grade: D]

**CULA 400 Directed Studies with a Master Chef 3.0 Credits**

Structured program that allows students the opportunity to practice the skills and competencies learned in coursework with an acknowledged culinarian in a qualified foodservice operation. Students are monitored by their direct supervisor, by Culinary Arts faculty, and by evaluation of written reports, workbooks, journals, and portfolios prepared during the course.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 115 [Min Grade: D] or CULA 120 [Min Grade: D]

**CULA 405 [WI] Culture and Gastronomy I 3.0 Credits**

The first of two courses devoted to the study of food as a determinant, how culture, beliefs, methods of acquisition, preparation and social interaction impact on a global scale. Reading, research, and course study focuses on food sources, discoveries and the evolution of sustainables and their effects on the formation of tribes and communities, population growth and expansion. Dishes, history and commonalities from three global cuisines will be compared, prepared and discussed. This is a writing intensive course. Classes are divided between lecture and cooking labs.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**CULA 410 Culture and Gastronomy II 3.0 Credits**

The second of two courses devoted to the study of food and culture. The course comprises a survey of contemporary food studies topics and an examination of food choices in contemporary society. Reading, research and course study focuses on food sources, individual and gender identity, the global food chain, sustainability, inherent "costs" of contemporary consumables, and the future of food in an ever expanding global economy. Classes are divided between lecture and cooking labs. This is a reading and writing intensive course.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 405 [Min Grade: D]

**CULA 412 Food Writing 3.0 Credits**

A practical introduction to food journalism. Explores through regular writing and reading assignments the broad range of topics typically encountered in a newspaper or magazine environment, from ingredient features and trend stories, to profiles, first person essays, restaurant criticism, "live" deadline assignments, and long-form magazine projects.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**CULA 415 Food Styling and Photography 3.0 Credits**

The course deals with the basics of composition, color theory, basic digital photography, food styling techniques, and what constitutes a professional photographic image. An art historical approach is used to facilitate the development of aesthetic judgment. Students prepare a variety of dishes, utilizing and amplifying cooking skills, prop, style, and photograph a variety of themed food and drink employing new skills in a new and exciting manner.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 115 [Min Grade: D] or CULA 120 [Min Grade: D]

**CULA 420 Senior Design Project 3.0 Credits**

Students will undertake individual creative research which will enable them to prepare for the Culinary Arts Program annual show. Emphasis will be on the incorporation of skills, technologies and techniques learned from prior coursework and experience.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** CULA 310 [Min Grade: D] and CULA 315 [Min Grade: D]

**CULA 421 Senior Design Project I 2.0 Credits**

Students will undertake individual creative research which will enable them to prepare for the Culinary Arts Program annual show. Emphasis will be on the incorporation of skills, technologies and techniques learned from prior coursework and experience.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**CULA 422 Senior Design Project II 2.0 Credits**

Students will undertake individual creative research which will enable them to prepare for the Culinary Arts Program annual show. Emphasis will be on the incorporation of skills, technologies and techniques learned from prior coursework and experience.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 421 [Min Grade: D]

**CULA 423 Senior Design Project III 2.0 Credits**

Students will undertake individual creative research which will enable them to prepare for the Culinary Arts Program annual show. Emphasis will be on the incorporation of skills, technologies and techniques learned from prior coursework and experience.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 421 [Min Grade: D] and CULA 422 [Min Grade: D]

**CULA 425 The Kitchen Garden 3.0 Credits**

This course familiarizes students with the preparation and planting of a raised-bed culinary garden using organic techniques. Students will practice indoor and outdoor seed sowing; learn to promote soil health and study the relationships between the kitchen and the garden. The harvested spring produce is used for various culinary applications.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**CULA 426 The Kitchen Garden: Summer 3.0 Credits**

This course familiarizes students with the dynamics of the contemporary kitchen garden as a food source, and a platform for environmental stewardship. Students will study the importance of plant nutrition; and take part in community garden outreach activities. The harvested summer produce is used in summer term Culinary Arts classes.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**CULA 427 The Kitchen Garden: Fall 3.0 Credits**

This course familiarizes students with the complex relationships between food sources, conventional vs. sustainable farming practices; and the ethics of food access and waste analysis. Preservation of the harvest is explored; and the fall produce is used in various culinary applications.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**CULA 440 Food in the Arts 3.0 Credits**

Course offerings rotate: food in film, in literature, and painting. Film: Examines the role that food plays in a film's story line, lives of the characters, and how food is an element of expression and a transforming agent. Students will study and discuss the films and recreate dishes from each film. Literature: Food as a central theme in fiction, the role that food plays in the story, the lives of the characters, and how it functions as an element of expression and as a transforming agent. Students recreate the dishes from each literary work, heighten their culinary skills and explore the intricacies of the related cuisines. Painting: studies the role of food in paintings 17th to the 21st C. from Caravaggio to Dali to Theibaud and prepare meals inspired by them.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Can be repeated 2 times for 9 credits

**Prerequisites:** CULA 121 [Min Grade: D]

**CULA I199 Independent Study in CULA 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Can be repeated multiple times for credit

**CULA I299 Independent Study in CULA 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Can be repeated multiple times for credit

**CULA I399 Independent Study in CULA 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Can enroll if major is CULA.

**CULA I499 Independent Study in CULA 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Can be repeated multiple times for credit

**CULA T180 Special topics in CULA 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Can be repeated multiple times for credit

**CULA T280 Special topics in CULA 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Can be repeated multiple times for credit

**CULA T380 Special topics in CULA 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Can be repeated multiple times for credit

**CULA T480 Special topics in CULA 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Can enroll if major is CULA.

## Custom-Designed Major

### Courses

**CSDN 101 [WI] Introduction to Multi-Disciplinary Methods 1.0 Credit**

Teaches Custom-Designed Major students about the many different methods of scholarly analysis practiced across the university. Students will be introduced to the methods practiced in the social sciences and humanities, creative arts, science and engineering, and business.

**College/Department:** Pennoni Honors College

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is CSDN.

**Prerequisites:** HNRS 200 [Min Grade: D]

**CSDN 102 Knowledge by Design Seminar 1.0 Credit**

Develops skills in designing curriculum paths at the University, designing research topic bibliographies, and developing original research questions and methodologies. The course culminates in the preparation of a formal proposal for the student's course of study in the Custom-Designed Major Program.

**College/Department:** Pennoni Honors College

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is CSDN.

**Prerequisites:** CSDN 101 [Min Grade: D]

**CSDN 203 Custom-Designed Major Seminar 1.0 Credit**

Brings Custom-Designed Major students at the sophomore, pre-junior, and junior years together to present and critique original work with their peers related to their individualized courses of study.

**College/Department:** Pennoni Honors College

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is CSDN and classification is Sophomore.

**Prerequisites:** CSDN 102 [Min Grade: D]

**CSDN 304 Custom-Designed Major Proj I 3.0 Credits**

Research project sequence for the Custom-Designed Major program.

**College/Department:** Pennoni Honors College

**Repeat Status:** Can be repeated 2 times for 6 credits

**Restrictions:** Can enroll if classification is Senior.

**CSDN 305 Custom-Designed Major Project II 3.0 Credits**

Research project sequence for the Custom-Designed Major program.

**College/Department:** Pennoni Honors College

**Repeat Status:** Can be repeated 2 times for 6 credits

**Restrictions:** Can enroll if classification is Senior.

**CSDN 306 Custom-Designed Major Project III 3.0 Credits**

Research project sequence for the Custom-Designed Major program.

**College/Department:** Pennoni Honors College

**Repeat Status:** Can be repeated 2 times for 6 credits

**Restrictions:** Can enroll if classification is Senior.

**CSDN I199 Independent Study in CSDN 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Pennoni Honors College

**Repeat Status:** Can be repeated multiple times for credit

**CSDN I299 Independent Study in CSDN 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Pennoni Honors College

**Repeat Status:** Can be repeated multiple times for credit

**CSDN I399 Independent Study in CSDN 1.0-3.0 Credit**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Pennoni Honors College

**Repeat Status:** Can be repeated 2 times for 6 credits

**CSDN I499 Independent Study in CSDN 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Pennoni Honors College

**Repeat Status:** Can be repeated multiple times for credit

**CSDN T180 Special Topics in CSDN 1.0-12.0 Credit**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Pennoni Honors College

**Repeat Status:** Can be repeated multiple times for credit

**CSDN T280 Special Topics in CSDN 1.0-12.0 Credit**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Pennoni Honors College

**Repeat Status:** Can be repeated multiple times for credit

**CSDN T380 Special Topics in CSDN 1.0-12.0 Credit**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Pennoni Honors College

**Repeat Status:** Can be repeated multiple times for credit

**CSDN T480 Special Topics in CSDN 1.0-12.0 Credit**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Pennoni Honors College

**Repeat Status:** Can be repeated multiple times for credit

## Dance

### Courses

**DANC 100 Survey of Dance Studies 3.0 Credits**

This course will include lecture, reading assignments, writing assignments and self-reflection activities to introduce students to academic dance coursework in higher education.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**DANC 101 Introduction to Dance Studies 3.0 Credits**

This course will include lecture, reading assignments, writing assignments and self-reflection activities to introduce potential part-time professional dance program participants to coursework in higher education.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**DANC 102 Yoga 3.0 Credits**

The physical and intellectual study of the ancient practice of yoga. Includes both physical practice and readings related to the discipline, as well as a survey of a variety of forms of the practice.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Can be repeated 3 times for 12 credits

**DANC 104 Ballet Technique I 2.0 Credits**

Introduces ballet dance vocabulary including alignment, stretching and strengthening, line, flexibility and movement phrases.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Can be repeated 7 times for 16 credits

**DANC 105 Modern Dance Technique I 2.0 Credits**

Introduces modern dance vocabulary, including stretching and strengthening exercises, alignment, movement phrases, and basic locomotor skills. Includes performances and discussion.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Can be repeated 7 times for 16 credits

**DANC 106 Jazz Dance Technique I 2.0 Credits**

Introduces jazz dance style, concentrating on body isolations, movement vocabulary and the development of movement phrases.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Can be repeated 3 times for 8 credits

**DANC 107 Hip-Hop Dance Technique I 2.0 Credits**

Introduces hip-hop dance technique, vocabulary, movement principles, muscle control, and body alignment. Includes appreciation for funk and hip-hop with historical and cultural contexts.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Can be repeated 3 times for 8 credits

**DANC 108 Dance Improvisation I 2.0 Credits**

A studio course in creative movement. Uses contact and structured improvisational problems, interaction between dances and the elements of time, space and force.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Can be repeated 3 times for 8 credits

**DANC 109 African Dance Technique I 2.0 Credits**

This studio course is designed to explore the aesthetic, movement, music and rituals found in African Dance forms.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Can be repeated 3 times for 8 credits

**DANC 110 Movement for Actors 3.0 Credits**

Employs specific exercises designed to increase the actor's ability to move freely and with expression and to appreciate the role of movement in the making of theater.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**DANC 115 Introduction to Dance 3.0 Credits**

A studio and classroom course. Examines the elements of dance through study and participation in classical, theatrical, and social forms. Includes readings, films, and discussion.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**DANC 116 Dance and Fitness 3.0 Credits**

This course explores areas of health and fitness that impact peak physical performance for dance and related activities. Topics will be covered through a combination of kinesthetic and academic approaches.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**DANC 117 Foundations of Somatic Theory and Practice 3.0 Credits**

This course, for beginner through advanced, teaches you to maximize your potential for dance, sports, yoga, martial arts or any movement practice, through readings, exercises and assignments that build core strength, flexibility and efficient action.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**DANC 131 Dance Practicum in Performance 1.0 Credit**

Provides practical experience as a dancer in a Department of Performing Arts dance production. Includes helping with preperformance production, attending all rehearsals, and performing in the concerts. May be repeated for credit.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Can be repeated multiple times for credit

**DANC 132 Dance Practicum in Production 1.0 Credit**

Provides practical experience in dance production, including participation in publicity, costume construction, lighting design, box office, and program production for a Drexel University Dance Ensemble concert. May be repeated for credit.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Can be repeated multiple times for credit

**DANC 133 Dance Practicum in Choreography 1.0 Credit**

Covers the process of developing an idea into a finished dance through close work with the artistic director, including selecting dancers and music; teaching the movement; planning costumes, lighting, and sets; polishing the work; and presenting it to an audience during a Drexel University Dance Ensemble concert. May be repeated for credit.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Can be repeated multiple times for credit

**DANC 135 Rhythmic Study for Dance 3.0 Credits**

Covers rhythmic structures that can accompany dance, including sight reading and eurhythmics.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**DANC 204 Ballet Technique II 2.0 Credits**

Studio course in intermediate level ballet technique. Further develops students' alignment, line, muscular stamina, flexibility and movement vocabulary.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Can be repeated 7 times for 16 credits

**Prerequisites:** DANC 104 [Min Grade: D]

**DANC 205 Modern Dance Technique II 2.0 Credits**

Covers advanced modern dance vocabulary including stretching and strengthening exercises, alignment, movement phrases and performance quality.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 7 times for 16 credits

**Prerequisites:** DANC 105 [Min Grade: D]

**DANC 206 Jazz Dance Technique II 2.0 Credits**

Covers advanced jazz dance style, concentrating on body isolations, movement vocabulary, and the development of movement phrases, syncopation and flexibility.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 3 times for 8 credits

**Prerequisites:** DANC 106 [Min Grade: D]

**DANC 207 Hip-Hop Dance Technique II 2.0 Credits**

Advanced hip-hop dance technique, vocabulary, movement principles, muscle control, and body alignment. Includes appreciation for funk and hip-hop with historical and cultural contexts.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 3 times for 8 credits

**Prerequisites:** DANC 107 [Min Grade: D]

**DANC 208 Dance Improvisation II 2.0 Credits**

A studio course in advanced creative movement. Uses improvisational problems and improvisational dance making to study momentum, speed, alignment, contact, sound, group work, and dramatic intention.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** DANC 108 [Min Grade: D]

**DANC 209 African Dance Technique II 2.0 Credits**

This studio course is an advanced exploration of the aesthetic, movement, music and rituals found in African Dance forms. It builds on principles of African I and introduces more complex and physically demanding repertory.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 3 times for 8 credits

**Prerequisites:** DANC 109 [Min Grade: D]

**DANC 215 Dance Appreciation 3.0 Credits**

Teaches students to look at dance as an art form, emphasizing the ability to analyze and understand various dance styles. Includes films, readings, performances, and discussion. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**DANC 216 Introduction to Laban Movement Analysis 3.0 Credits**

This course introduces the principles of movement analysis by Rudolph Von Laban including an exploration of effort - shape, space and body as introduced by physical therapist Irmgard Bartenieff.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**DANC 221 Survey of Dance and Movement Therapy 3.0 Credits**

This course investigates the use of dance as a diagnostic and therapeutic tool for psychological health and recovery.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**DANC 222 Dance Pedagogy 3.0 Credits**

This course explores the social and physical development of children as it relates to the teaching of dance. Develops a repertoire of techniques for teaching children and adults.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**DANC 225 Dance Repertory 2.0 Credits**

This course allows dancers to synthesize their technical abilities with their knowledge of dance history as they learn the works of major historical choreographers.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 2 times for 6 credits

**DANC 235 Dance Composition I 3.0 Credits**

Explores the basic traditional forms of solo and group composition through improvisation, manipulation of movement phrases and critique.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**DANC 260 Injury Prevention for Dance 3.0 Credits**

This course uses physical and intellectual exploration to create individual flexibility and injury prevention plans that meet the student's goals. It is particularly targeted to dancers who use their bodies intensively.

Techniques for injury prevention and recovery are emphasized.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**DANC 304 Ballet Dance Technique III 2.0 Credits**

Studio course in advanced level ballet technique. Further develops students' alignment, line, muscular stamina, flexibility and movement vocabulary.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 7 times for 16 credits

**Prerequisites:** DANC 204 [Min Grade: D]

**DANC 305 Modern Dance Technique III 2.0 Credits**

This course covers advanced modern dance vocabulary, including stretching and strengthening exercises, alignment principles, movement phrases and increasingly complex locomotor skills.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 7 times for 16 credits

**Prerequisites:** DANC 205 [Min Grade: D]

**DANC 306 Jazz Dance Technique III 2.0 Credits**

This course covers advanced jazz dance styles for highly experienced students, concentrating on body isolations, movement vocabulary and the development of movement phrases, syncopation and flexibility.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 3 times for 8 credits

**Prerequisites:** DANC 206 [Min Grade: D]

**DANC 315 Twentieth Century Dance 3.0 Credits**

Covers the history of Western theatrical dance from the beginning of the century to contemporary times. Emphasizes the development of modern dance in the United States. Includes films, performances, and discussion. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**DANC 316 Dance Kinesiology 3.0 Credits**

This course will provide an introduction to the musculoskeletal system and basic health information. Students will gain an understanding of anatomy and kinesiology and will explore how these topics are related to dance, normal daily activities, injury prevention, and healthy lifestyle choices. The kinesiological concepts presented in this course will be applied using the context of dance movement.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**DANC 335 Dance Composition II 3.0 Credits**

This course explores the advanced forms of solo or group choreography including narrative, abstract and musical interactions.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 2 times for 9 credits

**Prerequisites:** DANC 235 [Min Grade: D]

**DANC 380 Special Topics in Dance 0.5-3.0 Credits**

Covers selected topics in dance. May be repeated for credit if topics vary.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DANC 415 Dance Aesthetics and Criticism 3.0 Credits**

This course is designed to introduce students to the concepts of aesthetics which affect the ways in which dance is created, performed and viewed. Issues of dance criticism and how this pertains to aesthetic judgment will also be addressed. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (DANC 215 [Min Grade: D])

**DANC 416 Survey of Somatic Practices 3.0 Credits**

This course investigates a range of integrative mind/body practices for physical well-being and optimal performance.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** DANC 316 [Min Grade: D] and DANC 117 [Min Grade: D]

**DANC 481 Senior Seminar in Dance 1.0 Credit**

Senior Seminar prepares graduating Dance students for a successful transition after graduation and provide strategies to contribute to the field of dance. This course will also prepare students for a culminating senior project experience.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**DANC 491 Senior Project in Dance 1.0 Credit**

Senior Project is the capstone course for Dance Majors in which the student presents a project in one of three areas: a presentation, scholarly research paper, or a major performance. The students will be required to utilize the skills, techniques, and concepts that they learned prior to their senior year in Drexel's Dance Program and present a project that reflects the students' strength, concentration, and passion.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 2 times for 3 credits

**Prerequisites:** DANC 481 [Min Grade: D]

**DANC 495 Directed Studies in Dance 0.5-12.0 Credits**

Offers supervised individual study of special subjects in dance. May be repeated for credit. Department permission required.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DANC I199 Independent Study in DANC 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DANC I299 Independent Study in DANC 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DANC I399 Independent Study in DANC 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DANC I499 Independent Study in DANC 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DANC T180 Special Topics in Dance 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DANC T280 Special Topics in Dance 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DANC T380 Special Topics in Dance 0.5-3.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DANC T480 Special Topics in Dance 0.5-3.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

# Design & Merchandising

## Courses

### **DSMR 100 Computer Imaging I 3.0 Credits**

The course explores the fundamentals of computer design software including Adobe Photoshop, Illustrator and InDesign. Projects include graphics creation and manipulation; image acquisition, text creation and manipulation; typography; input and output options and control; hardware/software/system fundamentals; and troubleshooting as they relate to the creative industries.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is DSMR or major is EAM.

### **DSMR 201 Analysis of Product 3.0 Credits**

This course examines the methods by which non-apparel products are conceived, designed and brought to market. Students learn to recognize the importance of design integrity in the areas of home furnishing, cosmetics, accessories, paper products, footwear, and industrial design.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

### **DSMR 205 Digital Promotion Strategies 3.0 Credits**

Utilizing current and commonly available technologies, students develop a communication plan to disseminate current trend and style information to end use customers. Students explore past, analyze and participate in the present and consider the future uses of new technologies in merchandising fashion apparel, accessories and home products.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

### **DSMR 210 Presentation Techniques Design and Merchandising 3.0 Credits**

This course explores the various types of presentation/storyboard formats used within the industry in merchandising product. The student learns to create an array of presentations used for visual communication among all facets of the workplace as well as market research specific to the design industry.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (VSST 102 [Min Grade: D] or VSST 105 [Min Grade: D]) and (VSCM 100 [Min Grade: D] or DSMR 100 [Min Grade: D])

### **DSMR 211 Computer Design for Design and Merchandising 3.0 Credits**

This course addresses the use of computer design as a merchandising and design tool for branding and promotion of a business or organization. The student is introduced to the branding process from a visual point of view and will create brand identity materials through the use of computer software programs including Adobe Photoshop, Illustrator and InDesign.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** VSCM 100 [Min Grade: D] or DSMR 100 [Min Grade: D]

### **DSMR 212 Visualization Techniques for Design & Merchandising 3.0 Credits**

Visual Presentation for Design and Merchandising explores hand drawn and 3D computer software tools to accurately express design intentions for store and window displays, branded fixture plans as well as other design related projects. This course focuses on analog and digital techniques including diagrammatic sketching, 1-point perspective, visual note-taking and mind-mapping skills, hand coloring techniques, concept boards and SketchUp.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** VSST 111 [Min Grade: D]

### **DSMR 230 Textiles for Design and Merchandising 3.0 Credits**

Examines the textile manufacturing industry and the fundamental processes involved in producing natural and man-made fabrics as they relate to Design & Merchandising. Includes basic terminology and production processes as well as selection and evaluation of fabrics based on aesthetics, performance and care characteristics.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is DSMR.

Cannot enroll if classification is Freshman

### **DSMR 231 Retail Operations 3.0 Credits**

Examines retail philosophies within an operational context, including understanding how consumption, present and future, determines a retailer's strategy.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

### **DSMR 232 Merchandise Planning and Buying 4.0 Credits**

Provides a working knowledge of merchandise planning, flow, and distribution in the retail setting. Covers profitable merchandise and assortment planning and control in both conceptual and technical formats. Final project incorporates six-month financial, classification, and assortment planning.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ACCT 115 [Min Grade: D] or ECON 201 [Min Grade: D] or DSMR 231 [Min Grade: D] or ACCT 110 [Min Grade: D]

### **DSMR 233 [WI] Retail Image Analysis 3.0 Credits**

Students will perform an in-depth analysis of theoretical and applied retail product and brand research. Qualitative, quantitative and triangulation methods of research will be discussed. The course focuses on researching, writing and presenting various topics in a professional environment. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**DSMR 305 Digital Commerce 3.0 Credits**

Students explore and analyze past, current and future trends in ecommerce technologies that primarily support the back end inventory, logistics and front end operations of the fashion apparel, accessory and home products industries.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**DSMR 309 Color and Trend Forecasting 3.0 Credits**

This course provides an overview of the fashion forecasting function in Fashion, Design & Merchandising. Students investigate color and trend forecasting, design research and concepts, and fabric direction. Students apply their knowledge in "hands on" color cards and development of a trend book.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** DSMR 210 [Min Grade: D] or FASH 210 [Min Grade: D]

**DSMR 310 Merchandising Operations & Management 3.0 Credits**

This course will focus on the Apparel Management functions that exist between the merchandising, design, production and promotion elements of the apparel supply chain. The student will be a member of a team that must bring a fully merchandised collection from item selection through production to retail in an ideal Vertical Merchandising System. Forecasting, collection development, production and revisions, allocation of inventory, coordinated visual presentation packaging and problem solving of anomalies in the supply chain are integrated into this course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** DSMR 211 [Min Grade: D] and DSMR 232 [Min Grade: D]

**DSMR 311 Visual Merchandising 4.0 Credits**

Visual Merchandising combines design skills, consumer psychology and marketing principles to create window displays, floor merchandising and plan-o-grams in a retail environment that entices consumers to buy. Students will investigate related areas of store planning and design, point-of-purchase display, fixture design, and topics on trend in the industry. Students will apply the principles and elements of design in merchandise presentation, analysis and experimentation and field research. Methods of promoting and selling merchandise, analyzing leading retail firms, employing basic methods of displaying merchandise, and developing a basic understanding of the use of special materials and lighting will be integrated into experiential projects outside of the classroom.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** (VSST 103 [Min Grade: D] or VSST 106 [Min Grade: D]) and DSMR 211 [Min Grade: D]

**DSMR 312 Visual Merchandising II 3.0 Credits**

Visual merchandising II is an in-depth look at exhibit design, where students explore the traditions, expectations and norms of exhibit design. Technological advances in exhibit design will be introduced and utilized to produce a visual outcome/presentation for exhibition purpose.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (VSST 103 [Min Grade: D] or VSST 106 [Min Grade: D]) and DSMR 210 [Min Grade: D] and DSMR 211 [Min Grade: D]

**DSMR 313 International Fashion Merchandising 3.0 Credits**

Introduces students already familiar with U.S. retail merchandising to global retail merchandising. Develops a framework for the international merchandising process and discusses effects of globalization.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** DSMR 231 [Min Grade: D]

**DSMR 314 Visual Merchandising III 4.0 Credits**

Assuming the role of the Visual Merchandiser students apply Visual Merchandising principles to the area of store planning and design, analyze leading retailers and trends, develop an understanding of the use of materials and lighting "in store," and learn to use industry software. This course is inter-disciplinary with Interior Design.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is DSMR or major is INTR and classification is Junior or Senior.

**Prerequisites:** DSMR 311 [Min Grade: D]

**DSMR 315 [WI] Media Merchandising I 3.0 Credits**

Media Merchandising I explores the process of creating, designing and publishing the annual D & M Magazine and accompanying media. The students develop all content organized around theses of school, city, fashion, product and technology, their various intersections as it relates to design and merchandising. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 1 times for 6 credits

**Restrictions:** Can enroll if classification is Junior or Senior.

**Prerequisites:** VSST 103 [Min Grade: D] and DSMR 210 [Min Grade: D] and DSMR 211 [Min Grade: D] and ENGL 103 [Min Grade: D]

**DSMR 316 Media Merchandising II 3.0 Credits**

Media Merchandising II is a continuation of Media Merchandising I, where critical decisions with regard to informational articles, interviews, photography, graphic design, interactive media and paid advertisement are completed. The end result is the D & M Magazine, a distributable product with actual marketing potential.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 1 times for 6 credits

**Restrictions:** Can enroll if classification is Junior or Senior.

**Prerequisites:** DSMR 315 [Min Grade: D]

**DSMR 317 Media Merchandising III 3.0 Credits**

Students work in interdisciplinary groups to develop and produce episode based style programming for delivery on DUTV and through other media broadcast media outlets. Students will develop a promotional package for the overall program series.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is DSMR or major is FMVD and classification is Junior or Senior.

**DSMR 318 Music Merchandising 3.0 Credits**

Students work in interdisciplinary groups with Music Industry Program artists to create a comprehensive merchandise extension program including product selection, production, distribution and promotion within the context of the artists' overall brand package.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is DSMR or major is EAM or major is MUSI and classification is Junior or Senior.

**DSMR 320 Merchandising and Design Directions 3.0 Credits**

Merchandising and Design Directions addresses the production of prototypes for a small collection of accessories or home products. The necessary collateral promotional materials for marketing these designs to a specific target market and retail outlet will also be created.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 1 times for 6 credits

**Restrictions:** Can enroll if classification is Junior or Senior.

**Prerequisites:** VSST 103 [Min Grade: D] and DSMR 210 [Min Grade: D] and DSMR 211 [Min Grade: D]

**DSMR 321 [WI] Fashion Show Production I 2.0 Credits**

Limited enrollment. This course is an examination of the Fashion Show as a sales and marketing tool and as a historically important event in the evolution of the fashion industry. An understanding of all behind-the-scenes aspects of a professional fashion show will be discussed. This course introduces a hands-on experience in addition to academic course work. Especially for students interested in event planning, public relations and marketing, this course provides experience that will be valuable as students enter the workplace.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**DSMR 322 Fashion Show Production II 2.0 Credits**

DSMR 322, Fashion Show Production II, is a continuation of DSMR 321. Whereas DSMR 321 examined the business of the fashion show using an academic approach (lecture, projects, video), DSMR 322 is a hands-on experience, which culminates in the production of Drexel's annual fashion show each year in June. The purpose of the course is to give students experience producing one of the College and University's most important public relations events. Students are an integral part of the team that plans, manages and executes all phases of the Fashion Show.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**Prerequisites:** DSMR 321 [Min Grade: D]

**DSMR 324 Retail Intersections: Social & Cultural Issues 3.0 Credits**

Those who participate in the business of fashion such as retailers, merchants, designers, manufacturers and stylists must evolve in order to sell to customers. Throughout their lives, students are exposed to retailing, merchandising, buying, design, sales, branding, promotions, manufacturing and other such fields. For those interested in the study of retailing, fashion and merchandising, it is essential to understand landmark research and theoretical concepts behind the influences of this field and how social change, innovations and with the evolution of a multicultural marketplace, shifts have occurred over generations, and into the 21st century. This conceptual and theoretical course will expose students to a diverse range of clients and consumers.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** DSMR 231 [Min Grade: D]

**DSMR 325 Advanced Merchandise Planning and Buying 4.0 Credits**

Advanced buying strategies focuses on in-season merchant operations of the merchant organization. Students develop assortment and promotional plans and learn to react to changes in their plans as the season unfolds. Students perform "hands on" tasks in conjunction with the D & M retail outlets.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** DSMR 232 [Min Grade: D]

**DSMR 326 Fashion Product Promotion 4.0 Credits**

This course explores the global aspects of product promotional strategies through the examination of the economic, political and social/cultural trends of today's globalized marketplace. Various national and international regions are analyzed in terms of their market characteristics and current retail environment. Students will research market information and analyze opportunities regarding merchandise positioning and brand imagery toward the development of a comprehensive promotional plan.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 1 times for 8 credits

**DSMR 333 Fashion Product Development 3.0 Credits**

Provides an overview of both knitted and woven apparel. Covers the procedures and processes involved in apparel product development, particularly as related to retail merchandising and marketing. Considers styling as a reflection and a reinterpretation of current trends in specific markets.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** FASH 201 [Min Grade: D]

**DSMR 397 Retail Practicum 3.0 Credits**

Students work on a variety of hands on projects surrounding our retail laboratory, supporting the d&m popup and online retail outlets. Tasks may include: Product development, buying, visual merchandising, photography, operations, data collection, analysis and promotion.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 4 times for 15 credits

**DSMR 398 D&M Practicum 0.5-4.0 Credits**

Students work on a variety of special projects for ongoing D&M Program administration and special project requests from Industry and Community Partners that vary each term. The Industry and Community Partners and the D&M program are seen as clients, and these special projects are integral to their business. Examples include: developing content for the D&M program Social Media, developing and implementing mannequin display throughout the D&M program space, providing event planning support for community or industry partner events.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 10 times for 44 credits

**DSMR 410 Career Strategies for Design and Merchandising 3.0 Credits**

Course develops skills that enable the student to put into place an effective job search strategy. Specifically geared to the D&M professions, students develop comprehensive area of expertise including networking, industry research, and industry hiring trends.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**DSMR 411 Design and Merchandising Portfolio Design 3.0 Credits**

Students will prepare a complete visual showcase of their marketability and skills. Accepted industry standards, targeting visual elements to specific job goals and self-promotion will be emphasized.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**DSMR 434 Fashion Product Sourcing 3.0 Credits**

This course explores the history and growth of sourcing. Students consider the consumer benefits in terms of lower prices and quality. Sourcing is analyzed from the retail/product development point of view and will examine challenges they face in the global arena.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** DSMR 333 [Min Grade: D]

**DSMR 477 [WI] Design and Merchandising Seminar 3.0 Credits**

Provides reading and discussion of pertinent topics of current concern in the professional area of design and merchandising. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is DSMR.

Cannot enroll if classification is Freshman

**DSMR 496 [WI] Senior Problem in Design and Merchandising 3.0 Credits**

Provides an opportunity for the student to research, independently or within a group, an idea within the field of design-merchandising, synthesizing material and developing a presentation of that concept. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**DSMR I199 Independent Study in Design & Merchandising 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DSMR I299 Independent Study in Design & Merchandising 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DSMR I399 Independent Study in Design & Merchandising 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DSMR I499 Independent Study in Design & Merchandising 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DSMR T180 Special Topics in Design & Marketing 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DSMR T280 Special Topics in Design & Marketing 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DSMR T380 Special Topics in Design & Marketing 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DSMR T480 Special Topics in Design & Marketing 0.5-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

## Digital Media

### Courses

**DIGM 100 Digital Design Tools 3.0 Credits**

Students learn the basics of visual design within the digital realm.

Software tools such as Adobe Photoshop and Illustrator are utilized.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**DIGM 105 Overview of Digital Media 3.0 Credits**

Surveys the history, theory, practice, technologies, and related social issues associated with the growth of digital media.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**DIGM 110 Digital Spatial Visualization 3.0 Credits**

Students learn to represent 3D objects and spaces in 2D media using a variety of drawing and computer graphic techniques. This course lays important foundations for subsequent courses in 3D computer modeling and animation.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (DIGM 100 [Min Grade: D] or GMAP 101 [Min Grade: D]) and VSST 110 [Min Grade: D]

**DIGM 220 Digital Still Imaging I 3.0 Credits**

Introduces the still image for majors in screen-based visual media. Covers the making, appreciation, and critical analysis of images produced by still cameras using both film and digital capture. Screen-based presentation is primary, but a number of print-based projects are included.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (DIGM 100 [Min Grade: D] or GMAP 101 [Min Grade: D]) and (VSST 101 [Min Grade: D] or VSST 108 [Min Grade: D])

**DIGM 221 Digital Still Imaging II 3.0 Credits**

Second course on the still image for majors in screen-based visual media. Continues the investigation begun in DIGM 220 Digital Still Imaging I.

Introduces color and imaging and explores in greater depth the potentials of digital imaging applications for manipulation, enhancement, creative interpretation. Includes image preparation for the Web.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** DIGM 220 [Min Grade: D]

**DIGM 223 Creative Concept Design 3.0 Credits**

This course explores methods to develop design concepts on demand. Topics to be considered include recognizing one's imaginative potential, expanding fanciful memory, and maintaining a creative ecology of mind.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**DIGM 250 Professional Practices 3.0 Credits**

Provides a professional orientation to the field through an exploration of a variety of digital media projects. In addition to lecture and discussions, allows students to take active part in role plays and presentations to achieve an understanding of the importance of team building, team work, and team management in all phases of digital media production from proposals to product delivery.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** DIGM 242 [Min Grade: D]

**DIGM 252 Multimedia Timeline Design 3.0 Credits**

Introduces basic design concepts and tools to create time based 2D and 3D multimedia. Addresses issues from pre-production planning, through, post-production and delivery; emphasis on time-based multimedia.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** DIGM 100 [Min Grade: D]

**DIGM 308 Digital Cultural Heritage 3.0 Credits**

Digital Cultural Heritage is a growing pursuit including Digital Media, Digital Humanities, Computer Science, and Archeology. It has components in academic research, museology, tourism, economic development as well as new media technology development and applications. This class will investigate this emerging and exciting field and explore its possibilities in the context of Philadelphia's cultural heritage.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**DIGM 350 [WI] Digital Storytelling 3.0 Credits**

By surfing the internet and playing computer games, by lectures, assigned readings, class screening, and research projects, this class explores the impact of digital media on art, design and daily living. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**DIGM 355 Overview of Immersive Media 3.0 Credits**

Provides a broad overview and introduction to Immersive media in all its forms including narrative (video and animation) and interactive (game engine, user roams free and interacts/changes what they see). In addition to these two broad categories, this course also covers many of the commonly used delivery methods for these experiences including head-set VR, head-set AR, mobile screen AR, fulldome projection.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ANIM 211 [Min Grade: D]

**DIGM 359 Immersive Media Production & Post 3.0 Credits**

This course introduces production and post-production of narrative immersive media such as 360° photos and video (monoscopic and stereoscopic), as well as CGI animated works. Production involves the use of cameras and lighting to capture the real world, or CGI animation to create imagined worlds. Viewers of this type of media "experience" stories unfolding all around them within headsets or in fulldome projection, but are not able to change or move through the environment the way a video game player would inside a video game.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** DIGM 355 [Min Grade: D]

**DIGM 365 Interactive Immersive Media 3.0 Credits**

This course introduces immersive media experiences that are fully interactive, allowing the viewer/user to manipulate and navigate through the experience rather than view it passively. Rather than using camera or rendered animation, this form of immersive media is created using interactive game engines like Unity or Unreal, but can also involve custom code development similar to interactive digital media such as web and mobile applications.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** DIGM 355 [Min Grade: D]

**DIGM 399 Independent Project-Digital Media 2.0-12.0 Credits**

Supervised planning and execution of a project in the area of digital media. Department permission required.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

**DIGM 451 [WI] Explorations in New Media 3.0 Credits**

Through class presentations, field trips, discussions, readings, screenings and guest speakers; this class bridges artistic and technical aspects of new media in theory and practice. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**DIGM 475 [WI] Seminar: The Future of Digital Media 3.0 Credits**

Focuses on current and anticipated issues in digital media. Involves reading and discussion of news, product announcements, articles, and predictions related to digital media. Provides a comprehensive and up-to-date understanding of digital media, including its likely directions in the immediate future and long-term possibilities. This is a writing intensive course.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** IDM 371 [Min Grade: D] (Can be taken Concurrently)DIGM 451 [Min Grade: D]

**DIGM 490 Digital Media Senior Project 3.0 Credits**

In this course students produce professional-level media assets for a team based senior project in a simulated real-world production environment. It requires a project that demonstrates the integration of the academic and practical knowledge the student has acquired in the overall field as well as in one or more specializations. Students will refine their understanding of the production, delivery and presentation of quality digital media production through implementation of professional best practices, and practice and perfect written, oral, and visual presentation skills through the power of collaboration, teamwork and shared missions.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 2 times for 9 credits

**Prerequisites:** (ANIM 314 [Min Grade: D] or GMAP 377 [Min Grade: D] or IDM 372 [Min Grade: D] or VRIM 320 [Min Grade: D]) and DIGM 451 [Min Grade: D]

**DIGM 491 Digital Media Senior Project Studio 1.0 Credit**

In this course Digital Media senior project teams will meet with an appointed advisor on the technical details of their specific project requirements.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 2 times for 3 credits

**DIGM 492 Senior Project in Digital Media I 3.0 Credits**

The first of a two-course sequence. Requires a project that demonstrates the integration of the academic and practical knowledge the student has acquired in the overall field as well as in one or more specializations.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**DIGM 493 Senior Project in Digital Media II 3.0 Credits**

The second of a two-course sequence.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is DIGM and classification is Senior.

