Graduate Course Catalog

2019-2020

Table of Contents

About Drexel University	7	Biomedicine and Entrepreneurship	50
Accreditation	10	Biomedicine and Law	54
Graduate Catalog	12	Biotechnology	57
Center for Hospitality and Sport Management	13	Cancer Biology	58
Master of Science in Food Science	13	Clinical Research for Health Professionals	60
Master of Science in Hospitality Management	13	Clinical Research Organization and Management	62
Sport Coaching Leadership	13	Criminalistic Science	63
Master of Science in Sport Management	13	Drexel Pathway to Medical School	64
Close School of Entrepreneurship	14	Drug Discovery and Development	65
Entrepreneurship and Innovation	14	Forensic Science	67
Graduate Minor in Entrepreneurship & Innovation	15	Histotechnology	68
College of Computing & Informatics	16	Immunology	70
Computer Science	16	Infectious Disease	72
Health Informatics	21	Interdepartmental Medical Science	75
Information Studies	25	Interdisciplinary Health Sciences	75
Information Systems	25	Laboratory Animal Science	76
Library and Information Science	30	Medical Science	78
National Security Management	32	Medical and Healthcare Simulation	80
Software Engineering	32	Microbiology and Immunology	81
Graduate Minor in Computer Science	37	Molecular and Cell Biology and Genetics	84
Archives Specialist Certificate	37	Molecular Medicine	86
Competitive Intelligence and Knowledge Management Specialist Certificate	37	Neuroscience	88
Post-Baccalaureate Certificate in Computer Science	37	Pathologists' Assistant	91
Certificate in Continuity Management	38	Pharmacology and Physiology	93
Certificate in Cybersecurity, Law and Policy	38	Certificate in Clinical Research	96
Digital Curation Specialist	38	Evening Post-Baccalaureate Pre-Medical Certificate Program	97
Digital Libraries Specialist Certificate	38	Certificate in Quantitative Principles for Clinical Research	98
Certificate in Homeland Security	38	Certificate in Veterinary Medical Science	99
Advanced Certificate in Information Studies and Technology	38	Goodwin College of Professional Studies	100
Certificate in Intelligence	38	Professional Studies	100
Youth Services Specialist Certificate	38	College of Nursing and Health Professions	102
College of Medicine: Graduate School of Biomedical Sciences and Professional Studies	39	Art Therapy and Counseling	104
Academic Medicine	41	Creative Arts Therapies PhD	106
Biochemistry	42	Couple and Family Therapy PhD	108
Master of Science in Biological Science	42	Dance/Movement Therapy and Counseling	110
Biomedical Studies	42	Master of Family Therapy	112
Biomedicine and Business	43	Health Administration	114
Biomedicine and Digital Media	47	Human Nutrition	115
		Music Therapy and Counseling	119
		MSN in Nurse Anesthesia	121
		PhD in Nursing	121
		Doctor of Nursing Practice	123

MSN: Clinical Nurse Leader Concentration	125	Post-Master's Certificate in Nursing Education	162
MSN: Clinical Trials Research Concentration	127	Leadership in Health Systems Management	162
MSN: Nursing Education Concentration	127	Adult-Gerontology Acute Care Nurse Practitioner Post-Master's Certificate	163
MSN: Nursing Innovation Concentration	129	Adult-Gerontology Primary Care Nurse Practitioner Post-Master's Certificate	163
MSN: Nursing Leadership in Health Systems Management Concentration	131	Family/Individual Across the Lifespan Nurse Practitioner Post-Master's Certificate	164
MSN "Bridge" Program	133	Pediatric Acute Care Nurse Practitioner Post-Master's Certificate	165
MSN: Adult-Gerontology Acute Care Nurse Practitioner	134	Pediatric Primary Care Nurse Practitioner Post-Master's Certificate	165
MSN: Adult-Gerontology Primary Care Nurse Practitioner	135	Pediatric Primary Care and Pediatric Acute Care Dual Nurse Practitioner Post-Master's Certificate	166
MSN: Family/Individual Across the Lifespan Nurse Practitioner ...	136	Psychiatric Mental Health Nurse Practitioner Post-Master's Certificate	166
MSN: Pediatric Acute Care Nurse Practitioner	137	Women's Health/Gender-Related Nurse Practitioner Post-Master's Certificate	167
Pediatric Primary Care Nurse Practitioner	138	Certificate in Pediatric Rehabilitation	167
MSN: Pediatric Primary Care and Pediatric Acute Care Dual Option	139	Service to Veterans	167
Psychiatric Mental Health Nurse Practitioner	140	Sexual Health and Wellness	168
Women's Health/Gender Related Nurse Practitioner	141	Certificate in Substance Use Disorder Treatment	169
Doctor of Physical Therapy	142	Certificate of Advanced Study in Women's Integrative Health	170
Nutrition Sciences	145	LeBow College of Business	172
Physician Assistant (PA)	146	Accounting	172
Physician Assistant Post-Professional Master's Program	149	MBA Programs	174
Rehabilitation Sciences	149	Executive MBA Program	178
Rehabilitation Sciences	151	Doctorate in Business Administration (DBA)	179
Certificate of Advanced Study in Complementary and Integrative Therapies	152	Business Administration	183
Certificate in Couple and Family Therapy	153	Business Analytics	186
Certificate in Forensic Trends and Issues in Contemporary Healthcare	153	Finance	187
Post-Master's Certificate in Geriatrics	154	Master of Science in Leadership	187
Certificate in Advanced Practice in Hand and Upper Quarter Rehabilitation	155	Marketing	187
Certificate of Advanced Study in Holistic Hospice and Palliative Care	155	Supply Chain Management and Logistics	189
Certificate of Advanced Study in Integrative Addiction Therapies	156	Certificate in Advanced Business	191
Issues in Human Trafficking Certificate	157	Certificate in Leadership	191
Certificate in Medical Family Therapy	157	LeBow College of Business: School of Economics	192
Post-Master's Certificate in Music Therapy	157	Economics	192
Neuroscience, Learning and online Instruction	158	Economics	194
Post-Master's Certificate in Nurse Anesthesia	158	The Antoinette Westphal College of Media Arts & Design	198
Clinical Nurse Leader Post-Master's Certificate	158	Arts Administration	199
Post-Baccalaureate Certificate in Nursing Innovation	159	Master of Science in Design Research/graduate/collegeofmediaartsanddesign/	199
Post-Baccalaureate Certificate in Integrated Nursing Care of Autism Spectrum Disorder (ASD)	160	Digital Media	199
Post-Baccalaureate Certificate in Nursing Education	161	Fashion Design	204

Interior Architecture and Design	206	Certificate in Systems Engineering Fundamentals	300
Museum Leadership	209	Certificate in Systems Engineering Integrated Logistics	300
Paul F. Harron Television Management Program	209	Certificate in Systems Reliability Engineering	300
The College of Arts and Sciences	210	The College of Medicine	302
Biological Sciences	210	The Doctor of Medicine (MD) Program	302
Chemistry	214	The School of Biomedical Engineering, Science, and Health Systems	
Communication	217	305
Communication, Culture and Media	220	Biomedical Engineering	306
Environmental Policy	222	Biomedical Science	311
Environmental Science	224	Integrated Biomedical Engineering and Business	316
Joint JD/PhD Law-Psychology Program	226	Advanced Certificate in Bioinformatics	319
Mathematics	227	Advanced Certificate in Biomedical Technology Development	319
Physics	229	Advanced Certificate in Tissue Engineering	319
Psychology MS	234	The School of Education	320
Public Policy	236	Adult Education and Organization Development	321
Publishing	237	Applied Behavior Analysis	321
Science, Technology, and Society	238	Creativity and Innovation	323

About Drexel University

Mission Statement

Drexel University fulfills our founder's vision of preparing each new generation of students for productive professional and civic lives while also focusing our collective expertise on solving society's greatest problems. Drexel is an academically comprehensive and globally engaged urban research university dedicated to advancing knowledge and society and to providing every student with a valuable, rigorous, experiential, technology-infused education, enriched by the nation's premier co-operative education program.

Vision

Drexel will be the Philadelphia region's leading university excelling in high-quality experiential education, online learning, technology transfer and business incubation, translational research, and urban revitalization. Drexel will use and leverage all its assets - outstanding faculty, highly motivated students, over 150,000 alumni world-wide, a pragmatic and entrepreneurial culture, co-operative education, Drexel University Online, and our superior location as a major transportation hub - to create an accessible, relevant and market-leading educational research platform that benefits our diverse community of students, advances our scholarly work, and champions economic development in our region. Drexel will join the ranks of the most impactful and competitive universities in the United States at a time when the nation is clamoring for educational value, jobs, and new ideas for bolstering our economy.

A Brief History of Drexel University

In founding the institution that would become Drexel University, Philadelphia financier and philanthropist Anthony J. Drexel launched a tradition of innovation. Mr. Drexel envisioned an institution of higher learning uniquely suited to the needs of a rapidly growing industrial society and the young women and men seeking their place in it - core values that continue to guide the University in its modern era. Mr. Drexel's vision was realized in 1891 with the establishment of the Drexel Institute of Art, Science and Industry. Originally a non-degree-granting institution, Drexel began conferring bachelor of science degree in 1914, when its 18 departments were organized into four schools. In 1927, the Commonwealth of Pennsylvania granted Drexel the privilege to confer the master of science degree, and in 1965, the doctor of philosophy degree.

The cornerstone of Drexel's career preparation model has been its cooperative education (co-op) program. Introduced in 1919 as one of the first models of its kind, co-op is integral to the University's educational experience. Through co-op, students alternate periods of study with periods of full-time professional employment, providing unrivaled, valuable professional experience.

The institution's curriculum and organization of its academic programs have evolved to include 15 colleges and schools. Through its evolution, Drexel has undergone two changes in name - in 1936 becoming the Drexel Institute of Technology, and in 1970, Drexel University. The current title reflects the institution's commitment to research as well as the breadth of its academic programs.

Drexel's mission, services and opportunities expanded further in 2002 when MCP Hahnemann University, a major Philadelphia health sciences institution, merged with Drexel University with the addition of the College of Medicine (<http://archives.drexelmed.edu/history.php>), the College of

Nursing and Health Professions, and the recently named Dornsife School of Public Health. In 2001, the University established an affiliation with one of Philadelphia's most storied institutions, the Academy of Natural Sciences, now the Academy of Natural Sciences of Drexel University (<http://www.anasp.org/about/academy-history/>). These historic events extended the resources of Drexel have led to many productive synergies in teaching and research.

Drexel's foundation as an innovating institution established the university as a national leader in higher education. In 1983, Drexel became the nation's first university to require all undergraduates to have personal access to a microcomputer for use in all their coursework. The university continued its commitment to integrating technology when it became the first university to operate a fully wireless campus in 2000. In 2006, Drexel became the first major research university to open a new law school in 25 years. The Thomas R. Kline School of Law is one of only two US university law schools that follows a cooperative education model of learning.

Throughout its evolution to a comprehensive urban research university, Drexel's core mission has held constant. Since its founding, the institution has remained a privately controlled, nonsectarian, coeducational center of higher learning, distinguished by a commitment to preparing women and men for success in their chosen careers incorporating experiential learning and celebrating diversity. Its greatly expanded enrollment, campuses, and curricula reflect a history of responsiveness to societal and individual needs - all of which Mr. Drexel sought to address in his day and going forward through his charge "change."

Drexel University Today

Today, over 25,000 students are enrolled in over 100 undergraduate programs and over 190 graduate programs across 16 colleges, schools, and centers:

- Close School of Entrepreneurship (<http://drexel.edu/close/>)
- College of Arts and Sciences (<http://drexel.edu/coas/>)
- College of Computing & Informatics (<http://drexel.edu/cci/>)
- College of Engineering (<https://drexel.edu/engineering/>)
- College of Medicine: School of Biomedical Sciences and Professional Studies (<https://drexel.edu/medicine/academics/graduate-school/>)
- College of Nursing and Health Professions (<https://drexel.edu/cnhp/>)
- Dornsife School of Public Health (<http://drexel.edu/dornsife/>)
- Drexel College of Medicine (<http://drexel.edu/medicine/>)
- Goodwin College of Professional Studies (<http://drexel.edu/goodwin/>)
- LeBow College of Business (<http://www.lebow.drexel.edu/>)
- LeBow College of Business: School of Economics (<http://www.lebow.drexel.edu/faculty-and-research/disciplines/economics/>)
- Pennoni Honors College (<https://drexel.edu/biomed/>)
- School of Biomedical Engineering, Science, and Health Systems (<http://www.biomed.drexel.edu/>)
- School of Education (<http://drexel.edu/soe/>)
- Thomas R. Kline School of Law (<http://www.drexel.edu/law/>)
- Westphal College of Media Arts and Design (<http://www.drexel.edu/westphal/>)

Drexel Co-op

Drexel University has been a pioneer in cooperative education since 1919 — operating one of the largest cooperative education programs in the nation. Undergraduates alternate on-campus study with full-time

employment in fields related to their academic interests. More than 1,600 employer organizations in business, government, health care and education participate at locations in more than 30 states and 45 countries. The Steinbright Career Development Center (<http://drexel.edu/scdc/>) (Steinbright) works to ensure that students and alumni get the most from their experiential and career education activities.

Technology

Technology is integrated into every aspect of the Drexel educational experience, marking the university as a leader in educational innovation.

Drexel made history in 1983 when it became the first university to mandate that all students must have personal access to a microcomputer. This tradition of leadership in integrating state-of-the-art technologies into a Drexel education continued when Drexel, in early 1998, inaugurated the first totally wireless library in the nation. In 2000, Drexel again made history by becoming the nation's first major university to offer completely wireless Internet access across the entire campus.

A pioneer in online learning, Drexel offers distance education programs leading to certificates and degrees in areas including engineering management, business administration, information systems and library and information science. Drexel University Online has over 7,500 unique students from all 50 states and more than 20 countries pursuing one of more than 130 graduate and undergraduate degree and certificate programs. Over all, there are more than 13,000 Drexel University students taking at least one course online.

Drexel is widely recognized for excellence in technology-based, experiential learning and was ranked in the top third in the 2019 edition of *U.S. News & World Report's* "Best National Universities," coming in at 102nd out of 312.

Location

Drexel's 74-acre University City Main Campus is located in the vibrant University City district of Philadelphia, Pennsylvania. Drexel makes full use of its metropolitan setting by integrating Philadelphia and its resources into the classroom, co-op/internship experience, and student life, making it a model for other urban universities. The main campus is a 10-minute walk from Center City, the core of Philadelphia's commercial and business district.

Drexel teaches at two additional Philadelphia campuses: the Center City Campus houses the College of Nursing and Health Professions and the Queen Lane Medical Campus in East Falls houses the College of Medicine. The Law School also operates the Kline Institute of Trial Advocacy in Center City.

Programs of note

Civic Engagement

Civic engagement, participation in the public life of the community, is important to the Drexel University's strategic plan. Civic engagement can take many forms from volunteerism doing community service to electoral participation and advocacy.

Drexel University's Lindy Center for Civic Engagement (<http://www.drexel.edu/lindycenter/>) fosters a culture of civic responsibility by providing programs and resources that empower Drexel students and the broader university community to expand their civic identities through engagement in mutually beneficial partnerships that lead to a more just society.

The Lindy Center for Civic Engagement focuses on four core priorities including: Community-Based Learning, Civic Leadership, Public Service, and Community Partnerships.

Honors Program

The Pennoni College offers several academic options for its students. These opportunities are designed to be intensive, and are taught by faculty members who understand and accommodate Honors students' abilities and aspirations.

The Honors Program offers several academic options for its students. These opportunities are designed to be intensive, and are taught by faculty members who understand and accommodate Honors students' abilities and aspirations.

These options include:

- **Honors Colloquia:** These interdisciplinary courses introduce students to topics not typically covered elsewhere. These courses are small, discussion-based, seminar style classes. Past Honors Colloquia topics include: The Hidden God in Cinema; Theory of Special Relativity; The Graphic Novel; Torture and Terrorism, and many others.
- **Honors-Section Courses:** These courses fulfill traditional major requirements but offer Honors credit. While the subject remains the same, the classes are taught to smaller groups, consisting entirely of Honors students, and on an advanced level that encourages discussion and practical application. Honors-section courses include, among other subjects, physics, English, business, general psychology, chemistry, and biology.
- **Honors Options:** With permission from their instructors and approval from the Honors Program, Honors students may elect to enhance non-honors courses to yield honors credit. The student and faculty member conducting may agree on the specific terms before the course begins and jointly submit a proposal to the Honors Program.
- **Independent Study:** Honors students frequently come across topics in their general coursework that they would like to investigate in greater detail. To accommodate this, the Honors College encourages students to study and research a topic of their choosing with guidance from a faculty member.

The Symposium

The Symposium (<https://drexel.edu/pennoni/custom-designed-major/the-symposium/>) is an interdisciplinary, project-based course series exploring subjects of the broadest possible interest and greatest societal impact. Through intensive examination of a different major these every year, it brings Drexel University students, teachers, and visiting expert lecturers into collaboration. The Symposium strives to avoid the "textbook approach," with an emphasis on developing in students the active skills of interdisciplinary inquiry: reading, writing, critical thinking, methodological creativity, and argument. Four new courses are offered each year, designed to elaborate different dimensions of the theme. Through these courses, students are encouraged to see the University as an interconnected enterprise, and to imagine the University as one part of a larger spectrum of scholars in the communities of the city, the nation, and the world.

ROTC

The Army Reserve Officers' Training Corps (<http://www.armyrotc.com/edu/drexel/>), established at Drexel in 1918, is an integral part of the University. Army ROTC courses are open to all students, and enrollment alone does not carry a military obligation. Students selected for the advanced course (normally pre-junior, junior, and senior years) will complete their academic and military studies concurrently, and upon

graduation will be commissioned as lieutenants in the United States Army, Army Reserve, or Army National Guard. Participation in the advanced course may qualify participants to receive financial aid through a series of scholarships and cooperative education programs. For further information, contact the Professor of Military Science, Drexel University, The Armory, 33rd and Market Streets, Philadelphia, PA 19104.

Drexel students are eligible to participate in the Naval Reserve Officers' Training Corps (<http://www.vpul.upenn.edu/nrotc/>) (NROTC) through a cross-enrollment agreement with the University of Pennsylvania. All naval science courses are held on Penn's campus. The NROTC program enables a college student to earn a commission in the Navy or the Marine Corps while concurrently satisfying requirements for his or her baccalaureate degree. Scholarship and nonscholarship programs are available.

Drexel students are eligible to participate in the Air Force Reserve Officers' Training Corps (<http://www.sju.edu/afrotc/>) (AFROTC) through a cross-enrollment agreement with St. Joseph's University. All aerospace studies courses will be held on the St. Joseph's campus. The AFROTC program enables a college student to earn a commission as an Air Force officer while concurrently satisfying requirements for his or her baccalaureate degree.

Global

Study Abroad

Drexel University's Study Abroad programs are open to students in all disciplines who meet the qualifications of each individual program. Please see the study abroad website (<http://www.drexel.edu/studyabroad/>) for eligibility requirements of each individual program and for the most up to date program offerings.

Foreign Language Proficiency

The University awards an advanced-level Certification of Proficiency (<http://catalog.drexel.edu/certificates/proficiencycertificates/>) in a foreign language in recognition of exceptional ability in oral and written communication in that language. Certification is listed on the official college transcript.

Examinations leading to proficiency certification include listening comprehension, reading comprehension, and written analysis, and the ETS Achievement Test, which is also the qualifying examination for proficiency testing. Certification also requires successful completion of an extensive oral interview, with at least a "2" rating on the FSI/ACTFL rating scale. Certification indicates proven ability to function effectively in professional and social situations in a country in which the target language is spoken.

Affirmative Action and Equal Opportunity

University Policy: Affirmative Action and Equal Opportunity

It is the policy of the University to provide a working and learning environment in which employees and students are able to realize their full potential as productive members of the University community. To this end, the University affirms its commitment to equal opportunity and nondiscrimination in employment and education for all qualified individuals regardless of race, religion, color, national origin, sex, age, sexual orientation, disability or applicable veteran status or any other characteristic protected by applicable federal or state law. Further, the University is committed to taking affirmative action to increase opportunities at all levels of employment and to increase opportunities for participation in programs and activities by all faculty, staff, and students.

Affirmative Action is directed toward racial and ethnic minorities, women, persons with disabilities, and Vietnam-era veterans. All member of the University community -- faculty, staff, and students -- are expected to cooperate fully in meeting these goals.

It is the policy of the University that no qualified individual with a disability shall, on the basis of the disability, be excluded from participation in University programs and activities. Disability is defined as any physical or mental impairment that substantially limits one or more major life activities; or having a record of such impairment; or being regarded as having such impairment. A qualified individual with a disability means an individual as defined above, who is capable of performing the essential functions of a particular job or of participating in a particular course of study, with or without reasonable accommodations for his/her disability. Reasonable accommodations are determined on a case-by-case basis.

Consumer Information and Student Right to Know

In accordance with federal regulations set forth by the Higher Education Opportunity Act of 1965, as amended, a summary of consumer information must be made available to all prospective and enrolled students at Drexel University. Links to the information is available on the Office of the Provost's website (<http://drexel.edu/provost/policies/heoa/>).

Accreditation

Drexel University's educational programs are accredited by MSCHE (Middle States Commission on Higher Education).

The Antoinette Westphal College of Media Arts and Design

- The National Association of Schools of Arts & Design has accredited Westphal's Bachelor of Science programs in: Animation & Visual Effects; Art History; Design & Merchandising; Entertainment and Arts Management (Visual Arts); Fashion Design; Film & Video; Game Art & Production; Graphic Design; Interactive Digital Media; Interior Design; Photography; Product Design; TV Production & Media Management.
- The National Association of Schools of Arts & Design has accredited Westphal's Master of Science programs in Digital Media; Fashion Design; Interior Design; and Design Research
- The National Association of Schools of Arts & Design has accredited Westphal's Doctor of Philosophy in Digital Media.
- The Architecture program is accredited by NAAB (National Architectural Accrediting Board).
- The BS in Interior Design is accredited by CIDA (Council for Interior Design Accreditation).
- The MS in Interior Architecture & Design is accredited by CIDA (Council for Interior Design Accreditation).

The Bennett S. LeBow College of Business

- The Bennett S. LeBow College of Business is accredited by AACSB (Association to Advance Collegiate Schools of Business).

The College of Engineering

- The undergraduate programs for Architectural Engineering, Chemical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering Environmental Engineering, Materials Science and Engineering, and Mechanical Engineering are accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.
- The undergraduate Construction Management program is accredited by ACCE (American Council for Construction Education).
- The undergraduate Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, <http://www.abet.org>.
- The Project Management program is approved by the Project Management Institute (PMI)[®] as a Registered Education Provider (R.E.P.). This designation indicates that Drexel has met or exceeded rigorous standards for the quality and the effectiveness of its program as defined by PMI, <http://www.pmi.org/learning/training-development/rep> (<http://www.pmi.org/learning/training-development/rep>).

The College of Arts and Sciences

- The Chemistry BS is certified by ACS (American Chemical Society).
- The Clinical Psychology PhD program is accredited by APA (American Psychological Association).
- The English Language Center is accredited by CEA (Commission on English Language Program Accreditation).

The College of Nursing and Health Professions

- The Baccalaureate Degree in Nursing (BSN), the Master's Degree in Nursing (MSN) and the Doctor of Nursing (DNP) at Drexel University

are accredited by the Commission on Collegiate Nursing Education (CCNE) (<http://www.aacn.nche.edu/ccne-accreditation/>), One Dupont Circle, NS, Suite 530, Washington, DC, 20036, 202-887-6791.

- The Couple and Family Therapy MFT degree and Post-Master's Certificates are accredited by COAMFTE (Commission on Accreditation of Marriage and Family Therapy Education).
- The Creative Arts Therapies MA degrees in Dance/Movement Therapy and Counseling, Music Therapy and Counseling, and Art Therapy and Counseling are approved by the ADTA (American Dance Therapy Association), the AMTA (American Music Therapy Association), and the AATA (American Art Therapy Association), respectively.
- The Didactic Program in Nutrition is accredited by ACEND (Accreditation Council for Education in Nutrition and Dietetics Association).
- The Nurse Anesthesia program is accredited by COA (Council on Accreditation of Nurse Anesthesia Educational Programs).
- The Doctor of Physical Therapy (DPT) program is accredited by CAPTE (Commission on Accreditation in Physical Therapy Education).
- The Physician Assistant program is accredited by ARC-PA (Accreditation Review Commission on Education for the Physician Assistant).

The College of Computing & Informatics

- The BS in Computer Science is accredited by the Computing Accreditation Commission (CAC) of ABET (<http://www.abet.org>).
- The BS in Information Systems is accredited by the Computing Accreditation Commission (CAC) of ABET (<http://www.abet.org>).
- The BS in Information Technology is accredited by the Computing Accreditation Commission (CAC) of ABET (<http://www.abet.org>).
- The BS in Software Engineering is accredited by the Engineering Accreditation Commission (EAC) of ABET (<http://www.abet.org>).
- The MS in Library and Information Science is accredited by ALA (American Library Association).
- The MS in Health Informatics Program is in Candidacy Status, pending accreditation review by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM)

The Drexel University College of Medicine

- The MD degree is accredited by LCME (Liaison Committee on Medical Education).
- The Master's program in Histotechnology (MHP) and the MS Degree in Pathologists' Assistant program are accredited by NAACLS (National Accrediting Agency for Clinical Laboratory Sciences).

The Dornsife School of Public Health

- The Dornsife School of Public Health is accredited by CEPH (Council on Education for Public Health).

The School of Biomedical Engineering, Science and Health Systems

- The undergraduate biomedical engineering curriculum is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>).

The School of Education

- Teacher education, school leadership and other programs leading to Pennsylvania State-issued credentials or endorsements for various PreK-12 subject areas are approved by the Pennsylvania Department of Education. These include teacher preparation programs in the areas of Pre-Kindergarten - Grade 4 (PK-4); Middle Level (Grades 4 - 8) in English, Mathematics and Science; the Secondary Level (Grades 7-12) in areas of Biology, Chemistry, Earth & Space Science, English, General Science, Mathematics, Physics, and Social Studies; and Special Education (both Grades PK - 8 and 7 - 12). State-approved, school leadership certification areas include School Principal K-12, School Superintendent K-12, Special Education Supervisory and Instructional Technology Specialist. Other state-approved programs and program endorsements are provided in the areas of Autism, Reading Specialist, STEM Teaching Endorsement, and Teaching English as a Second Language Program.
- The School of Education will be seeking accreditation from the Council for the Accreditation of Educator Preparation

The Thomas R. Kline School of Law

- The Thomas R. Kline School of Law is accredited by ABA (American Bar Association).
- The Master of Legal Studies (MLS) is accredited by the Compliance Certification Board (CCB)[®].

Any student or prospective student may request a copy of the documents describing the institution's accreditation. This information is available in the Provost's Office and in the Financial Aid Office, both located in the Main Building.

Close School of Entrepreneurship

In today's extremely competitive global workforce, there is an increased value and demand for initiative, independence, innovation, and the intellectual dexterity to rethink the old ways of doing things and invent new ones. The Charles D. Close School of Entrepreneurship has pioneered an approach to entrepreneurship education that addresses this need by teaching students to be entrepreneurial thinkers and doers, preparing them to meet the world market on solid footing and to create their own opportunities.

The Close School defines entrepreneurship as more than starting a company or sparking innovation within established organizations. At the Close School, entrepreneurship is a habit of mind and an attitude; a skill set applicable to pursuing innovation in both personal and career contexts. We assist students in cultivating an approach to life built around innovative thinking, calculated daring, and proactive behavior.

Within our unique curriculum, students learn skills such as resilience, collaboration, negotiation, and communication. The Close School's academic and co-curricular programs prepare students for the ever-evolving 21st-century workforce, which will include experiences in new venture creation, self-employment, corporate innovation and the development of impactful social enterprises.

Majors

- Entrepreneurship and Innovation (MS) (p. 14)
- **NEW:** Transdisciplinary Science, Computing, Engineering and Design (MS)

Minors

- Entrepreneurship and Innovation (<http://catalog.drexel.edu/graduate/schoolofentrepreneurship/entrepreneurshipandinnovationgminor/>)

Entrepreneurship and Innovation

Major: Entrepreneurship and Innovation

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 52.0701

Standard Occupational Classification (SOC) code: 11-1011; 11-1021; 11-9199

About the Program

The Charles D. Close School of Entrepreneurship is founded on the principle that entrepreneurship encompasses more than starting a new venture. Entrepreneurship is a habit of mind and an attitude; a skill set applicable to pursuing innovation in both personal and career contexts; as well as an approach to life built around innovative thinking, calculated daring, and proactive behavior.

The MS in Entrepreneurship and Innovation is designed for recent graduates or working professionals who wish to increase their knowledge of and experiences in innovation and entrepreneurship. The MS focuses

on developing the entrepreneurial mindset and the skills associated with new-venture creation and corporate innovation.

For additional information about the MS in Entrepreneurship and Innovation, please contact Rita Berson (rk25@drexel.edu).

Degree Requirements

Required Courses

ENTP 501	Entrepreneurship Essentials	3.0
BUSN 501	Measuring and Maximizing Financial Performance	3.0
ENTP 535	Social Entrepreneurship	3.0
ENTP 540	Methods of Entrepreneurship	3.0
ENTP 565	Franchising	3.0
ENTP 611	Learning from Failure	3.0
ENTP 641	Innovation in Established Companies	3.0
ENTP 651	Leading New Ventures	3.0
BLAW 646	Legal Issues in New Ventures	3.0
ENTP 660	Early Stage Venture Funding	3.0
ENTP 621	Innovation & Ideation	3.0
ENTP 690	The Lean Launch	3.0
ENTP 631	Building Internal & External Relationships	3.0
Electives		6.0
Choose two of the following graduate electives, OR two from other units (upon advisor approval):		
ENTP 555	Dynamics of the Family Firm	
ENTP 670	Clean Venture Lab	
ENTP T580	Special Topics in Entrepreneurship	

Total Credits 45.0

Entrepreneurship and Innovation Faculty

Nick Bayer, BS (*Cornell University*). Adjunct Instructor.

Roy Carriker, PhD (*University of Connecticut*). Teaching Professor.

Donna De Carolis, PhD (*Temple University*) *Dean Silverman Family Professor Entrepreneurial Leadership*.

Michael Kurzeja, MBA (*Grantham University*). Adjunct Instructor.

Roger Lee, MS (*Drexel University*). Adjunct Teaching Professor.

Barrie Litzky, PhD (*Drexel University*). Associate Professor.

Larissa Milne, MBA (*Drexel University*). Adjunct Teaching Professor.

Dean Musser, BS (*Drexel University*). Adjunct Instructor.

Ozlem Ogutveren-Gonul, PhD (*Gazi University, Ankara, Turkey*).
Assistant Teaching Professor.

Scott Quitel, JD, MBA (*Temple University*) *Director of Social Entrepreneurship*. Assistant Teaching Professor.

Charles Sacco, MBA (*Drexel University*) *Assistant Dean of Strategic Initiatives; Director of the Baiada Institute for Entrepreneurship*.

Damian Salas, MBA (*Drexel University*) *Assistant Dean of Entrepreneurship Programs*. Assistant Teaching Professor.

Zahed Subhan, PhD, JD/LLB (Law) (*University of Leeds (UK); London University*). Teaching Professor.

College of Computing & Informatics

From our position on the leading edge of information and technology, Drexel University's College of Computing & Informatics (CCI) instills the knowledge and skills necessary for our students to lead and innovate across industries in a rapidly evolving technological landscape.

Building on Drexel University's exceptional foundation of entrepreneurship and cooperative education, we provide unparalleled professional experiences and the on-the-job training that is vital to preparing today's students for tomorrow's world. At CCI, our unique structure bringing computing and informatics together under one roof in a dynamic, collaborative college allows us to spot trends before they emerge, to solve problems before they occur, and to build a better tomorrow, starting today.

The College contributes to theory and practice along dimensions that include technical, human, organizational, policy and societal considerations. This broad perspective positions the College to address the complex, multi-disciplinary problems that are increasingly common as society becomes more dependent on information technology.

The academic programs of the College provide broad and deep coverage of computing & informatics. For more information about the College, please visit the College's website (<http://drexel.edu/cci/>).

Computer Science

Major: Computer Science

Degree Awarded: Master of Science in Computer Science (MSCS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MSCS); 90.0 (PhD)

Co-op Option: Available for full-time on-campus master's-level students

Classification of Instructional Programs (CIP) code: 11.0701

Standard Occupational Classification (SOC) code: 11-3021; 15-1111; 15-1131; 15-1132; 15-1199

About the Program

The Department of Computer Science in the College of Computing & Informatics (<http://drexel.edu/cci/>) houses research groups actively conducting research on a wide range of topics in Computer Science including artificial intelligence, algorithms, computer vision and graphics, programming languages, networks, privacy and security, high-performance computing, software engineering, computer algebra, and algorithms. The department emphasizes both interdisciplinary and applied research and is supported by major federal research grants from the National Science Foundation, Department of Defense, Department of Energy, and the National Institute of Standards and Technology, as well as by private sources.

Master of Science in Computer Science

The Master of Science in Computer Science program is designed to provide breadth of understanding in the core topics of computer science, in-depth advanced material, and a range of topics in the research areas of the faculty. A balance of theory and practice is presented, preparing students to perform cutting edge research as well as training students to become practicing computer scientists or software engineers in business, industry, or government. A thesis option is available to prepare students for doctoral studies or other research-oriented career paths.

A graduate co-op is available for the Master of Science program. For more information, visit the Steinbright Career Development Center's website (<http://www.drexel.edu/scdc/co-op/graduate/>).

Doctorate in Computer Science

Students enrolled in the PhD in Computer Science program are expected to become an expert in a research area in computer science or its interdisciplinary field with other disciplines. They are expected to conduct research in considerable depth, and make substantial contributions through creative research and serious scholarship. The program is designed for students to ensure core knowledge of the fundamental computer science areas and to conduct bleeding edge research at the forefront of a selected area. Students are prepared for leadership careers in research and education in computer science and interdisciplinary work using computer science.

Additional Information

For more information about these programs, visit the College of Computing & Informatics' website (<https://drexel.edu/cci/academics/overview/>).

Master of Science in Computer Science

General Requirements

Students must complete a minimum of 45.0 graduate credits for the MS degree.

Core Requirements 18.0

Students must take 1 course marked "Core Candidate" from each of the 6 categories below. There are 2 Core Candidate courses in each category.

Theory

CS 521	Data Structures and Algorithms I (Core Candidate)
CS 522	Data Structures and Algorithms II
CS 525	Theory of Computation (Core Candidate)
CS 618	Algorithmic Game Theory
CS 620	Advanced Data Structure and Algorithms
CS 621	Approximation Algorithms
CS 623	Computational Geometry

Intelligent Systems

CS 500	Fundamentals of Databases (Core Candidate)
CS 510	Introduction to Artificial Intelligence (Core Candidate)
CS 511	Robot Laboratory
CS 610	Advanced Artificial Intelligence
CS 611	Game Artificial Intelligence
CS 612	Knowledge-based Agents
CS 613	Machine Learning
CS 615	Deep Learning
CS 660	Data Analysis at Scale
CS 661	Responsible Data Analysis

Programming Systems

CS 550	Programming Languages (Core Candidate)
CS 650	Program Generation and Optimization
CS 675	Reverse Software Engineering
CS 676	Parallel Programming
SE 575	Software Design (Core Candidate)
SE 576	Software Reliability and Testing
SE 577	Software Architecture
SE 578	Security Engineering

Computer Systems

CS 543	Operating Systems (Core Candidate)
CS 544	Computer Networks (Core Candidate)
CS 643	Advanced Operating Systems
CS 645	Network Security
CS 647	Distributed Systems Software

Vision and Graphics

CS 536	Computer Graphics (Core Candidate)
CS 537	Interactive Computer Graphics
CS 558	Game Engine Programming
CS 583	Introduction to Computer Vision (Core Candidate)
CS 634	Advanced Computer Vision
CS 636	Advanced Computer Graphics

Applications

CS 530	Developing User Interfaces (Core Candidate)
CS 540	High Performance Computing (Core Candidate)
CS 567	Applied Symbolic Computation
CS 590	Privacy
CS 630	Cognitive Systems

CS 668	Computer Algebra I
CS 669	Computer Algebra II

Breadth Requirements 9.0

Students must take an additional 3 courses from the remaining courses above, spanning at least 2 of the listed categories.

Depth Requirements 6.0

Students are required to complete at least 2 more Computer Science (CS) and Software Engineering (SE) courses beyond the breadth requirement, preferably at the 600- or 700-level. The CS Independent Study course (CS I599, CS I699, CS I799) may be taken if approved by the College.

Additional Graduate-Level Courses 6.0

Two additional graduate level courses are required. These courses are typically 600- or 700-level Computer Science (CS) courses. Graduate courses may be taken from outside the department, if on the list of approved external courses, and may include CS Independent Study (CS I599, CS I699, CS I799) and CS 997 Research in Computer Science, if approved by the College.

Other courses, such as intermediate 500-level and special topics, may also qualify for fulfilling this requirement. Students must check with their advisor to see if this is the case, and have these courses approved by the College. Any course offered by another department that is not on the list of approved external courses must be approved by the College, or it will not count towards the degree.

Thesis or Non-Thesis Option 6.0

Thesis Option

Usually students pursuing a Master's Thesis will first do 3.0 research credits (CS I599, CS I699, CS I799 or CS 997) to obtain background knowledge required by the thesis topic. It is the responsibility of the student to find a thesis supervisor.

CS 898	Master's Thesis
--------	-----------------

Non-thesis Option

The non-thesis option requires 2 additional 600- or 700-level Computer Science (CS) courses taken in place of the 6.0 thesis credits.

Total Credits 45.0

Sample Plan of Study (MScS)

Term 1	Credits

CS 536	Computer Graphics (Core Candidate)
CS 583	Introduction to Computer Vision (Core Candidate)
CS 537	Interactive Computer Graphics
CS 558	Game Engine Programming
CS 634	Advanced Computer Vision
CS 636	Advanced Computer Graphics

Applications

CS 530	Developing User Interfaces (Core Candidate)
CS 540	High Performance Computing (Core Candidate)
CS 567	Applied Symbolic Computation
CS 590	Privacy
CS 630	Cognitive Systems
CS 668	Computer Algebra I
CS 669	Computer Algebra II

Breadth Requirement

12.0

Students must take another 4 intermediate and advanced courses from the remaining courses above, spanning at least 3 of the listed course categories while earning at least a grade of B in each course.

Depth Requirement

18.0

Students are required to complete at least 18.0 credits of CS courses beyond the Breadth Requirement. These courses should be Computer Science (CS) and Software Engineering (SE) courses preferably at the 600- or 700-level courses. Course selection must be approved by the student's research advisor. The department will periodically offer topics courses, typically run in a seminar fashion, on current research areas of interest to faculty. As part of the Depth Requirements, 3.0 out of the 18.0 credits, but no more than 9.0 credits, are to be Independent Study work (CS I799).

Total Credits

48.0

Plan of Study

Upon entering the PhD program, each student will be assigned an Graduate Advisor, and with the help of the Advisor will develop and file a plan of study (which can be brought up to date when necessary). The plan of study should be filed with the Graduate Advisor no later than the end of the first term.

Qualifying Requirements

PhD student must pass each of the six core courses selected as part of the "Core Requirements" (one "Core Candidate" course from each of the listed categories) with a grade B+ or higher. If a student fails to meet this minimum grade requirement, he or she may either (1) take the other "Core Candidate" course in the same category and obtain a grade of B+ or higher; (2) retake the same course at the next offering; or (3) retake the final exam of the same course with permission by the instructor, if deemed appropriate by the instructor and the College. Normally, a student is expected to satisfy this requirement by the end of the student's first year. These requirements, including the remedial actions, must be completed by the end of the student's second year. Transfer credits may count towards these requirements subject to course instructor approval of the syllabus for the transferred course.

Candidacy Exam

The Computer Science candidacy examination serves to define the student's research domain and to evaluate the student's knowledge and understanding of various fundamental and seminal results in that domain. At this point the student is expected to be able to read, understand, analyze, and explain advanced technical results in a specialized area of computer science at an adequate level of detail. The candidacy examination will evaluate those abilities using a defined set of published manuscripts. The student will prepare a written summary of the contents of the material, present the summary orally, and answer questions about the material. The examination committee will evaluate the written summary, the oral presentation, and the student's answers.

Thesis Proposal

After completing the candidacy examination successfully, the PhD candidate must prepare a thesis proposal that outlines, in detail, the specific problems that will be solved in the PhD dissertation. The quality of the research proposal should be at the level of, for example, a peer-reviewed proposal to a federal funding agency, or a publishable scientific paper. The candidate is responsible for sending the research proposal to the PhD committee two weeks before the oral presentation. The PhD committee need not be the same as the candidacy exam committee, but it follows the same requirements and must be approved by the Office of Graduate Studies. The oral presentation involves a 30-minute presentation by the candidate followed by an unspecified period during which the committee will ask questions. After the question and answer period, the candidate will be asked to leave the room and the committee will determine if the research proposal has been accepted. The research proposal can be repeated at most once.

Thesis Defense

After completing the research proposal successfully, the PhD candidate must conduct the necessary research and publish the results in a PhD dissertation. The dissertation must be submitted to the PhD committee two weeks prior to the oral defense. The oral presentation involves a 45-minute presentation by the candidate, open to the public, followed by an unspecified period during which the committee will ask questions. The question-and-answer period is not open to the public. After the question and answer period, the candidate will be asked to leave the room and the committee will determine if the candidate has passed or failed the examination. The candidate will be granted one more chance to pass the final defense if (s)he fails it the first time. Paperwork selecting the thesis committee and indicating the results of the thesis defense must be filed with the College of Computing & Informatics (<http://drexel.edu/cci/>) and the Graduate College (<https://drexel.edu/graduatecollege/>).

Dual Degree Opportunities

Graduate students already enrolled in a master's degree program at Drexel have the opportunity, through the dual master's program, to work simultaneously on two CCI master's degrees and to receive both upon graduation. To be eligible, graduate students must be currently working on their first CCI master's degree when requesting admission to the second CCI master's degree. They must obtain approval from the graduate advisors of both programs and work out a plan of study encompassing coursework and/or research (thesis) credits for both degrees.

To satisfy dual degree requirements for the MSCS and another degree the plan of study must include the following: mandatory core, flexible core, breadth and one depth course for a total of 30.0 credits. To obtain a dual degree you must have a minimum of 60 credits, thesis and research credits will be in excess of the 30.0 credits required by MSCS. The dual degree for MSCS students is only available to on-campus students. Please contact your advisor (<https://drexel.edu/cci/current-students/graduate-professional-development/advising/>) for more information on program requirements as some CCI master's degree combinations may require additional prerequisites.

The dual master's student must complete the Change of Curriculum and Status form (<https://drexel.edu/graduatecollege/forms-policies/forms/>) and obtain approvals from both graduate advisors. Final approval is granted by the Graduate College (<http://drexel.edu/graduatecollege/>). The student is then registered in both majors simultaneously. Upon graduation, the student must file two Application for Degree (<http://drexel.edu/drexelcentral/graduation/information/applying-for-degree/>) forms.

3675 Market Street

In March 2019, the College of Computing & Informatics relocated to 3675 Market (<https://drexel.edu/cci/about/our-facilities/>). For the first time in the College's history, all CCI faculty, students and professional staff are housed under one roof. Occupying two floors in the brand new uCity Square building, CCI's new home offers state-of-the-art technology in our classrooms, labs, meeting areas and collaboration spaces. 3675 Market offers Class A laboratory, office, coworking, and convening spaces. In fall 2019, the College will open a third floor which will include additional offices, classrooms, a research lab, a maker space, and a ground-breaking DXC Technology Innovation Lab. Located at the intersection of Market Street and 37th Street, 3675 Market will act as a physical nexus, bridging academic campuses and medical centers to the east and south, the commercial corridors along Market Street and Chestnut Street, and the residential communities to the north and west.

The uCity Square building offers:

- Speculative lab/office space
- World-class facilities operated by CIC (<https://cic.us/philadelphia/>)
- Café/restaurant on-site
- Quorum, a two-story, 15K SF convening space and conference center
- Adjacent to future public square
- Access to Science Center's nationally renowned business acceleration and technology commercialization programs

Drexel University Libraries

Drexel University Libraries (<http://www.library.drexel.edu/>) is a learning enterprise, advancing the University's academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through three physical locations, including W. W. Hagerty Library, Queen Lane Library, and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at [library.drexel.edu](http://www.library.drexel.edu/) (<http://www.library.drexel.edu/>) or in-person at W. W. Hagerty Library (<http://www.library.drexel.edu/locations/>).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

CCI Commons

Located on the 10th floor of 3675 Market Street, the CCI Commons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, and more collaborative space for its students. Students have access to 3675 Market's fully equipped conference room with 42" displays and videoconferencing capabilities. The CCI Commons provides technical support to students, faculty, and professional staff. In addition, the staff provides audio-visual support for all presentation classrooms within 3675 Market. Use of the CCI Commons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the CCI Commons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the CCI Commons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as "DreamSpark" that allows students free access to a wide array of Microsoft software titles and operating systems.

The CCI Commons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University's network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

CCI Learning Center

The CCI Learning Center (CCILC), located in 3675 Market Street's CCI Commons student computer lab, provides consulting and other learning resources for students taking computer science classes. The CCILC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

The CCILC and CCI Commons serve as a central hub for small group work, student meetings, and TA assistance.

Research Laboratories

The College houses multiple research labs, led by CCI faculty, in 3675 Market Street including: the Drexel Health and Risk Communication Lab, Interactive Systems for Healthcare, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), High Performance Computing Laboratory (SPIRAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Social Computing Research Group, Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College's research web page (<http://cci.drexel.edu/research.aspx>).

Computer Science Faculty

Yuan An, PhD (*University of Toronto, Canada*) *Director of International Programs*. Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

David Augenblick, MS (*University of Pennsylvania*). Associate Teaching Professor. Introductory and object-oriented programming, data structures and database systems, computer application project management, application of computer programming principles and solutions to engineering problems.

Marcello Balduccini, PhD (*Texas Tech University*) *Senior Research Scientist, Applied Informatics Group*. Associate Research Professor. Logic programming, declarative programming, answer set programming, knowledge representation, various types of reasoning

M. Brian Blake, PhD (*George Mason University*) *Executive Vice President for Academic Affairs and Provost; Distinguished Professor of Systems and Software Engineering; Joint Appointments with the College of Engineering and the College of Medicine*. Software engineering approaches for integration of Web-based systems.

Mark Boady, PhD (*Drexel University*). Assistant Teaching Professor. Computer Algebra, complex symbolic calculations, automation of computation problems

David E. Breen, PhD (*Rensselaer Polytechnic Institute*). Associate Professor. Self-organization, biomedical image/video analysis, biological simulation, geometric modeling and visualization

Matthew Burlick, PhD (*Stevens Institute of Technology*). Assistant Teaching Professor. Image processing, machine learning, real-time video

tracking, object detection and classification, statistics/probability, and acoustics

Yuanfang Cai, PhD (*University of Virginia*). Associate Professor. Formal software design modeling and analysis, software economics, software evolution and modularity.

Bruce W. Char, PhD (*University of California-Berkeley*). Professor. Symbolic mathematical computation, algorithms and systems for computer algebra, problem-solving environments parallel and distributed computation.

Christopher Geib, PhD (*University of Edinburgh*). Associate Professor. Decision making and reasoning under conditions of uncertainty, planning, scheduling, constraint, based reasoning, human computer and robot interaction, probabilistic reasoning, computer network security, large scale process control, user interfaces.

Colin Gordon, PhD (*University of Washington*). Assistant Professor. Software reliability, program behavior, concurrent and systems-level code, formal assurance, programming models, distributed computing, even testing

Jeremy R. Johnson, PhD (*Ohio State University*). Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Constantine Katsinis, PhD (*University of Rhode Island*). Teaching Professor. High-performance computer networks, parallel computer architectures with sustained teraflops performance, computer security, image processing.

Geoffrey Mainland, PhD (*Harvard University*). Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD (*University of Toronto*) *The Auerbach Berger Chair in Cybersecurity Distinguished Professor of Computer Science*. Professor. Software engineering; software security; code analysis; evolutionary computation.

Adelaida Alban Medlock, MS (*Drexel University*). Associate Teaching Professor. Introductory programming; computer science education.

William Mongan, MS (*Drexel University*) *Associate Department Head for Undergraduate Affairs, Computer Science*. Associate Teaching Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach

Ko Nishino, PhD (*University of Tokyo*) *Associate Department Head for Graduate Affairs, Computer Science*. Professor. Computer vision, computer graphics, analysis and synthesis of visual appearance.

Krzysztof Nowak, PhD (*Washington University*). Associate Teaching Professor. Fourier analysis, partial differential equations, image processing, wavelets, asymptotic distribution of eigenvalues, numerical methods and algorithms, computer science education.

Santiago Ontañón, PhD (*University of Barcelona*). Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning

Jeffrey L. Popyack, PhD (*University of Virginia*). Professor. Operations research, stochastic optimization, computational methods of Markov decision processes; artificial intelligence, computer science education.

Jeffrey Salvage, MS (*Drexel University*). Teaching Professor. Object-oriented programming, multi-agent systems, software engineering, database theory, introductory programming, data structures.

Dario Salvucci, PhD (*Carnegie Mellon University*) *Department Head, Computer Science*. Professor. Human computer interaction, cognitive science, machine learning, applications for driving.

Kurt Schmidt, MS (*Drexel University*). Associate Teaching Professor. Data structures, math foundations for computer science, programming tools, programming languages.

Ali Shokoufandeh, PhD (*Rutgers University*) *Senior Associate Dean of Research*. Professor. Theory of algorithms, graph theory, combinatorial optimization, computer vision.

Erin Solovey, PhD (*Tufts University*). Assistant Professor. Human-computer interaction, brain-computer interfaces, tangible interaction, machine learning, human interaction with complex and autonomous systems.

Julia Stoyanovich, PhD (*Columbia University*). Assistant Professor. Data and knowledge management, big data, biological data management, search and ranking.

Brian Stuart, PhD (*Purdue University*). Associate Teaching Professor. Machine learning, networking, robotics, image processing, simulation, interpreters, data storage, operating systems, computer science, data communications, distributed/operating systems, accelerated computer programming, computer graphics.

Filippos Vokolos, PhD (*Polytechnic University*). Assistant Teaching Professor. System architecture, principles of software design and construction, verification and validation methods for the development of large software systems, foundations of software engineering, software verification & validation, software design, programming languages, dependable software systems.

Emeritus Faculty

Valerie Ann Yonker, PhD (*Drexel University*). Associate Teaching Professor Emerita. Human service information systems, systems analysis and design, measurement in software evaluation, knowledge engineering.

Health Informatics

Major: Health Informatics

Degree Awarded: Master of Science in Health Informatics (MSHI)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.2706

Standard Occupational Classification (SOC) code: 15-1111

About the Program

The Master of Science in Health Informatics (MSHI) at the College of Computing & Informatics prepares graduates to use data, information and knowledge for scientific inquiry and problem solving to improve health outcomes. The program addresses the challenges and opportunities encountered as healthcare transforms itself into a digital, patient-centered system. The inter-disciplinary nature of the MSHI program brings clinicians and IT professionals together to analyze problems and develop solutions through the application of advanced information technology.

Students in this program complete their required courses in the College of Computing & Informatics and choose from a group of approved electives drawn from the College of Nursing and Health Professions, the Dornsife School of Public Health and the LeBow College of Business. All courses are delivered online and students are encouraged to enroll in approved experiential learning programs. Under the guidance of skilled faculty, students engage in a variety of learning activities, develop their organizational leadership skills and develop an appreciation of the varied perspectives in today's healthcare world.

The MS in Health Informatics enables IT professionals who want to expand their knowledge and skills into healthcare, whether in patient care organizations such as hospitals and clinics, or the insurance and pharmaceutical industries. The flexibility of this program is ideal for clinicians who wish to acquire technical skills to advance their careers in today's competitive health care environment.

Drexel's MSHI degree program is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM). Drexel University's educational programs are accredited by MSCHE (Middle States Commission on Higher Education).

Admission Requirements

The Master of Science in Health Informatics accepts applicants who hold a Bachelor's degree from an accredited university. Please visit the College of Computing & Informatics' website (<https://drexel.edu/cci/admissions/graduate-professional-development/admissions-information-and-requirements/ms-programs-admissions-requirements/>) for more information on admission requirements.

Additional Information

For more information about this program, visit the College of Computing & Informatics' MS in Health Informatics (<https://drexel.edu/cci/academics/graduate-programs/ms-in-health-informatics/>) web page.

Degree Requirements

The curriculum is based around contemporary health issues and has been designed to help students understand the current landscape of health informatics and how information, technology and people relate and intersect in healthcare environments. Because health informatics is an interdisciplinary field, all students will complete a common core of 11 courses (33 quarter hours) from the College of Computing & Informatics before choosing from a suite of specialized electives offered by the College of Computing & Informatics or other Colleges at Drexel University.

Required Courses		
INFO 540	Perspectives on Information Systems	3.0
INFO 600	Web Systems & Architecture	3.0
INFO 605	Database Management Systems	3.0
INFO 606	Advanced Database Management	3.0
INFO 620	Information Systems Analysis and Design	3.0
INFO 648	Healthcare Informatics	3.0
INFO 659	Introduction to Data Analytics	3.0
INFO 712	Information Assurance	3.0
INFO 896	Health Informatics Experience *	3.0
NURS 557	Leadership and Stewardship in the Health Professions	3.0
NURS 558	Economics of Healthcare Management & Policy	3.0
Approved Electives		9.0
Choose three of the following:		
BST 571	Introduction to Biostatistics	
BUSN 651	Healthcare Business Practice I: Foundations	

BUSN 652	Healthcare Business Practice II
BUSN 653	Healthcare Business Practice III: Capstone
DSCI 511	Data Acquisition and Pre-Processing
DSCI 521	Data Analysis and Interpretation
EPI 570	Introduction to Epidemiology
EPI 572	Design and Analysis of Epidemiological Studies
HSAD 505	Ethical and Legal Issues in Healthcare Management and Policy
INFO 517	Principles of Cybersecurity
INFO 608	Human-Computer Interaction
INFO 610	Analysis of Interactive Systems
INFO 611	Design of Interactive Systems
INFO 622	Content Representation
INFO 623	Social Network Analytics
INFO 624	Information Retrieval Systems
INFO 634	Data Mining
INFO 646	Information Systems Management
INFO 731	Managing Health Informatics Projects
INFO 732	Healthcare Informatics: Planning & Evaluation
INFO 733	Public Health Informatics
NURS 531	Epidemiology in Action: Tracking Health & Disease
NURS 532	Evaluation of Health Outcomes
NURS 564	The Business of Healthcare
RSCH 519	Introduction to Biostatistics
RSCH 523	Methods for Health Research
SE 630	Software Engineering Economics
Free electives	3.0
Total Credits	45.0

* Students are encouraged to approach the program director to develop a project assignment and agreement for INFO 896.

Sample Plan of Study

Term 1		Credits
INFO 540	Perspectives on Information Systems	3.0
INFO 648	Healthcare Informatics	3.0
	Term Credits	6.0
Term 2		
INFO 600	Web Systems & Architecture	3.0
INFO 605	Database Management Systems	3.0
	Term Credits	6.0
Term 3		
INFO 620	Information Systems Analysis and Design	3.0
INFO 659	Introduction to Data Analytics	3.0
	Term Credits	6.0
Term 4		
INFO 712	Information Assurance	3.0
Approved Elective		3.0
	Term Credits	6.0
Term 5		
NURS 557	Leadership and Stewardship in the Health Professions	3.0
Approved Elective		3.0
	Term Credits	6.0
Term 6		
INFO 606	Advanced Database Management	3.0
NURS 558	Economics of Healthcare Management & Policy	3.0
	Term Credits	6.0
Term 7		
Approved Elective		3.0
Free Elective		3.0
	Term Credits	6.0
Term 8		

INFO 896	Health Informatics Experience	3.0
	Term Credits	3.0
Total Credit: 45.0		

Dual Degree Opportunities

Graduate students already enrolled in a master's degree program at Drexel have the opportunity, through the dual master's program, to work simultaneously on two CCI master's degrees and to receive both upon graduation. To be eligible, graduate students must be currently working on their first CCI master's degree when requesting admission to the second CCI master's degree. They must obtain approval from the graduate advisors of both programs and work out a plan of study encompassing coursework and/or research (thesis) credits for both degrees. Please contact your advisor (<https://drexel.edu/cci/current-students/graduate-professional-development/advising/>) for more information on program requirements as some CCI master's degree combinations may require additional pre-requisites.

The dual master's student must complete the Change of Curriculum and Status form (<https://drexel.edu/graduatecollege/forms-policies/forms/>) and obtain approvals from both graduate advisors. Final approval is granted by the Graduate College (<http://drexel.edu/graduatecollege/>). The student is then registered in both majors simultaneously. Upon graduation, the student must file two Application for Degree (<http://drexel.edu/drexelcentral/graduation/information/applying-for-degree/>) forms.

Evaluations

The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the Health Informatics degree is evaluated relative to the following Learning Objectives:

Specific learning outcomes for program graduates include the following:

- Articulate the ways in which data, information, and knowledge are used to solve health problems from the individual to the population level.
- Apply theories, methods, and processes for the generation, storage, retrieval, use, management, and sharing of healthcare data, information, and knowledge.
- Apply, adapt, and validate informatics concepts and approaches as they relate to specific biomedical and healthcare problems.
- Select relevant concepts and techniques from the social sciences to solve problems in health informatics.
- Work collaboratively across disciplines to define, discuss, and resolve health problems.
- Analyze the ethical and policy issues related to biomedical and healthcare informatics.

Facilities

3675 Market Street

In March 2019, the College of Computing & Informatics relocated to 3675 Market (<https://drexel.edu/cci/about/our-facilities/>). For the first time in the College's history, all CCI faculty, students and professional staff are housed under one roof. Occupying two floors in the brand new uCity Square building, CCI's new home offers state-of-the-art technology in our classrooms, labs, meeting areas and collaboration spaces. 3675 Market offers Class A laboratory, office, coworking, and convening spaces. In fall 2019, the College will open a third floor which will include additional offices, classrooms, a research lab, a maker space, and a ground-

breaking DXC Technology Innovation Lab. Located at the intersection of Market Street and 37th Street, 3675 Market will act as a physical nexus, bridging academic campuses and medical centers to the east and south, the commercial corridors along Market Street and Chestnut Street, and the residential communities to the north and west.

The uCity Square building offers:

- Speculative lab/office space
- World-class facilities operated by CIC (<https://cic.us/philadelphia/>)
- Café/restaurant on-site
- Quorum, a two-story, 15K SF convening space and conference center
- Adjacent to future public square
- Access to Science Center's nationally renowned business acceleration and technology commercialization programs

Drexel University Libraries

Drexel University Libraries (<http://www.library.drexel.edu/>) is a learning enterprise, advancing the University's academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through three physical locations, including W. W. Hagerty Library, Queen Lane Library, and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at [library.drexel.edu](http://www.library.drexel.edu/) (<http://www.library.drexel.edu/>) or in-person at W. W. Hagerty Library (<http://www.library.drexel.edu/locations/>).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

CCI Commons

Located on the 10th floor of 3675 Market Street, the CCI Commons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, and more collaborative space for its students. Students have access to 3675 Market's fully equipped conference room with 42" displays and videoconferencing capabilities. The CCI Commons provides technical support to students, faculty, and professional staff. In addition, the staff provides audio-visual support for all presentation classrooms within 3675 Market. Use of the CCI Commons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the CCI Commons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in

the CCI Commons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as "DreamSpark" that allows students free access to a wide array of Microsoft software titles and operating systems.

The CCI Commons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University's network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

CCI Learning Center

The CCI Learning Center (CCILC), located in 3675 Market Street's CCI Commons student computer lab, provides consulting and other learning resources for students taking computer science classes. The CCILC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

The CCILC and CCI Commons serve as a central hub for small group work, student meetings, and TA assistance.

Research Laboratories

The College houses multiple research labs, led by CCI faculty, in 3675 Market Street including: the Drexel Health and Risk Communication Lab, Interactive Systems for Healthcare, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), High Performance Computing Laboratory (SPIRAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Social Computing Research Group, Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College's research web page (<http://cci.drexel.edu/research.aspx>).

Computing & Informatics Faculty

Denise E. Agosto, PhD (*Rutgers, The State University of New Jersey*). Professor. Youth information behaviors, public libraries, multicultural issues in youth library services, and qualitative research methods.

Yuan An, PhD (*University of Toronto, Canada*) Director of *International Programs*. Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

David Augenblick, MS (*University of Pennsylvania*). Associate Teaching Professor. Introductory and object-oriented programming, data structures and database systems, computer application project management, application of computer programming principles and solutions to engineering problems.

Marcello Balduccini, PhD (*Texas Tech University*) Senior Research Scientist, *Applied Informatics Group*. Associate Research Professor. Logic programming, declarative programming, answer set programming, knowledge representation, various types of reasoning

Ellen Bass, PhD (*Georgia Institute of Technology*) Joint Appointment with the *College of Nursing and Health Professions*. Professor. Characterizing human judgement and decision making, modeling human judgement when supported by information automation, computational models of human-human and human-automation coordination.

Mark Boady, PhD (*Drexel University*). Assistant Teaching Professor. Computer Algebra, complex symbolic calculations, automation of computation problems

David E. Breen, PhD (*Rensselaer Polytechnic Institute*). Associate Professor. Self-organization, biomedical image/video analysis, biological simulation, geometric modeling and visualization

Matthew Burlick, PhD (*Stevens Institute of Technology*). Assistant Teaching Professor. Image processing, machine learning, real-time video tracking, object detection and classification, statistics/probability, and acoustics

Yuanfang Cai, PhD (*University of Virginia*). Associate Professor. Formal software design modeling and analysis, software economics, software evolution and modularity.

Christopher Carroll, MS (*Drexel University*) *BSCST Program Director*. Associate Teaching Professor. Information technology within healthcare companies, computer networking and design, IT infrastructure, server technology, information security, virtualization and cloud computing.

Bruce W. Char, PhD (*University of California-Berkeley*). Professor. Symbolic mathematical computation, algorithms and systems for computer algebra, problem-solving environments parallel and distributed computation.

Chaomei Chen, PhD (*University of Liverpool*). Professor. Information visualization, visual analytics, knowledge domain visualization, network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Catherine D. Collins, MLIS (*Indiana University*). Associate Teaching Professor. Knowledge management, collection development, management of information organizations, information sources and services, international development.

M. Carl Drott, PhD (*University of Michigan*). Associate Professor. Systems analysis techniques, web usage, competitive intelligence.

Andrea Forte, PhD (*Georgia Institute of Technology*) *PhD Program Director, and MS in Information Program Director*. Associate Professor. Social computing, human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, information literacy.

Susan Gasson, PhD (*University of Warwick*). Associate Professor. The co-design of business and IT-systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Christopher Geib, PhD (*University of Edinburgh*). Associate Professor. Decision making and reasoning under conditions of uncertainty, planning, scheduling, constraint, based reasoning, human computer and robot interaction, probabilistic reasoning, computer network security, large scale process control, user interfaces.

Colin Gordon, PhD (*University of Washington*). Assistant Professor. Software reliability, program behavior, concurrent and systems-level code, formal assurance, programming models, distributed computing, even testing

Jane Greenberg, PhD (*University of Pittsburgh*) *Alice B. Kroeger Professor*. Metadata, ontological engineering, data science, knowledge organization, information retrieval

Peter Grillo, PhD (*Temple University*) *Associate Department Head for Undergraduate Affairs, Information Science*. Teaching Professor. Strategic applications of technology within organizations.

Jeremy R. Johnson, PhD (*Ohio State University*). Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Xia Lin, PhD (*University of Maryland*) *Department Head, Information Science*. Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Geoffrey Mainland, PhD (*Harvard University*). Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD (*University of Toronto*) *The Auerbach Berger Chair in Cybersecurity Distinguished Professor of Computer Science*. Professor. Software engineering; software security; code analysis; evolutionary computation.

Gabriela Marcu, PhD (*Carnegie Mellon University*). Assistant Teaching Professor. Human-computer interaction, health informatics, action research, ethnography, user experience design, designing for social change, organizational information systems, ubiquitous computing, knowledge management.

Adelaida Alban Medlock, MS (*Drexel University*). Associate Teaching Professor. Introductory programming; computer science education.

William Mongan, MS (*Drexel University*) *Associate Department Head for Undergraduate Affairs, Computer Science*. Associate Teaching Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach

Ko Nishino, PhD (*University of Tokyo*) *Associate Department Head for Graduate Affairs, Computer Science*. Professor. Computer vision, computer graphics, analysis and synthesis of visual appearance.

Danuta A. Nitecki, PhD (*University of Maryland at College Park*) *Dean of Libraries*. Professor. Library metrics and use in management, library as place, and academic library service models.

Krzysztof Nowak, PhD (*Washington University*). Associate Teaching Professor. Fourier analysis, partial differential equations, image processing, wavelets, asymptotic distribution of eigenvalues, numerical methods and algorithms, computer science education.

Santiago Ontañón, PhD (*University of Barcelona*). Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning

Jung-ran Park, PhD (*University of Hawaii at Manoa*). Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Alex Poole, PhD (*University of North Carolina*). Assistant Professor. Digital curation, archives and records management, digital humanities, and diversity, inclusivity, and equity.

Jeffrey L. Popyack, PhD (*University of Virginia*). Professor. Operations research, stochastic optimization, computational methods of Markov decision processes; artificial intelligence, computer science education.

Lori Richards, PhD (*University of North Carolina*). Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Michelle L. Rogers, PhD (*University of Wisconsin-Madison*). Associate Professor. Human-computer interaction, healthcare informatics, human factors engineering, socio-technical systems, health services research, patient safety.

Jeffrey Salvage, MS (*Drexel University*). Teaching Professor. Object-oriented programming, multi-agent systems, software engineering, database theory, introductory programming, data structures.

Dario Salvucci, PhD (*Carnegie Mellon University*) *Department Head, Computer Science*. Professor. Human computer interaction, cognitive science, machine learning, applications for driving.

Kurt Schmidt, MS (*Drexel University*). Associate Teaching Professor. Data structures, math foundations for computer science, programming tools, programming languages.

Ali Shokoufandeh, PhD (*Rutgers University*) *Senior Associate Dean of Research*. Professor. Theory of algorithms, graph theory, combinatorial optimization, computer vision.

Erin Solovey, PhD (*Tufts University*). Assistant Professor. Human-computer interaction, brain-computer interfaces, tangible interaction, machine learning, human interaction with complex and autonomous systems.

Il-Yeol Song, PhD (*Louisiana State University*). Professor. Conceptual modeling, ontology and patterns, data warehouse and OLAP, object-oriented analysis and design with UML, medical and bioinformatics data modeling & integration,.

Julia Stoyanovich, PhD (*Columbia University*). Assistant Professor. Data and knowledge management, big data, biological data management, search and ranking.

Brian Stuart, PhD (*Purdue University*). Associate Teaching Professor. Machine learning, networking, robotics, image processing, simulation, interpreters, data storage, operating systems, computer science, data communications, distributed/operating systems, accelerated computer programming, computer graphics.

Filippos Vokolos, PhD (*Polytechnic University*). Assistant Teaching Professor. System architecture, principles of software design and construction, verification and validation methods for the development of large software systems, foundations of software engineering, software verification & validation, software design, programming languages, dependable software systems.

Rosina Weber, PhD (*Federal University of Santa Catarina*). Associate Professor. Case-based reasoning, explainable artificial intelligence, machine learning, textual analytics, natural language understanding, language models, recommender systems, technological aspects of knowledge management, project management, and requirements engineering.

Erija Yan, PhD (*Indiana University*). Assistant Professor. Network Science, information analysis and retrieval, scholarly communication methods and applications.

Emeritus Faculty

Michael E. Atwood, PhD (*University of Colorado*). Professor Emeritus. Human-computer interaction, computer-supported cooperative work, organizational memory.

Thomas A. Childers, PhD (*Rutgers University*). Professor Emeritus. Measurement, evaluation, and planning of information and library services, the effectiveness of information organizations.

David E. Fenske, PhD (*University of Wisconsin-Madison*). Dean Emeritus and Professor. Digital libraries, informatics, knowledge management and information technologies.

John B. Hall, PhD (*Florida State University*). Professor Emeritus. Academic library service, library administration, organization of materials.

Katherine W. McCain, PhD (*Drexel University*). Professor Emeritus. Scholarly communication, information production and use in the research process, development and structure of scientific specialties, diffusion of innovation, bibliometrics, evaluation of information retrieval systems.

Carol Hansen Montgomery, PhD (*Drexel University*) *Dean of Libraries Emeritus*. Research Professor. Selection and use of electronic collections, evaluation of library and information systems, digital libraries, economics of libraries and digital collections.

Delia Neuman, PhD (*The Ohio State University*). Professor Emerita. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Gerry Stahl, PhD (*University of Colorado*). Professor Emeritus. Human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, theory of collaboration.

Howard D. White, PhD (*University of California at Berkeley*). Professor Emeritus. Literature information systems, bibliometrics, research methods, collection development, online searching.

Susan Wiedenbeck, PhD (*University of Pittsburgh*). Professor Emeritus. Human-computer interaction, end-user programming/end-user development, empirical studies of programmers, interface design and evaluation.

Information Systems

Standard Occupational Classification (SOC) code: 11-3021

About the Program

The College of Computing & Informatics' Master of Science in Information Systems (MSIS) prepares students for both the technical and real-world aspects of creating and managing information systems. The program is offered both online and on campus, part-time and full-time.

The program is designed for students with or without prior background in information systems, seeking to learn latest methods in data analysis, human-centered computing, and information systems. Courses integrate the business, organizational, and technical aspects of computer-based information systems, while offering the chance to develop and expand expertise in three specialist areas:

1. Software and systems development, such as organizational information system design, requirements analysis, software project management, modern systems development and implementation.
2. Data analytics, information, and knowledge management, such as organizational data management, data mining, natural language processing, intelligent systems, and competitive intelligence.
3. Human-centered computing, such as human-computer interaction, user-experience design, social computing, collaboration systems, and online community support.

A graduate co-op is available for this program. For more information, visit the Steinbright Career Development Center's website (<http://www.drexel.edu/scdc/co-op/graduate/>).

Additional Information

For more information about this program, visit the College of Computing & Informatics' MS in Information Systems (<https://drexel.edu/cc/academics/graduate-programs/ms-in-information-systems/>) web page.

Admission Requirements

The Master of Science in Information Systems accepts applicants who hold a Bachelor's degree from an accredited university. Please visit the College of Computing & Informatics' website (<https://drexel.edu/cc/academics/graduate-programs/ms-in-information-systems/>) for more information on admission requirements.

Degree Requirements

Required Courses		
INFO 532	Software Development	3.0
INFO 540	Perspectives on Information Systems	3.0
INFO 600	Web Systems & Architecture	3.0
INFO 605	Database Management Systems	3.0
INFO 608	Human-Computer Interaction	3.0
INFO 620	Information Systems Analysis and Design	3.0
INFO 646	Information Systems Management	3.0
SE 627	Requirements Engineering and Management	3.0
SE 638	Software Project Management	3.0
Distribution Requirements		12.0
Select four of the following:		
CS 520	Computer Science Foundations	
CS 570	Programming Foundations	
CS 571	Advanced Programming Techniques	
INFO 517	Principles of Cybersecurity	
INFO 606	Advanced Database Management	
INFO 622	Content Representation	
INFO 623	Social Network Analytics	
INFO 624	Information Retrieval Systems	
INFO 633	Information Visualization	
INFO 634	Data Mining	
INFO 648	Healthcare Informatics	
INFO 655	Intro to Web Programming	

INFO 659	Introduction to Data Analytics	
INFO 670	Cross-platform Mobile Development	
INFO 690	Understanding Users: User Experience Research Methods	
INFO 691	Prototyping the User Experience	
INFO 710	Information Forensics	
INFO 712	Information Assurance	
INFO 731	Managing Health Informatics Projects	
INFO 732	Healthcare Informatics: Planning & Evaluation	
SE 578	Security Engineering	
SE 630	Software Engineering Economics	
SE 636	Software Engineering Process	
Free Electives *		6.0
Total Credits		45.0

* Courses in the distribution course set that students do not take to meet the distribution requirement may be taken as free electives. All other masters-level INFO courses may be taken as free electives. MSIS students may not take courses designated as doctoral-level courses.

Dual Degree Opportunities

Graduate students already enrolled in a master's degree program at Drexel have the opportunity, through the dual master's program to work simultaneously on two master's degrees and to receive both upon graduation. To be eligible, graduate students must be currently working on their first degree when requesting admission to the second. They must

obtain approval from the graduate advisors of both programs and work out a plan of study encompassing coursework and/or research (thesis) credits for both degrees. Please contact your advisor (<https://drexel.edu/cci/current-students/graduate-professional-development/advising/>) for more information on program requirements as some CCI master's degree combinations may require additional pre-requisites.

The dual master's student must complete the Change of Curriculum and Status form (<https://drexel.edu/graduatecollege/forms-policies/forms/>) and obtain approvals from both graduate advisors. Final approval is granted by the Graduate College (<http://drexel.edu/graduatecollege/>). The student is then registered in both majors simultaneously. Upon graduation, the student must file two Application for Degree (<http://drexel.edu/drexelcentral/graduation/information/applying-for-degree/>) forms.

Facilities

3675 Market Street

In March 2019, the College of Computing & Informatics relocated to 3675 Market (<https://drexel.edu/cci/about/our-facilities/>). For the first time in the College's history, all CCI faculty, students and professional staff are housed under one roof. Occupying two floors in the brand new uCity Square building, CCI's new home offers state-of-the-art technology in our classrooms, labs, meeting areas and collaboration spaces. 3675 Market offers Class A laboratory, office, coworking, and convening spaces. In fall 2019, the College will open a third floor which will include additional offices, classrooms, a research lab, a maker space, and a ground-breaking DXC Technology Innovation Lab. Located at the intersection of Market Street and 37th Street, 3675 Market will act as a physical nexus, bridging academic campuses and medical centers to the east and south, the commercial corridors along Market Street and Chestnut Street, and the residential communities to the north and west.

The uCity Square building offers:

- Speculative lab/office space
- World-class facilities operated by CIC (<https://cic.us/philadelphia/>)
- Café/restaurant on-site
- Quorum, a two-story, 15K SF convening space and conference center
- Adjacent to future public square
- Access to Science Center's nationally renowned business acceleration and technology commercialization programs

Drexel University Libraries

Drexel University Libraries (<http://www.library.drexel.edu/>) is a learning enterprise, advancing the University's academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through three physical locations, including W. W. Hagerty Library, Queen Lane Library, and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at [library.drexel.edu](http://www.library.drexel.edu) (<http://www.library.drexel.edu/>) or in-person at W. W. Hagerty Library (<http://www.library.drexel.edu/locations/>).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

CCI Commons

Located on the 10th floor of 3675 Market Street, the CCI Commons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, and more collaborative space for its students. Students have access to 3675 Market's fully equipped conference room with 42" displays and videoconferencing capabilities. The CCI Commons provides technical support to students, faculty, and professional staff. In addition, the staff provides audio-visual support for all presentation classrooms within 3675 Market. Use of the CCI Commons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the CCI Commons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the CCI Commons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as "DreamSpark" that allows students free access to a wide array of Microsoft software titles and operating systems.

The CCI Commons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University's network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

CCI Learning Center

The CCI Learning Center (CCILC), located in 3675 Market Street's CCI Commons student computer lab, provides consulting and other learning resources for students taking computer science classes. The CCILC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

The CCILC and CCI Commons serve as a central hub for small group work, student meetings, and TA assistance.

Research Laboratories

The College houses multiple research labs, led by CCI faculty, in 3675 Market Street including: the Drexel Health and Risk Communication Lab, Interactive Systems for Healthcare, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), High Performance Computing Laboratory (SPIRAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Social Computing Research Group, Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College's research web page (<http://cci.drexel.edu/research.aspx>).

Evaluations

The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the Information Systems degree is evaluated relative to the following Learning Objectives:

Graduates of the MS in Information Systems program are prepared to assume leadership and management positions designing, developing, and delivering innovative technological solutions to information problems in a variety of contexts. Their preparation encompasses the knowledge and abilities required to:

- Use a human-centered approach to analyze information needs and design solutions to meet those needs.
- Lead or contribute substantially to a team in developing information technology products and services.
- Evaluate, compare, and select from alternative and emerging information technologies.
- Communicate with technical and non-technical audiences about information technology concepts and stakeholder needs.
- Contribute substantially to an information technology plan for an organization.
- Explain information technology uses, benefits, and ethical and global issues for individuals and organizations.

Computing & Informatics Faculty

Denise E. Agosto, PhD (*Rutgers, The State University of New Jersey*). Professor. Youth information behaviors, public libraries, multicultural issues in youth library services, and qualitative research methods.

Yuan An, PhD (*University of Toronto, Canada*) *Director of International Programs*. Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

David Augenblick, MS (*University of Pennsylvania*). Associate Teaching Professor. Introductory and object-oriented programming, data structures and database systems, computer application project management, application of computer programming principles and solutions to engineering problems.

Marcello Balduccini, PhD (*Texas Tech University*) *Senior Research Scientist, Applied Informatics Group*. Associate Research Professor. Logic programming, declarative programming, answer set programming, knowledge representation, various types of reasoning

Ellen Bass, PhD (*Georgia Institute of Technology*) *Joint Appointment with the College of Nursing and Health Professions*. Professor. Characterizing human judgement and decision making, modeling human judgement when supported by information automation, computational models of human-human and human-automation coordination.

Mark Boady, PhD (*Drexel University*). Assistant Teaching Professor. Computer Algebra, complex symbolic calculations, automation of computation problems

David E. Breen, PhD (*Rensselaer Polytechnic Institute*). Associate Professor. Self-organization, biomedical image/video analysis, biological simulation, geometric modeling and visualization

Matthew Burlick, PhD (*Stevens Institute of Technology*). Assistant Teaching Professor. Image processing, machine learning, real-time video

tracking, object detection and classification, statistics/probability, and acoustics

Yuanfang Cai, PhD (*University of Virginia*). Associate Professor. Formal software design modeling and analysis, software economics, software evolution and modularity.

Christopher Carroll, MS (*Drexel University*) *BSCST Program Director*. Associate Teaching Professor. Information technology within healthcare companies, computer networking and design, IT infrastructure, server technology, information security, virtualization and cloud computing.

Bruce W. Char, PhD (*University of California-Berkeley*). Professor. Symbolic mathematical computation, algorithms and systems for computer algebra, problem-solving environments parallel and distributed computation.

Chaomei Chen, PhD (*University of Liverpool*). Professor. Information visualization, visual analytics, knowledge domain visualization, network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Catherine D. Collins, MLIS (*Indiana University*). Associate Teaching Professor. Knowledge management, collection development, management of information organizations, information sources and services, international development.

M. Carl Drott, PhD (*University of Michigan*). Associate Professor. Systems analysis techniques, web usage, competitive intelligence.

Andrea Forte, PhD (*Georgia Institute of Technology*) *PhD Program Director, and MS in Information Program Director*. Associate Professor. Social computing, human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, information literacy.

Susan Gasson, PhD (*University of Warwick*). Associate Professor. The co-design of business and IT-systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Christopher Geib, PhD (*University of Edinburgh*). Associate Professor. Decision making and reasoning under conditions of uncertainty, planning, scheduling, constraint, based reasoning, human computer and robot interaction, probabilistic reasoning, computer network security, large scale process control, user interfaces.

Colin Gordon, PhD (*University of Washington*). Assistant Professor. Software reliability, program behavior, concurrent and systems-level code, formal assurance, programming models, distributed computing, even testing

Jane Greenberg, PhD (*University of Pittsburgh*) *Alice B. Kroeger Professor*. Metadata, ontological engineering, data science, knowledge organization, information retrieval

Peter Grillo, PhD (*Temple University*) *Associate Department Head for Undergraduate Affairs, Information Science*. Teaching Professor. Strategic applications of technology within organizations.

Jeremy R. Johnson, PhD (*Ohio State University*). Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Xia Lin, PhD (*University of Maryland*) *Department Head, Information Science*. Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction,

object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Geoffrey Mainland, PhD (*Harvard University*). Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD (*University of Toronto*) *The Auerbach Berger Chair in Cybersecurity Distinguished Professor of Computer Science*. Professor. Software engineering; software security; code analysis; evolutionary computation.

Gabriela Marcu, PhD (*Carnegie Mellon University*). Assistant Teaching Professor. Human-computer interaction, health informatics, action research, ethnography, user experience design, designing for social change, organizational information systems, ubiquitous computing, knowledge management.

Adelaida Alban Medlock, MS (*Drexel University*). Associate Teaching Professor. Introductory programming; computer science education.

William Mongan, MS (*Drexel University*) *Associate Department Head for Undergraduate Affairs, Computer Science*. Associate Teaching Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach

Ko Nishino, PhD (*University of Tokyo*) *Associate Department Head for Graduate Affairs, Computer Science*. Professor. Computer vision, computer graphics, analysis and synthesis of visual appearance.

Danuta A. Nitecki, PhD (*University of Maryland at College Park*) *Dean of Libraries*. Professor. Library metrics and use in management, library as place, and academic library service models.

Krzysztof Nowak, PhD (*Washington University*). Associate Teaching Professor. Fourier analysis, partial differential equations, image processing, wavelets, asymptotic distribution of eigenvalues, numerical methods and algorithms, computer science education.

Santiago Ontañón, PhD (*University of Barcelona*). Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning

Jung-ran Park, PhD (*University of Hawaii at Manoa*). Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Alex Poole, PhD (*University of North Carolina*). Assistant Professor. Digital curation, archives and records management, digital humanities, and diversity, inclusivity, and equity.

Jeffrey L. Popyack, PhD (*University of Virginia*). Professor. Operations research, stochastic optimization, computational methods of Markov decision processes; artificial intelligence, computer science education.

Lori Richards, PhD (*University of North Carolina*). Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Michelle L. Rogers, PhD (*University of Wisconsin-Madison*). Associate Professor. Human-computer interaction, healthcare informatics, human

factors engineering, socio-technical systems, health services research, patient safety.

Jeffrey Salvage, MS (*Drexel University*). Teaching Professor. Object-oriented programming, multi-agent systems, software engineering, database theory, introductory programming, data structures.

Dario Salvucci, PhD (*Carnegie Mellon University*) *Department Head, Computer Science*. Professor. Human computer interaction, cognitive science, machine learning, applications for driving.

Kurt Schmidt, MS (*Drexel University*). Associate Teaching Professor. Data structures, math foundations for computer science, programming tools, programming languages.

Ali Shokoufandeh, PhD (*Rutgers University*) *Senior Associate Dean of Research*. Professor. Theory of algorithms, graph theory, combinational optimization, computer vision.

Erin Solovey, PhD (*Tufts University*). Assistant Professor. Human-computer interaction, brain-computer interfaces, tangible interaction, machine learning, human interaction with complex and autonomous systems.

Il-Yeol Song, PhD (*Louisiana State University*). Professor. Conceptual modeling, ontology and patterns, data warehouse and OLAP, object-oriented analysis and design with UML, medical and bioinformatics data modeling & integration,.

Julia Stoyanovich, PhD (*Columbia University*). Assistant Professor. Data and knowledge management, big data, biological data management, search and ranking.

Brian Stuart, PhD (*Purdue University*). Associate Teaching Professor. Machine learning, networking, robotics, image processing, simulation, interpreters, data storage, operating systems, computer science, data communications, distributed/operating systems, accelerated computer programming, computer graphics.

Filippos Vokolos, PhD (*Polytechnic University*). Assistant Teaching Professor. System architecture, principles of software design and construction, verification and validation methods for the development of large software systems, foundations of software engineering, software verification & validation, software design, programming languages, dependable software systems.

Rosina Weber, PhD (*Federal University of Santa Catarina*). Associate Professor. Case-based reasoning, explainable artificial intelligence, machine learning, textual analytics, natural language understanding, language models, recommender systems, technological aspects of knowledge management, project management, and requirements engineering.

Erija Yan, PhD (*Indiana University*). Assistant Professor. Network Science, information analysis and retrieval, scholarly communication methods and applications.

Emeritus Faculty

Michael E. Atwood, PhD (*University of Colorado*). Professor Emeritus. Human-computer interaction, computer-supported cooperative work, organizational memory.

Thomas A. Childers, PhD (*Rutgers University*). Professor Emeritus. Measurement, evaluation, and planning of information and library services, the effectiveness of information organizations.

David E. Fenske, PhD (*University of Wisconsin-Madison*). Dean Emeritus and Professor. Digital libraries, informatics, knowledge management and information technologies.

John B. Hall, PhD (*Florida State University*). Professor Emeritus. Academic library service, library administration, organization of materials.

Katherine W. McCain, PhD (*Drexel University*). Professor Emeritus. Scholarly communication, information production and use in the research process, development and structure of scientific specialties, diffusion of innovation, bibliometrics, evaluation of information retrieval systems.

Carol Hansen Montgomery, PhD (*Drexel University*) *Dean of Libraries Emeritus*. Research Professor. Selection and use of electronic collections, evaluation of library and information systems, digital libraries, economics of libraries and digital collections.

Delia Neuman, PhD (*The Ohio State University*). Professor Emerita. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Gerry Stahl, PhD (*University of Colorado*). Professor Emeritus. Human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, theory of collaboration.

Howard D. White, PhD (*University of California at Berkeley*). Professor Emeritus. Literature information systems, bibliometrics, research methods, collection development, online searching.

Susan Wiedenbeck, PhD (*University of Pittsburgh*). Professor Emeritus. Human-computer interaction, end-user programming/end-user development, empirical studies of programmers, interface design and evaluation.

Library and Information Science

Major: Library and Information Science

Degree Awarded: Master of Science in Information Science (MSI)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 25.0101

Standard Occupational Classification (SOC) code: 25-4021

About the Program

The Library and Information Science (LIS) graduate major integrates information technology, professional knowledge, and interdisciplinary, experiential learning to prepare our graduates to lead and innovate in libraries, archives, museums, and information organizations. The LIS graduate major in the MSI program is accredited by the American Library Association (ALA) since 1924, and is one of the one of the oldest continuously operating LIS graduate programs in North America.

Admission Requirements

The Master of Science in Information accepts applicants who hold a Bachelor's degree from an accredited university. Please visit the College of Computing & Informatics' website (<https://drexel.edu/cci/admissions/graduate-professional-development/admissions-information->

[and-requirements/ms-programs-admissions-requirements/](https://drexel.edu/cci/admissions/graduate-professional-development/admissions-information-requirements/ms-programs-admissions-requirements/)) for more information on admission requirements.

Additional Information

For more information about this program, visit the College of Computing & Informatics' MS in Information web page (<https://drexel.edu/cci/academics/graduate-programs/ms-in-information/>) and/or the Library and Information Science graduate major web page (<https://drexel.edu/cci/academics/graduate-programs/ms-in-information/library-science-graduate-program-major/>).

Facilities

3675 Market Street

In March 2019, the College of Computing & Informatics relocated to 3675 Market (<https://drexel.edu/cci/about/our-facilities/>). For the first time in the College's history, all CCI faculty, students and professional staff are housed under one roof. Occupying two floors in the brand new uCity Square building, CCI's new home offers state-of-the-art technology in our classrooms, labs, meeting areas and collaboration spaces. 3675 Market offers Class A laboratory, office, coworking, and convening spaces. In fall 2019, the College will open a third floor which will include additional offices, classrooms, a research lab, a maker space, and a ground-breaking DXC Technology Innovation Lab. Located at the intersection of Market Street and 37th Street, 3675 Market will act as a physical nexus, bridging academic campuses and medical centers to the east and south, the commercial corridors along Market Street and Chestnut Street, and the residential communities to the north and west.

The uCity Square building offers:

- Speculative lab/office space
- World-class facilities operated by CIC (<https://cic.us/philadelphia/>)
- Café/restaurant on-site
- Quorum, a two-story, 15K SF convening space and conference center
- Adjacent to future public square
- Access to Science Center's nationally renowned business acceleration and technology commercialization programs

Drexel University Libraries

Drexel University Libraries (<http://www.library.drexel.edu/>) is a learning enterprise, advancing the University's academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through three physical locations, including W. W. Hagerty Library, Queen Lane Library, and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at [library.drexel.edu](http://www.library.drexel.edu/) (<http://www.library.drexel.edu/>) or in-person at W. W. Hagerty Library (<http://www.library.drexel.edu/locations/>).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a

liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

CCI Commons

Located on the 10th floor of 3675 Market Street, the CCI Commons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, and more collaborative space for its students. Students have access to 3675 Market's fully equipped conference room with 42" displays and videoconferencing capabilities. The CCI Commons provides technical support to students, faculty, and professional staff. In addition, the staff provides audio-visual support for all presentation classrooms within 3675 Market. Use of the CCI Commons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the CCI Commons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the CCI Commons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as "DreamSpark" that allows students free access to a wide array of Microsoft software titles and operating systems.

The CCI Commons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University's network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

CCI Learning Center

The CCI Learning Center (CCILC), located in 3675 Market Street's CCI Commons student computer lab, provides consulting and other learning resources for students taking computer science classes. The CCILC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

The CCILC and CCI Commons serve as a central hub for small group work, student meetings, and TA assistance.

Research Laboratories

The College houses multiple research labs, led by CCI faculty, in 3675 Market Street including: the Drexel Health and Risk Communication Lab, Interactive Systems for Healthcare, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), High Performance Computing Laboratory (SPIRAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Social Computing Research Group, Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College's research web page (<http://cci.drexel.edu/research.aspx>).

Evaluations

The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the Library and Information

Science graduate major is evaluated relative to the following Learning Objectives:

Graduates of the LIS graduate major in the Master of Science in Information (MSI) degree program are prepared to assume leadership positions in designing, executing, and evaluating information services and products and in managing organizations that facilitate access to recorded knowledge. Their preparation enables them to gain the knowledge and abilities required to:

- Explain the foundational principles, professional ethics and values, and social and technological contexts within which various information professionals work.
- Identify and analyze the information needs of various communities (e.g., academic institutions, local neighborhoods, workplaces, schools) and design and implement library/information programs and services to meet those needs.
- Analyze and apply information policies and information-related laws (including the standards and guidelines of pertinent professional organizations) that advance the creative and ethical applications of information technologies and the delivery of information resources throughout society.
- Foster the core values of the profession (e.g., access, equity, intellectual freedom, privacy, social justice) in all programs and services offered in these communities.
- Encourage the development of information literacy in support of all areas of individuals' and communities' needs (e.g., in formal and informal education, career development, healthcare and financial planning, research innovation, political and social engagement, etc.).
- Lead and manage information agencies, projects, and people through creative and effective approaches to planning, budgeting, policy making, fundraising, communication, and advocacy.
- Use research and data in sophisticated ways to demonstrate the value of the library and to help individuals and communities address community challenges (e.g., poverty and hunger, population shifts, economic development, preservation of cultural heritage, etc.).
- Help individuals and communities to understand, appraise, organize, manage, and preserve digital assets available through a variety of formal and informal sources and to create and manage their own digital identities and materials effectively.

Library & Information Science Faculty

Denise E. Agosto, PhD (*Rutgers, The State University of New Jersey*). Professor. Youth information behaviors, public libraries, multicultural issues in youth library services, and qualitative research methods.

Chaomei Chen, PhD (*University of Liverpool*). Professor. Information visualization, visual analytics, knowledge domain visualization, network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Catherine D. Collins, MLIS (*Indiana University*). Associate Teaching Professor. Knowledge management, collection development, management of information organizations, information sources and services, international development.

Susan Gasson, PhD (*University of Warwick*). Associate Professor. The co-design of business and IT-systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Jane Greenberg, PhD (*University of Pittsburgh*) Alice B. Kroeger Professor. Metadata, ontological engineering, data science, knowledge organization, information retrieval

Xia Lin, PhD (*University of Maryland*) Department Head, *Information Science*. Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Gabriela Marcu, PhD (*Carnegie Mellon University*). Assistant Teaching Professor. Human-computer interaction, health informatics, action research, ethnography, user experience design, designing for social change, organizational information systems, ubiquitous computing, knowledge management.

Jung-ran Park, PhD (*University of Hawaii at Manoa*). Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Lori Richards, PhD (*University of North Carolina*). Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Erija Yan, PhD (*Indiana University*). Assistant Professor. Network Science, information analysis and retrieval, scholarly communication methods and applications.

Emeritus Faculty

Thomas A. Childers, PhD (*Rutgers University*). Professor Emeritus. Measurement, evaluation, and planning of information and library services, the effectiveness of information organizations.

David E. Fenske, PhD (*University of Wisconsin-Madison*). Dean Emeritus and Professor. Digital libraries, informatics, knowledge management and information technologies.

John B. Hall, PhD (*Florida State University*). Professor Emeritus. Academic library service, library administration, organization of materials.

Katherine W. McCain, PhD (*Drexel University*). Professor Emeritus. Scholarly communication, information production and use in the research process, development and structure of scientific specialties, diffusion of innovation, bibliometrics, evaluation of information retrieval systems.

Delia Neuman, PhD (*The Ohio State University*). Professor Emerita. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Howard D. White, PhD (*University of California at Berkeley*). Professor Emeritus. Literature information systems, bibliometrics, research methods, collection development, online searching.

Software Engineering

Major: Software Engineering

Degree Awarded: Master of Science in Software Engineering (MSSE)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 14.0903

Standard Occupational Classification (SOC) code: 15-1132; 15-1133

About the Program

The College of Computing & Informatics' Master of Science in Software Engineering (MSSE) program was created in response to the growing importance of software in modern society and the rapid rise in demand for professional software engineers.

The MS in Software Engineering program draws on the broad strengths of the College of Computing & Informatics to provide a curriculum that encompasses behavioral, managerial, and technical aspects of software engineering. The program is appropriate for students interested in technical and managerial software work across a wide range of application domains.

All students in the program take a core curriculum that provides a foundation spanning key software engineering topics and providing an integrative software studio experience. Students also take electives allowing them to specialize and gain in-depth knowledge according to their individual interests and career goals. The degree program culminates in a hands-on capstone experience (Software Studio) in which graduate students work for two to three quarters on an intensive team-based software project, with the goal of applying what they have learned to a real-world, ongoing project.

Admission Requirements

The Master of Science in Software Engineering accepts applicants who hold a Bachelor's degree from an accredited university. Please visit the College of Computing & Informatics' website (<https://drexel.edu/cci/admissions/graduate-professional-development/admissions-information-and-requirements/ms-programs-admissions-requirements/>) for more information on admission requirements.

Additional Information

For more information about this program, please visit the College of Computing & Informatics' MS in Software Engineering (<http://drexel.edu/cci/academics/programs/graduate-programs/ms-in-software-engineering/>) web page (<https://drexel.edu/cci/academics/graduate-programs/ms-in-software-engineering/>).

Degree Requirements

Software Engineering Core Courses

Core Courses

SE 575	Software Design	3.0
SE 576	Software Reliability and Testing	3.0
SE 577	Software Architecture	3.0
SE 578	Security Engineering	3.0
SE 627	Requirements Engineering and Management	3.0
SE 630	Software Engineering Economics	3.0
SE 636	Software Engineering Process	3.0

Breadth Courses 12.0

Choose 12 credits from the following:

CS 500	Fundamentals of Databases
CS 530	Developing User Interfaces
CS 645	Network Security
CS 647	Distributed Systems Software
INFO 608	Human-Computer Interaction
INFO 633	Information Visualization
SE 610	Open Source Software Engineering
SE 572	Web Services and Mobile Architectures

SE 638 Software Project Management

Depth and Software Studio Courses 12.0

At least 12 total credits, including at least 6 and up to 9 Software Studio credits, are required

Choose 1 or 2 of the following to fulfill the depth requirement:

Any graduate CS course not required for the core or counted as a breadth course

ECEC 500	Fundamentals Of Computer Hardware
ECEC 622	Parallel Programming
ECEC 641	Web Security I
ECEC 632	Performance Analysis of Computer Networks
ECEC 642	Web Security II
ECEC 643	Web Security III
INFO 517	Principles of Cybersecurity
INFO 555	Introduction to Geographic Information Systems
INFO 605	Database Management Systems
INFO 606	Advanced Database Management
INFO 607	Applied Database Technologies
INFO 610	Analysis of Interactive Systems
INFO 611	Design of Interactive Systems
INFO 634	Data Mining
INFO 648	Healthcare Informatics
INFO 679	Information Ethics
INFO 710	Information Forensics
INFO 712	Information Assurance
INFO 725	Information Policy and Ethics

Complete 2 or 3 software studio courses:

SE 691	Software Studio
--------	-----------------

Total Credits 45.0

Sample Plan of Study

Term 1		Credits
SE 575	Software Design	3.0
SE 627	Requirements Engineering and Management	3.0
Term Credits		6.0
Term 2		Credits
SE 576	Software Reliability and Testing	3.0
SE 630	Software Engineering Economics	3.0
Term Credits		6.0
Term 3		Credits
SE 577	Software Architecture	3.0
SE 636	Software Engineering Process	3.0
Term Credits		6.0
Term 4		Credits
SE 578	Security Engineering	3.0
Breadth Course		3.0
Term Credits		6.0
Term 5		Credits
SE 691	Software Studio	3.0
Breadth Course		3.0
Term Credits		6.0
Term 6		Credits
SE 691	Software Studio	3.0
Breadth Course		3.0

Term Credits		6.0
Term 8		Credits

Depth Course	3.0
Term Credits	3.0
Total Credit: 45.0	

Dual Degree Opportunities

Graduate students already enrolled in a master's degree program at Drexel have the opportunity, through the dual master's program, to work simultaneously on two CCI master's degrees and to receive both upon graduation. To be eligible, graduate students must be currently working on their first CCI master's degree when requesting admission to the second CCI master's degree. They must obtain approval from the graduate advisors of both programs and work out a plan of study encompassing coursework and/or research (thesis) credits for both degrees. Please contact your advisor (<https://drexel.edu/cc/current-students/graduate-professional-development/advising/>) for more information on program requirements as some CCI master's degree combinations may require additional pre-requisites.

The dual master's student must complete the Change of Curriculum and Status form (<https://drexel.edu/graduatecollege/forms-policies/forms/>) and obtain approvals from both graduate advisors. Final approval is granted by the Graduate College (<http://drexel.edu/graduatecollege/>). The student is then registered in both majors simultaneously. Upon graduation, the student must file two Application for Degree (<http://drexel.edu/drexelcentral/graduation/information/applying-for-degree/>) forms.

Facilities

3675 Market Street

In March 2019, the College of Computing & Informatics relocated to 3675 Market (<https://drexel.edu/cc/about/our-facilities/>). For the first time in the College's history, all CCI faculty, students and professional staff are housed under one roof. Occupying two floors in the brand new uCity Square building, CCI's new home offers state-of-the-art technology in our classrooms, labs, meeting areas and collaboration spaces. 3675 Market offers Class A laboratory, office, coworking, and convening spaces. In fall 2019, the College will open a third floor which will include additional offices, classrooms, a research lab, a maker space, and a ground-breaking DXC Technology Innovation Lab. Located at the intersection of Market Street and 37th Street, 3675 Market will act as a physical nexus, bridging academic campuses and medical centers to the east and south, the commercial corridors along Market Street and Chestnut Street, and the residential communities to the north and west.

The uCity Square building offers:

- Speculative lab/office space
- World-class facilities operated by CIC (<https://cic.us/philadelphia/>)
- Café/restaurant on-site
- Quorum, a two-story, 15K SF convening space and conference center
- Adjacent to future public square
- Access to Science Center's nationally renowned business acceleration and technology commercialization programs

Drexel University Libraries

Drexel University Libraries (<http://www.library.drexel.edu/>) is a learning enterprise, advancing the University's academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through

three physical locations, including W. W. Hagerty Library, Queen Lane Library, and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at [library.drexel.edu](http://www.library.drexel.edu) (<http://www.library.drexel.edu/>) or in-person at W. W. Hagerty Library (<http://www.library.drexel.edu/locations/>).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

CCI Commons

Located on the 10th floor of 3675 Market Street, the CCI Commons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, and more collaborative space for its students. Students have access to 3675 Market's fully equipped conference room with 42" displays and videoconferencing capabilities. The CCI Commons provides technical support to students, faculty, and professional staff. In addition, the staff provides audio-visual support for all presentation classrooms within 3675 Market. Use of the CCI Commons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the CCI Commons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the CCI Commons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as "DreamSpark" that allows students free access to a wide array of Microsoft software titles and operating systems.

The CCI Commons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University's network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

CCI Learning Center

The CCI Learning Center (CCILC), located in 3675 Market Street's CCI Commons student computer lab, provides consulting and other learning resources for students taking computer science classes. The CCILC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

The CCILC and CCI Commons serve as a central hub for small group work, student meetings, and TA assistance.

Research Laboratories

The College houses multiple research labs, led by CCI faculty, in 3675 Market Street including: the Drexel Health and Risk Communication Lab,

Interactive Systems for Healthcare, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), High Performance Computing Laboratory (SPIRAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Social Computing Research Group, Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College's research web page (<http://cci.drexel.edu/research.aspx>).

Computing & Informatics Faculty

Denise E. Agosto, PhD (*Rutgers, The State University of New Jersey*). Professor. Youth information behaviors, public libraries, multicultural issues in youth library services, and qualitative research methods.

Yuan An, PhD (*University of Toronto, Canada*) *Director of International Programs*. Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

David Augenblick, MS (*University of Pennsylvania*). Associate Teaching Professor. Introductory and object-oriented programming, data structures and database systems, computer application project management, application of computer programming principles and solutions to engineering problems.

Marcello Balduccini, PhD (*Texas Tech University*) *Senior Research Scientist, Applied Informatics Group*. Associate Research Professor. Logic programming, declarative programming, answer set programming, knowledge representation, various types of reasoning

Ellen Bass, PhD (*Georgia Institute of Technology*) *Joint Appointment with the College of Nursing and Health Professions*. Professor. Characterizing human judgement and decision making, modeling human judgement when supported by information automation, computational models of human-human and human-automation coordination.

Mark Boady, PhD (*Drexel University*). Assistant Teaching Professor. Computer Algebra, complex symbolic calculations, automation of computation problems

David E. Breen, PhD (*Rensselaer Polytechnic Institute*). Associate Professor. Self-organization, biomedical image/video analysis, biological simulation, geometric modeling and visualization

Matthew Burlick, PhD (*Stevens Institute of Technology*). Assistant Teaching Professor. Image processing, machine learning, real-time video tracking, object detection and classification, statistics/probability, and acoustics

Yuanfang Cai, PhD (*University of Virginia*). Associate Professor. Formal software design modeling and analysis, software economics, software evolution and modularity.

Christopher Carroll, MS (*Drexel University*) *BSCST Program Director*. Associate Teaching Professor. Information technology within healthcare companies, computer networking and design, IT infrastructure, server technology, information security, virtualization and cloud computing.

Bruce W. Char, PhD (*University of California-Berkeley*). Professor. Symbolic mathematical computation, algorithms and systems for computer algebra, problem-solving environments parallel and distributed computation.

Chaomei Chen, PhD (*University of Liverpool*). Professor. Information visualization, visual analytics, knowledge domain visualization, network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Catherine D. Collins, MLIS (*Indiana University*). Associate Teaching Professor. Knowledge management, collection development, management of information organizations, information sources and services, international development.

M. Carl Drott, PhD (*University of Michigan*). Associate Professor. Systems analysis techniques, web usage, competitive intelligence.

Andrea Forte, PhD (*Georgia Institute of Technology*) *PhD Program Director, and MS in Information Program Director*. Associate Professor. Social computing, human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, information literacy.

Susan Gasson, PhD (*University of Warwick*). Associate Professor. The co-design of business and IT-systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Christopher Geib, PhD (*University of Edinburgh*). Associate Professor. Decision making and reasoning under conditions of uncertainty, planning, scheduling, constraint, based reasoning, human computer and robot interaction, probabilistic reasoning, computer network security, large scale process control, user interfaces.

Colin Gordon, PhD (*University of Washington*). Assistant Professor. Software reliability, program behavior, concurrent and systems-level code, formal assurance, programming models, distributed computing, even testing

Jane Greenberg, PhD (*University of Pittsburgh*) *Alice B. Kroeger Professor*. Metadata, ontological engineering, data science, knowledge organization, information retrieval

Peter Grillo, PhD (*Temple University*) *Associate Department Head for Undergraduate Affairs, Information Science*. Teaching Professor. Strategic applications of technology within organizations.

Jeremy R. Johnson, PhD (*Ohio State University*). Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Xia Lin, PhD (*University of Maryland*) *Department Head, Information Science*. Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Geoffrey Mainland, PhD (*Harvard University*). Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD (*University of Toronto*) *The Auerbach Berger Chair in Cybersecurity Distinguished Professor of Computer Science*. Professor. Software engineering; software security; code analysis; evolutionary computation.

Gabriela Marcu, PhD (*Carnegie Mellon University*). Assistant Teaching Professor. Human-computer interaction, health informatics, action research, ethnography, user experience design, designing for social

change, organizational information systems, ubiquitous computing, knowledge management.

Adelaida Alban Medlock, MS (*Drexel University*). Associate Teaching Professor. Introductory programming; computer science education.

William Mongan, MS (*Drexel University*) *Associate Department Head for Undergraduate Affairs, Computer Science*. Associate Teaching Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach

Ko Nishino, PhD (*University of Tokyo*) *Associate Department Head for Graduate Affairs, Computer Science*. Professor. Computer vision, computer graphics, analysis and synthesis of visual appearance.

Danuta A. Nitecki, PhD (*University of Maryland at College Park*) *Dean of Libraries*. Professor. Library metrics and use in management, library as place, and academic library service models.

Krzysztof Nowak, PhD (*Washington University*). Associate Teaching Professor. Fourier analysis, partial differential equations, image processing, wavelets, asymptotic distribution of eigenvalues, numerical methods and algorithms, computer science education.

Santiago Ontañón, PhD (*University of Barcelona*). Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning

Jung-ran Park, PhD (*University of Hawaii at Manoa*). Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Alex Poole, PhD (*University of North Carolina*). Assistant Professor. Digital curation, archives and records management, digital humanities, and diversity, inclusivity, and equity.

Jeffrey L. Popyack, PhD (*University of Virginia*). Professor. Operations research, stochastic optimization, computational methods of Markov decision processes; artificial intelligence, computer science education.

Lori Richards, PhD (*University of North Carolina*). Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Michelle L. Rogers, PhD (*University of Wisconsin-Madison*). Associate Professor. Human-computer interaction, healthcare informatics, human factors engineering, socio-technical systems, health services research, patient safety.

Jeffrey Salvage, MS (*Drexel University*). Teaching Professor. Object-oriented programming, multi-agent systems, software engineering, database theory, introductory programming, data structures.

Dario Salvucci, PhD (*Carnegie Mellon University*) *Department Head, Computer Science*. Professor. Human computer interaction, cognitive science, machine learning, applications for driving.

Kurt Schmidt, MS (*Drexel University*). Associate Teaching Professor. Data structures, math foundations for computer science, programming tools, programming languages.

Ali Shokoufandeh, PhD (*Rutgers University*) *Senior Associate Dean of Research*. Professor. Theory of algorithms, graph theory, combinational optimization, computer vision.

Erin Solovey, PhD (*Tufts University*). Assistant Professor. Human-computer interaction, brain-computer interfaces, tangible interaction, machine learning, human interaction with complex and autonomous systems.

Il-Yeol Song, PhD (*Louisiana State University*). Professor. Conceptual modeling, ontology and patterns, data warehouse and OLAP, object-oriented analysis and design with UML, medical and bioinformatics data modeling & integration,.

Julia Stoyanovich, PhD (*Columbia University*). Assistant Professor. Data and knowledge management, big data, biological data management, search and ranking.

Brian Stuart, PhD (*Purdue University*). Associate Teaching Professor. Machine learning, networking, robotics, image processing, simulation, interpreters, data storage, operating systems, computer science, data communications, distributed/operating systems, accelerated computer programming, computer graphics.

Filippos Vokolos, PhD (*Polytechnic University*). Assistant Teaching Professor. System architecture, principles of software design and construction, verification and validation methods for the development of large software systems, foundations of software engineering, software verification & validation, software design, programming languages, dependable software systems.

Rosina Weber, PhD (*Federal University of Santa Catarina*). Associate Professor. Case-based reasoning, explainable artificial intelligence, machine learning, textual analytics, natural language understanding, language models, recommender systems, technological aspects of knowledge management, project management, and requirements engineering.

Erija Yan, PhD (*Indiana University*). Assistant Professor. Network Science, information analysis and retrieval, scholarly communication methods and applications.

Emeritus Faculty

Michael E. Atwood, PhD (*University of Colorado*). Professor Emeritus. Human-computer interaction, computer-supported cooperative work, organizational memory.

Thomas A. Childers, PhD (*Rutgers University*). Professor Emeritus. Measurement, evaluation, and planning of information and library services, the effectiveness of information organizations.

David E. Fenske, PhD (*University of Wisconsin-Madison*). Dean Emeritus and Professor. Digital libraries, informatics, knowledge management and information technologies.

John B. Hall, PhD (*Florida State University*). Professor Emeritus. Academic library service, library administration, organization of materials.

Katherine W. McCain, PhD (*Drexel University*). Professor Emeritus. Scholarly communication, information production and use in the research process, development and structure of scientific specialties, diffusion of innovation, bibliometrics, evaluation of information retrieval systems.

Carol Hansen Montgomery, PhD (*Drexel University*) *Dean of Libraries Emeritus*. Research Professor. Selection and use of electronic collections, evaluation of library and information systems, digital libraries, economics of libraries and digital collections.

Delia Neuman, PhD (*The Ohio State University*). Professor Emerita. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Gerry Stahl, PhD (*University of Colorado*). Professor Emeritus. Human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, theory of collaboration.

Howard D. White, PhD (*University of California at Berkeley*). Professor Emeritus. Literature information systems, bibliometrics, research methods, collection development, online searching.

Susan Wiedenbeck, PhD (*University of Pittsburgh*). Professor Emeritus. Human-computer interaction, end-user programming/end-user development, empirical studies of programmers, interface design and evaluation.

Graduate Minor in Computer Science

About the Program

The Graduate Minor Degree in Computer Science trains current Drexel graduate students either in an MS or a PhD program of their home departments other than the Computer Science Department to obtain fundamental computer science knowledge as well as an introduction to advanced topics in computer science that will be suitable for their own graduate studies. The aim is to provide a systematic and efficient education to Drexel graduate students interested in expanding their studies through integration of computing, including but not limited to rigorous algorithmic thinking and effective computational implementation, without any prerequisites on computer science knowledge.

Required Core Courses

CS 520	Computer Science Foundations	3.0
CS 570	Programming Foundations	3.0
CS 571	Advanced Programming Techniques	3.0

Elective Courses

Complete 2 courses selected from the Master of Science in Computer Science Core Requirements. One course must be a core candidate. If courses are taken from two different Core Requirement categories, both courses must be a Core Candidate.

Theory

CS 521	Data Structures and Algorithms I (Core Candidate)
CS 522	Data Structures and Algorithms II
CS 525	Theory of Computation (Core Candidate)
CS 618	Algorithmic Game Theory
CS 620	Advanced Data Structure and Algorithms
CS 621	Approximation Algorithms
CS 623	Computational Geometry

Intelligent Systems

CS 500	Fundamentals of Databases (Core Candidate)
CS 510	Introduction to Artificial Intelligence (Core Candidate)
CS 511	Robot Laboratory
CS 610	Advanced Artificial Intelligence
CS 611	Game Artificial Intelligence
CS 612	Knowledge-based Agents
CS 613	Machine Learning

CS 615	Deep Learning
CS 660	Data Analysis at Scale
CS 661	Responsible Data Analysis
Programming Systems	
CS 550	Programming Languages (Core Candidate)
CS 650	Program Generation and Optimization
CS 675	Reverse Software Engineering
CS 676	Parallel Programming
SE 575	Software Design (Core Candidate)
SE 576	Software Reliability and Testing
SE 577	Software Architecture
SE 578	Security Engineering
Computer Systems	
CS 543	Operating Systems (Core Candidate)
CS 544	Computer Networks (Core Candidate)
CS 643	Advanced Operating Systems
CS 645	Network Security
CS 647	Distributed Systems Software
Vision and Graphics	
CS 536	Computer Graphics (Core Candidate)
CS 537	Interactive Computer Graphics
CS 558	Game Engine Programming
CS 583	Introduction to Computer Vision (Core Candidate)
CS 634	Advanced Computer Vision
CS 636	Advanced Computer Graphics
Applications	
CS 530	Developing User Interfaces (Core Candidate)
CS 540	High Performance Computing (Core Candidate)
CS 567	Applied Symbolic Computation
CS 590	Privacy
CS 630	Cognitive Systems
CS 668	Computer Algebra I
CS 669	Computer Algebra II
Total Credits	15.0

Additional Information

For more information, please visit the College of Computing & Informatics (<http://drexel.edu/cci/programs/graduate-programs/>)' website.

Post-Baccalaureate Certificate in Computer Science

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 12.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 11.0701

Standard Occupational Classification (SOC) Code: 15-1131

About the Program

The Post-Baccalaureate Certificate Program in Computer Science accepts applicants who hold Bachelor degrees in areas other than Computer Science and offers them opportunities to learn the fundamentals of programming and theory in computer science. The aim is to provide an efficient and systematic education on basics of computer science without any prerequisite knowledge. The certificate program

may also serve as an on-ramp to a Master of Science in Computer Science (p. 16) or Software Engineering (p. 32), if completed with predetermined grade requirements.

Admission Requirements

Please visit the College of Computing & Informatics' website (<https://drexel.edu/cci/admissions/graduate-professional-development/admissions-information-and-requirements/professional-development-admissions-requirements/>) to learn more about admission requirements.

Additional Information

For more information about this certificate program, please visit the College of Computing & Informatics' website (<http://drexel.edu/cci/academics/programs/professional-development-programs/post-baccalaureate-certificate-in-computer-science/>).

Program Requirements

Required Core Courses

CS 520	Computer Science Foundations	3.0
CS 570	Programming Foundations	3.0
CS 571	Advanced Programming Techniques	3.0

Elective Courses 3.0

Complete 1 of the following courses:

CS 500	Fundamentals of Databases
CS 510	Introduction to Artificial Intelligence
CS 521	Data Structures and Algorithms I
CS 525	Theory of Computation
CS 530	Developing User Interfaces
CS 536	Computer Graphics
CS 540	High Performance Computing
CS 543	Operating Systems
CS 544	Computer Networks
CS 550	Programming Languages
CS 575	Software Design
CS 583	Introduction to Computer Vision

Total Credits 12.0

Advanced Certificate in Information Studies and Technology

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's

Number of Credits to Completion: 24.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 3 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 11.0401

Standard Occupational Classification (SOC) Code: 15-1199

About the Program

This non-degree program provides specialized training beyond the master's degree so that practitioners can update and extend their skills and knowledge by adding position-relevant coursework in order to meet their current employment requirements. It is not intended to provide coursework that can be applied to the College of Computing & Informatics' master's or doctoral degrees. The program leads to an Advanced

Certificate in Information Studies and Technology awarded through the College of Computing & Informatics.

Admission Requirements

Please visit the College of Computing & Informatics' website (<https://drexel.edu/cci/admissions/graduate-professional-development/admissions-information-and-requirements/professional-development-admissions-requirements/>) for more information on admission requirements.

Additional Information

For additional information, view the College of Computing & Informatics Advanced Certificate in Information Studies and Technology (<https://drexel.edu/cci/academics/professional-development-programs/continuing-education/>) web page.

Requirements

The Advanced Certificate in Information Studies and Technology consists of a minimum of eight courses that must be completed within three calendar years. Students must take four INFO courses as well as complete the final independent study within the College. The three remaining courses may be taken from offerings within the College or from other programs in the University, based on consultation with the student's advisor and agreement of the faculty mentor.

College of Medicine: Graduate School of Biomedical Sciences and Professional Studies

Overview

Renowned for its innovative, student-centered educational programs, the Graduate School of Biomedical Sciences and Professional Studies in the College of Medicine at Drexel University provides regionally unique PhD and Master's level academic offerings that attract the brightest, most ambitious and entrepreneurial applicants. With a strong emphasis on job placement in different scientific and health related career fields as well as academic rigor to prepare students for medical and health-related professional schools, Drexel students are at the forefront of their selected disciplines and emerge as graduates as the next generation of leaders.

Today, there are more than 950 students pursuing doctoral or master's degrees within the Graduate School in the College of Medicine.

The collaborative nature of the new Graduate School with other Drexel schools (Engineering and College of Arts and Sciences, among others) provides students with a multidisciplinary advantage. Coupled with the solid foundation afforded by a Drexel education, innovation-driven programming offers students a unique experience to launch their careers in the chosen field of study.

The Graduate School of Biomedical Sciences and Professional Studies is committed to supporting and promoting an academic "success-network" that propels the transition from training in different disciplines to becoming leaders in solving global problems.

More information is available on the Graduate School of Biomedical Sciences and Professional Studies (<http://www.drexel.edu/medicine/Academics/Graduate-School/>) website.

Majors

- Academic Medicine (MS) (p. 41)
- **NEW:** Biochemistry of Health & Disease (MS)
- **NEW:** Biochemistry of Health & Disease (PhD)
- Biomedical Studies (MS) (p. 42)
- Biomedicine and Business (MS) (p. 43)
- Biomedicine and Digital Media (MS) (p. 47)
- Biomedicine and Entrepreneurship (MS) (p. 50)
- Biomedicine and Law (MS) (p. 54)
- Biotechnology (MS) (p. 57)

Mission Statement

Drexel University College of Medicine excels and innovates in education, research, and delivery of compassionate care in our culture of diversity, spirited inquiry, collaboration, and opportunity.

About the College

The College of Medicine's main campus, Queen Lane, is in a suburban-like setting in the East Falls section of Philadelphia. Additional facilities are located at the Center City campus, next to Hahnemann University Hospital. Our Pediatrics Department is at St. Christopher's Hospital for Children, and the Psychiatry Department is based at Friends Hospital. Students can receive clinical education at more than 20 affiliated hospitals and ambulatory sites chosen for their commitment to teaching as well as medical excellence. The College of Medicine is renowned for its innovative educational programs, enhanced by the use of technology that permeates all components of the curriculum.

The College's medical practice, Drexel Medicine®, is a patient-focused practice emphasizing quality, innovation and community service, and enhanced by physician involvement in the research and educational programs.

Collaborative projects leveraging Drexel University's technological expertise continue to push the frontiers of nanomedicine and neuroengineering. The College of Medicine is a major regional center for spinal cord research, and has developed one of the leading centers for malaria study in the nation. Additionally, the College is home to a memory disorders center dedicated to ground-breaking research in Alzheimer's and related dementias.

Drexel University College of Medicine houses one of eight National Institute on Drug Abuse (NIDA) Centers of Excellence for Physician Information, one of 21 National Centers of Excellence in Women's Health designated by the Department of Health & Human Services, the Executive Leadership in Academic Medicine (ELAM) program, and the Archives and Special Collections on Women in Medicine. It has developed the largest HIV/AIDS primary care practice in the Mid-Atlantic region, with extensive NIH-funded research in prevention and therapeutic intervention. Faculty clinicians are highly respected in numerous other specialties, including cardiology and pain management.

Facilities

Drexel University College of Medicine (<http://www.drexel.edu/medicine/>) is a living laboratory, giving students a broad variety of hands-on experience, enhanced by clinical rotations in hospitals, practicums, and external research opportunities, depending on their program of study. Students in all programs benefit from the College's physical plant, which offers some of the most advanced facilities in biomedical, health sciences, and healthcare education. The Queen Lane campus is designed for the purpose of teaching basic sciences and clinical skills in lecture halls, classrooms, small group rooms and a variety of laboratories. The College of Medicine provides wireless Internet access to curricular resources from anywhere on campus. Computers, multimedia technology, and the Internet augment the information and skills students learn from classes, print materials, and on clinical rotations. College of Medicine faculty members have been leaders in developing interactive computer-based learning tools, ranging from biochemical exercises to simulated patients presenting ethical dilemmas. Comprehensive curriculum websites, streaming videos of lectures, and online slide atlases for histology and pathology are all available.

Some of the College's key facilities and their features include:

Queen Lane Student Activities Center

A 17,700-square-foot student activity center was completed in 2006 at the Queen Lane Campus. The Student Activities Center occupies 2 floors and houses a full line of exercise equipment, a bookstore, student government offices and flexible space for events and lectures. The facility is available to students, staff and groups.

Queen Lane Medical Simulation Center

The College opened a state-of-the-art simulation center for medical education in 2010. Part of a new 25,000-square-foot addition, the center allows students to learn in simulated operating room and patient room settings.

Clinical Education Assessment Center

Ten examination rooms with digital capture that simulate physicians' offices are linked to control and observation rooms for faculty. Students work with standardized patients to enhance their abilities in medical interviewing, physical examination skills, and patient counseling.

Multidisciplinary Laboratories

- Forty-two tables with microscopes for teaching neuroanatomy, microbiology, and pathology are available.
- Microscopes are equipped with a networked video system so that all students in a class can look at a single slide under the microscope through monitors on their lab tables or on a projection screen and can retrieve microscopic images via computer.

New College Building

The New College Building at the Center City Hahnemann campus is designed for the purpose of teaching basic and clinical sciences, with auditoriums, classrooms, laboratories and offices. The lecture halls are designed to accommodate a variety of educational methodologies, spanning from the basic lecture format to the enriched laboratory setting where courses such as Anatomy, Pathology, Microbiology, Histology and Applied Anatomic Pathology can be taught.

Libraries

Drexel University has four libraries (<http://www.drexel.edu/medicine/About/Libraries/>) to serve the needs of students, faculty and staff. The collections of two libraries – one at Queen Lane and one at Center City – emphasize subjects relevant to the health sciences, with print resources distributed to meet the needs of the programs and departments at each campus, and free document delivery service between the locations.

Computers in the reference areas of each library, and the Microcomputer Centers, provide access to the Libraries' online catalog; to databases (indexes) including MEDLINE, CINAHL, and PsycINFO; to more than 2000 full-text electronic journals, and to online reference resources such as MD Consult and Harrison's Online. Full Internet access is provided for reference and research purposes.

All online resources (databases, electronic journals, etc.) are available to students, staff and faculty who are registered Library users, and can be accessed from off-campus locations. In addition to Internet access, computers in the Microcomputer Centers also provide a broad range of software including word processing, spreadsheet, communications, graphics, and statistics. Computer-assisted instruction and tutorials are available for many curricula-related topics. A plotter and scanner are also available at some locations.

The Library staff is dedicated to providing assistance to students and other library users through on-the-spot reference help, mediated literature searches, and instructional sessions. Guides are available online to help with the use of Library services and resources.

Videoconferencing

Drexel University College of Medicine makes extensive use of videoconferencing between Philadelphia campuses and clinical teaching sites, and the Sacramento campus. There are videoconferencing classrooms with split screen to allow for speakers in different locations.

Web-Based Instruction

Uses of web-based instruction range from providing a supplement to classroom instruction to teaching a whole course remotely. Many instructors post their syllabi on the web, distribute supplementary readings via the web, and set up electronic discussion lists for their students. Having students submit assignments electronically is common practice.

Unique faculty-developed tools, including doc.com, a web-based set of video encounters between physician and patient, help medical students improve their communication skills. DxR, a web-based patient simulation program, trains students in clinical reasoning; and MedEthEx provides

an online series of exercises in medical ethics and communication. The recently implemented Web-OSCE, closely linked to doc.com, allows medical trainees to interview standardized patients remotely and receive performance feedback.

Academic Medicine

Major: Academic Medicine

Degree Awarded: Master of Science

Calendar Type: Semester

Total Credit Hours: 36.0 + research based publication; Additional 25.0 credits for concentration in otolaryngology

Classification of Instructional Programs (CIP) code: 51.1199

Standard Occupational Classification (SOC) code: 25-1071

Note: This program is currently not accepting students.

About the Program

Exceptional residents often pursue scholarly activities in addition to fulfilling their other residency requirements. This program is designed for those residents who publish research and pursue scholarly activities in addition to their typical residency training, and who desire to pursue careers in clinical education in their field of interest.

Students pursuing an MS in Academic Medicine must designate a concentration. At this time the first available concentration is the field of otolaryngology.

The MS in Academic Medicine is designed to address topics of value to the academic physician, including training in leadership, education, ethics, professionalism, public health, health accreditation, statistics, bioepidemiology, research techniques, medical writing and editing, grant writing, research regulations, public speaking and academic health center management. These are topics typically important to educators, but not commonly covered in depth during residency training.

Goals and Objectives

The MS in academic medicine provides a structured pathway for physicians planning careers as clinical educators to acquire specialized knowledge and to demonstrate a special expertise in teaching. The objectives of the MS in Academic Medicine include:

- training young physicians to be skilled clinical educators;
- providing students with core knowledge about academic medicine that is not included systematically in residency training programs;
- encouraging research;
- exposing students to the process of supervising and mentoring research;
- encouraging life-long continued study of materials and methods for clinical education.

Examinations

All residents are required to take in-service training examinations annually. This is a national, standardized test provided for each clinical specialty. Performance at the 70th percentile or better in this examination is considered a passing grade for the MS. Alternatively, board certification would be sufficient to acknowledge that the student has mastered a body of knowledge suitable for the MS degree. Each clinical specialty has its own (very rigorous) requirements for board certification, supervised by the American Board of Medical Specialties.

Admission Requirements

Applications are reviewed by the department in which the degree is offered (for example: otolaryngology - head and neck surgery).

Recommendations for acceptance are presented to the Biomedical Graduate Education Committee of the College of Medicine for final approval. The requirements for admission include but are not limited to:

- enrollment in an ACGME approved residency program;
- satisfactory completion of at least one year of residency;
- a letter of recommendation from the applicant's Department Chair or Program Director;
- an interview in person;
- medical school transcript.

Visit the Office of Biomedical Graduate Studies Admissions website for more detailed information about applying to the program, including important application dates.

Degree Requirements

A minimum of thirty-six semester credits are required with a B average or better. Thus, the course of study for the MS in Academic Medicine will be in addition to the standard curriculum for residents plus the requirement of a research based, first authored publication.

Research Requirements

Each candidate for the MS will conduct a research project under the guidance of his/her advisory committee. In most cases this project will encompass clinical or bench research that will result in a first author publication in a peer-reviewed journal. (Case reports are not sufficient for fulfilling this requirement.) However if the student is involved in scholarly activity of another nature that is deemed sufficiently rigorous by the advisory committee, flexibility to recognize and accept other activities is intended. For example, such activities might include writing a book or developing the curriculum for a new academic program.

Curriculum

ACMD 600S	Academic Medicine: Core Knowledge I	3.0
ACMD 601S	Academic Medicine: Core Knowledge II	3.0
ACMD 602S	Academic Medicine Thesis Research	4.0
IDPT 500S	Responsible Conduct of Research	2.0
IDPT 600S	Thesis Defense (taken twice, each time for 9 credits)	18.0
Additional didactic courses included in the Associated Residency Program		6.0
Total Credits		36.0

Required courses for concentration in Otolaryngology

25.0 semester credits

OTO 600S	General Otolaryngology	3.0
OTO 601S	Otology	3.0
OTO 602S	Head and Neck Oncology	3.0
OTO 603S	Pediatric Otolaryngology, Introduction	3.0
OTO 604S	Journal Club in Otolaryngology	1.0
Select two Otolaryngology electives from the following:		6.0
OTO 605S	Laryngology – Voice, Introduction	
OTO 606S	Laryngology – Voice, Advanced	
OTO 607S	Laryngology – Swallowing	
OTO 608S	Temporal Bone Dissection	

OTO 609S	Neurotology	
OTO 610S	Audiology	
OTO 611S	Endocrine Surgery	
OTO 612S	Allergy and Immunology	
OTO 613S	Radiology of the Head and Neck	
OTO 614S	Pathology and Histology	
OTO 615S	Pediatric Otolaryngology, Advanced	
OTO 616S	Otolaryngology Practice	
OTO 617S	Research Methodology and Publication	
OTO 618S	Facial Plastic and Reconstructive Surgery	
OTO 619S	Sleep Disorders	
OTO 620S	Taste and Smell	
OTO 622S	Bronchoesophagology	
Select one Otolaryngology surgery elective from the following:		6.0
OTO 700S	General Otolaryngologic Surgery	
OTO 701S	Otologic Surgery	
OTO 702S	Head and Neck Oncologic Surgery	
OTO 700S	General Otolaryngologic Surgery	
OTO 703S	Pediatric Otolaryngologic Surgery	
OTO 704S	Neurotologic Surgery	
OTO 705S	Laryngologic Surgery	
OTO 706S	Rhinologic Surgery	
OTO 707S	Surgery of the Sinuses	
OTO 708S	Bronchoesophagology	
OTO 709S	Cosmetic Plastic and Reconstructive Surgery	
Total Credits		25.0

Biomedical Studies

Major: Biomedical Studies

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 56.0

Classification of Instructional Programs (CIP) code: 26.0102

Standard Occupational Classification (SOC) code: 19-1042

About the Program

This two-year Special Master's degree program is designed for students who have completed all health professional school prerequisites and need to strengthen their science background and/or MCAT score before applying to medical or other health professional schools.

In the first year, students take advanced undergraduate courses in physics and chemistry, graduate courses in biochemistry, physiology, anatomy, psychology/sociology, laboratory techniques, a community outreach course, and a year-long dedicated MCAT preparation course. Students transition into the second year of the program after successfully completing the first year curriculum by passing all courses, achieving a minimum cumulative graduate GPA of 3.0, sitting for the MCAT, and completing a summer research project. Students typically submit their medical school applications during the summer between year one and year two. During the second year, students take rigorous coursework in biochemistry, physiology, microanatomy, and neuroanatomy, utilizing the IMS (<http://catalog.drexel.edu/graduate/schoolofbiomedicalsciences/intensivemedicalsciences/>) curriculum medical school-equivalent lectures and laboratory materials, complemented by an ethics and a professionalism course.

The Master of Science degree will be awarded contingent upon satisfactory completion of all program requirements, including an earned cumulative graduate GPA of no less than 3.0.

For more information about this program, visit the College of Medicine's Master of Science in Biomedical Studies (<http://drexel.edu/medicine/academics/graduate-school/biomedical-studies/>) web page.

Drexel University College of Medicine
Division of Pre-medical and Pre-health Programs
Graduate School of Biomedical Sciences and Professional Studies
New College Building, Room 4104
245 North 15th Street, Mail Stop 344
Philadelphia, PA 19102

Phone: 215-762-4692

Email: CoM_MedicalSciences@drexel.edu

Admission Requirements

Applicants to the MBS program must have fulfilled all undergraduate pre-medical requirements and demonstrated mastery of the material at a minimum grade of C. These requirements include a year of biology, chemistry, physics and organic chemistry, including respective laboratory sections. Applicants are required to submit official MCAT scores if the exam was taken, or official GRE scores in lieu of the MCAT. The following credentials are competitive for application to the MBS program:

- A minimum undergraduate math/science (BCPM) and cumulative GPA of 2.9
- All premedical prerequisite courses at a grade of C or better
- Minimum MCAT scores of 35th percentile, or minimum GRE scores of 50th percentile

Applicants with lower scores may be considered if they can demonstrate a marked improvement in their academic history. Health care-related experiences, community service, research, leadership and extracurricular activities are also taken into consideration.

Degree Requirements

Required Undergraduate Courses

MSPP 400S	Advanced Topics in Chemistry I	4.0
MSPP 401S	Advanced Topics in Chemistry II	4.0
MSPP 402S	Advanced Topics in Physics I	4.0
MSPP 403S	Advanced Topics in Physics II	4.0
MSPP 404S	Concepts in Science and Verbal Reasoning I	6.0
MSPP 405S	Concepts in Science and Verbal Reasoning II	6.0

Required MS Courses

MSPP 511S	Concepts in Biochemistry and Cell Biology	4.0
MSPP 512S	Psychosocial and Behavioral Factors in Health and Medicine	3.0
MSPP 525S	Community Dimensions of Medicine	2.0
MSPP 505S	Laboratory Techniques in Biochemistry & Molecular Biology	2.0
MSPP 513S	Advanced Human Anatomy	4.0
MSPP 515S	Advanced Human Physiology	4.0
IMSP 502S	Medicine and Society	3.0
IMSP 513S	Medical Biochemistry	8.0
IMSP 506S	Medical Professionalism and Leadership	3.0
IMSP 522S	Medical Physiology I	3.5
IMSP 523S	Medical Physiology II	3.5
IMSP 542S	Medical Microanatomy I	5.0
IMSP 543S	Medical Microanatomy II	3.0
IMSP 562S	Medical Neuroanatomy	6.0

Summer Research Project

MSPP 550S	Research Project	2.0
-----------	------------------	-----

Additional Non-required Courses

IMSP 544S	Medical Immunology I	
IMSP 545S	Medical Immunology II	
IMSP 552S	Medical Nutrition	
Total Credits		84.0

Sample Plan of Study

Term Credits		15.5

Total Credit: 84.0

* This course will be offered over two semesters

Biomedicine and Business

Major: *Biomedicine and Business*

Degree Awarded: *Master of Science (MS)*

Calendar Type: *Semester*

Total Credit Hours: *36.0*

Classification of Instructional Programs (CIP) code: *26.9999*

Standard Occupational Classification (SOC) code: *11-1021*

About the Program

Mission Statement

The MS in Biomedicine and Business degree program provides comprehensive training in fundamental aspects of scientific discovery, technology commercialization, and business. The program prepares graduates for management positions in scientifically oriented organizations in the public or private sector (e.g., biotechnology and pharmaceutical industry, academics, government, non-profit organizations). Students develop broad core knowledge in biological sciences and biomedical technology development and commercialization plus finance, economics, and organizational leadership.

Curriculum

This is an interdisciplinary program offered by the College of Medicine. The science courses are taught by faculty from Drexel University College of Medicine. Faculty from Drexel University's LeBow College of Business teach the business courses.

- Non-thesis program (36.0 semester credits needed to graduate)
- Required and elective courses in each discipline
- Flexible internship (experiential learning)
- Customizable plan of study

Format

- Online (select courses in both disciplines are offered face-to-face on-campus)
- Accelerated: 1-year MS (full-time) or 2.5 years (part-time)

Full-time and Part-Time Options

Students may meet the degree requirements in either a full-time (at least 9.0 credits per semester) or part-time basis. Full-time students generally complete the program in one year. Part-time students must complete the program within six years. Students must enroll in at least 4.5 semester credits of College of Medicine courses to qualify for financial aid. For information regarding financial aid, please visit Drexel Central (<http://www.drexel.edu/drexelcentral/>).

Program Contact Information

For questions about the curriculum and program goals, please contact one of the Program Directors:

- Sandra Urdaneta-Hartmann, MD, PhD, MBA (slu22@drexel.edu)
- Sandhya Kortagere, PhD (sk673@drexel.edu)

For questions about how to apply to the program, please contact an enrollment counselor at duonline@drexel.edu or visit the Drexel University Online MS in Biomedicine and Business web page (<https://online.drexel.edu/online-degrees/biomedical-degrees/ms-biomedicine-business/>).

For information regarding financial aid, please visit Drexel Central (<http://www.drexel.edu/drexelcentral/>).

Admission Requirements

Post-college applicants must have completed a four-year degree program. An undergraduate degree in science is preferred but not required. Although a minimum cumulative grade point average (GPA) of 3.0

is strongly desired, an applicant with a lower cumulative GPA will be considered if other strengths are apparent in the application.

Applicants must also fulfill the following requirements for consideration:

- Official transcripts from all colleges and universities attended
- Essay/Personal statement
- Resume
- References from at least three instructors or professionals

Official test scores from graduate and professional admission exams, such as the Graduate Record Examination (GRE), Graduate Management Admission Test (GMAT), Law School Admission Test (LSAT), or Medical College Admission Test (MCAT), are optional but highly desirable.

International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. Applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score on the Test of English as a Foreign Language (TOEFL). IELTS scores may be submitted in lieu of TOEFL scores. An evaluation by World Education Services (WES) is required for transcripts from institutions outside the United States.

Online applications (<https://online.drexel.edu/online-degrees/biomedical-degrees/ms-biomedicine-business/#apply>) are accepted all year round for consideration for either fall or spring admission. Students may defer admission by one year. All admission decisions are made at the College of Medicine.

Program Contact Information

For questions about the curriculum and program goals, please contact one of the Program Directors:

- Sandra Urdaneta-Hartmann, MD, PhD, MBA (slu22@drexel.edu)
- Sandhya Kortagere, PhD (sk673@drexel.edu)

For questions about how to apply to the program, please contact an enrollment counselor at duonline@drexel.edu or visit the Drexel University Online MS in Biomedicine and Business web page (<https://online.drexel.edu/online-degrees/biomedical-degrees/ms-biomedicine-business/>).

For information regarding financial aid, please visit Drexel Central (<http://www.drexel.edu/drexelcentral/>).

Degree Requirements

Science courses are offered by Drexel University College of Medicine and are taught in **semester terms** (fall and spring). Business courses are offered by LeBow College of Business and are taught face-to-face in **quarter terms** (fall, winter, spring, and summer).

Three (3.0) credit quarter courses confer the equivalent of 2.0 semester credits. The program requires the completion of 36.0 semester credits for graduation. Semesters and quarters overlap sufficiently to allow full-time students to meet the degree requirements for this program in two years.

There are several ways to customize the internship or experiential learning component (2.0 - 6.0 semester credits) so that it satisfies both the degree requirements and, especially, the student's own personal needs and career aspirations. The duration of the internship may vary. Shorter

rotations may require that the student enrolls in elective courses to meet the semester credit requirements for the degree.

Required Courses		
Science		
MIIM 503S	Biomedical Ethics	2.0
	or IDPT 500S Responsible Conduct of Research	
MIIM 518S	Foundations of Applied Biomedicine *	3.0
MIIM 519S	Commercialization of Biomedical Technology **	3.0
MIIM 631S	Biomedical Innovation Development and Management	5.0
Business ***		
BUSN 501	Measuring and Maximizing Financial Performance	3.0
BUSN 502	Essentials of Economics	3.0
Elective Courses		
Choose at least 1 program-specific science elective and at least 2 business electives		
Science, Program-Specific (Choose at least 1, but more than 1 is recommended)		
MIIM 517S	Applied Statistics for Biomedical Sciences	
	or IDPT 501 Biostatistics I	
MIIM 550S	Biomedicine Seminar	
MIIM 605S	Experiential Learning	
MIIM 645S	Biomedical Career Explorations	
MIIM T680S	Special Topics in Microbiology & Immunology	
Science, Clinical Research		
CR 501S	Emerging Trends in Medical Device Regulation	
CR 511S	The History of Misconduct in Biomedical Research	
CR 513S	Business Processes and Contemporary Concerns in Pharmaceutical R & D	
CR 514S	World Wide Regulatory Submissions	
CR 515S	Intro to Clinical Trials	
CR 525S	Scientific Writing and Medical Literature	
CR 535S	Current Federal Regulatory Issues in Biomedical Research	
CR 545S	Pharmaceutical Law	
CR 555S	Compliance & Monitoring Issues	
CR 600S	Designing the Clinical Trial	
Science, Basic Science & Research		
MIIM 521S	Biotechniques I: Molecular and Genomic Methods	
MIIM 522S	Biotechniques II: Immunological Methods	
MIIM 530S	Fundamentals of Molecular Medicine I	
	or MIIM 515 Concepts in Biomedicine I	
MIIM 531S	Fundamentals of Molecular Medicine II	
	or MIIM 516 Concepts in Biomedicine II

MIIM 631S	Biomedical Innovation Development and Management	5.0
Elective Course(s)		
MIIM 550S	Biomedicine Seminar	3.0
ORGB 631	Leading Effective Organizations	3.0
Term Credits		11.0

Total Credit: 42.0

* **This is a full-time plan with # 9.0 semester credits/ semester.** Business and entrepreneurship courses are listed in quarter credits, since they are offered in quarter terms (overlap with semester terms). However, 2.0 semester credits will be awarded for 3.0 quarter credits completed. **To qualify for financial aid, each semester students must enroll in #4.5 credits in science courses offered by the College of Medicine.** Students must enroll in at least 1 College of Medicine course in order to enroll in any course offered by another Drexel College or School. Students graduate after 4 terms (1 year), completing 3-4 courses per term, all terms are eligible for financial aid. The first term can be part-time (8 credits) and still meet the 36 semester credit requirement for graduation.

Program Goals

Upon completion of the degree requirements of this program students would have achieved the following program-level goals:

1. Develop core knowledge in biological sciences, technology development and commercialization
2. Gain understanding of finance, economics, management and organization leadership
3. Apply business expertise to evaluate the process of delivering biomedical products to market
4. Develop skills to identify and evaluate professional ethical dilemmas and appropriate solutions
5. Strengthen communication, leadership, and soft-skills (e.g., teamwork, problem-solving, knowledge of career opportunities, networking)

Drexel Student Learning Priorities (DSLPs)

In the course of meeting these program-level goals, students would have also made progress in all of Drexel's Student Learning Priorities (DSLPs) (<http://drexel.edu/provost/assessment/outcomes/dslp/>) to help them build their future:

Core Intellectual and Practical Skills:

- Communication
- Creative and critical thinking
- Ethical reasoning
- Information literacy
- Self-directed learning

Experiential and Applied Learning:

- Global competence
- Leadership
- Professional practice
- Research, scholarship and creative expression
- Responsible citizenship

Biomedicine and Digital Media

Major: Biomedicine and Business

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 41.5

Classification of Instructional Programs (CIP) code: 26.9999

Standard Occupational Classification (SOC) code: 27-1014

About the Program

The MS in Biomedicine and Digital Media program intersects science, technology, entrepreneurship, and interactive digital art design and animation. This skills-based program is for individuals interested in media design and production careers with an emphasis in health and science.

Graduates of this program will be prepared to progress into more advanced graduate studies in science or digital media and/or careers in scientifically oriented media/communication jobs in the public or private sector (e.g., academic, scientific publishing and media companies), or lead their new ventures in digital imaging.

Curriculum

This is an interdisciplinary hybrid (blended) program offered by the College of Medicine. The science courses, which are offered online are taught by faculty from Drexel University College of Medicine. Faculty from Drexel University's College of Media Arts and Design teach the digital media courses which are offered face-to-face. Select courses in both disciplines are offered face-to-face on campus. Students must complete a minimum of 36.0 semester credits to graduate.

- No thesis requirement
- Required and elective courses in each discipline
- Flexible internship (experiential learning)
- Customizable plan of study

Format

- Hybrid/Blended (digital media courses are face-to-face, select science courses are offered face-to-face on-campus)
- Accelerated: 1-year MS (full-time) or 2.5 years (part-time)

Program Contact Information

For questions about the curriculum and program goals, please contact one of the Program Directors:

- Sandra Urdaneta-Hartmann, MD, PhD, MBA (slu22@drexel.edu)
- Sandhya Kortagere, PhD (sk673@drexel.edu)

For questions about how to apply to the program, please contact an enrollment counselor at duonline@drexel.edu.

For information regarding financial aid, please visit Drexel Central (<http://www.drexel.edu/drexelcentral/>).

Admission Requirements

Post-college applicants must have completed a four-year degree program. An undergraduate degree in science is preferred but not required. Although a minimum cumulative grade point average (GPA) of 3.0 is strongly desired, an applicant with a lower cumulative GPA will be considered if other strengths are apparent in the application.

Applicants must also fulfill the following requirements for consideration:

- Official transcripts from all colleges and universities attended
- Essay/personal statement
- Resume
- References from at least three instructors or professionals

Official test scores from graduate admission exams, such as the Graduate Record Examination (GRE), are optional but highly desirable.

International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. Applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score on the Test of English as a Foreign Language (TOEFL). IELTS scores may be submitted in lieu of TOEFL scores. An evaluation by World Education Services (WES) is required for transcripts from institutions outside the United States.

Online applications (<https://online.drexel.edu/online-degrees/biomedical-degrees/ms-biomedicine-business/#apply>) are accepted all year round for

consideration for either fall or spring admission. Students may defer admission by one year. All admission decisions are made at the College of Medicine.

Program Contact Information

For questions about the curriculum and program goals, please contact one of the Program Directors:

- Sandra Urdaneta-Hartmann, MD, PhD, MBA (slu22@drexel.edu)
- Sandhya Kortagere, PhD (sk673@drexel.edu)
(sandhya.kkortagere@drexelmedu.edu)

For questions about how to apply to the program, please contact an enrollment counselor at duonline@drexel.edu or visit the Drexel University Online MS in Biomedicine and Business web page (<https://online.drexel.edu/online-degrees/biomedical-degrees/ms-biomedicine-business/>).

For information regarding financial aid, please visit Drexel Central (<http://www.drexel.edu/drexelcentral/>).

Degree Requirements

Science courses are offered by Drexel University College of Medicine and are taught in **semester terms** (fall and spring). Digital Media courses are offered by Westphal College of Media Arts & Design and are taught face-to-face in **quarter terms** (fall, winter, spring, and summer).

Three (3.0) credit quarter courses confer the equivalent of 2.0 semester credits. The program required the completion of 36.0 semester credits for graduation. Semesters and quarters overlap sufficiently to allow full-time students to meet the degree requirements for this program in two years.

There are several ways to customize the internship or experiential learning component (2.0 - 6.0 semester credits) so that it satisfies both the degree requirements and, especially, the student's own personal needs and career aspirations. The duration of the internship may vary. Shorter rotations may require that the student enrolls in elective courses to meet the semester credit requirements for the degree.

Required Courses

Science Requirements		
MIIM 503S	Biomedical Ethics	2.0
	or IDPT 500S Responsible Conduct of Research	
MIIM 518S	Foundations of Applied Biomedicine *	3.0
MIIM 519S	Commercialization of Biomedical Technology **	3.0

DIGM 531	Game Design II
ANIM 588	Spatial Data Capture
GMAP 545	Game Development Foundations
GMAP 547	Serious Games
GMAP 548	Experimental Games
GMAP 560	Game Design from the Player's Perspective
DIGM T580	Special Topics in Digital Media
Entrepreneurship ***	
ENTP 611	Learning from Failure
ENTP 621	Innovation & Ideation
ENTP 641	Innovation in Established Companies

* Substitutions: MIIM 515S and MIIM 516S; or MIIM 530S or MIIM 531S

** Substitution: MIIM 535S and MIIM 536S

*** Science courses are offered on a semester basis; digital media and entrepreneurship courses are offered on a quarter basis. Semesters and quarters overlap. Credits shown for digital media and entrepreneurship courses are quarter credits (3 quarter credits = 2 semester credits). This program requires a minimum of 36.0 semester credits to meet the degree requirements. This requirement can be met through a combination of science, digital media and entrepreneurship courses.

Sample Plan of Study

To learn more about part-time options, please contact a Program Director:

- Sandra Urdaneta-Hartmann, MD, PhD, MBA (slu22@drexel.edu)
- Sandhya Kortagere, PhD (sk673@drexel.edu)

Sample Plans of Study

These are samples of customizable plans of study. Variations may occur depending on course availability and each student's interest.

This program is only available as a hybrid program, starting in the fall semester.

Full-time, Fall Start

First Year

Fall		Credits
Required Course(s)		
MIIM 518S	Foundations of Applied Biomedicine	3.0
DIGM 505*	Design and Interactivity Bootcamp	3.0
DIGM 506*	Animation and Game Design Bootcamp	3.0
Elective Course(s)		
MIIM 645S	Biomedical Career Explorations	2.0
Term Credits		11.0

Spring

Required Course(s)		
MIIM 519S	Commercialization of Biomedical Technology	3.0
MIIM 503S	Biomedical Ethics	2.0

Term Credits		8.0

Spring

Required Course(s)		
MIIM 631S	Biomedical Innovation Development and Management	5.0
ENTP 621*	Innovation & Ideation	3.0
Term Credits		8.0

Total Credit: 41.0-45.0

* **This is a part-time plan with <9.0 semester credits/semester.** Digital media and entrepreneurship courses are listed in quarter credits, since they are offered in quarter terms (overlap with semester terms). However, 2.0 semester credits will be awarded for 3.0 quarter credits completed. **To qualify for financial aid, each semester students must enroll in #4.5 credits in science courses offered by the College of Medicine.** Students must enroll in at least 1 College of Medicine course in order to enroll in any course offered by another Drexel College or School. Students graduate after 5 terms (1.5 years), completing 2-3 courses per term, all terms are eligible for financial aid

Program Goals

Upon completion of the degree requirements of this program students would have developed:

- A broad core knowledge in interactive digital media development for application in biomedical science and innovative technologies
- More in-depth analytical, research, and critical thinking skills applicable to the process of biomedical technology development
- Skills to identify professional ethical dilemmas and evaluate appropriate solutions
- Graduate-level communication and leadership skills
- Additional professional soft skills (e.g., teamwork, problem-solving, knowledge of career opportunities, networking)

Drexel Student Learning Priorities (DSLPS)

In the course of meeting these program-level goals, students would have also made progress in all of Drexel's Student Learning Priorities (DSLPS)

(<http://www.drexel.edu/provost/irae/assessment/outcomes/dslp/>) to help them build their future:

Core Intellectual and Practical Skills:

- Communication
- Creative and critical thinking
- Ethical reasoning
- Information literacy
- Self-directed learning

Experiential and Applied Learning:

- Global competence
- Leadership
- Professional practice
- Research, scholarship and creative expression
- Responsible citizenship

Biomedicine and Entrepreneurship

Major: Biomedicine and Entrepreneurship

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 36.0

Classification of Instructional Programs (CIP) code: 26.9999

Standard Occupational Classification (SOC) code: 19-1020

About the Program

Mission Statement

The MS in Biomedicine and Entrepreneurship program integrates training in technical and practical aspects of science, research and entrepreneurship for individuals interested in pursuing innovation-driven careers in the life sciences. The program helps develop individual initiative and entrepreneurial thinking around scientific discoveries and innovation. The program is designed to facilitate not only new venture creation but also individual initiative and entrepreneurial thinking.

Graduates of the program will be prepared to progress into more advanced graduate studies in science or entrepreneurship and/or careers in scientifically oriented management jobs in the public or private sector. These graduates will especially be equipped to lead or have top management roles in new biomedical or life sciences ventures.

Curriculum

This is an interdisciplinary online program offered by the College of Medicine. The science courses, which are offered online are taught by faculty from Drexel University College of Medicine. Drexel University's Charles D. Close School of Entrepreneurship (<http://drexel.edu/close/>) teach the entrepreneurship courses.

- Non-thesis program (36.0 semester credits needed to graduate)
- No thesis requirement
- Required and elective courses in each discipline
- Flexible internship (experiential learning)
- Customizable plan of study

Format

- Online (select courses in both disciplines are offered face-to-face on-campus)
- Accelerated: 1-year MS (full-time) or 2.5 years (part-time)

Program Contact Information

For questions about the curriculum and program goals, please contact one of the Program Directors:

- Sandra Urdaneta-Hartmann, MD, PhD, MBA (slu22@drexel.edu)
- Sandhya Kortagere, PhD (sk673@drexel.edu)

For questions about how to apply to the program, please contact an enrollment counselor at duonline@drexel.edu or visit the Drexel University Online MS in Biomedicine and Business web page (<https://online.drexel.edu/online-degrees/biomedical-degrees/ms-biomedicine-business/>).

ENTP 631	Building Internal & External Relationships
ENTP 660	Early Stage Venture Funding
ENTP 670	Clean Venture Lab
ENTP 690	The Lean Launch
ENTP T580	Special Topics in Entrepreneurship

* Substitutions: MIIM 515S and MIIM 516S OR MIIM 530S OR MIIM 531S

** Science courses are offered on a semester basis; entrepreneurship courses are offered on a quarter basis. Semesters and quarters overlap. Credits shown for ENTP courses are quarter credits (3 quarter credits = 2 semester credits). This program requires a minimum of 36.0 semester credits to meet the degree requirements. This requirement can be met through a combination of science and entrepreneurship courses.

Sample Plan of Study

To learn more about part-time options, please contact a Program Director:

- Sandra Urdaneta-Hartmann, MD, PhD, MBA (slu22@drexel.edu)
- Sandhya Kortagere, PhD (sk673@drexel.edu)

Sample Plans of Study

These are samples of customizable plans of study. Variations may occur depending on course availability and each student's interest.

Full-Time, Fall Start

First Year

Fall		Credits
Required Course(s)		
MIIM 518S	Foundations of Applied Biomedicine	3.0
Elective Course(s)		
MIIM 550S	Biomedicine Seminar	3.0
CR 525S	Scientific Writing and Medical Literature	3.0
		Term Credits
		9.0

Spring

Required Course(s)		
MIIM 519S	Commercialization of Biomedical Technology	3.0
MIIM 503S	Biomedical Ethics	2.0
or IDPT 500S	Responsible Conduct of Research	
ENTP 540 *	Methods of Entrepreneurship	3.0
Elective Course(s)		

ENTP 631 [†]	Building Internal & External Relationships	3.0
	Term Credits	11.0
Summer		
Elective Course(s)		
MIIM 605S	Experiential Learning	2.0-6.0
MIIM 645S	Biomedical Career Explorations	2.0
ENTP 651 [†]	Leading New Ventures	3.0
	Term Credits	7.0-11.0
Second Year		
Fall		
Required Course(s)		
MIIM 631S	Biomedical Innovation Development and Management	5.0
ENTP 501 [†]	Entrepreneurship Essentials	3.0
Elective Course(s)		
ENTP 631 [†]	Building Internal & External Relationships	3.0
	Term Credits	11.0
Total Credit: 38.0-42.0		

* **This is a full-time plan with # 9.0 semester credits/ semester.** Entrepreneurship courses are listed in quarter credits, since they are offered in quarter terms (overlap with semester terms). However, 2.0 semester credits will be awarded for 3.0 quarter credits completed. **To qualify for financial aid, each semester students must enroll in #4.5 credits in science courses offered by the College of Medicine.** Students must enroll in at least 1 College of Medicine course in order to enroll in any course offered by another Drexel College or School. Students graduate after 4 terms (1 year), completing 3-4 courses per term, all terms are eligible for financial aid.

Program Goals

Upon completion of the degree requirements for this MS program, students would have achieved the following program-level goals:

- 1. Develop broad core knowledge in biological sciences, entrepreneurship and biomedical innovation**
 - Be proficient in fundamental concepts in molecular and cellular biology, and other major areas within the biological sciences
 - Be proficient in fundamental concepts in entrepreneurship
 - Be proficient in the process of biomedical innovation development and commercialization
- 2. Develop analytical and critical thinking skills**
 - Be able to critically analyze the ideas and concepts related to science and entrepreneurship presented written or orally by others (e.g., textbooks, journals, mass media, presentations by peers and subject matter experts)
 - Be able to identify, analyze, and evaluate the need for innovative solutions to problems or challenges in biomedicine and innovation management
 - Be able to identify and analyze challenges faced in biomedical innovation development and management
 - Be able to discuss the commercial viability of innovative biomedical products (e.g., drugs, devices, diagnostics, digital media content)
 - Be able to draft and analyze strategic and tactical plans to deliver a biomedical product to the market
 - Be able to articulate and defend their analysis
- 3. Develop research skills**
 - Be proficient at conducting primary research
 - Be proficient in collecting data from electronic databases, the World Wide Web, the library, and other sources
 - Be able to interpret data
- 4. Develop professional ethics**
 - Be able to identify and evaluate professional ethical dilemmas, and discuss appropriate resolutions
 - Apply professional ethical standards such as appropriate attribution of ideas, good recordkeeping, and truthful presentation of data/facts and conclusions
 - Be able identify and evaluate the economic and social impact of strategic decisions
- 5. Develop communication and leadership skills**
 - Be proficient at developing oral and/or written comprehensive reports, presenting facts, analysis, and conclusions
 - Be proficient at using appropriate technologies for communication
 - Be able to interact and work effectively with others in work settings involving cultural and demographic diversity
- 6. Develop other "work readiness" soft skills (e.g., teamwork, problem-solving, knowledge of career opportunities, networking)**
 - Be knowledgeable of career opportunities in their desired field
 - Be proficient at presenting a professional profile of oneself
 - Be proficient at time-management
 - Be able to work in teams
 - Begin to develop problem-solving skills for use in the workplace
 - Begin to develop a professional network

Drexel Student Learning Priorities (DSLPs)

In the course of meeting these program-level goals, students would have also made progress in all of Drexel's Student Learning Priorities (DSLPs (<http://drexel.edu/provost/assessment/outcomes/dslp/>)) (<http://www.drexel.edu/provost/irae/assessment/outcomes/dslp/>) to help them build their future:

Core Intellectual and Practical Skills:

- Communication
- Creative and critical thinking
- Ethical reasoning
- Information literacy
- Self-directed learning

Experiential and Applied Learning:

- Global competence
- Leadership
- Professional practice
- Research, scholarship and creative expression
- Responsible citizenship

Biomedicine and Law

Major: Biomedicine and Law

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 36.0

Classification of Instructional Programs (CIP) code: 26.9999

Standard Occupational Classification (SOC) code: 19-1020; 23-2000

About the Program

The Masters of Science in Biomedicine and Law degree program comprehensive training in technical and practical aspects of science and innovation, as well as in the legal aspects related to new biomedical product development, entrepreneurship and regulatory compliance. This program is geared to individuals interested in careers focused in technology development.

Graduates of this program will be prepared to progress into more advanced graduate studies in science and/or careers in scientifically oriented management jobs in the public or private sector (e.g., technology commercialization offices, patent agencies). These individuals will also be competitive Law School applicants, if they so chose to continue their professional studies, even though credits for their legal coursework in this program will not be transferable for Law School credits.

Curriculum

This is an interdisciplinary online program offered by the College of Medicine. The science courses, which are offered online are taught by faculty from Drexel University College of Medicine. Faculty from Drexel University's Kline School of Law teach the entrepreneurship courses.

- Non-thesis program (36.0 semester credits needed to graduate)
- No thesis requirement
- Required and elective courses in each discipline
- Flexible internship (experiential learning)
- Customizable plan of study

Format

- Online (select courses in both disciplines are offered face-to-face on-campus)
- Accelerated: 1-year MS (full-time) or 2.5 years (part-time)

Program Contact Information

For questions about the curriculum and program goals, please contact one of the Program Directors:

- Sandra Urdaneta-Hartmann, MD, PhD, MBA (slu22@drexel.edu)
- Sandhya Kortagere, PhD (sk673@drexel.edu)

For questions about how to apply to the program, please contact an enrollment counselor at duonline@drexel.edu.

For information regarding financial aid, please visit Drexel Central (<http://www.drexel.edu/drexelcentral/>).

Program Goals

Upon completion of the degree requirements for this MS program, students would have developed:

1. A broad core knowledge in biological sciences and legal aspects of biomedical innovation
2. More in-depth analytical, research, and critical thinking skills
3. An advanced understanding of professional ethics
4. Graduate-level communication and leadership skills
5. Other "work readiness" soft skills such as teamwork, problem-solving, knowledge of career opportunities, and networking.

Drexel Student Learning Priorities (DSLPs)

In the course of meeting these program-level goals, students would have also made progress in all of Drexel's Student Learning Priorities (DSLPs) (<http://www.drexel.edu/provost/irae/assessment/outcomes/dslp/>) to help them build their future:

Core Intellectual and Practical Skills:

- Communication
- Creative and critical thinking
- Ethical reasoning
- Information literacy
- Self-directed learning

Experiential and Applied Learning:

- Global competence
- Leadership
- Professional practice
- Research, scholarship and creative expression
- Responsible citizenship

Admission Requirements

Post-college applicants must have completed a four-year degree program. An undergraduate degree in science is preferred but not required. Although a minimum cumulative grade point average (GPA) of 3.0

is strongly desired, an applicant with a lower cumulative GPA will be considered if other strengths are apparent in the application.

Applicants must also fulfill the following requirements for consideration:

- Official transcripts from all colleges and universities attended;
- Essay/Personal statement
- Resume; and
- References from at least three instructors or professionals.

