About Drexel University

Mission Statement

Drexel University fulfills our founder's vision of preparing each new generation of students for productive professional and civic lives while also focusing our collective expertise on solving society's greatest problems. Drexel is an academically comprehensive and globally engaged urban research university dedicated to advancing knowledge and society and to providing every student with a valuable, rigorous, experiential, technology-infused education, enriched by the nation's premier co-operative education program.

Vision

Drexel will be the Philadelphia region's leading university excelling in high-quality experiential education, online learning, technology transfer and business incubation, translational research, and urban revitalization. Drexel will use and leverage all its assets - outstanding faculty, highly motivated students, over 150,000 alumni world-wide, a pragmatic and entrepreneurial culture, co-operative education, Drexel University Online, and our superior location as a major transportation hub - to create an accessible, relevant and market-leading educational research platform that benefits our diverse community of students, advances our scholarly work, and champions economic development in our region. Drexel will join the ranks of the most impactful and competitive universities in the United States at a time when the nation is clamoring for educational value, jobs, and new ideas for bolstering our economy.

A Brief History of Drexel University

In founding the institution that would become Drexel University, Philadelphia financier and philanthropist Anthony J. Drexel launched a tradition of innovation. Mr. Drexel envisioned an institution of higher learning uniquely suited to the needs of a rapidly growing industrial society and the young women and men seeking their place in it - core values that continue to guide the University in its modern era. Mr. Drexel's vision was realized in 1891 with the establishment of the Drexel Institute of Art, Science and Industry. Originally a non-degree-granting institution, Drexel began conferring bachelor of science degree in 1914, when its 18 departments were organized into four schools. In 1927, the Commonwealth of Pennsylvania granted Drexel the privilege to confer the master of science degree, and in 1965, the doctor of philosophy degree.

The cornerstone of Drexel's career preparation model has been its cooperative education (co-op) program. Introduced in 1919 as one of the first models of its kind, co-op is integral to the University's educational experience. Through co-op, students alternate periods of study with periods of full-time professional employment, providing unrivaled, valuable professional experience.

The institution's curriculum and organization of its academic programs have evolved to include 15 colleges and schools. Through its evolution, Drexel has undergone two changes in name - in 1936 becoming the Drexel Institute of Technology, and in 1970, Drexel University. The current title reflects the institution's commitment to research as well as the breadth of its academic programs.

Drexel's mission, services and opportunities expanded further in 2002 when MCP Hahnemann University, a major Philadelphia health sciences institution, merged with Drexel University with the addition of the College of Medicine (http://archives.drexelmed.edu/history.php), the College of

Nursing and Health Professions, and the recently named Dornsife School of Public Health. In 2001, the University established an affiliation with one of Philadelphia's most storied institutions, the Academy of National Sciences, now the Academy of Natural Sciences of Drexel University (http://www.ansp.org/about/academy-history/). These historic events extended the resources of Drexel have led to many productive synergies in teaching and research.

Drexel's foundation as an innovating institution established the university as a national leader in higher education. In 1983, Drexel became the nation's first university to require all undergraduates to have personal access to a microcomputer for use in all their coursework. The university continued its commitment to integrating technology when it became the first university to operate a fully wireless campus in 2000. In 2006, Drexel became the first major research university to open a new law school in 25 years. The Thomas R. Kline School of Law is one of only two US university law schools that follows a cooperative education model of learning.

Throughout its evolution to a comprehensive urban research university, Drexel's core mission has held constant. Since its founding, the institution has remained a privately controlled, nonsectarian, coeducational center of higher learning, distinguished by a commitment to preparing women and men for success in their chosen careers incorporating experiential learning and celebrating diversity. Its greatly expanded enrollment, campuses, and curricula reflect a history of responsiveness to societal and individual needs - all of which Mr. Drexel sought to address in his day and going forward through his charge "change."

Drexel University Today

Today, over 25,000 students are enrolled in over 100 undergraduate programs and over 190 graduate programs across 16 colleges, schools, and centers:

- Close School of Entrepreneurship (http://drexel.edu/close/)
- College of Arts and Sciences (http://drexel.edu/coas/)
- College of Computing & Informatics (http://drexel.edu/cci/)
- College of Engineering (https://drexel.edu/engineering/)
- College of Medicine: School of Biomedical Sciences and Professional Studies (https://drexel.edu/medicine/academics/graduate-school/)
- College of Nursing and Health Professions (https://drexel.edu/cnhp/)
- Dornsife School of Public Health (http://drexel.edu/dornsife/)
- Drexel College of Medicine (http://drexel.edu/medicine/)
- Goodwin College of Professional Studies (http://drexel.edu/goodwin/)
- LeBow College of Business (http://www.lebow.drexel.edu/)
- LeBow College of Business: School of Economics (http://www.lebow.drexel.edu/faculty-and-research/disciplines/economics/)
- Pennoni Honors College (https://drexel.edu/biomed/)
- School of Biomedical Engineering, Science, and Health Systems (http://www.biomed.drexel.edu/)
- School of Education (http://drexel.edu/soe/)
- Thomas R. Kline School of Law (http://www.drexel.edu/law/)
- Westphal College of Media Arts and Design (http://www.drexel.edu/westphal/)

Drexel Co-op

Drexel University has been a pioneer in cooperative education since 1919 — operating one of the largest cooperative education programs in the nation. Undergraduates alternate on-campus study with full-time

employment in fields related to their academic interests. More than 1,600 employer organizations in business, government, health care and education participate at locations in more than 30 states and 45 countries. The Steinbright Career Development Center (http://drexel.edu/scdc/) (Steinbright) works to ensure that students and alumni get the most from their experiential and career education activities.