**Prerequisites:** DIGM 492 [Min Grade: D]

**DIGM 494 Senior Project in Digital Media III 3.0 Credits**

The third of a three-course sequence. Requires a project that demonstrates the integration of the academic and practical knowledge the student has acquired in the overall field as well as in one or more specializations.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is DIGM and classification is Senior.

**Prerequisites:** DIGM 493 [Min Grade: D]

**DIGM I199 Independent Study in Digital Media 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DIGM I299 Independent Study in Digital Media 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DIGM I399 Independent Study in Digital Media 2.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DIGM I499 Independent Study in Digital Media 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DIGM T180 Special Topics in Digital Media 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DIGM T280 Special Topics in Digital Media 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DIGM T380 Special Topics in Digital Media 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**DIGM T480 Special Topics in Digital Media 0.0-3.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

## Economics

### Courses

**ECON 201 Principles of Microeconomics 4.0 Credits**

Examines allocation of resources within an economy. Major topics include interaction of supply and demand in markets, consumer choice, cost structure of firms, and profit maximization for competitive forms as well as firms with market power.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**ECON 202 Principles of Macroeconomics 4.0 Credits**

Examines measurement, growth, and fluctuation of aggregate economic activity. Includes national income accounting and explains determination of output, employment, and price level. Also provides an introduction to international economics, money and banking, and economic policy. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECON 201 [Min Grade: D] (Can be taken Concurrently)

**ECON 203 Survey of Economic Policy 4.0 Credits**

This course will introduce students to the application of economic principles for a variety of policy-relevant topics covered in more advanced economics classes. Examples of applications may include the analysis of financial and economic crises, mergers, free trade agreements, social security, and unemployment.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECON 202 [Min Grade: D] (Can be taken Concurrently)ECON 201 [Min Grade: D]

**ECON 240 Economics of Health Care Systems 4.0 Credits**

Examine the health care industry from an economic perspective, including demand, cost-benefit analysis, insurance, supply constraints, and the role of the government.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**ECON 250 Game Theory and Applications 4.0 Credits**

Introduces the basic ideas of game theory with a minimum of mathematics; and discusses application to economics, politics, business, behavioral science, philosophy, population biology and engineering.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** STAT 201 [Min Grade: C] or STAT 205 [Min Grade: C] or MATH 107 [Min Grade: C]

**ECON 260 Economics of Small Business 4.0 Credits**

Discusses economic topics relevant to the role and varieties of small businesses in industrialized economies, and to government policy with respect to small business.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECON 201 [Min Grade: C]

**ECON 301 Microeconomics 4.0 Credits**

Examines theory of the firm and theory of the consumer in a rigorous fashion. Also covers risk and uncertainty, price determination, market failures, and analysis of various government policies.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C] and (MATH 102 [Min Grade: C] or MATH 121 [Min Grade: C])

**ECON 321 Macroeconomics 4.0 Credits**

Provides an in-depth introduction to dominant theories behind short-run economic fluctuations and long-run economic growth. Employs both mathematical and graphical tools to discuss determination of output, employment, and price level in the aggregate economy. Also covers effectiveness of monetary and fiscal policies in dealing with unemployment and inflation.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C] and ECON 301 [Min Grade: C] and (MATH 102 [Min Grade: C] or MATH 121 [Min Grade: C])

**ECON 322 [WI] Economics Seminar 4.0 Credits**

Requires research and writing of a scholarly paper on a topic in economics approved by an appointed faculty adviser. This is a writing intensive course.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECON 301 [Min Grade: C] and ECON 321 [Min Grade: C]

**ECON 326 [WI] Economic Ideas 4.0 Credits**

Covers the history of economic thought and development of different schools of thinking in economics. This is a writing intensive course.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C]

**ECON 330 Managerial Economics 4.0 Credits**

Covers applied economics relevant for decision-making processes. Emphasizes profit management, demand and cost analysis, pricing, and government policy.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C]

**ECON 331 International Macroeconomics 4.0 Credits**

This course covers fundamental issues in open economy macroeconomics. We will learn about how fiscal and monetary policy work when the economy is open to international trade in goods and services and to international capital flows. We will also study the effects of these policies on the current account and the exchange rate. The course treatment will be mainly theoretical. However, we will frequently refer to features of the international financial markets data, and we will use examples, case studies, readings, videos and policy applications to illustrate the findings of the theory and/or to try to bridge the gap between the predictions of theoretical models and real world developments.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C]

**ECON 334 Public Finance 4.0 Credits**

This course explores the role of government in the economy. Students will analyze the rationales for government policies as well as their implications for equity and efficiency. Much of the course will center on current policy issues related to the national debt, Social Security, education, environmental protection and taxation. Both theoretical applications and empirical findings will be discussed.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C] and (MATH 102 [Min Grade: C] or MATH 121 [Min Grade: C])

**ECON 336 Labor Economics 4.0 Credits**

Develops an understanding of how labor institutions operate to determine wages and employment. Examines alternative policy questions involving unemployment and inflation, collective bargaining, investment in education and training, and other labor-related questions. Requires students to apply theoretical and empirical abilities to research a labor-related issue and improve the ability to think clearly and communicate effectively.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C]

**ECON 338 Industrial Organization 4.0 Credits**

Examines observational studies of industries with respect to competitive or non-competitive structure, conduct, and performance. Considers implications of profitability, technological innovation, antitrust policy, and competitiveness in trade. Reviews problems of measurement and sources of data.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C] and (MATH 102 [Min Grade: C] or MATH 121 [Min Grade: C])

**ECON 342 Economic Development 4.0 Credits**

Covers topics including driving forces of economic growth, economic planning, income distribution and poverty, labor migration, capital markets and saving, international debt problems and global economic crisis. Emphasizes underlying theories and realities of economic growth and development of less developed economies and emerging economies.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C]

**ECON 344 Comparative Economic Systems 4.0 Credits**

Covers theory and contemporary practices of capitalism, socialism, fascism, and the welfare state as economic systems.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C]

**ECON 348 Mathematical Economics 4.0 Credits**

Discusses the application of mathematics in economic models, with extensive discussion of economic applications of linear algebra and calculus. Considers implications of the assumptions of maximization of profits and utility. Stresses mathematical models and techniques useful in statistical applications of economics.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C] and (MATH 102 [Min Grade: C] or MATH 121 [Min Grade: C])

**ECON 350 [WI] Applied Econometrics 4.0 Credits**

Applies statistics to economics, with emphasis on the special problems of statistical analysis of economic data, sources of data, and examples of applications and models. Covers forecasting the impacts of changing economic policy and of developments in industrial markets using economic-statistical models. This is a writing intensive course.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C] and STAT 201 [Min Grade: C]

**ECON 351 Resource and Environmental Economics 4.0 Credits**

Examines the microeconomic and quantitative aspects of markets for both renewable and exhaustible resources, and the interaction between the energy and resource sectors of the economy and between the productive sectors of the economy and the natural environment, with evaluation of major public policy initiatives and issues in these areas.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C]

**ECON 354 Money and Banking 4.0 Credits**

This is a course about the role of money and financial intermediation in modern economies and therefore the environment in which businesses operate. The course is organized around three sets of questions. First, what is money and why is it necessary? How can seemingly worthless paper serve a key purpose in a market economy? Second, what is the role of banks, both historically and in the more complex financial system of today? What are the origins of banking panics such as those experienced at the onset of the Great Depression or during the 2007-08 financial crisis? Third, how do central banks conduct monetary policy and what types of policies should the Federal Reserve and other government agencies follow to prevent financial crises?.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECON 321 [Min Grade: C] or FIN 325 [Min Grade: C]

**ECON 360 Time Series Econometrics 4.0 Credits**

Introduce time-series econometric models and provide tools for empirical analysis using time-series economic and financial data, with specific emphasis on application and forecasting.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECON 201 [Min Grade: D] and ECON 202 [Min Grade: D] and ECON 350 [Min Grade: D]

**ECON 361 Health Economics 4.0 Credits**

This course covers the economics of health and health care. Students will study how health is produced, how health insurance markets work, the government role in health care, cost benefit analysis, and the markets for medical education, pharmaceuticals and physician and hospital services. Students will learn to analyze health systems on grounds of efficiency and equity, and to assess the credibility of research in health economics and health policy. This course should be of interest to students who are interested in public policy issues surrounding health, health care, health in developing nations and health care reform.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECON 201 [Min Grade: C]

**ECON I199 Independent Study in ECON 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**ECON I299 Independent Study in ECON 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**ECON I399 Independent Study in ECON 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**ECON I499 Independent Study in ECON 0.5-5.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**ECON T180 Special Topics in ECON 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**ECON T280 Special Topics in ECON 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**ECON T380 Special Topics in ECON 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**ECON T480 Special Topics in ECON 0.5-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

## Education Human Resource Development

### Courses

**EHRD 205 Organizational Learning & Strategy 3.0 Credits**

The purpose of this course is to help learning professionals understand how to align learning functions with strategic goals of the organization in order to support leadership functions. Students will develop an understanding of learning in, by, and across organizations, explore barriers to change, and discuss and apply specific tools and processes to facilitate and sustain change and tighten the alignment of organizational learning and strategy.

**College/Department:** School of Education

**Repeat Status:** Not repeatable for credit

## Education Learning Technologies

### Courses

**EDLT 101 Learning, Culture & Technology Workshop I 3.0 Credits**

The Workshops (EDLT 101, 201, 301) are comprised of a set of three project-based courses that will provide innovative, rigorous, and immersive educational experiences in diverse learning environments that focus on emerging technologies, authentic and situated learning and contextual factors. Students will observe, document, analyze, and describe complex learning situations, develop different learning designs, and an e-portfolio, and explore social and cultural perspectives on learning.

**College/Department:** School of Education

**Repeat Status:** Not repeatable for credit

**EDLT 103 Foundation in Education III: Learning Sciences 3.0 Credits**

This foundations course introduces students to the Learning Sciences, an interdisciplinary field that draws on multiple theoretical perspectives and research paradigms with the goal of advancing and applying knowledge about human learning and development. Its purpose is to introduce students to basic concepts and findings relevant to theory, design, and research in the Learning Sciences, with specific focus on how those concepts and findings apply to learning environments and experiences. Students will learn the rich history about learning and acquire a deep understanding of how the notion of learning has evolved over time. Students will collaborate to design learning environments from different theoretical perspectives on learning.

**College/Department:** School of Education

**Repeat Status:** Not repeatable for credit

**EDLT 201 Learning, Culture and Technology Workshop II 3.0 Credits**

The Workshops (EDLT 101, 201, 301) are comprised of a set of three project-based courses that will provide innovative, rigorous, and immersive educational experiences in diverse learning environments that focus on emerging technologies, authentic and situated learning and contextual factors. Students will observe, document, analyze, and describe complex learning situations, develop different learning designs, and an e-portfolio, and explore social and cultural perspectives on learning.

**College/Department:** School of Education

**Repeat Status:** Not repeatable for credit

**EDLT 238 New Media Literacies 3.0 Credits**

This course provides an in-depth exploration of new media literacies including the practices and concepts of fan fiction writing, online social networking, video gaming, appropriation and remixing, tinkering and making, transmedia navigation, multitasking, performance, distributed cognition, and collective intelligence. It examines literacy as a sophisticated set of meaning-making activities situated in specific social spaces. Students will learn how new media are changing the dimensions of school literacies and challenge traditional ways of learning and communicating.

**College/Department:** School of Education

**Repeat Status:** Not repeatable for credit

**EDLT 250 Sociocultural Perspectives on Learning 3.0 Credits**

This course will focus on knowing and learning from sociocultural perspectives and will include emphasis on both recent research and seminal literature. The course will begin with an introduction to sociocultural research and then explore how these theories can be used to understand how learning occurs in various disciplines.

**College/Department:** School of Education

**Repeat Status:** Not repeatable for credit

**EDLT 301 Learning, Culture & Technology Workshop III 3.0 Credits**

The Workshops (EDLT 101, 201, 301) are comprised of a set of three project-based courses that will provide innovative, rigorous, and immersive educational experiences in diverse learning environments that focus on emerging technologies, authentic and situated learning and contextual factors. Students will observe, document, analyze, and describe complex learning situations, develop different learning designs, and an e-portfolio, and explore social and cultural perspectives on learning.

**College/Department:** School of Education

**Repeat Status:** Not repeatable for credit

**EDLT 325 Design for Learning with Digital Media 3.0 Credits**

Investigates the relationship among learning sciences, theory, technology, and design in the creation of learning goals and experiences. Special emphasis is placed on the integration of technology in order to enhance effective learning. Learners will design learning activities, create them, implement them, and assess their effectiveness with digital tools. Issues in digital citizenship, collaboration, affordability, and continuous learning will also be examined.

**College/Department:** School of Education

**Repeat Status:** Not repeatable for credit

**EDLT 326 Technology Applications for Learning 3.0 Credits**

Investigates the application of digital technologies as learning tools from the perspectives of design, development, implementation, and assessment. Provides learners with an understanding of the instructional versatility and limitations of digital technologies through hands-on experience with applications in their subject-matter fields. Addresses issues concerning integrating digital technologies into a variety of formal and informal learning settings.

**College/Department:** School of Education

**Repeat Status:** Not repeatable for credit

**EDLT 339 Future Pedagogies 3.0 Credits**

This course introduces learners to learning and designing experiences for complex domains. Students explore current pedagogies and how to assess the progress of learning. Students learn how to think about and design learning environments to facilitate different types of knowledge to support novice to expert learners.

**College/Department:** School of Education

**Repeat Status:** Not repeatable for credit

**EDLT 353 Play and Learning in Participatory Cultures 3.0 Credits**

In this course, students examine the role of play along the developmental continuum and in immersive and interactive learning spaces. Students also examine how play impacts learning in the context of participatory cultures. Students focus on play, its role in learning in social spaces, and the current research around these practices. Students study the issues relating to how schools, organizations, and society are responding to the challenges of emerging technologies through the design of participatory spaces.

**College/Department:** School of Education

**Repeat Status:** Not repeatable for credit

**EDLT 354 Learning In and Out of Schools 3.0 Credits**

The term "informal learning environments" (ILEs) is often used to describe places and activities where learning occurs outside of more formal settings such as schools, universities, etc. Examples of ILEs include after school activities, museums, zoos, and so on. This course is an introduction to ILEs and theories related to understanding how learning occurs within them. The course will also consider similarities and differences between learning in and out of schools.

**College/Department:** School of Education

**Repeat Status:** Not repeatable for credit

**EDLT 491 Senior Project I 3.0 Credits**

The Senior Project courses (EDLT 491, 492, 4933) are a set of three courses intended to immerse student teams in the design, implementation, and evaluation of a substantial project. Most educational design research involves teams in their creation, so it is essential to develop those skills. Students collaborate on an extended project to better understand project and time management issues related to large design projects. The courses also facilitate students' integrating materials from other courses in service of better learning environments.

**College/Department:** School of Education

**Repeat Status:** Not repeatable for credit

**EDLT 492 Senior Project II 3.0 Credits**

The Senior Project courses (EDLT 491, 492, 4933) are a set of three courses intended to immerse student teams in the design, implementation, and evaluation of a substantial project. Most educational design research involves teams in their creation, so it is essential to develop those skills. Students collaborate on an extended project to better understand project and time management issues related to large design projects. The courses also facilitate students' integrating materials from other courses in service of better learning environments.

**College/Department:** School of Education

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EDLT 491 [Min Grade: D]

**EDLT 493 Senior Project III 3.0 Credits**

The Senior Project courses (EDLT 491, 492, 4933) are a set of three courses intended to immerse student teams in the design, implementation, and evaluation of a substantial project. Most educational design research involves teams in their creation, so it is essential to develop those skills. Students collaborate on an extended project to better understand project and time management issues related to large design projects. The courses also facilitate students' integrating materials from other courses in service of better learning environments.

**College/Department:** School of Education

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EDLT 491 [Min Grade: D] and EDLT 492 [Min Grade: D]

# Electrical & Computer Engineering

## Courses

**ECE 101 Electrical and Computer Engineering in the Real World 1.0 Credit**

This seminar introduces students to highly visible and compelling applications of ECE through the use of familiar real-world applications. The course will highlight some of the high-impact advances of ECE and the importance of ECE in our daily lives. Fundamental concepts, such as electricity, light, computing, networking, and signal processing will be introduced in this context and explained at an introductory level. This course is intended to inspire students to pursue ECE and will lead them directly into ECE 102.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**ECE 102 Applications of Electrical and Computer Engineering 2.0 Credits**

Introduces the basic fundamentals of ECE through the use of real-world applications. The course will introduce Signals and Systems, Analog electronic basics, as well as Digital numbers and systems. The course will introduce students to basic ECE material, preparing the students for ECE 200 and ECE 201.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**ECE 105 Programming for Engineers II 3.0 Credits**

This course will cover advanced usage and understanding of programming concepts using Python within the Linux environment. By the end of the course, students will not only possess strong programming capabilities but will also have a firm grasp on scientific computing fundamentals. Students should already have a working knowledge of bash, python, pylint, tmux/GNU screen, X11 tunnelling, and at least one terminal based editor (vim, nano, joe, etc) from ENGR 131 or ENGR 132.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGR 131 [Min Grade: D] or ENGR 132 [Min Grade: D]

**ECE 121 Introduction to Entertainment Engineering 3.0 Credits**

This introductory survey course will focus on the four prevailing entertainment media: music, images, video, and games. We will explore how each medium is represented digitally and reveal the technologies used to capture, manipulate and display such content. Technical standards used in everyday entertainment devices (mp3, H.264, JPEG 1080p, HDMI) will be explained in layman's terms. The goal is to provide students with technical literacy for using digital media.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**ECE 200 Digital Logic Design 4.0 Credits**

Number systems and representation, two's complement arithmetic, digital logic devices, switching algebra, truth tables, minimization of Boolean functions, combinational logic design and analysis, sequential circuit analysis and design.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ECE 201 Foundations of Electric Circuits I 4.0 Credits**

Covers basic electric circuit concepts and laws; circuit theorems; mesh and node methods; analysis of first-order electric circuits; forced and natural response; sinusoidal steady state analysis; complex frequency.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is CAE or classification is Freshman

**Prerequisites:** PHYS 102 [Min Grade: D]

**ECE 203 Programming for Engineers 3.0 Credits**

Fundamentals of computer organization; rudiments of programming including data types, arithmetic and logical expressions, conditional statements, control structures; problem solving techniques for engineers using programming; object-oriented programming; arrays; simulation of engineering systems; principles of good programming practice.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ECE 211 Electrical Engineering Principles 3.0 Credits**

Not open to electrical or mechanical engineering students. Covers basic techniques of electric circuit analysis, electronic devices, amplifiers, operational amplifier, and fundamentals of instrumentation.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is EE or major is MECH or classification is Freshman

**Prerequisites:** (MATH 201 [Min Grade: D] or ENGR 231 [Min Grade: D] or MATH 261 [Min Grade: D]) and (PHYS 211 [Min Grade: D] or PHYS 281 [Min Grade: D] or PHYS 102 [Min Grade: D])

**Corequisite:** ECE 212

**ECE 212 Electrical Engineering Principles Laboratory 1.0 Credit**

Not open to electrical or mechanical engineering students. Includes experiments involving concepts discussed in ECE 211.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is EE or major is MECH or classification is Freshman

**Corequisite:** ECE 211

**ECE 301 Foundations of Electric Circuits II 4.0 Credits**

Covers analysis of operational amplifiers, second-order electric circuits; ac power; and an introduction to the Laplace transform.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECE 201 [Min Grade: D] and (ENGR 232 [Min Grade: D] or MATH 262 [Min Grade: D])

**ECE 302 Design with Embedded Processors 3.0 Credits**

A project-based course on design and implementation of mixed signal systems with embedded processors (digital, analog and software) with applications in signal processing, control, wireless and Internet of Things.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECE 203 [Min Grade: D] or ENGR 131 [Min Grade: D] or ENGR 132 [Min Grade: D] or CS 171 [Min Grade: D]

**ECE 303 ECE Laboratory 3.0 Credits**

This course has an emphasis on measurement systems, and develops both theory and application. The software and digital and analog hardware used are relevant to both electrical and computer engineers. Multi-week design projects and design teams are used to prepare students for Senior Design work.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECE 301 [Min Grade: D] or ECE 201 [Min Grade: D] and (ENGR 103 [Min Grade: D] or ENGR 113 [Min Grade: D])

**ECE 361 Probability for Engineers 4.0 Credits**

This course will cover topics related to probability and statistics.

Probability topics include sample space and probability, discrete and continuous random variables, expectation, variance, covariance, correlation, conditional expectation, conditional variance, the weak and strong law of large numbers and the central limit theorem. Statistics topics include properties of a random sample, principles of data reduction, and point estimation.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGR 232 [Min Grade: C] or MATH 262 [Min Grade: C]

**ECE 362 Engineering Statistics 3.0 Credits**

This course will cover topics related to statistics and probability.

Probability topics include sample space and probability; discrete and continuous random variables, expectation, variance, the law of large numbers and the central limit theorem. Statistics topics include properties of a random sample, principles of data reduction, point estimation, hypothesis testing, interval estimation, and linear regression.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (ENGR 202 [Min Grade: D] and ENGR 231 [Min Grade: D]) or (ENGR 202 [Min Grade: D] and MATH 261 [Min Grade: D])

**ECE 391 Introduction to Engineering Design Methods 1.0 Credit**

Introduces the design process, including information retrieval, problem definition, proposal writing, patents, and design notebooks. Includes presentations on problem areas by experts from industry, government, and education.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**ECE 491 [WI] Senior Design Project I 2.0 Credits**

Introduces the design process, including information retrieval, problem definition, proposal writing, patents, and design notebooks. Includes presentations on problem areas by experts from industry, government, and education. This is a writing intensive course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** ECE 391 [Min Grade: D] and ECE 361 [Min Grade: D]

**ECE 492 [WI] Senior Design Project II 2.0 Credits**

Continues ECE 491. Requires written and oral progress reports. This is a writing intensive course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** ECE 491 [Min Grade: D]

**ECE 493 Senior Design Project III 4.0 Credits**

Continues ECE 492. Requires written and oral final reports, including oral presentations by each design team at a formal Design Conference open to the public and conducted in the style of a professional conference.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** ECE 492 [Min Grade: D]

**ECE I199 Independent Study in ECE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECE I299 Independent Study in ECE 12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECE I399 Independent Study in ECE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECE I499 Independent Study in ECE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECE T180 Special Topics in ECE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECE T280 Special Topics in ECE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECE T380 Special Topics in ECE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECE T480 Special Topics in ECE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

# Electrical & Computer Engineering - Power Engineering

## Courses

**ECEP 352 Electric Motor Control Principles 4.0 Credits**

Introduces machinery principles, magnetic circuits, three-phase circuits, the electrical and economic structure of the power industry, ac and dc machine fundamentals, and power electronic converters and their interfaces with electric motors. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEE 302 [Min Grade: D] (Can be taken Concurrently) (ECE 201 [Min Grade: D] or ECES 211 [Min Grade: D])

**ECEP 354 Energy Management Principles 4.0 Credits**

Covers principles of power engineering, including the electrical and economic structure of the power industry (distribution, subtransmission, and bulk transmission levels; environmental issues; the electrical system analysis; the thermal system analysis; links between electromechanics and thermodynamics; and safety issues). Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEE 302 [Min Grade: D] (Can be taken Concurrently) (ECE 201 [Min Grade: D] or ECES 211 [Min Grade: D])

**ECEP 371 Introduction to Nuclear Engineering 2.0 Credits**

This course introduces the student to the fundamental topic of nuclear engineering. This course should be the first course for students interested in the nuclear engineering minor, as all of the topics will be discussed in greater detail in other courses. Topics include atomic and nuclear structure, binding energy, reaction kinetics and energetics, and radioactive decay.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 201 [Min Grade: C]

**ECEP 372 Radiation Detection and Measurement 3.0 Credits**

Introduces students to the fundamentals of radiation detection, and applications of radiation detection equipment.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 201 [Min Grade: D]

**ECEP 380 Introduction to Renewable Energy 3.0 Credits**

Introduction to Renewable Energy is an undergraduate survey course for engineers, scientists and others interested in energy systems and applications. The course introduces students to the mix of current major electric power sources and the pressures that are forcing a transition to renewable sources. Wind and solar energy will be studied in detail, with others as time allows. Course culminates with an integrating off-grid energy system design.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** MATH 122 [Min Grade: D] and (PHYS 102 [Min Grade: D] or PHYS 115 [Min Grade: D] or PHYS 154 [Min Grade: D])

**ECEP 402 Theory of Nuclear Reactors 4.0 Credits**

Introduces students to atomic and nuclear physics, radiation interaction with matter, components of nuclear reactors, neutron diffusion and moderation, nuclear reactor theory, and heat removal from nuclear reactors.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 201 [Min Grade: D] and (ENGR 232 [Min Grade: D] or MATH 210 [Min Grade: D] or MATH 262 [Min Grade: D])

**ECEP 403 Nuclear Power Plant Design & Operation 3.0 Credits**

Introduces students to the design of nuclear power plants. Topics covered include electrical transmission, non-nuclear related equipment, fluid flow, heat transfer, thermodynamics, heat exchangers, pump, valves, piping and nuclear reactor design. Course includes a final project which is the design of a nuclear power plant.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 201 [Min Grade: D]

**ECEP 404 Introduction to Nuclear Engineering 2.0 Credits**

Introduces the fundamental scientific, technical, social and ethical issues in nuclear engineering; nuclear reactions and radiation, radiation protection and control, nuclear energy production and utilization, nuclear fuel cycle, nuclear fuel cycle, nuclear materials, controlled fusion and thermonuclear plasma systems, basics of plasma physics and plasma chemistry, nuclear waste management, nuclear reactor safety, analysis of severe nuclear accidents, risk assessment and related issues of engineering ethics.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 201 [Min Grade: D] and (ENGR 210 [Min Grade: D] or CHE 206 [Min Grade: D])

**ECEP 406 Introduction to Radiation Health Principles 3.0 Credits**

This course is intended to impart radiation safety knowledge to the nuclear engineering student. A fundamental knowledge of radiation safety is critical for all nuclear engineers.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 201 [Min Grade: D]

**ECEP 411 Power Systems I 3.0 Credits**

Covers steady state generator, transformer and transmission line modeling used for balanced steady state power system analysis including three-phase to single-phase model conversion, per-unit analysis, generator and line loadability, transformer and transmission line voltage regulation and reactive compensation.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEP 352 [Min Grade: D]

**ECEP 412 Power Systems II 4.0 Credits**

Covers y-bus based analysis of power systems including steady-state power-flow models and algorithms, economic dispatch of power generation, load-frequency control and introduction to transient stability analysis including time-domain simulation and equal area criterion.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEP 411 [Min Grade: D]

**ECEP 413 Power Systems III 3.0 Credits**

Covers Z-bus-based analysis of power systems including symmetrical component networks of generators, transformers, transmission lines and loads, symmetrical and unbalanced three-phase bus and line faults, and an introduction to power system protection.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEP 412 [Min Grade: D]

**ECEP 421 Modeling and Analysis of Electric Power Distribution Systems 3.0 Credits**

Introduction to power distribution systems; balanced and unbalanced systems, component and load modeling, radial and weekly meshed topologies; algorithms for unbalanced power studies including radial and general structure solver.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** ECEP 352 [Min Grade: C]

**Corequisite:** ECEP 411

**ECEP 422 Power Distribution Automation and Control 3.0 Credits**

Focuses on distribution management systems and their application: including optimizing network operation - capacitor placement and control, network reconfiguration, service restoration. Modern solution technologies are addressed.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEP 421 [Min Grade: C]

**ECEP 423 Service and Power Quality Distribution Systems 3.0 Credits**

Focus on power distribution systems: service and power quality assessment including stat estimation, voltage quality, trouble call analysis, service restoration, component and system reliability assessment.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEP 422 [Min Grade: C]

**ECEP 431 Advanced Electromagnetic Energy Conversion I 4.0 Credits**

Covers theory and operation of alternating current machinery, with emphasis on design alternatives and the effects of design on performance. Includes construction of machine models from laboratory measurements.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEP 352 [Min Grade: D]

**ECEP 432 Advanced Electromagnetic Energy Conversion II 4.0 Credits**

Covers dynamic behavior and transient phenomena of rotating machines and the mathematical models used to describe them, generalized machine theory, measurement of parameters for the mathematical models, and measurement of dynamic and transient behavior.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEP 431 [Min Grade: D]

**ECEP 441 Protective Relaying 3.0 Credits**

Covers operating principles of electromechanical and static relays, fault clearance, and protection of individual parts of a power system. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEP 411 [Min Grade: D] (Can be taken Concurrently)ECEP 352 [Min Grade: D]

**ECEP 451 Power Electronic Converter Fundamentals 3.0 Credits**

Fundamentals of power electronics that include waveforms, basic power switch properties and magnetic circuits. Introduction to basic power electronic converter circuits: diode and phase-controlled rectifies and inverters; switch-mode converters. Applications to DC and AC power supply systems.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEP 352 [Min Grade: D]

**ECEP 452 Experimental Study of Power Electronic Converters 3.0 Credits**

Experimental study of common power electronic converters: diode rectifiers, phase-controlled rectifies, switch-mode inverters. Both hardware and software studies. Additional lectures on: Study of DC-DC switch-mode converters.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEP 451 [Min Grade: D]

**ECEP 453 Applications of Power Electronic Converters 3.0 Credits**

Provides a first look at various power electronic applications in residential, commercial and industrial sites. Examples include utility application such as static var compensators (SVC), thyristor switch capacitors (TSC), high voltage direct-current (HVDC) transmission systems among others. In addition, fundamentals of motor drives and their controls are covered. Examples include induction, DC synchronous and specialized motors.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEP 451 [Min Grade: D]

**ECEP 461 High Voltage Laboratory 1.0 Credit**

Requires students to perform four basic experiments to become familiar with high-voltage techniques and then do a high-voltage design project of their own choosing.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEP 352 [Min Grade: D]

**ECEP 471 Power Seminar I 0.5 Credits**

Discusses current developments in power system operation and research, concentrating on current and future energy sources.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ECEP 472 Power Seminar II 0.5 Credits**

Discusses current developments in power system operation and research, concentrating on generating stations, transmission lines, and substations.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ECEP 473 Power Seminar III 0.5 Credits**

Discusses current developments in power system operation and research, concentrating on distribution, security, and economics.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ECEP 480 Solar Energy Engineering 3.0 Credits**

Covers design of grid-connected and battery backup grid-connected photovoltaic systems. Both electrical and mechanical aspects are included. Topics include system components (solar cells, charge controllers, maximum power point trackers, inverters, etc.), system economics, computer and web-based design aids, electrical codes and standards, externalities of PV systems.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Pre-Junior or Sophomore

**Prerequisites:** ECEE 302 [Min Grade: D] or ECEE 352 [Min Grade: D] or CHE 431 [Min Grade: D] or ECEP 380 [Min Grade: D]

**ECEP 497 Research in Power Systems 0.5-12.0 Credits**

Requires independent study in a topic approved by the faculty.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEP I199 Independent Study in ECEP 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEP I299 Independent Study in ECEP 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEP I399 Independent Study in ECEP 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEP I499 Independent Study in ECEP 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ECEP T180 Special Topics in ECEP 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEP T280 Special Topics in ECEP 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**ECEP T380 Special Topics in ECEP 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEP T480 Special Topics in ECEP 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

# Electrical & Computer Engineering - Computers

## Courses

**ECEC 201 Advanced Programming for Engineers 3.0 Credits**

This course will cover advanced usage and understanding of programming concepts using Python and C within the Linux environment. The course consists of two distinct parts. In the first part, Object Oriented Programming (OOP) and simulation concepts will be covered using the high-level language Python. The second part of the course will introduce the low-level language C as it pertains to Computer Engineering majors and will serve as a foundation for future embedded firmware and system level software authorship as well as a means to better understand the underlying mechanisms implemented by the Python interpreter in terms of CPU control and memory organization.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGR 131 [Min Grade: D] or ENGR 132 [Min Grade: D] or ECE 203 [Min Grade: D] or CS 171 [Min Grade: D]

**ECEC 204 Design with Microcontrollers 3.0 Credits**

Offers hands-on experience in the design of controllers that incorporate microcontrollers as an embedded component in a larger system. The microcomputer topics to be studied will include architecture, software, programming and interfaces.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (ECE 200 [Min Grade: D] or CS 270 [Min Grade: D]) and (ECEC 201 [Min Grade: D] or ECEC 301 [Min Grade: D])

**ECEC 302 Digital Systems Projects 3.0 Credits**

Studies the theory of digital system design and the topdown design methodology using hardware description language and software tools for simulation, synthesis and Field Programmable Gate Array (FPGA) implementation.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** (ECE 105 [Min Grade: D] or CS 172 [Min Grade: D] or ECE 203 [Min Grade: D]) and (ECE 200 [Min Grade: D] or CS 270 [Min Grade: D])

**ECEC 352 Secure Computer Systems: Design Concepts 4.0 Credits**

Covers concepts of secure computation, including economics vs. faults, errors, and hidden messages; mathematical foundations of secure computing; design issues in fault-tolerant computing; and testability and cryptography.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEC 302 [Min Grade: D] and MATH 221 [Min Grade: D]

**ECEC 353 Systems Programming 3.0 Credits**

This course introduces computer systems, including interaction of hardware and software through the operating system, from the programmer's perspective. Three fundamental abstractions are emphasized: processes, virtual memory, and files. These abstractions provide programmers a common interface to a wide variety of hardware devices. Topics covered include linking, system level I/O, concurrent programming, and network programming.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 265 [Min Grade: D] or ECEC 201 [Min Grade: D]

**ECEC 355 Computer Organization & Architecture 3.0 Credits**

This course will cover the principles of designing microprocessors using solid engineering fundamentals and quantitative cost/performance trade-offs. Topics will cover instruction set architectures, arithmetic for computers, assessing and understanding processor performance, processor datapath and control, pipelining, cache design, and virtual-memory design.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEC 302 [Min Grade: D]

**ECEC 356 Embedded Systems 4.0 Credits**

Lectures will cover theoretical concepts of embedded and cyber#physical systems including discrete and continuous dynamics, hybrid systems, state machines, concurrent computation, embedded systems architecture and scheduling. Lab involves programming embedded applications for the decentralized software services architecture using C# and the Microsoft Robotics Software Development Kit (SDK) together with the hardware image processing and tracking capabilities of the Kinect sensor.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEC 204 [Min Grade: D] or ECEC 304 [Min Grade: D]

**ECEC 357 Introduction to Computer Networks 3.0 Credits**

History of the Internet; introduction to packet switching, circuit switching and virtual circuit switching; statistical multiplexing; protocol layering; metrics of network performance including bandwidth, delay and loss; medium access protocols and Ethernet; routing algorithms; end-to-end issues; flow and congestion control; an overview of application layer protocols.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECE 105 [Min Grade: D] or ECE 203 [Min Grade: D] or CS 171 [Min Grade: D]

**ECEC 402 Digital System Projects Embedded Design 3.0 Credits**

A project-based course on real-time applications using Field Programmable Gate Array (FPGA), embedded processors (software), IP (Intellectual Property) cores library and custom IP cores.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEC 302 [Min Grade: D] and (ECEC 204 [Min Grade: D] or ECEC 304 [Min Grade: D])

**ECEC 411 Computer Hardware 3.0 Credits**

Covers the design and performance of computer hardware devices, including direct memory access, priority arbitration, double buffering, and bus standards. Fall.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** ECEC 355 [Min Grade: D]

**ECEC 412 Modern Processor Design 3.0 Credits**

This course introduces modern processor design in a systematic manner. It discusses dynamically scheduled superscalar techniques including multi-issue, dynamic instruction scheduling, speculative execution, and branch prediction; advanced cache designs, and new techniques including SMT and VLIW. The course provides a comprehensive coverage of modern processor architectures.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEC 355 [Min Grade: D] or CS 281 [Min Grade: D]

**ECEC 413 Introduction to Parallel Computer Architecture 3.0 Credits**

This course provides an introduction to the fundamental principles and engineering trade-offs involved in designing modern parallel computers (multi-processors). Topics covered include, but are not limited to, shared-memory and message-passing programming, cache-coherence, synchronization, scalable distributed memory multi-processors, and interconnection techniques.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEC 355 [Min Grade: D] or CS 281 [Min Grade: D]

**ECEC 414 High Performance Computing 3.0 Credits**

This course is an introduction to high performance computing, including both concepts and applications. Course contents will include discussions of different types of high performance computer architectures (multi-core/multi-threaded processors, parallel computers, etc.), the design, implementation, optimization and analysis of efficient algorithms for uni-processors, multi-threaded processors, and parallel computers, and high performance programming.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEC 355 [Min Grade: D] or (CS 281 [Min Grade: D] and CS 282 [Min Grade: D])

**ECEC 421 Introduction to Operating Systems I 3.0 Credits**

Covers basic concepts of computer operating systems, including multiprocessing and multiprogramming systems, lock operations, synchronization, and file structures. Winter.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** ECEC 355 [Min Grade: D] and CS 260 [Min Grade: D]