Official test scores from graduate admission exams, such as the Graduate Record Examination (GRE), are optional but highly desirable.

International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. Applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score on the Test of English as a Foreign Language (TOEFL). IELTS scores may be submitted in lieu of TOEFL scores. An evaluation by World Education Services (WES) is required for transcripts from institutions outside the United States.

Online applications (<https://online.drexel.edu/online-degrees/biomedical-degrees/ms-biomedicine-business/#apply>) are accepted all year round for consideration for either fall or spring admission. Students may defer admission by one year. All admission decisions are made at the College of Medicine.

Program Contact Information

For questions about the curriculum and program goals, please contact one of the Program Directors:

- Sandra Urdaneta-Hartmann, MD, PhD, MBA (slu22@drexel.edu)
- Sandhya Kortagere, PhD (sk673@drexel.edu)

For information regarding financial aid, please visit Drexel Central (<http://www.drexel.edu/drexelcentral/>).

For questions about how to apply to the program, please contact an enrollment counselor at duonline@drexel.edu.

Degree Requirements

There are several ways to customize the experiential learning component (2.0 - 6.0 semester credits) so that it satisfies both the degree requirements and, especially, the student's own personal situation. The duration of the internship may vary. Shorter rotations may require that the student enroll in elective courses to meet the semester credit requirements for degree.

Program Requirements

Required Courses

Science Requirements		
MIIM 503S	Biomedical Ethics	2.0
	or IDPT 500S Responsible Conduct of Research	
MIIM 518S	Foundations of Applied Biomedicine *	3.0
MIIM 519S	Commercialization of Biomedical Technology **	3.0
MIIM 631S	Biomedical Innovation Development and Management	5.0
Law Requirements		
LAW 783S	Bioethics	2.0
	or MIIM 503S Biomedical Ethics	
LSTU 500S	Introduction to the Legal System	3.0
LSTU 506S	Patients and Privacy: HIPAA and Related Regulations	3.0

Electives

Choose at least 1 program-specific science elective and 2 law electives	
Science, Program-Specific (Required to pick at least 1 course, but more than 1 is recommended)	
MIIM 517S	Applied Statistics for Biomedical Sciences or IDPT 501 Biostatistics I
MIIM 550S	Biomedicine Seminar
MIIM 605S	Experiential Learning
MIIM 645S	Biomedical Career Explorations
MIIM T680S	Special Topics in Microbiology & Immunology
Science, Clinical Research	
CR 501S	Emerging Trends in Medical Device Regulation
CR 511S	The History of Misconduct in Biomedical Research
CR 514S	World Wide Regulatory Submissions
CR 515S	Intro to Clinical Trials
CR 525S	Scientific Writing and Medical Literature
CR 535S	Current Federal Regulatory Issues in Biomedical Research
CR 545S	Pharmaceutical Law
CR 555S	Compliance & Monitoring Issues
CR 600S	Designing the Clinical Trial
Science, Basic Science & Research	
MIIM 530S	Fundamentals of Molecular Medicine I or MIIM 515 Concepts in Biomedicine I
MIIM 531S	Fundamentals of Molecular Medicine II or MIIM 516 Concepts in Biomedicine II
MIIM 533S	Molecular Medicine Journal Club II
MIIM 534S	Molecular Medicine Journal Club I
MIIM 521S	Biotechniques I: Molecular and Genomic Methods
MIIM 522S	Biotechniques II: Immunological Methods
MIIM 540S	Viruses and Viral Infections
MIIM 541S	Bacteria and Bacterial Infections
MIIM 542S	Mycology and Fungal Infections
MIIM 543S	Parasitology and Parasitic Diseases
MIIM 545S	Introduction to Infectious Diseases
MIIM 546S	Introduction to Immunology
MIIM 606S	Microbiology and Immunology Seminar
MIIM 613S	Emerging Infectious Diseases
MIIM 653S	Clinical Correlations in Infectious Disease
Law (Required to pick at least 2 courses) ***	
LAW 610S	Reproductive Rights Law
LAW 674S	Health Care Fraud and Abuse
LAW 703S	Law and Entrepreneurship
LAW 780S	Health Care Quality Regulation
LAW 781S	Health Care Cost and Access Regulation
LAW 782S	Health Policy Colloquium
LAW 784S	Health Care Finance
LAW 785S	Legal Regulation of Pharmaceutical and Medical Device Research and Development
LAW 787S	Legal Regulation of Pharmaceutical and Medical Device Sales and Marketing Practices
LAW 788S	Law of Medical Malpractice
LAW 792S	Food and Drug Law
LAW 872S	Health Law Legal Research
LSTU 501S	Compliance Skills: Auditing, Investigation & Reporting
LSTU 503S	Legal Research and Analysis
LSTU 504S	Health Care Rules and Regulations
LSTU 505S	Health Care Quality, Patient Safety and Risk Management
LSTU 507S	Risk Assessment and Management
Entrepreneurship ***	
ENTP 611	Learning from Failure
ENTP 621	Innovation & Ideation
ENTP 641	Innovation in Established Companies

* Substitutions: MIIM 515S and MIIM 516S OR MIIM 530S OR MIIM 531S

** Substitutions: MIIM 535S and MIIM 536S

*** Science and law courses are offered on a semester basis, and entrepreneurship courses are offered on a quarter basis. Semesters and quarters overlap. Credits shown for entrepreneurship courses are quarter credits (3 quarter credits = 2 semester credits). This program requires a minimum of 36.0 semester credits to meet the degree requirements. This requirement can be met through a combination of science, digital media and entrepreneurship courses.

About the Program

The MS in Biotechnology program is designed to train laboratory personnel in the theory and practice of state-of-the-art technologies for biochemical analysis. The program is targeted to individuals who will be seeking employment in biotechnology/pharmaceutical firms or academic laboratories and is appropriate for recent college graduates or experienced technicians. Graduates of this program will possess a set of technical skills that will make them very competitive for laboratory jobs in the academic or industrial sectors, or, if they are already employed, enhance their potential for advancement.

This program includes both academic coursework and hands-on practica.

For more information, please visit Drexel College of Medicine's Biotechnology Program (<http://drexel.edu/medicine/academics/graduate-school/biotechnology/>) web page.

Jane Azizkhan-Clifford, PhD
Interim Program Director
Department of Biochemistry and Molecular Biology
Drexel University College of Medicine
biotechnology@drexelmed.edu

Admission Requirements

For acceptance to the program, the applicant must have completed a four-year biology or chemistry-based bachelor's degree program, or equivalent. While there are no minimum requirements, applicants should be competitive with regard to grades, entrance exam scores and letters of recommendation. Students must fulfill all requirements for consideration as defined by the Executive Committee of the Division of Biomedical Science Programs:

- official transcripts from all colleges and universities attended
- official transcript evaluation such as WES, for transcripts from international institutions that are not in English, or that do not use a 4 point GPA scale;
- official entrance exam scores such as the Graduate Record Examination (GRE) or Medical College Admission Test (MCAT);
- references from at least three instructors or industry professionals;
- an application fee of \$75;
- international applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score on the Test of English as a Foreign Language (TOEFL), or IELTS, with the exception of those who have received their undergraduate degree in an accredited US institution;

Students applying to the program will be expected to have undergraduate experience in chemistry, cell biology, biochemistry, and mathematics--including, at a minimum--two semesters each of inorganic chemistry, organic chemistry, physics, calculus and biology.

To learn more about applying to Drexel College of Medicine programs visit the College of Medicine's Graduate School of Biomedical Sciences and Professional Studies (<http://www.drexel.edu/medicine/Academics/Graduate-School/>) website.

About the Curriculum

This program offers a set of required didactic courses designed to provide students with the theoretical underpinnings of modern Biochemistry and Biotechnology, and will form a foundation for the four hands-on practica. These practica will provide detailed exposure and experience in four different aspects of biochemistry/biotechnology: protein expression and purification; crystallography; gene expression and manipulation; protein-protein and protein-ligand interaction with SPR; and imaging/microscopy. Each practica will be conducted under the close supervision of a faculty member with expertise in the area, and will progress from an initial set of experiments in which the results are already known (allowing students to become familiar with techniques), then progressing to a project tightly associated with the ongoing research in the mentor's laboratory. The third practicum will be 8.0 semester credit hours, and will include preparation of a scholarly paper that reviews a topic related to the techniques associated with that particular practicum.

Program Requirements

Required Courses		
BIOC 507S	Biochemistry Seminar Series *	4.0
BIOC 508S	Experimental Approaches to Biochemical Problems	3.0
BIOC 603S	Advanced Topics in Biochemistry and Molecular Biology	1.5
IDPT 500S	Responsible Conduct of Research	2.0
IDPT 502S	Learn Early As Professionals I (LEAP I)	1.0
IDPT 504S	Learn Early and Practice (LEAP II)	1.0
IDPT 521S	Molecular Structure and Metabolism	5.0
IDPT 526S	Cells to Systems	5.0
Required Practica		
BIOC 513S	Biotechnology Practicum I	4.0

Cancer Biology

Major: Cancer Biology

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 46.0 (non-thesis); 55.0 (thesis)

Classification of Instructional Programs (CIP) code: 26.0911
Standard Occupational Classification (SOC) code: 19-1042

About the Program

The goal of the MS in Cancer Biology program is to provide a master's degree focused on the fundamentals of cancer from an interdisciplinary perspective, including:

- biology and molecular biology of cancer initiation;
- metastasis;
- treatment; and
- bioinformatics/systems biology.

The program is designed to meet the needs of two groups of individuals: (1) new or recent college graduates who wish to increase their marketability for jobs in academic or industrial laboratories through the acquisition of knowledge and skills more developed than obtained through a standard college curriculum; and (2) currently employed technical staff in the pharmaceutical or biotechnology industry (or academia) who wish to advance their position.

Consisting of both classroom and laboratory instruction, the program fills a need to train laboratory personnel in cancer theory and research. Graduates of this program will possess knowledge in both the theoretical as well as the practical level.

Additional Information

For more information about the program, and how to apply, please visit the College of Medicine's Cancer Biology Program (<http://drexel.edu/medicine/academics/graduate-school/cancer-biology/>) web page.

Mauricio Reginato, PhD
Program Director

Clinical Research for Health Professionals

Major: Clinical Research for Health Professionals

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 36.0

Classification of Instructional Programs (CIP) code: 51.0000

Standard Occupational Classification (SOC) code: 11-9199

About the Program

The MS in Clinical Research for Health Professionals program is a non-thesis curriculum designed for residents, fellows, and clinicians seeking knowledge in the conduct of translational and investigator-initiated research. The degree often acts as an advanced preparation for independent investigators and other practicing researchers familiar with clinical research, while developing their clinical careers.

The program is also available to other clinical health professionals such as nurses (with a minimum of a bachelor's degree required), medical technologists, etc., to help these individuals advance their professional opportunities.

Online course work coupled with supervised independent research activities will allow health care professionals in any academic hospital

setting throughout the US to receive an MS degree from Drexel University College of Medicine (DUCoM).

Research Project

While the MS in Clinical Research for Health Professionals program does not require a thesis, the program is consistent with a master's level education that challenges students to clearly express well-organized thoughts in written form. The collection, analysis and refinement of scientific information to produce a professional-level written document are crucial skills for those in the health professions. This requirement will expose students to the entire process of developing an independent research project and reporting on that research project up to and including experiencing a facsimile of the peer review and re-submission process. The research project will provide students with the opportunity to develop, test and report on research hypotheses.

It is anticipated that each student will conduct a minimum of nine hours research per week for 3.0 credits per semester. Research may include a broad spectrum of clinical studies such as: retrospective studies; bench-top studies in conjunction or not with pharmaceutical companies; development of new clinical methodologies/techniques; or, development/evaluation of new medical devices. Research mentors must be established researchers with a doctoral degree. A key requirement of this mentored research is the support of a doctoral level mentor/advisor located at the institution where the student's research will be conducted. A curriculum vitae of the proposed research mentor must be submitted with the student's application for evaluation by the admissions committee and the program director. The appropriateness of the mentor will be evaluated by an ad hoc committee whose members come from the Graduate School faculty. The student must submit a 7-10 page journal-format paper at the end of each semester documenting their research and demonstrating that each successive semester's work builds upon their prior work.

For more information about the program and to apply, visit the Drexel University Online (<http://online.drexel.edu/online-degrees/biomedical-degrees/ms-crhp/>) web site.

Clinical Research Organization and Management

Major: Clinical Research Organization and Management

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 36.0

Classification of Instructional Programs (CIP) code: 51.0000

Standard Occupational Classification (SOC) code: 11-9199

About the Program

The Master of Science in Clinical Research Organization and Management is an online program designed for individuals already trained in the area of clinical sciences, as well as for others who desire a focused education in the proper conduct of clinical research.

The Master of Science in Clinical Research Organization and Management program offers students a rigorous graduate education taught by leaders from the pharmaceutical, biotechnology and medical device industries, as well as from academic research centers. The program provides online courses that include scientific rationale related to the design and analysis of clinical trials, epidemiology and

biostatistics, ethics-based reasoning for the conduct of research, clinical trial management and monitoring processes, and federal regulatory rules and policies essential to the development of a broadly-educated and well-prepared professional in clinical research and new therapeutic product investigation.

The program is designed so that graduates will be able to:

- Successfully apply the framework and philosophies of research to the management of clinical trials, employing quality principles of current good clinical practice to produce valid and useful data;
- Ensure that sound ethical principles and values are always recognized and upheld in research involving a human population;
- Use current statistical knowledge and methods in the design, implementation, conduct, and assessment of clinical trial programs; and
- Describe the scientific and clinical research literature to effectively interpret the results of clinical research, thereby enhancing the decision-making process.

Students work with advisors to customize their course plans to meet their career goals.

Program Delivery Options

All Clinical Research (CR) courses are offered solely online. Visit Drexel University Online for details.

Degree Requirements

The Master of Science in Clinical Research Organization and Management program consists of 12 courses (36.0 credits). Any courses offered by the Clinical Research Organization Management program (Subject code "CR") may be applied to fulfill the requirements of this major. No master's thesis is required.

The program is organized into five areas of study devoted to clinical research and related administrative and regulatory issues. Students may take courses within their preferred area of study, a cross-section of courses within other areas of study, **or any other Clinical Research (CR) courses being offered.**

Criminalistic Science

Major: Criminalistic Science

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 44.5

Classification of Instructional Programs (CIP) code: 43.0111

Standard Occupational Classification (SOC) code: 19-4092; 33-3021

About the Program

The School of Biomedical Sciences and Professional Studies offers the Master of Science in Criminalistic Science. The Master of Science in Criminalistic Science is designed to introduce students to the basic principles of Criminalistic Science while also providing opportunities to pursue either more traditional and/or more innovative concentrations of study.

Criminalistics is defined as the scientific study and analysis of crime scenes and the evidence within those scenes to solve a crime and apprehend the perpetrator of the crime. The disciplines within criminalistics are science based, with most using multiple combinations of the natural sciences to conduct examinations and analysis of evidence and crime scenes.

In addition to required courses in criminal law, trial process and the use of evidence, the Master of Science in Criminalistic Science program offers courses in fingerprint science, forensic engineering, motor vehicle crash reconstruction, firearms and tool mark analysis, fire and explosion analysis, footwear and tire track analysis, bloodstain pattern analysis, trace materials and forensic geology and botany, and nuclear, biological, chemical terrorism/mass disaster management.

Admission Requirements

Applicants must have a bachelor's degree from an accredited US college or university or its equivalent. Official general GRE scores are required for admission. Typical applicants would have a minimum 3.0 GPA.

Selection is based upon academic qualifications, standardized test scores, references, an evaluation of the candidate's goals and commitment, and a telephone interview.

Each applicant's academic record will be evaluated based upon its individual merits. Since consideration for employment within the field of criminalistic science necessitates the absence of a criminal background, it is expected that all individuals applying to this program will have no history of criminal behavior, including prior illicit drug and/or prescription drug abuse.

FCA 506S	Medico-legal Death Investigation	2.0
FCA 510S	Gross Human Skeletal Biology	3.0
MFSP 550S	Biological Aspects of the Forensic Sciences	2.0
MFSP 556S	Forensic Anthropology and Topics in Human Identification	3.0
MFSP 559S	Criminal Law and the Court: Use of Evidence I	3.5
MFSP 561S	Techniques of Crime Scene Investigation	3.0
MFSP 575S	Introduction to Criminal Law and Trial Process	3.0
MFSP 576S	Ethics for the Forensic Scientist	2.0
MFSP 602S	Professional Courtroom Testimony & Moot Court	3.0
Introduction to Scientific Writing *		2.0

Elective Courses **15.0**

MFSP 560S	Criminal Law and the Court: Use of Evidence II	
MFSP 562S	Arson and Explosive Analysis	
MFSP 563S	Latent Fingerprint Analysis	
MFSP 565S	Firearms and Tool Mark Analysis	
MFSP 566S	Techniques of interview and interrogation	
MFSP 568S	Vehicle Accident Reconstruction and Analysis	
MFSP 569S	Footwear and Tire Track Analysis	
MFSP 570S	Nuclear/Biological/Chemical Terrorism	
MFSP 571S	Bloodstain Pattern Analysis	
MFSP 578S	Forensic Photography	
MFSP 590S	Homicide Investigation	
MFSP 591S	Criminal Investigative Analysis I	
MFSP 593S	Cyber Crime	
MFSP 595S	Criminal Investigative Analysis II	
MFSP 596S	Advanced Vehicle Accident Analysis	
MFSP 597S	Forensic Serology	

Total Credits 44.5

* Introduction to Scientific Writing will be offered as a Special Topics Course, IHS T580S, during the 2017-2018 academic year.

Drexel Pathway to Medical School

Major: Drexel Pathway to Medical School

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 48.0

Classification of Instructional Programs (CIP) code: 26.9999

Standard Occupational Classification (SOC) code: 19-1029

About the Program

This intensive, one-year master's degree program provides qualifying candidates a conditional acceptance for matriculation into Drexel University's College of Medicine following successful completion of the program. Small-group instruction is provided during the intensive introductory summer enrichment portion of the curriculum and individual counseling with an administrative advocate is available throughout the program.

Visit the Drexel University College of Medicine's website: Drexel Pathway to Medical School Program (<http://www.drexelmed.edu/Home/AcademicPrograms/GraduateSchoolofBiomedSciencesProfStudies/DrexelPathwaytoMedicalSchool.aspx>).

Admission Requirements

The program is open to all premedical students who have successfully completed the prerequisite coursework for medical school with a grade of C or better. All applications to the DPMS program are considered by the College of Medicine which utilizes a holistic review process. While there are no specific minimum or maximum GPA or score requirements, a typical competitive applicant has a GPA above 2.9 and an MCAT above the 25th percentile. If an applicant is chosen for an interview, they will be notified by the College of Medicine.

Drug Discovery and Development

Major: Drug Discovery and Development

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 38.0

Classification of Instructional Programs (CIP) code: 26.1001

Standard Occupational Classification (SOC) code: 19-1029

About the Program

The MS in Drug Discovery and Development program provides in-depth exposure to the multiple elements involved in the discovery and development of marketed drugs. This unique program provides the rigorous scientific and technical training necessary to succeed in the complex and multidisciplinary field of drug discovery. It has been designed to prepare students for a smooth transition into an enduring and productive career within the pharmaceutical and biotechnology industry. It covers all aspects of drug discovery and development beginning with the identification of a drug target and proceeding through to clinical trials, regulatory approval and commercialization. Students will also be introduced to business aspects as well as to other areas of biotechnology and to the basic sciences of pharmacology and physiology.

The MS in Drug Discovery and Development is available to individuals who have already obtained a BS or BA degree in the biomedical sciences, life sciences, health sciences or related fields who wish to pursue an industry-focused master's-level degree or enhance their qualifications for a doctoral program in the biomedical sciences or medicine. This includes individuals who plan to pursue a career in the pharmaceutical or biotechnical industries.

This program is also intended for individuals from other disciplines who wish to have a broader base of information about drug discovery and development, those who may wish to transition into the industry, or those who are already active in the industry and seek to increase their knowledge. The curriculum has been designed with the recognition that the pharmaceutical and biotechnical industries require a diversity of experience and expertise.

For more information about this program, visit the College of Medicine's Biomedical Graduate Studies (<https://drexel.edu/medicine/admissions/overview/>) page.

Admission Requirements

For acceptance to the program, the applicant must have completed a four-year biology or chemistry-based bachelor's degree program, or equivalent, with at least a 3.0 GPA. Students must fulfill all requirements for consideration as defined by the Drexel University College of Medicine Biomedical Graduate Education Committee:

- official transcripts from all colleges and universities attended;
- official copies of entrance test scores and official test scores from the Graduate Record Examination (GRE) for applicants to the full-time program;
- references from at least three instructors or professionals;
- an application fee is required for the full-time program;
- International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. Applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score on the Test of English as a Foreign Language (TOEFL), or IELTS.

Students applying to the program will be expected to have undergraduate experience in chemistry, cell biology, biochemistry, and mathematics and are encouraged to have training in inorganic chemistry, organic chemistry, physics, calculus and biology.

Visit Drexel University's Graduate Admissions (<http://www.drexel.edu/grad/programs/ducom/>) site for additional information regarding specific requirements for applying to the Graduate School of Biomedical Science and Professional Studies in the College of Medicine as well as important application dates.

For additional information on how to apply, visit Drexel's Admissions page for Biomedical Graduate Studies (<http://www.drexel.edu/grad/programs/ducom/apply/>).

Degree Requirements

The curriculum is designed to provide students with a with a comprehensive understanding of the entire process of drug discovery and development and its scientific foundation, while simultaneously offering multiple options to pursue specialized areas of interest.

Required Courses

IDPT 500S	Responsible Conduct of Research	2.0-3.0
or CR 612S	Fundamentals of Compliance	
NEUR 500S	Statistics for Neuro/Pharm Research	2.0-3.0
or IDPT 501S	Biostatistics I	
or CR 520S	Applications of Clinical Research Biostatistics	
PHRM 512S	Graduate Pharmacology	3.0
PHRM 525S	Drug Discovery and Development I	3.0
PHRM 526S	Drug Discovery and Development II	3.0
PHRM 527S	Current Topics in Drug Discovery and Development	1.0
PHRM 605S	Research in Drug Discovery and Development	4.0
or PHRM 610S	Practicum in Drug Discovery and Development	

Electives * 20.0-21.0

CBIO 510S	Cancer Biology	
CR 500S	Epidemiology	
CR 501S	Emerging Trends in Medical Device Regulation	
CR 505S	Ethical Issues in Research	
CR 508S	Medical Device Combination Product Regulation	
CR 510S	Sponsored Projects Finance	
CR 511S	The History of Misconduct in Biomedical Research	
CR 512S	Fundamentals of Academic Research Administration	
CR 513S	Business Processes and Contemporary Concerns in Pharmaceutical R & D	
CR 514S	World Wide Regulatory Submissions	
CR 515S	Intro to Clinical Trials	
CR 518S	Clinical Trial Budgeting	
CR 520S	Applications of Clinical Research Biostatistics	
CR 523S	Current Issues in Review Boards	
CR 525S	Scientific Writing and Medical Literature	
CR 527S	Clinical Data Management	
CR 535S	Current Federal Regulatory Issues in Biomedical Research	
CR 536S	Clinical Project Management	
CR 541S	Patient Recruitment and Informed consent	
CR 545S	Pharmaceutical Law	
CR 546S	Clinical Outsourcing	
CR 550S	Leadership Skills	
CR 551S	International Regulatory Affairs	
CR 555S	Compliance & Monitoring Issues	
CR 565S	Contemporary Issues in Human Research Protection	
CR 570S	Principles and Practice of Pharmacovigilance	
CR T580S	Special Topics in Clinical Research	
CR 600S	Designing the Clinical Trial	
CR 609S	Innovative Product Development	
CR 612S	Fundamentals of Compliance	
CR 614S	Introduction to Clinical Pharmacology	
CR 617S	Informatics in Pharm Res & Development	
CR 620S	Regulatory, Scientific and Social Issues Affecting Biotech Research	
CR 625S	Health Policy and Economics	
CR 631S	Applications of Clinical Research Biostatistics II	
CR 633S	Quality Assurance Audits	
CR 635S	Strategic Planning	
MIIM 521S	Biotechniques I: Molecular and Genomic Methods	
MIIM 522S	Biotechniques II: Immunological Methods	
MIIM 524S	Vaccines and Vaccine Development	
MIIM 527S	Immunology, Immunopathology and Infectious Diseases	
MIIM 530S	Fundamentals of Molecular Medicine I	
MIIM 531S	Fundamentals of Molecular Medicine II	
MLAS 536S	Animal Models for Biomedical Research	
NEUR 508S	Graduate Neuroscience I	
PATH 601S	Cell and Molecular Pathobiology of Cancer	

PHGY 503S	Graduate Physiology	
PHRM 502S	Current Topics in Pharmacology & Physiology	
PHRM 503S	Pharm & Phys 1st Lab Rotation	
PHRM 507S	Prin of Neuropharmacology	
PHRM 516S	Advanced Topics in Physiology	
PHRM 517S	Advanced Topics in Pharmacology	
PHRM 518S	New Frontiers in Therapy	
PHRM 519S	Methods in Biomedical Research	
PHRM 520S	Internship in Drug Discovery and Development	
PHRM 521S	Intensive Internship in Drug Discovery and Development	
Quarter Elective Course Options (must be approved by advisor)		
PHRM T580S	Special Topics in Pharmacology	
BMES 604	Pharmacogenomics	
MGMT 910	Readings in Strategic Management	
MGMT 940	Seminar in Organizational Behavior	
ORGB 625	Leadership and Professional Development	
PBHL 530	Principles of Epidemiology	
PROJ 501	Introduction to Project Management	
PROJ 535	International Project Management	

Total Credits 38.0-41.0

* Courses that are not listed above may be taken as electives only with the approval of the program director.

Forensic Science

Major: Forensic Science

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 42.0- 43.0

Classification of Instructional Programs (CIP) code: 43.0106

Standard Occupational Classification (SOC) code: 19-4092

About the Program

The Master of Science in Forensic Science (MSFS) program is a two-year graduate program leading to the Master of Science degree. Students in this program will gain theoretical and practical expertise in various aspects of forensic investigation. Graduates from the MSFS program will be prepared to work as analysts in forensic laboratories or in the biotech and pharmaceutical industry and gain a foundation for additional degrees in science and healthcare.

The core curriculum, taken by all students, provides foundational skills in forensic chemistry, biology, criminalistics, statistics, and law. For enhanced study, students can further specialize through concentrations in Molecular Biology or Forensic Medicine, leveraging the areas of expertise within the College of Medicine. Students will also complete a thesis-quality mentored research project in an area of their interest within the different disciplines represented at the College.

For more information about this program, visit the College of Medicine's Master of Science in Forensic Science (<http://www.drexel.edu/medicine/Academics/Graduate-School/Forensic-Science/>) web page.

Admission Requirements

Applicants to the MS in Forensic Science Program must have completed a four-year BA or BS degree program with a focus in biology, chemistry or related disciplines with undergraduate coursework in biology, general and organic chemistry, physics, mathematics, or related subjects. Although a minimum cumulative grade point average (GPA) of 3.0 on a 4.0 system is strongly desired, applicants with a lower cumulative GPA will be considered based on overall experience, such as research and/or professional, and other strengths that are demonstrated in the application.

The following must be submitted for consideration:

- Application with \$75.00 fee
- Official transcripts from each college and/or university attended
- Three letters of recommendation (two must be academic)

- Official GRE or other standardized test scores (e.g. MCAT test scores)
- A personal statement describing the interest in this field, personal goals and career aspirations
- International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. Applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score on the Test of English as a Foreign Language (TOEFL), or IELTS.

Histotechnology

Major: Histotechnology

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 46.0

Classification of Instructional Programs (CIP) code: 51.1007

Standard Occupational Classification (SOC) code: 29-2011; 29-2012

About the Program

The Graduate School of Biomedical Sciences and Professional Studies offers the Master of Science in Histotechnology program. This one-year (12-month) program combines academic studies with a clinical practicum to prepare the students to perform complex tissue specimen preparations in the histology laboratory. The program provides advanced training and is designed to enable graduates to work as highly qualified histotechnologists under the supervision of pathologists.

Coursework includes histology, biochemistry, advanced histotechnology, anatomy, physiology, microbiology, medical ethics, laboratory management and leadership skills. In addition to the course work, students complete a three-month practicum designed to allow students to apply the knowledge and techniques learned during their didactic courses in a clinical hospital setting. The practicum allows the student the opportunity to perform routine as well as specialized, histotechnology techniques under the supervision of a qualified histotechnologist.

Program Accreditation

The *National Accrediting Agency for Clinical Laboratory Sciences (NAACLS)* has established national standards for Histotechnology training programs. The standards include both didactic course work and clinical experiences necessary to properly educate a Histotechnologist. The Master of Histotechnology program at Drexel University College of Medicine is accredited by NAACLS. Visit the NAACLS (<http://www.naacls.org/>) website for more information about the professional activities of this organization.

Professional Certification

The *American Society for Clinical Pathology Board of Certification (ASCP BOC)* has established a national certification program for Histotechnologists. Graduates of the Master of Histotechnology program are eligible to sit for the national certification examination for Histotechnology. Visit the ASCP BOC (<http://www.ascp.org/Board-of-Certification/>) website to read more about the certification program and the professional activities of this organization.

Professional Affiliation

The *National Society for Histotechnology (NSH)* is a non-profit organization, committed to the advancement of Histotechnology, its practitioners and quality standards of practice through leadership, education and advocacy. Visit the NSH website to read more about the professional activities of this organization.

Career Opportunities

Histotechnologists are employed in community hospitals, academic centers such as medical schools and university hospitals, private pathology laboratories, medical research centers, government hospitals. Additional opportunities are available in clinical and industrial research, veterinary pathology, marine biology and forensic pathology.

For more information about this program, visit the College of Medicine's Master of Science in Histotechnology (<http://www.drexelmed.edu/Home/AcademicPrograms/ProfessionalStudiesintheHealthSciences/AlliedHealthProfessionPrograms/HistotechnologyProgram.aspx>) page.

Admission Requirements

A bachelor's degree in a biological or allied health science, with a cumulative GPA of approximately 2.75, is the minimum requirement for acceptance into the Master's Degree Program. Prerequisite course work includes mathematics, English composition, general chemistry, organic and/or biochemistry and biological science. Microbiology, anatomy and histology are recommended but not required.

All candidates will be required to have a formal interview with one of the program director's prior to final acceptance. Deadline for submission of the application is the second Friday in June of the year in which the students plan to enroll.

Candidates for admission must provide the following credentials:

- Completed application form
- Resume
- Official Transcripts from all schools attended or where coursework was attempted or taken
- Official General Graduate Record Examination (GRE) scores
- Three letters of evaluation
- Self-assessment essays:
 - A. Discuss personal goals, conditions, or career aspirations that motivate you to pursue graduate study at Drexel University.
 - B. What are your most important accomplishments?
 - C. What do you expect to achieve through this program?

The application and supporting material must be received no later than the program deadline date.

Immunology

Major: Immunology

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 36.0

Classification of Instructional Programs (CIP) code: 26.0507

Standard Occupational Classification (SOC) code: 11-9121

About the Program

Mission Statement

The Master of Science in Immunology, offered by the Department of Microbiology and Immunology and the Institute for Molecular Medicine and Infectious Disease (IMMID), is a **non-thesis degree program**. The program provides education and training in areas of research in basic and clinical immunology and immunologically-based diseases. Students in this program acquire theoretical and practical knowledge about the normal functions of the immune system and disease pathogenesis associated with immunological dysfunction. Students also learn how this knowledge is applied to develop tools for diagnosis, treatment, prognosis, and prevention of immunologically based diseases. Graduates from this program will be ready to enter the biotechnology workforce and are attractive candidates for doctoral programs in science and medicine.

The Master of Science in Immunology program is designed to provide academic and practical biotechnical knowledge in translational research, particularly in the areas of immunotherapeutics and vaccine development.

Curriculum

The two year non-thesis program encompasses fundamental requirements to establish a sound grounding in immunology, biochemistry, genetics, cellular and molecular biology. The program is typically completed in two full-time years (four semesters of at least nine credits) of required and elective graduate courses, and one or more experiential research components in the first or second year. The flexibility

of the curriculum enables students to complete the degree requirement within 18 months on an accelerated basis, and up to 4 years on a part-time basis. The successful completion of the degree will be determined by grades obtained in the graduate courses, participation in seminars and journal clubs, and performance in the research component. A minimum of 36.0 credits is required to graduate, with at least 6 of those earned as research credits.

The experiential research component of the curriculum can be fulfilled by two alternative approaches. Most students choose to engage in an intensive 6.0 credit hands-on research internship in which a 12-16 week research program will be undertaken in a laboratory at Drexel University, another academic institution, or at a biotechnology or biopharmaceutical company. Alternatively, students may choose to engage in a less intensive experience spanning two semesters, or conduct an independent research project, with the approval and supervision of Program Directors.

Traditional (Face-to-Face), Hybrid, or Online Learning Options

Classes can be attended at any of Drexel College of Medicine locations: Center City and Queen Lane campuses in Philadelphia. State-of-the-art video conferencing provides real-time interactive learning at these locations. Most classes are held in the late afternoon/early evening to facilitate participation of working professionals. The program may also be completed fully online, offered through Drexel University Online (<https://online.drexel.edu/online-degrees/biomedical-degrees/ms-immunology/>). All required courses and most electives have online sections and online students experience the same curriculum as face-to-face or hybrid students. Online sections are designed to maximize interactions among students and faculty, and may include live web sessions. Individual students also may choose a mix of traditional and online (hybrid) courses. The goal is to provide maximum scheduling flexibility.

Program Contact information

For more detailed information about the curriculum and program goals, please contact either:

Stephen Jennings, PhD

Email: srj32@drexel.edu (stephen.jennings@drexelmed.edu)

or

Pooja Jain, PhD

Email: pj27@drexel.edu (pooja.jain@drexelmed.edu)

Program Goals

Over the course of completing the program, students will develop

1. Core knowledge of molecular and cellular disciplines that constitute biomedical sciences
2. Working knowledge of normal functions of the immune system at the cellular and molecular level and how immunological dysfunction contributes to immunologically based disease
3. Practical knowledge and skills that help identify gaps in the biomedical field for the development of molecular diagnostic and therapeutic tools.
4. Skills in basic, translational, or clinical research
5. Professional ethics necessary for the responsible conduct of research

6. Communication and leadership skills
7. Other soft skills (e.g., collaboration, problem solving, career planning, networking) that facilitate career advancement and promotion

In the course of meeting these program-level goals, students will have also made progress in all of the Drexel Student Learning Priorities (DSLPs) to help them build their futures.

Core Intellectual and Practical Skills:

- Communication
- Critical and creative thinking
- Ethical reasoning
- Information literacy
- Self-directed learning
- Technology use

Experiential and Applied Learning:

- Global competence
- Leadership
- Professional practice
- Research, scholarship and creative expression
- Responsible citizenship

Admission Requirements

For acceptance into the Master of Science in Immunology program, the applicant must have completed a four-year biology or chemistry-based BA or BS degree program with undergraduate coursework in biology, microbiology, immunology, chemistry, biochemistry, mathematics, and/or other related subjects. Although a minimum cumulative grade point average (GPA) of 3.00 is strongly desired, an applicant with a lower cumulative GPA will be considered if other strengths are apparent in the application.

To be considered for acceptance, an applicant must provide the following as part of a complete online application for admission:

- Official transcripts from all colleges and universities attended
- A current *curriculum vitae* (CV) or resume
- References from at least three instructors or professionals

Although standardized test scores are not required for admission, official copies of scores from the Graduate Record Examination (GRE) or Medical College Admission Test (MCAT) will be considered if submitted as part of the application.

International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. In addition to the above requirements, applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS).

Acceptance into the program will be decided by considering the sum of the applicant's undergraduate curriculum, cumulative GPA, GRE/MCAT scores, recommendation letters, and relevant research and professional experience.

Online applications are considered year round. Potential students are encouraged to apply no later than July 1 for Fall admission, or December 1 for Spring admission.

For additional information about the program and to access the online application, view the Master of Science in Immunology (<http://drexel.edu/medicine/academics/Graduate-School/immunology/>) page on the College of Medicine's website.

Degree Requirements

About the Curriculum

Through the combination of required and elective courses, a total of 36.0 credits is required to successfully obtain the degree of Masters of Science in Molecular Medicine. In order to maintain full-time student status, a minimum of 9.0 credits must be taken in any given academic semester. In most cases, there are both traditional (face-to-face) and online sections for each course). Students should work with their program advisors to plan their course of study.

Research Requirements

The research component of the curriculum can be fulfilled by two alternative approaches. Most student choose to engage in a hands-on research internship in which a 12 week research program will be undertaken in a laboratory at Drexel, another academic institution, or at a biotechnology or biopharmaceutical company. Alternatively, students may choose to engage in an independent research project, with the approval and supervision of Program Directors.

For an individualized plan of study listing the sequence of courses to be completed, students should work with their program advisor.

Program Requirements

Required Courses

IDPT 500S	Responsible Conduct of Research	2.0
or MIIM 503S	Biomedical Ethics	
IDPT 501S	Biostatistics I	2.0
or MIIM 517S	Applied Statistics for Biomedical Sciences	
MIIM 527S	Immunology, Immunopathology and Infectious Diseases	3.0
MIIM 530S	Fundamentals of Molecular Medicine I	3.0
MIIM 531S	Fundamentals of Molecular Medicine II	2.0
MIIM 532S	Fundamentals of Molecular Medicine III	2.0
MIIM 533S	Molecular Medicine Journal Club II	1.0
MIIM 534S	Molecular Medicine Journal Club I	1.0
MIIM 606S	Microbiology and Immunology Seminar	1.0
MIIM 654S	Clinical Correlations in Immunology	3.0

To complete the MS in Immunology degree, 36.0 credits must be accrued. Students may choose from a menu of additional electives, depending on their academic goals.

Possible Electives

MIIM 502S	Microbiology and Immunology Journal Club
MIIM 521S	Biotechniques I: Molecular and Genomic Methods
MIIM 522S	Biotechniques II: Immunological Methods
MIIM 524S	Vaccines and Vaccine Development
MIIM 525S	Principles of Biocontainment
MIIM 540S	Viruses and Viral Infections
MIIM 541S	Bacteria and Bacterial Infections
MIIM 542S	Mycology and Fungal Infections
MIIM 543S	Parasitology and Parasitic Diseases
MIIM 555S	Molecular Mechanisms of Microbial Pathogenesis
MIIM 607S	Immunology II
MIIM 612S	Molecular Mechanisms of Viral Pathogenesis

MIIM 613S	Emerging Infectious Diseases
MIIM 615S	Experimental Therapeutics
MIIM 621S	Biomedical Research I
MIIM 622S	Biomedical Research II
MIIM 625S	Advanced Molecular Virology
MIIM 630S	Advanced Molecular Biology
MIIM 651S	Research Internship in Immunology
MIIM 660S	Current Concepts in Molecular Medicine I
MLAS 529S	Molecular Genetics
Total Credits	
36.0	

Infectious Disease

Major: Infectious Disease

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 36.0

Classification of Instructional Programs (CIP) code: 26.0508

Standard Occupational Classification (SOC) code: 19-1022; 19-1029

About the Program

Mission Statement

The Master of Science in Infectious Disease (<http://www.drexel.edu/medicine/Academics/Graduate-School/Infectious-Disease/>) program, offered by the Department of Microbiology and Immunology (<http://www.drexel.edu/medicine/About/Departments/Microbiology-Immunology/>) and by the Institute for Molecular Medicine and Infectious Disease (<http://www.drexel.edu/medicine/About/Departments/Institute-for-Molecular-Medicine-Infectious-Disease/>) (IMMID), provides graduate-level training in the area of infectious disease. Classroom activities, online learning, and research experiences cover fundamentals of molecular biology, cell biology, and immunology, as well as basic, translational, and clinical aspects of diseases caused by important infectious pathogens, including HIV, methicillin-resistant *Staphylococcus aureus* (MRSA), malarial parasites, influenza virus, and Zika virus. Elective courses offer highly focused studies of topics relevant to infectious disease, including: vaccines and vaccine development; viral, bacterial, parasitic, and fungal pathogens; emerging pathogens; principles of biocontainment; and experimental therapeutics.

The program is designed to prepare students for careers in infectious disease in government, industry, and academic settings. The program is ideally suited for enhancing the scientific credentials of recent college graduates, early career scientists, premedical students, employees in industry, and clinical laboratory technicians.

Curriculum

This non-thesis degree program comprises numerous required and elective graduate courses, as well as an elective research internship that can be completed during the course of the training program. Although most learners will complete the program in two years (four semesters) as full-time students, some may opt to enroll on a part-time basis, taking up to seven years to complete the degree program. Elective courses available to students in the program provide knowledge and expertise in areas relevant to infectious disease research, such as emerging infectious diseases, vaccines and vaccine development, biotechniques and laboratory research, and principles of biocontainment. The successful completion of the degree will be determined by grades obtained in the graduate courses, participation in seminars and journal clubs, and (if applicable) performance in the experiential learning component. The

degree is conferred upon successful completion of a minimum of 36.0 credits of course work.

Learning Options

The Master of Science in Infectious Disease Program is available in two learning formats. Students can enroll in the face-to-face/hybrid program and attend classes on the Center City and Queen Lane campuses of the Drexel University College of Medicine in Philadelphia. Most classes are held in the late afternoon/early evening to facilitate participation of working professionals. Required and elective courses are offered both live (face-to-face) and online, providing the student the flexibility to formulate a hybrid plan of study that includes a mix of traditional, face-to-face courses and online courses.

The online degree program, which is offered through Drexel University Online, features the same curriculum as the face-to-face/hybrid program, including the experiential research internship. Online courses are designed with activities that maximize interactions among students and faculty, including live web sessions with faculty and guest speakers.

These different program formats provide students with maximum flexibility to meet their schedule demands and accommodate their learning preferences.

Experiential Learning

A signature element of the Program is the Research Internship in Infectious Disease. The internship encompasses one of three specific areas of research in the field of infectious disease:

- basic discovery involving infectious bacterial, viral, fungal, or parasitic pathogens that cause human disease;
- translational research focused on the development of new approaches to diagnose, prevent, or treat infectious diseases; and
- clinical infectious disease research focused on infectious diseases in humans.

Most students choose to engage in a hands-on research internship consisting of a 17-week research project in a laboratory at Drexel University, another academic institution, or at a biotechnology or biopharmaceutical company. Students in the online program can make arrangements with academic or industrial institutions at their own locations rather than in the Greater Philadelphia region. Alternatively, traditional and online students may choose to engage in independent research projects with the approval and supervision of the Program Director.

Because the Research Internship in Infectious Disease is an elective course, students can instead choose to earn all 12 elective credits by completing other elective courses offered as part of the curriculum.

Program Contact Information

For more detailed information about the curriculum and program goals, please contact:

Fred Krebs, Ph.D. (Director)
Email: fck23@drexel.edu

Visit the websites for the face-to-face/hybrid and online Master of Science in Infectious Disease programs for more detailed information. For additional information regarding application deadlines, the online application process, and specific requirements for applying to the College

of Medicine, visit Drexel University's Graduate Admissions (<http://www.drexel.edu/grad/programs/ducom/infectious-disease/>) site.

Program Goals

Upon completion of the Master of Science in Infectious Disease Program, students will have achieved the following program-level goals:

1. **Develop broad core knowledge in the biological sciences.**
 - Demonstrate proficiency in fundamental concepts in molecular biology, biochemistry, and cell biology.
 - Demonstrate proficiency in these areas as they are described and applied in the primary scientific literature.
2. **Develop a working knowledge of infectious disease pathogens and the diseases that they cause.**
 - Demonstrate basic science knowledge of pathogens that cause human disease in the fields of virology, parasitology, bacteriology, mycology, and others.
 - Identify diseases caused by these pathogens and the mechanisms of pathogenesis.
 - Be able to critically analyze and evaluate publications in the primary literature that describe basic, translational, and clinical infectious disease research.
3. **Develop skills in analytical and critical thinking.**
 - Develop proficiency in critical analyses of ideas and concepts related to infectious disease research documented in the primary literature.
 - Use critical thinking skills in collegial presentations and discussions of research focused on infectious diseases and the pathogens that cause them.
4. **Develop skills in basic, translational, and/or clinical research.**
 - Develop new laboratory skills or enhance pre-existing skills.
 - Be proficient in collecting information and data from electronic source material and databases.
 - Apply analytical skills and critical thinking to data analyses.
5. **Develop professional ethics necessary for the responsible conduct of research.**
 - Be able to identify and evaluate professional ethical dilemmas, and discuss appropriate resolutions.
 - Apply professional ethical standards such as appropriate attribution of ideas, good recordkeeping, and truthful presentation of data/facts and conclusions.
6. **Develop communication and leadership skills.**
 - Be proficient at developing oral and/or written comprehensive reports, presenting facts, conducting analyses, and reaching conclusions.
 - Be proficient at using appropriate technologies for communication.
 - Be able to interact and work effectively with others in work settings involving cultural and demographic diversity.
7. **Develop other soft skills (e.g. collaboration, problem solving, career planning, networking) that facilitate career advancement and promotion.**
 - Develop a working knowledge of career opportunities in the desired field.
 - Effectively present a professional profile of oneself.
 - Be proficient at time and task management.
 - Be able to work effectively in collaborative and team-driven settings.

- Begin the development of problem-solving skills to be used in the workplace.
- Begin to establish a professional network.

Drexel Student Learning Priorities (DSLPS)

In the course of meeting these program-level goals, students will have also made progress in all of the Drexel Student Learning Priorities (DSLPS) (<http://drexel.edu/provost/assessment/outcomes/dslp/>) to help them build their futures:

Core Intellectual and Practical Skills

- Communication
- Critical and creative thinking
- Ethical reasoning
- Information literacy
- Self-directed learning
- Technology use

Experiential and Applied Learning

- Global competence
- Leadership
- Professional practice
- Research, scholarship, and creative expression
- Responsible citizenship

Admission Requirements

For acceptance into the Master of Science in Infectious Disease program, the applicant must have completed a four-year biology or chemistry-related BA or BS degree program with undergraduate coursework in biology, microbiology, immunology, chemistry, biochemistry, mathematics, and/or other related subjects. Although a minimum cumulative grade point average (GPA) of 3.00 is strongly desired, an applicant with a lower cumulative GPA will be considered if other strengths are apparent in the application.

To be considered for acceptance, an applicant must provide the following as part of a complete online application for admission:

- Official transcripts from all colleges and universities attended
- A current *curriculum vitae* (cv) or resume
- References from at least three instructors or professionals

Although standardized test scores are not required for admission, official copies of scores from the Graduate Record Examination (GRE) or Medical College Admission Test (MCAT) will be considered if submitted as part of the application.

International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. In addition to the above requirements, applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS).

Acceptance into the program will be decided by considering the sum of the applicant's undergraduate curriculum, cumulative GPA, GRE/MCAT

scores (if provided), recommendation letters, and relevant research or professional experiences.

Visit the websites for the face-to-face/hybrid and online Masters of Science in Infectious Disease programs for more detailed information. For additional information regarding application deadlines, the online application process, and specific requirements for applying to the College of Medicine, visit Drexel University's Graduate Admissions (<http://www.drexel.edu/grad/programs/ducom/infectious-disease/>) site.

Degree Requirements

Courses with an MIIM or IDPT designation are offered by the Drexel University College of Medicine and are taught on a semester schedule (fall and spring). These courses are available in traditional (face-to-face), hybrid, and/or online formats. Some of these traditional courses and hybrid courses are offered as evening classes at locations on either the Center City Campus or the Queen Lane Campus.

At least 36.0 credits are required to complete the program and earn a Master's Degree in Infectious Disease.

Required Courses

IDPT 500S	Responsible Conduct of Research	2.0
or MIIM 503S	Biomedical Ethics	
IDPT 501S	Biostatistics I	2.0
or MIIM 517S	Applied Statistics for Biomedical Sciences	
MIIM 527S	Immunology, Immunopathology and Infectious Diseases	3.0
MIIM 530S	Fundamentals of Molecular Medicine I	3.0
MIIM 531S	Fundamentals of Molecular Medicine II	2.0
MIIM 532S	Fundamentals of Molecular Medicine III	2.0
MIIM 533S	Molecular Medicine Journal Club II	1.0
MIIM 534S	Molecular Medicine Journal Club I	1.0
MIIM 545S	Introduction to Infectious Diseases	4.0
MIIM 606S	Microbiology and Immunology Seminar	1.0
MIIM 653S	Clinical Correlations in Infectious Disease	3.0

Electives		12.0-15.0
MIIM 521S	Biotechniques I: Molecular and Genomic Methods	
MIIM 522S	Biotechniques II: Immunological Methods	
MIIM 523S	Molecular Virology	
MIIM 524S	Vaccines and Vaccine Development	
MIIM 525S	Principles of Biocontainment	
MIIM 540S	Viruses and Viral Infections	
MIIM 541S	Bacteria and Bacterial Infections	
MIIM 542S	Mycology and Fungal Infections	
MIIM 543S	Parasitology and Parasitic Diseases	
MIIM 555S	Molecular Mechanisms of Microbial Pathogenesis	
MIIM 613S	Emerging Infectious Diseases	
MIIM 615S	Experimental Therapeutics	
MIIM 621S	Biomedical Research I	
MIIM 622S	Biomedical Research II	
MIIM 625S	Advanced Molecular Virology	
MIIM 652S	Research Internship in Infectious Disease	
MIIM 660S	Current Concepts in Molecular Medicine I	
MLAS 529S	Molecular Genetics	
Total Credits		36.0-39.0

Interdisciplinary Health Sciences

Major: Interdisciplinary Health Sciences

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 48.0

Classification of Instructional Programs (CIP) code: 51.1099

Standard Occupational Classification (SOC) code: 29-2011; 29-2012

About the Program

The Graduate School of Biomedical Sciences and Professional Studies, Division of Pre-Medical and Pre-Health (PMPH) Programs, offers the Master of Science degree in Interdisciplinary Health Sciences (IHS). This program provides students with an opportunity to enhance their academic credentials and to succeed in challenging biomedical science courses with content relevant to their chosen healthcare profession.

IHS students complete multiple required courses throughout their first and second years. These courses provide general knowledge and training essential for a career in healthcare. Students are also offered personalized guidance from a program advisor as they select from a broad range of elective courses to best meet their needs and interests. Students entering their second year in IHS must decide upon a concentration track and complete a specified number of courses within that concentration track prior to graduation. In this way, the IHS curriculum is both flexible and structured, with the ultimate goal of reinforcing the healthcare career interests of each student.

During the second year of IHS, students complete a rigorous one-year research project. These projects teach students to communicate complex scientific information and hone their critical thinking and analysis skills. Students with a dedicated interest in biomedical research may choose to complete a mentored research project in a laboratory or clinic. Alternatively, students may choose to complete an independent literature analysis project on the biomedical topic of their choice.

Upon completion of IHS, students will have a strong, integrated view of the biomedical sciences, which provides numerous advantages to graduates, whether using the degree as a springboard for further professional education, or for direct entry into the healthcare workforce.

Students must complete a minimum of 48.0 credits to graduate, and must complete all required courses. The Master of Science degree will be awarded contingent upon satisfactory completion of all program requirements, including an earned GPA of no less than 3.0.

For more information about the program, visit the College of Medicine's MS in Interdisciplinary Health Sciences (<http://www.drexel.edu/medicine/Academics/Graduate-School/Interdisciplinary-Health-Sciences/>) page.

Admission Requirements

Applicants to the IHS program must meet the following criteria:

- Earned a minimum undergraduate math/science GPA of 2.5
- Successfully completed all pre-medical prerequisite courses
- Received MCAT scores in the 20th-50th percentile range, or minimum GRE – 50th percentile

Qualifying students participating in other PMPH Master of Science programs may have the option to transition into IHS, if healthcare career goals deem the transfer appropriate.

Applicants with lower scores may be considered if they can demonstrate recent upward academic trends, or exemplary healthcare experience or community service activities.

For more information about applying to the program, visit the College of Medicine's MS in Interdisciplinary Health Science Admissions (<http://www.drexel.edu/medicine/Academics/Graduate-School/Interdisciplinary-Health-Sciences/>) web page.

Degree Requirements

Required Courses

IHS 500S	Career Development in the Health Sciences Seminar I	1.0
IHS 501S	Career Development in the Health Sciences Seminar II	1.0
IHS 507S	Initiating Biomedical Research	2.0
IHS 508S	MIHS Research Project	1.5
IHS 509S	MIHS Research Paper	1.5
IHS 510S	Introductory Biostatistics	3.0
IHS 513S	Scientific Writing for Healthcare Professionals	2.0
MSPP 525S	Community Dimensions of Medicine	2.0
Concentration Courses and Electives *		34.0
Total Credits		48.0

* Number of elective credits may vary depending on concentration selected.

Concentrations:

Biochemical and Pharmacologic Principles**Select six of the following:**

CR 614S	Introduction to Clinical Pharmacology	3.0
IHS 502S	Neuropharmacology	3.0
IHS 514S	Molecular Biology & Biochemistry of the Cell	3.0
IHS 525S	Human Nutrition	3.0
IHS T580S	Special Topics in Interdisciplinary Health Science *	3.0
MFSP 551S	Human Function	3.0
MFSP 557S	Drug Chemistry	2.0
MFSP 580S	Principles of Immunology	2.0
MLAS 529S	Molecular Genetics	3.0
MSPA 580S	Medical Microbiology I	4.0
MSPA 581S	Medical Microbiology II	3.0
MSPP 515S	Advanced Human Physiology	4.0
MSPP 511S	Concepts in Biochemistry and Cell Biology	4.0
PHRM 512S	Graduate Pharmacology	3.0

Concepts in Anatomy and Pathology**Select six of the following:**

CR 500S	Epidemiology	3.0
FCA 510S	Gross Human Skeletal Biology	3.0
IHS 514S	Molecular Biology & Biochemistry of the Cell	3.0
IHS 525S	Human Nutrition	3.0
IHS T580S	Special Topics in Interdisciplinary Health Science *	3.0
MFSP 551S	Human Function	3.0
MFSP 554S	Principles of Forensic Pathology	3.0
MFSP 556S	Forensic Anthropology and Topics in Human Identification	3.0
MFSP 580S	Principles of Immunology	2.0
MFSP 584S	Introduction to Forensic Radiology	2.0

MFSP 582S	Human Osteology and Calcified Tissue Biology II	2.0
MFSP 585S	Clinical Forensic Emergency Medicine and Traumatology	2.0
MFSP 586S	Introduction to Forensic Pediatrics	3.0
MFSP 587S	Introduction to Forensic Psychology	2.0
MFSP 588S	Advanced Topics in Cell Biology	2.0

* Please see your advisor for the course numbers and topics that are acceptable.

Sample Plan of Study

First Year

Fall		Credits
IHS 500S	Career Development in the Health Sciences Seminar I	1.0
IHS 510S	Introductory Biostatistics	3.0
IHS 513S	Scientific Writing for Healthcare Professionals	2.0
	Minimum of 6.0 additional credits selected from list of electives in conjunction with program director	6.0
	Term Credits	12.0

Spring

IHS 501S	Career Development in the Health Sciences Seminar II	1.0
MSPP 525S	Community Dimensions of Medicine	2.0
IHS 507S***	Initiating Biomedical Research	2.0
	Minimum of 6.0 additional credits selected from list of electives in conjunction with program director	6.0
	Term Credits	11.0

Second Year

Fall		
IHS 508S	MIHS Research Project	1.5
	Additional credits selected from list of electives in conjunction with program director, with at least 5.0 credits coming from concentration track [†]	10.0
	Term Credits	11.5
Spring		
IHS 509S	MIHS Research Paper	1.5
	Additional credits selected from list of electives in conjunction with program director, with at least 5.0 credits coming from concentration track [†]	12.0
	Term Credits	13.5

Total Credit: 48.0

* Students taking the Medical Sciences track are also required to take all IMS fall courses except for IMSP 544S, IMSP 545S, IMSP 552S.

** Please see your advisor for acceptable course numbers.

*** Students may also take this course in the Fall of Year two with approval of the Program Director.

† Number of credits is only a suggestion and may be split differently between Semesters.

Laboratory Animal Science

Major: Laboratory Animal Science

Degree Awarded: Master of Laboratory Animal Science (MLAS)

Calendar Type: Semester

Total Credit Hours: 49.0

Classification of Instructional Programs (CIP) code: 01.0999

Standard Occupational Classification (SOC) code: 19-1011

About the Program

The Graduate School of Biomedical Sciences and Professional Studies offers the Master of Laboratory Animal Science (MLAS) degree. The MLAS program is designed for individuals who have a bachelor's degree in animal science or a related field and who are seeking advanced career positions in laboratory animal science and laboratory animal facility management. Alternatively, the MLAS degree is also a powerful means to enhance students' credentials for admission to veterinary medical school.

The MLAS program is a full-time, two-year program that begins in August of each year. The first two years of the program consists primarily of classroom instruction, while the last semester is reserved for experiential learning. The program is flexible for traditional and non-traditional students alike due to the availability of evening courses.

Available Online

For individuals who are currently working in the laboratory animal science field, the MLAS program is available online as well. Please review our website (<http://www.drexel.edu/medicine/Academics/Graduate-School/Master-of-Laboratory-Animal-Science/Online-MLAScience/>) for specific details about the online program.

Curriculum

The MLAS curriculum consists of basic science courses, laboratory animal science courses, and a practicum. The basic science courses were designed to build a solid foundation required for a successful career in laboratory animal science. The laboratory animal science courses focus on all aspects of laboratory animal science, including facility management. The practicum provides the student with the opportunity to apply the theoretical knowledge they have learned to the field of Laboratory Animal Science. The outcome is a highly trained laboratory animal science professional with a solid foundation in the sciences.

Pre-Veterinary Graduate Minor

Students desiring to attend veterinary medical school have the option to elect to complete a pre-vet minor (<http://catalog.drexel.edu/graduate/schoolofbiomedicalsciences/preveterinarygminor/>) within the Master of Laboratory Animal Science (MLAS) program. The addition of these courses to the MLAS program will help to further enhance the student's application to veterinary medical school by providing additional rigorous and relevant graduate level coursework.

Practicum

MLAS faculty and administration assist the students in identifying and securing practicum sites at universities, biotechnology organizations, and pharmaceutical companies. Practicum sites are available in Pennsylvania, New Jersey, New York, Delaware, Virginia, Kentucky, North Carolina, and Texas. The list expands every year. In many instances, the practicum sites have offered our students a permanent position within their organization upon completion of the MLAS degree.

Career Opportunities

MLAS graduates hold positions in laboratory animal facilities of universities, biotechnology companies, government agencies, and pharmaceutical companies. There they serve as veterinarians, supervisors, managers, IACUC administrators, trainers, educators, consultants, and sales representatives.

Veterinary Medical School

Successful completion of the MLAS program can also significantly improve a student's academic credentials for application to veterinary medical school. Please review our website (<http://www.drexel.edu/medicine/Academics/Graduate-School/Master-of-Laboratory-Animal-Science/>) for a comprehensive list of veterinary medical schools that have been attended by MLAS alumni.

Erin.Vogelsong@Drexel.edu | drexel.edu/medicine (<http://drexel.edu/medicine/>)

Admission Requirements

Students will be selected on the basis of adequate educational background and veterinary/ research/ animal care experience.

Prerequisite coursework includes: chemistry, biology, organic chemistry, and physics.

Candidates for admission must provide the following credentials:

- Bachelor's degree from an accredited U.S. college or university
- Cumulative GPA of 3.0 or higher
- General Graduate Record Exam (GRE) scores at or above the 50th percentile in all areas obtained within the last 5 years
- Official transcript from all post-secondary institutions attended
- Three letters of reference, two must be from science professors
- Personal statement stating the applicant's academic and professional goals

The deadline for submission of applications is the second Friday in July of the year the student seeks admission.

Degree Requirements

The MLAS degree can be completed full-time in two years and one summer practicum, or part-time in three or less years. Students must

successfully complete a minimum of 49.0 credit hours for graduation. A minimum grade point average of 3.0 is required for graduation as well as grades of "C" or better.

Required Courses

MLAS 501S	Laboratory Animal Seminar	2.0
MLAS 503S	The Institutional Animal Care and Use Committee's (IACUC) Role in Animal Research	3.0
MLAS 510S	Clinical Orientation In Laboratory Animal Facilities	1.0
MLAS 520S	Financial Mgmt In Lab Anim Sci	3.0
MLAS 521S	Arch Eng & Plan For Anim Fac	4.0
MLAS 523S	Organizational Management	3.0
MLAS 525S	Animal Anatomy	2.0
MLAS 535S	Biology & Care Of Lab Animals	4.0
MLAS 536S	Animal Models for Biomedical Research	1.0
MLAS 606S	Clinical Laboratory Techniques and Concepts	1.0
MLAS 610S	Diseases of Laboratory Animals	3.0
MLAS 801S	Laboratory Animal Practicum	12.0
MSPA 580S	Medical Microbiology I	4.0

Electives

Students must select a minimum of 6.0 credits from the following: 6.0

IHS 514S	Molecular Biology & Biochemistry of the Cell	
MLAS 500S	Animal Nutrition	
MLAS 502S	Occupational Safety and Health in Laboratory Animal Care and Use Programs	
MLAS 504S	Public Outreach for Animal Research	
MLAS 513S	Biochemical Basis of Disease (Upenn)	
MLAS 514S	Hematopoiesis (Upenn)	
MLAS 529S	Molecular Genetics	
MLAS 530S	Biostats In Vet Science	
MLAS 531S	Embryology	
MLAS 545S	Fundamentals of Histology	
MSPP 511S	Concepts in Biochemistry and Cell Biology	
PHGY 503S	Graduate Physiology	
PHRM 512S	Graduate Pharmacology	

Total Credits 49.0

* Students must choose a minimum of 2 elective courses to reach the 49.0 total credits.

** Students will begin their practicum in the spring, but it may continue into the summer depending on their location.

Medical Science

Major: Medical Science

Degree Awarded: Master of Science (MS) or Medical Doctor/Master of Science (MD/MS)

Calendar Type: Semester

Total Credit Hours: 62.0 (MS); 30 (MD/MS)

Classification of Instructional Programs (CIP) code: 26.9999

Standard Occupational Classification (SOC) code: 11-9121

About the MS Program

The Master of Science in Medical Science (MMS) program is a rigorous, direct-entry two-year degree program that couples a challenging and rich curriculum with engaged and personalized student advisement.

The program is designed to provide talented students with both medical knowledge and research competencies.

The first and second years of study focus on honing different skill sets. This sequence allows students to develop strong, well-rounded academic portfolios and become competitive candidates for seats in medical school or as they continue their graduate medical education.

About the MD/MS Program

The MD-MS in Medical Science (MD-MS) dual-degree program is designed to prepare physician scientists for careers as lifetime learners. The program is built on the foundation that clinical medicine and biomedical research enjoy a unique synergy. Physician scientists are uniquely poised to recognize, understand, apply, and expand clinical applications of basic research or identify novel or emerging areas of scientific inquiry that are needed to support clinical efforts.

The MD-MS degree in Medical Science would accept Drexel medical students who are in good academic standing following completion of the required medical school coursework as outlined in the plan of study and transfer them into the Graduate School of Biomedical Sciences and Professional Studies where they would be enrolled in the second year of the MMS program. At the end of this year, if they successfully complete MMSP 501S, MMSP 502S, MMSP 503S, and MMSP 504S, as well as Responsible Conduct in Research, these students are eligible for the Master of Science in Medical Science.

At the conclusion of this one year course of study, students will transfer back to the medical school to complete their requirements for the MD degree.

Medical and Healthcare Simulation

Major: Medical Healthcare Simulation

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 39.0

Classification of Instructional Programs (CIP) code: 51.1199

Standard Occupational Classification (SOC) code: 11-9121

About the Program

The goal of the MS in Medical Healthcare Simulation program is to educate healthcare professionals using simulation based methodology to bring a new level of standards and rigor in addition to creating new leaders to help shape the future of simulation education. The MS in Medical Healthcare Simulation program is a combination of both required and elective graduate courses, together with an intensive immersive educational experience. The majority of the educational experience will occur via an e-learning experience with three one-week mandatory in person simulation laboratory experiences.

Program Delivery

The curriculum is planned for a two-year time frame with each group to complete the curriculum as a cohort. However, the program may be extended, if appropriate, to accommodate part-time students or potential conflicts that might arise. These decisions will be determined by the program directors and in consultation with the student's mentor/advisor.

Admission Requirements

For acceptance into the MS in Medical and Healthcare Simulation program, the applicant must have, at a minimum, completed a four-year bachelor's degree, nursing degree program or equivalent, with a preferred GPA of 3.0 and must also have fulfilled all of the requirements for consideration as defined by the program committee.

All students must submit three confidential letters of evaluation and all previous official educational transcripts. If you have taken any standardized test, such as GRE and MCAT, the scores must be submitted for review. No standardized test is required for admission at this time. Each student will be assessed holistically based on the requirements by the program's committee.

As the degree program is directed toward medical simulation the background in medical care is required. The applicant must have graduated from medical school, or have a nursing or Bachelor's Degree or other health professional training (approved by the program director on individual basis) with an interest in simulation. A record of achievement in medical education, as provided by letters of reference, publications, teaching evaluations, or prior specialized training or experience in medical education is desired, but not required.

Degree Requirements

Required Courses

MSMS 501S	Simulation Curriculum and Design I	3.0
MSMS 503S	Biostatistics in Healthcare Literature	3.0
MSMS 504S	Principles of Assessment: Measurement Theory, Assessment Principles & Tools	3.0
MSMS 506S	Debriefing in Simulation	3.0
MSMS 701S	Simulation Laboratory Practicum I	4.0
MSMS 702S	Simulation Laboratory Practicum II	4.0
MSMS 703S	Simulation Laboratory Practicum III	4.0
MSMS 801S	Capstone	1.0
MSMS 802S	Capstone Project Implementation	2.0

Elective Courses

Students must select a minimum of 12 credits from the following:		12.0
CR 510S	Sponsored Projects Finance	
CR 525S	Scientific Writing and Medical Literature	
CR 550S	Leadership Skills	
CR 635S	Strategic Planning	
MSMS 505S	Standardized Patient Course	
MSMS 507S	High Fidelity, Low Fidelity and Task Trainers	
MSMS 508S	Interprofessional Education	
MSMS 509S	Fundamentals of Simulation Program Administration	
MSMS 511S	Patient Safety and Simulation	
MSMS 600S	Adult Learning in Healthcare	
MSMS I899S	MSMS Independent Study	

Total Credits 39.0

Sample Plan of Study

* For a list of Medical and Healthcare Simulation electives, view the program's degree requirements.

Microbiology and Immunology

Major: Microbiology and Immunology

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Semester

Total Credit Hours: 46.0 (MS, non-thesis); 55.0 (MS, thesis); 131.0 (PhD)

Classification of Instructional Programs (CIP) code: 26.0599

Standard Occupational Classification (SOC) code: 19-1022

About the Program

The Department of Microbiology and Immunology offers students MS and PhD degrees. The programs are designed to promote understanding of the molecular mechanisms of infectious diseases. The department has research programs in the areas of parasitic, viral, and opportunistic infections; bacterial pathogenesis and genomics; inflammation and immunology; and drug development driven by investigators with national and international reputations and with extended histories of extramural funding from the NIH, as well as other sources of funding. Students are provided with a curriculum of integrated courses that include the essentials for biomedical research as well as courses that emphasize host-pathogen interactions through a molecular pathogenesis series of courses on viruses, bacteria, fungi, and parasites, as well as immunology. Upon completing these programs, students pursue careers in academic, governmental, or industrial settings.

MS in Microbiology and Immunology

The MS program provides students a broad background in microbiology and immunology and the techniques used in microbiology and immunology research. There are both a thesis and non-thesis option for an MS degree. The thesis option combines course-work with a novel research project. The non-thesis degree program allows students to earn the degree without a research project by taking additional classes and writing a literature review paper. Students who wish to continue their graduate training after the MS degree may apply to the PhD program, and their credits may be applied to the doctoral program. The average amount of time to completion is two years.

PhD in Microbiology and Immunology

The PhD program trains individuals to conduct independent hypothesis-driven research and to teach in the fields of microbiology and immunology. The program includes two years of coursework as well as original research leading to published thesis work. Laboratory rotations begin in the fall of the first year. The average amount of time to completion is five years.

For more information, including scheduling a plan of study, visit the College of Medicine's Microbiology and Immunology Program (<https://drexel.edu/medicine/academics/graduate-school/microbiology-immunology/>) website.

Admission Requirements

Students interested in all types of pathogens (viral, bacterial, fungal, parasitic) and the host response to these interactions are encouraged to apply. There are no minimal requirements, but applicants should be competitive with regard to grades, GRE scores, research experience, and letters of recommendation. Applicants are encouraged to use email to contact the program director or any of the faculty of the program with whom they may share scientific interests to discuss their suitability to the program and/or potential projects in relevant laboratories.

The Drexel University College of Medicine: School of Biomedical Sciences and Professional Studies has a rolling admissions policy, which means that complete applications are reviewed as they are received. Applicants are therefore advised to apply early, as decisions to accept or deny admission may be made before the official deadlines.

To learn more about applying to the Microbiology and Immunology program please visit the Microbiology and Immunology Program specific website (<http://drexel.edu/medicine/academics/graduate-school/microbiology-immunology/how-to-apply/>).

To learn more about applying to Drexel College of Medicine programs, please visit the College of Medicine's Graduate School of Biomedical Sciences and Professional Studies (<http://www.drexel.edu/medicine/Academics/Graduate-School/>) (<http://drexel.edu/medicine/academics/graduate-school/>) website.

Non-Thesis Option

Required Courses

IDPT 500S	Responsible Conduct of Research	2.0
IDPT 501S	Biostatistics I	2.0
IDPT 502S	Learn Early As Professionals I (LEAP I)	1.0
IDPT 504S	Learn Early and Practice (LEAP II)	1.0
IDPT 521S	Molecular Structure and Metabolism	5.0
IDPT 526S	Cells to Systems	5.0
IDPT 850S	Literature Review Non-Thesis MS	4.0

MIIM 502S	Microbiology and Immunology Journal Club *	4.0
MIIM 508S	Immunology I	3.0
MIIM 512S	Molecular Pathogenesis I (Viral Pathogenesis)	2.0
MIIM 513S	Molecular Pathogenesis II	3.0
MIIM 606S	Microbiology and Immunology Seminar *	4.0
Advanced Electives		9.0

Select a minimum of nine credits of Advanced Electives.

MIIM 504S	Microbiology and Immunology 1st Rotation	
MIIM 514S	Grant Building	
MIIM 524S	Vaccines and Vaccine Development	
MIIM 528S	Structural Bioinformatics	
MIIM 555S	Molecular Mechanisms of Microbial Pathogenesis

Molecular and Cell Biology and Genetics

Major: Molecular and Cell Biology and Genetics

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Semester

Total Credit Hours: 38.5 (MS, non-thesis); 63.5 (MS, thesis); 96.0 (PhD)

Classification of Instructional Programs (CIP) code: 26.0210

Standard Occupational Classification (SOC) code: 11-9121

About the Program

The interdisciplinary, research-oriented Molecular and Cell Biology and Genetics program offers both MS and PhD degrees. The program provides a broad education-training program for graduate students interested in biomedical problems that cross disciplinary boundaries and offers the opportunity for students to choose from approximately 60 faculty members in 10 different departments/centers to pursue their research interests. Our curriculum and research activities are tailored to students' needs and interests. Consequently, students can pursue a diverse variety of projects that range from the design and development of new therapeutic treatment strategies to the characterization of the molecular mechanisms that underlie various cellular processes and diseases. This intensive and research-oriented program provides students with opportunities to perform cutting-edge biomedical research employing multidisciplinary strategies. Upon completing these programs, students pursue careers in academic, governmental, or industrial settings.

The MS Program in Molecular & Cell Biology & Genetics

In the MS program, the focus is on strengthening the student's grasp of molecular biology and biotechnology and on providing experience and knowledge of research methods available in this fast-expanding field. This program is designed to prepare students for competitive industry jobs and for acceptance into PhD programs. Our MS students take the same courses as our PhD students, while also gaining extensive biomedical research experience. Students who wish to continue their graduate training after the MS degree may apply to the PhD program, and their credits may be applied to the doctoral program. In addition to the thesis-based MS program, Drexel offers a non-thesis degree program in which students can earn the degree without a research project by taking additional classes and writing a literature review paper.

The PhD Program in Molecular & Cell Biology & Genetics

This program is research focused, with the ultimate goal of training students to become leaders of scientific research in academics and industry. In addition to completing the curriculum requirements, PhD students must pass a preliminary exam and qualifying exam at the end of their first and second years, respectively.

Additional Information

For more information about the program, please visit the College of Medicine's Molecular and Cell Biology and Genetics Program (<http://www.drexelmed.edu/Home/AcademicPrograms/BiomedicalGraduateStudies/Programs/MastersDoctoralPrograms/MolecularCellBiologyGenetics.aspx>) website.

Admission Requirements

Drexel University College of Medicine has a rolling admissions policy, which means that complete applications are reviewed as they are received. Applicants are therefore advised to apply early, as decisions to accept or deny admission may be made before the official deadlines.

To learn more about applying to Drexel College of Medicine programs visit the College of Medicine's Graduate School of Biomedical Sciences and Professional Studies (<http://www.drexel.edu/medicine/Academics/Graduate-School/>) website.

About the Curriculum

Background courses in biochemistry, molecular and cell biology, and integrative biology are taken during the first academic year. In addition, every student carries out short research projects in three different laboratories during the first year. This exposure to research not only gives the student broad research training, but also helps the student to select a thesis advisor at the end of the first academic year. In the second year, the student begins thesis research and takes several advanced courses, tailored to the student's individual interests.

The program offers a weekly seminar series with invited external and intramural speakers who address the program's broad research interests. Journal Club members meet weekly in an informal setting to present results of interest from the current literature.

Courses Repeatable for Credit

As well as taking all required courses, MS and PhD students may re-enroll in courses having the status "repeatable for credit" (such as journal club, seminar and research courses) for the duration of their program in order to meet the total number of credits required for graduation.

For more information, including scheduling a plan of study, visit the College of Medicine's Molecular and Cell Biology and Genetics Program (<http://www.drexelmed.edu/Home/AcademicPrograms/BiomedicalGraduateStudies/Programs/MastersDoctoralPrograms/MolecularCellBiologyGenetics.aspx>) website.

Thesis Option

63.5 semester credits

Required Courses		
BIOC 603S	Advanced Topics in Biochemistry and Molecular Biology	1.5
IDPT 500S	Responsible Conduct of Research	2.0

IDPT 501S	Biostatistics I	2.0

Molecular Medicine

Major: Molecular Medicine

Degree Awarded: Master of Science (MS)

Calendar Type: Semester

Total Credit Hours: 36.0

Classification of Instructional Programs (CIP) code: 26.0204

Standard Occupational Classification (SOC) code: 19-1029

About the Program

Mission Statement

The Master of Science in Molecular Medicine program, offered by the Department of Microbiology and Immunology and by the Institute for Molecular Medicine and Infectious Disease (IMMID), provides education and training in areas of research in human health at the molecular level. Students in this program acquire theoretical and practical knowledge about normal body functions and disease pathogenesis at the molecular level. Students also learn how this knowledge is applied to develop novel tools for diagnosis, treatment, prognosis, and prevention of disease. Graduates from this program will be ready to enter the biotechnology workforce, and are attractive candidates for doctoral programs in science and medicine.

The Master of Science in Molecular Medicine program is designed to provide academic and practical biotechnological knowledge in translational research, particularly in the areas of molecular therapeutics and vaccine development.

Curriculum

The two year non-thesis program encompasses fundamental requirements to establish a sound grounding in microbiology, biochemistry, genetics, and molecular biology. The program is typically completed in two full-time years (four semesters of at least nine credits) of required and elective graduate courses, and one or more experiential research components in the first or second year. The flexibility of the curriculum enables students to complete the degree requirement within 18 months on an accelerated basis, and up to 4 years on a part-time basis. The successful completion of the degree will be determined by grades obtained in the graduate courses, participation in seminars and journal clubs, and performance in the research component. A minimum of 36.0 credits is required to graduate, with at least 6.0 of those earned as research credits.

The experiential research component of the curriculum can be fulfilled by two alternative approaches. Most students choose to engage in an intensive 6.0 credit hands-on research internship in which a 12-16 week research program will be undertaken in a laboratory at Drexel, another academic institution, or at a biotechnology or biopharmaceutical company. Alternatively, students may choose to engage in a less intensive experience spanning two semesters, or conduct an independent research project, with the approval and supervision of Program Directors.

Traditional (Face-to-Face), Hybrid, or Online Learning Options

Classes can be attended at any of Drexel College of Medicine locations: Center City and Queen Lane campuses in Philadelphia. State-of-the-art video conferencing provides real-time interactive learning at these locations. Most classes are held in the late afternoon/early evening to facilitate participation of working professionals. The program may also be completed fully online, offered through Drexel University Online. All required courses and most electives have online sections and online students experience the same curriculum as face-to-face or hybrid students. Online sections are designed to maximize interactions among students and faculty and may include live web sessions. Individual students also may choose a mix of traditional and online courses (hybrid). The goal is to provide maximum scheduling flexibility.

Program Contact information

For more detailed information about the curriculum and program goals, please contact either:

Pamela Norton, PhD
Email: pan29@drexel.edu

or

Stephen Jennings, PhD
Email: srj32@drexel.edu

Program Goals

Over the course of completing the program, students will develop:

1. Core knowledge of molecular and cellular disciplines that constitute biomedical sciences
2. Working knowledge of normal body functions at the molecular level and how these are altered in states of disease

3. Practical knowledge and skills that help identify gaps in the biomedical field for the development of molecular diagnostic and therapeutic tools
4. Skills in basic, translational, and/or clinical research
5. Professional ethics necessary for the responsible conduct of research
6. Communication and leadership skills
7. Other soft skills (e.g. collaboration, problem solving, career planning, networking) that facilitate career advancement and promotion

In the course of meeting these program-level goals, students will have also made progress in all of the Drexel Student Learning Priorities (DSLPS) to help them build their futures.

Core Intellectual and Practical Skills:

- Communication
- Critical and creative thinking
- Ethical reasoning
- Information literacy
- Self-directed learning
- Technology use

Experiential and Applied Learning:

- Global competence
- Leadership
- Professional practice
- Research, scholarship and creative expression
- Responsible citizenship

Admission Requirements

For acceptance into the Master of Science in Molecular Medicine program, the applicant must have completed a four-year biology or chemistry-based BA or BS degree program with undergraduate coursework in biology, microbiology, immunology, chemistry, biochemistry, mathematics, and/or other related subjects. Although a minimum cumulative grade point average (GPA) of 3.00 is strongly desired, an applicant with a lower cumulative GPA will be considered if other strengths are apparent in the application.

To be considered for acceptance, an applicant must provide the following as part of a complete online application for admission:

- Official transcripts from all colleges and universities attended
- A current *curriculum vitae* (CV) or resume
- References from at least three instructors or professionals

Although standardized test scores are not required for admission, official copies of scores from the Graduate Record Examination (GRE) or Medical College Admission Test (MCAT) will be considered if submitted as part of the application.

International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. In addition to the above requirements, applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS).

Acceptance into the program will be decided by considering the sum of the applicant's undergraduate curriculum, cumulative GPA, GRE/MCAT scores, recommendation letters, and relevant research or professional experiences.

Online applications are considered year round. Potential students are encouraged to apply no later than July 1 for Fall admission, or December 1 for Spring admission.

For additional information about the program and to access the online application, view the MS in Molecular Medicine (<http://www.drexelmed.edu/Home/AcademicPrograms/BiomedicalGraduateStudies/Programs/MastersDoctoralPrograms/MolecularMedicine.aspx>) page on the College of Medicine's website.

Degree Requirements

About the Curriculum

Through the combination of required and elective courses, a total of 36.0 credits is required to successfully obtain the degree of Masters of Science in Molecular Medicine. In order to maintain full-time student status, a minimum of 9.0 credits must be taken in any given academic semester. In most cases, there are both traditional (face-to-face) and online sections for each course. Students should work with their program advisors to plan their course of study.

Research Requirements

The research component of the curriculum can be fulfilled by two alternative approaches. Most students choose to engage in a hands-on research internship in which a 12 week research program will be undertaken in a laboratory at Drexel, another academic institution, or at a biotechnology or biopharmaceutical company. Alternatively, students may choose to engage in an independent research project, with the approval and supervision of Program Directors.

For an individualized plan of study listing the sequence of courses to be completed, students should work with their program advisor.

Required Courses		
IDPT 500S	Responsible Conduct of Research	2.0
or MIIM 503S	Biomedical Ethics	
IDPT 501S	Biostatistics I	2.0
or MIIM 517S	Applied Statistics for Biomedical Sciences	
MIIM 527S	Immunology, Immunopathology and Infectious Diseases	3.0
MIIM 530S	Fundamentals of Molecular Medicine I	3.0
MIIM 531S	Fundamentals of Molecular Medicine II	2.0
MIIM 532S	Fundamentals of Molecular Medicine III	2.0
MIIM 533S	Molecular Medicine Journal Club II	1.0
MIIM 534S	Molecular Medicine Journal Club I	1.0
MIIM 540S	Viruses and Viral Infections	2.0
MIIM 541S	Bacteria and Bacterial Infections	2.0
MIIM 542S	Mycology and Fungal Infections	2.0
MIIM 543S	Parasitology and Parasitic Diseases	2.0
MIIM 606S	Microbiology and Immunology Seminar	1.0
MIIM 660S	Current Concepts in Molecular Medicine I	3.0
Electives		
To complete the 36.0 credits total, students select from a menu of additional electives, and complete their required research component.		
MIIM 521S	Biotechniques I: Molecular and Genomic Methods	
MIIM 522S	Biotechniques II: Immunological Methods	
MIIM 523S	Molecular Virology	
MIIM 524S	Vaccines and Vaccine Development	

MIIM 525S	Principles of Biocontainment	
MIIM 555S	Molecular Mechanisms of Microbial Pathogenesis	
MIIM 613S	Emerging Infectious Diseases	
MIIM 615S	Experimental Therapeutics	
MIIM 621S	Biomedical Research I	
MIIM 622S	Biomedical Research II	
MIIM 625S	Advanced Molecular Virology	
MIIM 650S	Research Internship in Molecular Medicine	
MLAS 529S	Molecular Genetics	
Total Credits		36.0

Sample Plan of Study

First Year

Fall		Credits
IDPT 500S or MIIM 503S	Responsible Conduct of Research Biomedical Ethics	2.0
MIIM 527S	Immunology, Immunopathology and Infectious Diseases	3.0
MIIM 530S	Fundamentals of Molecular Medicine I	3.0
MIIM 534S	Molecular Medicine Journal Club I	1.0
Term Credits		9.0

Spring

MIIM 531S	Fundamentals of Molecular Medicine II	2.0

MIIM 541S	Bacteria and Bacterial Infections	2.0
MIIM 542S	Mycology and Fungal Infections	2.0
MIIM 543S	Parasitology and Parasitic Diseases	2.0
Term Credits		9.0

Second Year

Fall		Credits
MIIM 532S	Fundamentals of Molecular Medicine III	2.0
MIIM 606S	Microbiology and Immunology Seminar	1.0
Electives		6.0
Term Credits		9.0

Spring

IDPT 501S or MIIM 517S	Biostatistics I Applied Statistics for Biomedical Sciences	2.0
MIIM 540S	Viruses and Viral Infections	2.0
MIIM 660S	Current Concepts in Molecular Medicine I	3.0
Elective		2.0
Term Credits		9.0

Total Credit: 36.0

Neuroscience

Major: Neuroscience

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Semester

Total Credit Hours: 45.5 (MS, non-thesis); 55.5 (MS, thesis); 123.5 (PhD)

Classification of Instructional Programs (CIP) code: 26.1501

Standard Occupational Classification (SOC) code: 11-9121

About the Program

The College of Medicine School of Biomedical Sciences and Professional Studies offers an interdepartmental and multidisciplinary graduate program in Neuroscience leading to MS and PhD degrees. The program provides a vibrant research component for both MS and PhD degrees leading to published scientific work in reputable journals, as well as training in the panoply of research and presentation skills required to conduct and disseminate the research. Students are provided with a curriculum of integrated courses that include the essentials for biomedical

research as well as courses that span cellular, developmental, systems, and behavioral neurosciences, as well as neuroanatomy and injury and disease of the nervous system. Upon completing these programs, students pursue careers in academic, governmental, or industrial settings.

The MS in Neuroscience Program

The MS program provides students a broad background in neuroscience and the techniques used in neuroscience research. In addition to the thesis-based MS program, Drexel offers a non-thesis degree program in which students can earn the degree without a research project by taking additional classes and writing a literature review paper. Students who wish to continue their graduate training after the MS degree may apply to the PhD program, and their credits may be applied to the doctoral program.

The PhD in Neuroscience Program

The PhD program trains individuals to conduct independent hypothesis-driven research and to teach in the neurosciences. The program includes two years of coursework as well as original research leading to published thesis work. Laboratory rotations begin in the fall of the first year.

Additional Information

For more information, visit the College of Medicine's Neuroscience Program (<http://www.drexel.edu/medicine/Academics/Graduate-School/Neuroscience/>) web site.

Admission Requirements

Students interested in cellular, systems (including neuro-engineering) and behavioral neuroscience are encouraged to apply. There are no minimal requirements but applicants should be competitive with regard to grades, GRE scores, research experience, and letters of recommendation.

Applicants are encouraged to use email to contact any of the faculty of the program with whom they may share scientific interests to discuss their suitability to the program and/or potential projects in relevant laboratories.

The Drexel University College of Medicine: School of Biomedical Sciences and Professional Studies has a rolling admissions policy, which means that complete applications are reviewed as they are received. Applicants are therefore advised to apply early, as decisions to accept or deny admission may be made before the official deadlines.

To learn more about applying to Drexel College of Medicine programs visit the College of Medicine's Graduate School of Biomedical Sciences and Professional Studies (<http://www.drexel.edu/medicine/Academics/Graduate-School/>) website.

About the Curriculum

Students in both the PhD and MS programs begin their coursework with a core curriculum. The curriculum consists of a series of core courses that are shared by all of the biomedical graduate programs in the medical school, and a series of programmatic courses. All students in the Neuroscience Program must take the core curriculum, although the possibility exists for students to be excused from a particular course if they are able to prove that they already have the necessary knowledge required of the particular course.

During the second year, students select elective courses and begin their thesis research in consultation with the Advisory-Examination Committee. At the end of the second year, students take a comprehensive examination to qualify for PhD candidacy.

There are three rotations in the curriculum for which the student will be assigned a grade. The purpose of these rotations is to enable the student to select the most appropriate Graduate Advisor to supervise the research project for the student. The Neuroscience Program Director and Steering Committee will advise each student on the selection of rotations, as well as on the progress and outcome of rotations. Flexibility will be afforded in certain situations in which the student may be able to select an advisor before completing all three rotations, or in situations wherein it is advisable to terminate a particular rotation early in favor of another choice.

Courses Repeatable for Credit

As well as taking all required courses, MS and PhD students may re-enroll in courses having the status "repeatable for credit" (such as journal club, seminar and research courses) for the duration of their program in order to meet the total number of credits required for graduation.

MS Degree Requirements: Non-Thesis Option

MS without thesis: 45.5 semester credits

Required Courses

IDPT 500S	Responsible Conduct of Research	2.0
IDPT 502S	Learn Early As Professionals I (LEAP I)	1.0
IDPT 504S	Learn Early and Practice (LEAP II)	1.0
IDPT 521S	Molecular Structure and Metabolism	5.0
IDPT 526S	Cells to Systems	5.0
IDPT 850S	Literature Review Non-Thesis MS	4.0
NEUR 500S	Statistics for Neuro/Pharm Research	2.0
NEUR 501S	Neuroscience 1st Lab Rotation	4.0
NEUR 508S	Graduate Neuroscience I	2.5
NEUR 520S	Neurobiology Topics I *	4.0
NEUR 521S	Neurobiology Topics II *	4.0
NEUR 602S	Medical Neuroscience	6.0
NEUR 609S	Graduate Neuroscience II	4.0

Advanced Electives

Select at least one of the following:		1.0-4.0
NEUR 511S	Advanced Cellular and Developmental Neuroscience	
NEUR 512S	Advanced Systems and Behavioral Neuroscience	
NEUR 634S	Motor Systems	
Total Credits		45.5-48.5

* Taken twice in the two year program.

Approved Electives

Students may opt to take additional approved electives in consultation with their advisor.

Suggested Electives

MCBG 506S	Advanced Cell Biology	2.0
PHRM 507S	Prin of Neuropharmacology	3.0
PHRM 512S	Graduate Pharmacology	3.0

General Electives

IDPT 507S	Teaching Practicum I	1.0-4.0
IDPT 508S	Teaching Practicum II	1.0-4.0
IDPT 509S	Teaching Practicum III	1.0-4.0
NEUR 502S	Neuroscience 2nd Lab Rotation	4.0
NEUR 503S	Neuroscience 3rd Lab Rotatin	4.0
NEUR 600S	Neuroscience Thesis Research	9.0

* Additional courses from the Biograduate Medical programs may be taken as electives. Students should check with the College of Medicine's Graduate School of Biomedical Sciences and Professional Studies (<https://drexel.edu/medicine/academics/graduate-school/>) programs.

MS Degree Requirements: Thesis Option

MS with thesis: 55.5 minimum semester credits

Required Courses

IDPT 500S	Responsible Conduct of Research	2.0
IDPT 502S	Learn Early As Professionals I (LEAP I)	1.0
IDPT 504S	Learn Early and Practice (LEAP II)	1.0
IDPT 521S	Molecular Structure and Metabolism	5.0
or IDPT 550S	Biochemistry and Biophysics	
IDPT 526S	Cells to Systems	5.0
NEUR 500S	Statistics for Neuro/Pharm Research	2.0
NEUR 501S	Neuroscience 1st Lab Rotation	4.0
NEUR 508S	Graduate Neuroscience I	2.5
NEUR 520S	Neurobiology Topics I	2.0
NEUR 521S	Neurobiology Topics II	2.0
NEUR 600S	Neuroscience Thesis Research *	18.0
NEUR 602S	Medical Neuroscience	6.0
NEUR 609S	Graduate Neuroscience II	4.0

Advanced Electives 1.0-4.0

Select at least one of the following Advanced Electives

NEUR 511S	Advanced Cellular and Developmental Neuroscience
NEUR 512S	Advanced Systems and Behavioral Neuroscience
NEUR 634S	Motor Systems

Total Credits 55.5-58.5

* Taken both semesters in the second year.

Approved Electives

Students may opt to take additional approved electives in consultation with their advisor.

Suggested Electives

IDPT 600S	Thesis Defense	9.0
MCBG 506S	Advanced Cell Biology	2.0
NEUR 502S	Neuroscience 2nd Lab Rotation	4.0
PHRM 507S	Prin of Neuropharmacology	3.0
PHRM 512S	Graduate Pharmacology	3.0

General Electives

IDPT 507S	Teaching Practicum I	1.0-4.0
IDPT 508S	Teaching Practicum II	1.0-4.0
IDPT 509S	Teaching Practicum III	1.0-4.0
NEUR 503S	Neuroscience 3rd Lab Rotatin	4.0

* Additional courses from the Biomedical Graduate Programs may be taken as electives. Students should check with the College of Medicine's Graduate School of Biomedical Sciences and Professional Studies (<http://www.drexelmed.edu/Home/AcademicPrograms/BiomedicalGraduateStudies.aspx>) programs.

PhD Degree Requirements

Students are required to complete 123.5 credits; for additional graduation requirements, refer to the School of Biomedical Sciences and Professional Studies Handbook and the Neuroscience Program Policies

and Procedures (<https://drexel.edu/medicine/academics/graduate-school/neuroscience/>).

During the third year, students develop a plan for their doctoral research in conjunction with their thesis advisor. A formal, written thesis proposal is then presented to the student's Thesis Advisory Committee. Acceptance of this proposal after oral examination by the Committee leads to the final stage of doctoral training. PhD candidates then spend the majority of their time on thesis research. After concluding their research, they must submit and publicly defend their thesis before the Thesis-Examination Committee.

PhD students may enroll in courses having the status "repeatable for credit" (such as journal club, seminar and research courses) for the duration of their program in order to meet the degree completion requirement of 123.5 credits.

Required Courses

IDPT 500S	Responsible Conduct of Research	2.0
IDPT 502S	Learn Early As Professionals I (LEAP I)	1.0
IDPT 504S	Learn Early and Practice (LEAP II)	1.0
IDPT 521S	Molecular Structure and Metabolism	5.0
IDPT 526S	Cells to Systems	5.0
IDPT 600S	Thesis Defense	9.0
NEUR 500S	Statistics for Neuro/Pharm Research	2.0
NEUR 501S	Neuroscience 1st Lab Rotation	4.0
NEUR 502S	Neuroscience 2nd Lab Rotation	4.0
NEUR 508S	Graduate Neuroscience I	2.5
NEUR 520S	Neurobiology Topics I *	8.0
NEUR 521S	Neurobiology Topics II **	6.0
NEUR 600S	Neuroscience Thesis Research *	63.0
NEUR 602S	Medical Neuroscience	6.0
NEUR 609S	Graduate Neuroscience II	4.0

Advanced Electives 1.0-4.0

Select at least one of the following Advanced Electives

NEUR 511S	Advanced Cellular and Developmental Neuroscience
NEUR 512S	Advanced Systems and Behavioral Neuroscience
NEUR 634S	Motor Systems

Suggested Electives

IDPT 507S	Teaching Practicum I
MCBG 506S	Advanced Cell Biology
NEUR 503S	Neuroscience 3rd Lab Rotatin
PHRM 507S	Prin of Neuropharmacology
PHRM 512S	Graduate Pharmacology

General Electives

IDPT 508S	Teaching Practicum II
IDPT 509S	Teaching Practicum III

Total Credits 123.5-126.5

* Taken each Fall semester starting in the Second Year, until Thesis Defense

** Taken each Spring semester starting in the Second Year, until Thesis Defense

*** Taken each semester starting the Second Year, until Thesis Defense

* Additional courses from the Biomedical Graduate programs may be taken as electives. Students should check with the College of Medicine's School of Biomedical Sciences and Professional Studies (<http://www.drexelmed.edu/Home/AcademicPrograms/BiomedicalGraduateStudies.aspx>) programs.

Pathologists' Assistant

Major: Pathologists' Assistant
 Degree Awarded: Master of Science (MS)
 Calendar Type: Semester

Total Credit Hours: 91.0

Classification of Instructional Programs (CIP) code: 51.0811

Standard Occupational Classification (SOC) code: 29-2055

About the Program

The School of Biomedical Sciences and Professional Studies offers the Master of Science in Pathologists' Assistant (PathA). The pathologists' assistant is an intensely trained allied health professional who provides anatomic pathology services under the direction and supervision of a pathologist. Pathologists' assistants interact with pathologists in the same manner that physicians' assistants carry out their duties under the direction of physicians in surgical and medical practice.

The PathA program offers students the opportunity to train in the highly specialized field of anatomic pathology. This two-year, full-time program begins in May of each year. The first year is comprised of the instructional portion of the program supplemented by pathology laboratory exposure. The second year of the program is composed of several hospital-based clinical rotations offering progressively responsible experience in autopsy and surgical pathology. These rotations are supplemented with informal classroom education.

Program Accreditation

The National Accrediting Agency for Clinical Laboratory Sciences (NAACLS): NAACLS, in conjunction with the AAPA, has established national standards for Pathologists' Assistant training programs. The standards include both didactic course work and clinical experiences necessary to properly educate a pathologists' assistant. The Master of Pathologists' Assistant program at the Drexel University College of Medicine is accredited by NAACLS. Visit the NAACLS (<http://www.naacls.org/>) website for more information about the professional activities of this organization.

Professional Certification

The American Society for Clinical Pathology Board of Registry (ASCP BOC): The ASCP BOC, in conjunction with the AAPA, has established a national certification program for Pathologists' Assistants. In 2005, the ASCP BOC first offered a national certification examination for Pathologists' Assistants. In order to be eligible for the BOC examination, applicants must be graduates of a pathologists' assistant educational program accredited by the National Accrediting Agency for Clinical Laboratory Science (NAACLS). Visit the ASCP BOC (<http://www.ascp.org/Board-of-Certification/>) website to read more about the certification program and the professional activities of this organization.

Professional Affiliation

The American Association of Pathologists' Assistants (AAPA): The AAPA is the only national professional organization for pathologists' assistants.

The AAPA:

- is a not-for-profit, volunteer organization dedicated to advancing the pathologists' assistant profession by providing its members with education, networking, and professional support;
- supports professional competency through program accreditation and individual certification;
- promotes public and professional awareness of the pathologist's assistant as an integral member of the healthcare team.

Visit the AAPA (<http://www.pathassist.org>) website for more additional information about this association.

Career Opportunities

Pathologists' assistants are employed in community hospitals, academic centers such as medical schools and university hospitals, private pathology laboratories, medical research centers, government hospitals and medical examiner offices.

For more information about this program, visit the College of Medicine's Master of Science in Pathologists' Assistant (<http://www.drexelmed.edu/Home/AcademicPrograms/ProfessionalStudiesintheHealthSciences/AlliedHealthProfessionPrograms/PathologistsAssistantPathAProgram.aspx>) program's web page.

Admission Requirements

A pathologist's assistant is someone who has the ability to relate to people, the capacity for calm and reasoned judgment and who demonstrates a commitment to quality patient care.

The program's courses and content are ideal for:

- Recent graduates with a degree in a biological or allied health science, with exposure to anatomy, physiology, chemistry and microbiology. Previous exposure to pathology is recommended.
- Allied health professionals, in particular cytotechnologists, histotechnologists and medical technologists.

Admission requirements

Students will be selected on the basis of adequate educational background and medical experience. A bachelor's degree in a biological or allied health science with a cumulative GPA of at least 3.0 is the minimum requirement for acceptance into the program. Prerequisite course work will include microbiology, human anatomy, physiology, mathematics, English composition, general chemistry, organic and/or biochemistry and biological science.

All candidates will be required to have a formal interview with the Selection Committee prior to final acceptance. Deadline for submission of the application is the second Friday in February of the year in which the students plan to enroll.

Candidates for admission must provide the following credentials:

- Completed application form
- Resume
- Official transcripts from all college or university attended or where coursework was attempted or taken
- Official General Graduate Record Examination (GRE) scores
- Three letters of evaluation
- Self-assessment essays:
 - Discuss personal goals, conditions, or career aspirations that motivate you to pursue graduate study at Drexel University.
 - What are your most important accomplishments?
 - What do you expect to achieve through this program?

Total Credit: 91.0

Required Courses

MFSP 551S	Human Function	3.0
MLAS 531S	Embryology	3.0
MLAS 545S	Fundamentals of Histology	3.0
MSPA 500S	Gross Anatomy	5.0
MSPA 510S	Laboratory Management	2.0
MSPA 520S	Medical Terminology	3.0
MSPA 530S	Biomedical Photography	4.0
MSPA 540S	Histotechnology I	3.0
MSPA 541S	Histotechnology II	3.0
MSPA 550S	Applied Anatomic Pathology	4.0
MSPA 560S	Medical Ethics	2.0
MSPA 570S	Medical Pathology I	6.0
MSPA 571S	Medical Pathology II	4.0
MSPA 580S	Medical Microbiology I	4.0
MSPA 581S	Medical Microbiology II	3.0
MSPA 590S	Leadership Skills for the Medical Profession	3.0
MSPA 600S	Surgical Pathology I	6.0
MSPA 601S	Surgical Pathology II	6.0
MSPA 602S	Surgical Pathology III	6.0
MSPA 610S	Autopsy Pathology I	6.0
MSPA 611S	Autopsy Pathology II	6.0
MSPA 612S	Autopsy Pathology III	6.0
Total Credits		91.0

Pharmacology and Physiology

Major: Pharmacology and Physiology

Degree Awarded: Master of Science (MS) and Doctor of Philosophy (PhD)

Calendar Type: Semester

Total Credit Hours: 45.0 (MS, non-thesis); 62.0 (MS, thesis); 128.0 (PhD)

Classification of Instructional Programs (CIP) code: 26.1002

Standard Occupational Classification (SOC) code: 19-1042

About the Programs

The College of Medicine's Graduate School of Biomedical Sciences and Professional Studies offers graduate programs leading to the MS and the PhD degrees in Pharmacology & Physiology. The programs require independent research under the direction of departmental faculty members who are engaged in highly active research programs involving molecular, cellular, and behavioral approaches to experimental pharmacology and physiology in a strongly collaborative environment.

Students in both the PhD and MS programs begin their coursework with a core curriculum in biomedical sciences, and immediately start laboratory rotations. Intensive graduate level pharmacology, physiology and neuropharmacology courses round out the core programmatic courses. Specialization in ion channel physiology, smooth muscle physiology, behavioral pharmacology and signal transduction processes may involve the taking of several elective courses. Each program requires the defense of a thesis based on original research.

About the MS Program

The MS program, requiring two years of full-time study, provides a broad knowledge and technical expertise in pharmacology and physiology, allowing graduates to become partners in research in either an academic or an industrial environment. Students who wish to continue their graduate studies after the MS degree may apply to the PhD program, and their course credits may be applied to the doctoral program.

In addition to the thesis-based MS program, Drexel offers a non-thesis degree program in which students can earn the degree without a research project by taking additional classes and writing a literature review paper.

About the PhD Program

PhD candidates must pass a qualifying examination by November of their third year and they must have one accepted co-author manuscript, and one submitted first-author manuscript in peer-reviewed journals during the course of the program.

Additional Information

For more information about the program, please visit the College of Medicine's Pharmacology & Physiology Program (<http://drexel.edu/medicine/academics/graduate-school/pharmacology-physiology/>) website.

Admission Requirements

Drexel University College of Medicine has a rolling admissions policy, which means that complete applications are reviewed as they are received. Applicants are therefore advised to apply early, as decisions to accept or deny admission may be made before the official deadlines.

To learn more about applying to Drexel College of Medicine programs visit the Drexel College of Medicine's Graduate School of Biomedical Sciences and Professional Studies (<http://www.drexel.edu/medicine/Academics/Graduate-School/>) website.

Degree Requirements (MS)

About the Curriculum

The core curriculum is a comprehensive interdisciplinary program of study for all first-year research master's students in the Division of Biomedical Science Programs. The goal of the core curriculum is to provide a broad foundation in biomedical sciences and serve as a framework for advanced study in more specialized areas.

Courses Repeatable for Credit

As well as taking all required courses, students will re-enroll in courses having the status “repeatable for credit” (such as journal club, seminar and research courses) for the duration of their program in order to meet the total number of credits required for graduation.

Additional Information

For more information about the program, please visit the College of Medicine's Pharmacology and Physiology (<http://www.drexelmed.edu/Home/AcademicPrograms/BiomedicalGraduateStudies/Programs/MastersDoctoralPrograms/PharmacologyPhysiology.aspx>) Program (<http://drexel.edu/medicine/academics/graduate-school/pharmacology-physiology/>) web page.

Program Requirements

Non-Thesis Option

Required Courses

IDPT 500S	Responsible Conduct of Research	2.0
IDPT 501S	Biostatistics I	2.0
	or NEUR 500S Statistics for Neuro/Pharm Research	
IDPT 502S	Learn Early As Professionals I (LEAP I)	1.0
IDPT 504S	Learn Early and Practice (LEAP II)	1.0
IDPT 521S	Molecular Structure and Metabolism	5.0
IDPT 526S	Cells to Systems	5.0
IDPT 850S	Literature Review Non-Thesis MS	4.0
PHRM 502S	Current Topics in Pharmacology & Physiology *	4.0
PHRM 507S	Prin of Neuropharmacology	3.0
PHRM 512S	Graduate Pharmacology	3.0
PHRM 516S	Advanced Topics in Physiology	1.0
PHRM 517S	Advanced Topics in Pharmacology	1.0
PHGY 503S	Graduate Physiology	4.0

Advanced Electives 9.0

Select at least three Advanced Electives for a minimum of nine credits.

BIOC 520S	Macromolecular Structure & Function
CBIO 510S	Cancer Biology
MIIM 508S	Immunology I
MIIM 521S	Biotechniques I: Molecular and Genomic Methods
MLAS 536S	Animal Models for Biomedical Research
NEUR 508S	Graduate Neuroscience I
PHRM 518S	New Frontiers in Therapy
PHRM 519S	Methods in Biomedical Research
PHRM 525S	Drug Discovery and Development I
PHRM 526S	Drug Discovery and Development II

General Electives

IDPT 507S	Teaching Practicum I
IDPT 508S	Teaching Practicum II
IDPT 509S	Teaching Practicum III
IDPT 600S	Thesis Defense
CR 500S	Epidemiology
CR 513S	Business Processes and Contemporary Concerns in Pharmaceutical R & D
CR 514S	World Wide Regulatory Submissions
CR 515S	Intro to Clinical Trials
CR 520S	Applications of Clinical Research Biostatistics
CR 525S	Scientific Writing and Medical Literature
CR 535S	Current Federal Regulatory Issues in Biomedical Research
CR 545S	Pharmaceutical Law
CR 550S	Leadership Skills
CR 555S	Compliance & Monitoring Issues
CR 570S	Principles and Practice of Pharmacovigilance

CR 600S	Designing the Clinical Trial	
CR 609S	Innovative Product Development	
CR 612S	Fundamentals of Compliance	
CR 614S	Introduction to Clinical Pharmacology	
CR 617S	Informatics in Pharm Res & Development	
Total Credits		45.0

* Taken each semester.

Certificate in Clinical Research

Certificate Level: Graduate

Admissions Requirements: Bachelor's degree or higher

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 15.0

Instructional Delivery: Online

Calendar Type: Semester

Expected Time to Completion: 1.5 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.0719

Standard Occupational Classification (SOC) Code: 11-9111

About the Program

This part-time certificate program is a valuable professional resource for today's busy physicians, physician assistants, nurses, clinical fellows, research coordinators, and other individuals working in the clinical arena who want in-depth exposure to the skills and knowledge needed in the evolving clinical research field without having to commit to an entire master's program. All courses are conducted online to accommodate the needs of working professionals.

This program requires the successful completion of five graduate courses. Credits earned in the certificate program are recognized towards the Master of Science in Clinical Research Organization and Management. (<http://online.drexel.edu/online-degrees/biomedical-degrees/ms-crom/>)

Admission Requirements

A bachelor's degree from a regionally accredited institution in the United States or an equivalent international institution.

Cumulative GPA of 3.0 (graduate degree GPA will be considered along with the undergraduate GPA).

Required documents:

- A completed application
- Official transcripts from all universities of colleges and other post-secondary educational institutions (including trade schools) attended
- Two letters of recommendation
- Essay on your past successes, goals and objectives for pursuing this program
- Resume
- Additional requirements for international students

A telephone interview may be requested

Evening Post-Baccalaureate Pre-Medical Certificate Program

Certificate Level: Undergraduate

Admissions Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 32.0

Instructional Delivery: Campus

Calendar Type: Semester

Expected Time to Completion: 2 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.1199

Standard Occupational Classification (SOC) Code: 11-9121

About the Program

The Graduate School of Biomedical Sciences and Professional Studies at Drexel University's College of Medicine offers the part-time Evening Post-Baccalaureate Pre-Medical certificate (PMED). This program gives individuals who hold a non-science baccalaureate degree the opportunity to continue working while they take courses in the evening to prepare themselves for medical, veterinary, dental, podiatric, chiropractic, or other allied health professional schools. This program also affords the individual who took science courses many years ago the opportunity to revisit the sciences. The structured program is the equivalent of five semesters completed in succession.

Articulation agreements have been established for successful students upon completion of the PMED program. These schools include Drexel University College of Medicine, Edward Via College of Osteopathic Medicine, Philadelphia College of Osteopathic Medicine, and the Robert Wood Johnson School of Medicine.

The program consists of 5 semesters parsed out over 2 years. The curriculum offers the prerequisite science courses required by most health professional schools. During the first year, general chemistry and general physics with laboratories are offered. During the second year, students take organic chemistry and general biology in the summer and fall semesters. During the final semester, a formal MCAT review course is offered to students, expense-free. In addition, two elective courses are offered including Molecular Biology & Biochemistry and Sociology & Psychology.

Admission Requirements

Students applying to the program must have a bachelor's degree from an accredited institution in the United States. Admission into the program is competitive because of the limited number of seats. Applicants are accepted on a rolling admissions basis.

An applicant should have a minimum combined SAT score of 1000 or ACT score of 21 and a minimum undergraduate grade point average of 3.00. For those individuals far removed from the college years, additional factors, or other more recent coursework, will be considered.

Applicants to the program should have at least 6.0 semester credits of coursework in English literature and the behavioral sciences (psychology, sociology, or philosophy), as that is a requirement for admission into most health professional schools. The opportunity exists within the program to acquire these courses if a student without these courses is accepted. A strong understanding of algebra and trigonometry is a prerequisite for the program.

The program's application can be found on the College of Medicine's Evening Post-Baccalaureate Pre-Med Certificate Admissions (<http://www.drexelmed.edu/Home/Admissions/ProfessionalStudiesintheHealthSciences/EveningPostBaccalaureatePremedical.aspx>) web page.

Program Requirements

Required Courses

PMED 111S	General Chemistry I	3.0
PMED 112S	General Chemistry I Lab	1.0
PMED 121S	General Physics I	3.0
PMED 122S	General Physics I Lab	1.0
PMED 131S	General Chemistry II	3.0

PMED 132S	General Chemistry II Lab	1.0
PMED 141S	General Physics II	3.0
PMED 142S	General Physics II Lab	1.0
PMED 211S	General Biology I	3.0

Certificate in Quantitative Principles for Clinical Research

Certificate Level: Graduate

Admissions Requirements: Bachelor's degree or higher

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 9.0

Instructional Delivery: Online

Calendar Type: Semester

Expected Time to Completed: 1.5 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.0000; 51.0719

Standard Occupational Classification (SOC) Code: 11-9111

About the Program

This certificate of study addresses the needs of residents and fellows to attain knowledge in the basic principles of clinical research - analyzing data, understanding medical literature, and communicating results. All coursework is online, providing flexibility for the trainees and training programs.

Students completing this certificate can then apply to either the Clinical Research Organization and Management (<http://online.drexel.edu/online-degrees/biomedical-degrees/ms-crom/>) or the Clinical Research for Health Professionals (<http://online.drexel.edu/online-degrees/biomedical-degrees/ms-crhp/>) program to obtain an MS degree.

Admissions Requirements

A bachelor's degree from a regionally accredited institution in the United States or an equivalent international institution.

Required Documents

- A completed application
- Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended
- Additional requirements for International Students

Program Requirements

Required Courses

CR 500S	Epidemiology	3.0
CR 520S	Applications of Clinical Research Biostatistics	3.0
CR 525S	Scientific Writing and Medical Literature	3.0
Total Credits		9.0

Additional Information

Richard Mangano, PhD
 Director, Graduate Programs in Clinical Research

Visit the Drexel University Online web site for additional information and to apply to the Quantitative Principles for Clinical Research (<http://online.drexel.edu/online-degrees/biomedical-degrees/qpcr/>) program.

Goodwin College of Professional Studies

The Goodwin College of Professional Studies offers two Masters programs: MS in Professional Studies, which is designed for individuals and practitioners with established career paths who are interested in developing marketable skills to meet evolving workforce demands, seeking professional development, or expanding promotional opportunities; and an MS in Nonprofit Management: Public, Professional & Social Sectors, which prepares students to successfully handle the responsibilities, challenges and opportunities facing today's nonprofit sector.

Majors

- Nonprofit Management: Public, Professional & Social Sectors (MS) (<http://catalog.drexel.edu/graduate/collegeofprofessionalstudies/nonprofitmanagement/>)
- Professional Studies (MS) (p. 100)

Minor

- **New:** Nonprofit Management: Public, Professional & Social Sectors
- Professional Studies (<http://catalog.drexel.edu/graduate/collegeofprofessionalstudies/professionalstudiesgminor/>)

Professional Studies

Major: Professional Studies

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Classification of Instructional Programs (CIP) code: 30.0000

Standard Occupational Classification (SOC) code: 11-9199

About the Program

The MS in Professional Studies degree provides students with the highly valued interpersonal skills needed to collaborate, negotiate, and lead effectively in today's workplace by offering a blend of quantitative and qualitative courses. The interdisciplinary Workplace Competencies concentration allows students to apply their knowledge and learned skills across multiple industries. Our professors are career professionals who bring real-world workplace situations into our virtual classrooms to better prepare students to apply learned skills in the following industries: communications, human resources, finance, insurance, marketing, utilities, pharmaceuticals, among many others. This degree allows students to leverage themselves into various levels of middle and upper management with continued possibilities to climb the corporate ladder.

The MS in Professional Studies Program aims to equip students with the following demonstrable skills:

- **Communication** - enhancing oral, written, and non-verbal communication skills to allow students to easily relate to, collaborate with, and lead others in the work place - both in person and virtually
- **Leadership** - providing students with the necessary tool to lead people and organizations through the acts of negotiation, attracting and sustaining talent, and thinking and acting strategically to achieve results

- **Critical Inquiry** - training students to conduct research and collect data using proven scientific methods and then evaluate and analyze that data to make profitable decisions in the workplace
- **Ethics** - developing a moral and ethical framework from which organizational decisions can be made

This program is designed for the professional who has at least three years of working experience, and who is looking to **launch, change, or advance** his or her career.

Program Delivery

The Masters in Professional Studies is a part-time graduate degree program that is offered entirely online. Drexel University operates on a quarter schedule (four 10-week terms per academic year). Students will take two courses per quarter.

Additional Information

For additional information, please visit the Goodwin College Professional Studies (<http://drexel.edu/goodwin/academics/graduate-programs/ms-professional-studies/>) webpage.

Admission Requirements

Acceptance to the program requires:

- Completed online application (<http://www.drexel.com/online-degrees/business-degrees/ms-prof-studies/apply.aspx>) form
- Bachelor's degree from an accredited institution
- Undergraduate GPA of 3.0 or higher (graduate degree GPAs will be considered along with the undergraduate GPA)
 - Applicants with a cumulative GPA below 3.0 may be considered
- Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended
 - Instead of hard copy transcripts, you may supply official electronic transcripts issued by a post-secondary institution directly to Drexel University Online (customerservice@drexel.com)
 - You must supply transcripts regardless of the number of credits earned or the type of school you attended
 - If you do not list all post-secondary institutions on your application and these are listed on transcripts received from other institutions, processing of your application will be delayed until you have submitted the remaining transcripts
 - Please use our Transcript Look-up Tool (<http://www.drexel.com/tools/transcript.aspx>) to assist you in contacting your previous institutions
- Two letters of recommendation (3 preferred)
 - Drexel University Online now accepts electronic letters of recommendation
 - Submission instructions are available at: <http://www.drexel.edu/apply/recommend> (<http://www.drexel.edu/apply/recommend/>)
 - If a recommender prefers to submit an original, hard copy letter of recommendation, please remind the recommender that it must be signed and submitted in a sealed envelope signed across the flap by the recommender
- Personal Statement — 500-750 words, describing your interest in the program. Specifically, please discuss the following:
 - Your current line of work and career path until this point
 - How the program will help you facilitate your future career goals
 - Your role in building community in an online degree program

- Resume
- Optional: Students may elect to submit any of the following:
 - GRE/GMAT Scores
 - Example of a work project that demonstrates a specific skill or area of expertise
- International students must submit a TOEFL score of 550 or higher, please view additional International students requirements (<http://www.drexel.com/online-degrees/education-degrees/ms-humanresourcedevelopment/international.aspx>)
- Interviews are not required, but may be requested

Students will submit their portfolios as part of their Capstone experience. When students complete the program, they may choose to maintain their portfolios for a small annual fee.

Degree Requirements

Core Courses

PRST 501	Communication for Professionals	3.0
PRST 503	Ethics for Professionals	3.0
PRST 504	Introduction to Research Methods & Design	3.0
PRST 603	Communicating in Virtual Teams	3.0
PRST 612	Data Analysis and Interpretation	3.0
PRST 615	Program Evaluation	3.0
PRST 640	Policy Analysis	3.0
PRST 655	The Art & Science of Influencing Others	3.0
PRST 670	Fostering Diversity and Inclusion in the Workplace	3.0

Electives 12.0

Choose four of the following graduate electives (with advisor approval):

COM 610	Theories of Communication and Persuasion
CRTV 503	Creativity in the Workplace
CRTV 610	Creativity and Change Leadership
CRTV 630	Global Perspectives on Creativity
ENTP 611	Learning from Failure
ENTP 621	Innovation & Ideation
ENTP 631	Building Internal & External Relationships
ENTP 641	Innovation in Established Companies
MGMT 510	Business Problem Solving
ORGB 625	Leadership and Professional Development
ORGB 631	Leading Effective Organizations

Capstone

PRST 700	Capstone I: Project Exploration	1.5
PRST 701	Capstone II: Topical Analysis	4.5

Total Credits	45.0
---------------	------

Portfolio Requirement

All students will be required to maintain a portfolio as they progress through the program. Access to the portfolio platform is provided by the University at no charge to the student.

Over the course of their studies, students will add written assignments, projects, presentations, links to videos, and any other specimens to showcase learned skills, knowledge, or growth in one of 8 areas:

- Communication
- Creative and/or Critical Thinking & Information Literacy
- Ethical Reasoning & Responsible Citizenship
- Global Competence
- Leadership
- Personal Reflections
- Capstone
- Professional Documentation

College of Nursing and Health Professions

By anticipating and meeting the challenges presented by the nation's health care system, Drexel's College of Nursing and Health Professions is doing its part to guarantee a lasting legacy for current and future health professionals.

The College of Nursing and Health Professions offers a wide range of graduate programs. Many offer flexible scheduling, making it possible for students to continue their education through part-time, online, night, or weekend study.

Majors

- Addictions Counseling (MS) (<http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/addictionscounseling/>)
- Art Therapy and Counseling (MA) (p. 104)
- Complementary and Integrative Health (MS) (<http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/complementaryandintegrativehealth/>)
- Couple and Family Therapy (PhD) (p. 108)
- Couple and Family Therapy (DCFT) (<http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/coupleandfamilytherapydcft/>)
- Creative Arts Therapies (PhD) (p. 106)
- Culinary Arts and Science (MS) (<http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/culinaryartsandscience/>)
- Dance/Movement Therapy and Counseling (MA) (p. 110)
- Doctor of Health Science (DHSc) (<http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/healthsciencesdhsc/>)
- Family Therapy (MFT) (p. 112)
- Food Science (MS) (<http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/foodscience/>)
- Health and Rehabilitation Sciences (PhD) (<http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/healthandrehabilitationssciencephd/>)
- Health Administration (MHA) (p. 114)
- Human Nutrition (MS) (p. 115)
- Music Therapy and Counseling (MA) (p. 119)
- Nurse Anesthesia (MSN) (p. 121)
- Nursing: MSN/PhD Joint Degree (MSN/PhD) (<http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/nursingmsnphd/>)
- Nursing (PhD) (p. 121)
- Nursing Practice (DNP) (p. 123)
- **Nursing - Advanced Role (MSN)**
 - Clinical Nurse Leader (p. 125)
 - Clinical Research (<http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/clinicalresearchcon/>)
 - Nursing Education (p. 127)
 - Nursing Innovation (p. 129)
 - Nursing Leadership in Health Systems Management (p. 131)
 - MSN-Bridge Program (p. 133)
 - Quality, Safety, and Risk Management in Healthcare (<http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/qualitysafetyandriskmanagementinhealthcare/>)

[collegeofnursingandhealthprofessions/qualitysafetyandriskmanagementinhealthcare/](http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/qualitysafetyandriskmanagementinhealthcare/)

- **Nursing - Nurse Practitioner (MSN)**
 - Adult-Gerontology Acute Care Nurse Practitioner
 - Adult-Gerontology Primary Care Nurse Practitioner (p. 135)
 - Family/Individual Across the Lifespan Nurse Practitioner (p. 136)
 - Pediatric Acute Care Nurse Practitioner (p. 137)
 - Pediatric Primary Care Nurse Practitioner (p. 138)
 - Pediatric Primary Care and Pediatric Acute Care Dual Option Nurse Practitioner (p. 139)
 - Psychiatric Mental Health Nurse Practitioner (p. 140)
 - Women's Health/Gender Related Nurse Practitioner (p. 141)
- **NEW:** Nutrition and Dietetics (MS)
- Nutrition Sciences (PhD) (p. 145)
- Physical Therapy (DPT) (p. 142)
- Physician Assistant (MHS) (p. 146)
- Quality, Safety and Risk Management in Healthcare (MS) (<http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/qualitysafetyandriskmanagementinhealthcare/>)
- Rehabilitation Sciences (DHSc) (p. 149)
- Rehabilitation Sciences (MHS) (p. 151)

Graduate Minors

- Addictions Counseling (<http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/addictionscounselinggminor/>)
- Advanced Study in Complementary and Integrative Therapies (<http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/complementaryandintegrativetherapiesgminor/>)
- Advanced Study in Holistic Hospice and Palliative Care (<http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/holisticheospiceandpalliativecaregminor/>)

- Sexual Health and Wellness (<http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/sexualhealthandwellnessgminor/>)

Certificates

- Complementary and Integrative Therapies (p. 152)
- Forensic Trends and Issues in Contemporary Healthcare (p. 153)
- Geriatrics (p. 154)
- Holistic Hospice and Palliative Care (p. 155)
- Integrative Addiction Therapies (p. 156)
- Music Therapy (p. 157)
- Neuroscience, Learning and Instruction (<http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/neurosciencelearningandinstructionpbc/>)
- Nurse Anesthesia (p. 158)
- **Nursing Certificates - Advanced Role**
 - Clinical Nurse Leader Post-Master's Certificate (p. 158)
 - Leadership in Health Systems Management (p. 162)
 - Nursing Innovation (p. 159)
 - Integrated Nursing Care of Autism Spectrum Disorder (ASD) (p. 160)
 - Nursing Education Post-Bachelor's Certificate (p. 161)
- **Nursing Certificates - Nurse Practitioner**
 - Adult-Gerontology Acute Care Nurse Practitioner Post-Master's Certificate
 - Adult-Gerontology Primary Care Nurse Practitioner Post-Master's Certificate (p. 163)
 - Emergency/Trauma Nurse Practitioner (<http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/emergencytraumanppmc/>)
 - Family/Individual Across the Lifespan Nurse Practitioner Post-Master's Certificate (p. 164)
 - Pediatric Acute Care Nurse Practitioner Post-Master's Certificate (p. 165)
 - Pediatric Primary Care Nurse Practitioner Post-Master's Certificate (p. 165)
 - Pediatric Primary Care and Pediatric Acute Care Dual Option Nurse Practitioner Post-Master's Certificate (p. 166)
 - Psychiatric Mental Health Nurse Practitioner Post-Master's Certificate (p. 166)
 - Women's Health/Gender Related Nurse Practitioner Post-Master's Certificate (p. 167)
- Service to Veterans (p. 167)
- Sexual Health and Wellness (p. 168)
- Substance Use Disorder Treatment (p. 169)
- Women's Integrative Health (Advanced Study) (p. 170)

About the College

As the practice of medicine has become more complex with the advent of technology and new drug therapies, so has the provision of health services. An increasingly diverse, aging US population experiencing higher rates of chronic illness is demanding more service and culturally competent care. While technology improvements help provide the means to deliver safer, high-quality care, our society is facing shortages in health professionals such as nurses, mental health workers, nurse anesthetists, physician assistants, and rehabilitation science professionals. The

demand for these and other skilled professionals continues to increase and is expected to remain steady well into the 21st century. There is no more vibrant a place to prepare for these kinds of meaningful, rewarding careers than at Drexel University's College of Nursing and Health Professions (<http://www.drexel.edu/cnhp/>). The College offers associate's, bachelor's, master's, and doctoral degrees in more than a dozen health care fields.

Just as the health profession disciplines have come of age, so has the College of Nursing and Health Professions. Founded in 1969 as the College of Allied Health Professions with just three degree programs and a faculty of five, the college has undergone a remarkable evolution. Today it serves over 3,000 students, with a broad array of contemporary program offerings. Along the way, it has earned widespread recognition and accreditation for the education of health professionals.

Mission and Approach

The College believes that the health care needs of today and tomorrow can best be met by professionals who have expertise in their own fields and a concurrent understanding of other health disciplines. In addition to providing a broad-based education that balances academic learning with clinical training, the University promotes collaboration among students in our College of Nursing and Health Professions, our School of Public Health, and the College of Medicine, which draws from the rich traditions of predecessors Hahnemann University and the Medical College of Pennsylvania.

Teamwork is as important in academics as it is in health care. The College of Nursing and Health Professions' dedicated and knowledgeable faculty members work closely with students, providing a supportive and creative learning environment. Graduates from the College possess a wide range of experiences and the knowledge, compassion, and lifelong learning skills needed to become accomplished health care professionals.

The student body, which is diverse in age and culture, reflects Drexel University's commitment to provide qualified students with an opportunity for advanced education. Drexel welcomes nontraditional applicants and especially encourages applications from underrepresented minorities and those interested in practicing in underserved areas.

Many of Drexel's College of Nursing and Health Professions programs offer flexible scheduling, making it possible for students to continue their education through part-time, online, night, or weekend study.

Accreditation

The College has 12 nationally accredited or approved clinical programs. Pass rates for professional licensing and board certifications are well above the national mean, with nine programs boasting a 100% pass rate and nursing first-time pass rates consistently above 95%.

- The Baccalaureate Degree in Nursing (BSN) and the Master's Degree in Nursing (MSN) programs are accredited by CCNE (Commission on Collegiate Nursing Education). These programs and the post-graduate APRN certificates are also approved by the Pennsylvania State Board of Nursing.
- The Couple and Family Therapy MFT degree and Post-Master's Certificates are accredited by COAMFTE (Commission on Accreditation of Marriage and Family Therapy Education).
- The Creative Arts Therapies MA degree programs in Art Therapy and Counseling, Dance/Movement Therapy and Counseling, and Music Therapy and Counseling are approved by AATA (American Art

Therapy Association), ADTA (American Dance Therapy Association), and AMTA (American Music Therapy Association), respectively.

- The Didactic Program in Nutrition is accredited by ACEND (Accreditation Council for Education in Nutrition and Dietetics).
- The Health Services Administration program is certified by AUPHA (Association of University Programs in Health Administration).
- The Nurse Anesthesia program is accredited by COA (Council on Accreditation of Nurse Anesthesia Educational Programs).
- The Doctor of Physical Therapy (DPT) program is accredited by CAPTE (Commission on Accreditation in Physical Therapy Education).
- The Physician Assistant program is accredited by ARC-PA (Accreditation Review Commission on Education for the Physician Assistant).

Art Therapy and Counseling

Major: Art Therapy and Counseling

Degree Awarded: Master of Arts (MA)

Calendar Type: Quarter

Total Credit Hours: 90.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.2301

Standard Occupational Classification (SOC) code: 29-1129

About the Program

The Master of Arts in Art Therapy and Counseling program educates students for creative, responsive and effective therapy practice, in which art making is the essential mode of transformation. Through a balance of classroom education and clinically supervised practicum and internship experiences, students develop a strong foundation for skilled clinical practice. The 90.0 quarter-credit curriculum includes specific art therapy coursework in areas such as assessment and treatment planning for children, adolescents, adults, older adults and families; trauma approaches; creativity, symbol and metaphor; digital media use; mindfulness, and addictions and recovery. Students also take classes in general mental health counseling topics including human development; psychopathology; social and cultural foundations; clinical appraisal and assessment, and group dynamics. Graduates are eligible for the ATR-Provisional, ATR, and ATR-BC credentials, as well as professional counseling licensure in Pennsylvania (upon completion of post-graduation requirements).

Art therapy uses the creative process of making art to help improve a person’s physical, mental, and emotional well-being. Counseling is a professional relationship that empowers diverse individuals, families, and groups to accomplish mental health, wellness, education, and career goals. Art therapy and counseling can help clients explore their behaviors, thoughts and feelings, reconcile conflicts, foster self-awareness, manage coping with addictions, develop social skills, reduce anxiety, and increase self-esteem to build on strengths. Upon graduation, students from Drexel’s MA in Art Therapy and Counseling go on to work in a variety of settings, including but not limited to, medical and psychiatric hospitals, in-patient and out-patient behavioral health and recovery programs, community health and wellness centers, schools and after-school programs, trauma-informed settings, correctional facilities and halfway houses, elder care facilities, and private practices. Students also

pioneer new frontiers in therapy application through their clinical work and research.

For additional information about the program, visit the College of Nursing and Health Professions’ Art Therapy and Counseling (<https://www.drexel.edu/cnhp/academics/graduate/MA-Art-Therapy-Counseling/>) website.

Degree Requirements

Core Courses

CATX 501	Foundations of the Creative Arts Therapies	3.0
CTCN 501	Human Psychological Development	4.5
CTCN 503	DSM and Psychopathology	4.5
CTCN 504	Professional Orientation and Ethics	4.5
CTCN 505	Theories of Counseling and Psychotherapy	4.5
CTCN 506	Social and Cultural Foundations in Counseling and Art Therapy	4.5
CTCN 601	Introduction to Behavioral Research	4.5
CTCN 603	Clinical Appraisal and Assessment	4.5
CTCN 604	Career Counseling	4.5
CTCN 606	Group Dynamics in Counseling and Art Therapy	4.5

Art Therapy Track Courses

CATX 531	Adults & Older Adults Assessment & Treatment Planning	3.0
CATX 532	Trauma Approaches in Art Therapy	3.0
CATX 533	Child & Adolescent Assessment & Treatment Planning	3.0

Creative Arts Therapies Department Faculty

Yasmine Awais, MAAT, ATR-BC, ATCS, LCAT, LPC (*Art Institute of Chicago*). Associate Clinical Professor. Art therapy with diverse populations, art therapy in non-profit settings, clinical supervision.

Joke Bradt, PhD, MT-BC (*Temple University*) Director, PhD Program in *Creative Arts Therapies*. Professor. Research in music therapy, chronic pain, systematic reviews.

Natalie Rae Carlton, PhD, ATR-BC, LPCC (*Lesley University*) Director, *Art Therapy and Counseling MA Program*. Associate Clinical Professor. New media and art therapy, social justice in art activities, transgender and LGBTQ identity.

Christina Devereaux, PhD, LCAT, LMHC, BC-DMT, NCC (*UCLA*) Program Director for *Dance/Movement Therapy and Counseling*. Associate Clinical Professor. Dance movement therapy, children, attachment, autism spectrum disorder, trauma, group work, clinical supervision

Abby Dougherty, PhD, NCC, LPC (*Walden University*) Core Counseling Curriculum Coordinator. Clinical Assistant Professor. Virtual reality in mental health, mindfulness and contemplative practices in counselor education, creativity in college counseling, learning disabilities, relational-cultural theory in counseling and adult education.

Sharon Goodill, PhD, BC-DMT, NCC, LPC (*Union Institute and University*) Chair, *Department of Creative Arts Therapies*. Clinical Professor. Medical dance/movement, mind/body studies, movement assessment for DMT, CAT research and leadership.

Scott Horowitz, MA, MT-BC, LPC (*Drexel University*) Director of Field Education. Clinical Instructor. Interdisciplinary practice and education, developmental models of clinical and practicum supervision, music therapy and neurodevelopmental populations.

Florence Ierardi, MM, MT-BC, LPC (*Temple University*) Director, *Music Therapy and Counseling MA Program*. Associate Clinical Professor. Clinical improvisation, trauma-informed music therapy, multicultural music therapy perspectives.

Girija Kaimal, EdD, MA (*Harvard University*). Associate Professor. Art therapy, educational research, program evaluation, art therapy.

Dawn Morningstar, MCAT, VC-DMT, LP (*Hahnemann University*) Coordinator of *CAT Clinical Services*. Assistant Clinical Professor. Specialty in working with children and adolescents, Dance/movement therapist at Drexel's Parkway Health and Wellness faculty practice outpatient clinic.

Michele Rattigan, MA, ATR-BC, NCC, LPC (*MCP Hahnemann University*) Coordinator of *CAT Clinical Services*. Associate Clinical Professor. Unresolved trauma; post-partum depression and anxiety; disordered eating and body image concerns; self-harming behaviors; dissociative disorders

Ellen Schelly-Hill, MMT, BC-DMT, NCC, LPC (*Antioch NE Graduate School*) Director of *Dance/Movement Therapy and Counseling MA Program*. Associate Clinical Professor. Adults diagnosed with mood disorders, anxiety, chronic pain and with histories of trauma; clinical supervision; ethics.

Minjung Shim, PhD, BC-DMT (*Drexel University*). Assistant Research Professor. Medical dance/movement therapy, chronic pain management, mindfulness-based interventions, clinical trials, theory/model-building, qualitative inquiries, scoping reviews.

Emeritus Faculty

Nancy Gerber, PhD, ATR-BC (*Union Institute and University*). Associate Clinical Professor Emerita. Art therapy assessment and treatment of adolescents and adults; modern psychoanalysis and art therapy; arts

therapy education and doctoral education; arts based research and mixed methods research.

Creative Arts Therapies PhD

Major: Creative Arts Therapies

Degree Awarded: Doctor of Philosophy

Calendar Type: Quarter

Total Credit Hours: 48.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.2399

Standard Occupational Classification (SOC) code: 29-1129

About the Program

The PhD in Creative Arts Therapies is a research degree program for art therapists, dance/movement therapists, and music therapists who are interested in pursuing advanced scholarship and assuming academic leadership in their discipline. The primary mission of the program is the cultivation of scholars and academic leaders in the creative arts therapies who can:

- 1) Generate and disseminate relevant, robust rigorous research
- 2) Contribute to theory evaluation and building
- 3) Develop evidence-based best clinical practices
- 4) Cultivate academic proficiency in educating the next generation of art therapists, dance/movement therapists and music therapists.

The PhD program consists of four interactive learning modules, plus a dissertation:

- **Interdisciplinary-** Delivered as seminars, these modules challenge students to study, explore, critically evaluate and synthesize areas of interdisciplinary knowledge relative to creative arts therapies origins, philosophy, and theory.
- **Research-** Includes intensive study of multiple approaches to research. The purpose of the research module is to cultivate students' philosophical perspectives and develop research skills along a spectrum of traditional and innovative approaches. The research curriculum contributes to the generation and dissemination of robust and relevant research in the students' respective fields.
- **Self/Other Artistic Knowledge-** Introduces a laboratory-based pedagogical model in which students explore the intrinsic arts therapies intersubjective processes and transformative mechanisms that emerge through artistic inquiry and which parallels the actual arts therapies experience.
- **Practicum-** Emphasizes the transformation of theoretical knowledge to practical application and specialization. All students are required to complete a teaching practicum for one term. Beyond that, students select and complete two terms of a practicum of their choice in: 1) academia/teaching; 2) research; or 3) applied clinical practice. The practicum helps students position themselves as they prepare for graduation.
- **Dissertation-** An original robust research project that directly relates to the development of and contribution to the theory and practice of the student's creative arts therapy specialization. The dissertation is the culmination and representation of the students' doctoral work that not only advances knowledge in their field, but also positions them for career opportunities in academia and research.

Research

The professions of art therapy, dance/movement therapy, and music therapy have grown and become increasingly integrated as interventions in healthcare, education, and human services. Implicit in the emergent growth and integration of these professions is our responsibility to evaluate existing and develop new evidence-based theories and clinical practices. The mission of the PhD Program in Creative Arts Therapies is to generate, critically evaluate, and disseminate research to address this need and ultimately to advance the knowledge and evidence bases for these professions. Consequently, we have identified the following core values central to our research agenda.

Stewardship and scholarship in the Creative Arts Therapies includes:

1. Critical evaluation of the philosophical assumptions inherent in and essential to the understanding, preservation and advancement of theory and practice of the CATs.
2. Critical evaluation of the research approaches and methods best suited for the investigation of theories, processes, and mechanisms in the creative arts therapies.
3. Generation of knowledge that contributes to the construction, evaluation, and credibility of best evidence-based theory and clinical practices.
4. Translation, dissemination and application of rigorous research that contributes to the preservation and advancement of our fields and the health of society.

For additional information about the program, visit the College of Nursing and Health Professions' PhD in Creative Arts Therapies (<https://drexel.edu/cnhp/academics/doctoral/PHD-Creative-Arts-Therapies/>) website.

Degree Requirements

The mission of the PhD in Creative Arts Therapies program is to cultivate stewards of the professions who can preserve the traditions of the disciplines, promote scholarly and clinical advancement, and contribute to the evidence base of the fields. In pursuit of the program mission, the curriculum includes four interactive learning modules and a dissertation research project that comprise a full-time degree program:

- Interdisciplinary module
- Research module
- Self/other artistic module
- Practicum module

Located within these four learning modules and within the dissertation research are the following educational constructs and objectives:

1. **Learning Culture:** To create an innovative learning culture in which students can become advanced, critical, and creative thinkers, scholars and leaders in their field.
2. **Epistemological Integrity:** To cultivate a learning culture respectful of the epistemology of the creative arts therapies disciplines and resulting in the generation of an indigenous to the Creative Arts Therapies disciplines.
3. **Philosophy and Theory:** To identify and articulate the interdisciplinary philosophical assumptions which contribute to the worldview, indigenous epistemology, theory, and practice in the arts therapies.

4. Theory and Practice: To systematically examine and assess existing theory, propose revisions as necessary, and develop new theoretical constructs that contribute to the evidence base for the creative arts therapies disciplines.

5. Research: To expand the quality and quantity of original research while systematically and critically evaluating the traditional or innovative research paradigms most compatible with the epistemology, knowledge gaps, and research questions in the Creative Arts Therapies.

6. Research and Evidence Base: To generate and disseminate research contributing to theory building and critical evaluation of epistemologically relevant evidence based practice in the fields of art therapy, dance/movement therapy, and music therapy.

7. Dissemination and Translation: To expand the dissemination of knowledge and arts therapies services to both professional and public communities.

8. Leadership and Advocacy: To prepare scholarly leaders, researchers and advocates in the professions of art therapy, dance/movement therapy and music therapy.

For additional information about the program, visit the College of Nursing and Health Professions' PhD in Creative Arts Therapies web site.

General Requirements

The following general requirements must be satisfied in order to complete the PhD in Creative Arts Therapies:

- 48.0 quarter credits of required and elective courses as designated
- Passage of the Candidacy/Qualifying exam (administered after the completion of one year)
- Approval of dissertation proposal
- Completion of one quarter of a Teaching Practicum and two quarters of additional Practicum of the student's choice in one of the following areas: teaching, research, or advanced clinical practice
- Completion and passage of the dissertation
- Passage of final oral exam/oral defense of dissertation

The required courses in the curriculum are organized into four essential learning modules: 1) interdisciplinary; 2) research; 3) self/other and artistic knowledge; and 4) practical application. These courses comprise the key components of the doctoral program, along with the dissertation.

Interdisciplinary Seminars

ARTS 703	Interdisciplinary Seminar I	3.0
ARTS 704	Interdisciplinary Seminar II	3.0
ARTS 706	Interdisciplinary Seminar IV	3.0

Research Courses

ARTS 712	Research I: Philosophy & Theory	3.0
ARTS 715	Innovative and Emergent Research Methods	3.0
RSCH 714	Qualitative Research Methods I	3.0
RSCH 759	Foundations of Biostatistics	3.0
RSCH 770	Foundations in Research Methods	3.0

Research Specialization

Select one of the following: 3.0

ARTS 732	Advanced Quantitative Research Seminar	
ARTS 734	Innovative and Emergent Research Methods II	
RSCH 733	Qualitative Research Methods II	
RSCH 816	Intermediate Mixed Methods Research	

Self/Other Artistic Knowledge Studio Labs

ARTS 716	Studio Based Artistic Inquiry I	3.0
----------	---------------------------------	-----

ARTS 717	Studio Based Artistic Inquiry II	3.0
----------	----------------------------------	-----

Practical Application Courses

Practica in either research, teaching, clinical supervision, or advanced clinical practice.

ARTS 812	Teaching Practicum	1.0
ARTS 809	Practicum II	2.0-9.0
ARTS 810	Practicum III	2.0-9.0

Dissertation Research - Minimum of 4 credits

ARTS 804	Dissertation Research I	
ARTS 805	Dissertation Research II	
ARTS 806	Dissertation Research III	
ARTS 807	Dissertation Research IV	

Elective 3.0

Students, with advisement and in accordance with their educational plan, may choose a course in their content area.

Total Credits		45.0-59.0
---------------	--	-----------

* The dissertation is an original research project, the content of which directly relates to the epistemology, theory, and/or practice of the student's creative arts therapy specialization.

All electives must be graduate courses and can be selected from those courses offered at Drexel University. In particular, doctoral level courses in the College of Nursing and Health Professions, School of Public Health, College of Arts and Sciences, and/or the School of Education may be the most relevant to students in this program. (The Creative Arts Therapies PhD program director will obtain permission for the student to take the elective from the relevant Dean of the College or School, and the relevant program director and course instructor.)

Content areas that are acceptable for electives include the following: anthropology, biology, creativity, culture and communication, ethics, health psychology, literature, neuroanatomy, neuropsychology, philosophy, psychology, psychoanalysis, sociology, advanced statistics. Additional content areas may be added by special request as approved by the supervising faculty advisor and program director.

Sample Plan of Study

Term 1		Credits
ARTS 703	Interdisciplinary Seminar I	3.0
ARTS 712	Research I: Philosophy & Theory	3.0
ARTS 716	Studio Based Artistic Inquiry I	3.0
Term Credits		9.0

Term 2		Credits

* The dissertation is an original research project, the content of which directly relates to the epistemology, theory, and/or practice of the student's creative arts therapy specialization.

Couple and Family Therapy PhD

Major: Couple and Family Therapy

Degree Awarded: Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 120.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.1505

Standard Occupational Classification (SOC) code: 21-1013

About the Program

The PhD program in Couple and Family Therapy (CFT) develops the next generation of couple and family therapy scholars interested in research related to family based psychotherapy, families and health, and health disparities. Students are trained to advance the knowledge base of couple and family therapy through education, research, and clinical service with a particular emphasis on evidenced informed treatment modalities.

The program is rooted in relational and systems theories and therapies including Attachment-based Family Therapy, Emotionally Focused Family Therapy, and Medical Family Therapy approaches. Students are expected to demonstrate critical and analytical thinking with respect to the broad areas of systems theory and therapy, and have a primary interest in research and scholarship. The Counseling and Family Therapy Department is committed to attracting minority scholars as well as training students to be aware and sensitive to contextual issues such as race, class, gender, spirituality and sexual orientation, as well as power and privilege.

Graduates of the Couple and Family Therapy PhD program serve as researchers in public and private institutions, faculty in graduate programs of couple and family therapy, psychology, social work, or medical schools, and as clinicians in mental health agencies or private practice.

For additional information about the PhD in Couple and Family Therapy, visit the Counseling and Family Therapy Department (<https://drexel.edu/cnhp/academics/departments/Counseling-and-Family-Therapy/>) web site.

Degree Requirements

Students are required to complete the standard curriculum in couple and family therapy before pursuing the doctoral curriculum. The standard curriculum is offered in the COAMFTE- accredited Master of Family Therapy (p. 112) and Post-Master's Certificate programs at the University.

The curriculum includes study in the following areas:

- Theory and research in couple and family therapy
- Research methodology, including statistics, research design, and computer applications
- Evidenced informed and specialized instruction in couple and family therapy
- Diverse family structures,
- Supervised clinical experience

Required Courses

CFTP 713	Introduction to CFT Clinical Research	3.0
CFTP 720	Couple Therapy Theory & Practice	3.0
CFTP 721	Critical Theory in Couple and Family Therapy	3.0
CFTP 724	Multicultural Approach to Couple and Family Therapy	4.0
CFTP 725	Trauma and Families	4.0
CFTP 729	Diverse Families and Communities: Intervention Strategies	3.0
CFTP 735	Family Healthcare Policy	3.0
CFTP 757	Attachment, Emotions and Psychotherapy	3.0
CFTP 759	Psychotherapy Outcome and Process Research	3.0
CFTP 760	Teaching Practicum	2.0
CFTP T780	Special Topics in Couple and Family Therapy	1.0-6.0
NHP 762	Health Professional Education	3.0
RSCH 714	Qualitative Research Methods I	3.0
RSCH 759	Foundations of Biostatistics	3.0
RSCH 770	Foundations in Research Methods	3.0
RSCH 811	Intermediate Biostatistics	3.0
RSCH 814	Intermediate Biostatistics II	3.0
RSCH 815	Scientific Inquiry and Writing	3.0
Elective		3.0-4.0
Internship - Minimum of 27 credits *		27.0
CFTP 801	Couple and Family Therapy Internship	
Dissertation *		37.0
CFTP 802	Couple and Family Therapy Dissertation	
CFTP 803	Couple and Family Therapy Dissertation Defense	
Total Credits		120.0-126.0

* Internship (CFTP 801): Students are required to complete at least three terms of internship during the third or fourth year of the program. They must register for 9.0 credits per quarter to cover this activity. Most internships will be done in 3 quarters (27.0 credits), but the expectation has been set that the internship will be completed after 4 quarters (36.0 credits) to give the student some flexibility. Dissertation (CFTP 802): Students should begin their dissertation in year three or four of the program. This project is expected to take four quarters (36.0 credits). For each of those quarters the student must register for 9.0 credits of CFTP 802. If the project takes longer than four quarters, the student may continue to sign up for 9.0 credits of CFTP 802 each quarter. It is anticipated, however, that all students will complete their dissertations after 8 quarters (2 years, 72.0 credits). Dissertation Defense (CFTP 803): Students are required to defend their dissertations when they are complete. To defend, a student must register and pay for one credit of CFTP 803.

Students must be actively engaged in clinical practice throughout the program. Before graduating from the PhD program, all students are encouraged to complete at least 1,000 hours of direct client contact hours.

Internship

All students are required to do an internship. Internship supervisors must be clearly senior in experience to the student intern. The purpose of the internship is to provide students with a supervised full-time clinical, research, academic or administrative experience of at least nine months duration. Clinical and alternate internships must emphasize relationally focused practice and research. For the clinical internship, it is to ensure that students meet the 1,000 direct client contact hour standard.

Students should contact the Counseling and Family Therapy Department (<https://drexel.edu/cnhp/academics/departments/Counseling-and-Family-Therapy/>) for additional information about the qualifying exam and the dissertation.

Couple and Family Therapy Faculty

Stephanie Brooks, PhD, LCSW, LMFT (*Drexel University*) Associate Dean, Health Professions. Associate Clinical Professor. Outcome-based education; supervision and training; African American families; cultural diversity specifically African American families and adolescents; Person of the Therapist training; ADHD and couple therapy; families impacted by addiction; behavioral health and family violence.

Guy Diamond, PhD, MA (*California School of Professional Psychology*) Director, Center for Family Intervention Science. Associate Professor. Prevention and treatment of adolescent depression and suicide; screening and education in schools, primary care, emergency rooms and health care centers; Attachment-based family therapy; empirically supported treatment for youth depression and suicide.

Stephanie Krauthamer Ewing, PhD, MPH (*University of Delaware*). Assistant Professor. Promoting healthy emotional development and resilience in children and adolescents, attachment and caregiving relationships, impact of trauma on parenting and attachment, developmental and contextual risk factors for depression and suicide risk in youth, evidence based treatments for depression and suicide risk, research methodology.

Kenneth Hardy, PhD (*Florida State University*). Professor. Challenging society to think critically about the hidden but significant connections that often exist between trauma and issues of oppression.

Christian Jordal, PhD, LMFT, CST (*Virginia Polytechnic Institute and State University*) Program Director, Master of Family Therapy Program

(MFT). Associate Clinical Professor. Behavioral health outcomes, mixed methodology; LGBT and mixed orientation relationships, marital commitment, medical family therapy, sex therapy, transgender healthcare and relationships.

Marlene F. Watson, PhD, LMFT (*Virginia Polytechnic and State University*). Associate Professor. Forensic family therapy, siblings, race, class, gender and health policy issues.

Erica Wilkins, PhD, LMFT (*Texas Tech University*) Program Director, Doctor of Couple and Family Therapy (DCFT). Assistant Clinical Professor. Residual effects of slavery on African Americans, HIV/AIDS, treatment of post-traumatic stress, grief counseling, substance abuse and the family, culturally competent services, and contextual therapy.

Dance/Movement Therapy and Counseling

Major: Dance/Movement Therapy and Counseling

Degree Awarded: Master of Arts (MA)

Calendar Type: Quarter

Total Credit Hours: 90.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.2302

Standard Occupational Classification (SOC) code: 29-1129

About the Program

The Master of Arts program in Dance/Movement Therapy and Counseling educates students for creative, responsive and effective therapy practice, in which dance and movement are the essential modes of transformation. Through a balance of experiential and reflective learning, theory and skill-based education, and supervised practicum and internship experiences, students develop a strong base for effective clinical practice. The 90.0 quarter-credit curriculum includes specific dance/movement therapy coursework in areas such as Laban Movement Analysis (LMA); movement observation and assessment; child and adult theories and skills, and developmental movement, as well as general mental health counseling coursework in human development; psychopathology; social and cultural foundations; clinical appraisal and assessment, and group dynamics. Program graduates are eligible for the Registered Dance/Movement Therapist (R-DMT) credential, as well as professional counseling licensure in Pennsylvania (upon completion of post-graduation requirements).

The American Dance Therapy Association (ADTA) defines dance/movement therapy as the psychotherapeutic use of movement in a process that furthers the emotional, cognitive, social, and physical integration of the individual. The profession is positioned to meet an increasing interest in mind-body approaches to mental and physical health that have emerged in health profession circles and in the general public. Upon graduation, students go on to work in a variety of settings, including but not limited to, medical and psychiatric hospitals; inpatient and outpatient behavioral health programs; community health and wellness centers; schools and afterschool programs; trauma-informed settings; correctional facilities and halfway houses; elder care facilities, and private practices. Students also pioneer new frontiers in therapy application through clinical work and research.

For additional information about the program, visit the College of Nursing and Health Professions' Dance/Movement Therapy and Counseling

(<https://www.drexel.edu/cnhp/academics/graduate/MA-Dance-Movement-Therapy-Counseling/>) web site.

Degree Requirements

Core Courses

CATX 501	Foundations of the Creative Arts Therapies	3.0
CTCN 501	Human Psychological Development	4.5
CTCN 503	DSM and Psychopathology	4.5
CTCN 504	Professional Orientation and Ethics	4.5
CTCN 505	Theories of Counseling and Psychotherapy	4.5
CTCN 507	Social and Cultural Foundations in Counseling and Dance/Movement Therapy	4.5
CTCN 601	Introduction to Behavioral Research	4.5
CTCN 603	Clinical Appraisal and Assessment	4.5

CATX 624	Culminating Project in Dance/Movement Therapy II	2.0
	Term Credits	11.0

Total Credit: 90.0

* Please note that the electives are in addition to the 90 credits required for the degree. Please consult with you advisor before registering for an elective.

Dance/Movement Therapy and Counseling Faculty

Yasmine Awais, MAAT, ATR-BC, ATCS, LCAT, LPC (*Art Institute of Chicago*). Associate Clinical Professor. Art therapy with diverse populations, art therapy in non-profit settings, clinical supervision.

Joke Bradt, PhD, MT-BC (*Temple University*) Director, PhD Program in *Creative Arts Therapies*. Professor. Research in music therapy, chronic pain, systematic reviews.

Natalie Rae Carlton, PhD, ATR-BC, LPCC (*Lesley University*) Director, *Art Therapy and Counseling MA Program*. Associate Clinical Professor. New media and art therapy, social justice in art activities, transgender and LGBTQ identity.

Susan Deutsch Laban Movement Analysis

Christina Devereaux, PhD, LCAT, LMHC, BC-DMT, NCC (*UCLA*) Program Director for *Dance/Movement Therapy and Counseling*. Associate Clinical Professor. Dance movement therapy, children, attachment, autism spectrum disorder, trauma, group work, clinical supervision

Abby Dougherty, PhD, NCC, LPC (*Walden University*) Core Counseling Curriculum Coordinator. Clinical Assistant Professor. Virtual reality in mental health, mindfulness and contemplative practices in counselor education, creativity in college counseling, learning disabilities, relational-cultural theory in counseling and adult education.

Sharon Goodill, PhD, BC-DMT, NCC, LPC (*Union Institute and University*) Chair, *Department of Creative Arts Therapies*. Clinical Professor. Medical dance/movement, mind/body studies, movement assessment for DMT, CAT research and leadership.

Scott Horowitz, MA, MT-BC, LPC (*Drexel University*) Director of *Field Education*. Clinical Instructor. Interdisciplinary practice and education, developmental models of clinical and practicum supervision, music therapy and neurodevelopmental populations.

Florence Ierardi, MM, MT-BC, LPC (*Temple University*) Director, *Music Therapy and Counseling MA Program*. Associate Clinical Professor. Clinical improvisation, trauma-informed music therapy, multicultural music therapy perspectives.

Girija Kaimal, EdD, MA (*Harvard University*). Associate Professor. Art therapy, educational research, program evaluation, art therapy.

Dawn Morningstar, MCAT, VC-DMT, LP (*Hahnemann University*) Coordinator of *CAT Clinical Services*. Assistant Clinical Professor. Specialty in working with children and adolescents, Dance/movement therapist at Drexel's Parkway Health and Wellness faculty practice outpatient clinic.

Michele Rattigan, MA, ATR-BC, NCC, LPC (*MCP Hahnemann University*) Coordinator of *CAT Clinical Services*. Associate Clinical Professor. Unresolved trauma; post-partum depression and anxiety; disordered eating and body image concerns; self-harming behaviors; dissociative disorders

Ellen Schelly-Hill, MMT, BC-DMT, NCC, LPC (*Antioch NE Graduate School*) Director of *Dance/Movement Therapy and Counseling MA Program*. Associate Clinical Professor. Adults diagnosed with mood disorders, anxiety, chronic pain and with histories of trauma; clinical supervision; ethics.

Minjung Shim, PhD, BC-DMT (*Drexel University*). Assistant Research Professor. Medical dance/movement therapy, chronic pain management, mindfulness-based interventions, clinical trials, theory/model-building, qualitative inquiries, scoping reviews.

Emeritus Faculty

Nancy Gerber, PhD, ATR-BC (*Union Institute and University*). Associate Clinical Professor Emerita. Art therapy assessment and treatment of adolescents and adults; modern psychoanalysis and art therapy; arts therapy education and doctoral education; arts based research and mixed methods research.

Master of Family Therapy

Major: Family Therapy
Degree Awarded: Master of Family Therapy (MFT)
Calendar Type: Quarter
Total Credit Hours: 90.0
Co-op Option: None
Classification of Instructional Programs (CIP) code: 51.1505
Standard Occupational Classification (SOC) code: 21.1013

About the Program

The Master of Family Therapy (MFT) Program prepares couple and family therapy practitioners and meets the educational requirements for license eligibility in the state of Pennsylvania. It is a two-year, full-time or four-year, part-time program accredited by the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE).

This clinically rigorous program exposes students to broad areas of theory and practice with an emphasis on the interdependence of the individual and the context of their relationships extending from family of origin to the global community. The curriculum is centered on the principles of social justice, cultural competence, and the Person of the Therapist model. Students also participate in culturally diverse, clinical practicum experiences, working with individuals, couples, and families under the supervision of experienced clinicians.

For more information, visit Drexel's College of Nursing and Health Professions Counseling and Family Therapy Department (<https://drexel.edu/cnhp/academics/departments/Counseling-and-Family-Therapy/>) web page.

Degree Requirements

The MFT curriculum assists students in integrating theory and practice. Issues of cultural diversity such as race, class, gender, sexual orientation, and ethnicity and power and privilege are addressed throughout the program. Students are fully trained to assume clinical practice in couple and family therapy and meet the educational requirements for Clinical Fellow membership in the AAMFT.

Required Courses

Foundations of Relational/Systemic Practice, Theories & Models		
CFTP 500	Introduction to Systems Theory	4.0
CFTP 501	Introduction to Family Therapy	4.0
CFTP 502	Introduction to Family Therapy II	3.0
Clinical Treatment with Individuals, Couples & Families		
CFTP 509	Couples Therapy	4.0
CFTP 540	Child Therapy in Couple and Family Therapy	3.0
CFTP 606	Contextual Family Therapy	3.0
CFTP 610	Sex Therapy	3.0
Diverse, Multicultural/International &/or Underserved Communities		
CFTP 503	Historical and Sociocultural Influences	4.0
CFTP 504	Sociocultural Influences II	3.0
Research & Evaluation		
CFTP 524	Research I: Family Evaluation	3.0
CFTP 525	Research in Couple and Family Therapy	4.0
Professional Identity, Law, Ethics and Social Responsibility		
CFTP 522	Legal and Ethical Implications in Couple and Family Therapy Practice	4.0
CFTP 526	Person of the Therapist Experience I	2.0
CFTP 527	Person of the Therapist Experience II	2.0
CFTP 528	Person of the Therapist Experience III	2.0

CFTP 542	Professional Development Seminar	1.0
Biopsychosocial Health & Development across the Life Span		
CFTP 520	Family Life Cycle	4.0
CFTP 521	Human Development	4.0
Systemic/Relational Assessment & Mental Health Diagnosis and Treatment		
CFTP 513	DSM I: Adult Psychopathology	3.0
CFTP 514	DSM II: Child Psychopathology	3.0
Contemporary Issues		
CFTP 725	Trauma and Families	4.0
Community Intersections & Collaboration		
CFTP 518	Medical Family Therapy	4.0
Clinical Practice & Supervision		
CFTP 530	Clinical Practicum/Supervision I	1.0
CFTP 531	Clinical Practicum/Supervision II	1.0
CFTP 532	Clinical Practicum/Supervision III	1.0
CFTP 533	Clinical Practicum/Supervision IV	1.0
CFTP 534	Clinical Practicum/Supervision V	1.0
CFTP 535	Clinical Practicum/Supervision VI	1.0
CFTP 536	Clinical Practicum/Supervision VII	1.0
CFTP 539	Clinical Readiness Seminar	3.0
CFTP 561	Group Supervision / Practicum I	2.0
CFTP 562	Group Supervision / Practicum II	2.0
CFTP 563	Group Supervision / Practicum III	2.0
CFTP 564	Group Supervision / Practicum IV	2.0
Capstone Project		
CFTP 543	Capstone Project	1.0
Total Credits		90.0

Clinical Practicum Experience

All interns must complete two practicum experiences continuously prior to graduation: 9 month and 12 month. Interns will be expected to spend 16-20 hours per week working at the approved program practicum site. The intern, site supervisor, and CFT Director of Clinical Training negotiate practicum schedules. The practicum schedule cannot conflict with program class schedule.

Clinical practicum sites are located primarily in Philadelphia, Delaware, and New Jersey. Settings include addictions facilities, schools, family based and forensic family therapy treatment programs, hospitals, community health centers, juvenile justice treatment systems, and inpatient and outpatient behavioral health agencies. Students should expect to travel up to 30 miles to their practicum site or for related supervision. Transportation, therein is the responsibility of the student.

For additional information, students should contact the Couple and Family Therapy Department (<https://www.drexel.edu/cnhp/academics/departments/Couple-and-Family-Therapy/>).

Sample Plan of Study

Full-time:

Term 1		Credits
CFTP 500	Introduction to Systems Theory	4.0
CFTP 520	Family Life Cycle	4.0
CFTP 522	Legal and Ethical Implications in Couple and Family Therapy Practice	4.0
CFTP 526	Person of the Therapist Experience I	2.0
CFTP 530	Clinical Practicum/Supervision I	1.0
CFTP 539	Clinical Readiness Seminar	3.0
Term Credits		18.0
Term 2		
CFTP 501	Introduction to Family Therapy	4.0

CFTP 503	Historical and Sociocultural Influences	4.0
CFTP 513	DSM I: Adult Psychopathology	3.0
CFTP 527	Person of the Therapist Experience II	2.0
CFTP 531	Clinical Practicum/Supervision II	1.0
Term Credits		14.0
Term 3		
CFTP 502	Introduction to Family Therapy II	3.0
CFTP 514	DSM II: Child Psychopathology	3.0
CFTP 521	Human Development	4.0

Couple and Family Therapy Faculty

Stephanie Brooks, PhD, LCSW, LMFT (*Drexel University*) Associate Dean, *Health Professions*. Associate Clinical Professor. Outcome-based education; supervision and training; African American families; cultural diversity specifically African American families and adolescents; Person of the Therapist training; ADHD and couple therapy; families impacted by addiction; behavioral health and family violence.