**ECEC 422 Introduction to Operating Systems II 3.0 Credits**

Further develops the topics of ECEC 421. Spring.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEC 421 [Min Grade: D]

**ECEC 431 Introduction to Computer Networks 3.0 Credits**

Covers topics in computer and telecommunications network design.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECE 200 [Min Grade: D] and CS 260 [Min Grade: D]

**ECEC 432 Internet Architecture and Protocols 3.0 Credits**

Covers architecture, protocols, and services of the Internet with an analytical approach focused on design principles; Internet architecture and topology; architecture of web and mail servers; router architectures; routing protocols; multicasting; multimedia over IP and associated protocols; Quality-of-Service issues in the Internet.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEC 357 [Min Grade: D] or CS 472 [Min Grade: D]

**ECEC 433 Network Programming 3.0 Credits**

Covers application layer protocol and how applications use the transport layer; principles and practice of network programming; the client-server model; concurrent processing; introduction to sockets and related functions client and server software design with examples; principles, issues and challenges in e-mail and web application protocols; security protocols; and network life system concepts.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEC 357 [Min Grade: D]

**ECEC 441 Robotic Computer Interface & Control I 3.0 Credits**

Covers fundamentals of robotics systems, including mechanics, actuators, sensors, kinematics, and inverse kinematics. Fall.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** ECES 356 [Min Grade: D]

**ECEC 442 Robotic Computer Interface & Control II 3.0 Credits**

Covers robot dynamics, Lagrangian and Newton Euler methods, linear control of robots, path planning, and computer implementation. Winter.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEC 441 [Min Grade: D]

**ECEC 443 Robotic Computer Interface & Control III 3.0 Credits**

Covers robot-computer interface methods, including redundancy, optimal control, robustness, nonlinear control, adaptive control, and multiprocessor control. Spring.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEC 442 [Min Grade: D]

**ECEC 451 Computer Arithmetic 3.0 Credits**

This course provides an introduction to number representations used in computer arithmetic, issues of complexity in arithmetic operations, fixed point arithmetic, floating point arithmetic, and residue number systems.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECE 200 [Min Grade: D] and ECEC 355 [Min Grade: D]

**ECEC 453 Image Processing Architecture 3.0 Credits**

This course covers applications of computing techniques and hardware in image (still and video) processing. Methods of compression (lossless, lossy), video compression, JPEG standards, MPEG standards, processing requirements, and implementations for multimedia.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECE 200 [Min Grade: D] and ECES 301 [Min Grade: D] and ECES 303 [Min Grade: D]

**ECEC 455 Intelligent System Architectures 3.0 Credits**

This course outlines the principles of designing the architectures for intelligent systems. Methods of knowledge representation are compared for a variety of engineering problems. Methods of sensing and behavior generation are demonstrated for applications in large engineering and information systems including autonomous robots. Principles of goal-oriented computers are discussed, and modules of intelligent systems architectures are described. Theoretical fundamentals and practical techniques for learning are also covered.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** MATH 221 [Min Grade: D] and ECEC 355 [Min Grade: D]

**ECEC 457 Security in Computing 3.0 Credits**

The course introduces ideas from Cryptography and Fault Tolerant Computing. Cryptography studies how to artificially create distortions that being interwoven with computations mask them from eavesdropping. Fault Tolerance studies techniques of suppressing effects of natural noises that operate in computation channels. The course deals with both some introductory issues in Public Key Cryptography and some important aspects of designing Fault Tolerant Systems.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEC 355 [Min Grade: D]

**ECEC 459 Testing of Hardware 3.0 Credits**

Testing has become the largest expense item in the semiconductor industry. There is rapidly being developed new techniques in testing, design for test and built-in self-test because no existing set of techniques can satisfy the existing and future needs. The course reviews, in a unified way, important issues in testing and diagnosis of hardware. Together with the "Security in Computing" course, it brings a design engineer student to the state of the art level in the field.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEC 355 [Min Grade: D]

**ECEC 471 Introduction to VLSI Design 3.0 Credits**

This is an introductory course where systematic understanding, design and analysis of digital VLSI integrated circuits will be covered. The course will begin with a review of CMOS transistor operation and semiconductor processes. Logic design with CMOS transistor and circuit families will be described. Specifically, layout, design rules, and circuit simulation will be addressed. Performance metrics will be analyzed in design and simulation.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (ECE 200 [Min Grade: D] or CS 270 [Min Grade: D]) and (ECEL 301 [Min Grade: D] and ECEL 302 [Min Grade: D])

**ECEC 472 Custom VLSI Design & Analysis I 3.0 Credits**

This is the first of two courses offered on Custom Very Large Scale Integration (VLSI) circuit and systems design and analysis. An understanding of VLSI integrated circuits is achieved through circuit design and analysis. This course focuses exclusively on high performance digital CMOS VLSI circuit and systems design, although some topics on mixed-signal circuits are also addressed.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEC 471 [Min Grade: D]

**ECEC 473 Custom VLSI Design & Analysis II 3.0 Credits**

This is the second of two courses offered on Custom VLSI circuit and systems design and analysis. An understanding of VLSI integrated circuits is achieved through circuit design and analysis. This course focuses exclusively on high performance digital CMOS VLSI circuit and systems design, although some topics on mixed-signal circuits are also addressed. The primary focus is on-chip power management. Power generation techniques are discussed and different power converters are analyzed. Power distribution networks are presented with a focus on the different distribution architectures and output impedance characteristics. Techniques to reduce power supply noise are also provided. A secondary focus examines substrate noise in mixed-signal systems and techniques to reduce substrate noise.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEC 471 [Min Grade: D]

**ECEC 474 ASIC Design I 3.0 Credits**

This course will focus exclusively on digital CMOS Application Specific Integrated Circuit (ASIC) systems design and automation. The ASIC physical design flow, including logic synthesis, floorplanning, placement, clock tree synthesis, routing and verification will be presented. These back-end physical design flow steps will also be covered through hands-on practice using industrial VLSI CAD tools. Contemporary design practices will be reviewed and presented in experiments.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECE 200 [Min Grade: D] and ECEC 355 [Min Grade: D]

**ECEC 475 ASIC Design II 3.0 Credits**

Design and analysis of Application Specific Integrated Circuits (ASICs) will be covered from a systems design perspective. System timing, arithmetic building block and memory block design processes will be presented. Design tasks in a quarter-long, small-complexity processor design project will cover the back-end of the IC design flow range, from RTL synthesis to timing and power analysis. Projects will be performed in a hierarchical group, similar to an industrial setting, with other graduate and undergraduate students.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEC 474 [Min Grade: D]

**ECEC 476 Hardware Security & Trust 3.0 Credits**

The course covers a broad range of current topics in the areas of security and protection of modern integrated circuits. The covered material includes cryptographic processor and processing overhead, physical and invasive attacks, side-channel attacks, physically unclonable functions, hardware-based true random number generators, watermarking of intellectual property, FPGA security, passive and active metering for prevention of piracy, access control, and emerging threats to current and next-generation technologies.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEC 471 [Min Grade: D] or ECEC 571 [Min Grade: D]

**ECEC 486 Cell and Tissue Image Analysis 3.0 Credits**

Theory of supervised and unsupervised pattern recognition techniques, with practical programming projects.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ECEC 487 Pattern Recognition 3.0 Credits**

Theory of supervised and unsupervised statistical pattern recognition, presented through practical programming techniques.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECE 361 [Min Grade: D]

**ECEC 497 Research In Computer Engineering 0.5-12.0 Credits**

Computer engineering students only. Requires independent research in a field approved by the faculty.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Can enroll if major is CE.

**ECEC I199 Independent Study in ECEC 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEC I299 Independent Study in ECEC 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEC I399 Independent Study in ECEC 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEC I499 Independent Study in ECEC 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Can enroll if major is CE.

Cannot enroll if classification is Freshman or Sophomore

**ECEC T180 Special Topics in ECEC 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEC T280 Special Topics in ECEC 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEC T380 Special Topics in ECEC 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEC T480 Special Topics in ECEC 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

## Electrical & Computer Engineering - Electroph

### Courses

**ECEE 302 Electronic Devices 4.0 Credits**

Covers principles of operation of semiconductor devices, including PN diodes, bipolar transistors, and field effect transistors (JFET, MOSFET, MESFET). Applications of PN junctions, including solar cells, led, laser diodes. Laboratories reinforce lecture material by allowing students to build, measure and analyze data from simple devices.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENGR 220 [Min Grade: D]

**ECEE 304 Electromagnetic Fields & Waves 4.0 Credits**

Covers vector calculus, Coulomb's Law, Gauss' Law, Ampere's Law, Maxwell's equations, Electromagnetic (EM) fields in devices, EM fields in circuits, EM fields in machinery, EM waves, biological effects.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** MATH 291 [Min Grade: D]

**ECEE 352 Analog Electronics 4.0 Credits**

Teaches the fundamentals of electronic circuit analysis and design by means of practical projects, such as a dc power supply and an audio amplifier. Covers design with discrete components as well as integrated circuit design.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEE 302 [Min Grade: D] and ECES 301 [Min Grade: D]

**ECEE 354 Wireless and Optical Electronics 4.0 Credits**

Covers propagation of waves in various media as it relates to wireless communications: reflection, transmission, polarization, wave packets, dispersion, radiation and antennas, microwave electronic devices, optical wave guides, and fiber optics.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECES 301 [Min Grade: D] and ECES 303 [Min Grade: D] and ECEE 304 [Min Grade: D]

**ECEE 421 Advanced Electronics I 4.0 Credits**

Application-and design-focused course. Analyzes feedback in electronic circuits such as operational amplifiers. Covers design and applications of active filters and other typical electronic circuitry. Includes experiments in the design of multistage transistor circuits, feedback loops, operational amplifiers, and active filters.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEE 352 [Min Grade: D]

**ECEE 422 Advanced Electronic Circuits I 3.0 Credits**

Application-and design-focused course. Covers analysis and design of communication circuits and non-linear active circuits; oscillators, mixers, IF and RF amplifiers; and AM and FM modulators.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEE 421 [Min Grade: D]

**ECEE 423 Advanced Electronics Circuits II 3.0 Credits**

Application-and design-focused course. Covers non-linear circuits; function and wave form generators; log-amp, multipliers, dividers, power amp, and phase-lock loops; and design of electronics needed to implement different logic circuit families.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEE 421 [Min Grade: D]

**ECEE 434 Digital Electronics 4.0 Credits**

Covers basic digital integrated circuit building blocks (inverters, nor and nand logic), CMOS logic gates (dc and transient behavior), drivers, and digital circuits and systems (PLA, gate array, memory). Experiments in semiconductor material characterization, device characterization, circuit and device simulations.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEE 302 [Min Grade: D]

**ECEE 441 Lightwave Engineering I 3.0 Credits**

Covers fundamentals of wave propagation, including propagation in various fiber wave guides and field distributions, diffraction, attenuation, dispersion, information capacity, and other analytic and design considerations in fiber systems. Fall.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEE 304 [Min Grade: D]

**ECEE 442 Lightwave Engineering II 3.0 Credits**

Covers operating principles, construction, and characteristics of sources, couplers, and detectors used in optical systems. Includes equivalent circuit models and principles of generation, transmission, and reception. Winter.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEE 441 [Min Grade: D]

**ECEE 443 Lightwave Engineering III 3.0 Credits**

Covers applications of devices and systems in such areas as data, voice, and image trans-mission; industrial automation; process control; medicine; and computers. Includes basic measurement systems. Spring.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEE 442 [Min Grade: D]

**ECEE 451 Electroacoustics 3.0 Credits**

Applications-oriented course. Covers fundamentals of vibrating systems; equations of motion; acoustical, electrical, and mechanical analogs; properties of waves in fluids; acoustic impedance and plane wave transmission; application to design of transducers; and application of acoustic waves in medical imaging, non-destructive testing, and the biomedical field.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Junior or Pre-Junior or Sophomore

**ECEE 471 RF Components and Techniques 4.0 Credits**

This course covers microwave networks (Z, Y, S, T ABCD Parameters), signal flowgraph, impedance matching techniques (lumped and distributed, quarter wave transformers), circulators and isolators, directional couplers (branch line, Wilkinson, Lange, slot waveguide), and filters (lowpass, bandpass, bandstop, highpass). CAD laboratory and design projects are an integral part of this course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEE 354 [Min Grade: D]

**ECEE 472 RF Electronics 4.0 Credits**

This course covers static and dynamic characteristics of transistors, unipolar (MOSFET, MESFET, HEMT), bipolar (BJT, HBT), LNA design and realization, power amplifiers, distributed amplifiers, switches, limiters, phase shifters, detectors, mixers, oscillators (Colpitts, YIG turned, reflection, transmission, DRO). CAD laboratory and design projects are an integral part of this course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEE 471 [Min Grade: D]

**ECEE 473 Antennas and Radiating Systems 4.0 Credits**

This course covers short and magnetic dipole, radiation pattern, radiation resistance, directivity and gain, line antennas (dipoles, monopoles, V and inverted V antennas), helix, Yagi-Uda, log-periodic, aperture antennas (slot, horn and reflector), printed circuit antennas (patch and spiral), and phased antennas. CAD laboratory and design projects are an integral part of this course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEE 471 [Min Grade: D]

**ECEE 497 Research in Electrophysics 0.5-12.0 Credits**

Requires independent research in a topic approved by the faculty.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEE I199 Independent Study in ECEE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEE I299 Independent Study in ECEE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEE I399 Independent Study in ECEE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEE I499 Independent Study in ECEE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ECEE T180 Special Topics in ECEE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEE T280 Special Topics in ECEE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEE T380 Special Topics in ECEE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEE T480 Special Topics in ECEE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

## Electrical & Computer Engineering - Systems

### Courses

**ECES 201 Introduction to Audio-Visual Signals 4.0 Credits**

This introductory engineering course will focus on the digital signal representations commonly used in prevailing entertainment media: audio, images, and video. It will explore how each medium is represented digitally and convey the signal processing concepts used in storing, manipulating, transmitting, and rendering such content. The goal of the course is to provide non-engineering students with a fundamental understanding of core digital signal processing methods.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** MATH 122 [Min Grade: D]

**ECES 301 Signals and Systems I 4.0 Credits**

This course covers time and frequency domain analysis of both continuous and discrete time signals and systems. Topics covered include a discussion of fundamental signals and basic system properties, convolution, the Fourier series, the Fourier transform, and introductory filtering. Students will learn to design and analyze the input output relationships of linear time-invariant signals, and will discuss applications in the field of electrical engineering.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (ECE 205 [Min Grade: D] and ECE 201 [Min Grade: D]) or (ECE 201 [Min Grade: D] and ENGR 103 [Min Grade: D])

**ECES 302 Transform Methods and Filtering 4.0 Credits**

Covers the Fourier series and the Fourier transform, sinusoidal steady-state analysis and filtering, discrete-time systems and the Z-transform, discrete Fourier transform, network functions and stability, magnitude, phase, poles and zeroes, Nyquist criterion, the Nyquist plot and root loci, stability of one-ports, sensitivity, worst-case design and failure-tolerance.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** (TDEC 221 [Min Grade: D] or ENGR 232 [Min Grade: D] or MATH 262 [Min Grade: D] or MATH 210 [Min Grade: D]) and ECE 201 [Min Grade: D]

**ECES 303 Signals and Systems II 3.0 Credits**

This course introduces Laplace & Z-transforms & their corresponding region of convergence as extensions of Fourier transform (FT) to deal with signals & systems (continuous & discrete) with no FT. It also covers the fundamentals of the highly used discrete Fourier transforms (DFT) and its fast computation. The fast Fourier transform (FFT) is also presented to digitize the FT of discrete signals. Optimal, uniform, & compandor quantizer, which complements the sampler, are also introduced to discretize the signal's range for achieving full digitization of the signal (the digitizer). To close the loop, all FT, regular and generalized, continuous & discrete are tied together.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECE 361 [Min Grade: D], BMES 310 [Min Grade: D] (Can be taken Concurrently)(ECES 301 [Min Grade: D] or ECES 302 [Min Grade: D])

**ECES 304 Dynamic Systems and Stability 4.0 Credits**

Covers linear time-invariant circuits and systems; two-and multi-terminal resistors, operational-amplifier circuits, first-order circuits, linear and nonlinear second-order systems, state equation and state variables, eigenvalues and eigenvectors, zero-input response, qualitative behavior of  $\dot{x} = Ax$  (stability and equilibria), qualitative behavior of  $\dot{x} = f(x)$ , phase portraits, equilibrium states.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECES 301 [Min Grade: D]

**ECES 306 Analog & Digital Communication 4.0 Credits**

Covers signal sampling and reconstruction; modulation, angle modulation; digital communications systems, digital transmission.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** (ECES 301 [Min Grade: D] or ECES 302 [Min Grade: D]) and ECE 361 [Min Grade: D]

**ECES 352 Introduction to Digital Signal Process 4.0 Credits**

Covers discrete-time signals, analog-digital conversion, time and frequency domain analysis of discrete-time systems, analysis using Z-transform, introduction to digital filters, discrete-time Fourier transform, Discrete Fourier Transform (DFT), and Fast Fourier Transform (FFT).

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECES 303 [Min Grade: D] or ECES 201 [Min Grade: D]

**ECES 354 Wireless, Mobile & Cellular Communications 4.0 Credits**

Covers concepts of wireless systems; propagation effects, including loss, dispersion, fading, transmission, and reception; mobile systems, including design of base units and mobile units; micro cells and pico cells; cell division, including frequency use and reuse; concepts of FDMA, TDMA, and CDMA; error rates and outage probability; and circuits and components for wireless and mobile systems.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECES 306 [Min Grade: D]

**ECES 356 Theory of Control 4.0 Credits**

Covers the foundations of control theory. Includes experiments and demonstrations during lectures and labs that may be jointly held, taking advantage of multimedia and computer-controlled apparatus.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECES 304 [Min Grade: D]

**ECES 358 Computer Control Systems 4.0 Credits**

Reviews principles of applications of computer control systems to a variety of industries and technologies, including manufacturing processes, robotic cells, machine cells, chemical processes, network control, investment portfolio control, and real-time expert and learning systems for diagnostics and quality control.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECES 356 [Min Grade: D]

**ECES 411 Convex Optimization in Engineering Systems 3.0 Credits**

Covers fundamental of convex optimization including convex sets, convex functions, linear and nonlinear constraints, complementary slackness, Lagrange multipliers, Lagrangian duality, and quadratic programming. Focuses on applications (e.g., signal processing, communications, computer networking, and portfolio management). Focuses on use of Matlab or equivalent software.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** ECES 301 [Min Grade: D] and ECES 303 [Min Grade: D] and (ENGR 361 [Min Grade: D] or ECE 361 [Min Grade: D])

**ECES 412 Simulation of Stochastic Engineering Systems 3.0 Credits**

Covers algorithms for generation of pseudo-random numbers, generation of random variates using the inverse transform, acceptance rejection techniques, Monte Carlo simulation, basics of point and interval estimation and hypothesis testing. Coverage of Markov chains, Markov chain Monte Carlo, Metropolis algorithm, simulated annealing, as time permits. Applications include computer networks, statistical physics, derivative pricing. Focus on use of Matlab or equivalent software.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** ECES 301 [Min Grade: D] and ECES 303 [Min Grade: D] and (ENGR 361 [Min Grade: D] or ECE 361 [Min Grade: D])

**ECES 413 Strategies for Repeated Games 3.0 Credits**

Covers the gambler's ruin problem, optimality of bold play for subfair games, the Martingale betting system, Kelly betting and the maximum growth rate in superfair games, the multi-armed bandit and its generalizations, Parrondo's paradox for coupled subfair games, basics of auction theory. Focus on use of Matlab or equivalent software.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** ECES 301 [Min Grade: D] and ECES 303 [Min Grade: D] and (ENGR 361 [Min Grade: D] or ECE 361 [Min Grade: D])

**ECES 421 Communications I 3.0 Credits**

Covers analog communications, including linear modulation methods (AM, DSB, SSB), exponential modulation (FM, PM), and noise effects on analog communication systems.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECES 306 [Min Grade: D]

**ECES 422 Communications II 3.0 Credits**

Covers analog (PAM, PPM) and digital (PCM, DM) pulse modulation systems, entropy, source coding, and channel coding.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECES 421 [Min Grade: D]

**ECES 423 Communications III 3.0 Credits**

Covers digital transmission systems, baseband and passband, spread-spectrum communications, and basics of wireless and mobile systems.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECES 422 [Min Grade: D]

**ECES 434 Applied Digital Signal Processing 4.0 Credits**

This course explores digital signal processing (DSP) concepts through the context of current applications, which range from video encoding to human genome analysis. Topics such as sampling, aliasing, and quantization, are considered in terms of the constraints of particular applications. Discrete-time linear systems, frequency-domain analysis, and digital filtering using Discrete Fourier Transform are examined in-depth and realized through application-specific lab projects.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECES 352 [Min Grade: D]

**ECES 435 Recent Advances in Digital Signal Processing 4.0 Credits**

Digital signal processing algorithms once thought to be impractical are now implemented in devices, such as household appliances & mobile phones. This course explores the computationally-intensive DSP methods including short-time linear prediction, cepstral analysis, and complex phase reconstruction as well as alternative signal representations and transforms, including the Hilbert, Chirp, and Discrete Cosine Transforms. Laboratory projects will focus on the implementation of these methods.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECES 352 [Min Grade: D]

**ECES 436 Multi-disciplinary Digital Signal Processing 4.0 Credits**

The applications of digital signal processing (DSP) span a wide range of problem domains and disciplines. This course explores the multi-disciplinary aspects of DSP by focusing on a core set of common methods applicable to problems in many fields, such as periodicity detection, signal and power spectrum estimation, and data modeling. Laboratory projects will utilize experiments drawn from a diversity of fields, including medicine, music analysis, image processing, voice/data communications and robotics.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECES 352 [Min Grade: D]

**ECES 441 Bioinformatics 3.0 Credits**

This course will focus on developing the computational, algorithmic, and database navigational skills required to analyze genomic data that have become available with the development of high throughput genomic technologies. We will also illustrate statistical signal processing concepts such as dynamic programming, hidden markov models, information theoretic measures, and assessing statistical significance. The goals will be achieved through lecture and lab exercises that focus on genomic databases, genome annotation via hidden markov models, sequence alignment through dynamic programming, metagenomic analyses, and phylogenetics with maximum likelihood approaches.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**ECES 444 Systems and Control I 4.0 Credits**

This course focuses on the state space approach to systems analysis and control for use in such applications as: Automated Equipment, Robotics, Motor Control, Process Control and Aerospace. A brief review of Classical Controls provides the seaway for state space modeling as well as state variable feedback and observer based state control. Optimal Control (Performance Index for gain selection) as well as System Identification techniques and Lagrangian Dynamics are introduced. The course includes a set of laboratory experiments where students get hands-on experience with the core theoretical material.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECES 356 [Min Grade: D]

**ECES 445 Systems and Control II 4.0 Credits**

This course focuses on Linear Quadratic Gaussian Control for use in such applications as: Automated Equipment, Robotics, Motor Control, Process Control and Aerospace. The course introduces the Kalman Filter as a stochastic observer and then extends on applying it to target tracking, system identification and use in control.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECES 356 [Min Grade: D] and ECE 361 [Min Grade: D]

**ECES 446 Systems and Control III 4.0 Credits**

This course introduces nonlinear systems and some commonly used industrial non-linear control techniques relevant to such applications as: Automated Equipment, Robotics, Motor Control, Process Control and Aerospace. Foundation topics include: equilibrium and stability of nonlinear systems, analysis of limit cycles and region of attraction, Lyapounov stability, Nyquist stability for limit cycle analysis. Control techniques include topical solutions: Model Reference Adaptive control; Adaptive Disturbance Rejection Control, Robust and H-infinity Control, and Fuzzy Logic Control.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECES 356 [Min Grade: D]

**ECES 450 Statistical Analysis of Metagenomics 3.0 Credits**

This course focuses on developing the computational and database navigational skills required to analyze genomic data. The goals will be achieved through lecture and exercises on genomic databases, programming for importing and pre-processing genomic data, high performance programming for analysis of high-throughput metagenomic analyses, and use of high-performance computing for phylogenetic reconstruction.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ECES 462 Medical Robotics II 3.0 Credits**

This course will review the emerging, multidisciplinary field of Medical Robotics. The course includes multiple site/field visits to observe Medical Robot systems demonstrations and interaction with the medical team and system manufacturers.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECES 461 [Min Grade: D]

**ECES 497 Research in Systems Engineering 0.5-12.0 Credits**

Electrical engineering students only. Requires independent research in a topic approved by the faculty.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ECES 499 Supervised Study in Systems Engineering 0.5-20.0 Credits**

Requires independent study in a topic approved by the faculty.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ECES I199 Independent Study in ECES 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECES I299 Independent Study in ECES 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECES I399 Independent Study in ECES 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECES I499 Independent Study in ECES 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECES T180 Special Topics in ECES 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECES T280 Special Topics in ECES 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECES T380 Special Topics in ECES 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECES T480 Special Topics in ECES 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

## Electrical Engineering Lab

### Courses

**ECEL 301 [WI] Electrical Engineering Laboratory 2.0 Credits**

Offers laboratory experiences in each of the five ECE tracks: computers, controls/robotics, electronics, power and energy, and telecommunications. Each lab consists of a stand-alone module containing: lecture material providing basic theory, references, and laboratory experiments. This is a writing intensive course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECE 200 [Min Grade: D] and ECE 201 [Min Grade: D] and (TDEC 132 [Min Grade: D] or TDEC 133 [Min Grade: D] or ENGR 104 [Min Grade: D] or ENGR 103 [Min Grade: D])

**ECEL 302 ECE Laboratory II 2.0 Credits**

Offers laboratory experiences in each of the five ECE tracks: computers, controls/robotics, electronics, power and energy, and telecommunications. Each lab consists of a stand-alone module containing: lecture material providing basic theory, references, and laboratory experiments. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEL 301 [Min Grade: D]

**ECEL 303 ECE Laboratory III 2.0 Credits**

Offers laboratory experiences in each of the five ECE tracks: computers, controls/robotics, electronics, power and energy, and telecommunications. Each lab consists of a stand-alone module containing: lecture material providing basic theory, references, and laboratory experiments.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECEL 302 [Min Grade: D]

**ECEL 304 ECE Laboratory IV 2.0 Credits**

This course offers laboratory experience, using both modeling software and digital and analog hardware relevant to both electrical and computer engineers. Multi-week design projects and design teams are used to prepare students for Senior Design work.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEL 303 [Min Grade: D]

**ECEL 311 ECE Laboratory Methods I 3.0 Credits**

Introduces students to MATLAB and PSpice, industry standard CAD software for electronics (analog and digital) and systems engineers. Solve DC bias, DC sweep, AC sweep, and transient problems in PSpice and MATLAB. Build and design simple digital circuits.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECE 200 [Min Grade: D] and ECE 201 [Min Grade: D] and ENGR 103 [Min Grade: D]

**ECEL 312 ECE Laboratory Methods II 3.0 Credits**

Covers introduction to transistor circuits, PSpice simulations of active devices, transfer function analysis, Bode analysis, active filter analysis and design. Programming and use of Microprocessors and/or FPGA. Perform measurements on devices and circuits.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ECEL 301 [Min Grade: D] or ECEL 311 [Min Grade: D]

**ECEL 401 Lightwave Engineering Laboratory 3.0 Credits**

Teaches fundamentals of interaction of light with matter. Waves and photons. Interference and diffraction. Optical fibers and free-space optics. Introduces students to optical communication and imaging.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (ECEL 301 [Min Grade: D] and ECEL 302 [Min Grade: D] and ECEL 302 [Min Grade: D]) or (ECEL 311 [Min Grade: D] and ECEL 312 [Min Grade: D] and ECEL 304 [Min Grade: D])

**ECEL 402 Nano-Photonics Laboratory 3.0 Credits**

Teaches a fundamental knowledge of nanophotonic materials, devices, and applications in a hands-on laboratory setting. Introduces students to photonic bandgaps, photonic crystals, optical sensing methods, holography methods and materials, concepts of surface plasmons and Plasmon resonance.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (ECEL 301 [Min Grade: D] and ECEL 302 [Min Grade: D] and ECEE 304 [Min Grade: D]) or (ECEL 311 [Min Grade: D] and ECEL 312 [Min Grade: D] and ECEE 304 [Min Grade: D])

**ECEL 403 Bio-Photonics Laboratory 3.0 Credits**

Teaches the fundamentals of the interaction of light with matter. Introduces students to different types of optical detection for biomedical applications, Quantized states of matter, Energy levels of atoms and molecules, Absorption, Scattering, Fluorescence, Imaging of cells and molecules, Spectroscopy, and Cancer precursors.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (ECEL 301 [Min Grade: D] and ECEL 302 [Min Grade: D] and ECEE 304 [Min Grade: D]) or (ECEL 311 [Min Grade: D] or ECEL 312 [Min Grade: D] or ECEE 304 [Min Grade: D])

**ECEL 404 Software Defined Radio Laboratory 3.0 Credits**

This course introduces students to the concept of software defined radio using the USRP hardware platform and GNU Radio software. Functional blocks of wireless communications systems will be discussed, programmed in Python, and tested on hardware.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (ECEL 301 [Min Grade: D] and ECEL 302 [Min Grade: D] and ECES 301 [Min Grade: D] and ECES 303 [Min Grade: D]) or (ECEL 311 [Min Grade: D] and ECEL 312 [Min Grade: D] and ECES 301 [Min Grade: D] and ECES 303 [Min Grade: D])

**ECEL 405 Digital Systems Laboratory 3.0 Credits**

Students will gain practical knowledge of digital systems and signal processing by designing, simulating, constructing, testing and refining a digital audio recording system.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (ECEL 301 [Min Grade: D] and ECEL 302 [Min Grade: D] and ECES 301 [Min Grade: D]) or (ECEL 311 [Min Grade: D] and ECEL 312 [Min Grade: D] and ECES 301 [Min Grade: D])

**ECEL 407 General Purpose GPU Programming 3.0 Credits**

This course will teach students how to develop parallel algorithms for the GPU and implement them using the CUDA programming interface.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (ECEL 301 [Min Grade: D] and ECEL 302 [Min Grade: D] and ECEC 301 [Min Grade: D] and ECEC 355 [Min Grade: D]) or (ECEL 311 [Min Grade: D] and ECEL 312 [Min Grade: D] and ECEC 301 [Min Grade: D] and ECEC 355 [Min Grade: D])

**ECEL I199 Independent Study in ECEL 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEL I299 Independent Study in ECEL 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEL I399 Independent Study in ECEL 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEL I499 Independent Study in ECEL 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEL T180 Special Topics in ECEL 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEL T280 Special Topics in ECEL 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEL T380 Special Topics in ECEL 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ECEL T480 Special Topics in ECEL 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

## Electrical Engineering Technology

### Courses

**EET 102 Introduction to Engineering Technology 3.0 Credits**

The main objective of this course is to introduce the basic concepts and the fundamentals of Engineering Technology (ET). Students are introduced to the four tracks (electrical, mechanical, industrial, and biomedical) in ET and work on the selected topics designed to enhance the problem solving techniques.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**EET 201 Circuit Analysis I 4.0 Credits**

Introduction to the key electrical terms, basic laws and theorems of electric circuits by concentrating on Direct Current (DC) circuit analysis, power, and energy.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (PHYS 104 [Min Grade: D] or PHYS 102 [Min Grade: D]) and MATH 110 [Min Grade: D]

**EET 202 Circuit Analysis II 4.0 Credits**

Introduction to time domain (transient) analysis of R, L, C elements and energy storage in L and C circuits. The response of source-free RL, RC, and RLC circuits are developed followed by response to constant voltage and current sources.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EET 201 [Min Grade: D]

**EET 204 Introduction to Nanotechnology 3.0 Credits**

The course is an introduction to the physical, chemical and biological principles of nanotechnology. The course provides information on prevalent nanofabrication methods and materials, and familiarizes the students with the tools of nano measurements. The history, societal impact and the involvement of nanotechnology in everyday life are also discussed.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (CHEM 111 [Min Grade: D] and CHEM 113 [Min Grade: D]) or CHEM 101 [Min Grade: D] and (PHYS 103 [Min Grade: D] or PHYS 101 [Min Grade: D]) and (PHYS 104 [Min Grade: D] or PHYS 102 [Min Grade: D] or PHYS 151 [Min Grade: D])

**EET 205 Digital Electronics 4.0 Credits**

The objective of this course is to introduce AET students to fundamentals of digital electronics starting with the binary number system and proceeding to logic gates, Boolean algebra, combinational logic circuits, and the basic arithmetic units used in digital computers such as adders, counters and shift registers.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EET 201 [Min Grade: D]

**EET 206 Analog Electronics I 4.0 Credits**

Students are introduced to linear circuit analysis of passive and active semiconductor components, modeling of non-linear circuit elements, light and heat-dependent semiconductor devices, biasing of three-terminal devices, and semiconductor small-signal models.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EET 201 [Min Grade: D] and EET 202 [Min Grade: D]

**EET 207 Introduction to Laboratory and Process Control 3.0 Credits**

This course introduces students to programming techniques used to control laboratory experiments and industrial processes. The emphasis is on applications of LabView and C in real-world measurements and embedded systems.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**EET 208 Introduction to Programming for Embedded Systems 3.0 Credits**

This course introduces students to programming techniques used in embedded systems. The emphasis is on applications of C in real-world measurements, analysis, and embedded systems.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**EET 209 Fundamentals of Virtual Instrumentation 3.0 Credits**

This course introduces students to programming techniques used to monitor and control laboratory experiments and industrial processes. The emphasis is on applications of LabVIEW in real-world measurements and embedded systems, as well as on the practical aspects of interfacing a computer to various instruments including timing issues, real-time data acquisition and instrument control, instrument status, and acquisition speed.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**EET 307 Basic Power Systems I 3.0 Credits**

Fundamentals of single-phase and three-phase power systems; introduction to symmetrical components and sequence impedances; power transfer modeling; the per-unit system; power transmission line impedance and admittances.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**Prerequisites:** EET 104 [Min Grade: D]

**EET 310 Industrial Application of Nanotechnology 3.0 Credits**

This course introduces students to nanotechnology materials, devices, and processes from the perspective of product development and process engineering, manufacturing scale-up, quality assurance, and reliability. Laboratory projects provide students with hands-on experience in fabricating and characterizing nanomaterials and nanodevices, and their applications for renewable energy, solid-state lighting, novel functional materials, and biomedical engineering.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 111 [Min Grade: D] and CHEM 113 [Min Grade: D]

**EET 311 Modeling of Engineering Systems 4.0 Credits**

Course introduces students to development and application of ordinary differential equations to systems analysis with emphasis on electrical systems. Particular attention is paid to the derivation of differential equations from given practical circuits used in industrial applications.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** MATH 122 [Min Grade: D] and EET 202 [Min Grade: D]

**EET 313 Signals and Systems I 4.0 Credits**

Course introduces students to applications of the systems analysis to the design of useful circuits and devices used in industrial applications. Covers time and frequency domain circuit analysis (transfer function, convolution) to determine response of the system to the arbitrary input.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EET 311 [Min Grade: D]

**EET 317 Analog Electronics II 4.0 Credits**

Students are introduced to four-layer diodes, power amplifiers, differential amplifiers, linear and non-linear operational amplifiers, feedbacks, oscillators, and active filters. Class discussions include practical circuits, troubleshooting, and case studies.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EET 206 [Min Grade: D]

**EET 319 PLC Fundamentals 4.0 Credits**

Introduces the fundamentals of programmable logic controllers, and PLC application in process control. The course includes both lecture and laboratory aimed at applying fundamental principles to practical projects. The emphasis is on the basics of ladder logic, including timers, counters, and program control.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EET 205 [Min Grade: D]

**EET 320 Renewable Energy Systems 3.0 Credits**

This course provides an introduction to energy systems and renewable energy resources, with a scientific examination of the energy field and an emphasis on alternate energy sources and their technology and applications. The class explores society's present needs and future energy demands, examines conventional energy sources and systems, including fossil fuels and then focuses on alternate, renewable energy sources such as solar, wind power, geothermal and fuel cells.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 103 [Min Grade: D] or (PHYS 101 [Min Grade: D]) and PHYS 104 [Min Grade: D] or (PHYS 102 [Min Grade: D] or PHYS 151 [Min Grade: D])

**EET 322 Energy Conversion 4.0 Credits**

The course covers the fundamentals and the principles of electrical machines and transformers, with an emphasis on their application and installation. The course covers transformer, dc, ac and special machines. Novel energy conversion techniques such as Fuel Cell and Batteries are also discussed.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EET 202 [Min Grade: D]

**EET 323 Electrical Systems Design 3.0 Credits**

This course covers the basics of industrial systems, including safety, grounding, protection, lighting, distribution, commonly found in residential, commercial and industrial environment. The course formulates the application of standards and codes such as NEC, NEMA and IEEE.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EET 202 [Min Grade: D]

**EET 324 Power Electronics 4.0 Credits**

The course covers the basics of the industrial and power electronics over a spectrum of applications and provides an introduction to the emerging technologies in these fields. The course is accompanied by laboratory using hardware and software simulation tools.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EET 202 [Min Grade: D]

**EET 325 Microprocessors 3.0 Credits**

Introduces student to fundamentals of microprocessing using an application-oriented approach. Includes fundamental principles and system requirements supplemented with specific implementation examples and practical circuits with detailed design considerations.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EET 205 [Min Grade: D]

**EET 333 [WI] Non-Destructive Evaluation of Materials 4.0 Credits**

The course presents principles of Ultrasound Nondestructive Evaluation (NDE) of Materials combining hands-on laboratory experience with lectures. Students learn the physical principles and fundamentals of ultrasound material characterization. Students also learn industrial applications of NDE techniques and procedures and become familiar with detection and characterization of defects in materials, such as flaws and cracks.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (PHYS 103 [Min Grade: D] or PHYS 101 [Min Grade: D]) and (PHYS 104 [Min Grade: D] or PHYS 102 [Min Grade: D] or PHYS 151 [Min Grade: D])

**EET 335 Acoustic Emission 4.0 Credits**

The course presents principles of acoustic emission using practical applications in various industries. Physical principles of acoustic emission generation, propagation and detection in engineering materials and structures are presented. This includes principles of stress and strain and the underlying materials science of material deformation, crack growth and failure. Students learn how these principles are utilized to build technical applications of acoustic emission considered as an NDE method.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 103 [Min Grade: D] and PHYS 104 [Min Grade: D]

**EET 401 Applied Microcontrollers 4.0 Credits**

The course is an introduction to microcontroller hardware and software with an emphasis on embedded control applications. Topics covered include microcontroller architectures, programming, analog and digital input/output, timing, debugging and PC-based software development tools.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EET 205 [Min Grade: D]

**EET 402 Control Engineering 3.0 Credits**

The course covers fundamental of control theory and their applications, including, linear systems and feedback, linear system operation and stability, standard methods applicable to the linear systems and basic for designs and applications.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EET 311 [Min Grade: D] and EET 313 [Min Grade: D]

**EET 404 Signals and Systems II 3.0 Credits**

Introduces the analysis of electric circuits under steady sinusoidal conditions, applications of Laplace transformation and complex frequency analysis, and Fourier analysis for representing an arbitrary time function as a sum of sinusoidal functions.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EET 313 [Min Grade: D] and EET 311 [Min Grade: D]

**EET 406 Communication Systems 3.0 Credits**

This course introduces AET student to fundamentals of Communication Systems using an integrated approach to analog and digital communications. Design and applications of contemporary communication systems are emphasized via the reduction theory to practice.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EET 311 [Min Grade: D] and EET 313 [Min Grade: D]

**EET 407 Power Systems Fundamentals 3.0 Credits**

The course covers the basic principles of the power systems, electric grid, methods to analyze electric grid systems and basic power system protection and stability.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EET 202 [Min Grade: D] and EET 322 [Min Grade: D]

**EET 409 Optical System Design 3.0 Credits**

This course introduces ET students to fundamentals of optics and optical systems using an application-oriented approach. Special attention is given to fundamental principles of optical systems and their requirements supplemented with specific applications-based examples.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 104 [Min Grade: D]

**EET I199 Independent Study in EET 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**EET I299 Independent Study in EET 12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**EET I399 Independent Study in EET 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**EET I499 Independent Study in EET 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**EET T180 Special Topics in EET 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**EET T280 Special Topics in EET 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**EET T380 Special Topics in EET 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**EET T480 Special Topics in EET 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

## Engineering Management

### Courses

**EGMT 230 Introduction to Global Engineering 2.0 Credits**

This course introduces the student to a broad range of contemporary issues (economic, political and cultural) that engineers face in meeting the challenges of globalization. This is a discussion focused course and is intended to expose the engineers to concepts and challenges facing today's global engineers. Topics include understanding globalization, communicating across cultures, peace engineering, and developmental engineering. Students in this course will also be asked what it means to be an engineer today and to understand their role and potential for impact. The course will feature guest speakers and students will engage in various case study analysis.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**EGMT 295 Survey of Mentorship 1.0 Credit**

This course is the first in the leadership development course sequence, which is part of the Peer Mentor program. This course sequence is designed to develop and enhance the leadership skills among engineering students, emphasizing communication among peer groups and other undergraduate students. As the first course in the sequence, it is focused on the mentor-mentee relationship as it relates to leadership development. Students in this class will be assigned freshman mentees with whom they will be working during the fall term.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**EGMT 296 Survey of Leadership 1.0 Credit**

EGMT 296: Survey of Leadership is the second course in the leadership development course sequence which is part of the Peer Mentor program. This course sequence is designed to develop and enhance the leadership skills among engineering students, emphasizing communication among peer groups and other undergraduate students. As the second course in the sequence, EGMT 296: Survey of Leadership builds upon the foundational leadership concepts of trust, communication, and mentorship covered in EGMT 295: Survey of Mentorship. The course also focuses on self-awareness, team dynamics, and emotional intelligence, which is the ability of a person to adapt his or her leadership style based on situational needs.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**EGMT 340 Introduction to the Orbital Perspective 3.0 Credits**

Living on the International Space Station is a powerful, transformative experience that can change one's views on our planet and the problems we collectively face. Based upon Astronaut Ron Garan's experiences in space, this course focuses on the importance and possibilities of global collaboration and innovation in creating a better world. Students will learn what it is like to work with a diverse group of people in an environment only a handful of human beings have ever known. Students will also learn to apply the orbital perspective here at home, embracing new partnerships and processes to promote peace and combat hunger, thirst, poverty, and environmental destruction. This course is a call to action for each of us to care for the most important space station of all: planet Earth.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**EGMT 345 Introduction to Peacebuilding for Engineers 3.0 Credits**

Developed in partnership with professional peacebuilders from the PeaceTech Lab and USIP's Academy for International Conflict Management and Peacebuilding in Washington DC, this course introduces engineering students to the concepts and skills practiced in the field of international peacebuilding and conflict transformation. This course provides students with first-hand accounts of peacebuilders describing the challenges and opportunities in their work, short presentations outlining key theories and concepts that guide that work, and opportunities to think about how this knowledge, skills, and attitudes can be applied to real-life peacebuilding dilemmas.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**EGMT 350 Conflict Management for Engineers 3.0 Credits**

As the pace of science and technology innovation increases, so too does the role of engineers in solving some of the world's toughest challenges. The prevention of violent conflict and the pursuit of a sustainable peace is just such a challenge. Developed in partnership with professional peacebuilders from the PeaceTech Lab and the US Institute of Peace's Academy for International Conflict Management and Peacebuilding in Washington DC, this course introduces engineering students to the concepts and skills they will need in order to use technology expertise in service of conflict-affected communities. This course provides students with an introduction to the theory and practice of conflict analysis, strategic peacebuilding, and negotiation.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**EGMT 404 [WI] Introduction to Engineering Management Communications 3.0 Credits**

Excellence in design is as important to managerial communications as it is for any engineering endeavor. By applying this concept to the challenges that new engineering managers face, the course encourages engineers to aspire to professional competence in writing and speaking as they prepare for management. This helps them in both marketing their job skills and publishing and promoting innovative ideas and solutions. Students learn the rhetoric of managerial communication to affect workplace behavior on multiple levels, effect profitable technological and business outcomes, and promote the success of new products and systems. The basic skills of composition and grammar are also stressed: developing and organizing content, building effective reporting formats, and editing to achieve style and correctness.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**EGMT 462 Introduction to Engineering Management 3.0 Credits**

Introduces the general theory of management, including the processes of planning, organizing, assembling resources, supervising, and controlling. This is a writing intensive course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**EGMT 465 Introduction to Systems Engineering 3.0 Credits**

Determining technical requirements for engineering systems and planning technical product design and requirements. Analyzing the functionality, interoperability, and sustainability of new engineering systems. Integrating disparate engineering components for overall system optimization. Planning for testing and evaluation of engineering systems to evaluate conformance with technical requirements. Planning optimized organizational structure for execution of complex engineering programs.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**EGMT 470 Engineering Leadership Capstone 2.0 Credits**

This course aims to improve students' leadership, problem solving, and communications skills through mentorship, scholarship, and civic engagement. It requires students to utilize the skills developed through their degree programs to solve a problem in the local community. Students will then present their solution to the relevant parties at the end of the term.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (EGMT 295 [Min Grade: D] and EGMT 296 [Min Grade: D]) or (ORGB 320 [Min Grade: D] and EGMT 404 [Min Grade: D] and EGMT 462 [Min Grade: D])

**EGMT I199 Independent Study in EGMT 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**EGMT I299 Independent Study in EGMT 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**EGMT I399 Independent Study in EGMT 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**EGMT I499 Independent Study in EGMT 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**EGMT T180 Special Topics in EGMT 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**EGMT T280 Special Topics in EGMT 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**EGMT T380 Special Topics in EGMT 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**EGMT T480 Special Topics in EGMT 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

## Engineering, General

### Courses

**ENGR 081 Engr Common Mtng Time: Frosh 0.0 Credits**

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ENGR 100 Beginning Computer Aided Drafting for Design 1.0 Credit**

Introduces students to computer-aided graphics techniques and the use of a state-of-the-art, computer-aided design/drafting package. Students will learn 2-D and 3-D modeling techniques to support the design process. All students will be required to take a competency quiz on 4 of 6 available AutoCAD labs.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**ENGR 101 Engineering Design Laboratory I 2.0 Credits**

This course introduces students to engineering design and practice. Emphasis is placed on the synthesis of knowledge, skills and the methodologies that are the heart of the profession. The course is designed to integrate core scientific foundations into an engineering perspective through the use of team-based projects, computer tools and technical writing. This is the first part of the three term freshman design experience.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**ENGR 102 Engineering Design Laboratory II 2.0 Credits**

This course introduces students to engineering design and practice. Emphasis is placed on the synthesis of knowledge, skills and the methodologies that are the heart of the profession. The course is designed to integrate core scientific foundations into an engineering perspective through the use of team-based projects, computer tools and technical writing. This is the second part of the three term freshman design experience.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**ENGR 103 Engineering Design Laboratory III 2.0 Credits**

This course introduces students to engineering design and practice. Emphasis is placed on the synthesis of knowledge, skills and the methodologies that are the heart of the profession. The course is designed to integrate core scientific foundations into an engineering perspective through the use of team-based projects, computer tools and technical writing. This is the third part of the three term freshman design experience.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**ENGR 104 Engineering Design Laboratory for Transfers 4.0 Credits**

Individualized course specially designed for transfer students. Provides selected educational experiences in engineering design, experimental techniques, and computer skills to round out the student's previous course of study.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**ENGR 111 Introduction to Engineering Design & Data Analysis 3.0 Credits**

This course introduces students to engineering design and concepts in data collection, analysis, modeling, and presentation that are central to all fields of engineering. Students will gain exposure to a variety of engineering disciplines through introduction of problems and experiments from different fields.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Corequisite:** EXAM 080

**ENGR 113 First-Year Engineering Design 3.0 Credits**

In this course, students will focus on applying the engineering design process to problems of particular interest in the various engineering fields. A key component of the course is a term-long project where students will work in teams to solve an engineering problem.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGR 111 [Min Grade: D] and (ENGR 131 [Min Grade: D] or ENGR 132 [Min Grade: D])

**ENGR 121 Computation Lab I 2.0 Credits**

Introduces computation and programming through the use of a mathematical computation system, such as MATLAB. Programming techniques and algorithmic problem solving are introduced in the context of data analytics, basic calculus, modeling, simulation, and visualization. The course also illustrates the strengths and limitations of the scientific software in solving mathematical, engineering and scientific problems.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**ENGR 122 Computation Lab II 1.0 Credit**

Introduces physics-based simulations through the use of a mathematical computation system, such as MATLAB. Mathematical modeling and simulation of physical processes (static and dynamic) are used as a platform for numerical integration and differentiation.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGR 121 [Min Grade: D]

**ENGR 124 Computational Problem-Solving 3.0 Credits**

This course sequence introduces computation and programming through the use of a mathematical computation system. Programming techniques and algorithmic problem solving are introduced in the context of data analytics, basic calculus, visualization, physics based modeling and simulations. The course also illustrates the strengths and limitations of the scientific software in solving mathematical, engineering and scientific problems.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**ENGR 131 Introductory Programming for Engineers 3.0 Credits**

An introduction to the fundamentals of programming and algorithmic problem solving with applications in engineering. Emphases include (a) producing clear, robust, and efficient code, and (b) conceptualizing and designing computational algorithms to solve engineering problems. Upon completion, students will possess the programming skills necessary to perform computational analysis in any engineering discipline. This course is designed for students without any prior programming experience.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Corequisite:** EXAM 080

**ENGR 132 Programming for Engineers 3.0 Credits**

An introduction to the fundamentals of programming and algorithmic problem solving with applications in engineering. Emphases include (a) producing clear, robust, and efficient code, and (b) conceptualizing and designing computational algorithms to solve engineering problems. Upon completion, students will possess the programming skills necessary to perform computational analysis in any engineering discipline. This course is designed for students with some high-school Computer Science or programming experience in any language.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**ENGR 170 Pre-Calculus Practicum 1.0 Credit**

The Pre-calculus Practicum for Engineers is designed to promote excellence in mathematics, team-based approaches to working and learning, and an appreciation for how mathematics is connected with the discipline. Since mathematics is the language of engineering, it is important to master its core concepts at an early stage and to develop the habits of mind required for effective problem solving. Through individual drills, small-group problem sets, and in-class discussion we will reinforce concepts taught in the freshman mathematics sequence and improve fluency with the approaches and strategies linked to a culture of excellence within the discipline.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated 1 times for 2 credits

**Restrictions:** Cannot enroll if classification is Junior or Pre-Junior or Sophomore or Senior

**ENGR 171 Calculus I Practicum 1.0 Credit**

The Calculus I Practicum for Engineers is designed to promote excellence in mathematics, team-based approaches to working and learning, and an appreciation for how mathematics is connected with the discipline. Since mathematics is the language of engineering, it is important to master its core concepts at an early stage and to develop the habits of mind required for effective problem solving. Through individual drills, small-group problem sets, and in-class discussion we will reinforce concepts taught in the freshman mathematics sequence and improve fluency with the approaches and strategies linked to a culture of excellence within the discipline.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated 1 times for 2 credits

**Restrictions:** Cannot enroll if classification is Junior or Pre-Junior or Sophomore or Senior

**ENGR 172 Calculus II Practicum 1.0 Credit**

The Calculus II Practicum for Engineers is designed to promote excellence in mathematics, team-based approaches to working and learning, and an appreciation for how mathematics is connected with the discipline. Since mathematics is the language of engineering, it is important to master its core concepts at an early stage and to develop the habits of mind required for effective problem solving. Through individual drills, small-group problem sets, and in-class discussion we will reinforce concepts taught in the freshman mathematics sequence and improve fluency with the approaches and strategies linked to a culture of excellence within the discipline.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated 1 times for 2 credits

**Restrictions:** Cannot enroll if classification is Junior or Pre-Junior or Sophomore or Senior

**ENGR 173 Multivariate Calculus Practicum 1.0 Credit**

The Multivariate Calculus Practicum for Engineers is designed to promote excellence in mathematics, team-based approaches to working and learning, and an appreciation for how mathematics is connected with the discipline. Since mathematics is the language of engineering, it is important to master its core concepts at an early stage and to develop the habits of mind required for effective problem solving. Through individual drills, small-group problem sets, and in-class discussion we will reinforce concepts taught in the freshman mathematics sequence and improve fluency with the approaches and strategies linked to a culture of excellence within the discipline.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated 1 times for 2 credits

**Restrictions:** Cannot enroll if classification is Junior or Pre-Junior or Sophomore or Senior

**ENGR 199 Preparation for the Engineering Studies 6.0 Credits**

Preparation for the Engineering Core Curriculum through intensive, coordinated work in three areas: pre-calculus mathematics, effective study methods, and career evaluation and selection. Topics include: algebra, trigonometry, geometry, note-taking, exam preparation, time management, evaluation of engineering and other career paths. (This course does not count toward graduation requirements ).

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ENGR 201 Evaluation & Presentation of Experimental Data I 3.0 Credits**

Provide a comprehensive introduction to analysis, presentation, and communication of data collected by the engineer. Requires students to conduct experiments on engineering systems, then process and evaluate the collected data. Required presentation of research, results, conclusions, and conjectures from a technical and ethical viewpoint.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** MATH 122 [Min Grade: D] and PHYS 101 [Min Grade: D] and ENGR 103 [Min Grade: D]

**Corequisite:** EXAM 081

**ENGR 202 Evaluation & Presentation of Experimental Data II 3.0 Credits**

A continuation of ENGR 201.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENGR 201 [Min Grade: D]

**Corequisite:** EXAM 081

**ENGR 210 Introduction to Thermodynamics 3.0 Credits**

Introduces thermodynamics from a classical point of view. Covers work, heat, entropy, thermodynamic properties, equations of state, and first and second law analysis of closed systems, control volumes, and selected thermodynamic cycles.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** MATH 122 [Min Grade: D] and PHYS 101 [Min Grade: D]

**Corequisite:** EXAM 081

**ENGR 220 Fundamentals of Materials 4.0 Credits**

Introduces materials and their properties; atomic view and architecture of solids; atomic motion in solids, mechanical, magnetic, electrical and optical properties of materials. Corrosion and degradation of solids.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 101 [Min Grade: D] and MATH 122 [Min Grade: D] and PHYS 101 [Min Grade: D]

**Corequisite:** EXAM 081

**ENGR 231 Linear Engineering Systems 3.0 Credits**

Provides an overview of systems and modeling; specifically using linear algebra as the model. Specific emphasis will be placed on developing models of engineering systems and the use of computational tools for solutions of the problems. The focus of the lab will be the use of MATLAB for solution of contemporary engineering problems.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** MATH 122 [Min Grade: D]

**Corequisite:** EXAM 081

**ENGR 232 Dynamic Engineering Systems 3.0 Credits**

Provides an overview of dynamic systems and modeling; specifically using differential equations as a model. Specific emphasis will be placed on developing models of dynamic systems and the use of computational tools for solutions of the problems. The focus of the lab will be the use of MATLAB for solution of contemporary engineering problems.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGR 231 [Min Grade: D]

**Corequisite:** EXAM 081

**ENGR 280 Introduction to Global Engineering 2.0 Credits**

Introduces students to a broad range of contemporary issues (economic, political, and cultural) engineers face in meeting the challenges of globalization. In addition to responding to weekly presentations, students will engage in and report on an in-depth case study.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**ENGR 361 Statistical Analysis of Engineering Systems 3.0 Credits**

Probability, random variables, reliability, quality control, design of experiments, regression/correlation, ANOVA and related topics, hypothesis testing.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**ENGR 370 Vertically Integrated Projects 0.0-4.0 Credits**

The Vertically-Integrated Projects (VIP) Program will operate in a research and development context. Undergraduate students who join VIP teams will earn academic credit for their participation in design/discovery efforts that assist faculty and graduate students with research and development issues in their areas of expertise. Permission of the instructor required.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated 9 times for 40 credits

**ENGR 491 Senior Project Design I 2.0 Credits**

Introduces the design process, including information retrieval, problem definition, proposal writing, patents, and design notebooks. Includes presentations on problem areas by experts from industry, government, and education.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ENGR 492 Senior Project Design II 2.0 Credits**

Continues ENGR 491. Requires written and oral progress reports.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CIVE 491 [Min Grade: D]

**ENGR 493 Senior Project Design III 4.0 Credits**

Continues ENGR 492. Requires written and oral final reports, including oral presentations by each design team at a formal Design Conference open to the public and conducted in the style of a professional conference.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ENGR I199 Independent Study in ENGR 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ENGR I299 Independent Study in ENGR 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ENGR I399 Independent Study in ENGR 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ENGR I499 Independent Study in ENGR 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ENGR T180 Special Topics in ENGR 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ENGR T280 Special Topics in ENGR 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ENGR T380 Special Topics in ENGR 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ENGR T480 Special Topics in ENGR 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

## English

### Courses

**ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0 Credits**

Develops students' abilities to use writing as a tool for inquiry. Introduces genre theory, writing as a process, revision, and strategies of primary and secondary research. Reviews grammar, style, and documentation conventions. Engages students in reflection and promotes positive attitudes toward writing.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0 Credits**

Advances students' development in the writing processes. Promotes a critical evaluation and integration of information into their own writing as they research complex and open-ended issues. Identifies the relationships between rhetorical situations, the status of claims, and the need for evidence and warrants. Continues review of grammar, style, and documentation conventions. Encourages collaboration and effective search strategies of the Internet and library resources. Promotes students' reflective analysis and a positive attitude toward writing.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGL 101 [Min Grade: D]

**ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0 Credits**

Advances students' development in the writing and research processes and their understanding of how genres of writing shape meaning. Some courses may focus on the student's academic and discipline-specific experiences; Others may be based on literary or social themes. Promotes a critical reading of texts, reflective analysis, and a positive attitude toward writing.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGL 102 [Min Grade: D]

**ENGL 105 Honors Freshman English 3.0 Credits**

Develops students' abilities to read and write expository and persuasive academic discourse. Teaches students the components of the writing process and strategies to think and read critically and to present a written argument. Requires students to write expository and persuasive essays and research papers and to keep a journal to express their responses to the material read and studied in the course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is HONR.

**ENGL 195 English Freshman Seminar 3.0 Credits**

This course introduces freshman majors to the practice and study of the English major. It is a foundation for further study as well as a course about how we learn. It prepares the student to be successful in upper-division courses and to become familiar with the basic tools of the discipline. It encourages the creative and critical thinking that is a hallmark of the English major.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ENGL 200 [WI] Classical to Medieval Literature 3.0 Credits**

A survey of Greek and Roman literature (Homer, Aeschylus, Euripides, Virgil and Cicero), up to and including the Medieval period (Aquinas, Cavalcanti, Chaucer, and Dante). This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 201 Renaissance to the Enlightenment 3.0 Credits**

A survey of Western literature from the Renaissance to the Enlightenment, focusing on works by Cervantes, Erasmus, Rabelais, Petrarch, Voltaire, Rousseau, Swift and Pope.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 202 [WI] Romanticism to Modernism 3.0 Credits**

A survey of Western literature of the 19th and 20th centuries focusing on the major periods of Romanticism (Blake, Coleridge and Keats), Realism (Balzac and Ibsen), and Modernism (Kafka, Borges and Woolf). This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 203 [WI] Post-Colonial Literature I 3.0 Credits**

A survey of nonwestern literatures produced before the modern era in Asia, Africa, and the Middle East, representing the more important periods and genres. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 204 Post-Colonial Literature II 3.0 Credits**

A survey of nonwestern literatures written in the 20th century by writers from Asia, Africa, and the Middle East, and focusing on the effects of social, aesthetic and contemporary events on artistic creation.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 205 [WI] American Literature I 3.0 Credits**

A survey of American literature from Colonial times through the Civil War, including works by such writers as Anne Bradstreet, Emily Dickinson, Frederick Douglass, Cotton Mather, Ralph Waldo Emerson, Nathaniel Hawthorne, Herman Melville, Henry David Thoreau and Walt Whitman. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 206 [WI] American Literature II 3.0 Credits**

A survey of American literature from the Civil War through the 21st century, including works by such writers as Kate Chopin, W.E.B. Du Bois, T.S. Eliot, William Faulkner, F. Scott Fitzgerald, Henry James, Philip Roth, Mark Twain and John Updike. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 207 [WI] African American Literature 3.0 Credits**

Introduces students to African-American Literature, from the mid-18th century to the present. Provides a basic understanding of social, political and cultural influences and an awareness of the African-American literary tradition. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 211 [WI] British Literature I 3.0 Credits**

A historical survey of British literature from its beginning to the end of the eighteenth century. Students will read texts selected to represent major authors, forms and thematic material that illustrates the development of English literature through the medieval and Renaissance periods and seventeenth and eighteenth centuries. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 212 British Literature II 3.0 Credits**

A historical survey of British literature from the turn of the nineteenth century to the present; students will read texts selected to represent major authors, forms and thematic material of the Romantic, Victorian and modern periods.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 214 Readings in Fiction 3.0 Credits**

A basic course, which focuses on fiction as a genre through the study of a variety of short stories and fiction, organized by theme, period or form. One of three genre courses.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 215 [WI] Readings in Poetry 3.0 Credits**

A basic course which focuses on poetry as a genre through the study of a variety of poems organized by theme, period or form. One of three genre courses. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 216 [WI] Readings in Drama 3.0 Credits**

A basic course which focuses on drama as a genre through the study of a variety of plays organized by theme, period or form. One of three genre courses. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 220 LGBT Literature and Culture 3.0 Credits**

This course examines writing in English by lesbian, gay, bisexual, transgender (LGBT), and sexual minority authors. Learning from LGBT literature in a variety of forms and genres will help students cultivate sophisticated knowledge about sexual orientation, gender identity and expression, homoeroticism and homophobia, HIV/AIDS, the relationship of art and politics, and the intersections of sexuality, gender, race, class, and nation.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 300 [WI] Literature & Science 3.0 Credits**

This course studies the impact of scientific and technological change on works of literature and art produced in various historical periods. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 302 Environmental Literature 3.0 Credits**

This course explores the relatively recent discipline of Ecocriticism and considers the literary relationship between human beings and the natural environment--both altered and unaltered by human activity. The approach is interdisciplinary in its investigation of the relationships among science, culture, and personal observation. Students will read a selection of seminal texts of American environmental literature.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 303 Science Fiction 3.0 Credits**

Provides reading and discussion of works illustrating the development of modern science fiction.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 304 Young Adult Fiction 3.0 Credits**

This course introduces students to young adult (YA) fiction and to secondary sources useful for the appreciation of it. Topics discussed include: young adults as an audience, the genres of YA fiction, keeping up with YA fiction, literary and psychological theory applied to YA fiction.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 305 [WI] The Mystery Story 3.0 Credits**

A study of the mystery story, from its inception as a genre in the 19th century to the present, through short stories and novels. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 306 Literature of Baseball 3.0 Credits**

An examination of novels, short stories, and poetry about our "national pastime" that illuminate American ideals and values, history and culture from 1845 to the present. A study of how the game's symbols and rituals, its history and mythology help us understand American belief systems and ideologies.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 307 Literature of the Holocausts 3.0 Credits**

To underline the fact that more than one Holocaust has occurred, the course offers different points of view about the systematic slaughter of several religious and ethnic groups, pre-and post-World War II, through fiction, children's literature and films.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 308 [WI] The Literature of Business 3.0 Credits**

In this advanced reading course, students read literary works about business and work and write analytically about these works, grounding that analysis in nonfiction readings from business publications. Course writing assignments ask students to respond to problems and issues raised in the texts. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (ENGL 101 [Min Grade: D] and ENGL 102 [Min Grade: D] and ENGL 103 [Min Grade: D]) or ENGL 105 [Min Grade: A]

**ENGL 310 [WI] Period Studies 3.0 Credits**

This is a variable topics course, focusing on the literature of a particular period (i.e., Classical Literature; Victorian Literature; the Harlem Renaissance). May be repeated for credit. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 312 Research Project Development 1.0-3.0 Credit**

A seminar-style course in which students work on a research or creative project of their own choosing. They acquire knowledge and skills related to the development of researchable original ideas in the domains of humanities areas like literature and philosophy, or social science areas like communication, history or psychology, or a creative work or portfolio.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 3 times for 12 credits

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENGL 103 [Min Grade: D]

**ENGL 315 [WI] Shakespeare 3.0 Credits**

This course focuses on Shakespeare's major plays and sonnets, providing the historical and cultural contexts that gave rise to his work. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 320 [WI] Major Authors 3.0 Credits**

A course focused on intensive study of one or more authors, for example: Jane Austen; Joseph Conrad; Hemingway, Faulkner and Fitzgerald; Writers of the Harlem Renaissance; Carlos Fuentes and Gabriel Garcia Marquez. May be repeated for credit. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 1 times for 6 credits

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 323 Literature and Other Arts 3.0 Credits**

A variable topics course which studies relationships between literature and one or more of the visual arts, theater or music (i.e., Surrealism; Memoir and Documentary Film; The Faust Legend). May be repeated for credit.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 1 times for 6 credits

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: D]

**ENGL 325 Topics in World Literature 3.0 Credits**

A variable topics course which focuses on a particular national or regional literature within its cultural, historical and political contexts (i.e., African Literature; French Literature; Latin American Literature). May be repeated for credit.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 1 times for 6 credits

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 330 The Bible as Literature 3.0 Credits**

This course provides a close reading of selected books of the Old and New Testaments alongside selected literary works to discover both the literary qualities of these texts and their influence on literature.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 335 Mythology 3.0 Credits**

This course investigates the specific forms mythological stories have taken in the literature, art and ritual of some or all of the following: Greece, Rome, Iceland, Mesopotamia and Native American and European cultures in the United States.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 340 [WI] Classical Rhetoric 3.0 Credits**

A study in the theory and practical application of Greek and Roman rhetorical strategies in composition. Focuses on influential figures, terminology, the five canons, and the ancient composition processes known as "progymnasmata" to look at historical texts, the rhetoric of popular media, and the students' writing. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENGL 101 [Min Grade: D] and ENGL 102 [Min Grade: D]

**ENGL 345 American Ethnic Literature 3.0 Credits**

A variable topics course which studies the literature of one or more of the United States ethnic populations within their historical and cultural contexts. May be repeated for credit.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 350 Jewish Literature and Civilization 3.0 Credits**

Focuses on the Jewish Bible, a classic literary document of Western civilization, deemed by many people of the world as fundamental to their religion; stresses aspects of cultural diversity and awareness.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

Cannot enroll if classification is Freshman or Sophomore

**Prerequisites:** ENGL 101 [Min Grade: C] and ENGL 102 [Min Grade: C] and (ENGL 202 [Min Grade: C] or ENGL 203 [Min Grade: C] or ENGL 204 [Min Grade: C] or ENGL 205 [Min Grade: C] or ENGL 206 [Min Grade: C] or ENGL 211 [Min Grade: C] or ENGL 212 [Min Grade: C] or ENGL 214 [Min Grade: C])

**ENGL 395 [WI] Special Studies in Literature 0.0-3.0 Credits**

This is a variable topics course, providing intense literary study on a specific theme. May be repeated for credit. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

**ENGL 470 Capstone Seminar in Medical Humanities 3.0 Credits**

This seminar gives students the opportunity to synthesize, contextualize, and deepen their understanding of how disciplines in the humanities and the social sciences approach the experiences and implications of illness, aging, mortality and healing. Regular guest lecturers, discussion of assigned readings, student presentations, and written projects.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is CMDH.

**Prerequisites:** (ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: D]) and HUM 315 [Min Grade: B]

**ENGL 490 Seminar in English and American Literature 4.0 Credits**

An advanced course with variable topics in British or American Literature stressing textual analysis, cultural and historical contexts and research; provides students with intensive preparation for advanced and professional studies.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 3 times for 12 credits

**Restrictions:** Can enroll if major is ENGL and classification is Junior or Senior.

**ENGL 492 Seminar in World Literature 4.0 Credits**

An advanced course with variable topics in World Literature stressing textual analysis, cultural and historical contexts and research; provides students with intensive preparations for advanced and professional studies.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 3 times for 12 credits

**Restrictions:** Can enroll if major is ENGL and classification is Junior or Senior.

**ENGL 499 Senior Project in Literature 4.0 Credits**

Open to English Majors only, the senior project in literature should reflect the student's interest in a specific subject, author or theme and should demonstrate the student's research, critical and analytical expertise at an advanced, pre-professional level.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ENGL and classification is Senior.

**ENGL I199 Independent Study in ENGL 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ENGL I299 Independent Study in ENGL 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ENGL I399 Independent Study in ENGL 0.5-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ENGL I499 Independent Study in ENGL 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ENGL T180 Special Topics in English 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ENGL T280 Special Topics in English 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ENGL T380 Special Topics in English 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ENGL T480 Special Topics in English 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

# English as a Second Language

## Courses

### ESL 001 Foundations of University Study 0.0 Credits

High intermediate to advanced English as a second language course. This course provides ESL students with a foundation for University success through developing academic communication skills and strategies and promoting awareness of the academic and co-curricular culture of the American university.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 1 times for 15 credits

**Restrictions:** Can enroll if major is ESL or major is IG.

### ESL 002 Foundations of Academic Writing 0.0 Credits

This course introduces ESL students to the academic essay and the process approach to writing as well as reading for different purposes.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

### ESL 003 Foundations of Academic Reading 0.0 Credits

This course introduces ESL students to the skills of critical reading for information, specifically summarizing and evaluating source material.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

### ESL 004 International Gateway Foundations of Academic Writing for Chemistry 201 0.0 Credits

This course provides International Gateway students with support for success in the CHEM 201 course through developing academic skills and strategies to participate in the sciences.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

### ESL 010 Listening and Speaking I 0.0 Credits

Low beginning English as a second language. Provides intensive instruction in the development of the following skills: speaking and listening in everyday situations, vocabulary, pronunciation, and grammatical functions. Placement testing is required. Offered all terms. 7.5-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

### ESL 011 Reading and Writing I 0.0 Credits

Low beginning English as a second language. Provides intensive instruction in the development of the following skills: reading comprehension, simple inferring, basic vocabulary development, sentence and paragraph writing, basic grammatical structures, and the ability to communicate ideas orally and in writing. Placement testing is required. Offered all terms. 7.5-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

### ESL 012 English in Everyday Life 0.0 Credits

Low beginning English as a second language. Prepares students who have trouble talking with and understanding native English speakers in everyday situations such as going to the store or the bank, asking for directions, using the telephone, etc. Placement testing is required. Offered all terms. 3-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

### ESL 013 Beginning Grammar 0.0 Credits

Beginning English as a second language. Provides instruction and practice in such areas of English grammar as simple verb tenses, sentence structure, modals, and irregular verbs. Placement testing is required. Offered all terms.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL.

### ESL 020 Listening and Speaking II 0.0 Credits

High beginning English as a second language. Provides intensive instruction in the development of the following skills: speaking and listening (participating actively in spoken interactions and responding appropriately), vocabulary related to topics in the course, pronunciation and intonation patterns, and grammatical functions. Placement testing is required. Offered all terms. 7.5-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

### ESL 021 Reading and Writing II 0.0 Credits

High beginning English as a second language. Provides intensive instruction in the development of the following skills: reading comprehension, inferring, vocabulary development, non-academic paragraph writing, basic grammatical structures and mechanics, and the ability to communicate ideas orally and in writing. Placement testing is required. Offered all terms. 7.5-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

### ESL 022 Pronunciation and Conversation 0.0 Credits

High beginning to low intermediate English as a second language. Emphasizes vocabulary, pronunciation, and idioms. Gives students a chance to improve and practice their spoken communication skills. Placement testing is required. Offered all terms. 3-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL or major is IG.

### ESL 023 Intermediate Grammar III 0.0 Credits

Low intermediate English as a second language course. Provides instruction and practice in such areas as present, past, and future tense verbs, question structures, nouns and pronouns, and modals. Placement testing is required. Offered as needed. 3-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL or major is IG.

**ESL 024 Presentations with Stories & Legends 0.0 Credits**

Beginning to low intermediate. English as a second language. Provides instruction and practice in reading comprehension, writing, listening, and presentations using stories from a variety of sources. Placement testing is required.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL.

**ESL 030 Listening and Speaking III 0.0 Credits**

Low intermediate English as a second language. Provides intensive instruction in the development of the following skills: pronunciation (sounds, stress, intonation), vocabulary, listening/speaking (participating and responding appropriately in discussions, following directions, completing listening activities), grammatical competence, and repair of communication breakdown. Placement testing is required. Offered all terms. 7.5-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ESL 031 Reading and Writing III 0.0 Credits**

Low intermediate English as a second language. Provides intensive instruction in the development of the following skills: reading comprehension, inferring, vocabulary development, academic paragraph and essay format, grammatical structures and mechanics, and the ability to communicate ideas orally and in writing. Placement testing is required. Offered all terms. 7.5-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ESL 032 English for Business Purposes 0.0 Credits**

Intermediate English as a second language. Provides communication skills needed to do business with English speakers. Topics include small talk and telephone skills, participation in business meeting, presentations, communication through business letters and memos, and business negotiation. Placement testing is required. Offered all terms. 3-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ESL 034 Understanding the News Media 0.0 Credits**

Intermediate to advanced English as a second language. Emphasizes listening, discussion, and reading skills as students learn to read newspaper articles and listen to news from a variety of sources. Provides instruction on how the news is made and evaluated. Placement testing is required.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL.

**ESL 035 Intermediate Vocabulary Development 0.0 Credits**

Intermediate English as a second language course. Provides strategies to improve academic, general, and technical vocabulary; to discover common roots in English words; and to improve reading skills. Placement testing is required. Offered all terms. 3-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL or major is IG.

**ESL 036 TOEFL iBT Listening & Speaking 0.0 Credits**

High intermediate to advanced English as a second language. Prepares students to take the Internet-based TOEFL (Test of English as a Foreign Language) for academic purposes. Provides instruction in the listening and speaking sections of the TOEFL. Placement testing is required.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 1 times for 6 credits

**Restrictions:** Can enroll if major is ESL or major is IG.

**ESL 037 Intermediate Grammar IV 0.0 Credits**

High intermediate English as a second language course. Provides instruction and practice in such areas as comparative structures, passive voice, gerunds and infinitives, and clause structures. Placement testing is required. Offered as needed. 3-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL or major is IG.

**ESL 038 Intermediate Exploring American Life & Language 0.0 Credits**

Intermediate English as a second language course. Students evaluate aspects of United States culture and history as presented in selected drama, literature, and music. Additional presentations and writing assignments support development of fluency in speaking and writing skills. Placement testing for this course is required. 3-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL or major is IG.

**ESL 040 Listening and Speaking IV 0.0 Credits**

High intermediate English as a second language. Provides intensive instruction in the development of the following skills: pronunciation/fluency (sounds, stress, intonation, linking, phrasing), vocabulary, listening/speaking (participate appropriately in spoken interactions, understand news, mini-lectures), repair of communication breakdown, and grammatical competence. Placement testing is required. Offered all terms. 7.5-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ESL 041 Reading and Writing IV 0.0 Credits**

High intermediate English as a second language. Provides intensive instruction in the development of the following skills: reading comprehension, inferring, vocabulary development, academic essay format, grammatical structures and mechanics, and the ability to communicate ideas orally and in writing. Placement testing is required. Offered all terms. 7.5-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ESL 042 Advanced Grammar V 0.0 Credits**

Low advanced English as a second language course. Provides instruction and practice in such areas as usage of advanced verb tenses, subject-verb agreement, pronouns, and modals. Placement testing is required. Offered all terms. 3-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL or major is IG.