Guy Diamond, PhD, MA (*California School of Professional Psychology*) Director, *Center for Family Intervention Science*. Associate Professor. Prevention and treatment of adolescent depression and suicide; screening and education in schools, primary care, emergency rooms and health care centers; Attachment-based family therapy; empirically supported treatment for youth depression and suicide.

Stephanie Krauthamer Ewing, PhD, MPH (*University of Delaware*). Assistant Professor. Promoting healthy emotional development and resilience in children and adolescents, attachment and care-giving relationships, impact of trauma on parenting and attachment, developmental and contextual risk factors for depression and suicide risk in youth, evidence based treatments for depression and suicide risk, research methodology.

Kenneth Hardy, PhD (*Florida State University*). Professor. Challenging society to think critically about the hidden but significant connections that often exist between trauma and issues of oppression.

Christian Jordal, PhD, LMFT, CST (*Virginia Polytechnic Institute and State University*) Program Director, Master of Family Therapy Program (MFT). Associate Clinical Professor. Behavioral health outcomes, mixed methodology; LGBT and mixed orientation relationships, marital commitment, medical family therapy, sex therapy, transgender healthcare and relationships.

Marlene F. Watson, PhD, LMFT (*Virginia Polytechnic and State University*). Associate Professor. Forensic family therapy, siblings, race, class, gender and health policy issues.

Erica Wilkins, PhD, LMFT (*Texas Tech University*) Program Director, Doctor of Couple and Family Therapy (DCFT). Assistant Clinical Professor. Residual effects of slavery on African Americans, HIV/AIDS, treatment of post-traumatic stress, grief counseling, substance abuse and the family, culturally competent services, and contextual therapy.

Health Administration

Major: Health Administration

Degree Awarded: Master of Health Administration (MHA)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.0701

Standard Occupational Classification (SOC) code: 11-9111

About the Program

The Master of Health Administration program consists of 10 core courses, one on-site residency, and one elective course, for a total of 45.0 credits. All courses, except for the residency, will be conducted online through Drexel University Online (<http://online.drexel.edu/online-degrees/nursing-degrees/mha/>). The residency, based at Drexel University's Center City campus, is designed to provide students with a full master's level collaborative experience with on-campus and/or community activities, and the experience of working directly with health care or public health service organizations to improve the planning, delivery and evaluation of these services.

Students will learn the extent of health disparities in urban areas based on current health indices, such as infant mortality rates, life expectancy and violence, and the policy, systems management, and epidemiological tools for addressing these.

The curriculum includes community orientation, financial skills, analytical thinking, and strategic orientation. The community orientation is expressed in the public health approach in courses such as the Introduction to Descriptive Epidemiology and Biostatistics, which is based in the tradition of social epidemiology.

Students collaborate to produce an Applied Management Project which will be assigned in groups as a culminating project for the program. In this project, students will apply management tools and/or research tools to address particular administrative challenges, assuring that students think at an organizational level and use particular strategies to respond to change.

In addition to the content of the workforce course, self-confidence and self-development are integrated in the management courses and the on-campus portion of the program, which encourages self-reflection, application of theoretical perspectives, and synthesis of data and management tools. In the online portion of the course, students engage in threaded discussions with classmates about their completed projects.

This curriculum is designed to help you to achieve your goals on a timeline that fits your lifestyle and allows a student to graduate in two or three academic years. Students also have the option to enter during the Fall or Spring term.

Additional Information

The contact for this program is:

Melissa Giorgio, BS
Administrative Coordinator
Health Administration Department

Degree Requirements

The Master of Health Administration program consists of 11 core courses (41.0 credits), including one 4.0 credit on-site residency (HSAD 522), and one elective course (4.0 credits), for a total of 45.0 credits.

REQUIRED COURSES

EPI 570	Introduction to Epidemiology	3.0
HMP 512	The Business of Healthcare: Advanced Healthcare Financial Management	3.0
or IPS 564	The Business of Healthcare	
HSAD 500	Historical Influences on the US Healthcare System	4.0
HSAD 505	Ethical and Legal Issues in Healthcare Management and Policy	4.0
HSAD 515	Practice issues in Healthcare Management	4.0
HSAD 522	Applied Management Project	4.0
HSAD 525	National Health Expenditures	4.0
HSAD 530	Politics and Policy of Healthcare Resources	4.0
HSAD 540	Resources, Recruitment and Retention in Healthcare	4.0
HSAD 550	Planning in the Era of the Affordable Care Act	4.0
RSCH 519	Introduction to Biostatistics	3.0

ELECTIVE COURSES (4 credits from the following list)

HSAD 560	Advanced Healthcare Marketing	4.0
HSAD 561	Risk Management	
HSAD 562	Group Dynamics & Leadership in Health Care Management	
HSAD 565	Global Health and Management Issues	
IPS 562	Comparative Health Systems	
Total Credits		45.0

* HSAD 522 is taken during the first week of Summer term.

Sample Plan of Study

Two Year Sample Plan of Study

Term 1		Credits
HSAD 500	Historical Influences on the US Healthcare System	4.0
RSCH 519	Introduction to Biostatistics	3.0
Term Credits		7.0
Term 2		
HSAD 505	Ethical and Legal Issues in Healthcare Management and Policy	4.0

Health Services Administration Faculty

Jesse Ballenger, PhD (*Case Western Reserve University*). Associate Teaching Professor. Healthcare, medicine and ethics; aging and neurodegenerative diseases; Science and Technology Studies.

Merritt Brockman, DHA, FACHE (*Medical University of South Carolina*). Assistant Teaching Professor. Patient centered medical home; improvements in health care delivery.

Fred DiCostanzo, EdD (*Rutgers University*). Assistant Professor. Organizational leadership, Healthcare Management, Human resources and team effectiveness

Stephen F. Gambescia, PhD, MEd, MBA (*Temple University*). Professor. Health care policy, nonprofits and health care, and health care management and leadership.

Kevin Mitchell, PhD, MBA (*Walden University*). Assistant Teaching Professor. Health Services Administration; continuous quality improvement, strategic health care management. Research interests include health disparities in vulnerable population, evidenced based medicine and clinical pharmacology and therapeutics.

Marina Moses, MS, DrPH (*Columbia University*). Assistant Professor. Health administration; healthcare policy; nonprofit association management; sustainability.

Kristine A. Mulhorn, PhD (*University of Delaware*) *Chair, Department of Health Administration*. Professor. Disability and aging; cross-national methods of functioning.

Sharrona Pearl, PhD (*Harvard University*). Associate Professor. Medical ethics; science studies; history of science and medicine; critical race, gender, and disability studies; media studies.

Constance Karin Perry, PhD, EMT (*University of Buffalo*). Associate Professor. Biomedical ethics and ethical theory. Research interests include autonomy, personhood, feminist ethics, the ethics of animal experimentation, and ethical issues in reproduction and pregnancy.

Human Nutrition

Major: Human Nutrition
Degree Awarded: Master's of Science (MS)
Calendar Type: Quarter
Total Credit Hours: 45.0
Co-op Option: None

Classification of Instructional Programs (CIP) code: 30.1901
Standard Occupational Classification (SOC) code: 29-1031

About the Program

The Human Nutrition major is designed to provide the didactic coursework necessary to prepare students to address the nutrition needs of individuals or groups, through prevention or management of illness or chronic disease. This major also encompasses nutrition science, the application of the principles of biochemistry, physiology, and biology to human nutritional needs. The major includes two tracks; the Didactic Program in Dietetics (DPD) track leading to becoming a Registered Dietitian/Nutritionist (RDN), and the Nutrition Sciences track leading to application in research or industry. Applicants to the program should indicate to which track they are applying.

Current research in human nutrition includes: the prevention of obesity and diabetes across the lifespan; community engagement to improve healthful food access, availability, and exposure in school and clinic-based settings; nutrition misinformation in the areas of diabetes, oncology and weight control; and effectiveness of nutrition education (particularly by the use of multimedia) on health and eating habits.

Current research in nutrition science includes: dopamine-mediated mechanisms of food intake regulation in humans and its impact on metabolic homeostasis, especially as it applies to obesity, eating disorders and aging; the relationship between human exposure to pesticides and oxidative stress by measuring biomarkers of oxidative stress in biological fluids and DNA damage in human cells; identifying potential unique food safety risks for minority racial/ethnic and low income populations; and, understanding whether novel dietary interventions can influence bone-regulating hormones, bone mineral density, pro-inflammatory cytokines and energy metabolism.

Graduate study in human nutrition is offered on both a full-time and part-time basis. Students are admitted only in the Fall or Winter terms. Students in the DPD track are required to complete a comprehensive exam at the end of the first year of study, and have the option to complete a research thesis. Students in the Nutrition Sciences track are required to complete a research thesis. In addition to the core curriculum, students select specialty courses relating to their major, as well as electives.

Mission, Goals, and Outcome Measures

Drexel University's Department of Nutrition Sciences, Nutrition and Dietetics Program integrates a foundation in the nutrition sciences with courses in the social sciences to provide the knowledge, skills, and professional values needed for successful entry into dietetic internships, graduate school, or dietetics employment. The learning environment is structured to allow students and interns to use current technology, to participate in conducting research, and to engage in experiential learning, including co-operative education for undergraduates.

Goal 1

To provide quality didactic instruction and learning experiences to prepare graduates to be accepted into dietetic internships and graduate schools, or work in the field of dietetics.

Objective #1: Eighty percent of graduating BS students and 90% of graduating MS students will apply to an accredited dietetic internship.

Objective #2: Eighty percent of students who apply to dietetic internships or Individualized Supervised Practice Pathways (ISPPs) are accepted.

Objective #3: Seventy-five percent of students who apply to graduate school are accepted.

Objective #4: Eighty percent of graduates of the Drexel University ISPP who seek employment will be employed within six months of program completion.

Objective #5: Graduates of the didactic program in dietetics (DPD) will rate 10 aspects of their didactic and learning experiences and average of "4" or better, on a scale of 1=poor to 5=excellent.

Objective #6: At least 90% of students will complete the program within 150% of the expected time frame for the program (BS-DPD full-time = 4 years; BS-DPD part-time = 5 to 7 years; Masters of Science [MS]-DPD full-time = 2 years; MS-DPD part-time = 4 years; ISPP full-time = 3 quarters or 1 year; ISPP part-time = 6 quarters or 2 years).

Goal 2

To prepare graduates to become competent entry-level dietitians.

Objective #1: The program's first time pass rate on the entry exam for all tracks (BS-DPD, MS-DPD, and ISPP) will be 80% or higher.

Objective #2: Internship directors of graduates of the DPD will rate 10 aspects of the students' preparation for internship an average "4" or better, on a scale of 1=poor to 5=excellent.

Objective #3: Employers of alumni of the ISPP will rate 10 aspects of the employees' preparation for entry-level practice an average of "4" or better, on a scale of 1=poor to 5=excellent.

Goal 3

To increase diversity in the profession by recruiting and retaining students from under-represented groups and facilitating their success in the program.

Objective #1: At least 10% of students in all tracks (BS-DPD, MS-DPD and ISPP cumulatively) will be from under-represented groups.

Visit the College's MS in Human Nutrition web page (<https://www.drexel.edu/cnhp/academics/graduate/MS-Human-Nutrition/>) for more information.

Program Prerequisites

The Human Nutrition program builds on a fundamental background in human behavior, written communication, and the sciences of biology, chemistry, physiology and nutrition.

Applicants may apply to the program at any point in time while completing prerequisites. However, if they are accepted, all prerequisite courses must be completed with a grade of B or better before students may enroll in the program.

- 1 year of English composition and/or literature
- 1 semester of general biology with lab to include cells and genetics
- 2 semesters of general chemistry with lab, OR, 1 semester of general chemistry with lab AND 1 semester of organic chemistry with lab
- 1 semester biochemistry

- 1 semester of human physiology, OR, 2 semesters of anatomy & physiology with lab
- 1 semester of general psychology
- 1 semester of statistics
- 1 semester of nutrition

In addition, students completing the DPD track will be required to complete the following two courses either before entry to the program or while completing the degree program to receive a DPD Verification Statement.

- 1 semester of basic and quantity food preparation (DPD track only), OR 1 semester of basic food preparation and 1 semester quantity food (DPD track only)

Degree Requirements - Nutrition Sciences Track

Students are required to complete 18.0 credits of CORE courses and then select 27.0 credits of electives chosen from courses currently offered in Biology, Nutrition, Food Science, Environmental Science or Public Health after consulting with their advisor.

Required Courses		18.0
NFS 525	Nutritional Assessment Through the Life Cycle	
NFS 601	Research Methods	
NFS 602	Methods of Nutrition Research	
NFS T680	Special Topics in NFS	
NFS 997	Research	
Electives (27 credits chosen from the following; must be approved by thesis advisor or committee)		27.0
BIO 500	Biochemistry I	
BIO 501	Biochemistry Laboratory I	
BIO 566	Endocrinology	
BIO 610	Biochemistry of Metabolism	
BIO 611	Biochemistry Laboratory II	
BIO 613	Genomics	
BIO 614	Behavioral Genetics	
BIO 615	Proteins	
BIO 616	Biochemistry of Major Diseases	
BIO 626	Immunology	
BIO 662	Biology of Neuron Function	
BIO 664	Neurobiology of Disease	
FDSC 506	Food Composition & Behavior	
FDSC 550	Food Microbiology	
FDSC 551	Food Microbiology Laboratory	
FDSC 554	Microbiology & Chemistry of Food Safety I	
FDSC 558	Nutritional Impact of Food Processing Methods	
FDSC 560	Food Chemistry	
FDSC 561	Food Analysis	
FDSC 568	Functional Foods	
FDSC 654	Microbiology & Chemistry of Food Safety II	
FDSC 662	Sensory Evaluation of Food	
NFS 530	Macronutrient Metabolism	
NFS 531	Micronutrient Metabolism	
NFS 546	World Nutrition	
NFS 625	Nutrition and Exercise Physiology	
NFS 650	Advanced Nutritional Chemistry I	
NFS 651	Advanced Nutritional Chemistry II	
NFS 690	Community Nutrition	
NFS 810	Topics in Metabolic Nutrition	
NFS 811	Topics in Community Nutrition	

PSY 828	Weight and Eating Disorders	
RSCH 759	Foundations of Biostatistics	
RSCH 770	Foundations in Research Methods	
RSCH 811	Intermediate Biostatistics	
RSCH 812	Interpretation of Data	
RSCH 813	Measurement Theory in Healthcare	
Total Credits		45.0

Degree Requirements - Didactic Program in Dietetics (DPD) Track

The Didactic Program in Dietetics (DPD) (<https://www.drexel.edu/cnhp/academics/graduate/MS-Human-Nutrition/>) provides the coursework that is required to become a Registered Dietitian/Nutritionist (RD/RDN). *Dietetics* is the practical application of nutrition in the prevention and treatment of disease. Dietetics is an exciting and challenging profession because there are many diseases that are related to nutrition, such as heart disease, high blood pressure, stroke, cancer, diabetes and obesity.

The Drexel University Didactic Program in Dietetics (DPD) provides classroom training for students who want to become Registered Dietitians/Nutritionists (RD/RDN). Our Didactic Program in Dietetics is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics:

Academy of Nutrition and Dietetics
120 South Riverside Plaza
Suite 2000
Chicago, IL 60606
800-877-1600 x5400
www.eatright.org (<http://www.eatright.org>)

The Academy of Nutrition and Dietetics (<https://www.cdrnet.org/>) is the nation's largest organization of food and nutrition professionals, most of whom are Registered Dietitians (RD) or Registered Dietitians/Nutritionists (RDN). Note that the "RD" and "RDN" credential are the same credential. The Academy of Nutrition and Dietetics included the "RDN" to reflect that "all registered dietitians are nutritionists, but not all nutritionists are registered dietitians." In addition, the Academy of Nutrition and Dietetics states that adding the word to "nutritionist" to the RD credential allows for a broader notion of wellness.

To become an RD/RDN, students must complete a:

- Minimum of a bachelor's degree with course work approved by ACEND. Coursework typically includes food and nutrition sciences, chemistry, biochemistry, physiology, microbiology, community nutrition, nutrition counseling, basic and quantity food preparation, foodservice systems management and medical nutrition therapy.
 - NOTE: As of January 1, 2024, the minimum of a Master's degree will be required to be able to take the RDN exam.
- An accredited, supervised practice program, also called a dietetic internship (DI), at health-care facilities, community agencies and in foodservice operations. The internship must provide a minimum of 1200 hours of hands-on training.
- Pass a national examination administered by the Commission on Dietetic Registration.

Students who already have a bachelor's degree and want to become an RD/RDN, may complete coursework approved by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) at the master's degree level. Drexel University was one of the first universities in the country to offer the DPD program on the graduate level.

The MS in Human Nutrition with the DPD option is a full- or part-time program with courses offered in the evening. The program is 45.0 credits with a written comprehensive exam and may be completed in 18 months to two years with full-time study. Students who enroll part-time typically complete the program in three to four years. After completing the MS in Human Nutrition, students participating in this program will also receive a Verification Statement that shows successful completion of the DPD and allows them to apply for an accredited supervised practice experience (dietetic internship).

Required Courses

FDSC 506	Food Composition & Behavior	3.0
NFS 510	Profession of Dietetics	3.0
NFS 525	Nutritional Assessment Through the Life Cycle	3.0
NFS 526	Lifecycle Nutrition	3.0
NFS 530	Macronutrient Metabolism	3.0
NFS 531	Micronutrient Metabolism	3.0
NFS 543	Medical Nutrition Therapy I	3.0
NFS 544	Medical Nutrition Therapy II	3.0
NFS 545	Nutrition in Critical Care	3.0
NFS 546	World Nutrition	3.0
NFS 601	Research Methods	3.0
NFS 630	Nutrition Counseling	3.0
NFS 550	Foodservice Systems Management	3.0
NFS 690	Community Nutrition	3.0
Elective		3.0
Total Credits		45.0

Human Nutrition Faculty

Joan Rosen Bloch, PhD, CRNP (*University of Pennsylvania*). Associate Professor. Maternal and infant health outcomes with a particular focus on racial and ethnic perinatal health disparities.

Charlene Compher, PhD, RD, CNSC, LDN, FADA, FASPEN (*Drexel University*) *Courtesy Appointment*. Visiting Research Professor.

Nyree Dardarian, MS, RD, LDN, CSSD, FAND (*Drexel University*) *Director, Center for Nutrition & Performance*. Clinical Assistant Professor. Energy expenditure; sports nutrition

Francesco De Luca, MD (*Catholic University of Sacred Heart, Rome, Italy*) *Courtesy Appointment*. Visiting Research Professor.

Angelo Del Parigi, MD (*University of Bari, Italy*) *Courtesy Appointment*. Visiting Research Professor.

Jonathan Deutsch, PhD (*New York University*). Professor. Social and cultural aspects of food, culinary education, culinary improvisation, recipe and product development; food sustainability.

RoseAnn DiMaria-Ghalili, PhD, MSN, BSN, CNSC (*New York University, School of Education, Division of Nursing*). Associate Professor. Nutrition and surgical recovery to improve the care of older adults undergoing surgery; nutrition assessment, inflammation, and health outcomes.

Garrison L. Draper, MSc, CSCS, USAW, ISPAS (*Edith Cowan University, Perth, WA*) *Courtesy Appointment*. Visiting instructor

Susan Ettinger, PhD, RD, DABN, CDN (*Columbia University*) *Courtesy Appointment*. Visiting Research Professor.

Susan Fuchs, MS, IBCLC (*Drexel University*) *Director, Human Lactation Certificate Program*. Clinical Instructor. Human lactation

Beth L. Leonberg, MS, MA, RDN, CSP, FAND, LDN (*Colorado State University, Rowan University*) *Director, Didactic Program in Dietetics*. Associate Clinical Professor. Pediatric nutrition.

Michael Lowe, PhD (*Boston College*). Professor. Prevention and treatment of eating disorders and obesity; effects of appetitive responsiveness and dietary restraint on eating regulation; psychobiology of obesity-proneness; empirical foundations of unconscious processes.

Brandy-Joe Milliron, PhD (*Arizona State University*). Associate Professor. The development and evaluation of modifications in the natural environment to promote healthier living; farm to table school initiatives

Juan Muniz, PhD (*Oregon State University*). Visiting Research Professor. Food microbiology; community-based research to assess pesticide levels in homes; prevention of health effects of pesticides for indigenous farmworkers.

Jennifer Nasser, PhD, RD, FTOS (*Rutgers University*). Associate Professor. Dopamine-mediated mechanisms of food intake regulation in humans and its impact on metabolic homeostasis, especially as it applies to obesity, eating disorders and aging.

Kavitha Penugonda, PhD (*Kansas State University*) *Manager, Nutritional Biochemistry Laboratory*. Assistant Clinical Professor. Nutrient bioavailability in foods; nutritional supplements on health

Jennifer Quinlan, PhD (*North Carolina State University*). Professor. Food microbiology; microbiological quality and safety of produce, dairy and

meat products in markets in high vs. low socioeconomic areas, Bacillus and Clostridium spores in food processing.

Sobhana Ranjan, PhD, RD (*University of Delhi, India*) *Courtesy Appointment*. Visiting Research Professor.

Barry Ritz, PhD (*Drexel University*) *Courtesy Appointment*. Visiting Research Professor.

Vicki Schwartz, DCN, RD, LDN, CNSC, FAND (*Rutgers University*). Assistant Clinical Professor. Clinical nutrition; using standardized patients in nutrition counseling

Sinclair A. Smith, MS, DSc (*Boston University*) *Chair, Health Sciences*. Professor. Effects of aging, dehydration, and oral creatine supplementation on skeletal muscle metabolism using phosphorus magnetic resonance spectroscopy. Anatomy, physiology, and exercise science.

Deeptha Sukumar, PhD (*Rutgers University*). Associate Professor. Vitamin D and magnesium and bone mineral density; obesity and bone mineral density.

Stella Lucia Volpe, PhD, RD, ACSM-CEP, FACSM (*Virginia Polytechnic Institute and State University*) *Chair, Nutrition Sciences*. Professor. Prevention of obesity and diabetes across the lifespan; mineral metabolism and exercise; energy balance; sports nutrition.

Emeritus Faculty

Donna H. Mueller, PhD (*Temple University*). Associate Professor Emeritus. Clinical nutrition; pediatric nutrition; nutrition in pulmonary diseases, especially cystic fibrosis; nutrition in developmental delay; dental nutrition; dietetic education and professional development.

Music Therapy and Counseling

Major: Music Therapy and Counseling

Degree Awarded: Master of Arts (MA)

Calendar Type: Quarter

Total Credit Hours: 90.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.2305

Standard Occupational Classification (SOC) code: 29-1129

About the Program

The Master of Arts program in Music Therapy and Counseling educates students for creative, responsive and effective therapy practice, in which music is the essential mode of transformation. Through a balance of classroom education and clinically supervised practicum and internship experiences, students develop a strong foundation for skilled clinical practice. The 90 quarter-credit curriculum includes specific music therapy coursework in areas such as clinical musicianship; clinical improvisation; theories and methods for children, adolescents, adults and older adults, and technological applications, as well as general mental health counseling coursework in human development; social and cultural foundations; clinical appraisal and assessment, and group dynamics. All courses are taught at the graduate level. Graduates are eligible for Board Certification through the Certification Board for Music Therapists, as well as professional counseling licensure in Pennsylvania (upon completion of post-graduation requirements).

Music therapists use music within a therapeutic relationship to address physical, emotional, cognitive and social needs of individuals. Research shows that music therapy is an effective treatment for children, adolescents, adults, and older adults with mental health needs, developmental and learning disabilities, Alzheimer’s disease and other aging-related conditions, substance abuse problems, acute and chronic pain, and brain injuries. Graduates of the MA in Music Therapy & Counseling program go on to work in a variety of clinical environments, including but not limited to: medical and behavioral health in-patient and out-patient settings; community health and wellness centers; schools and afterschool programs; trauma-informed settings; correctional facilities; elder care facilities, and private practices. Students also pioneer new frontiers in therapy application through clinical work and research.

For additional information about program, visit the College of Nursing and Health Professions’ Music Therapy (<https://www.drexel.edu/cnhp/academics/graduate/MA-Music-Therapy-Counseling/>) web site.

Degree Requirements

Core Courses

CATX 501	Foundations of the Creative Arts Therapies	3.0
CTCN 501	Human Psychological Development	4.5
CTCN 503	DSM and Psychopathology	4.5
CTCN 504	Professional Orientation and Ethics	4.5
CTCN 505	Theories of Counseling and Psychotherapy	4.5
CTCN 508	Social and Cultural Foundations in Counseling and Music Therapy	4.5
CTCN 601	Introduction to Behavioral Research	4.5
CTCN 603	Clinical Appraisal and Assessment	4.5
CTCN 604	Career Counseling	4.5
CTCN 608	Group Dynamics in Counseling and Music Therapy	4.5

Music Therapy Track Courses

CATX 570	Clinical Musicianship I	2.5
CATX 571	Clinical Musicianship II	2.5
CATX 572	Clinical Musicianship III	2.5
CATX 573	Clinical Musical Improvisation	4.0
CATX 575	Music Therapy Theories & Methods: Children and Adolescents	4.0
CATX 577	Music Therapy Theories & Methods: Adults and Older Adults	4.0
CATX 579	Technological Applications in Music Therapy	2.0
CATX 673	Advanced Topics in Music Therapy and Counseling I: Music, Imagery and the Therapeutic Relationship	3.0
CATX 674	Advanced Topics in Music Therapy and Counseling II: Integrative and Community Processes	3.0
CATX 678	Advanced Clinical Improvisation & Musical Analysis	4.0

Clinical Education Courses

CTCN 512	Clinical Practicum & Practicum Supervision I	2.0
CTCN 522	Clinical Practicum & Practicum Supervision II	2.0
CTCN 532	Clinical Practicum & Practicum Supervision III	2.0
CTCN 612	Clinical Internship & Internship Supervision I	2.0
CTCN 622	Clinical Internship & Internship Supervision II	2.0
CTCN 632	Clinical Internship & Internship Supervision III	2.0

Culminating Project

Complete at least 3 credits

CATX 625	Culminating Project in Music Therapy I	
CATX 626	Culminating Project in Music Therapy II	

Additional Electives

As needed, in consultation with the program director students can select the following electives:

CATX 627	For Culminating Project Only	
CATX I699	Independent Study in Creative Arts Therapy	

Total Credits

90.0

Sample Plan of Study

Term 1		Credits
CTCN 501	Human Psychological Development	4.5

Creative Arts Therapies Department Faculty

Yasmine Awais, MAAT, ATR-BC, ATCS, LCAT, LPC (*Art Institute of Chicago*). Associate Clinical Professor. Art therapy with diverse populations, art therapy in non-profit settings, clinical supervision.

Joke Bradt, PhD, MT-BC (*Temple University*) Director, PhD Program in *Creative Arts Therapies*. Professor. Research in music therapy, chronic pain, systematic reviews.

Natalie Rae Carlton, PhD, ATR-BC, LPCC (*Lesley University*) Director, *Art Therapy and Counseling MA Program*. Associate Clinical Professor.

New media and art therapy, social justice in art activities, transgender and LGBTQ identity.

Christina Devereaux, PhD, LCAT, LMHC, BC-DMT, NCC (*UCLA*) Program Director for *Dance/Movement Therapy and Counseling*. Associate Clinical Professor. Dance movement therapy, children, attachment, autism spectrum disorder, trauma, group work, clinical supervision

Abby Dougherty, PhD, NCC, LPC (*Walden University*) Core Counseling Curriculum Coordinator. Clinical Assistant Professor. Virtual reality in mental health, mindfulness and contemplative practices in counselor education, creativity in college counseling, learning disabilities, relational-cultural theory in counseling and adult education.

Sharon Goodill, PhD, BC-DMT, NCC, LPC (*Union Institute and University*) Chair, *Department of Creative Arts Therapies*. Clinical Professor. Medical dance/movement, mind/body studies, movement assessment for DMT, CAT research and leadership.

Scott Horowitz, MA, MT-BC, LPC (*Drexel University*) Director of Field Education. Clinical Instructor. Interdisciplinary practice and education, developmental models of clinical and practicum supervision, music therapy and neurodevelopmental populations.

Florence Ierardi, MM, MT-BC, LPC (*Temple University*) Director, *Music Therapy and Counseling MA Program*. Associate Clinical Professor. Clinical improvisation, trauma-informed music therapy, multicultural music therapy perspectives.

Girija Kaimal, EdD, MA (*Harvard University*). Associate Professor. Art therapy, educational research, program evaluation, art therapy.

Dawn Morningstar, MCAT, VC-DMT, LP (*Hahnemann University*) Coordinator of *CAT Clinical Services*. Assistant Clinical Professor. Specialty in working with children and adolescents, Dance/movement therapist at Drexel's Parkway Health and Wellness faculty practice outpatient clinic.

Michele Rattigan, MA, ATR-BC, NCC, LPC (*MCP Hahnemann University*) Coordinator of *CAT Clinical Services*. Associate Clinical Professor. Unresolved trauma; post-partum depression and anxiety; disordered eating and body image concerns; self-harming behaviors; dissociative disorders

Ellen Schelly-Hill, MMT, BC-DMT, NCC, LPC (*Antioch NE Graduate School*) Director of *Dance/Movement Therapy and Counseling MA Program*. Associate Clinical Professor. Adults diagnosed with mood disorders, anxiety, chronic pain and with histories of trauma; clinical supervision; ethics.

Minjung Shim, PhD, BC-DMT (*Drexel University*). Assistant Research Professor. Medical dance/movement therapy, chronic pain management, mindfulness-based interventions, clinical trials, theory/model-building, qualitative inquiries, scoping reviews.

Emeritus Faculty

Nancy Gerber, PhD, ATR-BC (*Union Institute and University*). Associate Clinical Professor Emerita. Art therapy assessment and treatment of adolescents and adults; modern psychoanalysis and art therapy; arts therapy education and doctoral education; arts based research and mixed methods research.

MSN in Nurse Anesthesia

Major: Nurse Anesthesia

Degree Awarded: Master of Science in Nursing (MSN)

Calendar Type: Quarter

Total Credit Hours: 89.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.3804

Standard Occupational Classification (SOC) code: 29.1151

About the Program

The Master of Science in Nursing in nurse anesthesia is a 28-month, 89.0 quarter credit, full-time program. The program offers 19.0 theoretical nursing and research credits, a 15.0 quarter credit basic science component, a 30.0 quarter credits didactic anesthesia component and a 25.0 credit clinical component. Upon successful completion of the program's outcomes the student is awarded an MSN in nurse anesthesia and is eligible to take the national certification examination offered by the National Board of Certification and Recertification of Nurse Anesthetists (NBCRNA).

The Nurse Anesthesia Program is accredited by the:
Council on Accreditation of Nurse Anesthesia Educational Programs
222 South Prospect Avenue, Suite 304
Park Ridge, IL 60068
847.692.7050

PMC in Nurse Anesthesia

The College of Nursing and Health Professions also offers a post-master's certificate in nurse anesthesia (p. 158) option. Upon successful completion of the program's outcomes the student is awarded a certificate in nurse anesthesia and is eligible to take the national certification examination offered by the NBCRNA.

Additional Information

For more information, contact the Academic Advisor of the Nurse Anesthesia Program:
MSN Programs Academic Advisor
1601 Cherry Street
267.359.5786

Additional information is also available on Drexel's College of Nursing and Health Professions Nurse Anesthesia Program (<https://www.drexel.edu/cnhp/academics/graduate/MSN-Nursing-Nurse-Anesthesia/>) web page.

Admission Requirements

The nurse anesthesia program begins annually in January. Applications are reviewed continually. Applications should be made 12-18 months in advance of the anticipated January start date. Interviews are conducted throughout the year.

Prospective applicants must demonstrate their ability to pursue graduate work, as exemplified by high scholastic achievement, high aptitude-test scores, and letters of recommendation. Applicants for the nurse anesthesia programs may submit scores from the Miller Analogies Test (MAT) in lieu of the GRE.

For detailed admission requirements, visit the College's MSN in Nurse Anesthesia Admission Requirements (<http://www.drexel.edu/gradnursing/msn/nurseAnesthesia/admissions/>) web page.

An application form and additional requirements and deadline information is available on the the Nurse Anesthesia (<http://www.drexel.edu/grad/programs/cnhp/nurse-anesthesia/>) page of Drexel Admissions website.

Degree Requirements

MSN Core Courses

NURS 500 [WI]	Confronting Issues in Contemporary Health Care Environments	3.0
NURS 502	Advanced Ethical Decision Making in Health Care	3.0
NURS 544	Quality and Safety in Healthcare	3.0
NURS 549	Advanced Pharmacology	3.0
NURS 550	Advanced Health Assessment & Diagnostic Reasoning	4.0
RSCH 503	Research Methods and Biostatistics	3.0
RSCH 504	Evaluation and Translation of Health Research	3.0

Nurse Anesthesia Core

NURS 503	Basic Principles of Nurse Anesthesia	3.0
NURS 504	Overview of Nurse Anesthesia	3.0
NURS 505	Chemistry and Physics	2.0
NURS 507	Nurse Anesthesia Pharmacology I	3.0
NURS 510	Advanced Principles of Nurse Anesthesia I	3.0
NURS 511	Nurse Anesthesia Pharmacology II	3.0
NURS 515	Advanced Principles of Nurse Anesthesia II	3.0
NURS 518	Advanced Principles of Nurse Anesthesia III	3.0
NURS 530	Anesthesia Seminar	1.0
NURS 659	Advanced Principles of Nurse Anesthesia IV	3.0
NURS 688	Clinical Correlative Seminars	3.0
NURS 508	Nurse Anesthesia Clinical Practicum I	1.0
NURS 512	Nurse Anesthesia Clinical Practicum II	1.0
NURS 516	Nurse Anesthesia Clinical Practicum III	2.0
NURS 517	Nurse Anesthesia Clinical Practicum IV	3.0
NURS 683	Nurse Anesthesia Clinical Practicum V	3.0
NURS 684	Nurse Anesthesia Clinical Practicum VI	3.0
NURS 687	Clinical Residency I	6.0
NURS 689	Clinical Residency II	6.0

Physiological Science Courses

NURS 520	Advanced Physiology	3.0
NURS 521	Advanced Pathophysiology I	3.0
NURS 522	Advanced Pathophysiology II	3.0
NURS 523	Advanced Pathophysiology III	3.0

Total Credits		89.0
---------------	--	------

Nurse Anesthesia Faculty

Suzanne Ariza, MSN, CRNA (*Drexel University*). Assistant Clinical Professor.

Lew Bennett, DNP, CRNA (*Chatham University*) *Chair, Nurse Anesthesia Department*. Assistant Clinical Professor. Clinical and didactic education of nurse anesthesia students.

Ferne Cohen, EdD, CRNA (*Drexel University*) *Associate Chair & Director of Clinical Education, Nurse Anesthesia Department*. Assistant Clinical Professor. Clinical and didactic education of nurse anesthesia students.

PhD in Nursing

Major: Nursing

Degree Awarded: Doctor of Philosophy

Calendar Type: Quarter

Total Credit Hours: 49.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.3801

Standard Occupational Classification (SOC) code: 29-1141

About the Program

The College of Nursing and Health Professions (CNHP) offers a Doctor of Philosophy in Nursing Science, a research-based program embedded in social justice, which aims to prepare nurse researchers to design, conduct and lead research studies as emerging nurse scientists. The objective of the PhD in Nursing is to prepare professional nurses as scholars and researchers who will make a substantive contribution to the body of knowledge for the discipline of nursing and thereby improve health services for those who receive nursing care. Graduates are expected to plan and launch an independent program of research, seek needed support for initial phases of the research program, and begin to involve others (i.e., students, clinicians, and other researchers) in their activities.

The program of study builds on advanced preparation in nursing at the master's level (MSN to PhD). In addition to structured coursework, the program builds upon a research mentorship model which recognizes that research skills are learned most effectively by working with a faculty mentor, who provides opportunities to use the tools to conduct research and design, and execute an original research within a focused program of study.

Innovation, leadership, civic engagement, and interdisciplinary collaboration are strong educational values which are reflected in the Drexel University emerging strategic plan. The PhD in nursing program represents leadership in the fields, with interdisciplinary collaboration and critical consciousness as core administrative and curricular values basic to its philosophy and epistemology. Innovation is also central to this doctoral program as evidenced in its curriculum and research philosophy.

The College of Nursing and Health Professions (CNHP), Graduate Nursing Division in which the Doctoral Nursing Program is housed, is regarded as a forward thinking, progressive, and interdisciplinary healthcare school within the university as well as in the larger context of advanced healthcare education.

Admission Requirements

Applicants must possess a master's degree in nursing for admission consideration. Criteria for admission include:

- GPA of 3.5
- GRE scores
- OREs (and TOEFLs, if international)
- Letters of recommendation (3)
- Articulation of research interests, career goals and insight into important issues in the profession in essays
- Professional accomplishments
- Fit with faculty research interests and expertise

Degree Requirements

The PhD curriculum requires 49.0 quarter credits of course work plus comprehensive examination and dissertation completion. Of the 49.0 credits, 15.0 credits are required interdisciplinary courses, and 21.0 credits in nursing science. In addition, there are three elective courses that form the student's field of concentration related to their dissertation research. These elective courses can be taken anywhere within the university but must be approved by the student's advisor and the Doctoral Curriculum Committee in advance of taking these courses. The student

files a plan of Study outlining these courses in the winter of the first year which is approved by the Curriculum Committee.

Required Courses		
NURS 800	Theoretical Foundations of Nursing Inquiry 1	3.0
NURS 801	Theoretical Foundations of Nursing Inquiry II	3.0
NURS 803	Doctoral Seminar: Scientific Integrity	1.0
NURS 804	Doctoral Seminar: Creating Intellectual Community	1.0
NURS 805	Doctoral Seminar: Grantsmanship	1.0
NURS 806	Scientific Appraisal and Knowledge Development	3.0
NURS 819	Qualitative Research Methods in Nursing Inquiry	3.0
NURS 820	The Science of Therapeutics	3.0
RSCH 759	Foundations of Biostatistics	3.0
RSCH 770	Foundations in Research Methods	3.0
RSCH 811	Intermediate Biostatistics	3.0
RSCH 812	Interpretation of Data	3.0
RSCH 813	Measurement Theory in Healthcare	3.0
Required Research Apprenticeship (total of 3 credits)		3.0
NURS 850	Research Apprenticeship (Must be repeated 2 times)	
Dissertation Research (minimum of 4 credits)		4.0
NURS 989	Dissertation (May be repeated up to 7 times)	
Electives		9.0
NURS 860	Integration of Genetics/Genomics in a Research Agenda	
NURS 861	Interdisciplinary Approaches in Aging Research	
NURS 862	Reproductive Epidemiology	
NURS 863	Mixed-Methods Research	
NURS I899	Independent Study in Nursing

Doctor of Nursing Practice

Major: Nursing Practice

Degree Awarded: Doctor of Nursing Practice (DNP)

Calendar Type: Quarter

Total Credit Hours: 46.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.3818

Standard Occupational Classification (SOC) code: 11-9111

About the Program

Drexel's accredited online Doctor of Nursing Practice (DNP) program is designed for nurses seeking a terminal degree in nursing practice and offers an alternative to research-focused doctoral programs. The mission of the DNP program is to prepare advanced nursing practice leaders for application of evidence-based knowledge in practice, quality improvement, and systems leadership to improve health outcomes. DNP-prepared nurses are well-equipped to fully implement the science developed by nurse researchers prepared in PhD, DNS, and other research-focused nursing doctorates.

Upon graduation, students will be able to:

- Evaluate patient care delivery approaches to meet the current and anticipated needs of patient populations based on outcomes and scientific findings
- Translate research into clinical practice and policy to improve care and outcomes
- Use advanced communication skills to lead quality improvement and patient safety
- Use principles of business, finance, economics, and health policy to develop and implement plans to improve the quality of healthcare delivery
- Demonstrate sensitivity to diversity in patients and providers
- Evaluate effective strategies for the management of ethical dilemmas that can occur in the course of healthcare delivery

Clinical Requirements

A total of 500 clinical hours are required which are built into the following courses and project:

- NURS 830 - 125 hours
- NURS 835 - 125 hours
- NURS 838 - 125 hours

- NURS 842 - 75 hours
- NURS 843 - 125 hours

In-Person Experiential Elements

- **Orientation** (Required) – *September of Student's First Term*
 - Designed as a two-day introduction to the program and an opportunity to engage in discussion about the DNP project topic, meet peers, advisors, staff, and the faculty.
- **Global Immersion** (Optional) – *Spring Quarter of Student's Second Year*
 - The DNP program prepares future advanced nursing practice leaders to respond to current and future global healthcare needs in diverse settings. Global opportunities are transformational, strengthening the leadership role for which DNP scholars are prepared. At Drexel University, the option of global engagement experiences are available to students.

An exciting opportunity in Drexel's DNP program encompasses a one-week global experience at the birthplace of evidence-based practice. Conducted at a host university in another country, the scholar may elect to participate in a unique educational and cultural experience designed to gain global perspectives on health care. Upon completion, students are awarded practice hours towards the required number of clinical practicum hours in the program. For a global immersion trip, the student must satisfy requirements for U.S. citizenship (i.e. valid U.S. passport, NEXUS card) to enter a host country.

Admission Requirements

Admissions Criteria

- Master's of Science in Nursing (MSN)
- Master's degree in health-related field
- Master's of Business Administration (MBA)
- If Master's degree is not in Nursing, a Bachelor's of Science in Nursing (BSN) is required
- Graduate-level Research Methods course (grade B or higher)

Masters and Bachelors degrees from a regionally accredited institution in the United States or an equivalent international institution are accepted.

Submission of the following documents include:

- A completed application
- Copies of current RN license, advanced practice nursing licensure and advanced certification documents
- Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended
- Two letters of recommendation from individuals who hold a graduate degree (doctoral prepared highly preferred). Sources may be from academic, employer, or professional colleagues and attest to academic ability and professional competency.
- Personal statement/essay integrating responses to the following questions in 2-3 pages, double-spaced:
 - What is your area of interest (e.g. clinical practice, education, administration/nurse executive) and how will you apply the DNP to your practice area?
 - Identify a clinical problem or nursing process of interest you would like to develop for your practice-focused DNP project in a health care practice or system. Discuss why it is a problem and

how it is related to the DNP project in which you are interested. Explain how you aim to use the evidence-based practice project to improve processes or health outcomes.

- Curriculum Vitae (CV) or Resume
- Licensure/Certification
 - Current U.S. licensure as a registered nurse (RN)
 - Advanced Practice Registered Nurse (APRN) Candidates
 - Submit U.S. licensure and certification documentation for one of the following certification(s):
 - Certified Nurse Practitioner
 - Certified Nurse Midwife (CNM)
 - Certified Registered Nurse Anesthetist (CRNA)
 - Certified Clinical Nurse Specialist (CNS)
 - Nurse Managers/Executives Candidates
 - Submit certification documentation for one of the following certification(s) or verification that you are scheduled to take one of these exams:
 - American Credentialing Center (ANCC) Nurse Executive-Advanced certification (NEA)
 - American Nurse Credentialing Center (ANCC) Nurse Executive (NE)
 - American Organization of Nurse Executives (AONE) Certified in Executive Nursing Practice (CENP)
 - American Organization of Nurse Executives (AONE) Certified Nurse Manager and Leader (CNML)
 - If utilizing your master's preparation in an area of advanced nursing practice and do not hold or are eligible to attain one of the required certifications listed, contact the DNP Program (<https://drexel.edu/cnhp/academics/doctoral/DNP-Doctor-Nursing-Practice/>).

Degree Requirements

Curriculum

The Doctor of Nursing Practice (DNP) program of study integrates core courses along with clinical/role practicum and DNP Project courses. The DNP degree requires completion of a scholarly doctoral project that demonstrates clinical scholarship. The focused study combination of courses provides the student learner with an opportunity for acquisition of advanced knowledge, new skills, clinical scholarship, practice immersion experiences, and leadership for DNP role preparation to influence health care outcomes. The curriculum is based on nationally recognized standards by the American Association of Colleges of Nursing (AACN) and consistent with the DNP program accrediting by the Commission on Collegiate Nursing Education (CCNE).

The DNP Project process is designed to progress concurrent with the DNP Plan of Study coursework. A DNP Project Team for the scholarly doctoral project is required. During the DNP program, the student is paired with a DNP Project Chair (doctorate prepared Drexel faculty member) who guides and oversees the project team process related to the student's required DNP Final Project. A doctorate-prepared Practicum Mentor is required (for courses with Practicum/Practice Hours) who may be internal or external to the student's practice setting. Additional formal or informal experts, mentors, partners, and/or facilitators may provide intermittent or limited support throughout the project stages as needed (optional).

The intended project completion date is by the end of spring quarter, Year 2. Some students will require an additional quarter (summer quarter,

Year 2), depending on project complexities, practice site conflicts, and institutional review board processes. The DNP final project must be completed within the timelines for graduation established by College and University Policies. The project culminates with a final DNP scholarly paper.

Required Courses

NURS 703	Health Policy and Economics	3.0
NURS 706	Applied Epidemiology	3.0
NURS 714	Introduction to Qualitative Methods in Nursing Inquiry	3.0
NURS 716	Scientific Foundation of Nursing Knowledge Development	3.0
NURS 718	Quantitative Methods for Practice-based Nursing Inquiry	3.0
NURS 720	Health Information Technology and Information Systems	3.0
NURS 722	Organizations and Systems Leadership: Innovative Strategies	3.0
NURS 830	Doctoral Nursing Practice Clinical Practicum	3.0
NURS 835	Doctoral Nursing Practice Role Practicum	3.0
NURS 836	Clinical and Applied Nursing Ethics	3.0
NURS 837	Translating Evidence into Clinical Practice	3.0
NURS 838	Global Leadership Perspectives	3.0
NURS 842	DNP Project Seminar I	3.0
NURS 843	DNP Project Seminar II	3.0
RSCH 519	Introduction to Biostatistics	3.0
Total Credits		45.0

Program Delivery

The DNP program is an online distance-learning program with an information technology requirement for accessing courses. The DNP program is delivered over 10-week quarters per year with four academic quarters offered per year (1-semester credit is equivalent to 1.5-quarter credits). Students in the DNP Program are required to attend a mandatory, two-day DNP orientation. The orientation is an on-campus program held at Drexel University. DNP Orientation transpires at the start of the program corresponding to the beginning of the first Fall academic term.

Sample Plan of Study

First Year		Credits
Fall		
NURS 716	Scientific Foundation of Nursing Knowledge Development	3.0
RSCH 519	Introduction to Biostatistics	3.0
Term Credits		6.0
Winter		
NURS 706	Applied Epidemiology	3.0
NURS 837	Translating Evidence into Clinical Practice	3.0
Term Credits		6.0
Spring		
NURS 714	Introduction to Qualitative Methods in Nursing Inquiry	3.0
NURS 842	DNP Project Seminar I	3.0
Term Credits		6.0
Summer		
NURS 718	Quantitative Methods for Practice-based Nursing Inquiry	3.0
NURS 720	Health Information Technology and Information Systems	3.0
Term Credits		6.0
Second Year		
Fall		
NURS 830	Doctoral Nursing Practice Clinical Practicum	3.0
NURS 836	Clinical and Applied Nursing Ethics	3.0
Term Credits		6.0
Winter		
NURS 703	Health Policy and Economics	3.0

NURS 835	Doctoral Nursing Practice Role Practicum	3.0
Term Credits		6.0
Spring		
NURS 838	Global Leadership Perspectives	3.0
NURS 843	DNP Project Seminar II	3.0
Term Credits		6.0
Summer		
NURS 722	Organizations and Systems Leadership: Innovative Strategies	3.0
Term Credits		3.0

Total Credit: 45.0

* NURS 810 is an optional course to be taken under the direction of the academic advisor and the DNP program chair or director.

Doctor of Nursing Practice (DNP) Faculty

Anthony Angelow, MSN, CRNP, BC, CEN (*Thomas Jefferson University*). Assistant Clinical Professor. Developing diagnostic reasoning in nurse practitioners, curriculum design and implementation, and nurse practitioner educational methods.

Katherine Kaby Anselmi, PhD, JD, FNP-BC, WHNP-BC (*University of Pennsylvania*) *Assistant Dean of Accreditation/Regulatory Affairs & Online Innovation*. Associate Clinical Professor. Nursing, law, family nurse practitioner, women's health nurse practitioner.

Brenda Douglass, DNP, CRNP-BC, CDE, CTTS. Associate Clinical Professor. Endocrine, cardiology, pulmonology, sleep disorders, and chronic health conditions

Mary Gallagher-Gordon, PhD, MSN, RN, CNE (*Drexel University*) *Senior Director of Contracts, Compliance and Academic Community Initiatives*. Assistant Clinical Professor. Informatics, patient safety and nursing education, NCLEX review.

William Lorman, PhD, JD, PMHNP-BC, CARN-AP, FIAAN (*American Institute*). Assistant Clinical Professor. Addiction and mental health.

Bobbie Posmontier, PhD, CNM, PMHNP-BC (*University of Pennsylvania*). Associate Professor. Labor and delivery, midwifery, postpartum care, neonatal intensive care, improving access to care for women with postpartum depression, family psychiatric nurse practitioner.

Al Rundio, PhD, DNP, RN, APRN, CARN-AP, NEA-BC, FNAP, FIAAN, FAAN (*Chatham College*). Clinical Professor. Transference of dependencies from bariatric surgical procedures, relapse prevention in chemically addicted clients.

Albert Rundio, Jr., PhD, DNP, RN, APRN, NEA, BC, FAAN (*University of Pennsylvania*) *Associate Dean for Post Licensure and Graduate Nursing Programs*. Clinical Professor. Nursing graduate leadership and management track.

Susan Solecki, MSN, FNP-BC, PPCNP-BC (*Hahnemann University*). Associate Clinical Professor. Nursing women's health, adult health, and occupational health.

Linda Wilson, PhD, RN, CPAN, CAPA, BC, CNE, CHSE (*Rutgers University*) *Assistant Dean for Special Projects, Simulation & CNE Accreditation*. Associate Clinical Professor. Simulation informatics and technology, perianesthesia, pain management, critical care, trauma, emergency preparedness.

Patti Rager Zuzelo, EdD, RN, ACNS-BC, ANP-BC, CRNP, FAAN (*Widener University*). Clinical Professor. Advanced practice nursing,

leadership and management, nursing education, clinical nurse specialist (adult health) and adult nurse practitioner.

MSN: Clinical Nurse Leader Concentration

Major: Nursing: Clinical Nurse Leader Concentration

Degree Awarded: Master of Science in Nursing (MSN)

Calendar Type: Quarter

Total Credit Hours: 48.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.3801

Standard Occupational Classification (SOC) code: 29-1141

About the Program

The MSN Clinical Nurse Leader (CNL) track is designed to prepare nurses for an evolving advanced generalist role which incorporates advanced knowledge, skill, and clinical expertise in an evidence-and-quality-driven context. The CNL oversees care coordination of a distinct group of patients, is a resource for clinical decision making, and serves as lateral integrator of care. This clinical leader puts evidence-based practice into action to ensure that patients benefit from the latest innovations in care delivery. The CNL collects and evaluates patient outcomes, assess cohort risk, and has the decision-making authority to change care plans when necessary. This clinician functions as part of an interdisciplinary team by communicating, planning, and implementing care directly with other health care professionals including physicians, pharmacists, social workers, therapists, clinical nurse specialists, and nurse practitioners. The CNL is a leader in the health care delivery system across all settings in which health care is delivered. The program emphasizes the development of competencies related to the use of technology, evidence-based practice, customization of care, health team and interdisciplinary leadership, and outcome and risk assessment.

This online masters program prepares nurses to function effectively in a quickly changing, increasingly complex clinical care environment. Students have the opportunity to develop advanced competencies and depth of knowledge as clinical nurse leaders. The program emphasizes evidence-based approaches to solve clinical problems, assessment and evaluation of nursing and health care outcomes, clinical decision-making, lateral care integration, clinically-based leadership and the design of nursing care for clinical populations at the clinical unit or similar small system level.

Clinical practicum experiences include development and management of a data driven project which provides opportunities for students to deepen evidenced base practice competencies in the management of clients' health care needs at the point-of-care. Precepted clinical experiences will include activities such as modeling of care, assessment and evaluation of aggregate patient outcomes, case management and service integration, unit and interdisciplinary team leadership, as well as teaching and mentoring of staff.

The program is accredited by the Commission on Collegiate Nursing Education.

Additional Information

For more information about this program, contact:

Ms. Jillian Randall
Senior Academic Advisor

jnr56@drexel.edu
267.359.5692

Additional information is also available on Drexel's College of Nursing and Health Professions MSN in Clinical Nurse Leader (<https://www.drexel.edu/cnhp/academics/graduate/MSN-Clinical-Nurse-Leader/>) (<http://www.drexel.edu/gradnursing/msn/advancedRoleMSN/clinNurseLeader/>) web page and on the Drexel University Online MSN Clinical Nurse Leader (<http://online.drexel.edu/online-degrees/nursing-degrees/msn-clinical/>) web page.

Admission Requirements

- BSN from a program fully accredited by NLN and/or CCNE.
- 3.0 or above on all previous coursework or the last 60 credits completed. Applications from RN's with GPA < 3.0 may be considered on an individual basis.
- Official transcripts from all previous educational institutions are required.
- Two professional references required from colleagues or supervisors who can attest to the applicant's knowledge, skill, and potential aptitude for graduate study.
 - Letters of Recommendations are waived for students with a 3.5 GPA or higher
- Personal statement (no more than two pages and no less than one page double-spaced) that will give the admissions committee a better understanding of the followings:
 - Why you are choosing this particular program of study
 - Your plans upon completion of the certificate
 - How your current work experience will enhance your experience in this program
- Curriculum Vitae or Resume.
- Copy of Current US RN license required.
- Copies of any Advanced Practice Nursing Licensure and Certification Documents.
- While specific experience is not required for applicants to the track, previous related work experience may make an applicant more competitive.

International applicants must possess a BSN (or its equivalent) and current US RN license.

TOEFL Requirement

International Applicants, as well as Immigrants to the US and US Permanent Residents, whose native language is not English, and who have not received a Bachelor's degree or higher in the US, Australia, Canada, Ireland, New Zealand or the United Kingdom, and must show proficiency in English speaking as well as listening, writing and reading. US citizens born on US military bases abroad may be waived from the TOEFL requirement after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

If you take the TOEFLiBT exam, you are required to have a minimum combined score for the listening, writing and reading sections of 79 Plus a speaking section score of 26 or higher.

If you take the TOEFL, you are required to have a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher.

Advanced Role MSN Faculty

Susan M. Burke, PhD, RN, CPNP-BC (*The Catholic University of America*) Track Director, *Pediatric Primary Care*. Associate Clinical Professor. Pediatric primary care, health disparities in children, families under stress, children with special health care needs transitioning to adulthood.

Jennifer Coates, MSN, MBA, ACNPC, ACNP-BC (*The University of Pennsylvania*). Assistant Clinical Professor. Critical care nurse practitioner.

Frances H. Cornelius, PhD, MSN (*Drexel University; Wayne State University*) Chair, *MSN Department*. Clinical Professor. Environmental justice, community and public health instructional technology, distance learning, mobile learning, informatics.

Brenda Douglass, DNP, CRNP-BC, CDE, CTTS. Associate Clinical Professor. Endocrine, cardiology, pulmonology, sleep disorders, and chronic health conditions

Alecia Schneider Fox, PhD (Candidate) (*Widener University*) Senior Director *Nursing Faculty Affairs and Clinical Education*. Assistant Clinical Professor. Emergency, critical care, trauma, organ transplant and advanced nursing practice. Serves as the Faculty Advisor for the Drexel Chapter of the Student Nurses Association of Pennsylvania.

MSN: Nursing Education Concentration

Major: Nursing Education

Degree Awarded: Master of Science in Nursing (MSN)

Calendar Type: Quarter

Total Credit Hours: 46.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.3817

Standard Occupational Classification (SOC) code: 25-1072

About the Program

The MSN: Nursing Education program prepares students to work as nursing educators, nursing faculty, or nursing professors in all types of programs, at all levels, in a variety of settings. This program has a special focus on preparing students with the required competencies to be successful on the nurse educator certification exam.

Currently, there is a severe and critical nursing faculty shortage in the United States. This program will prepare graduates to fill these faculty and educator positions in healthcare organizations through cutting-edge content and learning experiences that build the skills and competencies essential for today's nurse educators.

The program integrates theories specific to adult learning, curriculum design, evaluation of courses and programs, critical thinking, both clinical and classroom techniques, and the preparation for the role of the nursing professor. The program also includes opportunities to explore contemporary and leading-edge educational modalities. Knowledge and skills gained through this program are applicable in a variety of settings.

This unique program even instructs students on how to teach online and use technology to teach nursing in innovative ways. The culminating practicum, which runs over two terms, provides students with opportunities to put what has been learned into practice. Participants complete a role practicum experience in teaching, providing ample opportunity to apply theory to practice. In addition, students are required to attend an immersive on-campus intensive (OCI) simulation residency when taking practicum. The OCI hours will count as part of the required 160 total practicum hours (24 practicum hours earned). The OCI is offered biannually.

The program is accredited by the Commission on Collegiate Nursing Education (CCNE).

MSN: Nursing Innovation Concentration

Major: Nursing Innovation

Degree Awarded: Master of Science in Nursing (MSN)

Calendar Type: Quarter

Total Credit Hours: 45.0 minimum

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.3818

Standard Occupational Classification (SOC) code: 29-1141

NOTE: This program is currently undergoing revision and therefore no applications will be accepted for the 2019-2020 academic year. Please check back in summer 2020 for an update.

About the Program

The online MSN in Nursing Innovation is designed for the graduate nursing student who seeks to re-invent and transform nursing practice in today's tumultuous health care system. Graduates of this accredited program fill innovative and problem-solving roles as clinicians, educators, administrators and clinical scientists; some students choose to move toward and succeed in the business environment of healthcare.

This pioneering masters degree emphasizes problem-solving and creative approaches to advance nursing practice, improve and change healthcare delivery and focuses on models, methods, environments and processes that will give students the tools to transform ideas into reality. It offers a flexible, but rigorous, curriculum including a substantial capstone project that demonstrates innovation and pushing the creative boundaries to promote real and substantive change.

This program:

- Gives students the ability to make ideas a reality.
- Teaches students new skills to support changing ideas into reality.
- Develops students as creative and inventive nurses who can make meaningful and unique contributions to the healthcare industry.
- Is a good fit for students whose career objectives may not be met by a traditional graduate nursing curriculum or career paths.

With approval, students may design an individualized plan of study to meet the program requirements or use the 4-5 electives to obtain a post-baccalaureate certificate in a specialty area of interest including but not limited to the list below.

- Leadership in Health Systems Management
- Nursing Education
- Substance Use Disorders Counseling
- Project Management
- Healthcare Informatics
- Complementary & Integrative Therapies

The program is accredited by the Commission on Collegiate Nursing Education (CCNE).

- Personal statement (no more than two pages and no less than one page double-spaced) that will give the admissions committee a better understanding of the followings:
 - Describe your proposed capstone project.
 - Would your capstone project be intrapreneurial or entrepreneurial?
 - Is your capstone a project, program, or product?
 - Who is your target audience?
- Curriculum Vitae or Resume.
- Copy of Current United States RN license required.
- Copies of any Advanced Practice Nursing Licensure and Certification Documents.
- While specific experience is not required for applicants to the track, previous related work experience may make an applicant more competitive.

International applicants must possess a BSN (or its equivalent) and current US RN license.

TOEFL Requirement

International Applicants, as well as Immigrants to the US and US Permanent Residents, whose native language is not English, and who have not received a Bachelor's degree or higher in the US, Australia, Canada, Ireland, New Zealand or the United Kingdom, and must show proficiency in English speaking as well as listening, writing and reading. US citizens born on US military bases abroad may be waived from the TOEFL requirement after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

If you take the TOEFLiBT exam, you are required to have a minimum combined score for the listening, writing and reading sections of 79 Plus a speaking section score of 26 or higher.

If you take the TOEFL, you are required to have a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher.

Degree Requirements

Core MSN Courses

NURS 500 [WI]	Confronting Issues in Contemporary Health Care Environments	3.0
NURS 502	Advanced Ethical Decision Making in Health Care	3.0
NURS 544	Quality and Safety in Healthcare	3.0
RSCH 503	Research Methods and Biostatistics	3.0
RSCH 504	Evaluation and Translation of Health Research	3.0

Required Track Courses

NURS 586	Innovation in Advanced Nursing Practice: Theory and Application	3.0
NURS 587	Case Studies in Intra/Entrepreneurship and Innovation in Nursing	3.0

Support Courses

NURS 564	The Business of Healthcare	3.0
PROJ 501	Introduction to Project Management	3.0

Practicum/Capstone Projects

NURS 652	Innovation Capstone Project	6.0
----------	-----------------------------	-----

Electives (by advisement with track coordinator or selected from concentrations listed below) **12.0-18.0**

Total Credits	45.0-51.0
---------------	-----------

Healthcare Informatics Concentration

PROJ 502	Project Planning & Scheduling	3.0
INFO 648	Healthcare Informatics	3.0
INFO 731	Managing Health Informatics Projects	3.0
INFO 732	Healthcare Informatics: Planning & Evaluation	3.0

Total Credits	12.0
---------------	------

Service to Veterans Concentration

IPS 549	The Military and Veteran Culture	3.0
IPS 550	The Unique Health Care Needs of our Military and Veterans	3.0
IPS 551	Veteran Advocacy	3.0
IPS 552	Veteran Healthcare Policy	3.0

Total Credits	12.0
---------------	------

Complementary & Integrative Therapies Concentration

CIT 501	Foundations of Phytotherapy	3.0
CIT 502	Foundations of Complementary and Integrative Therapies	3.0
CIT 503	Holistic Living For The Caregiver	3.0
CIT Elective *		3.0

Total Credits	12.0
---------------	------

* One CIT 500 or 600 level course

Holistic Hospice & Palliative Care Concentration

CIT 503	Holistic Living For The Caregiver	3.0
CIT 621	Spirituality in Hospice and Palliative Care	3.0
CIT 622	Holistic Therapies in Hospice and Palliative Care	3.0
CIT 623	Cultural Perspectives in Hospice and Palliative Care	3.0

Advanced Role MSN Faculty

Susan M. Burke, PhD, RN, CPNP-BC (*The Catholic University of America*) Track Director, *Pediatric Primary Care*. Associate Clinical Professor. Pediatric primary care, health disparities in children, families under stress, children with special health care needs transitioning to adulthood.

Jennifer Coates, MSN, MBA, ACNPC, ACNP-BC (*The University of Pennsylvania*). Assistant Clinical Professor. Critical care nurse practitioner.

Frances H. Cornelius, PhD, MSN (*Drexel University; Wayne State University*) Chair, *MSN Department*. Clinical Professor. Environmental justice, community and public health instructional technology, distance learning, mobile learning, informatics.

Brenda Douglass, DNP, CRNP-BC, CDE, CTTS. Associate Clinical Professor. Endocrine, cardiology, pulmonology, sleep disorders, and chronic health conditions

Alecia Schneider Fox, PhD (Candidate) (*Widener University*) Senior Director *Nursing Faculty Affairs and Clinical Education*. Assistant Clinical Professor. Emergency, critical care, trauma, organ transplant and advanced nursing practice. Serves as the Faculty Advisor for the Drexel Chapter of the Student Nurses Association of Pennsylvania.

MSN: Nursing Leadership in Health Systems Management Concentration

Major: Nursing: Nursing Leadership in Health Systems Management Concentration

Degree Awarded: Master of Science in Nursing (MSN)

Calendar Type: Quarter

Total Credit Hours: 48.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.3802

Standard Occupational Classification (SOC) code: 29-1141

About the Program

The MSN in Nursing Leadership in Health Systems Management program, designed for part-time attendance by working nurses, prepares students to become nursing leaders in today's rapidly changing health care environment. This online master's degree program will prepare students for a senior role in a dynamic and increasingly demanding healthcare environment.

The MSN program focuses on the development of a leadership style and the skill set essential for individuals in or seeking administrative roles, including:

- fiscal and organizational management,
- strategic planning,
- integrated quality outcomes measurement,
- organizational structures,
- marketing, and
- management of human resources within organizations.

The program also provides the student with information and strategies to problem solve, make decisions, resolve conflict, address legal/ethical issues and operationalize the mission and goals of the health care delivery organization.

Coursework for the MSN program is completed online. The MSN also requires one practicum experience that provides opportunities for students to further develop leadership skills for complex healthcare organizations.

The program is accredited by the Commission on Collegiate Nursing Education (CCNE).

Additional Information

For more information about this program, contact:

Jillian Randall
Senior Academic Advisor
jnr56@drexel.edu
267.359.5692

Additional information is also available on the Drexel's College of Nursing and Health Professions Nursing Leadership in Health Systems Management (<https://www.drexel.edu/cnhp/academics/graduate/MSN-Nursing-Leadership-in-Health-Systems-Management/>) web page and the Drexel University Online Nursing Leadership in Health Systems Management (<http://online.drexel.edu/online-degrees/nursing-degrees/msn-lead/>) web page.

Admission Requirements

- BSN from a program fully accredited by NLN and or CCNE.
- 3.0 or above on all previous coursework or the last 60.0 credits completed. Applications from RN's with a GPA of less than 3.0 may be considered on an individual basis.
- Official transcripts from all previous educational institutions are required.
- Two professional references required from colleagues or supervisors who can attest to the applicant's knowledge, skill, and potential aptitude for graduate study.

- Letters of recommendation are waived for students who have an undergraduate GPA of 3.5 or higher
- Personal statement (no more than two pages and no less than one page double-spaced) that will give the admissions committee a better understanding of the followings:
 - Why you are choosing this particular program of study
 - Your plans upon completion of the degree
 - How your current work experience will enhance your experience in this program
- Curriculum Vitae or Resume.
- Copy of Current US RN license required.
- Copies of any Advanced Practice Nursing Licensure and Certification Documents.
- While specific experience is not required for applicants to the track, previous related work experience may make an applicant more competitive.

International applicants must possess a BSN (or its equivalent) and current US RN license.

TOEFL Requirement

International Applicants, as well as Immigrants to the US and US Permanent Residents, whose native language is not English, and who have not received a Bachelor's degree or higher in the US, Australia, Canada, Ireland, New Zealand or the United Kingdom, and must show proficiency in English speaking as well as listening, writing and reading. US citizens born on US military bases abroad may be waived from the TOEFL requirement after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

If you take the TOEFLiBT exam, you are required to have a minimum combined score for the listening, writing and reading sections of 79 Plus a speaking section score of 26 or higher.

If you take the TOEFL, you are required to have a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher.

Additional Information

Additional information is also available on the Drexel College of Nursing and Health Professions' Nursing Leadership in Health Systems Management web page (<http://drexel.edu/cnhp/academics/graduate/MSN-Nursing-Leadership-in-Health-Systems-Management/>) and the Drexel University Online Nursing Leadership in Health Systems Management web page (<https://online.drexel.edu/online-degrees/nursing-degrees/msn-lead/>).

Degree Requirements

The program content addresses the four key areas of organizations: leading the human side of the enterprise, managing resources, managing operations, and managing information. Two threads are incorporated throughout all courses: the importance of professional image in written and live presentations and the use of technology to support and enhance management and care delivery outcomes.

MSN Core Courses

NURS 500 [WI]	Confronting Issues in Contemporary Health Care Environments	3.0
NURS 502	Advanced Ethical Decision Making in Health Care	3.0

MSN "Bridge" Program

MSN for Nurses with a Non-Nursing BA or BS

About the Program

Drexel University's RN-MSN "bridge" program is available for nurses who have a bachelor's degree in a field other than nursing and now wish to pursue an MSN degree. Applicants to this program must complete the admission process to the MSN program and seek initial advisement from the MSN program academic advisors. The bridge program is available only to students applying for the MSN Advanced Role programs. It is not available for students wishing to pursue an MSN Nurse Practitioner degree. However, to learn more about alternative pathways to becoming a nurse practitioner, contact Jillian Randall (see contact information below).

The graduate program department chair reviews the applicant's file for program eligibility and prerequisites are established on an individual basis.

The "bridge" consists of one undergraduate course. Individuals with extensive professional experience may request to waive the bridge course. Contact Jillian Randall (jnr56@drexel.edu) for more information. The required "bridge course" in the MSN Advanced Role Track is NURS 335 *Genetics and Genomics: Application to Nursing Practice* (4.5 quarter credits). This class is available entirely online and is delivered in a 10-week quarter term session. This course is offered in every term, and includes mandatory synchronous class meetings.

After successfully completing all requirements and admission to the MSN program, students progress directly into graduate-level courses. (Note: The BSN is not awarded in this program.)

Bridge to MSN Requirements

NURS 335	Genetics and Genomics: Application to Nursing Practice	4.5

MSN: Adult-Gerontology Acute Care Nurse Practitioner

Major: Nurse Practitioner, Adult-Gerontology Acute Care

Degree Awarded: Master of Science in Nursing (MSN)

Calendar Type: Quarter

Total Credit Hours: 57.0 quarter credits; 800 clinical hours

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.3801

Standard Occupational Classification (SOC) code: 29-1171

About the Program

The online Adult-Gerontology Acute Care Nurse Practitioner (AGACNP) program is designed to prepare practitioners for professional practice in the management of medical, surgical, and critical-care adult patient populations. Concurrent theory and clinical courses provide a knowledge base for the management of adults and older-adult acute, critical, and complex chronic health care conditions. Clinical practicum rotations allow students to put the principles they have learned into practice in medical, surgical, and critical care settings. Upon completing the program, graduates pursue practice roles across the continuum of acute care services ranging from high-acuity hospital based specialty services and intensive care settings. Graduates are eligible to sit for the AACN and/

or ANCC's Adult Gerontology Acute Care Nurse Practitioner Certification Examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulation, and evaluation. OCI visits occur 2-4 times during the clinical portion of the program and range from 2-3 days. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab. These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

For more information about this program, visit Drexel's MSN Nurse Practitioner Programs (<https://www.drexel.edu/cnhp/academics/graduate/MSN-Nurse-Practitioner-Adult-Gerontology-Acute-Care/>) web page.

MSN: Adult-Gerontology Primary Care Nurse Practitioner

Major: Nurse Practitioner, Adult-Gerontology Primary Care

Degree Awarded: Master of Science in Nursing (MSN)

Calendar Type: Quarter

Total Credit Hours: 52.0 quarter credits; 640 clinical hours

Co-op Option: None

Classification of Instructional Program (CIP) code: 51.3822

Standard Occupational Classification (SOC) code: 29-1171

About the Program

One of the major healthcare challenges of the 21st century will include the delivery of quality, comprehensive, cost effective care for a rapidly increasing number of older adults. With the elderly population in the U.S. expected to double, if not triple, by 2030 it is imperative that there is an educated workforce of health professionals able to deliver high-quality and appropriate care to the adult and older-adult population. In response to this need, Drexel University has developed an Adult-Gerontology Primary Care Nurse Practitioner (AGPC) program. The AGPC cares for individuals (aged 13 years and above) across the lifespan to promote maximal health, reduce risks and manage acute, chronic and complex health conditions. The AGPC is specifically trained to focus on health and wellness, disease prevention, and quality of life in the aging population.

The purpose of our AGPC program is to educate and prepare competent and compassionate AGPC graduates to provide comprehensive, quality and cost effective care founded in evidence-based practice to adults across the lifespan on the continuum of health and illnesses.

All graduates will be eligible to sit for the certification exam as an Adult-Gerontology Primary Care Nurse Practitioner through the American Academy of Nurse Practitioners (AANP) and/or American Nurses Credentialing Center (ANCC).

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulation, and evaluation. OCI visits occur 2-4 times during the clinical portion of the program and range from 2-3 days. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab. These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

For more information about this program, visit Drexel's MSN Nurse Practitioner Programs (<https://www.drexel.edu/cnhp/academics/graduate/MSN-Nurse-Practitioner-Adult-Gerontology-Primary-Care/>) web page.

MSN: Family/Individual Across the Lifespan Nurse Practitioner

Major: Nurse Practitioner, Family/Individual Across the Lifespan

Degree Awarded: Master of Science in Nursing (MSN)

Calendar Type: Quarter

Total Credit Hours: 56.0 quarter credits; 720 clinical hours

Co-op Option: None

Classification of Instructional (CIP) code: 51.3801

Standard Occupational Classification (SOC) code: 29-1171

About the Program

The Family/Individual Across the Lifespan Nurse Practitioner (FNP) online program focuses on the application of advanced-practice nursing knowledge—including physical, psychosocial, and environmental assessment skills—to manage common health and illness problems of clients of all ages and their families. It emphasizes health promotion and disease prevention. Family nurse practitioners primarily practice in ambulatory-care settings, such as primary care clinics, physician offices, HMOs, outpatient clinics, schools, nursing centers, emergency

departments, long-term care facilities, industry, the armed services, public health departments, correctional institutions, and home health agencies. Graduates of the program are eligible to sit for the ANCC's Family Nurse Practitioner Examination and/or the AANP's Family Nurse Practitioner Examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulation, and evaluation. OCI visits occur 2-4 times during the clinical portion of the program and range from 2-3 days. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab. These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

For more information about this program, visit Drexel's MSN Nurse Practitioner Programs (<http://drexel.edu/cnhp/academics/graduate/MSN-Nurse-Practitioner-Family-Individual-Across-Lifespan/>) web page.

MSN: Pediatric Acute Care Nurse Practitioner

Major: Nurse Practitioner, Pediatric Acute Care
Degree Awarded: Master of Science in Nursing (MSN)
Calendar Type: Quarter
Total Credit Hours: 57.0; 800 clinical hours
Co-op Option: None
Classification of Instructional Programs (CIP) code: 51.3809
Standard Occupational Classification (SOC) code: 29-1171

About the Program

The online Pediatric Acute Nurse Practitioner (PNP-AC) program is designed to prepare practitioners for professional practice in the management of medical, surgical, and critical-care pediatric patient populations. Concurrent theory and clinical courses provide a knowledge base for the management of pediatric complex acute, critical, and chronic health care conditions. Clinical practicum rotations allow students to put the principles they have learned into practice in medical, surgical, and critical care settings. Upon completing the program, graduates pursue practice roles across the continuum of acute care services ranging from high-acuity hospital based emergency or intensive care settings to specialty based practices. Graduates are eligible to sit for the PNCB's Pediatric Acute Care Nurse Practitioner Certification Examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulation, and evaluation. Students are required to attend On-Campus visits during the clinical course work within the curriculum. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab.

These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

Pediatric Primary Care Nurse Practitioner

Major: Nurse Practitioner, Pediatric Primary Care

Degree Awarded: Master of Science in Nursing (MSN)

Calendar Type: Quarter

Total Credit Hours: 52.0 quarter credits; 640 clinical hours

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.3809

Standard Occupational Classification (SOC) code: 29-1171

About the Program

The online Pediatric Primary Care Nurse Practitioner (PNP) program is directed toward preparing nurse practitioners who will take advanced nursing roles as clinicians, educators, researchers, and leaders in the rapidly changing, evidence-driven health care environment. The program emphasizes evidence-based practice, interdisciplinary collaboration, and critical use of evolving technology in the care of children and their families. While most pediatric nurse practitioners practice in primary care settings, the continuum of child healthcare spans the geographic settings of home care, ambulatory care, specialty care, urgent care, and rehabilitative care.

Pediatric primary care nurse practitioners provide advanced nursing care across the continuum of healthcare services to meet the specialized physiologic and psychological needs of patients from infancy through adolescence, and have competencies to manage well-child care as well as complex, acute, and chronic healthcare conditions within a family-centered healthcare model. Graduates are eligible to sit for the ANCC's Pediatric Primary Care Nurse Practitioner Examination and/or the PNCB's Pediatric Primary Care Nurse Practitioner Examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulations and evaluation. OCI visits occur as a part of the clinical portion of the program. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab.

These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

MSN: Pediatric Primary Care and Pediatric Acute Care Dual Option

Major: Nurse Practitioner, Pediatric Primary Care and Pediatric Acute Care

Degree Awarded: Master of Science

Calendar Type: Quarter

Total Credit Hours: 62.0; 1000 clinical hours

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.1601

Standard Occupational Classification (SOC) code: 29-1171

About the Program

The Pediatric Primary Care and Pediatric Acute Care Nurse Practitioner Program at Drexel University will prepare the Pediatric Nurse Practitioner to perform acts of medical diagnosis and treatment through didactic lectures, problem-based learning, clinical practice hours, standardized patient experiences and high-fidelity simulation.

This innovative dual option track coincides with the new models of healthcare delivery and the increasing demand for PNP's to provide care for children and their families across the entire continuum of health and illness, including acute critical conditions. The clinical practice settings for the dual certification track options provides students with a mixed inpatient/outpatient experience ranging from specialty clinics and primary care settings. Diverse clinical settings provide supervised clinical hours to allow the student advance practitioner to perform advance physical assessment, critical thinking, diagnostic reasoning and management of care in collaboration with licensed physician and APN's in accredited institutions. Students graduating from this track will be eligible to sit for both the Pediatric Primary Care and the Pediatric Acute Care Board Certifications through the PNCB.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulation, and evaluation. Students are required to attend On-Campus visits during the clinical course work within the curriculum. *Mandatory on-campus visits each quarter are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab.

These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

Psychiatric Mental Health Nurse Practitioner

Major: Nurse Practitioner, Psychiatric Mental Health Degree Awarded: Master of Science in Nursing (MSN)

Calendar Type: Quarter

Total Credit Hours: 52.0 quarter credits; 640 clinical hours

Co-op Option: None

Classification of Instructional Programs (CIP) code: 58.3810

Standard Occupational Classification (SOC) code: 29-1123

About the Program

The online Psychiatric Mental Health Nurse Practitioner (PMHNP) program prepares practitioners to provide a wide range of services to patients across the lifespan and their families. The program of study is based on a biopsychosocial model of care and includes the study and application of diagnostic and treatment modalities, and theories and approaches to practice. Graduates of this program practice in a wide variety of settings as this program enables them to provide direct (assessment, intervention) and indirect (consultation, case management, and supervision) advanced practice services to individuals who are at risk and those who need mental health services. Graduates are eligible to sit for the ANCC's Psychiatric Mental Health Certification Examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On-Campus Intensive (OCI) learning experiences, simulation, and evaluation. OCI visits occur 2-3 times during the clinical portion of the program and range from 2-3 days. *Mandatory on-campus visits each quarter are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab. Women's Health/Gender Related Nurse Practitioner

Major: Nurse Practitioner, Women's Health/Gender Related
 Degree Awarded: Master of Science in Nursing (MSN)
 Calendar Type: Quarter
 Total Credit Hours: 55.0 quarter credits; 640 clinical hours
 Co-op Option: None
 Classification of Instructional Programs (CIP) code: 51.3822
 Standard Occupational Classification (SOC) code: 29-1171

About the Program

The online Women's Health/Gender Related Nurse Practitioner track offers didactic and clinical education via distance learning and concurrent clinical preceptorships. The courses offered throughout the track reflect the competencies and skill sets required for today's women's health nurse practitioner as knowledge expands, health care systems evolve, technology advances and practice changes in response to current needs and evidence-based research. Additionally, this track offers the opportunity for students to work in transdisciplinary simulated scenarios to promote a better understanding and respect of discipline-specific roles, improve existing communication and collaboration within disciplines, and initiate teamwork development in order to promote patient safety and high-quality patient care. Graduates are eligible to sit for the NCC's Women's Health/Gender Related Nurse Practitioner Examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulation, and evaluation. OCI visits occur 2-4 times during the clinical portion of the program and range from 2-3 days. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab.

These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

Term 11		
NURS 693	WHNP IV: Mngmnt & Care of the High Risk Obstetrical and Post Partum Needs of Women and Families	5.0
Term Credits		5.0

Total Credit: 55.0

Doctor of Physical Therapy

Major: Physical Therapy

Degree Awarded: Doctor of Physical Therapy (DPT)

Calendar Type: Quarter

Total Credit Hours: 128.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.2308

Standard Occupational Classification (SOC) code: 29-1123

About the Program

The Doctor of Physical Therapy (DPT) curriculum produces broadly educated physical therapists, while being sensitive to the needs of the health care community and the students' interests. The program strives to foster both intellectual and professional growth in students and is reflective of contemporary practice to prepare graduates for the ongoing changes in health care delivery.

The Doctor of Physical Therapy (DPT) program prepares students for autonomous practice in physical therapy. As a science, physical therapy examines human motion at the tissue, organ, and systems levels. In the clinical environment, physical therapists (PTs) examine and evaluate patients/clients and implement procedural interventions that restore physical function for all people across the life span. As essential practitioners in the health care delivery system, PTs assume roles in rehabilitation services, prevention and health maintenance programs, and professional and community programs. As professional members of the health care team, PTs supervise support personnel, serve as consultants to other health care personnel, serve as consultants to families and caregivers, participate in administrative services, and conduct clinical research. PTs also serve as advocates for health policy and standards of care that help ensure optimum care for their patients/clients.

Graduates of the Doctor of Physical Therapy program are prepared to fulfill their professional obligations, provide leadership to the profession, and use their knowledge and skills to contribute to the health care of society.

The program is just under 3 years in length and spans eleven academic quarters. The curriculum consists of integrated didactic and clinical study with an emphasis on adult learning methodology. Foundational courses are emphasized during the first year, with subsequent quarters sequenced to progress through the hierarchy of educational objectives from simple to complex. All didactic material is organized for synthesis and application to professional practice.

For more information visit the Physical Therapy and Rehabilitation Science (<https://www.drexel.edu/cnhp/academics/doctoral/DPT-Doctor-Physical-Therapy/>) page on the College of Nursing and Health Professions website.

For application instructions, visit the Drexel's Graduate Admission web page for the Doctor of Physical Therapy (<http://drexel.edu/grad/programs/cnhp/professional-doctor-of-physical-therapy/>).

Degree Requirements

The DPT curriculum occurs in a 10-week quarter format over eleven quarters: fall, winter, spring, and summer I; fall, winter, spring, and summer II; and fall, winter and spring III. Classes begin in late September for first-year students. The curriculum is subject to modification.

NEUR 507	Neuroscience I	3.0
NEUR 508	Neuroscience II	2.0

Clinical Education

A strong history of comprehensive clinical education exists for our professional students. The clinical education for the DPT program is integrated into the didactic portions of the curriculum so that knowledge obtained in the classroom is readily put into practice. The DPT program has contracts with hundreds of clinical sites across the nation, representing all facets of professional practice. Students build confidence by participating in part-time integrated clinical experiences (ICEs) during the first year of the program and 32-33 weeks of full-time clinical experiences that offer various levels of acuity in different clinical environments.

Students may select from clinical sites that offer experiences with all ages across the life span and in a variety of environments including, but not limited to acute care, pediatrics, adult rehabilitation, geriatrics, orthopedics, sports medicine, and industrial and occupational rehabilitation.

For more information visit the Physical Therapy and Rehabilitation Sciences Overview (<https://www.drexel.edu/cnhp/academics/doctoral/DPT-Doctor-Physical-Therapy/>) page on the College of Nursing and Health Professions web site.

Facilities

Teaching Facilities

Most classes are held in lecture halls, classrooms, or laboratories on the Center City (Health Sciences) Campus of Drexel University. The entire campus has wireless capability for easy internet access. The Department of Physical Therapy and Rehabilitation Sciences has two state-of-the-art dedicated laboratories where the clinical components of the professional curriculum are taught. In these laboratories equipment reflects current physical therapy practice and is part of a multi-disciplinary clinical learning and resource center. Included as part of the resource center is a standardized patient lab that utilizes paid actors to simulate various clinical situations while students' interactions with those "patients" are monitored by supervising faculty. This center provides a rich environment for student learning.

The department also utilizes an anatomy lab where dissection of human cadavers occurs during the first two terms of the program. The anatomy course work focuses on the areas most relevant to physical therapy making connections to clinical practice.

Our teaching resources also include supported distance learning technology. Instructional materials are provided through text, graphics, audio and video formats and are available online through a course

management system 24 hours a day. Our online courses are highly interactive through the use of web discussion boards and audio chat tools.

Additionally, the Professional DPT program uses its own faculty-staffed clinical sites as well as various clinical sites in the area to enhance the educational experience of the student. The department operates outpatient physical therapy sites in the Drexel Recreation Center on the University City campus, a multidisciplinary Parkway Health and Wellness Center on the Center City campus and a pro-bono practice in the 11th Street Family Health Center. Students rotate through these facilities getting individualized mentoring while connecting classroom content with clinical practice. These experiences are in addition to the 32-33 weeks of full-time clinical education the student will experience throughout the curriculum.

Research Facilities

The Department conducts hypothesis-driven research in human movement, biomechanics, motor control, community-based practice and family-centered care. Some of this research is conducted in a 23,000 square foot multidisciplinary center on the Center City Campus. The center has a gait and motion analysis lab containing a video-based motion analysis system with in-floor force plates, and neuromuscular performance labs equipped with custom-built force measuring systems, 16-channel EMG system and electromagnetic tracking systems. Other research is conducted via partnerships with organizations locally, nationally, and internationally. Other departments involved in the research center include Nutrition Sciences and Nursing which provides fertile ground for collaboration. Professional DPT students have the opportunity to work with faculty and PhD students on ongoing laboratory projects through optional research practica.

Physical Therapy DPT Faculty

Maria Benedetto, DPT (*University of Puerto Rico; Columbia University*). Associate Clinical Professor. Pediatrics, Motor learning and motor control; yoga for children; dance prevention and injury rehabilitation

Lisa Ann Chiarello, PT, PhD, PCS, FAPTA (*Hahnemann University*) *Director, Doctor of Health Science in Rehabilitation Sciences and Certificate in Advanced Practice in Pediatric Rehabilitation Programs*. Professor. Pediatric community-based practice; family-centered care; determinants of outcomes; and participation of children with physical disabilities.

Heather Cronin, PT, DPT, GCS (*Temple University*). Adjunct Professor. Geriatrics

David Ebaugh, PT, PhD (*Drexel University*). Adjunct Clinical Professor. Identification and treatment of neuromusculoskeletal impairments associated with shoulder pain and dysfunction; differential diagnosis of shoulder problems; orthopedic examinations and interventions

Margaret Finley, PT, PhD (*University of Maryland*). Associate Professor. Upper extremity movement patterns in persons with chronic neuromuscular disorders.

Kevin E. Gard, DPT, OCS (*Temple University*) *Vice-Chair, Department of Physical Therapy and Rehabilitation Sciences and Director, Professional Doctor of Physical Therapy Program*. Clinical Professor. Orthopedics; sports medicine.

Sarah Leuzzi, PT, DPT, CWS, MLT, FACCWS (*Temple University*). Adjunct Professor. Regional Vice President of Sales East Coast, American Medical Technologies; manual lymphatic drainage; wound care

Margery A. Lockard, PT, PhD (*Hahnemann University*). Clinical Professor. Orthopedic/musculoskeletal physical therapy; management of patients using prosthetic and orthotic devices; and anatomy, physiology and kinesiology.

Clare Milner, PhD, FACSM (*University of Durham, University of Leeds*) *Director, PhD in Rehabilitation Science*. Associate Professor. Biomechanics of lower extremity injury, injury prevention, and rehabilitation; overuse injuries in runners; gait in people with knee pathology

Kathryn D. Mitchell, PT, DPT, NCS (*Temple University*) *Assistant Director of Clinical Education*. Assistant Clinical Professor. Adult neuromuscular rehabilitation; balance and falls in Multiple Sclerosis.

Patrick O'Connor, PT, MPT, CCS, MBA (*Drexel University*) *Program Director, Kindred Hospitals Philadelphia*. Adjunct Professor. Cardiopulmonary Physical Therapy

Jeffrey Ostrowski, PT (*Jefferson University*). Adjunct Professor. Partner, Excel Physical Therapy; Orthopaedic Physical Therapy, Administration, Practice Management

Orestes Mikhail Quisumbing, PT, DPT, NCS (*Drexel University*). Adjunct Professor. Neurologic rehabilitation, spinal cord injury, stroke, amputation

Won Sung, PT, PhD (*Arcadia University; Drexel University*). Adjunct Professor. Orthopedic spine rehabilitation, movement coordination

Sara Tomaszewski, PT, DPT, OCS (*Duke University*). Clinical Instructor. Orthopedics and sports physical therapy, injury prevention, and return-to-sport decision making.

Sarah Wenger, PT, DPT, OCS (*Arcadia University; Temple University*) *Coordinator, Professional Practice Lab*. Assistant Clinical Professor. Health, wellness and fitness, models for preventative physical therapy, dance medicine.

Glenn Williams, PT, PhD, ATC (*University of Delaware*) *Chair, Department of Physical Therapy & Rehabilitation Sciences*. Associate Professor. Neuromuscular plasticity after joint injury, orthopaedic-sports rehabilitation, human performance, post-traumatic osteoarthritis.

Emeritus Faculty

Margo Orlin, PT, PhD, FAPTA (*Drexel University*). Associate Professor Emeritus. Walking and running biomechanics and participation in children with developmental disabilities, evaluation of enhancing participation for children and adolescents with cerebral palsy.

Robert J. Palisano, PT, ScD, FAPTA (*Boston University*). Distinguished Professor. Classification and prognosis for gross motor function in children and youth with cerebral palsy; interventions to improve activity and participation in children with physical disabilities; transition to adulthood for youth with disabilities.

Patricia Rubertone, PT, MPT, MSW, EdD (*Widener University*) *Director of Experiential Learning*. Associate Clinical Professor Emerita. Student learning; course design; judgment of physical therapy student clinic performance by novice vs. experienced clinical instructors.

Susan Smith, PT, PhD (*University of Connecticut, Texas Woman's University*). Associate Professor and Dean Emerita. Geriatrics: health promotion and interventions for manifestations of low bone mass; assessment of fall risk and fall prevention interventions for older adults

Nutrition Sciences

Major: Nutrition Sciences

Degree Awarded: Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 90.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 30.1901

Standard Occupational Classification (SOC) code: 11-9121

About the Program

The program mission is to develop scientists who are able to contribute to the scholarly generation of nutrition science knowledge, spanning the overlapping disciplines of human nutrition, nutritional biochemistry, food safety, human physiology, exercise physiology and community nutrition; and the translation of this knowledge with respect to health, disease prevention and treatment.

Nutrition scientists who have a PhD can be involved in research, education, industry, community health, and/or clinical practice. With the current epidemic of obesity and type 2 diabetes mellitus, the need for PhD-educated nutritionists who can discover and design new treatment interventions is of major public health interest.

Admission Requirements

Applicants must possess a minimum of a Bachelor's of Science degree in biology, chemistry, nutrition, exercise physiology, food science or a similar area with a strong science base, and have taken an advanced undergraduate course in biochemistry, as well as a course in human nutrition and a course in basic statistics.

- College/University transcripts with a minimal overall grade point average (GPA) of 3.0 (on a 4.0 scale)
- Graduate Record Exam (GRE): minimum combined score of 308 on the Verbal and Math sections
- Two letters of recommendation from advisors, supervisors, professors, and/or mentors
- Curriculum vitae
- Personal statement outlining career plan, topic of research interest and preferred Nutrition Sciences faculty mentor with whom he/she would like to work

Degree Requirements

The PhD program consists of 90.0 quarter credits. The 90 credits include 45.0 credits of course work, 45.0 credits of research, as well as a research dissertation. Additionally, all PhD students will be required to obtain a minimum of 10 contact hours of nutrition-related teaching experience.

Required Nutrition Courses (18 credits):

NFS 525	Nutritional Assessment Through the Life Cycle	3.0
NFS 601	Research Methods	3.0
NFS 602	Methods of Nutrition Research	3.0
NFS 680	Special Topics	3.0
NFS 810	Topics in Metabolic Nutrition	3.0

NFS 811	Topics in Community Nutrition	3.0
Required Statistics Courses (9 credits):		
RSCH 759	Foundations of Biostatistics	3.0
RSCH 811	Intermediate Biostatistics	3.0
RSCH 814	Intermediate Biostatistics II	3.0
Required Professional Skills Courses (9 credits):		
RSCH 770	Foundations in Research Methods	3.0
RSCH 813	Measurement Theory in Healthcare	3.0
RSCH 815	Scientific Inquiry and Writing	3.0
Electives:		
12.0 credits chosen from graduate nutrition, basic science or other courses, as determined by the faculty mentor and/or dissertation committee		12.0
Independent Research (30 credits):		30.0
NFS 997	Research	
Dissertation Research (12 credits):		12.0
NFS 999	Dissertation Research	
Total Credits		90.0

Nutrition Sciences Faculty

Joan Rosen Bloch, PhD, CRNP (*University of Pennsylvania*). Associate Professor. Maternal and infant health outcomes with a particular focus on racial and ethnic perinatal health disparities.

Charlene Compher, PhD, RD, CNSC, LDN, FADA, FASPEN (*Drexel University*) *Courtesy Appointment*. Visiting Research Professor.

Robin M. Danowski, MS, RD, LDN. Instructor. Renal Nutrition

Nyree Dardarian, MS, RD, LDN, CSSD, FAND (*Drexel University*) *Director, Center for Nutrition & Performance*. Clinical Assistant Professor. Energy expenditure; sports nutrition

Francesco De Luca, MD (*Catholic University of Sacred Heart, Rome, Italy*) *Courtesy Appointment*. Visiting Research Professor.

Angelo Del Parigi, MD (*University of Bari, Italy*) *Courtesy Appointment*. Visiting Research Professor.

Jonathan Deutsch, PhD (*New York University*). Professor. Social and cultural aspects of food, culinary education, culinary improvisation, recipe and product development; food sustainability.

RoseAnn DiMaria-Ghalili, PhD, MSN, BSN, CNSC (*New York University, School of Education, Division of Nursing*). Associate Professor. Nutrition and surgical recovery to improve the care of older adults undergoing surgery; nutrition assessment, inflammation, and health outcomes.

Garrison L. Draper, MSc, CSCS, USAW, ISPAS (*Edith Cowan University, Perth, WA*) *Courtesy Appointment*. Visiting instructor

Susan Ettinger, PhD, RD, DABN, CDN (*Columbia University*) *Courtesy Appointment*. Visiting Research Professor.

Debi Page Ferrarello, RN, MSN, MS, IBCLC, RLC (*Jefferson University, Arcadia University*). Instructor. Human lactation

Andrea Judge, MPH, IBCLC, RLC (*University of North Carolina*). Clinical Instructor. Human lactation

Joseph Kehayias, PhD (*Indiana University*). Professor. Body composition analyses; measurement of sarcopenia; osteoporosis; energy expenditure.

Tanya V.E. Kral, PhD (*Pennsylvania State University*) *Courtesy Appointment*. Visiting Research Professor.

Beth L. Leonberg, MS, MA, RDN, CSP, FAND, LDN (*Colorado State University, Rowan University*) Director, Didactic Program in Dietetics . Associate Clinical Professor. Pediatric nutrition.

Rachelle Lessen, MS, RD, IBCLC, LDN (*Arcadia University*). Instructor. Human lactation

Michael Lowe, PhD (*Boston College*). Professor. Prevention and treatment of eating disorders and obesity; effects of appetitive responsiveness and dietary restraint on eating regulation; psychobiology of obesity-proneness; empirical foundations of unconscious processes.

Brandy-Joe Milliron, PhD (*Arizona State University*). Associate Professor. The development and evaluation of modifications in the natural environment to promote healthier living; farm to table school initiatives

Juan Muniz, PhD (*Oregon State University*). Visiting Research Professor. Food microbiology; community-based research to assess pesticide levels in homes; prevention of health effects of pesticides for indigenous farmworkers.

Jennifer Nasser, PhD, RD, FTOS (*Rutgers University*). Associate Professor. Dopamine-mediated mechanisms of food intake regulation in humans and its impact on metabolic homeostasis, especially as it applies to obesity, eating disorders and aging.

Margaret O'Neil, PT, PhD, MPH (*MCP Hahnemann University; Duke University; University of North Carolina at Chapel Hill*). Adjunct Associate Professor. Measurement of and interventions to improve physical activity and fitness levels and promote participation in children and youth with who are overweight/obese and those with physical disabilities (especially cerebral palsy).

Irene E. Olsen, PhD, RD, LDN (*Tufts University*) Courtesy Appointment. Visiting Research Professor.

Kavitha Penugonda, PhD (*Kansas State University*) Manager, Nutritional Biochemistry Laboratory. Assistant Clinical Professor. Nutrient bioavailability in foods; nutritional supplements on health

Jennifer Quinlan, PhD (*North Carolina State University*). Professor. Food microbiology; microbiological quality and safety of produce, dairy and meat products in markets in high vs. low socioeconomic areas, *Bacillus* and *Clostridium* spores in food processing.

Sobhana Ranjan, PhD, RD (*University of Delhi, India*) Courtesy Appointment. Visiting Research Professor.

Barry Ritz, PhD (*Drexel University*) Courtesy Appointment. Visiting Research Professor.

Patricia A. Shewokis, PhD (*University of Georgia*). Professor. Roles of cognition and motor function during motor skill learning; role of information feedback frequency on the memory of motor skills, noninvasive neural imaging techniques of functional near infrared spectroscopy (fNIRS) and electroencephalography (EEG) and methodology and research design.

Sinclair A. Smith, MS, DSc (*Boston University*) Chair, Health Sciences. Professor. Effects of aging, dehydration, and oral creatine supplementation on skeletal muscle metabolism using phosphorus magnetic resonance spectroscopy. Anatomy, physiology, and exercise science.

Deeptha Sukumar, PhD (*Rutgers University*). Associate Professor. Vitamin D and magnesium and bone mineral density; obesity and bone mineral density.

Alison Ventura, PhD (*Pennsylvania State University*) Courtesy Appointment. Visiting Research Professor. Factors that contribute to the development of eating behaviors and dietary preferences during infancy and early childhood.

Stella Lucia Volpe, PhD, RD, ACSM-CEP, FACSM (*Virginia Polytechnic Institute and State University*) Chair, Nutrition Sciences. Professor. Prevention of obesity and diabetes across the lifespan; mineral metabolism and exercise; energy balance; sports nutrition.

Emeritus Faculty

Donna H. Mueller, PhD (*Temple University*). Associate Professor Emeritus. Clinical nutrition; pediatric nutrition; nutrition in pulmonary diseases, especially cystic fibrosis; nutrition in developmental delay; dental nutrition; dietetic education and professional development.

Physician Assistant (PA)

Major: Physician Assistant

Degree Awarded: Master of Health Sciences (MHS)

Calendar Type: Quarter

Total Credit Hours: 117.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 51.0912

Standard Occupational Classification (SOC) code: 29-1071

About the Program

The Drexel University Physician Assistant Program provides graduates with a Master of Health Science degree and eligibility to sit for the PANCE (Physician Assistant National Certifying Examination).

The physician assistant (PA) is a primary health care provider who, when graduated from an accredited program and national certified and state-licensed, is eligible to practice medicine with the legal supervision of a physician.

PA's perform many duties including, but not limited to, physical examinations, diagnosis and treatment of illnesses, ordering and interpretation of lab tests, assist in surgery, perform procedures, perform hospital rounds, prescribe medicines and provide patient education.

The mission of this program is to:

- Educate qualified primary care physician assistants
- Improve health care delivery in rural and urban medically underserved areas
- Promote the physician assistant profession

Additional Information

For more information about this program, contact: paadmissions@drexel.edu

For more details about the program, visit the College of Nursing and Health Professions Physician Assistant (<https://www.drexel.edu/cnph/academics/graduate/MHS-Physician-Assistant/>) page.

Admission Requirements

The Drexel University Physician Assistant Program utilizes the Central Application Service for Physician Assistants (CASPA). All applicants must complete the CASPA application process no later than September 1st of the year prior to expected date of matriculation. Applications must be e-submitted, complete (including the receipt by CASPA of all transcripts, reference forms, and other supporting documentation such as foreign transcript evaluations and TOEFL score) and received by CASPA by the September 1st deadline. Applicants may not apply directly to the Drexel University Physician Assistant Program. Applications made directly to the Office of Enrollment Management (Admissions) of Drexel University will not be processed.

- All applications must be verified by CASPA no later than September 1st.
- For the 2019-2020 application cycle (open mid-April - September 1, 2019) all prerequisites must be completed by the end of the fall semester. NOTE: Up to two (2) admission prerequisite courses may be incomplete at the time of application submission, but those courses must be completed by the end of the Fall 2019 term.

For additional details about the application process, visit the Physician Assistant Program's Admissions (<https://www.drexel.edu/cnhp/academics/graduate/MHS-Physician-Assistant/>) web page.

Application Prerequisites

- A minimum grade point average of 3.0 on a 4.0 grading scale from all colleges and universities attended is required for the following three (3) categories: non-science courses, natural science courses, and combined overall courses. Applications will not be reviewed unless the applicant has attained these minimum requirements at time of application.
- Meet the technical standards for admission, progression, and graduation from the Physician Assistant Program. Each applicant is expected to review completely the "Technical Standards for PA Program" PDF at the end of this page. Individuals unable to meet these technical standards, with or without reasonable accommodation, are counseled to pursue alternate careers.
- Official transcripts from all colleges and universities attended sent directly to CASPA.
- Non-United States-based educational institutional transcripts must be evaluated by an approved agency (see the listing of acceptable agencies on the CASPA website at https://portal.caspaonline.org/faq/foreign_transcripts.htm). Evaluation fees are the responsibility of the applicant. Evaluations must be sent directly to CASPA.
- Three completed reference forms with accompanying letters of recommendation attached and submitted as part of the official CASPA application. Preferred references are from individuals who have interacted with the applicant in a supervisory capacity or academic instructors who have personal knowledge of the applicant. Submission of references from friends, relatives, personal physicians, or instructors who do not possess a personal, supervisory knowledge of the applicants is discouraged.
- A personal statement recorded as part of the CASPA application.
- An applicant whose native language is not English must submit scores from the TOEFL iBT examination unless the applicant has graduated with a bachelor's degree from a U.S. college or university. The minimum required score for the iBT (Internet Based Testing) is 79 and a minimum score of 26 is required for the speaking component.

Find more detailed information at <http://www.toeflgoanywhere.org/>. Scores must be submitted directly to CASPA.

- Meet the minimum prerequisite coursework as detailed in the "Admission Requirements and Process" PDF below.

A minimum of 500 hours of clearly documented volunteer/paid direct hands-on patient contact accrued by the time of application and recorded as part of the official CASPA application is required. Ensure that all hours are accurately reported. Applicants may list the same position in multiple sections in order to account for multiple experiences (patient contact, related health care, research, shadowing, etc.) accrued in the same position as long as each hour is not reported in more than one experience category. Please review the "Patient Contact" PDF below for more information regarding acceptable forms of patient contact.

- Graduate Record Examination (GRE) scores are not required.
- The Physician Assistant Program does not grant advanced standing.

Degree Requirements

The intensive curriculum consists of professionally related coursework taken during a continuous period (the part-time option requires an additional calendar year) and gives students an understanding of both the health care system within which they will work and the functions appropriate to the role of the physician assistant. The curriculum is divided into a full year of didactic courses followed by an additional 15 months of supervised clinical practice.

Training begins with four quarters of didactic education which integrates patient interaction throughout. The clinical training phase consists of six (6) five-credit, five week clinical rotations in medicine, surgery, women's health, pediatrics, emergency medicine, and psychiatry. The clinical phase of the curriculum is completed on a full-time basis for both full and part-time students.

The final portion of the curriculum consists of two, 10-credit quarter-long, primary care practica (preceptorships). During the preceptorship phase, each student is assigned to two primary care sites for individualized clinical training with physician preceptors. Training sites during the clinical year are located throughout Pennsylvania and in other states. Students are expected to relocate during the clinical phase and are responsible for all associated financial costs, including transportation and living expenses.

The program is intensely challenging, both intellectually and physically, and requires stamina as well as personal and financial sacrifice on the part of the students. The program demands a high degree of integrity, self-sufficiency, motivation, and self-discipline, and highly developed study skills.

The Physician Assistant program utilizes electronic documentation and communications. Therefore, all students are required to have laptop computers with Web access capability.

Contact the Physician Assistant Program (<https://www.drexel.edu/cnhp/academics/graduate/MHS-Physician-Assistant/>) for more information on the sequencing for the part-time option.

Required Courses

First Year		
Fall		Credits
PA 540	Clinical Anatomy	5.0
PA 545	Physician Assistant Practice	1.0
PA 543	Ethical Issues in Physician Assistant Practice	2.0

PA 542	Patient Communication	2.0
PA 544	Clinical Assessment	5.0
Term Credits		15.0

Winter

In this quarter, part-time students may take PA 546 Health Policy for Physician Assistance Practice and/or an elective in addition to the required courses. This will enable them to take the first summer quarter off. addition to the required courses.

PA 548	Principles of Medical Science I	2.0
PA 556	Clinical Medicine I	5.0
PA 551	Pharmacology and Therapeutics I	3.0
PA 559	Clinical Skills I	2.0
PA 547	Evidence Based Medicine for Physician Assistants	3.0
Term Credits		15.0

Spring

PA 549	Principles of Medical Science II	2.0
PA 557	Clinical Medicine II	5.0
PA 552	Pharmacology and Therapeutics II	2.0
PA 560	Clinical Skills II	2.0
PA 554	Biopsychosocial Issues in Patient Care	5.0
Term Credits		16.0

Summer

In this quarter, part-time students may take PA 546 Health Policy for Physician Assistant Practice plus an elective if they wish to attend during the summer quarter.

PA 550	Principles of Medical Science III	2.0
PA 558	Topics in Clinical Practice	5.0
PA 553	Pharmacology and Therapeutics III	2.0
PA 561	Clinical Skills III	4.0
PA 546	Health Policy for Physician Assistant Practice	2.0
Term Credits		15.0

Second Year

Fall

The Clinical Phase (Full-time for all students, 5 quarters)		
Rotation I		5.0
Rotation II		5.0
Term Credits		10.0

Winter

Rotation III		5.0
Rotation IV		5.0
Graduate Project I		3.0
Term Credits		13.0

Spring

Rotation V		5.0
Rotation VI		5.0
Term Credits		10.0

Third Year

Summer

PA 635	Primary Care Practicum I	10.0
PA 638	Graduate Project II	3.0-6.0
Term Credits		13.0-16.0

Fourth Year

Fall

PA 637	Primary Care Practicum II	10.0
Term Credits		10.0

Total Credit: 117.0-120.0

***Clinical Year Rotation Courses**

The sequencing of the six clinical rotations will vary for individual students, but all students must take all six rotations.

PA 629	Internal Medicine Rotation	5.0
--------	----------------------------	-----

PA 630	Pediatrics Rotation	5.0
PA 631	Women's Health Rotation	5.0
PA 632	Behavioral Medicine Rotation	5.0
PA 633	Surgery Rotation	5.0
PA 634	Emergency Medicine Rotation	5.0

Physician Assistant Faculty

Patrick C. Auth, PhD, PA-C (*Drexel University*) *Department Chair, Physician Assistant Department.* Clinical Professor. Clinical reasoning of physician assistant students.

Adrian Banning, MMS, PA-C (*Arcadia University*) *Research Coordinator.* Assistant Clinical Professor. Dermatology, family practice, and evidence based medicine.

Geraldine A. Buck, DrPH, MHS, PA-C (*Drexel University*) *Director, Physician Assistant Post-Professional Master's Program.* Associate Teaching Professor. Public health.

Ryan Clancy, MSHS, MA, PA-C (*The George Washington University*) *Co-Director, Clinical Education.* Clinical Instructor. Primary care, behavioral and occupational health

Rosalie Coppola, MHS, PA-C (*Drexel University*). Associate Clinical Professor. Pediatrics, Standardized patients, clinical assessment

Ellen D. Feld, MD, FACP (*University of Cincinnati, College of Medicine*). Clinical Professor. Clinical medicine and ethical issues.

Gretchen L. Fox, MMSc, PA-C (*St. Francis College*) *Associate Program Director.* Associate Clinical Professor. Internal medicine/family practice.

Juanita Gardner, MPH, PA-C (*Drexel University*). Assistant Clinical Professor. Primary care and global health.

Julie Kinzel, MEd, PA-C (*Temple University*). Assistant Clinical Professor. Long term care experiences, geriatrics, gastroenterology and liver disease.

Daniela C. Livingston, PA-C, MD (*Medical School, Bucharest, Romania; University of Washington, Seattle*). Assistant Clinical Professor. Pediatrics, primary care and working with underserved populations, with a special emphasis on preventative pediatrics.

Ann McDonough Madden, MHS, BS, PA-C (*Drexel University*). Associate Clinical Professor. Healthcare disparities, urban health.

Catherine Nowak, MS, PA-C (*Mercy College*) *Director of Clinical Rotations.* Assistant Clinical Professor. Clinical education, behavioral health, women's health

Clare Pisoni, MPAS, PA-C (*University of Nebraska*). Clinical Instructor. Critical care medicine, surgery, simulation

Allison Rusgo, MHS, MPH, PA-C (*Drexel University*). Assistant Clinical Professor. Emergency medicine, internal medicine, global health

Megan Schneider, MMS, MSPH, PA-C (*Arcadia University*). Clinical Instructor. Emergency medicine, pathophysiology, clinical medicine

Diana D. Smith, MHS, PA-C (*Drexel University*) *Director, didactic curriculum.* Assistant Clinical Professor. Primary care, global health care; distance education.

Charles Stream, MPH, PA-C (*George Washington University*). Assistant Clinical Professor. Primary care, evidenced-based medicine

Rehabilitation Sciences

Major: Rehabilitation Sciences

Degree Awarded: Doctor of Health Science (DHSc)

Calendar Type: Quarter

Total Credit Hours: 48.0

Classification of Instructional Programs (CIP) code: 51.2314

Standard Occupational Classification (SOC) code: 29-1123

About the Program

The Doctor of Health Science (DHSc) in Rehabilitation Sciences program is designed to be an advanced doctoral degree program open to physical and occupational therapists seeking leadership roles in education and/or clinical practice. The aim of the program is to prepare physical and occupational therapists to be leaders in Rehabilitation Sciences by acquiring skills and educators, members of research teams and advocates for best practice. The curriculum includes foundation courses in the health professions, teaching, and research.

Program Delivery

Coursework is predominantly online, with onsite components arranged on preset week days or weekends during the curriculum. Most of the coursework will be offered without pre- or co-requisites to maximize students' ability to balance their work and personal lives while completing the degree. Each student chooses an area of scholarship that matches the expertise of one of our faculty members; an arrangement that ensures optimal mentorship for the students.

Objectives

Graduates of the Doctor of Health Science in Rehabilitation Sciences program will be prepared to:

- Assume leadership positions in professional, academic, clinical and/or community organizations.
- Educate students and practitioners in rehabilitation sciences in academic, clinical, and community organizations.
- Consult with consumer groups and organizations to create interprofessional partnerships to foster healthy communities.
- Contribute to and disseminate scholarship for transfer of knowledge in the rehabilitation sciences to promote best practice and quality education.

Additional Information

For more information, visit the Department of Physical Therapy and Rehabilitation Sciences (<https://www.drexel.edu/cnhp/academics/departments/Physical-Therapy/>) web page.

Admission Requirements

Applicants must possess a master's or clinical doctoral professional degree in physical therapy or a related field such as MPT, MSPT, MOT, DPT, or OTD or some other master's degree for admission consideration. In addition applicants must have a current, active US or Canadian license to practice their discipline. Applicants would complete a standard graduate application including submission of the following:

- Copy of professional license
- College/university transcripts with minimal overall GPA of 3.0
- GRE scores
- Two letters of recommendation from advisors, supervisors, professors, or mentors
- CV
- Personal statement outlining career plan and topic of research interest

Degree Requirements

Foundation Courses

NHP 680	Informatics in the Health Professions	3.0
NHP 766	Health Promotion, Fitness and Wellness	3.0
NHP 767	Leadership & Professional Issues	3.0
RHAB 768	Advancing the Practice of Rehabilitation	3.0
RSCH 758	Application of Evidence to Practice	3.0
RSCH 741	Foundations in Scholarly Inquiry & Writing	3.0

Teaching Courses

NHP 760	Academia for Health Professionals	1.0
NHP 762	Health Professional Education	3.0
NHP 822	Teaching Practicum	3.0

Research Courses

NHP 810	Biostatistical Applications	2.0
RSCH 519	Introduction to Biostatistics	3.0
RSCH 770	Foundations in Research Methods	3.0
RSCH 813	Measurement Theory in Healthcare	3.0

Elective Practicum Experience

		2.0
NHP 822	Teaching Practicum	
NHP 832	Leadership Practicum	
RSCH 823	Research Practicum	

Additional Elective Option

3.0
An Elective may be selected from courses and practica (including independent study) within and outside the program to support the student's plan of study.

Scholarship Experience *

NHP 818	Scholarship Question Development	1.0
NHP 827	Scholarship I	2.0
NHP 828	Scholarship II	2.0
NHP 829	Scholarship III	2.0

Total Credits 48.0

* Students must successfully complete comprehensive examination prior to enrolling in the Scholarship Experience series

Sample Plan of Study

Term 1		Credits
NHP 767	Leadership & Professional Issues	3.0

Facilities

Teaching Facilities

The primary teaching resource for this program is supported distance learning technology. Instructional materials are provided through text, graphics, audio and video formats and are available online through a course management system 24 hours a day. The online courses are highly interactive through the use of web discussion boards, audio chat tools, and video conferencing. Program faculty share a belief that it is important to fully support distance learning students, and support will be offered via email, telephone, fax, and video-conferencing. The College of Nursing and Health Professions invests in state-of-the-art technology to foster an effective teaching and learning environment. The onsite portions of the program are held on the Center City (Health Sciences) Campus of Drexel University. The Department of Physical Therapy and Rehabilitation Sciences has two state-of-the-art dedicated teaching laboratories.

Research Facilities

The department's research facilities include over 9,000 square feet of well-equipped research laboratory space (Biomechanics, Gait, Pediatrics, and Neuromuscular Performance Labs), with equipment including force plates, EMG, motion analysis and human performance measurement equipment. This space includes conference rooms, PhD and post doc offices and is located next door to the College's 14,000 square feet, multi-disciplinary clinical practice.

The Department of Physical Therapy and Rehabilitation also values community partners as a central part of the research resources. Many faculty and students are involved in community-based research through collaborations with CanChild Centre, 11th Street Family Health Center, and numerous pediatric hospitals, out-patient facilities, and early intervention providers. Faculty are collaborating on research projects with nationally and internationally known researchers on several multi-site funded projects.

Rehabilitation Sciences DHSc Faculty

Lisa Ann Chiarello, PT, PhD, PCS, FAPTA (*Hahnemann University*)
Director, Doctor of Health Science in Rehabilitation Sciences and Certificate in Advanced Practice in Pediatric Rehabilitation Programs. Professor. Pediatric community-based practice; family-centered care; determinants of outcomes; and participation of children with physical disabilities.

Jane Fedorzayk, PT, PhD, CHT (*Temple University*). Adjunct Professor. Upper extremity tendinopathies and nerve injuries

Margaret Finley, PT, PhD (*University of Maryland*). Associate Professor. Upper extremity movement patterns in persons with chronic neuromuscular disorders.

Margery A. Lockard, PT, PhD (*Hahnemann University*). Clinical Professor. Orthopedic/musculoskeletal physical therapy; management of patients using prosthetic and orthotic devices; and anatomy, physiology and kinesiology.

Robert Maschi, PT, DPT, OCS, CSCS (*Temple University*). Assistant Clinical Professor. Orthopedics, musculoskeletal disorders, lower extremity biomechanics and movement analysis

Clare Milner, PhD, FACSM (*University of Durham, University of Leeds*)
Director, PhD in Rehabilitation Science. Associate Professor. Biomechanics of lower extremity injury, injury prevention, and rehabilitation; overuse injuries in runners; gait in people with knee pathology

Margaret O'Neil, PT, PhD, MPH (*MCP Hahnemann University; Duke University; University of North Carolina at Chapel Hill*). Adjunct Associate Professor. Measurement of and interventions to improve physical activity and fitness levels and promote participation in children and youth with who are overweight/obese and those with physical disabilities (especially cerebral palsy).

Sheri Silfies, PT, PhD (*MCP Hahnemann University*). Adjunct Associate Professor. Identification and treatment of impairments in neuromuscular control of trunk mobility and stability in patients with low back pain, focusing on mechanism of recurrent low back pain; core control in athletes.

Glenn Williams, PT, PhD, ATC (*University of Delaware*)
Chair, Department of Physical Therapy & Rehabilitation Sciences. Associate Professor. Neuromuscular plasticity after joint injury, orthopaedic-sports rehabilitation, human performance, post-traumatic osteoarthritis.

Emeritus Faculty

Margo Orlin, PT, PhD, FAPTA (*Drexel University*). Associate Professor Emeritus. Walking and running biomechanics and participation in children with developmental disabilities, evaluation of enhancing participation for children and adolescents with cerebral palsy.

Robert J. Palisano, PT, ScD, FAPTA (*Boston University*). Distinguished Professor. Classification and prognosis for gross motor function in children and youth with cerebral palsy; interventions to improve activity and participation in children with physical disabilities; transition to adulthood for youth with disabilities.

Patricia Rubertone, PT, MPT, MSW, EdD (*Widener University*) *Director of Experiential Learning*. Associate Clinical Professor Emerita. Student learning; course design; judgment of physical therapy student clinic performance by novice vs. experienced clinical instructors.

Susan Smith, PT, PhD (*University of Connecticut, Texas Woman's University*). Associate Professor and Dean Emerita. Geriatrics: health promotion and interventions for manifestations of low bone mass; assessment of fall risk and fall prevention interventions for older adults

Rehabilitation Sciences

Major: Rehabilitation Sciences

Degree Awarded: Master of Health Sciences (MHS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Classification of Instructional Programs (CIP) code: 51.2308

Standard Occupational Classification (SOC) code: 29-1123

About the Program

Individuals cannot enroll directly in the Master of Health Sciences in Rehabilitation Sciences program. Requirements for the degree completion include successful completion of 45.0 credit hours concluding with a case study or a clinical project.

Upon completion of the MHS program, graduates will be prepared to:

- Analyze the impact of injury or disease process on musculoskeletal or neuromuscular function within a specific population, including orthopedics, pediatrics, and hand rehabilitation.
- Improve their practice through clinical decision-making that is consistent with concepts of health promotion, client-centered care and current best evidence.
- Facilitate the transfer of health care policy and research findings into clinical practice.
- Evaluate methods of service delivery and intervention strategies and procedures at individual and program levels.
- Serve effectively as clinical educators and consultants to consumers and colleagues.
- Engage in professional life-long learning and contribute to the field of rehabilitation.

Additional Information

For more information, visit the Department of Physical Therapy and Rehabilitation Sciences (<https://www.drexel.edu/cnhp/academics/departments/Physical-Therapy/>) web page.

Degree Requirements (MHS)

Master of Health Sciences (MHS): 45.0 quarter credits

Core Requirements

RSCH 519	Introduction to Biostatistics	3.0
RSCH 523	Methods for Health Research	3.0
PTRS 650	Motor Control and Learning Rehabilitation	3.0

PTRS 651	Applied Tissue Biomechanics	3.0
PTRS 721	Teaching Concepts in Rehabilitation	3.0
PTRS 758	Evidence-Based Rehabilitation	4.0

Concentration

Students select a minimum of 16-18 credits in one of the following concentrations. 16.0-18.0

Hand and Upper Quarter Rehabilitation Concentration Options

PTRS 767	Foundations in Hand Therapy
PTRS 768	Upper Quarter Joint Pathology
PTRS 769	Nerve Injuries of the Upper Quarter
PTRS 770	Diseases That Affect the Hand

Pediatrics Concentration Options *

PTRS 740	Issues in Pediatric Health & Rehabilitation
PTRS 760	Pediatric Decision Making
PTRS 761	Pediatric Clinical Application
PTRS 772	Selected Topics in Pediatrics

Orthopedics Concentration Options *

PTRS 590	Advanced Musculoskeletal Anatomy
PTRS 765	Spinal Rehabilitation
PTRS 766	Extremity Rehabilitation
PTRS 767	Foundations in Hand Therapy
PTRS 768	Upper Quarter Joint Pathology
PTRS 769	Nerve Injuries of the Upper Quarter
PTRS 770	Diseases That Affect the Hand
PTRS 771	Work Injury Management
RHAB 763	Biomechanics in Rehabilitation
RHAB 764	Biomechanics in Human Movement
RHAB 765	Introduction to Movement Science

Electives * 8.0

PTRS 612	Pharmacotherapeutics
RHAB 824	Teaching Practicum I
RHAB 825	Teaching Practicum II
RHAB 826	Teaching Practicum III
RHAB 816	Special Topics
RHAB 1899	Independent Study

Final Project

PTRS 786	MHS Final Project I	1.0-2.0
PTRS 787	MHS Final Project II	1.0-2.0

Total Credits 45.0-49.0

* Additional courses (as approved). Number of credits required for electives is dependent upon total credits in concentration selected. Contact the Rehabilitation Sciences Master of Health Science Program (<https://www.drexel.edu/cnhp/academics/departments/Physical-Therapy/>) for more details.

Facilities

Teaching Facilities and Resources

Most classes are held in lecture halls, classrooms, or laboratories on the Center City (Health Sciences) Campus of Drexel University. The entire campus has wireless capability for easy internet access. The Department of Physical Therapy and Rehabilitation Sciences has two state-of-the-art dedicated laboratories. Our teaching resources also include supported distance learning technology. Instructional materials are provided through text, graphics, audio and video formats and are available online through a course management system 24 hours a day. Our online courses are highly interactive through the use of web discussion boards, audio chat tools, and video conferencing.

Research Facilities

The department's research facilities include over 9,000 square feet of well-equipped research laboratory space (Biomechanics, Gait, Pediatrics, and Neuromuscular Performance Labs), with equipment including force plates, EMG, motion analysis and human performance measurement equipment. This space includes conference rooms, PhD and post doc offices and is located next door to the Colleges 14,000 square feet, multi-disciplinary clinical practice.

The Department of Physical Therapy and Rehabilitation also values community partners as a central part of the research resources. Many faculty and students are involved in community-based research through collaborations with CanChild Centre, 11th Street Family Health Center, and numerous pediatric hospitals, out-patient facilities, and early intervention providers. Faculty are collaborating on research projects with nationally and internationally known researchers on several multi-site funded projects.

Physical Therapy and Rehabilitation Sciences Faculty

Maria Benedetto, DPT (*University of Puerto Rico; Columbia University*). Associate Clinical Professor. Pediatrics, Motor learning and motor control; yoga for children; dance prevention and injury rehabilitation

Benjamin Binder-Markey, PT, DPT, PhD (*Northwestern University, University of Delaware*). Assistant Professor. Skeletal muscle adaptations after neural injury and effects on function

Lisa Ann Chiarello, PT, PhD, PCS, FAPTA (*Hahnemann University*) Director, Doctor of Health Science in Rehabilitation Sciences and Certificate in Advanced Practice in Pediatric Rehabilitation Programs. Professor. Pediatric community-based practice; family-centered care; determinants of outcomes; and participation of children with physical disabilities.

Margaret Finley, PT, PhD (*University of Maryland*). Associate Professor. Upper extremity movement patterns in persons with chronic neuromuscular disorders.

Kevin E. Gard, DPT, OCS (*Temple University*) Vice-Chair, Department of Physical Therapy and Rehabilitation Sciences and Director, Professional Doctor of Physical Therapy Program. Clinical Professor. Orthopedics; sports medicine.

Margery A. Lockard, PT, PhD (*Hahnemann University*). Clinical Professor. Orthopedic/musculoskeletal physical therapy; management of patients using prosthetic and orthotic devices; and anatomy, physiology and kinesiology.

Robert Maschi, PT, DPT, OCS, CSCS (*Temple University*). Assistant Clinical Professor. Orthopedics, musculoskeletal disorders, lower extremity biomechanics and movement analysis

Clare Milner, PhD, FACSM (*University of Durham, University of Leeds*) Director, PhD in Rehabilitation Science. Associate Professor. Biomechanics of lower extremity injury, injury prevention, and rehabilitation; overuse injuries in runners; gait in people with knee pathology

Kathryn D. Mitchell, PT, DPT, NCS (*Temple University*) Assistant Director of Clinical Education. Assistant Clinical Professor. Adult neuromuscular rehabilitation; balance and falls in Multiple Sclerosis.

Annalisa Na, PT, DPT, PhD, OCS (*University of Delaware*). Assistant Research Professor. Interactions of multimorbidity diseases on functional outcomes in older adults

Sinclair A. Smith, MS, DSc (*Boston University*) Chair, Health Sciences. Professor. Effects of aging, dehydration, and oral creatine supplementation on skeletal muscle metabolism using phosphorus magnetic resonance spectroscopy. Anatomy, physiology, and exercise science.

Sara Tomaszewski, PT, DPT, OCS (*Duke University*). Clinical Instructor. Orthopedics and sports physical therapy, injury prevention, and return-to-sport decision making.

Sarah Wenger, PT, DPT, OCS (*Arcadia University; Temple University*) Coordinator, Professional Practice Lab. Assistant Clinical Professor. Health, wellness and fitness, models for preventative physical therapy, dance medicine.

Glenn Williams, PT, PhD, ATC (*University of Delaware*) Chair, Department of Physical Therapy & Rehabilitation Sciences. Associate Professor. Neuromuscular plasticity after joint injury, orthopaedic-sports rehabilitation, human performance, post-traumatic osteoarthritis.

Emeritus Faculty

Margo Orlin, PT, PhD, FAPTA (*Drexel University*). Associate Professor Emeritus. Walking and running biomechanics and participation in children with developmental disabilities, evaluation of enhancing participation for children and adolescents with cerebral palsy.

Robert J. Palisano, PT, ScD, FAPTA (*Boston University*). Distinguished Professor. Classification and prognosis for gross motor function in children and youth with cerebral palsy; interventions to improve activity and participation in children with physical disabilities; transition to adulthood for youth with disabilities.

Patricia Rubertone, PT, MPT, MSW, EdD (*Widener University*) Director of Experiential Learning. Associate Clinical Professor Emerita. Student learning; course design; judgment of physical therapy student clinic performance by novice vs. experienced clinical instructors.

Susan Smith, PT, PhD (*University of Connecticut, Texas Woman's University*). Associate Professor and Dean Emerita. Geriatrics: health promotion and interventions for manifestations of low bone mass; assessment of fall risk and fall prevention interventions for older adults

Certificate of Advanced Study in Complementary and Integrative Therapies

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 12.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.3300

Standard Occupational Classification (SOC) Code: 29-1199

About the Program

The Certificate of Advanced Study in Complementary and Integrative Therapies (CIT) program is designed to provide practicing healthcare professionals with an "evidence-based program" in complementary and integrative therapies. This knowledge will allow them to assess, guide and evaluate patient use and to integrate CIT into their professional practice. The program provides students with the cultural and theoretical basis for applying complementary and integrative therapies while focusing on the skills and techniques of specific therapies.

This program is applicable to a wide range of healthcare professionals including nurses, nurse practitioners, physician's assistants, creative arts therapists, couple and family therapists, women's health practitioners, members of oncology organizations, members of AHNA and more. Admission requires a minimum of a bachelor's degree from an accredited college or university.

The program content is congruent with the educational standards set forth by the American Association of Holistic Nurses (AHNA) and the Foundations in Clinical Aromatherapy course adheres to the educational standards (level one) set forth by the National Association for Holistic Aromatherapy (NAHA).

American Holistic Nurses Credentialing Corporation, Inc. (<http://www.ahncc.org/school-endorsement-program/current-endorsed-nursing-programs/>) has endorsed Drexel University's Complementary and Integrative Health Master's and Certificate Programs, which allows graduates of these programs to sit for the nationally accredited board certification in holistic nursing.

Features and Benefits:

- Embraces the foundational principles of holistic Integrative care, focusing on the mind, body, spirit approach to achieve optimal health and healing within the framework of conventional healthcare.
- Courses are taught by internationally-recognized leaders in Complementary and Integrative Therapies and faculty trained in both conventional healthcare and integrative therapies.
- Program is taught wholly online in a highly dynamic learning format that engages students.

Admission Requirements:

Individuals submitting an application must fulfill the following:

- 2.75 GPA or above on all previous coursework
- Minimum of a bachelor's degree from an accredited college or university
- Official transcripts from all universities or colleges attended
- Nurse, physician assistants, and other healthcare professionals who hold licensure or a certificate: copy of license, eligibility for licensure, or certificate
- Current resume or curriculum vitae
- One professional letter of recommendation from either previous or immediate supervisors or former faculty members who can attest to your clinical knowledge, skill, and potential aptitude for graduate study
 - References will not be accepted from colleagues or family members.
- Personal statement (no more than two pages and no less than one page double-spaced) that will give the admissions committee a better understanding of the followings:

- Why you are choosing this particular program of study
- Your plans upon completion of the certificate
- How your current work experience will enhance your experience in this program
- International students will need to meet university international student admissions guidelines, including TOEFL Program Requirements.

Program Requirements

Required Courses

CIT 501	Foundations of Phytotherapy	3.0
CIT 502	Foundations of Complementary and Integrative Therapies	3.0
CIT 503	Holistic Living For The Caregiver	3.0
Select one of the following:		3.0
CIT 511	Spirituality, Health and Healing	
CIT 512	Body Movement Therapies	
CIT 513	Yoga for the Enlightened Practitioner	
CIT 552	Integrative Advanced Relaxation Techniques (I-ART)	
CIT 600	Foundations in Clinical Aromatherapy	
CIT 602	Women's Integrative Health	
CIT 617	Qigong: Bio-energy Therapy	
CIT 618	Principles of Holistic Nursing	
CIT 619	Principles of Bioenergy Therapies	
CIT 620	Integrative Meditation: Where East Meets West	
CIT 628	Special Topics in Complementary and Integrative Therapies	
CIT 690	Independent Study	
Total Credits		12.0

Certificate in Forensic Trends and Issues in Contemporary Healthcare

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 9.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 43.0106

Standard Occupational Classification (SOC) Code: 19-4092

About the Program

NOTE: This program is currently undergoing revision and therefore no applications will be accepted for the 2019-2020 academic year. Please check back in summer 2020 for an update.

The certificate program examines contemporary trends and issues related to the wide range of interpersonal violence, crime and sudden violent death that may be encountered in a variety of healthcare settings. Theoretical tenets, methods for assessment and related implications for intervention and/or referral will be examined from a multifaceted perspective—including that of the offender, crime victim, families, and the healthcare community-at-large.

Program Goals

- Examine social attitudes and perceptions toward victimization and offending behavior;
- Identify the psychological, physical and legal aspects of victimization;
- Assess victim trauma and identify appropriate interventions for victimized clients;
- Assess the motivational intent and behavior patterns of offenders who commit aggressive crimes;
- Analyze institutional approaches and subsequent response patterns to victims and offenders in a variety of settings (e.g., inpatient, outpatient, primary care settings, academic, etc.);
- Assess ethical dimensions of healthcare issues relative to the role and scope of practice and healthcare providers;
- Examine healthcare policy assessment, development and/or modification to enhance health promotion of offenders and victims across the lifespan.

Admission Requirements

Admission to this program requires completion of a BS/BA degree. The program is intended for providers and educators in the healthcare sciences, as well as professionals who have direct contact with victims and/or offenders across disciplines and areas of practice (e.g. social workers, criminal justice, police, high school teachers, etc). The program is open to practitioners, graduate student and healthcare educators across the continuum of specialties and agencies.

- 2.75 GPA or above on all previous coursework
- A baccalaureate degree with a major in a health-related field from an accredited college or university
- Official transcripts from all universities or colleges attended
- A copy of your United States RN license (License verification from your nursing license registry website is acceptable)
- Current Resume/CV
- One professional letter of recommendation from either previous or immediate supervisors or former faculty members who can attest to your clinical knowledge, skill, and potential aptitude for graduate study
 - References will not be accepted from colleagues or family members.
- Personal statement (no more than two pages and no less than one page double-spaced) that will give the admissions committee a better understanding of the followings:
 - Why you are choosing this particular program of study
 - Your plans upon completion of the certificate

- How your current work experience will enhance your experience in this program

TOEFL Requirement

International applicants, as well as immigrants to the United States and US permanent residents whose native language is not English and who have not received a bachelor's degree or higher in the United States, Australia, Canada, Ireland, New Zealand, or the United Kingdom, must show proficiency in English speaking as well as listening, writing, and reading. American citizens born on US military bases abroad may be waived from the TOEFL requirements after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

- If you take the TOEFLiBT exam, you must have a minimum combined score for the listening, writing, and reading sections of 79 plus a speaking section score of 26 or higher.
- If you take the TOEFL, you must have a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher.

Program Requirements

Requirements (choose 3)		9.0
IPS 519	Forensic Science Foundations	
IPS 528	Victimology – Contemporary Trends	
IPS 533	Forensic Mental Health	
IPS 670	Interdisciplinary Perspectives of Health Law	
Total Credits		9.0

Post-Master's Certificate in Geriatrics

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's Certificate

Number of Credits to Completion: 20.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.0912

Standard Occupational Classification (SOC) Code: 29-1071

About the Program

The PA Post-Master's Certificate in Geriatrics consists of three didactic courses and one clinical practicum (20.0 quarter credit hours). The certificate program is offered part-time for working professionals and is one year in length; the program begins in the Winter Term of each year (January), and runs through the Fall term of the following year (December).

The three didactic courses are offered online, and the clinical practicum in geriatrics is a supervised clinical practice experience.

The PA Post-Master's Certificate in Geriatrics program is designed to:

- enhance the knowledge and skills of Physician Assistants in clinical geriatrics
- build competencies in patient-centered, evidence-based clinical practice
- improve access to high-quality geriatric care

Admission Requirements

Applicants to the PA Post-Master's Certificate (PMC) program in geriatrics must be/have:

- Master's degree (minimum GPA 3.0)
- Graduate of an ARC-PA accredited PA Program
- Current NCCPA certificate
- Active, unrestricted license for clinical practice as a Physician Assistant (PA)
- Minimum of one year of clinical practice as a PA
- Transcripts from all universities, colleges, post-secondary educational institutions
- Personal statement describing reasons for pursuing the PMC and professional goals/plans
- Two letters of reference

Program Requirements

PA 810	Clinical Applications of Geriatric Physiology	5.0
PA 811	Geriatrics I	5.0
PA 812	Geriatrics II	5.0
PA 819	Geriatrics Clinical Practicum	5.0
Total Credits		20.0

Sample Plan of Study

Term		Credits
Term 1	PA 819	5.0
	Term Credits	5.0
Term 2	PA 810	5.0
	Term Credits	5.0
Term 3	PA 811	5.0
	Term Credits	5.0
Term 4	PA 812	5.0
	Term Credits	5.0
Total Credit:		20.0

Additional Information

Additional information is available on the Drexel University Online (<http://online.drexel.edu/online-degrees/certificateprograms.aspx>) website or the College of Nursing and Health Professions (<http://www.drexel.edu/cnhp/academics/post-masters/>) website.

Certificate of Advanced Study in Holistic Hospice and Palliative Care

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 12.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.3306

Standard Occupational Classification (SOC) Code: 29-1199

NOTE: This program is currently undergoing revision and therefore no applications will be accepted for the 2019-2020 academic year. Please check back in summer 2020 for an update.

About the Program

The Certificate of Advanced Study in Holistic Hospice and Palliative Care provides students with a mind-body-spirit approach to end-of-life care. Graduates of the program develop mastery in providing compassionate spiritual care to patients and their families.

The use of Complementary and Integrative Therapies (CIT) within the scope of end-of-life care provides practitioners the tools needed to treat the holistic spectrum of the patient and their family, while integrating an effective and efficient delivery of care. The program's curriculum focuses on evidenced-based complementary and integrative therapy approaches that can be integrated within the framework of conventional healthcare practice.

Features and Benefits:

- This holistic program is driven by the principle of patient-centered care that provides compassionate and supportive integrative care to both the patient and their family.
- Courses are taught by internationally recognized leaders in Complementary and Integrative Therapies and faculty trained in both conventional healthcare and integrative therapies.
- Courses are offered wholly online in a highly dynamic learning format that engages students.

American Holistic Nurses Credentialing Corporation, Inc. (<http://www.ahncc.org/school-endorsement-program/current-endorsed-nursing-programs/>) has endorsed Drexel University's Complementary and Integrative Health Master's and Certificate Programs, which allows graduates of these programs to sit for the nationally accredited board certification in holistic nursing.

Admission Requirements:

- 2.75 GPA or above on all previous coursework
- A baccalaureate degree with a major in a health-related field from an accredited college or university
- Official transcripts from all universities or colleges attended
- Nurse, nurse practitioner, physician assistants, and other healthcare professionals who hold licensure or a certificate: copy of license, eligibility for licensure, or certificate
- Current resume or curriculum vitae
- One professional letter of recommendation from either previous or immediate supervisors or former faculty members who can attest to your clinical knowledge, skill, and potential aptitude for graduate study
 - References will not be accepted from colleagues or family members.
- Personal statement (no more than two pages and no less than one page double-spaced) that will give the admissions committee a better understanding of the followings:
 - Why you are choosing this particular program of study
 - Your plans upon completion of the certificate
 - How your current work experience will enhance your experience in this program
- International students will need to meet university international student admissions guidelines, including TOEFL Program Requirements.

Certificate of Advanced Study in Integrative Addiction Therapies

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Bacaleaureate

Number of Credits to Completion: 12.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.3300

Standard Occupational Classification (SOC) Code: 29-1199

NOTE: This program is currently undergoing revision and therefore no applications will be accepted for the 2019-2020 academic year. Please check back in summer 2020 for an update.

About the Program

The Certificate of Advanced Study in Integrative Addiction Therapies prepares healthcare professionals to treat patients suffering from substance use disorders within the holistic spectrum by healing the body, mind, and spirit. Students will learn to integrate evidence-based complementary and integrative therapies (CIT) such as nutritional neuroscience, neurofeedback, meditation, auricular acupuncture, and Qigong bioenergy therapies within the framework of conventional healthcare. These integrative therapies will enable healthcare practitioners to incorporate innovative, caring and holistic methods to an underserved population.

Substance use disorders are among this country's most ubiquitous health and social issues. This cutting edge program is designed to empower practitioners to utilize complementary and integrative therapies within the scope of conventional healthcare practice to treat substance use disorders and enhance patient outcomes. It will provide practitioners the tools needed to treat the substance use disorder patient (and their family) within the holistic spectrum, healing body, mind and spirit.

A holistic, integrative treatment program for addiction requires combining neuronutritional treatment with other facets (bio, psycho, social, spiritual, economic), including counseling and education to support lifestyle change.

Features and Benefits:

- This ground-breaking Integrative Addiction Therapies program is the first program of its kind worldwide.
- It is the first program to offer future addiction healthcare professionals the skills needed to help their patients achieve health and recovery within the holistic spectrum healing mind, body and spirit, using natural and integrative methods.
- Courses are taught by internationally recognized leaders in Complementary and Integrative Therapies and distinguished psychotherapists in the field of Integrative Addiction Therapies.
- Courses are offered wholly online in a dynamic and interactive learning environment.

American Holistic Nurses Credentialing Corporation, Inc. (<http://www.ahncc.org/school-endorsement-program/current-endorsed-nursing->

programs/) has endorsed Drexel University's Complementary and Integrative Health Master's and Certificate Programs, which allows graduates of these programs to sit for the nationally accredited board certification in holistic nursing.

Admission Requirements:

Post-Master's Certificate in Music Therapy

Certificate Level: Graduate

Admissions Requirements: Master's degree

Certificate Type: Post-Master's Certificate

Number of Credits to Completion: 53.5

Instructional Delivery: Campus

Calendar Type: Quarter

Expected Time to Completion: 3 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 51.2305

Standard Occupational Classification (SOC) Code: 29-1129

About the Program

The Post-Master's Certificate (PMC) in Music Therapy is designed for students who hold a Master's degree in mental health counseling, and want to make the transition to Board Certified Music Therapist, or integrate Music Therapy approaches into their counseling practice. Students who successfully complete the certificate program are eligible for Board Certification through the Certification Board for Music Therapist, a nationally recognized and transferable credential. While an undergraduate degree in Music Therapy or a music-related field is not required to be eligible for the PMC in Music Therapy, applicants must pass a music audition. Upon review of applicant's transcript, additional coursework may be required to meet board certification requirements.

Students in the PMC program take classes alongside students in the Master of Arts in Music Therapy & Counseling program. Through a balance of classroom education and clinically supervised practicum and internship experiences, students develop a strong foundation for skilled clinical practice. The 53.5 quarter-credit curriculum includes music therapy coursework in areas such as clinical musicianship; clinical improvisation; theories and methods for children, adolescents, adults and older adults, and technological applications.

Music therapists use music within a therapeutic relationship to address physical, emotional, cognitive and social needs of individuals. Research shows that music therapy is an effective treatment for children, adolescents, adults, and older adults with mental health needs, developmental and learning disabilities, Alzheimer's disease and other aging-related conditions, substance abuse problems, acute and chronic pain, and brain injuries. Graduates of the MA in Music Therapy & Counseling program go on to work in a variety of clinical environments, including but not limited to: medical and behavioral health in-patient and out-patient settings; community health and wellness centers; schools and afterschool programs; trauma-informed settings; correctional facilities; elder care facilities, and private practices. Students also pioneer new frontiers in therapy application through clinical work and research.

Admissions

For additional information about the program, visit the College of Nursing and Health Professions' Post-Master's Certificate in Music Therapy website. Admission requirements for the certificate program are similar to those for the MA program in Music Therapy (p. 119). For additional information about admission to the program, visit the College of Nursing and Health Professions' Creative Arts Therapies (<https://www.drexel.edu/cnhp/academics/departments/Creative-Arts-Therapies/>) web site.

Post-Master's Certificate in Nurse Anesthesia

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's Certificate

Number of Credits to Completion: 71.0

Instructional Delivery: Campus

Calendar Type: Quarter

Expected Time to Completion: 3 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 51.3804

Standard Occupational Classification (SOC) Code: 29-1151

About the Program

The Post Master's Certificate (PMC) in Nurse Anesthesia program is a full-time program that offers 6.0 theoretical nursing and research credits, 9.0 quarter credit basic science component, 31.0 quarter credits of a didactic anesthesia component and a 25.0 credits in a clinical component. Upon successful completion program outcomes student is awarded a post master's certificate in nurse anesthesia and is eligible to take the national certification examination offered by the National Board of Certification and Recertification of Nurse Anesthetists (NBCRNA).

The nurse anesthesia program is accredited by the:

Council on Accreditation of Nurse Anesthesia Educational Programs
222 S. Prospect Ave, Suite 304
Park Ridge, IL 60068
847-692-7050

Admission Requirements

This certificate program is offered to those individuals who have earned a master's degree in nursing and seek further preparation in nurse anesthesia. Transcripts are reviewed and course work is determined on an individual basis. Contact the College of Nursing for more specific admission requirements (<https://www.drexel.edu/cnhp/academics/post-masters/Certificate-PM-Nurse-Anesthesia/>).

Required courses

NURS 503	Basic Principles of Nurse Anesthesia	3.0
NURS 504	Overview of Nurse Anesthesia	3.0
NURS 505	Chemistry and Physics	2.0
NURS 507	Nurse Anesthesia Pharmacology I	3.0
NURS 508	Nurse Anesthesia Clinical Practicum I	1.0

NURS 510	Advanced Principles of Nurse Anesthesia I	3.0
NURS 511	Nurse Anesthesia Pharmacology II	3.0
NURS 512	Nurse Anesthesia Clinical Practicum II	1.0
NURS 515	Advanced Principles of Nurse Anesthesia II	3.0
NURS 516	Nurse Anesthesia Clinical Practicum III	2.0
NURS 517	Nurse Anesthesia Clinical Practicum IV	3.0
NURS 518	Advanced Principles of Nurse Anesthesia III	3.0
NURS 521	Advanced Pathophysiology I	3.0
NURS 522	Advanced Pathophysiology II	3.0
NURS 523	Advanced Pathophysiology III	3.0

Clinical Nurse Leader Post-Master's Certificate

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's Certificate

Number of Credits to Completion: 30.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 51.3801

Standard Occupational Classification (SOC) Code: 29-1141

About the Program

The Clinical Nurse Leader (CNL) oversees care coordination of a distinct group of patients, is a resource for clinical decision making, and serves as a lateral integrator of care. This clinical leader puts evidence-based practice into action to ensure that patients benefit from the latest innovations in care delivery. The CNL collects and evaluates patient outcomes, assesses cohort risk, and has the decision-making authority to change care plans when necessary. This clinician functions as part of an interdisciplinary team by communicating, planning, and implementing care directly with other health care professionals including physicians, pharmacists, social workers, therapists, clinical nurse specialists, and nurse practitioners. The CNL is a leader in the health care delivery system across all setting in which health care is delivered.

Students in this certificate program have the opportunity to learn about healthcare management, policy and quality improvement at the point of care with individuals seeking health care, while obtaining knowledge of healthcare systems, finance and economics. In addition, students will be given the opportunity to learn about advanced clinical assessment, pathophysiology, and advanced pharmacology, if not taken as part of their original MSN.

Students will also learn about designing and redesigning client care based on evidence-based knowledge and analysis of outcomes, as well as gain knowledge of healthcare reimbursement and issues in planning care across the lifespan, as well as the following:

- Application of tools for risk analysis
- Utilize epidemiological methodology to collect data and knowledge acquisition in planning quality improvement programs
- Manage and develop therapeutic partnerships
- Develop, monitor disease management programs to support improved outcomes

Admission Requirements

- Masters degree (MSN) from a program fully accredited by NLN and/or CCNE
- Official transcripts from all previous educational institutions required
- Personal statement (no more than two pages and no less than one page double-spaced) that will give the admissions committee a better understanding of the followings:
 - Why you are choosing this particular program of study
 - Your plans upon completion of the certificate
 - How your current work experience will enhance your experience in this program
- Curriculum Vitae or resume
- GPA of 3.0 or above on all previous coursework
- One professional letter of recommendation from either previous or immediate supervisors or former faculty members who can attest to your clinical knowledge, skill, and potential aptitude for graduate study
 - References will not be accepted from colleagues or family members.

TOEFL Requirements

International applicants, as well as immigrants to the United States and US permanent residents whose native language is not English and who have not received a bachelor's degree or higher in the United States, Australia, Canada, Ireland, New Zealand, or the United Kingdom, must show proficiency in English speaking as well as listening, writing, and reading. American citizens born on U.S. military bases abroad may be waived from the TOEFL requirement after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

- If you take the TOEFLiBT exam, you must have a minimum combined score for the listening, writing, and reading sections of 79 plus a speaking section score of 26 or higher.
- If you take the TOEFL, you must have a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher.

The 3 P's (Advanced Pharm, Advanced Pathophysiology and Advanced Clinical Physical Assessment) may be waived if taken within 5 years.

Program Requirements

NURS 531	Epidemiology in Action: Tracking Health & Disease	3.0
NURS 532	Evaluation of Health Outcomes	3.0
NURS 548	Advanced Pathophysiology	3.0
NURS 549	Advanced Pharmacology	3.0
NURS 550	Advanced Health Assessment & Diagnostic Reasoning	4.0
NURS 602	Foundations for Clinical Nurse Leader	4.0
NURS 603	Clinical Nurse Leader Capstone Immersion I	5.0

NURS 604	Clinical Nurse Leader Capstone Immersion II	5.0
Total Credits		30.0

Post-Baccalaureate Certificate in Nursing Innovation

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 18.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 51.3801

Standard Occupational Classification (SOC) Code: 29.1141

About the Program

NOTE: This program is currently undergoing revision and therefore no applications will be accepted for the 2019-2020 academic year. Please check back in summer 2020 for an update.

This Nursing Innovation Certificate program is for individuals who want to understand the theories of innovation, examine some successful and failed innovations, as well as learn what it takes to be a successful intra/entrepreneur. This program is ideal for the student who seeks to re-invent and innovate in nursing practice in a variety of roles, as clinician, educator, administrator, clinical scientist, or in the business environment of healthcare. This certificate is available for individuals that hold a Bachelor's degree.

This program provides a five-course grouping of classes focusing on re-inventing and promoting innovative nursing practice in a variety of roles, as clinician, educator, administrator, clinical scientist or in the business environment of healthcare. Courses are chosen from the MSN in Nursing Innovation. It is designed to emphasize entrepreneurial and intrapreneurial approaches to advanced nursing practice.

Admission Requirements:

- 2.75 GPA or above on all previous coursework
- A baccalaureate degree with a major in a health-related field from an accredited college or university
- Official transcripts from all universities or colleges attended
- A copy of your United States RN license (License verification from your nursing license registry website is acceptable)

- Current Resume/CV
- One professional letter of recommendation from either previous or immediate supervisors or former faculty members who can attest to your clinical knowledge, skill, and potential aptitude for graduate study
 - References will not be accepted from colleagues or family members.
- Personal statement (no more than two pages and no less than one page double-spaced) that will give the admissions committee a better understanding of the followings:
 - Describe your proposed capstone project.
 - Would your capstone project be intrapreneurial or entrepreneurial?
 - Is your capstone a project, program, or product?
 - Who is your target audience?
- International students will need to meet university international student admissions guidelines, including TOEFL Program Requirements.

Program Requirements

Required Courses

NURS 564	The Business of Healthcare	3.0
NURS 586	Innovation in Advanced Nursing Practice: Theory and Application	3.0
NURS 587	Case Studies in Intra/Entrepreneurship and Innovation in Nursing	3.0
NURS 652	Innovation Capstone Project	6.0
PROJ 501	Introduction to Project Management	3.0
Total Credits		18.0

Post-Baccalaureate Certificate in Integrated Nursing Care of Autism Spectrum Disorder (ASD)

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post Baccalaureate

Number of Credits to Completion: 9.0 - 12.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 51.3801

Standard Occupational Classification (SOC) Code: 29-1141

About the Program

NOTE: This program is currently undergoing revision and therefore no applications will be accepted for the 2019-2020 academic year. Please check back in summer 2020 for an update.

Autism spectrum disorder (ASD) is a condition that has significant health implications across the lifespan for affected people and for family members.

This certificate program focuses specifically on the *integrated care* of the complex health problems of people affected by autism spectrum disorder, as well as the collaborations among patients, families, and healthcare providers. The program prepares students to pursue a highly innovative role in an area of practice in which the value of nursing care needs to be developed. Graduates of the certificate program will reshape how care is provided to people with ASD in multiple settings across the lifespan.

This post-baccalaureate certificate is designed for nurses already working in fields such as pediatrics, family practice, mental health, and school nursing. Students in master's programs may pursue this certificate as a graduate minor to achieve a specialization in autism spectrum disorder nursing care. Students in the master's programs may also take courses to fulfill elective requirements.

Goals and Objectives

- To provide nurses with information on the nursing care across the lifespan of people with autism spectrum disorders.
- To examine the prevalence, etiology, and clinical characteristics of autism spectrum disorder in the context of the family and team approach to care.
- To integrate scientific and evidence based knowledge of autism spectrum disorder with the clinical skills of the registered nurse working with this population across the lifespan.
- To integrate scientific and evidence based knowledge of autism spectrum disorder with the clinical skills of the registered nurse who specialized in the adult population.
- To formulate a practice philosophy and long term professional agenda in ASD care to include practice, education, and research.

Curriculum

Required course work for the Certificate in Integrated Nursing Care of Autism Spectrum Disorder is dependent upon the desired focus of study.

Admission Requirements

- Bachelor's Degree from a fully accredited program.
- 2.75 GPA or above on all previous coursework.
- Official transcripts from all previous educational institutions required.
- A copy of your United States RN license (License verification from your nursing license registry website is acceptable).
- Personal statement (no more than two pages and no less than one page double-spaced) that will give the admissions committee a better understanding of the followings:
 - Why you are choosing this particular program of study
 - Your plans upon completion of the certificate
 - How your current work experience will enhance your experience in this program
- Curriculum Vitae or Resume.
- One professional letter of recommendation from either previous or immediate supervisors or former faculty members who can attest to your clinical knowledge, skill, and potential aptitude for graduate study.
 - References will not be accepted from colleagues or family members.

TOEFL Requirement

International applicants, as well as immigrants to the United States and U.S. permanent residents whose native language is not English and who have not received a bachelor's degree or higher in the United States, Australia, Canada, Ireland, New Zealand, or the United Kingdom, must show proficiency in English speaking as well as listening, writing, and reading. American citizens born on U.S. military bases abroad may be waived from the TOEFL requirement after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

- If you take the TOEFLiBT exam, you must have a minimum combined score for the listening, writing, and reading sections of 79 plus a speaking section score of 26 or higher.
- If you take the TOEFL, you must have a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher.

Classification of Instructional Program (CIP) Code: 51.3817

Standard Occupational Classification (SOC) Code: 25-1072

About the Program

This certificate program provides a four-course grouping of classes that focus on knowledge and skills required for nurse educator roles. Courses are chosen from the MSN in Nursing Education curriculum. Upon completion of this certificate program, the student will have 12.0 graduate credits from an NLN/CCNE-approved master's in nursing program.

Admission Requirements

- Bachelor's Degree from a fully accredited program.
- 2.75 GPA or above on all previous coursework.
- Official transcripts from all previous educational institutions required.
- A copy of your United States RN license (License verification from your nursing license registry website is acceptable)
- Personal statement (no more than two pages and no less than one page double-spaced) that will give the admissions committee a better understanding of the followings:
 - Why you are choosing this particular program of study
 - Your plans upon completion of the certificate
 - How your current work experience will enhance your experience in this program
- Curriculum Vitae or Resume.
- One professional letter of recommendation from either previous or immediate supervisors or former faculty members who can attest to your clinical knowledge, skill, and potential aptitude for graduate study
 - References will not be accepted from colleagues or family members.

TOEFL Requirement

International applicants, as well as immigrants to the United States and U.S. permanent residents whose native language is not English and who have not received a bachelor's degree or higher in the United States, Australia, Canada, Ireland, New Zealand, or the United Kingdom, must show proficiency in English speaking as well as listening, writing, and reading. American citizens born on U.S. military bases abroad may be waived from the TOEFL requirement after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

- If you take the TOEFLiBT exam, you must have a minimum combined score for the listening, writing, and reading sections of 79 plus a speaking section score of 26 or higher.
- If you take the TOEFL, you must have a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher.

Program Requirements

NURS 591	Foundations of Nursing Education	3.0
NURS 606	Curriculum Design for Higher Level Cognition	3.0
NURS 613	The Role and Responsibility of the Nursing Professor	3.0
or NURS 616	Teaching Methods in Nursing Education	
NURS 615	Assessment, Measurement and Evaluation	3.0
Total Credits		12.0

Leadership in Health Systems Management

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 12.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 51.3817

Standard Occupational Classification (SOC) Code: 25-1072

About the Program

This certificate program focuses on development of a leadership style and skills set essential for individuals in or seeking administrative roles. The program provides a four-course grouping of classes from the MSN in Nursing Leadership in Health Systems Management curriculum. Selected classes provide essential skills for supervisory and management positions that help professionals perform in their expanded roles and grow as emerging leaders.

Emphasis will be placed on fiscal and organizational management, strategic planning, integrated quality outcomes measurement, organizational structures, marketing, and management of human resources within organizations. The program provides the student with information and strategies to problem solve, make decisions, resolve conflict and operationalize the mission and goals of the healthcare delivery organization.

Admission Requirements

- Bachelor's Degree from a fully accredited program.
- Current, unrestricted United States RN license.
- 2.75 GPA or above on all previous coursework.
- Official transcripts from all previous educational institutions required.
- Personal statement (no more than two pages and no less than one page double-spaced) that will give the admissions committee a better understanding of the followings:
 - Why you are choosing this particular program of study
 - Your plans upon completion of the certificate
 - How your current work experience will enhance your experience in this program
- Curriculum Vitae or Resume.
- One professional letter of recommendation from either previous or immediate supervisors or former faculty members who can attest to your clinical knowledge, skill, and potential aptitude for graduate study.
 - References will not be accepted from colleagues or family members.

Adult-Gerontology Acute Care Nurse Practitioner Post-Master's Certificate

Certificate Level: Graduate
Admission Requirements: Master's degree
Certificate Type: Post-Master's
Number of Credits to Completion: 39.0; 800 clinical hours
Instructional Delivery: Online
Calendar Type: Quarter
Expected Time to Completion: 2 years
Financial Aid Eligibility: Aid eligible
Classification of Instructional Program (CIP) Code: 51.3822

Standard Occupational Classification (SOC) Code: 29-1171

About the Program

The online Adult-Gerontology Acute Care Nurse Practitioner (AGACNP) program is designed to prepare practitioners for professional practice in the acute management of medical, surgical, and critical care adult-older adult patient populations. This certificate is offered to those individuals who have earned a master's degree in nursing and seek further preparation as an Adult Gerontology Acute Care Nurse Practitioner. Graduates will be eligible to sit for the AACN and/or ANCC's Adult Gerontology Acute Care Certification Examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulation, and evaluation. OCI visits occur 2-4 times during the clinical portion of the program and range from 2-3 days. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab. These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

Program Requirements

Required Courses		
Support Courses		
NURS 548	Advanced Pathophysiology	3.0
NURS 549	Advanced Pharmacology	3.0
NURS 550	Advanced Health Assessment & Diagnostic Reasoning	4.0
NURS 664	Professional Issues for Nurse Practitioners	1.0
Concentration Courses		
NURS 554	Pharmacology for Adult-Gerontology Acute Care Nurse Practitioners	3.0
NURS 570	Adult Gerontology Acute Care NP I: Introduction to Adult Gerontology Acute Care Medicine	5.0
NURS 571	Adult Gerontology Acute Care Nurse Practitioner II: Mgmt/Care of Patients in Acute/Crit Care Med Set	5.0
NURS 572	Adult Gerontology Acute Care Nurse Practitioner III: Mgmt/Care of Patients in Acute Surgical Setting	5.0
NURS 573	Adult Gerontology Acute Care NP IV: Management of Care of Patients in Critical Care Settings	5.0
NURS 580	Adult Gero Acute Care NP V: Mgmt/Care of Clients in Acute, Critical Care, Med or Surg Settings	5.0
Total Credits		39.0

Adult-Gerontology Primary Care Nurse Practitioner Post-Master's Certificate

Certificate Level: Graduate
Admission Requirements: Master's degree
Certificate Type: Post-Master's
Number of Credits to Completion: 34.0; 640 clinical hours
Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 51.3822

Standard Occupational Classification (SOC) Code: 29-1171

About the Program

The Post-Master's Certificate in Adult-Gerontology Primary Care (AGPC) Nurse Practitioner program is intended for MSN prepared professionals who would like to gain further knowledge in the primary care continuum. It is designed to prepare practitioners who will take advanced nursing roles as clinicians, educators, researchers, and leaders in the rapidly changing, evidence-driven healthcare environment. Emphasis is placed on evidence-based practice, interdisciplinary collaboration, and critical use of evolving technology. Graduates will be prepared to provide care for adults throughout their lifespan to promote maximal health, reduce risks and manage acute and chronic health conditions.

All graduates will be eligible to sit for the certification exam as an Adult-Gerontology Primary Care Nurse Practitioner through the American Academy of Nurse Practitioners (AANP) and/or American Nurses Credentialing Center (ANCC).