**ESL 043 Intermediate Presentation Skills 0.0 Credits**

Intermediate English as a second language course. Provides instruction on preparing, delivering, and evaluating presentations. Explores ways to engage audience and improve performance. Builds confidence through speaking skill development. Placement testing is required. Offered all terms. 3-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL or major is IG.

**ESL 044 Skills for College Success 0.0 Credits**

High intermediate to advanced English as a second language. Addresses academic skills topics such as listening to lectures and note taking, reading textbooks and synthesizing information, conducting research, and expanding awareness of the United States academic environment. Placement testing is required. Offered all terms.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 1 times for 6 credits

**Restrictions:** Can enroll if major is ESL or major is IG.

**ESL 045 TOEIC Preparation 4-6 0.0 Credits**

High intermediate to advanced English as a second language. Introduces skills and strategies that are helpful in taking the TOEIC test. Improves listening and reading comprehension skills. Focuses on analyzing types of test questions commonly asked and learning strategies for answering the questions. Placement testing is required. Offered all terms. 3-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ESL 048 TOEFL iBT Reading & Writing 0.0 Credits**

High Intermediate to advanced English as a second language. Prepares students to take the Internet Based TOEFL (Test of English as a Foreign Language) for academic purposes. Provides instruction in the reading and writing sections of the TOEFL. Placement testing is required.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL or major is IG.

**ESL 049 Intermediate Pronunciation and Conversation 0.0 Credits**

Intermediate English as a second language course. Provides instruction on pronunciation, word stress, and intonation. Gives students a chance to improve and practice their spoken communication skills. Placement testing is required. Offered all terms. 3-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL or major is IG.

**ESL 050 Listening and Speaking V 0.0 Credits**

Low advanced English as a second language. Provides intensive instruction in the development of the following skills: pronunciation/fluency (ease, speed, smoothness of speaking), vocabulary, listening/speaking (participate appropriately in spoken interactions, understand news reports, lectures), repair of communication breakdown, and grammatical competence. Placement testing is required. Offered all terms. 7.5-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ESL 051 Reading and Writing V 0.0 Credits**

Low advanced English as a second language. Provides intensive instruction in the development of the following skills: reading comprehension, inferring, vocabulary development, academic essays and the use of source material, grammatical structures and mechanics, and the ability to communicate effectively in writing. Placement testing is required. Offered all terms. 7.5-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ESL 052 Advanced Vocabulary Development 0.0 Credits**

Advanced English as a second language course. Provides strategies to improve academic, general, and technical vocabulary; to discover common roots in English words; and to improve reading skills. Placement testing is required. Offered all terms. 3-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL or major is IG.

**ESL 055 Strategies for Academic Reading 0.0 Credits**

Advanced English as a second language. Improves reading comprehension. Provides skills for defining and identifying main and supporting ideas, recognizing transitional words and their role in meaning, and finding organizational patterns. Explores the authors' purpose, opinion, and tone. Placement testing is required. Offered as needed. 3-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ESL 056 GMAT Preparation 5-6 0.0 Credits**

Advanced English as a second language. Provides instruction for GMAT reading. Offers strategies to identify key parts of an argument and reviews grammatical and stylistic rules in the sentence correction section. Analyses arguments. Provides instruction for essay writing. Placement testing is required. Offered as needed. 3-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ESL 057 Advanced Vocabulary and Idioms 0.0 Credits**

Advanced English as a second language. Provides strategies to improve idiomatic language using authentic sources from a variety of media. Placement testing is required.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL or major is IG.

**ESL 058 Advanced Exploring American Life & Language 0.0 Credits**

Advanced English as a second language course. Students evaluate aspects of United States culture and history as presented in selected drama, literature, and music. Additional presentations and writing assignments support development of fluency in speaking and writing skills. Placement testing for this course is required. 3-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL or major is IG.

**ESL 060 Listening and Speaking VI 0.0 Credits**

Advanced English as a second language. Provides intensive content-based instruction in the development of the following skills: pronunciation/fluency (ease, speed, smoothness of speaking), vocabulary, listening/speaking (participate appropriately in spoken interactions, understand news reports, lectures), grammatical competence, repair of communication breakdown. Placement testing is required. Offered all terms. 7.5-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ESL 061 Reading and Writing VI 0.0 Credits**

Advanced English as a second language. Provides intensive instruction in the development of the following skills: reading comprehension, inferring, academic writing (including research paper with synthesis, summary, reaction, analysis, and citation of sources), grammar and mechanics, and effective communication in writing. Placement testing is required. Offered all terms. 7.5-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ESL 062 TOEFL iBT for All Skills 0.0 Credits**

High intermediate to advanced English as a second language. Prepares students to take the iBT (Internet Based Test of English as a Foreign Language) for academic purposes. Provides instruction in the listening, speaking, reading, and writing sections of the TOEFL. Placement testing is required.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 2 times for 12 credits

**Restrictions:** Can enroll if major is ESL or major is IG.

**ESL 063 Advanced Grammar VI 0.0 Credits**

High advanced English as a second language course. Provides instruction and practice in such areas as usage of passive tense, noun clauses, adjective clauses, gerunds and infinitives, and conditional sentences. Placement testing is required. Offered all terms. 3-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL or major is IG.

**ESL 064 Advanced Presentation Skills 0.0 Credits**

Advanced English as a second language course. Provides instruction on preparing, delivering, and evaluating presentations. Explores ways to engage audience and improve performance. Builds confidence through speaking skill development. Placement testing is required. Offered all terms. 3-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL or major is IG.

**ESL 067 Language of Science Technology Engineering and Mathematics 0.0 Credits**

High intermediate to advanced English as a second language course. Provides instruction on building academic vocabulary, reading, and oral skills by incorporating authentic materials from a variety of STEM (Science, Technology, Engineering & Math) fields.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL or major is IG.

**ESL 068 Language of Media and Design 0.0 Credits**

High Intermediate-Advanced Listening & Speaking. Develops English as a second language communicative fluency in design-related concepts and vocabulary through the use of authentic materials and experiences.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 1 times for 0 credits

**ESL 069 Advanced Pronunciation and Conversation 0.0 Credits**

Advanced Intermediate English as a second language course. Provides instruction on pronunciation, word stress, and intonation. Gives students a chance to improve and practice their spoken communication skills. Placement testing is required. Offered all terms. 3-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL or major is IG.

**ESL 070 GLOBE Business Information 0.0 Credits**

Intermediate to advanced level English as a second language. Develops students' ability to read business material, understand key vocabulary and discuss current events in the business sector. Provides instruction in reading and understanding case studies. Placement testing is required. Offered as needed. 7.5-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ESL 071 GLOBE Business Communication 0.0 Credits**

Intermediate to advanced level English as a second language. Improves students' ability to effectively communicate in business setting. Offers strategies for negotiation and provides instruction on cross-cultural communication styles. Placement testing is required. Offered as needed. 7.5-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ESL 072 Business Site Visits 0.0 Credits**

Intermediate to advanced level English as a second language. Prepares students to observe American business practices on site. Develops research skill. Provides instructions and practice in organizing and making presentations as well as letter writing skills. Placement testing is required. Offered as needed. 3-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ESL 073 Introduction to Business Research 0.0 Credits**

High-intermediate to advanced level English as a second language. Introduces students to the research process of business related topics and exposes them to American culture and conversation through interaction. Offered as needed. 7.5-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL or major is IG.

**ESL 074 IELTS Listening and Speaking 0.0 Credits**

High intermediate to advanced English as a second language. Prepares students to take the IELTS (International English Language Testing System) for academic and professional purposes. Provides instruction in the listening and speaking sections of the IELTS test. Placement testing is required.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL or major is IG.

**ESL 075 IELTS Reading and Writing 0.0 Credits**

High intermediate to advanced English as a second language. Prepares students to take the IELTS (International English Language Testing System) for academic and professional purposes. Provides instruction in the reading and writing sections of IELTS. Placement testing is required.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL.

**ESL 076 IELTS (International English Language Testing System) Test Preparation All Skills 0.0 Credits**

High intermediate to advanced English as a second language. Prepares students to take the IELTS (International English Language Testing System) for academic and professional purposes. Provides instruction in the listening, speaking, reading, and writing sections of the IELTS test. Placement testing is required.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 1 times for 12 credits

**Restrictions:** Can enroll if major is ESL or major is IG.

**ESL 080 Preparation Course for International Teaching Assistants 0.0 Credits**

Intermediate to advanced English as a second language. Prepares new international teaching assistants for their responsibilities in the university. Provides intensive instruction in English language, pedagogy, and the culture of the American classroom. Department permission required. Offered as needed. 18-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ESL 081 Accent Reduction 0.0 Credits**

This is an advanced English as a second language course, which provides intensive instruction in the development of speaking and pronunciation skills. Students will practice pronunciation skills by participating actively in spoken interactions and responding appropriately while focusing on vocabulary, pronunciation, intonation patterns, and grammatical functions.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ESL or major is IG.

**ESL 090 English for Medical Purposes 0.0 Credits**

High intermediate to advanced English as a second language. Develops participants' communication skills in medical context. Provides an overview of the American healthcare system and the dynamics of the different participants involved in the system. Placement testing is necessary. Offered as needed. 2.5-2.5-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ESL 091 Special Topics in English Language & Culture 0.0 Credits**

Advanced English as a second language. Focuses on specific issues in English structure and usage. Includes issues of discourse, sociolinguistics, and culture. Placement testing is necessary. Offered as needed. 3-0-0.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ESL 110 Introduction to Academic Discourse 3.0 Credits**

The course prepares students for courses requiring English academic communication. The course provides a review of English grammar, an introduction to academic writing, reading, and academic support services. Opportunities to interact with other members of the university community are provided. By departmental approval only.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 1 times for 6 credits

**ESL 180 Topics in English for Academic Purposes 2.0 Credits**

This course focuses on the academic discourse of a particular genre and/or content area in English for Specific Purposes or English for Academic Purposes.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 5 times for 12 credits

## Entertainment & Arts Management

### Courses

**EAM 130 Overview of Entertainment and Arts Management 3.0 Credits**

Students acquire an understanding of the profit and non-profit organization within a social and governmental context. Of primary focus are the arts organization as an entity, how they are organized and the impact and place they have within the community.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is EAM.

**EAM 200 Introduction to the Music Industry 3.0 Credits**

Introduction to the Music Industry gives students a basic overview of the commercial music business with an emphasis on its inherently changing nature and the entrepreneurial mindset that this demands of those involved in it. The goal of the course is to provide a basic introduction to four major areas of the industry: Contracts, Publishing, Touring & Booking, and Recording.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is EAM.

**EAM 211 Strategic Management for Entertainment and Arts Management 3.0 Credits**

Explores the concepts of planning and evaluation as it relates to the arts. Instruction will focus on the development of business plans, including research, organization, competition, marketing, staffing, and financial issues (i.e. budgets, etc.). Students present and defend the elements of their plans. Other topics discussed will be leadership skills decision-making, and managing change.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Freshman or Sophomore .

**EAM 261 Copyrights and Trademarks 3.0 Credits**

This is the introductory law course for EAM managers and discusses topics relating to copyrights, intellectual property rights, and royalties.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BLAW 201 [Min Grade: D]

**EAM 270 Audience Development for Arts 3.0 Credits**

This course emphasizes the usefulness and application of marketing theories and concepts to develop audiences and promotes the arts as a valuable social sector, with a focus on marketing planning and strategy development. Focus is placed on marketing research, analysis, planning, strategy development, and development of marketing plans.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EAM 211 [Min Grade: D]

**EAM 301 Gallery and Collection Management 3.0 Credits**

Discusses the professional operation of museums and commercial art galleries including advocacy, legal, administration, curatorial, exhibition, and public issues by examining the questions: What are the challenges of managing a museum's collection including acquisition policies, insurance, conservation and storage of art? What resources are needed to manage a gallery?.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**EAM 302 Exhibition Design 3.0 Credits**

Discuss key issues in exhibition presentation including visual design elements, accessibility, and approachable presentation strategies. This course also explores theoretical and ethical issues related to museums, art collecting, cultural patrimony, curatorial authority, and diversity.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**EAM 310 Social Media in Entertainment 3.0 Credits**

Social Media In Entertainment teaches students how to develop the strategies for using social media as a marketing tool in the arts and entertainment industries. The goal will be to develop a social media strategy for a specific entity utilizing information on strategies and tactics learned during the course, as well as how to integrate this strategy into an overall marketing plan. Students will learn how to craft a strategy, how to evaluate which social media tools and tactics to use to achieve the most effective results and how to successfully implement the strategy.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**EAM 312 Introduction to Fund Development for the Arts 3.0 Credits**

This course will provide an introduction to the fundraising process and initial training needs for current and future nonprofit arts organization managers. The focus is a blend of theory and practice in the areas of fund development process, organization, and communication; the primary goal is to prepare students for successfully working with or in nonprofit arts organizations in development / fundraising capacities. Our work will cover: basic sources of funding including online fundraising; board / trustee fiduciary responsibilities; trends, ethics, and innovation in fund development.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is EAM.

**Prerequisites:** EAM 130 [Min Grade: D]

**EAM 313 Volunteer and Board Management 3.0 Credits**

This course continues the work of EAM 312- Intro to Fund Development for the Arts. It will build on that course by focusing on the area of volunteers for nonprofit organizations. Content will examine the board of directors and other volunteers in relation to governing, managing, operating a nonprofit arts entity.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is EAM.

**Prerequisites:** EAM 312 [Min Grade: D]

**EAM 315 Content Strategies for Digital Products 3.0 Credits**

In this course students will understand content strategy and its business value, as well as how to audit, plan, create, deliver and manage content that effectively promotes a brand message across multiple digital channels.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**EAM 321 Box Office and Venue Management 3.0 Credits**

Focuses on the operational management tasks. Students explore the marketing and promotional component of box office management, the use of technology and ticket sales, and managing people.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EAM 211 [Min Grade: D]

**EAM 322 Performing Arts Touring 3.0 Credits**

Performing Arts Touring provides an overview of organizing all types of touring entertainment with a focus on the administrative and management responsibilities including booking, staffing, and decision making. Focus is placed two basic types of touring: music concert tours and performing arts tours such as Broadway shows, ballet companies, small theatrical tours, and similar arts tours. Students learn about unions, contracts, financing, logistics, promotion, ticketing, and other areas associated with arts and entertainment touring.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior.

**EAM 325 Producing for Live Entertainment 3.0 Credits**

This course is experience-based and designed to familiarize students with all aspects of producing a live entertainment event and to discuss and develop the necessary skills to do so successfully through practical experience. The course provides an overview of the issues routinely encountered by producers of live events, both commercial and non-profit, through the actual producing of an arts/entertainment event. Skills developed include working creatively with artists; understanding project management, planning and budgeting; revenue projection and management (including possible fundraising); understanding technical and logistical issues around production; and successful execution.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 1 times for 6 credits

**Restrictions:** Cannot enroll if classification is Freshman

**EAM 340 Artist Representation and Management 3.0 Credits**

This course gives an introduction to artist representation in the entertainment and media industry. It will cover all aspects of representation including client selection, career management and strategy for artists, agent/managers' roles and managing your career. The course covers how the industry works both conceptually and politically. Discussions will include topics around the major entertainment companies, their work and focus, and how they compete. The course breaks down the industry into "revenue silos" in which a client can generate money.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is EAM and classification is Junior or Senior.

**EAM 350 Arts, Culture and Society 3.0 Credits**

Arts, Culture & Society examines the role of art's impact on society, exploring key cultural and public policy issues including community standards and censorship, and different approaches to public support and funding. Readings, videos, discussions and projects will explore questions as to the social functions of the arts; the use of art for advocacy and patronage over the world; and the impact of art on society and economic development. The geographic focus of this course is global and will compare art, including commercial entertainment and the media, and cultural practices and impacts from various cultures around the world.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**EAM 361 Law for Entertainment and Arts Management Managers 3.0 Credits**

Examines the relationship between the arts and law, including contracts, license fees, labor-management agreements, liability, immigration law, use fees, first amendment issues, and the formation of partnerships and corporations.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EAM 261 [Min Grade: D]

**EAM 365 Media and Entertainment Business 3.0 Credits**

This course focuses on media networks and other major players in the media and entertainment business, examining their interdependence, and discussing major trends and tendencies on the market and their impact on the art and entertainment field.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**EAM 391 [WI] Entertainment Promotion and Branding 3.0 Credits**

This writing intensive course will provide students with in-depth information about the essential area of publicity and promotion for the entertainment and arts industries. Through the art of public relations (PR), students will learn to maximize the potential for news coverage in print, electronic (radio, TV) and online sources. Focus will be placed on the process of writing for public relations and promotion in both style and content. By writing multiple drafts of biographies, press releases, pitch letters, students will hone skills to creatively present your message to media outlets, from local to international.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**EAM 401 [WI] Writing for Arts Managers 3.0 Credits**

Focuses on non-marketing writing, with a significant portion of the class focusing on the development and writing of proposals seeking funding for arts organizations. The course covers in-depth the standard elements of a complete professionally prepared proposal, as well as exposing students to alternate formats.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A] or HUM 108 [Min Grade: D]) and EAM 312 [Min Grade: D]

**EAM 461 Entertainment Publishing 3.0 Credits**

A detailed look at the publishing industry, including history and economics of publishing. Industry segments to be covered include books, periodicals and new media. Topics include developer/publisher issues, laws, industry operating characteristics, distribution and industry trends.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EAM 361 [Min Grade: D]

**EAM 471 Fine Arts Market Development 3.0 Credits**

Examines the dynamics of the commercial visual arts market, including international auction houses such as Sotheby's and major private collectors. Answers questions like: How is the market value (price) of art works determined?.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**EAM 472 Trends in Visual Arts 3.0 Credits**

Exploration of recent developments in the visual arts in the US and abroad. Includes the reviewing of major visual arts exhibitions and emerging artists and artistic trends within the decade. Field trips to area galleries and art museums are included.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

### **EAM 491 Entertainment and Arts Management Senior Project 1.0 Credit**

Senior Project is a thesis course on a topic of the student's choice over the three quarters of senior year in close cooperation with a faculty advisor. The student will present their final product to a jury in their final quarter of senior year.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 3 times for 3 credits

**Restrictions:** Can enroll if major is EAM and classification is Senior.

### **EAM I199 Independent Study in Entertainment & Arts Management 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

### **EAM I299 Independent Study in Entertainment & Arts Management 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

### **EAM I399 Independent Study in Entertainment & Arts Management 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 4 times for 12 credits

### **EAM I499 Independent Study in Entertainment & Arts Management 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

### **EAM T480 Special Topics in Entertainment & Arts Management 1.0-3.0 Credit**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 5 times for 15 credits

## **Entrepreneurship and Innovation**

### **Courses**

#### **ENTP 100 Innovation Ecosystem 1.0 Credit**

This course is designed to introduce students to the numerous entrepreneurial activities that are part of Drexel University and the greater Philadelphia region. The course sparks curiosity about innovations and ideas not commonly encountered, and stimulates creative thinking about new opportunities.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

#### **ENTP 101 Life Strategies I 3.0 Credits**

Life Strategies is a two term series which reinforces entrepreneurship as an increasingly important life skill. First in the series, Life Strategies I, has two thrusts. It first explores the accelerating job market evolution and why future careers and earning a living will be vastly different from even recent history. Facts presented make the case people should embrace entrepreneurship as a "habit of mind" as they maneuver future career options. The course then introduces the personal skill set valuable to entrepreneurs, skills every student should consider honing to help them navigate their future whether or not they plan to be an entrepreneur.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

#### **ENTP 102 Life Strategies II 3.0 Credits**

Life Strategies II introduces the fundamentals of starting an entrepreneurial endeavor. The course provides students with a basic understanding of startup enterprise essentials and why a startup isn't just a smaller version of a large business. The course is intended to give a student who has no business training the ability to frame a potential business idea for consideration by others using only a few simple models, common sense, and logic. Life Strategies I is a prerequisite.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENTP 101 [Min Grade: D]

#### **ENTP 105 Entrepreneurship Practice & Mindset 3.0 Credits**

This course is intended for anyone interested in developing an entrepreneurial mindset for success in starting their own venture, or working in an established company or new start-up venture. Throughout this course, students will develop a mindset that will enable them to build a toolkit to create and evaluate entrepreneurial opportunities, marshal resources, and form teams driven by creativity, leadership, and smart action. In sum, this course is a journey through the fuzzy, front-end of early-stage entrepreneurial activity. This course is not intended to be a complete overview of entrepreneurship; it is an immersion experience for students to cultivate thinking entrepreneurially, not only to find and create opportunities, but in all that they do.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENTP 101 [Min Grade: D]

**ENTP 205 Ready, Set, Fail 3.0 Credits**

There are many students who say they want to be an entrepreneur, but they are often not ready for the risk that comes with starting and growing a business. Taking risks requires a deep appreciation of failure. This course will teach students how to appreciate failure, learn from it, and use these experiences to build future success in an entrepreneurial setting.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENTP 101 [Min Grade: D] (Can be taken Concurrently)

**ENTP 210 [WI] Leading Start-Ups 3.0 Credits**

Entrepreneurs face unique leadership challenges, especially when founding a new company. This course provides the aspiring entrepreneur with tools and frameworks necessary for creating strategy, building companies, and assembling human capital with limited resources. By exploring what entrepreneurial leaders actually do, and how they do it, the student will learn through experiential exercises both the challenges and the excitement of starting a new venture.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENTP 101 [Min Grade: D] (Can be taken Concurrently)

**ENTP 215 Building Entrepreneurial Teams 3.0 Credits**

The overall goal of this course is to evaluate the different approaches in forming teams during the startup of a new company. We will compare and contrast evidence-based and anecdotal team formation models to determine their advantages and disadvantages as well as their effects on the expected outcomes.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENTP 210 [Min Grade: D]

**ENTP 225 Mindfulness & Wellbeing 3.0 Credits**

Modern day demands create stress in workers' lives, and gone unmanaged, stress can have devastating physical, psychological and financial implications. Investing in one's psychological and emotional health pays long-term dividends because it buffers the negative effects of stress, and helps individuals become their best selves. Based upon the practice of mindfulness, and the domain of positive psychology, this course teaches students how to cope with contemporary challenges, and to become more proactive and to flourish in their entrepreneurial endeavors despite them.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENTP 101 [Min Grade: D]

**ENTP 250 Ideation 3.0 Credits**

Innovation is the driving force behind today's economy and ideation supports an individual's ability to innovate. This course provides students with tools, methods and self-reflection techniques necessary to bring new ideas into reality. Through creative innovation, successful entrepreneurs not only create new ventures but also re-invent companies to remain competitive in an ever-changing market. Students in this course will use ideation techniques to develop new ideas, change or build upon established practices and apply these techniques in approaching and analyzing business situations. Students will be able to apply creative skills more effectively both personally and professionally.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENTP 101 [Min Grade: D] (Can be taken Concurrently)

**ENTP 270 Social Entrepreneurship 3.0 Credits**

This course examines how social entrepreneurs launch successful ventures to address the world's most challenging social and environmental problems. The course introduces students to frameworks and methodologies that challenge current models to advance original solutions to existing problems. A passion for social change is advanced by adopting a market orientation and data-driven approaches that encompass both social and financial outcomes.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENTP 101 [Min Grade: D] (Can be taken Concurrently)

**ENTP 275 Diversity Entrepreneurship 3.0 Credits**

Today, women and minority entrepreneurs are starting new business ventures at a quick pace. Yet there are few resources for these business owners to improve the historically high failure rate or grow their new venture. In this course, students will understand how race, gender, or ethnicity plays a part in establishing a women- or minority-owned enterprise. The course examines the current state of minority and women's entrepreneurship along with the conditions that support or block minority or women entrepreneurs.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENTP 101 [Min Grade: D] (Can be taken Concurrently)

**ENTP 285 Organizational Innovation and Change for Corporate Entrepreneurs 3.0 Credits**

In today's world, change and innovation are needed at every level of an organization. New processes, organizational designs, innovative management styles, problem solving techniques, and market creation are not just for new product and service creation. An entrepreneurial mindset is the premise for the fundamental approach to meet the ongoing need for continuous change. Corporate entrepreneurs need to be well-equipped to act as change agents in an organization to diagnose, understand and address the need for change and innovation. Every organization is unique and organizational development techniques and processes should be developed specific to each organization. This course takes a deep dive into how corporate entrepreneurs can achieve planned and systematic change and improvement in a complex environment.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENTP 101 [Min Grade: D]

**ENTP 325 Early Stage Venture Funding 3.0 Credits**

This course provides students with an understanding of the process, opportunities and challenges associated with early stage venture funding. It exposes you to the concepts, practices and tools related to the funding needs of early stage ventures with a focus on bootstrapping, friends/family financing and angel-stage investment. The course will include an understanding of the unique needs of family businesses, small businesses and social ventures, as well as a deep look at alternative (but increasingly popular) fund raising techniques such as crowdfunding. This will be accomplished through a combination of field projects, readings, cases, and speakers designed to convey the unique environment of investments and new ventures.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENTP 101 [Min Grade: D] (Can be taken Concurrently) (ACCT 115 [Min Grade: D] or ACCT 120 [Min Grade: D] or ACCT 110 [Min Grade: D])

**ENTP 329 Entrepreneurship & New Technologies 3.0 Credits**

Creating a new technology venture offers unique challenges. Indeed, innovation and advances in technology are prevalent, and technological innovation leads to competitive advantage. Students are introduced to the challenges of new technology-based companies that include: the complexity of intellectual property, research team development, and sources of funding. This course will examine entrepreneurship in technology markets and take a deep view of what it takes to be a technology entrepreneur.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENTP 101 [Min Grade: D] (Can be taken Concurrently)

**ENTP 340 Managing Entrepreneurial Growth 3.0 Credits**

Managing growth includes leveraging assets at every stage and controlling the risk. This course will focus on areas that are essential to a new venture's growth, including planning, marketing, talent management, and financial performance. Students will examine the growth opportunities of a venture and develop an experiential growth plan that will provide the greatest impact for a firm.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENTP 101 [Min Grade: D] (Can be taken Concurrently)

**ENTP 350 Dynamics of the Family Firm 3.0 Credits**

This course studies the unique dynamics of family firms and the complex issues involved with creating, owning, and successfully operating a family business. Students will examine ownership structures, strategic human-resource issues, governance, strategy, marketing, family dynamics, culture, and philanthropy.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENTP 101 [Min Grade: D] (Can be taken Concurrently)

**ENTP 360 Franchising 3.0 Credits**

Franchising is rapidly increasing worldwide. There is a growing need among franchise owners for employees with industry experience and know-how, and there are growing opportunities for entrepreneurs who want to start a franchise. Together, these developments present a unique opportunity for the entrepreneur. This course offers various aspects of starting, developing, and managing a franchise.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENTP 101 [Min Grade: D] (Can be taken Concurrently)

**ENTP 370 Global Entrepreneurship 3.0 Credits**

This course focuses on international opportunity identification for new and emerging companies; market analysis; joint ventures, regional legal and cultural issues and financing foreign ventures. The course will provide students with an understanding of the complexities faced by entrepreneurs doing business in a global environment and with knowledge, which will help them to be successful within the global context. In classroom discussion, emphasis will be placed on entrepreneurship in China, India and Latin America, however class projects will touch upon numerous countries across the globe.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENTP 101 [Min Grade: D] (Can be taken Concurrently)

**ENTP 375 3BL - Triple Bottom Line 3.0 Credits**

The course seeks to develop students' critical capacities for reflection and action based upon a systems-thinking framework, with respect to social, environmental, and organizational challenges and the ways in which new ventures can address them. Students will learn about the history of the sustainability movement as it is the precursor of modern triple bottom line organizational forms. Lectures and readings provide the history of the sustainability movement, social movements that led to innovation, and alternative perspectives on the global economy. The course addresses the pros and cons of growing and supporting local business vs. engaging with business on a global scale.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENTP 101 [Min Grade: D]

**ENTP 385 Innovation in Established Companies 3.0 Credits**

This course provides students with an understanding of how companies remain competitive using innovation as the driving force behind product or service development. Entrepreneurs challenge assumptions and create value in established organizations. While most executives would agree that innovation is the key to a sustainable business in the 21st century, few seem to understand how to make it a reality. Students will be introduced to various kinds of internal and joint ventures, such as corporate venture-capital investments, alliances, mergers, and acquisitions to create value and promote entrepreneurship within an organization. Students will develop skills that are important for careers in an entrepreneurial setting and corporate venture activities.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENTP 101 [Min Grade: D] (Can be taken Concurrently)

**ENTP 390 Energy Entrepreneurship 3.0 Credits**

This course will provide the groundwork to understanding new venture development in energy markets. Through experiential learning, specifically, field visits to local energy companies, and through guest speakers, students will develop an appreciation and understanding of the market conditions and policy implications of new ventures in this sector.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENTP 101 [Min Grade: D] (Can be taken Concurrently)

**ENTP 410 [WI] Thought Leadership 3.0 Credits**

The individual entrepreneur faces many challenges. This course takes a philosophical and ethical approach to developing the entrepreneurial mindset. This course examines the ethical challenges in a start-up venture or high-growth firm, as illustrated through discussions by guest speakers—serial entrepreneurs. Students will be required to reflect on the varying viewpoints presented by the distinguished experts, and will develop their own approaches and philosophies regarding "the entrepreneur" and the "process of entrepreneurship."

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENTP 101 [Min Grade: D] (Can be taken Concurrently)

**ENTP 440 Launch It!: Early Stage 3.0 Credits**

This course is designed for students interested in completing one of four minors offered by the Close School of Entrepreneurship: Entrepreneurship and Innovation, Social Entrepreneurship, Energy Innovations or Health Innovations. In the course, students will be expected to identify an opportunity and propose the launch of a company. Working in teams, students will also learn how to experiment with different business models, validate a market need, and build all facets of a start-up company. Students will be expected to achieve milestones and propose key risks on which the business' success depends.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENTP 101 [Min Grade: D] (Can be taken Concurrently)

**ENTP 450 Launch It! 3.0 Credits**

This course is designed for those serious about being entrepreneurs. Students will be expected to work on the actual launching of a start-up. The course involves talking to customers, partners, competitors, experimenting with different business models, validating a market need through customer development, and building all facets of a start-up company. \*Admission to this course requires submission of a business application form and approval of the application by the professor.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENTP 205 [Min Grade: D] and ENTP 250 [Min Grade: D] and ENTP 325 [Min Grade: D]

**ENTP I199 Independent Study in ENTP 1.0-12.0 Credit**

Various topics of interest in the field of entrepreneurship will be reviewed. Topics will vary from term to term.

**College/Department:** Close School of Entrepreneurship-3145

**Restrictions:** Cannot enroll if classification is Freshman

**ENTP T480 Special Topics in Entrepreneurship 1.0-12.0 Credit**

This course covers various topics of particular relevance to the study of entrepreneurship.

**College/Department:** Close School of Entrepreneurship-3145

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

## Environmental Engineering

### Courses

**ENVE 300 Introduction to Environmental Engineering 3.0 Credits**

Overview of environmental engineering practice: water resources, water and waste control, solid waste, air pollution, risk management and environmental health. Population and resource demand forecasting, chemistry and microbiology necessary to solve basic problems is included.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CAEE 202 [Min Grade: D] and CAEE 203 [Min Grade: D]

**ENVE 302 Environmental Transport and Kinetics 3.0 Credits**

Covers applications of mass balances to describing transport environmental systems, diffusive and dispersive processes, and coupling of transport and kinetic models.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CHE 201 [Min Grade: D] or CHE 211 [Min Grade: D]

**ENVE 316 Fundamentals of Environmental Biotechnology 3.0 Credits**

This is an introductory course in environmental biotechnology for upper-level undergraduates and graduate students in engineering.

The fundamentals of microbiology and molecular biology important to environmental engineering applications will be emphasized.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 141 [Min Grade: D] and (ENVE 300 [Min Grade: D] or CHE 211 [Min Grade: D])

**ENVE 335 Industrial Safety 3.0 Credits**

Examines safety in the workplace, loss prevention principles, Occupational Safety and Health Act implementation, accident investigation techniques, and basics of loss control and risk management.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ENVE 410 Solid and Hazardous Waste 3.0 Credits**

Provides an overview of municipal and industrial waste management, including design and economic analysis. Discusses options such as landfilling and incineration from engineering, social, and regulatory perspectives. Reviews physical, chemical, and biological treatment of hazardous waste.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ENVE 415 Recycling of Materials 3.0 Credits**

This course will examine the selection criteria for recycling component materials. Recycling involves both reusing materials for energy applications and reprocessing materials into new products.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENVE 302 [Min Grade: D]

**ENVE 416 Urban Water Resources & Infrastructure Systems 3.0 Credits**

This course covers planning, design, and operation of water and wastewater systems in urban areas. Topics include domestic and firefighting water supply, treatment, storage and distribution; wastewater collection and treatment; stormwater collection, peak flow attenuation and treatment, and protection of source/receiving water aquatic habitat.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENVE 300 [Min Grade: D] and CIVE 330 [Min Grade: D] and CIVE 430 [Min Grade: D]

**ENVE 421 Water and Waste Treatment II 3.0 Credits**

Covers processes used for water purification and waste treatment, containment and immobilization of hazardous wastes, and ultimate disposal of residues and hazardous materials.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**ENVE 422 Water and Waste Treatment Design 3.0 Credits**

Covers integration of processes into a complete treatment system. Includes detailed design procedures to control wastes, prevent environmental contamination, and protect drinking water quality.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENVE 421 [Min Grade: D]

**ENVE 435 Groundwater Remediation 3.0 Credits**

Reviews physical, chemical, and biological remediation technologies for contaminated sites and groundwater by in-site and ex-site applications.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ENVE 450 Data-based Engineering Modeling 3.0 Credits**

This course covers empirical methods to understand and model engineering systems. Students will learn to develop evaluate statistical models and use three common statistical software packages, Excel, SPSS, and R.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Junior or Pre-Junior or Sophomore

**Prerequisites:** ENGR 361 [Min Grade: D] or CHE 335 [Min Grade: D] or MEM 361 [Min Grade: D] or MATH 311 [Min Grade: D]

**ENVE 455 Geographic Information Systems 3.0 Credits**

The course provides grounding in fundamental principles of GIS, and achieves understanding through hands on practical laboratories. Course topics include: spatial reference systems, geographic data theory and structures, structures, spatial analysis tools, functions and algorithms, GIS data sources, compilation and quality, and GIS project design and planning.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**ENVE 460 Fundamentals of Air Pollution Control 3.0 Credits**

Fundamental topics with regard to the formation and control of air pollutants are studied. This course provides strong foundation for engineers who will be involved in the development of engineering solutions for industrial air pollution prevention and design, development or selection of air pollution control devices and systems.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**ENVE 465 Indoor Air Quality 3.0 Credits**

Introduces basic concepts about indoor air quality, indoor air pollutants, including their sources and health effects, transport of pollutants, modeling of pollutant concentration in buildings, and ventilation as well as air cleaning systems.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENVE 302 [Min Grade: D] or AE 220 [Min Grade: D]

**ENVE 470 Industrial Ecology 3.0 Credits**

Industrial Ecology (IE) is an evolving view of industrial operations which seeks to design processes and manufacture products in such a way to minimize and optimize their environmental interactions. IE borrows the analogy from nature that "waste" from one organism is "food" for another. Within the "technosphere", the organization in which economic processes and activities are conducted by humans, IE uses the evolving tools life cycle assessment (LCA), material flow analysis (MFA), and economic valuation, to explore novel approaches to minimizing waste stocks and flows at both micro and macro levels.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CIVE 240 [Min Grade: B-] and ENVE 300 [Min Grade: B-]

**ENVE 471 Environmental Life Cycle Assessment 3.0 Credits**

This course provides undergraduate engineering students with an enhanced skill set to permit them to cooperate more fully in the sustainable design and planning of engineering systems. Students will be introduced to the systems analysis modeling approaches, life cycle assessment (LCA) and material flow analysis (MFA), and will explore research-oriented aspects of the methods and their application in engineering design, decisions, and public policy.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENVE 300 [Min Grade: B-] and CIVE 240 [Min Grade: B-]

**ENVE 485 Professional Environmental Engineering Practice 1.0 Credit**

Professional and ethical considerations in environmental engineering practice. Career management and lifelong learning.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ENVE and classification is Senior.

**ENVE 486 Environmental Engineering Processes Laboratory I 2.0 Credits**

Laboratory experiments on common environmental engineering unit processes are performed. Students use data to draw conclusions relevant to design of full-scale systems.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ENVE and classification is Senior.

**Prerequisites:** ENVE 302 [Min Grade: D] and ENVS 401 [Min Grade: D]

**ENVE 487 Environmental Engineering Processes Laboratory II 2.0 Credits**

Laboratory experiments on common environmental engineering unit processes are performed. Students use data to draw conclusions relevant to design of full-scale systems. Continuation of ENVE 486.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ENVE and classification is Senior.

**Prerequisites:** ENVE 486 [Min Grade: D]

**ENVE 491 [WI] Senior Project Design I 3.0 Credits**

Introduces the design process. Covers information retrieval, problem definition, proposal writing, patents, and design notebooks. Explores problem areas through presentations by experts from industry, government, and education. This is a writing intensive course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** ENVE 302 [Min Grade: D]

**ENVE 492 [WI] Senior Design Project II 3.0 Credits**

Continues the work started in ENVE 491. Requires written and oral progress reports. This is a writing intensive course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** ENVE 491 [Min Grade: D]

**ENVE 493 [WI] Senior Design Project III 3.0 Credits**

This course is the final sequence in the design project. It requires written and oral final reports, including oral presentations by each design team at a formal Design Conference open to the public and conducted in the style of a professional conference. This is a writing intensive course.