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulation, and evaluation. OCI visits occur 2-4 times during the clinical portion of the program and range from 2-3 days. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab. These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

Program Requirements

Family/Individual Across the Lifespan Nurse Practitioner Post-Master's Certificate

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's

Number of Credits to Completion: 38.0 quarter credits; 720 clinical hours

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 51.3805

Standard Occupational Classification (SOC) Code: 29-1171

About the Program

The Family/Individual Across the Lifespan Nurse Practitioner (FNP) online program focuses on the application of advanced-practice nursing knowledge -- including physical, psychosocial, and environmental assessment skills -- to manage common health and illness problems of clients of all ages and their families. This certificate is offered to those individuals who have earned a master's degree in nursing and seek further preparation to become a Family/Individual Across the Lifespan Nurse Practitioner (FNP). Graduates will be eligible to sit for the AANP's Family/Individual Across the Lifespan Nurse Practitioner Certification Examination and/or the ANCC's Family/Individual Across the Lifespan Nurse Practitioner Certification Examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On-Campus Intensive (OCI) learning experiences, simulation, and evaluation. OCI visits occur 2-4 times during the clinical portion of the program and range from 2-3 days. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab. These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

Pediatric Acute Care Nurse Practitioner Post-Master's Certificate

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's

Number of Credits to Completion: 39.0; 800 clinical hours

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 51.3809

Standard Occupational Classification (SOC) Code: 29-1171

About the Program

The Pediatric Acute Care Nurse Practitioner Certificate is an elite post-graduate program that prepares students to deliver advanced care to infants, children and adolescents with acute, critical, and complex health conditions. Students will build upon primary care experience through courses that emphasize evidence-based practice, interdisciplinary collaboration, and the critical use of new technology. The program's curriculum was developed and is taught by Drexel University's renowned faculty from the nationally ranked College of Nursing and Health Professions. Upon completing the program, graduates pursue practice roles across the continuum of acute care services ranging from high-acuity hospital based emergency or intensive care settings to specialty based practices. Graduates are eligible to sit for the PNCB's Pediatric Acute Care Nurse Practitioner Certification Examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulation, and evaluation. Students are required to attend On-Campus visits during the clinical course work within the curriculum. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab. These visits provide guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

Pediatric Primary Care and Pediatric Acute Care Dual Nurse Practitioner Post-Master's Certificate

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's

Number of Credits to Completion: 44.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 51.3809

Standard Occupational Classification (SOC) Code: 29-1171

About the Program

The Pediatric Primary Care and Pediatric Acute Care Nurse Practitioner Program at Drexel University will prepare the Pediatric Nurse Practitioner to perform acts of medical diagnosis and treatment through didactic lectures, problem-based learning, clinical practice hours, standardized patient experiences and high-fidelity simulation.

This innovative dual option track coincides with the new models of healthcare delivery and the increasing demand for PNPs to provide care for children and their families across the entire continuum of health and illness, including acute critical conditions. The clinical practice settings for the dual certification track options provides students with a mixed inpatient/outpatient experience ranging from specialty clinics and primary care settings. Diverse clinical settings provide supervised clinical hours to allow the student advance practitioner to perform advanced physical assessment, critical thinking, diagnostic reasoning and management of care in collaboration with licensed physician and APN's in accredited institutions. Students graduating from this track will be eligible to sit for both the Pediatric Primary Care and the Pediatric Acute Care Board Certifications through the PNCB.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulation, and evaluation. Students are required to attend On-Campus visits during

the clinical course work within the curriculum. *Mandatory on-campus visits each quarter are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab. These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

Women's Health/Gender-Related Nurse Practitioner Post-Master's Certificate

Certificate Level: Graduate

Admission Requirements: Master's degree

Certificate Type: Post-Master's

Number of Credits to Completion: 37.0; 640 clinical hours

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 51.3822

Standard Occupational Classification (SOC) Code: 29-1171

About the Program

The online Women's Health/Gender Related Nurse Practitioner program supplies nurses with the skills necessary to provide advanced care to women and their partners throughout the lifespan with a specialized emphasis on reproductive and gynecologic health needs. Graduates are also qualified to provide a myriad of gender related services focusing on health promotion and disease prevention that range from well-woman care, prenatal and postpartum care, and common and complex women's

health issues in both primary settings and women's health specialty practices. Additionally, this track offers the opportunity for students to work in transdisciplinary simulated scenarios to promote a better understanding and respect of discipline-specific roles, improve existing communication and collaboration within disciplines, and initiate teamwork development in order to promote patient safety and high-quality patient care.

This certificate is offered to those individuals who have earned a master's degree in nursing and seek further preparation to become a Women's Health/Gender Related Nurse Practitioner (WH/GRNP). Graduates are eligible to sit for the NCC's Women's Health/Gender Related Nurse Practitioner Certification Examination.

The nurse practitioner faculty is committed to quality and excellence in the nurse practitioner (NP) programs. Students meet on campus for mandatory On Campus Intensive (OCI) learning experiences, simulation, and evaluation. OCI visits occur 2-4 times during the clinical portion of the program and range from 2-3 days. *Mandatory on-campus visits are essential to students transitioning into the NP role.*

During the On-Campus Intensives, students engage in simulated clinical learning experiences conducted in the College of Nursing and Health Professions' state-of-the-art, multidisciplinary patient simulation lab. These visits provide direct guidance and mentoring from faculty, as well as the opportunity to collaborate with peers.

Service to Veterans

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 18.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.3818
 Standard Occupational Classification (SOC) Code: 29-1141

NOTE: This program is currently undergoing revision and therefore no applications will be accepted for the 2019-2020 academic year. Please check back in summer 2020 for an update.

About the Program

This online certificate marks achievement of advanced understanding, comprehension and application of the issues surrounding the veteran or veteran family member who has returned from military service and is entering or has entered civilian life. This combination of six courses provides the learner with the necessary knowledge to identify specific health and learning needs of veterans, and to provide advocacy resources to help meet those needs. These courses will all be delivered through online instruction. By completing this certificate, the learner will be able to identify, refer and advocate for the veteran and veteran family members with necessary specialized skills and knowledge, to address many health and educational needs of this unique group.

Admission Requirements

- Bachelor's Degree from a fully accredited program.
- 2.75 GPA or above on all previous coursework.
- Official transcripts from all previous educational institutions required.
- Personal statement (no more than two pages and no less than one page double-spaced) that will give the admissions committee a better understanding of the followings:
 - Why you are choosing this particular program of study
 - Your plans upon completion of the certificate
 - How your current work experience will enhance your experience in this program
- Curriculum Vitae or Resume.
- One professional letter of recommendation from either previous or immediate supervisors or former faculty members who can attest to your clinical knowledge, skill, and potential aptitude for graduate study
 - References will not be accepted from colleagues or family members.

International Students: International applicants, as well as immigrants to the United States and U.S. permanent residents whose native language is not English and who have not received a bachelor's degree or higher in the United States, Australia, Canada, Ireland, New Zealand, or the United Kingdom, must show proficiency in English speaking as well as listening, writing, and reading. American citizens born on U.S. military bases abroad may be waived from the TOEFL requirement after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

- If you take the TOEFLiBT exam, you must have a minimum combined score for the listening, writing, and reading sections of 79 plus a speaking section score of 26 or higher.
- If you take the TOEFL, you must have a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher.

Program Requirements

Required Courses

IPS 548	Foundations in Transdisciplinary Professional Collaboration	3.0
IPS 549	The Military and Veteran Culture	3.0
IPS 551	Veteran Advocacy	3.0

Sexual Health and Wellness

Certificate Level: Graduate
Admission Requirements: Bachelor's degree
Certificate Type: Post-Baccalaureate
Number of Credits to Completion: 12.0
Instructional Delivery: Online
Calendar Type: Quarter
Expected Time to Completion: 1 year
Financial Aid Eligibility: Not aid eligible
Classification of Instructional Program (CIP) Code: 51.0001
Standard Occupational Classification (SOC) Code: 21.1091

NOTE: No applications will be accepted for the 2019-2020 academic year. Please check back in summer 2020 for an update.

About the Program

This program will prepare health professionals with the knowledge, skills, and attitudes required to provide comprehensive and sensitive sexual health care to their patients and their partners. Students who complete the certificate program will be able to discuss a wide range of patient sexual health issues, promote sexual wellness, and provide patient education on various sexual health topics.

This post-baccalaureate certificate should allow graduate students from various health-related programs of study to obtain a deeper knowledge base and improved skill set related to human sexuality. Not only can many sexual problems and dysfunctions be clinically managed to improve patient quality of life, but patient education, health promotion,

and risk reduction counseling can reduce negative and unintended consequences of sex while enhancing overall patient health and sexual wellness. Issues such as unwanted pregnancy, HIV and other sexually transmitted diseases, sexual assault and abuse, and lack of access to family planning, along with increased incidences of breast, gynecological and prostate cancers challenge health professionals across disciplines to increase their knowledge and skills to appropriately address the sexual health needs of their patients. In addition, greater social acceptance and legal protection for lesbian, gay, bisexual, and transgender (LGBT) individuals has increased the need for health professionals to combat health disparities and discrimination within these populations and better serve these clients.

The intended audience of this post baccalaureate certificate program is health professionals – both clinical and non-clinical who seek to specialize in sexual health and medicine. This program is designed to enhance the graduate education of physicians; nurse practitioners; physician assistants; nurses in inpatient, outpatient, or school settings; social workers; health educators; behavioral health counselors; and other health professionals. It is important to note that this program prepares the healthcare professional as a sexual health educator not as a sex therapist.

Admissions Requirements

- Bachelor's Degree from a fully accredited program.
- 2.75 GPA or above on all previous coursework or last 60 credits completed.
- Official transcripts from all previous educational institutions required.
- Personal statement (no more than two pages and no less than one page double-spaced) that will give the admissions committee a better understanding of the followings:
 - Why you are choosing this particular program of study
 - Your plans upon completion of the certificate
 - How your current work experience will enhance your experience in this program
- Curriculum Vitae or Resume.
- One professional letter of recommendation from either previous or immediate supervisors or former faculty members who can attest to your clinical knowledge, skill, and potential aptitude for graduate study
 - References will not be accepted from colleagues or family members.

International Students: International applicants, as well as immigrants to the United States and U.S. permanent residents whose native language is not English and who have not received a bachelor's degree or higher in the United States, Australia, Canada, Ireland, New Zealand, or the United Kingdom, must show proficiency in English speaking as well as listening, writing, and reading. American citizens born on U.S. military bases abroad may be waived from the TOEFL requirement after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

- If you take the TOEFLiBT exam, you must have a minimum combined score for the listening, writing, and reading sections of 79 plus a speaking section score of 26 or higher.
- If you take the TOEFL, you must have a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher.

Certificate in Substance Use Disorder Treatment

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 18.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.1501

Standard Occupational Classification (SOC) Code: 21-1011

About the Program

This certificate is designed for individuals with bachelor's degrees in psychology, social work, nursing, or other allied health professions who want to advance their knowledge of substance use disorders treatment and supervision practices. It is offered through the Counseling and Family Therapy Department's Behavioral Health Counseling Program within the College of Nursing and Health Professions of Drexel University, and is designed for individuals working in health care settings serving people with substance use disorders. The certificate requires the completion of six online courses for a total of 18.0 quarter credits. Completion of this

certificate does not in and of itself certify clinical expertise. The required coursework can also be applied toward a specialty focus area for students in the Innovations and Intra/Entrepreneurship Advanced Practice Nursing Track.

Each course focuses on a core competency needed to facilitate recovery from substance abuse. Students will acquire knowledge concerning the etiology of substance use behavior; the bio-psycho-social nature of addiction; substance use patterns across the lifespan and; recovery and relapse prevention. Students will also develop skills related to motivational enhancement, cognitive / behavioral change and workforce supervision.

Program goals

The goal of this certificate program is for students to:

- Gain an understanding of the bio-psycho-social dynamics of substance use;
- Develop evidence-based treatment competencies;
- Gain educational training hours to either obtain or maintain a credential as a drug/alcohol counseling professional.

In and of itself, this certificate does not take the place of supervised, clinical training, but rather serves as one of several possible components required to obtain a professional certification or clinical license to practice.

Program Requirements

Required Courses

BACS 534	Approaches to Substance Use Disorders	3.0
BACS 535	Motivational Enhancement Skills	3.0
BACS 540	Treatment Planning and Relapse Prevention	3.0

Certificate of Advanced Study in Women's Integrative Health

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 12.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 51.3300

Standard Occupational Classification (SOC) Code: 29-1199

NOTE: This program is currently undergoing revision and therefore no applications will be accepted for the 2019-2020 academic year. Please check back in summer 2020 for an update.

About the Program

The Certificate of Advanced Study in Women's Integrative Health provides healthcare professionals with a mind-body-spirit approach to care. Studies have shown that women desire a broader, integrative approach to their healthcare and share a philosophical congruence with Complementary and Integrative Health (CIH) core values. In this program, students learn to integrate evidence-based complementary and integrative health therapies such as phytomedicine, nutrition, mind/body, and energy therapy modalities within the framework of conventional healthcare practice.

Integrative healthcare reaffirms the importance of the relationship between practitioner and patient, focuses on the whole person, and utilizes all appropriate therapeutic approaches, both conventional biomedicine and CIH practices to achieve optimal health and healing. Women's Integrative Health provides a model of care that is most compatible and reflective of women's emotional and psychological needs in the health care relationship and prepares students to incorporate an innovative, caring and holistic spectrum of treatment. Students learn to explore the fullness of women's lives, taking into account a woman's beliefs, intuitions, and preferences for care which allows them to form a healing partnership, while providing their patients with the finest possible healthcare.

Features & Benefits:

- Courses are taught by leading women's integrative health practitioners and internationally-recognized experts in complementary and integrative therapies
- Offered by Drexel's top-ranked College of Nursing and Health Professions
- Pioneering program in women's integrative health is the first university program to offer practitioners evidenced-based integrative treatment
- Coursework is designed for nurse practitioners, nurses, physician assistants, nutrition scientists and other health care professionals

American Holistic Nurses Credentialing Corporation, Inc. (<http://www.ahncc.org/school-endorsement-program/current-endorsed-nursing-programs/>) has endorsed Drexel University's Complementary and Integrative Health Master's and Certificate Programs, which allows graduates of these programs to sit for the nationally accredited board certification in holistic nursing.

Admission Requirements:

- 2.75 GPA or above on all previous coursework
- A baccalaureate degree with a major in a health-related field from an accredited college or university
- Official transcripts from all universities or colleges attended
- Nurse, nurse practitioner, physician assistants, and other healthcare professionals who hold licensure or a certificate: copy of license, eligibility for licensure, or certificate

- Current Resume/CV
- One professional letter of recommendation from either previous or immediate supervisors or former faculty members who can attest to your clinical knowledge, skill, and potential aptitude for graduate study
 - References will not be accepted from colleagues or family members.
- Personal statement (no more than two pages and no less than one page double-spaced) that will give the admissions committee a better understanding of the followings:
 - Why you are choosing this particular program of study
 - Your plans upon completion of the certificate
 - How your current work experience will enhance your experience in this program
- International students will need to meet university international student admissions guidelines, including TOEFL Program Requirements.

TOEFL Requirement:

International applicants, as well as immigrants to the United States and U.S. permanent residents whose native language is not English and who have not received a bachelor's degree or higher in the United States, Australia, Canada, Ireland, New Zealand, or the United Kingdom, must show proficiency in English speaking as well as listening, writing, and reading. American citizens born on U.S. military bases abroad may be waived from the TOEFL requirement after providing documentation of this status. Otherwise, applicants must meet one of the following requirements:

- If you take the TOEFLiBT exam, you must have a minimum combined score for the listening, writing, and reading sections of 79 plus a speaking section score of 26 or higher.
- If you take the TOEFL, you must have a minimum score of 550 or higher and a Test of Spoken English score (TSE) of 55 or higher.

Program Requirements

CIT 503	Holistic Living For The Caregiver	3.0
CIT 534	Witches, Wise Women and Women Healers	3.0
CIT 602	Women's Integrative Health	3.0
CIT 658	Advanced Women's Integrative Health	3.0
Total Credits		12.0

LeBow College of Business

About the College

LeBow College of Business (<http://www.lebow.drexel.edu/>) is among just 25 percent of business schools nationwide accredited by the Association to Advance Collegiate Schools of Business (AACSB). Drexel LeBow offers a range of master's level degrees including the master of science (MS), master of business administration (MBA) and executive master of business administration (EMBA). LeBow also offers two doctoral degrees: a PhD in business and an executive doctorate in business administration (DBA). Additionally the School of Economics (<http://catalog.drexel.edu/graduate/schoolofeconomics/>) offers master of science and doctoral degrees.

The MBA degree offers a variety of delivery formats – face-to-face or online, part-time or full-time and at a satellite campus in Malvern, Penn. Additionally, the Drexel LeBow MBA offers customization and specialization in areas such as finance, marketing, entrepreneurship/innovation and business analytics.

Prospective students interested in Drexel LeBow graduate programs are not required to have undergraduate degrees in business.

About the Curriculum

Graduate business programs at Drexel University's LeBow College of Business provide a high-quality education that blends theory and practice. Students receive individualized attention to help them achieve short-term and long-term career goals.

The Drexel LeBow MBA enrolls approximately 800 students representing diverse backgrounds, 20 percent of whom are enrolled full-time.

Approximately 50 percent of the full-time students are international.

Drexel LeBow MBA students have come from more than 40 countries in Asia, Europe, South America and Canada.

Following in the mission of the University's founder, A.J. Drexel, to provide practical applications of learning, the Drexel LeBow faculty have backgrounds in corporate management and scholarly research. Drexel LeBow faculty combine strengths in teaching and research. They also enjoy strong ties with the corporate community. Corporate and entrepreneurial leaders add to the full-time faculty by coming to campus as guest lecturers or as adjunct professors.

Centers and Facilities

This marriage of academic rigor and practical applications can also be seen in the development of the school's Centers of Excellence. Centers of Excellence are catalysts for research and innovation, think tanks for nationally significant trends and issues, and incubators for opportunities in business and integration among disciplines. LeBow's Centers of Excellence provide students with meaningful experiential learning and impact the performance of business in our region and around the world. As part of the curriculum Drexel LeBow MBA students will take courses which reside in the centers and will see firsthand how practical learning is applied.

The Centers are:

- Institute for Strategic Leadership (<http://www.lebow.drexel.edu/academics/centers/strategic-leadership/>)
- Center for Corporate Governance (<https://www.lebow.drexel.edu/academics/centers/corporate-governance/>)
- Dana and David Dornsife Office for Experiential Learning (<https://www.lebow.drexel.edu/academics/centers/experiential-learning/>)

Facilities

Accounting

Major: Accounting

Degree Awarded: Master of Science in Accounting (MSA)

Calendar Type: Quarter
Total Credit Hours: 45.0
Classification of Instructional Programs (CIP) code: 52.0305
Standard Occupational Classification (SOC) code: 11-3031

About the Program

The Master of Science in Accounting is a market-driven degree designed to prepare students to become leaders in the field. The program deepens students' understanding of accounting concepts, sharpens business acumen and provides the analytical and communication skills needed to become a successful accounting professional. The MS in Accounting degree prepares students for the CPA exam and beyond. The program combines theory with practice, encouraging MS in Accounting students to become well-connected to the dynamic accounting industry and share their expertise with their community through programs such as VITA (Volunteer Income Tax Assistance). Upon completion of the program, students will be eligible to be licensed in the state of Pennsylvania.

This 45.0 credit MS in Accounting program is delivered on-campus, both full-time and part-time.

- Full-time can be completed in as little as 12 months
- Part-time completion varies by student

This selective Master of Science in Accounting program is designed for students who hold a bachelor's degree preferably in the area of Accounting from an AACSB (or equivalent) accredited institution. Applicants must have earned a minimum grade of C in each of the following prerequisite courses and an overall GPA of 3.0 (B) or above.

Prerequisite Requirements

ACCT 115	Financial Accounting Foundations	4.0
ACCT 116	Managerial Accounting Foundations	4.0
ACCT 321	Financial Reporting I	4.0
ACCT 322	Financial Reporting II	4.0
ACCT 323	Financial Reporting III	4.0
ACCT 331	Cost Accounting	4.0
ACCT 341	Principles of Auditing	4.0
TAX 341	Individual Income Taxes	4.0

Students with undergraduate degrees in accounting from non-US schools may be eligible for admission to the program. These students will be responsible for assessing whether their academic backgrounds make them eligible to sit for the CPA examination.

Students with undergraduate degrees in areas outside of accounting can be considered for admission to the program only after they acquire the necessary prerequisite undergraduate accounting and/or business courses. These students should contact the LeBow Graduate Student Services (<http://www.lebow.drexel.edu/academics/graduate/resources/advising/>) to determine what courses are needed to gain admission to the MS in Accounting program.

State CPA Requirements

Students planning to take the CPA exam should review the educational requirements established by the State Board of Accountancy in the state in which they plan to sit for the examination. Students are qualified to sit for the examination in Pennsylvania by meeting the degree requirements. Students planning to apply for a CPA license in Pennsylvania need to obtain 225.0 quarter credit hours, the equivalent to 150.0 semester hours. Students should contact the Accounting Department (<http://www.lebow.drexel.edu/faculty-and-research/disciplines/accounting/>) for additional information.

www.lebow.drexel.edu/faculty-and-research/disciplines/accounting/) for additional information.

Degree Requirements

Required Core Courses

ACCT 600	Accounting Analysis & Theory	3.0
ACCT 604	International Financial Reporting	3.0

Gordian Ndubizu, PhD (*Temple University*). Professor. Financial accounting.

Duri Park, PhD (*Ohio State University*). Assistant Professor. Financial accounting, insider trading, investments, and cash holdings.

Jennifer Wright, MTA (*Villanova University*) Assistant Department Head, Accounting and Tax. Associate Clinical Professor.

MBA Programs

Major: Business Administration

Degree Awarded: Master of Business Administration (MBA)

Calendar Type: Quarter

Total Credit Hours: 49.0

Classification of Instructional Programs (CIP) code: 52.0201

Standard Occupational Classification (SOC) code: 11-1021

About the MBA

The Drexel LeBow MBA offers a customizable, cross-disciplinary plan of study that prepares students to solve complex business problems across industries. The rigorous, comprehensive degree program is designed to emphasize the broad perspective of business concepts through innovative coursework, experiential learning and career coaching.

Grounded by a strong academic foundation in business, the program offers several opportunities to specialize and align students' specific area of interest, including business concentrations and dual degree options. Graduate minors from schools throughout the University are also available, allowing students to tailor their plan of study to fit their specific career goals.

Learning Outcomes and Competencies

Leadership Skills

Leadership and Collaboration - Leads individuals, teams, and organizations to attain common business goals and manage change

Communication - Effectively communicates in writing and speaking in business settings

Professional Development and Advancement - Takes initiative and responsibility for one's professional development and career advancement

Business Acumen

Financial Acumen - Integrates quantitative and qualitative analyses to recommend financial decisions that support financial and strategic goals

Marketing Strategy - Applies marketing theories and tools to make sound marketing decisions and recommendations

Global Mindset - Integrates global perspectives to function effectively in diverse business contexts

Strategic Analysis - Provides the ability to develop a fine-grained analysis of the overall business situation of the firm

Information Systems and Analytics - Collects, manages, and analyzes data, and uses insights gained to set and achieve business goals

Business Operations - Applies quantitative and qualitative tools and operations knowledge to dissect, find structure in, and optimize operations

Business Law - Analyzes and applies the law in decision-making

Solving Business Problems

Identifying and Framing Relevant Complex Business Problems – Uses integrated problem solving and project management skills to identify, structure, and solve complex managerial problems

Structuring and Implementing Integrated Solutions - Integrates all business disciplines and uses decision-making tools to formulate an organization's strategic direction and implements solutions to emergent business problems

Students selecting a concentration can choose from the following options:

- Accounting
- Business Analytics
- Finance
- Entrepreneurship/Innovation Management
- Marketing
- Supply Chain Management and Logistics

Program Delivery

The College offers one MBA degree delivered in the format that best suits a student's lifestyle; full-time or part-time, on campus or online. The MBA can be completed at Drexel's main campus in Philadelphia or at a satellite campus in Malvern, Pa., in as little as 18-24 months. Professionals seeking more flexibility in earning the MBA at their own pace can personalize their studies by combining on-campus and online classes.

Please contact Drexel LeBow's Graduate Admissions Office directly to discuss which MBA delivery option (<https://www.lebow.drexel.edu/academics/graduate/mba/>) is best suited for you.

Degree Requirements

The Master of Business Administration (MBA) curriculum remains firmly grounded on the best features of the "traditional" MBA. Among these features is a broad overview of business, complemented by at least one area of concentration.

Students selecting a concentration can choose from the following options:

- Accounting
- Business Analytics
- Entrepreneurship/Innovation Management
- Finance
- Healthcare Management (See advisor for scheduling options)
- Marketing
- Supply Chain and Logistics

Facilities

MBA Program Faculty

Marco Airaud, PhD (*University of Pennsylvania Philadelphia*). Associate Professor. Computational economics, international economics, macroeconomics and monetary economics.

Murugan Anandarajan, PhD (*Drexel University*) *Interim Associate Dean for Academic Affairs*. Professor. Cyber crime, strategic management of information technology, unstructured data mining, individual internet usage behavior (specifically abuse and addiction), application of artificial intelligence techniques in forensic accounting and ophthalmology.

Trina Larsen Andras, PhD (*University of Texas at Austin*) *Head of the Department of Marketing; Academic Director, Center for Corporate Research Management*. Professor. International marketing, marketing channels management, cross-cultural communication.

Orakwue B. Arinze, PhD (*London School of Economics*). Professor. Client/Server computing; Enterprise Application Software (EAS)/ Enterprise Resource Planning Software (ERP); knowledge-based and decision support applications in operations management.

Jie Cai, PhD (*University of Iowa*) *Department of Finance*. Associate Professor. Investment banking, mergers and acquisitions, corporate finance and corporate governance.

Suresh Chandran, PhD (*Vanderbilt University*). Clinical Professor. Corporate entrepreneurship; corporate social responsibility; global management; intellectual property and employee rights; Sustainability; Technological Innovation.

Lauren D'Innocenzo, PhD (*University of Connecticut*). Associate Professor. Team effectiveness, contextual influences, emergent team dynamics, shared leadership, multi-level modeling, and groups/teams.

Qizhi Dai, PhD (*University of Minnesota*). Associate Professor. Business Value of Information Technology, eCommerce, Economics of Information Technology, Information System Management.

Pia DiGirolamo, PhD (*Purdue University*). Assistant Clinical Professor. Macroeconomics, international finance.

Boryana Dimitrova, PhD (*Drexel University*). Assistant Clinical Professor. Global marketing, inter-organizational, marketing channels, retailing and retail management.

Michaela Draganska, PhD (*Kellogg School of Management, Northwestern University*) *Department of Marketing*. Associate Professor. Advertising strategy, product assortment decisions, new product positioning, distribution channels. Marketing analytics and big data, marketing communications, marketing research, marketing strategy, technology and innovation.

Elea Feit, PhD (*University of Michigan*) *Department of Marketing*. Assistant Professor. Bayesian hierarchical models, interactive (eCommerce), marketing research, missing data.

Christopher Gaffney, PhD (*Rutgers University, New Brunswick*). Assistant Clinical Professor. Applied Probability, Decision Theory, Risk Analysis

Cuneyt Gozu, PhD (*University of Albany*). Associate Clinical Professor. Attitudes; Groups/Teams; Leadership; Motivation; Power and Influence

Michael Howley, PhD (*Arizona State University*). Clinical Professor. Investments in dissatisfied customers, service recovery, health-care marketing, marketing of service organizations, financial consequences of marketing actions.

Yanliu Huang, PhD (*The Wharton School, University of Pennsylvania*). Associate Professor. Consumer n-store decision making, consumer planning, health marketing, memory and learning.

Daniel Korschun, PhD (*Boston University*). Associate Professor. Brand and corporate reputation management, corporate social responsibility, internal marketing, marketing strategy, relationship marketing.

Rosalie S. Kreider, JD (*Villanova University*) *Department of Legal Studies*. Clinical Professor. Business law, international business law.

David Kurz, EdD (*University of Pennsylvania*). Associate Clinical Professor. Business Education; Groups/Teams; Leadership; Supply Chain Leadership.

Jeongsik Lee, PhD (*University of California Los Angeles*). Assistant Professor. Economics of Innovation; Social networks; Technology management

Johnny Lee, PhD (*University of Utah*). Associate Clinical Professor. Accounting information systems; e-business; managerial accounting; supply chain management

Benjamin Lev, PhD (*Case Western Reserve University*). Trustee Professor. Inventory Control, Mathematical Programming, Operations Planning and Scheduling.

Merrill W. Liechty, PhD (*Duke University*). Clinical Professor. Bayesian statistics, portfolio selection, higher moment estimation, higher moment estimation, Markov Chain Monte Carlo

Dali Ma, PhD (*University of Chicago*). Associate Professor. Social hierarchy; Social networks; Sociology of entrepreneurship; Sociology of transitional China

Mary Mawritz, PhD (*University of Central Florida*). Associate Professor. Abusive supervision; deviant behavior; leadership.

Bruce D. McCullough, PhD (*University of Texas Austin*). Professor. Applied Econometrics, Data Mining, Econometric Techniques, Reliability of Statistical and Econometric Software.

V. K. Narayanan, PhD (*University of Pittsburgh*). Deloitte Touche Jones Stubbs Professor. Cognition and Strategy; Corporate Entrepreneurship; Organization design

Gordian Ndubizu, PhD (*Temple University*). Professor. Financial accounting.

Edward Nelling, PhD, CFA (*University of Pennsylvania-Wharton Department Head*). Professor. Investments; corporate finance; real estate finance.

Gregory Nini, PhD (*The Wharton School, University of Pennsylvania*). Assistant Professor. Creditor control rights, corporate governance, and firm value; insurance economics.

Fariborz Y. Partovi, PhD (*The Wharton School, University of Pennsylvania Department of Decision Sciences*). Professor. Manufacturing Technology Development, Quality Implementation, Quality Management, Service Management, Six-Sigma

Natalie Pedersen, JD (*Harvard University Department of Legal Studies*). Associate Professor. Employment law; employment discrimination; implicit bias.

Christian Resick, PhD (*Wayne State University*). Associate Professor. Groups/Teams; Leadership; Organizational Culture and Fit; Personality.

Patricia Robak, PhD (*Lehigh University Department of Finance*). Clinical Professor. Investments, money and banking, international finance.

Konstantinos Serfes, PhD (*University of Illinois at Champaign-Urbana*). Professor. Industrial organization; microeconomics; game theory

Samir Shah, DPS (*Pace University*). Clinical Professor. Drexel University's Provost Fellow India Partnerships

Prashant Srivastava, PhD (*Oklahoma State University*). Associate Clinical Professor. New product development, supply chain management, B2B marketing, sales, strategic alliances, organizational learning, market orientation, healthcare marketing, and database marketing.

Srinivasan Swaminathan, PhD (*University of Texas-Austin*). Professor. Marketing research and strategy, pricing and promotions, loyalty and satisfaction.

Samuel H. Szewczyk, PhD (*Pennsylvania State University*). Associate Professor. Corporate governance, mergers and acquisitions, financial engineering, investment banking, financial institutions.

George Tsetsekos, PhD (*The University of Tennessee Dean Emeritus, LeBow College of Business; Francis Professor of Finance*). Professor. Valuation and corporate restructuring, treasury and risk/hedging operations, investment banking, securitization, emerging capital markets, multinational finance, bank asset-liability management.

Daniel Tzabbar, PhD (*University of Toronto*). Associate Professor. Accessing and managing knowledge; Alliances; Human capital; Organizational learning and change; Social Capital; Technology Entrepreneurship; Technology Innovation

Chen Wang, PhD (*University of British Columbia*). Associate Professor. Consumer curiosity, self-regulation and goals, sensory perception.

Joan Weiner, PhD (*The Wharton School, University of Pennsylvania*). Professor. Business ethics, leadership, communication and decision making; educational innovation; health system management design.

Jonathan C. Ziegert, PhD (*University of Maryland Management Department*). Associate Professor. Attitudes; Diversity; Groups/Teams; Leadership; Organizational Culture and Fit.

Executive MBA Program

Major: Business Administration

Degree Awarded: Master of Business Administration (MBA)

Calendar Type: Quarter

Total Credit Hours: 49.0

Classification of Instructional Programs (CIP) code: 52.0101

Standard Occupational Classification (SOC) code: 11-1021

About the Program

The Executive MBA program is designed for executives, entrepreneurs, and professionals with an average of 15 years of experience (and a minimum of seven years) who are currently in a managerial or managerial-track position. Graduates of the Executive MBA program are catalysts, effective leaders who demonstrate mastery of problem-solving and strategy development in increasingly complex business environments.

Working within an intimate cohort with diverse experiences and backgrounds, Executive MBA students complete a robust cross-disciplinary plan of study with an emphasis on strategic leadership and business solutions. Students collaborate in high-performance teams, which enable them to gain diverse perspectives and learn new strategies for problem-solving. The program includes comprehensive leadership self-assessment tools, including an executive coach to help design and implement a personal career development plan and reinforce leadership skills. During the program students will have the opportunity to choose electives from an array of contemporary interdisciplinary courses.

Through their professional experience and academic research, our world-class faculty foster an environment where applied learning and real-world application is an integral part of the experience. Highly engaged Executive MBA alumni further enhance this close-knit community, opening their

doors to help students build connections and uncover opportunities to benefit their careers.

Program Delivery

The Executive MBA program delivers 18 months of study in a 20-month period. Courses are primarily taught in residency format with accompanying online elements. The program begins with the LeBow Leadership Experience, a six-day introductory immersion that teaches the tenets of high impact, transformational leadership, and ends with an international immersion experience that applies the concepts and principles learned in the classroom to a global business setting. Past international immersions have examined the transitioning economies of Cuba and South Africa, the rising consumerism and urbanization of China, and Vietnam's emergence as a global outsourcing giant.

Additional Information

For additional information about the program, visit the Executive MBA (<http://www.lebow.drexel.edu/academics/graduate/mba/executive-mba/>) web page.

Admission Requirements

The Executive MBA program has separate admission procedures. A personal interview is required. Students admitted to the program have an average of 15 years work experience and significant potential for advancement in their organizations. A minimum of 7 years of professional experience (including 2 years of management) is required. Students must be admitted to the Executive MBA program to register for Executive MBA cohorted classes.

For further information, please contact:

Mark Dierkes
Director of Recruitment
Executive MBA Program
215-571-3272
med24@drexel.edu

About the Curriculum

Each year, the Executive MBA curriculum is revised to strengthen the best of our program, and include new content and teaching methods to make the entire Drexel experience richer, more rewarding, and more relevant to our students. It is built around 19 courses delivered through various types of executive learning experiences, including classroom meetings with online supplemental sessions, campus immersions, international immersions, online courses, plus six 1-credit elective courses that span an array of disciplines. The program blends proven learning elements that go far beyond a typical MBA program.

The Executive MBA begins with the six-day Drexel Leadership Experience and ends with a 7-10 day international immersion. In between, class sessions are mostly clustered in an on-campus residency format.

Doctorate in Business Administration (DBA)

Major: Business Administration

Degree Awarded: Doctorate in Business Administration (DBA)

Calendar Type: Quarter

Total Credit Hours: 60.0

Classification of Instructional Programs (CIP) code: 52.0201

Standard Occupational Classification (SOC) code: 11-1021

About the DBA

The Doctorate in Business Administration (DBA) is a part-time executive doctoral program designed to equip executives and senior managers with scientific methods to address complex industry and organizational challenges. The program integrates and leverages Drexel's 120+ year history of experiential learning to provide a broad theoretical perspective of current business issues as well as a strong foundation in applied research and analysis to enrich critical knowledge, skills, and abilities. Through an integrative framework of empirical exploration and evidence-based decision making, executives learn the "science of business" and develop successful data driven strategies and solutions that can be applied to their respective organizations.

The DBA cohorted format enables candidates to complete the program in 2.5 years (10 consecutive quarters), using a lockstep executive residency and online model. DBA candidates complete a minimum of 60.0 credits beyond the Master's degree. As part of the accelerated nature of the program and focus on complex business challenges, the program employs a mentored dissertation model. It is expected that applicants will have a minimum of 10 years of industry and/or leadership experience.

Program Highlights

- 2.5 Year, Part-time, Cohorted Executive Program
- Executive Residency Format with Online Components
- 16 Courses, 60 Credits post-Masters
- Mentored Dissertation Model

- Integrated, Cross-Disciplinary Course Work
- Drexel DBA Faculty Collaboration from Management, Marketing, Decision Sciences and MIS, Accounting, Economics, Finance, Design, Biomedical Engineering, and Psychology

DBA Learning Outcomes

Upon degree completion, graduates of the DBA program will be able to...

- Demonstrate knowledge of both theoretical and applied business research methodology.
- Integrate knowledge from business and non-business disciplines to generate novel ideas, strategies, and practical approaches to address business issues faced by senior leadership in organizations.
- Demonstrate mastery of scientific inquiry methods that examine empirical support for theoretical frameworks as applied to business problems.
- Demonstrate an ability to address complex industry challenges using frameworks of empirical examination that build prescriptive conclusions and real world knowledge.

Admission Requirements

The DBA provides a broad theoretical and practical perspective on current business issues as well as a strong foundation in applied research and analysis. The LeBow College of Business seeks applicants with a minimum of 10 years of senior industry and/or leadership experience, exceptional ability and the motivation needed to successfully complete the DBA. Admission into this part-time cohorted program requires a Master's degree and is highly selective.

In reviewing an applicant's credentials, the DBA admissions committee will consider:

- Completed Application Form
- Prior Academic Accomplishments: All course work taken prior to application will be reviewed. Applicants should have attained a minimum grade point average of 3.3 (on a 4.0 scale) for all graduate course work completed.
- Graduate Management Admissions Test (GMAT) or Graduate Records Examination (GRE): DBA applicants are NOT required to submit scores from either the GMAT or GRE. However, individuals who have taken these exams prior may forward their scores in support of their application.
- Personal Statement: Explain how the applicant's educational and personal experiences have influenced the decision to pursue a DBA, professional objectives in attaining a DBA, and the applicant's strategy (time, effort, and organizational and family support) to excel in the program.
- Essay(s): Please reference the program webpage for specific essay(s) requirement for the application.
- Letters of Recommendation: Two letters of recommendation must be submitted in support of the application. Applicants are strongly encouraged to seek recommendations from professionals who can assess the applicant's likelihood of success in an executive doctoral program.
- Current Resume or CV: Include relevant industry positions, achievements or research.
- Interview: Upon request of the DBA admission committee, selected candidates will be requested to participate in an admissions interview.

Admission Procedures

The DBA Program admits students each fall. To be considered for scholarship and admission, the completed application must be received by the LeBow College of Business Office of Graduate Admissions no later than **April 30th**. It is the applicant's responsibility to ensure that all transcripts, essays/personal statements and letters of recommendation, as well as the application form and fee, are received by Drexel University by this deadline.

Please contact Mark Dierkes, Director of Executive Program Recruitment, at med24@drexel.edu or at 215-571-3272 directly with any questions concerning required entrance exams (such as the GMAT), evaluation of undergraduate or graduate records (grades, scores, total years and subjects studied, etc.), and any other issues regarding application to the College.

Degree Requirements

Required Courses

BUSN 910	Applied Organizational & Consumer Behavior	4.0
BUSN 911	Opportunities in a Data Driven Economy	4.0
BUSN 912	Corporate Growth and Risk Strategies	4.0
BUSN 913	Driving Innovation and Design	4.0

BUSN 946	Dissertation Research, Discussion and Contribution Chapter	1.0
BUSN 947	Dissertation Research, Final Defense	1.0-9.0
Total Credits		60.0-68.0

Dissertation

DBA candidates are required to complete and submit doctoral dissertation for committee approval. The dissertation is an integral part of the DBA program and serves as a demonstration of academic excellence in applying the science of business with all its expected rigor to an important problem of interest to the industry, as well as providing insight based on theory and supported by appropriate methodological and statistical rigor.

The dissertation process is comprised of a series of lockstep courses, culminating in two major milestones: defense of the proposal and defense of the completed research. The dissertation will need to show relevance, be tied to appropriate scientific literature, and have appropriate methodology and analysis to support the conclusions. Each student will be assigned a dissertation chair, who will guide the student through the process starting in year one, and committee who will evaluate the proposal and the completed research. Both proposal defense and completed research defense must attain a passing grade for the degree to be conferred. There are no qualifying or candidacy exams.

This course provides the foundation to apply current economic, consumer behavior and HR capital trends guided by scholarly based findings and analysis to apply to business issues in the new digital and global economy.

College/Department: LeBow College of Business

Repeat Status: Not repeatable for credit

Prerequisites: BUSN 913 [Min Grade: B]

BUSN 921 Applied Behavioral Research 4.0 Credits

This course introduces behavioral research thinking. The course will provide an overview of applied behavioral research methodologies, including experimental, quasi-experimental, and survey research techniques. Students will learn the advantages of each methodology and when to apply it. Students will also be introduced to measurement theory, validity, reliability, and how to conduct research ethically. There will be detailed discussions on the data and how it was collected as well as hands-on demonstrations of the statistical methodologies that were applied. Students will learn what the statistical assumptions are, what the parameters mean, and how to practically interpret the results.

College/Department: LeBow College of Business

Repeat Status: Not repeatable for credit

BUSN 923 Qualitative Inquiry Methods 4.0 Credits

This course introduces students to approaches in social science and humanistic research known as qualitative inquiry. These approaches include ethnography, grounded theory, phenomenology, case study, and narrative research, and employ methods of interviewing, discourse/content analysis, and participation observation. Students will explicate studies that employ these approaches; discuss assumptions of qualitative inquiry; discuss standards of sampling, ethics, and validity, and design a qualitative research proposal.

College/Department: LeBow College of Business

Repeat Status: Not repeatable for credit

Prerequisites: BUSN 921 [Min Grade: B]

BUSN 924 Analyzing Quantitative Data 4.0 Credits

In this course, students will learn to test hypotheses and assess theory in business and behavioral contexts as those relate to analyzing survey data, archival data, and experimental data. Through hands-on exercises that revisit and reconstruct published research, students will learn commonly used statistical methods that test hypotheses and learn how to interpret results, as well as look for problems as revealed through the statistical testing that might lend support to alternative models. Methods discussed include linear regression, dimension reduction, analysis of variance and GLM, and logistic regression models.

College/Department: LeBow College of Business

Repeat Status: Not repeatable for credit

Prerequisites: BUSN 922 [Min Grade: B] or BUSN 925 [Min Grade: B]

BUSN 925 Survey Research 4.0 Credits

This course will introduce students to the art and craft of survey research. Students will become familiar with the theoretical underpinnings of survey research and at the same time get hands-on experience designing, deploying, and analyzing surveys. The course will cover all aspects of conducting survey research: selecting a sample, formulating individual questions, measurement scales, designing a questionnaire, and analyzing the collected data.

College/Department: LeBow College of Business

Repeat Status: Not repeatable for credit

Prerequisites: BUSN 921 [Min Grade: B]

BUSN 941 Dissertation Research, Applied Methodology Workshop 4.0 Credits

This applied methodology workshop focuses candidates on development of well-defined research questions, appropriate methodology approaches, outline of the Hypotheses, and elucidation about the Importance of the research topics.

College/Department: LeBow College of Business

Repeat Status: Not repeatable for credit

BUSN 942 Dissertation Research, Data Collection Strategy 4.0 Credits

This applied dissertation research course focuses candidates on the development of well-defined data collection strategy. This may include, but is not limited to, analyzing archival data, designing the survey to be used, or determining how to use existing organizational changes in a quasi-experimental design to assess phenomena. This will include IRB permission as necessary.

College/Department: LeBow College of Business

Repeat Status: Not repeatable for credit

Prerequisites: BUSN 941 [Min Grade: B]

BUSN 943 Dissertation Research, Literature Review and Proposal Defense 4.0 Credits

This applied dissertation research course focuses candidates on the development of the literature review section that will be included in the dissertation. The literature review should present the theoretical background of the dissertation and support the propositions and hypotheses.

College/Department: LeBow College of Business

Repeat Status: Not repeatable for credit

Prerequisites: BUSN 942 [Min Grade: B]

BUSN 944 Dissertation Research, Data Collection Process 5.0 Credits

This applied dissertation research course focuses candidates on the development of the data collection process for the dissertation. The data can be collected through surveys, quasi-experimental designs, panel data, or any other source approved by the dissertation chair and committee.

College/Department: LeBow College of Business

Repeat Status: Not repeatable for credit

Prerequisites: BUSN 943 [Min Grade: B]

BUSN 945 Dissertation Research, Data Analysis 5.0 Credits

This applied dissertation research course focuses candidates on completing the data analysis for the dissertation. It is expected that the student will consult with the Dissertation Chair and professors on the appropriate analyses methods that should be applied.

College/Department: LeBow College of Business

Repeat Status: Not repeatable for credit

Prerequisites: BUSN 944 [Min Grade: B]

BUSN 946 Dissertation Research, Discussion and Contribution Chapter 1.0 Credits

This applied dissertation research course focuses candidates on completing the Discussion and Contribution chapter of the dissertation.

College/Department: LeBow College of Business

Repeat Status: Not repeatable for credit

Prerequisites: BUSN 945 [Min Grade: B]

BUSN 947 Dissertation Research, Final Defense 1.0 Credits

This applied dissertation research course focuses candidates on completing the Dissertation and after consultation and approval by the Dissertation Chair to submit it for Final Defense before the Committee.

College/Department: LeBow College of Business

Repeat Status: Repeatable for credit

Facilities

DBA Interdepartmental LeBow Faculty

Murugan Anandarajan, PhD (*Drexel University*) *Interim Associate Dean for Academic Affairs*. Professor. Cyber crime, strategic management of information technology, unstructured data mining, individual internet usage behavior (specifically abuse and addiction), application of artificial intelligence techniques in forensic accounting and ophthalmology.

Hasan Ayaz, PhD (*Drexel University*) *School of Biomedical Engineering, Science and Health Systems*. Associate Professor. Optical brain imaging,

cognitive neuroengineering, brain computer interface (BCI), functional near infrared (fNIR), and near infrared spectroscopy (NIRS).

Lauren D'Innocenzo, PhD (*University of Connecticut*). Associate Professor. Team effectiveness, contextual influences, emergent team dynamics, shared leadership, multi-level modeling, and groups/teams.

Michaela Draganska, PhD (*Kellogg School of Management, Northwestern University*) Department of Marketing. Associate Professor. Advertising strategy, product assortment decisions, new product positioning, distribution channels. Marketing analytics and big data, marketing communications, marketing research, marketing strategy, technology and innovation.

David Gefen, PhD (*Georgia State University*) Provost Distinguished Research Professor. Professor. Strategic IT management; IT development and implementation management; research methodology; managing the adoption of large IT systems, such as MRP II, ERP, and expert systems; research methodology, eCommerce; Online Auctions; Outsourcing; SAS; Technology Adoption.

Paul Harrington, PhD (*University of Massachusetts, Boston*) Director, Center for Labor Markets and Policy. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Teresa Harrison, PhD (*University of Texas Austin*) Associate Dean, Academic Affairs. Associate Professor. Econometrics, public finance, industrial organization, empirical microeconomics including health and nonprofit organizations.

Yanliu Huang, PhD (*The Wharton School, University of Pennsylvania*). Associate Professor. Consumer n-store decision making, consumer planning, health marketing, memory and learning.

John Kounios, PhD (*University of Michigan*) Director, PhD Program in Applied Cognitive and Brain Sciences. Professor. Cognitive neuroscience, especially creativity, problem solving, and cognitive enhancement.

Mary Mawritz, PhD (*University of Central Florida*). Associate Professor. Abusive supervision; deviant behavior; leadership.

Rajiv Nag, PhD (*Pennsylvania State University*). Clinical Professor. Organizational Knowledge and Identity; Organizational learning and change; Strategic Leadership; Strategic Performativity

V. K. Narayanan, PhD (*University of Pittsburgh*). Deloitte Touche Jones Stubbs Professor. Cognition and Strategy; Corporate Entrepreneurship; Organization design

Mark Stehr, PhD (*University of California at Berkeley*) Assistant Director School of Economics. Associate Professor. Health economics, health behaviors, public finance, public policy.

Rajneesh Suri, PhD (*University of Illinois at Urbana-Champaign*) Associate Dean for Research, Marketing Department. Professor. Pricing, promotions and branding.

George Tsetsekos, PhD (*The University of Tennessee*) Dean Emeritus, LeBow College of Business; Francis Professor of Finance. Professor. Valuation and corporate restructuring, treasury and risk/hedging operations, investment banking, securitization, emerging capital markets, multinational finance, bank asset-liability management.

Daniel Tzabbar, PhD (*University of Toronto*). Associate Professor. Accessing and managing knowledge; Alliances; Human capital; Organizational learning and change; Social Capital; Technology Entrepreneurship; Technology Innovation

Jonathan C. Ziegert, PhD (*University of Maryland*) Management Department. Associate Professor. Attitudes; Diversity; Groups/Teams; Leadership; Organizational Culture and Fit.

Wendy van Ginkel, PhD (*Eramus University Rotterdam*) Management Department. Associate Professor. Team dynamics; Knowledge sharing; Diversity; Team cognition.

Daan van Knippenberg, PhD (*Leiden University*) Joseph F. Rocereto Professor, Academic Director of the Institute of Strategic Leadership. Professor. Leadership; Diversity; Teams; Team Innovation.

Business Administration

Major: Business Administration

Degree Awarded: Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 60.0 (Post-Master's) or 90.0 (Post-Bachelor's)

Classification of Instructional Programs (CIP) code: 52.0101

Standard Occupational Classification (SOC) code: 11-1021

About the Program

Drexel's PhD in Business program prepares candidates for careers in academic research and teaching. The PhD in Business includes specializations in accounting, finance, marketing, management (organizational behavior and strategy), and operations & business analytics. PhD degrees are delivered as full-time, on-campus degrees and normally require about five years to complete. The LeBow faculty take a hands-on approach to research and mentoring students on a daily basis. The support of LeBow's collaborative, collegial research environment provides our doctoral students with tremendous research opportunities.

The program enables students to complete their doctoral coursework in two years. Students begin specializing in their chosen area during the first year of study. For information about doctoral work in economics, please visit the PhD in Economics (p. 194) web page.

PhD students complete a minimum of 60.0 quarter credits beyond the master's degree. Students who enter the program without a master's degree must complete 90.0 credits beyond the bachelor's degree. Degree Requirements describe the basic structure of the PhD in Business curriculum.

For additional information about the program visit the PhD Program in Business (<http://www.lebow.drexel.edu/Prospects/Doctorate/>) page.

Admission Requirements/Financial Aid

The LeBow College of Business seeks applicants with exceptional ability and motivation who can succeed in a research-oriented program. Admission to this full-time program is competitive and highly selective. Applicants are only admitted for full-time status. Applicants must specify their proposed area of specialization, and their credentials are ultimately compared to the credentials of other applicants in the same specialization area. There may be relatively few openings in a given area. A master's degree is not a requirement, although most admitted students have one.

In reviewing an applicant's credentials, the faculty consider the following factors:

- *Prior Academic Accomplishments*: The faculty will examine all course work taken prior to application, paying particular attention to the specific courses that have been completed. Applicants should have attained a minimum grade point average of 3.0 (on a 4.0 scale) for all undergraduate course work completed. They also should have attained a minimum 3.3 average for any graduate-level course work taken. The faculty generally expect applicants to demonstrate a substantially higher level of accomplishment than these minimum requirements.
- *Graduate Management Admissions Test (GMAT) or Graduate Records Examination (GRE)*: Applicants to all specializations within the PhD program are required to submit scores from either the GMAT or GRE. While all specializations will accept either one, applicants applying to the Accounting, Management (Organization or Strategy), Finance, or Marketing specializations should submit GMAT scores. Applicants to the specializations in Operations & Business Analytics or Economics should submit the GREs. GMAT and GRE scores are not accepted if they are more than five years old.
- *Test of English as a Foreign Language (TOEFL)*: Applicants whose native language is not English and who have not already received a degree from a U.S. university, must also submit scores from the Test of English as a Foreign Language (TOEFL).
- *Personal Statement/Essay*: Each applicant must submit a personal statement. The personal statement should explain the applicant's educational and personal experiences that have influenced the decision to pursue a PhD and should discuss the candidate's career plans and goals. The faculty are especially interested in learning about an applicant's prior research experience and the commitment to future research in the applicant's area of specialization.
- *Letters of Recommendation*: Two letters of recommendation must be submitted in support of the application. Applicants are strongly encouraged to seek recommendations from academics or other professionals who can assess the applicant's likelihood of success in a research-oriented PhD program.

Admission Procedures

The PhD Program in Business admits students each Fall. To be considered for admission, the completed application must be received by the LeBow College of Business Office of Graduate Admissions no later than **January 15th**. It is the applicant's responsibility to ensure that all transcripts, test scores and letters of recommendation, as well as the application form and the personal statement, are received by Drexel University no later than January 15th.

Assistantships and Financial Aid

LeBow generally provides 5 years of tuition and stipend support conditional on satisfactory progress throughout the program. PhD students are also provided with substantial support for traveling to academic conferences. Each applicant to the PhD program is automatically considered for a graduate assistantship as well as for admissions into the program. First-year graduate assistants are assigned to work with a faculty member on research and/or teaching activities. During the second and subsequent years, graduate assistants are generally assigned a combination of teaching and research responsibilities. Assistants receive a stipend and 27.0 credits of tuition remission per academic year. Doctoral students who are making satisfactory progress toward the degree can expect to be provided with an

assistantship through the Spring Quarter of their fifth year from the date they start the program.

Additional Information

For questions about applying, please contact:

The LeBow PhD Program Office
Bennett S. LeBow College of Business
Drexel University
3141 Chestnut Street
Philadelphia, PA 19104-2875
lebowphd@drexel.edu

Degree Requirements

60 credits (Post-Master's degree)

90 credits (Post-Bachelor's degree)

- 15.0 credits of core courses
- 30.0 credits of specialization requirements
- 15.0 credits of dissertation research
- 30.0 credits for students without Master's degree

Core Program

PhD students in business select one of two broad streams of research:

- behavioral based research; or
- economics based research.

Within each stream all students pursue a common set of core courses during their first year of study. This core consists of course work in research methodology (three courses) and economics (two courses) or behavioral science (two courses). In addition to these core courses, students also take courses in their specializations during their first year in the program.

Each research stream consists of 5 core courses. All courses are 3.0 credits each.

Economics Stream Core Courses *

ECON 902	Mathematical Economics	3.0
ECON 910	Advanced Microeconomics I	3.0
ECON 940	Econometrics I	3.0
ECON 941	Econometrics II	3.0
STAT 931	Statistics for Economics	3.0
Total Credits		15.0

* Operations and Business Analytics students may make substitutions for the econometrics series. Their research methodology sequences is comprised of Statistics, STAT 924 Multivariate Analysis I and OPR 922 Operations Research Methods I.

Economics Stream First Year Core Sequence

Fall		Credits
ECON 902	Mathematical Economics	3.0
STAT 931	Statistics for Economics	3.0
Term Credits		6.0
Winter		
ECON 910	Advanced Microeconomics I	3.0
ECON 940	Econometrics I	3.0
Term Credits		6.0
Spring		

ECON 941	Econometrics II	3.0
Term Credits		3.0
Total Credit:		15.0

Behavioral Stream

Behavioral Stream Core Courses

STAT 924	Multivariate Analysis I	3.0
STAT 932	Statistics for Behavioral Science	3.0
MGMT 906	Foundations of Research in Behavioral Science	3.0
MGMT 907	Research Analysis in Behavioral Sciences	3.0
MKTG 940	Multivariate II	3.0
Total Credits		15.0

Behavioral Stream First Year Core Sequence

Fall		Credits
MGMT 906	Foundations of Research in Behavioral Science	3.0
STAT 932	Statistics for Behavioral Science	3.0
Term Credits		6.0
Winter		
MGMT 907	Research Analysis in Behavioral Sciences	3.0
STAT 924	Multivariate Analysis I	3.0
Term Credits		6.0
Spring		
MKTG 940	Multivariate II	3.0
Term Credits		3.0
Total Credit:		15.0

First-Year Examination

After the completion of the core coursework, students are examined on their competence in the core material and their readiness to proceed to their specialization area.

Specialization

The PhD Program in Business offers specializations in six areas:

- Accounting
- Finance
- Marketing
- Organizational Behavior (Management)
- Operations & Business Analytics
- Strategy (Management)

Each specialization area consists of 10 courses (30.0 credits) in addition to the 5 stream courses. The courses outside of the stream courses are either department requirements or electives selected by the student with the approval of their PhD coordinator. Up to 3 of the electives may be independent studies or dissertation research courses subject to the approval of the student's PhD coordinator and the Director of the LeBow PhD Program. The requirements of each area of specialization are discussed in detail on the LeBow College of Business PhD Program Areas of Specialization (<http://www.lebow.drexel.edu/academics/doctorate/>) web page.

Candidacy Examination

At the completion of their coursework, students take written and oral candidacy examinations. These examinations test each student's preparation for dissertation research. Once the candidacy examinations are passed, the student is recognized as a PhD candidate.

Doctoral Dissertation

The doctoral dissertation is a piece of original research designed to make a contribution to the student's chosen discipline. Each candidate selects a dissertation adviser and an advisory committee of additional faculty members is formed. The candidate prepares a detailed dissertation proposal that is defended before the University community. After successfully defending the proposal, the candidate conducts the research (15.0 credit minimum) and prepares a written dissertation. The completed dissertation is then defended in a final oral examination.

Dissertation Format Review

In addition to meeting the Thesis Advisory Committee's standards of originality and scholarly content, all doctoral dissertations must conform to university format requirements. Students should obtain a copy of the Thesis Manual from the Graduate College of Drexel University (<http://www.drexel.edu/graduatecollege/>) or from the Thesis Reviewer in 5038 MacAlister Hall.

Selected Faculty Researchers

ACCOUNTING

Hsuhui Chang, PhD (<http://www.lebow.drexel.edu/people/hsiuhichang/>) (*University of Minnesota*) *Department of Accounting and Tax, KPMG Endowed Chair and Department Head.* Professor.

Anthony P. Curatola, PhD (<http://www.lebow.drexel.edu/people/anthonycuratola/>) (*Texas A&M University*) *Joseph F. Ford Professor of Accounting.* Professor. Federal and state income tax policy, retirement income taxation, fringe benefits taxation, educational savings and tax incentives, federal and state income tax research.

DECISION SCIENCES

Avijit Banerjee, PhD (<http://www.lebow.drexel.edu/people/anthonycuratola/>) (*The Ohio State University*) *Department of Decision Sciences.* Professor. Interface with Marketing, Pricing Revenue Management, Inventory Control, Operations Planning and Scheduling, Production Planning and Control, Supply Chain Management

Seung-Lae Kim, PhD (<http://www.lebow.drexel.edu/people/seung-laekim/>) (*Penn State University*) *Department of Decision Sciences.* Professor. Inventory control, Production Planning and Control, Quality Management, Six-Sigma, Supply Chain Management

FINANCE

Michele Lowry, PHD (<http://www.lebow.drexel.edu/people/michellelowry/>) (*University of Rochester*) *Department of Finance.* TD Bank Professor of Finance. Empirical Corporate Finance, including initial public offerings, mergers, and corporate governance.

Ralph Walkling, PhD (<http://www.lebow.drexel.edu/people/ralphwalkling/>) (*University of Maryland*) *Stratakis Professor of Corporate Governance, Department of Finance.* Professor. Corporate governance, mergers and acquisitions.

MANAGEMENT

Jeffrey H. Greenhaus, PhD (<http://www.lebow.drexel.edu/people/jeffreygreenhaus/>) (*New York University*) *William A. Mackie Professor of Management.* Professor. Work-Life Balance.

V. K. Narayanan, PhD (<http://www.lebow.drexel.edu/people/vadakenarayanan/>) (*University of Pittsburgh*) *Delloitte Touche Jones Stubbs Professor*. Cognition and Strategy; Corporate Entrepreneurship; Organization design

MARKETING

Rolph E. Anderson, PhD (<http://www.lebow.drexel.edu/people/rolphanderson/>) (*University of Florida*) *Royal H. Gibson Sr. Professor of Marketing*. Professor. Personal selling and sales management; multivariate data analysis; customer relationship management (CRM); customer satisfaction and customer loyalty.

Bert Rosenbloom, PhD (<http://www.lebow.drexel.edu/people/bertrosenbloom/>) (*Temple University*) *Rauth Chair of Electronic Commerce*. Professor. Marketing channels and distribution systems, electronic commerce, inter-organizational marketing management, wholesale and retail distribution, marketing strategy and planning.

Business Analytics

Major: Business Analytics

Degree Awarded: Master of Science in Business Analytics (MSBSAN)

Calendar Type: Quarter

Total Credit Hours: 45.0

Classification of Instructional Programs (CIP) code: 52.1302

Standard Occupational Classification (SOC) code: 15-2041; 19-3022; 25-1011; 25-1022

About the Program

The MS in Business Analytics program is designed for students who have an interest in quantitative methods, data analysis, and using computer programs to solve business problems.

Students learn how to access and analyze data for the purpose of improved business decision-making. This program prepares students to make good business decisions with fact-based insights and an understanding of business performance from a systems view, using statistical and quantitative analysis of data as well as explanatory and predictive modeling.

The program draws upon three traditional areas of business intelligence:

- *statistics*, to explore and uncover relationships in data;
- *operations research*, to develop mathematical models for data-supported decision making; and
- *management information systems*, to access and create databases that support the other two areas.

Additional Information

For additional information about the program, students should contact the Department of Decision Sciences and MIS (<https://www.lebow.drexel.edu/faculty-and-research/disciplines/decision-sciences-and-mis/>).

Degree Requirements

Operations Research

OPR 601	Managerial Decision Models and Simulation	3.0
---------	---	-----

Statistics

STAT 610	Statistics for Business Analytics	3.0
STAT 630	Multivariate Analysis	3.0

STAT 642	Data Mining for Business Analytics	3.0

Murugan Anandarajan, PhD (*Drexel University*) *Interim Associate Dean for Academic Affairs*. Professor. Cyber crime, strategic management of information technology, unstructured data mining, individual internet usage behavior (specifically abuse and addiction), application of artificial intelligence techniques in forensic accounting and ophthalmology.

Orakwue B. Arinze, PhD (*London School of Economics*). Professor. Client/Server computing; Enterprise Application Software (EAS)/ Enterprise Resource Planning Software (ERP); knowledge-based and decision support applications in operations management.

Hande Benson, PhD (*Princeton University*). Professor. Interior-point methods, Large Scale Optimization, Mathematical Programming, Nonlinear Optimization, Operations and Supply Chain Optimization, Optimization Software, Portfolio Optimization

Qizhi Dai, PhD (*University of Minnesota*). Associate Professor. Business Value of Information Technology, eCommerce, Economics of Information Technology, Information System Management.

Michaela Draganska, PhD (*Kellogg School of Management, Northwestern University*) *Department of Marketing*. Associate Professor. Advertising strategy, product assortment decisions, new product positioning, distribution channels. Marketing analytics and big data, marketing

communications, marketing research, marketing strategy, technology and innovation.

Elea Feit, PhD (*University of Michigan*) *Department of Marketing*. Assistant Professor. Bayesian hierarchical models, interactive (eCommerce), marketing research, missing data.

Christopher Gaffney, PhD (*Rutgers University, New Brunswick*). Assistant Clinical Professor. Applied Probability, Decision Theory, Risk Analysis

David Gefen, PhD (*Georgia State University*) *Provost Distinguished Research Professor*. Professor. Strategic IT management; IT development and implementation management; research methodology; managing the adoption of large IT systems, such as MRP II, ERP, and expert systems; research methodology, eCommerce; Online Auctions; Outsourcing; SAS; Technology Adoption.

Jinwook Lee, PhD (*Rutgers University, New Brunswick*). Assistant Professor. Decision Models, Mathematical Programming, Risk Assessment Stochastic Optimization, Stochastic Processes.

Merrill W. Liechty, PhD (*Duke University*). Clinical Professor. Bayesian statistics, portfolio selection, higher moment estimation, higher moment estimation, Markov Chain Monte Carlo

Bruce D. McCullough, PhD (*University of Texas Austin*). Professor. Applied Econometrics, Data Mining, Econometric Techniques, Reliability of Statistical and Econometric Software.

Samir Shah, DPS (*Pace University*). Clinical Professor. Drexel University's Provost Fellow India Partnerships

Chaojiang Wu, PhD (*University of Cincinnati*). Assistant Professor. Computational Statistics, Data Analytics, Data Mining, Decision Models, Predictive Analytics

Marketing

Major: Marketing

Degree Awarded: Master of Science in Marketing (MSM)

Calendar Type: Quarter

Total Credit Hours: 45.0

Classification of Instructional Programs (CIP) code: 52.1401

Standard Occupational Classification (SOC) code: 11-2021

About the Program

The Master of Science in Marketing provides students with a focused training in marketing science and it develops the technical skills necessary for success in today's business environment. Marketers require a higher level of technical capabilities to respond to today's dynamic marketing. At the same time, new tools such as neuroscience, analytics, and the proliferation of digital media empower marketers to better understand customers and respond to their needs and wants. These skills offer a higher level of training not typically available in graduate marketing education.

Additional Information

For more information about the program, contact the Department of Marketing (<https://www.lebow.drexel.edu/academics/graduate/master-of-science/ms-marketing/>). For more detailed information please contact Lori Miceli at lr398@drexel.edu or 215-895-0975, Program Manger for Master of Science in Marketing.

Admission Requirements

The LeBow College of Business seeks applicants with exceptional ability and motivation. Students who hold a bachelor's degree, either in Marketing or another discipline, may apply to the MS program. Students who lack some part of this preparation may be considered for admission conditional on their completing the appropriate undergraduate courses as non-matriculated students during the summer term before they begin the program in the fall.

In reviewing an applicant's credentials, the following factors will be considered:

- **Prior Academic Accomplishments:** All course work taken prior to application will be examined, paying particular attention to the specific courses that have been completed. Applicants should have attained a minimum grade point average (GPA) of 3.0 (on a 4.0) scale for all undergraduate course work completed.
- **Graduate Record Examination (GRE) or Graduate Management Aptitude Test (GMAT):** Applicants are required to submit GRE or GMAT scores. Scores of more than five years old are not accepted.
- **Test of English as a Foreign Language (TOEFL):** Applicants whose native language is not English and who have not already received a degree from a U.S. university must also submit scores from the Test of English as a Foreign Language (TOEFL).
- **Personal Statement/Essay:** Each applicant must submit a personal statement. The personal statement should explain the applicant's educational and personal experiences that have influenced the decision to pursue an MS and should discuss the candidate's career plans and goals.
- **Letters of Recommendation:** Two letters of recommendation must be submitted in support of the application. Applicants are strongly encouraged to seek recommendations from academics or other professionals who can assess the applicant's likelihood of success in the MS program.

Degree Requirements

Required Courses

MKTG 601	Marketing Strategy & Planning	3.0
MKTG 622	Buyer Behavior Theory	3.0

Marketing Faculty

Rolph E. Anderson, PhD (*University of Florida*) *Royal H. Gibson Sr. Professor of Marketing*. Professor. Personal selling and sales management; multivariate data analysis; customer relationship management (CRM); customer satisfaction and customer loyalty.

Trina Larsen Andras, PhD (*University of Texas at Austin*) *Head of the Department of Marketing; Academic Director, Center for Corporate Research Management*. Professor. International marketing, marketing channels management, cross-cultural communication.

Boryana Dimitrova, PhD (*Drexel University*). Assistant Clinical Professor. Global marketing, inter-organizational, marketing channels, retailing and retail management.

Michaela Draganska, PhD (*Kellogg School of Management, Northwestern University*) *Department of Marketing*. Associate Professor. Advertising strategy, product assortment decisions, new product positioning, distribution channels. Marketing analytics and big data, marketing communications, marketing research, marketing strategy, technology and innovation.

Lawrence Duke, MBA (*Harvard Business School*). Associate Clinical Professor. International marketing and strategy, new product development, business-to-business marketing, marketing of financial services.

Elea Feit, PhD (*University of Michigan*) *Department of Marketing*. Assistant Professor. Bayesian hierarchical models, interactive (eCommerce), marketing research, missing data.

William Halvena, PhD (*Columbia University*). Associate Clinical Professor. Quantitative Marketing, Marketing Research, Consumer Behavior

Michael Howley, PhD (*Arizona State University*). Clinical Professor. Investments in dissatisfied customers, service recovery, health-care marketing, marketing of service organizations, financial consequences of marketing actions.

Yanliu Huang, PhD (*The Wharton School, University of Pennsylvania*). Associate Professor. Consumer n-store decision making, consumer planning, health marketing, memory and learning.

Daniel Korschun, PhD (*Boston University*). Associate Professor. Brand and corporate reputation management, corporate social responsibility, internal marketing, marketing strategy, relationship marketing.

Bert Rosenbloom, PhD (*Temple University*) *Rauth Chair of Electronic Commerce*. Professor. Marketing channels and distribution systems, electronic commerce, inter-organizational marketing management, wholesale and retail distribution, marketing strategy and planning.

Prashant Srivastava, PhD (*Oklahoma State University*). Associate Clinical Professor. New product development, supply chain management, B2B marketing, sales, strategic alliances, organizational learning, market orientation, healthcare marketing, and database marketing.

Rajneesh Suri, PhD (*University of Illinois at Urbana-Champaign*) *Associate Dean for Research, Marketing Department*. Professor. Pricing, promotions and branding.

Srinivasan Swaminathan, PhD (*University of Texas-Austin*). Professor. Marketing research and strategy, pricing and promotions, loyalty and satisfaction.

Chen Wang, PhD (*University of British Columbia*). Associate Professor. Consumer curiosity, self-regulation and goals, sensory perception.

Supply Chain Management and Logistics

Major: Supply Chain Management and Logistics

Degree Awarded: Master of Science in Supply Chain Management and Logistics (MSSCML)

Calendar Type: Quarter

Total Credit Hours: 45.0

Classification of Instructional Programs (CIP) code: 52.0203

Standard Occupational Classification (SOC) code: 11-3071

About the Program

Today, companies worldwide are competing in very different ways and very different environments than they were in the past because of technological advances. Operations, Supply Chain Management, and Logistics are key functions through which companies can gain strategic advantage, and companies are hiring graduates to drive innovations for their new economic surroundings.

The Drexel MS Program in Supply Chain Management and Logistics is delivered in two tracks:

- For students in the **Industry Professional Track**, we are committed to increasing their supply chain competencies and leadership abilities. We work with organizations and leaders from around the world to help shape strategies that inspire competitive advantage and business success.
- For students in the **Research Track**, we leverage industry relationships to inform the development of theory and models that advance the field. Research seminars led by our top-notch faculty prepare our MS students to enter PhD programs and become academic leaders.

Additional Information

Please contact Drexel LeBow's Graduate Admissions Office (<http://www.lebow.drexel.edu/academics/graduate/resources/admissions/admissions-standards/>) directly with any questions concerning required entrance exams (such as the GMAT), evaluation of undergraduate or graduate records (grades, scores, total years and subjects studied, etc.), and any other issues regarding application to the College.

Degree Requirements

All students will be required to take a series of foundation courses in the management of operations and the quantitative methods that support analysis and decision making for supply chain management and logistics. After the common core, the students will choose one of the following tracks:

- (1) **Industry Professional Track**: This track covers a range of topics for practical management decisions over multiple horizons for different types of supply chains and prepares the students for effective leadership in an increasingly complex, dynamic, global business environment.
- (2) **Research Track**: This track goes deeper into the theoretical foundations of decision making in supply chains and prepares students for doctoral studies in the area.

Core Courses		
POM 610	Supply Chain Management I	3.0
POM 615	Supply Chain Management II	3.0
POM 624	Management of Service Firms	3.0
POM 628	Advanced Supply Chain Management	3.0
POM 630	Transportation & Logistics Management	3.0
Quantitative Methods		
OPR 601	Managerial Decision Models and Simulation	3.0
STAT 610	Statistics for Business Analytics	3.0
Select one of the following MIS courses		3.0
MIS 630	Inter-Active Decision Support Systems	
MIS 632	Database Analysis and Design for Business	
MIS 633	Predictive Business Analytics with Relational Database Data	
MIS T680	Special Topics in MIS	
Select one of the following tracks		21.0
Industry Professional Track		
POM 770	Supply Chain Management and Logistics Capstone Project	
Select six* of the following		
BUSN 502	Essentials of Economics	
ECON 610	Microeconomics	
ECON 630	International Economics	
ECON 650	Business & Economic Strategy: Game Theory & Applications	
MIS 651	Information Systems Outsourcing Management	
MIS 661	Managing with Enterprise Application Software using SAP - Logistics	
MIS 662	Managing with Enterprise Application Software using SAP- Accounting & Analytics	
OPR 640	Decision Models for the Public Sector	
ORGB 625	Leadership and Professional Development	
or ORGB 633 Leading Effective Organizations		
ORGB 640	Negotiations for Leaders	
POM 642	Sustainable Supply Chain Management and Logistics	
POM 643	Managing Queues for Service Operations	
POM 644	Revenue Management	
STAT 634	Quality & Six-Sigma	
STAT 638	Advanced Statistical Quality Control	
Research Track**		
OPR 922	Operations Research Methods I	
POM 771	Supply Chain Management and Logistics Master's Thesis	
POM 900	Decision Processes in Operations Management	
POM 922	Inventory Models Seminar	
POM 925	Supply Chain Management Seminar	
POM 930	Scheduling Theory	
Total Credits		45.0

* Courses from a graduate minor can be substituted for courses on the list of approved electives. Other substitutions must be approved by academic advisor and department.

** The Master's Thesis (POM 771) typically entails 6 or more credits of coursework. A student on the Research Track who completes a thesis for less than 6 credits must take one or more elective courses to reach the graduation requirement of 45 credits.

Certificate in Advanced Business

Certificate Level: Post-graduate

Admission Requirements: Master's degree or higher

Certificate Type: Post-Master's Certificate

Number of Credits to Completion: 12.0

Instructional Delivery: Campus, Online, Hybrid

Calendar Type: Quarter

Expected Time To Completion: 3 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 52.0201

Standard Occupational Classification (SOC) Codes: 11-1021, 13-0000

About the Program

The Drexel LeBow Advanced Business Certificate (ABC) program is available to applicants possessing an earned master's degree or doctoral degree from a fully accredited university or college. The program is designed to permit qualified candidates the opportunity to update their skills in a professional field of specialization in which they have had previous academic experience, or to acquire competence in a new business discipline.

The post-master's ABC program requires completion of a four-course sequence and may include the following specialization areas:

- business analytics
- finance
- leadership
- marketing
- or a customized certificate option

The Advanced Business Certificate program is administered by the Krall Center Corporate and Executive Education (<http://www.lebow.drexel.edu/corporate-services/corporate-and-executive-education/>) Drexel LeBow College of Business. Participants in this part-time certificate program have a three-year maximum timeframe within which to complete the certificate requirements. ABC students are enrolled in courses in Drexel LeBow MBA sections pending availability.

Upon acceptance to the ABC program, students will meet with an advisor to review program/course prerequisites (if applicable), and create a plan of study within one of the programs specializations. Sample course sequences in the specialization areas are listed below.

The ABC program leads to a Post-Master's Certificate. The credits earned in the certificate are not applicable to any current or future degree program offered by Drexel University unless all applicable entrance criteria for the anticipated program are met.

Certificate Requirements

After completing the four-course series, and receiving at least a 3.0 GPA for the certificate courses, students will receive a Post-Master's Certificate. Continuing Education Units (CEU) credits and/or Continuing Professional Educational (CPE) credits may be applicable.

Sample Sequences

All sample sequences are subject to change based on availability and individual student academic and professional background.

12.0 quarter credits

Sample Business Analytics sequence:

FIN 642	Business Conditions and Forecasting	3.0
MIS 632	Database Analysis and Design for Business	3.0
STAT 601	Business Statistics	3.0
STAT 632	Datamining for Managers	3.0

Sample Innovation sequence:

FIN 635	Entrepreneurial Finance	3.0
MGMT 650	Corporate Venturing	3.0
MGMT 652	New Venture Planning	3.0
MKTG 654	Corporate Brand & Reputation Management	3.0

Sample Finance sequence:

FIN 601	Corporate Financial Management	3.0
FIN 602	Advanced Financial Management	3.0
FIN 622	Financial Institutions & Markets	3.0
FIN 642	Business Conditions and Forecasting	3.0

Sample Leadership sequence:

BUSN T680	Special Topics in BUSN	3.0
MGMT 510	Business Problem Solving	3.0
MGMT 655	Knowledge Management	3.0
ORGB 625	Leadership and Professional Development	3.0
ORGB 631	Leading Effective Organizations	3.0

Sample Marketing sequence:

MKTG 601	Marketing Strategy & Planning	3.0
MKTG 622	Buyer Behavior Theory	3.0
MKTG 634	Integrated Marketing Communications Management	3.0
MKTG 638	New Product Planning, Strategy, and Development	3.0

LeBow College of Business: School of Economics

The LeBow College of Business celebrated its strengths in economics teaching and research by elevating its economics department into a School of Economics. The School of Economics continues LeBow's commitment to offering a curriculum that is current and challenging and to conducting research that aligns with business trends and informs policy makers.

Economics is at the root of business decisions, government policy making and global relations. As a course of study, it can lead to diverse career opportunities. A degree in economics provides students with a robust understanding of the workings of the market system, major economic institutions, economic policy, and development. The School of Economics boasts an award-winning faculty who are leading researchers and dedicated teachers. The world-renowned faculty members take a hands-on approach to teaching, research and mentoring students.

Majors

- Economics (MSECON) (p. 192)
- Economics (PhD) (p. 194)
- Economics and Computer Science (MSECCS) (<http://catalog.drexel.edu/graduate/schoolofeconomics/economicsandcomputerscience/>)

Minors

- Economic Data Analysis (<http://catalog.drexel.edu/graduate/schoolofeconomics/economicdataanalysisgminor/>)
- Economics (<http://catalog.drexel.edu/graduate/schoolofeconomics/economicsgminor/>)

Economics

Major: Economics

Degree Awarded: Master of Science in Economics (MSECON)

Calendar Type: Quarter

Total Credit Hours: 45.0

Classification of Instructional Programs (CIP) code: 45.0603

Standard Occupational Classification (SOC) code: 19-3011

About the Program

The Master of Science program in Economics at Drexel University integrates training in core economics, rigorous quantitative methods and policy analysis. It prepares students for a career in industry, the financial sector, government or international organizations. The program also provides knowledge and analytical skills necessary for students wishing to pursue a PhD degree in Economics or related areas.

Admission Requirements

The LeBow College of Business: School of Economics seeks applicants with exceptional ability and motivation. Students who hold a bachelor's degree, either in economics or another discipline, may apply to the MS program. All courses in the program expect a preparation of at least principles of economics and basic statistics. Students who lack some part

of this preparation may be considered for admission conditional on their completing the appropriate undergraduate courses as non-matriculated students during the summer term before they begin the program in the fall.

In reviewing an applicant's credentials, the faculty will consider the following factors:

- **Prior Academic Accomplishments:** The faculty will examine all course work taken prior to application, paying particular attention to the specific courses that have been completed. Applicants should have attained a minimum grade point average of 3.0 (on a 4.0 scale) for all undergraduate course work completed.
- **Graduate Record Examination (GRE) or Graduate Management Aptitude Test (GMAT):** Applicants are required to submit GRE or GMAT scores. Scores of more than five years old are not accepted.
- **Test of English as a Foreign Language (TOEFL):** Applicants whose native language is not English and who have not already received a degree from a U.S. university must also submit scores from the Test of English as a Foreign Language (TOEFL).
- **Personal Statement/Essay:** Each applicant must submit a personal statement. The personal statement should explain the applicant's educational and personal experiences that have influenced the decision to pursue an MS and should discuss the candidate's career plans and goals.
- **Letters of Recommendation:** Two letters of recommendation must be submitted in support of the application. Applicants are strongly encouraged to seek recommendations from academics or other professionals who can assess the applicant's likelihood of success in the MS program.

Admission Procedures

The MS in Economics program admits students each fall. To be considered for admission, the completed application must be received by the LeBow College of Business Office of Graduate Admissions. Admissions are considered on a rolling basis and will remain open until all available slots are filled. It is the applicant's responsibility to ensure that all transcripts, test scores and letters of recommendation, as well as the application form and the personal statement, are received by LeBow College Business, School of Economics.

Graduate Assistantships and Financial Aid

Financial assistance for the MS program may be available on a limited basis to highly qualified candidates.

Research Assistantships and Teaching Assistantships may be also be available on a limited basis for highly qualified candidates.

To obtain an application, please contact:

Centers and Facilities

This marriage of academic rigor and practical applications can also be seen in the development of the school's Centers of Excellence. Centers of Excellence are catalysts for research and innovation, think tanks for nationally significant trends and issues, and incubators for opportunities in business and integration among disciplines. LeBow's Centers of Excellence provide students with meaningful experiential learning and impact the performance of business in our region and around the world. As part of the curriculum Drexel LeBow MBA students will take courses which reside in the centers and will see firsthand how practical learning is applied.

The Centers are:

- Sovereign Institute for Strategic Leadership (<https://www.lebow.drexel.edu/academics/centers/>)
- Center for Corporate Governance (<https://www.lebow.drexel.edu/academics/centers/corporate-governance/>)
- Dana and David Dornsife Center for Experiential Learning (<https://www.lebow.drexel.edu/academics/centers/experiential-learning/>)

Facilities

School of Economics Faculty

Marco Airaud, PhD (*University of Pennsylvania Philadelphia*). Associate Professor. Computational economics, international economics, macroeconomics and monetary economics.

Patricia Awerbuch, MBA (*Drexel University*). Assistant Clinical Professor. Performance of on-campus students in an online classroom designed for distance learners; business professors.

Richard Barnett, PhD (*University of Minnesota*). Clinical Professor. Economic theory, macroeconomics.

Sebastien Bradley, PhD (*University of Michigan*). Associate Professor. Public finance, international economics.

Mian Dai, PhD (*Northwestern University*). Assistant Professor. Managerial economics and strategy.

Pia DiGirolamo, PhD (*Purdue University*). Assistant Clinical Professor. Macroeconomics, international finance.

Shawkat M. Hammoudeh, PhD (*University of Kansas*). Professor. Applied econometrics, financial economics, international economics, and natural resource economics.

Teresa Harrison, PhD (*University of Texas Austin*) *Associate Dean, Academic Affairs*. Associate Professor. Econometrics, public finance, industrial organization, empirical microeconomics including health and nonprofit organizations.

Paul E. Jensen, PhD (*Penn State University*) *Associate Dean, College of Business*. Associate Professor. International trade. Primary research interest is international trade, particularly in empirical studies of international trade patterns.

Bang Nam Jeon, PhD (*Indiana University*) *Department of Economics and International Business*. Professor. Financial economics, world financial market linkages, foreign direct investment flows in the Asia-Pacific economies, the Korean economy: currency crisis, FDI, and macroeconomic issues, regional economic integration and newly industrializing economies: the

Stephen Joyce, MA (*Temple University*). Assistant Clinical Professor. Education and human capital.

Andre Kurmann, PhD (*University of Virginia*). Associate Professor. Computational economics, financial economics, labor economics, macroeconomics and monetary economics.

Christopher A. Laincz, PhD (*Duke University*). Associate Professor. Economic development, technological change, and growth, industrial organization, macroeconomics and monetary economics.

Vibhas Madan, PhD (*Michigan State University*). Professor. International trade theory, applied microeconomics.

Roger A. McCain, PhD (*Louisiana State University*) *Co-director*. Professor. Computational economics, game theory.

Bruce D. McCullough, PhD (*University of Texas Austin*). Professor. Applied Econometrics, Data Mining, Econometric Techniques, Reliability of Statistical and Econometric Software.

Irina Murtazashvili, PhD (*Michigan State University*). Assistant Professor. Applied econometrics.

Eydis Olsen, MA (*American University*). Clinical Associate Professor. Macroeconomics, political economy.

Tristan Potter, PhD (*Boston College*). Assistant Professor. Macroeconomics, labor.

Konstantinos Serfes, PhD (*University of Illinois at Champaign-Urbana*). Professor. Industrial organization; microeconomics; game theory

Ricardo Serrano-Padial, PhD (*University of California at San Diego*). Assistant Professor. Microeconomics theory, information economics with applications in finance, macroeconomics and industrial organization.

Mark Stehr, PhD (*University of California at Berkeley*) *Assistant Director School of Economics*. Associate Professor. Health economics, health behaviors, public finance, public policy.

Constantinos Syropoulos, PhD (*Yale University*) *Trustee Professor of International Economics*. Professor. International trade, political economy, applied microeconomics.

Yoto Yotov, PhD (*Boston College*). Associate Professor. International trade, applied microeconomics, political economy.

Emeritus Faculty

Edward C. Koziara, PhD (*University of Wisconsin*). Professor Emeritus. Applied micro and macro economics.

Bijou Yang Lester, PhD (*University of Pennsylvania*). Professor Emeritus. Behavioral characteristics of shopping on-line, economic issues of electronic commerce, contingent employment and part-time work, the economy and suicide.

Andrew G. Verzilli, PhD (*Boston College*). Professor Emeritus. Teaching effectiveness in economics; economics and financial history.

Chiou-shuang Yan, PhD (*Purdue University*). Professor Emeritus. International economics, input-output analysis.

Economics

Major: Economics

Degree Awarded: Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 60.0 (Post-Master's degree) or 90.0 (Post-Bachelor's degree)

Classification of Instructional Programs (CIP) code: 45.0603

Standard Occupational Classification (SOC) code: 19-3011

About the Program

Drexel's PhD program in Economics prepares economists for academic research as well as careers in government or industry by providing a solid background in economic theory, quantitative analysis, and analytical tools at the advanced level. Each year a relatively small number of PhD students are accepted into the program, which allows for a collegial environment where the PhD students interact with faculty on a daily basis. Requirements for the MS in Economics program are satisfied if the coursework associated with the first and second years of the PhD program are complete.

The PhD program in Economics offers three fields of study:

- Industrial Organization
- International Trade
- Open Economy Macroeconomics

The PhD program in Economics is also particularly strong in applied microeconometrics.

Students typically complete their coursework in two years and the PhD degree in five. Students work as research and teaching assistants under the supervision of a faculty member. After their second year, students can teach independently.

Additional information can be found online at the PhD Program in Economics (<http://www.lebow.drexel.edu/Prospects/Doctorate/Econ/>) page as well as in the LeBow College of Business LeBow PhD Handbook (<https://www.lebow.drexel.edu/sites/default/files/1457548154-lebowphdhandbook2016.pdf>).

To apply and for application information please check online at the LeBow PhD Admissions (<http://www.lebow.drexel.edu/resources/admissions/phd/>) webpage.

Questions should be addressed to lebowphd@drexel.edu.

Admission Requirements

The LeBow College of Business: School of Economics seeks applicants with exceptional ability and motivation. For the PhD, the School places emphasis on applicants who can provide evidence of strong potential in a research-oriented program. In general, prior training at either the undergraduate or graduate level in economics and mathematics is strongly encouraged. All courses in the program expect a preparation of at least principles of economics and basic statistics. Students who lack some part of this preparation may be considered for admission conditional on their completing the appropriate undergraduate courses as non-matriculated students during the summer term before they begin the program in the fall.

Admission is competitive and highly selective.

In reviewing an applicant's credentials, the faculty will consider the following factors:

- **Prior Academic Accomplishments:** The faculty will examine all course work taken prior to application, paying particular attention to the specific courses that have been completed. Applicants should have attained a minimum grade point average of 3.0 (on a 4.0 scale) for all undergraduate course work completed. They also should have attained a minimum 3.3 average for any graduate-level course work taken. The faculty generally expects applicants to demonstrate a substantially higher level of accomplishment than these minimum requirements. A master's degree is not a requirement.
- **Graduate Record Examination (GRE):** Applicants are required to submit GRE scores. GRE scores are not accepted if they are more than five years old.
- **Test of English as a Foreign Language (TOEFL):** Applicants whose native language is not English and who have not already received a degree from a U.S. university must also submit scores from the Test of English as a Foreign Language (TOEFL).
- **Personal Statement/Essay:** Each applicant must submit a personal statement. The personal statement should explain the applicant's educational and personal experiences that have influenced the

decision to pursue a PhD and should discuss the candidate's career plans and goals. The faculty are especially interested in learning about an applicant's prior research experience and the commitment to future research in the applicant's area of specialization.

- **Letters of Recommendation:** Two letters of recommendation must be submitted in support of the application. Applicants are strongly encouraged to seek recommendations from academics or other professionals who can assess the applicant's likelihood of success in a research-oriented PhD program.

Admission Procedures

The PhD Programs in Economics admits students each fall. To be considered for admission, the completed application must be received by the LeBow College of Business Office of Graduate Admissions no later than **January 15th**. It is the applicant's responsibility to ensure that all transcripts, test scores and letters of recommendation, as well as the application form and the personal statement, are received by Drexel University no later than **January 15th**.

Assistantships and Financial Aid

The LeBow College of Business strives to provide graduate assistantships to all entering PhD students. Each applicant to the PhD program is automatically considered for a graduate assistantship as well as for admission into the program. First-year graduate assistants are assigned to work with a faculty member on research activities. During the second and subsequent years, graduate assistants are generally assigned a combination of teaching and research responsibilities. Assistants receive a stipend and 27.0 credits of tuition remission per academic year. Doctoral students who are making satisfactory progress toward the degree can expect to be provided with an assistantship for at least four years.

Degree Requirements

The PhD in Economics program prepares economists for careers in research, teaching, business, and government. It is designed to provide students with not only a broad understanding of modern economics, but also the opportunity to conduct high quality research in a number of specific fields of study including industrial organization, international economics, and health economics.

In the second year of study, the PhD in Economics offers three fields of specialization: industrial organization, international trade, and open economy macroeconomics. Students complete courses in two of these fields of specialization.

Curriculum

60.0 credits (Post-Master's degree)

90.0 credits (Post-Bachelor's degree)

- 27.0 credits of first year core courses
- 18.0 credits of economics field requirements
- 15.0 credits (minimum) of dissertation research
- 30.0 additional dissertation research credits for students without a Master's degree

Core Program

All PhD students pursue a common set of core courses. The following courses are all completed during the first year, with the exception of ECON 941 Econometrics II, which is completed in the second year.

Core Courses

ECON 902	Mathematical Economics	3.0
ECON 910	Advanced Microeconomics I	3.0
ECON 911	Advanced Microeconomics II	3.0
ECON 920	Advanced Macroeconomics I	3.0
ECON 921	Advanced Macroeconomics II	3.0
ECON 940	Econometrics I	3.0
ECON 941	Econometrics II	3.0
ECON 942	Applied Microeconometrics	3.0
ECON 980	Game Theory	3.0
STAT 931	Statistics for Economics	3.0
Total Credits		30.0

* Taken in the second year.

First-Year Examination

After the completion of the core coursework, students are examined on their competence in the core material and their readiness to proceed.

Fields of Specialization

Students are required to complete the coursework for at least two of the following fields/sequences.

Industrial Organization

ECON 950	Industrial Organization I
ECON 951	Industrial Organization II
ECON 959	Industrial Organization Seminar

International Trade

ECON 960	International Trade
ECON 961	Empirical International Trade
ECON 969	International Trade Seminar

Open Economy Macroeconomics

ECON 925	Macroeconomic Dynamics
ECON 962	Open Economy Macroeconomics
ECON 979	Open Economy Macro Seminar

Electives

In addition, students can take elective courses from the Economics Department, from any other departments in the College of Business, and from departments in other Colleges of Drexel University. The following is a set of sample electives:

ECON 930	Monetary Economics	3.0
ECON 952	Health Economics	3.0
ECON 955	Public Economics	3.0
ECON 964	Economic Development	3.0
ECON T980	Special Topics in ECON	0.5-9.0
Additional courses with the permission of the advisor		3.0

Dissertation Research

ECON 998	Dissertation Research in Economics	12.0
----------	------------------------------------	------

Facilities**School of Economics Faculty**

Marco Airauda, PhD (*University of Pennsylvania Philadelphia*). Associate Professor. Computational economics, international economics, macroeconomics and monetary economics.

Patricia Awerbuch, MBA (*Drexel University*). Assistant Clinical Professor. Performance of on-campus students in an online classroom designed for distance learners; business professors.

Richard Barnett, PhD (*University of Minnesota*). Clinical Professor. Economic theory, macroeconomics.

Sebastien Bradley, PhD (*University of Michigan*). Associate Professor. Public finance, international economics.

Mian Dai, PhD (*Northwestern University*). Assistant Professor. Managerial economics and strategy.

Pia DiGirolamo, PhD (*Purdue University*). Assistant Clinical Professor. Macroeconomics, international finance.

Shawkat M. Hammoudeh, PhD (*University of Kansas*). Professor. Applied econometrics, financial economics, international economics, and natural resource economics.

Teresa Harrison, PhD (*University of Texas Austin*) *Associate Dean, Academic Affairs*. Associate Professor. Econometrics, public finance, industrial organization, empirical microeconomics including health and nonprofit organizations.

Paul E. Jensen, PhD (*Penn State University*) *Associate Dean, College of Business*. Associate Professor. International trade. Primary research interest is international trade, particularly in empirical studies of international trade patterns.

Bang Nam Jeon, PhD (*Indiana University*) *Department of Economics and International Business*. Professor. Financial economics, world financial market linkages, foreign direct investment flows in the Asia-Pacific economies, the Korean economy: currency crisis, FDI, and macroeconomic issues, regional economic integration and newly industrializing economies: the

Stephen Joyce, MA (*Temple University*). Assistant Clinical Professor. Education and human capital.

Andre Kurmann, PhD (*University of Virginia*). Associate Professor. Computational economics, financial economics, labor economics, macroeconomics and monetary economics.

Christopher A. Laincz, PhD (*Duke University*). Associate Professor. Economic development, technological change, and growth, industrial organization, macroeconomics and monetary economics.

Vibhas Madan, PhD (*Michigan State University*). Professor. International trade theory, applied microeconomics.

Roger A. McCain, PhD (*Louisiana State University*) *Co-director*. Professor. Computational economics, game theory.

Bruce D. McCullough, PhD (*University of Texas Austin*). Professor. Applied Econometrics, Data Mining, Econometric Techniques, Reliability of Statistical and Econometric Software.

Irina Murtazashvili, PhD (*Michigan State University*). Assistant Professor. Applied econometrics.

Eydis Olsen, MA (*American University*). Clinical Associate Professor. Macroeconomics, political economy.

Tristan Potter, PhD (*Boston College*). Assistant Professor. Macroeconomics, labor.

Konstantinos Serfes, PhD (*University of Illinois at Champaign-Urbana*). Professor. Industrial organization; microeconomics; game theory

Ricardo Serrano-Padial, PhD (*University of California at San Diego*). Assistant Professor. Microeconomics theory, information economics with applications in finance, macroeconomics and industrial organization.

Mark Stehr, PhD (*University of California at Berkeley*) Assistant Director School of Economics. Associate Professor. Health economics, health behaviors, public finance, public policy.

Constantinos Syropoulos, PhD (*Yale University*) Trustee Professor of International Economics. Professor. International trade, political economy, applied microeconomics.

Yoto Yotov, PhD (*Boston College*). Associate Professor. International trade, applied microeconomics, political economy.

Emeritus Faculty

Edward C. Koziara, PhD (*University of Wisconsin*). Professor Emeritus. Applied micro and macro economics.

Bijou Yang Lester, PhD (*University of Pennsylvania*). Professor Emeritus. Behavioral characteristics of shopping on-line, economic issues of electronic commerce, contingent employment and part-time work, the economy and suicide.

Andrew G. Verzilli, PhD (*Boston College*). Professor Emeritus. Teaching effectiveness in economics; economics and financial history.

Chiou-shuang Yan, PhD (*Purdue University*). Professor Emeritus. International economics, input-output analysis.

The Antoinette Westphal College of Media Arts & Design

About the College

The Antoinette Westphal College of Media Arts & Design (<http://www.drexel.edu/westphal/>) (The Westphal College) offers graduate programs in Arts Administration & Museum Leadership, Design Research, Fashion Design, Interior Architecture & Design, Digital Media, Television Management, and Urban Strategy. The programs are distinctive in content and professionally oriented.

The Westphal College is a community of learning within the areas of media, design, the fine arts, the performing arts, and the management of creative enterprise that values experiential and immersive education; it is a place where students are encouraged to give form to ideas by learning to negotiate change in an ever-changing world. Through creative, critical, and collaborative approaches, the Westphal College's diverse programs seek to foster innovation and leadership in progressively interconnected professional disciplines and areas of study.

The academic programs are rigorous, and provide the appropriate balance of a solid foundation with individual creative direction, cultural awareness, strong technical skills, and an understanding of management and professional practice. The College is committed to a continual review of our curricula, processes and outcomes in order to make those improvements and refinements necessary to further enrich our students' education, and to continue to foster independent thinkers, astute leaders, and creative problem solvers.

Majors

- Arts Administration & Museum Leadership (MS) (<http://catalog.drexel.edu/graduate/collegeofmediaartsanddesign/artsadministrationandmuseumleadership/>)
- Design Research (MS) (<http://catalog.drexel.edu/graduate/collegeofmediaartsanddesign/designresearch/>)
- Digital Media (MS, PhD) (p. 199)
- Fashion Design (MS) (p. 204)
- Interior Architecture & Design (MS) (p. 206)
- Retail & Merchandising (MS) (<http://catalog.drexel.edu/graduate/collegeofmediaartsanddesign/retailmerchandising/>)
- Television and Media Management (MS, MS/MBA) (<http://catalog.drexel.edu/graduate/collegeofmediaartsanddesign/televisionandmediamanagement/>)
- Urban Strategy (MS) (<http://catalog.drexel.edu/graduate/collegeofmediaartsanddesign/urbanstrategy/>)

Minors

- Arts Administration (<http://catalog.drexel.edu/graduate/collegeofmediaartsanddesign/artsadministrationgradminor/>)
- Digital Media (<http://catalog.drexel.edu/graduate/collegeofmediaartsanddesign/digitalmediagradminor/>)

- Museum Leadership (<http://catalog.drexel.edu/graduate/collegeofmediaartsanddesign/museumleadershipgradminor/>)
- **NEW:** Retail and Merchandising

Full/Part-Time Options

- Graduate study in digital media, fashion design, interior architecture + design and design research includes two years of full-time graduate study. There are some programs that require prerequisite coursework before entering into the graduate level studies.
- Students may enroll in the Arts Administration & Museum Leadership programs on a full-time or part-time basis. Full-time arts administration students may complete the degree in five terms. The arts administration, television management and retail & merchandising graduate programs are also available as fully-online degrees through Drexel University Online (<https://online.drexel.edu/>).
- Students may enroll in the Paul F. Harron Graduate Program in Television Management program on a full-time or part-time basis. Television management students enrolled full-time in either option should plan to take two full years to complete the program.
- The Digital Media PhD program is a full-time program. The post-MS version of the PhD program is 3-4 years and 4-5 years for the post-BS version of the PhD.

Facilities

Designed to be an incubator for tomorrow's creative leaders, The URBN Center is the award-winning home for many of the programs in the Antoinette Westphal College of Media Arts & Design, providing students with rigorous, studio intensive instruction with the latest technological resources. Majors that share this space include Animation & Visual Effects, Architecture, Design & Merchandising, Entertainment & Arts Management, Fashion Design, Game Design & Production, Graphic Design, Interactive Digital Media, Interior Design, Music Industry, and Product Design.

The URBN Center also provides a black box theater (<http://www.drexel.edu/performingarts/about/facilities/URBN-center-black-box-theater/>) for our performing arts, a 3,500 square foot Leonard Pearlstein Gallery (<http://www.drexel.edu/pearlsteingallery/>), a Motion Capture studio, a Hybrid Making Lab (http://drexel.edu/westphal/about/overview/making_spaces/HybridMakingLab/) featuring Universal Laser Cutters and 3D printing and prototyping, the Robert and Penny Fox Historic Costume Collection (<http://www.drexel.edu/westphal/resources/FHCC/>), the Charles Evans Fashion Design Library, a multi-use screening & lecture room, Shima Seki high-tech knitting machines and offices for the College's administrative functions.

The Academic Building is home to our Photography major and Department of Art & Art History. Within this facility, the Westphal College occupies a 10,000- square-foot photography lab, lighting studios, digital imaging labs (http://www.drexel.edu/westphal/about/overview/making_spaces/DarkroomFacility/), as well as six lecture/ laboratory spaces for our Visual Studies courses.

In University Crossings, a 25,000 square foot space houses offices for Film & Video, Screenwriting & Playwriting and Television faculty. Also in this building are two state-of-the-art digital editing facilities, a shooting studio with special effects capability, two screening rooms, a digital audio post production studio, several multi-media classrooms, and a well-

stocked equipment room featuring state of the art cameras ARRIFLEX (Arri) Alexa XT Plus and the Amira Premiere 4K.

MacAlister Hall serves students in the Westphal College with: digital audio labs and recording studios for Music Industry; The Mandell Theater (<http://drexel.edu/performingarts/about/facilities/mandell-theater/>), a 420-seat proscenium theater with scene shop and dressing rooms; the Ellen Forman Memorial Dance Studio (<http://www.drexel.edu/performingarts/about/facilities/ellen-forman-dance-studio/>); and a high-definition studio space for our college-operated television station, DUTV, which reaches over 400,000 households.

Digital Media

Major: Digital Media

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS); 90.0 (PhD, post-bachelor's); or 45.0 (PhD, post-master's)

Co-op Option: Graduate Co-op

Classification of Instructional Programs (CIP) code: 11.0801

Standard Occupational Classification (SOC) code: 15-1134

About the Program

As a natural extension of the Animation and Visual Effects, Game Design and Production, Interactive Digital Media and Virtual Reality and Immersive Media undergraduate programs, both the Masters of Science (MS) and PhD program challenge students to push beyond what is known and into what is possible.

Students will who will excel are those that:

- have graduated with significant skills in 3D modeling and animation, game design, or interactive digital media and could immediately find a job in user experience (UX) design, game design, virtual and augmented reality (AR/VR), or animation—but want more. Students will build upon those skills and develop a critical understanding of how the industry evolves, so they can forecast the future and prepare employers for what's coming.
- are a scholar with significant knowledge in the field of digital media, and want both to advance that knowledge and to apply it to research problems across disciplines. Students can expand their universe of possibilities in areas like gaming, animation, virtual and augmented reality, or immersive media in general.

Each of the programs is STEM-designated.

Master of Science Program

In this two-year program, students will combine research with applicable skills in 21st century media applications. The curriculum offers a mix of academic coursework and project-related activities in advanced digital design, including 3D modeling, animation, interactivity, gaming and digital media history, theory and methods.

PhD Program

In this interdisciplinary doctoral program, students will focus on translational research, with emphasis on an iterative and design-based research philosophy. They will study the application of digital media towards solving research problems in disciplines such as engineering, education, cultural heritage, health and business.

Additional Information

For more information, visit Drexel's Graduate Studies in Digital Media (<http://www.drexel.edu/westphal/academics/graduate/DIGM/>) web page.

Admission Requirements

Master of Science Program

The MS in Digital Media is an advance course of study. A successful applicant for admission will have a baccalaureate degree, a minimum 3.2 undergraduate GPA and assumed production skills in 3-D modeling, animation and interactivity.

Proof of basic competencies is demonstrated by undergraduate transcript and/or portfolio review. For qualified candidates lacking production skills, we offer a series of pre-graduate classes. Satisfactory completion of the classes qualifies one to apply for graduate admission. Pre-graduate classes may include some or all for the following:

CS 171	Computer Programming I	3.0
CS 172	Computer Programming II	3.0
DIGM 100	Digital Design Tools	3.0
DIGM 505	Design and Interactivity Bootcamp	3.0
DIGM 506	Animation and Game Design Bootcamp	3.0

For additional information on requirements and how to apply, visit Graduate Admissions at Drexel University (<http://www.drexel.edu/grad/programs/westphal/>).

MS in Digital Media

Degree Requirements

Students are required to take a Digital Media History, Theory and Methods course and an advanced seminar for a total of six credits, as well as a minimum of nine courses in advanced modeling animation and interactivity.

During the first year, students also take three New Media Project courses (9.0 credits); these courses provide opportunities to work on funded and unfunded research and industry projects under the guidance of a graduate faculty member. With faculty approval, students may also work on personally designed projects relevant to problem solving in a student's specific area of interest.

In addition, students are required to take 12.0 credits (a minimum of four courses) of directed studies in support of developing knowledge in an area—outside of media and design—to which digital media skills may be applied. The set of directed studies will be determined by the students and their graduate advisors. Possible areas for this focus include, but are not limited to, computer science, information science, bio-medical technology, social science, humanities and education.

Thesis Project

During the second year of study, each student develops and produces a master's thesis project. By the third week of the fall term students submit a proposal to the Digital Media Graduate Committee. Upon approval of the proposal, the student works toward thesis completion, including:

- an oral presentation to the college
- a written statement to the committee
- a copy of the completed media work for the graduate program archive

The thesis project must demonstrate domain knowledge of the agreed upon classes. The media component of the project must demonstrate expertise in 3D modeling/animation and/or interactivity.

Prerequisite Courses

Students without adequate background in digital media are required to take the following prerequisite courses, which are offered during the fall term of the first year of enrollment. These courses do not count towards the MS in Digital Media degree requirements.

Bootcamps *		
DIGM 505	Design and Interactivity Bootcamp	3.0
DIGM 506	Animation and Game Design Bootcamp	3.0
Total Credits		6.0

* Required for students without digital media background.

Required Courses

Digital Media Core		
DIGM 501	New Media: History, Theory and Methods	3.0
DIGM 510	Designing for Interactivity	3.0
DIGM 511	Research Methods for Digital Media	3.0
Digital Media Specialization		18.0
Select 18.0 credits from the following list:		
Game Design and Development		
DIGM 530	Game Design I	
DIGM 531	Game Design II	
GMAP 545	Game Development Foundations	
GMAP 547	Serious Games	
GMAP 548	Experimental Games	
GMAP 560	Game Design from the Player's Perspective	
Animation and Immersive Media		
ANIM 588	Spatial Data Capture	
DIGM 525	Animation I	
DIGM 526	Animation II	
DIGM 547	Organic Modeling	
DIGM 560	Advanced Concepts and Applications in Interactive 3D Environments	
DIGM 616	Immersive World Building	
UX Design and Digital Cultural Heritage		
DIGM 508	Digital Cultural Heritage	
DIGM 520	Interactivity I	
DIGM 521	Interactivity II	
General Digital Media		
DIGM 591	Digital Media Skills Intensive	
DIGM I599	Independent Study in Digital Media	
DIGM I699	Independent Study in Digital Media	
DIGM T580	Special Topics in Digital Media	
DIGM T680	Special Topics in Digital Media	
New Media Project		
DIGM 540	New Media Project **	6.0
Thesis		
DIGM 680	Thesis Development	3.0
Directed Studies		9.0
Total Credits		45.0

** Course is taken 2 times.

Program Requirements Overview

Students applying for admission into the Digital Media PhD program are either post-baccalaureate or post-master's students. Those who are post-

master's are required to take a minimum of 45.0 credits toward their PhD degree (Research Core). Post-baccalaureate PhD students are required to take a minimum of 90.0 credits (45.0 credits Digital Media Core, and 45.0 credits Research Core).

Prerequisite Courses

Post-baccalaureate PhD students without adequate background in digital media are required to take the following prerequisite courses, which are offered fall term of the first year of enrollment. These courses do not count towards the Digital Media degree requirements.

Bootcamps *		
DIGM 505	Design and Interactivity Bootcamp	3.0
DIGM 506	Animation and Game Design Bootcamp	3.0
Total Credits		6.0

* Required for students without DIGM background

Digital Media Core Courses

Digital Media MS Core		
DIGM 501	New Media: History, Theory and Methods	3.0
DIGM 510	Designing for Interactivity	3.0
DIGM 511	Research Methods for Digital Media	3.0
Digital Media Specialization		18.0
Choose 18.0 credits from the following courses:		
Game Design and Development		
DIGM 530	Game Design I	
DIGM 531	Game Design II	
GMAP 545	Game Development Foundations	
GMAP 547	Serious Games	
GMAP 548	Experimental Games

DIGM T780	Special Topics in Digital Media	
DIGM T880	Special Topics in Digital Media	
DIGM T980	Special Topics in Digital Media	
Total Credits		45.0

In addition to the course requirements, PhD students must progress through a series of steps leading to the PhD dissertation:

1. Doctoral candidacy exam
2. Dissertation proposal
3. Written dissertation and public dissertation defense

Dissertation Advisor

Every PhD student has to identify a dissertation advisor no later than the second term in the program. Post-master's students are expected to identify an advisor as soon as possible after joining the program or even before they are formally in the program. The expectation is that post-master's students are academically mature and have already focused on a research area and contacted potential advisors prior to their arrival. Dissertation advisors are not restricted to digital media faculty, but have to be approved by the Department of Digital Media under observation of college and university rules and regulations.

Directed Research Electives

Digital Media PhD students are required to take 18.0 PhD level credits of directed research electives, which have to be approved in advance by the dissertation advisor. It is expected that students take at least 9.0 of these elective credits from other Drexel colleges outside the Antoinette Westphal College of Media Arts in Design in areas closely related to their respective dissertation projects. No more than 12.0 of the elective research credits can be independent study credits.

Doctoral Candidacy Committee

The Department of Digital Media has to establish a Doctoral Candidacy Committee conforming to established university and college rules for dissertation/candidacy committee membership. The purpose of this committee is to conduct and evaluate doctoral candidacy examinations.

Doctoral Candidacy Exam

The Doctoral Candidacy Exam consists of a preliminary proposal prepared by the student outlining the dissertation research plan with an oral defense before the Doctoral Candidacy Committee. A student may schedule the preliminary proposal portion whenever she/he and her/his

advisor decide they are ready but no later than the end of the fall term of second year of study.

To be considered a doctoral candidate by the university, a student must have both passed the Doctoral Candidacy Exam and completed all 45.0 credits of master level coursework post-baccalaureate or 15.0 credits coursework post-master. Once the student has reached doctoral candidate status, the Department of Digital Media will review her/his progress annually.

Dissertation Committee

Within six months of successful completion of the Doctoral Candidacy Examination the Department of Digital Media has to appoint the student's Dissertation Committee based on a proposal submitted by the student and the dissertation advisor. The committee has to conform to established university and college rules for dissertation/candidacy committee membership. The committee must have at least five members, three of whom must be tenure-track faculty at Drexel. At least one member must be from outside the Antoinette Westphal College of Media Arts and Design. In addition, at least three members must be Digital Media core faculty. The chair of the committee must be a Digital Media core faculty member who is not also the dissertation advisor of the student.

Once the Dissertation Committee is established, it will continue on throughout the student's progress toward the PhD degree. The committee's function is to guide the research and to determine the student's general knowledge of the area, as well as the student's breadth and depth of the specific topic. The committee will also consider the scientific feasibility of the proposed research.

Dissertation Proposal

The Dissertation Proposal consists of a written proposal of the dissertation research, a public presentation, and oral proposal defense before the Dissertation Committee. To ensure that students are progressing towards completion of the PhD in a timely fashion, the proposal defense must take place no later than the end of the second year of study. A formal request for an extension of this deadline must be approved following a review of the student's progress.

The purpose of the Dissertation Proposal is to determine if the PhD student is able to initiate, organize, write and defend a scientific idea, which will lead to a PhD dissertation. The presentation will be based on the formal written proposal submitted to the Dissertation Committee at least three weeks before the presentation.

Students who elect to complete the MS in Digital Media alongside the Digital Media PhD degree can submit a revised version of the Dissertation Proposal as a Master Thesis for the partial fulfillment of the MS in Digital Media degree.

Dissertation Defense

The written dissertation will be submitted with the dissertation advisor's approval to the Dissertation Committee. A title and abstract of the dissertation must also be provided to the Digital Media office at least three weeks prior to the defense to allow the time and place of the defense to be publicized. The PhD candidate's public defense consists of his or her presentation of dissertation research followed by an examination by the Dissertation Committee.

Sample Plan of Study

Students without adequate background in digital media must complete two prerequisite courses, which are offered during the fall term of the first year of enrollment: DIGM 505 *Design and Interactivity* and DIGM 506 *Animation and Game Design*.

First Year		Credits
Fall		
DIGM 501	New Media: History, Theory and Methods	3.0
DIGM 505	Design and Interactivity Bootcamp	3.0
DIGM 506	Animation and Game Design Bootcamp	3.0
Term Credits		9.0
Winter		
DIGM 510	Designing for Interactivity	3.0
DIGM 540	New Media Project	3.0
Digital Media Specialization		3.0
Term Credits		9.0
Spring		
DIGM 511	Research Methods for Digital Media	3.0
DIGM 540	New Media Project	3.0
Digital Media Specialization		3.0
Term Credits		9.0
Summer		
Digital Media Specialization		3.0
Term Credits		3.0
Second Year		
Fall		
DIGM 680	Thesis Development	1.0
Digital Media Specialization		3.0
Directed Elective		3.0
Term Credits		7.0
Winter		
DIGM 680	Thesis Development	1.0
Digital Media Specialization		3.0
Directed Elective		3.0
Term Credits		7.0
Spring		
DIGM 680	Thesis Development	1.0
Digital Media Specialization		3.0
Directed Elective		3.0
Term Credits		7.0

Total Credit: 51.0

Sample Plan of Study

Post-Baccalaureate PhD Students

Students without adequate background in digital media must complete two prerequisite courses, which are offered during the fall term of the first year of enrollment: DIGM 505 *Design and Interactivity* and DIGM 506 *Animation and Game Design*.

First Year		Credits
Fall		
DIGM 501	New Media: History, Theory and Methods	3.0
DIGM 505	Design and Interactivity Bootcamp	3.0
DIGM 506	Animation and Game Design Bootcamp	3.0
Term Credits		9.0
Winter		
DIGM 510	Designing for Interactivity	3.0
DIGM 540	New Media Project	3.0

Digital Media Specialization		3.0
Term Credits		9.0
Spring		
DIGM 511	Research Methods for Digital Media	3.0
DIGM 540	New Media Project	3.0
Digital Media Specialization		3.0
Term Credits		9.0
Summer		
DIGM 850	Public Venue Seminar	3.0
Directed Elective		6.0
Term Credits		9.0
Second Year		
Fall		
DIGM 680	Thesis Development	1.0
DIGM 710	Digital Media Research Methods I	3.0
Digital Media Specialization		5.0
Term Credits		9.0
Winter		
DIGM 680	Thesis Development	1.0
DIGM 711	Digital Media Research Methods II	3.0
Digital Media Specialization		4.0
Term Credits		8.0

Facilities

The Digital Media Program operates several labs including a state of the art combined green screen/motion capture studio as well as 2.5 ton 3-degree-of-freedom motion platform. All labs and classrooms are equipped with powerful Dell and Boxx Technologies Workstations running Windows and Unix operating systems and Mac computers running OS X. Software includes a host of Adobe products and Autodesk 3ds Max and Combustion; Alias Maya; Softimage XSI and Behavior, Pixar RenderMan Pro Server along with RenderMan Artist Tools for Maya and RenderMan for Maya; Pixologic Z-Brush; Apple Shake; MotionBuilder; GarageGames; NextLimit RealFlow, and SideEffect's Houdini.

Digital Media Faculty

Paul Diefenbach, PhD (*University of Pennsylvania*). Associate Professor. Game development, real-time rendering.

Troy Finamore, MS (*Drexel University*) Program Director, *Interactive Digital Media*. Associate Teaching Professor. Advertising, design and interactivity.

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Nick Jushchyshyn, MFA (*Academy of Art University*) Program Director, *VR & Immersive Media*. Associate Professor. Visual effects, digital media and animation.

Frank J. Lee, PhD (*Carnegie Mellon University*). Professor. Human-computer interaction; cognitive engineering and science; intelligent software agents for games and education.

Robert Lloyd, MFA (*Temple University*) Program Director, *Game Design & Production*. Associate Teaching Professor. Game development, themed entertainment and motion simulation.

David Mauriello, BA (*Lafayette College*). Assistant Professor. 3D modeling and animation.

Glen Muschio, PhD (*Temple University*). Associate Professor. Digital media, society, communication.

Santiago Ontañón, PhD (*University of Barcelona*). Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning

Stefan Rank, PhD (*Vienna University of Technology*). Associate Professor. Artificial intelligence, game design and human-computer interaction.

Jervis Thompson, BS (*Drexel University*). Teaching Professor. Digital media, interactive multimedia.

Michael Wagner, PhD (*Vienna University of Technology*) Program Director, *Digital Media*. Associate Professor. Educational use of digital media and computer games.

Jichen Zhu, PhD (*Georgia Institute of Technology*). Associate Professor. Developing humanistic and interpretive framework of computational technology, particularly artificial intelligence (AI), and constructing AI-

based cultural artifacts; interactive storytelling, games and software studies.

Emeritus Faculty

Theo Artz, BFA (*Tyler School of Art, Temple University*). Associate Professor. Digital media.

Fashion Design

Major: Fashion Design

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 63.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 50.0407

Standard Occupational Classification (SOC) code: 27-1022

About the Program

The MS in Fashion Design is a full-time program that stresses the development of the aesthetic and philosophical concepts of fashion design and the technical skills to support research and experimentation in these concepts. A typical graduate sequence may consist of seven terms of graduate courses and five terms of prerequisite coursework, beginning with the summer term accelerated design and drawing courses.

The goal of the MS program in fashion design is to integrate the understanding of design with the construction of clothing so that the final products answer physical, aesthetic, psychological, and social needs within the context of contemporary fashion and industrial limitations. The curriculum is structured so that studio, laboratory, and classroom work give the graduate student a directed experience in the study of aesthetics, criticism, and contemporary art concepts; contemporary and historic art and design; traditional and current fashion technology; the discipline of drawing; and the making of art. A required industry internship affords the graduate student direct experience in a workplace of their choice. This comprehensive approach provides the basis for a broad range of employment in the fashion industry and in education. Other professional opportunities lie in merchandising, costume design, curatorial work, and computer-aided design.

The faculty of the Department of Design includes art historians, CAD specialists, designers, fiber artists, merchandising specialists, new materials and processes researchers, painters, and sculptors. The department also draws on practicing professionals as adjunct professors for specialized coursework and for critique of student work.

A limited number of graduate assistantships are available to students after completing the first year.

The Fashion and Design & Merchandising programs produce a professionally juried annual fashion show which provides competitive fashion industry and department awards and excellent exposure for the graduate students' design thesis. Drexel students can participate in the activities of the Fashion Group of Philadelphia, the local chapter of an international fashion industry organization. The Fox Historic Costume Collection, a rich resource of inspiration, is located in the URBN Center. Philadelphia has many fine museums and galleries and is an affordable bus ride to New York City. Students are encouraged to attend local and regional fashion events.

The 63.0 graduate quarter credits does not include any of the required prerequisite coursework. See the Admission Requirements for a list of

courses students are expected to have completed prior to beginning their graduate study.

Additional Information

For more information about this program, please contact the Program Director:

Kathi Martin

martink@drexel.edu

Admission Requirements

Students enter the program from diverse backgrounds, including liberal arts, fine arts, and business. A personal interview is required. The admission criteria for the graduate program consist of the requirements of the University for graduate admission plus satisfaction of undergraduate coursework in basic fashion design skills and concepts. These prerequisites comprise 24.0 credits in design, drawing, and art history in addition to 20.0 credits in specific undergraduate fashion design professional courses, or their equivalent.

Prerequisite Undergraduate Coursework

ARTH 101	History of Art I: Ancient to Medieval	3.0
ARTH 102	History of Art II: Renaissance to Romanticism	3.0
ARTH 335 [WI]	History of Costume I: Preclassical to Directoire	3.0
ARTH 336 [WI]	History of Costume II: Directoire to World War I	3.0
FASH 201	Survey of the Fashion Industry	3.0
FASH 211	Fashion Drawing I	3.0
FASH 212	Fashion Drawing II	3.0
FASH 230	Textiles for Fashion Design	3.0
FASH 241	Construction Skills	4.0
FASH 341	Flat Pattern Design	4.0
VSST 104	Accelerated Design I *	2.0
VSST 105	Accelerated Design II *	2.0
VSST 106	Accelerated Design III *	2.0
VSST 110	Introductory Drawing *	3.0
VSST 111	Figure Drawing I *	3.0
Total Credits		44.0

* Or VSST 101, VSST 102, VSST 103 VSST 110, VSST 111 (18.0 credits).

Beginning in the summer term, the department offers a four-term prerequisite year to prepare candidates for the graduate coursework. A portfolio review and departmental evaluation determine what prerequisites have been satisfied. Contact the graduate advisor for specific information about prerequisites or to make an appointment for evaluation.

For additional information on requirements and how to apply, visit Graduate Admissions at Drexel University (<http://www.drexel.edu/grad/programs/westphal/>).

Degree Requirements

The two years of full-time graduate coursework combine four terms of faculty-directed studio work in fashion design and two terms of student-directed independent studio work with required courses in design, aesthetics, and the art process. Elective coursework in fashion or specific topics; advanced studies in art, computer-aided design, art history, and fashion design; and independent studies allow individual flexibility in curriculum design.

Collection I and Collection II (FASH 685 and FASH 686) emphasize the development of an original statement of design intent, allowing students to

synthesize their academic experiences and prepare for the marketplace. Each graduate student develops his or her personal collection which is then produced and presented in a professional fashion show.

Professional Portfolio (FASH 664) is a capstone course in which students create a professional quality collection of drawings geared to their market preferences.

Students are required to participate in at least three national and international fashion design competitions (FASH 699). These competitions provide awareness of world-wide design sensibilities and the overall level of competition in various facets of the marketplace.

The fashion industry internship (FASH 600) promotes spirit of entrepreneurship and provides perspective on success in the fashion industry. A full-time ten week position in industry is required and provides experience in design and production processes.

Required Courses

Fashion Design Studios		
ARTH 530	History of Modern Design	3.0
FASH 504	Materials Exploration	3.0
FASH 510	Presentation Techniques	3.0

Facilities

The open design of the URBN Center studio spaces fosters collaboration across our diverse design, media and art disciplines. It provides spaces where students can see what their classmates are creating; where making labs can be shared by students from many majors; and where creative connections can be made.

All majors in the college integrate use of discipline-specific and general use software in the 35 computer labs at Drexel's Westphal College of Media Arts & Design which house over 550 computers (Apple iMacs, Apple MacPros, BoxxTech, Dell, and HP). Also available within our college are five premier Music Industry recording studios and a motion capture/green screen compositing space. The Hybrid Lab contains traditional metal and woodworking machines as well as a rapid prototyper, a laser cutter, and access to a 3D router for multi-disciplinary design and product making. In The Shima Seiki Haute Technology Laboratory students experiment with production methods that advance the field of wearable technology using sixteen SDS-ONE APEX3 workstations, three state-of-the-art knitting machines. The CAD Fashion lab is equipped with digital fashion design and proprietary print design software

The Robert and Penny Fox Historic Costume Collection (<http://www.drexel.edu/westphal/resources/FHCC/>) (FHCC), one of the finest teaching collections in the United States, is an educational resource for

the students of Drexel University. Our mission as a University-based collection is to educate and inspire, while providing a significant resource for an ever-expanding community of historians, scholars, artists, and designers. Westphal College's new URBN Center facility has greatly improved the accessibility and visibility of the FHCC and allowed us to honor A. J. Drexel's original educational intent in taking a leadership role in research and scholarship, while preserving the collection for future generations. The Charles Evans Library contains books, periodicals, DVDs and other sources of inspiration for the fashion student.

The fourth floor of the Academic Building is occupied by a 10,000-square-foot photography lab, lighting studios, and two digital imaging labs. It offers professional-quality equipment in a comfortable working environment.

Film and video facilities include two fully equipped television studios; digital editing facilities; video-editing suites; film editors; and specially outfitted multimedia rooms for all courses. Loan equipment available to students includes digital video cameras; Bolex, Gizmo and Arriflex film cameras; and field lighting and audio equipment. Additionally, the college operates a cable television station reaching over 400,000 households.

The music industry major's digital audio labs and recording studios in MacAlister Hall and University Crossings offer opportunities for the creation, modification, analysis, and recording of sound and music using analog and digital media.

The Mandell Theater (<http://drexel.edu/performingarts/about/facilities/mandell-theater/>) provides a 420-seat proscenium theater with scene shop, dressing rooms, and costume shop. Costume is taught with primary source material from Drexel's 7,000-piece Historic Costume Collection (<http://www.drexel.edu/westphal/resources/FHCC/>).

The Ellen Forman Memorial Dance Studio, adjacent to the Mandell Theater is the primary studio for the Dance major.

In University Crossings, a 25,000 square foot space houses offices for film, video, screenwriting, and playwriting faculty as well as two state-of-the-art digital editing facilities, a shooting and motion capture studio with special effects capability, two screening rooms, several multimedia classrooms, a laboratory for game development and research, laboratories for other digital media purposes and for music industry, and a well-stocked equipment room.

Fashion Design Faculty

Anita Dennis, AST (*Art Institute of Philadelphia*) *Fashion Laboratory Technician*. Assistant Teaching Professor. Fashion designer and technician; construction skills.

Genevieve Dion, MFA (*University of the Arts*) *Director, Center for Functional Fabrics*. Associate Professor. Industrial designer, wearable artist, new materials technology research.

Ann Gerondelis, AIA, IDSA (*Georgia Institute of Technology*) *Design Department Head*. Teaching Professor. Embodied perception and its relationship to the design of human experiences, from the scale of the built environment to objects that surround us.

Liz Goldberg, MFA (*Pratt Institute*). Adjunct Professor. Artist, painter and animator

Cynthia Golebuski, MS (*Drexel University*) *Associate Program Director, Fashion Design*. Teaching Professor. Fashion designer, illustrator, computer aided design.

Lisa Hayes, BFA (*Syracuse University*) *Program Director, Fashion Design*. Associate Professor. Fashion designer, product designer, pattern design, sustainability specialist.

Jaeyoon Jeong, MS (*Drexel University*). Assistant Teaching Professor. Owner/Designer Jaeyoon Jeong Collection, 3D garment simulation and patternmaking.

Autumn Kietpongler, MS (*Drexel University*). Adjunct Professor. Designer at Autumnlin Atelier. Creative technologies specialist.

Jackie Kilmartin, MS (*University of the Sciences*). Assistant Professor. Owner/designer Lillian Jackson Textiles, bio-medical textile engineer, Shima Seiki Knitwear Specialist

Hyun-Ah Kim, BS (*Drexel University*). Adjunct Professor. Designer and design consultant, CAD pattern maker and design consultant

Jan Marshall, BA (*Long Island University*). Assistant Teaching Professor. Fashion designer, knitwear, product development, fashion analysis.

Kathi Martin, MSIS (*Drexel University*) *Associate Director of the Graduate Program in Fashion Design*. Professor. Fashion and textile designer; textile artist; CAD and 3D garment simulation, best practices online databases and graphic interfaces for fashion and historic costume, virtual characters for fashion design.

Alphonso McClendon, MS (*Drexel University*) *Program Director, Design & Merchandising*. Associate Professor. Merchandising operations, product development, sourcing, omni-channel strategies.

Elizabeth Quinn, MS (*Drexel University*). Adjunct Professor. Fashion designer. Sustainability specialist.

Clare Sauro, MA (*Fashion Institute of Technology*) *Curator, Historic Costume Collection*. Associate Teaching Professor. Costume history.

Giulia Sebring, Masters (*Instituto Marangoni*). Adjunct Professor. Designer.

Domenica Vinci, BS (*Philadelphia University*). Adjunct Professor. Designer at Off da Wall Graffiti

Emeritus Faculty

Roberta Gruber, MS (*Drexel University*). Associate Professor Emeritus. Fashion designer and illustrator; wearable artist, merchandiser, special events.

Interior Architecture and Design

Major: Interior Architecture and Design
Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 69.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 04.0501

Standard Occupational Classification (SOC) code: 27-1025

About the Program

The graduate program in Interior Architecture & Design offers a first professional Master of Science degree that prepares students of diverse undergraduate backgrounds to become leaders in the field of interior design. We are consistently ranked among the top programs in the country, and in the survey by Design Intelligence of "America's Best Design Schools." As one of the few CIDA accredited graduate programs in the country, our students are on the fast-track to licensure and are highly prepared to enter the professional world of interior architecture and design. Our coursework teaches conceptual, technical, and hands-on approaches in designing a range of spaces. Student work includes public, commercial, residential, and institutional projects in which students learn to transform environments to address aesthetic, social, physical and psychological needs. In conjunction with our integrated studio approach, the program emphasizes independent research culminating in a master's thesis.

Comprised of 69.0 graduate credits, most students complete the MS Interior Architecture & Design program in two to three years, depending upon individual student backgrounds and the completion of all necessary prerequisites.

Student Background

MS Interior Architecture & Design students come to the program with undergraduate degrees in a wide variety of fields, bringing rich experiences and enthusiasm. The majority of applicants have backgrounds in non-design fields, and approximately 25% are international students. Our students are characterized by their open-mindedness, with a desire and commitment to acquire knowledge through rigorous study and training.

Professional Opportunities

Alumni are principals of their own interior design firms, hold a range of positions at major design and architectural firms, and work as facilities managers, consultants, teaching faculty, or in related industry areas. About one-third of the students obtain entry-level employment *before* graduation from the program; our students have little difficulty finding employment following graduation, and many reach senior positions within five years.

Professional exposure occurs in exchanges with practitioners through professional jurying of all major student projects and in one-on-one thesis advising. As part of the graduate comprehensive exam, students are required to gain professional experience through paid employment, service to the profession, or other professional engagement.

For more information, visit Drexel's Graduate Studies in Interior Architecture & Design (<http://www.drexel.edu/westphal/academics/graduate/interiordesign/>) web page.

Admission Requirements

Admission criteria for the graduate program consists of the requirements of the University for graduate admission, plus satisfaction of basic interior design undergraduate coursework. These prerequisites include courses in design, drawing, and art history. For applicants with a background and education in design, many or all of these prerequisites may be waived. For applicants with no background in design, we offer up to 38.0 credits of prerequisite coursework in conjunction with the graduate curriculum.

The prerequisite program typically begins in the summer term with an accelerated sequence of foundational coursework and includes two

quarters of undergraduate interior design courses to prepare candidates for the graduate coursework.

A portfolio review or evaluation by the Associate Director of the Interior Architecture & Design program determines what prerequisites have been satisfied. Contact Graduate Studies in Interior Architecture & Design (<http://www.drexel.edu/westphal/academics/graduate/INTR/>) for specific information about prerequisites or to make an appointment for review and evaluation.

Degree Requirements

The full-time graduate coursework combines seven terms of faculty-directed coursework in interior design, including a student-initiated thesis.

The 69.0 credits that make up the graduate requirement include a visual studies sequence as well as elective coursework in the following areas: interior design seminars on specific topics; advanced studies in art, art history, and interior design; and independent studies. This allows individual flexibility in curriculum design.

Required Courses		
Studios		
INTR 722	Graduate Studio A	4.0
INTR 723	Studio A Seminar	2.0

Facilities

The Interior Architecture program is housed in URBN Center, an original Venturi Scott Brown building enhanced by an award-winning retrofit by MS&R Design, including a skylight covered atrium, exposed beams and open spaces. There is a dedicated 24-hour graduate student studio, with storage space, computers, and a small lounge area. We have a materials library that is continually updated with samples from major manufacturers

and local design offices and showrooms; two computer labs and in-house printing for the use of our students; a Hybrid Making Lab (http://drexel.edu/westphal/about/overview/making_spaces/HybridMakingLab/) with laser cutters, 3D printers, a CNC router and small-scale power tools for student use; and a larger shop facility which offers larger wood, metal, casting, CNC, and fabrication equipment.

The URBN Annex houses a black box theater, screening room and the Leonard Pearlstein Gallery (<http://www.drexel.edu/pearlsteingallery/>). Additional studio and classroom space in the Academic Building and the Design Arts Annex accommodate photography, basic design, painting, sculpture and a full woodworking shop with industrial-quality equipment.

Philadelphia, one of the nation's major design centers, gives interior design students the vitality of the contemporary arts at local galleries; easy access to many museums, libraries, renowned buildings, as well as design centers located in Philadelphia, New York City and Washington, D.C.

Architecture & Interiors Faculty

David Ade, AIA, LEED A.P., NCARB, BArch (*Drexel University*). Adjunct Associate Professor. Principal, SMP Architects, sustainable design

Ulrike Altenmuller-Lewis, AIA, Dr.-Ing. (*Bauhaus Universitat Weimar*). Associate Professor. Research on educational environments; translations of architectural theory texts.

Stephen Bonitatibus, AIA, MArch (*University of Pennsylvania*). Adjunct Professor. Principal, Bonitatibus Associates; traditional residential architecture.

Anthony Bracali, AIA, LEED A.P., BArch (*Drexel University*). Adjunct Associate Professor. President, Friday Architects; civic, non-profit and community-based architecture.

Mark Brack, PhD (*University of California at Berkeley*). Associate Professor. British and American architecture from 1700 to the present; Hispanic colonial architecture in the American Southwest; vernacular architecture; historic preservation.

Daniel Chung, RA, PE, MArch, MSE (*Yale University, Princeton University*). Associate Professor. Building performance and exterior envelope systems.

Jon Coddington, AIA, MArch (*University of Pennsylvania*). Professor. Architecture, urban design and planning.

Rena Cumby, BArch, MS (*Drexel University*). Associate Professor. Interior designer; foundation studies and design education.

John DeFazio, AIA, BArch (*New York Institute of Technology*). Adjunct Professor. Architecture in film.

Katherine Dowdell, AIA, BS Interior Design (*Drexel University*). Adjunct Assistant Professor. Principal, Farragut Street Architects; historic preservation

Eugenia Ellis, PhD (*Virginia Polytechnic Institute and State University*). Associate Professor. Natural and electric light sources and effects on biological rhythms and health outcomes; ecological strategies for smart, sustainable buildings of the nexus of health, energy and technology.

Dyer Alfred "Lyndsay" Falck, RA, ARCUK, ARIBA, NCARB, M.URP (*University of Capetown, South Africa*). Adjunct Professor. Building technology

Jeff Fama, MArch (*State University of New York at Buffalo*). Adjunct Associate Professor. Retail, entertainment, and theater design.

Susan Feenan, BArch (*Temple University*). Adjunct Assistant Teaching Professor. Institutional and commercial architecture.

Gary Garofalo, BS Arch Eng (*Pennsylvania State University*). Adjunct Assistant Professor. Principal Lighting Design Collaborative; lighting expert, lighting design.

Alan Greenberger, FAIA (*Rensselaer Polytechnic Institute*) *Department Head, Architecture, Design & Urbanism*. Distinguished Teaching Professor. Urban planning, economic development, urban governance

Don Jones, FAIA, LEED DD+C, MArch (*University of Pennsylvania*). Adjunct Professor. Principal, Director of Sustainable Design, Ewing Cole; sports venues.

Tim Kearney, AIA, MArch (*University of Pennsylvania*). Adjunct Professor. Principal, CuetoKEARNEY design; sustainable design

Nicole Koltick, MArch (*University of California, Los Angeles*) *Director, Design Futures Lab*. Associate Professor. Researching possibilities for architecture and design through the use of unexpected and innovative interdisciplinary models; computational design, digital fabrication, contemporary form making, design research, philosophy and theory of design, speculative design

Jeffrey Krieger, AIA, LEED AP, MArch (*Carnegie Mellon University*). Adjunct Associate Professor. President, Krieger and Associates Architects; residential design.

Karin Kuenstler, MS (*Bank Street College of Education and Parsons*) *Associate Dean for Research and Graduate Studies*. Associate Professor. Interior design for corporate and commercial facilities.

Maria Kuttruff, MS (*Drexel University*). Adjunct Assistant Professor. Owner/Principal, Viola Interior Design, LLC. Residential interior design.

Robert Nalls, AIA, NCARB, MArch (*University of Pennsylvania*). Adjunct Professor. Principal, Nalls Architecture Inc.; institutional and educational buildings.

Diana S. Nicholas, RA, AIA, NCARB, MFA (*University of the Arts, Philadelphia*) *Director of MS Design Research, Coordinator, Sustainability in the Built Environment Minor*. Assistant Professor. Coordinator, Sustainability in the Built Environment Researching Health in residential urban environment and interprofessional collaboration

Jacklynn Niemiec, LEED BD+C, MArch (*University of Pennsylvania*). Assistant Teaching Professor. Graphic representation

James Rowe, AIA, MArch (*University of Pennsylvania*). Adjunct Associate Professor. Principal, Studio Agoos Lovera; institutional, recreation, corporate, civic and residential design.

Debra Ruben, NCIDQ, IDEC, LEED AP, MS (*Drexel University*) *Academic Associate Dean; Interim Associate Dean, Graduate Studies*. Associate Professor. Interior design

Paul Salvaggio, AIA, LEED AP, NCARB, BArch, BS Arch (*Pennsylvania State University*). Adjunct Assistant Professor. Principal, Arcus Design Group; residential architecture.

Rachel Schade, AIA, MArch (*University of Pennsylvania*) *Program, Architecture, Associate Director for Student Placement*. Associate Teaching Professor. Principal, Rachel Simmons Schade Architect. Work-study placement; residential, graphic representation.

Harris Steinberg, FAIA, MArch (*University of Pennsylvania*) *Executive Director, Lindy Institute for Urban Innovation*. Distinguished Teaching Professor. Urban design and civic engagement.

Frances Temple West, AIA, NCARB, LEED GA, MArch (*Virginia Tech*). Assistant Teaching Professor. Principal, Frances Temple-West Architect; Retail, Corporate/Commercial, and Residential design

Frances Temple-West, AIA, NCARB, LEED GA, MArch (*Virginia Tech*). Assistant Teaching Professor. Principal, Frances Temple-West Architect; retail, corporate/commercial, and residential design

Simon Tickell, AIA, MArch (*University of Pennsylvania*). Associate Teaching Professor. Principal, Simon J Tickell Architect; educational and museum buildings, residential design

Nancy Trainer, FAIA, AICP, LEED, AFAAR, MArch (*University of Pennsylvania*) *Associate Vice President of Design & Planning at Drexel*. Adjunct Teaching Professor. Planning, institutional design.

Ada Tremonte, NCIDQ, IDEC, IIDA, MS (*Drexel University*) *Director, BS Interior Design*. Teaching Professor. President, a d a Design Associates, Inc.; educational and corporate/commercial design

Emeritus Faculty

Judith Bing, MArch (*Yale University*). Professor Emeritus. Research on traditional architecture of the Balkans and Anatolia

Sylvia Clark, MArch (*University of Pennsylvania*). Professor Emeritus.

Paul M. Hirshorn, FAIA, MArch, MCP, (*University of Pennsylvania*). Professor Emeritus.

Marjorie Kriebel, BArch (*University of Pennsylvania*). Professor Emeritus.

The College of Arts and Sciences

About the College

By pursuing excellence in research and scholarship, we train our graduate students to become ethical professionals with expertise in particular areas of inquiry and an appreciation for the fundamental interactions among disciplines in a fast-changing, challenging and diverse world.

Drexel University's College of Arts and Sciences (<http://www.drexel.edu/coas/>) (CoAS) stands unafraid in the face of change. We recognize that our ever-evolving, fast-paced culture required a new approach to education, one that understands the world is malleable and can be molded by minds inspired to lead society's evolution.

But innovation requires more than an ambitious personality. It requires versatility -- we must not only be experts in our field, but also agile enough to engage in the cross-disciplinary work needed to address modern problems resourcefully. That's why our faculty challenge students to see past their own perspectives and establish a deeper understanding of humanity's needs. It's why our co-op program inserts students within a professional culture, introducing them to the expectations of the job while offering hands-on practical application of coursework. And it's why, starting as early as early as freshman year, students team with faculty members as peers, conducting research that affects the world now.

Here at CoAS, we are committed to implementing in-the-moment change, not for personal glory, but because it's what the world needs.

Majors

- Biological Sciences (MS, PhD) (p. 210)
- Chemistry (MS, PhD) (p. 214)
- Communication (MS) (p. 217)
- Communication, Culture and Media (MS, PhD) (p. 220)
- Creative Writing (MFA) (<http://catalog.drexel.edu/graduate/collegeofartsandsciences/creativewriting/>)
- Environmental Policy (MSEP) (p. 222)
- Environmental Science (MSES, PhD) (p. 224)
- Mathematics (MS, PhD) (p. 227)
- Physics (MS, PhD) (p. 229)
- Psychology (MS) (p. 234)
- Psychology: Applied Cognitive and Brain Sciences (PhD) (<http://catalog.drexel.edu/graduate/collegeofartsandsciences/psychology-acbsphd/>)
- Psychology: Clinical Psychology (PhD) (<http://catalog.drexel.edu/graduate/collegeofartsandsciences/psychology-clinicalphd/>)
- Psychology-Law (PhD/JD) (p. 226)
- Public Policy (MS) (p. 236)

English Language Center

As part of the College of Arts and Sciences, Drexel's English Language Center (<http://www.drexel.edu/elc/>) offers an accredited intensive English program throughout the year. In addition to classes in academic skills such as essay writing and oral presentations, the Center offers the language of STEM (Science Technology Engineering and Math), Language of Media and Design, Global Business English program (GLOBE), English for academic purposes, TOEFL and IELTS preparation, ESL Teaching enhancement programs, and other subjects.

Many graduate students begin their studies at Drexel in the English Language Center and the Graduate Preparation summer program for a rigorous and supportive environment to develop or enhance their academic English language knowledge and skills. International Teaching Assistants are oriented through a summer course in the language, culture, and pedagogy of the US classroom. All Drexel international students have access to tutoring and other academic skills workshops throughout the academic year.

Some graduate programs within the College of Arts and Sciences may accept who are academically admissible but need further English language study.

For more information, see the ELC website (<http://www.drexel.edu/elc/>) or contact the Center at:

Biological Sciences

Major: Biological Sciences
Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)
Calendar Type: Quarter
Total Credit Hours: 45.0 (MS) or 90.0 (post-bachelor's) or 45.0 (post-master's)
Co-op Option: Available for full-time on-campus master's-level students
Classification of Instructional Programs (CIP) code: 26.0101
Standard Occupational Classification (SOC) code: 19-1029

About the Program

The Department of Biology (<http://drexel.edu/coas/academics/departments-centers/biology/>) offers graduate programs in biological sciences leading to the doctorate degree and to the thesis or non-thesis master of science degree. The curricula and research programs are designed to help students achieve success in their degree programs and pursue positions of leadership in their respective fields of research.

The intellectual life of the department relies heavily on the participation, creativity and the energy of graduate students; therefore the department

expects students to be vigorously involved in courses, seminars, journal clubs, research, informal discussions, and departmental functions.

Additional Information

Contact the Department of Biology (<https://drexel.edu/coas/academics/departments-centers/biology/>) at 215-895-2624 for more information.

MS in Biological Sciences

Degree Requirements

Soon after matriculation the student completes a plan of study with the advisor, outlining his or her specific program. Both thesis and non-thesis options are available. Conducting formal research necessary for the thesis is dependent upon the student finding a faculty member whom will serve as their faculty advisor and supervise a mutually agreed upon research project.

Students registering for an MS with graduate co-op will gain 6 months of work experience in the summer/fall term (year 1/year 2). The Steinbright Career Development Center (<http://drexel.edu/scdc/>) will provide students with an overview of professionalism, resume writing, and the job search process. Students will not earn academic credit for the co-op but will earn 9.0 non-academic co-op units per term.

Students wishing to pursue PhD candidacy are encouraged to elect the MS with thesis. After all other requirements are completed, the research MS student defends the thesis at a final oral examination. Alternatively, all non-thesis students must pass a comprehensive examination as a condition of their degree completion.

Requirements for the MS Curriculum with Thesis

BIO 500	Biochemistry I	3.0
BIO 540	Readings in Molecular and Cellular Bioscience and Biotechnology	3.0
BIO 601	Research Methods	3.0
BIO 632	Advanced Cell Biology	3.0
BIO 635	Advanced Genetics and Molecular Biology	3.0
BIO 997	Research in Bioscience	12.0
ENVS 506	Biostatistics	3.0
GRAD 600	An Introduction to the Responsible Conduct of Research (RCR): A Short Course for Investigators	1.0
Bioscience electives		14.0
Total Credits		45.0

Requirements for the Non-Thesis MS with Graduate Co-op

BIO 500	Biochemistry I	3.0
BIO 632	Advanced Cell Biology	3.0
BIO 635	Advanced Genetics and Molecular Biology	3.0
COOP 500	Career Management and Professional Development for Master's Degree Students	1.0
ENVS 506	Biostatistics	3.0
Bioscience electives*		32.0
Total Credits		45.0

Requirements for the Non-thesis MS Curriculum

BIO 500	Biochemistry I	3.0
BIO 632	Advanced Cell Biology	3.0
BIO 635	Advanced Genetics and Molecular Biology	3.0
ENVS 506	Biostatistics	3.0
Bioscience electives *		33.0
Total Credits		45.0

* *Non-thesis students may elect to take up to 4.0 credits of BIO 997 Research in Bioscience.

Bioscience Electives Include:

BIO 534	Bioinformatics I	3.0
BIO 535	Bioinformatics II	3.0
BIO 610	Biochemistry of Metabolism	3.0
BIO 613	Genomics	3.0
BIO 614	Behavioral Genetics	3.0
BIO 615	Proteins	3.0
BIO 616	Biochemistry of Major Diseases	3.0
BIO 620	Biomembranes	3.0
BIO 630	Cell Biology of Disease	3.0
BIO 644	Human Genetics	3.0
BIO 646	Stem Cell Research	3.0
BIO 650	Virology	3.0
BIO 661	Neurobiology of Autism Disorders	3.0
BIO 662	Biology of Neuron Function	3.0
BIO 663	Molecular Mechanisms of Neurodegeneration	3.0
BIO 664	Neurobiology of Disease	3.0

PhD in Biological Sciences

The Doctor of Philosophy in Biological Sciences is conferred in recognition of breadth of scholarship and scientific attainment plus demonstrated ability to complete original research.

The following general requirements must be satisfied in order to complete the PhD program in Biological Sciences:

- 90.0 (post-bac) or 45.0 (post-MS) credit hours total
- establishing a plan of study
- 7 core courses
- additional courses dependent on advisor or committee recommendations
- candidacy exam/approval of dissertation proposal
- dissertation/thesis
- defense of dissertation/thesis
- a graduate research seminar presentation once a year for students in their third year and beyond.

Thesis Advisor/Plan of Study

For students admitted without an identified thesis advisor, the thesis advisor must be selected by the end of winter term in the first year. All students are asked to submit a plan of study by the end of the winter quarter first year. It is anticipated that the graduate coursework will be completed during the first two years or less. Students should check with the department for a list of available electives.

Cell Molecular Genetics Track

Core Requirement Courses

BIO 540	Readings in Molecular and Cellular Bioscience and Biotechnology	3.0
BIO 601	Research Methods	3.0
RCRG 600	An Introduction to the Responsible Conduct of Research	0.0

Distribution Required Courses: Must take all 3

BIO 500	Biochemistry I	3.0
BIO 632	Advanced Cell Biology	3.0
BIO 635	Advanced Genetics and Molecular Biology	3.0

Statistics Requirement Course

ENVS 506	Biostatistics *	3.0
----------	-----------------	-----

Required Elective Courses: Must take 1

3.0

Research and Research Seminars **		69.0
BIO 864	Graduate Research Seminar	
BIO 997	Research in Bioscience	
Total Credits		90.0

* Or approved substitute course.

** BIO 864 and BIO 997 are taken multiple times to reach 90.0 credits.

Ecology Evolution Track

Core Requirement Courses		
BIO 540	Readings in Molecular and Cellular Bioscience and Biotechnology	3.0
BIO 601	Research Methods	3.0
RCRG 600	An Introduction to the Responsible Conduct of Research	0.0
Distribution Required Courses: Must take 2		9.0-10.0
BIO 636	Population Genetics *	
ENVS 526	Molecular Ecology *	
ENVS 528	Conservation Biology	
Statistics Requirement Course		
ENVS 506	Biostatistics **	3.0
Required Elective Courses: Must take 2		6.0
Research and Research Seminars ***		66.0
BIO 864	Graduate Research Seminar	
BIO 997	Research in Bioscience	
Total Credits		90.0-91.0

* Offered every other year.

** Or approved substitute course.

*** BIO 864 and BIO 997 are taken multiple times to reach 90.0 credits.

Sample Plan of Study (MS)

Thesis - MS Sample Plan of Study

Term 1		Credits
BIO 500	Biochemistry I	3.0
BIO 540	Readings in Molecular and Cellular Bioscience and Biotechnology	3.0
Bioscience elective		3.0
Term Credits		9.0
Term 2		
BIO 635	Advanced Genetics and Molecular Biology	3.0
BIO 997	Research in Bioscience (OR Bioscience electives)	5.0
GRAD 600	An Introduction to the Responsible Conduct of Research (RCR): A Short Course for Investigators	1.0
Term Credits		9.0
Term 3		
BIO 632	Advanced Cell Biology	3.0
ENVS 506	Biostatistics	3.0
Bioscience elective or Research		3.0
Term Credits		9.0
Term 4		
BIO 601	Research Methods	3.0
BIO 997	Research in Bioscience	3.0
Bioscience electives		3.0
Term Credits		9.0
Term 5		
BIO 997	Research in Bioscience	3.0
Bioscience electives		6.0
Term Credits		9.0
Total Credit:		45.0

Non-Thesis with Graduate Co-op - MS Sample Plan of Study

Term 1		Credits
COOP 500	Career Management and Professional Development for Master's Degree Students	1.0
BIO 500	Biochemistry I	3.0
Bioscience electives		6.0
Term Credits		10.0
Term 2		
BIO 635	Advanced Genetics and Molecular Biology	3.0
Bioscience electives		6.0
Term Credits		9.0
Term 3		
BIO 632	Advanced Cell Biology	3.0

Bioscience elective		3.0
Term Credits		9.0
Term 4		
Bioscience electives		9.0
Term Credits		9.0
Term 5		
Bioscience electives		9.0
Term Credits		9.0
Total Credit:		45.0

Additional Information

Contact the Department of Biology (<http://www.drexel.edu/biology/>) at 215-895-2624 for more information.

Biological Sciences Faculty

Michael Akins, PhD (*Yale University*). Assistant Professor. The neural mechanisms underlying how organisms interact with the environment; circuit formation, particularly of sensory circuits, and neural diseases including autism and Fragile X syndrome (FXS).

Shivanthi Anandan, PhD (*University of California, Los Angeles*) *Interim Vice Provost for Undergraduate Education*. Associate Professor. Microbial

genetics, in particular the analysis of light-regulated signal transduction pathways and the regulation of gene expression in photosynthesizing organisms.

John R. Bethea, PhD (*University of Alabama at Birmingham*). Professor. Neuroscience and immunology.

Valerie Bracchi-Ricard, PhD (*University Joseph Fourier, Grenoble, France*). Research Assistant Professor. Role of TNF and TNF receptors in neuroinflammation and remyelination following spinal cord injury.

Laura Duwel, PhD (*University of Cincinnati*) Assistant Department Head, Department of Biology. Teaching Professor. Immunology and microbiology.

Felice Elefant, PhD (*Temple University*) Director of the Biology Graduate Program. Professor. Understanding the roles of two classes of chromatin regulatory proteins termed histone acetyltransferases (HATs) and histone de-methylases.

Roman Fischer, PhD (*University of Stuttgart, Germany*). Research Assistant Professor. Regenerative and anti-inflammatory therapies to treat autoimmune and neurodegenerative diseases.

Denise Garcia, PhD (*UCLA*). Associate Professor. Neuroscience, the role of astrocytes in the central nervous system.

Tali Gidalevitz, PhD (*University of Chicago*). Associate Professor. Genetic and molecular pathways regulating protein folding homeostasis, and their role in protein conformation diseases, aging, and development.

Mary Katherine Gonder, PhD (*The City University of New York*) Director, Bioko Biodiversity Protection Program Co-Founder, Central African Biodiversity Alliance. Professor. Deciphering spatial patterns of biodiversity across the Gulf of Guinea and Congo Basin region; Conservation measures to mitigate the effects of habitat loss and climate change in western equatorial Africa.

Susan Gurney, PhD (*Westfälische Wilhelms-Universität Münster (Germany)*). Associate Teaching Professor. Evolutionary genetics (human and equids); stem cell biology; forensic science

Meshagae Hunte-Brown, PhD (*Drexel University*). Teaching Professor. Stable isotopes in aquatic food webs, ecosystem ecology, STEM education.

Jiu Jiang, MD, PhD (*Shanghai Second Medical University*). Research Associate Professor. T cell immune response to virus infection in aged mice.

Karen Kabnick, PhD (*Massachusetts Institute of Technology*). Associate Teaching Professor. Molecular and genetic mechanisms of cellular biology, human disease, host/parasite interactions.

Kari Lenhart, PhD (*Princeton University*). Assistant Professor. Coordination of stem cell behavior and regulation of stem cell cytokinesis in the young and aged niche.

Robert Loudon, PhD (*Thomas Jefferson University*). Associate Teaching Professor. Rho GTPases, regulation of actin cytoskeleton, Regulation of G protein-coupled receptors by receptor kinases and arrestins.

Daniel Marena, PhD (*Syracuse University*). Associate Professor. Developmental neurobiology and behavior; CHARGE syndrome; Pitt-Hopkins syndrome; Alzheimer's disease.

Donna Murasko, PhD (*Penn State Hershey Medical Center*) Dean Emeritus. Professor. The effects of aging on the adaptive immune response to influenza virus and retrovirus latency and reactivation.

Michael O'Connor, MD, PhD (*MD, Johns Hopkins University; PhD, Colorado State*). Professor. Biophysical and physiological ecology, thermoregulation of vertebrates, ecological modeling.

Sean O'Donnell, PhD (*University of Wisconsin-Madison*). Professor. Tropical ecology, focusing on geographic variation and elevation effects on ecology and behavior of army ants and ant-bird interactions; neurobiology, focusing on brain plasticity and brain evolution in social insects.

Ryan Petrie, PhD (*McGill University*). Assistant Professor. Mechanisms of cell movement through three-dimensional extracellular matrix.

Jerome Ricard, PhD (*University Joseph Fourier, Grenoble, France*). Research Assistant Professor. Inflammation and cell death after spinal cord injury. Regulation of cell death by Eph receptors.

Jacob Russell, PhD (*University of Arizona*). Professor. Microbiomes and metagenomics; ecology and evolution of symbiosis.

Nianli Sang, MB, PhD (*M.B., Fudan University Shanghai Medical College; Ph.D., Thomas Jefferson University*) Co-Director of the Cell Imaging Center. Associate Professor. Molecular and cellular biology of cancer; posttranslational modification, folding and quality control of proteins and their implication in cell physiology and human diseases.

Aleister Saunders, PhD (*University of North Carolina, Chapel Hill*) Senior Vice Provost for Research, Director of the RNAi Resource Center. Professor. Identification and characterization of genes and proteins involved in Alzheimer's disease.

Kevin P.W. Smith, PhD (*Drexel University*). Assistant Teaching Professor. Linking behavioral ecology and organismal diversity, neonate behavior in herpetological models, STEM education.

Elias T. Spiliotis, PhD (*The Johns Hopkins University*) Director of the Cell Imaging Center. Associate Professor. Cell polarity and cell division: regulation of cytoskeleton-dependent motility.

Jennifer Stanford, PhD (*Harvard University*). Associate Professor. Evaluating and improving approaches to teach STEM content in higher education environments to promote student learning, engagement in STEM courses, and STEM student retention.

Khakhina Svetlana, PhD (*Rowan University, GSBS*). Assistant Teaching Professor. Host-pathogen interactions. Exploring the diversity of bacteriophages and antibiotic-production bacteria to use it as tolls provided by nature to treat antibiotic-resistant bacterial infections.

Monica M. Togna, PhD (*New Jersey Institute of Technology*). Assistant Teaching Professor. Examination of the structure and function of living organisms from the cellular to the organismal level in order to better understand common physiological processes.

Emeritus Faculty

Joseph Bentz, PhD (*State University of New York [SUNY] at Buffalo*). Professor Emeritus. Biophysics, biochemistry and biopharmaceutics, focused on the molecular basis of biological membrane transport and fusion.

Cecilie Goodrich, PhD (*Harvard University*). Professor Emeritus. Neuroscience and systems physiology, postnatal maturation of physiology and behavior in relation to brain immunocytochemistry.

Chemistry

Major: Chemistry

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS); 90.0 (PhD)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 40.0501

Standard Occupational Classification (SOC) code: 19-2031

About the Program

The Department of Chemistry (<http://drexel.edu/coas/academics/departments-centers/chemistry/>) offers graduate programs in analytical chemistry, atmospheric chemistry, inorganic chemistry, organic chemistry, materials chemistry, physical chemistry, educational chemistry, and polymer chemistry. The curriculum is designed to prepare students for the research and practical application of chemistry to challenges facing mankind. The department also encourages interdisciplinary activities. Faculty members are active participants in the environmental engineering and science and biomedical science and engineering programs; others work with physicists and biologists in areas such as atmospheric science, biochemistry, and biophysical chemistry.

The chemistry faculty wants graduate students to understand the purpose of, and need for, fundamental research while working on problems of practical interest and application to the challenges facing mankind in the modern world. Areas of research include the use of digital electronic methods to analyze trace constituents of air and water, a study of the molecules of living systems, the effects of toxic chemicals and carcinogens, synthesis and characterization of compounds of medicinal and industrial interest, methods for studying macromolecules, and characterization of transient species using lasers.

The Department of Chemistry strives to maintain a community of research scholars (faculty, postdoctoral fellows, and graduate and undergraduate students) that is large enough to provide a variety of experiences within chemistry, yet small enough to give each student individual attention. Both full- and part-time study are available.

Admission/Financial Assistance Requirements for Admission

For admission to graduate study, the department requires a BS in chemistry or the equivalent. This requirement applies to full-time and part-time students working toward either the MS or PhD. Generally, in order to be considered for admission, a successful applicant should have taken two semester courses of Organic, Analytical and Physical Chemistry with corresponding laboratory courses. In addition, he/she should have taken an upper level Inorganic Chemistry course. All entering MS and PhD students are required to take a series of two-hour exams in analytical, inorganic, organic, and physical chemistry to help assess their preparation for graduate work in chemistry. The scores obtained on these exams are used as a basis for course selection.

Applicants for admission to PhD level graduate studies must submit Graduate Record Examination (GRE) results with their application. GRE scores are helpful to the Chemistry Department and the Office of Admissions, and are required for those students requesting financial

support, i.e., a teaching assistantship (TA) and/or would like to be considered for a Dean's Scholarship or a Provost's Fellowship. Applicants for admission to MS level graduate studies are also encouraged to submit their GRE results with their application.

Financial Assistance

Graduate students at Drexel can obtain two main types of financial support: teaching assistantships and research assistantships. Teaching assistantships are available on a competitive basis to incoming students and are normally renewable for several years. All those requesting financial assistance must submit GRE scores.

Forms, details about requirements, and information about application deadlines are all available on the Chemistry (<http://www.drexel.edu/grad/programs/coas/chemistry/>) page of Drexel's Graduate Admissions website.

Master of Science in Chemistry

Degree Requirements

The MS degree is awarded after satisfactory completion of a minimum of 45.0 credit hours in chemistry and related fields, at least 30.0 credits of which must be taken at Drexel. Both thesis and nonthesis options are available.

Course Requirements

The course requirements for both thesis and non-thesis options are one complete sequence in the major area of interest; one of the sequence courses from each of analytical, organic, polymer, and inorganic chemistry; and two courses in physical chemistry. The remaining credits may be chosen from graduate courses within the department or from other departments offering courses related to the student's major areas.

Major Sequence		9.0
Select one of the following sequences:		
Inorganic Chemistry		
CHEM 521	Inorganic Chemistry I	
CHEM 522	Inorganic Chemistry II	
CHEM 523	Inorganic Chemistry III	
Analytical Chemistry		
CHEM 530	Analytical Chemistry I	
CHEM 531	Analytical Chemistry II	
CHEM 755	Mass Spectrometry	
Organic Chemistry		
CHEM 541	Organic Chemistry I	
CHEM 542	Organic Chemistry II	
CHEM 543	Organic Chemistry III	
Physical Chemistry		
CHEM 557	Physical Chemistry I	
CHEM 558	Physical Chemistry II	
CHEM 555	Quantum Chemistry Of Molecules I	
Polymer Chemistry		
CHEM 561	Polymer Chemistry I	
CHEM 562	Polymer Chemistry II	
CHEM 563	Polymer Chemistry III	
Additional Sequence Courses **		15.0
Electives		21.0
Total Credits		45.0

- * Each of these courses can be replaced by CHEM 554 or CHEM 752.
- ** One of which must be chosen from CHEM 554, CHEM 555, CHEM 557, CHEM 558 or CHEM 752.