**College/Department:** College of Engineering

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** ENVE 492 [Min Grade: D]

**ENVE I199 Independent Study in ENVE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ENVE I299 Independent Study in ENVE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ENVE I399 Independent Study in ENVE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ENVE I499 Independent Study in ENVE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ENVE T180 Special Topics in ENVE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ENVE T280 Special Topics in ENVE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ENVE T380 Special Topics in ENVE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

**ENVE T480 Special Topics in ENVE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Engineering

**Repeat Status:** Can be repeated multiple times for credit

## Environmental Graphic Design

### Courses

**EVGD 200 Introduction to Environmental Graphic Design 4.0 Credits**

This course is an introduction to the Environmental Graphic Design specialty including wayfinding systems, architectural graphics, signage, exhibit design, and mapped and themed environments.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is GRDS.

**Prerequisites:** VSCM 230 [Min Grade: D] and VSCM 240 [Min Grade: D]

**EVGD 210 Architectural Signage 4.0 Credits**

Architectural Signage focuses on identification and wayfinding systems within a built environment. This course explores means and methods through class exercises and assigned projects.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is GRDS.

**Prerequisites:** EVGD 200 [Min Grade: D]

**EVGD 220 Wayfinding 4.0 Credits**

This course explores the discipline of wayfinding in an urban environment through the use of visual clues and directional hierarchy, including typography, symbols, and color.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is GRDS.

**Prerequisites:** EVGD 210 [Min Grade: D]

**EVGD 310 Design Techniques and Materials 3.0 Credits**

This course introduces a wide range of materials and techniques and explores how they may be applied to develop a successful environmental graphics project.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is GRDS.

**Prerequisites:** EVGD 220 [Min Grade: D]

**EVGD 320 Exhibit Design 4.0 Credits**

This exploration of exhibit design focuses on communicating a narrative visually through the design of space, graphics, objects, and interactivity.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is GRDS.

**Prerequisites:** VSCM 230 [Min Grade: D] and VSCM 240 [Min Grade: D] and EVGD 200 [Min Grade: D]

**EVGD 421 Environmental Branding 4.0 Credits**

This course explores the marketing power of a branded identity when it is visually and spatially applied to a retail environment.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is GRDS.

**Prerequisites:** EVGD 320 [Min Grade: D]

**EVGD I199 Independent Study in EVGD 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**EVGD I299 Independent Study in EVGD 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**EVGD I399 Independent Study in EVGD 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**EVGD I499 Independent Study in EVGD 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**EVGD T180 Special Topics in Environmental Graphic Design 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**EVGD T280 Special Topics in Environmental Graphic Design 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**EVGD T380 Special Topics in Environmental Graphic Design 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**EVGD T480 Special Topics in Environmental Graphic Design 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

## Environmental Science

### Courses

**ENVS 101 Introduction to Environmental Science 5.0 Credits**

Students will be introduced to a variety of disciplines and techniques necessary to effectively study local stream, marsh, lake, and terrestrial ecosystems. Students will examine the physical, chemical, and biological elements with these ecosystems with an emphasis on biological elements. Some of the field experiences will include learning how to sample algae, higher plants, invertebrates, fish and salamanders, and methods for surveying and monitoring marshes and selected physical and chemical measurements.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ENSS or major is ENVS or major is GEO.

**ENVS 102 Natural History, Research and Collections 2.0 Credits**

Students will learn about the scope, nature and uses of the specimen collection, methods of collection care, maintenance and growth for different taxonomic groups. Students will learn how biodiversity research questions and projects are conceived and implemented. Students will observe and collect specimens and data, and begin to learn analyses and publication of results. Students will gain an appreciation for the role of natural history collections in modern research.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ENVS or major is GEO.

**ENVS 169 Environmental Science 3.0 Credits**

This course provides an introduction to environmental problems and their causes, cultural changes, worldviews, ethics and environment. It covers such topics as science, matter and energy, ecosystems and how they work, air and air pollution, climate, global warming, and ozone loss, waste minerals and soil, solid, toxic and hazardous wastes, protecting food sources and energy resources.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if major is BIO or major is ENVS

**ENVS 201 Practical Identification of Plants and Animals 2.0 Credits**

This course provides instruction and hands on experience in using print and online taxonomic keys, field guides and reference collections of real specimens for identification of plants, animals and fungi. The emphasis is on the flora and fauna of the Philadelphia region and learning how to use identification tools in the field and lab. The main objective is to have students understand the importance of accurate identification of organisms and to develop basic knowledge and skills that can be extended and applied to organisms widely.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ENVS.

**Prerequisites:** BIO 124 [Min Grade: D]

**ENVS 202 Tree of Life 2.0 Credits**

This course reviews the diversity of life in the context of phylogenetic history as the organizing principle. The course emphasizes recent discoveries of living and fossil taxa, breakthroughs and controversies in resolving relationships, and the key evolutionary innovations in eukaryotes, such as multicellularity, major shifts in habitat, parasitism, symbiosis, and complex morphological novelties.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ENVS or major is GEO.

**Prerequisites:** BIO 124 [Min Grade: D]

**ENVS 203 The Watershed Approach 2.0 Credits**

Students will integrate several disciplines of study to compare an urbanized to a non-urbanized stream ecosystem. All elements of the stream ecosystem and its watershed will be examined. Field experience will include learning how to assess the physical properties of a stream, measure and monitor water quality, sample invertebrates and vertebrates.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ENVS.

**Prerequisites:** ENVS 101 [Min Grade: D] or BIO 126 [Min Grade: D]

**ENVS 212 Evolution 4.0 Credits**

Aspects of the fact of evolution are discussed in class, including early evolutionary thought, pivotal moments in the history of life, and evidences for evolution from fossils, genetics, and living organisms. Key concepts include natural selection, speciation, adaptation, vicariance, inclusive fitness, and evodevo. Non-scientific arguments pertaining to evolution are refuted.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 100 [Min Grade: D] or BIO 101 [Min Grade: D] or BIO 107 [Min Grade: D] or BIO 109 [Min Grade: D] or BIO 124 [Min Grade: D] or BIO 141 [Min Grade: D]

**ENVS 223 Foraging for Edible Plants 3.0 Credits**

This course explores the historical and contemporary reasons why humans forage for edible plants. There will be discussion about modern diets in a global agricultural world, and common pervasive myths about the dangers of foraging for wild plants. During this course, students will learn about how to identify species of edible plants, and recognize poisonous plants of the region.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ENVS 226 Discoveries in Animal Behavior 3.0 Credits**

The course explores the incredible diversity of animal behavior using specially selected examples of recent research findings. It focuses on the adaptiveness of behavior: how animals solve problems posed by their physical and social environments. We will consider implications of research on other species for understanding our own (human) behavior. Non-majors only.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ENVS 230 General Ecology 3.0 Credits**

This course examines how organisms interact with the biological and physical world and bridges the natural sciences with the social sciences. Using evolutionary theory as its basis, this course will cover topics spanning multiple levels of organization within the science of ecology.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 126 [Min Grade: D] or BIO 141 [Min Grade: D] or BIO 101 [Min Grade: D] or BIO 109 [Min Grade: D]

**ENVS 247 Native Plants and Sustainability 3.0 Credits**

Plants are an integral part of our daily lives in nearly every way, directly or indirectly. Increasingly, our landscapes are becoming dominated with species that are introduced from other parts of the world (intentionally or by accident), displacing many of the species that were once key components of our ecosystems. The impacts of the loss of native plants are profound. This course will give students an overview of the many reasons why native plants are critically important to us, and the problems that arise when non-native plants replace them. There will be discussions about topics ranging from evolutionary theory, conservation, agriculture, public health, nutrition, and more.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ENVS 254 Invertebrate Morphology and Physiology 3.0 Credits**

Provides comparative study of the major invertebrate groups, relationships between physiology and organismal structure, phylogenetic relationships and classification, development, and life histories.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 100 [Min Grade: D] or BIO 101 [Min Grade: D] or BIO 107 [Min Grade: D] or BIO 109 [Min Grade: D] or BIO 124 [Min Grade: D]

**Corequisite:** ENVS 255

**ENVS 255 Invertebrate Morphology and Physiology Lab 2.0 Credits**

This laboratory course provides a comparative study of the morphology of representative species from the major invertebrate groups. How their structural features relate to their physiology and behavior is emphasized. Identification of species, examining phylogenetic relationships, and understanding life histories will relate organisms to their ecological roles.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Corequisite:** ENVS 254

**ENVS 260 Environmental Science and Society 3.0 Credits**

This course is a multidisciplinary introduction to the range of disciplines that make up the environmental sciences. The aim of this course is to provide an understanding of basic physical, ecological and social sciences that focus on the study on the natural environment and its interaction with human society.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ENVS 275 Global Climate Change 3.0 Credits**

This course provides a multidisciplinary introduction to the issue of global climate change. It focuses on the scientific evidence for climate change, its impact on natural and human systems, actions that can be taken to mitigate or adapt to climate change and the political and cultural dynamics of this issue.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ENVS 284 Physiological and Population Ecology 3.0 Credits**

Examines the role of physiological adaptation in the ecology of plants and animals and the principles of population biology as applied to biological systems.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENVS 230 [Min Grade: D]

**ENVS 285 [WI] Population Ecology Laboratory 2.0 Credits**

This laboratory course will introduce the basic concepts of populations ecology in context of their modern ramifications and will prepare students for advanced research in population ecology. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENVS 284 [Min Grade: D] (Can be taken Concurrently)

**ENVS 286 Community and Ecosystem Ecology 3.0 Credits**

Introduces the principles of community and ecosystem ecology. Emphasizes the role of community structure and ecosystem organization in the ecology of plants and animals.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENVS 230 [Min Grade: D]

**ENVS 287 Community Ecology Laboratory 2.0 Credits**

This laboratory course will introduce the basic concepts of community ecology in context of their modern ramifications and will prepare students for advanced research in community and ecosystem ecology. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENVS 286 [Min Grade: D] (Can be taken Concurrently)

**ENVS 289 Global Warming, Biodiversity and Your Future 3.0 Credits**

Human induced global warming is changing the physical environment, ecological systems, and human systems around the world. We will explore causes, effects, and consequences of global warming using NASA satellite information and current scientific and semi-popular writings. Students will understand the implications of global climate change for their futures.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ENVS 302 Environmental Chemistry Laboratory 2.0 Credits**

In this course students will learn basic techniques for chemical analysis of environmental samples, including biological material, water and soil. Students will also learn to utilize more manual methods but will also use electronic data acquisition systems and further develop their scientific writing skills.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ENVS.

**Prerequisites:** CHEM 103 [Min Grade: D]

**ENVS 304 Energy and the Environment: Iceland 3.0 Credits**

This course studies how an economy and culture changes when it switches from fossil to alternative energy. In the last 30 years Iceland has switched from a poor country fueled by fossil fuels to one of the wealthiest nations in Europe, with only 20 percent of its energy coming from fossil fuels. In this class students will synthesize data/knowledge into flow diagrams of the economy of Iceland and then use the synthesis to understand the impacts of energy development and extraction on the environment and society.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ENVS 305 Iceland Intensive: Green Energy 1.0 Credit**

Students will attend an intensive course in Iceland on energy plants and their impact on the environment. The course in Iceland will bring students to various energy facilities to examine their operation and better understand how these facilities impact the environment and serve society. Before each tour of a power plant students will attend a lecture at Reykjavik University on power production and its role in fueling economies and its potential impacts on the environment.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Corequisite:** ENVS 304

**ENVS 308 GIS and Environmental Modeling 3.0 Credits**

Students will learn how to write computer programs to read data directly from digital maps and then perform various spatial analyses and modeling tasks. The class will include an introduction to spatial- and geo-statistics; techniques for determining ecological richness of organisms; methods for modeling basic forcing factors such as solar radiation, water temperature; approaches for modeling the flow of water in a landscape; and ultimately, combining these techniques to model or simulate ecosystems.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ENVS 310 Introduction to Environmental Chemistry 3.0 Credits**

This course uses a topic-based approach to the chemistry of the environment. Students in this course are expected to have a minimal/some knowledge of chemistry, with a desire of applying this knowledge to the environment. Topics of interest include environmental chemistry of water, water pollution, water treatment, geochemistry, atmospheric chemistry, air pollution, hazardous materials and resources.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 103 [Min Grade: D]

**ENVS 312 Systematic Biology 3.0 Credits**

This is an introduction to systematic biology. The primary tasks of systematics are 1) the discovery, description, and classification of biodiversity to construct a general reference system for life on Earth; 2) the reconstruction of the "tree of life": the descent relationships among units of biodiversity at multiple hierarchic levels from genes to phyla; and 3) the application of reconstructions of descent relationships to the study of evolution. Phylogenetic systematics, concerned with units of biodiversity at the species level and above, will be emphasized.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENVS 202 [Min Grade: D] or BIO 126 [Min Grade: D] or BIO 141 [Min Grade: D]

**ENVS 315 Plant Animal Interactions 3.0 Credits**

Plant-animal interactions provide us with some of the most remarkable examples of adaptation and co-evolution. They are also key determinants of ecosystem functions. This course will provide a survey of the diversity of plant-animal interactions, the multidisciplinary approaches used to understand their ecology and evolution, and their importance to ecosystem services that sustain human societies.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D]

**ENVS 322 Tropical Ecology 3.0 Credits**

This is a course in the ecology of tropical rain forests and dry forests. Tropical ecology will explore the physical and biological factors that result in the formation of the forest, the effect of human impact, the effectiveness of management, and the future of these forests.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D] or BIO 141 [Min Grade: D]

**ENVS 323 Tropical Field Studies 3.0 Credits**

This is a study abroad course focusing on the ecology of tropical forest ecosystems. We will visit and compare forest ecosystems in several ecological life zones. The course will combine lectures, natural history surveys, faculty-led field research problems, and learning experiences with local residents to explore the biological diversity and function of tropical forests, including the effects of human impacts. Some background in Biology or Ecology is useful.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ENVS 326 Molecular Ecology 3.0 Credits**

Through a combination of lecture, discussion, and computational exercises, students will learn how molecular tools have been used to study genetic variation. They will then learn how these studies have provided answers to previously unanswered questions in fields including ecology, evolution, behavior, conservation, and forensics.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENVS 230 [Min Grade: D] or ENVS 284 [Min Grade: D] or BIO 211 [Min Grade: D] or BIO 218 [Min Grade: D] or BIO 141 [Min Grade: D]

**ENVS 327 Molecular Ecology Laboratory 2.0 Credits**

Through a combination of laboratory and computational exercises, students will develop a toolkit for applied molecular studies of ecology and evolution. The course will focus on initiating or continuing a novel research project relating to one of several topics within the field of molecular ecology.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENVS 230 [Min Grade: D] or ENVS 284 [Min Grade: D] or BIO 211 [Min Grade: D] or BIO 218 [Min Grade: D]

**ENVS 328 Conservation Biology 3.0 Credits**

This course we will detail the loss of biodiversity and explore related issues, including the theories and practices of conservation biology and the solutions currently and the solutions currently being formulated to enhance the preservation of species on our planet. The course will explore potential limitations to these strategies and provide an appreciation of the relevance of ethics, economics and politics to biodiversity conservation while promoting the potential for individual action to influence conservation efforts.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D]

**ENVS 330 Aquatic Ecology 3.0 Credits**

Studies the relationships between aquatic plants and animals and their environment. Introduces the study of the ecology of lakes, rivers, ponds, and streams.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Pre-Junior or Senior.

**Prerequisites:** ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D] or BIO 141 [Min Grade: D]

**ENVS 333 Wetland Ecology 3.0 Credits**

Examination of the structure, function, and dynamics of wetland ecosystems. Topics include geomorphology, hydrology, biogeochemistry, plant and animal adaptations to wetland environments, and wetland policy.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D]

**ENVS 334 Watershed Ecology 3.0 Credits**

Watershed ecology explores the linkages among aquatic ecosystems and their water catchment or watershed. Aquatic ecosystems are influenced by physical, chemical, and biologic factors in "the watershed." The conditions in the watershed influence aquatic ecosystems at several spatial-scales, for example areas neighboring a stream, "the riparian zone," influences water temperature much more than those areas further away from the stream. Incorporating spatial scale into watershed studies is a developing field with many opportunities to advance watershed science and the associated environmental regulations and policies.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D]

**ENVS 335 Aquatic Insects and Water Quality 3.0 Credits**

Healthy water quality has always been an essential part of human survival and culture. This course outlines the importance of using aquatic macroinvertebrates (principally insects) for assessing water quality and its wide use by government, consulting businesses and citizen groups. Nearly 90 groups of aquatic macroinvertebrates used in stream assessment and in sampling will be identified.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 126 [Min Grade: D] or ENVS 230 [Min Grade: D]

**ENVS 336 Terrestrial Ecology 5.0 Credits**

Studies the relationships between terrestrial plants and animals and their environment. Introduces the study of the ecology of local ecosystems, such as the Poconos and the New Jersey Pine Barrens.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** BIO 126 [Min Grade: D] or ENVR 230 [Min Grade: D] or ENVS 230 [Min Grade: D]

**ENVS 341 Equatorial Guinea: Society & Environment 4.5 Credits**

A lecture and community outreach course based at the National University of Equatorial Guinea that combines instruction in mankind's relationship with the natural environment (human population, natural resources, environmental degradation, pollution, biodiversity loss and climate change) with environmental outreach activities specific to Equatorial Guinea.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ENVS 342 Equatorial Guinea: Natural Resource Economics 4.5 Credits**

A lecture course based at the National University of Equatorial Guinea that combines instruction in the economic implications of natural resources (renewable and non-renewable resources, efficient utilization, market performance, government controls, sustainability and discounting) with a university-wide guest lecture series addressing local issues.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ENVS 343 Equatorial Guinea: Field Methods 3.0 Credits**

A lecture and field excursion course based at the University of Equatorial Guinea combining instruction in standard methods for studying rainforest communities (expedition planning; GPS and mapping, forest diversity and productivity; wildlife population monitoring) with multi-day field experiences in Bioko Island's remote protected areas.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ENVS 344 Equatorial Guinea: Field Research 6.0 Credits**

An intensive research course that takes advantage of the unspoiled rainforest adjacent to the Moka Wildlife Center, a university-affiliated research station located in the highlands of Bioko Island, Equatorial Guinea (Central/West Africa). Opportunities exist for student research on topics including primates, antelope, birds, chameleons, butterflies and plants.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 1 times for 6 credits

**ENVS 351 Resource and Environmental Economics 4.0 Credits**

Examines the microeconomic and quantitative aspects of markets for both renewable and exhaustible resources, and the interaction between the energy and resource sectors of the economy and between the productive sectors of the economy and the natural environment, with evaluation of major public initiatives and issues in these areas.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECON 201 [Min Grade: D] and ECON 202 [Min Grade: D]

**ENVS 352 Ornithology 3.0 Credits**

Birds are among the most ubiquitous, diverse, and charismatic animals and we know a great deal about their biology. This course aims to teach students who are enthusiastic about natural history about the biology of birds and covers a variety of topics including evolution, ecology, behavior, conservation, and diversity of birds and uses the world renowned specimen collections housed in the Academy of Natural Sciences of Drexel University.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 126 [Min Grade: D] or ENVS 230 [Min Grade: D] or BIO 109 [Min Grade: D] or BIO 141 [Min Grade: D]

**ENVS 353 Field Ornithology Lab 2.0 Credits**

The Delaware Valley is the cradle of North American Ornithology. This course aims to give students a hands on lab and field experience in identifying birds found in the Delaware Valley. Half of the classes are held outside at local parks and refuges and the remainder are in the lab where specimens from the world renowned collections housed at the Academy of Natural Sciences of Drexel University will be studied.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ENVS 354 Ichthyology 3.0 Credits**

This course will explore fish and the link between their diversity in form and ecological function. This combined lecture-lab course will cover the basic systematics, evolutionary relationships, biogeography, structure, physiology, life history, and ecology of fishes and lampreys.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 126 [Min Grade: D] or ENVS 230 [Min Grade: D]

**ENVS 355 Biogeography 3.0 Credits**

This course is a survey of the field of Biogeography, the study of biological diversity across space and time. Factors and evolutionary history that influence both the ecology and evolution of organismal diversity will be covered. Topics will range from how species distributions arise to how we define species and how we reconstruct the influence and importance of both ecology and evolutionary history on their distributions.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 126 [Min Grade: D] or ENVS 212 [Min Grade: D]

**ENVS 360 Evolutionary Developmental Biology 3.0 Credits**

Evolutionary Developmental Biology (Evo-Devo) compares developmental processes between organisms to determine how these mechanisms evolved in light of ancestral relationships. Topics include "your inner fish," how to "build" a dinosaur, and the reducibly simple evolution of the eye. Also explored are developmental controls such as environmental factors and molecular mechanisms.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENVS 212 [Min Grade: D] or BIO 217 [Min Grade: D]

**ENVS 364 Animal Behavior 3.0 Credits**

The mechanisms, ecology and evolution of the activities of animals in relation to their natural environment. Topics include development and control (neural and hormonal) of behavior, adaptations for survival, feeding, and predator avoidance, strategies of habitat selection, communication, reproduction, and social behavior.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENVS 212 [Min Grade: D] or BIO 126 [Min Grade: D]

**ENVS 365 Animal Behavior Laboratory 2.0 Credits**

An observational study of the behavior of a captive group of social animals at the Philadelphia Zoo including species selection, background research, ethogram construction, 16 hours of quantified observation, analysis of data and written report.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D]

**ENVS 370 Practice of Environmental Economics 3.0 Credits**

The focus of this course is on the real world implications of environmental resources exploitation and economic tools for dealing with them. Areas include air and water pollution, toxic wastes and mineral, water and forestry resource harvesting/extraction.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ECON 201 [Min Grade: D] and ECON 202 [Min Grade: D]

**ENVS 382 Field Botany of the New Jersey Pine Barrens 4.0 Credits**

This course focuses on plant identification skills that are necessary to conduct scientific botanical surveys. The vascular flora of the New Jersey Pine Barrens, including rare plant species, is emphasized with special reference to habitat and community analysis. Non-vascular species are examined but not emphasized.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Pre-Junior or Senior.

**ENVS 383 Ecology of the New Jersey Pine Barrens 4.0 Credits**

Course focuses on the ecology of the New Jersey Pine Barrens. Students learn field methods, identify index species (flora and fauna), perform community analyses, and use equipment for measuring abiotic variables (soil and water). Field exercises focus on key aspects of the regional ecology: fire, soil and water.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Pre-Junior or Senior.

**Prerequisites:** ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D]

**ENVS 385 Systems Ecology 3.0 Credits**

Systems Ecology will provide the tools to integrate and synthesize disciplines of sciences to understand the development, disruption, and dynamics of ecosystems. Students will learn general systems theory about how elements of an ecosystem interact with other parts of the system and how exogenous or external variables drive ecosystem processes. The course will show how to combine field data with simple mathematics in step by step calculations to describe, study, and emulate complex systems.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 126 [Min Grade: D] or BIO 141 [Min Grade: D]

**ENVS 388 Marine Field Methods 4.0 Credits**

Course focus is on the ecology of local marine environments. Students learn marine field survey methods, identification of marine organisms, habitat analyses, and use of equipment for measuring abiotic variables. Students sample fish, plankton and invertebrate species aboard the Drexel 25 foot Research Vessel Peter Kilham.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Pre-Junior or Senior.

**Prerequisites:** ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D]

**ENVS 390 Marine Ecology 3.0 Credits**

This course studies major processes in the marine environment, especially relationships between organisms and the factors that influence their abundance.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Pre-Junior or Senior.

**Prerequisites:** ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D] or BIO 141 [Min Grade: D]

**ENVS 391 Freshwater and Marine Algae 3.0 Credits**

Origin and evolution of various algal groups, principles and methods of algal systematics, algal ecology, and use of algae as environmental indicators. Field trips to local streams, ponds and wetlands where students will collect algal samples and record environmental data. Lab work will include sample processing and algal identification.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Pre-Junior or Senior.

**Prerequisites:** BIO 124 [Min Grade: D] or BIO 141 [Min Grade: D]

**ENVS 392 Ichthyology and Herpetology 3.0 Credits**

Many species of fishes, amphibians and reptiles face extirpation from their former ranges and some face total extinction within our lifetime. This course investigates major regional and global issues concerning viability of these organisms and addresses solutions using concepts of population ecology, community ecology, physiological ecology and conservation biology.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**ENVS 393 Entomology 3.0 Credits**

This course introduces students to some of the major topics in the field of entomology.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 124 [Min Grade: D] or BIO 141 [Min Grade: D]

**Corequisite:** ENVS 394

**ENVS 394 Entomology Laboratory 2.0 Credits**

This course introduces students to some of the major practical topics in the field of entomology. The course consists of lab work, collecting trips, and creation of an insect collection.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 124 [Min Grade: D] or BIO 141 [Min Grade: D]

**Corequisite:** ENVS 393

**ENVS 400 Cascade Mentoring 2.0 Credits**

Provides senior ENVS students with mentoring and service opportunities within the Environmental Science curriculum. The course will also cover issues of ethics, professional development and career counseling. ENVS senior students will be required to enroll as a peer mentor for one of these six courses. Seniors will work with faculty to help plan and deliver experiential activities and will act as mentors and tutors for first and second year students enrolled in these courses.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 3 times for 6 credits

**Restrictions:** Can enroll if major is ENVS and classification is Senior.

**ENVS 401 Chemistry of the Environment 3.0 Credits**

Covers principles of physical and organic chemistry applicable to the study and evaluation of environmental conditions, especially the pollution of air, water, and soil (including chemical changes and reactions in the environment).

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** CHEM 102 [Min Grade: D] or CHEM 122 [Min Grade: D]

**ENVS 405 Atmospheric Chemistry 3.0 Credits**

Introduces the principles of atmospheric physics and photochemical kinetics as a prelude to understanding the atmospheric chemical system. Examines the chemistry of the natural atmosphere to prepare for the understanding of how pollutants interact with natural species. Considers pollution of the stratosphere and the troposphere.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENVR 401 [Min Grade: D] or ENVS 401 [Min Grade: D]

**ENVS 409 Environmental Surveying and GIS 3.0 Credits**

This course is a field intensive course that gives students hands on training on state-of-the-art surveying gear. Students will learn the principals of surveying used by field ecologists or geoscientists, including types of surveying gear, how to use it in the field, and how to analyze collected data.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ENVS 410 Physiological Ecology 3.0 Credits**

Examines mechanisms by which physiological factors affect and limit the distribution and abundance of animals, including physiological and behavioral thermoregulation, heat and cold tolerance, acclimation, metabolism, osmoregulation and dehydration tolerance, feeding strategies, digestion and feeding patterns, energy and water budgets, toxins and optimality theory.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D] or BIO 141 [Min Grade: D]

**ENVS 412 Biophysical Ecology 3.0 Credits**

Covers energy balances and methods of heat transfer in organisms, including convection, conduction, radiation, evaporation, and metabolism and steady-state and transient energy balances, including mass balances, water uptake and evaporation.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** (MATH 239 [Min Grade: D] or MATH 123 [Min Grade: D]) and (PHYS 153 [Min Grade: D] or PHYS 102 [Min Grade: D])

**ENVS 413 Advanced Population Ecology 3.0 Credits**

One of the greatest issues concerning life on Earth and human impact on the planet is whether species will survive or go extinct. This course explores how wild populations change over time and investigates the concepts and quantitative methods used to determine the viability of plant and animal populations.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENVS 284 [Min Grade: D]

**ENVS 414 Advanced Community Ecology 3.0 Credits**

Community ecology is the study of how populations of organisms interact with each other and the physical environment. Students will investigate the underlying principles that explain and predict interactions among populations of organisms, and how these principles can be used to conserve and manage wild animal and plant communities.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** ENVS 286 [Min Grade: D]

**ENVS 415 Advanced Environmental GIS 3.0 Credits**

This course is structured to build upon techniques and skills learned in an introductory level GIS class. This advanced course is technically oriented and will introduce high-level geospatial analyses in an environmental science context. Provides instruction and theory of geospatial modeling, mapping, and future trends.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENVS 308 [Min Grade: D] or ENVE 455 [Min Grade: D]

**ENVS 417 Stream Assessment 3.0 Credits**

Most stream and river ecosystems are stressed by human activities, and aquatic ecologists are frequently called upon to assess problems, make scientific evaluations and provide management recommendations. A main goal of this course is to provide problem-solving experiences in stream assessment based on example real-world environmental questions. The assessments will provide students opportunities to address issues they may face as ecologists, engineers, managers and policy makers.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D] or BIO 141 [Min Grade: D]

**ENVS 418 Coastal Biogeochemistry 3.0 Credits**

This course covers fundamental biogeochemical and ecological concepts necessary to critically examine influential and current relevant literature.

Topics include eutrophication, hypoxia, ocean acidification, climate change, and greenhouse gas exchange in nearshore coastal waters such as estuaries, coastal rivers and watersheds, mangroves, seagrasses, salt marshes, wetlands, mud and sand flats, and coral reefs. Analytical tools such as stable isotopes, ecosystem models, and process measurements will be used.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 101 [Min Grade: D]

**ENVS 438 Biodiversity 3.0 Credits**

This course explores major patterns of biodiversity that biologists have documented across the planet. The course begins with an overview of major types of biodiversity, focusing on species diversity, and methods for measuring and analyzing biodiversity. Next it explores major patterns of biodiversity that are fundamental to ecology and conservation, and theories for the causes of biodiversity patterns.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** BIO 124 [Min Grade: D] or ENVS 230 [Min Grade: D]

**ENVS 441 [WI] Issues in Global Change I: Seminar 2.0 Credits**

Discusses and evaluates topics such as records of climate change, atmospheric chemistry and global warming, the greenhouse effect, ozone depletion, acid rain, decreased biodiversity, desertification, deforestation, and sea-level rise. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ENSS or major is ENVS or major is GEO and classification is Senior.

**ENVS 442 Issues in Global Change II: Research 2.0 Credits**

Requires students to focus on a particular change topic or issue in order to analyze it, prepare a research report, and present a final seminar.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ENSS or major is ENVS or major is GEO and classification is Senior.

**Prerequisites:** ENVS 441 [Min Grade: D]

**ENVS 443 Issues in Global Change III: Synthesis 2.0 Credits**

The purpose of this course is to provide seniors in Environmental Science and Ecology with an opportunity to make an in-depth examination of the factors causing global change in the 21st century, to analyze their own data as well as that in the literature, to synthesize new ideas and to report orally and in writing on their findings.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is ENSS or major is ENVS or major is GEO and classification is Senior.

**Prerequisites:** ENVS 442 [Min Grade: D]

**ENVS 470 Advanced Topics in Evolution 3.0 Credits**

Discusses and evaluates selected topics such as population and quantitative genetics, genomics in evolutionary analysis, fitness concepts and modes of selection, species concepts and modes of speciation, evolution of development and complex adaptations, biological diversification over space and time, adaptive radiation and extinction, historical biogeography. Topics for each term will be selected based on current research and interest.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 3 times for 12 credits

**Prerequisites:** ENVS 212 [Min Grade: D] or BIO 217 [Min Grade: D]

**ENVS 497 Research 0.5-12.0 Credits**

Provides guided research in ecology, earth science and environmental science.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ENVS I199 Independent Study in ENVS 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ENVS I299 Independent Study in ENVS 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ENVS I399 Independent Study in ENVS 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ENVS I499 Independent Study in ENVS 0.5-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ENVS T180 Special Topics in Environmental Science 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ENVS T280 Special Topics in Environmental Science 0.0-12.0 Credits**

Special topics offered in biodiversity, earth and environmental science.

Topics include recent multidisciplinary areas of environmental concern.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ENVS T380 Special Topics in Environmental Science 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ENVS T480 Special Topics in Environmental Science 0.0-12.0 Credits**

Special topics offered in environmental science. Topics include recent multidisciplinary areas of environmental concern.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

## Environmental Studies & Sustainability

### Courses

**ENSS 120 Introduction to Environmental Studies 3.0 Credits**

This course looks at the many topics that fall under the interdisciplinary focus of environmental studies, such as biodiversity, preservation, conservation, sustainability, deforestation, environmental justice, risk society, treadmill of production, and climate change. Students will be introduced to the ideas, issues and practices linked to these concepts.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ENSS 275 Global Climate Change 3.0 Credits**

This course provides a multidisciplinary introduction to the issue of global climate change. It focuses on the scientific evidence for climate change, its impact on natural and human systems, actions that can be taken to mitigate or adapt to climate change and the political and cultural dynamics of this issue.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ENSS 283 Introduction to Environmental Policy 3.0 Credits**

Introduction to researching environmental laws and regulations, local ordinances, and how to participate in the process. The course will explore the major environmental statutes and the system for policy creation and implementation in the US Government, and the importance of citizen involvement in environmental protections.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ENSS 285 Introduction to Urban Planning 3.0 Credits**

The urban planning profession seeks to improve the arrangement and character of the built environment: the places we live, work, and play. Planners develop strategies and designs to improve communities for the future, balancing citizen, political, financial, and environmental interests. This practice-focused course will introduce the many types of work planners do, and many local professionals who do it.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**ENSS 326 Cities and Sustainability 3.0 Credits**

This course will provide an overview of the issue of sustainability planning and policy for cities. Topics include how we define sustainability for cities, and how we measure its progress and impacts. The course will also cover how land reuse planning impacts the development of green space, including parks, gardens and urban agriculture, as well as green building, the green economy and the impact of sustainability planning on public health outcomes.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ENSS 341 Environmental Movements in America 4.0 Credits**

Focuses on key collective actors and institutions that are involved in the creation of U.S. environmental policies, including historical and cultural processes of change involving social movements, environmental advocacy organizations, foundations, and the media.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ENSS 345 Sociology of the Environment 4.0 Credits**

Examines acts of nature vs. acts of man, food and health, environmental politics, social movements and environmental issues, environmental and development policies, and environmental and global change.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ENSS 346 Environmental Justice 4.0 Credits**

Focuses on the political economy of environmental injustice and the impact of social movements addressing it; impact of chemical pollutants on human health; and the scientific and legal issues surrounding the study and regulation of pollutants.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**ENSS 348 Delaware River Issues and Policy 3.0 Credits**

This course will examine the various elements of watershed management including the governance structure of the Delaware Basin, what science can and cannot tell us, how policies may differ by state, how toxic pollutants are managed and impacts of climate change. Also addressed are how various species are protected and the challenges of maintaining the natural world in a densely populated watershed.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Pre-Junior or Senior.

**ENSS I199 Independent Study in ENSS 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ENSS I299 Independent Study in ENSS 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ENSS I399 Independent Study in ENSS 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ENSS I499 Independent Study in ENSS 1.0-12.0 Credit**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ENSS T180 Special Topics in Environmental Studies & Sustainability 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ENSS T280 Special Topics in Environmental Studies & Sustainability 1.0-12.0 Credit**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ENSS T380 Special Topics in Environmental Studies & Sustainability 1.0-12.0 Credit**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**ENSS T480 Special Topics in Environ Stu & Sustainability 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

## Fashion Design

### Courses

**FASH 201 Survey of the Fashion Industry 0.0-3.0 Credits**

Introduces the materials and methods used to design, develop, and market the fashion product, including current vocabulary and foundation of knowledge about industry practices and career opportunities.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FASH 211 Fashion Drawing I 3.0 Credits**

Examines the fashion figure, fabrication, and conceptual design through the use of black, white, and gray media. Includes classroom drawing from a live model and weekly critiques.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** VSST 111 [Min Grade: D]

**FASH 212 Fashion Drawing II 3.0 Credits**

Examines fashion forms, fabrication, and conceptual design through the use of color and mixed media. Works toward the development of a personal "fashion look" and an understanding of drawing as it relates to the fashion industry. Includes live model.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** FASH 211 [Min Grade: D]

**FASH 230 Textiles for Fashion Design 3.0 Credits**

Examines the textile manufacturing industry and the fundamental processes involved in producing fabrics made of natural or manufactured fibers. Includes basic textile terminology and production processes as well as selection and evaluation of fabrics based on aesthetics, performance and care characteristics.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is FASH.

**FASH 241 Construction Skills 0.0-4.0 Credits**

Develops a proficiency in basic garment construction. Emphasizes facility with industrial equipment. Introduces production techniques and an overall awareness of standards of quality.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FASH 310 Presentation Techniques 3.0 Credits**

Introduces the presentation techniques and skills used for communication in the fashion industry.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (VSST 102 [Min Grade: D] or VSST 105 [Min Grade: D]) and FASH 201 [Min Grade: D]

**FASH 311 Textile Design 3.0 Credits**

Instructs the student in both traditional and digital techniques of textile design. Investigates layout, repeats, and coordinated fabric groups.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** VSST 102 [Min Grade: D] or VSST 105 [Min Grade: D]

**FASH 313 Fashion Drawing for Industry 3.0 Credits**

Covers sketching and specification drawing for the professional designer. Emphasizes communicating with manufacturers, pattern-makers, and assistants, regarding, garment construction, detailing, and fabrication.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** FASH 210 [Min Grade: D]

**FASH 314 Fashion Presentation Drawing 3.0 Credits**

Requires the creation of a portfolio of original designs executed in a medium of choice. Explores various market segments of the industry and includes project reviews by critics who are specialists in these areas.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**FASH 315 Computer Aided Design for Patternmaking 0.0-3.0 Credits**

Develops skills in patternmaking, markermaking, and grading, using the computer as a tool.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** FASH 342 [Min Grade: D]

**FASH 316 Computer Aided Design for Fashion Design 0.0-3.0 Credits**

Explores the use of computers in the fashion industry and develops presentation skills using industrial and commercial software.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** FASH 313 [Min Grade: D]

**FASH 317 Technical Design 3.0 Credits**

Technical Design is crucial in managing technical information internally and externally within a fashion design company. The student is trained in the essential skills of creating technical packages using data programs and sketching, conducting fittings, maintaining specs, and grading patterns and how to communicate information efficiently in a global fashion industry.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is FASH.

Cannot enroll if classification is Freshman or Pre-Junior or Sophomore

**Prerequisites:** FASH 342 [Min Grade: D]

**FASH 341 Flat Pattern Design 0.0-4.0 Credits**

Explores basic patternmaking techniques and manipulations and establishes comparisons between drafting and draping techniques in the development of standard slopers.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FASH 241 [Min Grade: D]

**FASH 342 Draping Design 0.0-4.0 Credits**

Covers garment development by the draping method. Advances skills of FASH 341.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** FASH 341 [Min Grade: D]

**FASH 343 Tailoring 4.0 Credits**

Provides intensive investigation of materials and construction techniques used in tailoring. Uses a combination of garment production methods, including a strong emphasis on couture practices.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** FASH 342 [Min Grade: D]

**FASH 349 Fashion Design I 4.0 Credits**

Poses fashion problems to be solved, with an emphasis on elements of design. Explores use of half-scale experimentation and development of "studies" as an aid in developing design ideas.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** VSST 204 [Min Grade: D] or VSST 304 [Min Grade: D]

**FASH 350 Fashion Design II 4.0 Credits**

Explores sources of inspiration and requires students to translate and develop source material into creative garments. Stresses the extension and elaboration of ideas within a specific market.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FASH 251 [Min Grade: D] or FASH 349 [Min Grade: D]

**FASH 351 Fashion Design III 0.0-4.0 Credits**

Requires development of original designs and execution incorporating draping, drafting, and flat-pattern techniques. Facilitates the development of a realistic approach to garment design in terms of industrial restrictions, and market segmentations. Includes professional critiques.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** (FASH 252 [Min Grade: D] and FASH 343 [Min Grade: D])

**FASH 352 Fashion Design IV 0.0-4.0 Credits**

Expands and broadens technical skills and lays the groundwork for development of the senior collection. Includes couture evening wear techniques and research processes.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** FASH 351 [Min Grade: D]

**FASH 399 Independent Study in Fashion Design 0.5-12.0 Credits**

Provides individualized study in fashion design in a specialized area of study. May be repeated for credit. Department permission required.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**FASH 433 Couture Techniques 3.0 Credits**

Expands and broadens technical skills and lays the groundwork for development of the senior collection. Includes couture evening wear techniques and research processes.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FASH 351 [Min Grade: D]

**FASH 450 Machine Knitting 3.0 Credits**

Machine Knitting is an introduction to knitwear design specialization.

Students learn to style and draw knit garments to develop a professional portfolio. Technical information regarding yarn analysis, stitch construction, pattern and garment construction are the focus of this class.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 3 times for 9 credits

**Restrictions:** Can enroll if major is FASH.

**Prerequisites:** FASH 241 [Min Grade: D] and VSST 112 [Min Grade: D]

**FASH 451 Accessory Design 3.0 Credits**

This course provides students with concepts and skills to design traditional and contemporary fashion accessories with emphasis in embroidery; applique; hand painting; and clay, plastic and ceramic work.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FASH 241 [Min Grade: D]

**FASH 452 Millinery Design 3.0 Credits**

Familiarizes students with the techniques and processes involved in hat making. Emphasis will be placed on historical perspectives and materials.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FASH 241 [Min Grade: D]

**FASH 453 Intimate Apparel Design 3.0 Credits**

This course will offer an introduction to the foundations and sleepwear marketplace. Primary focus will be on the design and execution of two pieces for this market. Students will learn how to construct a bra (molded cups) and how to incorporate these details into their final looks for this market. In addition, students will learn the safe operation of the specialty sewing machines for knit construction.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FASH 251 [Min Grade: D]

**FASH 464 Professional Portfolio 3.0 Credits**

This course will involve preparation and execution of a finished designer portfolio for couture, 7th Avenue or the boutique American market.

Included in the preparation is research of their chosen entry into the market via history, visuals and customer profile.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is FASH and classification is Senior.

**Prerequisites:** FASH 314 [Min Grade: D]

**FASH 466 Business of Fashion 3.0 Credits**

Presents the following topics in seminar fashion merchandising, retail distribution, interpreting consumer demand, merchandise assortment planning, unit and inventory control and pricing, fashion marketing and manufacturing, including the marketing process, components of the fashion industry, market evaluation, demographic and psychological factors, manufacturing components and processes, and case studies.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is FASH and classification is Senior.

**FASH 467 Style and the Media 3.0 Credits**

Fashion Journalism is reading and writing about all aspects of fashion, including reporting, criticism and commentary about photography related to fashion published in newspapers or magazines, displayed on websites, aired on radio and/or TV. The style of the writers and also the aspects of dress they found significant is examined.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FASH 491 Collection I 4.0 Credits**

The second of a three-part series in which the student develops the senior collection. Requires the student to demonstrate the synthesis of a personal aesthetic and technical acumen.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** FASH 352 [Min Grade: D]

**FASH 492 Collection II 3.0 Credits**

Requires completion of senior collection and presentation in student fashion show.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** FASH 491 [Min Grade: D]

**FASH I199 Independent Study in Fashion Design 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FASH I299 Independent Study in Fashion Design 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FASH I399 Independent Study in Fashion Design 0.5-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FASH I499 Independent Study in Fashion Design 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FASH T180 Special Topics in Fashion Design 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FASH T280 Special Topics in Fashion Design 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FASH T380 Special Topics in Fashion Design 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FASH T480 Special Topics in Fashion Design 0.5-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

## Film & TV Production

### Courses

**FMTV 100 Visual Storytelling 3.0 Credits**

This course explores a variety of techniques and principles used to tell stories visually. We will begin by asking, "What is a story and how might we differentiate a story told in images and sounds from one told in writing?" We will then investigate how techniques of cinematography, editing, and mise-en-scène contribute to the exposition of a story and to the articulations of its meaning.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMTV 110 Basic Cinematography 3.0 Credits**

An introduction to the basics of photography and lighting for film and video production through demonstrations, lectures, screenings and hands-on use of digital video and still cameras and lighting equipment.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMTV 115 Basic Editing 3.0 Credits**

Theoretical and practical principles of editing using a computer-controlled and post-production system utilizing sync sound film and video material.

This class is a hands-on workshop. Screenings of excerpts from feature and short films are used to demonstrate editorial concepts.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMTV 120 Basic Sound 3.0 Credits**

A thorough analysis of sound theory and practical applications to give students the tools to understand how sound can be successfully recorded, edited, sweetened and re-recorded (mixed) for film and video.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMTV 130 Basic TV Studio 3.0 Credits**

This course will focus on developing operational skills for all studio production facilities including camera operations and composition, microphones and audio mixers, basic lighting, teleprompter, video switcher and graphics playback.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMTV 185 TV Industry 3.0 Credits**

The course is designed to provide an overview of the organizational structures and business models utilized by current television content and distribution companies. In addition to looking at the basic structure of an organization, the course will also examine the often delicate, unusual and sometimes combative inter-relationship of company divisions, competitors, advertisers and audiences. We will profile the top media companies and the industry leaders/entrepreneurs that have shaped the medium thus far and into the future. Each class will begin with a discussion of current industry.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMTV 200 Voice & Style 3.0 Credits**

This is a workshop course designed to help students develop their individual voices and styles as storytellers through in-class exercises and studying the work of other filmmakers.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMTV 110 [Min Grade: D] or FMVD 110 [Min Grade: D]

**FMTV 201 Portfolio Prep 1.0 Credit**

Students will organize and reflect on materials in preparation for their Year II portfolio crits.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Sophomore.

**FMTV 210 Intermediate Cinematography 3.0 Credits**

This course provides advanced focus in cinematic concepts and techniques and their use in filmmaking. We will study and understand the qualities of light and how it affects images, and strengthen our knowledge of lens physics. We will learn to choose the appropriate lens for any given shot. We will learn how to use a light meter and other tools to correctly expose shots. Assigned projects will provide opportunities to harness all this technical knowledge in the service of creativity.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (FMTV 110 [Min Grade: D] or FMVD 110 [Min Grade: D]) and (FMTV 115 [Min Grade: D] or FMVD 115 [Min Grade: D]) and (FMTV 120 [Min Grade: D] or FMVD 120 [Min Grade: D])

**FMTV 211 Intermediate Lighting 3.0 Credits**

This course emphasizes learning to model figures and shape scenery with light for film and video production. We will cover methods of creating mood and atmosphere through light appropriate to the story of a particular film or program.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMTV 110 [Min Grade: D] or FMVD 110 [Min Grade: D]

**FMTV 215 Intermediate Editing 3.0 Credits**

This course will build upon Adobe Premiere and Avid editing principles taught in FMTV 115, with increased emphasis on editing aesthetics.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (FMTV 110 [Min Grade: D] or FMVD 110 [Min Grade: D]) and (FMTV 115 [Min Grade: D] or FMVD 115 [Min Grade: D]) and (FMTV 120 [Min Grade: D] or FMVD 120 [Min Grade: D])

**FMTV 220 Intermediate Sound 3.0 Credits**

This course is designed to build upon the audio production recording skills achieved in FMTV 120: Basic Sound. Students will learn how to operate advanced industry standard field recorders and mix sound for multiple set microphones, including wireless microphones, and will become adept at troubleshooting potential film production audio issues.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMTV 120 [Min Grade: D] or FMVD 120 [Min Grade: D]

**FMTV 230 Intermediate TV Studio 3.0 Credits**

This course is an Introduction to directing live and taped multi-camera television productions in a studio setting. The emphasis will be on developing solid, basic directing technique that will be built upon in subsequent additional courses. Additionally, the basics of producing live TV programming will be discussed.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMTV 130 [Min Grade: D] or TVPR 100 [Min Grade: D]

**FMTV 240 Narrative Film 3.0 Credits**

This course is designed to build upon the skills learned in Basic Cinematography (FMTV 110), Basic Sound (FMTV 120), and Basic Editing (FMTV 115) introducing additional production and post methodologies. Increased emphasis is placed upon the ability of the student to use the resources of the medium in a professional manner.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (FMTV 270 [Min Grade: D] or FMVD 202 [Min Grade: D]) and SCRP 280 [Min Grade: D]

**FMTV 245 Microbudget Film 3.0 Credits**

This course examines alternative production models that free filmmakers to take creative risk and work outside of traditional structures. Course includes screenings, workshops, and the making of a short film.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMTV 240 [Min Grade: D] or FMVD 215 [Min Grade: D]

**FMTV 250 Documentary Film 3.0 Credits**

Builds on the knowledge of cinematic language and basic production technique learned in FMTV 110. Students become familiar with documentary shooting and editing strategies and produce final documentary projects.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (FMTV 110 [Min Grade: D] or FMVD 110 [Min Grade: D]) and (FMTV 115 [Min Grade: D] or FMVD 115 [Min Grade: D]) and (FMTV 120 [Min Grade: D] or FMVD 120 [Min Grade: D])

**FMTV 260 Experimental Film 3.0 Credits**

This course explores experimental theses and techniques in film. Self-discovery, working through a process, and developing varied strategies are part of each student's journey that culminates in a finished experimental film.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**Prerequisites:** (FMTV 110 [Min Grade: D] or FMVD 110 [Min Grade: D]) and (FMTV 115 [Min Grade: D] or FMVD 115 [Min Grade: D]) and (FMTV 120 [Min Grade: D] or FMVD 120 [Min Grade: D])

**FMTV 265 Commercials and Promos 3.0 Credits**

Students analyze and produce a wide variety of commercials and promos. Fundamental concepts of brand marketing are presented and utilized in the production of student's own script-to-screen commercials and promos. This history of commercials, both in the United States and worldwide, is also studied.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**Prerequisites:** (FMTV 110 [Min Grade: D] or FMVD 110 [Min Grade: D]) and (FMTV 115 [Min Grade: D] or FMVD 115 [Min Grade: D]) and (FMTV 120 [Min Grade: D] or FMVD 120 [Min Grade: D])

**FMTV 270 Basic Directing 3.0 Credits**

This course provides students with an understanding of the role of a film director. Students focus on the development of comprehensive skills for directing technical personnel, exposure to directing styles, communicating with actors and cinematic choices.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman  
**Prerequisites:** (FMTV 110 [Min Grade: D] or FMVD 110 [Min Grade: D]) and (FMTV 115 [Min Grade: D] or FMVD 115 [Min Grade: D]) and (FMTV 120 [Min Grade: D] or FMVD 120 [Min Grade: D])

**FMTV 275 Intermediate Directing 3.0 Credits**

This course gives students instruction and experience in producing, interpreting, staging, directing, shooting, and live-cutting scenes in a studio. Students will experience the challenges of managing a cast and crew while simultaneously dealing with the kind of time, resource, and creative challenges that exist in the professional world.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**Prerequisites:** (FMTV 270 [Min Grade: D] or FMVD 202 [Min Grade: D]) and (FMTV 230 [Min Grade: D] or TVPR 200 [Min Grade: D])

**FMTV 280 Basic Producing 3.0 Credits**

This course covers essential aspects of producing including script breakdowns, budgeting, scheduling, running a production, and guiding a film through post.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**FMTV 285 Media Law and Ethics 3.0 Credits**

This course is an introduction to the areas of the law, current legal issues and practical legal understandings relevant to the media industry as viewed through the day-to-day professional experience of the senior media executive and/or any individual working the industry.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**Prerequisites:** (FMTV 185 [Min Grade: D] or TVIE 180 [Min Grade: D]) and EAM 130 [Min Grade: D]

**FMTV 291 Film & TV Internship 0.5-3.0 Credits**

Students work part-time for local companies to gain professional experience.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**FMTV 340 Production Workshop 3.0 Credits**

The Workshop is designed to provide advanced students with the skills, time and manpower necessary to successfully complete a larger fictional project. It offers students the experience of working with a group of people to create a collaborative vision.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMTV 240 [Min Grade: D] or FMVD 215 [Min Grade: D]

**FMTV 345 TV Series I 3.0 Credits**

Students start with scripts for multiple episodes written in SCRIP 353. They do all pre-production including casting, location scouting, budgeting, scheduling, and production design. They then shoot every page of script, getting all the coverage needed to produce finished episodes for DUTV.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** (FMTV 110 [Min Grade: D] or FMVD 110 [Min Grade: D]) and (FMTV 115 [Min Grade: D] or FMVD 115 [Min Grade: D]) and (FMTV 120 [Min Grade: D] or FMVD 120 [Min Grade: D])

**FMTV 346 TV Series II 3.0 Credits**

Continued exploration of production techniques hones FMTV 345 TV Series I. Students start with scripts for multiple episodes written in SCRIP 353. They do all pre-production including casting, location scouting, budgeting, scheduling, and production design. They then shoot every page of script, getting all the coverage needed to produce finished episodes for DUTV.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** (FMTV 110 [Min Grade: D] or FMVD 110 [Min Grade: D]) and (FMTV 115 [Min Grade: D] or FMVD 115 [Min Grade: D]) and (FMTV 120 [Min Grade: D] or FMVD 120 [Min Grade: D])

**FMTV 355 DNews 3.0 Credits**

This course teaches the basics of producing and writing news segments for magazine shows on broadcast and cable, and provides opportunities to hone those skills by realizing, developing, writing and producing multiple stories for DNEWS.

**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Can be repeated 2 times for 9 credits

**FMTV 401 Creative Careers 3.0 Credits**

The course is a mix of lecture, guest visits, and presentation of work. All students work on a common foundation of assets that can be shared with potential employers or collaborators. Emphasis is on taking concrete steps toward post-grad careers as active filmmakers.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**Prerequisites:** FMTV 340 [Min Grade: D] or FMVD 322 [Min Grade: D]

**FMTV 415 TV Series Editing 3.0 Credits**

This course is intended to emulate as closely as possible the experience of editing a prime-time network television series.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 2 times for 9 credits

**Prerequisites:** FMTV 215 [Min Grade: D] or FMVD 237 [Min Grade: D]

**FMTV 495 Senior Project 3.0 Credits**

The student plans and produces a long-term project during the senior year with faculty supervision. The project is expected to integrate the academic and practical knowledge the student has acquired in the area of film and TV.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 3 times for 12 credits

**Restrictions:** Can enroll if classification is Junior or Senior.

**Prerequisites:** FMTV 340 [Min Grade: D] or FMVD 322 [Min Grade: D]

**FMTV I199 Independent Study in Film & TV 0.5-6.0 Credits**

This course permits students to independently produce a project outside of coursework.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FMTV I299 Independent Study in Film & TV 0.5-6.0 Credits**

This course permits students to independently produce a project outside of coursework.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FMTV I399 Independent Study in Film & TV 0.5-6.0 Credits**

This course permits students to independently produce a project outside of coursework.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FMTV I499 Independent Study in Film & TV 0.5-6.0 Credits**

This course permits students to independently produce a project outside of coursework.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FMTV T180 Special Topics in Film & TV 0.5-3.0 Credits**

An in-depth exploration of subjects not currently covered in the required curriculum.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FMTV T280 Special Topics in Film & TV 0.5-3.0 Credits**

An in-depth exploration of subjects not currently covered in the required curriculum.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FMTV T380 Special Topics in Film & TV 0.5-3.0 Credits**

An in-depth exploration of subjects not currently covered in the required curriculum.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FMTV T480 Special Topics in Film & TV 0.5-3.0 Credits**

An in-depth exploration of subjects not currently covered in the required curriculum.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

## Film & Video

### Courses

**FMVD 110 Basic Shooting and Lighting 3.0 Credits**

An introduction to the basics of shooting and lighting for film and video production through demonstrations, lectures, screenings and hands-on use of digital video and still cameras and lighting equipment.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMVD 115 Basic Editing 3.0 Credits**

Theoretical and practical principles of editing using a computer-controlled and post-production system utilizing sync sound film and video material.

This class is a hands-on workshop. Screenings of excerpts from feature and short films are used to demonstrate editorial concepts.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMVD 120 Basic Sound 3.0 Credits**

A thorough analysis of sound theory and practical applications to give students the tools to understand how sound can be successfully recorded, edited, sweetened and re-recorded (mixed) for film and video.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMVD 200 Acting for the Screen 3.0 Credits**

This course examines the issues and techniques specific to acting for the camera. Through weekly workshops students address the limitations and relationships actors face in performing for the camera. The class explores various acting styles and schools of thought and involves extensive scene study and performance in a video setting.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMVD 202 Directing for the Screen 3.0 Credits**

This course provides students with an understanding of the role of a director in film and television. Students focus on the development of comprehensive skills for directing technical personnel, exposure to directing styles, communicating with actors and cinematic choices.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D]

**FMVD 206 Audio Production and Post 3.0 Credits**

This course is an introduction to the creation and manipulation, of digital audio files. It is geared towards the Digital Media student, with respect to applying soundtrack elements to their images. Topics will include recording dialog, location sound recording, sound effects design, music editing, and multi-track mixing.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMVD 207 Location Sound Recording 3.0 Credits**

This course will focus on training students to record quality sound for films in any location.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D]

**FMVD 210 Documentary Video Production 3.0 Credits**

Builds on the knowledge of cinematic language and basic production technique learned in FMVD 110. Students become familiar with documentary shooting and editing strategies and produce final documentary projects.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** FMVD 110 [Min Grade: D]

**FMVD 215 Narrative Video Production 3.0 Credits**

This course applies the basic skills learned in Screenwriting, Shooting and Lighting, Sound, Editing and Directing towards the creation of a fictional narrative film with increased emphasis on intermediate production and post-production technologies.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D] and FMVD 202 [Min Grade: D] and SCRP 280 [Min Grade: D]

**FMVD 218 Intermediate Cinematography 3.0 Credits**

This course provides advanced focus in cinematic concepts and techniques and their use in electronic filmmaking.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D]

**FMVD 220 Experimental Video Production 3.0 Credits**

This course explores experimental theses and techniques in video.

Self discovery, working through a process, and developing varied strategies are part of each student's journey that culminates in a finished experimental film.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D]

**FMVD 226 Intermediate Sound 3.0 Credits**

This course is designed to build upon the audio production recording skills achieved in FMVD 120-Basic Sound. Students will learn how to operate advanced industry standard field recorders and mix sound for multiple set microphones, including wireless microphones, and will become adept at troubleshooting potential film production audio issues.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMVD 120 [Min Grade: D]

**FMVD 228 Visual Storytelling 3.0 Credits**

This course explores a variety of techniques and principles that are used to tell a visual story. It asks how we might differentiate a story told in images and sounds from one told in writing and investigates how techniques of cinematography, editing, and mise-en-scène contribute to the exposition of a story and to the articulations of its meaning.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is FMVD.

**Prerequisites:** FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D]

**FMVD 232 Film Action Choreography 3.0 Credits**

In this course, a variety of different types of action scenes ranging from fistfights to car chases will be studied. Through screenings of successful action scenes and shot by shot analysis the student will learn the importance of camera placement and ample coverage. Through the combination of screenings and hands on action arrangement the student will gain an understanding of what is involved in a successful action sequence and have to skills to execute them.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D]

**FMVD 234 Legal Basics for Filmmakers 3.0 Credits**

This course is designed to provide students with knowledge of basic business and legal issues in the film industry, and to develop a working understanding of intellectual property, contracts and other issues which apply to filmmaking, to assist the student in understanding the legal issues related to creative works.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMVD 235 Intermediate Lighting 3.0 Credits**

Emphasizes learning to model figures and shape scenery with light for film and video production. Covers methods of creating mood and atmosphere through light appropriate to the story of a particular film or video.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** FMVD 110 [Min Grade: D]

**FMVD 237 Intermediate Editing 3.0 Credits**

This course will build upon Adobe Premiere and Avid editing principles taught in FMVD 115-Basic Editing, with increased emphasis on editing aesthetics.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D]

**FMVD 242 Film Production Design 3.0 Credits**

This course is designed to instruct in the techniques and methods of designing a set for film and television.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMVD 286 Producing for Features 3.0 Credits**

Producing will cover all aspects associated with producing a feature film in both the Hollywood and Independent arenas.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMVD 291 Film and Video Internship 0.5-3.0 Credits**

The student does a non-paying internship in the field of film and video for academic credit, working a minimum of 100 hours in a 10-week term for 3 credits. The student provides an initial informational sheet on the internship and submits a final paper on the experience. May be repeated for credit. The first time the course may be taken for 3 credits. After that, the course may be repeated, but for 1 credit each time. Department permission required.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Can enroll if major is FMVD.

**FMVD 305 Special Effects Make-up 3.0 Credits**

Introduction to the materials and techniques used in the creation of a character or special effects make-up for film and video. Through demonstrations and hands-on projects, students learn the basics of cosmetic application and more specialized techniques.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMVD 306 Micro-budget Filmmaking 3.0 Credits**

This course will prepare students to make quality films on very small budgets. We will look at how aspiring filmmakers can survive in the world after college without access to an equipment office and readily available crews. Students will examine the early work of contemporary filmmakers and apply these lessons to a 5 - 8 minute short film.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**FMVD 307 Cutting Trailers 3.0 Credits**

View, analyze and produce theoretical trailers and promos, as well as study the marketing methods that drive these productions. The history of trailers will also be studied.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMVD 237 [Min Grade: D]

**FMVD 310 Camera Operators Workshop 3.0 Credits**

A hands-on introduction to the role of the camera operator in filmmaking.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is FMVD.

**Prerequisites:** FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D] and FMVD 218 [Min Grade: D]

**FMVD 315 Audio Post Production 3.0 Credits**

Sound Post-Production is a workshop that allows students to thoroughly focus on the audio portion of editing. In this course, the individual components of sound design are presented and students in order to understand how all the components work together to form a solid soundtrack.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D]

**FMVD 316 Post Color Correction 3.0 Credits**

This course is designed to introduce students to the aesthetic and technical techniques of color grading using Blackmagic Design's DaVinci Resolve. Color Grading requires students to grasp the concepts of video scopes, color theory, and the glossary of colorist terms.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMVD 237 [Min Grade: D]

**FMVD 317 Directing the Score 3.0 Credits**

This course will provide the filmmaker student with the communication tools to direct a film score composer.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D]

**FMVD 320 Steadicam Workshop 3.0 Credits**

A hands-on introduction to the use of the Steadicam as a creative production tool. The course will cover basic theory, set-up, and operation of the Steadicam with various cameras.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMVD 310 [Min Grade: D]

**FMVD 322 Production Workshop I 3.0 Credits**

The first of a two-course sequence in which students produce a larger scale film, in terms of crew size, production value and story.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** FMVD 215 [Min Grade: D]

**FMVD 323 Production Workshop II 3.0 Credits**

The second of a two-course sequence in which students produce a film or video project.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** FMVD 322 [Min Grade: D]

**FMVD 324 Visual Effects for Film Editors 3.0 Credits**

This course will introduce students to commonly used techniques in visual effects using Adobe After Effects. Students will learn workflow between After Effects and both Premiere and Avid editing systems, as well as integration with Photoshop and Illustrator.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMVD 237 [Min Grade: D]

**FMVD 325 Stop Motion Animation 3.0 Credits**

This course will explore the technique and expressive possibilities of traditional Stop Motion Animation. Students will learn to shoot objects or models one frame at a time to create the illusion of movement and life.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D]

**FMVD 327 Advanced Lighting 3.0 Credits**

This course expands upon lighting techniques taught in FMVD 235, Basic Lighting.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMVD 235 [Min Grade: D]

**FMVD 328 New Technologies in Film 3.0 Credits**

This is a hands-on course that instructs in the use of emerging technologies in the film industry.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is FMVD or major is TELE.

**Prerequisites:** FMVD 310 [Min Grade: B]

**FMVD 341 Creating Credits and Opticals 3.0 Credits**

This course is designed to present a "real world" introduction to creating open and close title sequences for film and television.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMVD 237 [Min Grade: D]

**FMVD 399 Independent Project in Film and Video 0.5-12.0 Credits**

Students plan and produce a project in the area of film and video with faculty supervision. May be repeated for credit. Department permission required.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Can enroll if major is FMVD.

Cannot enroll if classification is Freshman

**FMVD 400 Advanced Directing 3.0 Credits**

This hands-on class explores the communication between actors and directors in the film industry. In a workshop setting, using professional actors, students work on scenes rotating as directors.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMVD 202 [Min Grade: D]

**FMVD 401 Creative Careers 3.0 Credits**

The course will be a mix of lecture, guest visits, and presentation of work. All students will work on a common foundation of assets that can be shared with potential employers or collaborators. Emphasis will be on taking concrete steps toward post-grad careers as active filmmakers.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is FMVD and classification is Senior.

**Prerequisites:** FMVD 323 [Min Grade: D]

**FMVD 410 Running a Production Company 3.0 Credits**

This course explores the practical implications of starting and running a small media production business. Emphasis will be placed on the nuts and bolts of bookkeeping, marketing, sales, strategic planning and tax compliance. Students will create a personal business plan and create marketing material promoting their business.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**FMVD 415 Advanced Editing 3.0 Credits**

This course builds upon the intermediate skills taught in FMVD 237-Intermediate Editing. Students advance towards editing larger scale productions, address challenges to specific types of projects, and explore advanced techniques.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is FMVD and classification is Senior.

**Prerequisites:** FMVD 237 [Min Grade: B]

**FMVD 430 Advanced Cinematography 3.0 Credits**

This course provides students with exposure to the principles of advanced cinematography and videography both in theory and practical experiences.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMVD 230 [Min Grade: D]

**FMVD 490 Directed Studies in Film and Video 0.5-12.0 Credits**

Students undertake specified studies in the field of film and video with faculty supervision. May be repeated for credit. Department permission required.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

**FMVD 495 Senior Project in Film and Video 3.0 Credits**

The student plans and produces a long-term project during the senior year with faculty supervision. The project is expected to integrate the academic and practical knowledge the student has acquired in the area of film and video.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated 3 times for 9 credits

**Restrictions:** Can enroll if major is FMVD and classification is Junior or Senior.

**Prerequisites:** FMVD 323 [Min Grade: D]

**FMVD I199 Independent Study in Film & Video 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FMVD I299 Independent Study in Film & Video 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FMVD I399 Independent Study in Film & Video 0.5-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FMVD I499 Independent Study in Film & Video 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FMVD T180 Special Topics in Game Film & Video 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FMVD T280 Special Topics in Game Film & Video 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FMVD T380 Special Topics in Game Film & Video 3.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FMVD T480 Special Topics in Game Film & Video 3.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

# Film Studies

## Courses

**FMST 101 Film History I: Emergence 3.0 Credits**

This course covers the emergence and evolution of film narrative in the first half of the 20th Century, as well as the core concepts of film analysis that help us understand this process. We will focus on the artistic and institutional factors contributing to the rise and decline of Classical Hollywood Cinema.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 102 Film History II: New Waves 3.0 Credits**

This course investigates the liberation of film aesthetics in the latter half of the 20th Century, and how filmmakers of this era redefined their medium. Particular emphasis is placed on the "new waves" of filmmaking in Western Europe and the "New Hollywood" revolution that soon followed.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMST 101 [Min Grade: D]

**FMST 103 Film History III: Trends 3.0 Credits**

This course explores recent trends in domestic and international cinema, including the independent and multi-national filmmaking movements and ideologies that flourished around the turn of the 21st Century, as well as current developments in mainstream Hollywood cinema.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMST 102 [Min Grade: D]

**FMST 105 Film History & Theory I 3.0 Credits**

This course covers the emergence and evolution of film narrative in the first half of the 20th Century, as well as the core concepts of film analysis that help us understand this process. The focus will be on the artistic and institutional factors contributing to the rise and decline of Classical Hollywood Cinema as well as the major theories regarding film form.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 150 American Classic Cinema 3.0 Credits**

This course explores the richness and variety of American Classic Cinema while instructing in the basic principles of cinematic storytelling.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 160 European Cinema 3.0 Credits**

This course surveys European Cinema from the period immediately after World War I to the present and looks at the work of several different directors whose work is representative of some of the dominant trends that have influenced western cinema.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 204 Film Voice and Style 3.0 Credits**

Imitation is the sincerest form of flattery; however, filmmakers also must develop their own unique voice and style. In this course students will undertake an in-depth study of a particular filmmaker, style, genre, or movement and submit a paper, film or project that will be the summation of their research.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 205 Film History & Theory II 3.0 Credits**

In this course, we will discuss the rise of Italian Neo-Realism, the French New Wave, and the so-called "Art House" film movements that contributed to the dramatic liberation of film aesthetics in the latter half of the 20th-century and to the rise of the "New Hollywood" revolution of the late sixties and seventies. We will continue looking at key works through the lens of film theory.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMST 105 [Min Grade: D] or FMST 101 [Min Grade: D]

**FMST 245 Non-Western Cinema 3.0 Credits**

This is a survey of what has come to be considered World Cinema that originated outside of Europe and the United States. This course examines films that are great works of cinema that express the culture from which they spring as well as the unique artistic sensibilities and idea of their directors.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 250 The Documentary Tradition 3.0 Credits**

Involves intensive study of major documentary film and video works. Covers topics including propaganda, documentary's relationship to social reality, documentary aesthetics, and the problem of "truth" in documentary.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 255 Hitchcock 3.0 Credits**

A study of Hitchcock's use of cinematic techniques to tell complex, provocative stories.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 260 The Western 3.0 Credits**

Explores the genre of the classic American Western. Students analyze a selection of Westerns to acquire an understanding of the human and cinematic values they embody.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 262 Film Comedy 3.0 Credits**

Examines a broad selection of film comedies in search of principles that underlie successful film comedy.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 264 Russian Cinema 3.0 Credits**

This course is an overview of Russian cinema of the 20th century.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 266 The Cinematographer's Art 3.0 Credits**

This course examines the craft and style of some of the greatest feature film cinematographers.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 270 Controversial Films 3.0 Credits**

This course examines some particularly controversial intersections of art and life in the cinema. It explores a variety of films that either addressed or incited controversies and discusses controversial topics surrounding race, ethnicity, religion, sexuality and politics as depicted in film.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 271 Sex in Film: Beyond Hollywood's Gaze 3.0 Credits**

This course considers the history of the representation of sexuality in cinema. It looks especially at the international art films that brought a new sexual sophistication to the narrative film; the brief era of "porno chic" when American pornography seemed poised to challenge Hollywood; and the inner workings of the adult film industry. Finally, this course is also a critical study of the relations between narrative eroticism and forms of human expression.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 272 War Films 3.0 Credits**

In this course, we will examine the cinematic representation and meaning of warfare as they pertain to the major epochs of warfare from WWII to the present.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 275 Breakthroughs of Contemporary Film Directors 3.0 Credits**

This course looks at the breakthrough films that "made" the careers of their directors by setting them on a course of institutional and popular recognition. We will analyze the content and form of these films, the various social, economic, and historical forces that led to their creation, as well as the particular technical components and innovations that established these directors and their styles.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 276 Great Years in Cinema: 1999 3.0 Credits**

1999 proved to be one of the greatest years in cinematic history in terms of the quality of films, the popular and critical acclaim of those films and the influence that these films would have in the years that followed. This course will examine and analyze the factors that likely contributed to the high volume of quality films released that year.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 290 Hollywoodland I 3.0 Credits**

This course examines the history, culture and mythology of Hollywood through ten films, ranging from the silent era to the present, which the entertainment industry has made about itself. Topics to be covered include the growth of Los Angeles as a city, perceptions of stars and producers, the coming of sound in 1927 and the intersection of entertainment and politics. Films to be shown include "A Star is Born," "Sunset Boulevard," "The Front," "A Face in the Crowd," and other lesser-known works. Readings: "What Makes Sammy Run?," "The Last Tycoon," "The Day of the Locust," and "Once in a Lifetime."

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 291 Hollywoodland II 3.0 Credits**

This course continues to examine the history, culture and mythology of Hollywood through films the entertainment industry has made about itself. In this course, the films looked at are primarily from the 1980s on, including "The Stunt Man," "My Favorite Year," "The Comedian" and "The Artist." Also discussed: the effect of television on the film industry, the breakup of the studio system in the late 40's-early 50's, the rise of programming created for HBO and other pay cable outlets, and changing perceptions of the business itself.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FMST 200 [Min Grade: D]

**FMST 293 Japanese Cinema: Kurosawa 3.0 Credits**

This course will be a survey of some of the major films of Akira Kurosawa, who is widely heralded as one of the greatest filmmakers of the 20th century. His films will be looked at in the context of both Japanese cinema, especially the cinema that preceded him, and world cinema in general.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 304 Film Voice and Style 3.0 Credits**

Imitation is the sincerest form of flattery; however, filmmakers also must develop their own unique voice and style. In this course students will undertake an in-depth study of a particular filmmaker, style, genre, or movement and submit a paper, film or project that will be the summation of their research.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 340 French New Wave 3.0 Credits**

This course screens films by all five members of the French New Wave movement and examines the works of others who both influenced these five men and were also part of the aesthetic development in France during this period.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 345 Italian Neo Realism 3.0 Credits**

Students are exposed to Italian Neorealism, its historical connection to Italy's post WWII, its technique of realism and its influence on later Italian and international films.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 352 The Horror Film 3.0 Credits**

This course reviews the history of the horror film and its various sub-genres and analyzes the methods employed in the most successful films. Students dissect the representation of evil and the impact these films have on culture.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST 355 Contemporary Cinema 3.0 Credits**

Students interpret and assess contemporary film in light of film history and aesthetics. Includes viewing and analysis of a different current film each week.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**FMST I199 Independent Study in FMST 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FMST I299 Independent Study in FMST 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FMST I399 Independent Study in FMST 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FMST I499 Independent Study in FMST 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FMST T180 Special Topics in Film Studies 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FMST T280 Special Topics in Film Studies 3.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FMST T380 Special Topics in Film Studies 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**FMST T480 Special Topics in Film Studies 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

# Finance

## Courses

### FIN 150 Financial Literacy 4.0 Credits

Financial literacy is designed to help students understand their personal financial lives. Students will be exposed to how to make everyday decisions (e.g., rent/buy a house or lease/own a car) as well as understand credit cards, student loans, consumer purchasing decisions, insurance, and other financial decisions.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

### FIN 301 Introduction to Finance 4.0 Credits

Covers financial structure of a corporation, short-and long-term financial policies, sources and uses of capital funds, asset valuation, capital budgeting, and corporate growth.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**Prerequisites:** (STAT 201 [Min Grade: D] or STAT 205 [Min Grade: D] or STAT 261 [Min Grade: D]) and (ACCT 115 [Min Grade: D] or ACCT 110 [Min Grade: D] or HRM 310 [Min Grade: D])

### FIN 302 Intermediate Corporate Finance 4.0 Credits

Provides an in-depth treatment of long-term financing decisions, including estimation of the cost of capital, financial leverage, dividend policy, and working capital analysis.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FIN 301 [Min Grade: C] and (STAT 202 [Min Grade: C] or STAT 206 [Min Grade: C])

### FIN 321 Investment Securities & Markets 4.0 Credits

Covers stocks, bonds, other investment vehicles, and operation and regulation of the stock market.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**Prerequisites:** FIN 301 [Min Grade: C] and (STAT 202 [Min Grade: C] or STAT 206 [Min Grade: C])

### FIN 323 Risk Management 4.0 Credits

Provides a fundamental understanding of risk and return, modern portfolio theory, asset pricing models, performance evaluation, and the use of derivatives to hedge and manage risk.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**Prerequisites:** FIN 321 [Min Grade: C] and (STAT 202 [Min Grade: C] or STAT 206 [Min Grade: C])

### FIN 325 Financial Institutions and Markets 4.0 Credits

Covers understanding of the financial system from the money-creation process to the functioning of the Federal Reserve System to the role and management of financial institutions.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**Prerequisites:** FIN 301 [Min Grade: C] and (STAT 202 [Min Grade: C] or STAT 206 [Min Grade: C])

### FIN 330 Derivative Securities 4.0 Credits

The analysis and pricing of derivative securities including futures and options: applications to risk management and portfolio management.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FIN 323 [Min Grade: C]

### FIN 332 Investment Analysis 4.0 Credits

Introduces investment analysis, with particular emphasis on financial statement analysis.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**Prerequisites:** FIN 321 [Min Grade: C]

### FIN 335 Entrepreneurial Finance 4.0 Credits

The purpose of the course is to bring financial management decision, tools and techniques typically applied in corporate contexts into the realm of entrepreneurship. This course presents the importance of understanding and applying entrepreneurial finance methods and tools to help ensure a successful venture.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FIN 301 [Min Grade: C]

### FIN 338 Money and Capital Markets 4.0 Credits

Covers the organization and operation of the money and capital markets and key institutional financial intermediaries.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** FIN 325 [Min Grade: C]

### FIN 340 Seminar in Finance 4.0 Credits

Covers current topics and selected cases in finance.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** FIN 302 [Min Grade: D] and FIN 321 [Min Grade: D] and FIN 325 [Min Grade: D]

### FIN 341 Applied Portfolio Management 4.0 Credits

This course covers topics related to portfolio management. Students will learn how to analyze industries, select securities for inclusion in investment portfolios, and analyze portfolio performance. Students will participate in the management of a real investment portfolio for the duration of the course.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FIN 321 [Min Grade: C]

**FIN 342 Advanced Portfolio Management 4.0 Credits**

This course covers advanced topics related to portfolio management. Students will learn how to analyze industries and the investment potential of individual securities in depth. They will also learn advanced methods for analyzing portfolio performance and investment strategy. Students will participate in the management of a real investment portfolio for the duration of the course.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FIN 341 [Min Grade: C]

**FIN 345 Mergers & Acquisitions 4.0 Credits**

The purpose of this course is to guide students to a better understanding of mergers (forming a new company by combining with another firm) and acquisitions (purchasing another firm) from the perspective of a corporation. Students will analyze the process in which one firm identifies potential other firms to take over and how to calculate the value of these firms. Further, student will be exposed to additional issues that arise when corporations undertake mergers and acquisitions.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Senior.