Thesis Option

Up to nine credits of CHEM 997 *Graduate Research* may be counted towards a master's thesis. No later than the spring term of the first year of coursework, a student should choose a research advisor with whom to work in carrying out an original investigation in chemistry. The results will be written up in thesis form and submitted to an MS thesis committee consisting of the research advisor and two other departmental faculty appointed by the advisor. The acceptance by this committee of the MS thesis completes the thesis option requirements for the MS degree. Students in the MS program receiving financial aid from the department must elect the thesis option if they do not pursue the PhD program at Drexel.

PhD in Chemistry

Degree Requirements

The PhD degree is awarded in any of eight main areas of chemistry: analytical, atmospheric, inorganic, organic, materials, physical, educational or polymer chemistry. The degree recipient must demonstrate scholastic breadth in chemistry and contribute significantly to scientific advancement in a chosen major area. Requirements of the program include coursework, candidacy examinations, a chemical information retrieval or technical writing course, and successful completion of a publishable PhD thesis.

Course Requirements

Ninety credits of graduate-level work must be completed for the PhD degree. The Chemistry Department requires 30.0 credits of coursework in chemistry (outlined in the Course Requirements (p. 214) section of the MS program). The balance can be made up of advanced special topics courses and research credits.

Candidacy Requirements

To become a candidate for the PhD in chemistry at Drexel, a student must pass a prescribed set of cumulative examinations.

Cumulative Examinations

Written examinations designed to test a student's background in his or her major area are given monthly during the academic year and occasionally during the summer at the discretion of the faculty. Students should begin taking these examinations after having completed three courses in the major area (usually the main sequence courses), though beginning these exams earlier is possible for well-prepared students. Students normally begin taking these examinations in the fall term of their second year.

Research Seminar

The thesis proposal seminar is designed to help the student conduct his/her research more efficiently by (i) promoting a greater fundamental understanding about the student's own specific research project and (ii) providing context and perspective about previous accomplishments in the field by other research groups as well as her/his own. The subject of the seminar will be a literature review and a description/defense of the student's research project including results of experiments and investigations already conducted as well as future work. The examination at which the thesis proposal is defended is held no later than the end

of the *winter* term of the *second* year for *full-time* students or the end of the *spring* term of the *second* year for *part-time* students. A written report is submitted to the committee no later than two weeks before the examination. A passing grade on this examination is required for continuation in the PhD program.

Thesis

A PhD thesis — the heart of the PhD degree — must be written, accepted by the research supervisor, presented to a PhD Thesis Examining Committee, and defended orally to the satisfaction of the Examining Committee. It is the responsibility of the student, not the research supervisor, to submit an acceptable thesis. It is expected that the student will have at least one peer-reviewed research article accepted for publication by the time of the thesis defense.

Facilities

There are seven undergraduate teaching laboratories in the department: three freshman Chemistry Laboratories, two advanced Organic Chemistry Laboratories, a Physical Chemistry Laboratory, an Analytical Instrumentation Laboratory and a combined Analytical/Inorganic Chemistry Laboratory.

Mass Spectrometry Laboratory

A Waters Autospec M high resolution mass spectrometer, a Sciex API triple quadrupole mass spectrometer, and a Bruker Autoflex III MALDI Time-of-Flight mass spectrometer.

Magnetic Resonance Laboratory

Varian INNOVA 300 MHz superconducting FT-NMR spectrometer, Varian INNOVA 500 MHz superconducting FT-NMR spectrometer, and a Varian X-band 12" EPR spectrometer.

Analytical Instrumentation Laboratory

The open-access departmental Analytical Instrumentation Laboratory includes two Perkin-Elmer (PE) Spectrum One Fourier-transform infrared absorption spectrometers each with a universal diamond ATR accessory, a PE Lambda-35 UV/visible spectrometer, a PE Lambda-950 UV/visible/NIR spectrometer with a 60-mm-diameter diffuse reflectance integrating sphere, a PE model 343 polarimeter, a PE LS55B luminescence spectrometer, a PE Clarus 500 capillary-column GC with dual FID detectors, a BioAnalytical Systems Epsilon Electrochemistry System equipped with a rotating disk electrode, Clarus 500 capillary-column GC/MS system (with electron impact capability), a PE Series 200 Quaternary HPLC development system with UV/visible photodiode array detector, a PE Series 200 binary HPLC system interfaced to a Sciex 2000 triple quadrupole MS detector, a PE Series 2000 binary gel permeation chromatography system with refractive index detector, and a Varian AA240FS flame atomic absorption spectrometer equipped with a GTA 120 graphite furnace accessory.

Atomic Force Microscopy

The department has a Veeco multimode Atomic force microscopy (AFM) for research and education. AFM, also called scanning force microscopy (SFM), is one of the foremost tools for imaging, measuring, and manipulating matter at the nanoscale. It is when a fine tip is scanned across a surface the tip-surface force is measured to provide topographic, frictional, and adhesion information of a surface. With the ability to perform non-invasive, high-resolution surface imaging and force measurement, AFM has become an essential characterization

tool in multiple disciplines in life science, biomedical engineering, nanoengineering, chemistry, materials science, and other related fields.

Other Departmental Facilities

The department has a VEECO INNOVA N3 Multimode scanning probe microscope and also maintains a computational chemistry laboratory equipped with nine Dell Optiplex 620 computers running Hyperchem v 8.0. Research laboratories for each of the department faculty members are located in Disque and Stratton Halls. Instrumentation available in the research laboratories is described on individual faculty web pages. Additional full-time support includes an instrument specialist (for NMR and MS), a glassblower (Chemistry Department), two electronics specialists (College of Arts & Sciences Electronics Shop), and four machinists (Drexel University Machine Shop).

Chemistry Faculty

Jason Cross, PhD (*University of Surrey (UK)*). Associate Teaching Professor. Luminescent lanthanide complexes

Fraser Fleming, PhD (*University of British Columbia (Canada)*)
Department Head, Chemistry. Professor. Nitriles, Isonitriles, Stereochemistry, Organometallics

Joe P. Foley, PhD (*University of Florida*). Professor. Separation science, especially the fundamentals and biomedical/pharmaceutical applications of the following voltage- or pressure-driven separation techniques: capillary electrophoresis (CE), electrokinetic chromatography, supercritical fluid chromatography, and high-performance and two-dimensional liquid chromatography (LC). Within these techniques, we explore novel separation modes (e.g., dual-opposite-injection CE and sequential elution LC), novel surfactant aggregate pseudophases, and chiral separations.

Lee Hoffman, PhD (*Flinders University, Adelaide, South Australia*). Assistant Teaching Professor. Interfacial studies on the self-assembly of natural organic materials, understanding the nature of each component, and development of a mechanism describing this process; Dendrimer/metal nanocomposite design and synthesis hosting metal nanoparticles, utilizing the multivalent dendritic polymer architecture for further exploitation with other molecules such as antibodies and other targeting species.

Monica Ilies, PhD (*Polytechnic University of Bucharest*). Associate Teaching Professor. Bioorganic chemistry and chemical biology; bioinorganic chemistry and biochemistry.

Haifeng Frank Ji, PhD (*Chinese Academy of Sciences*). Professor. Micromechanical sensors for biological and environmental applications; Nanomechanical drug screening technology.

Daniel B. King, PhD (*University of Miami*). Associate Professor. Assessment of active learning methods and technology in chemistry courses; incorporation of environmental data into chemistry classroom modules; development of hands-on activities and laboratory experiments.

Dionicio Martinez-Solario, PhD (*University of Alabama*). Assistant Professor. Total synthesis of complex biologically active natural products serving as inspirational platforms for the discovery and development of new reactions and synthetic methods.

Craig McClure, PhD (*University of Michigan*). Associate Teaching Professor. Promotion of quantitative literacy in introductory courses;

development of guided inquiry activities for introductory chemistry; outreach programs in STEM fields.

Kevin G. Owens, PhD (*Indiana University*). Associate Professor. Mass spectrometry research, including the development of sample preparation techniques for quantitative analysis and mass spectrometric imaging using matrix-assisted laser desorption/ionization (MALDI) time-of-flight mass spectrometry (TOFMS) techniques for both biological and synthetic polymer systems, the development of laser spectroscopic techniques for combustion analysis, and the development of correlation analysis and other chemometric techniques for automating the analysis of mass spectral information.

Lynn S. Penn, PhD (*Bryn Mawr College*). Professor. Surface modification for specific applications: chemically derivatize metal and ceramic solid surfaces; designing and executing sequential chemical processes, building complex and layered structures on surfaces, with specific focus on behavior of polymer brushes (investigating the fundamental transport-selective behavior of polymer brushes because of potential in drug delivery, biomedical devices and as an explanation of some biological processes).

Susan A. Rutkowsky, PhD (*Drexel University*) *Associate Department Head*. Associate Teaching Professor. Development of labs and lecture demonstrations for general and organic chemistry courses; STEM outreach programs.

Jeremiah Scepaniak, PhD (*New Mexico State University*). Assistant Professor. Design transition metal-based contrast agents for MRI & synthesis of bimetallic complexes to activate small molecules.

Reinhard Schweitzer-Stenner, PhD (*Universität Bremen (Germany)*). Professor. Exploring conformational ensembles of unfolded or partially folded peptides and proteins; determining the parameters governing peptide self-aggregation; structure and function of heme proteins; investigating protein-membrane interactions; use of IR, VCD, Raman, NMR and absorption spectroscopy for structure analysis.

Karl Sohlberg, PhD (*University of Delaware*). Associate Professor. Computational and theoretical materials-related chemistry: (1) complex catalytic materials; (2) mechanical and electrical molecular devices.

Anthony Wambsgans, PhD (*Rice University*). Associate Teaching Professor.

Ezra Wood Associate Professor. Radical chemistry and formation of secondary pollutants in urban and forest environments, impacts of biomass burning on air pollution and climate change, pollutant emissions, and design and deployment of novel instrumentation for field studies.

Jun Xi, PhD (*Cornell University*). Associate Teaching Professor. Biomacromolecular interactions both in solution and in confined environment; mechanisms of DNA replication and DNA repair; structure and function of molecular chaperones; drug target identification and new therapeutic development; single molecule enzymology; DNA directed organic synthesis.

Emeritus Faculty

Anthony W. Addison, PhD (*University of Kent at Canterbury, England*). Professor Emeritus. Design and synthesis of novel biomimetic and oligonuclear chelates of copper, nickel, iron, ruthenium and vanadium; their interpretation by magnetochemical, electrochemical and spectroscopic methods, including electron spin resonance; CD and ESR spectroscopy and kinetics for elucidation of molecular architecture

of derivatives (including NO) of oxygen-binding and electron-transfer heme- and non-heme iron metalloproteins of vertebrate and invertebrate origins; energy-transfer by Ru, Ir and lanthanide-containing molecules and assemblies.

Amar Nath, PhD (*Moscow State University, Moscow USSR*). Professor Emeritus.

Peter A. Wade, PhD (*Purdue University*). Professor Emeritus. Exploration of a newly discovered [3,3]-sigmatropic rearrangement in which O-allyl nitronic esters are thermally converted to #,#-unsaturated nitro compounds; development and exploitation of a carbon-based hemiacetal mimic; and exploration of cycloaddition reactions involving nitroethylene derivatives and novel nitrile oxides.

Communication

Major: Communication

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 09.0900

Standard Occupational Classification (SOC) code: 11-2011; 11-2031; 25-1122

About the Program

Drexel's Master of Science in Communication program prepares students for careers in a wide range of professional activities. The program specializes in three areas:

- public communication
- technical communication
- science and health communication

Public Communication

Public Communication has much to offer those looking to work in journalism, public relations and nonprofit organizations. Students can choose from courses such as Strategic Social Media Communication, Event Planning, Sports Journalism, Public Relations Writing, and Nonprofit Communication.

Technical Communication

Technical Communication provides skills in technical writing, computer documentation and training to prepare students for careers in a wide range of industries, from social networking to publishing to health insurance. Students choose from courses such as Technical Writing, Digital Publishing, Technical & Science Editing, and Technical Documentation & Software.

Science and Health Communication

Science and Health Communication leads to careers in medical, science and pharmaceutical communication. Students can choose from courses such as Science Writing, Medical Journalism, and Campaigns in Health & Environment.

In addition, the program provides a strong foundation in ethics and theoretical approaches to communication. This theoretical basis is designed to ensure that, as the field changes, students will continue to

have an intellectual framework for evaluating and implementing new technology and changing media.

The program emphasizes flexibility, encouraging each student, in consultation with a faculty advisor, to craft a particular course of study. Throughout the curriculum students may use electives to increase communication skills or to further develop areas of specialization.

Students can attend classes on campus or online, full-time or part-time, they can begin the program in any academic quarter, and they can complete all required coursework in the evening. The degree requires 45.0 credits of graduate coursework, and can be completed part-time in approximately three years or full-time in five quarters (just over a year).

The program accommodates students from widely varying educational backgrounds; many have backgrounds in science and mathematics, and an equal number come from humanities-related disciplines. Some students pursue their degrees while already working in demanding jobs.

For additional information, visit the MS in Communication (<http://drexel.edu/coas/academics/graduate-programs/communication/>) web page.

Admission Requirements

Applicants must meet the general requirements for admission to graduate studies. Prospective students must also submit:

- A 750-1,000 word statement explaining why they want to enter the program. The statement will be reviewed to evaluate each applicant's writing skills and sense of purpose.
- Two letters of recommendation from professional or academic references
- Transcripts of all college-level coursework
- A current resume

GRE scores are not required, but are recommended for applicants with an undergraduate GPA of less than 3.0.

For international students where English is not the official language, a TOEFL score of 100 (iBT) or equivalent IELTS score is required. For more information regarding international application, please see the International Students Admissions Information (<http://drexel.edu/grad/resources/international/>) page.

Visit the Graduate Admissions (<http://drexel.edu/grad/>) website for more information about requirements and deadlines, as well as instructions for applying online.

Degree Requirements

The MS degree requires 45.0 credits of coursework and six months of internship for those who lack significant experience in communication related fields.

Internship

An internship is required and may be completed at any time during the student's tenure at Drexel. Students who already have the equivalent of six months of professional experience may waive this requirement at the discretion of the Department's Graduate Director.

Required Courses

COM 500	Reading & Res Communication	3.0
COM 610	Theories of Communication and Persuasion	3.0
COM 698	Creating and Managing Communication Professional Identities	3.0
Electives *		21.0

Required Concentration Courses 15.0

Students must select and complete one of the following concentration options:

Technical Communication

COM 612	Ethics for Technical, Science and Health Communication	
Choose four of the following:		
COM 510	Technical Writing	
COM 525	Document Design and Usability	
COM 535	Digital Publishing	
COM 567	Technical Documentation and Software	
COM 570	Technical, Science and Health Editing	
INFO 532	Software Development	

Science and Health Communication

CHP 672	Theory and Practice in Health Communication	
COM 520	Science Writing	
COM 570	Technical, Science and Health Editing	
COM 612	Ethics for Technical, Science and Health Communication	
COM 670	Medical Writing	
	or COM 673: Medical Journalism	

Public Communication

COM 613	Ethics for Public Communication	
Choose four of the following:		
COM 535	Digital Publishing	
COM 536	Strategic Social Media Communication	
COM 541	Foundations of Public Relations	
COM 542	Public Relations Writing **	
COM 543	Public Relations Planning **	
COM 563	Event Planning	
COM 575	Grant Writing	
COM 576	Nonprofit Communications	
COM 650	Telecommunications Regulation and Policy	
COM 660	Investigative Journalism	

Total Credits 45.0

* Any appropriate graduate course offered in the University can serve as an elective if the student has sufficient background to take the course. In addition, the program offers its own elective courses including special topics (COM T680 (p. 220)). Qualified students may also pursue independent study for elective credit in special cases.

** To enroll in this class you must first earn a grade of "B" or better in COM 541 *Foundations of Public Relations* or get permission from the MS COM advisor to waive this requirement.

Sample Plan of Study

Public Communication

Term 1		Credits

Communication Faculty

Ronald Bishop, III, PhD (*Temple University*) *Director, Undergraduate Programs in Communication*. Professor. Investigative reporting, sports journalism, journalism history, journalism sourcing patterns, textual narrative and ideological analysis, cultural history of fame.

Joan W. Blumberg, BA (*Pennsylvania State University*). Assistant Teaching Professor. Publishing, electronic publishing, publishing and communications, publishing and mass-media.

Karen Cristiano, MS (*Temple University*) *Assistant Department Head of Communication*. Teaching Professor. Journalism, medical writing, feature writing, copy editing, mass media and society.

Richard Forney Assistant Teaching Professor. Broadcast journalism technology and the effects of new technologies on personal and corporate communication skills.

Alexander Friedlander, PhD (*Carnegie Mellon University*) *Associate Dean for Undergraduate Education, College of Arts and Sciences; Interim Co-Director, Judaic Studies Program*. Associate Professor. Rhetorical theory and practice, document design, writing and technology.

Ernest A. Hakanen, PhD (*Temple University*) *Director, Graduate Programs in Communication, Culture & Media*. Professor. Telecommunications policy, adolescent media use, communication theory and history, global media, and semiotics.

Barbara Hoekje, PhD (*University of Pennsylvania*). Associate Professor. Sociolinguistic theory, discourse analysis, applied linguistics (language teaching, learning, and testing).

Alexander Jenkins, PhD (*Drexel University*). Assistant Teaching Professor. Digital games, video games, emotion, morality, online fan communities, emerging media, convergence.

Hyunmin Lee, PhD (*University of Missouri*) *Director, Undergraduate Programs in Communication*. Associate Professor. Social media strategies for relationship and reputation management in public relations;

media messages of public health issues and its psychological and behavioral effects on the public.

Susan Magee, MFA *Director Online Teaching*. Instructor. Digital Publishing, Content reation, Blogging, Strategic Social Media, Public Relations, Business and Technical Communication

Julia May, PhD (*Drexel University*) *Director, Professional MS Communication Programs*. Assistant Teaching Professor. Political communication; international politics and its news coverage; public opinion; transatlantic relations; war, torture and human rights; debate in the public sphere.

Alexander Nikolaev, PhD (*Florida State University*). Associate Professor. Public relations, political communication, organizational communication, mass communication, international communications and negotiations, communications theory.

Rakhmiel Peltz, PhD (*University of Pennsylvania*). Professor. Judaic studies, Yiddish culture and linguistics, ethnography of communication, immigrant cultural studies.

Douglas V. Porpora, PhD (*Temple University*). Professor. War, genocide, torture, and human rights; macro-moral reasoning in public sphere debate; contemporary social theory moral and political communication; religion.

Rachel R. Reynolds, PhD (*University of Illinois*). Associate Professor. Sociolinguistics, ethnography of communication and discourse analysis; violence against women in mass media; political economy of migration; semiotics including the textual, the visual and multimodal.

Rosemary Rys, MA (*Rowan University*). Assistant Teaching Professor. Public relations and marketing.

Wesley Shumar, PhD (*University of Pennsylvania*). Professor. Digital media and learning; culture of higher education; entrepreneurship education; craft culture; semiotic of consumer culture.

Lawrence Souder, PhD (*Temple University*) *Director, Drexel Edits*. Teaching Professor. Science and technical writing, communication ethics, nonprofit communication.

Allan Stegeman, MA (*University of Houston*). Teaching Professor. Communication, technology and mass media, video.

Susan Stein, PhD (*University of Wisconsin*). Associate Teaching Professor. Science, environmental, and health communication

Scott Tattar, BA (*York College of Pennsylvania*) *Faculty Advisor, Drexel PRSSA, Communication Department Recruitment Liason*. Instructor. Public relations

Hilde Van den Bulck, PhD (*Katholieke Universiteit Leuven*) *Department Head of Communication*. Professor. Political economy of media structures; media policies for digitized media ecologies; stakeholders and coalitions in media policies; digitization; convergence and legacy media; public (service) media; celebrity culture and industry; fandom and anti-fandom.

Asta Zelenkauskaite, PhD (*Indiana University*). Associate Professor. Social media; user-generated content; computer-mediated communication; interactivity; active audience analysis; mobile communication; gender and online identity; prosumer culture; internet of things; quantitative/qualitative research.

Communication, Culture and Media

Major: Communication, Culture and Media

Degrees Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (Masters); 90.0 (PhD Post-Bachelors) or 45.0 (PhD Post-Masters)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 09.0102

Standard Occupational Classification (SOC) code: 25-1122

About the Program

MS in Communication, Culture & Media

The Master's Program (MS) in Communication, Culture & Media is a great choice for academically oriented students who wish to learn the basics of research and theory in communication and media studies, possibly to test the waters for further study, or to explore a personal fascination with mass media, mediated communication, cultural studies, social change and media. The program also encourages interdisciplinary approaches to the study of communication and media through faculty strengths in anthropology, communication, linguistics and sociology.

The MS degree requires 45.0 credits of graduate level coursework and the review by two faculty members of a major research or critical paper that has come out of the student's work while in the program.

The program can be completed part time in approximately three years, or full time in five terms (just under a year and a half).

PhD in Communication, Culture & Media

The PhD program in Communication, Culture & Media develops innovative scholar-teachers who know how to impart theories and studies on the interaction of social forces and communication. Our graduates are trained as committed researchers in quantitative and qualitative approaches to communication study. The program also encourages interdisciplinary approaches to the study of communication and media through faculty strengths in anthropology, communication, linguistics and sociology.

Click here for more information about the Graduate Programs in Communication, Culture and Media (<http://drexel.edu/coas/academics/graduate-programs/communication-culture-media/>).

Admission Requirements

MS program admission requirements

Applicants to the MS program will be evaluated based on:

- A 1,000 word statement of purpose
- Two letters of recommendation
- Transcripts of all college-level coursework
- GRE scores are recommended (especially for students whose GPAs are below 3.2)
- For international students where English is not the official language, a TOEFL score of 100 (iBT) or equivalent score in IELTS, or Cambridge CPE.

PhD program admission requirements

Applicants to the PhD program will be evaluated by the Department's Graduate Committee for admission to the program. Prospective students must submit with their application:

- a 1,500 word statement of purpose
- three letters of recommendation
- transcripts of all college-level coursework
- GRE scores
- for international students where English is not the official language, TOEFL or other English language proficiency scores are also required. For more information regarding international applicant requirements, view the International Students Admissions Information (<http://drexel.edu/grad/resources/international/>) page.

Minimum criteria include:

- Completion of a BA or BS degree in an appropriate field
- GPA of 3.0 or higher (preferred GPA 3.5 for courses in the major)
- For international students, a TOEFL score of 100 (iBT) or equivalent score in IELTS, or Cambridge CPE.

Students entering the program with a Master's degree or with some graduate credit will be evaluated by the Graduate Committee as to how many of their courses could possibly be counted toward the PhD. Students entering with an MS in an appropriate field are required by the university to take a minimum of 15 credit hours in the PhD program before being eligible to take qualifying exams.

For additional information on how to apply, visit the Drexel University Requirements for Admissions (<http://www.drexel.edu/grad/programs/coas/>) page.

Degree Requirements

Core Requirements

COM 610	Theories of Communication and Persuasion	3.0
CCM 704	Research Methods in Communication, Culture and Media	3.0

Required Electives. Choose three of the following: 9.0

CCM 710	Mass Communication and American Social Thought	
CCM 715	Media, Advocacy and Public Spaces	
CCM 725	Political Communication	
CCM 740	Consumer Culture	
CCM 745	Digital Subjectivities	
CCM 750	Political Economy of Media	

Additional Electives *

Three courses from the CCM rubric at 500 level or above	9.0
---	-----

Free Electives **

Seven Additional Graduate Level Electives	21.0
Total Credits	45.0

* There are several possible electives in CCM, including special seminars at the 800 level.

** Any appropriate graduate course offered in the University can serve as an elective if the student has sufficient background to take the course. Suggested courses for free electives might also include: CCM, COM, STS, PLCY, AADM, TVMN, and ENVP.

Degree Requirements

The PhD requires a minimum of 90.0 credits beyond a Bachelor's degree, including 45.0 credit hours of coursework prior to taking qualifying exams,

15.0 credit hours of coursework after exams, and 30.0 hours of research credits.

The PhD coursework is structured around a set of required core courses, a set of required seminars with rotating topics, and electives in graduate communication lecture courses, independent study work, and dissertation credit.

All students in the program take five common core courses. They then take no less than five courses chosen from CCM 800 level seminar offerings. Students are encouraged to take additional seminars after meeting that requirement, since seminar courses enable collaborative relationships with professors and introduce students to the scholarly community. In addition to course work, students will be assigned required teaching and research duties, in the fall, winter and spring terms.

After completing the core requirements and a sequence of seminars, students are expected to take a minimum of 10 additional courses from existing graduate level lecture courses (depending on their interests and research needs). Students may take up to two graduate courses (six credits) outside the department. Additional credits to meet the 90.0 credit requirements will come from independent study and dissertation credits.

Student advising will include appointments with both graduate director and an assigned mentor during the first two weeks of fall courses, where an individualized plan of study (University form D1) will be completed and approved by the program director.

Core Courses

CCM 701	Contemporary Social Theory	3.0
CCM 702	Communication Theory I: Persuasion and Media Effects	3.0
CCM 703	Communication Theory II: Discourse and Semiotics	3.0
CCM 704	Research Methods in Communication, Culture and Media	3.0
CCM 705	Data Analysis in Communication	3.0

Seminars

Students select 15 credits from the five categories of seminars * 15.0

CCM 801	Seminar in Contemporary Theory	
CCM 802	Seminar in Discourse and Semiotics	
CCM 803	Seminar in Structural and Cultural Dynamics	
CCM 804	Seminar in Research Methodology	
CCM 805	Seminar in Communication Ethics	

Communication, Culture & Media Electives 30.0

Ten courses are required, for a total of 30.0 credit hours of electives. These may be chosen from CCM 500 to CCM 800 level courses, including 800 level seminars that are a different topic from earlier courses taken.

Dissertation Credits/Additional Electives ** 30.0

CCM 998	PhD Dissertation Research in Communication, Culture & Media	1.0-12.0
---------	---	----------

For the dissertation, students work with a principal advisor, one of the Communication, Culture and Media Program grad faculty, and no less than two additional faculty from within the department. Students must find one additional outside reader, and students may bring in up to two outside readers.

Total Credits	91.0-102.0
---------------	------------

* There are five categories of seminar: one in which students learn advanced work and influences on a specific theorist or theoretical school; one in which students learn about theories of language, discourse and the sign; one that teaches the paradigm of structural dynamics central to social sciences theory and research; one in which students study a research methods approach; and one that deals with approaches to research ethics. Students must take a seminar in each area (CCM 801, CCM 802, CCM 803, CCM 804, CCM 805). Seminars can be repeated, with a maximum of three courses taken in each area, as long as the subject covered is different each time.

** Students may take up to six graduate-level courses outside of the Communication, Culture and Media program rubric.

Qualifying Examinations

After students have completed 45.0 credits, which will usually be at the end of their 6th term, they will be required to take a qualifying examination. The qualifying exam includes of three parts: theory, methods and a content area. Students will be given the grade of fail, pass or high pass on the exam. A grade of pass in all three sections of the exam will be required to qualify for the PhD. Students who do not pass one out of three sections of the exam on the first attempt may retake the section that they failed one time to qualify for the PhD. If they do not pass the second time they take the failed section of the exam they will be dismissed from the program. When a student passes all three sections of the exam, the proper paperwork will be filed with the university graduate office and they will be advanced to candidacy.

Dissertation Defense

Students should defend the dissertation and graduate towards the end of their fourth or fifth year, depending on whether they entered the program with a Masters degree.

Visit the Graduate programs in Communication, Culture, and Media (<http://www.drexel.edu/coas/academics/graduate-programs/communication-culture-media/>) website for more information.

Term 8		
CCM 998	PhD Dissertation Research in Communication, Culture & Media	9.0
	Term Credits	9.0
Term 9		
CCM 998	PhD Dissertation Research in Communication, Culture & Media	9.0
	Term Credits	9.0
Term 10		
CCM 998	PhD Dissertation Research in Communication, Culture & Media	9.0
	Term Credits	9.0

Total Credit: 90.0

Communication, Culture and Media Faculty

Mary Ebeling, PhD (*University of Surrey*) Director, *Women's and Gender Studies*. Associate Professor. Science and technology studies; emerging technologies and biocapital; media and democratic cultures; radical social movements; sociology of markets; political sociology; and ethnographic methodologies.

Ernest A. Hakanen, PhD (*Temple University*) Director, *Graduate Programs in Communication, Culture & Media*. Professor. Telecommunications policy, adolescent media use, communication theory and history, global media, and semiotics.

Barbara Hoekje, PhD (*University of Pennsylvania*). Associate Professor. Sociolinguistic theory, discourse analysis, applied linguistics (language teaching, learning, and testing).

Jordan Hyatt, PhD, JD (*University of Pennsylvania, Villanova University School of Law*). Associate Professor. Community corrections; drug treatment; homelessness; probation/parole; re-entry; risk assessment; sentencing.

Emmanuel F. Koku, PhD (*University of Toronto*). Associate Professor. Social network analysis; qualitative/quantitative research; medical

sociology; social epidemiology; social demography; sociology of development; communication and information technology; community and urban sociology.

Hyunmin Lee, PhD (*University of Missouri*) Director, *Undergraduate Programs in Communication*. Associate Professor. Social media strategies for relationship and reputation management in public relations; media messages of public health issues and its psychological and behavioral effects on the public.

Brent Luvaas, PhD (*UCLA*). Associate Professor. DIY and independent media production; transnational consumer culture; popular music; new media and mediated subjectivities; youth culture in the US and Indonesia.

Rakhmiel Peltz, PhD (*University of Pennsylvania*). Professor. Judaic studies, Yiddish culture and linguistics, ethnography of communication, immigrant cultural studies.

Douglas V. Porpora, PhD (*Temple University*). Professor. War, genocide, torture, and human rights; macro-moral reasoning in public sphere debate; contemporary social theory moral and political communication; religion.

Rachel R. Reynolds, PhD (*University of Illinois*). Associate Professor. Sociolinguistics, ethnography of communication and discourse analysis; violence against women in mass media; political economy of migration; semiotics including the textual, the visual and multimodal.

Mimi Sheller, PhD (*New School for Social Research*) Director, *Center for Mobilities Research and Policy*. Professor. Sustainable mobility and mobility justice: new cultures and infrastructures of travel, transport, mobile communication, and urbanism; Caribbean Studies: history, culture and political theory of the region, including intersections of race, ethnicity, gender, sexuality and class.

Wesley Shumar, PhD (*University of Pennsylvania*). Professor. Digital media and learning; culture of higher education; entrepreneurship education; craft culture; semiotic of consumer culture.

Asta Zelenkauskaitė, PhD (*Indiana University*). Associate Professor. Social media; user-generated content; computer-mediated communication; interactivity; active audience analysis; mobile communication; gender and online identity; prosumer culture; internet of things; quantitative/qualitative research.

Environmental Policy

Major: Environmental Policy

Degree Awarded: Master of Science in Environmental Policy (MSEP)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 44.0599

Standard Occupational Classification (SOC) code: 19-1031

About the Program

The Master of Science in Environmental Policy spans the disciplines of law, political science, economics, engineering, business, public health and more. Students in this program take core courses in Public Policy, Environmental Policy and Economics and tracked courses in Environmental Science, Environmental and Occupational Health, or Environmental Engineering. Students can conduct real-world research writing through a case study thesis, select elective courses tailored to

their interests, or complete their degree with research experience. MS in Environmental Policy candidates receive personalized advising, which helps students find the classes and opportunities that will best serve their professional goals.

For more information about this program, visit the MS in Environmental Policy (<http://drexel.edu/coas/academics/graduate-programs/environmental-policy/>) page.

Admission Requirements

Applications are accepted year-round, and applicants can expect a decision within one month. Entering students may begin study fall, winter, or spring quarter. Full-time students can complete the program in two years. Part-time students can complete the degree at their own pace.

For additional information on how to apply, visit Drexel's Admissions page for Environmental Policy (<http://www.drexel.edu/grad/programs/coas/environmental-policy/>).

Degree Requirements

Students take 27.0 credits of core classes made up of four Public Policy courses, three Environmental Core courses, and two Economics Core courses. They also take either an Environmental Science, Occupational Health, or Environmental Engineering Track (2 three-credit classes). Students may use the remaining 12.0 credits to complete approved electives or research experience. Students wishing to delve deeper into a subject can choose to complete a 9.0 credit case study, as part of their 45.0 required credits, which they should begin in the first or second quarter.

Public Policy Core Courses * 12.0

PLCY 503	Theory and Practice of Policy Analysis
PLCY 504	Methods of Policy Analysis
PLCY 506	Institutional Dynamics of the Policy Process
PLCY 507	Nonprofit Organizations

Environmental Core Courses 9.0

ENVP 572	Environmental Policy
ENVP 522	Environmental Law (Environmental Law)
ENVS 506	Biostatistics

Environmental Science or Environmental and Occupational Health Track 6.0

Environmental Science Track- 2 of the following courses:

ENVS 501	Chemistry of the Environment
ENVS 528	Conservation Biology
ENVS 538	Biodiversity

Environmental and Occupational Health Track- EOH 510 and one of the following 600-level EOH courses:

EOH 510	Principles and Practice of Environmental and Occupational Health
EOH 605	Evidence Evaluation for Identification of Environmental Hazards
EOH 610	Environmental and Occupational Toxicology
EOH 615	Environmental and Occupational Health Policy
EOH 620	Environmental Hazard Assessment
EOH 630	Environmental Health Risk and Impact Assessment
EOH 665	Quantitative Risk Analysis for Environmental Health

Economics Core 6.0

BUSN 502	Essentials of Economics
ECON 616	Public Finance and Cost Benefit Analysis

Research Experience and/or Approved Courses in Environmental Policy 12.0

Case Study Sequence 9 Credit Elective

PLCY 510	Introduction to Case Study Research
PLCY 511	Case Study Literature Review

PLCY 512	Case Study Document Review
PLCY 513	Case Study Interviews
PLCY 515	Case Study Colloquium
PLCY 516	Case Study Research II
PLCY 517	Case Study Final Project

Or three approved courses (3-12 credits) to be selected with an advisor.

Total Credits 45.0

* Within the first quarter of study, a student must meet with an assigned advisor and work out a plan of study.

Sample Plan of Study

First Year

Fall		Credits
ENVP 572	Environmental Policy	3.0
EOH 510	Principles and Practice of Environmental and Occupational Health	3.0
PLCY 504	Methods of Policy Analysis	3.0
Term Credits		9.0

Winter

BUSN 502	Essentials of Economics	3.0
ENVP 522	Environmental Law (Environmental Law)	3.0
PLCY 503	Theory and Practice of Policy Analysis	3.0
Term Credits		9.0

Spring

ENVS 506	Biostatistics	3.0
EOH 615	Environmental and Occupational Health Policy	3.0
PLCY 507	Nonprofit Organizations	3.0
Term Credits		9.0

Second Year

Fall

ECON 616	Public Finance and Cost Benefit Analysis	3.0
EOH 665	Quantitative Risk Analysis for Environmental Health	3.0
PLCY 506	Institutional Dynamics of the Policy Process	3.0
Term Credits		9.0

Winter

ENVP 552	Political Economy of Climate Change	3.0
ENVP 875	Environmental Justice	3.0
EOH 605	Evidence Evaluation for Identification of Environmental Hazards	3.0
Term Credits		9.0

Total Credit: 45.0

Environmental Policy Faculty

Richardson Dilworth, PhD (*Johns Hopkins University*) Director, Center for Public Policy. Professor. American political development, urban politics, public policy.

Christian Hunold, PhD (*University of Pittsburgh*). Professor. Environmental policy; comparative politics; urban wildlife; political theory.

Alison Kenner, PhD (*Rensselaer Polytechnic Institute*). Associate Professor. Science, technology, and health; environmental health problems; cities and place; feminist theory; medical anthropology; digital humanities

Gwen Ottinger, PhD (*University of California, Berkeley*). Associate Professor. Social studies of science and technology, environmental justice, science and engineering ethics, citizen science, environmental ethics.

Mimi Sheller, PhD (*New School for Social Research*) Director, Center for Mobilities Research and Policy. Professor. Sustainable mobility and

mobility justice: new cultures and infrastructures of travel, transport, mobile communication, and urbanism; Caribbean Studies: history, culture and political theory of the region, including intersections of race, ethnicity, gender, sexuality and class.

Diane Sicotte, PhD (*Arizona State University*). Associate Professor. Sociology of environmental injustice: inequalities in the citing of environmental hazards; community-based research in neighborhoods dealing with industrial hazards; sociology of the environment; urban sociology; social inequalities.

Chloe Silverman, PhD (*University of Pennsylvania*) Director, Center for Science, Technology & Society. Associate Professor. Parent advocacy for autism, neurodiversity, and pollinator health research.

Emeritus Faculty

Robert J. Brulle, PhD (*George Washington University*). Professor Emeritus. Environmental policy and politics, critical theory, marine risk, social movements, environmental sociology.

Environmental Science

Major: Environmental Science

Degree Awarded: Master of Science in Environmental Science (MSES) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MSES); 90.0 (PhD)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 03.0104

Standard Occupational Classification (SOC) code: 19-2041

About the Program

Environmental science is a multidisciplinary field in which we try to understand environmental problems and find solutions to them. This field requires understanding of a number of disciplines.

The program's areas of focus include: ecology, biodiversity, conservation, environmental chemistry and assessment, and paleoecology-geology. A student may alternatively craft a specialized plan of study outside of these strength areas under the guidance of an academic advisor.

The master's degree may be completed with either a thesis or non-thesis option. Those choosing to prepare a thesis must complete 45.0 credits (up to 12.0 credits may be research). Students choosing the non-thesis option must complete coursework totaling 45.0 credits (6.0 of which may be research). Most courses carry three credits.

Part-time Study

The MS degree may be completed on a part-time basis. Most courses are scheduled in the late afternoon and evening, usually on a rotating basis from year to year. Part-time students should plan to take courses in the appropriate sequence to comply with the necessary prerequisites. Scheduling of course is dependent on student demand and faculty resources; however, most prescribed courses are offered at least once every other year (schedules are published each term). Required courses should be taken at the first opportunity.

Additional Information

For more information, visit the Department of Biodiversity, Earth & Environmental Science (<http://drexel.edu/coas/academics/departments-centers/bees/>) website.

Susan Cole is the Graduate Coordinator for Environmental Science. Susan Cole can be reached by telephone at 215.895.2905 or e-mail at coless@drexel.edu.

Admission Requirements

In addition to the general entrance requirements for all applicants, entrance to the MS Program in Environmental Science requires a bachelor of science degree in science, mathematics, or engineering. Minimally, students must have completed a year each of general biology and general chemistry, and one semester of calculus. Organic chemistry and physics preferred depending on student interest.

PhD Program

Applicants to the doctoral program are judged on the basis of academic excellence and the alignment of their research interests with those of the faculty in the department. Prospective PhD students are welcome to contact the program to discuss their research interests.

Additional information about how to apply is available on the Graduate Admissions at Drexel University (<http://www.drexel.edu/grad/programs/coas/environmental-science/>) website.

Degree Requirements: MS in Environmental Science

The Master of Science in Environmental Science (MSES) program requires three core courses that form the basis for further specialization. Students choose to complete the remainder of the program with elective courses based on interest. 45.0 total credits are required for program completion.

Core Courses

ENVS 501	Chemistry of the Environment	3.0
ENVS 506	Biostatistics	3.0
ENVS 511	Evolutionary Ecology	3.0
ENVS electives		36.0
Total Credits		45.0

Elective Areas

Please see Course Descriptions for a list of Environmental Science (ENVS) electives. Students may also take Environmental Policy (ENVP) and Environmental Engineering (ENVE) courses with prerequisites. Other departmental courses with approval.

Degree Requirements: PhD in Environmental Science

The following general requirements must be satisfied in order to complete the PhD program in Environmental Science:

- 90.0 (post-bachelor's) or 45.0 (post-master's) quarter credits
- qualifying exam
- establishing a plan of study
- 3 core courses recommended, not required

- additional courses dependent on advisor or committee recommendations
- candidacy exam/approval of dissertation proposal
- dissertation/thesis
- defense of dissertation/thesis
- a graduate research seminar presentation once a year for second, third, and fourth-year students.

Thesis Advisor/Plan of Study

For students admitted without an identified Thesis Advisor, the Thesis Advisor must be selected by the end of Winter term in the first year. All students are asked to submit a Plan of Study (that has been agreed upon by Thesis Advisor and student) by the end of Winter term first year. It is anticipated that the graduate coursework will be completed during the first two years or less. Generally there is no prescribed coursework -- students must take courses needed to complete their research under guidance of an faculty advisor.

Curriculum

The following courses are *recommended*, but not required:

ENVS 501 Chemistry of the Environment
 ENVS 506 Biostatistics
 ENVS 511 Evolutionary Ecology

Candidacy Examination

The function of the Candidacy Examination is to test the breadth and the depth of the student's capabilities in their chosen area of study. The graduate student becomes a PhD *candidate* only after successfully completing the Candidacy Examination and completing 15 or 45 credits (for post-master's or post-bachelor's degree students, respectively). The candidacy exam is comprised of three parts whose order will be determined by the Candidacy Committee: written examination (or qualifying exam), dissertation research proposal, and oral examination.

Students entering the program with a master's degree are expected to complete the candidacy examination by the end of the summer quarter of their first year. Students entering the PhD program with a bachelor's degree are expected to complete this examination by the end of the summer quarter of their second year.

Thesis/Dissertation and Defense of Thesis/Dissertation

The student will finalize their dissertation only after approval to write is granted by the Dissertation Research Committee. Approval is based upon an evaluation of the breadth and depth of original research being conducted by the student. The dissertation must follow the format specifications set forth in the Drexel's Office of Research and Graduate College of Drexel University (<http://drexel.edu/graduatecollege/>). Research conducted for the dissertation must be presented in a lecture open to the public and then defended, privately, before the student's Dissertation Research Committee.

Facilities

Facilities include fully equipped research laboratories in microbiology, ecology, hydrology, and chemistry. Field ecology research augments lab facilities with field-specific equipment, including two boats (14- and 25-foot) and vans with towing capacity. A full range of sampling equipment exists in the department from seine nets, sediment dredges

and coring devices, water sampling bottles, flow meters and acoustic tracking devices. Some additional research facilities in environmental biotechnology, chemistry and atmospheric engineering are located in other locations on Drexel's campus.

Among the equipment available for student research are atomic absorption spectrophotometers, UV-visible spectrophotometers, gas-liquid chromatographs, ion chromatograph, ICP-Mass Spectrometer, GC-Mass Spectrometer, high performance liquid chromatographs, total organic carbon analyzer, elemental analyzer for carbon and nitrogen, stable isotope mass spectrometer, high-speed refrigerated centrifuge, nutrient analyzers, and UV photochemical reactor. In addition, the department and university have various microscopes including a scanning electron microscope (SEM). Within the department and in the Department of Biology there is a large capacity for genomics including preparatory equipment for DNA extraction and enhancement.

Drexel University is a national leader in the use of computers for educational and research functions. Several facilities on campus are available for student use.

Environmental Science Faculty

Ted Daeschler, PhD (*University of Pennsylvania*) Associate Curator of Vertebrate Zoology; Vice President for Systematic Biology and the Library: Academy of Natural Sciences. Associate Professor. Vertebrate fauna of the Late Devonian Period in eastern North America; fossil collecting; systematic work focusing on freshwater vertebrates; nature of early non-marine ecosystems.

Jon Gelhaus, PhD (*University of Kansas*) Curator, Department of Entomology: Academy of Natural Sciences. Professor. Systematic expertise in crane flies (Tipuloidea); phylogenetic reconstruction; historical and ecological biogeography; biodiversity measures and evolution of morphological character systems.

Danielle Kreeger, PhD (*Oregon State University*). Research Associate Professor. Trophic interactions in aquatic ecosystems.

Stefanie Kroll, PhD (*SUNY College of Environmental Science and Forestry*) Project Science Director, Academy of Natural Sciences. Assistant Research Professor. Aquatic macroinvertebrate ecology, bioindicators of human stressors on aquatic ecosystems, monitoring the effects of watershed conversation, management and restoration.

Marie J. Kurz, PhD (*University of Florida*) Biogeochemistry Section Leader, Academy of Natural Sciences. Assistant Research Professor. Interactions between geochemical, ecological & hydrologic processes in freshwater systems. Availability, transport and cycling of stream solutes; Stream ecosystem structure & function; Groundwater-surface water interactions; Adaptive management & restoration of water resources & aquatic ecosystems.

Tatyana Livshultz, PhD (*Cornell University*) Assistant Curator of Botany. Assistant Professor. Expertise of the milkweed and dogbane family (Apocynaceae); evolution and species diversity of the genus *Dischidia*; differences in floral form and function.

Amanda Lough, PhD (*Washington University in St. Louis*). Assistant Professor. Volcanic seismicity and the relation to magma plumbing systems; glacial seismicity and the seismicity of Antarctica; intraplate seismicity.

Richard McCourt, PhD (*University of Arizona*) Associate Curator of Botany, Academy of Natural Sciences of Drexel University; 2010-2012:

Program Director, Division of Graduate Education, National Science Foundation. Professor. Biodiversity, evolution, ecology, and systematic of green algae, specifically charophyte algae.

Michael O'Connor, MD, PhD (*MD, Johns Hopkins University; PhD, Colorado State*). Professor. Biophysical and physiological ecology, thermoregulation of vertebrates, ecological modeling.

Sean O'Donnell, PhD (*University of Wisconsin-Madison*). Professor. Tropical ecology, focusing on geographic variation and elevation effects on ecology and behavior of army ants and ant-bird interactions; neurobiology, focusing on brain plasticity and brain evolution in social insects.

Marina Potapova, PhD (*Russian Academy of Sciences*) *Assistant Curator.* Assistant Professor. Taxonomy, ecology, and biogeography of freshwater diatoms; methods of quantifying morphological characters of diatom frustules based on geometric morphometrics; systematic of monoraphid freshwater diatoms.

Gary Rosenberg, PhD (*Harvard University*) *Pilsbry Chair of Malacology.* Professor. Magnitude and origin of species-level diversity in the Mollusca.

Jacob Russell, PhD (*University of Arizona*). Professor. Microbiomes and metagenomics; ecology and evolution of symbiosis.

Alexis Schulman, PhD (*Massachusetts Institute of Technology*) *Director of the Environmental Studies and Sustainability Program.* Associate Research Professor. Environmental policy and politics, Urban planning Sustainability and resilience transitions, Policy implementation, Local knowledge and community science

Jocelyn A. Sessa, PhD (*Penn State University*) *Assistant Curator of Invertebrate Paleontology: Academy of Natural Sciences.* Assistant Professor. Paleoecology; paleobiology; extinction recovery dynamics; climate change; isotope geochemistry; fossil and modern mollusks

Loyc Vanderkluisen, PhD (*University of Hawaii*). Associate Professor. The cyclicality of volcanic eruptions, volcanic degassing processes, and large igneous provinces.

David J. Velinsky, PhD (*Old Dominion University*) *Department Head, Biodiversity, Earth and Environmental Science.* Professor. Geochemical cycling of organic and inorganic constituents of sediments and waters; Sedimentary diagenesis of major and minor elements; Isotope biogeochemistry of carbon, nitrogen and sulfur in marine and freshwater systems.

Dane Ward, PhD (*Drexel University*). Assistant Teaching Professor. Urban agriculture and sustainability both in Philadelphia and Cienfuegos, Cuba, as well as insect community structure and population ecology of reptiles and amphibians in the New Jersey Pine Barrens.

Elizabeth B. Watson, PhD (*University of California, Berkeley*). Associate Professor. The implications of global and regional environmental change, and unraveling the interacting effects of multiple anthropogenic stressors on coastal ecosystems to promote more informed management, conservation, and restoration.

Jason Weckstein, PhD (*Louisiana State University*) *Associate Curator of Ornithology.* Associate Professor. Avian phylogenetics, comparative biology and evolutionary history; biodiversity surveys of birds and their parasites and pathogens; coevolutionary history of birds and their parasites.

Emeritus Faculty

Susan S. Kilham, PhD (*Duke University*). Professor Emeritus. Aquatic ecology: phytoplankton; physiological ecology, especially of diatoms in freshwater and marine systems; large lakes; food webs; biogeochemistry.

John G. Lundberg, PhD (*University of Michigan*). Professor Emeritus. Diversity and diversification of fishes; documenting and interpreting the morphological, molecular, and taxonomic diversity of living and fossil fishes in the interrelated fields of systematic, faunistics and biogeography and paleobiology; exploration and collecting in poorly-known tropical freshwater habitats and regions.

Daniel Otte, PhD (*University of Michigan*) *Senior Curator, Systematics and Evolutionary Biology.* Professor Emeritus. Taxonomy and biogeography of Orthoptera (grasshoppers, crickets, katydids and their relatives).

James R. Spotila, PhD (*University of Arkansas*) *L. D. Betz Chair Professor.* Professor Emeritus. Physiological and biophysical ecology, thermoregulation of aquatic vertebrates, biology of sea turtles.

Joint JD/PhD Law-Psychology Program

Major: Law and Psychology

Degree Awarded: Juris Doctor (JD) and Doctor of Philosophy (PhD)

Calendar Type: Semester and Quarter

Total Credit Hours: 85.0 Semester (JD) and 91.0 Quarter (PhD)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 22.0208

Standard Occupational Classification (SOC) code: 11-9199; 23-1011

About the Program

The Kline School of Law (<http://drexel.edu/law/>) and the Department of Psychology (<http://drexel.edu/coas/academics/departments-centers/psychology/>) in the College of Arts and Sciences offer a joint and integrated JD/PhD Program in Law and Psychology. The program melds two already ongoing successful endeavors, the JD degree in the School of Law and the PhD in clinical psychology in the Department of Psychology. See the JD-PhD Program webpage (<http://drexel.edu/coas/academics/graduate-programs/psychology/doctorate-juris-doctorate/>) for more information.

Students in the program complete all 85.0 semester credits required for graduation from the law school and all 91.0 quarter credits required to complete the doctorate. The program allows those students who wish to pursue professional degrees in both law and psychology a more efficient plan of study. The program is designed to be completed in seven (7) years, including required psychology practica, a year's internship in an American Psychological Association accredited predoctoral mental health/forensic setting, a master's thesis, a doctoral dissertation, and 20 hours per week of cooperative training and 50 hours of pro bono service in law.

Students who are accepted into the JD/PhD program will receive full tuition remission for all psychology coursework, plus a guaranteed annual stipend that is currently at least \$17,000 per year for all six years they are at the university prior to completing the clinical internship. Students with outstanding LSAT scores are eligible for full tuition remission from the School of Law.

For information on the Admissions process, visit the JD/PhD Application Instructions (<http://drexel.edu/coas/academics/graduate-programs/psychology/doctorate-juris-doctorate/application-instructions/>) page.

Philosophy

The program bridges the gap between legal and psychological training. By and large, lawyers and social scientists come from different cultures, with different interests, different cognitive approaches to solving problems, different research methodologies, and different attitudes toward confrontation and argument. Each profession arrives at the “truth” in different ways, and its members are exposed to different styles of education during their post-baccalaureate training. Legal education develops an understanding of case analysis, statutory interpretation, the evolution of legal traditions, and methods for resolving disputes. Education in psychology develops research and clinical skills and understanding of behavioral theories, techniques, and statistical methods. Law, which has special rules concerning evidence and proof, relies heavily on precedent and the application of legal principles to specific facts toward the goal of settling conflicts that need immediate resolution. By contrast, psychology looks at problems through an empirical lens, using psychometrically-based tools and techniques to systematically evaluate questions, but rarely reaching a “final verdict.” Because the limits of evidence and the meaning of “proof” in psychological research may differ sharply from the limits of evidence and proof in law, conflict may result when the two disciplines interact.

Goals

Within the broad framework of the program’s philosophy, the JD/PhD Program in Law & Psychology has three specific goals:

- Develop scientist-practitioners who will produce legally sophisticated social science research to aid the legal system to make better empirically-based decisions;
- Produce lawyer-psychologists who will participate in the development of more empirically and theoretically sophisticated mental health policy by legislatures, administrative tribunals, and the courts; and
- Educate highly trained clinicians who can contribute to the advancement of forensic psychology in such areas as criminal law, domestic relations, and civil commitment.

In fulfilling these goals, the program trains students in an integrated and conceptually unified curriculum so they acquire a mature understanding of the interaction between the two disciplines.

Degree Requirements

Students attend the School of Law and the Department of Psychology simultaneously for six years, integrating course work in both disciplines each year. Students maintain continuous contact with the faculties of both schools and the developments in both disciplines over the course of each year.

In the seventh year, after obtaining the JD, students undertake a year-long supervised internship and complete their doctoral dissertation. They are awarded the PhD at the end of their seventh year.

Training consists of seven elements:

- The required existing core program in law and psychology at both schools;

- Interdisciplinary courses; e.g., Mental Health Law, Behavioral Sciences and the Law, Expert Witnesses, Law and the Mind Sciences;
- Supervised psycholegal research experience on teams of students’ faculty mentors;
- Legal clinics and psychology practica and internships that combine knowledge from both fields in a practical setting;
- Electives in both fields, e.g., bioethics, education law, health law, health psychology, employment discrimination, neuropsychology;
- Cooperative experience and pro bono service in legal settings; and
- Employment for at least one summer in a legal setting, e.g., public interest law firm, governmental agency, private law firm, nonprofit association.

Mathematics

Major: Mathematics

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS) or 90.0 (PhD)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 27.0101

Standard Occupational Classification (SOC) code: 15-2021; 15-2041

About the Program

The Department of Mathematics is a broadly based academic unit offering instructional programs and carrying on research activities in mathematics. Doctor of Philosophy and Master of Science degrees are offered.

Areas of research specialty among the faculty include applied mathematics, algebraic combinatorics, biomathematics, discrete mathematics, optics, analysis, number theory, numerical analysis, probability and statistics, matrix and operator theory, fluid mechanics, and partial differential equations.

Additional Information

For more information about these graduate programs, visit Department of Mathematics (<http://drexel.edu/coas/academics/graduate-programs/mathematics/>) webpage.

Admission Requirements

Applicants should hold a BS degree in mathematics or the equivalent and meet the University’s graduate admission standards. In particular, the student should have had intensive exposure to proof oriented courses, such as real analysis and abstract algebra. Students requesting financial aid are required to take the Graduate Record Examination General Test. Because many of the core courses are two- or three-term sequences beginning in the fall, new students are typically admitted to the programs only in the fall term. Admissions standards for the MS and PhD programs are equivalent.

For additional information on how to apply, visit Drexel University’s Graduate Admissions (<http://www.drexel.edu/grad/programs/coas/mathematics/>) website.

Master of Science in Mathematics

Students must complete a minimum of 45.0 graduate credits for the MS degree. Of these 15 courses, the following six are required:

Required Courses

MATH 504	Linear Algebra & Matrix Analysis	3.0
MATH 505	Principles of Analysis I	3.0
MATH 506	Principles of Analysis II	3.0
MATH 533	Abstract Algebra I	3.0
MATH 630	Complex Variables I	3.0
MATH 633	Real Variables I	3.0

The remaining 9 courses may be any graduate mathematics courses. In some cases, course substitutions may be made with courses from other departments. Elective courses taken outside the department must receive prior departmental approval in order to be counted toward the degree.

There are no thesis, language, or special examination requirements for the master's degree.

Students seeking a dual MS must satisfy core requirements for both degree programs.

Students should note that some departmental courses, such as Advanced Engineering Mathematics, are foundation courses and do not contribute to the departmental requirements for the degree. They do count toward the University requirements for a degree.

PhD in Mathematics

Students must complete a minimum of 45 graduate credits for the PhD degree, in addition to the 45.0 required by the MS program for a total of 90.0 credits. Of the 45.0 credits of MS program courses, the following six are required:

Required Courses

MATH 504	Linear Algebra & Matrix Analysis	3.0
MATH 505	Principles of Analysis I	3.0
MATH 506	Principles of Analysis II	3.0
MATH 533	Abstract Algebra I	3.0
MATH 630	Complex Variables I	3.0
MATH 633	Real Variables I	3.0

The remaining 27.0 credits, comprising the MS segment of the PhD program, may be any graduate mathematics courses. In some cases, course substitutions may be made with courses from other departments. Elective courses taken outside the department must receive prior departmental approval in order to be counted toward the degree.

The student must pass a written qualifying exam. The student is allowed two attempts. Students must take exam at the end of their first year, and have a second opportunity in September of their second year.

Students must take a PhD candidacy exam at the end of their second year. Additional coursework to reach the 90.0 credits required for the PhD will be agreed upon with the student's Graduate Advisor. Students should note that some departmental courses, such as MATH 544 *Advanced Engineering Mathematics*, are foundation courses and do not contribute to the departmental requirements for the degree. They do count toward the University requirements for a degree.

Facilities

The computing resources of the Mathematics Department include servers dedicated to administrative, research and computation functions. The research server has 4 VCPS's with 8 GB RAM and 40 GB disk space; the computational server pi has the CPU 2.6 GHZ (16 core) AMD Operon with 32 GB RAM and 500 GB disk.

Graduate students and faculty have access to the main Drexel high-performance cluster: Proteus. The university block is available for general purpose computing. Overall, the facility has 2496 computer cores, 9.8 TB RAM (4 GB RAM per core).

In addition to the primary university library, the department itself has a small collection of texts and research books. It is housed in a comfortable room that lends itself to informal research meetings.

Mathematics Faculty

David M. Ambrose, PhD (*Duke University*) Associate Department Head, *Mathematics*. Professor. Applied analysis and computing for systems of nonlinear partial differential equations, especially free-surface problems in fluid dynamics.

Jason Aran, MS (*Drexel University*). Associate Teaching Professor.

Jonah D. Blasiak, PhD (*University of California at Berkeley*). Associate Professor. Algebraic combinatorics, representation theory, and complexity theory.

Yasmine Boolakee-Pant, MS (*University of Freiburg*). Instructor.

Robert P. Boyer, PhD (*University of Pennsylvania*). Professor. Functional analysis, C^* -algebras and the theory of group.

Fernando Carreon, PhD (*University of Texas at Austin*). Teaching Professor.

Patrick Clarke, PhD (*University of Miami*). Associate Professor. Homological mirror symmetry, Landau-Ginzburg models, algebraic geometry, symplectic geometry.

Daryl Falco, MS (*Drexel University*). Associate Teaching Professor. Discrete mathematics and automata theory.

Raymond Favocci, MS (*Drexel University*). Associate Teaching Professor.

Darij Grinberg, PhD (*Massachusetts Institute of Technology*). Assistant Professor. Algebraic Combinatorics, Noncommutative Algebra, Symmetric Functions, Hopf Algebras, Enumerative Combinatorics, Invariant Theory

Pavel Grinfeld, PhD (*Massachusetts Institute of Technology*). Associate Professor. Intersection of physics, engineering, applied mathematics and computational science.

Anatolii Grinshpan, PhD (*University of California at Berkeley*). Associate Teaching Professor. Function theory and operator theory, harmonic analysis, matrix theory.

Yixin Guo, PhD (*University of Pittsburgh*). Associate Professor. Biomathematics, dynamical systems, ordinary and partial differential equations and math education.

R. Andrew Hicks, PhD (*University of Pennsylvania*). Professor. Geometry; optics; computer vision.

Pawel Hitczenko, PhD (*Warsaw University*). Professor. Probability theory and its applications to analysis, combinatorics, wavelets, and the analysis of algorithms.

Jeffrey LaComb, PhD (*Duke University*). Assistant Teaching Professor. Rare Event Simulation, Dynamical Systems, Numerical Analysis and Mathematical Biology

Georgi S. Medvedev, PhD (*Boston University*). Professor. Ordinary and partial differential equations, mathematical neuroscience.

Cecilia Mondaini, PhD (*Federal University of Rio de Janeiro*). Assistant Professor. Analysis of Partial Differential Equations, Fluid Dynamics, Stochastic Processes

Shari Moskow, PhD (*Rutgers University*) *Department Head*. Professor. Partial differential equations and numerical analysis, including homogenization theory, numerical methods for problems with rough coefficients, and inverse problems.

Oksana P. Odintsova, PhD (*Omsk State University*). Teaching Professor. Math education; geometrical modeling.

Dimitrios Papadopoulos, MS (*Drexel University*). Assistant Teaching Professor.

Joel Pereira, PhD (*University of North Carolina*). Assistant Teaching Professor. Commutative Algebra

Ronald K. Perline, PhD (*University of California at Berkeley*) *Undergraduate Adviser*. Associate Professor. Applied mathematics, numerical analysis, symbolic computation, differential geometry, mathematical physics.

Marci A. Perlstadt, PhD (*University of California at Berkeley*). Associate Professor. Applied mathematics, computed tomography, numerical analysis of function reconstruction, signal processing, combinatorics.

Adam C. Rickert, MS (*Drexel University*). Associate Teaching Professor.

Eric Schmutz, PhD (*University of Pennsylvania*). Professor. Probabilistic combinatorics, asymptotic enumeration.

Li Sheng, PhD (*Rutgers University*). Associate Professor. Discrete optimization, combinatorics, operations research, graph theory and its application in molecular biology, social sciences and communication networks, biostatistics.

Gideon Simpson, PhD (*Columbia University*). Associate Professor. Partial differential equations, scientific computing and applied mathematics.

Xiaoming Song, PhD (*University of Kansas*). Associate Professor. Stochastic Calculus, Large Deviation Theory, Theoretical Statistics, Data Network Modeling and Numerical Analysis.

Jeanne M. Steuber, MS (*Boston University*). Associate Teaching Professor.

Kenneth P. Swartz, PhD (*Harvard University*). Assistant Teaching Professor. Applied statistics, data analysis, calculus, discrete mathematics, biostatistics.

K. Shwetketu Virbhadra, PhD (*Physical Research Laboratory*). Instructor.

Richard D. White, MS (*Penn State University*). Assistant Teaching Professor.

Hugo J. Woerdeman, PhD (*Vrije Universiteit, Amsterdam*). Professor. Matrix and operator theory, systems theory, signal and image processing, and harmonic analysis.

J. Douglas Wright, PhD (*Boston University*) *Associate Department Head*. Professor. Partial differential equations, specifically nonlinear waves and their interactions.

Dennis G. Yang, PhD (*Cornell University*). Associate Teaching Professor. Dynamical systems, neurodynamics.

Thomas (Pok-Yin) Yu, PhD (*Stanford University*). Professor. Multiscale mathematics, wavelets, applied harmonic analysis, subdivision algorithms, nonlinear analysis, applied differential geometry and data analysis.

Matthew Ziemke, PhD (*University of South Carolina*). Assistant Teaching Professor. Functional Analysis, Operator Algebras, Semigroups, Mathematical Physics

Emeritus Faculty

Howard Anton, PhD (*Polytechnic Institute of Brooklyn*). Professor Emeritus.

Loren N. Argabright, PhD (*University of Washington*). Professor Emeritus. Functional analysis, wavelets, abstract harmonic analysis, the theory of group representations.

Robert C. Busby, PhD (*University of Pennsylvania*). Professor Emeritus. Functional analysis, C*-algebras and group representations, computer science.

Ewaugh Finney Fields, EdD (*Temple University*) *Dean Emeritus*. Professor Emeritus. Mathematics education, curriculum and instruction, minority engineering education.

William M.Y. Goh, PhD (*Ohio State University*). Associate Professor Emeritus. Number theory, approximation theory and special functions, combinatorics, asymptotic analysis.

Patricia Henry Russell, MS (*Drexel University*). Teaching Professor Emerita.

Bernard Kolman, PhD (*University of Pennsylvania*). Professor Emeritus. Lie algebras; theory, applications, and computational techniques; operations research.

Charles J. Mode, PhD (*University of California at Davis*). Professor Emeritus. Probability and statistics, biostatistics, epidemiology, mathematical demography, data analysis, computer-intensive methods.

Chris Rorres, PhD (*Courant Institute, New York University*). Professor Emeritus. Applied mathematics, scattering theory, mathematical modeling in biological sciences, solar-collection systems.

Justin R. Smith, PhD (*Courant Institute, New York University*). Professor Emeritus. Homotopy theory, operad theory, quantum mechanics, quantum computing.

Jet Wimp, PhD (*University of Edinburgh*). Professor Emeritus. Applied mathematics, special factors, approximation theory, numerical techniques, asymptotic analysis.

Physics

Major: Physics

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS); 90.0 (PhD)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 40.0801

Standard Occupational Classification (SOC) code: 19-2010; 19-2012;

11-9121; 25-1054; 25-2031

About the Program

The Department of Physics offers opportunities for students to study with leading researchers in astrophysics, biophysics, condensed matter, particle physics, and physics education research, as well as to participate in international collaborations. Coursework for the MS and PhD degrees includes advanced training in core areas of physics and in topics of current research. PhD students begin research early in the program, commencing thesis work in their second year of study.

To learn more about the graduate program in physics visit the Department of Physics (<http://drexel.edu/coas/academics/graduate-programs/physics/>) webpage.

Admission Requirements

For admission to the graduate programs, a bachelor's degree in an approved program is required with a minimum undergraduate GPA of 3.0/4.0.

The GRE general exam is required from all applicants (minimum scores 150 Verbal, 150 Quantitative, 3.5 Analytic Writing). The GRE Physics Subject Test is required for PhD applicants to be considered for assistantships (no minimum score).

TOEFL scores are required for international applicants or applicants who earned a degree outside the US (minimum score 100). IELTS scores may be submitted in lieu of TOEFL scores. The minimum IELTS band score is 7.0. TOEFL or IELTS scores below these levels may be considered, but may require an interview.

Visit the Graduate Admissions (<http://www.drexel.edu/grad/programs/coas/physics/>) website for more information about requirements and deadlines, as well as instructions for applying online.

Degree Requirements (MS)

The Department of Physics offers a Master of Science degree that provides advanced training in core areas of fundamental physics and exposure to the application of physics in areas of current research.

This program is suitable as both a means for professional development and preparation for further graduate study. Students who wish to complete only the MS degree are welcomed, and will find that the learning environment will allow them to broaden their professional understanding by exploring current topics and trends of physics in an interdisciplinary setting.

Students who intend to pursue the Physics PhD degree should apply directly to that program. The requirements for the Physics PhD include the coursework required for the MS degree, thus PhD students can earn the MS degree during their PhD study. Students should apply to the program that best aligns with their goals. MS students who wish to continue study toward the PhD degree must apply for the PhD program on a competitive basis.

Satisfactory completion of a minimum of 45.0 credits of approved physics courses is required. The student must maintain a cumulative GPA average for all courses of at least 3.0.

There are no thesis, language, or special examination requirements for the master's degree.

Core Courses

PHYS 501	Mathematical Physics I	3.0
----------	------------------------	-----

PHYS 506	Dynamics I	3.0
PHYS 511	Electromagnetic Theory I	3.0
PHYS 512	Electromagnetic Theory II	3.0
PHYS 516	Quantum Mechanics I	3.0
PHYS 517	Quantum Mechanics II	3.0
PHYS 521	Statistical Mechanics I	3.0
PHYS 522	Statistical Mechanics II	3.0
Topics Courses		21.0
PHYS 502	Mathematical Physics II	
PHYS 518	Quantum Mechanics III	
PHYS 531	Galactic Astrophysics	
PHYS 532	Cosmology	
PHYS 553	Nanoscience	
PHYS 561	Biophysics	
PHYS 562	Computational Biophysics	
PHYS 576	Introduction to Particle Physics	
PHYS 626	Solid State Physics I	
PHYS 627	Solid State Physics II	
PHYS 631	Relativity Theory I	
PHYS T780	Special Topics in Physics	
Total Credits		45.0

Degree Requirements (PhD)

90.0 quarter credits

The Department of Physics offers opportunities for students to study with leading researchers in astrophysics, biophysics, condensed matter, particle physics, and physics education research, as well as to participate in international collaborations. Coursework for the PhD degree includes advanced training in core areas of physics and topics of current research. PhD students begin research early in the program, commencing thesis work in their second year of study.

The usual schedule for physics graduate students consists of two years of coursework, qualifying exams, and research training, followed by dissertation research. All PhD students follow a common set of eight core courses during their first two years of study. In addition to these core courses, students also take at least four topics courses.

PhD students Admitted with Post-Master's Status

Students who are admitted for PhD study with "post-masters" status must take 15.0 credits of graduate coursework with a minimum GPA of 3.0 to become doctoral candidates. Courses are to be chosen in consultation with the Graduate Academic Committee. Post-masters students are expected to pass the oral qualifying exam by the end of the Spring quarter of their first year of study. To be prepared for the oral exam, post-masters students should begin research as soon as possible.

Program Requirements

Doctoral candidates are required to complete a minimum of 45.0 credits of coursework and research work beyond the master's requirement of 45.0 credits while maintaining a minimum of 3.0 GPA. Advancement to doctoral candidacy requires a minimum GPA in core courses of 3.0, with no more than 2 grades below B-.

Core Courses

PHYS 501	Mathematical Physics I	3.0
PHYS 506	Dynamics I	3.0
PHYS 511	Electromagnetic Theory I	3.0
PHYS 512	Electromagnetic Theory II	3.0

PHYS 516	Quantum Mechanics I	3.0
PHYS 517	Quantum Mechanics II	3.0
PHYS 521	Statistical Mechanics I	3.0
PHYS 522	Statistical Mechanics II	3.0
Research		
PHYS 997	Research	9.0
Topics Courses		
Select four including a minimum of two outside research specialty:		12.0
PHYS 502	Mathematical Physics II	
PHYS 518	Quantum Mechanics III	
PHYS 531	Galactic Astrophysics	
PHYS 532	Cosmology	
PHYS 553	Nanoscience	
PHYS 561	Biophysics	
PHYS 562	Computational Biophysics	
PHYS 576	Introduction to Particle Physics	
PHYS 626	Solid State Physics I	
PHYS 627	Solid State Physics II	
PHYS 631	Relativity Theory I	
PHYS T780	Special Topics in Physics	
Total Credits		45.0

Research Training

Students begin research in the spring and summer terms of their first year. The spring project culminates in a poster presented to the department. A two-page proposal for their summer research is also due at the end of the spring term. At the end of the summer, students are required to submit an in-depth written report and give an oral presentation of their summer project. Research during the second year is toward the candidacy exam, described below.

Candidacy Examination

The candidacy exam is based on original research performed by the student, which consists of an oral presentation and a written report of no less than 15 pages, submitted to the examination committee and the Associate Department Head for Graduate Studies at least one week prior to the exam. Immediately after the public presentation, the Examination Committee will privately conduct an oral examination. This exam must be passed by the end of the second year of study.

Dissertation Defense

This dissertation defense includes a final public presentation and defense of the dissertation. The dissertation must be submitted to the Examination Committee at least two weeks prior to the oral defense. The oral presentation involves a public 45-60 minute presentation by the candidate followed by an unspecified period during which the Examination Committee will ask questions. All doctoral dissertations, in addition to originality and scholarly content, must conform to University format requirements.

Sample Plan of Study (MS)

Term 1		Credits
PHYS 501	Mathematical Physics I	3.0
PHYS 506	Dynamics I	3.0
Topics Course		3.0
Term Credits		9.0
Term 2		
PHYS 511 or 521	Electromagnetic Theory I Statistical Mechanics I	3.0
PHYS 516	Quantum Mechanics I	3.0

Topics Course		3.0
Term Credits		9.0
Term 3		
PHYS 512 or 522	Electromagnetic Theory II Statistical Mechanics II	3.0
PHYS 517	Quantum Mechanics II	3.0
Topics Course		3.0
Term Credits		9.0
Term 4		
Topics Courses		6.0
Term Credits		6.0
Term 5		
PHYS 521 or 511	Statistical Mechanics I Electromagnetic Theory I	3.0
Topics Course		3.0
Term Credits		6.0
Term 6		
PHYS 522 or 512	Statistical Mechanics II Electromagnetic Theory II	3.0
Topics Course		3.0
Term Credits		6.0

Total Credit: 45.0

Sample Plan of Study (PhD)

The sample plan of study below lists required courses and electives for the first two years of the full-time PhD program, for a minimum of 45.0 credits. During the third year and thereafter, PhD program students must take a minimum of 45.0 additional credits of research (PHYS 998 Dissertation Research).

The following is a sample plan of study that includes all required courses for the first two academic years for full-time PhD students entering without a previous Master's degree. Post-master's students should consult the Graduate Academic Committee. Summer terms may be subject to change.

First Year		
Fall		Credits
PHYS 501	Mathematical Physics I	3.0
PHYS 506	Dynamics I	3.0
Topics Course**		3.0
Term Credits		9.0
Winter		
PHYS 516	Quantum Mechanics I	3.0
PHYS 511 or 521*	Electromagnetic Theory I Statistical Mechanics I	3.0
Topics Course**		3.0
Term Credits		9.0
Spring		
PHYS 517	Quantum Mechanics II	3.0
PHYS 512 or 522*	Electromagnetic Theory II Statistical Mechanics II	3.0
PHYS 997***	Research	3.0
Term Credits		9.0
Summer		
PHYS 997	Research	1.0-9.0
Term Credits		1.0-9.0
Second Year		
Fall		
Topics Course**		3.0
PHYS 997	Research	6.0
Term Credits		9.0

Winter			
PHYS 521 or 511	Statistical Mechanics I Electromagnetic Theory I		3.0
Topics Course**			3.0
PHYS 997	Research		3.0
	Term Credits		9.0
Spring			
PHYS 522 or 512*	Statistical Mechanics II Electromagnetic Theory II		3.0
PHYS 997	Research		6.0
	Term Credits		9.0
Summer			
PHYS 998	Ph.D. Dissertation		1.0-9.0
	Term Credits		1.0-9.0
Total Credit: 56.0-72.0			

* Core Course sequences PHYS 511 / PHYS 512 and PHYS 521 / PHYS 522 are offered in alternate years.

** Topics courses are an introduction to current topics of experimental and theoretical interest. They are offered in alternate years.

*** 3.0 credits of PHYS 997: *Research* must be taken by Spring of the first year.

Additional information for graduate students is available at the Department of Physics (<http://drexel.edu/coas/academics/departments-centers/physics/>).

Facilities

Astrophysics Facilities:

- The Numerical Astrophysics Facility emphasizes theoretical and numerical studies of stars, star formation, planetary systems, star clusters, galaxy distributions, cosmological modeling, gravitational lensing, and the early universe. The facility employs a high-performance Graphics Processing Unit (GPU) compute cluster, each node containing two 6-core, 2.7 GHz Intel Xeon CPUs and 96 Gbytes of RAM, accelerated by 4–6 Nvidia Fermi/Titan GPUs, and connected by QDR infiniband, affording computational speeds of up to 50 trillion floating point operations per second.
- The Joseph R. Lynch Observatory houses a 16-inch Meade Schmidt-Cassegrain telescope equipped with an SBIG CCD camera.
- Drexel was a member of the original Sloan Digital Sky Survey (SDSS) collaboration; faculty and students remain active in analyzing data from the SDSS. Drexel is an institutional member of the Large Synoptic Survey Telescope (LSST), currently under construction in Chile; faculty and students are developing LSST-related machine learning tools and analyzing simulated LSST data to prepare for "first light" in 2022.

Biophysics Facilities:

- Bio-manipulation and microscopy laboratories. Four optical tables and six research grade microscopes are configured to perform microscopic spectroscopy and manipulation on solutions and individual cells. A spatial light modulator allows spatial patterns to be encoded on samples and explored; all microscopes are temperature controlled with state of the art cameras, including a 2,000 frame per second high speed system. Each optical table is also equipped with high power lasers for photolysis or fluorescence spectroscopy. Microfluidic attachments are present on one table, and in an adjacent laboratory, a small microfluidic fabrication facility has been established.

- Experimental biophysics lab for studies of proteins and biomimetic lipids, including a fluorescence spectrometer.
- The Computational Biophysics facility also includes: (i) a Beowulf cluster with 46 dual Quad-core hyperthreaded Xeon CPU (736 cores) and 12Gb of RAM nodes plus a master with 1Tb of storage and 24Gb of RAM, (ii) a Beowulf cluster with 44 dual-core Xeon CPU (344 cores), (iii) a dual Quad-core hyperthreaded Xeon CPU workstation with 24Gb RAM and 3Tb disk with two Tesla C2050 GPU CUDA-accelerated graphics card, (iv) a dual Quad-core hyperthreaded Xeon CPU workstation with 8Gb RAM and 4Tb disk with an NVIDIA N280 GPU CUDA-accelerated graphics card, (v) a quad 8-core hyperthreaded Xeon CPU workstation with 128Gb RAM and 16Tb total disk, (vi) a 72Tb file server with 12Gb RAM, (vii) a 96Tb quad 6-core file server with 64Gb RAM, (viii) and several Linux workstations connected through a gigabit network.

Condensed Matter Physics Research Facilities:

- The Energy Materials Research Laboratory is devoted to atomic scale investigations of materials for energy. As the size of the system shrinks, conventional bulk thermodynamics becomes irrelevant and we enter the realm of mesoscopic physics. The equilibrium behavior of small systems is governed by the prevailing number of surface atoms that behave differently from the bulk ones. The electronic properties are also subject to reduced number of available electronic states. We take advantage of different scanning probe microscopy and spectroscopy techniques to elucidate the local electronic properties of materials that are relevant to solving energy problems. The laboratory research is funded by grants from NSF and DOE.
- The Ultrafast Electron Diffraction Laboratory investigates structural dynamics in nanoscale materials at timescales that are fundamental to materials science and condensed matter physics. The techniques are based on exciting matter with light and probing the response of the lattice with electrons. The research interests of the lab are in a range of phenomena and systems including phase transformations induced by strong laser excitation, phase transformations in strongly correlated systems, generation and detection of coherent lattice vibrations, and characterization of materials properties of graphene, few-layer-graphene, ultra-thin graphite & nanocrystalline diamond.
- The Ultra-low Temperature Laboratory includes a dilution refrigerator, 3He and 4He cryostats and microwave sources to study quantum phenomena in nano and microscale devices, superconducting qubits, nanostructures and quantum fluids and solids.
- The Mesoscale Materials Laboratory investigates light-matter interactions and the extent and effects of ordering of lattice, charge and spin degrees of freedom on electronic phases and functional properties in solids, with an emphasis on bulk and epitaxial film complex oxides. Facilities include instrumentation for pulsed laser deposition of epitaxial complex oxide films, atomic layer deposition, variable-temperature characterization of carrier transport (DC to 20 GHz), and a laser spectroscopy lab enabling high-resolution Raman scattering spectroscopy at temperatures to 1.5 K and under magnetic field to 7 T.

Particle Physics Facilities:

- The Drexel Particle Physics Group researches fundamental neutrino properties with the DUNE long baseline experiment hosted by Fermilab and the PROSPECT short baseline reactor experiment

located at Oak Ridge National Laboratory, as well as the planned nEXO neutrinoless double beta decay experiment.

- We are also active in the IceCube neutrino telescope located at the geographic South Pole.
- The Bubble Chamber Laboratory develops superheated-liquid detectors for rare-interaction searches, including the PICO dark matter experiment located at SNOLAB in Canada.

Laboratory for High-Performance Computational Physics:

- In addition to the department computing cluster (15 linux workstations), high-performance computing resources include a dual-processor server with two Xeon E5-2650 processors (16 cores), 128 GB of RAM, and two Xeon Phi P5110 co-processor cards (480 cores). Department researchers also have access to a cluster of 18 Dell PowerEdge C6145 servers (AMD Opteron 6378 Piledriver CPU's, 64 cores/server, 256 GB RAM/server) with a total of 1152 cores and 4.5TB RAM.

Physics Faculty

Alexey Aprelev, PhD (*St Petersburg State University*). Assistant Teaching Professor. Experimental biophysics.

Eric Brewe, PhD (*Arizona State University*). Associate Professor. Physics Education Research, introductory course reform, network analysis in learning, neuromechanisms of learning.

Luis R. Cruz Cruz, PhD (*MIT*). Associate Professor. Computational studies of confinement effects on the folding of amyloidogenic proteins, spatial correlations of neurons in the brain, firing dynamics of neuronal networks, fluid flow through porous media.

N. John DiNardo, PhD (*University of Pennsylvania*). Professor. Physics education research, surface physics, condensed matter physics, materials science.

Michelle Dolinski, PhD (*University of California, Berkeley*) Associate Dean of Graduate Education. Associate Professor. Neutrino physics, rare nuclear decays, cryogenic detector technologies.

Frank A. Ferrone, PhD (*Princeton University*). Professor. Experimental and theoretical protein dynamics, kinetics of biological self-assembly, including sickle cell and Alzheimer's disease, sickle cell testing and diagnostic devices.

David M. Goldberg, PhD (*Princeton University*) Associate Department Head for Undergraduate Studies. Professor. Theoretical and computational cosmology, extragalactic astrophysics, gravitational lensing.

Goran Karapetrov, PhD (*Oregon State University*). Professor. Experimental solid state physics, scanning probe microscopy, nanoscale catalysis, mesoscopic superconductivity.

Rachael M. Kratzer, PhD (*Drexel University*). Assistant Teaching Professor. Quasars, active galactic nuclei

Charles Lane, PhD (*California Institute of Technology*). Professor. Experimental tests of invariance principles and conservation laws, neutrino oscillations and properties.

Christina Love, PhD (*Temple University*). Associate Teaching Professor. Educational methods and technology, STEM education, science literacy and outreach, particle physics, astrophysics.

Stephen L. W. McMillan, PhD (*Harvard University*) Department Head. Professor. Stellar dynamics, large-scale computations of stellar systems, and high-performance special-purpose computers.

Naoko Kurahashi Neilson, PhD (*Stanford University*). Associate Professor. Neutrino physics, high energy astro-particle physics.

Russell Neilson, PhD (*Stanford University*). Associate Professor. Dark matter, neutrino physics.

Gordon Richards, PhD (*University of Chicago*). Professor. Quasars, active galactic nuclei, supermassive black holes, galaxy evolution, sky surveys, infrared/X-ray/radio astronomy

Jonathan E. Spanier, PhD (*Columbia University*) Department Head, *Mechanical Engineering and Mechanics*. Professor. Light-matter interactions in electronic materials, including ferroelectric semiconductors, complex oxide thin film science; laser spectroscopy, including Raman scattering.

Somdev Tyagi, PhD (*Brigham Young University*) Associate Head of *Non-Major Studies in Physics*. Professor. Nanobiophysics, Raman spectroscopy, magnetic materials.

Brigita Urbanc, PhD (*University of Ljubljana, Slovenia*) Associate Department Head for Graduate Studies. Professor. Computational and experimental biophysics of protein folding and assembly, relevant to Alzheimer's and Parkinson's disease; discrete molecular dynamics of coarse-grained protein and lipid models.

Jörn Venderbos, PhD (*Leiden University*). Assistant Professor. Theory of quantum materials: topological insulators, topological semimetals, materials prediction and design, strongly correlated electron materials, complex electronic ordering phenomena, unconventional superconductors

Michael Vogeley, PhD (*Harvard University*) Associate Department Head for Graduate Studies. Professor. Cosmology; galaxy formation and evolution; statistical analysis of large data sets; active galactic nuclei.

Emeritus Faculty

Shyamalendu Bose, PhD (*University of Maryland*). Professor Emeritus.

Leonard D. Cohen, PhD (*University of Pennsylvania*). Professor Emeritus.

Leonard X. Finegold, PhD (*University of London*). Professor Emeritus.

Robert Gilmore, PhD (*Massachusetts Institute of Technology*). Professor Emeritus.

Richard D. Haracz, PhD (*Wayne State University*). Professor Emeritus.

Frederick House, PhD (*University of Wisconsin*). Professor Emeritus.

Arthur P. Joblin, PhD (*Drexel University*). Professor Emeritus.

Donald C. Larson, PhD (*Harvard University*). Professor Emeritus.

Teck-Kah Lim, PhD (*University of Adelaide*). Professor Emeritus.

Arthur E. Lord, PhD (*Columbia University*). Professor Emeritus.

James McCray, PhD (*California Institute of Technology*). Professor Emeritus.

Richard I Steinberg, PhD (*Yale University*). Professor Emeritus.

T. S. Venkataraman, PhD (*Worcester Polytechnic Institute*). Professor Emeritus.

Psychology MS

Major: Psychology

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 42.0101

Standard Occupational Classification (SOC) code: 19-3031; 19-3032; 19-3039

About the Program

The master of science degree in the Department of Psychology, College of Arts & Sciences, is ideal for students interested in pursuing graduate education in scientific psychology and research methods. It is designed for students interested in advanced education in scientific psychology in order to obtain further educational or career opportunities.

The program is an opportunity for students to take their first step into graduate education, and to begin a path toward further educational and career opportunities. These opportunities may include further graduate-level training leading to a PhD, a career in research, or other educational and administrative opportunities. The curriculum is focused on training in a range of research experience in neurocognitive and behavioral sciences. In addition to required coursework, students are required to complete a minimum of eight hours per week with a research mentor in laboratory activities. These activities culminate with the successful completion of a thesis project.

For more information, visit the Department of Psychology (<http://drexel.edu/coas/academics/departments-centers/psychology/>) website.

Admission Requirements

Applicants must meet the general University requirements for admission, including a minimum 3.0 GPA (on a 4.0 scale) for the last two years of undergraduate study. Applicants to the graduate program in psychology are also required to submit scores from the Graduate Record Examination (GRE) general tests. Only applications for full-time status are considered.

Various factors are considered in choosing students. These include background in psychology, undergraduate (and, if applicable, graduate) GPA, GRE scores, a personal essay, and letters of recommendation. The minimum expected combined GRE score is 302, with scores 150 on each section (verbal, quantitative) of the GRE.

For additional information on how to apply, visit Drexel's Admissions Requirements for Psychology (<http://www.drexel.edu/grad/programs/coas/psychology/>) page.

Degree Requirements

The general requirements for earning the MS degree in psychology are as follows:

- Completion of all required coursework with a minimum grade point average of 3.0, with no grade lower than a B in any required (non-elective) course and no more than two course grades of C or lower.
- Successful completion of a minimum of 45.0 course credits. Students take required courses and select additional electives.
- Successful completion of required research laboratory hours (8 hours per week for 2 years).
- Completion of a thesis.

Program Requirements

PSY 510	Research Methods I	3.0
PSY 511	Research Methods II	3.0
PSY 512	Cognitive Psychology	3.0
PSY 610	Data Analysis in Psychology	3.0
PSY 624	Behavior Analysis	3.0
PSY 710	Data Analysis II	3.0
PSY 898	Master's Thesis in Psychology	0.0-3.0
PSY 898	Master's Thesis in Psychology	0.0-3.0
PSY 898	Master's Thesis in Psychology	0.0-3.0
Additional Electives		18.0
Total Credits		36.0-45.0

Additional Information

For more information on specific requirements, consult the Master's of Science in Psychology (<http://drexel.edu/coas/academics/graduate-programs/psychology/>) website.

Facilities

Computers

Computer resources for student use include more than 20 personal computers (IBM, Macintosh) available in the library and 10 IBM PCs available in the computer laboratory. Both facilities are near the department. In both locations, word processing and biostatistics software is available.

By using computers from their homes or in the library, students have free access to e-mail and a wide array of online services (e.g., the Internet, World Wide Web, and literature databases such as PsychLit and Medline).

Library

Psychology books and journals are located at the Moore Campus Library on Henry Avenue, Queen Lane Library on the Queen Lane Campus, and the W. W. Hagerty Library on the University City Campus. The combined holdings represent one of the best psychology libraries on the East Coast.

Equipment

Testing equipment for classroom instruction is available to psychology graduate students. The program also has videotape and audiotape equipment available for classroom instruction and research activities.

Psychology Faculty

Meghan Butryn, PhD (*Drexel University*). Associate Professor. Treatment and prevention of obesity and eating disorders, behavioral treatment, acceptance and commitment therapy.

Dorothy Charbonnier, PhD (*State University of New York at Stony Brook*). Associate Teaching Professor. The nature of the creative process and writing.

Evangelia Chrysikou, PhD (*Temple University*). Associate Professor. Cognitive neuroscience, neuropsychology, neural basis of language, memory, and executive functions, neurocognitive processes associated with problem solving and flexible thought

Douglas L. Chute, PhD (*University of Missouri*) *Louis and Bessie Stein Fellow*. Professor. Neuropsychology and rehabilitation; technological applications for the cognitively compromised and those with acquired brain injuries.

Brian Daly, PhD (*Loyola University, Chicago*) *Interim Department Head*. Associate Professor. Pediatric neuropsychology, intervention with at-risk youth.

David DeMatteo, PhD, JD (*MCP Hahnemann University; Villanova University School of Law*) *Director of the JD-PhD Program in Law and Psychology*. Professor. Psychopathy, forensic mental health assessment, drug policy; offender diversion.

Evan M. Forman, PhD (*University of Rochester*) *Director WELL Center*. Professor. Clinical psychology: mechanisms and measurement of psychotherapy outcome, cognitive-behavioral and acceptance based psychotherapies, the development and evaluation of acceptance-based interventions for health behavior change (for problems of obesity and cardiac disease) as well as mood and anxiety disorders; neurocognition of eating.

Pamela Geller, PhD (*Kent State University*) *Director, Clinical Training*. Associate Professor. Stressful life events and physical and mental health outcomes, particularly in the area of women's reproductive health (e.g. pregnancy, pregnancy loss, infertility, medical education).

Maureen Gibney, PsyD (*Widener University*). Teaching Professor. Clinical psychopathology; neuropsychological evaluation and intervention with the elderly.

Naomi Goldstein, PhD (*University of Massachusetts*) *Co-Director of the JD-PhD Program; Stoneleigh Foundation Fellow*. Professor. Forensic psychology; juvenile justice; Miranda rights comprehension; false confessions; juvenile justice treatment outcome research; anger management intervention development; child and adolescent behavior problems.

Kirk Heilbrun, PhD (*University of Texas at Austin*). Professor. Forensic psychology, juvenile and adult criminality, violence risk assessment, forensic psychological assessment, treatment of mentally disordered offenders, academic-sports mentoring.

Adrienne Juarascio, PhD (*Drexel University*) *Director, Practicum Training*. Assistant Professor. Enhancing treatment outcomes for eating disorders and obesity; Acceptance-based behavioral treatments; Evaluating mechanisms of action in behavioral treatments

Marlin Killen, PhD (*Trident University International*). Teaching Professor. Authentic teaching methods in Psychology as well as student persistence behavior.

John Kounios, PhD (*University of Michigan*) *Director, PhD Program in Applied Cognitive and Brain Sciences*. Professor. Cognitive neuroscience, especially creativity, problem solving, and cognitive enhancement.

David Kutzik, PhD (*Temple University*). Professor. Social and cultural theory, political economy, gerontology, materialisms, activity theory, reflection theories, communities of practice and labor theories of culture.

Michael Lowe, PhD (*Boston College*). Professor. Prevention and treatment of eating disorders and obesity; effects of appetitive responsiveness and dietary restraint on eating regulation; psychobiology of obesity-proneness; empirical foundations of unconscious processes.

John Medaglia, PhD (*The Pennsylvania State University*). Assistant Professor. Applying models and methods developed in neuropsychology, cognitive neuroscience and graph theory to understand and treat brain dysfunction and enhance healthy functioning

Megan Meyer, PhD (*Temple University*). Assistant Teaching Professor. Influences on preferred body type; changes in body image, self-esteem, and self-efficacy in females as a function of strength training; Sensation and Perception

Danette Morrison, PhD (*University of Maryland - College Park*). Assistant Teaching Professor. Social and academic motivation within school context; Social relationships and identity development; Educational attainment of ethnic minorities

Arthur Nezu, PhD, DHLL, ABPP (*State University of New York at Stony Brook*). Distinguished University Professor of Psychology, Professor of Medicine, Professor of Community Health and Prevention. Behavioral medicine applications of problem-solving therapy and other cognitive-behavior therapies (e.g., to decrease emotional and psychosocial risk factors; improve adherence), particularly with regard to patients with cardiovascular disease; assessment.

Christine Maguth Nezu, PhD (*Fairleigh Dickinson University*). Professor of Psychology, Professor of Medicine. Cognitive-behavioral assessment and treatment for mood, anxiety, personality disorders, and coping with chronic illness; mind/body studies; stress and coping; developmental disabilities and comorbid behavioral and emotional disorders; spirituality and psychology.

Karol Osipowicz, PhD (*Thomas Jefferson University*). Associate Teaching Professor. The application of advanced neuroimaging to the study of human brain function and anatomy.

Nancy Raitano Lee, PhD (*University of Denver*) *Director of MS and BS/MS Programs*. Associate Professor. Neuropsychological and neuroanatomic correlates of intellectual and developmental disabilities; Verbal memory and language difficulties in Down syndrome and other genetic disorders; Comorbid autism spectrum disorder symptoms in youth with genetic disorders; Neuroanatomic correlates of individual differences in typical and atypical cognition

Diana Robins, PhD (*University of Connecticut*) *Interim Director, AJ Drexel Autism Institute*. Professor. Autism screening, early detection of autism

Ludo Scheffer, PhD (*University of Pennsylvania*) *Director of Undergraduate Studies*. Teaching Professor. Meta-cognitive development, writing, and computers; Language and literacy development in the early years in the context of family and schooling; Youth-at-risk; School violence and bullying; Program/intervention effectiveness

Maria Schultheis, PhD (*Drexel University*) *Vice Provost of Research, Office of Research and Innovation*. Professor. Clinical Neuropsychology and rehabilitation following neurological compromise (brain injury, stroke, multiple sclerosis), application of technologies in psychology.

Specialization in the use of virtual reality (VR) simulation, and evaluation of the demands of driving after disability.

Jennifer Schwartz, PhD (*Idaho State University*) Director of Psychological Services Center. Teaching Professor. Adult psychopathology; evidence-based clinical practice; competency-based training; competency-based clinical supervision.

Julia Sluzenski, PhD (*Temple University*). Assistant Teaching Professor. Spatial and episodic memory, memory loss across the lifespan, developmental psychology.

J. Michael Williams, PhD (*University of Vermont*). Associate Professor. Memory disorder; traumatic brain injury; auditory neglect; neuropsychological assessment; recovery and rehabilitation of brain function; functional magnetic resonance imaging.

Fengqing (Zoe) Zhang, PhD (*Northwestern University*). Associate Professor. Neuroimaging data analysis; Data mining; Bayesian inference; High dimensional data analysis

Eric A Zillmer, PsyD (*Florida Institute of Technology*) Carl R. Pacifico Professor of Neuropsychology and the Director of Athletics. Professor. Psychological assessment (neuropsychological, cognitive, personality), psychiatric and neurological disorders, behavioral medicine, neurogerontology, mathematical modeling, sports psychology, psychology of genocide.

Emeritus Faculty

Donald Bersoff, JD, PhD (*Yale University, New York University*). Professor Emeritus. Law and psychology; mental health law.

James Calkins, PhD. Professor Emeritus.

Thomas Hewett, PhD (*University of Illinois at Urbana-Champaign*). Professor Emeritus. Human computer interaction and cognitive engineering; development of computing environments to support knowledge, workers, and high performance experts.

Myrna Shure, PhD (*Cornell University*). Professor Emeritus. Child development, problem-solving interventions with children, prevention programs.

Mary Spiers, PhD (*University of Alabama at Birmingham*). Professor Emeritus. Clinical neuropsychology and medical psychology; memory and practical applications for memory disorders in the elderly; cognitive health of women.

Public Policy

Major: Public Policy

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 44.0501

Standard Occupational Classification (SOC) code: 11-1031

About the Program

Drexel's MS in Public Policy is similar in its core curriculum to a Master of Public Administration (MPA) and a Master of Public Policy (MPP) program, as it is designed for people who work, or who would like to work, for government or a nonprofit organization. It is innovative and distinct in

at least two key respects: focus on case study research and distinct track of specialization.

Case Study Research: The program has a required core curriculum of nine courses, specifically designed for students to:

- develop an understanding of the social, political and ethical context of policy research, and how this understanding can be applied to an applied practice of policy analysis;
- conceptualize, design and conduct social research for policy purposes, as well as comprehensively analyze existing social research data;
- recognize the history of public policy institutions in America and the management and governance of nonprofit organizations; and
- understand the concept of sustainability as it relates to policy planning, design, and implementation.

In addition to the core courses, the program has a focus on case study research as a unifying element of the curriculum. The curriculum reinforces coursework with a series of accompanying 1-credit, online, Case Study Research co-requisites. Students are required to choose a specific case study topic that they will work on for the duration of their time in the program. In each subsequent Case Study Research course, students continue further research and writing on their chosen case study topic. Thus by the end of the program students will have produced a polished, in-depth analysis of a specific case that they can use to demonstrate expertise in a given policy area.

Specialization Tracks: With the approval and support of the program director, students can craft a specialized course of study with their three electives, or they can take courses in the following:

- Economic Policy
- Education Policy
- Environmental Policy
- Information Policy
- Science and Technology Policy

For additional information, view the Center for Public Policy (<http://drexel.edu/coas/academics/departments-centers/public-policy/>) page on the College of Arts and Sciences' website. Current Drexel Thomas Kline School of Law students, please see the page on joint JD-MS Public Policy degrees (<http://drexel.edu/law/academics/jointDegrees/JD-MSPP/>) for more information.

Admission Requirements

Acceptance for graduate study at Drexel University requires a four-year bachelor's degree from an accredited institution in the United States or an equivalent international institution. There is no pre-requisite undergraduate major or specific coursework. Although admission requirements vary by program, regular acceptance typically requires a minimum grade point average (GPA) of 3.0 for the last two years of undergraduate work. The GPA for any graduate work must be at least 3.0.

The admission committee evaluates all credentials submitted by applicants to determine a student's ability and potential to succeed in graduate study. Applicants to this program should also include their intended area of focus (see the admissions page for the essay prompt) and are often contacted for an information interview. The committee is interested in the applicant's ability to contribute to his/her program of study and to the University community as a whole.

Drexel is extending the same scholarship opportunities to Master of Science in Public Policy students who enroll in 8.0 credits that are usually only available for full-time programs (minimum enrollment of nine credits for full-time status).

Visit the Graduate Admissions (<http://www.drexel.edu/grad/programs/coas/>) website for more information about requirements and deadlines, as well as instructions for applying online.

Degree Requirements

Students take required courses for the MS in Public Policy from multiple schools within Drexel University, including the Center for Public Policy in the College of Arts and Sciences, the LeBow College of Business, and the College of Computing and Informatics.

Students are required to receive a grade of "B" or better in all core coursework in order to fulfill the requirements of the MS in Public Policy degree and be eligible for graduation. This policy is in addition to the Drexel University Graduate College policy that requires all graduate students to maintain a minimum cumulative 3.0 GPA per term as well as an overall 3.0 GPA for graduation purposes.

Required Courses

BUSN 502	Essentials of Economics	3.0
ECON 616	Public Finance and Cost Benefit Analysis	3.0
INFO 680	US Government Information	3.0
PLCY 503	Theory and Practice of Policy Analysis	3.0
PLCY 504	Methods of Policy Analysis	3.0
PLCY 506	Institutional Dynamics of the Policy Process	3.0
PLCY 507	Nonprofit Organizations	3.0
URBS 530	Quantitative Methods & Reasoning for Urban Strategists	3.0

Statistics - Choose 1

CCM 705	Data Analysis in Communication	3.0
ECON 540	Intro to Econometrics and Data Analysis	3.0
ECON 550	Econometrics	3.0
STAT 601	Business Statistics	3.0
STAT 610	Statistics for Business Analytics	3.0

Case Study Courses

The curriculum reinforces coursework with a series of accompanying 1-credit, online, Case Study Research courses. In the first, students are introduced to case study methodology and practice, and required to choose a specific case that they will work on for the duration of the core curriculum. In each subsequent Case Study Research course, students continue further research and writing on their chosen case study topic. Thus by the end of the program students have produced a polished, in-depth analysis of a specific case that they can use to demonstrate expertise in a given policy area.

PLCY 510	Introduction to Case Study Research	3.0
PLCY 516	Case Study Research II (1-credit course taken 3 times)	3.0
PLCY 517	Case Study Final Project	3.0

Approved Public Policy Elective Courses*

Total Credits		45.0
---------------	--	------

* Elective courses are taught under the PLCY T580 Special Topics in Public Policy, or one of the participating departments. Students are required to take three 3-credit graduate level courses to fulfill the electives requirement. Public Policy students are able to select any graduate level courses (pending department approval) to create an electives "track" based on their own interests. Students have taken this opportunity to explore areas such as Education Policy, Environmental Policy and Urban Systems.

Sample Plan of Study

Term	Courses	Credits
Term 1	PLCY 506 Institutional Dynamics of the Policy Process	3.0
	PLCY 504 Methods of Policy Analysis	3.0
	PLCY 510 Introduction to Case Study Research	3.0
	Term Credits	9.0
Term 2	BUSN 502 Essentials of Economics	3.0
	INFO 680 US Government Information	3.0
	PLCY 516 Case Study Research II	3.0
	Term Credits	9.0
Term 3	ECON 616 Public Finance and Cost Benefit Analysis	3.0
	PLCY 507 Nonprofit Organizations	3.0
	PLCY 503 Theory and Practice of Policy Analysis	3.0
	Term Credits	9.0
Term 5	URBS 530 Quantitative Methods & Reasoning for Urban Strategists	3.0
	Statistics (Choose one from the list)	3.0
	PLCY 517 Case Study Final Project	3.0
	Term Credits	9.0
Term 6	Approved Elective	3.0
	Approved Elective	3.0
	Approved Elective	3.0
	Term Credits	9.0

Total Credit: 45.0

Public Policy Faculty

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

Richardson Dilworth, PhD (*Johns Hopkins University*) Director, Center for Public Policy. Professor. American political development, urban politics, public policy.

Christian Hunold, PhD (*University of Pittsburgh*). Professor. Environmental policy; comparative politics; urban wildlife; political theory.

Franco Montalto, PhD (*Cornell University*). Professor. Effects of built infrastructure on societal water needs, ecohydrologic patterns and processes, ecological restoration, green design, and water interventions.

Gwen Ottinger, PhD (*University of California, Berkeley*). Associate Professor. Social studies of science and technology, environmental justice, science and engineering ethics, citizen science, environmental ethics.

Mark Stehr, PhD (*University of California at Berkeley*) Assistant Director School of Economics. Associate Professor. Health economics, health behaviors, public finance, public policy.

Publishing

Major: Publishing
 Degree Awarded: Master of Arts (MA)
 Calendar Type: Quarter
 Total Credit Hours: 45.0
 Co-op Option: None
 Classification of Instructional Programs (CIP) code: 09.1001

Standard Occupational Classification (SOC) code: 27-3041

NOTE: This program is no longer accepting applications.

About the Program

Students are given a broad scope view of the Publishing Industry via courses taught by publishing professionals and experts in their fields. In addition to the ten required courses, students will take an additional five courses in the aspect of publishing that best suits their interests. Courses will be taught in traditional classrooms, as well as online in both synchronized and asynchronous sessions; special projects can occur in day and evening hours.

The required course list contains seven courses specific to the Publishing program, and three by other disciplines (Law, Business, and Digital Design). The elective list contains three courses specific to the program, and then a wide-range of courses from Communication, Visual Arts and Design, Business, and Law.

Independent Projects are encouraged and are limited only by the student's imagination or area of interest. Opportunities abound at Drexel itself, as well as many other area publishers with whom we've built relationships.

Degree Requirements

Required courses

LAW 603S	Media Law	3.0
MKTG 601	Marketing Strategy & Planning	3.0
PUB 504	Drexel Publishing Group Special Projects	3.0
PUB 530	The Publishing Environment	3.0
PUB 631	Publication Design: Print and Digital	3.0
PUB 635	Periodicals Publishing	3.0
PUB 720	The Ebook and Online Magazines	3.0
PUB 730	Book Publishing	3.0
PUB 750	Small Press Development	3.0
WEST 500	Introduction to Digital Design Tools	3.0
Select five of the following:		15.0
AADM 620	Legal and Ethical Issues in the Arts	
AADM 751	Management Techniques In the Arts	
COM 500	Reading & Res Communication	
COM 510	Technical Writing	
COM 520	Science Writing	
COM 525	Document Design and Usability	
COM 530	Techniques and Science of Photography	
COM 540	Technical and Science Graphics	
COM 570	Technical, Science and Health Editing	
COM 610	Theories of Communication and Persuasion	
COM 670	Medical Writing	
COM T680	Special Topics in Communication	
LAW 602S	First Amendment

Science, Technology, and Society

Major: Science, Technology, and Society

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 30.1501

Standard Occupational Classification (SOC) code: 11-9121

NOTE: This program is no longer accepting applications.

About the Program

The Science, Technology, and Society (STS) program systemically investigates the social dimensions of science, technology and medicine. Faculty from a range of disciplines contribute to a curriculum that features a broad set of perspectives, all grounded in a foundation of social theory, research methods, and writing and presentation skills. The STS program emphasizes three interrelated areas: environment and sustainability; health and medicine; and information, identities and networks. The STS Lab course is a unique feature of the curriculum—it prepares students to work as a team to address meaningful science and technology related topics. Working with a faculty adviser, graduate students develop an individualized plan of study that allows them to pursue their interests in-depth.

STS students are independent thinkers who are dedicated to understanding the intersections of society, science, medicine and technology. While STS students vary widely in their professional and educational backgrounds and career ambitions, they share a

common commitment to a critical approach to our world’s most pressing technoscientific challenges.

Prospective students for the MS in STS see this educational opportunity as a crucial factor in their skill development and career advancement. They are college graduates in engineering, the humanities, social sciences, and natural sciences; professionals in businesses, city and state government offices, and area hospitals; and middle and high school teachers. Students can attend full or part time and complete all coursework in the evening.

Admission Requirements

NOTE: This program is no longer accepting applications.

Applicants to the program must meet the general requirements for admission to graduate studies at Drexel University.

Prospective students must also submit a 500-word essay explaining why they want to enter the program and some of the issues related to science, technology and society that they would like to study. These statements are read carefully by the faculty screening committee to evaluate each applicant’s sense of purpose. Entering students typically begin during the fall quarter. Students are able, though, to start the program during any quarter.

Visit the Graduate Admissions (<http://www.drexel.edu/grad/programs/coas/science-technology-society/>) website for more information about requirements and deadlines, as well as instructions for applying online.

Degree Requirements

The program requires 45.0 credits of coursework. Required courses total 24.0 credits. Remaining credits are chosen from a list of electives.

Basic Requirements

SCTS 501	Introduction to Science, Technology and Society	3.0
SCTS 502	Research Methods	3.0
SCTS 503	Advanced Research Methods	3.0
SCTS 504	Science, Technology & Society Theories	3.0

Advanced Requirements

Ethics, Values, Identities, and Culture 6.0

Select two of the following:

CHP 807	Public Health Ethics	
INFO 679	Information Ethics	
SCTS 575	Digital Power and Resistance	
SCTS 600	Contemporary Feminist Theory	
SCTS 610	Material Culture	
SCTS 612	Medical and Healthcare Ethics	
SCTS 614	Technology, Progress, and Determinism	
SCTS 615	The Biopolitics of Health	
SCTS 620	Medicine, Technology and Science	
SCTS 650	Global Subjects of Biocapital	
SCTS 651	Transnational Science, Technology & Capitalism	

Science and Technology Policy 3.0

Select one of the following:

COM 650	Telecommunications Regulation and Policy	
INFO 725	Information Policy and Ethics	
PLCY 509	Sustainability & Public Policy	
SCTS 570	Environmental Policy	
SCTS 571	Science and Technology Policy	
SCTS 641	Risk and Disaster Policy	
SCTS 643	Contemporary Stem Workforces: Organizations of Labor in Lab, Shop and Clinic	

SCTS 645	War and Technoscience	
Science, Technology & Society Lab		3.0
Select one of the following:		
SCTS 550	Special Topics in STS Lab	
SCTS 561	Mobilities Lab	
SCTS 562	Identity and Intersectionality Lab	
SCTS 563	Philadelphia in a Changing Climate Lab	
Thesis and Electives*		21.0
SCTS 798	Master's Research	
Suggested Electives**		
CHP 516	History of Public Health	
CCM 701	Contemporary Social Theory	
CCM 704	Research Methods in Communication, Culture and Media	
CCM 801	Seminar in Contemporary Theory	
COM 650	Telecommunications Regulation and Policy	
MGMT 602	Innovation Management	
PLCY 504	Methods of Policy Analysis	
PSY 612	Psychology of Human-Computer Interaction Design	
PSY 712	History and Systems	
SCTS 584	Historiography of Science	
SCTS 639	Politics of Life	
SCTS 640	STS Perspectives on Risk and Disaster	
SCTS 660	Theoretical and Sociological Aspects of Measurement	
SCTS 665	Advanced Topics in Philosophy of Science	
SCTS 697	Internship in Science, Technology and Society	
SCTS T780	Special Topics in Science Technology and Society	
SCTS I799	Independent Study in SCTS	
Total Credits		45.0

* Students who elect to pursue the Thesis option should complete 9.0 credits of SCTS 798 - Master's Thesis and select 12.0 credits from the list of suggested electives.

** Additional electives may be taken from other schools and colleges in the University with approval from the Director of the MS in Science, Technology & Society program.

Sample Plan of Study

Term 1		Credits	
SCTS 501	Introduction to Science, Technology and Society	3.0	
SCTS 502	Research Methods	3.0	
SCTS 504	Science, Technology & Society Theories	3.0	
Term Credits		9.0	
Term 2	Science & Technology Policy course	3.0	
Two Ethics, Values, Identities, & Culture courses		6.0	
Term Credits		9.0	
Term 3	SCTS 503	Advanced Research Methods	3.0
Science, Technology, & Society Lab course		3.0	
STS Elective		3.0	
Term Credits		9.0

Total Credit: 45.0			

Science, Technology and Society Faculty

Lloyd Ackert, PhD (*Johns Hopkins University*). Teaching Professor. History of science and technology; ecology; Russian science.

Peter Amato, PhD (*Fordham University*) *Director, Philosophy*. Teaching Professor. Ethics, Marxism, Continental philosophy.

Jesse Ballenger, PhD (*Case Western Reserve University*). Associate Teaching Professor. Healthcare, medicine and ethics; aging and neurodegenerative diseases; Science and Technology Studies.

Mary Ebeling, PhD (*University of Surrey*) *Director, Women's and Gender Studies*. Associate Professor. Science and technology studies; emerging technologies and biocapital; media and democratic cultures; radical social movements; sociology of markets; political sociology; and ethnographic methodologies.

Christian Hunold, PhD (*University of Pittsburgh*). Professor. Environmental policy; comparative politics; urban wildlife; political theory.

Kelly Joyce, PhD (*Boston College*) *Director, Master's Program in Science Technology & Society*. Professor. Science, medicine and technology; aging and technology; qualitative social science methods; healthcare and medicine.

Alison Kenner, PhD (*Rensselaer Polytechnic Institute*). Associate Professor. Science, technology, and health; environmental health problems; cities and place; feminist theory; medical anthropology; digital humanities

Scott G. Knowles, PhD (*Johns Hopkins University*) *Department Head, History*. Professor. Urban history, Philadelphia history, history of technology, history of disasters, modern history.

Brent Luvaas, PhD (*UCLA*). Associate Professor. DIY and independent media production; transnational consumer culture; popular music; new media and mediated subjectivities; youth culture in the US and Indonesia.

Jonson Miller, PhD (*Virginia Tech*). Teaching Professor. Science and technology, American history, military history.

Gwen Ottinger, PhD (*University of California, Berkeley*). Associate Professor. Social studies of science and technology, environmental justice, science and engineering ethics, citizen science, environmental ethics.

Flavia Padovani, PhD (*University of Geneva*). Associate Professor. History and philosophy of science, epistemology, logic.

Jody A. Roberts, PhD (*Virginia Polytechnic Institute and State University*) *Director, Center for Contemporary History and Policy, Chemical Heritage Foundation*. Assistant Professor. Intersections of emerging molecular sciences and public policy and the ways in which tensions brought about between the two get resolved.

Tiago Saraiva, PhD (*Universidad Autónoma de Madrid*). Associate Professor. History of science and technology; transnational history; environmental history

Jonathan Seitz, PhD (*University of Wisconsin*) *Assistant Department Head, History*. Teaching Professor. History of religion, science, medicine, witchcraft, early modern Europe, Italy.

Mimi Sheller, PhD (*New School for Social Research*) *Director, Center for Mobilities Research and Policy*. Professor. Sustainable mobility and

mobility justice: new cultures and infrastructures of travel, transport, mobile communication, and urbanism; Caribbean Studies: history, culture and political theory of the region, including intersections of race, ethnicity, gender, sexuality and class.

Chloe Silverman, PhD (*University of Pennsylvania*) *Director, Center for Science, Technology & Society*. Associate Professor. Parent advocacy for autism, neurodiversity, and pollinator health research.

Amy Slaton, PhD (*University of Pennsylvania*). Professor. History of science and technology; history of standards and metrology; intersectionality, race, labor.

Andrew Smith, PhD (*SUNY, Stony Brook*). Associate Professor. Philosophy, social and political philosophy, American philosophy.

Kathryn Steen, PhD (*University of Delaware*). Associate Professor. History of technology, history of industry and business, and comparative history.

Michael Yudell, MPH, PhD (*Columbia University*) *Chair, Department of Community Health*. Associate Professor. Department of Community Health and Prevention. Public health ethics; history of public health; race and racism; autism.

Emeritus Faculty

Robert J. Brulle, PhD (*George Washington University*). Professor Emeritus. Environmental policy and politics, critical theory, marine risk, social movements, environmental sociology.

The College of Engineering

About the College

The College of Engineering prepares a new generation of engineers dedicated to discovery and the application of technology to promote economic development and improve quality of life.

Drexel University's College of Engineering is guided by five core values that shape the curriculum and experience for all students: excellence in academics and research; personal, intellectual and professional development; diversity; innovation and exploration; internal and external collaborations and partnerships. We provide a research agenda for our PhD students that addresses society's most pressing challenges regionally, nationally and globally. Our Master of Science students are trained in strategic leadership and entrepreneurial risk-taking to address the opportunities and challenges of a rapidly changing industry.

The graduate programs at Drexel College of Engineering integrate evolving engineering science with the growing fields of engineering applications and processes. As Drexel moves through the 21st century, the College of Engineering will continue to offer students a diverse academic learning and research environment, while continuing to build on its national reputation for excellence in engineering and research.

- Systems Engineering (<http://catalog.drexel.edu/graduate/collegeofengineering/systemsengineering/systemsengineeringcert/>)
- Systems Engineering Analysis (p. 299)
- Systems Engineering Integrated Logistics (p. 300)
- Systems Reliability Engineering (p. 300)

About Graduate Co-op

Drexel University's long tradition in the field of experiential learning has now been extended into many of its master's programs in science, business, and engineering.

This option, called the Graduate Co-op Program (<http://www.drexel.edu/scdc/co-op/graduate/>) (GCP), provides students with the opportunity to gain work experience directly related to their career goals. Employment typically lasts six months. It is important to note that the GCP program does not guarantee a job. It is a market-driven process for the candidates as well as employers. GCP provides the tools and contacts; the student must qualify for the job on the basis of merit, qualifications, and skills.

Further information on the GCP program is available at the Drexel Steinbright Career Development Center. (<http://www.drexel.edu/scdc/>)

Architectural Engineering

Major: Architectural Engineering

Degree Awarded: Master of Science in Architectural Engineering (MSAE) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MSAE); 90.0 (PhD)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 14.0401

Standard Occupational Classification (SOC) code: 11-9041

About the Program

Architectural Engineering is inherently an interdisciplinary enterprise that is centered on the design, construction, and operation of the built environment. Architectural Engineering MS or PhD graduates may include students with expertise in one or more of the following sub-disciplines (usually housed in civil/environmental engineering and elsewhere in traditional disciplinary constructs or newly developing fields of focus or expertise):

- Building energy efficiency and alternative energy
- Indoor environmental quality

Our graduates are engineers and researchers trained in integrated building design and operation practices, who can work on interdisciplinary teams that are able to develop creative solutions combined with technological advances to produce functional, efficient, attractive and sustainable building infrastructure.

Admission Requirements

Applicants to the MS or PhD in Architectural Engineering must meet the following requirements:

- A BS in Engineering OR
- For students without an Engineering degree, the following courses, or their approved equivalents from other departments, will meet these requirements:
 - *Introduction to Fluid Flow* – CIVE 320
 - *Introduction to Thermodynamics* – ENGR 210
 - *Heat Transfer* – MEM 345 – for Building Energy students
 - *General Chemistry II* – CHEM 102 – for Indoor Environmental Quality students

The application package will include:

- undergraduate and graduate transcripts;
- three letters of recommendation from faculty or professionals who can evaluate the applicant's promise as a graduate student;
- GRE scores;
- a written statement of career and educational goals.

Competitive applicants will possess an undergraduate GPA of 3.30 or higher and GRE scores above the 60th percentile.

Degree Requirements (MS)

The goal of the MS in Architectural Engineering (AE) is to produce graduates who have a solid understanding of the Architectural Engineering discipline as well as an understanding of the interrelationships between the major AE sub-disciplines. Graduates will have demonstrated the ability and capacity to apply that understanding and skill, and the curriculum and project requirements are designed to provide to the students and then ask them to demonstrate the ability to effectively engage in professional-level performance.

Required Courses

Core Courses for all AE students

AE 510	Intelligent Buildings	3.0
AE 550	Comfort Analysis and Indoor Air Quality	3.0
AE 544	Building Envelope Systems	3.0
AE 551	Building Energy Systems I	3.0
MEM 591	Applied Engr Analy Methods I	3.0
MEM 592	Applied Engr Analy Methods II	3.0

Building Energy Theme

Complete three of the following:		9.0
AE 552	Building Energy Systems II	
CHE 513	Chemical Engineering Thermodynamics I	
CHE 525	Transport Phenomena I	
MEM 611	Conduction Heat Transfer	
MEM 612	Convection Heat Transfer	
MEM 621	Foundations of Fluid Mechanics	

Indoor Air Quality (IAQ) Theme

Complete three of the following:		9.0
AE T780	Special Topics in AE	
CHE 525	Transport Phenomena I	

ENVE 560	Fundamentals of Air Pollution Control	
ENVE 660	Chemical Kinetics in Environmental Engineering	
ENVS 501	Chemistry of the Environment	
MEM 621	Foundations of Fluid Mechanics	
Additional Electives **		9.0
Total Credits		45.0

* Indoor Modeling and Field Measurements.

** The balance of the required 45.0 credits, a maximum of 18.0 credits, will be electives approved by the student's advisor and the departmental graduate advisor.

Degree Requirements (PhD)

The following general requirements must be satisfied in order to complete the PhD in Architectural Engineering:

- 90.0 quarter credit hours total (or 45 credit hours post-MS)
- Plan of study established with Advisor
- Qualifying courses
- Candidacy exam
- Approval of dissertation proposal
- Defense of dissertation
- Full-time residency for one continuous academic year is usually desired for the PhD degree to ensure students the opportunity for intellectual association with other scholars.

Students entering with a master's degree may be exempted from some or all of the courses in the breadth requirement; however, they are still required to meet all milestones of the program. Individual courses may also be transferred with approval of the Graduate Advisor. The total credit amount, candidacy exam, and dissertation are University Requirements. Additional requirements are determined by the department offering the degree.

MSAE coursework plus research and courses defined by the dissertation Committee 90.0

Qualifying Courses

To satisfy the qualifying requirements, students must earn a grade of B+ or better in the first 6 Architectural Engineering graduate courses taken at Drexel, and must earn an overall GPA of 3.5 or better in these courses. Normally these courses comprise at least 4 "core" courses and either 2 more courses, either "core" or in one of the Architectural Engineering themes taken as part of the PhD program; however, they may in some cases include more advanced courses (e.g., if the student has received transfer credit for a core course).

Undergraduate courses, independent studies, research credits, and courses from other departments cannot be counted toward the qualifying requirements. Student progress toward these requirements will be assessed in the Annual Review following the student's first year in the PhD program. For more information visit the Department's PhD Program Requirements page.

Candidacy Exam

After approximately one year of study beyond the master's degree, doctoral students take a candidacy examination, consisting of written and oral parts. The Architectural Engineering candidacy examination serves to define the student's research domain and to evaluate the student's knowledge and understanding of various fundamental and seminal

results in that domain. At this point the student is expected to be able to read, understand, analyze, and explain advanced technical results in a specialized area of Architectural Engineering at an adequate level of detail. The candidacy examination will evaluate those abilities using a defined set of published manuscripts. The student will prepare a written summary of the contents of the material, present the summary orally, and answer questions about the material. The examination committee will evaluate the written summary, the oral presentation, and the student's answers.

Thesis Proposal

After completing the candidacy examination successfully, the PhD candidate must prepare a thesis proposal that outlines, in detail, the specific problems that will be solved in the PhD dissertation. The quality of the research proposal should be at the level of, for example, a peer-reviewed proposal to a federal funding agency, or a publishable scientific paper. The candidate is responsible for sending the research proposal to the PhD committee two weeks before the oral presentation. The PhD committee need not be the same as the candidacy exam committee, but it follows the same requirements and must be approved by the Office of Graduate Studies. The oral presentation involves a 30-40-minute presentation by the candidate followed by an unspecified period during which the committee will ask questions.

After the question and answer period, the candidate will be asked to leave the room and the committee will determine if the research proposal has been accepted. The research proposal can be repeated at most once. A thesis proposal must be approved within two years of becoming a PhD candidate.

After approval of the proposal, the committee meets from time to time to review the progress of the research.

Thesis Defense

After completing the research proposal successfully, the PhD candidate must conduct the necessary research and publish the results in a PhD dissertation. The dissertation must be submitted to the PhD committee two weeks prior to the oral defense and at least 90 days before the graduation date. The oral presentation involves a 45-minute presentation by the candidate, open to the public, followed by an unspecified period during which the committee will ask questions. The question and answer period is not open to the public.

After the question and answer period, the candidate will be asked to leave the room and the committee will determine if the candidate has passed or failed the examination. The candidate will be granted one more chance to pass the final defense if he or she fails it the first time. Paperwork selecting the thesis committee and indicating the results of the thesis defense must be filed with the Department of Civil, Architectural and Environmental Engineering and the Office of Graduate Studies.

The PhD degree is awarded for original research on a significant Architectural Engineering problem. Graduate students who have an MS degree or have completed work equivalent to that required for of an MS degree will continue to work closely with individual faculty members to pursue the PhD degree (see Faculty Research Interests on the department website). PhD dissertation research is usually supported by a research grant from a government agency or an industrial contract.

Many doctoral students take three to five years of full-time graduate study to complete their degrees.

Sample Plan of Study (MSAE)

Indoor Air Quality - Sample Plan of Study

First Year		Credits
Term 1		
AE 544	Building Envelope Systems	3.0
AE 550	Comfort Analysis and Indoor Air Quality	3.0
MEM 591	Applied Engr Analy Methods I	3.0
Term Credits		9.0
Term 2		
AE 510	Intelligent Buildings	3.0
AE 551	Building Energy Systems I	3.0
MEM 592	Applied Engr Analy Methods II	3.0
Term Credits		9.0
Term 3		
AE T780	Special Topics in AE	3.0
Free Electives		6.0
Term Credits		9.0
Second Year		
Term 1		
ENVS 501	Chemistry of the Environment	3.0
MEM 621	Foundations of Fluid Mechanics	3.0
Free Elective		3.0
Term Credits		9.0
Term 2		
CHE 525	Transport Phenomena I	3.0
ENVE 560	Fundamentals of Air Pollution Control	3.0
ENVE 660	Chemical Kinetics in Environmental Engineering	3.0
Term Credits		9.0
Total Credit: 45.0		

Undergraduate Course Prerequisites for students without an Engineering Degree:

The following courses, or their approved equivalents from other departments, will meet these requirements:

- CIVE 320 - Fundamental Fluids
- CHEM 102 - Basic Chemistry
- ENGR 210 - Thermodynamics

Building Energy - Sample Plan of Study

First Year		Credits
Term 1

Total Credit: 45.0

Undergraduate Course Prerequisites for students without an Engineering Degree

The following courses, or their approved equivalents from other departments, will meet these requirements:

- CIVE 320 - Fundamental Fluids
- MEM 345 - Heat Transfer
- ENGR 210 - Thermodynamics

Plan of Study (PhD)

Upon entering the PhD program, each student will be assigned an academic advisor, and with the help of the advisor will develop and file a plan of study (which can be brought up to date when necessary). The plan of study should be filed with the Graduate Coordinator no later than the end of the first term.

Civil, Architectural and Environmental Engineering Faculty

Abieyuwa Aghayere, PhD (*University of Alberta*). Professor. Structural design - concrete, steel and wood; structural failure analysis; retrofitting of existing structures; new structural systems and materials; engineering education.

Ivan Bartoli, PhD (*University of California, San Diego*). Associate Professor. Non-destructive evaluation and structural health monitoring; dynamic identification, stress wave propagation modeling.

Robert Brehm, PhD (*Drexel University*). Teaching Professor. International infrastructure delivery; response to natural catastrophes; risk assessment and mitigation strategies; project management techniques.

Shannon Capps, PhD (*Georgia Institute of Technology*). Assistant Professor. Atmospheric chemistry; data assimilation; advanced sensitivity analysis; inverse modeling.

S.C. Jonathan Cheng, PhD (*West Virginia University*). Associate Professor. Soil mechanics; geosynthetics; geotechnical engineering; probabilistic design; landfill containments; engineering education.

Eugenia Ellis, PhD (*Virginia Polytechnic Institute and State University*). Associate Professor. Natural and electric light sources and effects on biological rhythms and health outcomes; ecological strategies for smart, sustainable buildings of the nexus of health, energy and technology.

Yaghoob (Amir) Farnam, PhD (*Purdue University*). Assistant Professor. Advanced and sustainable infrastructure materials; multifunctional, self-responsive and bioinspired construction materials; advanced multiscale manufacturing; characterization, and evaluation of construction materials; durability of cement-based materials.

Patricia Gallagher, PhD (*Virginia Polytechnic Institute and State University*). Professor. Geotechnical and geoenvironmental engineering; soil improvement; recycled materials in geotechnics.

Patrick Gurian, PhD (*Carnegie-Mellon University*). Professor. Risk analysis of environmental and infrastructure systems; novel adsorbent materials; environmental standard setting; Bayesian statistical modeling; community outreach and environmental health.

Charles N. Haas, PhD (*University of Illinois-Urbana*) *L. D. Betz Chair Professor of Environmental Engineering and Department Head, Civil, Architectural and Environmental Engineering*. Professor. Water treatment; risk assessment; bioterrorism; environmental modeling and statistics; microbiology; environmental health.

Ahmad Hamid, PhD (*McMaster University*). Professor. Engineered masonry; seismic behavior, design and retrofit of masonry structures; development of new materials and building systems.

Simi Hoque, PhD (*University of California - Berkeley*). Associate Professor. Computational methods to reduce building energy and environmental impacts, urban metabolism, thermal comfort, climate resilience.

Y. Grace Hsuan, PhD (*Imperial College*). Professor. Durability of polymeric construction materials; advanced construction materials; and performance of geosynthetics.

Joseph B. Hughes, PhD (*University of Iowa*) *Distinguished University Professor*. Biological processes and applications of nanotechnology in environmental systems.

L. James Lo, PhD (*University of Texas at Austin*). Assistant Professor. Architectural fluid mechanics; building automation and autonomy; implementation of natural and hybrid ventilation in buildings; airflow distribution in buildings; large-scale air movement in an urban built environment; building and urban informatics; data-enhanced sensing and control for optimal building operation and management; novel data gathering methods for building/urban problem solving; interdisciplinary research on occupant behaviors in the built environment.

Roger Marino, PhD (*Drexel University*). Associate Teaching Professor. Engineering education; land development; product Development

Joseph P. Martin, PhD (*Colorado State University*). Professor. Geotechnical and geoenvironmental engineering; hydrology; transportation; waste management.

James E. Mitchell, MArch (*University of Pennsylvania*). Professor. Architectural engineering design; building systems; engineering education.

Franco Montalto, PhD (*Cornell University*). Professor. Effects of built infrastructure on societal water needs, ecohydrologic patterns and processes, ecological restoration, green design, and water interventions.

Nariman Mostafavi, PhD (*University of Massachusetts - Amherst*). Assistant Teaching Professor. Simulation tools for analyzing urban metabolism; environmentally responsive design; urban resilience; engineering economics; industrial ecology.

Joseph V. Mullin, PhD (*Pennsylvania State University*) *Associate Department Head*. Teaching Professor. Structural engineering; failure analysis; experimental stress analysis; construction materials; marine structures.

Mira S. Olson, PhD (*University of Virginia*). Associate Professor. Peace engineering; source water quality protection and management; contaminant and bacterial fate and transport; community engagement.

Miguel A. Pando, PhD (*Virginia Polytechnic Institute and State University*). Assistant Professor. Laboratory testing of geomaterials; geotechnical aspects of natural hazards; soil-structure-interaction; geotechnical engineering.

Michael Ryan, PhD (*Drexel University*) Associate Department Head of Graduate Studies. Assistant Teaching Professor. Microbial Source Tracking (MST); Quantitative Microbial Risk Assessment (QMRA); dynamic engineering systems modeling; molecular microbial biology; phylogenetics; metagenomics; bioinformatics; environmental statistics; engineering economics; microbiology; potable and waste water quality; environmental management systems.

Christopher Sales, PhD (*University of California, Berkeley*). Associate Professor. Environmental microbiology and biotechnology; biodegradation of environmental contaminants; microbial processes for energy and resource recovery from waste; application of molecular biology, analytical chemistry and bioinformatic techniques to study environmental biological systems.

Yared Shifferaw, PhD (*Johns Hopkins University*). Assistant Professor. Computational and experimental mechanics; structural stability; optimization; health monitoring and hazard mitigation; sustainable structures; emerging materials; thin-walled structures and metallic structures.

Kurt Sjoblom, PhD (*Massachusetts Institute of Technology*). Assistant Professor. Laboratory testing of geomaterials, geotechnical engineering, foundation engineering.

Sabrina Spatari, PhD (*University of Toronto*). Associate Professor. Industrial ecology; development and application of life cycle assessment (LCA) and material flow analysis (MFA) methods for guiding engineering and policy decisions; specific interest in biomass and bioenergy, biofuels, and urban infrastructure.

Robert Swan Associate Teaching Professor. Geotechnical and Geosynthetic Engineering; soil/geosynthetic interaction and performance; laboratory and field geotechnical/geosynthetic testing.

Michael Waring, PhD (*University of Texas-Austin*) Associate Department Head for Undergraduate Programs; Director of Architectural Engineering Program. Associate Professor. Indoor air quality and building sustainability; indoor particulate matter fate and transport; indoor chemistry and particle formation; secondary impacts of control technologies and strategies.

Jin Wen, PhD (*University of Iowa*). Associate Professor. Architectural engineering; Building Energy Efficiency; Intelligent Building; Net-zero Building; and Indoor Air Quality.

Aspasia Zerva, PhD (*University of Illinois*). Professor. Earthquake engineering; mechanics; seismology; structural reliability; system identification; advanced computational computational methods in structural analysis.

Emeritus Faculty

Harry G. Harris, PhD (*Cornell University*). Professor Emeritus. Structural models; dynamics of structures, plates and shells; industrialized building construction.

Richard Weggel, PhD (*University of Illinois*) Samuel S. Baxter Professor Emeritus; Civil and Environmental Engineering. Professor Emeritus. Coastal engineering; hydraulics engineering; hydrology.

Richard Woodring, PhD (*University of Illinois*) Dean of Engineering Emeritus. Professor Emeritus. Structural engineering, reinforced concrete.

Chemical Engineering

Major: Chemical Engineering

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS); 90.0 (PhD)

Co-op Option: Available for full-time on-campus master's-level students

Classification of Instructional Programs (CIP) code: 14.0701

Standard Occupational Classification (SOC) code: 17-2041

About the Program

The graduate program in the Chemical and Biological Engineering Department integrates current chemical engineering science with the growing fields of engineering applications and processes, emphasizing engineering design and scientific analysis. The department intends to develop broadly educated individuals who are knowledgeable in modern theories, cognizant of the behavior of engineering systems, and aware of current mathematical and engineering tools that are useful for the solution of problems in complex processes and systems, especially those in the fields of chemical, environmental, biochemical, and materials process engineering. Areas of particular strength include biological engineering, energy and the environment, multiscale modeling and process systems engineering, and polymer science and engineering.

Programs are arranged to meet the needs and interests of individual students. The plan of study is initially formulated in consultation with the departmental graduate advisor and subsequently guided by the thesis advisor.

A graduate co-op is available for the Master of Science program. For more information, visit the Steinbright Career Development Center's website (<http://www.drexel.edu/scdc/co-op/graduate/>).

Graduates have pursued a variety of careers, ranging from faculty positions in academia to research and development in industry, in the U.S. and overseas.

Additional Information

For more information about this program, visit Drexel University's Department of Chemical and Biological Engineering (<https://drexel.edu/engineering/academics/departments/chemical-biological-engineering/>) web page.

Admission Requirements

Students should fulfill Drexel University's general requirements for admission to graduate studies. The subjects normally included in an undergraduate program in chemical engineering provide a satisfactory background. Decisions regarding prerequisite qualifications for students

who may be deficient in some areas are made after consultation with the departmental graduate advisor.

The core courses are designed for students with undergraduate training in chemical engineering. However, students with a background in biological sciences and engineering can also enroll in the core courses after completing the necessary basic engineering courses and disciplinary chemical engineering courses. Programs for such students are determined on an individual basis after consultation with the departmental graduate advisor.

Graduate study in chemical engineering is offered on a regular full-time basis and on a part-time basis. Details not covered in the following information may be obtained by contacting the departmental graduate advisor. The General (Aptitude) Test of the Graduate Record Examination (GRE) is required for applicants pursuing full-time study.

Financial Assistance

Financial aid in the form of teaching assistantships, research assistantships, and fellowship grants is available to qualified full-time PhD students. Awards are made annually on a competitive basis.

For additional information on how to apply, visit Drexel's Admissions page for Chemical Engineering (<http://www.drexel.edu/grad/programs/coe/chemical-engineering/>).

Master of Science in Chemical Engineering

Degree Requirements

In general, each program leading to the Master of Science in Chemical Engineering must meet the following requirements: total, 45.0 credits; core chemical engineering, 15.0 credits; area of concentration, at least 15.0 credits; free electives, at most 6.0 credits; research, at most 21.0 credits. Core courses in the chemical engineering Master's program are listed below. A Master's Thesis is optional.

Thesis option: The thesis may be based on either a theoretical or an experimental investigation, or both, of limited scope but involving a significant degree of originality. The nature of the research may involve multidisciplinary areas such as biological engineering, materials processing and engineering, energy and the environment, and other topics. The scope and content of the thesis is guided by the thesis advisor. All students pursuing a Master's with Thesis must complete 9.0 credits of thesis research (CHE 898) and, at the discretion of the research advisor, up to 12.0 credits of independent study (CHE 1799).

Coursework-only (non-Thesis) option: Students not pursuing Master's with Thesis may take up to 21.0 credits of independent study (CHE 1799) although independent study is **not** required for a non-thesis Master's. Non-thesis students may also take additional concentration electives beyond the required 15.0-credit series. Non-thesis students may **not** register for thesis research.

Concentration: All Master's students must complete a 15-credit series of concentration electives. Concentration electives may be chosen from course offerings in chemical engineering, mathematics, science, and other engineering disciplines, and are subject to approval by the departmental graduate advisor. Sample concentration series courses are listed below; there are many other possibilities. Free (non-concentration) electives need only be graduate-level.

Co-op: Students have the option to pursue a co-op as part of their Master's program. In conjunction with the Steinbright Career Development Center (<http://drexel.edu/scdc/co-op/graduate/>), students will be provided an overview of professionalism, resume writing, and the job search process. Co-op will be for a six-month position running in the summer/fall terms. Students will not earn academic credit for the co-op but will earn 9.0 non-academic co-op units per term.

Full-time students usually take the core courses in the first year. Other courses may be substituted for the core courses, if equivalent courses are available and if the substitution is approved by the graduate advisor. Full-time students normally require a minimum of one calendar year to complete their study and research.

Curriculum		
CHE 502	Mathematical Methods in Chemical Engineering	3.0
CHE 513	Chemical Engineering Thermodynamics I	3.0
CHE 525	Transport Phenomena I	3.0
CHE 543	Kinetics & Catalysis I	3.0
CHE 554	Process Systems Engineering	3.0
Area of Concentration		15.0
Thesis/Research		9.0
Electives		6.0
Sample Areas of Concentration		
Biochemical Engineering		
Sample Courses		
BIO 500	Biochemistry I	
BIO 610	Biochemistry of Metabolism	
BMES 501	Medical Sciences I	
CHE 562	Bioreactor Engineering	
CHE 564	Unit Operations in Bioprocess Systems	
Computer Science		
Sample Courses		
CS 543	Operating Systems	
CS 551	Compiler Construction I	
CS 552	Compiler Construction II	
CS 550	Programming Languages	
Engineering Management		
Sample Courses		
EGMT 501	Leading and Managing Technical Workers	
EGMT 502	Analysis and Decision Methods for Technical Managers	
EGMT 504	Design Thinking for Engineering Communications	
EGMT 531	Engineering Economic Evaluation & Analysis	
EGMT 581	Meeting Engineering Leadership Challenges	
Environmental Engineering		
Sample Courses		
ENVS 501	Chemistry of the Environment	
ENVS 608	Fate of Pollutants in Air and Water	
ENVE 661	Env Engr Op-Chem & Phys	
ENVE 662	Enviro Engr Unit Oper-Bio	
ENVE 865	Benefit-Cost Analysis for Infrastructure	
Materials Science and Engineering		
Sample Courses		
MATE 500	Structure and Properties of Metals	
MATE 501	Structure and Properties of Polymers	
MATE 502	Structure and Properties of Ceramic and Electronic Materials	
MATE 505	Phase Equilibria	
MATE 507	Kinetics	
Total Credits		45.0

PhD in Chemical Engineering

Superior students with MS or BS degrees will be considered for the doctoral program in chemical engineering. Students joining with a Master's degree may satisfy up to 45.0 credit hours of the PhD course/research credit requirements depending on the courses taken and/or research carried out in their Master's programs, subject to approval by the graduate program advisor.

Degree Requirements

The following general requirements must be satisfied in order to complete the PhD in chemical engineering:

- 90 credit hours total
- 18 core credits
- 15 credit hours of specialized plan of study
- 57 credit hours of research (including a 3 credit research practice course)
- Qualifying exam (2nd term)
- Establishing a plan of study (2nd term)
- Candidacy exam (5th term)
- Dissertation/Thesis
- Defense of Dissertation/Thesis
- GPA requirements: 3.0 overall; 3.0 graduate chemical engineering (CHE) courses; 3.0 core graduate chemical engineering (CHE) courses

Qualifying Exam

The qualifying exam is administered once a year in January at the start of the 2nd term. The objective of the exam is to evaluate proficiency in core undergraduate chemical engineering material. The format is made up of seven problems, each covering a separate core topic from the undergraduate curriculum, including thermodynamics, heat transfer, mass transfer, fluid mechanics, kinetics, control, and separations. Students must display mastery of five out of the seven topics to pass the qualifying exam. A student can appeal to take a second-chance exam at the end of the 2nd term if the qualifying exam was not satisfactory in the first instance. However, the appeal is not guaranteed and will depend on student's overall performance in coursework, research and teaching assistant duties.

Plan of Study

All students must meet with their research advisor in their 2nd term to work out a plan of study.

Core Requirements

CHE 502	Mathematical Methods in Chemical Engineering	3.0
CHE 513	Chemical Engineering Thermodynamics I	3.0
CHE 525	Transport Phenomena I	3.0
CHE 543	Kinetics & Catalysis I	3.0
CHE 614	Chemical Engineering Thermodynamics II	3.0
CHE 626	Transport Phenomena II	3.0
Specialized Plan of Study Courses		15.0

15.0 credit hours of courses approved by research advisor. All students are expected to develop competence in their area(s) of specialization.

Research		57.0
57.0 credit hours of research, which may include up to 6.0 credit hours of electives.		
CHE 590	Research Methods and Practices	

CHE 998 Ph.D. Dissertation

Total Credits

90.0

Candidacy Exam

The components of the candidacy exam are as follows:

- Proposal Document (Written): The student is required to write a research proposal of about 15 pages, including background, preliminary results, and a research plan (with his/her advisor's input). The proposal must be submitted to each member of the student's thesis committee and to the graduate program advisor on the first day of the student's 5th term.
- Proposal Defense (Oral): The student provides a formal defense of his/her proposal to his/her thesis committee before the end of the student's 5th term.

Preliminary Exam

A preliminary exam is targeted at least 6 months prior to the thesis defense, with this scheduling subject to the research advisor's discretion. This preliminary exam is to ensure that the student has made adequate progress in his/her project. The components of the preliminary exam include:

- Exam Documents (Written): The student is required to write an abstract of the preliminary defense talk, a one-page document describing the plan for completing the thesis, a tentative list of the thesis chapter titles, and a current list of publications/presentations. These must be submitted to each member of the student's thesis committee and to the graduate program advisor in advance of the oral exam date.
- Preliminary Defense (Oral): The student provides a formal defense of the work to date and the anticipated work to be completed for the thesis to his/her thesis committee.
- Publications: At a minimum, at least one manuscript (original article) must have been submitted to a refereed journal prior to the oral exam date.

Thesis/Dissertation and Defense

As the culmination of intensive study and independent research, the doctoral dissertation represents a major scholarly endeavor; accordingly, it is recognized as the most important requirement of the degree. All doctoral candidates must present an acceptable dissertation based on significant work. The dissertation must represent a unique contribution to chemical engineering or biochemical engineering knowledge. A final oral examination is conducted, in part, as a defense of the dissertation. The requirements of the thesis/dissertation and defense are:

- Thesis (Written): The student is required to write a thesis detailing the entire PhD project, including background, methods, results, discussion, conclusions and bibliography.
- Defense (Oral): The student provides a formal defense of his/her PhD thesis in an oral examination to his/her thesis committee.
- Publications: At a minimum, at least one original article must be published in a refereed journal (department's minimum requirement). At the discretion of the research advisor, further publication requirements may be imposed above this minimum.

For more information, visit the Chemical and Biological Engineering Department (<http://drexel.edu/cbe/>) web page.

Facilities

Abrams Laboratory (Abrams)

Software:

- The Abrams group Github repository (<https://github.com/cameronabrams>)

Computational resources:

- Proteus, Drexel's high-performance cluster (www.drexel.edu/research/urcf/services/cluster)
- NSF XSEDE (www.xsede.org)
- DoD HPCMP (www.hpc.mil)

Alvarez Research Group (Alvarez)

- Rheo Filament- VADER1000 - Filament Extensional Rheometer with forced convection oven
- TA DHR3 – Controlled Stress Rheometer with Electronic Heated Plates
- TA ARES G2 – Controlled Strain Rheometer with Forced Convection Oven
- Controlled Film Coater
- Gel Spinning Apparatus for continuous filament and fiber formation
- Microtensiometer for measurement of dynamic transport of surfactant to fluid-fluid interfaces, including dilatational rheology of equilibrated surfaces.
- Supercritical Microtensiometer for measurement of surfactant transport to fluid-fluid interfaces at elevated pressures
- Nikon TE microscope with 3MP camera and various objectives.
- Fluigent - 4 port continuous pressure fluid pump

Nanomaterials for Energy Applications and Technology Laboratory (Baxter)

- Amplified Ti:Sapphire laser with time-resolved terahertz spectroscopy and femtosecond UV/vis/NIR transient absorption spectroscopy (Bossone 106)
- Solar simulator with monochromator and photovoltaic/photoelectrochemical test station
- Electrochemical impedance spectroscopy
- Layer-by-layer deposition robot
- Dip coater
- Spin coater
- Electrodeposition station
- Continuous flow microreactors

Biofuels Laboratory (Cairncross)

- Bubble column biodiesel reactors
- Recirculating heated oil baths
- Quartz crystal microbalance / heat conduction calorimeter (Masscal G1)
- Maxtek quartz crystal microbalance with phase lock oscillator
- Parr reactor

Nanocrystal Solar Laboratory (Fafarman)

- Two chamber fabrication glove box with separate air-purification for wet-chemical synthesis and dry-process fabrication steps, featuring HEPA filtered laminar flow air handling for class-1 cleanroom conditions in an inert atmosphere. In the wet-chemical fabrication chamber there are a spincoater, centrifuge, hot-plates and solid and liquid reagents. On the dry chamber side, there is an integrated thermal evaporator for depositing metal, and a UV-ozone cleaner.
- Custom built Schlenk vacuum/gas manifold, all necessary glassware, J-Kem precision temperature controllers and heating mantles
- Perkin Elmer Lambda 35 UV-vis spectrometer
- ThermoFisher Nicolet iS50R Fourier-transform vis-NIR-MIR absorption spectrometer covering spectral ranges 13000 – 600 and 25000 – 8000 1/cm
- Keithley dual-channel precision source-meter
- Crystalaser Q-switch laser, 300 mW at 532 nm
- Home-built 4-point probe station for thin film electrical conductivity
- 80 MHz digital oscilloscope
- Stanford Research Systems lock-in amplifier

Nanofibers for Energy Storage and Conversion Laboratory (Kalra)

- Four Electrospinning Stations (with core-shell spinning capability)
- Mbraun Dual User Glove Box
- Carver Heat Press
- Four Gamry Potentiostats (Ref 3000 and Interface 1000)
- 32-channel Maccor Battery Cycler, three 8-channel NEWARE Battery Cyclers
- Rotating Disc Electrode Test Station (Pine Instruments)
- Tube Furnaces/Convection Ovens/Vacuum Ovens/Ultrasonicator/Hot Plates/Precision Balances
- Environmental Chamber (Tenney) with high temperature/humidity control ranging from 25-200C and 5-95%RH and integrated with vapor permeation and EIS
- Thermo Fisher Nicolet IS50 FTIR Spectrometer equipped with in-operando battery/supercapacitor cells

Thin Films and Devices Laboratory (Lau)

- Chemical Vapor Deposition Thin Film Reactor System I
- Chemical Vapor Deposition Thin Film Reactor System II
- Chemical Vapor Deposition Rotating Bed Reactor System
- Denton Desktop High Vacuum Sputtering System
- Harrick RF Plasma Reactor
- Gamry Reference 600 Electrochemical Testing Station
- Gamry Interface 1000 Electrochemical Impedance Spectrometer
- Agilent Electrochemical Impedance Analyzer 4294A
- Solar Illuminator
- Nicolet 6700 FTIR Spectrometer
- Shimadzu UV-1800 UV-VIS Spectrophotometer
- Laurell Technologies Spin Coater
- Ramé-Hart 290 Goniometer
- Meiji MT5310L Microscope
- Vacuum Ovens/Hot Plates

Polymers and Composites Laboratory (Palmese)

- TA Instruments TGA Q50 Thermogravimetric Analyzer
- KSV Instruments CAM 200 Contact Angle and Surface Tension Meter
- TA Instruments DSC Q2000 Differential Scanning Calorimeter
- Instron 8872
- Thermo Nicolet Nexus 870 FTIR
- TA Instruments DMA Dynamic Mechanical Analysis
- Perkin Elmer DSC7 Differential Scanning Calorimeter
- Waters GPC/HPLC (RI, UV Detectors)
- Electrospinning station
- TA Instruments AR Rheometer
- Thinky planetary centrifugal mixer ARE-250
- Melt Press
- Portable Near Infrared Spectrometer
- Brookfield digital viscometer
- Glove Box
- Supercritical Dryer (2x)
- Dielectric Barrier Discharge (DBD) plasma reactor

Process Systems Engineering Laboratory (Soroush)

- Shimadzu GPC
- Mini-Reactors
- Agilent GC/MS
- Fluidized Sand Bath
- IKA-RCT Stirred Hotplate Reactors
- Olympus Microscope
- Shimadzu UV-Vis Spectrophotometer (UV-1700)

Electrochemical Interfaces and Catalysis Laboratory (Snyder)

- Millipore DI water system
- 302N Autolab Potentiostats (x2)
- Mettler Toledo Micro-Balance
- Ultracentrifuge
- 4 port Schlenk line
- 4 kW Ambrell Radio Frequency Induction Furnace

Tang Laboratory (Tang)

- Six-channel Bio-Logic SP-300 potentiostat with electrochemical impedance spectroscopy
- LC Technology dual-user glovebox with argon atmosphere. Includes oxygen and water analyzers, electronic feedthroughs, and integrated vacuum oven
- Coin cell crimper /decrimper for battery fabrication (TOB Battery)
- Automatic electrode film coater (TOB Battery)
- Tube furnace
- Vacuum oven
- Karl-Fischer titration apparatus (Mettler Toledo)

- Two rotating disk electrode test station (Pine Instruments) with rotating ring-disk accessories
- 32-channel battery cycler (Arbin)

Wrenn Laboratory (Wrenn)

- PTI, Inc. C-71 Time-Resolved Fluorescence Spectrometer (pulsed nitrogen and dye lasers)
- PTI, Inc. A-710 Steady State Fluorescence Spectrometer
- Brookhaven 90Plus Dynamic Light Scattering Apparatus
- Brookhaven Goniometer-based, Static Light Scattering Apparatus
- Perkin-Elmer BUV40XW0 UV-Visible Absorbance Spectrometer
- Zeiss Axioskop2 Fluorescence microscope
- Zeiss Ultraviolet Digital Image Analysis System (contains Orca Camera, Sony 17" monitor, and Axiovision II software)
- Beckman Coulter Allegra64 Centrifuge
- Misonix, Inc. XL2020 Sonicator

Chemical Engineering Faculty

Cameron F. Abrams, PhD (*University of California, Berkeley*). Professor. Molecular simulations in biophysics and materials; receptors for insulin and growth factors; and HIV-1 envelope structure and function.

Nicolas Alvarez, PhD (*Carnegie Mellon University*). Assistant Professor. Photonic crystal defect chromatography; extensional rheology of polymer/polymer composites; surfactant/polymer transport to fluid and solid interfaces; aqueous lubrication; interfacial instabilities.

Jason Baxter, PhD (*University of California, Santa Barbara*). Professor. Solar cells, semiconductor nanomaterials, ultrafast spectroscopy.

Richard A. Cairncross, PhD (*University of Minnesota*). Associate Professor. Effects of microstructure on transport and properties of polymers; moisture transport and degradation on biodegradation on biodegradable polymers; production of biofuel.

Aaron Fafarman, PhD (*Stanford University*). Associate Professor. Photovoltaic energy conversion; solution-based synthesis of semiconductor thin films; colloidal nanocrystals; electromodulation and photomodulation spectroscopy.

Vibha Kalra, PhD (*Cornell University*). Associate Professor. Electrodes for energy storage and conversion; supercapacitors; Li-S batteries; fuel cells; flow batteries; electrospinning for nanofibers; molecular dynamics simulations; Nanotechnology, polymer nanocomposites.

Kenneth K.S. Lau, PhD (*Massachusetts Institute of Technology*) *Associate Department Head*. Professor. Surface science; nanotechnology; polymer thin films and coatings; chemical vapor deposition.

Raj Mutharasan, PhD (*Drexel University*) *Frank A. Fletcher Professor*. Biochemical engineering; cellular metabolism in bioreactors; biosensors.

Giuseppe R. Palmese, PhD (*University of Delaware*). George B Francis Professor. Reacting polymer systems; nanostructured polymers; radiation processing of materials; composites and interfaces.

Joshua Snyder, PhD (*Johns Hopkins University*). Assistant Professor. Electrocatalysis (energy conversion/storage); heterogeneous catalysis corrosion (dealloying nanoporous metals); interfacial electrochemical phenomena in nanostructured materials; colloidal synthesis.

Masoud Soroush, PhD (*University of Michigan*). Professor. Process systems engineering; polymer engineering.

John H. Speidel, BSHE, MCHE (*University of Delaware; Illinois Institute of Technology*). Teaching Professor. Chemical process safety; process design engineering.

Maureen Tang, PhD (*University of California, Berkeley*). Assistant Professor. Batteries and fuel cells; nonaqueous electrochemistry; charge transport at interfaces.

Michael Walters, PhD (*Drexel University*). Assistant Teaching Professor. Undergraduate laboratory.

Stephen P. Wrenn, PhD (*University of Delaware*). Professor. Biomedical engineering; biological colloids; membrane phase behavior and cholesterol transport.

Emeritus Faculty

Charles B. Weinberger, PhD (*University of Michigan*). Professor Emeritus. Suspension rheology; fluid mechanics of multi-phase systems.

Civil Engineering

Major: Civil Engineering

Degree Awarded: Master of Science in Civil Engineering (MSCE) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MSCE); 90.0 (PhD)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 14.0801

Standard Occupational Classification (SOC) code: 17-2015

About the Program

Objectives

The graduate program in civil engineering offers students the opportunity to develop a more fundamental and complete understanding of the principles that govern their field as well as current design methodology. Students are encouraged to be innovative and imaginative in their quest for recognizing, stating, analyzing, and solving engineering problems.

The goal of the Master's program is to develop technical depth of expertise for a professional career in the planning, design, construction, and operation of large-scale infrastructure systems, built facilities, and water resources management. The goal of the PhD program is to develop the abilities to discover, pursue, and apply basic knowledge. PhD recipients are prepared to engage in teaching and research or in an industrial career in the development of new concepts and innovative systems.

General Information

The civil engineering programs comprise the following areas of specialization: building systems, geotechnical engineering, hydraulic and coastal engineering, structural engineering, and water resources.

For more information, visit the Department of Civil, Architectural and Environmental Engineering (<https://drexel.edu/engineering/academics/departments/civil-architectural-environmental-engineering/>) web page.

Admission Requirements

MS admission is based on an academic record demonstrating adequate preparation and potential for successful graduate study. This typically includes a BS from an engineering curriculum accredited by the Accrediting Board for Engineering and Technology (ABET) or the equivalent from a non-U.S. institution. Submission of results from the Graduate Record Exam (GRE) is required. A grade point average (GPA) of 3.0 is usually required. Graduates who do not have a bachelor's degree in either Civil, Architectural or Environmental Engineering may be required to take preparatory undergraduate courses.

For additional information on how to apply, visit Drexel's Admissions page for Civil Engineering (<http://www.drexel.edu/grad/programs/coe/civil-engineering/>).

Master of Science in Civil Engineering

The programs of study at the master's level continue the specialization developed at the senior level of the undergraduate program or newly developed interests. The Master of Science in Civil Engineering program may be elected by graduates of ABET-accredited undergraduate programs in civil engineering and related fields. Admission and prerequisites are determined on the basis of a student's undergraduate transcript.

Most MSCE graduates work as professional engineers in consulting firms, industry, or governmental agencies. A number of our graduates have started consulting and construction firms in the Philadelphia area and have been very successful. Other former students hold prominent positions in public utilities, local government agencies, and industry.

The full-time graduate academic program is closely associated with the research efforts of the faculty. Full-time master's degree candidates are encouraged to base their master's thesis on some aspect of faculty research. The one-to-one relationship between student and faculty member provides an invaluable learning experience. The General (Aptitude) Test of the Graduate Record Examination (GRE) is required for applicants pursuing full-time study.

The master's degree requires a total of 45.0 credits, of which 24.0 credits must be in the major field of interest and 6.0 credits are to fulfill math requirements. The remaining credits are taken as electives in related areas. The choice of core and elective courses is made in consultation with the student's graduate advisor.

Areas of concentration include:

- Structural
- Geotechnical/geoenvironmental/geosynthetics
- Water resources

Geotechnical/Geosynthetic Engineering Requirements

Required Cross-Cutting Courses

CIVE 605	Advanced Mechanics Of Material *	3.0
ENVE 555	Geographic Information Systems	3.0
or CIVE 615	Infrastructure Condition Evaluation	
ENVE 571	Environmental Life Cycle Assessment	3.0
ENVE 750	Data-based Engineering Modeling	3.0
or ENVE 727	Risk Assessment	
or ENVE 865	Benefit-Cost Analysis for Infrastructure	

Required Theme Courses *

CIVE 632	Advanced Soil Mechanics	3.0
CIVE 635	Slope Stability and Landslides	3.0
or CIVE 838	Soil Behavior	
CIVE 640	Environmental Geotechnics	3.0
or CIVE 650	Geosynthetics I	
CIVE 730	Experimental Soil Mechanics I	3.0
or CIVE 731	Experimental Soil Mechanics II	
or CIVE 651	Geosynthetics II	

Technical Elective Courses 12.0

These courses must be approved by the student's advisor and the graduate advisor.
 Select from any of the following that were not already counted for credit.

CIVE 530	Geotechnical Engineering for Highways	
CIVE 531	Advanced Foundation Engineering	
CIVE 542	Incorporating Sustainability Principles in Design	
CIVE 615	Infrastructure Condition Evaluation	
CIVE 635	Slope Stability and Landslides	
CIVE 636	Ground Modification	
CIVE 640	Environmental Geotechnics	
CIVE 650	Geosynthetics I	
CIVE 651	Geosynthetics II	
CIVE 562	Introduction to Groundwater Hydrology	
CIVE 730	Experimental Soil Mechanics I	
CIVE 731	Experimental Soil Mechanics II	
CIVE 833	Earth Retaining Structures	
CIVE 838	Soil Behavior	
ENVE 555	Geographic Information Systems	
ENVE 727	Risk Assessment	
ENVE 750	Data-based Engineering Modeling	
MATH 520	Numerical Analysis I	
MATH 521	Numerical Analysis II	
MEM 591	Applied Engr Analy Methods I	
MEM 592	Applied Engr Analy Methods II	
MEM 660	Theory of Elasticity I	
MEM 663	Continuum Mechanics	
MEM 664	Introduction to Plasticity	
MEM 681	Finite Element Methods I	
MEM 682	Finite Element Methods II	

Electives or Thesis ** 9.0

Total Credits 45.0

- * Must achieve grade of B or better.
- ** For students writing an M.S. thesis, these nine credits should consist of six research credits (CIVE 997) and three thesis credits (CIVE 898). Full time Masters students are encouraged to do a thesis. Students opting not to do a thesis will be required to complete an additional 9.0 elective credits from the list above, therefore, the total elective credits required will be 21.

Structural Engineering Requirements

Required Cross-Cutting Courses

CIVE 605	Advanced Mechanics Of Material *	3.0
ENVE 555	Geographic Information Systems	3.0
or CIVE 615	Infrastructure Condition Evaluation	
ENVE 571	Environmental Life Cycle Assessment	3.0
ENVE 750	Data-based Engineering Modeling	3.0
or ENVE 727	Risk Assessment	
or ENVE 865	Benefit-Cost Analysis for Infrastructure	

Required Theme Courses *

CIVE 701	Structural Analysis I	3.0
CIVE 702	Structural Analysis II	3.0
CIVE 703	Structural Analysis III	3.0

CIVE 801	Dynamics of Structures I	3.0
----------	--------------------------	-----

Technical Elective Courses 12.0

These courses must be approved by the student's advisor and the graduate advisor.
 Select from any of the following that were not already counted for credit.

AE 510	Intelligent Buildings	
AE 561	Airflow Simulation in Built Environment	
CIVE 510	Prestressed Concrete	
CIVE 520	Advanced Concrete Technology	
CIVE 531	Advanced Foundation Engineering	
CIVE 540	Forensic Structural Engineering	
CIVE 542	Incorporating Sustainability Principles in Design	
CIVE 615	Infrastructure Condition Evaluation	
CIVE 704	Behavior and Stability of Structural Members I	
CIVE 705	Behavior and Stability of Structural Members II	
CIVE 711	Engineered Masonry I	
CIVE 714	Behavior of Concrete Structures I	
ENVE 727	Risk Assessment	
ENVE 555	Geographic Information Systems	
ENVE 750	Data-based Engineering Modeling	
MATH 520	Numerical Analysis I	
MATH 521	Numerical Analysis II	
MEM 591	Applied Engr Analy Methods I	
MEM 660	Theory of Elasticity I	
MEM 663	Continuum Mechanics	
MEM 664	Introduction to Plasticity	
MEM 681	Finite Element Methods I	
MEM 682	Finite Element Methods II	

Electives or Thesis ** 9.0

Total Credits 45.0

- * Must achieve grade of B or better.
- ** For students writing an M.S. thesis, these nine credits should consist of six research credits (CIVE 997) and three thesis credits (CIVE 898). Full time Masters students are encouraged to do a thesis. Students opting not to do a thesis will be required to complete an additional 9.0 elective credits from the list above, therefore, the total elective credits required will be 21.

Water Resources Engineering Requirements

Required Cross-Cutting Courses

CIVE 664	Open Channel Hydraulics *	3.0
ENVE 555	Geographic Information Systems	3.0
or CIVE 615	Infrastructure Condition Evaluation	
ENVE 571	Environmental Life Cycle Assessment	3.0
ENVE 750	Data-based Engineering Modeling	3.0
or ENVE 727	Risk Assessment	
or ENVE 865	Benefit-Cost Analysis for Infrastructure	

Required Theme Courses *

CIVE 565	Urban Ecohydraulics	3.0
ENVE 681	Analytical and Numerical Techniques in Hydrology	3.0
or CIVE 567	Watershed Analysis	
ENVE 665	Hazardous Waste & Groundwater Treatment	3.0
or CIVE 564	Sustainable Water Resource Engineering	
ENVS 501	Chemistry of the Environment	3.0

Technical Elective Courses 12.0

These courses must be approved by the student's advisor and the graduate advisor.

Select from any of the following that were not already counted for credit.

CIVE 562	Introduction to Groundwater Hydrology	
CIVE 564	Sustainable Water Resource Engineering	

CIVE 567	Watershed Analysis	
CIVE 615	Infrastructure Condition Evaluation	
ENVE 555	Geographic Information Systems	
ENVE 660	Chemical Kinetics in Environmental Engineering	
ENVE 661	Env Engr Op-Chem & Phys	
ENVE 665	Hazardous Waste & Groundwater Treatment	
ENVE 727	Risk Assessment	
ENVE 750	Data-based Engineering Modeling	
ENVE 865	Benefit-Cost Analysis for Infrastructure	
Electives or Thesis **		9.0
Total Credits		45.0

* Must achieve grade of B or better.

** For students writing an M.S. thesis, these nine credits should consist of six research credits (CIVE 997) and three thesis credits (CIVE 898). Full time Masters students are encouraged to do a thesis. Students opting not to do a thesis will be required to complete an additional 9.0 elective credits from the list above, therefore, the total elective credits required will be 21.

Dual graduate degrees are possible. Among the more popular programs are combining the MS in Civil Engineering with an MS in Environmental Engineering, or Engineering Management. The required credits must meet all civil engineering program requirements and will be determined on the basis of the student's proposed program of study.

Sample Plan of Study

Geotechnical/Geosynthetic Engineering

Term	Credits
Term 1	
CIVE 605	Advanced Mechanics Of Material 3.0
CIVE 615	Infrastructure Condition Evaluation 3.0
Theme elective	3.0
Term Credits	9.0
Term 2	
ENVE 727	Risk Assessment 3.0
Theme electives	6.0
Term Credits	9.0
Term 3

Term Credits	9.0
Term 6	
ENVE 665	Hazardous Waste & Groundwater Treatment 3.0
Theme elective or Thesis credit	3.0
Term Credits	6.0
Total Credit:	45.0

PhD in Civil Engineering

The PhD degree is awarded for original research on a significant civil engineering problem. Graduate students who have completed their MS degrees work closely with individual faculty members (see Faculty Research Interests below). PhD dissertation research is usually supported by a research grant from a government agency or an industrial contract.

The full-time graduate academic program is closely associated with the research efforts of the faculty. The General (Aptitude) Test of the Graduate Record Examination (GRE) is required for applicants pursuing full-time study.

Doctoral students normally take at least 45.0 credits, including research credits, beyond the master's degree requirements. Full-time residency for one continuous academic year is required for the PhD degree to ensure students the opportunity for intellectual association with other scholars. Many doctoral students take two, three, or four years of full-time graduate study to complete their degrees. Involvement in the teaching activity of the Civil, Architectural and Environmental Engineering Department is required of all PhD applicants.

After approximately one year of study beyond the master's degree, doctoral students take a candidacy examination, consisting of written and oral parts. Each PhD candidate is supervised by a major professor and a doctoral committee chaired by the major professor.

PhD candidates submit a detailed proposal for dissertation research to the doctoral committee. The students then take a proposal examination; successful completion of this examination is required to become a PhD candidate. After approval of the proposal, the committee meets from time to time to review the progress of the research. The dissertation must be submitted to the doctoral committee at least 90 days before the graduation date. The committee schedules and conducts a final oral examination before approval of the dissertation.

Areas of research include:

- Structural
- Geotechnical/geoenvironmental/geosynthetics
- Water resources
- Sustainable engineering
- Building systems/energy

Dual Degree Programs

Civil Engineering students may find it useful to pursue dual MS degrees. Such programs have been pursued in concert with Environmental Engineering/Science, Mechanical Engineering, Information Studies and Engineering Management. A dual degree student must complete the required coursework for each degree. Depending upon the concentration, up to 15.0 credits from another program may count as electives for the MSCE with the advisor's approval. The student is responsible for obtaining approval of MSCE courses that apply to the second degree.

Bachelor's/Master's Dual Degree Program

Exceptional undergraduate students can also pursue a master of science degree in the same period as the bachelor of science. Many students deepen their knowledge with a Master's degree in Civil Engineering, while others have broadened their knowledge with a Master's degree in related areas such as Environmental Science, Engineering Management, Software Engineering and Information Technology.

For more information about this program, visit the Department's BS/MS Dual Degree Program (<https://drexel.edu/engineering/academics/departments/civil-architectural-environmental-engineering/academic-programs/undergraduate/accelerated-and-dual-degree-programs/>) web page.

Facilities

Construction Materials Laboratory

This laboratory contains facilities for the study of concrete, asphalt, mortar, soil-cement, and timber materials, and moist cure facilities.

Geosynthetics Laboratory

This laboratory contains a complete suite of physical, mechanical, hydraulic, endurance, and environmental test devices for assessing behavior of geotextiles, geogrids, geonets, geomembranes, and geocomposites.

HVAC and Refrigeration Laboratory

This laboratory contains complete models of heating, ventilation, air conditioning, refrigeration, and pumping system models.

Hydromechanics Laboratory

This laboratory contains a wave channel tilting flume, pipe friction equipment, bench demonstration equipment, and a beach erosion model.

Soil Mechanics and Geoenvironmental Laboratory

This laboratory contains triaxial and direct shear equipment, controlled environmental chambers, consolidation tests, flexwall permeameters, and a test bed.

Structural Testing Laboratory

This laboratory contains universal testing machines with 150,000- and 300,000-pound capacity and test beds with MTS dynamic load equipment.

Civil, Architectural and Environmental Engineering Faculty

Abieyuwa Aghayere, PhD (*University of Alberta*). Professor. Structural design - concrete, steel and wood; structural failure analysis; retrofitting of existing structures; new structural systems and materials; engineering education.

Ivan Bartoli, PhD (*University of California, San Diego*). Associate Professor. Non-destructive evaluation and structural health monitoring; dynamic identification, stress wave propagation modeling.

Robert Brehm, PhD (*Drexel University*). Teaching Professor. International infrastructure delivery; response to natural catastrophes; risk assessment and mitigation strategies; project management techniques.

Shannon Capps, PhD (*Georgia Institute of Technology*). Assistant Professor. Atmospheric chemistry; data assimilation; advanced sensitivity analysis; inverse modeling.

S.C. Jonathan Cheng, PhD (*West Virginia University*). Associate Professor. Soil mechanics; geosynthetics; geotechnical engineering; probabilistic design; landfill containments; engineering education.

Eugenia Ellis, PhD (*Virginia Polytechnic Institute and State University*). Associate Professor. Natural and electric light sources and effects on biological rhythms and health outcomes; ecological strategies for smart, sustainable buildings of the nexus of health, energy and technology.

Yaghoob (Amir) Farnam, PhD (*Purdue University*). Assistant Professor. Advanced and sustainable infrastructure materials; multifunctional, self-responsive and bioinspired construction materials; advanced multiscale manufacturing; characterization, and evaluation of construction materials; durability of cement-based materials.

Patricia Gallagher, PhD (*Virginia Polytechnic Institute and State University*). Professor. Geotechnical and geoenvironmental engineering; soil improvement; recycled materials in geotechnics.

Patrick Gurian, PhD (*Carnegie-Mellon University*). Professor. Risk analysis of environmental and infrastructure systems; novel adsorbent materials; environmental standard setting; Bayesian statistical modeling; community outreach and environmental health.

Charles N. Haas, PhD (*University of Illinois-Urbana*) *L. D. Betz Chair Professor of Environmental Engineering and Department Head, Civil, Architectural and Environmental Engineering*. Professor. Water treatment; risk assessment; bioterrorism; environmental modeling and statistics; microbiology; environmental health.

Ahmad Hamid, PhD (*McMaster University*). Professor. Engineered masonry; seismic behavior, design and retrofit of masonry structures; development of new materials and building systems.

Simi Hoque, PhD (*University of California - Berkeley*). Associate Professor. Computational methods to reduce building energy and environmental impacts, urban metabolism, thermal comfort, climate resilience.

Y. Grace Hsuan, PhD (*Imperial College*). Professor. Durability of polymeric construction materials; advanced construction materials; and performance of geosynthetics.

Joseph B. Hughes, PhD (*University of Iowa*) *Distinguished University Professor*. Biological processes and applications of nanotechnology in environmental systems.

L. James Lo, PhD (*University of Texas at Austin*). Assistant Professor. Architectural fluid mechanics; building automation and autonomy; implementation of natural and hybrid ventilation in buildings; airflow distribution in buildings; large-scale air movement in an urban built environment; building and urban informatics; data-enhanced sensing and control for optimal building operation and management; novel data gathering methods for building/urban problem solving; interdisciplinary research on occupant behaviors in the built environment.

Roger Marino, PhD (*Drexel University*). Associate Teaching Professor. Engineering education; land development; product Development

Joseph P. Martin, PhD (*Colorado State University*). Professor. Geotechnical and geoenvironmental engineering; hydrology; transportation; waste management.

James E. Mitchell, MArch (*University of Pennsylvania*). Professor. Architectural engineering design; building systems; engineering education.

Franco Montalto, PhD (*Cornell University*). Professor. Effects of built infrastructure on societal water needs, ecohydrologic patterns and processes, ecological restoration, green design, and water interventions.

Nariman Mostafavi, PhD (*University of Massachusetts - Amherst*). Assistant Teaching Professor. Simulation tools for analyzing urban

metabolism; environmentally responsive design; urban resilience; engineering economics; industrial ecology.

Joseph V. Mullin, PhD (*Pennsylvania State University*) *Associate Department Head*. Teaching Professor. Structural engineering; failure analysis; experimental stress analysis; construction materials; marine structures.

Mira S. Olson, PhD (*University of Virginia*). Associate Professor. Peace engineering; source water quality protection and management; contaminant and bacterial fate and transport; community engagement.

Miguel A. Pando, PhD (*Virginia Polytechnic Institute and State University*). Assistant Professor. Laboratory testing of geomaterials; geotechnical aspects of natural hazards; soil-structure-interaction; geotechnical engineering.

Michael Ryan, PhD (*Drexel University*) *Associate Department Head of Graduate Studies*. Assistant Teaching Professor. Microbial Source Tracking (MST); Quantitative Microbial Risk Assessment (QMRA); dynamic engineering systems modeling; molecular microbial biology; phylogenetics; metagenomics; bioinformatics; environmental statistics; engineering economics; microbiology; potable and waste water quality; environmental management systems.

Christopher Sales, PhD (*University of California, Berkeley*). Associate Professor. Environmental microbiology and biotechnology; biodegradation of environmental contaminants; microbial processes for energy and resource recovery from waste; application of molecular biology, analytical chemistry and bioinformatic techniques to study environmental biological systems.

Yared Shifferaw, PhD (*Johns Hopkins University*). Assistant Professor. Computational and experimental mechanics; structural stability; optimization; health monitoring and hazard mitigation; sustainable structures; emerging materials; thin-walled structures and metallic structures.

Kurt Sjoblom, PhD (*Massachusetts Institute of Technology*). Assistant Professor. Laboratory testing of geomaterials, geotechnical engineering, foundation engineering.

Sabrina Spatari, PhD (*University of Toronto*). Associate Professor. Industrial ecology; development and application of life cycle assessment (LCA) and material flow analysis (MFA) methods for guiding engineering and policy decisions; specific interest in biomass and bioenergy, biofuels, and urban infrastructure.

Robert Swan Associate Teaching Professor. Geotechnical and Geosynthetic Engineering; soil/geosynthetic interaction and performance; laboratory and field geotechnical/geosynthetic testing.

Michael Waring, PhD (*University of Texas-Austin*) *Associate Department Head for Undergraduate Programs; Director of Architectural Engineering Program*. Associate Professor. Indoor air quality and building sustainability; indoor particulate matter fate and transport; indoor chemistry and particle formation; secondary impacts of control technologies and strategies.

Jin Wen, PhD (*University of Iowa*). Associate Professor. Architectural engineering; Building Energy Efficiency; Intelligent Building; Net-zero Building; and Indoor Air Quality.

Aspasia Zerva, PhD (*University of Illinois*). Professor. Earthquake engineering; mechanics; seismology; structural reliability; system

identification; advanced computational methods in structural analysis.

Emeritus Faculty

Harry G. Harris, PhD (*Cornell University*). Professor Emeritus. Structural models; dynamics of structures, plates and shells; industrialized building construction.

Richard Weggel, PhD (*University of Illinois*) *Samuel S. Baxter Professor Emeritus; Civil and Environmental Engineering*. Professor Emeritus. Coastal engineering; hydraulics engineering; hydrology.

Richard Woodring, PhD (*University of Illinois*) *Dean of Engineering Emeritus*. Professor Emeritus. Structural engineering, reinforced concrete.

Computer Engineering

Major: Computer Engineering

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS); 90.0 (PhD)

Co-op Option: Available for full-time on-campus master's-level students

Classification of Instructional Programs (CIP) code: 14.0901

Standard Occupational Classification (SOC) code: 15-1132; 15-1133; 15-1143; 17-2031

About the Program

The computer engineering curriculum is designed to: (1) address the needs of students with a variety of different backgrounds; (2) ensure that graduates will have adequate knowledge and skills in at least one area of specialization; (3) meet the immediate needs of working students as well as to adequately prepare full-time students for a real-world technological environment; and (4) equip students with tools to grasp and develop new technologies and trends.

The Master of Science in Computer Engineering degree requires a minimum of 45.0 approved credits chosen in accordance with a plan of study arranged in consultation with the student's advisor and the departmental graduate advisor. Up to but not exceeding 9.0 research/thesis credits may be taken by students who choose to write a master's thesis. Students who elect a non-thesis option are also encouraged to engage in research, by registering for supervised research credits (not to exceed 9.0 credits).

Students within the Master of Science in Computer Engineering are eligible to take part in the Graduate Coop Program, which combines classroom coursework with a 6-month, full-time work experience. For more information, visit the Steinbright Career Development Center's website (<http://www.drexel.edu/scdc/co-op/graduate/>).

For more information, visit the Department of Electrical and Computer Engineering (<https://drexel.edu/engineering/academics/departments/electrical-computer-engineering/>) web site.

Admission Requirements

Applicants should have an undergraduate degree equivalent to a US bachelor's degree in computer engineering, computer science, or electrical engineering. Students holding degrees in other engineering and science disciplines with appropriate coursework or training will also be considered.

Appropriate coursework includes experience with all of the following: Software (advanced programming and operating systems); Computer Architecture (digital systems design, computer organization and architecture); Algorithms and Data Structures; Computer Networks. Students must have a minimum 3.0 GPA (on a 4.0 scale) for the last two years of undergraduate studies, as well as for any subsequent graduate-level work.

The GRE General Test is required of applicants to full-time MS and PhD programs. Students whose native language is not English and who do not hold a degree from a US institution must take the Test of English as a Foreign Language (TOEFL).

For additional information on how to apply, visit Drexel's Admissions page for Computer Engineering (<http://www.drexel.edu/grad/programs/coe/computer-engineering/>).

Degree Requirements (MS)

The Master of Science in Computer Engineering curriculum encompasses 45.0 approved credit hours, chosen in accordance with the following requirements and a plan of study arranged with the departmental graduate advisor in consultation with the student's research advisor, if applicable. Before the end of the first quarter in the Department of Electrical and Computer Engineering, for a full-time student, or by the end of the first year for a part-time student, said plan of study must be filed and approved with the departmental graduate advisor.

A total of at least 30.0 credit hours must be taken from among the graduate course offerings of the Department of Electrical and Computer Engineering. These credits must be taken at Drexel University. No transfer credit may be used to fulfill these requirements, regardless of content equivalency.

The remaining courses needed to reach the minimum credit hour requirement for the degree program are considered elective courses. Elective courses can be chosen from among the graduate course offerings of the Department of Electrical and Computer Engineering; other departments within the College of Engineering; the School of Biomedical Science, Engineering and Health Systems; the Department of Mathematics; the Department of Physics; the Department of Chemistry, the Department of Biology, and the Department of Computer Science. In order to have courses outside of these departments and schools count towards degree completion, they must be approved by the departmental graduate advisors prior to registration for said courses.

Please note that ECEC 500 *Fundamentals of Computer Hardware* and ECEC 600 *Fundamentals of Computer Networks* do **not** count toward the credit requirements to complete the MS in Electrical Engineering degree program.

Computer Engineering (ECEC) Courses	21.0
General Electrical and Computer Engineering (ECEC, ECEE, ECEP, ECES, ECET) Courses	9.0
Elective Courses	15.0
Total Credits	45.0

Options for Degree Fulfillment

Although not required, students are encouraged to complete a Master's Thesis as part of the MS studies. Those students who choose the thesis option may count up to 9.0 research/thesis credits as part of their required credit hour requirements.

Students may choose to participate in the Graduate Co-Op Program working on curriculum related projects. Graduate Co-op enables graduate students to alternate class terms with a six-month period of hands-on experience, gaining access to employers in their chosen industries. Whether co-op takes students throughout the United States or abroad, they are expanding their professional networks, enhancing their resumes, and bring that experience back to the classroom and their peers.

For more information on curricular requirements, visit the Department of Electrical and Computer Engineering (<http://drexel.edu/ece/>)' (<http://www.ece.drexel.edu/>)s web site.

PhD in Electrical Engineering

General Requirements

The following general requirements must be satisfied in order to complete the PhD in Electrical Engineering:

- 90.0 credit hours total
- candidacy examination
- research proposal
- dissertation defense

Students entering with a master's degree in electrical or computer engineering or a related field will be considered a post-masters PhD student and will only be required to complete a total of 45.0 credit hours, in accordance with University policy.

Curriculum

Appropriate coursework is chosen in consultation with the student's research advisor. A plan of study must be developed by the student to encompass the total number of required credit hours. Both the departmental graduate advisor and the student's research advisor must approve this plan.

Candidacy Examination

The candidacy examination explores the depth of understanding of the student in his/her specialty area. The student is expected to be familiar with, and be able to use, the contemporary tools and techniques of the field and to demonstrate familiarity with the principal results and key findings.

The student, in consultation with his/her research advisor, will declare a principal technical area for the examination. The examination includes the following three parts:

- A self-study of three papers from the archival literature in the student's stated technical area, chosen by the committee in consultation with the student.
- A written report (15 pages or less) on the papers, describing their objectives, key questions and hypotheses, methodology, main results and conclusions. Moreover, the student must show in an appendix independent work he/she has done on at least one of the papers – such as providing a full derivation of a result or showing meaningful examples, simulations or applications.
- An oral examination which takes the following format:
 - A short description of the student's principal area of interest (5 minutes, by student).

- A review of the self-study papers and report appendix (25-30 minutes, by students).
- Questions and answers on the report, the appendix and directly related background (40-100 minutes, student and committee).

In most cases, the work produced during the candidacy examination will be a principal reference for the student's PhD dissertation; however, this is not a requirement.

Research Proposal

Each student, after having attained the status of PhD Candidate, must present a research proposal to a committee of faculty and industry members, chosen with his/her research advisor, who are knowledgeable in the specific area of research. This proposal should outline the specific intended subject of study; i.e., it should present a problem statement, pertinent background, methods of study to be employed, expected difficulties and uncertainties and the anticipated form, substance and significance of the results.

The purpose of this presentation is to verify suitability of the dissertation topic and the candidate's approach, and to obtain the advice and guidance of oversight of mature, experienced investigators. It is not to be construed as an examination, though approval by the committee is required before extensive work is undertaken. The thesis proposal presentation must be open to all; announcements regarding the proposal presentation must be made in advance.

The thesis advisory committee will have the sole responsibility of making any recommendations regarding the research proposal. It is strongly recommended that the proposal presentation be given as soon as possible after the successful completion of the candidacy examination.

Dissertation Defense

Dissertation Defense procedures are described on the Graduate College's webpage (<http://drexel.edu/graduatecollege/academics/thesis-and-dissertation/>). The student must be a PhD candidate for at least one year before he/she can defend his/her doctoral thesis.

Dual Degree

The ECE Department offers outstanding students the opportunity to receive two diplomas (BS and MS) at the same time. The program requires five (5) years to complete. BSMS applicants, who represent some of the best undergraduates students in the department, can work with faculty members on research projects and also have the option to pursue MS Thesis. This program prepares individuals for careers in research and development; many of its past graduates continued their studies toward a PhD.

For more information on eligibility and academic requirements, visit the Engineering Combined BS/MS (<http://drexel.edu/ece/academics/undergrad/bs-ms/>) page.

Facilities

Drexel University and the Electrical and Computer Engineering Department are nationally recognized for a strong history of developing innovative research. Research programs in the ECE Department prepare students for careers in research and development, and aim to endow graduates with the ability to identify, analyze, and address new technical and scientific challenges. The ECE Department is well equipped

with state-of-the-art facilities in each of the following ECE Research laboratories:

Research Laboratories at the ECE Department

Adaptive Signal Processing and Information Theory Research Group

The Adaptive Signal Processing and Information Theory Research Group conducts research in the area of signal processing and information theory. Our main interests are belief/expectation propagation, turbo decoding and composite adaptive system theory. We are currently doing projects on the following topics:

- Delay mitigating codes for network coded systems
- Distributed estimation in sensor networks via expectation propagation
- Turbo speaker identification
- Performance and convergence of expectation propagation
- Investigating bounds for SINR performance of autocorrelation based channel shorteners

Applied Networking Research Lab

Applied Networking Research Lab (ANRL) projects focus on modeling and simulation as well as experimentation in wired, wireless and sensor networks. ANRL is the home of MuTANT, a Multi-Protocol Label Switched Traffic Engineering and Analysis Testbed composed of 10 high-end Cisco routers and several PC-routers, also used to study other protocols in data networks as well as automated network configuration and management. The lab also houses a sensor network testbed.

Bioimage Laboratory

Uses computer gaming hardware for enhanced and affordable 3-D visualization, along with techniques from information theory and machine learning to combine the exquisite capabilities of the human visual system with computational sensing techniques for analyzing vast quantities of image sequence data.

Data Fusion Laboratory

The Data Fusion Laboratory investigates problems in multisensory detection and estimation, with applications in robotics, digital communications, radar, and target tracking. Among the projects in progress: computationally efficient parallel distributed detection architectures, data fusion for robot navigation, modulation recognition and RF scene analysis in time-varying environments, pattern recognition in biological data sequences and large arrays, and hardware realizations of data fusion architectures for target detection and target tracking.

Drexel Network Modeling Laboratory

The Drexel Network Modeling Laboratory investigates problems in the mathematical modeling of communication networks, with specific focus on wireless ad hoc networks, wireless sensor networks, and supporting guaranteed delivery service models on best effort and multipath routed networks. Typical methodologies employed in our research include mathematical modeling, computer simulation, and performance optimization, often with the end goal of obtaining meaningful insights into network design principles and fundamental performance tradeoffs.

Drexel University Nuclear Engineering Education Laboratory

The field of nuclear engineering encompasses a wide spectrum of occupations, including nuclear reactor design, medical imaging,

homeland security, and oil exploration. The Drexel University Nuclear Engineering Education Laboratory (DUNEEL) provides fundamental hands on understanding for power plant design and radiation detection and analysis. Software based study for power plant design, as well as physical laboratory equipment for radiation detection, strengthen the underlying concepts used in nuclear engineering such that the student will comprehend and appreciate the basic concepts and terminology used in various nuclear engineering professions. Additionally, students use the laboratory to develop methods for delivering remote, live time radiation detection and analysis. The goal of DUNEEL is to prepare students for potential employment in the nuclear engineering arena.

Drexel VLSI Laboratory

The Drexel VLSI Laboratory investigates problems in the design, analysis, optimization and manufacturing of high performance (low power, high throughput) integrated circuits in contemporary CMOS and emerging technologies. Suited with industrial design tools for integrated circuits, simulation tools and measurement beds, the VLSI group is involved with digital and mixed-signal circuit design to verify the functionality of the discovered novel circuit and physical design principles. The Drexel VLSI laboratory develops design methodologies and automation tools in these areas, particularly in novel clocking techniques, featuring resonant clocking, and interconnects, featuring wireless interconnects.

Drexel Wireless Systems Laboratory

The Drexel Wireless Systems Laboratory (DWSL) contains an extensive suite of equipment for constructing, debugging, and testing prototype wireless communications systems. Major equipment within DWSL includes:

- software defined radio network testbeds for rapidly prototyping new communications and network systems,
- electromagnetic anechoic chamber and reverberation chambers for testing new wireless technologies,
- experimental cell tower for field testing new wireless technologies.

The lab is also equipped with network analyzers, high speed signal generators, oscilloscopes, and spectrum analyzers as well as several Zigbee development platforms for rapidly prototyping sensor networks. The lab offers laboratory coursework in wireless network security, collaborative intelligent radio networks, and fundamental analog and digital communication systems.

Ecological and Evolutionary Signal-processing and Informatics Laboratory

The Ecological and Evolutionary Signal-processing and Informatics Laboratory (EESI) seeks to solve problems in high-throughput genomics and engineer better solutions for biochemical applications. The lab's primary thrust is to enhance the use of high-throughput DNA sequencing technologies with pattern recognition and signal processing techniques. Applications include assessing the organism content of an environmental sample, recognizing/classifying potential and functional genes, inferring environmental factors and inter-species relationships, and inferring microbial evolutionary relationships from short-read DNA/RNA fragments. The lab also investigates higher-level biological systems such as modeling and controlling chemotaxis, the movement of cells.

Electric Power Engineering Center

This newly established facility makes possible state-of-the-art research in a wide variety of areas, ranging from detailed theoretical model

study to experimental investigation in its high voltage laboratories. The mission is to advance and apply scientific and engineering knowledge associated with the generation, transmission, distribution, use, and conservation of electric power. In pursuing these goals, this center works with electric utilities, state and federal agencies, private industries, nonprofit organizations and other universities on a wide spectrum of projects. Research efforts, both theoretical and experimental, focus on the solution of those problems currently faced by the electric power industry. Advanced concepts for electric power generation are also under investigation to ensure that electric power needs will be met at the present and in the future.

Electronic Design Automation Facility

Industrial-grade electronic design automation software suite and integrated design environment for digital, analog and mixed-signal systems development. Field Programmable Gate Array (FPGA) development hardware. Most up-to-date FPGA/embedded system development hardware kits. Printed circuit board production facility. Also see Drexel VLSI Laboratory.

Microwave-Photonics Device Laboratories

The laboratory is equipped with test and measurement equipment for high-speed analog and digital electronics and fiber optic systems. The test equipment includes network analyzers from Agilent (100kHz- 1.3 GHz and 45 Mhz-40 GHz), and Anritsu (45 MHz-6 GHz); spectrum analyzers from Tektronix, HP, and Agilent with measurement capability of DC to 40 GHz and up to 90 GHz using external mixers; signal generators and communication channel modulators from HP, Rhode-Schwartz, Systron Donner, and Agilent; microwave power meter and sensor heads, assortment of passive and active microwave components up to 40 GHz ; data pattern generator and BER tester up to 3Gb/s; optical spectrum analyzer from Anritsu and power meters from HP; single and multimode fiber optic based optical transmitter and receiver boards covering ITU channels at data rates up to 10Gb/s; passive optical components such as isolator, filter, couplers, optical connectors and fusion splicer; LPKF milling machine for fabrication of printed circuit boards; wire-bonding and Cascade probe stations; Intercontinental test fixtures for testing of MMIC circuits and solid-state transistors; state-of-the-art microwave and electromagnetic CAD packages such as Agilent ADS, ANSYS HFSS, and COMSOL multi-physics module.

Multimedia & Information Security Lab [MISL]

The Multimedia and Information Security Lab (MISL) develops algorithms to detect fake images and videos, along with algorithms to determine the true source an image or video. This research is particularly important because widely available editing software enables multimedia forgers to create perceptually realistic forgeries. Our goal at MISL, is to conduct research that provides information verification and security in scenarios when an information source cannot be trusted.

The research conducted at MISL is part of a new area, known as multimedia forensics, which lies at the intersection of many areas in machine learning and artificial intelligence, signal processing, image and video processing, game theory, etc. Our algorithms work by identifying or learning visually imperceptible traces left in images and videos by processing operations. We use these traces to detect editing or forgery as well as to link an image or video back to the camera that captured it. We also perform research on anti-forensic operations designed to fool forensic techniques. By studying anti-forensics, researchers can

identify and address weaknesses in existing forensic techniques as well as develop techniques capable of identifying the use of anti-forensics.

Music and Entertainment Technology Laboratory

The Music and Entertainment Technology Laboratory (MET-lab) is devoted to research in digital media technologies that will shape the future of entertainment, especially in the areas of sound and music. We employ digital signal processing and machine learning to pursue novel applications in music information retrieval, music production and processing technology, and new music interfaces. The MET-lab is also heavily involved in outreach programs for K-12 students and hosts the Summer Music Technology program, a one-week learning experience for high school students. Lab facilities include a sound isolation booth for audio and music recording, a digital audio workstation running ProTools, two large multi-touch display interfaces of our own design, and a small computing cluster for distributed processing.

NanoPhotonics+ Lab

Our research is primarily in the area of nanophotonics with a focus on the nanoscale interaction of light with matter. Interests include: liquid crystal/polymer composites for gratings, lenses and HOEs; liquid crystal interactions with surfaces and in confined nanospaces; alternative energy generation through novel photon interactions; ink-jet printed conducting materials for RF and photonic applications; and the creation and development of smart textiles technologies including soft interconnects, sensors, and wireless implementations.

Opto-Electro-Mechanical Laboratory

This lab concentrates on the system integration on optics, electronics, and mechanical components and systems, for applications in imaging, communication, and biomedical research. Research areas include: Programmable Imaging with Optical Micro-electrical-mechanical systems (MEMS), in which microscopic mirrors are used to image light into a single photodetector; Pre-Cancerous Detection using White Light Spectroscopy, which performs a cellular size analysis of nuclei in tissue; Free-space Optical Communication using Space Time Coding, which consists of diffused light for computer-to-computer communications, and also tiny lasers and detectors for chip-to-chip communication; Magnetic Particle Locomotion, which showed that particles could swim in a uniform field; and Transparent Antennas using Polymer, which enables antennas to be printed through an ink-jet printer.

Plasma and Magnetics Laboratory

Research is focused on applications of electrical and magnetic technologies to biology and medicine. This includes the subjects of non-thermal atmospheric pressure plasma for medicine, magnetic manipulation of particles for drug delivery and bio-separation, development of miniature NMR sensors for cellular imaging and carbon nanotube cellular probes.

Power Electronics Research Laboratory

The Power Electronics Research Laboratory (PERL) is involved in circuit and design simulation, device modeling and simulation, and experimental testing and fabrication of power electronic circuits. The research and development activities include electrical terminations, power quality, solar photovoltaic systems, GTO modeling, protection and relay coordination, and solid-state circuit breakers. The analysis tools include EMPT, SPICE, and others, which have been modified to incorporate models of such controllable solid-state switches as SCRs, GTOs, and MOSFETs. These

programs have a wide variety and range of modeling capabilities used to model electromagnetics and electromechanical transients ranging from microseconds to seconds in duration. The PERL is a fully equipped laboratory with 42 kVA AC and 70 kVA DC power sources and data acquisition systems, which have the ability to display and store data for detailed analysis. Some of the equipment available is a distribution and HV transformer and three phase rectifiers for power sources and digital oscilloscopes for data measuring and experimental analysis. Some of the recent studies performed by the PERL include static VAR compensators, power quality of motor controllers, solid-state circuit breakers, and power device modeling which have been supported by PECO, GE, Gould, and EPRI.

Computer Engineering Faculty

Tom Chmielewski, PhD (*Drexel University*). Teaching Professor. Modeling and simulation of electro-mechanical systems; optimal, adaptive and non-linear control; DC motor control; system identification; kalman filters (smoothing algorithms, tracking); image processing; robot design; biometric technology and design of embedded systems for control applications utilizing MATLAB and SIMULINK

Fernand Cohen, PhD (*Brown University*). Professor. Surface modeling; tissue characterization and modeling; face modeling; recognition and tracking.

Andrew Cohen, PhD (*Rensselaer Polytechnic Institute*). Associate Professor. Image processing; multi-target tracking; statistical pattern recognition and machine learning; algorithmic information theory; 5-D visualization

Kapil Dandekar, PhD (*University of Texas-Austin*) *Director of the Drexel Wireless Systems Laboratory (DWSL); Associate Dean of Research, College of Engineering*. Professor. Cellular/mobile communications and wireless LAN; smart antenna/MIMO for wireless communications; applied computational electromagnetics; microwave antenna and receiver development; free space optical communication; ultrasonic communication; sensor networks for homeland security; ultrawideband communication.

Afshin Daryoush, ScD (*Drexel University*). Professor. Digital and microwave photonics; nonlinear microwave circuits; RFIC; medical imaging.

Anup Das, PhD (*University of Singapore*). Assistant Professor. Design of algorithms for neuromorphic computing, particularly using spiking neural networks, dataflow-based design of neuromorphic computing system, design of scalable computing system; hardware-software co-design and management, and thermal and power management of many-core embedded systems

Bruce A. Eisenstein, PhD (*University of Pennsylvania*). Arthur J. Rowland Professor of Electrical and Computer Engineering. Pattern recognition; estimation; decision theory.

Adam K. Fontecchio, PhD (*Brown University*) *Director, Center for the Advancement of STEM Teaching and Learning Excellence (CASTLE)*. Professor. Electro-optics; remote sensing; active optical elements; liquid crystal devices.

Gary Friedman, PhD (*University of Maryland-College Park*) *Associate Department Head for Graduate Affairs*. Professor. Biological and biomedical applications of nanoscale magnetic systems.

Allon Guez, PhD (*University of Florida*). Professor. Intelligent control systems; robotics, biomedical, automation and manufacturing; business systems engineering.

Peter R. Herczfeld, PhD (*University of Minnesota*). Professor. Lightwave technology; microwaves; millimeter waves; fiberoptic and integrated optic devices.

Leonid Hrebien, PhD (*Drexel University*). Professor. Tissue excitability; acceleration effects on physiology; bioinformatics.

Nagarajan Kandasamy, PhD (*University of Michigan*) *Associate Department Head for Undergraduate Affairs*. Associate Professor. Embedded systems, self-managing systems, reliable and fault-tolerant computing, distributed systems, computer architecture, and testing and verification of digital systems.

Youngmoo Kim, PhD (*MIT*) *Director, Expressive and Creative Interactive Technologies (ExCITE) Center*. Professor. Audio and music signal processing, voice analysis and synthesis, music information retrieval, machine learning.

Fei Lu, PhD (*University of Michigan*). Assistant Professor. Power electronics; wireless power transfer technology for the high-power electric vehicles and the low-power electronic devices.

Karen Miu, PhD (*Cornell University*). Professor. Power systems; distribution networks; distribution automation; optimization; system analysis.

Bahram Nabet, PhD (*University of Washington*). Professor. Optoelectronics; fabrication and modeling; fiber optic devices; nanoelectronics; nanowires.

Prawat Nagvajara, PhD (*Boston University*). Associate Professor. System on a chip; embedded systems; power grid computation; testing of computer hardware; fault-tolerant computing; VLSI systems; error control coding.

Dagmar Niebur, PhD (*Swiss Federal Institute of Technology*). Associate Professor. Intelligent systems; dynamical systems; power system monitoring and control.

Christopher Peters, PhD (*University of Michigan*). Teaching Professor. Nuclear reactor design; ionizing radiation detection; nuclear forensics; power plant reliability and risk analysis; naval/marine power and propulsion; directed energy/high power microwaves; nonstationary signal processing; radar; electronic survivability/susceptibility to harsh environments; electronic warfare

Karkal Prabhu, PhD (*Harvard University*). Teaching Professor. Computer engineering education; computer architecture; embedded systems

Gail L. Rosen, PhD (*Georgia Institute of Technology*). Associate Professor. Signal processing, signal processing for biological analysis and modeling, bio-inspired designs, source localization and tracking.

Ioannis Savidis, PhD (*University of Rochester*). Associate Professor. Analysis, modeling, and design methodologies for high performance digital and mixed-signal integrated circuits; Emerging integrated circuit technologies; Electrical and thermal modeling and characterization, signal and power integrity, and power and clock delivery for 3-D IC technologies

Kevin J. Scoles, PhD (*Dartmouth College*) Associate Dean for Undergraduate Affairs. Associate Professor. Microelectronics; electric vehicles; solar energy; biomedical electronics.

Harish Sethu, PhD (*Lehigh University*). Associate Professor. Protocols, architectures and algorithms in computer networks; computer security; mobile ad hoc networks; large-scale complex adaptive networks and systems.

James Shackleford, PhD (*Drexel University*). Associate Professor. Medical image processing, high performance computing, embedded systems, computer vision, machine learning

P. Mohana Shankar, PhD (*Indian Institute of Technology*) Allen Rothwarf Professor of Electrical and Computer Engineering. Professor. Wireless communications; biomedical ultrasonics; fiberoptic bio-sensors.

Matthew Stamm, PhD (*University of Maryland, College Park*). Associate Professor. Information Security; multimedia forensics and anti-forensics; information verification; adversarial dynamics; signal processing

Baris Taskin, PhD (*University of Pittsburgh*). Professor. Very large-scal integration (VLSI) systems, computer architecture, circuits and systems, electronic design automation (EDA), energy efficient computing.

John Walsh, PhD (*Cornell University*). Associate Professor. Bounding the region of entropic vectors and its implications for the limits of communication networks, big data distributed storage systems, and graphical model based machine learning; efficient computation and analysis of rate regions for network coding and distributed storage; code construction, polyhedral computation, hierarchy, and symmetry

Steven Weber, PhD (*University of Texas-Austin*) Department Head. Professor. Mathematical modeling of computer and communication networks, specifically streaming multimedia and ad hoc networks.

Jaudelice de Oliveira, PhD (*Georgia Institute of Technology*). Associate Professor. Software-defined networking; social and economic networks; network security; design and analysis of protocols, algorithms and architectures in computer networks, particularly solutions for the Internet of Things

Emeritus Faculty

Suryadevara Basavaiah, PhD (*University of Pennsylvania*). Professor Emeritus. Computer engineering; computer engineering education; custom circuit design; VLSI technology; process and silicon fabrication

Eli Fromm, PhD (*Jefferson Medical College*). Professor Emeritus. Engineering education; academic research policy; bioinstrumentation; physiologic systems.

Edwin L. Gerber, PhD (*University of Pennsylvania*). Professor Emeritus. Computerized instruments and measurements; undergraduate engineering education.

Construction Management

Major: Construction Management

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 52.2001

Standard Occupational Classification (SOC) code: 11-9021

About the Program

The Master of Science in Construction Management program gives professionals the opportunity to develop the multidisciplinary skills required of effective construction managers. The program focuses on training professionals to meet the challenge of increasing owner demands, tighter project delivery times and increasing regulation. The program provides the leadership skills professionals need to navigate the many daily challenges construction organizations face in successfully managing construction operations.

Three concentrations are available: construction project management, real estate, and sustainability and green construction.

Program Goals

The program is designed to increase the students' breadth and depth of knowledge in the principles and practices of construction management. The program serves as an excellent platform to develop senior management for the nation's construction industry.

Graduates of the Master of Science in Construction Management program will:

- exhibit strong technical and managerial skills
- apply scientific methodologies to problem solving
- think critically
- exercise creativity and inject innovation into the process
- operate at the highest level of ethical practice
- employ principles of transformational leadership

Concentrations

Three concentrations are available:

Construction Project Management

This concentration provides the knowledge and skills required to successfully manage complex construction projects. Topics include the hard skills of project management, such as estimating and budgeting, time management, and planning. Other topics include managerial and legal aspects of construction contract administration, international construction practices, strategic planning, quality management, and productivity analysis.

Real Estate

In this concentration students explore the knowledge and skills required to create, maintain, and build environments for living, working and entertainment purposes. Relevant issues include project finance, real estate as investments, design and construction, operations, development law, environmental remediation, public policy, market analysis, and architecture.

Sustainability and Green Construction

Sustainable development means integrating the decision-making process across the project team, so that every decision is made with an eye to the greatest long-term benefits. Currently, in the Leadership in Energy and Environmental Design (LEED) green building rating system, the construction process represents a significant portion of the effort required to achieve high performance building programs. This concentration is intended to explore these concepts in detail.

For additional information, view the College of Engineering's Construction Management (<https://drexel.edu/engineering/academics/departments/construction-engineering-project-management-systems-engineering/>) web page or the program academic adviser:

Ms. Jessica Cruz, jc635@drexel.edu, 215-895-5943

Admissions Requirements

Admission to the program requires:

- A bachelor's degree in construction management or engineering, or a baccalaureate business or non-technical degree.
- A completed application
- Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended. Potential students must supply transcripts regardless of the number of credits earned or the type of school attended. If a potential student does not list all post-secondary institutions on his or her application, and these are listed on transcripts received from other institutions, processing of the application will be delayed until the remaining transcripts have been submitted.
- GPA of 3.0 or higher
- Two letters of recommendation (professional or academic)
- Up-to-date resume
- 500 word essay on why the applicant wishes to pursue graduate studies in this program
- International Students must submit a TOEFL score indicating a minimum of 600 (paper exam) or 250 (CBT exam). For more information regarding international applicant requirements, view the International Students Admissions Information (<http://drexel.edu/grad/resources/international/>) page.

Visit the Graduate Admissions (<http://www.drexel.edu/grad/programs/coe/construction-management/>) website for more information about requirements and deadlines, as well as instructions for applying online.

Degree Requirements

The Master of Science in Construction Management curriculum includes a core of 5 required courses (15.0 credits), a concentration (24.0 credits), and 6.0 credits of culminating experience. The culminating experience includes a capstone project in construction management.

Core Foundation Courses

CMGT 501	Leadership in Construction	3.0
CMGT 505	Construction Accounting and Financial Management	3.0
CMGT 510	Construction Control Techniques	3.0
CMGT 512	Cost Estimating and Bidding Strategies	3.0
CMGT 515	Risk Management in Construction	3.0

Concentrations **15.0-24.0**

Students pursue a concentration in one of the following areas:

Construction Management Project Management Concentration

CMGT 525	Applied Construction Project Management
CMGT 528	Construction Contract Administration
CMGT 530	Equipment Applications and Economy
CMGT 532	International Construction Practices
CMGT 538	Strategic Management in Construction
CMGT 540	Schedule Impact Analysis
CMGT 548	Quality Management and Construction Performance
CMGT 550	Productivity Analysis and Improvement

Real Estate Concentration

Select eight of the following:

CMGT 535	Community Impact Analysis
REAL 568	Real Estate Development
REAL 571	Advanced Real Estate Investment & Analysis
REAL 572	Advanced Market Research & Analysis
REAL 573	Sales & Marketing of Real Estate
REAL 574	Real Estate Economics in Urban Markets
REAL 575	Real Estate Finance
REAL 576	Real Estate Valuation & Analysis
REAL 577	Legal Issues in Real Estate Development

Sustainability and Green Construction Concentration

CMGT 535	Community Impact Analysis
CMGT 545	Sustainable Principles & Practices
CMGT 546	Sustainable Technologies
CMGT 547	LEED Concepts
CMGT 558	Community Sustainability

Culminating Experience **6.0**

CMGT 696	Capstone Project in Construction Management I
CMGT 697	Capstone Project in Construction Management II

Total Credits 45.0

Construction Management Faculty

Jeffrey Beard, PhD (*Georgia Institute of Technology*). Associate Clinical Professor. Project and Program Management; Entrepreneurship in design and construction; Integrated project delivery systems; History of engineering and construction; Sustainable design and construction.

Douglas Carney, MBA, AIA (*Eastern University*). Clinical Professor. Architecture; Contract management; Master planning; Site analysis; Feasibility and zoning issues; Space needs and program development; Code analysis and compliance studies; project scheduling.

Johanna Casale, PhD (*Rutgers University*). Assistant Teaching Professor. Engineering education, first year design, structural aspects of construction.

Charles Cook, PhD (*New York University*). Assistant Clinical Professor. Construction management; project management; leadership and teambuilding; oral and written communication.

Christine M. Fiori, PhD (*Drexel University*) Program Director. Clinical Professor. Improving the delivery of safety education in construction curriculum; Ancient construction techniques; Design and construction in developing countries; Leadership in construction; Workforce development

Kathleen M. Short, PhD (*Virginia Tech*). Assistant Teaching Professor. Workforce development and women in construction; transformative safety leadership; construction education.

Cybersecurity

Major: Cybersecurity

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: Available for full-time on-campus master's-level students

Classification of Instructional Programs (CIP) code: 11.1003

Standard Occupational Classification (SOC) code: 15-1122

About the Program

As a greater percentage of people worldwide use computers, there is a marked increase in cybersecurity concerns. Motivated through

discussions with the National Security Agency (NSA), Drexel University's MS in Cybersecurity program prepares students with both academic and practical training to be competitive in today's rapidly changing technical landscape. The program provides deeply technical and specialized training and enables graduates to understand, adapt, and develop new techniques to confront emerging threats in cybersecurity.

Administered by the Electrical & (<http://www.drexel.edu/ece/>) Computer Engineering Department in the College of Engineering, this program is interdisciplinary in nature and includes courses from Drexel University's College of Computing & Informatics. Topics covered include computer networking, probability concepts, techniques for analyzing algorithms, dependable software design, reverse software engineering, intrusion detection, ethics, privacy, confidentiality, authenticity, and social networking.

The program offers multidisciplinary "research rotations" as an independent study component of the degree program and an option to participate in the Graduate Coop Program. For more information relating to Graduate Coop, please see the Steinbright Career Development Center's website (<https://drexel.edu/scdc/co-op/graduate/>).

Additional Information

For additional information about this program, please visit the ECE Department's Cybersecurity degree page (<https://drexel.edu/engineering/academics/departments/electrical-computer-engineering/academic-programs/graduate/ms/cybersecurity/>).

Degree Requirements

The Master of Science in Cybersecurity program encompasses a minimum of 45.0 approved credit hours, chosen in accordance with the requirements listed below. A plan of study should be arranged with the departmental graduate advisors, and in consultation with the student's research advisor, if applicable.

The required core courses provide students with a theoretical foundation in the field of cybersecurity and a framework to guide the application of knowledge gained in technical electives to the practice of cybersecurity.

Core Courses

INFO 517	Principles of Cybersecurity	3.0
INFO 679	Information Ethics	3.0
INFO 725	Information Policy and Ethics	3.0
SE 578	Security Engineering	3.0
Cybersecurity Track-Specific Technical Electives *		24.0
Cybersecurity Non-Track Technical Electives **		9.0
Total Credits		45.0

* Cybersecurity technical electives are used to build a deep understanding of one or more areas of technical expertise within the field of cybersecurity. All students are required to take a minimum of 18.0 credits of cybersecurity technical electives from the graduate course offerings of the Department of Computer Science, the Department of Computing and Security Technology, and the Department of Electrical and Computer Engineering [ECE]. A list of pre-approved technical electives can be found on the ECE Department website.

** General electives are the remaining courses needed to reach the minimum credit hour requirement for the degree program. General electives can be chosen from among the graduate course offerings of the College of Computing & Informatics; the Department of Computer Science; the Department of Computing and Security Technology; the Department of Electrical and Computer Engineering, and the Department of Mathematics. In order to have courses outside of these departments and schools count towards degree completion, they must be approved by the departmental graduate advisors prior to registration for said courses.

Graduate Co-op/Career Opportunities

Graduate Co-Op

Students may choose to participate in the Graduate Co-op Program, working on curriculum related projects. Graduate Co-op enables graduate students to alternate class terms with a six-month period of hands-on experience, gaining access to employers in their chosen industries. Whether co-op takes students throughout the United States or abroad, they are expanding their professional networks, enhancing their resumes, and bringing that experience back to the classroom and their peers.

Further information on the Graduate Co-Op Program (<http://www.drexel.edu/scdc/coop/graduate/>) is available at the Drexel Steinbright Career Development Center. (<http://www.drexel.edu/scdc/>)

Career Opportunities

The program was deliberately designed to address needs of the Federal Cyber Service, the Department of Defense, and the National Security Agency. The program strengthens ties between these agencies and Drexel University and will provide professional opportunities for students pursuing this degree.

Research

Students in the MS in Cybersecurity program have opportunities to perform research-oriented coursework for academic credit. Research-oriented coursework can be divided into three categories: research rotations, master's thesis, and independent research.

A total of 9.0 credits of research-oriented coursework may be counted towards the minimum credit hour requirement of the degree program. These credits are considered general electives.

Facilities

Drexel University and the Electrical and Computer Engineering Department are nationally recognized for a strong history of developing innovative research. Research programs in the ECE Department prepare students for careers in research and development, and aim to endow graduates with the ability to identify, analyze, and address new technical and scientific challenges. The ECE Department is well equipped with state-of-the-art facilities in each of the following ECE Research laboratories:

Research Laboratories at the ECE Department

Adaptive Signal Processing and Information Theory Research Group

The Adaptive Signal Processing and Information Theory Research Group (<http://www.ece.drexel.edu/walsh/aspitrg/home.html>) conducts

research in the area of signal processing and information theory. Our main interests are belief/expectation propagation, turbo decoding and composite adaptive system theory. We are currently doing projects on the following topics:

- i) Delay mitigating codes for network coded systems,
- ii) Distributed estimation in sensor networks via expectation propagation,
- iii) Turbo speaker identification,
- iv) Performance and convergence of expectation propagation,
- v) Investigating bounds for SINR performance of autocorrelation based channel shorteners.

Applied Networking Research Lab

Applied Networking Research Lab (ANRL) projects focus on modeling and simulation as well as experimentation in wired, wireless and sensor networks. ANRL is the home of MuTANT, a Multi-Protocol Label Switched Traffic Engineering and Analysis Testbed composed of 10 high-end Cisco routers and several PC-routers, also used to study other protocols in data networks as well as automated network configuration and management. The lab also houses a sensor network testbed.

Bioimage Laboratory

Uses computer gaming hardware for enhanced and affordable 3-D visualization, along with techniques from information theory and machine learning to combine the exquisite capabilities of the human visual system with computational sensing techniques for analyzing vast quantities of image sequence data.

Data Fusion Laboratory

The Data Fusion Laboratory investigates problems in multisensory detection and estimation, with applications in robotics, digital communications, radar, and target tracking. Among the projects in progress: computationally efficient parallel distributed detection architectures, data fusion for robot navigation, modulation recognition and RF scene analysis in time-varying environments, pattern recognition in biological data sequences and large arrays, and hardware realizations of data fusion architectures for target detection and target tracking.

Drexel Network Modeling Laboratory

The Drexel Network Modeling Laboratory investigates problems in the mathematical modeling of communication networks, with specific focus on wireless ad hoc networks, wireless sensor networks, and supporting guaranteed delivery service models on best effort and multipath routed networks. Typical methodologies employed in our research include mathematical modeling, computer simulation, and performance optimization, often with the end goal of obtaining meaningful insights into network design principles and fundamental performance tradeoffs.

Drexel Power-Aware Computing Laboratory

The Power-Aware Computing Lab (<http://dpac.ece.drexel.edu/>) investigates methods to increase energy efficiency across the boundaries of circuits, architecture, and systems. Our recent accomplishments include the Sigil profiling tool, scalable modeling infrastructure for accelerator implementations, microarchitecture-aware VDD gating algorithms, an accelerator architecture for ultrasound imaging, evaluation of hardware reference counting, hardware and operating system support for power-agile computing, and memory systems for accelerator-based architectures.

Drexel University Nuclear Engineering Education Laboratory

The field of nuclear engineering encompasses a wide spectrum of occupations, including nuclear reactor design, medical imaging, homeland security, and oil exploration. The Drexel University Nuclear Engineering Education Laboratory (DUNEEL) provides fundamental hands on understanding for power plant design and radiation detection and analysis. Software based study for power plant design, as well as physical laboratory equipment for radiation detection, strengthen the underlying concepts used in nuclear engineering such that the student will comprehend and appreciate the basic concepts and terminology used in various nuclear engineering professions. Additionally, students use the laboratory to develop methods for delivering remote, live time radiation detection and analysis. The goal of DUNEEL is to prepare students for potential employment in the nuclear engineering arena.

Drexel VLSI Laboratory

The Drexel VLSI Laboratory investigates problems in the design, analysis, optimization and manufacturing of high performance (low power, high throughput) integrated circuits in contemporary CMOS and emerging technologies. Suited with industrial design tools for integrated circuits, simulation tools and measurement beds, the VLSI group is involved with digital and mixed-signal circuit design to verify the functionality of the discovered novel circuit and physical design principles. The Drexel VLSI laboratory develops design methodologies and automation tools in these areas, particularly in novel clocking techniques, featuring resonant clocking, and interconnects, featuring wireless interconnects.

Drexel Wireless Systems Laboratory

The Drexel Wireless Systems Laboratory (DWSL) contains an extensive suite of equipment for constructing, debugging, and testing prototype wireless communications systems. Major equipment within DWSL includes:

- software defined radio network testbeds for rapidly prototyping new communications and network systems,
- electromagnetic anechoic chamber and reverberation chambers for testing new wireless technologies,
- experimental cell tower for field testing new wireless technologies.

The lab is also equipped with network analyzers, high speed signal generators, oscilloscopes, and spectrum analyzers as well as several Zigbee development platforms for rapidly prototyping sensor networks. The lab offers laboratory coursework in wireless network security, collaborative intelligent radio networks, and fundamental analog and digital communication systems.

Ecological and Evolutionary Signal-processing and Informatics Laboratory

The Ecological and Evolutionary Signal-processing and Informatics Laboratory (EESI) seeks to solve problems in high-throughput genomics and engineer better solutions for biochemical applications. The lab's primary thrust is to enhance the use of high-throughput DNA sequencing technologies with pattern recognition and signal processing techniques. Applications include assessing the organism content of an environmental sample, recognizing/classifying potential and functional genes, inferring environmental factors and inter-species relationships, and inferring microbial evolutionary relationships from short-read DNA/RNA fragments. The lab also investigates higher-level biological systems such as modeling and controlling chemotaxis, the movement of cells.

Electric Power Engineering Center

This newly established facility makes possible state-of-the-art research in a wide variety of areas, ranging from detailed theoretical model study to experimental investigation in its high voltage laboratories. The mission is to advance and apply scientific and engineering knowledge associated with the generation, transmission, distribution, use, and conservation of electric power. In pursuing these goals, this center works with electric utilities, state and federal agencies, private industries, nonprofit organizations and other universities on a wide spectrum of projects. Research efforts, both theoretical and experimental, focus on the solution of those problems currently faced by the electric power industry. Advanced concepts for electric power generation are also under investigation to ensure that electric power needs will be met at the present and in the future.

Electronic Design Automation Facility

Industrial-grade electronic design automation software suite and integrated design environment for digital, analog and mixed-signal systems development. Field Programmable Gate Array (FPGA) development hardware. Most up-to-date FPGA/embedded system development hardware kits. Printed circuit board production facility. Also see Drexel VLSI Laboratory.

Microwave-Photonics Device Laboratories

The laboratory is equipped with test and measurement equipment for high-speed analog and digital electronics and fiber optic systems. The test equipment includes network analyzers from Agilent (100kHz- 1.3 GHz and 45 Mhz-40 GHz), and Anritsu (45 MHz-6 GHz); spectrum analyzers from Tektronix, HP, and Agilent with measurement capability of DC to 40 GHz and up to 90 GHz using external mixers; signal generators and communication channel modulators from HP, Rhode-Schwartz, Systron Donner, and Agilent; microwave power meter and sensor heads, assortment of passive and active microwave components up to 40 GHz ; data pattern generator and BER tester up to 3Gb/s; optical spectrum analyzer from Anritsu and power meters from HP; single and multimode fiber optic based optical transmitter and receiver boards covering ITU channels at data rates up to 10Gb/s; passive optical components such as isolator, filter, couplers, optical connectors and fusion splicer; LPKF milling machine for fabrication of printed circuit boards; wire-bonding and Cascade probe stations; Intercontinental test fixtures for testing of MMIC circuits and solid-state transistors; state-of-the-art microwave and electromagnetic CAD packages such as Agilent ADS, ANSYS HFSS, and COMSOL multi-physics module.

Multimedia & Information Security Laboratory

The Multimedia & Information Security Laboratory (MISL) conducts research that provides information verification and security in scenarios when an information source cannot be trusted.

The majority of MISL's research is in digital multimedia forensics. Digital multimedia forensics involves the developing mathematical techniques to identify multimedia forgeries such as falsified images and videos. This research is particularly important because widely available editing software enables multimedia forgers to create perceptually realistic forgeries. MISL performs research on anti-forensic operations designed to fool forensic techniques. By studying anti-forensics, researchers can identify and address weaknesses in existing forensic techniques as well as develop techniques capable of identifying the use of anti-forensics.

Music and Entertainment Technology Laboratory

The Music and Entertainment Technology Laboratory (MET-lab) is devoted to research in digital media technologies that will shape the future of entertainment, especially in the areas of sound and music. We employ digital signal processing and machine learning to pursue novel applications in music information retrieval, music production and processing technology, and new music interfaces. The MET-lab is also heavily involved in outreach programs for K-12 students and hosts the Summer Music Technology program, a one-week learning experience for high school students. Lab facilities include a sound isolation booth for audio and music recording, a digital audio workstation running ProTools, two large multi-touch display interfaces of our own design, and a small computing cluster for distributed processing.

NanoPhotonics+ Lab

Our research is primarily in the area of nanophotonics with a focus on the nanoscale interaction of light with matter. Interests include: liquid crystal/polymer composites for gratings, lenses and HOEs; liquid crystal interactions with surfaces and in confined nanospaces; alternative energy generation through novel photon interactions; ink-jet printed conducting materials for RF and photonic applications; and the creation and development of smart textiles technologies including soft interconnects, sensors, and wireless implementations.

Opto-Electro-Mechanical Laboratory

This lab concentrates on the system integration on optics, electronics, and mechanical components and systems, for applications in imaging, communication, and biomedical research. Research areas include: Programmable Imaging with Optical Micro-electrical-mechanical systems (MEMS), in which microscopic mirrors are used to image light into a single photodetector; Pre-Cancerous Detection using White Light Spectroscopy, which performs a cellular size analysis of nuclei in tissue; Free-space Optical Communication using Space Time Coding, which consists of diffused light for computer-to-computer communications, and also tiny lasers and detectors for chip-to-chip communication; Magnetic Particle Locomotion, which showed that particles could swim in a uniform field; and Transparent Antennas using Polymer, which enables antennas to be printed through an ink-jet printer.

Plasma and Magnetics Laboratory

Research is focused on applications of electrical and magnetic technologies to biology and medicine. This includes the subjects of non-thermal atmospheric pressure plasma for medicine, magnetic manipulation of particles for drug delivery and bio-separation, development of miniature NMR sensors for cellular imaging and carbon nanotube cellular probes.

Power Electronics Research Laboratory

The Power Electronics Research Laboratory (PERL) is involved in circuit and design simulation, device modeling and simulation, and experimental testing and fabrication of power electronic circuits. The research and development activities include electrical terminations, power quality, solar photovoltaic systems, GTO modeling, protection and relay coordination, and solid-state circuit breakers. The analysis tools include EMPT, SPICE, and others, which have been modified to incorporate models of such controllable solid-state switches as SCRs, GTOs, and MOSFETs. These programs have a wide variety and range of modeling capabilities used to model electromagnetics and electromechanical transients ranging from microseconds to seconds in duration. The PERL is a fully equipped laboratory with 42 kVA AC and 70 kVA DC power sources and data acquisition systems, which have the ability to display and store data for

detailed analysis. Some of the equipment available is a distribution and HV transformer and three phase rectifiers for power sources and digital oscilloscopes for data measuring and experimental analysis. Some of the recent studies performed by the PERL include static VAR compensators, power quality of motor controllers, solid-state circuit breakers, and power device modeling which have been supported by PECO, GE, Gould, and EPRI.

Privacy, Security and Automation Lab

Drexel University's Privacy, Security, and Automation Laboratory (PSAL) researches on topics at the intersection between artificial intelligence, privacy and security, and human-computer interaction.

RE Touch Lab

The RE Touch Lab is investigating the perceptual and mechanical basis of active touch perception, or haptics, and the development of new technologies for stimulating the sense of touch, allowing people to touch, feel, and interact with digital content as seamlessly as we do with objects in the real world. We study the scientific foundations of haptic perception and action, and the neuroscientific and biomechanical basis of touch, with a long-term goal of uncovering the fundamental perceptual and mechanical computations that enable haptic interaction. We also create new technologies for rendering artificial touch sensations that simulate those that are experienced when interacting with real objects, inspired by new findings on haptic perception.

Testbed for Power-Performance Management of Enterprise Computing Systems

This computing testbed is used to validate techniques and algorithms aimed at managing the performance and power consumption of enterprise computing systems. The testbed comprises a rack of Dell 2950 and Dell 1950 PowerEdge servers, as well as assorted desktop machines, networked via a gigabit switch. Virtualization of this cluster is enabled by VMWare's ESX Server running the Linux RedHat kernel. It also comprises of a rack of ten Apple Xserve machines networked via a gigabit switch. These servers run the OS X Leopard operating systems and have access to a RAID with TBs of total disk capacity.

Cybersecurity Faculty

Kapil Dandekar, PhD (*University of Texas-Austin*) Director of the Drexel Wireless Systems Laboratory (DWSL); Associate Dean of Research, College of Engineering. Professor. Cellular/mobile communications and wireless LAN; smart antenna/MIMO for wireless communications; applied computational electromagnetics; microwave antenna and receiver development; free space optical communication; ultrasonic communication; sensor networks for homeland security; ultrawideband communication.

Constantine Katsinis, PhD (*University of Rhode Island*). Teaching Professor. High-performance computer networks, parallel computer architectures with sustained teraflops performance, computer security, image processing.

Steven Weber, PhD (*University of Texas-Austin*) Department Head. Professor. Mathematical modeling of computer and communication networks, specifically streaming multimedia and ad hoc networks.

Christopher C. Yang, PhD (*University of Arizona, Tucson*). Professor. Web search and mining, security informatics, knowledge management, social media analytics, cross-lingual information retrieval, text summarization, multimedia retrieval, information visualization, information

sharing and privacy, artificial intelligence, digital library, and electronic commerce.

Electrical Engineering

Major: Electrical Engineering

Degree Awarded: Master of Science (MS): or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS) or 90.0 (PhD)

Co-op Option: Available for full-time on-campus master's-level students

Classification of Instructional Programs (CIP) code: 14.1001

Standard Occupational Classification (SOC) code: 17-2071

About the Program

The program in electrical engineering prepares students for careers in research and development, and aims to endow graduates with the ability to identify, analyze and address new technical and scientific challenges. At present, the department offers graduate coursework in six general areas: (1) computer engineering; (2) control, robotics and intelligent systems; (3) electrophysics; (4) image and signal processing and interpretation; (5) power engineering and energy; and (6) telecommunications and networking.

A student's plan of study must contain a selection of courses from the department's offerings and may include appropriate graduate elective courses from other engineering departments or from physics or mathematics. Further information can be obtained from the department website or from the graduate advisor.

Students are also encouraged to engage in thesis research. The combined thesis and research cannot exceed 9.0 credits. The MS program is organized so that a student may complete the degree requirements in less than 2 years of full-time study or 2-3 years of part-time study.

Students within the Master of Science in Electrical Engineering are eligible to take part in the Graduate Co-op Program, which combines classroom coursework with a 6-month, full-time work experience. For more information, visit the Steinbright Career Development Center's website (<http://www.drexel.edu/scdc/co-op/graduate/>).

For more information about the MS or PhD in Electrical Engineering, please visit the Electrical and Computer Engineering (<https://drexel.edu/engineering/academics/departments/electrical-computer-engineering/>) Department (<http://drexel.edu/ece/>) web site.

Admission Requirements

Applicants must satisfy general requirements for graduate admission, including a minimum 3.0 GPA (on a 4.0 scale) for the last two years of undergraduate studies, as well as for any subsequent graduate work, and hold a bachelor's degree in electrical engineering, computer engineering, or the equivalent from an accredited college or university. A degree in science (physics, mathematics, computer science, etc.) is also acceptable. Applicants with degrees in sciences may be required to take a number of undergraduate engineering courses. An undergraduate degree earned abroad must be deemed equivalent to a US bachelor's.

Applicants for full-time MS and PhD programs must take the GRE general test. Students whose native language is not English and who do not hold a degree from a US institution must take the TOEFL within two years before application.

For additional information on how to apply, visit Drexel's Admissions page for Electrical Engineering (<http://www.drexel.edu/grad/programs/coe/electrical-engineering/>).

Degree Requirements (MS)

The Master of Science in Electrical Engineering curriculum encompasses 45.0 or 48.0 (with the Graduate Co-op option) approved credit hours, chosen in accordance with the following requirements and a plan of study arranged with the departmental graduate advisor in consultation with the student's research advisor, if applicable. Before the end of the first quarter in the Department of Electrical and Computer Engineering, for a full-time student, or by the end of the first year for a part-time student, said plan of study must be filed and approved with the departmental graduate advisor.

A total of at least 30.0 credit hours must be taken from among the graduate course offerings of the Department of Electrical and Computer Engineering. These credits must be taken at Drexel University. No transfer credit may be used to fulfill these requirements, regardless of content equivalency.

The remaining courses needed to reach the minimum credit hour requirement for the degree program are considered elective courses. Elective courses can be chosen from among the graduate course offerings of the Department of Electrical and Computer Engineering; other departments within the College of Engineering; the School of Biomedical Science, Engineering and Health Systems; the Department of Mathematics; the Department of Physics; the Department of Chemistry and the Department of Biology. In order to have courses outside of these departments and schools count towards degree completion, they must be approved by the departmental graduate advisors prior to registration for said courses.

Please note that ECEC 500 *Fundamentals of Computer Hardware* and ECEC 600 *Fundamentals of Computer Networks* do **not** count toward the credit requirements to complete the MS in Electrical Engineering degree program.

Required Courses	
Electrical Engineering (ECEE, ECEP, ECES, ECET) Courses	21.0
General Electrical and Computer Engineering (ECEC, ECEE, ECEP, ECES, ECET) Courses	9.0
Elective Courses	15.0
Total Credits	45.0

Options for Degree Fulfillment

Although not required, students are encouraged to complete a Master's Thesis as part of the MS studies. Those students who choose the thesis option may count up to 9.0 research/thesis credits as part of their required credit hour requirements.

Students may choose to participate in the Graduate Co-op Program, where 6.0 credit hours can be earned for a six month cooperative education experience in industry, working on curriculum related projects. The total number of required credit hours is increased to 48.0 for those students who choose to pursue the Graduate Co-op option. This change represents an increase in non-departmental required credit hours to a total of 18.0 credit hours, 6.0 of which are earned from the cooperative education experience.

For more information on curricular requirements, visit the Department of Electrical and Computer Engineering' (<http://www.ece.drexel.edu/>)s web site.

PhD in Electrical Engineering General Requirements

The following general requirements must be satisfied in order to complete the PhD in Electrical Engineering:

- 90.0 credit hours total
- candidacy examination
- research proposal
- dissertation defense

Students entering with a master's degree in electrical or computer engineering or a related field will be considered a post-masters PhD student and will only be required to complete a total of 45.0 credit hours, in accordance with University policy.

Curriculum

Appropriate coursework is chosen in consultation with the student's research advisor. A plan of study must be developed by the student to encompass the total number of required credit hours. Both the departmental graduate advisor and the student's research advisor must approve this plan.

Candidacy Examination

The candidacy examination explores the depth of understanding of the student in his/her specialty area. The student is expected to be familiar with, and be able to use, the contemporary tools and techniques of the field and to demonstrate familiarity with the principal results and key findings.

The student, in consultation with his/her research advisor, will declare a principal technical area for the examination. The examination includes the following three parts:

- A self-study of three papers from the archival literature in the student's stated technical area, chosen by the committee in consultation with the student.
- A written report (15 pages or less) on the papers, describing their objectives, key questions and hypotheses, methodology, main results and conclusions. Moreover, the student must show in an appendix independent work he/she has done on at least one of the papers – such as providing a full derivation of a result or showing meaningful examples, simulations or applications.
- An oral examination which takes the following format:
 - A short description of the student's principal area of interest (5 minutes, by student).
 - A review of the self-study papers and report appendix (25-30 minutes, by student).
 - Questions and answers on the report, the appendix and directly related background (40-100 minutes, student and committee).

In most cases, the work produced during the candidacy examination will be a principal reference for the student's PhD dissertation; however, this is not a requirement.

Research Proposal

After having attained the status of PhD Candidate, each student must present a research proposal to a committee of faculty and industry members, chosen with his/her research advisor, who are knowledgeable in the specific area of research. This proposal should outline the specific

intended subject of study, i.e., it should present a problem statement, pertinent background, methods of study to be employed, expected difficulties and uncertainties and the anticipated form, substance and significance of the results.

The purpose of this presentation is to verify suitability of the dissertation topic and the candidate's approach, and to obtain the advice and guidance of oversight of mature, experienced investigators. It is not to be construed as an examination, though approval by the committee is required before extensive work is undertaken. The thesis proposal presentation must be open to all; announcements regarding the proposal presentation must be made in advance.

The thesis advisory committee will have the sole responsibility of making any recommendations regarding the research proposal. It is strongly recommended that the proposal presentation be given as soon as possible after the successful completion of the candidacy examination.

Dissertation Defense

Dissertation Defense procedures are described in the Graduate College of Drexel University (<http://www.drexel.edu/graduatecollege/>) policies regarding Doctor of Philosophy Program Requirements. The student must be a PhD candidate for at least one year before he/she can defend his/her doctoral thesis.

Dual Degree

The Department of Electrical and Computer Engineering offers outstanding students the opportunity to receive two diplomas (BS and MS) at the same time. The program requires five (5) years to complete. Participants, who are chosen from the best undergraduates students, work with a faculty member on a research project and follow a study plan that includes selected graduate classes. This program prepares individuals for careers in research and development; many of its past graduates continued their studies toward a PhD.

Facilities

Drexel University and the Electrical and Computer Engineering Department are nationally recognized for a strong history of developing innovative research. Research programs in the ECE Department prepare students for careers in research and development, and aim to endow graduates with the ability to identify, analyze, and address new technical and scientific challenges. The ECE Department is well equipped with state-of-the-art facilities in each of the following ECE Research laboratories:

Research Laboratories at the ECE Department

Adaptive Signal Processing and Information Theory Research Group

The Adaptive Signal Processing and Information Theory Research Group conducts research in the area of signal processing and information theory. Our main interests are belief/expectation propagation, turbo decoding and composite adaptive system theory. We are currently doing projects on the following topics:

- Delay mitigating codes for network coded systems
- Distributed estimation in sensor networks via expectation propagation
- Turbo speaker identification
- Performance and convergence of expectation propagation

- Investigating bounds for SINR performance of autocorrelation based channel shorteners

Applied Networking Research Lab

Applied Networking Research Lab (ANRL) projects focus on modeling and simulation as well as experimentation in wired, wireless and sensor networks. ANRL is the home of MuTANT, a Multi-Protocol Label Switched Traffic Engineering and Analysis Testbed composed of 10 high-end Cisco routers and several PC-routers, also used to study other protocols in data networks as well as automated network configuration and management. The lab also houses a sensor network testbed.

Bioimage Laboratory

Uses computer gaming hardware for enhanced and affordable 3-D visualization, along with techniques from information theory and machine learning to combine the exquisite capabilities of the human visual system with computational sensing techniques for analyzing vast quantities of image sequence data.

Data Fusion Laboratory

The Data Fusion Laboratory investigates problems in multisensory detection and estimation, with applications in robotics, digital communications, radar, and target tracking. Among the projects in progress: computationally efficient parallel distributed detection architectures, data fusion for robot navigation, modulation recognition and RF scene analysis in time-varying environments, pattern recognition in biological data sequences and large arrays, and hardware realizations of data fusion architectures for target detection and target tracking.

Drexel Network Modeling Laboratory

The Drexel Network Modeling Laboratory investigates problems in the mathematical modeling of communication networks, with specific focus on wireless ad hoc networks, wireless sensor networks, and supporting guaranteed delivery service models on best effort and multipath routed networks. Typical methodologies employed in our research include mathematical modeling, computer simulation, and performance optimization, often with the end goal of obtaining meaningful insights into network design principles and fundamental performance tradeoffs.

Drexel Power-Aware Computing Laboratory

The Power-Aware Computing Lab investigates methods to increase energy efficiency across the boundaries of circuits, architecture, and systems. Our recent accomplishments include the Sigil profiling tool, scalable modeling infrastructure for accelerator implementations, microarchitecture-aware VDD gating algorithms, an accelerator architecture for ultrasound imaging, evaluation of hardware reference counting, hardware and operating system support for power-agile computing, and memory systems for accelerator-based architectures.

Drexel University Nuclear Engineering Education Laboratory

The field of nuclear engineering encompasses a wide spectrum of occupations, including nuclear reactor design, medical imaging, homeland security, and oil exploration. The Drexel University Nuclear Engineering Education Laboratory (DUNEEL) provides fundamental hands on understanding for power plant design and radiation detection and analysis. Software based study for power plant design, as well as physical laboratory equipment for radiation detection, strengthen the underlying concepts used in nuclear engineering such that the student will

comprehend and appreciate the basic concepts and terminology used in various nuclear engineering professions. Additionally, students use the laboratory to develop methods for delivering remote, live time radiation detection and analysis. The goal of DUNEEL is to prepare students for potential employment in the nuclear engineering arena.

Drexel VLSI Laboratory

The Drexel VLSI Laboratory investigates problems in the design, analysis, optimization and manufacturing of high performance (low power, high throughput) integrated circuits in contemporary CMOS and emerging technologies. Suited with industrial design tools for integrated circuits, simulation tools and measurement beds, the VLSI group is involved with digital and mixed-signal circuit design to verify the functionality of the discovered novel circuit and physical design principles. The Drexel VLSI laboratory develops design methodologies and automation tools in these areas, particularly in novel clocking techniques, featuring resonant clocking, and interconnects, featuring wireless interconnects.

Drexel Wireless Systems Laboratory

The Drexel Wireless Systems Laboratory (DWSL) contains an extensive suite of equipment for constructing, debugging, and testing prototype wireless communications systems. Major equipment within DWSL includes:

- software defined radio network testbeds for rapidly prototyping new communications and network systems,
- electromagnetic anechoic chamber and reverberation chambers for testing new wireless technologies,
- experimental cell tower for field testing new wireless technologies.

The lab is also equipped with network analyzers, high speed signal generators, oscilloscopes, and spectrum analyzers as well as several Zigbee development platforms for rapidly prototyping sensor networks. The lab offers laboratory coursework in wireless network security, collaborative intelligent radio networks, and fundamental analog and digital communication systems.

Ecological and Evolutionary Signal-processing and Informatics Laboratory

The Ecological and Evolutionary Signal-processing and Informatics Laboratory (EESI) seeks to solve problems in high-throughput genomics and engineer better solutions for biochemical applications. The lab's primary thrust is to enhance the use of high-throughput DNA sequencing technologies with pattern recognition and signal processing techniques. Applications include assessing the organism content of an environmental sample, recognizing/classifying potential and functional genes, inferring environmental factors and inter-species relationships, and inferring microbial evolutionary relationships from short-read DNA/RNA fragments. The lab also investigates higher-level biological systems such as modeling and controlling chemotaxis, the movement of cells.

Electric Power Engineering Center

This newly established facility makes possible state-of-the-art research in a wide variety of areas, ranging from detailed theoretical model study to experimental investigation in its high voltage laboratories. The mission is to advance and apply scientific and engineering knowledge associated with the generation, transmission, distribution, use, and conservation of electric power. In pursuing these goals, this center works with electric utilities, state and federal agencies, private industries, nonprofit organizations and other universities on a wide spectrum of

projects. Research efforts, both theoretical and experimental, focus on the solution of those problems currently faced by the electric power industry. Advanced concepts for electric power generation are also under investigation to ensure that electric power needs will be met at the present and in the future.

Electronic Design Automation Facility

Industrial-grade electronic design automation software suite and integrated design environment for digital, analog and mixed-signal systems development. Field Programmable Gate Array (FPGA) development hardware. Most up-to-date FPGA/embedded system development hardware kits. Printed circuit board production facility. Also see Drexel VLSI Laboratory.

Microwave-Photonics Device Laboratories

The laboratory is equipped with test and measurement equipment for high-speed analog and digital electronics and fiber optic systems. The test equipment includes network analyzers from Agilent (100kHz- 1.3 GHz and 45 MHz-40 GHz), and Anritsu (45 MHz-6 GHz); spectrum analyzers from Tektronix, HP, and Agilent with measurement capability of DC to 40 GHz and up to 90 GHz using external mixers; signal generators and communication channel modulators from HP, Rhode-Schwartz, Systron Donner, and Agilent; microwave power meter and sensor heads, assortment of passive and active microwave components up to 40 GHz ; data pattern generator and BER tester up to 3Gb/s; optical spectrum analyzer from Anritsu and power meters from HP; single and multimode fiber optic based optical transmitter and receiver boards covering ITU channels at data rates up to 10Gb/s; passive optical components such as isolator, filter, couplers, optical connectors and fusion splicer; LPKF milling machine for fabrication of printed circuit boards; wire-bonding and Cascade probe stations; Intercontinental test fixtures for testing of MMIC circuits and solid-state transistors; state-of-the-art microwave and electromagnetic CAD packages such as Agilent ADS, ANSYS HFSS, and COMSOL multi-physics module.

Multimedia & Information Security Lab [MISL]

The Multimedia and Information Security Lab (MISL) develops algorithms to detect fake images and videos, along with algorithms to determine the true source an image or video. This research is particularly important because widely available editing software enables multimedia forgers to create perceptually realistic forgeries. Our goal at MISL, is to conduct research that provides information verification and security in scenarios when an information source cannot be trusted.

The research conducted at MISL is part of a new area, known as multimedia forensics, which lies at the intersection of many areas in machine learning and artificial intelligence, signal processing, image and video processing, game theory, etc. Our algorithms work by identifying or learning visually imperceptible traces left in images and videos by processing operations. We use these traces to detect editing or forgery as well as to link an image or video back to the camera that captured it. We also perform research on anti-forensic operations designed to fool forensic techniques. By studying anti-forensics, researchers can identify and address weaknesses in existing forensic techniques as well as develop techniques capable of identifying the use of anti-forensics.

Music and Entertainment Technology Laboratory

The Music and Entertainment Technology Laboratory (MET-lab) is devoted to research in digital media technologies that will shape the future of entertainment, especially in the areas of sound and music.

We employ digital signal processing and machine learning to pursue novel applications in music information retrieval, music production and processing technology, and new music interfaces. The MET-lab is also heavily involved in outreach programs for K-12 students and hosts the Summer Music Technology program, a one-week learning experience for high school students. Lab facilities include a sound isolation booth for audio and music recording, a digital audio workstation running ProTools, two large multi-touch display interfaces of our own design, and a small computing cluster for distributed processing.

NanoPhotonics+ Lab

Our research is primarily in the area of nanophotonics with a focus on the nanoscale interaction of light with matter. Interests include: liquid crystal/polymer composites for gratings, lenses and HOEs; liquid crystal interactions with surfaces and in confined nanospaces; alternative energy generation through novel photon interactions; ink-jet printed conducting materials for RF and photonic applications; and the creation and development of smart textiles technologies including soft interconnects, sensors, and wireless implementations.

Opto-Electro-Mechanical Laboratory

This lab concentrates on the system integration on optics, electronics, and mechanical components and systems, for applications in imaging, communication, and biomedical research. Research areas include: Programmable Imaging with Optical Micro-electrical-mechanical systems (MEMS), in which microscopic mirrors are used to image light into a single photodetector; Pre-Cancerous Detection using White Light Spectroscopy, which performs a cellular size analysis of nuclei in tissue; Free-space Optical Communication using Space Time Coding, which consists of diffused light for computer-to-computer communications, and also tiny lasers and detectors for chip-to-chip communication; Magnetic Particle Locomotion, which showed that particles could swim in a uniform field; and Transparent Antennas using Polymer, which enables antennas to be printed through an ink-jet printer.

Plasma and Magnetics Laboratory

Research is focused on applications of electrical and magnetic technologies to biology and medicine. This includes the subjects of non-thermal atmospheric pressure plasma for medicine, magnetic manipulation of particles for drug delivery and bio-separation, development of miniature NMR sensors for cellular imaging and carbon nanotube cellular probes.

Power Electronics Research Laboratory

The Power Electronics Research Laboratory (PERL) is involved in circuit and design simulation, device modeling and simulation, and experimental testing and fabrication of power electronic circuits. The research and development activities include electrical terminations, power quality, solar photovoltaic systems, GTO modeling, protection and relay coordination, and solid-state circuit breakers. The analysis tools include EMPT, SPICE, and others, which have been modified to incorporate models of such controllable solid-state switches as SCRs, GTOs, and MOSFETs. These programs have a wide variety and range of modeling capabilities used to model electromagnetics and electromechanical transients ranging from microseconds to seconds in duration. The PERL is a fully equipped laboratory with 42 kVA AC and 70 kVA DC power sources and data acquisition systems, which have the ability to display and store data for detailed analysis. Some of the equipment available is a distribution and HV transformer and three phase rectifiers for power sources and digital oscilloscopes for data measuring and experimental analysis. Some of the

recent studies performed by the PERL include static VAR compensators, power quality of motor controllers, solid-state circuit breakers, and power device modeling which have been supported by PECO, GE, Gould, and EPRI.

RE Touch Lab

The RE Touch Lab is investigating the perceptual and mechanical basis of active touch perception, or haptics, and the development of new technologies for stimulating the sense of touch, allowing people to touch, feel, and interact with digital content as seamlessly as we do with objects in the real world. We study the scientific foundations of haptic perception and action, and the neuroscientific and biomechanical basis of touch, with a long-term goal of uncovering the fundamental perceptual and mechanical computations that enable haptic interaction. We also create new technologies for rendering artificial touch sensations that simulate those that are experienced when interacting with real objects, inspired by new findings on haptic perception.

Testbed for Power-Performance Management of Enterprise Computing Systems

This computing testbed is used to validate techniques and algorithms aimed at managing the performance and power consumption of enterprise computing systems. The testbed comprises a rack of Dell 2950 and Dell 1950 PowerEdge servers, as well as assorted desktop machines, networked via a gigabit switch. Virtualization of this cluster is enabled by VMWare's ESX Server running the Linux RedHat kernel. It also comprises of a rack of ten Apple Xserve machines networked via a gigabit switch. These servers run the OS X Leopard operating systems and have access to a RAID with TBs of total disk capacity.

Electrical Engineering Faculty

Tom Chmielewski, PhD (*Drexel University*). Teaching Professor. Modeling and simulation of electro-mechanical systems; optimal, adaptive and non-linear control; DC motor control; system identification; kalman filters (smoothing algorithms, tracking); image processing; robot design; biometric technology and design of embedded systems for control applications utilizing MATLAB and SIMULINK

Fernand Cohen, PhD (*Brown University*). Professor. Surface modeling; tissue characterization and modeling; face modeling; recognition and tracking.

Andrew Cohen, PhD (*Rensselaer Polytechnic Institute*). Associate Professor. Image processing; multi-target tracking; statistical pattern recognition and machine learning; algorithmic information theory; 5-D visualization

Kapil Dandekar, PhD (*University of Texas-Austin*) *Director of the Drexel Wireless Systems Laboratory (DWSL); Associate Dean of Research, College of Engineering*. Professor. Cellular/mobile communications and wireless LAN; smart antenna/MIMO for wireless communications; applied computational electromagnetics; microwave antenna and receiver development; free space optical communication; ultrasonic communication; sensor networks for homeland security; ultrawideband communication.

Afshin Daryoush, ScD (*Drexel University*). Professor. Digital and microwave photonics; nonlinear microwave circuits; RFIC; medical imaging.

Anup Das, PhD (*Universit of Singapore*). Assistant Professor. Design of algorithms for neuromorphic computing, particularly using spiking neural

networks, dataflow-based design of neuromorphic computing system, design of scalable computing system; hardware-software co-design and management, and thermal and power management of many-core embedded systems

Bruce A. Eisenstein, PhD (*University of Pennsylvania*). Arthur J. Rowland Professor of Electrical and Computer Engineering. Pattern recognition; estimation; decision theory.

Adam K. Fontecchio, PhD (*Brown University*) Director, Center for the Advancement of STEM Teaching and Learning Excellence (CASTLE). Professor. Electro-optics; remote sensing; active optical elements; liquid crystal devices.

Gary Friedman, PhD (*University of Maryland-College Park*) Associate Department Head for Graduate Affairs. Professor. Biological and biomedical applications of nanoscale magnetic systems.

Allon Guez, PhD (*University of Florida*). Professor. Intelligent control systems; robotics, biomedical, automation and manufacturing; business systems engineering.

Leonid Hrebien, PhD (*Drexel University*). Professor. Tissue excitability; acceleration effects on physiology; bioinformatics.

Nagarajan Kandasamy, PhD (*University of Michigan*) Associate Department Head for Undergraduate Affairs. Associate Professor. Embedded systems, self-managing systems, reliable and fault-tolerant computing, distributed systems, computer architecture, and testing and verification of digital systems.

Youngmoo Kim, PhD (*MIT*) Director, Expressive and Creative Interactive Technologies (ExCITE) Center. Professor. Audio and music signal processing, voice analysis and synthesis, music information retrieval, machine learning.

Fei Lu, PhD (*University of Michigan*). Assistant Professor. Power electronics; wireless power transfer technology for the high-power electric vehicles and the low-power electronic devices.

Karen Miu, PhD (*Cornell University*). Professor. Power systems; distribution networks; distribution automation; optimization; system analysis.

Bahram Nabet, PhD (*University of Washington*). Professor. Optoelectronics; fabrication and modeling; fiber optic devices; nanoelectronics; nanowires.

Prawat Nagvajara, PhD (*Boston University*). Associate Professor. System on a chip; embedded systems; power grid computation; testing of computer hardware; fault-tolerant computing; VLSI systems; error control coding.

Dagmar Niebur, PhD (*Swiss Federal Institute of Technology*). Associate Professor. Intelligent systems; dynamical systems; power system monitoring and control.

Christopher Peters, PhD (*University of Michigan*). Teaching Professor. Nuclear reactor design; ionizing radiation detection; nuclear forensics; power plant reliability and risk analysis; naval/marine power and propulsion; directed energy/high power microwaves; nonstationary signal processing; radar; electronic survivability/susceptibility to harsh environments; electronic warfare

Gail L. Rosen, PhD (*Georgia Institute of Technology*). Associate Professor. Signal processing, signal processing for biological analysis and modeling, bio-inspired designs, source localization and tracking.

Ioannis Savidis, PhD (*University of Rochester*). Associate Professor. Analysis, modeling, and design methodologies for high performance digital and mixed-signal integrated circuits; Emerging integrated circuit technologies; Electrical and thermal modeling and characterization, signal and power integrity, and power and clock delivery for 3-D IC technologies

Kevin J. Scoles, PhD (*Dartmouth College*) Associate Dean for Undergraduate Affairs. Associate Professor. Microelectronics; electric vehicles; solar energy; biomedical electronics.

Harish Sethu, PhD (*Lehigh University*). Associate Professor. Protocols, architectures and algorithms in computer networks; computer security; mobile ad hoc networks; large-scale complex adaptive networks and systems.

James Shackelford, PhD (*Drexel University*). Associate Professor. Medical image processing, high performance computing, embedded systems, computer vision, machine learning

P. Mohana Shankar, PhD (*Indian Institute of Technology*) Allen Rothwarf Professor of Electrical and Computer Engineering. Professor. Wireless communications; biomedical ultrasonics; fiberoptic bio-sensors.

Jonathan E. Spanier, PhD (*Columbia University*) Department Head, Mechanical Engineering and Mechanics. Professor. Light-matter interactions in electronic materials, including ferroelectric semiconductors, complex oxide thin film science; laser spectroscopy, including Raman scattering.

Matthew Stamm, PhD (*University of Maryland, College Park*). Associate Professor. Information Security; multimedia forensics and anti-forensics; information verification; adversarial dynamics; signal processing

Baris Taskin, PhD (*University of Pittsburgh*). Professor. Very large-scale integration (VLSI) systems, computer architecture, circuits and systems, electronic design automation (EDA), energy efficient computing.

John Walsh, PhD (*Cornell University*). Associate Professor. Bounding the region of entropic vectors and its implications for the limits of communication networks, big data distributed storage systems, and graphical model based machine learning; efficient computation and analysis of rate regions for network coding and distributed storage; code construction, polyhedral computation, hierarchy, and symmetry

Steven Weber, PhD (*University of Texas-Austin*) Department Head. Professor. Mathematical modeling of computer and communication networks, specifically streaming multimedia and ad hoc networks.

Jauelice de Oliveira, PhD (*Georgia Institute of Technology*). Associate Professor. Software-defined networking; social and economic networks; network security; design and analysis of protocols, algorithms and architectures in computer networks, particularly solutions for the Internet of Things

Emeritus Faculty

Eli Fromm, PhD (*Jefferson Medical College*). Professor Emeritus. Engineering education; academic research policy; bioinstrumentation; physiologic systems.

Edwin L. Gerber, PhD (*University of Pennsylvania*). Professor Emeritus. Computerized instruments and measurements; undergraduate engineering education.

Electrical Engineering/ Telecommunications Engineering

Major: Electrical/Telecommunications Engineering

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS) or 90.0 (PhD)

Co-op Option: Available for full-time on-campus master's-level students

Classification of Instructional Programs (CIP) code: 14.1001; 14.1004

Standard Occupational Classification (SOC) code: 15-1143; 17-2071

About the Program

Drexel University's Electrical and Computer Engineering Department prepares students to contribute to advances in the rapidly changing field of telecommunications by providing advanced studies as part of the Master of Science (MS) in Electrical and Telecommunications Engineering degree program. The MS in Electrical and Telecommunications Engineering combines the expertise of its faculty in electrical and computer engineering, business, information systems, and humanities. Through its interdisciplinary approach, Drexel's Telecommunications Engineering program trains and nurtures the complete telecommunications engineer.

The MS in Electrical Engineering/Telecommunications Engineering degree is awarded to students who demonstrate in-depth knowledge of the field. The average time required to complete the master's degree is two years of full-time study or three years of part-time study.

A graduate co-op is available for the Master of Science program. For more information, visit the Steinbright Career Development Center's website (<http://www.drexel.edu/scdc/co-op/graduate/>).

For more information, visit the Department of Electrical and Computer Engineering' (<https://drexel.edu/engineering/academics/departments/electrical-computer-engineering/academic-programs/graduate/ms/electrical-and-telecommunications-engineering/>)s web site.

Admission Requirements

Applicants must meet the general requirements for graduate admission, which include at least a 3.0 GPA for the last two years of undergraduate study and for any graduate level study undertaken, and are required to hold a bachelor of science degree in electrical engineering or a related field. Applicants whose undergraduate degrees are not in the field of electrical engineering may be required to take a number of undergraduate courses. The GRE General Test is required of applicants for full-time MS and PhD programs. Applicants whose native language is not English and who do not have a previous degree from a US institution are required to take the Test of English as a Foreign Language (TOEFL).

For additional information on how to apply, visit Drexel's Admissions page for Electrical-Telecommunications Engineering (<http://www.drexel.edu/grad/programs/coe/electrical-telecommunications/>).

MS in Electrical and Telecommunications Engineering

The Master of Science in Electrical and Telecommunications Engineering curriculum encompasses 45.0 or 48.0 (with the Graduate Co-Op) approved credit hours, chosen in accordance with the following requirements and a plan of study arranged with the departmental graduate advisor in consultation with the student's research advisor (if applicable). This plan of study must be filed in the Department of Electrical and Computer Engineering and approved with the departmental graduate advisor before the end of the first quarter for a full-time student, or by the end of the first year for a part-time student.

Degree Requirements

A total of at least 30.0 credit hours must be taken from among the graduate course offerings of the Department of Electrical and Computer Engineering. These credits must be taken at Drexel University. No transfer credit may be used to fulfill these requirements, regardless of content equivalency.

Telecommunications Engineering (ECET) Courses	6.0
Telecommunications Engineering Elective (ECEC, ECEE, ECES, ECET) Courses	15.0
General Electrical and Computer Engineering (ECEC, ECEE, ECEP, ECES, ECET) Courses	9.0
Elective Courses	15.0
Total Credits	45.0

With the remaining required 15.0 credit hours, students may take graduate coursework, subject to the approval of the departmental graduate advisor, in electrical and computer engineering, mathematics, physics or other engineering disciplines.

In addition, students pursuing an MS in Electrical and Telecommunications Engineering are allowed and strongly encouraged to take the following course as part of their required 15.0 credit hours:

- COM 650 *Telecommunications Policy in the Information Age*

Although not required, students are encouraged to complete a master's thesis as part of the MS studies. Those students who choose the thesis option may count up to 9.0 research/thesis credits as part of their required credit hour requirements.

Graduate Co-op Program

Students may choose to participate in the Graduate Co-op Program, where 6.0 credit hours can be earned for a six month cooperative education experience in industry, working on curriculum related projects. The total number of required credit hours is increased to 48.0 for those students who choose to pursue the Graduate Co-op option. This change represents an increase in non-departmental required credit hours to a total of 18.0 credit hours, 6.0 of which are earned from the cooperative education experience.

Please note that ECEC 500 *Fundamentals of Computer Hardware* and ECEC 600 *Fundamentals of Computer Networks* do **not** count toward the credit requirements to complete the MS in Electrical Engineering degree program.

For more information on curricular requirements, visit the Department of Electrical and Computer Engineering (<http://www.ece.drexel.edu/>)'s web site.

PhD in Electrical Engineering

General Requirements

The following general requirements must be satisfied in order to complete the PhD in Electrical Engineering:

- 90.0 credit hours total
- candidacy examination
- research proposal
- dissertation defense

Students entering with a master's degree in electrical or computer engineering or a related field will be considered a post-masters PhD student and will only be required to complete a total of 45.0 credit hours, in accordance with University policy.

Curriculum

Appropriate coursework is chosen in consultation with the student's research advisor. A plan of study must be developed by the student to encompass the total number of required credit hours. Both the departmental graduate advisor and the student's research advisor must approve this plan.

Candidacy Examination

The candidacy examination explores the depth of understanding of the student in his/her specialty area. The student is expected to be familiar with, and be able to use, the contemporary tools and techniques of the field and to demonstrate familiarity with the principal results and key findings.

The student, in consultation with his/her research advisor, will declare a principal technical area for the examination. The examination includes the following three parts:

- A self-study of three papers from the archival literature in the student's stated technical area, chosen by the committee in consultation with the student.
- A written report (15 pages or less) on the papers, describing their objectives, key questions and hypotheses, methodology, main results and conclusions. Moreover, the student must show in an appendix independent work he/she has done on at least one of the papers – such as providing a full derivation of a result or showing meaningful examples, simulations or applications.
- An oral examination which takes the following format:
 - A short description of the student's principal area of interest (5 minutes, by student).
 - A review of the self-study papers and report appendix (25-30 minutes, by student).
 - Questions and answers on the report, the appendix and directly related background (40-100 minutes, student and committee).

In most cases, the work produced during the candidacy examination will be a principal reference for the student's PhD dissertation; however, this is not a requirement.

Research Proposal

After having attained the status of PhD Candidate, each student must present a research proposal to a committee of faculty and industry members, chosen with his/her research advisor, who are knowledgeable in the specific area of research. This proposal should outline the specific

intended subject of study, i.e., it should present a problem statement, pertinent background, methods of study to be employed, expected difficulties and uncertainties and the anticipated form, substance and significance of the results.

The purpose of this presentation is to verify suitability of the dissertation topic and the candidate's approach, and to obtain the advice and guidance of oversight of mature, experienced investigators. It is not to be construed as an examination, though approval by the committee is required before extensive work is undertaken. The thesis proposal presentation must be open to all; announcements regarding the proposal presentation must be made in advance.

The thesis advisory committee will have the sole responsibility of making any recommendations regarding the research proposal. It is strongly recommended that the proposal presentation be given as soon as possible after the successful completion of the candidacy examination. The student must be a PhD candidate for at least one year before he/she can defend his/her doctoral thesis.

Dissertation Defense

Dissertation Defense procedures are described in the Graduate College of Drexel University (<http://www.drexel.edu/graduatecollege/>) policies regarding Doctor of Philosophy Program Requirements. The student must be a PhD candidate for at least one year before he/she can defend his/her doctoral thesis.

Dual Degree

The ECE Department offers outstanding students the opportunity to receive two diplomas (BS and MS) at the same time. The program requires five (5) years to complete. Participants, who are chosen from the best undergraduates students, work with a faculty member on a research project and follow a study plan that includes selected graduate classes. This program prepares individuals for careers in research and development; many of its past graduates continued their studies toward a PhD.

Facilities

Drexel University and the Electrical and Computer Engineering Department are nationally recognized for a strong history of developing innovative research. Research programs in the ECE Department prepare students for careers in research and development, and aim to endow graduates with the ability to identify, analyze, and address new technical and scientific challenges. The ECE Department is well equipped with state-of-the-art facilities in each of the following ECE Research laboratories:

Research Laboratories at the ECE Department

Adaptive Signal Processing and Information Theory Research Group

The Adaptive Signal Processing and Information Theory Research Group conducts research in the area of signal processing and information theory. Our main interests are belief/expectation propagation, turbo decoding and composite adaptive system theory. We are currently doing projects on the following topics:

- Delay mitigating codes for network coded systems,
- Distributed estimation in sensor networks via expectation propagation,
- Turbo speaker identification,
- Performance and convergence of expectation propagation,

v) Investigating bounds for SINR performance of autocorrelation based channel shorteners.

Applied Networking Research Lab

Applied Networking Research Lab (ANRL) projects focus on modeling and simulation as well as experimentation in wired, wireless and sensor networks. ANRL is the home of MuTANT, a Multi-Protocol Label Switched Traffic Engineering and Analysis Testbed composed of 10 high-end Cisco routers and several PC-routers, also used to study other protocols in data networks as well as automated network configuration and management. The lab also houses a sensor network testbed.

Bioimage Laboratory

Uses computer gaming hardware for enhanced and affordable 3-D visualization, along with techniques from information theory and machine learning to combine the exquisite capabilities of the human visual system with computational sensing techniques for analyzing vast quantities of image sequence data.

Data Fusion Laboratory

The Data Fusion Laboratory investigates problems in multisensory detection and estimation, with applications in robotics, digital communications, radar, and target tracking. Among the projects in progress: computationally efficient parallel distributed detection architectures, data fusion for robot navigation, modulation recognition and RF scene analysis in time-varying environments, pattern recognition in biological data sequences and large arrays, and hardware realizations of data fusion architectures for target detection and target tracking.

Drexel Network Modeling Laboratory

The Drexel Network Modeling Laboratory investigates problems in the mathematical modeling of communication networks, with specific focus on wireless ad hoc networks, wireless sensor networks, and supporting guaranteed delivery service models on best effort and multipath routed networks. Typical methodologies employed in our research include mathematical modeling, computer simulation, and performance optimization, often with the end goal of obtaining meaningful insights into network design principles and fundamental performance tradeoffs.

Drexel Power-Aware Computing Laboratory

The Power-Aware Computing Lab (<http://dpac.ece.drexel.edu/>) investigates methods to increase energy efficiency across the boundaries of circuits, architecture, and systems. Our recent accomplishments include the Sigil profiling tool, scalable modeling infrastructure for accelerator implementations, microarchitecture-aware VDD gating algorithms, an accelerator architecture for ultrasound imaging, evaluation of hardware reference counting, hardware and operating system support for power-agile computing, and memory systems for accelerator-based architectures.

Drexel University Nuclear Engineering Education Laboratory

The field of nuclear engineering encompasses a wide spectrum of occupations, including nuclear reactor design, medical imaging, homeland security, and oil exploration. The Drexel University Nuclear Engineering Education Laboratory (DUNEEL) provides fundamental hands on understanding for power plant design and radiation detection and analysis. Software based study for power plant design, as well as physical laboratory equipment for radiation detection, strengthen the underlying concepts used in nuclear engineering such that the student will

comprehend and appreciate the basic concepts and terminology used in various nuclear engineering professions. Additionally, students use the laboratory to develop methods for delivering remote, live time radiation detection and analysis. The goal of DUNEEL is to prepare students for potential employment in the nuclear engineering arena.

Drexel VLSI Laboratory

The Drexel VLSI Laboratory investigates problems in the design, analysis, optimization and manufacturing of high performance (low power, high throughput) integrated circuits in contemporary CMOS and emerging technologies. Suited with industrial design tools for integrated circuits, simulation tools and measurement beds, the VLSI group is involved with digital and mixed-signal circuit design to verify the functionality of the discovered novel circuit and physical design principles. The Drexel VLSI laboratory develops design methodologies and automation tools in these areas, particularly in novel clocking techniques, featuring resonant clocking, and interconnects, featuring wireless interconnects.

Drexel Wireless Systems Laboratory

The Drexel Wireless Systems Laboratory (DWSL) contains an extensive suite of equipment for constructing, debugging, and testing prototype wireless communications systems. Major equipment within DWSL includes:

- three software defined radio network testbeds (HYDRA, USRP, and WARP) for rapidly prototyping radio, optical and ultrasonic communications systems,
- a TDK RF anechoic chamber and EMSCAN desktop antenna pattern measurement system,
- a materials printer and printed circuit board milling machine for fabricating conformal antennas and
- wireless protocol conformance testing equipment from Aeroflex.

The lab is also equipped with network analyzers, high speed signal generators, oscilloscopes, and spectrum analyzers as well as several Zigbee development platforms for rapidly prototyping sensor networks.

DWSL personnel also collaborate to create wearable, fabric based transceivers through collaboration with the Shima Seiki Haute Laboratory in the Drexel ExCITe Center. The knitting equipment at Drexel includes sixteen SDS-ONE APEX3 workstations and four state-of-the-art knitting machines. The workstations accurately simulate fabric construction and provide researchers and designers the opportunity to program, create and simulate textile prototypes, import CAD specifications of final products, and produce made-to-measure or mass-produced pieces on Shima Seiki knitting machines. For testing smart textiles for biomedical, DWSL personnel also have collaborators in the Center for Interdisciplinary Clinical Simulation and Practice (CICSP) in the Drexel College of Medicine which provides access to medical mannequin simulators.

Ecological and Evolutionary Signal-processing and Informatics Laboratory

The Ecological and Evolutionary Signal-processing and Informatics Laboratory (EESI) seeks to solve problems in high-throughput genomics and engineer better solutions for biochemical applications. The lab's primary thrust is to enhance the use of high-throughput DNA sequencing technologies with pattern recognition and signal processing techniques. Applications include assessing the organism content of an environmental sample, recognizing/classifying potential and functional genes, inferring environmental factors and inter-species relationships, and inferring microbial evolutionary relationships from short-read DNA/RNA fragments.

The lab also investigates higher-level biological systems such as modeling and controlling chemotaxis, the movement of cells.

Electric Power Engineering Center

This newly established facility makes possible state-of-the-art research in a wide variety of areas, ranging from detailed theoretical model study to experimental investigation in its high voltage laboratories. The mission is to advance and apply scientific and engineering knowledge associated with the generation, transmission, distribution, use, and conservation of electric power. In pursuing these goals, this center works with electric utilities, state and federal agencies, private industries, nonprofit organizations and other universities on a wide spectrum of projects. Research efforts, both theoretical and experimental, focus on the solution of those problems currently faced by the electric power industry. Advanced concepts for electric power generation are also under investigation to ensure that electric power needs will be met at the present and in the future.

Electronic Design Automation Facility

Industrial-grade electronic design automation software suite and integrated design environment for digital, analog and mixed-signal systems development. Field Programmable Gate Array (FPGA) development hardware. Most up-to-date FPGA/embedded system development hardware kits. Printed circuit board production facility. Also see Drexel VLSI Laboratory.

Microwave-Photonics Device Laboratories

The laboratory is equipped with test and measurement equipment for high-speed analog and digital electronics and fiber optic systems. The test equipment includes network analyzers from Agilent (100kHz- 1.3 GHz and 45 Mhz-40 GHz), and Anritsu (45 MHz-6 GHz); spectrum analyzers from Tektronix, HP, and Agilent with measurement capability of DC to 40 GHz and up to 90 GHz using external mixers; signal generators and communication channel modulators from HP, Rhode-Schwartz, Systron Donner, and Agilent; microwave power meter and sensor heads, assortment of passive and active microwave components up to 40 GHz ; data pattern generator and BER tester up to 3Gb/s; optical spectrum analyzer from Anritsu and power meters from HP; single and multimode fiber optic based optical transmitter and receiver boards covering ITU channels at data rates up to 10Gb/s; passive optical components such as isolator, filter, couplers, optical connectors and fusion splicer; LPKF milling machine for fabrication of printed circuit boards; wire-bonding and Cascade probe stations; Intercontinental test fixtures for testing of MMIC circuits and solid-state transistors; state-of-the-art microwave and electromagnetic CAD packages such as Agilent ADS, ANSYS HFSS, and COMSOL multi-physics module.

Music and Entertainment Technology Laboratory

The Music and Entertainment Technology Laboratory (MET-lab) is devoted to research in digital media technologies that will shape the future of entertainment, especially in the areas of sound and music. We employ digital signal processing and machine learning to pursue novel applications in music information retrieval, music production and processing technology, and new music interfaces. The MET-lab is also heavily involved in outreach programs for K-12 students and hosts the Summer Music Technology program, a one-week learning experience for high school students. Lab facilities include a sound isolation booth for audio and music recording, a digital audio workstation running ProTools,

two large multi-touch display interfaces of our own design, and a small computing cluster for distributed processing.

NanoPhotonics+ Lab

Our research is primarily in the area of nanophotonics with a focus on the nanoscale interaction of light with matter. Interests include: liquid crystal/polymer composites for gratings, lenses and HOEs; liquid crystal interactions with surfaces and in confined nanospaces; alternative energy generation through novel photon interactions; ink-jet printed conducting materials for RF and photonic applications; and the creation and development of smart textiles technologies including soft interconnects, sensors, and wireless implementations.

Opto-Electro-Mechanical Laboratory

This lab concentrates on the system integration on optics, electronics, and mechanical components and systems, for applications in imaging, communication, and biomedical research. Research areas include: Programmable Imaging with Optical Micro-electrical-mechanical systems (MEMS), in which microscopic mirrors are used to image light into a single photodetector; Pre-Cancerous Detection using White Light Spectroscopy, which performs a cellular size analysis of nuclei in tissue; Free-space Optical Communication using Space Time Coding, which consists of diffused light for computer-to-computer communications, and also tiny lasers and detectors for chip-to-chip communication; Magnetic Particle Locomotion, which showed that particles could swim in a uniform field; and Transparent Antennas using Polymer, which enables antennas to be printed through an ink-jet printer.

Plasma and Magnetics Laboratory

Research is focused on applications of electrical and magnetic technologies to biology and medicine. This includes the subjects of non-thermal atmospheric pressure plasma for medicine, magnetic manipulation of particles for drug delivery and bio-separation, development of miniature NMR sensors for cellular imaging and carbon nanotube cellular probes.

Power Electronics Research Laboratory

The Power Electronics Research Laboratory (PERL) is involved in circuit and design simulation, device modeling and simulation, and experimental testing and fabrication of power electronic circuits. The research and development activities include electrical terminations, power quality, solar photovoltaic systems, GTO modeling, protection and relay coordination, and solid-state circuit breakers. The analysis tools include EMPT, SPICE, and others, which have been modified to incorporate models of such controllable solid-state switches as SCRs, GTOs, and MOSFETs. These programs have a wide variety and range of modeling capabilities used to model electromagnetics and electromechanical transients ranging from microseconds to seconds in duration. The PERL is a fully equipped laboratory with 42 kVA AC and 70 kVA DC power sources and data acquisition systems, which have the ability to display and store data for detailed analysis. Some of the equipment available is a distribution and HV transformer and three phase rectifiers for power sources and digital oscilloscopes for data measuring and experimental analysis. Some of the recent studies performed by the PERL include static VAR compensators, power quality of motor controllers, solid-state circuit breakers, and power device modeling which have been supported by PECO, GE, Gould, and EPRI.

RE Touch Lab

The RE Touch Lab is investigating the perceptual and mechanical basis of active touch perception, or haptics, and the development of new technologies for stimulating the sense of touch, allowing people to touch, feel, and interact with digital content as seamlessly as we do with objects in the real world. We study the scientific foundations of haptic perception and action, and the neuroscientific and biomechanical basis of touch, with a long-term goal of uncovering the fundamental perceptual and mechanical computations that enable haptic interaction. We also create new technologies for rendering artificial touch sensations that simulate those that are experienced when interacting with real objects, inspired by new findings on haptic perception.

Testbed for Power-Performance Management of Enterprise Computing Systems

This computing testbed is used to validate techniques and algorithms aimed at managing the performance and power consumption of enterprise computing systems. The testbed comprises a rack of Dell 2950 and Dell 1950 PowerEdge servers, as well as assorted desktop machines, networked via a gigabit switch. Virtualization of this cluster is enabled by VMWare's ESX Server running the Linux RedHat kernel. It also comprises of a rack of ten Apple Xserve machines networked via a gigabit switch. These servers run the OS X Leopard operating systems and have access to a RAID with TBs of total disk capacity.

Electrical Engineering Faculty

Tom Chmielewski, PhD (*Drexel University*). Teaching Professor. Modeling and simulation of electro-mechanical systems; optimal, adaptive and non-linear control; DC motor control; system identification; kalman filters (smoothing algorithms, tracking); image processing; robot design; biometric technology and design of embedded systems for control applications utilizing MATLAB and SIMULINK

Fernand Cohen, PhD (*Brown University*). Professor. Surface modeling; tissue characterization and modeling; face modeling; recognition and tracking.

Andrew Cohen, PhD (*Rensselaer Polytechnic Institute*). Associate Professor. Image processing; multi-target tracking; statistical pattern recognition and machine learning; algorithmic information theory; 5-D visualization

Kapil Dandekar, PhD (*University of Texas-Austin*) Director of the *Drexel Wireless Systems Laboratory (DWSL)*; Associate Dean of Research, *College of Engineering*. Professor. Cellular/mobile communications and wireless LAN; smart antenna/MIMO for wireless communications; applied computational electromagnetics; microwave antenna and receiver development; free space optical communication; ultrasonic communication; sensor networks for homeland security; ultrawideband communication.

Afshin Daryoush, ScD (*Drexel University*). Professor. Digital and microwave photonics; nonlinear microwave circuits; RFIC; medical imaging.

Anup Das, PhD (*Universit of Singapore*). Assistant Professor. Design of algorithms for neuromorphic computing, particularly using spiking neural networks, dataflow-based design of neuromorphic computing system, design of scalable computing system; hardware-software co-design and management, and thermal and power management of many-core embedded systems

Bruce A. Eisenstein, PhD (*University of Pennsylvania*). Arthur J. Rowland Professor of Electrical and Computer Engineering. Pattern recognition; estimation; decision theory.

Adam K. Fontecchio, PhD (*Brown University*) Director, *Center for the Advancement of STEM Teaching and Learning Excellence (CASTLE)*. Professor. Electro-optics; remote sensing; active optical elements; liquid crystal devices.

Gary Friedman, PhD (*University of Maryland-College Park*) Associate Department Head for Graduate Affairs. Professor. Biological and biomedical applications of nanoscale magnetic systems.

Allon Guez, PhD (*University of Florida*). Professor. Intelligent control systems; robotics, biomedical, automation and manufacturing; business systems engineering.

Leonid Hrebien, PhD (*Drexel University*). Professor. Tissue excitability; acceleration effects on physiology; bioinformatics.

Nagarajan Kandasamy, PhD (*University of Michigan*) Associate Department Head for Undergraduate Affairs. Associate Professor. Embedded systems, self-managing systems, reliable and fault-tolerant computing, distributed systems, computer architecture, and testing and verification of digital systems.

Youngmoo Kim, PhD (*MIT*) Director, *Expressive and Creative Interactive Technologies (ExCITe) Center*. Professor. Audio and music signal processing, voice analysis and synthesis, music information retrieval, machine learning.

Fei Lu, PhD (*University of Michigan*). Assistant Professor. Power electronics; wireless power transfer technology for the high-power electric vehicles and the low-power electronic devices.

Karen Miu, PhD (*Cornell University*). Professor. Power systems; distribution networks; distribution automation; optimization; system analysis.

Bahram Nabet, PhD (*University of Washington*). Professor. Optoelectronics; fabrication and modeling; fiber optic devices; nanoelectronics; nanowires.

Prawat Nagvajara, PhD (*Boston University*). Associate Professor. System on a chip; embedded systems; power grid computation; testing of computer hardware; fault-tolerant computing; VLSI systems; error control coding.

Dagmar Niebur, PhD (*Swiss Federal Institute of Technology*). Associate Professor. Intelligent systems; dynamical systems; power system monitoring and control.

Christopher Peters, PhD (*University of Michigan*). Teaching Professor. Nuclear reactor design; ionizing radiation detection; nuclear forensics; power plant reliability and risk analysis; naval/marine power and propulsion; directed energy/high power microwaves; nonstationary signal processing; radar; electronic survivability/susceptibility to harsh environments; electronic warfare

Gail L. Rosen, PhD (*Georgia Institute of Technology*). Associate Professor. Signal processing, signal processing for biological analysis and modeling, bio-inspired designs, source localization and tracking.

Ioannis Savidis, PhD (*University of Rochester*). Associate Professor. Analysis, modeling, and design methodologies for high performance digital and mixed-signal integrated circuits; Emerging integrated circuit

technologies; Electrical and thermal modeling and characterization, signal and power integrity, and power and clock delivery for 3-D IC technologies

Kevin J. Scoles, PhD (*Dartmouth College*) Associate Dean for Undergraduate Affairs. Associate Professor. Microelectronics; electric vehicles; solar energy; biomedical electronics.

Harish Sethu, PhD (*Lehigh University*). Associate Professor. Protocols, architectures and algorithms in computer networks; computer security; mobile ad hoc networks; large-scale complex adaptive networks and systems.

James Shackelford, PhD (*Drexel University*). Associate Professor. Medical image processing, high performance computing, embedded systems, computer vision, machine learning

P. Mohana Shankar, PhD (*Indian Institute of Technology*) Allen Rothwarf Professor of Electrical and Computer Engineering. Professor. Wireless communications; biomedical ultrasonics; fiberoptic bio-sensors.

Jonathan E. Spanier, PhD (*Columbia University*) Department Head, Mechanical Engineering and Mechanics. Professor. Light-matter interactions in electronic materials, including ferroelectric semiconductors, complex oxide thin film science; laser spectroscopy, including Raman scattering.

Matthew Stamm, PhD (*University of Maryland, College Park*). Associate Professor. Information Security; multimedia forensics and anti-forensics; information verification; adversarial dynamics; signal processing

Baris Taskin, PhD (*University of Pittsburgh*). Professor. Very large-scale integration (VLSI) systems, computer architecture, circuits and systems, electronic design automation (EDA), energy efficient computing.

John Walsh, PhD (*Cornell University*). Associate Professor. Bounding the region of entropic vectors and its implications for the limits of communication networks, big data distributed storage systems, and graphical model based machine learning; efficient computation and analysis of rate regions for network coding and distributed storage; code construction, polyhedral computation, hierarchy, and symmetry

Steven Weber, PhD (*University of Texas-Austin*) Department Head. Professor. Mathematical modeling of computer and communication networks, specifically streaming multimedia and ad hoc networks.

Jaudelice de Oliveira, PhD (*Georgia Institute of Technology*). Associate Professor. Software-defined networking; social and economic networks; network security; design and analysis of protocols, algorithms and architectures in computer networks, particularly solutions for the Internet of Things

Emeritus Faculty

Eli Fromm, PhD (*Jefferson Medical College*). Professor Emeritus. Engineering education; academic research policy; bioinstrumentation; physiologic systems.

Edwin L. Gerber, PhD (*University of Pennsylvania*). Professor Emeritus. Computerized instruments and measurements; undergraduate engineering education.

Master of Engineering

Major: Engineering
Degree Awarded: Master of Engineering (ME)

Calendar Type: Quarter

Total Credit Hours: 48.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 14.0101

Standard Occupational Classification (SOC) code: 17.2199

About the Program

This ME program is a highly customizable program primarily used for international and visiting students studying engineering at Drexel whose plan of study must be customized. This program may be offered by any department and will be reviewed by the department Advisor to make certain the plan of study meets degree requirements.

The ME program offers wide flexibility for those students who wish to combine technical and nontechnical study with hands-on experience in industry and laboratory research. This degree program may not be the best choice for those who wish to earn a PhD in Engineering.

Admission Requirements

This program allows for maximum flexibility for international visiting students and students on study abroad. In addition to meeting requirements for graduate admission, which include at least a 3.0 GPA for the last two years of undergraduate study and for any graduate study, applicants must hold a bachelor's degree in engineering from an accredited institution or an equivalent. Students whose background is in science or mathematics may be accepted to the program, but they will be required to take undergraduate engineering courses.

Although the Graduate Record Examination (GRE) is not required for admission, it may be required of students interested in a teaching or research assistantship. Applicants whose native language is not English and who do not have previous degrees from a U.S. institution are required to submit scores of at least 550 on the Test of English as a Foreign Language (TOEFL).

Degree Requirements

Students take a series of core and elective courses. Students work closely with and advisor to develop an individualized plan of study. This is a highly customizable degree program and may include a mix of courses, Co-op, research and thesis. The average time required to complete the master's degree is two years of full-time study or three years of part-time study. This is primarily used for visiting students.

Degree Requirements

The degree requires a total of 48.0 credits, including at least 18.0 credits from an engineering discipline core. This core may be from any engineering department: Civil and Architectural, Chemical, Electrical and Computer, Materials, or Mechanical Engineering and Mechanics. (Please refer to the appropriate departmental description in this catalog for more information about each department.) The department Advisor will work closely with the student to develop an plan of study that meets the program requirements.

Engineering Management

Major: Engineering Management

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 15.1501
Standard Occupational Classification (SOC) code: 11-9041

About the Program

In our increasingly complex, technologically oriented economy, demand has risen for professionals with the expertise to manage both human and technological resources: a combination of talents crucial to organizations competing in the global marketplace. Students graduating with the master's in engineering management are significantly better positioned to meet the challenge.

The Engineering Management Program (<http://www.drexel.edu/egmt/>) is designed to provide the background in management science necessary to advance from purely technical positions to supervisory responsibilities in such areas as research and development, production, engineering, design, and technical marketing. Study can be on a part-time or full-time basis, and courses are available both online and face to face.

Engineering management is a multidisciplinary program offering a core curriculum and specialization in a selected area of technology or management. Majors in engineering management should hold a bachelor's degree in engineering, basic science, or a related field. The program is open to those professionals who aspire to be engineering or technically based managers.

Certificate Opportunity

The Engineering Management Program offers a five-course Graduate Certificate in Engineering Management (<http://catalog.drexel.edu/graduate/collegeofengineering/engineeringmanagementpbc/>).

Students can pursue the Graduate Certificate in Engineering Management, earn the credential, and subsequently apply those credits toward completion of a master's in engineering management. However, current students in pursuit of the master's in engineering management may not simultaneously pursue the graduate certificate.

Non-engineering management graduate students in the College of Engineering are welcome to apply for the certificate with advisor approval, and they can do so while simultaneously pursuing their primary degree.

Additional Information

For more information about the program, visit the Engineering Management (<http://online.drexel.edu/online-degrees/engineering-degrees/ms-egmt/>) program page.

Admission Requirements

Admission to this program requires:

- A four-year bachelor of science degree in engineering from an ABET-accredited institution in the United States or an equivalent international institution. Bachelor's degrees in math or the physical sciences may also be considered for admission.
- Minimum cumulative undergraduate GPA of 3.0. If any other graduate work has been completed, the average GPA must be at least 3.0.
- Complete graduate school application.
- Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended.
- Two letters of recommendation, professional or academic (at least one professional).
- Resume

- A personal statement explaining why you wish to earn the degree and why you are prepared to succeed.
- International students must submit an Internet-based TOEFL (IBT = score of 94 or higher).

At least three years of relevant professional work experience are recommended but not required.

Interested students should complete the Drexel University Online admission application (<http://online.drexel.edu/online-degrees/engineering-degrees/ms-egmt/#admissionscriteria>) for admission into this online program.

Degree Requirements

The master's in engineering management degree requires 45.0 credits: 30.0 credits in required core courses and 15.0 graduate elective credits.

Students may take their required elective credits from any graduate-level course(s) in engineering, business, or another college for which they have adequate preparation and can obtain approvals from the college and the engineering management program.

All candidates are encouraged to discuss areas of interest with the program advisor and to develop a proposed plan of study during the early stages of the program.

Note: Specific course requirements may be waived for students who have taken equivalent courses elsewhere.

Engineering Management

EGMT 501	Leading and Managing Technical Workers	3.0
EGMT 502	Analysis and Decision Methods for Technical Managers	3.0
EGMT 504	Design Thinking for Engineering Communications	3.0
EGMT 581	Meeting Engineering Leadership Challenges	3.0

Quantitative Analysis

EGMT 571	Engineering Statistics	3.0
EGMT 572	Statistical Data Analysis *	3.0
EGMT 573	Operations Research	3.0

Economics and Financial Management

EGMT 531	Engineering Economic Evaluation & Analysis	3.0
EGMT 535	Financial Management	3.0

Engineering Management Capstone

EGMT 692	Engineering Management Capstone	3.0
----------	---------------------------------	-----

Electives

Select five of the following electives: ** 15.0

EGMT 536	Advanced Financial Management for Engineers	
EGMT 650	Systems Thinking for Leaders	

Marketing & Business Development

EGMT 614	Marketing: Identifying Customer Needs	
EGMT 615	New Product Conceptualization, Justification, and Implementation	
EGMT 616	Value Creation through New Product Development	
EGMT 660	Sustainable Business Practices for Engineers	

Project Management

EGMT 620	Engineering Project Management	
EGMT 625	Project Planning, Scheduling and Control	
EGMT 630	Global Engineering Project Management	

Systems Engineering & Systems Thinking

EGMT 635	Visual System Mapping	
SYSE 685	Systems Engineering Management	
SYSE 688	Systems Engineering Analysis	
SYSE 690	Modeling and Simulation	

Engineering Law & Ethics

EGMT 610	Ethics & Business Practices for Engineers
EGMT 652	Engineering Law
Other Approved Electives	
SYSE 510	Systems Engineering Process
SYSE 511	Systems Engineering Tools
SYSE 520	Global Sustainment and Integrated Logistics
SYSE 521	Integrated Risk Management
SYSE 522	Engineering Supply Chain Systems
SYSE 523	Systems Reliability Engineering
SYSE 524	Systems Reliability, Availability & Maintainability Analysis
SYSE 525	Statistical Modeling & Experimental Design
SYSE 530	Systems Engineering Design
SYSE 531	Systems Architecture Development
SYSE 532	Software Systems Engineering
SYSE 533	Systems Integration and Test
Total Credits	45.0

* EGMT 572 Statistical Data Analysis requires as a prerequisite EGMT 571 Managerial Statistics or approval from the program administration to complete a waiver and request to take then pass the STAT Placement Exam in place of EGMT 571. If approved for the waiver of EGMT 571, students will be eligible to complete an upper level course substitution to satisfy the degree requirements.

** Students may select electives from other disciplines outside of Engineering Management with prior approval from their advisor.

Sample Plan of Study

Term 1		Credits
EGMT 501	Leading and Managing Technical Workers	3.0
EGMT 504	Design Thinking for Engineering Communications	3.0
	Term Credits	6.0
Term 2		
EGMT 502	Analysis and Decision Methods for Technical Managers	3.0
EGMT 571	Engineering Statistics	3.0
	Term Credits	6.0
Term 3		
EGMT 572	Statistical Data Analysis	3.0
EGMT 531	Engineering Economic Evaluation & Analysis	3.0
	Term Credits	6.0
Term 4		
EGMT 573	Operations Research	3.0
EGMT 535	Financial Management	3.0
	Term Credits	6.0
Term 5		
EGMT 581	Meeting Engineering Leadership Challenges	3.0

Total Credit: 45.0

Engineering Management Faculty

James Breen, MBA, PE (*Drexel University*). Adjunct Instructor. Vice President of Manufacturing Network Strategy at Johnson & Johnson.

Robert Brehm, PhD (*Drexel University*). Teaching Professor. International infrastructure delivery; response to natural catastrophes; risk assessment and mitigation strategies; project management techniques.

James Lill, MS, PE (*Drexel University*). Adjunct Instructor. Director of Facilities, Planning and Management for the Downingtown Area School District.

Carole Mablekos, PhD (*Purdue University*). Adjunct Instructor. Public speaking, technical writing, organizational behavior, and business writing courses.

Miray Pereira, MBA (*Rutgers University*). Adjunct Instructor. Manages a team of consultants responsible for development, facilitation and implementation of fundamental demand management systems and capabilities for DuPont, most recently with the DuPont Safety & Protection Platform in strategic planning, mergers & acquisitions.

Fredric Plotnick, PhD, JD, PE (*Drexel University; Widener University*). Adjunct Professor. CEO and principal consultant of Engineering & Property Management Consultants, Inc.

Stephen Smith, PhD (*Drexel University*). Associate Teaching Professor. Development of online learning and distance teaching/learning techniques for engineering.

Walter Sobkiw, BS (*Drexel University*). Adjunct Faculty. Author of "Systems Engineering Design Renaissance" and "Systems Practices as Common Sense."

Fernando Tovia, PhD (*University of Arkansas*). Adjunct Instructor. Core quantitative analysis, strategic planning, supply chain management and manufacturing systems.

John Via, DEngr (*Southern Methodist University*). Teaching Professor. Pharmaceutical, Bio-pharmaceutical, and Medical Device development and manufacturing

Engineering Technology

Major: Engineering Technology

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 15.0000

Standard Occupational Classification (SOC) code: 17-3029

About the Program

The Master of Science in Engineering Technology offers courses focused on the technologies used in today's modern emerging industries. The program is designed for individuals who want marketable, applicable skills, and currently hold an accredited baccalaureate degree in engineering technology or have relevant work or class experience in science, technology, engineering, or mathematics (STEM) fields. The primary goal of the Master of Science in Engineering Technology is to develop advanced-level practitioners who are capable in resolving technical problems through the application of engineering principles and technology.

The program can be pursued on a part-time or full-time basis. Courses will be delivered in several modes: face-to-face and/or on-line, and allow practicing professionals the opportunity to update knowledge and skills based on the latest technological developments in the industrial environment and therefore advance in their chosen careers. The flexibility of the program curriculum permits students to select a combination of courses relevant to their individual career goals or to provide the foundation for further advanced study.

Program Goals

Graduates of the Master of Science in Engineering Technology will be expected to:

- Apply scientific and technological concepts to solving technological problems.
- Apply concepts and skills developed in a variety of technical and professional disciplines including computer applications and networking, materials properties and production processes, and quality control to improve production processes and techniques.
- Plan, facilitate, and integrate technology and problem solving techniques in the leadership functions of the industrial enterprise system.
- Engage in applied technical research that will add to the knowledge of the discipline and solve problems in an industrial environment.
- Develop the communication skills required for technical managers.

For additional information, view the College of Engineering's Engineering Technology program (<http://drexel.edu/engtech/>) web page or contact Gerry Willis at 215-895-6253 or gtm23@drexel.edu.

Admission Requirements

Applicants must have a 3.0 grade point average in their undergraduate or upper division (junior and senior year) coursework.

International students who have their undergraduate degree from a country whose language is not English can be admitted with a Test of English as a Foreign Language (TOEFL) test score of 550 or better. For more information regarding international applicant requirements, view the International Students Admissions Information (<http://drexel.edu/grad/resources/international/>) page.

Prerequisite courses

The following prerequisite courses must be completed at the undergraduate level with a minimum grade of C:

- Calculus I
- Calculus II
- Physics I (can be algebra-based)
- Physics II (can be algebra-based)
- AC/DC Circuit Analysis
- Digital Electronics
- Chemistry I or Materials
- Business Statistics

Visit the Graduate Admissions (<http://www.drexel.edu/grad/programs/coe/engineering-technology/>) website for more information about requirements and deadlines, as well as instructions for applying online.

Degree Requirements

Candidates for the MS in Engineering Technology must complete a minimum of 45.0 quarter credits. A minimum grade of B is required in all core courses and no more than two C grades in electives.

Of the 45.0 quarter credits required for the degree, 30.0 must be earned at Drexel University, including 24.0 credits of Engineering Technology (ET) courses. A maximum of 15.0 transfer credits may be allowed for graduate courses taken at other institutions, if they are appropriate to the student's plan of study.

Core Courses

EGMT 571	Engineering Statistics	3.0
EGMT 610	Ethics & Business Practices for Engineers	3.0
ET 610	Networks for Industrial Environments	3.0
ET 615	Rapid Prototyping and Product Design	3.0
ET 619	Programmable Devices and Systems	3.0
ET 620	Microsystems and Microfabrication	3.0
ET 681	Nanomaterials and Nanoengineering	3.0
ET 725	Sensors and Measurement Systems	3.0
ET 732	Modern Energy Conversion Technologies	3.0
Electives		9.0

Select three of the following:

EGMT 572	Statistical Data Analysis
ET 605	Materials for Emerging Technologies
ET 635	Engineering Quality Methods
ET 675	Reliability Engineering
ET 685	Precision Manufacturing
ET 730	Lean Manufacturing Principles

ET 733	Renewable Energy Technology	
ET 755	Sustainable and Green Manufacturing	
PROJ 501	Introduction to Project Management	
SYSE 685	Systems Engineering Management	
Capstone Course		9.0
ET 775	Master's Project and Thesis in Engineering Technology *	
Total Credits		45.0

* This is a three (3) credit course that is repeated three (3) times.

Engineering Technology Faculty

M. Eric Carr, MsCpE (*Drexel University*). Instructor. Computer Engineering, Digital Design, Programmable Devices, Genetic Algorithms, Programming, Additive Manufacturing, Maker Movement.

Richard Chiou, PhD (*Georgia Institute of Technology*). Associate Professor. Green manufacturing, mechatronics, Internet-based robotics and automation, and remote sensors and monitoring.

Yalcin Ertekin, PhD (*University of Missouri-Rolla*). Associate Clinical Professor. High speed machining with micromachining applications, machining process optimization and condition monitoring using multiple sensors, FEA simulation with 3D solid modeling applications, rapid prototyping and reverse engineering, quality and reliability improvement through statistically designed experiments, neural networks and data mining and Taguchi methods, CNC machine tool calibration characterization of cold fastening, clinching and self-pierced riveting processes, non-invasive surgical tool design, student learning enhancement using online simulation tools.

Vladimir Genis, PhD (*Kiev State University, Ukraine*) *Department Head, Engineering Technology*. Professor. Ultrasound wave propagation and scattering, ultrasound imaging, electronic instrumentation, piezoelectric transducers, and engineering education. Designed and developed diagnostic and therapeutic equipment for medical applications and electronic systems and techniques for defense-related and industrial applications.

Irina Ciobanescu Husanu, PhD (*Drexel University*). Assistant Clinical Professor. Microgravity combustion, thermal-fluid science with applications in micro-combustion, fuel cells and research of alternative and green fuels, energy conversion and renewable energy, industrial experience in aerospace engineering areas (theoretical analysis, numerical simulations and experimental investigations), design and testing of propulsion systems, mechanical instrumentation, and developing industrial applications of aircraft engines.

Lunal Khuon, PhD (*Massachusetts Institute of Technology*). Clinical Associate Professor. Radio frequency, analog, and biomedical integrated circuits, biomedical instrumentation, neural interfaces, wireless systems, and engineering education. Research topics include area-efficient and power-efficient integrated circuits, plasmonics, adiabatic circuits, rotary clocks, and medical cyber-physical systems.

Michael Mauk, PhD, PE (*University of Delaware*). Assistant Clinical Professor. Rapid prototyping, microfluidics, alternative energy including solar energy and photovoltaics, semiconductor materials science, nanotechnology.

Environmental Engineering

Major: Environmental Engineering

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS); 90.0 (PhD)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 14.1401

Standard Occupational Classification (SOC) code: 17-2081

About the Program

Programs in environmental engineering are available with specializations in air pollution, hazardous and solid waste, subsurface contaminant hydrology, water resources, water and wastewater, and sustainability treatment.

Environmental engineering is concerned with protecting human, animal, and plant populations from the effects of adverse environmental factors, including toxic chemicals and wastes, pathogenic bacteria, and global warming.

Environmental engineers also try to minimize the effect of human activities on the physical and living environment so that we can all live more healthy and sustainable lives. This field builds on other branches of engineering, especially civil, chemical, and mechanical engineering. It also builds on information from many of the sciences, such as chemistry, physics, hydrology, geology, atmospheric science, and several specializations of biology (ecology, microbiology) and public health. Students who elect to study environmental engineering will become familiar with many of these areas because maintaining and improving the environment requires that problems be evaluated and solutions found using a multidisciplinary approach.

For more information about this program, visit the MS in Environmental Engineering (<http://www.drexel.edu/cae/academics/grad-doctoral-programs/>) web page.

Admission Requirements

In addition to the general entrance requirements for all environmental engineering applicants, entrance to the MS in Environmental Engineering program requires an undergraduate engineering degree from an ABET-approved institution. Students lacking this credential will be required to complete additional undergraduate courses to incorporate related elements of the functional equivalent of the ABET engineering BS degree. Typically, courses must be taken in computer programming, differential equations, linear algebra and fluid mechanics.

For additional information on how to apply, visit Drexel's Admissions page for Environmental Engineering (<http://www.drexel.edu/grad/programs/coe/environmental-engineering/>).

Degree Requirements (MS)

The MS in Environmental Engineering program requires 45.0 credits of coursework. Both a theses and a non-thesis option are available. It is possible to finish the MS degree on either a part-time or full-basis. The degree consists of a set of core courses, a sequence in one of several areas of emphasis (treatment process, human risks, water resources, environmental modeling, and air quality) and completion of cognate and elective sequences. After the first term of study, a detailed plan of study is developed with the student's graduate advisor.

Students entering the program without an ABET accredited BS degree in engineering will be required to take additional undergraduate coursework depending on their background and their career objectives.

Core Courses

ENVE 660	Chemical Kinetics in Environmental Engineering	3.0
ENVS 501	Chemistry of the Environment	3.0
An approved course in statistics such as ENVE 750, ENVS 506 or BMES 510		3.0
An approved policy course such as EOH 560, PLCY 503 or ENVP 774		3.0
An approved life science course such as ENVE 516 or ENVS 511		3.0
Specialization Courses *		10.0-13.0
Cognate Discipline **		12.0
Electives or Thesis		8.0-11.0
Total Credits		45.0-51.0

* Students must take 4 courses in an approved specialization, such as environmental treatment processes, human risks, water resources, environmental modeling, or air quality.

** Students must complete a course sequence aside from their specialization. This might include a second specialization or a sequence within engineering, an applicable science, public health, or other as approved by the graduate advisor.

Degree Requirements (PhD)

Applicants to the doctoral program are judged on the basis of academic excellence and the alignment of their research interests with those of the faculty in the School. To be awarded the PhD, students must complete a major research project publishable in peer-reviewed journals. The degree requires a total of 90.0 credits; credits earned toward a master's degree may apply toward the 90.0 credits. There is no prescribed coursework—students must take courses needed to complete their research under guidance of an academic advisor. There is a one-year residency requirement. Students must successfully pass the candidacy examination, the proposal defense, and a PhD dissertation and oral defense.

Prospective PhD student are welcome to contact the Department (<http://www.drexel.edu/cae/>) to discuss their research interests.

Dual Degree

Dual MS Degree

The university encourages students with broad interest to consider a dual-master's option. Students can simultaneously work on two master's degree, applying to both programs a limited number of credits (a maximum of 15.0 to each). Applicants interested in a dual degree should apply for just one program; once enrolled at Drexel, the student may then request admission to the second program. The graduate advisors from both degree programs must approve the student's enrollment, and they must approve the transfer of credits from one program to another. Applicants considering two degrees are encouraged to contact the appropriate academic departments.

Bachelor's/Master's Dual Degree Program

The BS/MS dual degree is an accelerated program providing the academically qualified student an opportunity to simultaneously earn both BS and MS degrees (two diplomas are awarded) in program areas of his/her choice in five years, the time normally required to finish a bachelor's degree alone. Because both degrees are completed in the time usually required for the bachelor's degree, both degrees may be completed at the undergraduate tuition rate.

The five-year completion period is possible because fewer undergraduate credits are required for the combined degrees (180.0 credits instead of 192.0 credits). Also, co-op experience may be adjusted (two co-op periods instead of three) giving the BS/MS student two additional quarters

to take courses. If needed, students may also take evening courses while on co-op.

The program combines the practical work experience of Drexel undergraduate cooperative education with the graduate credentials of an advanced degree. Students may earn both degrees in the same major, or may complete their master's degree in a different field. With both an undergraduate and graduate degree and practical work experience, BS/MS graduates enter the work force with specialized knowledge and training.

Students interested in the Environmental Engineering BS/MS program, may contact Dr. Charles N. Haas at haas@drexel.edu for more information.

Facilities

The Department of Civil, Architectural, and Environmental Engineering is well equipped with state-of-the-art facilities:

- Analytical instrumentation for measuring biological and chemical contaminants in air, water and land
- Field sampling equipment for water and air measurements
- Molecular biology capability
- Computational facilities including access to multi-processor clusters, and advanced simulation and data analysis software

Civil, Architectural and Environmental Engineering Faculty

Abieyuwa Aghayere, PhD (*University of Alberta*). Professor. Structural design - concrete, steel and wood; structural failure analysis; retrofitting of existing structures; new structural systems and materials; engineering education.

Ivan Bartoli, PhD (*University of California, San Diego*). Associate Professor. Non-destructive evaluation and structural health monitoring; dynamic identification, stress wave propagation modeling.

Robert Brehm, PhD (*Drexel University*). Teaching Professor. International infrastructure delivery; response to natural catastrophes; risk assessment and mitigation strategies; project management techniques.

Shannon Capps, PhD (*Georgia Institute of Technology*). Assistant Professor. Atmospheric chemistry; data assimilation; advanced sensitivity analysis; inverse modeling.

S.C. Jonathan Cheng, PhD (*West Virginia University*). Associate Professor. Soil mechanics; geosynthetics; geotechnical engineering; probabilistic design; landfill containments; engineering education.

Eugenia Ellis, PhD (*Virginia Polytechnic Institute and State University*). Associate Professor. Natural and electric light sources and effects on biological rhythms and health outcomes; ecological strategies for smart, sustainable buildings of the nexus of health, energy and technology.

Yaghoob (Amir) Farnam, PhD (*Purdue University*). Assistant Professor. Advanced and sustainable infrastructure materials; multifunctional, self-responsive and bioinspired construction materials; advanced multiscale manufacturing; characterization, and evaluation of construction materials; durability of cement-based materials.

Patricia Gallagher, PhD (*Virginia Polytechnic Institute and State University*). Professor. Geotechnical and geoenvironmental engineering; soil improvement; recycled materials in geotechnics.

Patrick Gurian, PhD (*Carnegie-Mellon University*). Professor. Risk analysis of environmental and infrastructure systems; novel adsorbent materials; environmental standard setting; Bayesian statistical modeling; community outreach and environmental health.

Charles N. Haas, PhD (*University of Illinois-Urbana*) *L. D. Betz Chair Professor of Environmental Engineering and Department Head, Civil, Architectural and Environmental Engineering*. Professor. Water treatment; risk assessment; bioterrorism; environmental modeling and statistics; microbiology; environmental health.

Ahmad Hamid, PhD (*McMaster University*). Professor. Engineered masonry; seismic behavior, design and retrofit of masonry structures; development of new materials and building systems.

Simi Hoque, PhD (*University of California - Berkeley*). Associate Professor. Computational methods to reduce building energy and environmental impacts, urban metabolism, thermal comfort, climate resilience.

Y. Grace Hsuan, PhD (*Imperial College*). Professor. Durability of polymeric construction materials; advanced construction materials; and performance of geosynthetics.

Joseph B. Hughes, PhD (*University of Iowa*) *Distinguished University Professor*. Biological processes and applications of nanotechnology in environmental systems.

L. James Lo, PhD (*University of Texas at Austin*). Assistant Professor. Architectural fluid mechanics; building automation and autonomy; implementation of natural and hybrid ventilation in buildings; airflow distribution in buildings; large-scale air movement in an urban built environment; building and urban informatics; data-enhanced sensing and control for optimal building operation and management; novel data gathering methods for building/urban problem solving; interdisciplinary research on occupant behaviors in the built environment.

Roger Marino, PhD (*Drexel University*). Associate Teaching Professor. Engineering education; land development; product Development

Joseph P. Martin, PhD (*Colorado State University*). Professor. Geotechnical and geoenvironmental engineering; hydrology; transportation; waste management.

James E. Mitchell, MArch (*University of Pennsylvania*). Professor. Architectural engineering design; building systems; engineering education.

Franco Montalto, PhD (*Cornell University*). Professor. Effects of built infrastructure on societal water needs, ecohydrologic patterns and processes, ecological restoration, green design, and water interventions.

Nariman Mostafavi, PhD (*University of Massachusetts - Amherst*). Assistant Teaching Professor. Simulation tools for analyzing urban metabolism; environmentally responsive design; urban resilience; engineering economics; industrial ecology.

Joseph V. Mullin, PhD (*Pennsylvania State University*) *Associate Department Head*. Teaching Professor. Structural engineering; failure analysis; experimental stress analysis; construction materials; marine structures.

Mira S. Olson, PhD (*University of Virginia*). Associate Professor. Peace engineering; source water quality protection and management; contaminant and bacterial fate and transport; community engagement.

Miguel A. Pando, PhD (*Virginia Polytechnic Institute and State University*). Assistant Professor. Laboratory testing of geomaterials; geotechnical aspects of natural hazards; soil-structure-interaction; geotechnical engineering.

Michael Ryan, PhD (*Drexel University*) *Associate Department Head of Graduate Studies*. Assistant Teaching Professor. Microbial Source Tracking (MST); Quantitative Microbial Risk Assessment (QMRA); dynamic engineering systems modeling; molecular microbial biology; phylogenetics; metagenomics; bioinformatics; environmental statistics; engineering economics; microbiology; potable and waste water quality; environmental management systems.

Christopher Sales, PhD (*University of California, Berkeley*). Associate Professor. Environmental microbiology and biotechnology; biodegradation of environmental contaminants; microbial processes for energy and resource recovery from waste; application of molecular biology, analytical chemistry and bioinformatic techniques to study environmental biological systems.

Yared Shifferaw, PhD (*Johns Hopkins University*). Assistant Professor. Computational and experimental mechanics; structural stability; optimization; health monitoring and hazard mitigation; sustainable structures; emerging materials; thin-walled structures and metallic structures.

Kurt Sjoblom, PhD (*Massachusetts Institute of Technology*). Assistant Professor. Laboratory testing of geomaterials, geotechnical engineering, foundation engineering.

Sabrina Spatari, PhD (*University of Toronto*). Associate Professor. Industrial ecology; development and application of life cycle assessment (LCA) and material flow analysis (MFA) methods for guiding engineering and policy decisions; specific interest in biomass and bioenergy, biofuels, and urban infrastructure.

Robert Swan Associate Teaching Professor. Geotechnical and Geosynthetic Engineering; soil/geosynthetic interaction and performance; laboratory and field geotechnical/geosynthetic testing.

Michael Waring, PhD (*University of Texas-Austin*) *Associate Department Head for Undergraduate Programs; Director of Architectural Engineering Program*. Associate Professor. Indoor air quality and building sustainability; indoor particulate matter fate and transport; indoor chemistry and particle formation; secondary impacts of control technologies and strategies.

Jin Wen, PhD (*University of Iowa*). Associate Professor. Architectural engineering; Building Energy Efficiency; Intelligent Building; Net-zero Building; and Indoor Air Quality.

Aspasia Zerva, PhD (*University of Illinois*). Professor. Earthquake engineering; mechanics; seismology; structural reliability; system identification; advanced computational computational methods in structural analysis.

Emeritus Faculty

Harry G. Harris, PhD (*Cornell University*). Professor Emeritus. Structural models; dynamics of structures, plates and shells; industrialized building construction.

Richard Weggel, PhD (*University of Illinois*) *Samuel S. Baxter Professor Emeritus; Civil and Environmental Engineering*. Professor Emeritus. Coastal engineering; hydraulics engineering; hydrology.

Richard Woodring, PhD (*University of Illinois*) *Dean of Engineering Emeritus*. Professor Emeritus. Structural engineering, reinforced concrete.

Materials Science and Engineering

Major: Materials Science and Engineering

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS); 90.0 (PhD)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 14.1801

Standard Occupational Classification (SOC) code: 17-2131

About the Program

The graduate program in Materials Science and Engineering aims to provide an education which encompasses both the breadth and depth of the most recent knowledge base in the materials science and engineering fields in a format suitable for individuals seeking careers in academia and/or industry.

In addition, the program provides students with research training through their courses and thesis research at the MS and PhD levels.

The graduate student body reflects a broad spectrum of undergraduate backgrounds. Because of the expansion into interdisciplinary areas, qualified physical and biological science graduates may also join the program. Students without an undergraduate degree in Materials Science and Engineering are required to take MATE 503 *Introduction to Materials Engineering*.

Graduate programs in materials science and engineering are offered both on a regular full-time and on a part-time (MS only) basis. The General (Aptitude) Test of the Graduate Record Examination (GRE) is required for applicants pursuing full-time study.

Career Opportunities

Graduates go on to careers in engineering firms, consulting firms, law firms, private industry, business, research laboratories, academia, and national laboratories. Materials scientists and engineers find employment in such organizations as Hewlett-Packard, Intel, IBM, 3M, DuPont, Lockheed-Martin, Johnson and Johnson, Merck, AstraZeneca, Arkema, Army Research Laboratory, Los Alamos National Laboratory, Air Products, Micron, Xerox, Motorola, Monsanto, Corning, and Eastman Kodak.

For more information about Materials Science and Engineering, visit the Department of Materials Science and Engineering (<https://drexel.edu/engineering/academics/departments/materials-science-engineering/>) web page.

Admission Requirements

Applicants must meet the graduate requirements for admission to Drexel University. The graduate student body reflects a broad spectrum of undergraduate backgrounds. Because of the expansion into interdisciplinary areas, qualified non-MSE engineering, physical and biological science graduates may also join the program.

For specific information on how to apply to this program, visit Drexel University's Materials Science and Engineering Graduate Admissions (<http://www.drexel.edu/grad/programs/coe/materials-science-engineering/>) page.

Degree Requirements (MS)

The 45.0 quarter credits required for the MS degree include two required core courses on MATE 510 *Thermodynamics of Solids* and MATE 512 *Introduction to Solid State Materials*. Students choose four additional selected core courses.

Thesis Options

Students pursuing the thesis option are required to undertake a 9.0 credit thesis on a topic of materials research supervised by a faculty member. Alternatively, MS students can select the non-thesis option, in which case, the thesis may be replaced by 9.0 credits of coursework.

All students in the thesis option are required to propose an advisor-supported research thesis topic during their first year. Students are urged to make a choice of topic as early as possible and to choose appropriate graduate courses in consultation with their advisor.

The program is organized so that part-time students may complete the degree requirements in two to four years. Full-time students may complete the program in two years.

There is no general exam required for MS students. If an MS student wishes to continue for a PhD then the student must apply and be admitted to the PhD program (there is no guarantee that an MS student will be admitted to the PhD program).

Materials Science and Engineering (MSMSE) Core Courses *

Required core courses:		
MATE 510	Thermodynamics of Solids	3.0
MATE 512	Introduction to Solid State Materials	3.0
Select four additional core courses from the following:		12.0
MATE 501	Structure and Properties of Polymers	
MATE 507	Kinetics	
MATE 515	Experimental Technique in Materials	
MATE 535	Numerical Engineering Methods	
MATE 610	Mechanical Behavior of Solids	
MATE 661	Biomedical Materials I	
Any additional related courses if approved by the graduate advisor/thesis advisor (such as MATE 514 and MATE 573)		
Optional Core Courses **		18.0
Thesis and Alternatives		9.0
9.0 credits MS thesis OR 6.0 credits of thesis proposal (literature review) + 3.0 credit course OR 9.0 credits of electives		
Total Credits		45.0

* PhD candidates must achieve a minimum B- grade in each of the core courses. Waiver of any of the 6 core courses must be approved by the MSE Department Graduate Advisor and the student's Thesis Advisor in Advance.

** Of the 18 technical elective credits, at least 9 credits must be taken as Materials Science and Engineering (MATE) courses, while the rest may be taken within the College of Engineering, College of Arts and Sciences, or at other colleges if consistent with the student's plan of study (and given advance written approval by his/her advisor). At least 9 of these 18 technical electives must be exclusive of independent study courses or research credits.

Degree Requirements (PhD)

Curriculum

A student must have at least the required 90.0 quarter credits for the PhD degree. An MS degree *is not* a prerequisite for the PhD degree, but can count for 45.0 quarter credits if the courses are approved by the Graduate Advisor. For students without an MS degree, but with previous graduate course work, they may transfer no more than 15.0 credits (equivalent to 12 semester-credits) from approved institutions, provided they follow the rules and regulations described in the Materials Requirements of Graduate Degrees (<http://mse.drexel.edu/media/49885/mse-graduate-program.pdf>).

The required 90.0 credits for a PhD degree are tabulated below:

- Required Core Courses: 6.0 credits
- Additional Required Courses: 7.0 credits (MATE 504 & MATE 536 [1.0 credit for first 6 terms])
- Selected Core Courses: 12.0 credits
- Optional Courses: 9.0 credits
- Research or additional option courses: 47.0 credits
- Dissertation: 9.0 credits (MATE 998)

Total: 90.0 credits

Required Core Courses: *

MATE 510	Thermodynamics of Solids	3.0
MATE 512	Introduction to Solid State Materials	3.0

Additional Required Courses:

MATE 504	The Art of Being a Scientist	2.0
MATE 536	Materials Seminar Series	6.0
MATE 998	Ph.D. Dissertation	9.0

Selected Core Courses: Choose 4 *

MATE 501	Structure and Properties of Polymers	
MATE 507	Kinetics	
MATE 514	Structure, Symmetry, and Properties of Materials	
MATE 515	Experimental Technique in Materials	
MATE 535	Numerical Engineering Methods	
MATE 610	Mechanical Behavior of Solids	
MATE 661	Biomedical Materials I	

Related courses as approved by the Graduate Advisor/Thesis Advisor

Optional Courses: 55.0

MATE 541	Introduction to Transmission Electron Microscopy and Related Techniques	
MATE 542	Nuclear Fuel Cycle & Materials	
MATE 543	Thermal Spray Technology	
MATE 544	Nanostructured Polymeric Materials	
MATE 563	Ceramics	
MATE 572	Materials for High Temperature and Energy	
MATE 573	Electronic, Magnetic and Optical Characterization of Energy Materials	
MATE 576	Recycling of Materials	
MATE T580	Special Topics in MATE	
MATE 582	Materials for Energy Storage	
MATE 583	Environmental Effects on Materials	

MATE 585	Nanostructured Carbon Materials
MATE 602	Soft Materials
MATE 702	Natural Polymers
MATE 897	Research
Other MSE courses that may be available	
Out-of-department courses, as approved by the Graduate Advisor/Thesis Advisor	
Total Credits	90.0

* PhD students must achieve a minimum "B-" grade in each of the core courses. Waiver of any of the six (6) core courses must be approved by the MSE Department Graduate Advisor and the student's Thesis Advisor in advance. MATE 536 is a 1.0 credit course that must be repeated 6 times.

An introductory course, MATE 503, is required for students without an undergraduate materials science and engineering degree.

Additional courses are encouraged for students entering the department with an MS degree. Students choose a doctoral thesis topic after consultation with the faculty. Students are required to consider topics early in the program. An oral thesis presentation and defense are scheduled at the completion of the thesis work.

In addition to the graduate seminar, which is required of all graduate students, doctoral program students must pass an oral candidacy examination and a thesis proposal defense. The exam is designed to improve and assess the communication skills and the analytical abilities of the student. The following procedures should be followed to complete the PhD.

Candidacy Exam Requirement

All MSE PhD students are required to take the PhD Candidacy Examinations administered by the MSE Department.

For more information, visit the Department of Materials Science and Engineering (<http://www.materials.drexel.edu/>) web page.

Facilities

Biomaterials and Biosurfaces Laboratory

This laboratory contains 10 kN biaxial and 5 kN uniaxial servo-hydraulic mechanical testing machines, a Fluoroscan X-ray system, a microscopic imaging system, a spectra fluorometer, a table autoclave, centrifuge, vacuum oven, CO2 incubators, biological safety cabinet, thermostatic water baths, precision balance and ultrasonic sterilizer.

Nanobiomaterials and Cell Engineering Laboratory

This laboratory contains fume hood with vacuum/gas dual manifold, vacuum pump and rotary evaporator for general organic/polymer synthesis; gel electrophoresis and electroblotting for protein characterization; bath sonicator, glass homogenizer and mini-extruder for nanoparticle preparation; centrifuge; ultrapure water conditioning system; precision balance; pH meter and shaker.

Ceramics Processing Laboratory

This laboratory contains a photo-resist spinner, impedance analyzer, Zeta potential meter, spectrofluorometer, piezoelectric d33 meter, wire-bonder, and laser displacement meter.

Dynamic Characterization Laboratory

This laboratory contains metallographic sample preparation (sectioning, mounting and polishing) facilities; inverted metallograph; microhardness tester; automated electropolishing for bulk and TEM sample preparation;

SEM tensile stage for EBSD; magneto-optical Kerr effect (MOKE) magnetometer.

MAX Phase Ceramics Processing Laboratory

This laboratory contains a vacuum hot-press; cold isostatic press (CIP) and hot isostatic press (HIP) for materials consolidation and synthesis; precision dilatometer; laser scattering particle size analyzer; impedance analyzer, creep testers, and assorted high temperature furnaces.

Mechanical Testing Laboratory

This laboratory contains mechanical and closed-loop servo-hydraulic testing machines, hardness testers, impact testers, equipment for fatigue testing, metallographic preparation facilities and a rolling mill with twin 6" diameter rolls.

Mesoscale Materials Laboratory

This laboratory contains instrumentation for growth, characterization, device fabrication, and design and simulation of electronic, dielectric, ferroelectric and photonic materials. Resources include physical and chemical vapor deposition and thermal and plasma processing of thin films, including oxides and metals, and semiconductor nanowire growth.

Facilities include pulsed laser deposition, atomic layer deposition, chemical vapor deposition, sublimation growth, and resistive thermal evaporation. Variable-temperature high-vacuum probe station and optical cryostats including high magnetic field, fixed and tunable-wavelength laser sources, several monochromators for luminescence and Raman scattering spectroscopies, scanning electron microscopy with electron beam lithography, and a scanning probe microscope.

Nanomaterials Laboratory

This laboratory contains instrumentation for testing and manipulation of materials under microscope, high-temperature autoclaves, Sievert's apparatus; glove-box; high-temperature vacuum and other furnaces for the synthesis of nano-carbon coatings and nanotubes; electro-spinning system for producing nano-fibers.

Oxide Films and Interfaces Laboratory

This laboratory contains an oxide molecular beam epitaxy (MBE) thin film deposition system; physical properties measurement system for electronic transport and magnetometry measurements from 2 – 400K, up to 9 T fields; 2 tube furnaces.

Powder Processing Laboratory

This laboratory contains vee blenders, ball-mills, sieve shaker + sieves for powder classification, several furnaces (including one with controlled atmosphere capability); and a 60-ton Baldwin press for powder compaction.

Soft Matter Research and Polymer Processing Laboratories

These laboratories contain computerized thermal analysis facilities including differential scanning calorimeters (DSC), dynamic mechanical analyzer (DMA) and thermo-gravimetric analyzer (TGA); single-fiber tensile tester; strip biaxial tensile tester; vacuum evaporator; spincoater; centrifuge; optical microscope with hot stage; liquid crystal tester; microbalance; ultrasonic cleaner; laser holographic fabrication system; polymer injection molder and single screw extruder.

Natural Polymers and Photonics Laboratory

This laboratory contains a spectroscopic ellipsometer for film characterization; high purity liquid chromatography (HPLC) system; lyophilizer; centrifuge; refractometer; electro-spinning system for producing nano-fibers.

X-ray Tomography Laboratory

This laboratory contains a high resolution X-ray tomography instrument and a cluster of computers for 3D microstructure reconstruction; mechanical stage, a positioning stage and a cryostage for in-situ testing. For more information on departmental facilities, please visit the Department's Facilities web page (<http://www.materials.drexel.edu/research/facilities/>).

Centralized Research Facilities

The Department of Materials Science & Engineering relies on Core Facilities within the University for materials characterization and micro- and nano-fabrication. These facilities contain state-of-the-art materials characterization instruments, including environmental and variable pressure field-emission scanning electron microscopes with Energy Dispersive Spectroscopy (EDS) for elemental analysis, and Orientation Image Microscopy (OIM) for texture analysis; a Transmission Electron Microscope (TEM) with STEM capability and TEM sample preparation equipment; a dual beam focused ion beam (FIB) system for nano-characterization and nano fabrication; a femtosecond/ terahertz laser Raman spectrometer; visible and ultraviolet Raman micro spectrometers with a total of 7 excitation wavelengths for non-destructive chemical and structural analysis and Surface Enhanced Raman (SERS); a Fourier Transform Infrared (FTIR) spectrometer with a microscope and full array of accessories; a Nanoindenter; an X-ray Photoelectron Spectrometer (XPS)/Electron Spectroscopy for Chemical Analysis (ESCA) system; and X-Ray Diffractometers (XRD), including small angle/wide angle X-Ray scattering (SAX/WAX).

More details of these instruments, information how to access them and instrument usage rates can be found on the Core Facilities web page (<http://crf.coe.drexel.edu>).

Materials Science and Engineering Faculty

Michel Barsoum, PhD (*Massachusetts Institute of Technology*).

Distinguished Professor. Processing and characterization of novel ceramics and ternary compounds, especially the MAX and 2-D MXene phases.

Hao Cheng, PhD (*Northwestern University*). Associate Professor.

Drug delivery, molecular self-assembly, cell-nanomaterial interactions, regenerative medicine and cell membrane engineering.

Yury Gogotsi, PhD (*Kiev Polytechnic Institute*) Director, A. J. Drexel Nanotechnology Institute. Distinguished University & Charles T. and Ruth M. Bach Professor. Nanomaterials; carbon nanotubes; nanodiamond; graphene; MXene; materials for energy storage, supercapacitors, and batteries.