**Prerequisites:** FIN 301 [Min Grade: C] and FIN 302 [Min Grade: C] and FIN 321 [Min Grade: C]

**FIN 346 Global Financial Management 4.0 Credits**

Examines the investment and financing strategies of multinational corporations. Covers topics including capital acquisition in the international environment, international investment borrowing, international corporate restructuring, currency swaps and recapitalizations, hedging techniques, and international risk-management instruments.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**Prerequisites:** FIN 301 [Min Grade: C]

**FIN 348 Corporate Financial Reporting to Executives 4.0 Credits**

Provides decision support to the corporate executive leadership team in visualizing the short-term and long-term financial picture of the firm.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FIN 301 [Min Grade: C] and ACCT 115 [Min Grade: C]

**FIN 350 Personal Finance 4.0 Credits**

Covers key personal financial documents, taxes, credit, insurance, and investments.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Junior or Pre-Junior or Senior.

**FIN 440 Credit Risk Analysis 4.0 Credits**

The course focuses on the firm's credit worthiness. It is designed to allow students to experience the responsibilities of a credit analyst. Students will learn to interpret financial statements, identify a firm's financial vulnerabilities and complete a full credit risk analysis. Upon course completion, students should be able to evaluate financial statements, determine the credit strength of the firm and answer the question "do you feel comfortable lending the company money.".

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** FIN 301 [Min Grade: C] and FIN 302 [Min Grade: C] and FIN 321 [Min Grade: C] and FIN 325 [Min Grade: C]

**FIN 450 Personal Wealth Management 4.0 Credits**

The focus of this course will be on the logic and principles underlying personal financial management as well as implementing tools and techniques for achieving sound financial goals. Topics include: investment decision analysis, consumer credit, tax planning, actuarial opportunities, financial investment strategies, and retirement planning.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FIN 302 [Min Grade: C] and FIN 321 [Min Grade: C]

**FIN I199 Independent Study in FIN 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**FIN I299 Independent Study in FIN 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**FIN I399 Independent Study in FIN 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**FIN I499 Independent Study in FIN 0.5-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**FIN T180 Special Topics in FIN 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**FIN T280 Special Topics in FIN 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**FIN T380 Special Topics in FIN 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**Prerequisites:** FIN 301 [Min Grade: C]

**FIN T480 Special Topics in FIN 0.5-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Can enroll if classification is Senior.

**Prerequisites:** FIN 301 [Min Grade: C]

## Food Science

### Courses

**FDSC 100 ServSafe 1.0 Credit**

This course is designed for students who will be involved in food service, either at the institutional or commercial levels. It is also of interest to students who desire practical applications of food and kitchen sanitation and related environmental studies. This course concentrates on measures that must be taken to protect consumers from foodborne diseases and other hazards that can be caused from eating those foods. ServSafe Certification exam through the National Restaurant Association is administered.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**FDSC 120 Food and the Senses 3.0 Credits**

This course is designed to help students develop their palates through understanding the different approaches to the sensory properties of food. By starting with simple ingredients and building in complexity of flavor profile, students will be introduced to the field of sensory evaluation.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**FDSC 154 Science of Food and Cooking 4.0 Credits**

Covers the physical and chemical characteristics of food components including sugars, starches, proteins, and fats and their changes during preparation and cooking. Also considers the interaction of components in foods such as eggs, dairy products, meats, and cereals and the formulation of baked goods. Methods of sensory evaluation are included.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**FDSC 270 Microbial Food Safety and Sanitation 4.0 Credits**

Covers topics including types, sources and growth of microorganisms in food; food spoilage; foodborne infections and intoxications and their prevention; chemical contamination; pest control and sanitation standards in foodservice operations; and FDA and local regulations.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**FDSC 350 Experimental Foods: Product Development 3.0 Credits**

Covers the ingredients used in the development of new food products and the process of developing new food products. Objective and subjective testing procedures are demonstrated in laboratory. Students propose and carry out a food development project.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FDSC 154 [Min Grade: D]

**FDSC 401 Modernist Cuisine 3.0 Credits**

The nexus of cuisine, gastronomy, and food science. This course explores the history, techniques, science, creative inspiration, and the new equipment that encompasses the contemporary aspect of modern cuisine (molecular gastronomy). A broad range of foods will be prepared to facilitate a familiarization with the range of modernist cuisine.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is CAS or major is CLSC or major is CULA or major is HOSP.

Cannot enroll if classification is Freshman

**Prerequisites:** CULA 115 [Min Grade: D] or CULA 120 [Min Grade: D]

**FDSC 450 Food Microbiology 3.0 Credits**

Covers application of microbiological principles to food safety, production, nutrient quality, and spoilage.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FDSC 270 [Min Grade: D]

**FDSC 451 Food Microbiology Laboratory 2.0 Credits**

Teaches laboratory techniques of food microbiology with emphasis on food production and quality assurance procedures. Should be taken with FDSC 450 concurrently. Please see the department for more information.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FDSC 270 [Min Grade: D] (Can be taken Concurrently)

**Corequisite:** FDSC 450

**FDSC 454 Microbiology & Chemistry of Food Safety 3.0 Credits**

Provides advanced study of chemicals of food safety significance, with emphasis on the effects of compounds normal to food. Includes regulations and controls.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ENVR 436 [Min Grade: D] or BIO 203 [Min Grade: D]

**FDSC 456 Food Preservation Processes 3.0 Credits**

Covers fundamentals of food processing and preservation, including techniques and methods employed to extend the useful life of food products, and the significance of changes in the composition of foods due to the processing, enzymatic activity, microbial action and chemical change.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** NFS 215 [Min Grade: D] or CHEM 242 [Min Grade: D]

**FDSC 458 Nutritional Impact of Food Processing Methods 3.0 Credits**

Covers the effect of processing on foods, emphasizing nutritional and chemical aspects. Includes topics such as synthetic foods, food additives, current food processing methods, nutritional policy, consumer dietary patterns, and food product trends.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (FDSC 154 [Min Grade: D] and NFS 215 [Min Grade: D]) or (NFS 154 [Min Grade: D] and NFS 400 [Min Grade: D]) or (NFS 154 [Min Grade: D] and NFS 215 [Min Grade: D])

**FDSC 460 Food Chemistry 3.0 Credits**

Covers physicochemical properties of food constituents, including the application of underlying scientific principles to the processing of foods and biological materials.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 242 [Min Grade: D] and CHEM 103 [Min Grade: D]

**FDSC 461 Food Analysis 3.0 Credits**

Provides analysis of foods and biological samples, with emphasis on their chemical composition and physicochemical properties.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** NFS 216 [Min Grade: D] or NFS 404 [Min Grade: D] or BIO 306 [Min Grade: D]

**FDSC 468 Functional Foods 3.0 Credits**

This course covers a range of functional foods and food components, their health conferring benefits, mechanisms of actions, and possible applications in the food industry.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FDSC 154 [Min Grade: D] and NFS 215 [Min Grade: D]

**FDSC 487 Food Engineering 3.0 Credits**

This course deals with understanding and implementing basic engineering concepts to solve quantitative problems in food engineering and processing. Concepts such as units and dimension, mass and energy balance, heat transfer, mass transfer, psychometrics and fluid flow will be covered.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** PHYS 104 [Min Grade: D] and MATH 102 [Min Grade: D]

**FDSC 490 Seminar in Food Science 1.0 Credit**

Current topics in food science will be studied with presentations by invited speakers and students. This course may be repeated for credit.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Can be repeated 3 times for 3 credits

**Restrictions:** Cannot enroll if classification is Freshman or Junior or Pre-Junior or Sophomore

**FDSC 491 Senior Project I 2.0 Credits**

Students will identify a research problem, synthesize a literature review of the problem and then develop a research proposal to be presented both in written form and defended orally.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FDSC 350 [Min Grade: D]

**FDSC 492 Senior Project II 2.0 Credits**

Students will carry out the research protocol developed in FDSC 491. The data generated will be analyzed to answer the research questions posed in FDSC 491. The final results will be presented both orally and in written form.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FDSC 491 [Min Grade: D]

**FDSC I199 Independent Study in FDSC 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Can be repeated multiple times for credit

**FDSC I299 Independent Study in FDSC 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Can be repeated multiple times for credit

**FDSC I399 Independent Study in FDSC 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Can be repeated multiple times for credit

**FDSC I499 Independent Study in FDSC 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Can be repeated multiple times for credit

**FDSC T180 Special topics in FDSC 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Can be repeated multiple times for credit

**FDSC T280 Special topics in FDSC 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Can be repeated multiple times for credit

**FDSC T380 Special topics in FDSC 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Can be repeated multiple times for credit

**FDSC T480 Special topics in FDSC 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Center for Food Hospitality Management

**Repeat Status:** Can be repeated multiple times for credit

# French

## Courses

### **FREN 101 French I 4.0 Credits**

Introductory French. Includes listening, speaking, reading, and writing. Offered all terms.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

### **FREN 102 French II 4.0 Credits**

Continues FREN 101. Offered all terms.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FREN 101 [Min Grade: C]

### **FREN 103 French III 4.0 Credits**

Continues FREN 102. Offered all terms.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FREN 102 [Min Grade: C]

### **FREN 201 French IV 4.0 Credits**

Intermediate French. Includes grammar review, listening, speaking, and reading, with individual audiolingual practice. Offered all terms.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FREN 103 [Min Grade: C]

### **FREN 202 French V 4.0 Credits**

Continues FREN 201. Offered all terms.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FREN 201 [Min Grade: C]

### **FREN 310 Advanced Writing and Speaking 4.0 Credits**

French 310 provides advanced practice in written and oral communication, including journalistic, professional, and creative writing. Examines contemporary cultural contexts through media and news.

Taught in French.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** FREN 202 [Min Grade: C]

### **FREN 320 Introduction to Language for the Professions 3.0 Credits**

This course provides an introduction to communication skills in areas such as contemporary business, health, and law in a culturally sensitive fashion. The content of this course may change every term it is offered and is repeatable for credit. Taught in French.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 8 times for 27 credits

**Prerequisites:** FREN 310 [Min Grade: C]

### **FREN 330 Introduction to Identities and Communities 3.0 Credits**

This course provides an introduction to the analysis of individual and collective identities, including issues of gender, sexual orientation, race, ethnicity, class, nationality, and religion. The content of this course may change every term it is offered and is repeatable for credit. Taught in French.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 8 times for 27 credits

**Prerequisites:** FREN 310 [Min Grade: C]

### **FREN 340 Introduction to Power and Resistance 3.0 Credits**

This course provides an introduction to the analysis of power relations and issues of (in)equality rooted in contemporary political and socio-economic systems. The content of this course may change every term it is offered and is repeatable for credit. Taught in French.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 8 times for 27 credits

**Prerequisites:** FREN 310 [Min Grade: C]

### **FREN 350 Introduction to Language, Media, and Society 3.0 Credits**

This course provides an introduction to the role of language and media in society, including sociolinguistics, gender, media studies, and communication. The content of this course may change every term it is offered and is repeatable for credit. Taught in French.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 8 times for 27 credits

**Prerequisites:** FREN 310 [Min Grade: C]

### **FREN 410 Advanced Grammar and Translation 3.0 Credits**

This course provides advanced grammar instruction and fosters translation and communication skills within a contemporary cultural context. The content of this course may change every term it is offered and is repeatable for credit. Taught in French.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 8 times for 27 credits

**Prerequisites:** FREN 310 [Min Grade: C] and (FREN 320 [Min Grade: C] or FREN 330 [Min Grade: C] or FREN 340 [Min Grade: C] or FREN 350 [Min Grade: C])

### **FREN 420 Advanced Studies in Language for the Professions 3.0 Credits**

French 420 provides an advanced communication skills in areas such as contemporary business, health, and law in a culturally sensitive fashion. The content of FREN 420 may change every term it is offered and is repeatable for credit. Taught in French.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 8 times for 27 credits

**Prerequisites:** FREN 310 [Min Grade: C] and (FREN 320 [Min Grade: C] or FREN 330 [Min Grade: C] or FREN 340 [Min Grade: C] or FREN 350 [Min Grade: C])

**FREN 430 Advanced Studies in Identities and Communities 3.0 Credits**

French 430 provides an advanced analysis of individual and collective identities, including issues of gender, sexual orientation, race, ethnicity, class, nationality, and religion. The content of FREN 430 may change every term it is offered and is repeatable for credit. Taught in French.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 8 times for 27 credits

**Prerequisites:** FREN 310 [Min Grade: C] and (FREN 320 [Min Grade: C] or FREN 330 [Min Grade: C] or FREN 340 [Min Grade: C] or FREN 350 [Min Grade: C])

**FREN 440 Advanced Studies in Power and Resistance 3.0 Credits**

French 440 provides an advanced analysis of power relations and issues of (in)equality rooted in contemporary political and socio-economic systems. The content of FREN 440 may change every term it is offered and is repeatable for credit. Taught in French.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 8 times for 27 credits

**Prerequisites:** FREN 310 [Min Grade: C] and (FREN 320 [Min Grade: C] or FREN 330 [Min Grade: C] or FREN 340 [Min Grade: C] or FREN 350 [Min Grade: C])

**FREN 450 Advanced Studies in Language, Media, and Society 3.0 Credits**

French 450 provides an advanced analysis of the role of language and media in society, including sociolinguistics, gender, media studies, and communication. The content of FREN 450 may change every term it is offered and is repeatable for credit. Taught in French.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 8 times for 27 credits

**Prerequisites:** FREN 310 [Min Grade: C] and (FREN 320 [Min Grade: C] or FREN 330 [Min Grade: C] or FREN 340 [Min Grade: C] or FREN 350 [Min Grade: C])

**FREN 480 French Minor Thesis Course 0.5-4.0 Credits**

Independent research study on a topic selected by the student. Independent study is supervised by a faculty member and guided by a plan of study. At the end of the course, the student is required to produce a paper and oral defense on the topic of his paper.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**FREN I199 Independent Study in FREN 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**FREN I299 Independent Study in FREN 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**FREN I399 Independent Study in FREN 0.5-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**FREN I499 Independent Study in FREN 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**FREN T180 Special Topics in French 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**FREN T280 Special Topics in French 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**FREN T380 Special Topics in French 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated multiple times for credit

**FREN T480 Special Topics in French 0.5-12.0 Credits**

Recommended for French minors and for students with proficiency status. Offered all terms. This is a writing intensive course.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Can be repeated 8 times for 96 credits

## Game Art & Production

### Courses

**GMAP 101 Game Design Lab I 3.0 Credits**

This course will cover an overview of fundamental image creation and editing tools, like Adobe Photoshop and Illustrator, in the framework of creative experimentation with analog game design exercises using a combination of digital and physical fabrication skills.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is GMAP.

**GMAP 102 Game Design Lab II 3.0 Credits**

This course will cover an overview of the fundamental design skills of digital games using a variety of game engines, including interactive text, 2d and 3d game engines, and grey-boxing with primitive shapes in-engine and modeling tools, exploiting the systems and existing asset libraries available for rapid experimentation.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is GMAP.

**Prerequisites:** GMAP 101 [Min Grade: D]

**GMAP 231 Scripting for Game Design 3.0 Credits**

This course explores modern game engine scripting languages that are event-driven, control the art assets, provide multiplayer communication, and database access.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CS 140 [Min Grade: D] or CS 171 [Min Grade: D]

**GMAP 260 Overview of Computer Gaming 3.0 Credits**

This course presents an overview of computer gaming, including its history, its foundation in traditional games and its contemporary forms. The relationship among genres, platforms and audiences are examined and critical evaluation skills are developed.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**GMAP 345 Game Development Foundations 3.0 Credits**

This course introduces students to the computer game design process. Students also learn how the individual skills of modeling, animation, scripting, interface design and storytelling are coordinated to produce interactive media experiences.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (ANIM 141 [Min Grade: D] or DIGM 141 [Min Grade: D] or CS 265 [Min Grade: D]) and (DIGM 260 [Min Grade: D] or GMAP 260 [Min Grade: D])

**GMAP 347 Serious Games 3.0 Credits**

This course explores development of games for education. Goals include understanding and appreciating the psychology of play and the principles of game design in developing educational games.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** GMAP 377 [Min Grade: D]

**GMAP 348 Experimental Games 3.0 Credits**

This course explores new ideas and innovative gameplay through constraints of team size and shortened development cycles.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** GMAP 377 [Min Grade: D]

**GMAP 360 Game Design from the Player's Perspective 3.0 Credits**

This course is an introduction to game design from a player's perspective. Students will experience a variety of games and analyze them with respect to the use of game design principles and their consequences for game play.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**GMAP 367 Character Animation for Gaming 3.0 Credits**

This course focuses on character animation techniques for real-time graphics, including cyclical animations, procedural animation, motion capture and integration into game engines.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** ANIM 212 [Min Grade: D] and (GMAP 345 [Min Grade: D] or CS 345 [Min Grade: D])

**GMAP 368 Artificial Intelligence in Gaming 3.0 Credits**

This course teaches the use and integration of state machines into game engines, as well as other methods for creating and controlling Non Player Characters (NPCs).

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (GMAP 345 [Min Grade: D] or CS 345 [Min Grade: D]) and (CS 172 [Min Grade: D] or GMAP 231 [Min Grade: D])

**GMAP 369 Mobile Game Development 3.0 Credits**

This course explores development of games for mobile platforms.

Specifically addressed will be platform issues such as processor speed, screen resolution, user interface and memory.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** GMAP 377 [Min Grade: D]

**GMAP 377 Game Development: Workshop I 3.0 Credits**

This course examines the roles of the executive producer and the development team in taking a computer game from concept to design document through production. Students will work in small teams to research and plan a production effort that results in a pre-production prototype.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** GMAP 345 [Min Grade: D] or DIGM 345 [Min Grade: D] or CS 345 [Min Grade: D]

**GMAP 378 Game Development: Workshop II 3.0 Credits**

This course provides an environment in which the pre-production of GMAP 377 Game Development: Workshop I can be taken through a full production effort. Students work in small teams to bring a selected prototype to completion.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** GMAP 377 [Min Grade: D] or DIGM 361 [Min Grade: D]

**GMAP 399 Independent Project in Game Art and Production 0.5-12.0 Credits**

Supervised planning and execution of a project in the area of Game Art and Production.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

**GMAP 421 Advanced Game Design and Production 3.0 Credits**

This course will step through the various modules of game engines, enabling students to gain access to real-time shaders and materials, particle systems and animation techniques.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Not repeatable for credit

**Prerequisites:** GMAP 377 [Min Grade: D]

**GMAP I199 Independent Study in Game Art and Production 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**GMAP I299 Independent Study in Game Art and Production 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**GMAP I399 Independent Study in Game Art and Production 0.5-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**GMAP I499 Independent Study in Game Art and Production 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**GMAP T180 Special Topics in Game Art and Production 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**GMAP T280 Special Topics in Game Art and Production 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**GMAP T380 Special Topics in Game Art and Production 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

**GMAP T480 Special Topics in Game Art and Production 3.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** Antoinette Westphal College of Media Arts Design

**Repeat Status:** Can be repeated multiple times for credit

## General Business

### Courses

**BUSN 101 Foundations of Business I 4.0 Credits**

Introduces the fundamental structures and functions of business organizations and the opportunities for career advancement within such organizations. Develops relevant business skills for professional success, emphasizing teams, communication, and real-world examples.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Freshman or Sophomore .

**BUSN 102 Foundations of Business II 4.0 Credits**

Exposes students to the external environments (local, national, and international) within which business organizations operate. Continues to build on important managerial and communication issues.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Freshman or Sophomore .

**Prerequisites:** BUSN 101 [Min Grade: D]

**BUSN 103 Advanced First Year Business Seminar 2.0 Credits**

Continues to address topics and professional development introduced in the Foundations of Business I and II courses. Further develops students; knowledge and skills in a variety of areas, which may include effective boardroom presentations, individual financial strategy, leadership issues, corporate communication, career management and decision making. May be repeated once for credit.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated 2 times for 4 credits

**BUSN 111 Foundations for Business 4.0 Credits**

Provides an integrated foundation for future business courses. Orients transfer and evening students to the main disciplines and functions of business, in both the internal and external environments; enables hands-on analysis of information and decision-making in a competitive arena; and provides an opportunity to develop teamwork and to enhance communication, presentation, and other management skills. This course cannot be used as part of your degree requirements if you were enrolled in the BUSN 101 Foundations of Business I and BUSN 102 Foundations of Business II sequence.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman or Sophomore

**BUSN 112 [WI] Career Management Business Residency 4.0 Credits**

Provides students with a practical framework for career planning through the use of career assessments, interactive exercises, and personal reflections. Students will investigate viable career paths, analyze internal and external motivators, and enhance their communication, leadership, and presentation skills through an online simulation, electronic portfolio, and employer site visit. This is a writing intensive course.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**BUSN 200 Introductory Seminar in Business Research 4.0 Credits**

This course provides an overview of methods used in business research. It will cover the development of research questions and hypotheses, research design and methods used in business, and the analysis and interpretation of data.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Freshman or Sophomore .

**BUSN 211 Peer Mentoring & Leadership Practicum 2.0 Credits**

This course is designed to highlight and develop mentoring and leadership skills required to guide and assist incoming freshmen in their transition to college. Students will develop critical thinking as it relates to leadership and the integration of those skills. The course is experiential in nature as students will immediately look to apply knowledge gained within the course.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Sophomore.

**Prerequisites:** UNIV 101 [Min Grade: B]

**BUSN 260 Introduction to Business Analytics 4.0 Credits**

This course introduces mathematical models that can be used to improve decision-making within an organization. Topics will include analytical tools such as optimization, simulation, and Visual Basic for Applications (VBA) for problem solving and decision support in all areas of business, including supply chain networks, operations, finance, economics, and marketing. Students will make extensive use of Excel and several spreadsheet based add-ins to solve real business problems, improve business processes, and help make important business decisions.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**BUSN 360 Programming for Data Analytics 4.0 Credits**

The mission of this course is to immerse students in the technical challenges associated with contemporary data analytics as applied to business processes and data-driven decision making. To achieve this mission, the course will introduce modules covering the state-of-the-art in the areas of R programming as applied to data analysis for business problems.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (STAT 202 [Min Grade: C-] or STAT 206 [Min Grade: C-]) and BUSN 260 [Min Grade: C-]

**BUSN 430 Mentoring & Leadership Development Practicum 2.0 Credits**

The role of the Peer Mentor is one of a role-model, tutor and trusted colleague. This course is designed to teach mentoring skills required by Teaching Assistants in BUSN 101 and for early career managers.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** FIN 301 [Min Grade: B] and ACCT 115 [Min Grade: B] and ACCT 116 [Min Grade: B]

**BUSN 431 Mentoring & Leadership Development Practicum 2.0 Credits**

The role of the peer mentor is one of a role model, tutor and trusted colleague. This course is designed to teach mentoring skills required by Teaching Assistants in BUSN 102 and for early career managers.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** FIN 301 [Min Grade: B] and ACCT 115 [Min Grade: B] and ACCT 116 [Min Grade: B]

**BUSN 432 Leadership & Mentoring Practicum 4.0 Credits**

The role of the TA is one of a role-model, tutor and trusted colleague. This course is designed to guide and assist upperclassmen as they support BUSN 101/102 students in their initial journey into business as well as provide leadership insights and experiences that highlight these secondary leadership roles.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Restrictions:** Cannot enroll if classification is Freshman

**Prerequisites:** FIN 301 [Min Grade: B] and ACCT 115 [Min Grade: B] and ACCT 116 [Min Grade: B]

**BUSN 460 Business Analytics Senior Project 4.0 Credits**

The senior project serves as a capstone for business analytics majors. The course provides an opportunity for students to develop a project that draws on their skills in the areas of data management, mathematical modeling, and statistical analysis to support data driven decision-making processes. Student often choose a project in the area of their second major (marketing, finance, etc.) and thus the project provides deeper insight into organizational decision-making in a functional area of business.

**College/Department:** LeBow College of Business

**Repeat Status:** Not repeatable for credit

**Prerequisites:** OPR 320 [Min Grade: C-] and MIS 343 [Min Grade: C-] and MIS 349 [Min Grade: C-] and (STAT 331 [Min Grade: C-] or STAT 335 [Min Grade: C-] or ECON 350 [Min Grade: C-]) and (OPR 330 [Min Grade: C-] or MKTG 366 [Min Grade: C-] or ECON 301 [Min Grade: C-])

**BUSN I199 Independent Study in BUSN 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**BUSN I299 Independent Study in BUSN 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**BUSN I399 Independent Study in BUSN 0.5-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**BUSN I499 Independent Study in BUSN 0.5-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

**BUSN T180 Special Topics in BUSN 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**BUSN T280 Special Topics in BUSN 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**BUSN T380 Special Topics in BUSN 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**BUSN T480 Special Topics in BUSN 0.5-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** LeBow College of Business

**Repeat Status:** Can be repeated multiple times for credit

**Restrictions:** Cannot enroll if classification is Freshman

## General Studies

### Courses

**GSTD 100 Strategies for Academic Success 1.0 Credit**

This course explores the learning process to assist students in achieving academic success. Self-assessments, personal reflection, and relevant electronic resources are used to foster students' development as self-directed learners. Topics include: study skills, learning strategies, personal development, academic planning and tracking, visioning, and goal setting. The goal of this course is to help improve students' efficacy in the areas of academic self-management, self-direction, and resource utilization.

**College/Department:** GC-3690

**Repeat Status:** Not repeatable for credit

**GSTD 111 Learning Skills & Strategies 3.0 Credits**

This course prepares traditional undergraduate students for the expectations and challenges of college life.

**College/Department:** GC-3690

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if classification is Freshman.

**GSTD 200 Lifelong Learning Theory & Practice 3.0 Credits**

Introduces theories and practical skills necessary for successful learning in a variety of environments. Covers self-efficacy development, autonomous learning, critical thinking, critical reading, learning to learn, effective researching and writing, goal setting theories, and practical strategies necessary to support learning in university, career, and personal contexts.

**College/Department:** GC-3690

**Repeat Status:** Not repeatable for credit

**GSTD 201 [WI] Professional Applications of Emotional Intelligence 3.0 Credits**

This course will examine emotional intelligence as applied through interpersonal communication. Particular emphasis will be placed on emotional intelligence in the workplace and in leadership. The main objective is to make students aware that intelligence and technological expertise are not enough to be successful in the workplace. This is a writing intensive course.

**College/Department:** GC-3690

**Repeat Status:** Not repeatable for credit

**GSTD 302 Customer Service Theory & Practice 3.0 Credits**

This course focuses on the theory of customer service and the practices that "best in class" companies apply to differentiate themselves from the competition. The course includes practical information and activities designed to teach students how to respond to customers, resolve problems, and provide quality customer service.

**College/Department:** GC-3690

**Repeat Status:** Not repeatable for credit

**GSTD 303 Client Relations Management 3.0 Credits**

This course introduces the skills that facilitate and enhance client relations management. Topics covered include building a trusting relationship, evaluating and managing expectations and needs, managing conflict, understanding the client's perspective, customer life cycle, consulting, serving public sector versus private sector clients, managing client relations managers, and ethical issues.

**College/Department:** GC-3690

**Repeat Status:** Not repeatable for credit

**GSTD 360 Applied Organizational Research 3.0 Credits**

This course presents a systematic approach to managerial methods of conducting organizational research and analysis. Students will undergo the management research process of specifying the problem; translating the problem into specific research questions; designing the data collection methodology; collecting, analyzing and interpreting data; and reporting the research results and recommendations.

**College/Department:** GC-3690

**Repeat Status:** Not repeatable for credit

**GSTD 380 Advanced Special Topics in General Studies 1.0-4.0 Credit**

Covers upper-level special topics of interest in General Studies. This course may be repeated for credit.

**College/Department:** GC-3690

**Repeat Status:** Can be repeated 11 times for 12 credits

**GSTD 400 Practicum 3.0 Credits**

Combines classroom theory with practical application at the student's worksite. Requires students to demonstrate the ability to apply classroom learning to situations benefiting a corporation. Includes an orientation, proposals, reports on works-in-progress, and a portfolio.

**College/Department:** GC-3690

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is GSTD and classification is Senior.

**GSTD 491 Senior Project in General Studies 3.0 Credits**

The senior project covers planning and execution of a capstone project that integrates the academic and practical knowledge acquired in the student's course of study. Students will complete a research proposal, a research project or an integrative portfolio.

**College/Department:** GC-3690

**Repeat Status:** Not repeatable for credit

**Restrictions:** Can enroll if major is GSTD and classification is Senior.

**GSTD I199 Independent Study in GSTD 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** GC-3690

**Repeat Status:** Can be repeated multiple times for credit

**GSTD I299 Independent Study in GSTD 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** GC-3690

**Repeat Status:** Can be repeated multiple times for credit

**GSTD I399 Independent Study in GSTD 0.5-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** GC-3690

**Repeat Status:** Can be repeated multiple times for credit

**GSTD I499 Independent Study in GSTD 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** GC-3690

**Repeat Status:** Can be repeated multiple times for credit

**GSTD T180 Special Topics in GSTD 1.0-4.0 Credit**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** GC-3690

**Repeat Status:** Can be repeated 11 times for 12 credits

**GSTD T280 Special Topics in GSTD 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** GC-3690

**Repeat Status:** Can be repeated multiple times for credit

**GSTD T380 Special Topics in GSTD 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** GC-3690

**Repeat Status:** Can be repeated multiple times for credit

**GSTD T480 Special Topics in GSTD 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** GC-3690

**Repeat Status:** Can be repeated multiple times for credit

## Geography Education

### Courses

**EDGE 210 Geography Education 3.0 Credits**

This course is an introduction to geographic concepts, themes and elements; designed to build a foundational understanding and analytical tools to examine the world from a geographic perspective. The course emphasizes the unique qualities of world regions, and the spatial interaction of people, elements, and regions, as well as major regional and global problems and prospects.

**College/Department:** School of Education

**Repeat Status:** Not repeatable for credit

**EDGE 211 Geography Education: Teacher Laboratory 1.5 Credit**

A teaching methods and techniques laboratory designed to prepare pre-service PK-12 teachers to effectively help their future students better understand and analyze their world utilizing geographic concepts, themes and elements. The weekly labs correspond directly to the content represented in EDGE210: Geography Education.

**College/Department:** School of Education

**Repeat Status:** Not repeatable for credit

**Prerequisites:** EDGE 210 [Min Grade: D]

**EDGE I199 Independent Study in EDGE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** School of Education

**Repeat Status:** Can be repeated multiple times for credit

**EDGE I299 Independent Study in EDGE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** School of Education

**Repeat Status:** Can be repeated multiple times for credit

**EDGE I399 Independent Study in EDGE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** School of Education

**Repeat Status:** Can be repeated multiple times for credit

**EDGE I499 Independent Study in EDGE 0.0-12.0 Credits**

Self-directed within the area of study requiring intermittent consultation with a designated instructor.

**College/Department:** School of Education

**Repeat Status:** Can be repeated multiple times for credit

**EDGE T180 Special topics in EDGE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** School of Education

**Repeat Status:** Can be repeated multiple times for credit

**EDGE T280 Special topics in EDGE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** School of Education

**Repeat Status:** Can be repeated multiple times for credit

**EDGE T380 Special topics in EDGE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** School of Education

**Repeat Status:** Can be repeated multiple times for credit

**EDGE T480 Special topics in EDGE 0.0-12.0 Credits**

Topics decided upon by faculty will vary within the area of study.

**College/Department:** School of Education

**Repeat Status:** Can be repeated multiple times for credit

## Geoscience

### Courses

**GEO 101 Physical Geology 4.0 Credits**

This course is an introduction to geology emphasizing the role of plate tectonics. Topics include formation of minerals, igneous, sedimentary, and metamorphic rocks, volcanoes, earthquakes, depositional environments, and geological hazards. Labs focus on mineral and rock identification, map skills, and 3D visualization.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**GEO 102 History of the Earth 4.0 Credits**

The history of the earth and the evolution of life on earth are examined. Geological and biological processes that allow us to reconstruct the past are emphasized. Topics include geologic time, plate tectonics, and the nature of the fossil record. Lab exercises include hands-on fossil identification and the use of fossils as tools to explore the history of the earth.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**GEO 103 Introduction to Field Methods in Earth Science 2.0 Credits**

This is an introductory course in earth science that provides experience with the fundamental skills and methods for the field study of the earth and earth processes.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**GEO 111 Natural Disasters 3.0 Credits**

This course is an overview of natural disasters and hazards. Students will learn the geology behind major natural disasters and how society best mitigates risk. Topics include volcanoes, earthquakes, tsunamis, hurricanes, and floods. Students will review case studies of past (and any concurrent) natural disasters through journal articles and media coverage.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**GEO 201 [WI] Earth Systems Processes 3.0 Credits**

Students will examine local and global environmental changes from an earth systems perspective. Important concepts include feed-back loops, tipping points, the "butterfly effect," and geological time. From a geological perspective, students will examine: natural and anthropogenic climate change; soil degradation; sea-level rise; plate tectonics; and natural hazards, such as coastal storms, levee breaks, earthquakes, tsunamis, landslides and more.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**GEO 205 Dinosaurs and Their World 3.0 Credits**

An introduction to dinosaur paleontology, this course focuses on the scientific method as applied to dinosaur studies. Topics include dinosaur evolution, the history of dinosaur research, an overview of dinosaurs, and birds as living dinosaurs. This is suitable for all majors.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**GEO 207 Introduction to Oceanography 3.0 Credits**

This course provides a topics-based approach to the field of Oceanography and its disciplines. Provides a solid understanding of the discipline of oceanography and a foundation to pursue further advanced topics in oceanography or to learn about how our planet works.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**GEO 211 Sedimentary Environments 4.0 Credits**

Students in this course develop an understanding of sedimentary processes and the ability to interpret paleoenvironments based on sedimentological parameters. Topics include current flow, bedforms, siliciclastic and carbonate rocks, fluvial, coastal, and Aeolian environments, taphonomy, and paleosols.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** GEO 101 [Min Grade: D]

**GEO 215 Mineralogy 4.0 Credits**

In this course, students will study mineralogy and optical mineralogy, with a focus on describing minerals within their geologic context. The foundations of mineralogy will be covered, including: crystallography, chemical bonding, controls on mineral structure, mineral stability, and crystal growth. Students will learn physical and chemical analytical methods to examine mineral composition and structure. Hand-sample identification will be emphasized in the laboratory component. In the field, students will learn to identify rock-forming minerals within the context of historical geological events.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 101 [Min Grade: D]

**GEO 301 Advanced Field Methods in Earth Science 2.0 Credits**

This skills course focuses on fundamental and commonly used geoscience field techniques. Students will learn surface and subsurface mapping, coring techniques and core analysis, remote sensing techniques, and sampling techniques. This course builds on GEO 103 and prepares students for advanced field studies.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** (GEO 101 [Min Grade: D] or CAEE 212 [Min Grade: D]) and GEO 103 [Min Grade: D]

**GEO 306 Environmental Geology 4.0 Credits**

Students in this course will focus on interactions between humans and the geosphere. Students will develop an understanding of a broad range of natural and human-induced geohazards, from earthquakes and tsunamis to industrial pollution and anthropogenic climate change. Regional examples will be emphasized, such environmental industrial contamination and remediation efforts in the Delaware Valley and hydraulic fracturing for natural gas in Pennsylvania.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** GEO 101 [Min Grade: D] or CAEE 212 [Min Grade: D]

**GEO 309 Geochemistry 4.0 Credits**

This course is a topics-based approach to the field of geochemistry with emphasis on aqueous systems, both marine and freshwater. Topics include: composition of the earth and oceans; chemical equilibrium; solubility; thermodynamics; oxidation-reduction reactions; organic geochemistry; isotope geochemistry; contaminant geochemistry; applications of geochemistry; consequences of weathering; composition of surface waters; geochemical modeling; and selected areas of interest.

**College/Department:** College of Arts and Sciences

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CHEM 103 [Min Grade: D] or CHEM 123 [Min Grade: D] or CHEM 102 [Min Grade: D]

**GEO 311 Stratigraphy 4.0 Credits**