Richard Knight, PhD (*Loughborough University*) Associate Department Head and Undergraduate Advisor. Teaching Professor. Thermal plasma technology; thermal spray coatings and education; plasma chemistry and synthesis.

Christopher Y. Li, PhD (*University of Akron*). Professor. Soft and hybrid materials for optical, energy, and bio applications; polymeric materials, nanocomposites, structure and properties.

Andrew Magenau, PhD (*University of Southern Mississippi*). Assistant Professor. Structurally complex materials exhibiting unique physical properties designed and fabricated using an assortment of methodologies involving directed self-assembly, externally applied stimuli, structure-function correlation, and applied engineering principles suited for

technologies in regenerative medicine, biological interfacing, catalytic, electronic, and optical applications

Michele Marcolongo, PhD, PE (*University of Pennsylvania*) *Department Head, Materials Science and Engineering*. Professor. Orthopedic biomaterials; acellular regenerative medicine, biomimetic proteoglycans; hydrogels.

Steven May, PhD (*Northwestern University*) *Department Head*. Professor. Synthesis of complex oxide films, superlattices, and devices; materials for energy conversion and storage; magnetic and electronic materials; x-ray and neutron scattering.

Ekaterina Pomerantseva, PhD (*Moscow State University, Russia*). Associate Professor. Solid state chemistry; electrochemical characterization, lithium-ion batteries, energy generation and storage; development and characterization of novel nanostructured materials, systems and architectures for batteries, supercapacitors and fuel cells.

Caroline L. Schauer, PhD (*SUNY Stony Brook*) *Associate Dean, Faculty Affairs College of Engineering*. Professor. Polysaccharide thin films and nanofibers.

Wei-Heng Shih, PhD (*Ohio State University*). Professor. Colloidal ceramics and sol-gel processing; piezoelectric biosensors, optoelectronics, and energy harvesting devices; nanocrystalline quantum dots for bioimaging, lighting, and solar cells.

Jonathan E. Spanier, PhD (*Columbia University*) *Department Head, Mechanical Engineering and Mechanics*. Professor. Light-matter interactions in electronic materials, including ferroelectric semiconductors, complex oxide thin film science; laser spectroscopy, including Raman scattering.

Mitra Taheri, PhD (*Carnegie Mellon University*) *Hoeganeas Professor of Metallurgy*. Professor. Development of the ultrafast Dynamic Transmission Electron Microscope (DTEM) for the study of laser-induced microstructural evolution/phase transformations in nanostructured materials; use of various in-situ Transmission Electron Microscopy techniques.

Jörn Venderbos, PhD (*Leiden University*). Assistant Professor. Theory of quantum materials: topological insulators, topological semimetals, materials prediction and design, strongly correlated electron materials, complex electronic ordering phenomena, unconventional superconductors

Christopher Weyant, PhD (*Northwestern University*). Teaching Professor. Engineering education

Antonios Zavaliangos, PhD (*Massachusetts Institute of Technology*) *A.W. Grosvenor Professor*. Professor. Constitutive modeling; powder compaction and sintering; pharmaceutical tableting, X-ray tomography.

Emeritus Faculty

Roger D. Corneliussen, PhD (*University of Chicago*). Professor Emeritus. Fracture, blends and alloys, as well as compounding.

Roger D. Doherty, PhD (*Oxford University*). Professor Emeritus. Metallurgical processing; thermo-mechanical treatment.

Ihab L. Kamel, PhD (*University of Maryland*). Professor Emeritus. Nanotechnology, polymers, composites, biomedical applications, and materials-induced changes through plasma and high energy radiation.

Jack Keverian, PhD (*Massachusetts Institute of Technology*). Professor Emeritus. Rapid parts manufacturing, computer integrated manufacturing systems, strip production systems, technical and/or economic modeling, melting and casting systems, recycling systems.

Mechanical Engineering and Mechanics

Major: Mechanical Engineering and Mechanics

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS) or 90.0 (PhD)

Co-op Option: Available for full-time on-campus master's-level students

Classification of Instructional (CIP) code: 14.1901

Standard Occupational Classification (SOC) code: 17-2141

About the Program

The Mechanical Engineering and Mechanics (MEM) Department (<http://drexel.edu/mem/>) offers MS and PhD degrees. The courses often associate with one or more areas of specialization: design and manufacturing, mechanics, systems and control, and thermal and fluid sciences. The mechanical engineering field is rapidly changing due to ongoing advances in modern science and technology. Effective mechanical engineers must possess expertise in mechanical engineering core subjects, interdisciplinary skills, teamwork skills, as well as entrepreneurial and managerial abilities. The degree programs are designed so students can learn the state-of-the-art knowledge now, and have the foundation to acquire new knowledge as they develop in future.

The MS degree program is offered on both a full-time and a part-time basis. The General (Aptitude) Test of the Graduate Record Examination (GRE) is required for applicants pursuing full-time study. Graduate courses are often scheduled in the late afternoon and evening, so full-time students and part-time students can take the same courses. The department has recently adopted the Graduate Co-op program at the master's level as an option.

The PhD degree program is offered for full-time students only and is a research intensive program. The research areas include, but are not limited to, bio-engineering, energy systems, high performance materials, nanotechnology, plasma science and engineering, and robotics.

Admission Requirements

Applicants must meet the graduate requirements for admission to Drexel University. Students holding a bachelor's degree in a science or engineering discipline other than mechanical engineering are advised to take several undergraduate courses as preparation for graduate studies. Though these courses are not counted toward the required credits for the degree, they also must be listed in the student's plan of study. Outstanding students with a GPA of at least 3.5 in their master's program will be considered for admission to the program leading to the doctor of philosophy degree in mechanical engineering.

Degree Requirements (MS) Requirements

The MS program has a two-fold mission: to prepare some students for continuation of their graduate studies and research toward a PhD degree, and to prepare other students for a career in industry upon graduation

with the MS degree. The MS program has a non-thesis option and a thesis option. Students who plan to continue to the PhD degree are advised to select the thesis-option.

The MS program is structured so that students have the opportunity to specialize in areas of interest while also obtain the broadest engineering education possible. Of the required 45.0 credits (15 courses) MS students are required to complete two core-course sequences (two terms each) from two different core areas. Students can take eight technical elective courses of which up to four courses can be from outside the Mechanical Engineering and Mechanics Department if they are approved in the students' plan of study. MS students have opportunity to apply to the optional graduate Co-op program. Students in the MS program should consult with the department graduate adviser at the beginning of their program and must file a plan of study prior to the third quarter of study. Further details can be obtained from the department's Graduate Programs Manual.

Typical MS Program

Two Core-Course Sequences (required)	12.0
Three Mathematics Courses (required) *	9.0
Eight Technical Electives (including 9 credits for thesis option)	24.0
Total Credits	45.0

* Mathematics courses: MEM 591, MEM 592, MEM 593.

Core Areas

All students take core courses in the department's areas of specialization as part of a comprehensive and flexible program. Further details can be obtained from the department's Graduate Programs Manual (<http://www.drexel.edu/mem/academics/graduate/grad-manual/>).

The core courses in each area are listed below:

Mechanics Area

Theory of Elasticity

MEM 660	Theory of Elasticity I	3.0
MEM 661	Theory of Elasticity II	3.0

Solid Mechanics

MEM 663	Continuum Mechanics	3.0
MEM 664	Introduction to Plasticity	3.0

Advanced Dynamics

MEM 666	Advanced Dynamics I	3.0
MEM 667	Advanced Dynamics II	3.0

Systems and Control Area

Robust Control Systems

MEM 633	Robust Control Systems I	3.0
MEM 634	Robust Control Systems II	3.0

Non-Linear Control Theory

MEM 636	Theory of Nonlinear Control I	3.0
MEM 637	Theory of Nonlinear Control II	3.0

Real-Time Microcomputer Control

MEM 639	Real Time Microcomputer Control I	3.0
MEM 640	Real Time Microcomputer Control II	3.0

Thermal and Fluid Sciences Area

Advanced Thermodynamics *

MEM 601	Statistical Thermodynamics I	3.0
MEM 602	Statistical Thermodynamics II	3.0

Heat transfer

MEM 611	Conduction Heat Transfer	3.0
MEM 612	Convection Heat Transfer	3.0
or MEM 613	Radiation Heat Transfer	

Fluid Mechanics *

MEM 621	Foundations of Fluid Mechanics	3.0
MEM 622	Boundary Layers-Laminar & Turbulent	3.0

* Consult the Thermal and Fluid Sciences area advisor for other options.

Degree Requirements (PhD)

Outstanding students with a GPA of at least 3.5 in their master's program will be considered for admission to the program leading to the Doctor of Philosophy degree in mechanical engineering.

PhD Course Requirements

At least 90.0 credits are required for the PhD degree. The master's degree is not a prerequisite for the PhD, but does count as 45.0 credits toward the 90.0 credit requirement.

For students entering the PhD program with a prior MS degree:

- 45.0 credits of graduate courses out of which 18.0 credits are graduate courses exclusive of independent study and dissertation. If the MS degree was not from Drexel's Mechanical Engineering and Mechanics (MEM) Department, 12.0 of these 18.0 credits must be MEM graduate courses (600-level or above). The remaining 27.0 credits consist of a combination of dissertation, independent study, and additional advanced coursework consistent with the approved plan of study.

For students entering the PhD program with a BS degree but without a prior master's degree:

- 90.0 credits of graduate courses. 45.0 of these 90.0 credits must satisfy the MS in Mechanical Engineering degree requirements. The remaining 45.0 credits must satisfy the requirements above.

PhD Candidacy Examination

A graduate student in the PhD program needs be nominated by his/her supervising adviser to take the candidacy examination. A student who enters the PhD program with a prior MS degree must take the Candidacy Examination within the first year after entry to the PhD program. A student who enters the PhD program without a prior MS degree must take the Candidacy Examination within 2 years after entry to the PhD program.

The Candidacy Examination consists of two components: A course-component examination and a research-component examination. The student must demonstrate excellence in both components. The research-component examination consists of a written report and an oral presentation. The Candidacy Committee selects three or more research papers in the student's declared research area for student to conduct a critical review. In three weeks the student submits a written report. One week after the written report is submitted the student makes an oral presentation. The presentation is followed by questions by the Committee. The goals of the questions: To evaluate the student's knowledge in the scientific fields related to the research area, including related background and fundamental material, and the student's ability to integrate information germane to success in research. Additional details are given in the Mechanical Engineering and Mechanics Graduate Program Manual.

Thesis Proposal

At least one year prior to graduation, the PhD candidate must give a thesis proposal to the dissertation advisory committee. The student must submit a written proposal and make a presentation. The written proposal normally includes: abstract, introduction, detailed literature

review, preliminary results, proposed research tasks and timetable. The committee will approve/reject the thesis topic, the scope of work and the general method of attack.

Thesis Defense

A final examination consisting of a presentation and defense of the research dissertation is required, before the PhD degree is granted.

Further details can be obtained from the department's Graduate Programs Manual.

Facilities

Advanced Design and Manufacturing Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=6) This laboratory provides research opportunities in design methodology, computer-aided design, analysis and manufacturing, and materials processing and manufacturing. Facilities include various computers and software, I-DEAS, Pro/E, ANSYS, MasterCAM, Mechanical DeskTop, SurfCAM, Euclid, Strim, ABQUS, and more. The machines include two Sanders Model Maker rapid prototyping machines, a BridgePort CNC Machining Center, a BOY 220 injection molding machine, an Electra high-temperature furnace for metal sintering, infiltration, and other heat treatment.

Biofabrication Laboratory

Utilizes cells or biologics as basic building blocks in which biological models, systems, devices and products are manufactured. Biofabrication techniques encompass a broad range of physical, chemical, biological, and/or engineering processes, with various applications in tissue science and engineering, regenerative medicine, disease parthenogenesis and drug testing studies, biochips and biosensors, cell printing, patterning and assembly, and organ printing.

The Biofabrication Lab at Drexel University integrates computer-aided tissue engineering, modern design and manufacturing, biomaterials and biology in modeling, design and biofabrication of tissue scaffolds, tissue constructs, micro-organ, tissue models. The ongoing research focuses on bio-tissue modeling, bio-blueprint modeling, scaffold informatics modeling, biomimetic design of tissue scaffold, additive manufacturing of tissue scaffolds, cell printing and organ printing.

Biological Systems Analysis Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=5)

The research in the Laboratory for Biological Systems Analysis involves the integration of biology with systems level engineering analysis and design, with an emphasis on: (1) the development of robotic systems that borrow from nature's designs and use novel technologies to achieve superior performance and function; and (2) the use of system identification techniques to evaluate the functional performance of animal physiological systems under natural, behavioral conditions. Facilities include rapid prototyping machines, compliant material manufacturing, mold making facilities, and a traditional machine shop and electronics workshop.

Biomechanics Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=2)

Emphasis in this laboratory is placed on understanding the mechanical properties of human joints, characterization of the mechanical properties of biological materials, studies of human movements, and design and development of artificial limbs. Facilities include a 3-D kinematic measuring system, Instron testing machine, and microcomputers for data

acquisition and processing. Additional biomechanical laboratory facilities are available at Moss Rehab Hospital.

Combustion Diagnostics Laboratory

High-speed cameras, spectrometers, and laser systems are used to conduct research in low temperature hydrocarbon oxidation, cool flames, and plasma-assisted ignition and combustion. Research in optical diagnostic development is conducted in this lab with a specific focus on tools to measure small peroxy radicals.

Combustion, Fuel Chemistry, and Emissions Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=1) Emphasis in this laboratory is placed on developing an understanding of both the chemical and physical factors that control and, hence, can be used to tailor combustion processes for engineering applications. Facilities include two single cylinder research engines, a pressurized flow reactor (PFR) facility, flat flame and slot burner systems, and complete analytical and monitoring instrumentation. The engine systems are used to study the effects of operating variables, fuel type, ambient conditions, and control devices on engine performance and emissions. The PFR facility is used for detailed kinetic studies of hydrocarbon pyrolysis and oxidation processes.

Complex Fluids and Multiphase Transport Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=1) The research focus of this lab lies at the interface of thermal-fluid sciences, nano materials, and colloid and surface sciences. We apply these fundamental sciences to advance energy conversion and storage systems, to provide effective thermal management solutions, and to enable scalable additive nanomanufacturing. Facilities include materials printing systems, fluorescence microscope and imaging systems, complex fluid characterization, microfluidics and heat transfer testers, coating and solar cell testing devices, electrochemical characterization, and high performance computing facilities.

Dynamic Multifunctional Materials Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=1) The focus of the Dynamic Multifunctional Materials Laboratory (DMML) is mechanics of materials; namely fracture and failure mechanisms under extreme conditions and their correlation to meso- and microstructural characteristics. Utilizing highly integrated experimental facilities such as a Kolsky (split-Hopkinson pressure bar), single-stage, and two stage light-gas gun, complex material behavior is deconstructed into dominant time and length scales associated with the energetics of damage evolution. In-situ laser and optical diagnostics such as caustics, interferometry techniques, schlieren visualization and virtual grid method, are used to investigate coupled field properties of multifunctional materials with the goal of not only analyzing and understanding behavior, but ultimately tailoring material properties for specific applications.

Electrochemical Energy Systems Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=1)

The Electrochemical Energy Systems Laboratory (ECSL) specializes in the design, diagnostics and characterization of next generation electrochemical energy conversion and storage systems. Current areas of research include flow-assisted supercapacitors, next generation flow battery technology and fuel cells for transportation, stationary and portable applications. ECSL utilizes a comprehensive approach, including: advanced diagnostics, system design, materials characterization, and computational modeling of electrochemical energy systems. The core mission of ECSL is to develop novel diagnostic and computational tools to understand critical issues in flow-assisted electrochemical systems and enable better system design. Due to the complex nature of these systems,

our research is highly interdisciplinary and spans the interface of transport phenomena, materials characterization, electrochemistry and system engineering.

Heat Transfer Laboratory

The heat transfer laboratory is outfitted with an array of instrumentation and equipment for conducting single- and multi-phase heat transfer experiments in controlled environments. Present efforts are studying the heat and mass transfer processes in super-critical fluids and binary refrigerants.

Lab-on-a-Chip and BioMEMS Lab (<http://mems.mem.drexel.edu/>) Develops miniature devices for biological and medical applications using microfabrication and microfluidics technologies. Our research projects have highly multidisciplinary nature and thus require the integration of engineering, science, biology and medicine. Projects are conducted in close collaboration with biologists and medical doctors. Our research methodology includes design and fabrication of miniature devices, experimental characterization, theoretical analysis, and numerical simulation.

Microcomputer Controls Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=7)

This laboratory provides an environment conducive to appreciating aspects of systems and control through hands-on experiments. They range from data acquisition and processing to modeling of dynamical systems and implementing a variety of controllers to control systems, such as DC motors and the inverted pendulum. Active research is being conducted on control reconfiguration in the event of actuator failures in aircrafts.

Multiscale Thermofluidics Laboratory

Develops novel scalable nanomanufacturing techniques using biological templates to manipulate micro- and nano- scale thermal and fluidic phenomena. Current work includes enhancing phase-change heat transfer with super-wetting nanostructured coatings and transport and separation through nanoporous membranes.

Nyheim Plasma Institute (<http://drexel.edu/NyheimInstitute/>) The Nyheim Plasma Institute (NPI) was formed in 2002 (originally the A.J. Drexel Plasma Institute) to stimulate and coordinate research projects related to plasma and other modern high-energy engineering techniques. Today the NPI is an active multidisciplinary organization involving 23 faculty members from 6 engineering departments working in close collaboration with the School of Biomedical Engineering, College of Arts and Sciences, and the College of Nursing and Health Professions.

Precision Instrumentation and Metrology Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=7) This laboratory is focused on activities related to precision measurement, computer-aided inspection, and precision instrument design. Facilities include 3D Coordinate Measuring Machine (Brown & Sharpe) with Micro Measurement and Reverse engineering software, Surface Profilometer, and Laser Displacement Measuring System.

Space Systems Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=1)

The objective of the Space Systems Laboratory (SSL) is to inspire future generations to advance aerospace engineering. It provides research opportunities in orbital mechanics, rendezvous and docking maneuvers, mission planning, and space environment. The lab provides facilities for activities in High Altitude Balloons, construction of air-vehicles and nano-

satellites, 0-g flights, and STK simulation package for satellite flights and trajectories.

Theoretical and Applied Mechanics Group (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=1)

Research in the Theoretical and Applied Mechanics Group (TAMG) focuses on using experimental, analytical and computational tools to understand deformation and failure of materials, components and structures in a broad range of time and length scales. To accomplish this goal, TAMG develops procedures that include mechanical behavior characterization coupled with non-destructive testing and modern computational tools. This information is used both for understanding the role of important material scales in the observed bulk behavior and for the formulation of constitutive laws that can model the response including damage initiation and progression according to prescribed loading conditions. Equipment and facilities used by TAMG include a range of mechanical testing equipment for testing in tension, compression, fatigue and fracture.

Vascular Kinetics Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=1)

The Vascular Kinetics Laboratory (VKL) uses engineering methods to understand how biomechanics and biochemistry interact in cardiovascular disease. In particular, we study fluid flow and blood vessel stiffness impact cellular response to glucose, growth factors, and inflammation to lead to atherosclerosis and metabolic syndrome. We then apply these discoveries to novel biomaterials and therapies, with a particular focus on treating cardiovascular disease in under-served populations. This research is at the interface of engineering and medicine, with close collaborations with biologists and physicians and a strong emphasis on clinical applications.

Mechanical Engineering Faculty

Jennifer Atchison, PhD (*Drexel University*). Assistant Teaching Professor. Engineering Education, Functional Fabrics, and Nanofibers

Jonathan Awerbuch, DSc (*Technion, Israel Institute of Technology*). Professor. Mechanics of composites; fracture and fatigue; impact and wave propagation; structural dynamics.

Nicholas P. Cernansky, PhD (*University of California-Berkeley*) *Hess Chair Professor of Combustion*. Professor. Combustion chemistry and kinetics; combustion generated pollution; utilization of alternative and synthetic fuels.

Bor-Chin Chang, PhD (*Rice University*). Professor. Computer-aided design of multivariable control systems; robust and optimal control systems.

Richard Chiou, PhD (*Georgia Institute of Technology*). Associate Professor. Green manufacturing, mechatronics, Internet-based robotics and automation, and remote sensors and monitoring.

Young I. Cho, PhD (*University of Illinois-Chicago*). Professor. Heat transfer; fluid mechanics; non-Newtonian flows; biofluid mechanics; rheology.

Bakhtier Farouk, PhD (*University of Delaware*) *Billings Professor of Mechanical Engineering*. Professor. Heat transfer; combustion; numerical methods; turbulence modeling; materials processing.

Alexander Fridman, DSc, PhD (*Moscow Institute of Physics and Technology*) *Mechanical Engineering and Mechanics, John A. Nyheim Endowed University Chair Professor, Director of the Drexel Plasma*

Institute. Professor. Plasma science and technology; pollutant mitigation; super-adiabatic combustion; nanotechnology and manufacturing.

Li-Hsin Han, PhD (*University of Texas at Austin*). Assistant Professor. Polymeric, micro/nano-fabrication, biomaterial design, tissue engineering, rapid prototyping, free-form fabrication, polymer micro actuators, photonics

Y. Grace Hsuan, PhD (*Imperial College*). Professor. Durability of polymeric construction materials; advanced construction materials; and performance of geosynthetics.

Andrei Jablokow, PhD (*University of Wisconsin, Madison*) Associate Department Head for Undergraduate Affairs, Mechanical Engineering and Mechanics. Associate Teaching Professor. Engineering education; kinematics; geometric modeling.

Antonios Kotsos, PhD (*Rice University*). Associate Professor. Applied mechanics; probabilistic engineering mechanics; modeling of smart multifunctional materials.

E. Caglan Kumbur, PhD (*Pennsylvania State University*). Associate Professor. Next generation energy technologies; fuel cell design and development.

Harry G. Kwatny, PhD (*University of Pennsylvania*) S. Herbert Raynes Professor of Mechanical Engineering. Professor. Dynamic systems analysis; stochastic optimal control; control of electric power plants and systems.

Alan Lau, PhD (*Massachusetts Institute of Technology*). Professor. Deformation and fracture of nano-devices and macroscopic structures; damage-tolerant structures and microstructures.

Michele Marcolongo, PhD, PE (*University of Pennsylvania*) Department Head, Materials Science and Engineering. Professor. Orthopedic biomaterials; acellular regenerative medicine, biomimetic proteoglycans; hydrogels.

Roger Marino, PhD (*Drexel University*). Associate Teaching Professor. Engineering education; land development; product Development

Matthew McCarthy, PhD (*Columbia University*) Associate Department Head for Graduate Affairs, Mechanical Engineering and Mechanics. Associate Professor. Micro- and nanoscale thermofluidic systems, bio-inspired cooling, smart materials and structures for self-regulated two-phase cooling, novel architectures for integrated energy conversion and storage.

David L. Miller, PhD (*Louisiana State University*). Professor. Gas-phase reaction kinetics; thermodynamics; biofuels.

Moses Noh, PhD (*Georgia Institute of Technology*). Associate Professor. MEMS; BioMEMS; lab-on-a-chip; microfabrication; microfluidics.

Mira S. Olson, PhD (*University of Virginia*). Associate Professor. Peace engineering; source water quality protection and management; contaminant and bacterial fate and transport; community engagement.

Sorin Siegler, PhD (*Drexel University*). Professor. Orthopedic biomechanics; robotics; dynamics and control of human motion; applied mechanics.

Jonathan E. Spanier, PhD (*Columbia University*) Department Head, Mechanical Engineering and Mechanics. Professor. Light-matter interactions in electronic materials, including ferroelectric semiconductors,

complex oxide thin film science; laser spectroscopy, including Raman scattering.

Wei Sun, PhD (*Drexel University*) Albert Soffa Chair Professor of Mechanical Engineering. Professor. Computer-aided tissue engineering; solid freeform fabrication; CAD/CAM; design and modeling of nanodevices.

Ying Sun, PhD (*University of Iowa*). Associate Professor. Transport processes in multi-component systems with fluid flow; heat and mass transfer; phase change; pattern formation.

Tein-Min Tan, PhD (*Purdue University*). Associate Professor. Mechanics of composites; computational mechanics and finite-elements methods; structural dynamics.

James Tangorra, PhD (*Massachusetts Institute of Technology*) Department Head, Engineering Technology. Associate Professor. Analysis of human and (other) animal physiological systems; head-neck dynamics and control; balance, vision, and the vestibular system; animal swimming and flight; robotics; system identification; bio-inspired design.

Ajmal Yousuff, PhD (*Purdue University*). Associate Professor. Optimal control; flexible structures; model and control simplifications.

Jack G. Zhou, PhD (*New Jersey Institute of Technology*). Professor. CAD/CAM; computer integrated manufacturing systems; rapid prototyping; system dynamics and automatic control.

Emeritus Faculty

Leon Y. Bahar, PhD (*Lehigh University*). Professor Emeritus. Analytical methods in engineering, coupled thermoelasticity, interaction between analytical dynamics and control systems.

Gordon D. Moskowitz, PhD (*Princeton University*). Professor Emeritus. Biomechanics, dynamics, design, applied mathematics.

Donald H. Thomas, PhD (*Case Institute of Technology*). Professor Emeritus. Biocontrol theory, biomechanics, fluidics and fluid control, vehicle dynamics, engineering design.

Albert S. Wang, PhD (*University of Delaware*). Professor Emeritus. Treatment of damage evolution processes in multi-phased high-temperature materials, including ceramics and ceramic-matrix composites.

Project Management

Major: Project Management

Degree Awarded: Master of Science (MS) and Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS); 90.0 (PhD)

Co-op Option: None

Classification of Instructional Programs (CIP) code: 52.0211

Standard Occupational Classification (SOC) code: 11-9199

The MS in Project Management is now housed in the Goodwin College of Professional Studies.

About the Program

Modern project management is a field that began in the 1950s in the defense industry. In the 1980s, the field gained critical mass in a broad range of industries, including, but not limited to building/construction, IT/

systems development, defense, engineering, film and video, financial services, healthcare, and government contracting. Organizations are using project management concepts, tools, and techniques to achieve their objectives and gain a competitive advantage.

Master of Science in Project Management

The Master of Science (MS) in Project Management, a part-time online program, is designed to equip professionals with the knowledge and skills expected of project managers in any field. The course content is mapped to the internationally-recognized Project Management Institute's (PMI)® *A Guide to the Project Management Body of Knowledge (PMBOK® Guide)*.

Interested candidates should visit Drexel University Online (<http://online.drexel.edu/online-degrees/business-degrees/project-management/>) for admissions requirements and more information about how to apply.

Questions about the MS in Project Management should be directed to:

Mercedes Moultrie
Program Manager
 Project Management Program
 Tel: 215.571.3939
 E-mail: mm342@drexel.edu

CAPM, PMP, and PMBOK are registered marks of the Project Management Institute, Inc.

Degree Requirements

The Master of Science in Project Management requires completion of 45.0 credit hours (quarter) of study. The curriculum includes a core of 10 required courses (30.0 credits), a culminating capstone project experience (PROJ 695 (<http://catalog.drexel.edu/coursedescriptions/quarter/grad/proj/>)) integrating the knowledge and skills acquired during the program (3.0 credits) and 12.0 credits of electives.

Electives

Students should use electives to increase project management, creativity, communication, or leadership skills or to develop areas of specialization. Any appropriate graduate course offered in the University can serve as an elective if the student has sufficient background to take the course. In addition, the program will offer its own elective courses including special topics (PROJ T580 (<http://catalog.drexel.edu/coursedescriptions/quarter/grad/proj/>); PROJ T680; (<http://catalog.drexel.edu/coursedescriptions/quarter/grad/proj/>) or PROJ T780 (<http://catalog.drexel.edu/coursedescriptions/quarter/grad/proj/>)). Qualified students may also pursue independent study (PROJ I599 (<http://catalog.drexel.edu/coursedescriptions/quarter/grad/proj/>); PROJ I699 (<http://catalog.drexel.edu/coursedescriptions/quarter/grad/proj/>); or PROJ I799 (<http://catalog.drexel.edu/coursedescriptions/quarter/grad/proj/>)) for elective credit in special cases.

Curriculum

Core Courses		
PROJ 501	Introduction to Project Management	3.0
PROJ 502	Project Planning & Scheduling	3.0
PROJ 510	Project Quality Management	3.0
PROJ 515	Project Estimation & Cost Management	3.0
PROJ 520	Project Risk Assessment & Management	3.0
PROJ 530	Managing Multiple Projects	3.0

PROJ 535	International Project Management	3.0
PROJ 540	Project Procurement Management	3.0
PROJ 603	Project Leadership & Teamwork	3.0
PROJ 645	Project Management Tools	3.0
Free Electives		12.0
Capstone Project		
PROJ 695	Capstone Project in Project Management	3.0
Total Credits		45.0

Degree Requirements

NOTE: The Project Management Program is not currently accepting applications to the PhD in Project Management.

The following general requirements must be satisfied to complete the PhD in Project Management:

- 90.0 quarter credit hours total (or 45.0 credit hours post-MS)
- Plan of study established with Advisor
- Qualifying courses
- Candidacy exam
- Approval of dissertation proposal
- Defense of dissertation
- Full-time residency is desired for the PhD degree to ensure students the opportunity for intellectual association with other scholars.

Students entering with a master's degree may be exempted from some or all of the courses in the breadth requirement; however, they are still required to meet all milestones of the program. Individual courses may also be transferred with approval of the Project Management program. The total credit amount, candidacy exam, and dissertation are University Requirements. Additional requirements are determined by the Project Management program.

To be enrolled into the PhD in Project Management program, students must be accepted by the program and the faculty member with whom they will be working.

Required Qualifying Project Management Courses		33.0
PROJ 501	Introduction to Project Management	
PROJ 502	Project Planning & Scheduling	
PROJ 510	Project Quality Management	
PROJ 515	Project Estimation & Cost Management	
PROJ 520	Project Risk Assessment & Management	
PROJ 530	Managing Multiple Projects	
PROJ 535	International Project Management	
PROJ 540	Project Procurement Management	
PROJ 603	Project Leadership & Teamwork	
PROJ 645	Project Management Tools	
PROJ 695	Capstone Project in Project Management	
Free Electives		12.0
Research and Candidacy Courses		15.0
Students must complete 15.0 credit hours of research courses as approved by their faculty/research advisor. Courses will include study in research methodologies, research design, data analysis; and writing for research, publication, and funding.		
Required Candidacy Courses		21.0
Students must complete 21.0 credit hours of courses in consultation with their faculty/research advisor/committee. Courses will include study in applied research and dissertation research.		
Professional Electives		9.0
PROJ 650	Project Stakeholder Management	
PROJ 665	Managing Project Knowledge	

PROJ 670	Project Management Methodologies: Managing Project Lifecycles	
Other electives approved by faculty advisor and the Project Management program (must be 6XX or higher)		
Total Credits		90.0

Candidacy Exam

After approximately one year of study beyond the master's degree, doctoral students will take a candidacy examination, consisting of written and oral parts. The Project Management candidacy examination serves to define the student's research domain and to evaluate the student's knowledge and understanding of various fundamental and seminal results in that domain. At this point the student is expected to be able to read, understand, analyze, and explain advanced results in a specialized area of Project Management at an adequate level of detail. The candidacy examination will evaluate those abilities using a defined set of published manuscripts. The student will prepare a written summary of the contents of the material, present the summary orally, and answer questions about the material. The examination committee will evaluate the written summary, the oral presentation, and the student's answers.

Dissertation Proposal

After successfully completing the candidacy examination, the PhD candidate must prepare a dissertation proposal that outlines, in detail, the specific problems that will be solved in the PhD dissertation. The quality of the dissertation proposal should be at the level of, for example, a peer-reviewed proposal to a federal funding agency, or a publishable scientific paper. A dissertation proposal must be approved within two years of becoming a PhD candidate.

Dissertation Defense

After successfully completing the dissertation proposal, the PhD candidate must conduct the necessary research and publish the results in a PhD dissertation.

Sample Plan of Study (PhD)

Upon entering the PhD in Project Management program, each student will be assigned an advisor, and with the help of the advisor will develop and file a plan of study (which can be brought up to date when necessary). The plan of study will be filed with the Project Management program; the student's advisor; and the Graduate College.

BS (in any discipline)/MS in Project Management

Note: The Project Management program is not currently accepting applications to this program.

Motivated Drexel undergraduate students from any discipline considering the BS/MS option have the opportunity to add the MS in Project Management to their curriculum. Students approved to pursue this option will work with advisors to develop a plan of study that will allow them to graduate with a BS in their undergraduate field of study and an MS in Project Management.

BS/MS students who complete an MS in Project Management will be equipped with the fundamental competencies expected of project managers in virtually any field. They will also be prepared to pursue the Certified Associate in Project Management (CAPM)[®] or Project Management Professional (PMP)[®] credentials from the Project Management Institute (PMI). Course content, which is the same as that of the MS in Project Management degree, is aligned with the internationally recognized Project Management Institute's (PMI)[®] *A Guide to the Project Management Body of Knowledge (PMBOK[®] Guide)*.

Eligible Students

Current Drexel undergraduate students who have completed between 90.0 and 120.0 credits of their respective undergraduate degree with a minimum cumulative GPA of 3.2 and who have successfully completed at least 1 co-op experience or have at least 1 year of professional experience should contact their undergraduate advisor about this option.

Application Requirements

- Signed Accelerated Degree Program Application (<http://drexel.edu/graduatecollege/forms-policies/forms/>) (approved by the student's primary academic advisor)
- Current resume
- Personal essay discussing the following:
 - Why you are pursuing a BS in your chosen discipline/the MS in Project Management
 - How you feel having a BS in your chosen discipline/the MS in Project Management will set you apart from your peers

Degree Requirements

 E-mail: mm342@drexel.edu

CAPM, PMP, and PMBOK are registered marks of the Project Management Institute, Inc.

Project Management Faculty

Frank Anbari, PMP, PhD (*Drexel University*). Clinical Professor.
 Transportation engineering; project scheduling; project cost management;

earned value management; project quality management; project leadership; project management education; Six Sigma.

Jon Boyle, PhD (*Virginia Polytechnic Institute and State University*). Adjunct Associate Professor. Cognitive neurosciences; industrial/organizational psychology; knowledge management; group processes; human resources and workforce development; business strategy; technology-enabled learning; research and development; process improvement

Simon Cleveland, PhD, PMP, CSM, CSPO, ITIL, SSBB (*Nova Southeastern University*). Adjunct Professor. Project management fundamentals; project scope management; project schedule management and cost control; project risk and quality management; project management for NGOs; managing project complexity; project initiation and development; introduction to program and portfolio management; technical projects planning and scheduling; managing troubled projects; project evaluation and assessment; project negotiation and conflict resolution; managing technology projects; project management for PMP certification; IT project and team management

Patrick O'Brien, PE, CCM, PMP, PhD (*Walden University*). Adjunct Instructor. Negotiations and executive communication; environmental management; scope and time management; project cost and risk management; project quality management; construction management; structural analysis;

Scott Serich, JD, PhD (*University of Michigan*). Adjunct Associate Professor. Procurement management; information technology project management

John Via, DEngr (*Southern Methodist University*). Adjunct Professor.

Tiffani A. Worthy, PMP, EdD (*George Washington University*). Adjunct Instructor. Project management fundamentals; project leadership; project communications; cross cultural communications; project management education; Myers-Briggs Type Indicator

Vince and Judy Vidas Program in Systems Engineering

Major: Systems Engineering

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 14.2701

Standard Occupational Classification (SOC) code: 17-2199

About the Program

The Master of Science in Systems Engineering is an interdisciplinary curriculum which integrates systems thinking with financial management and planning. The degree enables engineering leaders to perform, lead, and manage systems development throughout the life cycle, from conceptual development and engineering design through the operation and sustainment phases. Study can be on a part-time or full-time basis, and all courses are offered online.

The curriculum features the following:

- Include models relevant to sustainable, high performance systems as they relate to effective systems engineering

- Expose students to model-based systems engineering using SysML and DODAF, also covering major aspects of the systems domain.
- Teach systems engineering processes and skills to integrate user needs, manage requirements, conduct technological evaluation, and build elaborate system architectures, assess risk and establish financial and schedule constraints.
- Prepare students to intelligently manage and contribute to any engineering challenge, including concept development, technology assessment, architecture selection, and proposal development. The courses stimulate and challenge students as they consider sustainability-oriented projects and become serious systems engineering managers and practitioners.

Program Outcomes

Graduates of the Drexel University Master of Science in Systems Engineering will be competent in their ability to:

- develop and implement models and tools to enhance and optimize complex systems;
- develop and manage processes relevant to complex systems development;
- architect, design, implement, integrate, verify, validate, support and decommission complex systems;
- use systems engineering tools and practices to identify and execute effective technical solutions;
- manage system-intensive projects within cost and schedule constraints;
- consider financial elements in all complex systems solutions.

Certificate Opportunity

Students may complete a Graduate Certificate as a standalone pursuit or as a gateway to the full Master of Science in Systems Engineering. Students may apply for admission to the Masters of Science in Systems Engineering degree program at any point in a certificate series. Upon admission, graduate courses successfully completed in the certificate series may be applied toward the Master's degree as applicable. Certificate opportunities include:

- Certificate in Systems Design and Development (p. 299)
- Certificate in Systems Engineering (<http://catalog.drexel.edu/graduate/collegeofengineering/systemsengineering/systemsengineeringcert/>)
- Certificate in Systems Engineering Analysis (p. 299)
- Certificate in Systems Engineering Integrated Logistics (p. 300)
- Certificate in Systems Reliability Engineering (p. 300)

Admission Requirements

Degree and GPA Requirement

A bachelor's degree in an Engineering discipline from an ABET-accredited college or university is required. A bachelor's degree in science (Physics, Mathematics, Computer Science, etc.) may also be acceptable. An undergraduate degree earned abroad must be deemed equivalent to a U.S. bachelor's degree. A minimum 3.0 GPA (on a 4.0 scale) for a bachelor's degree as well as for any subsequent graduate-level work is required.

GRE Requirement

The GRE General Test is only required of applicants for full-time studies; part-time applicants do not need to take the GRE. Official documents of

the exam must be submitted directly to the Graduate Admissions Office. Unofficial photocopies will not be accepted. The GRE can be waived for students who have successfully completed a Master's degree or a Drexel certificate in the systems curriculum.

TOEFL Requirement

For students whose native language is not English and who do not hold a degree from a US institution, the Test of English as a Foreign Language (TOEFL) is required. TOEFL scores must be less than two years old to be considered. Minimum total score of 94 (internet-based). Official documents of this exam must be submitted directly to the Graduate Admissions Office. Unofficial photocopies will not be accepted.

Other Requirements

- Submission of an application
- Official, sealed college transcripts
- An essay
- Two or more letters of recommendation

Degree Requirements

The master of science in systems engineering degree requires a minimum of 45 credits, including 33 credits in required core courses and 12.0 graduate elective credits.

Students may take their required elective credits from any graduate-level course(s) in engineering, business, or another college for which they have adequate preparation and can obtain approvals from the college and the systems engineering program.

All candidates are encouraged to discuss areas of interest with the program advisor and to develop a proposed plan of study during the early stages of the program.

Note: Specific course requirements may be waived for students who have taken equivalent courses elsewhere.

Engineering Management Required Courses

EGMT 531	Engineering Economic Evaluation & Analysis	3.0
EGMT 572	Statistical Data Analysis	3.0
EGMT 573	Operations Research	3.0

Systems Engineering Required Courses

SYSE 510	Systems Engineering Process	3.0
SYSE 520	Global Sustainment and Integrated Logistics	3.0
SYSE 521	Integrated Risk Management	3.0
SYSE 533	Systems Integration and Test	3.0
SYSE 685	Systems Engineering Management	3.0
SYSE 688	Systems Engineering Analysis	3.0
SYSE 690	Modeling and Simulation	3.0

Capstone in Systems Engineering

SYSE 598	Capstone in Systems Engineering	3.0
----------	---------------------------------	-----

Electives

12.0

Complete four of the following:

ECEP 501	Power System Analysis
ECEP 502	Computer Analysis of Power Systems
ECEP 503	Synchronous Machine Modeling
ECEP 610	Power System Dynamics
ECEP 611	Power System Security
ECEP 612	Economic Operation of Power Systems
ECES 511	Fundamentals of Systems I
ECES 512	Fundamentals of Systems II
ECES 513	Fundamentals of Systems III

concept development, technology assessment, architecture selection, and proposal development.

Systems engineers are highly valued in industry because their skills complement those in traditional engineering fields. Whereas other engineering disciplines usually focus deeply in only one area, systems engineers must integrate all of those areas into a comprehensive and effective system. This is a versatile skill-set that allows for a flexible career path, as systems engineering expertise is sought by a wide range of industries such as healthcare, defense, communications, aerospace, government, transportation, finance, and more. Drexel University's MS Systems Engineering will prepare students from any of these fields to lead large, complex projects in their organizations.

Systems Engineering Faculty

Richard Grandrino, MBA (*Drexel University*). Teaching Faculty. Manager for advanced logistics operations at Lockheed Martin

Steven Mastro, PhD (*Drexel University*). Adjunct Faculty. Machinery Research and Silencing Division of NAVSEA Philadelphia. Work focuses on advanced sensor and control technologies for condition-based maintenance, damage control, and automation.

Miray Pereira, MBA (*Rutgers University*). Adjunct Instructor. Manages a team of consultants responsible for development, facilitation and implementation of fundamental demand management systems and capabilities for DuPont, most recently with the DuPont Safety & Protection Platform in strategic planning, mergers & acquisitions.

Walter Sobkiw, BS (*Drexel University*). Adjunct Faculty. Author of "Systems Engineering Design Renaissance" and "Systems Practices as Common Sense."

Fernando Tovia, PhD (*University of Arkansas*). Adjunct Instructor. Core quantitative analysis, strategic planning, supply chain management and manufacturing systems.

John Via, DEngr (*Southern Methodist University*). Teaching Professor. Pharmaceutical, Bio-pharmaceutical, and Medical Device development and manufacturing

Certificate in Construction Management

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 18.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 52.2001

Standard Occupational Classification (SOC) Code: 11-9021

About the Program

The certificate in Construction Management program teaches professionals the multidisciplinary skills required of effective senior construction managers. The program produces industry leaders that exhibit strong technical and managerial skills, apply scientific

methodologies to problem solving, are critical thinkers, exercise creativity, and inject innovation into the process.

Students have the option of completing this 18.0 credit certificate in construction management as a stand-alone professional development credential, or as a step toward the MS in Construction Management program (<http://drexel.edu/engmgmt/cmgt/academics/ms/>).

Admission Requirements

The admissions process for this program is the same as for the MS in Construction Management (<http://www.drexel.edu/grad/apply/overview/>).

Program Requirements

Requirements		
CMGT 510	Construction Control Techniques	3.0
CMGT 512	Cost Estimating and Bidding Strategies	3.0
CMGT 515	Risk Management in Construction	3.0
CMGT 525	Applied Construction Project Management	3.0
CMGT 528	Construction Contract Administration	3.0
CMGT 538	Strategic Management in Construction	3.0
Total Credits		18.0

Additional Information

For additional information, view the College of Engineering's Construction Management (<https://drexel.edu/engineering/academics/areas-of-study-programs/construction-management/>) web page or contact the program academic adviser:

Graduate Certificate in Project Management

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 18.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 52.0211

Standard Occupational Classification (SOC) Code: 11-9199

About the Program

While project management has been around since the 1950s, the field has experienced an explosion of growth, both in the number of project managers being employed and in the expectations of the industry. Not only is work becoming more "projectized," but also more organizations are using project management to achieve business results. This requires a solid foundation in business fundamentals, communication, and leadership, as well as skills in program management and portfolio management.

The Graduate Certificate in Project Management is designed to support the growing need for project management graduate education. It provides students with the knowledge and skills necessary for successful professional and leadership careers in the rapidly-expanding field of

project management and will prepare students to pursue the Certified Associate in Project Management (CAPM)[®] or Project Management Professional (PMP)[®] credential from the Project Management Institute (PMI).

Program Requirements

Required Courses

PROJ 501	Introduction to Project Management	3.0
PROJ 502	Project Planning & Scheduling	3.0
PROJ 510	Project Quality Management	3.0
PROJ 515	Project Estimation & Cost Management	3.0
PROJ 603	Project Leadership & Teamwork	3.0

Elective courses 3.0

Select 1 of the following:		
PROJ 520	Project Risk Assessment & Management	
PROJ 530	Managing Multiple Projects	
PROJ 535	International Project Management	
PROJ 540	Project Procurement Management	
PROJ 645	Project Management Tools	
PROJ 650	Project Stakeholder Management	
PROJ 665	Managing Project Knowledge	
Other graduate-level courses, with approval of student's Academic Advisor and the Project Management program (must be 5XX or higher)		

Total Credits 18.0

Additional Information

Interested candidates should visit Drexel University Online (<http://online.drexel.edu/online-degrees/business-degrees/project-management/>) for admissions requirements and more information about how to apply.

Questions about the Graduate Certificate in Project Management should be directed to:

CAPM, PMP, and PMBOK are registered marks of the Project Management Institute, Inc.

Certificate in Real Estate

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 18.0

Instructional Delivery: Campus, Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 52.1501

Standard Occupational Classification (SOC) Code: 11-9141

About the Program

This graduate certificate seeks to produce professionals with the knowledge, skills, and perspective required to be successful in the real estate development process and the industry as a whole. Students explore the knowledge and skills required to create, maintain, and build environments for living, working and entertainment purposes.

Relevant issues include project finance, real estate as investments, design and construction, operations, development law, environmental remediation, public policy, market analysis, and architecture.

Students wishing to complete this certificate in the context of a master's degree should consider the MS in Construction Management (<http://drexel.edu/engmgmt/cmgt/academics/ms/>) with a concentration in Real Estate.

Program Requirements

Requirements

REAL 568	Real Estate Development	3.0
REAL 571	Advanced Real Estate Investment & Analysis	3.0
REAL 572	Advanced Market Research & Analysis	3.0
REAL 575	Real Estate Finance	3.0
REAL 577	Legal Issues in Real Estate Development	3.0
Select one of the following:		3.0
REAL 573	Sales & Marketing of Real Estate	
REAL 574	Real Estate Economics in Urban Markets	
REAL 576	Real Estate Valuation & Analysis	

Total Credits 18.0

Additional Information

For additional information, view the College of Engineering's Construction Management (<https://drexel.edu/engineering/academics/departments/construction-engineering-project-management-systems-engineering/academic-programs/undergraduate/construction-management/>) web page or the program academic adviser:

Ms. Jessica Cruz, jc635@drexel.edu, 215-895-5943

Certificate in Sustainability and Green Construction

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 15.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 52.2001

Standard Occupational Classification (SOC) Code: 11-9021

About the Program

The architectural, engineering, and construction community faces the daunting task of providing a built environment which is in harmony with the natural environment—meeting the current needs of society without jeopardizing the ability of future generations to meet their needs. Sustainable development means integrating the decision-making process across the project team, so that every decision is made with an eye to the greatest long-term benefits.

The certificate in Sustainability and Green Construction is a flexible, part-time post-baccalaureate program, focused on the sustainable aspects of the construction process. Students have the opportunity to complete all requirements within one and a half years.

Currently, in the Leadership in Energy and Environmental Design (LEED) green building rating system, the construction process represents a

significant portion of the effort required to achieve high performance building programs. This certificate program is intended to explore these concepts in detail. Credits from this certificate will transfer toward a Master of Science in Construction Management.

Program Requirements

Requirements		
CMGT 535	Community Impact Analysis	3.0
CMGT 545	Sustainable Principles & Practices	3.0
CMGT 546	Sustainable Technologies	3.0
CMGT 547	LEED Concepts	3.0
CMGT 558	Community Sustainability	3.0
Total Credits		15.0

Additional Information

For additional information, view the College of Engineering's Construction Management (<https://drexel.edu/engineering/academics/departments/construction-engineering-project-management-systems-engineering/academic-programs/undergraduate/construction-management/>) web page or the program academic adviser:

Ms. Jessica Cruz, jc635@drexel.edu, 215-895-5943

Certificate in Systems Design and Development

Certificate Level: Graduate

Admission Requirements: Bachelor's degree in engineering or other science

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 15.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 14.2701

Standard Occupational Classification (SOC) Code: 17-2199

About the Program

The courses in this certificate focus on teaching students engineering design and management of large complex systems, including software intensive systems. By exposing the students to the systems engineering design body of knowledge and allowing them to develop systems skills in stimulating and challenging environments, they will be prepared to become industry leaders who can make a significant difference. Upon completion of this certificate, the students will be able to design, lead, and manage any systems engineering effort -- regardless of size, complexity, technologies, or engineering emphasis.

Admission Requirements

Degree and GPA Requirement

A bachelor's degree in an engineering discipline from an ABET-accredited college or university is required. A bachelor's degree in the sciences (physics, mathematics, computer science, etc.) may also be acceptable. Applicants with degrees in the sciences may be required to take a number of undergraduate or post-baccalaureate courses. An undergraduate degree earned abroad must be deemed equivalent to a US bachelor's

degree. A minimum 3.0 GPA (on a 4.0 scale) for a bachelor's degree as well as for any subsequent graduate-level work is required.

TOEFL Requirement

For students whose native language is not English and who do not hold a degree from a US institution, the Test of English as a Foreign Language (TOEFL) is required. TOEFL scores must be less than two years old to be considered. Minimum total score of 94 (internet-based). Official documents of this exam must be submitted directly to the Graduate Admissions Office. Unofficial photocopies will not be accepted.

Other Requirements

- Submission of an application
- Official, sealed college transcripts
- An essay
- Two or more letters of recommendation

Requirements

SYSE 685	Systems Engineering Management	3.0
SYSE 688	Systems Engineering Analysis	3.0
SYSE 530	Systems Engineering Design	3.0
SYSE 531	Systems Architecture Development	3.0
SYSE 532	Software Systems Engineering	3.0
Total Credits		15.0

Certificate in Systems Engineering Analysis

Certificate Level: Graduate

Admission Requirements: Bachelor's degree in engineering or other science

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 15.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1.5 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 15.1501

Standard Occupational Classification (SOC) Code: 11-9041

About the Program

The courses in this certificate focus on teaching students statistical analysis and the use of mathematical models to solve a variety of problems. The courses are structured to discuss theory, process and application. The primary emphasis is application as the objectives of the courses are to provide students with skills to model problems, determine a quantitative solution, and perform sensitivity analysis. Theory and process are also studied so students learn how the models work by understanding the underlying theory associated with a particular model. Understanding of theory also enforces skills to conduct sensitivity analyses and helps answer "what if" type questions. Upon successful completion of this certificate, students will be able to formulate mathematical models and solve quantitative problems.

Any students interested in decision sciences or advanced mathematical modeling and analysis should consider pursuing this certification.

Admission Requirements

Degree and GPA Requirement

A bachelor's degree in an engineering discipline from an ABET-accredited college or university is required. A bachelor's degree in the sciences (physics, mathematics, computer science, etc.) may also be acceptable. Applicants with degrees in the sciences may be required to take a number of undergraduate or post-baccalaureate courses. An undergraduate degree earned abroad must be deemed equivalent to a US bachelor's degree. A minimum 3.0 GPA (on a 4.0 scale) for a bachelor's degree as well as for any subsequent graduate-level work is required.

TOEFL Requirement

For students whose native language is not English and who do not hold a degree from a US institution, the Test of English as a Foreign Language (TOEFL) is required. Total Credits		15.0

Certificate in Systems Engineering Integrated Logistics

Certificate Level: Graduate

Admission Requirements: Bachelor's degree in engineering or other science

Certificate Type: Graduate Certificate

Number of Credits to Completion: 18.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1.5 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 14.2701

Standard Occupational Classification (SOC) Code: 17-2199

About the Program

The courses in this certificate focus on teaching students to understand, analyze and enhance the performance of complex and dynamic global supply chains. The certificate is structured with three quantitative courses: EGMT 571, EGMT 572, and EGMT 573, that will provide the students with mathematical and statistical tools to analyze and evaluate the supply chain.

The remaining three courses (SYSE 520, SYSE 522, SYSE 690) allow students to understand the dynamic and complex nature of global supply chains from a systems engineering perspective. They also teach students to implement the quantitative tools learned during the first three courses to efficiently manage the supply chain. Students will evaluate and analyze diverse types of supply chains through case studies, and they will analyze and discuss the best practices in supply chains across the world.

All affiliated courses may be applied to the Master of Science in Systems Engineering (p. 294) and the Master of Science in Engineering Management (p. 276).

Admission Requirements

Degree and GPA Requirement

A bachelor's degree in an engineering discipline from an ABET-accredited college or university is required. A bachelor's degree in the sciences (physics, mathematics, computer science, etc.) may also be acceptable. Applicants with degrees in the sciences may be required to take a number of undergraduate or post-baccalaureate courses. Certificate in Systems Reliability Engineering

Certificate Level: Graduate

Admission Requirements: Bachelor's degree in engineering or other science

Certificate Type: Graduate Certificate

Number of Credits to Completion: 18.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1.5 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 14.2701
Standard Occupational Classification (SOC) Code: 17-2199

SYSE 524	Systems Reliability, Availability & Maintainability Analysis	3.0
Total Credits		18.0

About the Program

The courses in this certificate focus on teaching students to design for sustainability and reliability of systems during the life cycle of an operation. The first three courses will teach students the analytical tools required to perform reliability and maintainability modeling and analysis. The final three courses will focus on systems reliability, maintainability, and availability analysis (RM&A) for systems. The courses have an application to all phases of the systems engineering process, including requirements definition through systems design and development. The students will learn the process that starts with RM&A in the initial phases of development, conducting trade off analysis during the system development phase to optimize reliability and availability of the system. The students will also learn to improve the reliability and availability of a product or a system by modeling and analysis of systems reliability using probability models.

Upon completion of the courses, students will be able to understand RM&A and modeling and apply reliability models for a product or system during its life-cycle: design, production, and warranty. Additionally, students will learn to conduct trade off analysis to enhance availability and reliability of the system and to develop maintenance concepts that are cost effective and support sustainment of the system.

Admission Requirements

Degree and GPA Requirement

A bachelor's degree in an engineering discipline from an ABET-accredited college or university is required. A bachelor's degree in the sciences (physics, mathematics, computer science, etc.) may also be acceptable. Applicants with degrees in the sciences may be required to take a number of undergraduate or post-baccalaureate courses. An undergraduate degree earned abroad must be deemed equivalent to a US bachelor's degree. A minimum 3.0 GPA (on a 4.0 scale) for a bachelor's degree as well as for any subsequent graduate-level work is required.

The College of Medicine

Overview

Renowned for its innovative, student-centered educational programs, Drexel University College of Medicine (<http://www.drexel.edu/medicine/>) represents the consolidation of two venerable medical schools with rich and intertwined histories: Hahnemann Medical College and Woman's Medical College of Pennsylvania. Established in 1848 and 1850, respectively, they were two of the earliest medical colleges in the United States, and Woman's was the very first medical school for women.

Today, with more than 1,000 medical students, Drexel University College of Medicine is educating one in every 83 medical students in the nation. Graduate students number more than 800, and the College is the academic partner in the education of nearly 600 medical residents and fellows. There are more than 700 clinical and basic science faculty, and more than 1,700 affiliate and volunteer faculty.

Within the College of Medicine, The Graduate School of Biomedical Sciences and Professional Studies (p. 39) offers an additional 29 majors, 3 graduate minors, and 5 professional certificates.

Major

- Medicine (MD) (p. 302)

About the College of Medicine

Mission Statement

Drexel University College of Medicine excels and innovates in education, research, and delivery of compassionate care in our culture of diversity, spirited inquiry, collaboration, and opportunity.

About the College

The College of Medicine's main campus, Queen Lane, is in a suburban-like setting in the East Falls section of Philadelphia. Additional education and research facilities are located at the Center City campus. Students receive their clinical education at 25 affiliated hospitals and ambulatory sites chosen for their commitment to teaching as well as medical excellence.

The College of Medicine has established one of the largest centers for spinal cord research in the Mid-Atlantic region, and founded one of the leading centers for malaria study in the nation. Collaborative projects leveraging Drexel University's technological expertise continue to push the frontiers of nanomedicine and neuroengineering.

The multifaceted HIV/AIDS program includes an affiliated primary care and specialty practice, and extensive NIH-funded research in prevention and therapeutic interventions. Faculty physicians are highly respected in numerous other specialties, including cardiology, sports medicine and neurology. The first medical school in the country to completely integrate women's health into its curriculum, the College is the home of ELAM[®], the highly regarded Executive Leadership in Academic Medicine Program for Women.

Facilities

Queen Lane Student Activities Center

A 17,700 square-foot student activity center was completed in 2006 at the Queen Lane Campus. The Student Activities Center occupies 2 floors and houses a full line of exercise equipment, a bookstore, student government offices and flexible space for events and lectures. The facility is available to students, staff and groups.

Queen Lane Medical Simulation Center

The College opened a state-of-the-art simulation center for medical education in 2010. Part of a new 25,000 square-foot addition, the center allows students to learn in simulated operating room and patient room settings.

Clinical Education Assessment Center

Ten examination rooms with digital capture that simulate physicians' offices are linked to control and observation rooms for faculty. Students work with standardized patients to enhance their abilities in medical interviewing, physical examination skills, and patient counseling.

Multidisciplinary Laboratories

- Forty-two tables with microscopes for teaching neuroanatomy, microbiology, and pathology are available.
- Microscopes are equipped with a networked video system so that all students in a class can look at a single slide under the microscope through monitors on their lab tables or on a projection screen and can retrieve microscopic images via computer.

New College Building

The New College Building at the Center City Campus is designed for the purpose of teaching basic and clinical sciences, with auditoriums, classrooms, laboratories and offices. The lecture halls accommodate a variety of educational methodologies, spanning from the basic lecture format to the enriched laboratory setting, where courses such as Anatomy, Pathology, Microbiology, Histology and Applied Anatomic Pathology can be taught.

The Doctor of Medicine (MD) Program

About the Program

Drexel University College of Medicine's MD program trains future physicians in the science and art of medicine. At Drexel, our medical students learn to combine cutting-edge technology with the lightest level of compassion in the practice of medicine. Our supportive educational environment emphasizes collaboration and gives students a comfort level that lets them learn and thrive. Faculty members are concerned first and foremost with teaching and helping students.

Recognizing that students have different learning styles, students choose between two innovative academic curricula for their first two years of study. Both options focus on professional medical education, preparing students to pursue a career as either a generalist or specialist. Both stress problem solving, lifelong learning skills and the coordinated teaching of basic science with clinical medicine.

Drexel has implemented a new, innovative MD curriculum called **Foundations and Frontiers**, designed to create physicians for the 21st century. The curriculum instills all of the enduring qualities essential to clinical excellence while also including essential emerging competencies

such as understanding of population health, health informatics, quality and patient safety, and health care systems and financing.

Foundations and Frontiers Highlights

Foundations and Frontiers was created with input from current medical students, faculty, alumni and national medical education experts. The program builds on the College of Medicine's legacy in medical education and embraces Drexel University's reputation for innovation and collaboration.

The new curriculum is supported technologically by Drexel-developed iPad applications and a state-of-the-art simulation center and clinical education center where medical students can apply what they have learned in the classroom with hands-on training.

Other hallmarks of the distinctive Frontiers and Foundations curriculum include:

- Early and frequent clinical exposure
- Integrated basic science and clinical education
- Team learning
- Technology-enhanced education
- Cultural competence
- Community and civic engagement
- And award winning, nationally recognized Professional Formation program
- Enhanced opportunities for research and scholarly projects in basic science as well as other areas such as Women's Health, Population Health, Healthcare Economics, and Humanities

The Societies

Incoming medical students are placed into one of six learning communities, or "societies," each taking its name from a famous Philadelphia landmark: Athenaeum, Liberty Bell, Physick House, Rocky Statue, Reading Terminal, and Eakins House.

Each society is led by a faculty director and student representatives, all of whom are responsible for coordinating and planning society activities. In addition, society-associated faculty serve as advisors to small groups of medical students in the first two years of the educational program.

The society provides the framework for relationships among medical students and faculty. The society also provides a social structure for each student, giving a small-school feel while maintaining all of the advantages and amenities of a large institution.

The program helps promote a greater sense of community and connectedness among the medical students and faculty. The society serves as the core unit for a variety of valuable activities including:

- Small group learning
- A faculty advising/peer mentoring program
- Community service projects
- Activities to promote student wellness
- Social activities
- Society-based competitions culminating in the coveted "Dean's Cup"

The Foundations and Frontiers curriculum information presented is subject to revision. Last updated June 1, 2017.

For more information, including admissions details, visit the College of Medicine's MD Program (<http://drexel.edu/medicine/academics/md-program/>) web site.

Three-Phase Curriculum

Foundations and Frontiers is a four-year curriculum that has been divided into three phases. Phase One (years 1 and 2) lays the groundwork for basic and clinical science. Phase Two (year 3) allows medical students to apply their patient care knowledge and skills to a variety of clinical settings. Phase Three (year 4) focuses on advanced clinical skills and preparation for residency.

Phase 1: Foundations

The 18-month "Foundations" phase includes basic and clinical science courses that integrate multiple disciplines. Medical students also spend time in non-traditional classroom settings working in teams to apply knowledge to clinical problems. This phase of the curriculum also includes multiple experiences in our state-of-the-art simulation center working with high-fidelity mannequins and standardized patients. The basic science content begins with an introduction to cells and tissues and then proceeds into organ-based blocks with a focus on normal processes. During the second year, medical students revisit the major organ systems with a focus on abnormal processes.

Lectures, conferences, laboratory, simulation and other team-learning formats develop and extend the principles introduced in the case throughout the week.

A longitudinal practicum experience extends through the Foundations phase and exposes medical students to patients in varied community settings. It provides experiences in chronic care, service learning and inter-professional education, and is combined with a social justice and health disparities curriculum.

During four one-week blocks, medical students will be immersed in the "Frontiers" portion of the curriculum, providing cutting-edge study in such areas as healthcare informatics, population health, quality and patient safety, healthcare economics, and principles of translational research.

Phase 2: Applications

The one-year long "Applications" phase allows medical students to practice their patient care knowledge and skills in a variety of clinical settings. The year starts with participating in a two-week structured session, "*Intersession I: Transition to the Clinical Years*," which focuses on skills needed for medical students to function effectively on the wards.

During the third year, medical students rotate through clerkships in surgery, internal medicine, family medicine, pediatrics, psychiatry, neurology, ambulatory medicine, and obstetrics and gynecology. To enhance the diversity of their clinical experience, medical students work with faculty members at multiple sites in metropolitan centers, working-class neighborhoods, suburbs, inner city areas, and rural communities.

All third-year clerkships take place on Drexel's academic campuses. Assignments for third year are based on the results of a lottery system, although medical students can elect year-long assignments at our six regional campuses:

- Abington Memorial Hospital
- Allegheny General Hospital
- York Hospital

- Kaiser Permanente in Sacramento
- Monmouth Medical Center
- Crozer Chester Medical Center

Phase 3: Transitions

The "Transitions" phase focuses on advanced clinical skills and preparation for residency. The fourth year curriculum is structured within "Pathways" - an advising system that gives medical students a well-rounded educational experience and also prepares them for potential career. Medical students may choose a discipline-specific Pathway or one that provides more broad-based experiences. All medical students have a Pathway-specific advisor who works with the student to balance the structure and flexibility of their learning needs, helps prepare the student to enter postgraduate training with confidence, and works to maximize the guidance and counseling available from preceptors.

The Pathway advisors help medical students focus their preparation for graduate medical education and careers. The Pathway program also gives medical students experience in fields of interest other than the one that is likely to be their career path. Medical students take both required courses and electives in the Pathway system. Six courses are required:

- Sub-internship in a core discipline
- Pathway-specific rotation
- Emergency medicine or critical care rotation
- Transition to residency
- Residency-immersion experience

Fourth-year medical students have opportunities to complete a variety of clinical elective rotations at hospitals and sites that are not Drexel clinical affiliates, including international rotations. In addition, during the fourth year, medical students may choose to leverage the expertise of one of Drexel's other colleges by studying for a graduate certificate in one of the Frontiers content areas. Alternatively, medical students may choose to conduct a scholarly project under the direction of a faculty member.

Dual Degree Programs

MD/PhD Program

The MD/PhD program is designed for a limited number of individuals who are strongly motivated toward a career in academic medicine and medically oriented research. The program trains individuals in the fundamental clinical aspects of medicine and offers advanced training in biochemistry, microbiology and immunology, molecular and cellular biology, neuroscience and pharmacology, as well as medical engineering. Physicians with extensive research training are uniquely positioned to advance medical care and to teach at the cutting edge of medical discovery. Tuition scholarships and stipends for medical school and graduate school are provided for a limited number of students.

MD/MPH

With Drexel's School of Public Health, the College of Medicine offers a joint five-year program for highly qualified students to pursue both the MD and the Master of Public Health degrees. Students are taught to be physicians with a public-health orientation to the development, planning, delivery, and evaluation of health care programs and policies.

MD/MBA

The MD/MBA degree meets a growing demand by physicians who wish to manage corporate medical practices, hospitals, and related organizations

and contribute to the development of health policy. The joint program prepares physicians to apply management principles to individual or group practices or to move into management positions at many types of organizations. Students receive training at both the College of Medicine and at Drexel's A.A.C.S.B. -accredited LeBow College of Business. The program lets students earn both degrees in five years.

MD/Healthcare Ethics MA

Drexel medical students may enter a combined degree pathway to receive a master's degree in health care ethics through St. Joseph's University. Students spend a year in residence at St. Joseph's University, usually after their second medical school year. They receive two course credits toward the master's degree from their medical school coursework.

For additional information, visit the College's Dual Degrees (<http://www.drexelmed.edu/Home/AcademicPrograms/MDProgram/AdditionalOpportunities/DualDegree.aspx>) page.

The School of Biomedical Engineering, Science, and Health Systems

Mission Statement

The mission of the School of Biomedical Engineering, Science and Health Systems is to promote health and quality of life through education, research and innovation that integrates engineering and life sciences in a global context.

The School of Biomedical Engineering, Science, and Health Systems (<http://drexel.edu/biomed/>) is a nationally recognized center for research in biomedical engineering and science. The School offers multidisciplinary instruction on a full- and part-time basis at the graduate level and full-time instruction at the undergraduate level. The faculty includes individuals with engineering, physics, mathematics, biostatistics, life science, medical, and clinical specialties. Multidisciplinary and translational research is carried out through collaboration among Drexel University faculty members and with medical schools and hospitals in the Philadelphia area.

The School offers MS programs in biomedical engineering, integrated biomedical engineering and business, and biomedical science. PhD programs are offered in biomedical engineering and biomedical science. Areas of specialization available include biomaterials and tissue engineering, neuroengineering, biosensors and devices, biomedical imaging, biostatistics, genome science and bioinformatics, systems biology, biomechanics, human factors and performance engineering.

The School offers certificate programs in bioinformatics, medical product design, and tissue engineering for professionals continuing their education.

Majors

- Biomedical Engineering (MS, PhD) (p. 306)
- Biomedical Science (MS, PhD) (p. 311)
- Integrated Biomedical Engineering and Business (MS) (p. 316)

Minors

- Bioinformatics (<http://catalog.drexel.edu/graduate/schoolofbiomedicalengineeringsscienceandhealthsystems/bioinformaticsgminor/>)
- **NEW:** Pediatric Engineering

Certificates

- Bioinformatics (p. 319)
- Medical Product Design and Device Development (<http://catalog.drexel.edu/graduate/schoolofbiomedicalengineeringsscienceandhealthsystems/medicalproductdesignanddevicedevelopmentpbc/>)
- Tissue Engineering (p. 319)

About the School

The vision of the School of Biomedical Engineering, Science, and Health Systems (the School) is to accelerate its role as the University's incubator for developing cutting-edge programs that enhance the University's position as a national leader in education and research. The School is a leader at Drexel University, regionally, and nationally in research and translation of discoveries that impact human health and well-being. It engages students across Drexel's campus in a unique combination of cooperative (Co-op) and experiential learning, multi-disciplinary research, entrepreneurship and international exposure. Faculty and students within School possess a spirit of innovation that is built on a deep understanding of fundamental scientific principles; hand-on experience both in the laboratory and in service to others; and recognition of the synergistic impact that occurs through partnerships, globally and locally, with industry, academia, policymakers, clinicians and social-service providers. The School will cultivate "Renaissance Biomedical Scientists and Engineers" who adapt easily to changing technologies, environments and problems.

The School's areas of academic thrust, both in research and education, are at the forefront of biosensing, bioimaging, bioinformation engineering and integrated bioinformatics, drug delivery, biomedical ultrasound & optics, bionanotechnology, cellular tissue engineering, neuroengineering and human performance. The School's multidisciplinary programs are built around a core curriculum with research opportunities in specialized areas. The core curriculum provides the technical and analytical training students need to apply their engineering skills or knowledge of the life sciences to current problems in biology and medicine. Various units at Drexel, such as the College of Engineering, the Dornsife School of Public Health, and the College of Arts and Sciences offer courses relevant to graduate students in biomedical engineering and biomedical science.

Metropolitan Philadelphia has one of the nation's highest concentrations of medical institutions and pharmaceutical, biotechnology, medical device and systems industry. The School has forged strategic partnerships with select universities, research institutes, health care institutions and industries in the region. The School enjoys a close working relationship with Drexel's College of Medicine as well as alliances with prominent medical institutions in the region to develop joint research and educational programs. These include University of Pennsylvania, Thomas Jefferson University, the Fox Chase Cancer Center and the Wistar Institute. These collaborative initiatives provide students with ample opportunities in basic and clinical research as well as innovative academic programs.

The School maintains extensive facilities and laboratories devoted to areas of research. Visit the School's BIOMED Research Facilities and Laboratory Map (<http://drexel.edu/biomed/research/facilities/>) web page for more details about the laboratories and equipment available.

Applicants to the graduate program must meet the requirements for admission to graduate studies at Drexel University. Candidates for degrees in the School of Biomedical Engineering, Science and Health Systems are required to maintain academics standards applicable to all graduate students at Drexel University.

Program Objectives

The overall objective of the graduate programs offered by the School of Biomedical Engineering, Science, and Health Systems is to provide multidisciplinary curricula with an instructional core and research opportunities for students. Graduate biomedical engineering students are typically individuals with undergraduate degrees in engineering, physical sciences, or mathematics. The core curriculum provides the

necessary training in life and medical sciences, modeling and simulation, and biomedical engineering applications to allow students to apply their engineering skills and perspective to solve current problems in biology and medicine. Areas in which students may focus their advanced studies and research attention include biomechanics and biomaterials, cellular and tissue engineering, biomedical sensing and imaging, human factors and performance engineering, neuroengineering, and bioinformatics. Students without an academic background in engineering or physical science who wish to enter the biomedical engineering program may enroll in the Crossover Program.

The core courses in the Biomedical Science program are designed to educate life-science students in quantitative analysis, mathematical modeling, systems analysis, and fundamental computational and informatics skills. Students are then encouraged to combine their knowledge of the life sciences with their newly acquired analytical skills to focus in such areas as tissue engineering and/or bioinformatics.

An agreement with the Drexel College of Medicine allows students to spend one year taking courses at the College of Medicine and their second year at the School of Biomedical Engineering, Science and Health Systems—leading to a Master's degree in Medical Science.

The School also offers an integrated master's degree in biomedical engineering and business, a collaboration with the LeBow College of Business and the Close School of Entrepreneurship, which offers early-career engineers a tech-savvy alternative to an MBA. Through this cross-disciplinary approach, students are able to acquire the advanced knowledge and skills necessary for graduate-level research and career specialization.

Programs are revised regularly to meet industry needs. For the most up-to-date list, please visit the School of Biomedical Engineering, Science, and Health Systems Graduate Admissions web page (<http://drexel.edu/grad/programs/biomed/>).

Admission Requirements

Acceptance for graduate study at Drexel's School of Biomedical Engineering, Science and Health Systems requires a four-year bachelor's degree from an accredited institution in the United States or equivalent international institution. Regular acceptance requires a minimal cumulative grade point average of 3.0 (B) on a 4.0 scale for the last two years of undergraduate work, and for any graduate level work undertaken. Drexel's School of Biomedical Engineering, Science and Health Systems normally requires a TOEFL score of at least 260. Verbal, analytical, and quantitative scores on the GRE General Test are recommended for admission and are required for financial assistantship consideration.

The School practices a rolling admissions policy--students are able to apply at any term during the year, but students are encouraged to matriculate in the fall to ensure proper sequence of coursework.

In addition to the School's requirements, students must satisfy the requirements of the Office of Research and Graduate Studies in matters such as academic standing, thesis, examinations, and time limits.

Financial Assistance

Financial support for qualified students pursuing studies toward the MS and PhD degrees is available in the form of research assistantships, teaching assistantships, graduate assistantships, and fellowships.

Dean's Fellowships are available for outstanding applicants to the School's Master programs and are renewable depending on the student's academic performance. Fellowship applicants must be seeking full-time study only at the master's level. Other requirements include a GPA of 3.5 or better in the student's bachelor's program and submission of GRE scores. For international students, a TOEFL score of 260 or better is required. For more information regarding international applicant requirements, view the International Students Admission Information (<http://www.drexel.edu/grad/resources/international/>) page.

Calhoun Graduate Assistantships are supported by the School's Calhoun Endowment and are available to outstanding applicants to the PhD program. To be considered for a fellowship, students must submit GRE scores along with all their application materials. The application deadline is February 28 for the following academic year.

For further assistance, students should contact the Office of Graduate Admissions (<https://drexel.edu/grad/>).

All applicants will automatically be considered for departmental assistantships. There is no additional paperwork to apply. Applicants interested in graduate assistantships must submit GRE scores. These awards are based on academic merit.

About Graduate Co-op

Drexel University's long tradition in the field of experiential learning has now been extended into many of its master's programs in science, business, and engineering.

This option, called Graduate Co-op (<http://www.drexel.edu/scdc/co-op/graduate/>), provides students with the opportunity to gain work experience directly related to their career goals while earning academic credit. Students who have earned a minimum of 24.0 credits with a GPA of at least 3.0 are eligible to participate. Employment typically lasts six months, during which students enroll in a special 3.0 credit GCP course coinciding with their term of employment. Students gain work experience while earning salaries. It is important to note that the GCP program does not guarantee a job. It is a market-driven process for the candidates as well as employers. GCP provides the tools and contacts; the student must qualify for the job on the basis of merit, qualifications, and skills.

Further information on the GCP program is available at the Drexel Steinbright Career Development Center. (<http://www.drexel.edu/scdc/>)

Biomedical Engineering

Major: Biomedical Engineering

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS) or 90.0 (PhD)

Co-op Option: Available for full-time on-campus master's-level students

Classification of Instructional Programs (CIP) code: 14.0501

Standard Occupational Classification (SOC) code: 17-2031

About the Program

The curriculum develops graduates who can identify and address unmet clinical, diagnostic, and healthcare needs by using their knowledge of modern theories, engineering systems, and mathematical and engineering tools. Biomedical engineers require the analytical tools and broad knowledge of modern engineering and science, fundamental

understanding of the biological or physiological system, and familiarity with recent technological breakthroughs.

Master students can choose to include a 6 months graduate co-op cycle as part of their studies. Students may also choose to enroll in a concentration in Biomedical Device Development, or specialize in biomaterials and tissue engineering, biomechanics, neuroengineering, imaging and devices or bioinformatics, or may pursue a dual-degree MS option. Graduating students work in industry in such fields as medical devices, health care, pharmaceuticals and biotechnology, continue academic careers (PhD), or continue to medical schools.

Degree Requirements (MS)

The core requirements for the master's in biomedical engineering encompass approximately 45.0 course credits (most courses carry three credits each). Students who choose the non-thesis option cannot register for thesis or research credits.

The curriculum includes room for specialization in several areas of biomedical engineering, as well as a concentration in biomedical technology development.

Core Courses

BMES 501	Medical Sciences I	3.0
BMES 502	Medical Sciences II	3.0
BMES 510	Biomedical Statistics	4.0
BMES 538	Biomedical Ethics and Law	3.0
BMES 546	Biocomputational Languages	4.0
or BMES 550	Advanced Biocomputational Languages	
BMES 672	Biosimulation I	3.0
BMES 673	Biosimulation II	3.0
BMES 864	Seminar (Must be taken 3 times)	0.0
BMES Electives - Select a minimum of 13 credits from the list below		13.0-18.0
BMES 503	Medical Sciences III	
BMES 508	Cardiovascular Engineering	
BMES 509	Entrepreneurship for Biomedical Engineering and Science	
BMES 515	Experimental Design in Biomedical Research	
BMES 517	Intermediate Biostatistics	
BMES 518	Interpretation of Biomedical Data	
BMES 524	Introduction to Biosensors	
BMES 528	Pediatric Engineering I	
BMES 529	Pediatric Engineering II	
BMES 531	Chronobioengineering I	
BMES 532	Chronobioengineering II	
BMES 534	Design Thinking for Biomedical Engineers	
BMES 535	Introduction to Product Design for Biomedical Engineers	
BMES 541	Nano and Molecular Mechanics of Biological Materials	
BMES 543	Quantitative Systems Biology	

BMES 544	Genome Information Engineering
BMES 548	Structural Bioinformatics and Drug Design
BMES 549	Genomic and Sequencing Technologies
BMES 551	Biomedical Signal Processing
BMES 588	Medical Device Development
BMES 604	Pharmacogenomics
BMES 611	Biological Control Systems I
BMES 621	Medical Imaging Systems I
BMES 622	Medical Imaging Systems II
BMES 623	Medical Imaging Systems III
BMES 631	Tissue Engineering I
BMES 632	Tissue Engineering II
BMES 641	Biomedical Mechanics I
BMES 642	Biomedical Mechanics II
BMES 651	Transport Phenomena in Living Systems I
BMES 660	Biomaterials I
BMES 661	Biomaterials II
BMES 675	Biomaterials and Tissue Engineering III
BMES 685	Experimental Methods in Neuroengineering
BMES 710	Neural Signals
BMES 711	Principles in Neuroengineering
BMES 722	Neural Aspects of Posture and Locomotion I
BMES 821	Medical Instrumentation
BMES 822	Medical Instrumentation II
BMES 825	Hospital Administration

General Electives in the fields of science, engineering, or medicine including additional BMES classes **9.0-12.0**

The sum of electives, core credits, and/or thesis credits must total 45.0 credits. Elective choices would depend upon the student's area(s) of focus or concentration but must be within the fields of science, engineering, or medicine. A concentration may substitute for elective credits. A minimum of 15 credits of BMES elective courses are required.

Thesis Option **0.0-9.0**

BMES 897	Research
BMES 898	Master's Thesis

Total Credits 45.0-62.0

* The research for the thesis may include work carried out during an internship.

Biomedical Technology Development Concentration (Optional)

Students enrolled in this concentration will develop an understanding of critical regulatory, economic, and legal issues in addition to the project management skills that facilitate the development of new medical devices and positive working relationships with intellectual property lawyers, insurance companies, and the federal government.

Core Courses

BMES 509	Entrepreneurship for Biomedical Engineering and Science	3.0
BMES 534	Design Thinking for Biomedical Engineers	3.0
BMES 538	Biomedical Ethics and Law	3.0
BMES 588	Medical Device Development	3.0
BMES 596	Clinical Practicum III	3.0
Total Credits		15.0

Biomaterials and Tissue Engineering Concentration (Optional)

This concentration is designed to provide students with advanced training in cellular and molecular biology relevant to tissue engineering and behavior of materials used in biomedical applications

Core Courses

BMES 631	Tissue Engineering I	4.0
BMES 632	Tissue Engineering II	4.0
BMES 660	Biomaterials I	4.0
BMES 661	Biomaterials II	4.0
BMES 675	Biomaterials and Tissue Engineering III	4.0
Total Credits		20.0

Bioinformatics Concentration (Optional)

This concentration emphasizes a systems engineering approach to provide a foundation in systems biology and pathology informatics. Students are provided students with hands-on experience in the application of genomic, proteomic, and other large-scale information to biomedical engineering as well as experience in advanced computational methods used in systems biology: pathway and circuitry, feedback and control, cellular automata, sets of partial differential equations, stochastic analysis, and biostatistics.

BMES 543	Quantitative Systems Biology	4.0
BMES 544	Genome Information Engineering	4.0
BMES 547	Machine Learning in Biomedical Applications	3.0
or BMES 549	Genomic and Sequencing Technologies	
BMES 551	Biomedical Signal Processing	3.0
BMES 604	Pharmacogenomics	3.0
Total Credits		17.0

Pediatric Engineering Concentration (Optional)

This concentration aims to train students: 1) to develop a fundamental understanding of childhood injury and disease, healthcare, and treatment, and 2) to apply scientific and engineering concepts, methods, and approaches to address healthcare challenges with direct relevance to pediatric patients.

BMES 528	Pediatric Engineering I	3.0
BMES 529	Pediatric Engineering II	3.0
BMES 538	Biomedical Ethics and Law	3.0
BMES 509	Entrepreneurship for Biomedical Engineering and Science	3.0
Total Credits		12.0

Sample Plan of Study (MS)**First Year**

Fall		Credits
BMES 501	Medical Sciences I	3.0
BMES 510	Biomedical Statistics	4.0
BMES 546 or 550	Biocomputational Languages Advanced Biocomputational Languages	4.0
BMES 864	Seminar	0.0
Term Credits		11.0
Winter		
BMES 502	Medical Sciences II	3.0
BMES 672	Biosimulation I	3.0
BMES 864	Seminar	0.0
BMES Elective		3.0-4.0
Term Credits		9.0-10.0
Spring		
BMES 673	Biosimulation II	3.0
BMES 538	Biomedical Ethics and Law (can be taken in any term)	3.0
BMES 864	Seminar	0.0
BMES Elective		3.0
Term Credits		9.0

Second Year

Fall		
Elective Courses and/or Thesis *	9.0-12.0	
Term Credits		9.0-12.0
Winter		
Elective Courses and/or Thesis **	7.0-12.0	
Term Credits		7.0-12.0

Total Credit: 45.0-54.0

* Can include BMES 897.

** Can include BMES 897 and BMES 898.

PhD in Biomedical Engineering Degree Requirements

To be awarded the PhD degree, students must complete 90.0 required credits and fulfill the one-year residency requirement.

The following milestones have to be satisfied during the course of the program:

- Students must successfully pass the candidacy examination.
- Students must submit a PhD dissertation proposal and successfully defend it.
- Students must write a dissertation and successfully pass final oral defense.

Post-Baccalaureate Requirements and Post-Master's Requirements

Both post-baccalaureate and post-master's students are admitted into the doctoral program in Biomedical Engineering, but have slightly differing sets of requirements.

For **post-master's students**, 45.0 of the credits that they earned toward their Master's degree may be applied toward the PhD. If coming from the Master's program in Biomedical Engineering at Drexel University, those courses they took would apply. For non-Drexel students who have completed their master's elsewhere, there may be exceptions made. If these students believe that they have covered the material of the required courses in another program, they must show evidence of such material and obtain a formal waiver of this requirement from the Graduate Advisor.

For **post-baccalaureate students**, students must complete a minimum of 90.0 credits and a research thesis. These 90.0 credits include the core courses required by Drexel's MS in Biomedical Engineering.

Core Courses

BMES 501	Medical Sciences I	3.0
BMES 502	Medical Sciences II	3.0
BMES 672	Biosimulation I	3.0
BMES 673	Biosimulation II	3.0
BMES 864	Seminar	0.0
BMES 897	Research	57.0
Additional Courses *		
BMES 510	Biomedical Statistics	4.0
BMES 538	Biomedical Ethics and Law	3.0
BMES 546	Biocomputational Languages	4.0
or BMES 550	Advanced Biocomputational Languages	
BMES Electives		10.0
Total Credits		90.0

* In addition to the required courses, post-baccalaureate PhD students must take at least 21.0 more credits in courses approved by their academic advisor. The balance may be taken as research and/or thesis/dissertation credits.

For post-master's students, 45.0 of the credits that they earned toward their Master's degree may be applied toward the PhD. If coming from the Master's program in Biomedical Engineering at Drexel University, those courses they took would apply. For non-Drexel students who have completed their master's elsewhere, there may be exceptions made. If these students believe that they have covered the material of the required courses in another program, they must show evidence of such material and obtain a formal waiver of this requirement from the Graduate Advisor.

In addition to the required courses, post-baccalaureate PhD students must take at least 21.0 more credits in courses. This balance may be taken as research and/or thesis/dissertation credits.

Thesis Advisor/Plan of Study

During the first year of the program all Doctoral students are required to identify a Thesis Advisor and complete a plan of study. The student's Thesis Advisor and the Graduate Advisor will guide the student in developing this plan of study. Each plan of study is individually tailored to the student, and includes a combination of research and course credits most beneficial and complimentary to the student's chosen thesis topic.

The Candidacy Examination

Doctoral students must successfully pass a candidacy examination, preferably at the end of the first year of their study.

The overall objective of the candidacy examination is to test the student's basic knowledge and preparedness to proceed toward a PhD in Biomedical Engineering. After a satisfactory performance on the candidacy examination the student is awarded the Doctoral Candidate status. Candidates must submit a Thesis Proposal by the end of the second year and defend it in an oral presentation to a committee of five faculty members.

Thesis Defense

After the student has successfully completed all the necessary research and composed a thesis manuscript, in accordance with the guidelines specified by the Office of Research and Graduate Studies, he or she then must formally defend their thesis. A formal thesis defense includes an oral presentation of research accomplishments in front of a committee of faculty members. The thesis defense is open to the general public.

Prospective PhD students are welcome to contact the school to discuss their research interests. For a more detailed description of the PhD requirements, please visit the School of Biomedical Engineering and Health Systems' Biomedical Engineering (<http://drexel.edu/biomed/>) web site.

Total Credit: 90.0		

Areas of Specialization

Areas of specialization can be pursued within the Biomedical Engineering graduate program. Students can plan their own focus area that will give them strength in a particular sub-discipline. Alternatively, the student can specialize by conducting research and writing a thesis.

Biomaterials and Tissue Engineering

Biomaterials and tissue engineering is designed to provide students with advanced training in cellular and molecular biology relevant to tissue engineering and behavior of materials used in biomedical applications.

Biomedical Technology Development

Students pursuing the concentration will develop an understanding of critical regulatory, economic, and legal issues in addition to the project management skills that facilitate the development of new medical devices and positive working relationships with intellectual property lawyers, insurance companies, and the federal government. (This is a formal concentration with specific course requirements.)

Bioinformatics

Bioinformatics emphasizes a systems engineering approach to provide a foundation in systems biology and pathology informatics. Students are provided with hands-on experience in the application of genomic, proteomic, and other large-scale information to biomedical engineering as well as experience in advanced computational methods used in systems biology: pathway and circuitry, feedback and control, cellular automata, sets of partial differential equations, stochastic analysis, and biostatistics.

Biomechanics and Human Performance Engineering

Biomechanics and human performance engineering is designed to meet two objectives: to acquaint students with the responses of biological tissues to mechanical loads as well as with the mechanical properties of living systems and to provide students with the background and skills needed to create work and living environments which improve human health and enhance performance. Biomechanics and human performance also involves the study of orthopedic appliances and the broader aspect of rehabilitation engineering and the management of disability.

Biomedical Systems and Imaging

Biomedical systems and imaging focuses on the theoretical and practical issues related to machine vision, image processing and analysis, and signal processing associated with such medical applications as well biomedical instrumentation and product development.

Neuroengineering

Neuroengineering is broadly defined to include the modeling of neural and endocrine systems, neural networks, complexity in physiological systems, evolutionary influences in biological control systems, neurocontrol, neurorobotics, and neuroprosthetics.

Biomedical Engineering, Science and Health Systems Faculty

Fred D. Allen, PhD (*University of Pennsylvania*) Associate Dean for Undergraduate Education. Teaching Professor. Tissue engineering, cell engineering, orthopedics, bone remodeling, wound healing, mechanotransduction, signal transduction, adhesion, migration.

Hasan Ayaz, PhD (*Drexel University*) School of Biomedical Engineering, Science and Health Systems. Associate Professor. Optical brain imaging, cognitive neuroengineering, brain computer interface (BCI), functional near infrared (fNIR), and near infrared spectroscopy (NIRS).

Sriram Balasubramanian, PhD (*Wayne State University*). Assistant Professor. Structural characteristics of the pediatric thoracic cage using CT scans and developing an age-equivalent animal model for pediatric long bones.

Kenneth A. Barbee, PhD (*University of Pennsylvania*) Senior Associate Dean, Associate Dean for Research. Professor. Cellular biomechanics of neural and vascular injury, mechanotransduction in the cardiovascular system, mechanical control of growth and development for wound healing and tissue engineering.

Paul Brandt-Rauf, MD, DrPH (*Columbia University*) Dean. Distinguished University Professor. Environmental health, particularly the molecular biology and molecular epidemiology of environmental carcinogenesis, and protein engineering for the development of novel peptide therapies for the treatment and prevention of cancer.

Donald Buerk, PhD (*Northwestern University*). Research Professor. Biotechnology, physiology, systems biology, blood flow, microcirculation, nitric oxide, oxygen transport

Jamie Dougherty, PhD (*Drexel University*). Associate Teaching Professor. Brain-computer interface, neural encoding, electrophysiological signal acquisition and processing.

Lin Han, PhD (*Massachusetts Institute of Technology*). Associate Professor. Nanoscale structure-property relationships of biological materials, genetic and molecular origins soft joint tissue diseases,

biomaterials under extreme conditions, coupling between stimulus-responsiveness and geometry.

Kurtulus Izzetoglu, PhD (*Drexel University*). Associate Research Professor. Cognitive neuroengineering, functional brain imaging, near infrared spectroscopy, medical sensor development, biomedical signal processing, human performance assessment, and cognitive aging

Andres Kriete, PhD (*University in Bremen Germany*) Associate Dean of Academic Affairs. Teaching Professor. Systems biology, bioimaging, control theory, biology of aging, skin cancer.

Steven Kurtz, PhD (*Cornell University*). Part-time Research Professor. Computational biomechanics of bone-implant systems and impact-related injuries, orthopaedic biomechanics, contact mechanics, orthopaedic biomaterials, large-deformation mechanical behavior and wear of polymers, and degradation and crosslinking of polyolefins in implant applications.

Peter Lewin, PhD (*University of Denmark, Copenhagen-Lyngby*) Richard B. Beard Professor, School Of Biomedical Engineering, Science & Health Systems. Professor. Biomedical ultrasonics, piezoelectric and polymer transducers and hydrophones; shock wave sensors.

Hualou Liang, PhD (*Chinese Academy of Sciences*). Professor. Neuroengineering, neuroinformatics, cognitive and computational neuroscience, neural data analysis and computational modeling, biomedical signal processing.

Donald L. McEachron, PhD (*University of California at San Diego*) Coordinator, Academic Assessment and Improvement. Teaching Professor. Animal behavior, autoradiography, biological rhythms, cerebral metabolism, evolutionary theory, image processing, neuroendocrinology.

Michael Neidrauer, PhD (*Drexel University*). Assistant Research Professor. Wound healing, near infrared, spectroscopy, cell culture, data analysis, optical coherence tomography (OCT), matlab, life sciences assay development, confocal microscopy, biomaterials, in-vivo, medical devices

Banu Onaral, PhD (*University of Pennsylvania*) H.H. Sun Professor; Senior Advisor to the President, Global Partnerships. Professor. Biomedical signal processing; complexity and scaling in biomedical signals and systems.

Kambiz Pourrezaei, PhD (*Rensselaer Polytechnic University*). Professor. Thin film technology; nanotechnology; near infrared imaging; power electronics.

Christopher Rodell, PhD (*University of Pennsylvania*). Assistant Professor. Biomaterials, supramolecular chemistry, and drug delivery. Therapeutic applications including the etiology of disease, organ injury, cardiovascular engineering, immune engineering, and biomedical imaging.

Ahmet Sacan, PhD (*Middle East Technical University*). Associate Teaching Professor. Indexing and data mining in biological databases; protein sequence and structure; similarity search; protein structure modeling; protein-protein interaction; automated cell tracking.

Joseph J. Sarver, PhD (*Drexel University*). Teaching Professor. Neuromuscular adaptation to changes in the myo-mechanical environment.

Patricia A. Shewokis, PhD (*University of Georgia*). Professor. Roles of cognition and motor function during motor skill learning; role of information feedback frequency on the memory of motor skills, noninvasive neural imaging techniques of functional near infrared spectroscopy (fNIRS) and electroencephalography (EEG) and methodology and research design.

Adrian C. Shieh, PhD (*Rice University*). Associate Teaching Professor. Contribution of mechanical forces to tumor invasion and metastasis, with a particular emphasis on how biomechanical signals may drive the invasive switch, and how the biomechanical microenvironment interacts with cytokine signaling and the extracellular matrix to influence tumor and stromal cell behavior.

Wan Y. Shih, PhD (*Ohio State University*). Professor. Piezoelectric microcantilever biosensors development, piezoelectric finger development, quantum dots development, tissue elasticity imaging, piezoelectric microcantilever force probes.

Kara Spiller, PhD (*Drexel University*). Associate Professor. Macrophage-biomaterial interactions, drug delivery systems, and chronic wound healing. Cell-biomaterial interactions, biomaterial design, and international engineering education.

Marek Swoboda, PhD (*Drexel University*). Assistant Teaching Professor. Cardiovascular engineering, cardiovascular system, diagnostic devices in cardiology, piezoelectric biosensors, and pathogen detection.

Amy Throckmorton, PhD (*University of Virginia*). Associate Professor. Computational and experimental fluid dynamics; cardiovascular modeling, including transient, fluid-structure interaction, and patient-specific anatomical studies; bench-to-bedside development of medical devices; artificial organs research; prediction and quantification of blood trauma and thrombosis in medical devices; design of therapeutic alternatives for patients with dysfunctional single ventricle physiology; human factors engineering of mechanical circulatory assist devices

Bhandawat Vikas, PhD (*Johns Hopkins School of Medicine*). Associate Professor. Sensorimotor integration, whole-cell patch clamp and imaging in behaving animals, optogenetics, neuromechanics, locomotion.

Bhandawat Vikas Associate Professor. Sensorimotor integration, whole-cell patch clamp and imaging in behaving animals, optogenetics, neuromechanics, locomotion

Margaret Wheatley, PhD (*University of Toronto*) *John M. Reid Professor*. Ultrasound contrast agent development (tumor targeting and triggered drug delivery), controlled release technology (bioactive compounds), microencapsulated allografts (ex vivo gene therapy) for spinal cord repair.

Ming Xiao, PhD (*Baylor University*). Associate Professor. Nanotechnology, single molecule detection, single molecule fluorescent imaging, genomics, genetics, genome mapping, DNA sequencing, DNA biochemistry, and biophysics.

Yinghui Zhong, PhD (*Georgia Institute of Technology*). Assistant Professor. Spinal cord repair, and engineering neural prosthesis/brain interface using biomaterials, drug delivery, and stem cell therapy.

Leonid Zubkov, PhD, DSc (*St. Petersburg State University, Russia*). Research Professor. Physiology, wound healing, physiologic neovascularization, near-infrared spectroscopy, optical tomography, histological techniques, computer-assisted diagnosis, infrared spectrophotometry, physiologic monitoring, experimental diabetes

mellitus, penetrating wounds, diabetes complications, skin, animal models, radiation scattering, failure analysis

Catherin von Reyn, PhD (*University of Pennsylvania*). Assistant Professor. Cell type-specific genetic engineering, whole-cell patch clamp in behaving animals, modeling, and detailed behavioral analysis to identify and characterize sensorimotor circuits.

Emeritus Faculty

Dov Jaron, PhD (*University of Pennsylvania*) *Calhoun Distinguished Professor of Engineering in Medicine*. Professor Emeritus. Mathematical, computer and electromechanical simulations of the cardiovascular system.

Rahamim Seliktar, PhD (*University of Strathclyde, Glasgow*). Professor Emeritus. Limb prostheses, biomechanics of human motion, orthopedic biomechanics.

Hun H. Sun, PhD (*Cornell University*). Professor Emeritus. Biological control systems, physiological modeling, systems analysis.

Biomedical Science

Major: Biomedical Science

Degree Awarded: Master of Science (MS) or Doctor of Philosophy (PhD)

Calendar Type: Quarter

Total Credit Hours: 45.0 (MS) or 90.0 (PhD)

Co-op Option: Available for full-time on-campus master's-level students

Classification of Instructional Programs (CIP) code: 26.0102

Standard Occupational Classification (SOC) code: 19-1042

About the Program

The Biomedical Science program at the School of Biomedical Engineering, Science and Health Systems applies fundamental biological research, analysis and technology to human health. The program educates students whose undergraduate education is in basic life sciences (e.g., biology) or paramedical disciplines in quantitative data analysis, mathematical modeling, systems analysis and informatics.

For students entering with degrees in physics, mathematics, and/or computer science, the School, in close collaboration with the Department of Biology, provides the coursework needed to acquire proficiency in the life sciences.

Master students can choose to include a 6 months co-op cycle as part of their studies. Students may also choose to enroll in concentrations such as biomedical technology development, biomaterials and tissue engineering, or bioinformatics. They can also specialize in neuroengineering, biomechanics or imaging and devices. Students who graduate with a master's degree from the biomedical science program often continue clinical training in medicine, dentistry, or veterinary medicine; pursue further graduate study toward the PhD degree; or work in industry in such fields as health care, pharmaceuticals, biotechnology, medical devices, etc.

The Biomedical Science program has an articulation with Intensive Medical Sciences (IMS) program at the Drexel College of Medicine, which can be pursued after taking one year of required classes. The IMS program is a rigorous one-year graduate program designed to help students develop strong academic portfolios and become attractive candidates for medical school.

Master of Science in Biomedical Science Degree Requirements

The core requirements for the master's in biomedical science encompass approximately 45.0 course credits (most courses carry three credits each). Students who choose the non-thesis option cannot register for thesis or research credits.

The curriculum includes room for specialization in several areas in biomedical engineering, as well as concentrations in biomaterials and tissue engineering, bioinformatics and biomedical technology development.

Concentrations

Three concentrations are available:

- **Biomaterials and Tissue Engineering**

Biomaterials and tissue engineering is designed to provide students with advanced training in cellular and molecular biology relevant to tissue engineering and behavior of materials used in biomedical applications.

- **Bioinformatics**

This specialization emphasized a systems engineering approach to provide a foundation in systems biology and pathology informatics. Students are provided with hands-on experience in the application of genomic, proteomic, and other large-scale information to biomedical engineering as well as experience in advanced computational methods used in systems biology: pathway and circuitry, feedback and control, machine learning, stochastic analysis, and biostatistics.

- **Biomedical Technology Development**

This concentration area aims to provide engineers with the comprehensive education and training necessary to succeed in careers in business, industry, non-profit organizations, and government agencies involving biomedical technology development.

Required Courses

BMES 505	Mathematics for Biomedical Sciences I	3.0
BMES 506	Mathematics for Biomedical Sciences II	3.0
BMES 507	Mathematics for Biomedical Sciences III	3.0
BMES 510	Biomedical Statistics	4.0
BMES 511	Principles of Systems Analysis Applied to Biomedicine I	3.0
BMES 512	Principles of Systems Analysis Applied to Biomedicine II	3.0-4.0
or BMES 543	Quantitative Systems Biology	
or BMES 611	Biological Control Systems I	
BMES 515	Experimental Design in Biomedical Research	4.0
BMES 538	Biomedical Ethics and Law	3.0
BMES 546	Biocomputational Languages	4.0
or BMES 550	Advanced Biocomputational Languages	

BMES 864	Seminar (Must be taken 3 times)	0.0
----------	---------------------------------	-----

BMES Electives - Select a minimum of 9.0 credits from the list below	9.0-15.0
---	-----------------

BMES 508	Cardiovascular Engineering
BMES 509	Entrepreneurship for Biomedical Engineering and Science
BMES 517	Intermediate Biostatistics
BMES 518	Interpretation of Biomedical Data
BMES 524	Introduction to Biosensors
BMES 525	Advanced Biosensors
BMES 528	Pediatric Engineering I
BMES 529	Pediatric Engineering II
BMES 531	Chronobioengineering I
BMES 532	Chronobioengineering II
BMES 534	Design Thinking for Biomedical Engineers
BMES 535	Introduction to Product Design for Biomedical Engineers
BMES 541	Nano and Molecular Mechanics of Biological Materials
BMES 543	Quantitative Systems Biology
BMES 544	Genome Information Engineering
BMES 547	Machine Learning in Biomedical Applications
BMES 548	Structural Bioinformatics and Drug Design
BMES 549	Genomic and Sequencing Technologies
BMES 551	Biomedical Signal Processing
BMES 588	Medical Device Development
BMES 604	Pharmacogenomics
BMES 621	Medical Imaging Systems I
BMES 622	Medical Imaging Systems II
BMES 623	Medical Imaging Systems III
BMES 631	Tissue Engineering I
BMES 632	Tissue Engineering II
BMES 641	Biomedical Mechanics I
BMES 642	Biomedical Mechanics II
BMES 651	Transport Phenomena in Living Systems I
BMES 660	Biomaterials I
BMES 661	Biomaterials II
BMES 672	Biosimulation I
BMES 673	Biosimulation II
BMES 685	Experimental Methods in Neuroengineering
BMES 710	Neural Signals
BMES 711	Principles in Neuroengineering
BMES 722	Neural Aspects of Posture and Locomotion I
BMES 821	Medical Instrumentation
BMES 822	Medical Instrumentation II
BMES 823	Medical Instrument Laboratory
BMES 825	Hospital Administration

General Electives in the fields of science, engineering, or medicine including additional BMES classes	6.0-12.0
---	-----------------

The sum of electives, core credits, and/or thesis credits must total 45.0 credits. Elective choices would depend upon the student's area(s) of focus or concentration but must be within the fields of science, engineering, or medicine. A concentration may substitute for elective credits. A minimum of 15 credits of BMES elective courses are required.

Thesis	0.0-9.0
---------------	----------------

BMES 897	Research
BMES 898	Master's Thesis

Total Credits	45.0-67.0
---------------	-----------

Biomedical Technology Development Concentration (Optional)

Students enrolled in this concentration will develop an understanding of critical regulatory, economic, and legal issues in addition to the project management skills that facilitate the development of new medical devices and positive working relationships with intellectual property lawyers, insurance companies, and the federal government.

BMES 509	Entrepreneurship for Biomedical Engineering and Science	3.0
BMES 534	Design Thinking for Biomedical Engineers	3.0
BMES 538	Biomedical Ethics and Law	3.0
BMES 588	Medical Device Development	3.0
BMES 596	Clinical Practicum III	3.0
Total Credits		15.0

Biomaterials and Tissue Engineering Concentration (Optional)

This concentration is designed to provide students with advanced training in cellular and molecular biology relevant to tissue engineering and behavior of materials used in biomedical applications

BMES 631	Tissue Engineering I	4.0
BMES 632	Tissue Engineering II	4.0
BMES 660	Biomaterials I	4.0
BMES 661	Biomaterials II	4.0
BMES 675	Biomaterials and Tissue Engineering III	4.0
Total Credits		20.0

Bioinformatics Concentration (Optional)

This concentration emphasizes a systems engineering approach to provide a foundation in systems biology and pathology informatics. Students are provided students with hands-on experience in the application of genomic, proteomic, and other large-scale information to biomedical engineering as well as experience in advanced computational methods used in systems biology: pathway and circuitry, feedback and control, cellular automata, sets of partial differential equations, stochastic analysis, and biostatistics.

BMES 543	Quantitative Systems Biology	4.0
BMES 544	Genome Information Engineering	4.0
BMES 551	Biomedical Signal Processing	3.0
BMES 604	Pharmacogenomics	3.0
BMES 547	Machine Learning in Biomedical Applications	3.0
or BMES 549	Genomic and Sequencing Technologies	
Total Credits		17.0

Pediatric Engineering Concentration (Optional)

This concentration aims to train students: 1) to develop a fundamental understanding of childhood injury and disease, healthcare, and treatment, and 2) to apply scientific and engineering concepts, methods, and approaches to address healthcare challenges with direct relevance to pediatric patients.

BMES 528	Pediatric Engineering I	3.0
BMES 529	Pediatric Engineering II	3.0
BMES 538	Biomedical Ethics and Law	3.0
BMES 509	Entrepreneurship for Biomedical Engineering and Science	3.0
Total Credits		12.0

Sample Plan of Study (MS)

First Year		
Fall		Credits
BMES 505	Mathematics for Biomedical Sciences I	3.0
BMES 510	Biomedical Statistics	4.0
BMES 546	Biocomputational Languages	4.0
or 550	Advanced Biocomputational Languages	
BMES 864	Seminar	0.0
Term Credits		11.0
Winter		

BMES 506	Mathematics for Biomedical Sciences II	3.0
BMES 511	Principles of Systems Analysis Applied to Biomedicine I	3.0
BMES 515	Experimental Design in Biomedical Research	4.0
BMES 864	Seminar	0.0
Term Credits		10.0

Spring

BMES 507	Mathematics for Biomedical Sciences III	3.0
BMES 538	Biomedical Ethics and Law	3.0
BMES 864	Seminar	0.0
Choose one of the following courses		3.0

BMES 512	Principles of Systems Analysis Applied to Biomedicine II
BMES 543	Quantitative Systems Biology
BMES 611	Biological Control Systems I

Term Credits		9.0
--------------	--	-----

Second Year

Fall

Elective Courses and/or Research*	9.0-12.0	
Term Credits		9.0-12.0

Winter

Elective Courses and/or Thesis**	6.0-9.0	
Term Credits		6.0-9.0

Total Credit: 45.0-51.0

* Can include BMES 897.

** Can include BMES 897 and BMES 898.

PhD in Biomedical Science Degree Requirements

Students with training in natural science or engineering, as well as individuals with academic or professional degrees in the medical science disciplines will be considered for admission to the doctoral program.

To be awarded the PhD degree, students must complete 90.0 required credits and fulfill a one-year residency requirement.

The following milestones have to be satisfied during the course of the program:

- Students must successfully pass the candidacy examination.
- Students must submit a PhD dissertation proposal and successfully defend it.
- Students must write a dissertation and successfully pass final oral defense.

Post-Baccalaureate Requirements and Post-Master's Requirements

Both post-baccalaureate and post-master's students are admitted into the doctoral program in Biomedical Science, but have slightly differing sets of requirements.

For **post-master's students**, 45.0 of the credits that they earned toward their Master's degree may be applied toward the PhD. If coming from the Master's program in Biomedical Science at the School of Biomedical Engineering, those courses they took would apply.

For **post-baccalaureate students**, students must complete a minimum of 90.0 credits and a research thesis. These 90.0 credits include the core courses required by Drexel's MS in Biomedical Science.

In addition to the required courses, post-baccalaureate PhD students must take at least 21.0 more credits in courses. This balance may be taken as research and/or thesis/dissertation credits.

Thesis Advisor/Plan of Study

During the first year of the program all Doctoral students are required to identify a Thesis Advisor and complete a plan of study. The student's Thesis Advisor and the Graduate Advisor will guide the student in developing this plan of study. Each plan of study is individually tailored to the student, and includes a combination of research and course credits most beneficial and complimentary to the student's chosen thesis topic.

The Candidacy Examination

Doctoral students must successfully pass a candidacy examination, preferably at the end of the first year of their study.

The overall objective of the candidacy examination is to test the student's basic knowledge and preparedness to proceed toward a PhD in Biomedical Science. After a satisfactory performance on the candidacy examination the student is awarded the Doctoral Candidate status. Candidates must submit a Thesis Proposal by the end of the second year and defend it in an oral presentation to a committee of five faculty members.

Thesis Defense

After the student has successfully completed all the necessary research and composed a thesis manuscript, in accordance with the guidelines specified by the Office of Research and Graduate Studies, he or she then must formally defend their thesis. A formal thesis defense includes an oral presentation of research accomplishments in front of a committee of faculty members. The thesis defense is open to the general public.

Prospective PhD students are welcome to contact the school to discuss their research interests. For a more detailed description of the PhD requirements, please visit the School of Biomedical Engineering and Health Systems' Biomedical Science (<http://drexel.edu/biomed/>) web site.

For more information, visit the School's web site and click on Graduate Programs (<http://drexel.edu/biomed/academics/graduate-programs/>).

Intensive Medical Sciences Pathway to the MS in Biomedical Science

The School of Biomedical Engineering, Science and Health Systems collaborates with the Drexel College of Medicine, specifically with the Intensive Medical Sciences program (IMS), to offer a unique pathway to a Masters in Biomedical Science degree. Students take one year of studies in the MS Biomedical Science program and another year in the IMS program (described below). This involves completing the core sequence and a thesis or taking a non-thesis option with additional coursework.

Intensive Medical Sciences Program Curriculum

The IMS curriculum involves a full-time commitment to rigorous coursework with strong academic requirements. Six major medical school equivalent courses are taken over two semesters. These include Medical Biochemistry, Medical Physiology, Medical Microanatomy, Medical Immunology, Medical Neuroanatomy, and Medical Nutrition. The courses are taught by the medical school faculty and students are guided by advisors when completing their medical school applications.

In addition to rigorous science courses, students also take a medical ethics course in the fall semester, followed by a professionalism course in the spring. The campuses are approximately five miles apart, and a University shuttle provides free transportation between the two.

Additionally, course conferences and laboratory components for IMS students are conducted at the Health Sciences Campus where the program is based. The IMS curriculum allows exposure to both medical school lectures and individual attention from medical school professors in small group conferences.

For more information, visit Drexel's College of Medicine's Intensive Medical Sciences program (<https://drexel.edu/medicine/academics/graduate-school/intensive-medical-sciences/>) web page.

Biomedical Engineering, Science and Health Systems Faculty

Fred D. Allen, PhD (*University of Pennsylvania*) Associate Dean for Undergraduate Education. Teaching Professor. Tissue engineering, cell engineering, orthopedics, bone remodeling, wound healing, mechanotransduction, signal transduction, adhesion, migration.

Hasan Ayaz, PhD (*Drexel University*) School of Biomedical Engineering, Science and Health Systems. Associate Professor. Optical brain imaging, cognitive neuroengineering, brain computer interface (BCI), functional near infrared (fNIR), and near infrared spectroscopy (NIRS).

Sriram Balasubramanian, PhD (*Wayne State University*). Assistant Professor. Structural characteristics of the pediatric thoracic cage using CT scans and developing an age-equivalent animal model for pediatric long bones.

Kenneth A. Barbee, PhD (*University of Pennsylvania*) Senior Associate Dean, Associate Dean for Research. Professor. Cellular biomechanics of neural and vascular injury, mechanotransduction in the cardiovascular system, mechanical control of growth and development for wound healing and tissue engineering.

Paul Brandt-Rauf, MD, DrPH (*Columbia University*) Dean. Distinguished University Professor. Environmental health, particularly the molecular biology and molecular epidemiology of environmental carcinogenesis, and protein engineering for the development of novel peptide therapies for the treatment and prevention of cancer.

Donald Buerk, PhD (*Northwestern University*). Research Professor. Biotechnology, physiology, systems biology, blood flow, microcirculation, nitric oxide, oxygen transport

Jamie Dougherty, PhD (*Drexel University*). Associate Teaching Professor. Brain-computer interface, neural encoding, electrophysiological signal acquisition and processing.

Lin Han, PhD (*Massachusetts Institute of Technology*). Associate Professor. Nanoscale structure-property relationships of biological materials, genetic and molecular origins soft joint tissue diseases, biomaterials under extreme conditions, coupling between stimulus-responsiveness and geometry.

Kurtulus Izzetoglu, PhD (*Drexel University*). Associate Research Professor. Cognitive neuroengineering, functional brain imaging, near infrared spectroscopy, medical sensor development, biomedical signal processing, human performance assessment, and cognitive aging

Andres Kriete, PhD (*University in Bremen Germany*) Associate Dean of Academic Affairs. Teaching Professor. Systems biology, bioimaging, control theory, biology of aging, skin cancer.

Steven Kurtz, PhD (*Cornell University*). Part-time Research Professor. Computational biomechanics of bone-implant systems and impact-related injuries, orthopaedic biomechanics, contact mechanics, orthopaedic biomaterials, large-deformation mechanical behavior and wear of polymers, and degradation and crosslinking of polyolefins in implant applications.

Peter Lewin, PhD (*University of Denmark, Copenhagen-Lyngby*) Richard B. Beard Professor, School Of Biomedical Engineering, Science & Health Systems. Professor. Biomedical ultrasonics, piezoelectric and polymer transducers and hydrophones; shock wave sensors.

Hualou Liang, PhD (*Chinese Academy of Sciences*). Professor. Neuroengineering, neuroinformatics, cognitive and computational neuroscience, neural data analysis and computational modeling, biomedical signal processing.

Donald L. McEachron, PhD (*University of California at San Diego*) Coordinator, Academic Assessment and Improvement. Teaching Professor. Animal behavior, autoradiography, biological rhythms, cerebral metabolism, evolutionary theory, image processing, neuroendocrinology.

Michael Neidrauer, PhD (*Drexel University*). Assistant Research Professor. Wound healing, near infrared, spectroscopy, cell culture, data analysis, optical coherence tomography (OCT), matlab, life sciences assay development, confocal microscopy, biomaterials, in-vivo, medical devices

Banu Onaral, PhD (*University of Pennsylvania*) H.H. Sun Professor; Senior Advisor to the President, Global Partnerships. Professor. Biomedical signal processing; complexity and scaling in biomedical signals and systems.

Kambiz Pourrezaei, PhD (*Rensselaer Polytechnic University*). Professor. Thin film technology; nanotechnology; near infrared imaging; power electronics.

Christopher Rodell, PhD (*University of Pennsylvania*). Assistant Professor. Biomaterials, supramolecular chemistry, and drug delivery. Therapeutic applications including the etiology of disease, organ injury, cardiovascular engineering, immune engineering, and biomedical imaging.

Ahmet Sacan, PhD (*Middle East Technical University*). Associate Teaching Professor. Indexing and data mining in biological databases; protein sequence and structure; similarity search; protein structure modeling; protein-protein interaction; automated cell tracking.

Joseph J. Sarver, PhD (*Drexel University*). Teaching Professor. Neuromuscular adaptation to changes in the myo-mechanical environment.

Patricia A. Shewokis, PhD (*University of Georgia*). Professor. Roles of cognition and motor function during motor skill learning; role of information feedback frequency on the memory of motor skills, noninvasive neural imaging techniques of functional near infrared spectroscopy (fNIRS) and electroencephalography (EEG) and methodology and research design.

Adrian C. Shieh, PhD (*Rice University*). Associate Teaching Professor. Contribution of mechanical forces to tumor invasion and metastasis, with a particular emphasis on how biomechanical signals may drive the

invasive switch, and how the biomechanical microenvironment interacts with cytokine signaling and the extracellular matrix to influence tumor and stromal cell behavior.

Wan Y. Shih, PhD (*Ohio State University*). Professor. Piezoelectric microcantilever biosensors development, piezoelectric finger development, quantum dots development, tissue elasticity imaging, piezoelectric microcantilever force probes.

Kara Spiller, PhD (*Drexel University*). Associate Professor. Macrophage-biomaterial interactions, drug delivery systems, and chronic wound healing. Cell-biomaterial interactions, biomaterial design, and international engineering education.

Marek Swoboda, PhD (*Drexel University*). Assistant Teaching Professor. Cardiovascular engineering, cardiovascular system, diagnostic devices in cardiology, piezoelectric biosensors, and pathogen detection.

Amy Throckmorton, PhD (*University of Virginia*). Associate Professor. Computational and experimental fluid dynamics; cardiovascular modeling, including transient, fluid-structure interaction, and patient-specific anatomical studies; bench-to-bedside development of medical devices; artificial organs research; prediction and quantification of blood trauma and thrombosis in medical devices; design of therapeutic alternatives for patients with dysfunctional single ventricle physiology; human factors engineering of mechanical circulatory assist devices

Bhandawat Vikas, PhD (*Johns Hopkins School of Medicine*). Associate Professor. Sensorimotor integration, whole-cell patch clamp and imaging in behaving animals, optogenetics, neuromechanics, locomotion.

Bhandawat Vikas Associate Professor. Sensorimotor integration, whole-cell patch clamp and imaging in behaving animals, optogenetics, neuromechanics, locomotion

Margaret Wheatley, PhD (*University of Toronto*) John M. Reid Professor. Ultrasound contrast agent development (tumor targeting and triggered drug delivery), controlled release technology (bioactive compounds), microencapsulated allografts (ex vivo gene therapy) for spinal cord repair.

Ming Xiao, PhD (*Baylor University*). Associate Professor. Nanotechnology, single molecule detection, single molecule fluorescent imaging, genomics, genetics, genome mapping, DNA sequencing, DNA biochemistry, and biophysics.

Yinghui Zhong, PhD (*Georgia Institute of Technology*). Assistant Professor. Spinal cord repair, and engineering neural prosthesis/brain interface using biomaterials, drug delivery, and stem cell therapy.

Leonid Zubkov, PhD, DSc (*St. Petersburg State University, Russia*). Research Professor. Physiology, wound healing, physiologic neovascularization, near-infrared spectroscopy, optical tomography, histological techniques, computer-assisted diagnosis, infrared spectrophotometry, physiologic monitoring, experimental diabetes mellitus, penetrating wounds, diabetes complications, skin, animal models, radiation scattering, failure analysis

Catherin von Reyn, PhD (*University of Pennsylvania*). Assistant Professor. Cell type-specific genetic engineering, whole-cell patch clamp in behaving animals, modeling, and detailed behavioral analysis to identify and characterize sensorimotor circuits.

Emeritus Faculty

Dov Jaron, PhD (*University of Pennsylvania*) *Calhoun Distinguished Professor of Engineering in Medicine*. Professor Emeritus. Mathematical, computer and electromechanical simulations of the cardiovascular system.

Rahamim Seliktar, PhD (*University of Strathclyde, Glasgow*). Professor Emeritus. Limb prostheses, biomechanics of human motion, orthopedic biomechanics.

Hun H. Sun, PhD (*Cornell University*). Professor Emeritus. Biological control systems, physiological modeling, systems analysis.

Integrated Biomedical Engineering and Business

Major: Integrated Biomedical Engineering and Business
Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 46.0

Co-op Option: Available for full-time on-campus master's-level students

Classification of Instructional Programs (CIP) code: 14.0501

Standard Occupational Classification (SOC) code: 17-2031

About the Program

The Master of Science in Integrated Biomedical Engineering and Business is designed for engineers pursuing Business/Management oriented careers in Biomedical Engineering. The program is open for students with previous undergraduate degrees in an engineering discipline. The program provides participants with a biomedical engineering training, but combines it with a multifaceted and transferable skill set of a manager and technology entrepreneur. Participants will complete specific courses and have experiences that promote the development of their business skills in terms of management, finance, leadership, communications and marketing skills, thus helping to ensure graduates' professional success.

In addition, the program requires a minimum of 46.0 quarter credits (40.0 credits in class; 3.0 or 6.0 co-op and/or 3.0-6.0 elective credits). It is a non-thesis program and can be completed in 1.5 years as a full time student, or it can be taken on a part-time basis.

Admission Requirements

Acceptance into the MS in Integrated Biomedical Engineering and Business program requires a four-year bachelor's degree in engineering from a regionally accredited institution in the United States or an

equivalent international institution. Regular acceptance typically requires a minimum cumulative grade point average of 3.0 for the last two years of undergraduate work. The average for any graduate work must be at least 3.0.

Applicants must also fulfill the following requirements for consideration:

- # Official transcripts from all colleges and universities attended;
- # Official test scores from Graduate Record Examination (GRE);
- # References from at least two instructors or professionals;
- # Essay and Resume

International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. Applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score on the Test of English as a Foreign Language (TOEFL). An evaluation by World Education Services (WES) is required for transcripts from institutions outside the United States.

Online applications are accepted all year round, but all admitted students initiate their studies in the following fall term. Students are encouraged to apply no later than July 1 for consideration for admission the following fall term. Students may defer admission by one year.

Degree Requirements

Required Biomedical Engineering Core

BMES 501	Medical Sciences I	3.0
BMES 510	Biomedical Statistics	4.0
BMES 511	Principles of Systems Analysis Applied to Biomedicine I	3.0
BMES 534	Design Thinking for Biomedical Engineers	3.0
BMES 538	Biomedical Ethics and Law	3.0
BMES 588	Medical Device Development	3.0

Required Business Classes

BUSN 501	Measuring and Maximizing Financial Performance	3.0
BUSN 502	Essentials of Economics	3.0
MGMT 601	Managing the Total Enterprise	3.0
MKTG 601	Marketing Strategy & Planning	3.0
ORGB 625	Leadership and Professional Development	3.0

Required Entrepreneurial Classes

BMES 509	Entrepreneurship for Biomedical Engineering and Science	3.0
ENTP 540	Methods of Entrepreneurship	3.0

Biomedical Engineering Elective Courses (Choose 6-10 credits) **6.0-10.0**

BMES 604	Pharmacogenomics	
BMES 631	Tissue Engineering I	
BMES 641	Biomedical Mechanics I	
BMES 660	Biomaterials I	
BMES 710	Neural Signals	
BMES 821	Medical Instrumentation	

BMES 825	Hospital Administration	
BMES 1799	Independent Study in BMES	
Total Credits		46.0-50.0

Biomedical Engineering, Science and Health Systems Faculty

Fred D. Allen, PhD (*University of Pennsylvania*) Associate Dean for Undergraduate Education. Teaching Professor. Tissue engineering, cell engineering, orthopedics, bone remodeling, wound healing, mechanotransduction, signal transduction, adhesion, migration.

Hasan Ayaz, PhD (*Drexel University*) School of Biomedical Engineering, Science and Health Systems. Associate Professor. Optical brain imaging, cognitive neuroengineering, brain computer interface (BCI), functional near infrared (fNIR), and near infrared spectroscopy (NIRS).

Sriram Balasubramanian, PhD (*Wayne State University*). Assistant Professor. Structural characteristics of the pediatric thoracic cage using CT scans and developing an age-equivalent animal model for pediatric long bones.

Kenneth A. Barbee, PhD (*University of Pennsylvania*) Senior Associate Dean, Associate Dean for Research. Professor. Cellular biomechanics of neural and vascular injury, mechanotransduction in the cardiovascular system, mechanical control of growth and development for wound healing and tissue engineering.

Paul Brandt-Rauf, MD, DrPH (*Columbia University*) Dean. Distinguished University Professor. Environmental health, particularly the molecular biology and molecular epidemiology of environmental carcinogenesis, and protein engineering for the development of novel peptide therapies for the treatment and prevention of cancer.

Donald Buerk, PhD (*Northwestern University*). Research Professor. Biotechnology, physiology, systems biology, blood flow, microcirculation, nitric oxide, oxygen transport

Jamie Dougherty, PhD (*Drexel University*). Associate Teaching Professor. Brain-computer interface, neural encoding, electrophysiological signal acquisition and processing.

Lin Han, PhD (*Massachusetts Institute of Technology*). Associate Professor. Nanoscale structure-property relationships of biological materials, genetic and molecular origins soft joint tissue diseases,

biomaterials under extreme conditions, coupling between stimulus-responsiveness and geometry.

Kurtulus Izzetoglu, PhD (*Drexel University*). Associate Research Professor. Cognitive neuroengineering, functional brain imaging, near infrared spectroscopy, medical sensor development, biomedical signal processing, human performance assessment, and cognitive aging

Andres Kriete, PhD (*University in Bremen Germany*) Associate Dean of Academic Affairs. Teaching Professor. Systems biology, bioimaging, control theory, biology of aging, skin cancer.

Steven Kurtz, PhD (*Cornell University*). Part-time Research Professor. Computational biomechanics of bone-implant systems and impact-related injuries, orthopaedic biomechanics, contact mechanics, orthopaedic biomaterials, large-deformation mechanical behavior and wear of polymers, and degradation and crosslinking of polyolefins in implant applications.

Peter Lewin, PhD (*University of Denmark, Copenhagen-Lyngby*) Richard B. Beard Professor, School Of Biomedical Engineering, Science & Health Systems. Professor. Biomedical ultrasonics, piezoelectric and polymer transducers and hydrophones; shock wave sensors.

Hualou Liang, PhD (*Chinese Academy of Sciences*). Professor. Neuroengineering, neuroinformatics, cognitive and computational neuroscience, neural data analysis and computational modeling, biomedical signal processing.

Donald L. McEachron, PhD (*University of California at San Diego*) Coordinator, Academic Assessment and Improvement. Teaching Professor. Animal behavior, autoradiography, biological rhythms, cerebral metabolism, evolutionary theory, image processing, neuroendocrinology.

Michael Neidrauer, PhD (*Drexel University*). Assistant Research Professor. Wound healing, near infrared, spectroscopy, cell culture, data analysis, optical coherence tomography (OCT), matlab, life sciences assay development, confocal microscopy, biomaterials, in-vivo, medical devices

Banu Onaral, PhD (*University of Pennsylvania*) H.H. Sun Professor; Senior Advisor to the President, Global Partnerships. Professor. Biomedical signal processing; complexity and scaling in biomedical signals and systems.

Kambiz Pourrezaei, PhD (*Rensselaer Polytechnic University*). Professor. Thin film technology; nanotechnology; near infrared imaging; power electronics.

Christopher Rodell, PhD (*University of Pennsylvania*). Assistant Professor. Biomaterials, supramolecular chemistry, and drug delivery. Therapeutic applications including the etiology of disease, organ injury, cardiovascular engineering, immune engineering, and biomedical imaging.

Ahmet Sacan, PhD (*Middle East Technical University*). Associate Teaching Professor. Indexing and data mining in biological databases; protein sequence and structure; similarity search; protein structure modeling; protein-protein interaction; automated cell tracking.

Joseph J. Sarver, PhD (*Drexel University*). Teaching Professor. Neuromuscular adaptation to changes in the myo-mechanical environment.

Patricia A. Shewokis, PhD (*University of Georgia*). Professor. Roles of cognition and motor function during motor skill learning; role of information feedback frequency on the memory of motor skills, noninvasive neural imaging techniques of functional near infrared spectroscopy (fNIRS) and electroencephalography (EEG) and methodology and research design.

Adrian C. Shieh, PhD (*Rice University*). Associate Teaching Professor. Contribution of mechanical forces to tumor invasion and metastasis, with a particular emphasis on how biomechanical signals may drive the invasive switch, and how the biomechanical microenvironment interacts with cytokine signaling and the extracellular matrix to influence tumor and stromal cell behavior.

Wan Y. Shih, PhD (*Ohio State University*). Professor. Piezoelectric microcantilever biosensors development, piezoelectric finger development, quantum dots development, tissue elasticity imaging, piezoelectric microcantilever force probes.

Kara Spiller, PhD (*Drexel University*). Associate Professor. Macrophage-biomaterial interactions, drug delivery systems, and chronic wound healing. Cell-biomaterial interactions, biomaterial design, and international engineering education.

Marek Swoboda, PhD (*Drexel University*). Assistant Teaching Professor. Cardiovascular engineering, cardiovascular system, diagnostic devices in cardiology, piezoelectric biosensors, and pathogen detection.

Amy Throckmorton, PhD (*University of Virginia*). Associate Professor. Computational and experimental fluid dynamics; cardiovascular modeling, including transient, fluid-structure interaction, and patient-specific anatomical studies; bench-to-bedside development of medical devices; artificial organs research; prediction and quantification of blood trauma and thrombosis in medical devices; design of therapeutic alternatives for patients with dysfunctional single ventricle physiology; human factors engineering of mechanical circulatory assist devices

Bhandawat Vikas, PhD (*Johns Hopkins School of Medicine*). Associate Professor. Sensorimotor integration, whole-cell patch clamp and imaging in behaving animals, optogenetics, neuromechanics, locomotion.

Bhandawat Vikas Associate Professor. Sensorimotor integration, whole-cell patch clamp and imaging in behaving animals, optogenetics, neuromechanics, locomotion

Margaret Wheatley, PhD (*University of Toronto*) John M. Reid Professor. Ultrasound contrast agent development (tumor targeting and triggered drug delivery), controlled release technology (bioactive compounds), microencapsulated allografts (ex vivo gene therapy) for spinal cord repair.

Ming Xiao, PhD (*Baylor University*). Associate Professor. Nanotechnology, single molecule detection, single molecule fluorescent imaging, genomics, genetics, genome mapping, DNA sequencing, DNA biochemistry, and biophysics.

Yinghui Zhong, PhD (*Georgia Institute of Technology*). Assistant Professor. Spinal cord repair, and engineering neural prosthesis/brain interface using biomaterials, drug delivery, and stem cell therapy.

Leonid Zubkov, PhD, DSc (*St. Petersburg State University, Russia*). Research Professor. Physiology, wound healing, physiologic neovascularization, near-infrared spectroscopy, optical tomography, histological techniques, computer-assisted diagnosis, infrared spectrophotometry, physiologic monitoring, experimental diabetes

mellitus, penetrating wounds, diabetes complications, skin, animal models, radiation scattering, failure analysis

Catherin von Reyn, PhD (*University of Pennsylvania*). Assistant Professor. Cell type-specific genetic engineering, whole-cell patch clamp in behaving animals, modeling, and detailed behavioral analysis to identify and characterize sensorimotor circuits.

Emeritus Faculty

Dov Jaron, PhD (*University of Pennsylvania*) *Calhoun Distinguished Professor of Engineering in Medicine*. Professor Emeritus. Mathematical, computer and electromechanical simulations of the cardiovascular system.

Rahamim Seliktar, PhD (*University of Strathclyde, Glasgow*). Professor Emeritus. Limb prostheses, biomechanics of human motion, orthopedic biomechanics.

Hun H. Sun, PhD (*Cornell University*). Professor Emeritus. Biological control systems, physiological modeling, systems analysis.

Advanced Certificate in Bioinformatics

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 14.0

Instructional Delivery: Campus

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 26.1103

Standard Occupational Classification (SOC) Code: 15-1111

About the Program

The certificate in bioinformatics program emphasizes a systems engineering approach to provide a foundation in systems biology and pathology informatics. Students are provided with hands-on experience in the application of genomic, proteomic, and other large-scale information to biomedical engineering as well as experience in advanced computational methods used in systems biology: pathway and circuitry, feedback and control, machine learning, and biostatistics.

Required Courses

BMES 546	Biocomputational Languages	4.0
or BMES 550	Advanced Biocomputational Languages	
BMES 544	Genome Information Engineering	4.0
Select Two of the Following Electives		6.0-9.0
BMES 543	Quantitative Systems Biology	
BMES 548	Structural Bioinformatics and Drug Design	
BMES 547	Machine Learning in Biomedical Applications	
BMES 545	Biosystems Modeling	
BMES 549	Genomic and Sequencing Technologies	
BMES 551	Biomedical Signal Processing	
BMES 604	Pharmacogenomics	

Total Credits

14.0-17.0

Advanced Certificate in Tissue Engineering

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 12.0

Instructional Delivery: Campus

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 14.0501

Standard Occupational Classification (SOC) Code: 17-2031

About the Program

The certificate in tissue engineering is designed to provide advanced training in cellular and molecular biology relevant to tissue engineering and behavior of materials used in biomedical applications.

Required Courses

BMES 631	Tissue Engineering I	4.0
BMES 632	Tissue Engineering II	4.0
BMES 660	Biomaterials I	4.0
Total Credits		12.0

The School of Education

The School of Education (<http://www.drexel.edu/soe/>) seeks to enrich knowledge and practice related to lifespan learning, based on the most current and appropriate research and practice. The School's goal is to improve human understanding through programs and activities that emphasize creative uses of human effort, technology, leadership, and problem solving.

The school offers an extensive and comprehensive array of diverse graduate, doctoral, and certificate programs that encompass all aspects of the educational field. Students graduate from Drexel prepared for successful careers in a variety of non-traditional fields of education through master's degree programs such as Applied Behavior Analysis, Creativity and Innovation, Educational Administration, Education Improvement and Transformation, Global and International Education, Higher Education, Learning Technologies, Mathematics Learning and Teaching, and Sport Coaching Leadership .

The School also offers Pennsylvania Department of Education-approved programs to certify students who already hold bachelor's degrees to be teachers in elementary education (grades PreK-4 with an emphasis on STEM subjects), secondary education (in biology, chemistry, earth and space science, English, general science, mathematics, physics or social studies), and K-12 (instructional technology specialist). Special education, teaching English as a second language, reading specialist, Wilson Language[®] Level 1, principal and superintendent certifications are also available. Individuals who complete the minimum requirements receive a PA Instructional I teaching certificate and have the option to continue coursework to fulfill requirements in the graduate Science of Instruction or teaching learning and curriculum (initial certification track) master's degree programs.

Other master's degree programs are also available to those who already have teacher certification and/or do not wish to obtain a teaching certificate. Students who would like to pursue the teaching English as a second language, reading specialist special education, principal or superintendent certification must already have Pennsylvania Instructional I certification, satisfactory professional school experience on a state-issued certificate appropriate for the assignment, or appropriate equivalent.

- Teaching English as a Second Language (p. 384)

Resources for Students

The School of Education provides a variety of resources designed to help students achieve optimal success in their area of study. Each distinct entity provides programming, services and, resources designed to creatively meet student's individual needs.

The Field Placement Office (FPO) (<http://drexel.edu/soe/resources/field-placement-office/>) within the School of Education is responsible for accepting and evaluating placement requests for all stages of clinical experiences within the Teacher Education Program. The FPO works with university partnering schools and school districts to coordinate appropriate

and carefully matched placements ensuring that students are exposed to a variety of cultures, economic backgrounds, and diverse settings.

The Early Career Practitioner Institute (ECPI) (<http://drexel.edu/soe/resources/early-career-practitioner-institute/>) is designed to provide ongoing professional development and classroom-based support to Drexel Teacher Certification candidates for a period of two years after they complete their certification program. This support initiative was constructed as a commitment to our graduates, and is provided at no additional cost to the alumni.

Early Childhood Education teachers can earn a significant discount on tuition through the T.E.A.C.H. Early Childhood (<http://drexel.edu/soe/resources/TEACH/>)[®] **Pennsylvania Scholarship**. Drexel University School of Education is a proud partner of T.E.A.C.H. to help students earn preK-4 teacher certification through our Bachelors of Education, Post-Bachelors Teaching Certificate and MS in Teaching, Learning and Curriculum.

The (http://goodwin.drexel.edu/centers_tc.php) **Torrance Center for Creative Studies** was established as an outgrowth of the research of E. Paul Torrance, internationally renowned authority on creativity. The Center's primary purpose is the identification and nurturance of creative potential. For more information, please call Dr. Fredricka Reisman at 215.895.6771 or email freddie@drexel.edu (%20freddie@drexel.edu).

The School of Education's Global Education Colloquium (<http://drexel.edu/soe/resources/event-series/gec/>) series allows all School of Education Students, including those in the MS in Global and International Education, the opportunity to hear research presentations from world-renowned scholars in the field of Global Education. The topics presented are the result of research spanning the full range of learning, teaching and training topics including international studies, higher education, peace education, social justice, inequality, politics of knowledge, policy, leadership and organizational change.

The Critical Conversations in Urban Education Lecture Series (<http://drexel.edu/soe/resources/event-series/ccue/>) is the School of Education's vehicle for critical dialogue and continuing education on issues important to the education of youth in urban settings, including Philadelphia. The series seeks to connect the academic and broader communities together for collaboration, understanding, and support that empower urban schools, educators, families, and students.

Students in Drexel University's School of Education EdD and PhD programs have the opportunity to present preliminary research for their dissertation at our monthly Doctoral Student Colloquiums (<http://drexel.edu/soe/research/student-research/>). Each month, one Drexel University School of Education PhD student and one EdD student present their research before an audience of Drexel students, faculty and professional staff. Students also submit a research brief that is included in a journal created by the School of Education.

Applied Behavior Analysis

Major: Applied Behavior Analysis

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 46.5

Co-op Option: None

Classification of Instructional Programs (CIP) code: 42.2814

Standard Occupational Classification (SOC) code: 19-3031

About the Program

Behavior analysis is a widely accepted and validated scientific approach to the investigation and manipulation of the environmental arrangements that occasion behavior. Extensive research with proven methods and impressive findings has helped develop the technology now called applied behavior analysis. Behavior analytic clinical and research advances have led to significant contributions in educational programming, and mental health and behavioral health assessment and treatment approaches.

The Master of Science in Applied Behavior Analysis will prepare clinical and educational leaders in the field of evidence-based approaches using behavior analytic principles and techniques. Graduates from this program will be highly successful candidates for institutions searching for knowledgeable and skilled behavior analysts serving in a variety of roles in behavior analytic settings. Interested students will also be prepared to transition to PhD programs in Applied Behavior Analysis and related fields.

The Behavior Analyst Certification Board, Inc. (<http://www.bacb.com/>)[®] has verified the Master's Core Applied Behavior Analysis course sequence as meeting the coursework requirements for eligibility to take the Board Certified Behavior Analyst Examination[®]. Applicants will have to meet additional experience and supervision requirements.

Additional Information

For more information about this program, contact:

Kyra Dukes, MS
Program Manager
Applied Behavior Analysis
kat353@drexel.edu

Admission Requirements

Applicants for the program will follow the university standards for admission to graduate study. Prospective students must have earned a bachelor's degree from an accredited institution and have an undergraduate GPA of 3.0 or higher to be considered for admission (graduate degree GPAs will be considered along with the undergraduate GPA).

In addition, prospective students are required to submit the following:

- Completed Application Form including official transcripts from all universities or colleges attended
- Two letters of recommendation
- Personal essay
- Resume

The admissions committee will evaluate the applicant's potential and commitment to succeed in graduate study. The applicant's potential to contribute to the overall quality of the program of study will also be considered.

Interviews, in person or by phone, may be conducted by the admissions committee with those applicants who meet Graduate Admission's standard admissions criteria.

Decisions will be made using dates corresponding to the regular university schedule for rolling admissions in Graduate Admissions.

The online program admits students both in the Fall and Spring Terms, while the on-campus and DC Residency program only admits students in the Fall.

Degree Requirements

Requirements

Core Applied Behavior Analysis Courses

EDEX 630	Fundamental Elements of Behavior Change	4.5
EDEX 631	Measurement and Experimental Design	4.5
EDEX 632	Behavioral Assessment and Functional Analysis	4.5
EDEX 633	Behavioral Interventions	4.5
EDEX 634	Consultation, Systems Change and Supervision	4.5
EDEX 635	Ethical Considerations and Professional Conduct	4.5
EDEX 636	Applications of Fundamental Elements of Behavior Analysis	4.5

Select one of the following concentration options: 9.0

Option 1: Autism Spectrum Disorders Concentration

(select 3 of the following)

EDEX 555	Teaching Students with Autism Spectrum Disorder	
EDEX 556	Characteristics & Methods: Autism	
EDEX 558	Characteristics & Methods: High Functioning Autism	
EDEX 560	Communication & Language Interventions: Autism Spectrum Disorders	
EDEX 562	Behavior & Sensory Support: Autism Spectrum Disorders	

Option 2: Fieldwork Concentration

EDEX 701	Field Experience in Applied Behavior Analysis	
EDEX 640	An Analysis of Verbal Behavior	

Option 3: Social Emotional and Behavior Wellness

(select 3 of the following)

EDEX 580	Social Emotional Wellness and Evidence-Based Preventative School Practices	
EDEX 581	Understanding Social Emotional Disorders	
EDEX 582	Evidence-Based School Interventions and Trauma Informed Education/Care	
EDEX 583	Collaboration and Community Based Practices to Promote Social Emotion Wellness	

Capstone Courses 6.0-7.5

Students have the option to select one of the following capstone tracks.

Thesis

EDUT 780	Thesis Capstone Course I	
EDUT 781	Thesis Capstone Course II	

Practitioner

EDUP 780	Practitioner Capstone Course I	
EDUP 781	Practitioner Capstone Course II	

Total Credits 46.5-48.0

* If the Fieldwork Concentration option is selected, students take EDEX 701 two times to reach 6.0 credits.

The Behavior Analyst Certification Board, Inc.® (<http://www.bacb.com/>) has approved the Core Applied Behavior Analysis course sequence as meeting the coursework requirements for eligibility to take the Board Certified Behavior Analyst Examination®. Applicants will have to meet additional requirements to qualify.

Sample Plan of Study

Applied Behavior Analysis MS Faculty

James Connell, PhD (*Louisiana State University*) *Founding Clinical Core Director and Research Fellow, A.J. Drexel Autism Institute.* Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Christina Vorndran, PhD (*Louisiana State University*) *Program Director, Applied Behavior Analysis and Special Education.* Clinical Professor. Designing effective and efficient community-based interventions, Severe behavior disorders, Functional behavior assessment

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

Creativity and Innovation

Major: Creativity and Innovation
Degree Awarded: Master of Science (MS)
Calendar Type: Quarter
Total Credit Hours: 45.0 - 46.5
Co-op Option: None
Classification of Instructional Programs (CIP) code: 13.9999
Standard Occupational Classification (SOC) code: 11-9199

About the Program

It is essential in today's world of increasing complexity, change, and competition that school and business leaders, as well as teachers and employees within their schools and organizations, engage in creative problem solving and new idea generation to solve evolving issues that arise within their work settings. They also need the skill sets to present their innovations to key decision makers within their schools/organizations for implementation. The MS in Creativity & Innovation (C&I) provides principals, CEOs, teachers, managers and other employees with creativity content and competencies to do just that. By internalizing the spirit of creativity and the principles of creative problem solving, program participants are transformed into change leaders capable of overcoming the status quo to implement their innovations and inspire new directions and visions.

Creativity is multidisciplinary – it is in all professional fields from chemistry to engineering, from education to computer science, and from sociology to business. Upon successful completion of this master's degree program, students will be able to create solutions to address problematic situations within various settings. Program completers will also enable

their organizations to foster creative and innovative environments while developing other creative problem-solvers within their workplaces.

For more information, visit Drexel University Online's MS in Creativity and Innovation (<http://online.drexel.edu/online-degrees/business-degrees/ms-creativity-innovation/>) website.

Degree Requirement

Required Courses

Students will complete a total of 45 credit hours consisting of eight core courses, a capstone sequence, and four concentration courses in an approved or customized area.

CRTV 501	Foundations in Creativity	3.0
CRTV 502	Tools and Techniques in Creativity	3.0
CRTV 503	Creativity in the Workplace	3.0
CRTV 610	Creativity and Change Leadership	3.0
CRTV 630	Global Perspectives on Creativity	3.0
CRTV 640	Creativity & Innovation: 1500-Present	3.0
CRTV 650	Current Trends in Creativity & Innovation	3.0
CRTV 660	Diagnostic Creative Intervention	3.0

Capstone 9.0-10.5

EDU 780 Capstone Research

Students have the option to select from one of the following capstone tracks.

Practitioner Track

EDUP 780 Practitioner Capstone Course I

EDUP 781 Practitioner Capstone Course II

Thesis Track

EDUT 780 Thesis Capstone Course I

EDUT 781 Thesis Capstone Course II

Lesson Study Track

EDUL 780 Lesson Study Capstone Course I

EDUL 781 Lesson Study Capstone Course II

Concentration Course Options (See listing of possible concentrations below). 12.0

Human Resource Development

EHRD 500 Foundations of Human Resources Development

EHRD 601 Leading and Evaluating Change

EHRD 602 Coaching and Mentoring for Sustainable Learning

EHRD 604 Development of Human Resources

or EHRD 66 Principles of Adult Learning

Global & International Education

EDGI 500 Introduction to Global, International & Comparative Education

EDGI 504 History and Theory of Comparative Education

EDGI 510 Culture, Society & Education in Comparative Perspective

EDGI 512 Globalization and Educational Change

or EDGI 514 Education and National Development

Higher Education

EDHE 500 Foundations of Higher Education

EDHE 510 Governance, Management & Administration in Higher Education

EDHE 530 Higher Education Law

or EHRD 66 Principles of Adult Learning

EDHE 606 Higher Education Career Development

Learning Technologies

EDLT 536 Learning Sciences and Instructional Design

or EDLT 53 Technologies for Performance Support

EDLT 550 Introduction to Instructional Design

EDLT 532 Designing Virtual Communities for Staff Development - Non-Field Experience

or EDLT 81 Designing and Developing Multimedia Applications For Learning

ELL 501 The Purpose and Business of E-Learning

Learning in Game-Based Environments

EDLT 541 Foundations of Game-Based Learning

EDLT 542 Research in Motivation & Game-based Learning

EDLT 543 Play & Learning in a Participatory Culture

EDLT 544 Integrating Games & Pedagogical Content Knowledge

Custom-Designed Concentration

A custom-designed concentration will consist of 12 professional electives that will be selected in consultation with the Program Director and/or Advisor. You may also choose to declare a Graduate Minor.

Total Credits 45.0-46.5

Education Faculty

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

Eric Brewe, PhD (*Arizona State University*). Associate Professor. Physics Education Research, introductory course reform, network analysis in learning, neuromechanisms of learning.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) *Founding Clinical Core Director and Research Fellow, A.J. Drexel Autism Institute*. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Alonzo M. Flowers, III, PhD (*Texas A&M University*). Associate Professor. Education issues including academic identity development of men of color in STEM education, diversity in teaching & learning, research methods/design, and college student development in higher education

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities.

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*) *Department Chair for Policy, Organization & Leadership*. Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Dominic F. Gullo, PhD (*Indiana University*). Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

H. Bernard Hall, PhD (*Temple University*). Assistant Professor. Hip-hop Pedagogy , English Education, Urban Teacher Education.

Penny Hammrich, PhD (*University of Minnesota*) *Dean*. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development,

planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Associate Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) *Senior Vice Provost for Faculty Affairs*. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) *Associate Dean of Research*. Associate Professor. Educational administration, leadership development, survey & instrument design.

Larry Keiser, PhD (*Drexel University*). Associate Clinical Professor. Education and corporate/business leaders' creativity and entrepreneurial mindsets; creative school/work environments; neuroscience of creativity; everyday creativity for teachers and educators.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Associate Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*) *Program Director*. Assistant Clinical Professor. Coached on the USRowing National Team staff since 2002, including the 2004, 2008, 2012, and 2016 Olympic Games; coaching development; measuring coaching quality; self-insight and reflective practices; coaching leadership; conference presenter; published author.

Valerie Klein, PhD (*Amherst College*). Associate Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Michael G. Kozak, Ed.D. (*Rowan University*). Assistant Clinical Professor. Leadership, STEAM, online and blended learning environments, systems thinking, experiential learning, K-12 education, and facilitating change

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Associate Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Clinical Professor. Experiences of students of African descent at predominantly white

colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. thinking about school reform by drawing, Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Joanne Sloand, EdD (*Duquesne University*) *Department Chair for Teaching, Learning & Curriculum*. Associate Clinical Professor. Special Education Leadership, Trauma-informed care, Parent engagement in special education service delivery.

Brian Smith, PhD (*Northwestern University*) *Senior Associate Dean of Academic Affairs*. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) *Associate Dean of Teacher Education and Undergraduate Affairs*. Clinical Professor. Cross-cultural, language and academic development, school reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) *Program Director, Applied Behavior Analysis and Special Education*. Clinical Professor. Designing effective and efficient community-based interventions, Severe behavior disorders, Functional behavior assessment

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

Emeritus Faculty

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Fredricka K. Reisman, PhD (*Syracuse University*) *Director of the Torrance Center for Creativity and Innovation*. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

Education Improvement and Transformation

Major: Education Improvement and Transformation

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 13.9999

Standard Occupational Classification (SOC) code: 11-9032

About the Program

One of the great challenges of our time is the improvement of the American education system from pre-school through retirement. Once the envy of the world, there are cracks in the education crucible which must be repaired or reformed. The system has endured social, intellectual, and economic challenges beyond its capacity to respond in a way that provides a sound foundation for all Americans, while keeping our country safe and competitive for the future.

The MS in Education Improvement and Transformation program is designed to prepare professional educators—as well as other professionals whose career interests lie in leading significant change in education—in the process of initiating transformative (reform) in formal and informal education sectors.

The program is comprised of "Professional Development Concentrations" (PDC), each focusing on specific topics pertaining to the improvement and transformation of education. Each PDC is comprised of nine credits (or 3 courses) of focused course work in a specific area, i.e.:

- Creativity and Innovation
- E-Learning Leadership
- Educational Policy
- Entrepreneurship
- Evaluation and Assessment
- Instructional Design
- Leadership in Educational Settings
- Learning in Game-based Environments
- Learning Technologies
- Special Education Leadership
- Special Education Law and Process
- Urban Education

Students may opt to create their own PDC with the advisement of the Program Manager for the MS in Education Improvement and Transformation program.

After students complete four PDC's, totaling a minimum of 36.0 credits, they will finish the program by enrolling in three courses (9.0 additional credits) that jointly form a capstone project to provide a real-life, hands-on experience in being an agent for change in transformative education. The combination of the 4 PDC's and the three capstone courses provides the student with the 45.0 credits required for the MS degree.

Additional Information

For additional information, visit Drexel University's Master of Science Program's in Education (<http://www.drexel.edu/soe/academics/graduate/>) page.

Degree Requirements

The Master of Science in Education Improvement and Transformation program is comprised of 15 courses. The core of the program is made up of four "Professional Development Concentrations" in strategic education improvement areas and topics for 36 credits.

These concentrations include areas such as assessment, strategic partnership, change leadership, educational policy, disabilities, virtual schools, charter schooling, homeschooling, community engagement & development, urban education, school boards, and financing education. Additional concentrations may be developed on a topical needs or special population-based basis.

Students also complete one research course and two capstone courses for a total of 9 credits and have the option to select their own capstone track-- practitioner, thesis or lesson study.

Degree Requirements

Students select four professional development concentration (PDC) areas from the list below for 36.0 credits and 9-10.5 credits of capstone courses for a total of 45-46.5 credits.

Choose four concentrations from the list below: * 36.0

Creativity & Innovation (PDCR)	
CRTV 502	Tools and Techniques in Creativity
CRTV 503	Creativity in the Workplace
CRTV 650	Current Trends in Creativity & Innovation
Educational Policy (PDEP)	
EDPO 620	Education Policy: Concepts, Issues, and Applications
EDPO 628	American Educational Policy and U.S. Competitiveness
EDPO 632	Ethics in Educational Policy Making
E-Learning Leadership (PDEL)	

ELL 501	The Purpose and Business of E-Learning
ELL 504	Learning Technologies & Disabilities
EDLT 554	Learning with Social Media and Mobiles
Entrepreneurship (PDEN)	
ENTP 501	Entrepreneurship Essentials
ENTP 535	Social Entrepreneurship
ENTP 611	Learning from Failure
Evaluation & Assessment (PDEA)	
EDAM 722	Evaluation & Assessment Competencies
EDHE 680	Foundations of Evaluation
EDUC 804	Program Evaluation in Organizations
Instructional Design (PDID)	
EDLT 551	Instructional Design Methods
EDLT 552	Instructional Design: Project Management
EDLT 553	Instructional Design: Special Topics
Leadership in Educational Settings (PDLI)	
CRTV 610	Creativity and Change Leadership
EDAM 702	School Leadership & Decision Making
EDAM 712	School and Community Partnerships and Relations
or EDAM 722	Mentoring and Collaborative Leadership
Learning in Game-based Environments (PDLG)	
EDLT 541	Foundations of Game-Based Learning
EDLT 543	Play & Learning in a Participatory Culture
EDLT 561	Design-Based Research Methods
Learning Technologies (PDLT)	
EDLT 512	Using and Integrating Learning Technologies
EDLT 537	Technologies for Performance Support
EDLT 554	Learning with Social Media and Mobiles
Special Education Law & Process (PDLP)	
EDEX 600	Family, School and Community Engagement in Special Education
EDEX 601	Special Education Advocacy
EDEX 602	Special Education Dispute Resolution and Skills Training
Special Education Leadership (PDSL)**	
EDEX 710	School Law & Policy in Special Education
EDEX 712	Instructional & Curriculum Leadership in Special Education
EDEX 714	Development, Supervision, & Support: Special Education Leadership
Urban Education (PDUE)	
EDUC 516	Diversity and Today's Teacher
EDAM 700	Leading in Urban, Rural and Suburban Settings
EDAM 701	Resource Management, Allocation and Entrepreneurship
or EDGI 530	Peace Education
Capstone Courses 9.0-10.5	
EDU 780	Capstone Research
Students have the option to select one of the following capstone tracks:	
Practitioner	
EDUP 780	Practitioner Capstone Course I
EDUP 781	Practitioner Capstone Course II
Thesis	
EDUT 780	Thesis Capstone Course I
EDUT 781	Thesis Capstone Course II
Lesson Study	
EDUL 780	Lesson Study Capstone Course I
EDUL 781	Lesson Study Capstone Course II
Total Credits	45.0-46.5

* Students have the option to choose three PDCs and create a fourth, 9.0 credit, non-transcribed, individually designed PDC with assistance from an academic advisor.

** Courses have classroom observation and require field placement application and appropriate clearances before enrolling. Contact the School of Education Field Placement Office at StuTeach@drexel.edu (StuTeach@Drexel.edu) for details.

Sample Plan of Study

EDUP 781, EDUT Practitioner Capstone Course II	3.0-4.5
781, Thesis Capstone Course II	
or EDUL 781 Lesson Study Capstone Course II	
Term Credits	3.0-4.5
Total Credit: 45.0-46.5	

Students have the option to select from the Practitioner, Thesis or Lesson Study Capstone track during term 7 and 8.

Education Faculty

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

Eric Brewe, PhD (*Arizona State University*). Associate Professor. Physics Education Research, introductory course reform, network analysis in learning, neuromechanisms of learning.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) *Founding Clinical Core Director and Research Fellow, A.J. Drexel Autism Institute*. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Alonzo M. Flowers, III, PhD (*Texas A&M University*). Associate Professor. Education issues including academic identity development of men of color in STEM education, diversity in teaching & learning, research methods/design, and college student development in higher education

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*) *Department Chair for Policy, Organization & Leadership*. Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Dominic F. Gullo, PhD (*Indiana University*). Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

H. Bernard Hall, PhD (*Temple University*). Assistant Professor. Hip-hop Pedagogy, English Education, Urban Teacher Education.

Penny Hammrich, PhD (*University of Minnesota*) *Dean*. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development,

planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Associate Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) *Senior Vice Provost for Faculty Affairs*. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) *Associate Dean of Research*. Associate Professor. Educational administration, leadership development, survey & instrument design.

Larry Keiser, PhD (*Drexel University*). Associate Clinical Professor. Education and corporate/business leaders' creativity and entrepreneurial mindsets; creative school/work environments; neuroscience of creativity; everyday creativity for teachers and educators.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Associate Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*) *Program Director*. Assistant Clinical Professor. Coached on the USRowing National Team staff since 2002, including the 2004, 2008, 2012, and 2016 Olympic Games; coaching development; measuring coaching quality; self-insight and reflective practices; coaching leadership; conference presenter; published author.

Valerie Klein, PhD (*Amherst College*). Associate Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Michael G. Kozak, Ed.D. (*Rowan University*). Assistant Clinical Professor. Leadership, STEAM, online and blended learning environments, systems thinking, experiential learning, K-12 education, and facilitating change

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Associate Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Clinical Professor. Experiences of students of African descent at predominantly white

colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. thinking about school reform by drawing, Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Joanne Sloand, EdD (*Duquesne University*) *Department Chair for Teaching, Learning & Curriculum*. Associate Clinical Professor. Special Education Leadership, Trauma-informed care, Parent engagement in special education service delivery.

Brian Smith, PhD (*Northwestern University*) *Senior Associate Dean of Academic Affairs*. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) Associate Dean of Teacher Education and Undergraduate Affairs. Clinical Professor. Cross-cultural, language and academic development, school reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) Program Director, *Applied Behavior Analysis and Special Education*. Clinical Professor. Designing effective and efficient community-based interventions, Severe behavior disorders, Functional behavior assessment

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

Emeritus Faculty

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Fredricka K. Reisman, PhD (*Syracuse University*) Director of the *Torrance Center for Creativity and Innovation*. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

Educational Administration

Major: Educational Administration

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 13.0401

Standard Occupational Classification (SOC) code: 11-9032

About the Program

The MS in Educational Administration program is designed to prepare and mentor future leaders using state and national leadership standards with the practical skills, knowledge, and internship experiences to become effective leaders in rural, urban, and suburban schools. The vision of the program is to create a collaborative and mentoring community of school leaders who contribute to a "research of practice" that significantly improves learning for all students.

Using state and national leadership standards, this master's degree is designed to prepare and mentor future elementary and secondary educational leaders with the practical skills, knowledge and internship experiences to become effective leaders in rural, city and suburban schools. This program is ideal for prospective students holding a teaching or counseling certificate who wish to advance into school administration with principal certification.

The program is designed as a part-time cohort model, and can be completed in two years with or without certification. View the degree requirements (p. 331) for more detailed information about the courses.

Educational Administration Program Options

- MS in Educational Administration

Concentrations:

- School Principal Certificate*
- Special Education Leadership & Principal (K-12) Certificate**
- Special Education Leadership Certificate (without Principal Certificate)**
- School Principal Certificate only*

*Requires a state-issued teacher certificate

**Requires a state-issued special education teacher certificate

Program Objectives

Graduates of the MS in Educational Administration program will be prepared to:

- Meet Pennsylvania certification standards
- Facilitate the development, articulation, implementation, and stewardship of a school/district vision of learning that is shared and supported by the school community
- Advocate, nurture, and sustain a school culture and instructional program conducive to student learning and staff professional growth
- Ensure management of the organization, operations, and resources for a safe, efficient, and effective learning environment
- Collaborate with families and community members, responding to diverse community interests and needs, and mobilizing community resources
- Act with integrity, fairness, and in an ethical manner
- Understand, respond to, and influence the larger political, social, economic, legal, and cultural context
- Monitor and evaluate students' achievements and programs on challenging standards for external and internal accountability goals
- Build teacher leadership capacity and mentor principal interns
- Conduct and share action research that documents sustainability in meeting school accountability goals and has practical, immediate, and useful application for other educators

For additional information, visit the School of Education's MS in Educational Administration (<http://drexel.edu/soe/academics/graduate/educational-administration/>) web page or the Drexel University Online (<http://online.drexel.edu/online-degrees/education-degrees/ms-ed-admin/>) web site.

Admission Requirements

Acceptance for graduate study in Drexel University's School of Education requires:

- Bachelor's degree from a regionally accredited institution.
- Undergraduate GPA of 3.0 or higher (graduate degree GPAs will be considered along with the undergraduate GPA).
- Complete graduate school application (<http://online.drexel.edu/online-degrees/education-degrees/ms-ed-admin/#apply>) (<http://www.drexel.com/online-degrees/education-degrees/ms-ed-admin/apply.aspx>).

- Official transcripts from *all universities or colleges and other post-secondary educational institutions (including trade schools)* attended. Instead of hard copy transcripts, you may supply official electronic transcripts issued by a post-secondary institution directly to Drexel University Online (use our email address, applyDUonline@drexel.edu). You must supply transcripts regardless of the number of credits earned or the type of school you attended. If you do not list all post-secondary institutions on your application and these are listed on transcripts received from other institutions, processing of your application will be delayed until you have submitted the remaining transcripts. Use the Transcript Lookup Tool (<http://online.drexel.edu/support/supporting-documents.aspx>) to assist you in contacting your previous institutions. If a college or university that you attended offers the option to send transcripts in a secure, password-protected electronic format, you may have the transcript sent to applyDUonline@drexel.edu.
- Two letters of recommendation, either professional or academic.
 - Drexel University Online now accepts electronic letters of recommendation. Please use the online letter of recommendation service (https://deptapp08.drexel.edu/em/LOR/Default.aspx?_ga=1.12981950.807833177.1437483903). If a recommender prefers to submit an original, hard copy letter of recommendation, please remind the recommender that it must be signed and submitted in a sealed envelope signed across the flap by the recommender.
 - One letter of recommendation must come from the principal of the school where the applicant has worked. (Recommendation must include applicant's presentation skills and experiences in a leadership role as well as the skills observed that would have a strong bearing on the applicant's success as a school leader and administrator.)
- An essay describing why the applicant is interested in pursuing graduate study in this field.
 - Applicant must include two paragraphs briefly describing their educational philosophy and explaining how principals shape learning in K-12 schools.
- State-issued certification
 - Email a copy to applyDUonline@drexel.edu
- International Students (<http://online.drexel.edu/support/international-students.aspx>): must submit a TOEFL score of 550 or higher. Students with transcripts from non-US institutions should have such transcripts evaluated by World Education Service (WES). The TOEFL examination is required for some non-citizens.

Degree Requirements

Core Courses

EDCR 510	Leadership in Educational Contexts and Systems	3.0
EDAM 700	Leading in Urban, Rural and Suburban Settings	3.0
EDAM 701	Resource Management, Allocation and Entrepreneurship	3.0
EDAM 705	School Law and Politics	3.0
EDAM 708	Integration of Technology with School Instruction and Management	3.0
EDAM 710	School Finance and Facilities	3.0
EDAM 712	School and Community Partnerships and Relations	3.0
EDAM 714	Instructional and Curriculum Leadership	3.0
EDAM 722	Evaluation & Assessment Competencies	3.0
EDAM 724	Mentoring and Collaborative Leadership	3.0

Principal Internship Courses

EDAM 715	School Principal Internship: Technology	1.5
EDAM 716	School Principal Internship: Finance	1.5
EDAM 717	School Principal Internship: Leadership	1.5
EDAM 718	School Principal Internship: Relations	1.5
Capstone Courses		9.0-10.5
EDU 780	Capstone Research	
Students have the option to select one of the following capstone tracks:		
Practitioner		
EDUP 780	Practitioner Capstone Course I	
EDUP 781	Practitioner Capstone Course II	
Thesis		
EDUT 780	Thesis Capstone Course I	
EDUT 781	Thesis Capstone Course II	
Lesson Study		
EDUL 780	Lesson Study Capstone Course I	
EDUL 781	Lesson Study Capstone Course II	
Total Credits		45.0-46.5

Performances

The performances for meeting Pennsylvania leadership standards and National Leadership Standards include a Leadership Portfolio. The Leadership Portfolio includes:

- Four Log Reflections -- explaining growth in log reflection over each term
- Evidence of 600 hours across four terms logged in the Internship
- Logs over 48 weeks
- Four term Goal Statements and Reflections on accomplishments
- Two to three artifacts on each of the ELCC standards totaling 14 to 21 or more artifacts
- An explanation of how each artifact shows applications of skill on each identified standard
- Four evaluations on the ELCC Standards and Drexel Competencies completed by the school site supervising principal

In addition, students must meet the current state minimum score on the appropriate PRAXIS Exam.

Special Education Leadership Concentration Program Requirements

The Special Education Leadership concentration within the MS in Educational Administration leads to the Supervisor of Special Education Certification. The concentration is designed to produce educators who are equipped with the advanced skills, knowledge and competencies they will need to collaboratively lead programs that meet the needs of students at risk and with disabilities in multiple settings. The 46.0 credit program fulfills the requirements for the Pennsylvania Department of Education approved certification and a master's degree in Educational Leadership.

Candidates are required to complete 300 internship hours for the Supervisor of Special Education Certification. Eligibility for PA Special Education Leadership certificate requires verification that the candidate has completed five years of satisfactory professional school experience on a state-issued certificate appropriate for the assignment. All courses must be completed with a B or better.

Core Courses

EDAM 700	Leading in Urban, Rural and Suburban Settings	3.0
EDAM 701	Resource Management, Allocation and Entrepreneurship	3.0
EDAM 722	Evaluation & Assessment Competencies	3.0
EDAM 724	Mentoring and Collaborative Leadership	3.0

* To satisfy the elective portion of the MS in Educational Administration with Special Education Leadership option, it is suggested that the candidate enroll in a course from the School of Education's Educational Policy or the Special Education Law and Process certificate programs. The following would be appropriate although any graduate course that the candidate has interest and is eligible to enroll may be considered with approval of the candidate's academic advisor:

- EDEX 600: Family, School and Community Engagement in Special Education
- EDEX 601: Special Education Advocacy
- EDEX 602: Special Education Dispute Resolution and Skills Training
- EDPO 620: Education Policy: Concepts, Issues and Applications
- EDPO 624: The Shaping of American Education Policy: Global Forces, Interest Groups and Politics

School Principal Certificate & Special Education Leadership Concentration

Program Requirements

The School Principal Certificate and Special Education Leadership concentration within the MS in Educational Administration leads to the Supervisor of Special Education Certification and Principal Certification. The concentration is designed to prepare future leaders with the tools and knowledge to collaboratively address special education programs and issues within a school setting. The 49.0 credit dual certification program fulfills the requirements for both Pennsylvania Department of Education approved certifications and a master's degree.

Candidates are required to complete 300 internship hours for the Supervisor of Education Certification and 400 internship hours for Principal Certification.

Eligibility for PA Special Education Leadership certificate requires verification that the candidate has completed five years of satisfactory professional school experience on a state-issued certificate appropriate for the assignment.

Eligibility for the PA Principal certificate requires verification that the candidate has completed three years of satisfactory professional school experience on a state-issued certificate appropriate for the assignment and appropriate Praxis exam. All courses must be completed with a B or better.

Education Faculty

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

Eric Brewe, PhD (*Arizona State University*). Associate Professor. Physics Education Research, introductory course reform, network analysis in learning, neuromechanisms of learning.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) *Founding Clinical Core Director and Research Fellow, A.J. Drexel Autism Institute*. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Alonzo M. Flowers, III, PhD (*Texas A&M University*). Associate Professor. Education issues including academic identity development of men of color in STEM education, diversity in teaching & learning, research methods/design, and college student development in higher education

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge

(TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*) *Department Chair for Policy, Organization & Leadership*. Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Dominic F. Gullo, PhD (*Indiana University*). Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

H. Bernard Hall, PhD (*Temple University*). Assistant Professor. Hip-hop Pedagogy, English Education, Urban Teacher Education.

Penny Hammrich, PhD (*University of Minnesota*) *Dean*. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Associate Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) *Senior Vice Provost for Faculty Affairs*. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) *Associate Dean of Research*. Associate Professor. Educational administration, leadership development, survey & instrument design.

Larry Keiser, PhD (*Drexel University*). Associate Clinical Professor. Education and corporate/business leaders' creativity and entrepreneurial mindsets; creative school/work environments; neuroscience of creativity; everyday creativity for teachers and educators.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Associate Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*) *Program Director*. Assistant Clinical Professor. Coached on the USRowing National Team staff since 2002, including the 2004, 2008, 2012, and 2016 Olympic Games; coaching development; measuring coaching quality; self-insight

and reflective practices; coaching leadership; conference presenter; published author.

Valerie Klein, PhD (*Amherst College*). Associate Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Michael G. Kozak, Ed.D. (*Rowan University*). Assistant Clinical Professor. Leadership, STEAM, online and blended learning environments, systems thinking, experiential learning, K-12 education, and facilitating change

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Associate Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. thinking about school reform by drawing, Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-

sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Joanne Sloand, EdD (*Duquesne University*) *Department Chair for Teaching, Learning & Curriculum*. Associate Clinical Professor. Special Education Leadership, Trauma-informed care, Parent engagement in special education service delivery.

Brian Smith, PhD (*Northwestern University*) *Senior Associate Dean of Academic Affairs*. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) *Associate Dean of Teacher Education and Undergraduate Affairs*. Clinical Professor. Cross-cultural, language and academic development, school reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) *Program Director, Applied Behavior Analysis and Special Education*. Clinical Professor. Designing effective and efficient community-based interventions, Severe behavior disorders, Functional behavior assessment

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

Emeritus Faculty

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Fredricka K. Reisman, PhD (*Syracuse University*) *Director of the Torrance Center for Creativity and Innovation*. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

Educational Leadership and Management

Major: Educational Leadership and Management

Degree Awarded: Doctor of Education (EdD)

Calendar Type: Quarter

Total Credit Hours: 60.0

Classification of Instructional Programs (CIP) code: 13.0401

Standard Occupational Classification (SOC) code: 11-9033

About the Program

The Doctor of Education degree in Educational Leadership and Management program is designed to prepare future leaders with the necessary skills and experience for senior administration and management positions.

Students can specialize in Educational Administration (with or without Pennsylvania Letter of Eligibility), Higher Education, Educational Policy, Human Resource Development, Special Education Leadership, Athletic Administration, Learning Technology, Global and International Education or Creativity & Innovation. Regardless of chosen concentration, the program focuses equally on the understanding and critical analysis of both practice and theory.

Mission

The mission of the EdD program in Educational Leadership and Management is to prepare graduates with the foremost education and business skills related to administration, management, finance, and strategic planning to successfully lead public school districts, universities and colleges, national foundations and organizations, corporations, and government agencies. The EdD program will prepare graduates for leadership roles in improving educational practice and applying management skills to the field of education.

About the Curriculum

The EdD program incorporates an interdisciplinary approach into the curriculum through the collaborative partnerships. The EdD program integrates education and business practices, skills, knowledge and theory into the curriculum, courses and instructional strategies. Students engaged in best practices, current research, and innovations in technology for enhanced instruction.

Recognizing that all practice has a theoretical dimension and all theory springs from questions identified through practice, the students in the EdD program will critically examine their own practices and the practices of their colleagues from a variety of theoretical perspectives.

The program is offered in two formats: Hybrid and Online. The hybrid program format is offered through a blended delivery system combining both on-campus classes and online education. Students meet once a month in an executive weekend format, in addition to an online component. The other option is a fully online program format.

For additional information about this program, visit the School of Education's EdD in Educational Leadership and Management (<https://drexel.edu/soe/academics/doctoral/edd-in-educational-leadership-management/>) web site.

Admission Requirements

Application Requirements for New Applicants

For details regarding the items below please review the Admission Application Checklist (<http://www.drexel.edu/grad/apply/checklist/>).

- *Transcripts* from all colleges and universities attended verifying completion of a master's degree (with 3.5 GPA or better) in education or an appropriate field and undergraduate degree in an appropriate major
- *Résumé* indicating at least 3 years of work experience relevant to applicant's professional goals
- *Three letters of recommendation*: Use the Electronic Letter of Recommendation (<https://deptapp08.drexel.edu/em/LOR/>) form to submit recommendation letters

Submission Part 1: (300 word maximum)

- Discuss your professional goals and aspirations, including how your current skills, along with your study of educational leadership will support your attainment of these goals.

Submission Part 2: A problem of practice (750 words maximum)

- In the Drexel Ed.D program, our students identify a *problem of practice* that becomes central to their dissertation research. While the final dissertation topic and the dissertation document evolve over time, generally, our students arrive with one or more ideas for a *problem of practice* they have an interest in studying.
- In this essay, you are asked to identify and describe a *problem of practice* relevant to your current (or a former) context of professional practice.
- Describe the significance of this problem to this organization.
- Based on your present understanding of the problem, discuss the potential underlying causes and contributing factors that have created the current challenges.
- What questions could be explored to learn more about the problem that may help to create potential solutions.

Submission Part 3: Writing Sample (5-30 page)

- Submit a 5 to 30-page writing sample that demonstrates your *academic writing abilities*. It is suggested that academic papers from prior coursework or journal articles (both that cite from peer reviewed articles) will represent you best in the admissions process. If a prior academic paper is not available, you are requested to create an academic paper 5 to 8 pages in length on a topic of your choice. Alternatively you may provide a writing sample where you are the solo author; this may be a work-based report that evidences your critical thinking and writing skills.

Supplemental Application Materials for New Applicants

To make your application more competitive, applicants are encouraged to submit two (2) or more of the following items:

- Detailed statement describing sustained Leadership Activities
- Detailed statement describing significant Creative Activities/Products
- Detailed statement describing significant Research Activities/Publications

Additional information about how to apply is available on the Graduate Admissions at Drexel University (<http://www.drexel.edu/grad/programs/edu/educational-leadership-and-management/>) website.

Degree Requirements

Students in the EdD program are required to complete core courses including education courses and MBA courses. Students complete courses within their areas of specialization prior to completing required research courses. At that point, students begin the dissertation phase of the EdD program.

EdD Candidacy Requirements

In summary, the sequence of events leading to the EdD candidacy include the following:

- All courses must be passed with a grade of B or better.
- In the fifth quarter, the comprehensive exam must be passed.
- In the ninth quarter, the dissertation proposal must be approved by committee (proposal hearings; filing of the D4 and 4A forms upon approval. At this point students have completed 54.0 of the 60.0 credits required in the program.)
- In terms 10-12, students register for Dissertation. As per the current policy, students pay one credit of tuition but register for multiple credits. A minimum of two credits are needed in the twelfth quarter to accrue the needed 60.0 credits.

Required Courses

Core Courses

EDUC 800	Educational Leadership & Change	3.0
EDUC 801	Creative Strategies For Educational Leaders	3.0
EDUC 802	Using and Integrating Learning Technologies	3.0
EDUC 804	Program Evaluation in Organizations	3.0
EDUC 845	Transformative Leadership: Finding One's Source	3.0

Concentration Course Options (See listing of possible concentrations listed below) **15.0-16.0**

Research Courses

EDUC 803	Educational Research Design I	3.0
EDUC 810	Educational Research Design II	3.0
EDUC 815	Writing for Research, Publication and Funding in Education	3.0
EDUC 818	Applied Research Study	3.0
EDUC 835	Quantitative Research Methods and Data Analysis	4.0
EDUC 836	Qualitative Research Methods and Data Analysis	4.0
EDUC 837	Advanced Qualitative Methods and Data Analysis	3.0
EDUC 880	Doctoral Seminar	1.0-1.5

EdD Candidacy Courses

EDUC 997	Doctoral Dissertation	6.0
Total Credits		60.0-61.5

Higher Education Concentration A *

EDHE 500	Foundations of Higher Education	3.0
EDHE 510	Governance, Management & Administration in Higher Education	3.0
EDHE 530	Higher Education Law	3.0
EDHE 669	Diversity in Higher Education	3.0
EDGI 506	Comparative Higher Education Systems	3.0
Total Credits		15.0

* For candidates entering the program without previous formal study in the area of Higher Education.

Higher Education Concentration B (alternative) **

EDHE 640	Foundations of Institutional Research	3.0
EDHE 662	Critical Issues in Student Affairs	3.0
EDHE 664	Strategies for Educational Success	3.0
EDHE 669	Diversity in Higher Education	3.0
EDGI 506	Comparative Higher Education Systems	3.0
Total Credits		15.0

** For candidates entering the program who have a strong background in the area of Higher Education and who seek to extend their previous studies in this area.

Educational Administration Concentration (Pennsylvania Superintendent Certification) †

EDAM 817	Curriculum Models	3.0
EDAM 820	School Superintendency	3.0
EDAM 824	Parents and Schools	3.0
EDAM 827	School Superintendent's Internship: Curriculum Models	1.0
EDAM 828	School Superintendent's Internship: Parents and Schools	1.0
EDAM 829	School Superintendent's Internship: Budget and Finance	1.0
EDAM 830	School Superintendent's Internship: Human Resource Development	1.0
EDEX 712	Instructional & Curriculum Leadership in Special Education	3.0
Total Credits		16.0

† For students with the background and interest in seeking PA School Superintendent Certification. **Any student required to participate in a program field experiences and/or internship as a component of their coursework, will be required to submit all required documents with regard to background checks/clearance(s) and field placement applications.**

Educational Administration Concentration (Non-certification Track)

EDAM 817	Curriculum Models	3.0
EDAM 820	School Superintendency	3.0
EDAM 824	Parents and Schools	3.0
EDEX 712	Instructional & Curriculum Leadership in Special Education	3.0
Education Policy course (EDPO) ***		3.0
Total Credits		15.0

*** Educational Policy course to be determined by Program Manager

Athletic Administration Concentration

SMT 615	Introduction to the College Sport Industry	3.0
SMT 618	NCAA Compliance	3.0
SMT 648	Gender Equity in High School & College Sports	3.0
Pick two of the following courses:		6.0
SMT 612	Development & Fundraising Strategies in Sport	
SMT 630	Sports Industry Practicum	
SMT 635	Sport Facilities & Event Management	
SMT 642	Administration of Interscholastic Sports	
Total Credits		15.0

Creativity and Innovation

CRTV 501	Foundations in Creativity	3.0
CRTV 502	Tools and Techniques in Creativity	3.0
CRTV 503	Creativity in the Workplace	3.0
CRTV 620	Research Methods and Assessment of Creative and Innovative Thinking	3.0
CRTV 630	Global Perspectives on Creativity	3.0

Educational Policy Concentration

EDPO 620	Education Policy: Concepts, Issues, and Applications	3.0
----------	--	-----

EDPO 624	The Shaping of American Education Policy: Global Forces, Interest Groups, and Politics	3.0
EDPO 628	American Educational Policy and U.S. Competitiveness	3.0
EDPO 632	Ethics in Educational Policy Making	3.0
EDPO 636	Access & Equity in Educational Policy Making	3.0
Total Credits		15.0

Global and International Education Concentration

EDGI 500	Introduction to Global, International & Comparative Education	3.0
EDGI 504	History and Theory of Comparative Education	3.0
EDGI 510	Culture, Society & Education in Comparative Perspective	3.0
EDGI 512	Globalization and Educational Change	3.0
EDGI 514	Education and National Development	3.0
Total Credits		15.0

Human Resource Development Concentration ††

EHRD 500	Foundations of Human Resources Development	3.0
EHRD 601	Leading and Evaluating Change	3.0
EHRD 602	Coaching and Mentoring for Sustainable Learning	3.0
EHRD 604	Development of Human Resources	3.0
EHRD 606	Human and Organizational Performance	3.0

†† A 3.0 credit substitute course will be identified to replace EHRD 500 for students who have already earned a master's degree in Human Resource Development

Learning Technologies

EDLT 532	Designing Virtual Communities for Staff Development - Non-Field Experience	3.0
EDLT 537	Technologies for Performance Support	3.0
EDLT 543	Play & Learning in a Participatory Culture	3.0
EDLT 550	Introduction to Instructional Design	3.0
ELL 501	The Purpose and Business of E-Learning	3.0

Special Education Leadership Concentration ****

EDEX 710	School Law & Policy in Special Education	3.0
EDEX 712	Instructional & Curriculum Leadership in Special Education	3.0
EDEX 714	Development, Supervision, & Support: Special Education Leadership	3.0
EDEX 716	Organization & Administration of Special Education	3.0

Supervisor of Special Education Internship Courses

EDEX 721	Supervisor of Special Education Internship: Special Education Leadership	1.0
EDEX 722	Supervisor of Special Education Internship: Instructional Leadership	1.0
EDEX 723	Supervisor of Special Education Internship: Collaboration & Personnel	1.0
EDEX 724	Supervisor of Special Education Internship: Finance & Management	1.0

Total Credits		16.0
---------------	--	------

**** Any student participating in field experience and/or internship placement related to a Drexel University – School of Education course will be required to submit all required documents with regard to clearance(s) and placement.

Creativity & Innovation Concentration

CRTV 501	Foundations in Creativity	3.0
CRTV 502	Tools and Techniques in Creativity	3.0
CRTV 503	Creativity in the Workplace	3.0
CRTV 620	Research Methods and Assessment of Creative and Innovative Thinking	3.0

CRTV 630	Global Perspectives on Creativity	3.0
Total Credits		15.0

Education Faculty

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

Eric Brewe, PhD (*Arizona State University*). Associate Professor. Physics Education Research, introductory course reform, network analysis in learning, neuromechanisms of learning.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) *Founding Clinical Core Director and Research Fellow, A.J. Drexel Autism Institute*. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Alonzo M. Flowers, III, PhD (*Texas A&M University*). Associate Professor. Education issues including academic identity development of men of color in STEM education, diversity in teaching & learning, research methods/ design, and college student development in higher education

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities.

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*) *Department Chair for Policy, Organization & Leadership*. Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Dominic F. Gullo, PhD (*Indiana University*). Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

H. Bernard Hall, PhD (*Temple University*). Assistant Professor. Hip-hop Pedagogy , English Education, Urban Teacher Education.

Penny Hammrich, PhD (*University of Minnesota*) *Dean*. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Associate Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) *Senior Vice Provost for Faculty Affairs*. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) *Associate Dean of Research*. Associate Professor. Educational administration, leadership development, survey & instrument design.

Larry Keiser, PhD (*Drexel University*). Associate Clinical Professor. Education and corporate/business leaders' creativity and entrepreneurial mindsets; creative school/work environments; neuroscience of creativity; everyday creativity for teachers and educators.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Associate Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*) *Program Director*. Assistant Clinical Professor. Coached on the USRowing National Team staff since 2002, including the 2004, 2008, 2012, and 2016 Olympic Games; coaching development; measuring coaching quality; self-insight and reflective practices; coaching leadership; conference presenter; published author.

Valerie Klein, PhD (*Amherst College*). Associate Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Michael G. Kozak, Ed.D. (*Rowan University*). Assistant Clinical Professor. Leadership, STEAM, online and blended learning environments, systems thinking, experiential learning, K-12 education, and facilitating change

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the

development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Associate Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. thinking about school reform by drawing, Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Joanne Sloand, EdD (*Duquesne University*) *Department Chair for Teaching, Learning & Curriculum*. Associate Clinical Professor. Special Education Leadership, Trauma-informed care, Parent engagement in special education service delivery.

Brian Smith, PhD (*Northwestern University*) *Senior Associate Dean of Academic Affairs*. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) Associate Dean of Teacher Education and Undergraduate Affairs. Clinical Professor. Cross-cultural, language and academic development, school reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) Program Director, Applied Behavior Analysis and Special Education. Clinical Professor. Designing effective and efficient community-based interventions, Severe behavior disorders, Functional behavior assessment

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

Emeritus Faculty

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Fredricka K. Reisman, PhD (*Syracuse University*) Director of the Torrance Center for Creativity and Innovation. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

Global and International Education

Major: Global and International Education

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 13.1319

Standard Occupational Classification (SOC) code: 25-2062

About the Program

The MS in Global and International Education is designed to prepare students to be leaders with the skills and knowledge necessary to work effectively within the complex economic, political, cultural, and social contexts that influence education and learning in diverse parts of the world. In addition to being aware of the global trends and issues of diverse approaches to education, students will develop the attitudes necessary to support learners and learning within and beyond mainstream educational systems.

Program Objectives

As a result of pursuing this program, students will be able to:

- Develop, analyze and implement new educational policies in a variety of multi-cultural settings, both public and private
- Critique international, comparative, and educational research
- Help lead educational, development, and other organizations through application of their understanding of current educational trends, educational interventions, and global forces
- Understand the global and multi-level politics of education policy
- Understand theories and perspectives on the relationship between education, national development, and societal change, with emphasis on contexts outside the US

Graduates of this program will be qualified to pursue careers in, among other fields and occupations, higher education, ESL programs, education abroad programs, law firms, international education associations, accreditation agencies, local community international outreach centers, US government, international development or human service agencies, and various non-governmental agencies, as well as act as administrators, managers, and researchers in national and international organizations, foundations, associations, and corporations.

Graduates of this program will lead their organizations in addressing the dramatic change in society and culture due to globalization and how these influence education.

The program is designed as a part-time cohort model and can be completed in two years. View the degree requirements for more detailed information about the courses.

Additional Information

For additional information, visit the School of Education's MS in Global and International Education (<http://drexel.edu/soe/academics/graduate/global-and-international-education/>) web page or contact us at gie@drexel.edu.

Admission Requirements

Admission to this program requires:

- **Bachelor's degree** from a regionally accredited institution
- An undergraduate **GPA of 3.0 or higher** (graduate degree GPAs will be considered along with the undergraduate GPA).
- **Graduates of foreign schools** must also have of 550 or higher in the Test of English as a Foreign Language (TOEFL).
- Completed **Application Form**.
- **Official transcripts** from all universities or colleges and other post-secondary educational institutions (including trade schools) attended. Instead of hard copy transcripts, applicants may supply official electronic transcripts issued by a post-secondary institution directly to Drexel University Online (send to: applyDUonline@drexel.edu).

Applicants must supply transcripts regardless of the number of credits earned or the type of school attended. If an applicant does not list all post-secondary institutions on the application and these are listed on transcripts received from other institutions, processing of the application will be delayed until all remaining transcripts have been submitted the remaining transcripts.

Use our Transcript Lookup Tool (<http://online.drexel.edu/support/supporting-documents.aspx>) to assist contact with previous

institutions. If a college or university offers the option to send transcripts in a secure, password-protected electronic format, have the transcript sent to applyDUonline@drexel.edu.

- **Two letters of recommendation** - professional or academic.
 - Drexel University Online now accepts electronic letters of recommendation. Please access the following web page for instructions regarding their submission: <http://www.drexel.edu/apply/recommend> (<http://www.drexel.edu/apply/recommend/>). If a recommender prefers to submit an original, hard copy letter of recommendation, please remind the recommender that it must be signed and submitted in a sealed envelope signed across the flap by the recommender.
- **Personal Essay**
- **Resume.**
- **International Students** (<http://online.drexel.edu/support/international-students.aspx>) must submit a TOEFL score of 550 or higher. Students with transcripts from non-US institutions should have such transcripts evaluated by World Education Service (WES). The TOEFL examination is required for some non-citizens. Applicants whose native language is English (who list themselves as born in or citizens of the following countries: American Samoa, Australia, Bahamas, Barbados, Belize, Bermuda, Botswana, British West Indies, Brunei Darussalam, Canada, England, Ghana, Guam, Ireland, Jamaica, Lesotho, Liberia, Malawi, Malta, Mauritius, New Zealand, Papua New Guinea, Puerto Rico, Scotland, Sierra Leone, South Africa, Swaziland, Tanzania, Trinidad/Tobago, Uganda, Virgin Islands, Wales, Zimbabwe) are exempt from the TOEFL. Applicants whose native language is not English are exempt from the TOEFL if the applicant completed 4 years of high school in the United States or completed English 101 and English 102 with a grade of C or better from a US domestic accredited institution. Applicants who received an undergraduate or graduate degree from an academic institution located in the US, UK or Canada are also exempt from the TOEFL.

Please refer to Drexel University Online's Master of Science in Global and International Education Admissions (<http://online.drexel.edu/online-degrees/education-degrees/ms-global/#admissionscriteria>) page for additional information.

Degree Requirements

A Master of Science in Global and International Education is a part-time online program. Students complete six core courses, three primary concentration courses, three secondary concentration or elective courses, and a three course capstone sequence.

Core Courses

EDGI 500	Introduction to Global, International & Comparative Education	3.0
EDGI 504	History and Theory of Comparative Education	3.0
EDGI 510	Culture, Society & Education in Comparative Perspective	3.0
EDGI 512	Globalization and Educational Change	3.0
EDGI 520	Political Economy of Education Reform	3.0
EDHE 680	Foundations of Evaluation	3.0

Primary Concentration Courses

EDGI 506	Comparative Higher Education Systems	3.0
EDGI 514	Education and National Development	3.0
EDGI 518	Analysis of Policy Issues in Global & International Education	3.0

Capstone Requirement

EDU 780	Capstone Research	3.0
---------	-------------------	-----

Students have the option to select from the Practitioner, Thesis, or Lesson Plan capstone track.

EDUP 780	Practitioner Capstone Course I	3.0
or EDUT 780	Thesis Capstone Course I	
or EDUL 780	Lesson Study Capstone Course I	

EDUP 781	Practitioner Capstone Course II	3.0-4.5
or EDUT 781	Thesis Capstone Course II	
or EDUL 781	Lesson Study Capstone Course II	

Select one of the following Secondary Concentrations: 9.0

Secondary Peace Education Concentration *

EDGI 530	Peace Education
EDGI 532	International Organizations in International Education
EDGI 534	Conflict Resolution in an International Context

Secondary Higher Education Concentration

Select 3 of the following Higher Education courses:

EDHE 500	Foundations of Higher Education
EDHE 510	Governance, Management & Administration in Higher Education
EDHE 520	Student Development & Customer Service Management
EDHE 530	Higher Education Law

Secondary E-Learning Leadership Concentration

Select 3 of the following E-Learning Leadership courses:

ELL 501	The Purpose and Business of E-Learning
ELL 502	E-Learning Technologies
ELL 503	Teaching and Learning Issues in E-Learning
ELL 504	Learning Technologies & Disabilities

Secondary Education Policy Concentration **

Select 3 of the following Education Policy courses

EDPO 620	Education Policy: Concepts, Issues, and Applications
EDPO 624	The Shaping of American Education Policy: Global Forces, Interest Groups, and Politics
EDPO 632	Ethics in Educational Policy Making
EDPO 636	Access & Equity in Educational Policy Making

Secondary Learning Technology Concentration

Select 3 of the following:

EDLT 532	Designing Virtual Communities for Staff Development - Non-Field Experience
EDLT 535	Researching & Evaluating Instructional Technology
EDLT 537	Technologies for Performance Support
EDLT 538	New Media Literacies

Sample Electives

Students can select courses as additional electives from within the School of Education or a course (with School of Education approval) from another Drexel University program, such as international business administration, foreign languages, women's and gender studies, or science/technology/society.

EDGI 600	Study Abroad Experience
EDGI 610	International Ecotourism & Education

Total Credits 45.0-46.5

* As an alternative secondary concentration, students may create a customized area of study from other Drexel University departments/programs such as International Business Administration, Women's and Gender Studies, or Science/Technology/Society.

** To complete the Drexel Educational Policy Certificate, students complete 2 additional 3-credit courses: EDPO 628 and EDPO 640.

Sample Plan of Study

Term 1		Credits
EDGI 500	Introduction to Global, International & Comparative Education	3.0
EDGI 504	History and Theory of Comparative Education	3.0

	Term Credits	3.0-4.5

Total Credit: 45.0-46.5

Education Faculty

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

Eric Brewe, PhD (*Arizona State University*). Associate Professor. Physics Education Research, introductory course reform, network analysis in learning, neuromechanisms of learning.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) *Founding Clinical Core Director and Research Fellow, A.J. Drexel Autism Institute*. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Alonzo M. Flowers, III, PhD (*Texas A&M University*). Associate Professor. Education issues including academic identity development of men of color in STEM education, diversity in teaching & learning, research methods/design, and college student development in higher education

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities.

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*) *Department Chair for Policy, Organization & Leadership*. Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Dominic F. Gullo, PhD (*Indiana University*). Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

H. Bernard Hall, PhD (*Temple University*). Assistant Professor. Hip-hop Pedagogy , English Education, Urban Teacher Education.

Penny Hammrich, PhD (*University of Minnesota*) *Dean*. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Associate Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) *Senior Vice Provost for Faculty Affairs*. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) Associate Dean of Research. Associate Professor. Educational administration, leadership development, survey & instrument design.

Larry Keiser, PhD (*Drexel University*). Associate Clinical Professor. Education and corporate/business leaders' creativity and entrepreneurial mindsets; creative school/work environments; neuroscience of creativity; everyday creativity for teachers and educators.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Associate Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*) Program Director. Assistant Clinical Professor. Coached on the USRowing National Team staff since 2002, including the 2004, 2008, 2012, and 2016 Olympic Games; coaching development; measuring coaching quality; self-insight and reflective practices; coaching leadership; conference presenter; published author.

Valerie Klein, PhD (*Amherst College*). Associate Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Michael G. Kozak, Ed.D. (*Rowan University*). Assistant Clinical Professor. Leadership, STEAM, online and blended learning environments, systems thinking, experiential learning, K-12 education, and facilitating change

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Associate Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as

innovative problem-setting, thinking qualitatively about school reform. thinking about school reform by drawing, Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Joanne Sloand, EdD (*Duquesne University*) Department Chair for Teaching, Learning & Curriculum. Associate Clinical Professor. Special Education Leadership, Trauma-informed care, Parent engagement in special education service delivery.

Brian Smith, PhD (*Northwestern University*) Senior Associate Dean of Academic Affairs. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) Associate Dean of Teacher Education and Undergraduate Affairs. Clinical Professor. Cross-cultural, language and academic development, school reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) Program Director, Applied Behavior Analysis and Special Education. Clinical Professor. Designing effective and efficient community-based interventions, Severe behavior disorders, Functional behavior assessment

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

Emeritus Faculty

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Fredricka K. Reisman, PhD (*Syracuse University*) *Director of the Torrance Center for Creativity and Innovation*. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

Higher Education

Major: Higher Education

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 13.0406

Standard Occupational Classification (SOC) code: 11-9033

About the Program

The Master of Science in Higher Education program is designed specifically to prepare highly skilled and knowledgeable practitioners for administrative and leadership positions in higher education. Graduates will be qualified to pursue careers as professionals in colleges and universities and national and international organizations, foundations, associations, and corporations.

Program Objectives

Students graduating with an MS in Higher Education will possess outstanding leadership, organizational, interpersonal and advocacy skills, including the ability to communicate effectively with internal and external groups. Students will be provided with in-depth knowledge regarding both public and private (non-profit and for-profit) institutions, as well as small and large institutions and multi-campus institutions.

About the Curriculum

The program consists of 45.0 credits earned across 15 courses: 5 core courses, 4 courses in the primary concentration of administration and leadership (in which all students are enrolled), 3 elective courses, and 3 courses that comprise the capstone experience. Students may take 3 elective courses of their choice or they may complete a secondary concentration by selecting 3 elective courses from the following areas:

- community college administration and leadership
- education policy
- enrollment management
- global and international education
- learning technologies and instructional design
- neuroscience, learning and online instruction
- student development and affairs

The curriculum incorporates an interdisciplinary approach, and course delivery integrates leading learning strategies and instructional technologies. Courses introduce students to best practices, current

research, software applications and database management systems. Students demonstrate knowledge and skills through both individual and group projects.

The program is designed as a part-time program and may be completed in two years.

Additional Information

For additional information, visit Drexel University's Master of Science in Higher Education (<http://drexel.edu/soe/academics/graduate/higher-education/>) page or contact us at he@drexel.edu.

Admission Requirements

Requirements for admission include:

- Bachelor's degree from a regionally accredited institution
- Undergraduate GPA of 3.0 or higher (graduate degree GPA will be considered along with the undergraduate GPA). Note: Provisional admission may be granted with a GPA between 2.80 to 2.99.

Prospective students must apply through Drexel University Online (<http://online.drexel.edu/>). Required documents include:

- Completed application
- Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended
- Two professional letters of recommendation
- Personal essay
- Resume
- Additional requirements for International Students (<http://online.drexel.edu/support/international-students.aspx>)

For additional information about the application process, please visit Drexel University Online's Master of Science in Higher Education admissions (<http://online.drexel.edu/online-degrees/education-degrees/ms-he/#admissionscriteria>) web page. For additional information about graduate admissions, please visit the Graduate Admissions at Drexel University (<http://www.drexel.edu/grad/programs/edu/higher-education/>) web page. For additional information about the program, please visit Drexel University's Master of Science in Higher Education (<http://drexel.edu/soe/academics/graduate/higher-education/>) page or contact us at he@drexel.edu.

Degree Requirements

This Master of Science in Higher Education program consists of 15 courses: 5 core courses, 4 primary concentration courses, 3 elective courses or secondary concentration courses, and 3 courses that comprise the capstone experience.

Core Courses

EDHE 500	Foundations of Higher Education	3.0
EDHE 510	Governance, Management & Administration in Higher Education	3.0
EDHE 520	Student Development & Customer Service Management	3.0
EDHE 530	Higher Education Law	3.0
EDHE 602	Managing Campus Operations	3.0

Capstone

EDU 780	Capstone Research	3.0
Students have the option to select from the Practitioner, Thesis, or Lesson Plan capstone track.		
EDUP 780	Practitioner Capstone Course I	3.0

or EDUT 780	Thesis Capstone Course I	
or EDUL 780	Lesson Study Capstone Course I	
EDUP 781	Practitioner Capstone Course II	3.0-4.5
or EDUT 781	Thesis Capstone Course II	
or EDUL 781	Lesson Study Capstone Course II	

Primary Concentration in Higher Education Administration and Leadership

Students complete four of the following courses for the primary concentration:

EDHE 540	Outcomes, Assessments & Continuous Improvement	3.0
EDHE 601	Strategic Planning & Evaluation	3.0
EDHE 606	Higher Education Career Development	3.0
or EDHE 608	Leadership for Learning	
EDHE 669	Diversity in Higher Education	3.0
or EDGI 506	Comparative Higher Education Systems	

Electives or Secondary Concentration (See Below) 9.0

Students select either any three elective courses (from offerings within the School of Education) or three courses within the secondary concentrations offered. Courses within a student's primary concentration do not count as electives.

Total Credits	45.0-46.5
---------------	-----------

Electives or Secondary Concentration

Secondary Concentration in Global and International Education

Select three of the following:

EDGI 500	Introduction to Global, International & Comparative Education	3.0
EDGI 506	Comparative Higher Education Systems	3.0
EDGI 510	Culture, Society & Education in Comparative Perspective	3.0
EDGI 512	Globalization and Educational Change	3.0
EDGI 518	Analysis of Policy Issues in Global & International Education	3.0

Secondary Concentration in Education Policy

EDPO 620	Education Policy: Concepts, Issues, and Applications	3.0
----------	--	-----

Select two of the following:

EDPO 624	The Shaping of American Education Policy: Global Forces, Interest Groups, and Politics	3.0
EDPO 632	Ethics in Educational Policy Making	3.0
EDPO 636	Access & Equity in Educational Policy Making	3.0
EDPO 640	Educational Policy-Making Tactics & Influence	3.0

Secondary Concentration in Community College Administration and Leadership

Select three of the following:

EDHE 634	Proposal Writing & Sponsored Project Management	3.0
EDHE 664	Strategies for Educational Success	3.0
EDHE 668	Transformational Leadership	3.0
EDHE 669	Diversity in Higher Education	3.0

Secondary Concentration in Enrollment Management

Select three of the following:

EDHE 650	Introduction to Enrollment Management	3.0
EDHE 652	Enrollment Marketing, Recruitment & Retention	3.0
EDHE 654	Financial Aid & Enrollment Management	3.0
EDHE 656	Enrollment Management Database Systems & Management	3.0

Secondary Concentration in Learning Technologies and Instructional Design

Select three of the following:

EDLT 532	Designing Virtual Communities for Staff Development - Non-Field Experience	3.0
EDLT 536	Learning Sciences and Instructional Design	3.0
EDLT 537	Technologies for Performance Support	3.0
EDLT 550	Introduction to Instructional Design	3.0
ELL 502	E-Learning Technologies	3.0

Secondary Concentration in Student Development and Affairs

Select three of the following:

EDHE 652	Enrollment Marketing, Recruitment & Retention	3.0
EDHE 662	Critical Issues in Student Affairs	3.0
EDHE 663	Safety and Crisis Management	3.0
EDHE 664	Strategies for Educational Success	3.0

EDHE 669	Diversity in Higher Education	3.0
----------	-------------------------------	-----

Secondary Concentration in Neuroscience, Learning & Online Instruction

Select three of the following:

IPS 553	Neuroscience of Learning	3.0
IPS 554	Online Neuropedagogy, Regulations & Online Instruction	3.0
IPS 600	Capstone: Applying Neurobiology to Instruction	3.0

Education Faculty

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

Eric Brewe, PhD (*Arizona State University*). Associate Professor. Physics Education Research, introductory course reform, network analysis in learning, neuromechanisms of learning.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) *Founding Clinical Core Director and Research Fellow, A.J. Drexel Autism Institute*. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Alonzo M. Flowers, III, PhD (*Texas A&M University*). Associate Professor. Education issues including academic identity development of men of color in STEM education, diversity in teaching & learning, research methods/design, and college student development in higher education

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities.

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*) *Department Chair for Policy, Organization & Leadership*. Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Dominic F. Gullo, PhD (*Indiana University*). Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

H. Bernard Hall, PhD (*Temple University*). Assistant Professor. Hip-hop Pedagogy, English Education, Urban Teacher Education.

Penny Hammrich, PhD (*University of Minnesota*) *Dean*. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development,

planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Associate Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) *Senior Vice Provost for Faculty Affairs*. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) *Associate Dean of Research*. Associate Professor. Educational administration, leadership development, survey & instrument design.

Larry Keiser, PhD (*Drexel University*). Associate Clinical Professor. Education and corporate/business leaders' creativity and entrepreneurial mindsets; creative school/work environments; neuroscience of creativity; everyday creativity for teachers and educators.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Associate Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*) *Program Director*. Assistant Clinical Professor. Coached on the USRowing National Team staff since 2002, including the 2004, 2008, 2012, and 2016 Olympic Games; coaching development; measuring coaching quality; self-insight and reflective practices; coaching leadership; conference presenter; published author.

Valerie Klein, PhD (*Amherst College*). Associate Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Michael G. Kozak, Ed.D. (*Rowan University*). Assistant Clinical Professor. Leadership, STEAM, online and blended learning environments, systems thinking, experiential learning, K-12 education, and facilitating change

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Associate Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Clinical Professor. Experiences of students of African descent at predominantly white

colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. thinking about school reform by drawing, Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Joanne Sloand, EdD (*Duquesne University*) *Department Chair for Teaching, Learning & Curriculum*. Associate Clinical Professor. Special Education Leadership, Trauma-informed care, Parent engagement in special education service delivery.

Brian Smith, PhD (*Northwestern University*) *Senior Associate Dean of Academic Affairs*. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) *Associate Dean of Teacher Education and Undergraduate Affairs*. Clinical Professor. Cross-cultural, language and academic development, school reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) *Program Director, Applied Behavior Analysis and Special Education*. Clinical Professor. Designing effective and efficient community-based interventions, Severe behavior disorders, Functional behavior assessment

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

Emeritus Faculty

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Fredricka K. Reisman, PhD (*Syracuse University*) *Director of the Torrance Center for Creativity and Innovation*. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

Learning Technologies

Major: Learning Technologies

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0-46.5

Co-op Option: None

Classification of Instructional Programs (CIP) code: 13.0501

Standard Occupational Classification (SOC) code: 25-9031

About the Program

The School of Education offers an MS in Learning Technologies program to prepare graduate students to meet the leadership challenges facing schools, higher education, corporate, non-profit, and government organizations related to learning using advanced technologies.

The MS in Learning Technologies program is nationally recognized for its strength in technology, the learning sciences, instructional design & development, online learning, and game-based learning environments. Students are expected to maintain a continuous registration and will be encouraged to take one to two courses per term until completion of their program of study.

Courses are offered in a convenient leading-edge online format, although blended learning enhancements are integrated into the program. Coursework is enriched and supplemented by hands-on learning activities leading to the creation of a product portfolio, interactive communications between faculty, students, and practitioners, connections with employers, and opportunities for collaborative research and writing. The program also features an annual online conference for presentation of program participant research papers and projects, as well as invited keynote

speakers, workshops, and poster sessions. There are also occasional on-campus events, with web-cast access.

Additional Information

For additional information about this program, contact the Program Manager or visit Drexel University Online's MS in Learning Technologies (<https://drexel.edu/soe/academics/graduate/learning-technologies/>) website.

Andrea Guy
 Program Manager
 School of Education
 aes68@drexel.edu
 215-571-4471

Admission Requirements

Each candidate to the MS in Learning Technologies will submit the following application materials:

- Completed application form
- Transcripts (must be provided for every institution attended)
- Personal essay, providing commitment to program's unique features
- Professional resume
- Two letters of recommendation

Admission to the MS in Learning Technologies program will follow the University standards for admission to graduate study including the receipt of a Bachelor's degree from an accredited college or university with an earned GPA of 3.0 or better on a 4.0 scale.

Information about how to apply is available on the Graduate Admissions at Drexel University (<http://www.drexel.edu/grad/apply/overview/>) website.

Degree Requirements

Students pursuing the MS in Learning Technologies will complete the following course requirements.

Core Courses

EDCR 512	Using and Integrating Learning Technologies	3.0
EDLT 503	The Learning Sciences	3.0
EDLT 537	Technologies for Performance Support	3.0
EDLT 541	Foundations of Game-Based Learning	3.0
EDLT 543	Play & Learning in a Participatory Culture	3.0
EDLT 551	Instructional Design Methods	3.0
EDLT 552	Instructional Design: Project Management	3.0
EDLT 553	Instructional Design: Special Topics	3.0
EDLT 554	Learning with Social Media and Mobiles	3.0
EDLT 561	Design-Based Research Methods	3.0
ELL 501	The Purpose and Business of E-Learning	3.0
ELL 504	Learning Technologies & Disabilities	3.0

Capstone Courses

EDU 780	Capstone Research	3.0
Students have the option to select from the Practitioner, Thesis or Lesson Study Capstone tracks:		
EDUP 780	Practitioner Capstone Course I	3.0
or EDUT 780	Thesis Capstone Course I	
or EDUL 780	Lesson Study Capstone Course I	
EDUP 781	Practitioner Capstone Course II	3.0-4.5
or EDUT 781	Thesis Capstone Course II	
or EDUL 781	Lesson Study Capstone Course II	

Total Credits	45.0-46.5

Education Faculty

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

Eric Brewe, PhD (*Arizona State University*). Associate Professor. Physics Education Research, introductory course reform, network analysis in learning, neuromechanisms of learning.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) *Founding Clinical Core Director and Research Fellow, A.J. Drexel Autism Institute*. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Alonzo M. Flowers, III, PhD (*Texas A&M University*). Associate Professor. Education issues including academic identity development of men of color in STEM education, diversity in teaching & learning, research methods/ design, and college student development in higher education

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities.

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*) *Department Chair for Policy, Organization & Leadership*. Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Dominic F. Gullo, PhD (*Indiana University*). Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

H. Bernard Hall, PhD (*Temple University*). Assistant Professor. Hip-hop Pedagogy, English Education, Urban Teacher Education.

Penny Hammrich, PhD (*University of Minnesota*) *Dean*. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Associate Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) *Senior Vice Provost for Faculty Affairs*. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) *Associate Dean of Research*. Associate Professor. Educational administration, leadership development, survey & instrument design.

Larry Keiser, PhD (*Drexel University*). Associate Clinical Professor. Education and corporate/business leaders' creativity and entrepreneurial mindsets; creative school/work environments; neuroscience of creativity; everyday creativity for teachers and educators.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Associate Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*) *Program Director*. Assistant Clinical Professor. Coached on the USRowing National Team staff since 2002, including the 2004, 2008, 2012, and 2016 Olympic Games; coaching development; measuring coaching quality; self-insight and reflective practices; coaching leadership; conference presenter; published author.

Valerie Klein, PhD (*Amherst College*). Associate Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Michael G. Kozak, Ed.D. (*Rowan University*). Assistant Clinical Professor. Leadership, STEAM, online and blended learning environments, systems thinking, experiential learning, K-12 education, and facilitating change

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Associate Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student

development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. thinking about school reform by drawing, Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Joanne Sloand, EdD (*Duquesne University*) *Department Chair for Teaching, Learning & Curriculum*. Associate Clinical Professor. Special Education Leadership, Trauma-informed care, Parent engagement in special education service delivery.

Brian Smith, PhD (*Northwestern University*) *Senior Associate Dean of Academic Affairs*. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) *Associate Dean of Teacher Education and Undergraduate Affairs*. Clinical Professor. Cross-cultural, language and academic development, school reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) *Program Director, Applied Behavior Analysis and Special Education*. Clinical Professor. Designing effective and efficient community-based interventions, Severe behavior disorders, Functional behavior assessment

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

Emeritus Faculty

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Fredricka K. Reisman, PhD (*Syracuse University*) *Director of the Torrance Center for Creativity and Innovation*. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

Mathematics Learning & Teaching

Major: Mathematics Learning and Teaching

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0

Co-op Option: None

Classification of Instructional Programs (CIP) code: 13.1311

Standard Occupational Classification (SOC) code: 25-2022

About the Program

Note: This program of study does not lead to teacher certification.

The MS in Mathematics Learning and Teaching is designed for current middle and high school mathematics teachers as well as mathematically inclined elementary teachers. The program is intended to support teachers in teaching mathematics where students learn with understanding, including supporting students in reasoning through the variety of complex mathematical situations that they encounter in the school mathematics curriculum. The Mathematics Learning and Teaching program includes courses with explicit focus on the use of technology in teaching and unpacking, and re-conceptualizing the mathematics of middle and high school curricula. In particular, the program of study involves courses that model best practices in mathematics education, including collaborative problem solving, reflection on practice, and student-centered instruction.

The mathematics education core courses are divided into two sets of courses: introductory (500-level) and advanced (600-level) courses. The introductory courses emphasize content-based and informed pedagogy, representation and communication, connections between multiple representations and multiple solution methods. The advanced courses emphasize common student conceptions, misconceptions and difficulties, diagnosing student thinking, addressing particular students'

needs effectively, scaling "individualized instruction," and collaborative instructional design and analysis.

All courses in this program are in an online format.

Additional Information

For additional information about this program, contact the School of Education (<http://www.drexel.edu/soe/>).

Admission Requirements

Note: This program of study does not lead to teacher certification.

Each candidate will submit the following application materials:

- Completed application form
- Transcripts (must be provided for every institution attended)
- Personal essay, providing commitment to program's unique features
- Professional resume

Admission to the MS in Mathematics Learning & Teaching program will follow the University standards for admission to graduate study including the receipt of a Bachelor's degree from an accredited college or university with an earned GPA of 3.0 on a 4.0 scale.

The Mathematics Learning and Teaching (MLT) program is built around the importance of the integration of research and practice and the importance of connecting school teaching practices with university coursework. As a result, there will be a fieldwork component for some courses. These courses require university students to interact with school-aged students, document their activity (ideally with video-recordings), and bring the results of their work back to the university class for collective analysis and reflection. MS and certificate students who are not current classroom teachers will need to obtain the appropriate Child Abuse and Criminal Record clearances for their state to work with school-aged students in schools during the school day. Such program candidates are also advised to talk with area schools in advance of entering one of the MLT programs to obtain the process for arranging the fieldwork components of the MLT courses.

Additional requirements for the MS in Mathematics Learning and Teaching program include:

- Completion of at least two semesters (or three quarters) of university calculus and at least one university mathematics course beyond university calculus. This additional course must be offered by the mathematics department and cannot include courses on the fundamentals of mathematics, college algebra, or mathematics for elementary school teachers. Exceptions to this requirement will be considered on an individual basis by the program director or the program admissions committee.
- All students must provide evidence of a current teaching position or must secure a site for field placement and complete the Child Abuse and Criminal Record Clearance by the end of the winter term in the first year in the program.

For additional information, contact the School of Education (<http://www.drexel.edu/soe/>). Additional information about how to apply is available on the Graduate Admissions at Drexel University (<http://www.drexel.edu/grad/programs/edu/mathematics-learning-and-teaching/>) website.

Degree Requirements

Education Core Courses

EDUC 522	Evaluation of Instruction	3.0
EDUC 524	Current Research in Curriculum & Instruction	3.0
EDUC 525	Multi-Media Instructional Design	3.0

Mathematics Education Core Courses

MTED 501	Proportional and Algebraic Reasoning	3.0
MTED 502	Geometry & Spatial Reasoning	3.0
MTED 503	Data Analysis and Probabilistic & Statistical Reasoning	3.0
MTED 511	Functions through the Curriculum	3.0
MTED 601	Diagnosing Student Mathematical Thinking	3.0
MTED 611	Virtual Field Experience I - Online Mentoring	1.5
MTED 612	Virtual Field Experience II - Online Mentoring	1.5
MTED 651	Problem Solving Strategies	3.0

Capstone Courses

EDU 780	Capstone Research	3.0
Students have the option to select from the Practitioner, Thesis or Lesson Study Capstone tracks:		
EDUP 780	Practitioner Capstone Course I	3.0
or EDUT 780	Thesis Capstone Course I	
or EDUL 780	Lesson Study Capstone Course I

 25-2053; 25-2054; 25-2059

About the Program

The Master of Science in Special Education program is intended for those interested in gaining greater skills and expertise in the area of Special Education and/or a teaching certificate in the area of special education. Candidates seeking Pennsylvania special education certification must have an active Pennsylvania Instructional I or II teaching certificate.

The courses address all required state and federal regulations as well as the Pennsylvania General Standards for Special Education and the competencies and standards outline by the Council of Exceptional Children (CEC).

The Master of Science in Special Education produces professionals who are equipped with the fundamental skills, knowledge, and competencies they need to meet the needs of students with disabilities or those at risk for of developing disabilities. The program is a flexible, part-time graduate program consisting of 45.0 credits: 27.0 credits in Core Special Education Certification courses, 12.0 credits in concentration courses, and 9.0 credits in research. Most courses have a field component that has the student apply what they are learning to classroom experiences. The program culminates with each potential graduate completing an action research project and an ePortfolio that demonstrates the student's mastery of core content.

The Pennsylvania Department of Education (PDE) is currently in the process of restructuring its requirements for Special Education Certification, grades PK-8 and grades 7-12. While the requirements are mandated by the PDE, the School of Education is committed to working with both current and new students to fulfill the competencies as required.

For additional information, please contact the School of Education's undergraduate Academic Advising Department at 215-895-6770.

Available Concentrations

Autism Spectrum Disorders

Within the past decade, the number of children diagnosed with Autism or Asperger's Syndrome has increased drastically. Consequently, the need for professionals trained in this specialized area has significantly increased. This concentration is designed for those who seek additional expertise in this critical need area. It will provide knowledge and skills for working with students with Autism Spectrum Disorder as well as effective teaching methods, interventions, and supports. Students who have an active PA Instructional I or Instructional II teaching certificate are eligible to apply for the PA Autism Spectrum Disorders endorsement upon completion of EDEX 555 and the concentration courses.

Collaborative Special Education Law and Process

Meeting the needs of children with disabilities through school-family-community collaboration is an ambitious goal of educational policy in the United States. An implementing objective is to develop highly qualified special education teachers and administrators in schools and the community, as well as to offer special education collaborative knowledge and practical skills training to parents and advocates, whose cooperative partnership is imperative to support the provisions for the successful learning of all students as incorporated and mandated in legislation such as No Child Left Behind (NCLB) and the Individuals with Disabilities Education Improvement Act of 2004 (IDEA).

Multisensory Reading Instruction Level I with WILSON® Level 1 Certification

It is estimated that up to 20% of school age children experience difficulty with some aspect of literacy. This course sequence gives teachers the necessary skills to provide direct instruction in a multisensory phonetic-based program to students with decoding deficits. With successful completion of the coursework, students are eligible for WILSON® Level 1 Certification. The Wilson Reading System® is recognized nationwide and is a highly desirable certification to have in Special Education.

Special Education Leadership

The courses in the Special Education Leadership concentration focus on change, finance, evaluation and assessment, and technology. Students must complete all courses and meet the prerequisite standards established by the PA Dept. of Education for recommendation for the PA supervisor of Special Education certification.

Applied Behavior Analysis

The ABA concentration prepares candidates with the background and knowledge related to applying behavior therapies in schools with a focus on behavior assessment, change and intervention.

Social Emotional Behavioral Wellness

Social Emotional Learning is an empirically-based approach to the non-academic barriers that students face in order to achieve a set of positive goals. Research shows that 1 in 5 students will experience some type of mental health issue during their time in school. This certificate is designed to help teachers and prospective teachers learn how to create positive classroom environments and how to execute evidence-based, age-appropriate strategies to foster social, emotional, and behavior wellness in PreK-12 students within a multi-tiered system of support. Students who have an active PA Instructional I or Instructional II teaching certificate are eligible to apply for the PA Social Emotional Behavioral endorsement.

Customized Concentration

Students who already possess a special education certification or who are not interested in obtaining a special education certification but want to enhance their skills in specific special education topic areas may choose to take two of the concentrations (24.0 credits) and 15.0 credits of their choosing from the special education certification core in addition to completing the research courses.

Additional Information

For more information about this program, contact the program manager:

Ms. Kyra Dukes, Program Manager
 kat353@drexel.edu

Admission Requirements

Applicants for the program will follow the university standards for admission to graduate study. Prospective students must have earned a bachelor's degree from an accredited institution and have an undergraduate GPA of 3.0 or higher to be considered for admission (graduate degree GPAs will be considered along with the undergraduate GPA). In addition, prospective students are required to submit the following:

- Completed Application Form including official transcripts from all universities or colleges attended
- Two letters of recommendation
- Personal essay

The admissions committee will evaluate the applicant's potential and commitment to succeed in graduate study in the online environment. The applicant's potential to contribute to the overall quality of the program of study will also be considered.

Interviews, in person or by phone, will be conducted by the admissions committee with those applicants who meet Graduate Admission's standard admissions criteria.

Decisions will be made using dates corresponding to the regular university schedule for rolling admissions in Graduate Admissions.

For more information about this program, contact the program manager:

Degree Requirements

The Master of Science in Special Education requires 45.0 credits consisting of 27.0 credits in core special education certification courses, 12.0 credits in concentration courses, and 9.0 credits in research. For a certification in special education, students must have completed 9 prerequisite credits in special education accommodations to apply for certification in Pennsylvania.

A field component is required in most courses.

Pre-Requisite Courses

Students must have the following courses in order to apply for a certification in special education. All students entering this master's program from an approved PA certification program after 2011 should have had these core courses in their initial certification program. If a student does not have these courses, they must complete them with a minimum grade of "B" in addition to the core certification offerings:

- EDEX 542: *Fundamentals of Special Education* (3 credits)
- EDEX 544: *The Inclusive Learner* (3 credits)
- EDEX 546: *Literacy and Content Skill Development PreK-8* or or EDEX 566: *Literacy and Content Skill Development 7-12* -- dependent on certification level desired (3 credits)

Required Courses

EDEX 543	Emotional and Behavioral Support of Individuals with Disabilities	3.0
EDEX 549	Teaching Individuals with High Incident Disabilities	3.0
EDEX 550	Teaching Individuals with Low Incident Disabilities	3.0
EDEX 552	Integrating Technology for Learning & Achievement	3.0
EDEX 555	Teaching Students with Autism Spectrum Disorder	3.0
Students will choose a concentration in Grades PreK-8 or Grades 7-12 based off of the certification they are seeking.		9.0
Concentration in Elementary Special Education (Grades PreK-8)		
EDEX 537	Special Education Law and Processes PreK-8	
EDEX 545	Teaching STEAM in an Inclusive Pre-K to 8 Environment	
EDEX 576	Special Education Practicum PreK-8	
Concentration in Secondary Special Education (Grades 7-12)		
EDEX 538	Special Education Law and Processes 7-12	
EDEX 565	Teaching Secondary Mathematics in an Inclusive Environment	
EDEX 577	Special Education Practicum 7-12	

Capstone Courses		
EDU 780	Capstone Research	3.0
Students have the option to select from the Practitioner, Thesis or Lesson Study Capstone tracks:		
EDUP 780	Practitioner Capstone Course I	3.0
or EDUT 780	Thesis Capstone Course I	
or EDUL 780	Lesson Study Capstone Course I	
EDUP 781	Practitioner Capstone Course II	3.0-4.5
or EDUT 781	Thesis Capstone Course II	
or EDUL 781	Lesson Study Capstone Course II	
Concentration Courses		12.0-31.5
Students complete courses from one of the concentrations listed below.		
Total Credits		45.0-66.0

Concentration Options		
Students must complete one of the following concentrations options:		
Autism Spectrum Disorders Concentration		12.0
EDEX 556	Characteristics & Methods: Autism	
EDEX 558	Characteristics & Methods: High Functioning Autism	
EDEX 560	Communication & Language Interventions: Autism Spectrum Disorders	
EDEX 562	Behavior & Sensory Support: Autism Spectrum Disorders	
Collaborative Special Education Law & Process		12.0
EDEX 600	Family, School and Community Engagement in Special Education	
EDEX 601	Special Education Advocacy	
EDEX 602	Special Education Dispute Resolution and Skills Training	
EDEX 710	School Law & Policy in Special Education	
Multisensory Reading Instruction Level **		12.0
EDLS 620	Applied Methods in Multisensory Reading Instruction	
EDLS 621	Multisensory Reading Instruction	
EDLS 622	Basic Word Study I	
EDLS 623	Basic Word Study II	
EDLS 624	Multisensory Practicum I	
EDLS 625	Multisensory Practicum II	
EDLS 626	Multisensory Practicum III	
Special Education Leadership		16.0
EDEX 710	School Law & Policy in Special Education	
EDEX 712	Instructional & Curriculum Leadership in Special Education	
EDEX 714	Development, Supervision, & Support: Special Education Leadership	
EDEX 716	Organization & Administration of Special Education	
EDEX 721	Supervisor of Special Education Internship: Special Education Leadership	
EDEX 722	Supervisor of Special Education Internship: Instructional Leadership	
EDEX 723	Supervisor of Special Education Internship: Collaboration & Personnel	
EDEX 724	Supervisor of Special Education Internship: Finance & Management	
Applied Behavior Analysis		31.5
EDEX 630	Fundamental Elements of Behavior Change	
EDEX 631	Measurement and Experimental Design	
EDEX 632	Behavioral Assessment and Functional Analysis	
EDEX 633	Behavioral Interventions	
EDEX 634	Consultation, Systems Change and Supervision	
EDEX 635	Ethical Considerations and Professional Conduct	
EDEX 636	Applications of Fundamental Elements of Behavior Analysis	
Social Emotional and Behavior Wellness		12.0
EDEX 580	Social Emotional Wellness and Evidence-Based Preventative School Practices	
EDEX 581	Understanding Social Emotional Disorders	
EDEX 582	Evidence-Based School Interventions and Trauma Informed Education/Care	

EDEX 583 Collaboration and Community Based Practices to Promote Social Emotion Wellness

** The multisensory reading instruction courses fulfill certain requirements (but not all) for the Wilson Language Level I certification.

Sample Plan of Study

Basic MS Special Education Program of Study

Candidates pursuing Special Education Leadership Concentration will enroll in additional 1 credit Internship Courses in First Year Term 3 (EDEX 721) and Term 4 (EDEX 722) and Second Year Term 1 (EDEX 723) and Term 2 (EDEX 724).

First Year			
Term 1			Credits
EDEX 537 or 538*	Special Education Law and Processes PreK-8 Special Education Law and Processes 7-12		3.0
EDEX 549	Teaching Individuals with High Incident Disabilities		3.0
Term Credits			6.0
Term 2			
EDEX 555	Teaching Students with Autism Spectrum Disorder		3.0
EDEX 543	Emotional and Behavioral Support of Individuals with Disabilities		3.0
Term Credits			6.0
Term 3			
EDEX 552	Integrating Technology for Learning & Achievement		3.0
Concentration Course			3.0
Term Credits			6.0
Term 4			
EDEX 550	Teaching Individuals with Low Incident Disabilities		3.0
EDU 780	Capstone Research		3.0
Term Credits			6.0
Second Year			
Term 1			
EDEX 545 or 565**	Teaching STEAM in an Inclusive Pre-K to 8 Environment Teaching Secondary Mathematics in an Inclusive Environment		3.0
EDUP 780, EDUL 780, or EDUT 780	Practitioner Capstone Course I Lesson Study Capstone Course I Thesis Capstone Course I		3.0
Concentration Course			3.0
Term Credits			9.0
Term 2			
EDUP 781, EDUL 781, or EDUT 781	Practitioner Capstone Course II Lesson Study Capstone Course II Thesis Capstone Course II		3.0
Concentration Course			3.0
Term Credits			6.0
Term 3			
EDEX 576 or 577***	Special Education Practicum PreK-8 Special Education Practicum 7-12		3.0
Concentration Course			3.0
Term Credits			6.0

Total Credit: 45.0

* Candidates pursuing Special Education PK-8 Certification enroll in EDEX 537. Those seeking Special Education 7-12 Certification enroll EDEX 538

** Candidates pursuing Special Education PK-8 Certification enroll in EDEX 545. Those seeking Special Education 7-12 Certification enroll EDEX 565

*** Candidates pursuing Special Education PK-8 Certification enroll in EDEX 576. Those seeking Special Education 7-12 Certification enroll EDEX 577

*** Candidates pursuing Special Education PK-8 Certification enroll in EDEX 576. Those seeking Special Education 7-12 Certification enroll EDEX 577

Education Faculty

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

Eric Brewe, PhD (*Arizona State University*). Associate Professor. Physics Education Research, introductory course reform, network analysis in learning, neuromechanisms of learning.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) *Founding Clinical Core Director and Research Fellow, A.J. Drexel Autism Institute*. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Alonzo M. Flowers, III, PhD (*Texas A&M University*). Associate Professor. Education issues including academic identity development of men of color in STEM education, diversity in teaching & learning, research methods/design, and college student development in higher education

Arotis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities.

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*) *Department Chair for Policy, Organization & Leadership*. Associate Professor. Mentoring

and leader development, workplace incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Dominic F. Gullo, PhD (*Indiana University*). Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

H. Bernard Hall, PhD (*Temple University*). Assistant Professor. Hip-hop Pedagogy, English Education, Urban Teacher Education.

Penny Hammrich, PhD (*University of Minnesota*) *Dean*. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Associate Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) *Senior Vice Provost for Faculty Affairs*. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) *Associate Dean of Research*. Associate Professor. Educational administration, leadership development, survey & instrument design.

Larry Keiser, PhD (*Drexel University*). Associate Clinical Professor. Education and corporate/business leaders' creativity and entrepreneurial mindsets; creative school/work environments; neuroscience of creativity; everyday creativity for teachers and educators.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Associate Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*) *Program Director*. Assistant Clinical Professor. Coached on the USRowing National Team staff since 2002, including the 2004, 2008, 2012, and 2016 Olympic Games; coaching development; measuring coaching quality; self-insight and reflective practices; coaching leadership; conference presenter; published author.

Valerie Klein, PhD (*Amherst College*). Associate Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Michael G. Kozak, Ed.D. (*Rowan University*). Assistant Clinical Professor. Leadership, STEAM, online and blended learning environments, systems thinking, experiential learning, K-12 education, and facilitating change

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Associate Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. thinking about school reform by drawing, Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Joanne Sloand, EdD (*Duquesne University*) *Department Chair for Teaching, Learning & Curriculum*. Associate Clinical Professor. Special

Education Leadership, Trauma-informed care, Parent engagement in special education service delivery.

Brian Smith, PhD (*Northwestern University*) *Senior Associate Dean of Academic Affairs*. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) *Associate Dean of Teacher Education and Undergraduate Affairs*. Clinical Professor. Cross-cultural, language and academic development, school reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) *Program Director, Applied Behavior Analysis and Special Education*. Clinical Professor. Designing effective and efficient community-based interventions, Severe behavior disorders, Functional behavior assessment

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

Emeritus Faculty

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Fredricka K. Reisman, PhD (*Syracuse University*) *Director of the Torrance Center for Creativity and Innovation*. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

Teaching, Learning and Curriculum

Major: Teaching, Learning, and Curriculum

Degree Awarded: Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 45.0-48.0

Instructional Delivery: Track I and Track III Online or On Campus; Track II Online only

Co-op Option: None

Classification of Instructional Programs (CIP) code: 13.1399

Standard Occupational Classification (SOC) code: 11-9039

About the Program

The MS in Teaching, Learning, and Curriculum program provides three options: (Track I) earning a master's degree while completing requirements to pursue initial Pennsylvania teacher certification for grade level PreK-4, 4 - 8 or a variety of secondary subject areas (grades 7 - 12); (Track II) earning a master's degree to enhance an existing career as a classroom teacher, preparation for additional certifications or for advanced research degrees such as EdD and PhD or (Track III) earning a master's degree while completing requirements to pursue initial Pennsylvania teacher certification in a variety of secondary subject areas and Special Education certification (level 7-12).

Track I: Initial Pennsylvania Teacher Certification

This track incorporates current research on teaching and provides in-depth preparation in pedagogy, curriculum development, teaching students with special needs, implications of learner and task characteristics for instructional design, scaffolding instruction for diverse learners, the latest techniques in evaluation of instruction, and use of interactive technology in instruction. Students are required to synthesize theoretical and practical knowledge through field study in an approved PreK-12 school setting. All candidates are also required to complete supervised field experiences, including a full-time student teaching experience for a minimum of 12 consecutive weeks.

Successful completion of the core pedagogy courses, satisfactory participation in all required field based experiences, subject area content knowledge requirements and state licensure exams allows for recommendation for PA Instructional I certification.

Program Goals

Graduates of the MS in Teaching, Learning and Curriculum (Track I) will:

- Demonstrate independent and creative academic teacher leadership skills that can be applied in the classroom, school community and the profession
- Understand the changing role of the educator in an increasingly diverse society from both an urban and a global perspective, and applies this understanding of best practice supported by educational research
- Demonstrate the ability to reflect upon professional practice during engagement in experiential learning and against a framework of understanding of best practice supported by educational research
- Demonstrate a strong academic background in all subject areas that meet Pennsylvania Department of Education (PDE) content requirements with emphasis on STEM, and can effectively integrate tools of technology in curriculum, assessment and instruction to enhance PK-12 student learning
- Demonstrate the ability to create and maintain a positive and democratic classroom climate that supports and facilitates learning for all students.

Track II: Advanced Studies in Teaching, Learning and Curriculum

This track is designed to provide students with advanced teaching knowledge and skills well beyond that required for initial Pennsylvania certification. Graduates will be prepared to function in a variety of roles

as instructors, instructional leaders or researchers in local, state, national and international organizations, foundations, associations, corporations and private educational institutions.

Program Goals

Graduates of the MS in Teaching, Learning and Curriculum (Track II) will:

- Possess advanced knowledge related to effective instruction in a variety of educational settings.
- Demonstrate skills in developing, analyzing, implementing, and evaluating existing and new instructional strategies and practices in a variety of educational institutions/organizations.
- Exhibit outstanding leadership, organizational, cross cultural, interpersonal and advocacy skills including the ability to communicate effectively with internal and external groups.
- Have in-depth knowledge of both public and private (non-profit and for-profit) institutions as well as small and large institutions.

Students in Track II complete 15 credits in Core Courses, 6 credits in Policy, Law & Organization courses, 9-10.5 credits in a Capstone Course sequence which includes a Research course and the choice of one of the three Capstone Course sequences (Practitioner Capstone 1 & 2, Lesson Study Capstone 1 & 2, or Thesis Capstone 1 & 2) and select a 15-16 credit area of concentration from among a variety of options, providing an opportunity for intensive study in teaching, learning, and curriculum.

Concentration options include Adult Education and Organization Development, Autism Spectrum Disorders, Creativity and Innovation, Education Policy, Global and International Education, Higher Education, Learning Technologies and Multisensory Reading Instruction Level I. If candidates possess a PA Instructional I certification, they can choose an add-on state certification concentration such as including Reading Specialist or Teaching English as a Second Language (TESL).

Students may also customize a concentration including professional electives from other academic departments or can declare a graduate minor based on their interests and professional goals.

Track III: Dual Certification - Secondary Subject Areas with Special Education (7-12)

This track incorporates current research on teaching and provides in-depth preparation in pedagogy, curriculum development, teaching students with special needs, implications of learner and task characteristics for instructional design, scaffolding instruction for diverse learners, the latest techniques in evaluation of instruction, and use of interactive technology in instruction. Students are required to synthesize theoretical and practical knowledge through field study in an approved PreK-12 school setting. All candidates are also required to complete supervised field experiences, including multiple practicum experiences (up to 70 hours) and a full-time student teaching experience for a minimum of 12 consecutive weeks. Clearances must be submitted prior to participation in course work with classroom-based field components.

Successful completion of the Teacher Education core pedagogy courses, Special Education Core Pedagogy and all Secondary Education content knowledge requirements along with qualifying scores on all required state licensing examinations permits Drexel to recommend the candidate for an initial PA Instructional teaching credential and 7-12 Special Education certification.

Program Goals

Graduates of the MS in Teaching, Learning and Curriculum (Track III) will:

- Demonstrate independent and creative academic teacher leadership skills that can be applied in the classroom, school community and the profession
- Understand the changing role of the educator in an increasingly diverse society from both an urban and a global perspective, and apply this understanding of best practice supported by educational research
- Demonstrate the ability to reflect upon professional practice during engagement in experiential learning and against a framework of understanding of best practice supported by educational research
- Demonstrate a strong academic background in all subject areas that meet Pennsylvania Department of Education (PDE) content requirements with emphasis on STEM, and can effectively integrate tools of technology in curriculum, assessment and instruction to enhance PK-12 student learning
- Demonstrate the ability to create and maintain a positive and democratic classroom climate that supports and facilitates learning for all students.
- Exhibit competencies in selecting and executing evidence based behavioral instructional and technology strategies to address the needs of all students
- Create and support inclusive learning environments where all learners are welcomed, challenged and held to high expectations

Admission Requirements

Admission to the MS in Teaching, Learning and Curriculum will follow the University standards for admission to graduate study including receipt of a bachelor's degree from an accredited college or university with an earned GPA of 3.0 on a 4.0 scale. Undergraduates who meet the rigorous requirements for participation in a Bachelor's and Master Dual Degree Program may also be considered for both tracks.

Prospective students can learn about specific admission requirements by visiting the Graduate Admissions at Drexel University (<http://www.drexel.edu/grad/programs/edu/teaching-learning-and-curriculum/>) website.

Degree Requirements

Track I: Initial Pennsylvania Teacher Certification

A minimum of 45.0 credits is required for students with or without prior certification for the Master of Science degree. Students may also pursue the MS in Teaching, Learning and Curriculum; Track I without pursuing PA Instructional I Certification.

Core Courses

Completion of the following 30.0 (secondary certification) credits or 42.0 (PreK-4) credits of core pedagogy courses allows for recommendation for PA Instructional I certification. View the requirements on the Post-Baccalaureate Teaching Certificate: Elementary Pre-K-4 and Secondary Concentrations (p. 376) page for additional information on requirements for specialization in subject areas. Students on Track I who do not wish to pursue PA Instructional I Certification, or who do not qualify for PA Instructional I certification may complete the MS Degree without a concentration by completing 15.0 credits of Core Pedagogy and 30.0 credits of MS Electives.

Track II: Advanced Studies in Teaching, Learning and Curriculum

A minimum of 45.0 credits is required including 27.0 credits of professional core, research policy, and organization courses and 18.0 credits of concentration electives. Students may choose from the following concentration options with the approval of a graduate academic advisor and the program director:

- Adult Education and Organization Development
- Autism Spectrum Disorders
- Creativity and Innovation
- Education Policy
- Global and International Education
- Higher Education
- Learning Technologies
- Multisensory Reading Instruction Level I
- Reading Specialist (48.0 credits required to complete MS)
- Teaching English as a Second Language (TESL)
- Customized concentration (including professional electives from various academic departments:
 - Educational Administration (qualified candidate may begin course work toward the 24.0 credit School Principal K-8 Certification program)
 - Instructional Technology (qualified candidate may begin course work toward the Instructional Technology Specialist Certification program)

Track III: Initial Pennsylvania Teacher Certification with Special Education 7 - 12 Certification

A minimum of 48.0 credits is required for students with or without prior certification for the Master of Science degree. Students may also pursue the MS in Teaching, Learning and Curriculum; without pursuing Certification.

Core Courses

Completion of the following 15.0 (secondary certification) credits and 33.0 Special Education core pedagogy courses allows for recommendation for PA Instructional I and Special Education (7-12) certification. View the requirements on the Post-Baccalaureate Teaching Certificate: Elementary Pre-K-4 and Secondary Concentrations (p. 376) page for additional information on requirements for specialization in subject areas.

Program Requirements

Track I: Teaching, Learning and Curriculum

Students complete 45.0 credit hours of pedagogy and methods course work including classroom-based field components. Successful completion of the Teacher Education Core Pedagogy and all Elementary Education or Secondary Education course work components of the degree, with the grade of B or better in each course, permits Drexel to recommend the candidate for an initial PA Instructional teaching credential providing the candidate is a US citizen or has an appropriate visa status, and has successfully completed all appropriate state testing requirements. Annual background checks are required to participate in course work with classroom-based field components.

Elementary Level Teacher Education Core Pedagogy (15 Credits)

EDEX 542 Fundamentals of Special Education

3.0

EDEX 544	The Inclusive Classroom (Field experience required)	3.0
EDLT 525	Design for Learning with Digital Media	3.0
EDUC 520	Professional Studies in Instruction	3.0
EDUC 565	Foundations in Instructing English Language Learners (Field experience required)	3.0

Elementary Education: Concentration in Pre-kindergarten - Grade 4 (27 credits)

EDEX 546	Literacy and Content Skill Development PreK-8 ((Field Experience Required))	3.0
EDUC 506	Assessment of Young Learners	3.0
EDUC 513	Elementary Science Teaching Methods	3.0
EDUC 521	Typical and Atypical Development in Early Childhood Education ((Field Experience Required))	3.0
EDUC 529	Early Literacy ((Field Experience Required))	3.0
EDUC 539	Expressive Arts	3.0
EDUC 540	Field Experience (12 week full time student teaching)	3.0
EDUC 555	Social Studies Teaching Methods	3.0
MTED 517	Mathematics Methods and Content (PreK-4) ((Field Experience Required))	3.0
Professional Elective (3 credits)		3.0
Total Credits		45.0

Middle Level Teacher Education Core Pedagogy (15 credits)

EDEX 542	Fundamentals of Special Education	3.0
EDEX 544	The Inclusive Classroom ((Field Experience Required))	3.0
EDLT 525	Design for Learning with Digital Media	3.0
EDUC 520	Professional Studies in Instruction	3.0
EDUC 565	Foundations in Instructing English Language Learners ((Field Experience Required))	3.0

Middle Level Education Grades 4 - 8 Concentration in Math, English, Social Studies or Science (18 credits)

EDEX 546	Literacy and Content Skill Development PreK-8 ((Field Experience Required))	3.0
EDUC 507	Teaching the Middle School Child ((Field Experience Required))	3.0
EDUC 522	Evaluation of Instruction	3.0
EDUC 540	Field Experience (12 week full time student teaching)	3.0
EDUC 562	Middle Years Social Studies Methods ((Field Experience Required))	1.5
EDUC 563	Middle Years Mathematical Methods (4-8) ((Field Experience Required))	1.5
EDUC 564	English/Language Arts Teaching Methods for the Middle Years ((Field Experience Required))	1.5
EDUC 567	Middle Years Science Methods	1.5
Professional Electives (12.0)		12.0
Total Credits		45.0

Secondary Level Teacher Education Core Pedagogy (15 credits)

EDEX 542	Fundamentals of Special Education	3.0
EDEX 544	The Inclusive Classroom	3.0
EDLT 525	Design for Learning with Digital Media	3.0
EDUC 520	Professional Studies in Instruction	3.0
EDUC 565	Foundations in Instructing English Language Learners	3.0

Secondary Education Grades 7-12: Concentration in Biology, Chemistry, Earth and Space Science, English, General Science, Mathematics, Physics, or Social Studies (15 credits)

EDEX 566	Literacy and Content Skill Development 7-12 (Field experience required)	3.0
EDUC 515	Adolescent Learners in Secondary Schools (Field experience required)	3.0
EDUC 522	Evaluation of Instruction	3.0
Candidate selects appropriate methods course (including a school-based field component) matching desired area of certification		
EDUC 538	English Teaching Methods (Field experience required)	3.0
or EDUC 514	Science Teaching Methods	

or EDUC 556	Secondary Social Studies Methods (7-12)	
or MTED 519	Teaching Secondary Mathematics	
EDUC 540	Field Experience (12 week full time student teaching)	3.0
Professional Electives (15 credits)		15.0
Total Credits		45.0

Track II: Advanced Studies in Teaching, Learning and Curriculum

Students complete a total of 45-47.5 credit hours dependent on selected concentration. Some concentrations require participation in classroom-based field components (e.g., Autism Spectrum Disorders, Multisensory Reading Instruction Level 1, Reading Specialist, Teaching English as a Second Language). Annual background checks are required to participate in course work with classroom-based field components.

Core Courses (15 credits)

EDAM 714	Instructional and Curriculum Leadership (Take EDLS 550 if pursuing Reading Specialist Concentration)	3.0
or EDLS 550	Theories of Reading and Writing	
EDLT 532	Designing Virtual Communities for Staff Development - Non-Field Experience	3.0
EDUC 530	Advanced Techniques in Instruction & Assessment	3.0
Reading Specialist Concentration students enroll in EDLS 555		
EDLS 555	Understanding Literacy through Sociocultural Perspectives	3.0
or EDUC 609	Language & Culture in Education	
Professional Elective (Reading Specialist Concentration students enroll in EDLS 575 in lieu of elective)		3.0

Policy, Law & Organization Courses (6 credits)

Select two courses from following list. Reading Specialist Concentration students enroll in EDLS 570 and EDLS 650; Educational Policy Concentration students enroll in EDAM 705 and EDUC 804		
EDAM 705	School Law and Politics	
EDLS 570	Literacy and Evaluation	
EDLS 650	Designing a Literacy Program	
EDPO 620	Education Policy: Concepts, Issues, and Applications	
EDUC 804	Program Evaluation in Organizations	

Capstone Courses (9-10.5 credits)

EDU 780	Capstone Research	3.0
Students selects and enrolls in appropriate course work following one of the following capstone tracks: Practioner, Lesson Study, or Thesis		
EDUP 780	Practitioner Capstone Course I	3.0
or EDUL 780	Lesson Study Capstone Course I	
or EDUT 780	Thesis Capstone Course I	
EDUP 781	Practitioner Capstone Course II	3.0-4.5
or EDUL 781	Lesson Study Capstone Course II	
or EDUT 781	Thesis Capstone Course II	

Concentration Option (15-16 credits) *

Candidate selects a formal concentration or creates a customizable, non-transcripted concentration in consultation with an academic advisor. Options include:

Human Resource Development (15 credits)		
EHRD 500	Foundations of Human Resources Development	
EHRD 601	Leading and Evaluating Change	
EHRD 602	Coaching and Mentoring for Sustainable Learning	
EHRD 660	Principles of Adult Learning	
EHRD 604	Development of Human Resources	

Autism Spectrum Disorders (15 credits)

EDEX 555	Teaching Students with Autism Spectrum Disorder	
EDEX 556	Characteristics & Methods: Autism	
EDEX 558	Characteristics & Methods: High Functioning Autism	
EDEX 560	Communication & Language Interventions: Autism Spectrum Disorders	
EDEX 562	Behavior & Sensory Support: Autism Spectrum Disorders	

Creativity and Innovation (15 credits)

CRTV 501	Foundations in Creativity
CRTV 502	Tools and Techniques in Creativity
CRTV 503	Creativity in the Workplace
CRTV 620	Research Methods and Assessment of Creative and Innovative Thinking
CRTV 630	Global Perspectives on Creativity

Educational Policy (15 credits)

EDPO 620	Education Policy: Concepts, Issues, and Applications
EDPO 624	The Shaping of American Education Policy: Global Forces, Interest Groups, and Politics
EDPO 628	American Educational Policy and U.S. Competitiveness
EDPO 632	Ethics in Educational Policy Making
EDPO 636	Access & Equity in Educational Policy Making

Global & International Education (15 credits)

EDGI 500	Introduction to Global, International & Comparative Education
EDGI 504	History and Theory of Comparative Education
EDGI 510	Culture, Society & Education in Comparative Perspective
EDGI 512	Globalization and Educational Change
EDGI 514	Education and National Development

Higher Education (15 credits)

EDHE 500	Foundations of Higher Education
EDHE 510	Governance, Management & Administration in Higher Education
EDHE 530	Higher Education Law
EDHE 669	Diversity in Higher Education
EHRD 660	Principles of Adult Learning
EDGI 506	Comparative Higher Education Systems

Learning Technologies (15 credits)

EDLT 532	Designing Virtual Communities for Staff Development - Non-Field Experience
EDLT 537	Technologies for Performance Support
EDLT 543	Play & Learning in a Participatory Culture
EDLT 550	Introduction to Instructional Design
ELL 501	The Purpose and Business of E-Learning

Multisensory Reading Instruction Level 1 (15 credit)

EDLS 620	Applied Methods in Multisensory Reading Instruction
EDLS 621	Multisensory Reading Instruction
EDLS 622	Basic Word Study I
EDLS 623	Basic Word Study II
EDLS 624	Multisensory Practicum I
EDLS 625	Multisensory Practicum II
EDLS 626	Multisensory Practicum III
Professional Elective (minimum 3 credits)	

Reading Specialist Certification Concentration (16 credits)

EDLS 560	Reading and Writing in the Content Areas (7-12)
EDLS 565	Constructing Meaning through Reading and Writing
EDLS 620	Applied Methods in Multisensory Reading Instruction
EDLS 622	Basic Word Study I
EDLS 623	Basic Word Study II
EDLS 624	Multisensory Practicum I
EDLS 625	Multisensory Practicum II
EDLS 626	Multisensory Practicum III

Teaching English as a Second Language Certification (15 credits)

EDUC 602	Language Learning & Teaching
EDUC 604	Structure and Sound System of English
EDUC 606	Design and Assessment
EDUC 608	The Intercultural Learner
Professional Elective (minimum 1.5 credits)	

Total Credits 45.0-47.5

* Candidates may opt for a formal concentration or a **Customized Concentration** which may include course work from other Drexel academic departments in consultation with an academic advisors. Sample customized concentrations might include:

- Educational Administration
- Evaluation & Assessment
- Instructional Design
- Instructional Technology
- Leadership in Educational Settings
- Learning in Game-Based Environments
- Special Education Law and Process
- Special Education Leadership
- Urban Education

Track III: Teaching, Learning and Curriculum Dual Certification - Secondary Subject Areas with Special Education (7-12)

Students complete 48.0 credit hours of pedagogy and methods course work including classroom-based field components. Successful completion of the Teacher Education and Special Education Core Pedagogy and all Secondary Education course work components of the degree, with the grade of B or better in each course, permits Drexel to recommend the candidate for an initial PA Instructional teaching credential and 7-12 Special Education certification providing the candidate is a US citizen or has an appropriate visa status, and has successfully completed all appropriate state testing requirements. Clearances must be submitted prior to participation in course work with classroom-based field components.

Dual Certification Core: Secondary Education (General Science, Mathematics, Biology, Chemistry, Physics, Earth and Space Science, English or Social Studies with 7-12 Special Education Certification (48.0 credits)

EDEX 538	Special Education Law and Processes 7-12	3.0
EDEX 542	Fundamentals of Special Education	3.0
EDEX 543	Emotional and Behavioral Support of Individuals with Disabilities (Field Experience Required)	3.0
EDEX 544	The Inclusive Classroom (Field Experience Required)	3.0
EDEX 549	Teaching Individuals with High Incident Disabilities (Field Experience Required)	3.0
EDEX 550	Teaching Individuals with Low Incident Disabilities (Field Experience Required)	3.0
EDEX 552	Integrating Technology for Learning & Achievement (Field Experience Required)	3.0
EDEX 555	Teaching Students with Autism Spectrum Disorder (Field Experience Required)	3.0
EDEX 565	Teaching Secondary Mathematics in an Inclusive Environment (Field Experience Required)	3.0
EDEX 566	Literacy and Content Skill Development 7-12 (Field Experience Required)	3.0
EDEX 577	Special Education Practicum 7-12 (Stage III Field Practicum required)	3.0
EDLT 525	Design for Learning with Digital Media	3.0
EDUC 515	Adolescent Learners in Secondary Schools (Field Experience Required)	3.0
EDUC 522	Evaluation of Instruction	3.0
Candidate selects appropriate methods course (including a school-based field component) matching desired area of certification		
EDUC 514	Science Teaching Methods (Stage III Pre Student Teaching Required)	3.0
or MTED 519	Teaching Secondary Mathematics	
or EDUC 556	Secondary Social Studies Methods (7-12)	
or EDUC 538	English Teaching Methods	

EDUC 540	Field Experience (12 week Student Teaching experience required)	3.0
Total Credits		48.0

Sample Plan of Study

Track I: Initial Certification Track - Secondary Education (Grades 7 - 12) - Students must declare a concentration in Biology, Chemistry, General Science, Earth and Space Science, Physics, Mathematics, English or Social Studies and take appropriate course for concentration during Term 5

First Year		
Term 1		Credits
EDEX 542	Fundamentals of Special Education	3.0
EDUC 520	Professional Studies in Instruction	3.0
Term Credits		6.0
Term 2		
EDEX 544	The Inclusive Classroom	3.0
EDUC 515	Adolescent Learners in Secondary Schools	3.0
Term Credits		6.0
Term 3		
EDEX 566	Literacy and Content Skill Development 7-12	3.0
Professional Elective		3.0
Term Credits		6.0
Term 4		
EDLT 525	Design for Learning with Digital Media	3.0
EDUC 522	Evaluation of Instruction	3.0
Term Credits		6.0
Second Year		
Term 5		
EDUC 514, MTED 519, EDUC 538, or EDUC 556	Science Teaching Methods Teaching Secondary Mathematics English Teaching Methods Secondary Social Studies Methods (7-12)	3.0
Professional Elective		3.0
Term Credits		6.0
Term 6		
EDUC 540	Field Experience	3.0
Term Credits		3.0
Term 7		
EDUC 565	Foundations in Instructing English Language Learners	3.0
Professional Elective		3.0
Term Credits		6.0
Term 8		
Professional Elective		3.0
Professional Elective		3.0
Term Credits		6.0
Total Credit: 45.0		

Track I: Initial Certification Track - Elementary Education (Grades PreK-4)

First Year		
Term 1		Credits
EDEX 542	Fundamentals of Special Education	3.0
EDUC 520	Professional Studies in Instruction	3.0
Term Credits		6.0
Term 2		
EDEX 544	The Inclusive Classroom	3.0

EDLT 525	Design for Learning with Digital Media	3.0

Term 3		
EDUC 521	Typical and Atypical Development in Early Childhood Education	3.0
EDEX 546	Literacy and Content Skill Development PreK-8	3.0
Term Credits		6.0
Term 4		
EDUC 513	Elementary Science Teaching Methods	3.0
EDUC 506	Assessment of Young Learners	3.0
Term Credits		6.0
Second Year		
Term 5		
MTED 517	Mathematics Methods and Content (PreK-4)	3.0
EDUC 529	Early Literacy	3.0
Term Credits		6.0
Term 6		
EDUC 540	Field Experience (Mandatory Full time Student Teaching)	3.0
Term Credits		3.0
Term 7		
EDUC 555	Social Studies Teaching Methods	3.0
EDUC 565	Foundations in Instructing English Language Learners	3.0
Term Credits		6.0
Term 8		
EDUC 539	Expressive Arts	3.0
Professional Elective		3.0
Term Credits		6.0
Total Credit: 45.0		

Track II: Advanced Studies in Teaching, Learning and Curriculum

Term 1		Credits
EDUC 609	Language & Culture in Education	3.0
Concentration or PLO Course		3.0
Term Credits		6.0
Term 2		
EDUC 530	Advanced Techniques in Instruction & Assessment	3.0
EDLT 532	Designing Virtual Communities for Staff Development - Non-Field Experience	3.0
Term Credits		6.0
Term 3		
EDAM 714	Instructional and Curriculum Leadership	3.0
Concentration Course		3.0
Term Credits		6.0
Term 4		
Concentration Course		3.0
Professional Elective		3.0
Term Credits		6.0
Term 5		
EDU 780	Capstone Research	3.0
Concentration or PLO Course		3.0
Term Credits		6.0
Term 6		
Concentration Course		3.0
Select one of the following Capstone I courses for the track you are following (Practitioner, Thesis or Lesson Study)		3.0
EDUP 780	Practitioner Capstone Course I	
EDUT 780	Thesis Capstone Course I	

EDUL 780	Lesson Study Capstone Course I	
Term Credits		6.0
Term 7		
Select one of the following Capstone 2 courses of the track you are following (Practitioner, Thesis or Lesson Study)		3.0-4.5
EDUP 781	Practitioner Capstone Course II	
EDUT 781	Thesis Capstone Course II	
EDUL 781	Lesson Study Capstone Course II	
Term Credits		3.0-4.5
Term 8		
Concentration or PLO Course		3.0
Concentration Course		3.0
Term Credits		6.0
Total Credit: 45.0-46.5		

Track II: Advanced Studies in Teaching, Learning and Curriculum (Reading Specialist Concentration)

Term 1		Credits
EDLS 575	Responding to Children's and Young Adult Literature	3.0
EDLS 620	Applied Methods in Multisensory Reading Instruction	1.0
EDUC 530	Advanced Techniques in Instruction & Assessment	3.0
Term Credits		7.0
Term 2		
EDLS 550	Theories of Reading and Writing	3.0
EDLS 622	Basic Word Study I	3.0
EDLS 624	Multisensory Practicum I	1.0
Term Credits		7.0
Term 3		
EDLS 555	Understanding Literacy through Sociocultural Perspectives	3.0
EDLS 623	Basic Word Study II	3.0
EDLS 625	Multisensory Practicum II	1.0
Term Credits		7.0
Term 4		
EDLS 560	Reading and Writing in the Content Areas (7-12)	3.0
EDLS 570	Literacy and Evaluation	3.0
EDLS 626	Multisensory Practicum III	1.0
Term Credits		7.0
Term 5		
EDLS 565	Constructing Meaning through Reading and Writing	3.0
EDU 780	Capstone Research	3.0
Term Credits		6.0
Term 6		
EDLS 650	Designing a Literacy Program	3.0
Select one of the following Capstone 1 courses for the track you are following (Practitioner, Thesis or Lesson Study)		
EDUL 780, EDUP 780,	Lesson Study Capstone Course I	3.0
780,	Practitioner Capstone Course I	
or EDUT 780	Thesis Capstone Course I	
Term Credits		6.0
Term 7		
EDLT 532	Designing Virtual Communities for Staff Development - Non-Field Experience	3.0
Select one of the following Capstone 2 courses for the track you are following (Practitioner, Thesis or Lesson Study)		
EDUL 781, EDUP 781,	Lesson Study Capstone Course II	3.0-4.5
781,	Practitioner Capstone Course II	
or EDUT 781	Thesis Capstone Course II	
Term Credits		6.0-7.5
Total Credit: 46.0-47.5		

Track III: Dual Certification Secondary Subject Areas and Special Education (7-12)

First Year		
Fall		
EDUC 565	Foundations in Instructing English Language Learners	3.0
EDEX 542	Fundamentals of Special Education	3.0

Education Faculty

Jennifer Adams, EdD (*Harvard University*). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (*Texas A&M University*). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (*George Washington University*). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

Eric Brewe, PhD (*Arizona State University*). Associate Professor. Physics Education Research, introductory course reform, network analysis in learning, neuromechanisms of learning.

José Luis Chávez, EdD (*University of Southern California*). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (*University of Pittsburgh*). Associate Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (*Louisiana State University*) *Founding Clinical Core Director and Research Fellow, A.J. Drexel Autism Institute*. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

Kareem Edouard, PhD (*Stanford University*). Assistant Professor. Educational technology; internet-based STEM learning; equity and inclusion in STEM education

Salvatore V. Falletta, EdD (*North Carolina State University*). Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Alonzo M. Flowers, III, PhD (*Texas A&M University*). Associate Professor. Education issues including academic identity development of men of color in STEM education, diversity in teaching & learning, research methods/design, and college student development in higher education

Aroutis N. Foster, PhD (*Michigan State University*). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities.

Kathy Geller, PhD (*Fielding Graduate University*). Associate Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (*University of Louisville, Kentucky*) *Department Chair for Policy, Organization & Leadership*. Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

John M. Gould, PhD (*University of Pittsburgh*) *Harrisburg EdD Educational Leadership & Change Program*. Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Dominic F. Gullo, PhD (*Indiana University*). Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

H. Bernard Hall, PhD (*Temple University*). Assistant Professor. Hip-hop Pedagogy, English Education, Urban Teacher Education.

Penny Hammrich, PhD (*University of Minnesota*) *Dean*. Distinguished University Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (*University of Massachusetts, Boston*) *Director, Center for Labor Markets and Policy*. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development,

planning, and development; vocational rehabilitation and job market transition.

Michael J. Haslip, PhD (*Old Dominion University*). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Deanna Hill, JD, PhD (*University of Pittsburgh*). Associate Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (*University of California, Los Angeles*) *Senior Vice Provost for Faculty Affairs*. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (*University of Oregon*) *Associate Dean of Research*. Associate Professor. Educational administration, leadership development, survey & instrument design.

Larry Keiser, PhD (*Drexel University*). Associate Clinical Professor. Education and corporate/business leaders' creativity and entrepreneurial mindsets; creative school/work environments; neuroscience of creativity; everyday creativity for teachers and educators.

Kristine Kelly, PhD (*University of Wisconsin, Madison*). Associate Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Cameron Kiosoglous, PhD (*Virginia Tech University*) *Program Director*. Assistant Clinical Professor. Coached on the USRowing National Team staff since 2002, including the 2004, 2008, 2012, and 2016 Olympic Games; coaching development; measuring coaching quality; self-insight and reflective practices; coaching leadership; conference presenter; published author.

Valerie Klein, PhD (*Amherst College*). Associate Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Michael G. Kozak, Ed.D. (*Rowan University*). Assistant Clinical Professor. Leadership, STEAM, online and blended learning environments, systems thinking, experiential learning, K-12 education, and facilitating change

Amanda Lannie, PhD (*Syracuse University*). Assistant Clinical Professor. Applied behavior analysis and special education; School-based consultation; system-wide interventions as a mechanism for delivery supports to all students; Designing effective and efficient interventions for students with emotional/behavioral disorders.

Vera Lee, EdD (*University of Pennsylvania*). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (*New York University*). Associate Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (*Temple University*). Clinical Professor. Experiences of students of African descent at predominantly white

colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (*University of Maryland*). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (*University of Pittsburgh, Duquesne University*). Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Joy Phillips, PhD (*The University of Texas at Austin*). Associate Clinical Professor. Visionary leadership in theory and practice, school reform as innovative problem-setting, thinking qualitatively about school reform. thinking about school reform by drawing, Educational Leadership Program Assessment.

Joyce Pittman, PhD (*Iowa State University of Science and Technology*). Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (*Marywood University*). Assistant Professor. Educational administration.

Lori Severino, EdD (*Neumann University*). Assistant Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD (*Vanderbilt University*). Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Joanne Sloand, EdD (*Duquesne University*) *Department Chair for Teaching, Learning & Curriculum*. Associate Clinical Professor. Special Education Leadership, Trauma-informed care, Parent engagement in special education service delivery.

Brian Smith, PhD (*Northwestern University*) *Senior Associate Dean of Academic Affairs*. Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Toni A. Sondergeld, PhD (*University of Toledo*). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (*University of California, Davis*). Distinguished Professor. STEM education, urban education, educational assistance

Bridget Sweeney Blakely, PhD (*Temple University*). Assistant Clinical Professor. Consultation; Positive Behavior Interventions and Supports (PBIS); Response to Intervention (RtI); Systems-level change; performance feedback

Mary Jean Tecce DeCarlo, EdD (*University of Pennsylvania*). Associate Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (*Saint Joseph's University*) *Associate Dean of Teacher Education and Undergraduate Affairs*. Clinical Professor. Cross-cultural, language and academic development, school reform, teacher preparation, teacher retention, teacher residencies in urban contexts.

Sheila Vaidya, PhD (*Temple University*). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (*Louisiana State University*) *Program Director, Applied Behavior Analysis and Special Education*. Clinical Professor. Designing effective and efficient community-based interventions, Severe behavior disorders, Functional behavior assessment

Christopher G. Wright, PhD (*Tufts University*). Assistant Professor. Engineering and science education, Urban education, elementary teacher education.

Emeritus Faculty

Mary Jo Grdina, PhD (*Case Western Reserve University*). Clinical Professor. Undergraduate studies, science education, curriculum design.

Fredricka K. Reisman, PhD (*Syracuse University*) *Director of the Torrance Center for Creativity and Innovation*. Professor Emeritus. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

Advanced Teaching and Curriculum Certificate

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 18.0

Instructional Delivery: Online, Campus

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 13.1399

Standard Occupational Classification (SOC) Code: 11-9039

About the Program

The Advanced Teaching and Curriculum Certificate program (ATCC) meets the needs of in-service teachers in a variety of educational settings who seek advanced knowledge beyond that required for initial teacher certification in the areas of effective instruction, curriculum and assessment.

Upon completion of the ATCC, candidates will possess knowledge of the many facets of education.

- In-depth understanding of varying educational organizations and sectors
- Expertise in developing, analyzing, implementing and evaluating instructional strategies
- Ability to exhibit leadership

- Organizational, cross cultural, interpersonal, advocacy, and communication skills

In addition, the ATCC program will provide candidates opportunities to explore a variety of other roles in an educational setting including:

- Instructional leaders both in and beyond the classroom
- Researchers in local, state, national, or international organizations
- Professionals in foundations, associations, corporations, and private education institutions.

Program Requirements

EDUC 530	Advanced Techniques in Instruction & Assessment	3.0
EDUC 533	Designing Virtual Communities	3.0
EDUC 537	Learning Disabilities II	3.0
EDUC 608	The Intercultural Learner	3.0
EDUC 714	Instructional and Curriculum Leadership	3.0
EDUC 813	Educational Issues Seminar	3.0
Total Credits		18.0

Additional Information

The program is administered through Drexel University Online. For the most current admission information, please visit the Drexel University Online (<https://online.drexel.edu/online-degrees/education-degrees/cert-tlc/>) website.

Post-Master's Certificate in Applied Behavior Analysis

Certificate Level: Graduate

Admission Requirements: Master's degree in Education or Psychology

Certificate Type: Post-Master's

Number of Credits to Completion: 31.5

Instructional Delivery: Campus; Online

Calendar Type: Quarter

Expected Time to Completion: 9 to 15 months

Financial Aid Eligibility: Aid eligible

Classification of Instructional Programs (CIP) Code: 42.2814

Standard Occupational Classification (SOC) Code: 19-3031

About the Program

Behavior analysis is a widely accepted and validated scientific approach to the investigation and manipulation of the environmental arrangements that occasion behavior. Extensive research with proven methods and impressive findings has helped develop the technology now called applied behavior analysis. Behavior analytic clinical and research advances have led to significant contributions in educational programming, and mental health and behavioral health assessment and treatment approaches.

The post master's certificate in Applied Behavior Analysis will prepare clinical and educational leaders in the field of evidence-based approaches using behavior analytic principles and techniques. Graduates from this program will be highly successful candidates for institutions searching for knowledgeable and skilled behavior analysts serving in a variety of roles in behavior analytic settings. Interested students will also be prepared to transition to PhD programs in Applied Behavior Analysis and related fields.

Admission Requirements

Students applying to this program should have the following:

- Master's degree in psychology or education from a regionally accredited institution.
- Graduate GPA of 3.0 or higher.
- Completed graduate school application.
- Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended.
- Two letters of recommendation - professional or academic.
- An essay describing why the applicant is interested in pursuing graduate study in this field.
- An interview, in person or by phone, may be conducted by the admissions committee with those applicants who meet Graduate Admission's standard admissions criteria.

Program Requirements

Core Applied Behavior Analysis Courses

EDEX 630	Fundamental Elements of Behavior Change	4.5
EDEX 631	Measurement and Experimental Design	4.5
EDEX 632	Behavioral Assessment and Functional Analysis	4.5
EDEX 633	Behavioral Interventions	4.5
EDEX 634	Consultation, Systems Change and Supervision	4.5
EDEX 635	Ethical Considerations and Professional Conduct	4.5
EDEX 636	Applications of Fundamental Elements of Behavior Analysis	4.5
Total Credits		31.5

The Behavior Analyst Certification Board, Inc.® (<http://www.bacb.com/>) has approved the Core Applied Behavior Analysis course sequence as meeting the coursework requirements for eligibility to take the Board Certified Behavior Analyst Examination®. Applicants will have to meet additional requirements to qualify including a Master's degree from a regionally accredited institution in Applied Behavior Analysis, Education or Psychology.

Sample Plan of Study

Term 1		Credits
EDEX 630	Fundamental Elements of Behavior Change	4.5
EDEX 632	Behavioral Assessment and Functional Analysis	4.5
Term Credits		9.0
Term 2		Credits
EDEX 631	Measurement and Experimental Design	4.5
EDEX 633	Behavioral Interventions	4.5
Term Credits		9.0
Term 3		Credits
EDEX 634	Consultation, Systems Change and Supervision	4.5
EDEX 635	Ethical Considerations and Professional Conduct	4.5
Term Credits		9.0
Term 4		Credits
EDEX 636	Applications of Fundamental Elements of Behavior Analysis	4.5
Term Credits		4.5
Total Credit: 31.5

Certificate in Autism Spectrum Disorders

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 15.0

Instructional Delivery: Online, Campus

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 13.1013

Standard Occupational Classification (SOC) Code: 25-2059

About the Program

Within the past decade, the number of children diagnosed with an Autism Spectrum Disorder (ASD) has increased drastically. Consequently, the need for professionals trained in this specialized area has significantly increased. This course sequence is designed for those who seek additional expertise in this critical-need area. Students who complete the graduate-level Certificate in Autism Spectrum Disorders are equipped with the fundamental skills, knowledge, teaching methods, interventions, and supports needed to work with students with ASD who have varying profiles.

The program is a part-time graduate program consisting of 5 courses (15.0 credits). Teacher certification is not a requirement for admission to this program, however applicants are expected to have completed a bachelor's degree. Upon completion of the program, students with an active PA Instructional I or Instructional II teaching certificate are eligible for the Pennsylvania Department of Education Autism Spectrum Disorders Endorsement.

Admission Requirements

Students applying to this program should have the following:

- Bachelor's degree from a regionally accredited institution.
- Undergraduate GPA of 3.0 or higher (graduate GPAs will be considered along with the undergraduate GPA).
- Completed graduate school application.
- Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended.
- Two letters of recommendation - professional or academic.
- An essay describing why the applicant is interested in pursuing graduate study in this field.

Program Requirements

Introductory Course

EDEX 555	Teaching Students with Autism Spectrum Disorder	3.0
----------	---	-----

Core Courses

EDEX 556	Characteristics & Methods: Autism	3.0
EDEX 558	Characteristics & Methods: High Functioning Autism	3.0
EDEX 560	Communication & Language Interventions: Autism Spectrum Disorders	3.0
EDEX 562	Behavior & Sensory Support: Autism Spectrum Disorders	3.0

Total Credits		15.0
---------------	--	------

A field component is required in each course.

Sample Plan of Study

First Year

Term 1		Credits
EDEX 555	Teaching Students with Autism Spectrum Disorder	3.0
EDEX 556	Characteristics & Methods: Autism	3.0
EDEX 558	Characteristics & Methods: High Functioning Autism	3.0
Term Credits		9.0

Term 2

EDEX 560	Communication & Language Interventions: Autism Spectrum Disorders	3.0
EDEX 562	Behavior & Sensory Support: Autism Spectrum Disorders	3.0
Term Credits		6.0

Total Credit: 15.0

Certificate in Collaborative Special Education Law and Process

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 12.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 13.0402

Standard Occupational Classification (SOC) Code: 11-9039

About the Program

The Collaborative Special Education Law and Process Certificate prepares individuals to meet the unique learning needs of students with disabilities, through legally mandated school, home and community collaboration. Meeting the needs of children with disabilities through school-parent-community collaboration is the goal of educational policy in the United States.

A program goal is to more fully develop highly qualified special education teachers and administrators in schools and the community while offering special education collaborative knowledge and practical skills training to parents and advocates, whose cooperative partnership is imperative to support the provisions for the successful learning of all students as incorporated and mandated in NCLB and the IDEA 2004.

Achieving the program goal and objectives requires collaborative educators, advocates and service providers committed to meeting the learning needs of all students with disabilities. The Collaborative Special Education Law and Process Certificate will benefit participants by providing them with the specialized training necessary to be collaborative

partners in the complex process of implementing federal and state mandates to appropriately educate students with disabilities.

Admission Requirements

Applicants for the program follow the University standards for admissions to graduate study, i.e., possess an earned bachelor's degree from an accredited institution; an earned undergraduate GPA of 3.0 or higher (graduate degree GPA, if applicable, will be considered along with undergraduate GPA). In addition, the candidate will submit for consideration a completed graduate school application with official transcripts from all colleges or universities attended, two letters of recommendation and personal essay.

Requirements

EDEX 600	Family, School and Community Engagement in Special Education	3.0
EDEX 601	Special Education Advocacy	3.0
EDEX 602	Special Education Dispute Resolution and Skills Training	3.0
EDEX 710	School Law & Policy in Special Education	3.0
Total Credits		12.0

Certificate in Community College Administration and Leadership

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 18.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: Less than 2 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 13.0407

Standard Occupational Classification (SOC) Code: 11-9033

About the Program

The certificate in community college administration and leadership is an option for students and professionals who have already completed a bachelor's degree and would like to enhance their professional credentials without pursuing a master's degree.

Program Requirements

Required Courses

EDHE 500	Foundations of Higher Education	3.0
EDHE 530	Higher Education Law	3.0
ORGB 631	Leading Effective Organizations	3.0
Select three of the following:		9.0
EDHE 634	Proposal Writing & Sponsored Project Management	
EDHE 664	Strategies for Educational Success	
EDHE 668	Transformational Leadership	
EDHE 669	Diversity in Higher Education	
Total Credits		18.0

Additional Information

Certificate in Creativity and Innovation

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 18.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 13.9999

Standard Occupational Classification (SOC) Code: 11-9199

About the Program

The graduate-level certificate in Creativity & Innovation (C&I) is for those who do not wish to pursue a master's degree but who would value a credential that demonstrates their learning. It provides corporate and business leaders, employees, school leaders, teachers, higher education managers and leaders, a mastery of the certificate's contemporary, creativity content knowledge and coursework. It is essential in today's world of increasing complexity, change, and competition that all employees within an organization engage in creative problem solving and new idea generation to solve evolving issues that arise within the work setting. The skill sets to present their innovations to key decision makers within their schools/organizations for implementation is also required. By internalizing the spirit of creativity and the principles of creative problem solving, program participants are transformed into change leaders capable of overcoming the status quo to implement their creative ideas and innovations to inspire new directions and visions.

Upon completion of the certificate in C&I program, students will have formed an in-depth understanding of creativity, enhanced communication, creative problem solving, and how these new solutions and innovations may be applied to practical situations that enhance their workplace culture. Participants will use their newly enhanced creative-thinking skills to reflect critically on existing workplace practices and express coherent and cogent ideas and suggestions for continuous improvement within their workplaces.

Credits from the certificate program may be applied toward the MS in Creativity and Innovation (<http://www.drexel.com/online-degrees/business-degrees/ms-creativity-innovation/>) should a candidate decide to build upon the certificate credential within the allotted time in accordance with University policies.

Program Requirements

Requirements

CRTV 501	Foundations in Creativity	3.0
CRTV 502	Tools and Techniques in Creativity	3.0
CRTV 503	Creativity in the Workplace	3.0
CRTV 610	Creativity and Change Leadership	3.0
CRTV 620	Research Methods and Assessment of Creative and Innovative Thinking	3.0
CRTV 630	Global Perspectives on Creativity	3.0
Total Credits		18.0

Sample Plan of Study

Term		Credits	
Term 1	CRTV 501	Foundations in Creativity	3.0
	Term Credits		3.0
Term 2	CRTV 502	Tools and Techniques in Creativity	3.0
	CRTV 630	Global Perspectives on Creativity	3.0
	Term Credits		6.0

Certificate in E-Learning Leadership

Certificate Level: Graduate

Admission Requirements: Bachelor's

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 18.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 13.0501

Standard Occupational Classification (SOC) Code: 25-9011

NOTE: New students will not be admitted to this certificate program for the 2019-20 academic year. Please check back next year.

About the Program

The graduate certificate in E-Learning Leadership is designed to meet the needs of today's working professionals across many fields. As the demand for academic programs and courses to be delivered via e-learning continues to grow, the corresponding need for leadership in this important area increases. Similarly, corporations continue to seek leaders to oversee training and development initiatives via e-learning. This certificate provides, in a concentrated format, the most contemporary knowledge and skills needed in this important area for students who do not wish to pursue a master's degree but who would value a credential that demonstrates their learning.

Admission requires a bachelor's degree from an accredited institution and an undergraduate GPA of a 3.0 on a 4.0 scale. Credits from the certificate in e-learning leadership can be applied toward an MS in Learning Technologies (p. 348).

Objectives

Upon completion of the program, students will have formed an in-depth understanding of online and distance learning theories and will be able to answer the following questions:

- Which emerging technologies hold greatest promise for enriching learning experiences throughout the educational enterprise?
- What pedagogical strategies should designers embody in instructional materials, including those based on multimedia and those reflected in gaming environments?
- How should educators deploy, manage, and evaluate information and communication technologies in classrooms for optimal educational effects?
- What principles of design and practice should educators incorporate into distributed educational courses and programs?

To learn more, visit the Drexel University Online Graduate Certificate in E-Learning (<http://online.drexel.edu/online-degrees/business-degrees/cert-elearning/>) website.

Admission Requirements

Applicants for the program will follow the University standards for admission to graduate study. Prospective students must minimally have earned a bachelor's degree from an accredited institution and have an undergraduate GPA of 3.0 or higher to be considered for admission (graduate degree GPAs will be considered along with the undergraduate GPA).

In addition, prospective students are required to submit the following:

- Completed application form including official transcripts from all universities or colleges attended
- Two letters of recommendation
- Personal essay
- Resume
- Application fee (if applicable)

The applicant's potential to contribute to the overall quality of the program of study will also be considered. Decisions will be made using dates corresponding to the regular University schedule for rolling admissions in Graduate Admissions.

Program Requirements

Requirements		
ELL 501	The Purpose and Business of E-Learning	3.0
ELL 502	E-Learning Technologies	3.0
ELL 503	Teaching and Learning Issues in E-Learning	3.0
ELL 504	Learning Technologies & Disabilities	3.0
ELL 604	Design & Delivery of E-Learning I	3.0
ELL 605	Design & Delivery of E-Learning II	3.0
Total Credits		18.0

Additional Information

To learn more, visit the Drexel University Online Graduate Certificate in E-Learning (<http://online.drexel.edu/online-degrees/business-degrees/cert-elearning/>) website.

Certificate in Education Policy

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 18.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 13.0406

Standard Occupational Classification (SOC) Code: 11-9039

About the Program

The certificate in education policy examines the concept of policy as it relates to education and educational institutions and their governance and practices. Students will learn the factors involved in education policy-making, including the ethics in policy-making decisions, and the methods for analyzing phenomenon that impact education policy.

The program is designed to prepare educators of all types in the decision-making process of education policy development.

Program Requirements

Requirements

EDPO 620	Education Policy: Concepts, Issues, and Applications	3.0
EDPO 624	The Shaping of American Education Policy: Global Forces, Interest Groups, and Politics	3.0
EDPO 628	American Educational Policy and U.S. Competitiveness	3.0
EDPO 632	Ethics in Educational Policy Making	3.0
EDPO 636	Access & Equity in Educational Policy Making	3.0
EDPO 640	Educational Policy-Making Tactics & Influence	3.0
Total Credits		18.0

Additional Information

For additional information, visit Drexel University's Certificate in Education Policy (<https://drexel.edu/soe/academics/certificates/Educational-Policy/>) page.

Certificate in Instructional Design

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 27.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 13.0501

Standard Occupational Classification (SOC) Code: 25-9031

NOTE: New students will not be admitted to this certificate program for the 2019-20 academic year. Please check back next year.

About the Program

The Instructional Design Certificate prepares students to apply the principles, theories, models, tools, and techniques of systematic instructional design in diverse organizational settings. It is appropriate for students from varied professional backgrounds seeking careers that utilize the systematic design and development of effective instruction either in physical facilities, online, or blended environments. This includes individuals preparing to be professional instructional designers, teachers,

and other learning design professionals for PK-20 education, adult education, and workplace training. It specifically addresses the needs of the millennial learner and collaborative, networked communities. Students are encouraged to integrate their professional experiences and engage co-learners from other environments in their explorations.

The outcomes of candidates who successfully complete the Instructional Design Certificate will be able to:

- create effective learning artifacts using a variety of media and methods including social media via mobile devices;
- design an effective instructional development plan that meets the needs of various stakeholders;
- collaborate with and lead a team of talented contributors to create an instructional product resulting in an effective and efficient outcome;
- design and integrate virtual community processes into learning environments;
- design effective learning experiences for online and blended students using tools and methods specific to these environments;
- apply knowledge from the quickly evolving field of learning science to the design process;
- create effective technology-enhanced instruction that includes analysis, design, development, implementation and evaluation;
- recognize and adapt learning environments, tools, methods, and strategies to engage and optimize learning for disabled populations;
- negotiate an effective instructional design and development initiative that meets the needs of a real client; and
- plan, develop, evaluate, and manage the rapid design/development of effective instructional materials.

Admission Requirements

Applicants for the program will follow the University standards for admission to graduate study. Prospective students must minimally have earned a bachelor's degree from an accredited institution and have an undergraduate GPA of 3.0 or higher to be considered for admission (graduate degree GPAs will be considered along with the undergraduate GPA).

In addition, prospective students are required to submit the following:

- Completed application form including official transcripts from all universities or colleges attended
- Two letters of recommendation
- Personal essay
- Resume
- Application fee (if applicable)

The applicant's potential to contribute to the overall quality of the program of study will also be considered. Decisions will be made using dates corresponding to the regular University schedule for rolling admissions in Graduate Admissions.

Credits from the certificate in Instructional Design can be applied toward an MS in Learning Technologies.

Program Requirements

Degree Requirements

Required Core Courses:

EDLT 532	Designing Virtual Communities for Staff Development - Non-Field Experience	3.0
or EDLT 533	Designing Virtual Communities	

EDLT 536	Learning Sciences and Instructional Design	3.0
EDLT 550	Introduction to Instructional Design	3.0
EDLT 554	Learning with Social Media and Mobiles	3.0
EDLT 811	Designing and Developing Multimedia Applications For Learning	3.0
ELL 502	E-Learning Technologies	3.0
ELL 504	Learning Technologies & Disabilities	3.0
Required Capstone Courses:		
EDAM 728	Research Methodology for Action Research	3.0
EDAM 740	Action Research Project	3.0
Total Credits		27.0

Additional Information

For additional information about this program, please contact LearningTech@drexel.edu (learningtech@drexel.edu).

Instructional Technology Specialist Certificate

Certificate Level: Graduate
Admission Requirements: Bachelor's degree
Certificate Type: Post-Baccalaureate
Number of Credits to Completion: 27.0-33.0
Instructional Delivery: Online
Calendar Type: Quarter
Expected Time to Completion: 2 years
Financial Aid Eligibility: Aid eligible
Classification of Instructional Program (CIP) Code: 13.0501
Standard Occupational Classification (SOC) Code: 25-9031

About the Program

The Instructional Technology Specialist certificate program was designed to address the dramatically increasing need in public education for certified instructional technology specialists at every level of K-12 schooling.

Applicants for instructional technology specialist Certification should ideally possess valid Pennsylvania Instructional I or II Teaching Certification. Students working on their initial teaching certificate may be required to complete additional coursework. (Visit the School of Education (<http://www.drexel.edu/soe/>) for additional information.)

Minimum coursework requirements for the instructional technology specialist Certificate include 27.0 credits of specific pedagogy. The PA Certification requires a "B" or better in all certification coursework. If a student seeks the Instructional Technology Specialist PA Certification without a previous held teaching certificate, he or she will also be required to complete EDUC 522 and EDUC 525 .

Admission Requirements

Applicants for the program will follow the University standards for admission to graduate study. Prospective students must minimally have earned a bachelor's degree from an accredited institution and have an undergraduate GPA of 3.0 or higher to be considered for admission (graduate degree GPAs will be considered along with the undergraduate GPA).

In addition, prospective students are required to submit the following:

- Completed application form including official transcripts from all universities or colleges attended

- Two letters of recommendation
- Personal essay
- Resume
- Application fee (if applicable)

The applicant's potential to contribute to the overall quality of the program of study will also be considered. Decisions will be made using dates corresponding to the regular University schedule for rolling admissions in Graduate Admissions.

Program Requirements

Core Courses		
EDEX 542	Fundamentals of Special Education	3.0
EDEX 544	The Inclusive Classroom	3.0
EDEX 552	Integrating Technology for Learning & Achievement	3.0
EDLT 533	Designing Virtual Communities	3.0
EDLT 534	Developing Educational Leaders Using Technology	3.0
EDLT 535	Researching & Evaluating Instructional Technology	3.0
EDLT 544	Integrating Games & Pedagogical Content Knowledge	3.0
EDUC 565	Foundations in Instructing English Language Learners	3.0
ELL 504	Learning Technologies & Disabilities	3.0
Additional required courses for candidates without prior teacher certification:		0.0-6.0
EDLT 525	Design for Learning with Digital Media	
EDUC 522	Evaluation of Instruction	
Total Credits		27.0-33.0

Additional Information

For additional information about this program, please contact LearningTech@drexel.edu (learningtech@drexel.edu).

Certificate in Math Leadership & Coaching

Certificate Level: Graduate
Admission Requirements: Bachelor's degree
Certificate Type: Post-Baccalaureate
Number of Credits to Completion: 20.0
Instructional Delivery: Online, Campus
Calendar Type: Quarter
Expected Time to Completion: 1 year
Financial Aid Eligibility: Not aid eligible
Classification of Instructional Program (CIP) Code: 13.1311
Standard Occupational Classification (SOC) Code: 25-1022

About the Program

Building on the existing offerings of the Mathematics Learning and Teaching Program, this graduate certificate will enable current mathematics teachers and leaders to apply for State-Approved Endorsements in Mathematics Coaching. The program is designed to address the needs of math coaches and leaders for all levels of pre-K-12 education. However, the program's flexible design will allow for students to specialize in preK-12, pre-K-8 or 6-12 mathematics coaching and leadership through appropriate selection of Mathematics Education Core courses.

Mathematics Education Core Courses		
Select Two Courses:		6.0
MTED 500	Learning and Teaching Number and Operation	
MTED 501	Proportional and Algebraic Reasoning	
MTED 502	Geometry & Spatial Reasoning	

MTED 503	Data Analysis and Probabilistic & Statistical Reasoning	
MTED 511	Functions through the Curriculum	
Mathematics Coaching and Leadership Core Courses		
MTED 621	Collaborative Instructional Design & Analysis I	3.0
MTED 642	Mathematics Coaching and Leadership	3.0
MTED 643	Practicum in Mathematics Coaching and Leadership	2.0
MTED 651	Problem Solving Strategies	3.0
EDAM 524	Mentoring and Collaborative Leadership	3.0
Total Credits		20.0

Certificate in Mathematics Learning & Teaching

Certificate Level: Graduate

Admissions Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 15.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 13.1311

Standard Occupational Classification (SOC) Code: 25-1022

About the Program

The certificate in mathematics learning and teaching requires the completion of 15.0 credit hours of coursework and is designed to provide mathematics teachers with development opportunities for enhancing the quality of their instruction. Recognizing that many teachers pursue graduate studies while working full-time, the program has been designed such that it can be completed over five quarters (requiring only one course per quarter.) All courses in this program are in an online format.

Students in the certificate program take courses alongside those in the MS in Mathematics Learning & Teaching (p. 351). All of the certificate courses can be counted towards MS in Mathematics Learning & Teaching program. Additionally, certificate students may concurrently pursue the MS in Teaching, Learning and Curriculum (p. 359).

Program Requirements

Required Course

MTED 601	Diagnosing Student Mathematical Thinking	3.0
Select two of the following:		6.0
MTED 501	Proportional and Algebraic Reasoning	
MTED 502	Geometry & Spatial Reasoning	
MTED 503	Data Analysis and Probabilistic & Statistical Reasoning	
MTED 511	Functions through the Curriculum	
Students select 6.0 additional credits from any 600- 700 level MTED courses.		6.0
Total Credits		15.0

Certificate in Multisensory Reading Instruction Level 1

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 12.0

Instructional Delivery: Campus, Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 13.1315

Standard Occupational Classification (SOC) Code: 25-2022

About the Program

Students completing this certificate would be become eligible to be certified Wilson Language Level 1 instructors by the Wilson Language Corporation. (<http://www.wilsonlanguage.com/>)

The EDLS 621 course, *Multisensory Reading Instruction K/1*, will enable teachers to implement a tier 1 and tier 2 Response to Intervention reading program for all students in grades K-1. The two other courses, EDLS 622 *Basic Word Study I* and EDLS 623 *Basic Word Study II*, will inform and instruct students on how to teach phonetics, including the six syllable types and the rules of the English language. Three additional practicum courses are offered for students to practice the techniques and theories taught in the courses. The practicums involve tutoring a student for 60 hours.

Admission Requirements

- Bachelor's degree from a regionally accredited institution.
- Undergraduate GPA of 3.0 or higher (graduate GPAs will be considered along with the undergraduate GPA).
- Completed graduate school application.
- Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended.
- Two letters of recommendation - professional or academic.
- An essay describing why the applicant is interested in pursuing graduate study in this field.
- International Students must submit a TOEFL score indicating a minimum of 600 (paper exam) or 250 (CBT exam). For more information, view the International Students page.

Program Requirements

Required Courses

EDLS 620	Applied Methods in Multisensory Reading Instruction	1.0
EDLS 621	Multisensory Reading Instruction	2.0
EDLS 622	Basic Word Study I	3.0
EDLS 623	Basic Word Study II	3.0
EDLS 624	Multisensory Practicum I	1.0
EDLS 625	Multisensory Practicum II	1.0
EDLS 626	Multisensory Practicum III	1.0
Total Credits		12.0

School Principal Certificate

Certificate Level: Graduate

Admissions Requirements: Bachelor's

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 24.0

Instructional Delivery: Online
Calendar Type: Quarter
Expected Time to Completion: 1 year
Financial Aid Eligibility: Aid eligible
Classification of Instructional Program (CIP) Code: 13.0408 / 13.0409
Standard Occupational Classification (SOC) Code: 11-9032

About the Program

The School Principal Certificate program was designed to produce school leaders who are knowledgeable about current theories and strategies in leadership and change. Components of the program's conceptual bedrock are heuristic diagnostic learning, intelligent use of emotions in interpersonal skills of leadership, creative problem solving, and learning technologies.

Admission Requirements

Applicants come from a variety of undergraduate and graduate backgrounds and typically desire to provide leadership for change as a school principal. The School Principal Certification is available for teachers or counselors who already possess initial teaching or educational specialist certificates. Applicants must meet the general admissions requirements for graduate studies at Drexel University.

Program Requirements

Students will not be recommended for the School Principal Certificate until all course requirements are met, the initial teaching or educational specialist certificate has been received, submitted passing Praxis Exam scores, and three years of satisfactory professional school experience have been completed. Minimum coursework requirements for the School Principal Certificate include 24.0 credits of specific pedagogy as outlined below. Students must achieve the grade of B or better in each graduate-level course needed for certification.

Certification Courses		
EDAM 705	School Law and Politics	3.0
EDAM 708	Integration of Technology with School Instruction and Management	3.0
EDAM 710	School Finance and Facilities	3.0
EDAM 712	School and Community Partnerships and Relations	3.0
EDAM 714	Instructional and Curriculum Leadership	3.0
EDAM 715	School Principal Internship: Technology	1.5
EDAM 716	School Principal Internship: Finance	1.5
EDAM 717	School Principal Internship: Leadership	1.5
EDAM 718	School Principal Internship: Relations	1.5
EDCR 510	Leadership in Educational Contexts and Systems	3.0
Total Credits		24.0

Students working toward School Principal Certification engage in a corresponding 1.5-credit school-based internship when enrolled in EDAM 715, EDAM 716, EDAM 717, EDAM 718 related to each course's content.

Sample Plan of Study

Term	Credits
Term 1	
EDCR 510	Leadership in Educational Contexts and Systems 3.0
	Term Credits 3.0
Term 2	
EDAM 712	School and Community Partnerships and Relations 3.0
EDAM 718	School Principal Internship: Relations 1.5
	Term Credits 4.5

Term 3		
EDAM 714	Instructional and Curriculum Leadership	3.0
EDAM 717	School Principal Internship: Leadership	1.5
	Term Credits	4.5
Term 4		
EDAM 705	School Law and Politics	3.0
EDAM 708	Integration of Technology with School Instruction and Management	3.0
EDAM 715	School Principal Internship: Technology	1.5
	Term Credits	7.5
Term 5		
EDAM 710	School Finance and Facilities	3.0
EDAM 716	School Principal Internship: Finance	1.5
	Term Credits	4.5
Total Credit: 24.0		

Students who possess a valid state-issued teacher or educational specialist certification and have completed a minimum of three years of satisfactory professional school experience upon successful completion of these certification courses, and who also meet the current state minimum score on the appropriate Praxis Exam may apply for School Principal Certification.

Students can receive a Master of Science degree in Educational Administration while pursuing the School Principal Certification. For additional information, visit the Educational Administration (<http://catalog.drexel.edu/graduate/schoolofeducation/educationaladministration/>) catalog page.

Post-Bachelor's Teaching Certificate: Elementary Education

Certificate Level: Graduate
Admission Requirements: Bachelor's degree
Certificate Type: Post-Baccalaureate
Number of Credits to Completion: 42.0
Instructional Delivery: Campus, online
Calendar Type: Quarter
Expected Time to Completion: 2 years
Financial Aid Eligibility: Aid eligible
Classification of Instructional Program (CIP) Code: 13.1202
Standard Occupational Classification (SOC) Code: 25-2021

About the Program

This certificate program is designed for individuals who hold a bachelor's degree and who seek to qualify for Pennsylvania teacher certification at the elementary level (PreK - 4th grade). The curriculum is designed for those changing careers as well as those who already serve as temporary, emergency, or substitute teachers and wish to earn a formal teaching credential. Students completing the certification program have the option to continue coursework to earn their MS in Teaching, Learning & Curriculum degree. All graduate credits earned in this certificate program may be applied toward the Master's degree in Teaching, Learning and Curriculum (p. 359). The coursework in this program will prepare students for a Pennsylvania Instructional I Certificate.

For students intending to teach outside of Pennsylvania, through operation of interstate reciprocity agreements, a Pennsylvania teaching certificate may be converted to the analogous teaching certificate in another state. The School of Education recommends prospective students

contact their state's Department of Education to find out these transfer procedures before proceeding.

Certification Area

Successful completion of Drexel University's Pennsylvania Department of Education-approved programs will allow candidates to pursue Pennsylvania Instructional I certification in the area of Elementary Education (PreK-4).

Additional content area coursework (or equivalent) may be required and is determined by departmental review at the time of application.

Program Requirements

Early Childhood/Elementary (PreK-4) Certification

EDEX 542	Fundamentals of Special Education	3.0

Post-Bachelor's Teaching Certificate: Secondary Education

Certificate Level: Graduate
Admission Requirements: Bachelor's degree
Certificate Type: Post-Baccalaureate
Number of Credits to Completion: 30.0
Instructional Delivery: Online, Campus
Calendar Type: Quarter
Expected Time to Completion: 2 years
Financial Aid Eligibility: Aid eligible
Classification of Instructional Program (CIP) Code: 13.1205
Standard Occupational Classification (SOC) Code: 25-2031

About the Program

These certificate programs are designed for individuals who hold a bachelor's degree and who seek to qualify for Pennsylvania teacher certification at the secondary level. The curriculum is designed for those changing careers as well as those who already serve as temporary, emergency, or substitute teachers and wish to earn a formal teaching credential. Students completing the certification program have the option to continue coursework to earn MS in Teaching, Learning & Curriculum degree. All graduate credits earned in this certificate program may be applied toward the Master's degree in Teaching, Learning and Curriculum.

The program will prepare students for a Pennsylvania Instructional I Certificate. Students also have the option of earning the Graduate Intern Teaching Certificate during the course of the program. The PA Graduate Intern Teaching Certificate feature is only available to students who want to teach in Pennsylvania.

For students intending to teach outside of Pennsylvania, through operation of interstate reciprocity agreements, a Pennsylvania teaching certificate may be converted to the analogous teaching certificate in another state. The School recommends prospective students contact the state's Department of Education to find out these transfer procedures before proceeding.

Certification Areas

Drexel University's Pennsylvania Department of Education-approved programs certify students who already hold Bachelor's degrees to be teachers in Secondary Education (7-12):

- biology
- chemistry

- earth and space science
- English
- general science
- mathematics
- physics
- social studies

Additional undergraduate content courses may be required. Learn more about undergraduate content course requirements for secondary certification in each subject.

Special Education 7-12 Post-Bachelor's Certificate

Certificate Level: Graduate
Admission Requirements: Bachelor's degree
Certificate Type: Post-Baccalaureate
Number of Credits to Completion: 24.0
Instructional Delivery: Online, Campus
Calendar Type: Quarter
Expected Time to Completion: 3 years
Financial Aid Eligibility: Aid eligible
Classification of Instructional Program (CIP) Code: 13.1019
Standard Occupational Classification (SOC) Code: 25-2054

About the Program

The special education 7-12 certification program seeks to produce professionals who are equipped with the fundamental skills, knowledge, and competencies necessary to meet the needs of students at risk for school failure and students with disabilities in multiple settings.

This certificate program focuses on students at the secondary level. The special education 7-12 certification program is intended for those interested in gaining greater skills and expertise in the area of secondary special education and a teaching certificate in the area of secondary special education. Candidates seeking PA special education 7-12 certification must have an active PA Instructional I or Instructional II teaching certificate in a required area.

This program is a part-time graduate program consisting of 27.0 credits in core special education 7-12 certification courses. For students that have not completed the prerequisite courses, the program will require 36.0 credits; 27.0 credits in core special education 7-12 certification courses and 9.0 credits in prerequisite courses.

The program is designed for currently certified teachers who wish to obtain special education 7-12 certification in Pennsylvania. Out-of-state teachers may also earn their PA special education 7-12 certification if they transfer their current teacher certification to PA.

The courses cover all required state and federal regulations as well as the PA General Standards for Special Education and the standards outlined by the Council of Exceptional Children (CEC).

Admission Requirements

Students applying to this program should have the following:

- Bachelor's degree from a regionally accredited institution.
- Undergraduate GPA of 3.0 or higher (graduate GPAs will be considered along with the undergraduate GPA).
- Completed graduate school application.
- Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended.
- Two letters of recommendation - professional or academic.
- An essay describing why the applicant is interested in pursuing graduate study in this field.

Program Requirements

Pre-requisites for Special Education 7-12 Certification *

EDEX 542	Fundamentals of Special Education	
EDEX 544	The Inclusive Classroom	
EDEX 566	Literacy and Content Skill Development 7-12	
Required Courses: 7-12 Special Education Certification Concentration		
EDEX 538	Special Education Law and Processes 7-12	3.0
EDEX 543	Emotional and Behavioral Support of Individuals with Disabilities	3.0
EDEX 549	Teaching Individuals with High Incident Disabilities	3.0
EDEX 550	Teaching Individuals with Low Incident Disabilities	3.0
EDEX 552	Integrating Technology for Learning & Achievement	3.0
EDEX 555	Teaching Students with Autism Spectrum Disorder	3.0
EDEX 565	Teaching Secondary Mathematics in an Inclusive Environment	3.0
EDEX 577	Special Education Practicum 7-12	3.0
Total Credits		24.0

* 9.0 quarter credits total. All students entering this program from an approved PA certification program after 2011 should have had these three courses in their initial certification requirements. If a student does not have these courses, he or she must complete them with a minimum grade of "B" in addition to the required core certification courses.

A field component is required in most courses.

Graduate Intern Teaching Certificate

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 30.0 (secondary); 42.0 (Pre-K)

Instructional Delivery: Campus, Online

Calendar Type: Quarter

Expected Time to Completion: 1 - 3 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 13.1202; 13.1205

Standard Occupational Classification (SOC) Code: 25-2021; 25-2022; 25-2031

About the Program

Admission Requirements

Applicants for the Graduate Intern Teaching Certificate program must complete an interview with a teacher education advisor before completing a graduate application. During this interview the applicant's transcripts are evaluated in relation to Pennsylvania state standards for the specific certification area. If coursework is dated, a content exam or additional coursework may be required. Life experience that demonstrates knowledge of the content area will be considered. Additional coursework in the content area may be required to meet certification standards. In

addition, applicants must meet the general admission requirements for graduate studies at Drexel University.

Program Requirements

Graduate Intern Teaching Certificate applicants for secondary certification must have a bachelor's degree in an area related to that in which they intend to become certified. Before a candidate can move from a PA Intern Teaching Certificate to full certification, the PA Instructional I Teaching Certification, all coursework for the full teaching certificate must be met. Minimum coursework requirements for full teacher certification include 30.0 credits (grades 7-12 teacher certification areas), 33.0 credits (grades 4 - 8 teacher certification areas) and 42.0 credits (PreK-4 teacher certification) of pedagogy coursework. This coursework may be incorporated into the graduate Teaching, Learning and Curriculum master's degree program in the subject area of certification.

Drexel's PA Intern Certificate teachers may obtain a full-time teaching position after they have been recommended by the School of Education for the Pennsylvania Department of Education Intern Teaching Certificate. As candidate is required to be continually enrolled at Drexel once the non-renewable PA Intern Certificate is issued until the candidate is fully certified, and as the PA Intern Teaching Certificate is only valid for a maximum of three years, Drexel prefers to recommend candidates for the PA Intern Teaching Certificate after a school or school district has indicated to the candidate that they wish to hire the candidate without full teacher certification (PA Instructional I). Successful completion of the appropriate sections of the PECT/Praxis Series assessment through Educational Testing Service (ETS) for Grades 4 - 8 and grades 7-12 Certification areas or PECT exams through Pearson Education for PreK-4 Certification are also required to be recommended for a PA Intern Teaching Certificate. Drexel has final decision as to whether or not to recommend a candidate for a PA Intern Certificate regardless of a candidate's credentials.

In situations where a candidate is offered a teaching position prior to completing EDUC 540 Field Experience (the graduate version of student teaching), the Intern must register for EDUC 540 in the next available term. The PA Intern's classroom setting needs to be appropriate to the area being pursued for certification. A Drexel University Supervisor will be appointed and the Intern's first 12 weeks classroom teaching will serve as the Intern's student teaching placement.

It is strongly recommended that students admitted into the Drexel graduate program minimally and successfully complete EDUC 520 Professional Studies in Instruction, EDEX 542 Fundamentals of Special Education, the appropriate methods course, and EDUC 540 Field Experience prior to requesting a PA Intern Teaching Certificate. A grade of B or better is required in order for all Drexel pedagogy courses (EDUC and EDEX courses) to be considered successfully completed.

Completion of all required pedagogy coursework with at least a B in each and a B average in required content courses and passing the appropriate Pennsylvania state licensing exams will satisfy requirements for Pennsylvania Instructional I Certification.

Reading Specialist Certificate

Certificate Level: Graduate

Admissions Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 31.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 13.1315

Standard Occupational Classification (SOC) Code: 25-2022; 25-2031

About the Program

The Reading Specialist Certificate Program is designed for teachers who already possess an Instructional I certificate in PA or another State who has a desire to become literacy coach, a literacy program/curriculum consultant (for a school, literacy center, etc.), a reading intervention specialist, or to supplement existing knowledge/skills in developing expertise as a reading instructor. The program is designed for teachers who want to obtain another certification as a Reading Specialist. Students completing Drexel's Reading Specialist program would also become eligible to obtain the Wilson Language Instruction Level 1 by the Wilson Language Corporation. Through reciprocity agreements among the states, graduates can transfer their certification in almost any state across the United States.

Program Requirements

Reading Specialist Certificate Requirements:

EDLS 550	Theories of Reading and Writing	3.0
EDLS 555	Understanding Literacy through Sociocultural Perspectives	3.0
EDLS 560	Reading and Writing in the Content Areas (7-12)	3.0
EDLS 565	Constructing Meaning through Reading and Writing	3.0
EDLS 570	Literacy and Evaluation	3.0
EDLS 575	Responding to Children's and Young Adult Literature	3.0
EDLS 620	Applied Methods in Multisensory Reading Instruction	1.0
EDLS 622	Basic Word Study I	3.0
EDLS 623	Basic Word Study II	3.0
EDLS 624	Multisensory Practicum I	1.0
EDLS 625	Multisensory Practicum II	1.0
EDLS 626	Multisensory Practicum III	1.0
EDLS 650	Designing a Literacy Program	3.0
Total Credits		31.0

Post-Bachelor's Certificate in Special Education Leadership

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 25.0

Instructional Delivery: Online, Campus

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 13.0402

Standard Occupational Classification (SOC) Code: 11-9039

About the Program

The Post-Bachelor's Certificate in Special Education Leadership program is designed to produce educators who are equipped with the advanced skills, knowledge, and competencies necessary to lead programs that meet the needs of students at risk for and with disabilities in multiple settings.

The program requires 16.0 credits of special education leadership courses and 9.0 credits of leadership core courses (for a total of 25.0 credits).

The courses in the leadership core focus on areas of change, finance, evaluation and assessment, and technology. Students must complete all courses and meet the prerequisite standards established by the PA Dept of Education for recommendation for the PA Supervisor of Special Education certification.

Admission Requirements

Students applying to this program should have the following:

- Bachelor's degree from a regionally accredited institution.
- Undergraduate GPA of 3.0 or higher (graduate GPAs will be considered along with the undergraduate GPA).
- Completed graduate school application.
- Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended.
- Two letters of recommendation - professional or academic.
- An essay describing why the applicant is interested in pursuing graduate study in this field.

Program Requirements

Leadership Core Courses

EDAM 708	Integration of Technology with School Instruction and Management	3.0
EDAM 710	School Finance and Facilities	3.0
EDAM 722	Evaluation & Assessment Competencies	3.0
Special Education Leadership Concentration Courses		
EDEX 710	School Law & Policy in Special Education	3.0
EDEX 712	Instructional & Curriculum Leadership in Special Education	3.0
EDEX 714	Development, Supervision, & Support: Special Education Leadership	3.0
EDEX 716	Organization & Administration of Special Education	3.0
EDEX 721	Supervisor of Special Education Internship: Special Education Leadership	1.0
EDEX 722	Supervisor of Special Education Internship: Instructional Leadership	1.0
EDEX 723	Supervisor of Special Education Internship: Collaboration & Personnel	1.0
EDEX 724	Supervisor of Special Education Internship: Finance & Management	1.0
Total Credits		25.0

Special Education PreK-8 Post-Bachelor's Certificate

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 24.0

Instructional Delivery: Online; Campus

Calendar Type: Quarter

Expected Time to Completion: 2 years

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 13.1017

Standard Occupational Classification (SOC) Code: 25-2052

About the Program

The special education PreK-8 certification program seeks to produce professionals who are equipped with the fundamental skills, knowledge, and competencies necessary to meet the needs of students at risk for school failure and students with disabilities in multiple settings.

This certificate program focuses on students from the prekindergarten to middle school levels. The special education PreK-8 certification program is intended for those interested in gaining greater skills and expertise in the area of PreK-8 special education and a teaching certificate in the area of PreK-8 special education. Candidates seeking PA special education PreK-8 certification must have an active PA Instructional I or Instructional II teaching certificate in a required area.

This program is a part-time graduate program consisting of 24.0 credits in core special education PreK-8 certification courses. For students that have not completed the prerequisite courses, the program will require 33.0 credits: 24.0 credits in core special education PreK-8 certification courses and 9.0 credits in prerequisite courses.

The program is designed for currently certified teachers who wish to obtain special education PreK-8 certification in Pennsylvania. Out of state teachers may also earn their PA special education PreK-8 certification if they transfer their current teacher certification to PA.

The courses cover all required state and federal regulations as well as the PA General Standards for Special Education and the standards outlined by the Council of Exceptional Children (CEC).

Admission Requirements

Students applying to this program should have the following:

- Bachelor's degree from a regionally accredited institution.
- Undergraduate GPA of 3.0 or higher (graduate GPAs will be considered along with the undergraduate GPA).
- Completed graduate school application.
- Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended.
- Two letters of recommendation - professional or academic.
- An essay describing why the applicant is interested in pursuing graduate study in this field.

Program Requirements

Pre-requisites for Certification in Special Education (PreK-8)

Students must have completed the following courses in order to apply for a Pennsylvania Special Education PreK-8 certification. All students entering the post-bachelor's certificate program after 2011 should have had these core courses in their initial certification program. If a student has not completed the following three courses, they should be taken to apply for special education certification:

EDEX 542	Fundamentals of Special Education	3.0
EDEX 544	The Inclusive Classroom	3.0
EDEX 546	Literacy and Content Skill Development PreK-8	3.0

Core Certification Courses

EDEX 537	Special Education Law and Processes PreK-8	3.0
EDEX 543	Emotional and Behavioral Support of Individuals with Disabilities	3.0
EDEX 545	Teaching STEAM in an Inclusive Pre-K to 8 Environment	3.0
EDEX 549	Teaching Individuals with High Incident Disabilities	3.0

EDEX 550	Teaching Individuals with Low Incident Disabilities	3.0
EDEX 552	Integrating Technology for Learning & Achievement	3.0
EDEX 555	Teaching Students with Autism Spectrum Disorder	3.0
EDEX 576	Special Education Practicum PreK-8	3.0
Total Credits		24.0

A field component is required in most courses.

Sample Plan of Study

First Year

Term 1		Credits
EDEX 537	Special Education Law and Processes PreK-8	3.0
EDEX 549	Teaching Individuals with High Incident Disabilities	3.0
Term Credits		6.0

Term 2

EDEX 550	Teaching Individuals with Low Incident Disabilities	3.0
EDEX 555	Teaching Students with Autism Spectrum Disorder	3.0
Term Credits		6.0

Term 3

EDEX 552	Integrating Technology for Learning & Achievement	3.0
EDEX 576	Special Education Practicum PreK-8	3.0
Term Credits		6.0

Second Year

Term 1

EDEX 543	Emotional and Behavioral Support of Individuals with Disabilities	3.0
EDEX 545	Teaching STEAM in an Inclusive Pre-K to 8 Environment	3.0
Term Credits		6.0

Total Credit: 24.0

STEM Education Certificate

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 12.0

Instructional Delivery: Online, Campus

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 13.1316

Standard Occupational Classification (SOC) Code: 25-2022; 25-2031

About the Program

The Certificate in STEM embraces the School of Education's and Universities focus on STEM education. The program creates an opportunity for those individuals who want to gain further understanding of STEM and provides the comprehensive education needed to effectively teach STEM concepts, as well as integrates strategies within the curriculum to effectively enhance student performance in STEM areas. The primary goal for the certificate in STEM Education is to broaden and deepen students' understanding of STEM education.

Admission Requirements

- Bachelor's degree from a regionally accredited institution
- Two letters of recommendation
- Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended
- Completed Application Form
- Undergraduate GPA of 3.0 or higher (graduate GPAs will be considered along with the undergraduate GPA)
- An essay describing why you are interested in pursuing graduate study in this field
- International Students must submit a TOEFL score indicating a minimum of 600 (paper exam) or 250 (CBT exam).

Program Requirements

Required Courses

EDUC 840	Theories of Individual Cognition in STEM Education	3.0
EDUC 842	Social Foundation and Group Cognition in STEM Education	3.0
EDUC 844	Creativity and Innovation in STEM Education	3.0
Capstone Course (select one)		3.0
EDUC 514	Science Teaching Methods	
MTED 519	Teaching Secondary Mathematics	
Total Credits		12.0

Certificate in Student Development and Affairs

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 18.0

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: Less than 2 years

Financial Aid Eligibility: Not aid eligible

Classification of Instructional Program (CIP) Code: 13.0406

Standard Occupational Classification (SOC) Code: 11-9033

About the Program

The certificate in student development and affairs is an option for students and professionals who have already completed a bachelor's degree and would like to enhance their professional credentials without pursuing a master's degree.

Program Requirements

Required Courses

EDHE 500	Foundations of Higher Education	3.0
EDHE 520	Student Development & Customer Service Management	3.0
EDHE 530	Higher Education Law	3.0
Select three of the following:		9.0
EDHE 652	Enrollment Marketing, Recruitment & Retention	
EDHE 662	Critical Issues in Student Affairs	
EDHE 663	Safety and Crisis Management	
EDHE 669	Diversity in Higher Education	
Total Credits		18.0

Additional Information

For additional information, visit Drexel University's Certificate in Student Development and Affairs (<http://www.drexel.edu/soe/academics/certificates/Student-Development-and-Affairs/>) page or contact he@drexel.edu.

Teaching English as a Second Language

Certificate Level: Graduate

Admission Requirements: Bachelor's degree

Certificate Type: Post-Baccalaureate

Number of Credits to Completion: 13.5

Instructional Delivery: Online

Calendar Type: Quarter

Expected Time to Completion: 1 year

Financial Aid Eligibility: Aid eligible

Classification of Instructional Program (CIP) Code: 13.1401

Standard Occupational Classification (SOC) Code: 25-2031

About the Program

Teaching English as a second language certification is an add-on certificate available to candidates that currently possess a Pennsylvania Instructional I or Instructional II teaching certificate. The 13.5 credit ESL certificate program covers the theory and practice of second language education, the structure and sound of English, the design and assessment of ESL course materials, as well as broader issues in intercultural learning. Completion of the program also includes field-based experiences and a capstone action research project, under the guidance of an ESL Program Specialist. It does not require that the instructor speak another language. Credits earned through this program may be applied toward the MS in Teaching, Learning and Curriculum (p. 359) initial certification or advanced track programs. All candidates are also required to complete field experiences ranging from 10 hours to 30 hours per course.

This program satisfies PA State of Education requirements for Program Specialist: ESL endorsement. Interstate agreements generally allow applicability across the US. However, prospective candidates outside of Pennsylvania are advised to check with their state authorities to determine whether this program is appropriate for their case.

Program Requirements

The Dornsife School of Public Health

About the School

The Dornsife School of Public Health (<http://drexel.edu/dornsife/>) at Drexel University provides education, conducts research, and partners with communities and organizations to improve the health of populations.

Founded on the principle of health as a human right, our school is especially committed to improving health in cities, eliminating health disparities, and promoting health in all policies.

Key to the school's mission is active engagement with the world of public health practice, with communities, and with a range of policies and sectors within and outside the health care system relevant to health.

School educational programs combine rigorous training with hands-on practical experiences. Students benefit from engagement with a broad set of community partnerships and research collaborations. Graduates acquire the knowledge, skills and perspective necessary to make a difference in the health of communities in the United States and worldwide.

Dornsife School of Public Health Faculty

Joseph Amon, PhD, MSPH (*Uniformed Services University of the Health Sciences*) *Director of the Office of Global Health*. Clinical Professor. Department of Community Health and Prevention. Global health; health and human rights; political epidemiology; ethics; mixed methods; health policy and advocacy; HIV/TB; monitoring and evaluation.

Amy Auchincloss, PhD, MPH (*University of Michigan*). Associate Professor. Department of Epidemiology and Biostatistics. Environmental determinants of health and the health effects of air pollution; contribution of resources in residential environments to health behaviors, obesity, diabetes and cardiovascular disease; the use of spatial analysis methods and agent-based mode

Sharrelle Barber, ScD, MPH (*Harvard University*). Assistant Research Professor. Department of Epidemiology and Biostatistics. Racism and health inequities, social epidemiology cardiovascular disease epidemiology, urban health, global health.

Scarlett Bellamy, ScD (*Harvard University*). Professor. Department of Epidemiology and Biostatistics. Clinical Trials Data Analysis Methods Health Disparities Infectious Disease Mental health and Behavioral health Reproductive or Sexual Health.

Zekarias Berhane, PhD (*University of Pittsburgh*). Assistant Research Professor. Department of Epidemiology and Biostatistics. Modeling time-to-event data with single and multiple outcomes, mixed effect models and regression diagnostics.

Usama Bilal, PhD, MPH, MD (*Johns Hopkins University*). Assistant Professor. Department of Epidemiology and Biostatistics. Urban health; macrosocial determinants of chronic diseases; health inequalities; food environments and nutrition; epidemiologic methods.

Sandra Bloom, MD (*Temple University School of Medicine*). Associate Professor. Department of Health Management and Policy. Psychological trauma and organizational stress.

Sherry Brandt-Rauf, MPhil, JD (*Columbia University*). Associate Teaching Professor. Department of Environmental and Occupational Health. Health policy, occupational health, environmental exposures, health disparities, public health law.

Jennifer Breaux, DrPh, MPH, CHES (*Drexel University*) *Director of Undergraduate Education*. Assistant Professor. Department of Community Health and Prevention. Maternal and child health, community health, human rights.

Darryl Brown, PhD (*Johns Hopkins University*) *Director of HMP Doctoral Programs*. Assistant Teaching Professor. Department of Health Management and Policy. Health services research and planning; health inequality, patient reported outcomes, applied health economics.

James W. Buehler, MD (*University of California, San Francisco*) *Director, MPH Program*. Clinical Professor. Department of Health Management and Policy. Public health capacity and practice, public health and healthcare interface, urban health.

Igor Burstyn, PhD (*Utrecht University*). Associate Professor. Department of Environmental and Occupational Health. Occupational and environmental epidemiology, industrial hygiene, endocrine disruptors, environmental exposures, biomarkers, air quality, gene-environmental

interaction, maternal and child health, Bayesian statistics, statistical modeling, etiology of autism.

Amy Carroll-Scott, PhD, MPH (*University of California at Los Angeles*). Assistant Professor. Department of Community Health and Prevention. The social and contextual determinants of persistent health disparities and the application of social science and community-based participatory research methods to understanding and eliminating such disparities.

Esther Chernak, MD, MPH, FACP (*UMDNJ-Robert Wood Johnson Medical School*) *Director of the Center for Public Health Readiness and Communication; Director of Joint Degree Programs*. Associate Clinical Professor. Department of Environmental and Occupational Health. Drexel University College of Medicine; Infectious diseases, public health emergency preparedness, medicine and public health, public health practice, crisis and emergency risk communication.

Mariana Chilton, PhD, MPH (*University of Pennsylvania*) *Director, Center for Hunger-Free Communities*. Professor. Department of Health Management and Policy. Nutrition, housing and health; chronic diseases; human rights, chronic diseases, community health, human rights and hunger.

Jane Clougherty, MSc, ScD (*Harvard University*). Associate Professor. Department of Environmental and Occupational Health. Social susceptibility to environmental pollutants; air pollution exposure science; community violence; urban health.

AnneClaire De Roos, PhD, MPH (*University of North Carolina at Chapel Hill*). Associate Professor. Department of Environmental and Occupational Health. Environmental and occupational epidemiology, pesticides, persistent pollutants, drinking water quality, greenspace in cities, extreme weather risk assessment.

Ana Diez Roux, MD, PhD, MPH (*Johns Hopkins University*) *Dean, Dornsife School of Public Health*. Distinguished Professor. Department of Epidemiology and Biostatistics. Social determinants of health; neighborhoods and health; psychosocial factors; air pollution, cardiovascular disease epidemiology; multilevel and systems methods; urban health and health in Latin America.

Nancy Epstein, MPH, MAHL (*University of North Carolina at Chapel Hill*). Professor. Department of Community Health and Prevention. Community organizing and community engagement strategies; arts and community health; religion, spirituality and health; health policy and advocacy; organizational and group dynamics; behavioral health; oral health; evaluation of community health programs.

Alison A. Evans, ScD (*Harvard University*). Associate Professor. Department of Epidemiology and Biostatistics. Epidemiology of infectious diseases and cancer; cohort studies; minority and immigrant health; chronic viral infections; hepatitis b; elimination of viral hepatitis; immunization; perinatal transmission.

Alex Ezeh, PhD (*University of Pennsylvania*). Dornsife Professor. Department of Community Health and Prevention. Global/International Health; Reproductive and Sexual Health; Urban Health.

Jerry Fagliano, MPH, PhD (*Johns Hopkins University*) *Chair*. Associate Clinical Professor. Department of Environmental and Occupational Health. Children's health and environmental exposures; health impacts of climate change; inequities in environmental exposure and disease; spatial distribution and clustering of disease.

Robert I. Field, PhD, JD, MPH (*Columbia University*) *Director of the JD-Master of Public Health Program*. Professor. Department of Health Management and Policy. Health law; public health law; health system structure; ethics of vaccines; public policy and legal aspects of health reform; genetic privacy.

Janet Fleetwood, PhD (*University of Southern California*). Professor. Department of Community Health and Prevention. Bioethics, Strategic Planning, Social Justice & Equity.

Arthur L. Frank, MD, PhD (*Mount Sinai School of Medicine*) *Chair Emeritus*. Professor. Department of Environmental and Occupational Health. Environmental and occupational health, agricultural safety and health, pneumoconiosis, occupational toxicology, environmental pollution.

Dennis Gallagher, MA, MPA (*University of Pittsburgh*). Associate Teaching Professor. Department of Health Management and Policy. Health department structure and financing; health policy and law; Medicare/Medicaid and public health infrastructure.

Marla Gold, MD (*New Jersey Medical School*) *Dean Emerita*. Professor. Department of Health Management and Policy. Design of HIV/AIDS care systems, treatment protocols, resource utilization, and epidemiology; CQI, managed care and systems of health care, health administration, behavioral health care and substance abuse treatment systems.

Neil Goldstein, PhD, MBI (*Drexel University*). Assistant Research Professor. Department of Epidemiology and Biostatistics. Data Analysis Methods, eHealth or mHealth, Infectious Disease, Maternal and Child Health, Reproductive or Sexual health, Spatial Analysis or GIS, Statistical Modeling, Vaccines and vaccinations, Electronic medical records/informatics, Translational epidemiology.

Edward J. Gracely, PhD (*Temple University*) *Joint Appointment in Drexel University College of Medicine*. Associate Professor. Department of Epidemiology and Biostatistics. Statistics, experimental design/research methods and statistical analysis, clinical trials.

Ali Groves, PhD, MHS (*University of North Carolina*). Assistant Professor. Department of Community Health and Prevention. Reproductive or sexual health; maternal and child health; global health; data analysis methods.

Irene Headen, PhD (*University of California, Berkeley*). Assistant Professor. Community Engaged Research, Health Disparities Health and Place, Maternal and Child Health Mixed Methods Research, Social Determinants of Racial/Ethnic Inequities in Maternal Health, Spatial Analysis or GIS, Urban Health

Tom Hipper, MSPH, MA (*Johns Hopkins Bloomberg School of Public Health*). Assistant Professor. Department of Environmental and Occupational Health. Crisis and risk communication in public health; mental health of first responders

Jana Hirsch, MES, PhD (*University of Michigan*). Assistant Research Professor. Department of Epidemiology and Biostatistics. Health and place, built environment, health disparities, behavioral health, spatial analysis, GIS, urban health, physical activity, active aging and age-friendly neighborhoods, gentrification, neighborhood change.

Mary E. Hovinga, PhD, MPH (*University of Michigan*). Associate Professor. Department of Epidemiology and Biostatistics. Cancer, cognitive disabilities; PCBs and DDT, lead exposure; neurological disorders, environmental hazards, epidemiologic study design.

Tran Huynh, PhD, MPH, CIH (*University of Minnesota*). Assistant Professor. Department of Environmental and Occupational Health. Industrial hygiene, immigrant health, occupational health, occupational exposure assessment and epidemiology, occupational health disparities, nail salons.

Jessie Kemmick Pintor, PhD, MPH (*University of Minnesota*). Assistant Professor. Department of Health Management and Policy. Community based participatory research; immigrant health; health disparities; health services research; health policy; maternal & child health; mixed methods; immigration policy.

Ann Klassen, PhD (*Johns Hopkins University*). Professor. Department of Community Health and Prevention. Cancer and chronic disease disparities, urban health, minority, immigrant and global health, tobacco control, nutrition, health communication, qualitative and mixed methods, place-based and spatial analysis.

Jennifer Kolker, MPH (*University of Michigan*) *Associate Dean for Public Health Practice; Director of Executive MPH Program*. Associate Clinical Professor. Department of Health Management and Policy. Public health policy and practice, workforce training, safety net programs, urban health issues; health department infrastructure and financing.

Shiriki Kumanyika, PhD, MS, MPH (*Cornell University*). Research Professor. Department of Community Health and Prevention. Solutions to obesity and diet-related diseases in black children and adults, Ethnic disparities in obesity in the US and other high-income countries, "Culture of health" approaches in black communities, Assessment of food environments, Environmental influences on lifestyle changes, Targeted marketing of unhealthy foods and beverages, Food and nutrition policy, Evidence-based public health, Social determinants of health and health equity, Systems science applications in public health.

Brent Langellier, PhD, MA (*University of California, Los Angeles*). Assistant Professor. Department of Health Management and Policy. Health and health care disparities, Latino health, complex systems, quantitative methods, GIS.

Stephen E. Lankenau, PhD (*University of Maryland*) *Associate Dean for Research*. Professor. Department of Community Health and Prevention. HIV/AIDS, overdose prevention, prescription drug misuse, medical marijuana, injection drug use, high risk youth, homelessness.

Felice Le-Scherban, PhD, MPH (*University of Michigan*). Assistant Professor. Department of Epidemiology and Biostatistics. Life course approaches to socioeconomic, racial, and ethnic health disparities; social determinants of health among immigrants; causal links between education and health; analytic methods in social epidemiology.