Technology

Technology is integrated into every aspect of the Drexel educational experience, marking the university as a leader in educational innovation.

Drexel made history in 1983 when it became the first university to mandate that all students must have personal access to a microcomputer. This tradition of leadership in integrating state-of-the-art technologies into a Drexel education continued when Drexel, in early 1998, inaugurated the first totally wireless library in the nation. In 2000, Drexel again made history by becoming the nation's first major university to offer completely wireless Internet access across the entire campus.

A pioneer in online learning, Drexel offers distance education programs leading to certificates and degrees in areas including engineering management, business administration, information systems and library and information science. Drexel University Online has over 7,500 unique students from all 50 states and more than 20 countries pursuing one of more than 130 graduate and undergraduate degree and certificate programs. Over all, there are more than 13,000 Drexel University students taking at least one course online.

Drexel is widely recognized for excellence in technology-based, experiential learning and was ranked in the top third in the 2019 edition of *U.S.News & World Report's* "Best National Universities," coming in at 102nd out of 312.

Location

Drexel's 74-acre University City Main Campus is located in the vibrant University City district of Philadelphia, Pennsylvania. Drexel makes full use of its metropolitan setting by integrating Philadelphia and its resources into the classroom, co-op/internship experience, and student life, making it a model for other urban universities. The main campus is a 10-minute walk from Center City, the core of Philadelphia's commercial and business district.

Drexel teaches at two additional Philadelphia campuses: the Center City Campus houses the College of Nursing and Health Professions and the Queen Lane Medical Campus in East Falls houses the College of Medicine. The Law School also operates the Kline Institute of Trial Advocacy in Center City.

Programs of note

Civic Engagement
Civic engagement, participation in the public life of the community, is important to the Drexel University's strategic plan. Civic engagement can take many forms from volunteerism doing community service to electoral participation and advocacy.

Drexel University's Lindy Center for Civic Engagement (http://www.drexel.edu/lindycenter/) fosters a culture of civic responsibility by providing programs and resources that empower Drexel students and the broader university community to expand their civic identities through engagement in mutually beneficial partnerships that lead to a more just society.

The Lindy Center for Civic Engagement focuses on four core priorities including: Community-Based Learning, Civic Leadership, Public Service, and Community Partnerships.

Honors Program
The Pennoni College offers several academic options for its students. These opportunities are designed to be intensive, and are taught by faculty members who understand and accommodate Honors students' abilities and aspirations.

The Honors Program offers several academic options for its students. These opportunities are designed to be intensive, and are taught by faculty members who understand and accommodate Honors students' abilities and aspirations.
These options include:

- **Honors Colloquia**: These interdisciplinary courses introduce students to topics not typically covered elsewhere. These courses are small, discussion-based, seminar style classes. Past Honors Colloquia topics include: The Hidden God in Cinema; Theory of Special Relativity; The Graphic Novel; Torture and Terrorism, and many others.
- **Honors-Section Courses**: These courses fulfill traditional major requirements but offer Honors credit. While the subject remains the same, the classes are taught to smaller groups, consisting entirely of Honors students, and on an advanced level that encourages discussion and practical application. Honors-section courses include, among other subjects, physics, English, business, general psychology, chemistry, and biology.
- **Honors Options**: With permission from their instructors and approval from the Honors Program, Honors students may elect to enhance non-honors courses to yield honors credit. The student and faculty member conducting may agree on the specific terms before the course begins and jointly submit a proposal to the Honors Program.
- **Independent Study**: Honors students frequently come across topics in their general coursework that they would like to investigate in greater detail. To accommodate this, the Honors College encourages students to study and research a topic of their choosing with guidance from a faculty member.

The Symposium
The Symposium (https://drexel.edu/pennoni/custom-designed-major/the-symposium/) is an interdisciplinary, project-based course series exploring subjects of the broadest possible interest and greatest societal impact. Through intensive examination of a different major these every year, it brings Drexel University students, teachers, and visiting expert lecturers into collaboration. The Symposium strives to avoid the "textbook approach," with an emphasis on developing in students the active skills of interdisciplinary inquiry: reading, writing, critical thinking, methodological creativity, and argument. Four new courses are offered each year, designed to elaborate different dimensions of the theme. Through these courses, students are encouraged to see the University as an interconnected enterprise, and to imagine the University as one part of a larger spectrum of scholars in the communities of the city, the nation, and the world.

ROTC
The Army Reserve Officers' Training Corps (http://www.armyrotc.com/edu/drexel/), established at Drexel in 1918, is an integral part of the University. Army ROTC courses are open to all students, and enrollment alone does not carry a military obligation. Students selected for the advanced course (normally pre-junior, junior, and senior years) will complete their academic and military studies concurrently, and upon

graduation will be commissioned as lieutenants in the United States Army, Army Reserve, or Army National Guard. Participation in the advanced course may qualify participants to receive financial aid through a series of scholarships and cooperative education programs. For further information, contact the Professor of Military Science, Drexel University, The Armory, 33rd and Market Streets, Philadelphia, PA 19104.

Drexel students are eligible to participate in the Naval Reserve Officers' Training Corps (http://www.vpul.upenn.edu/nrotc/) (NROTC) through a cross-enrollment agreement with the University of Pennsylvania. All naval science courses are held on Penn's campus. The NROTC program enables a college student to earn a commission in the Navy or the Marine Corps while concurrently satisfying requirements for his or her baccalaureate degree. Scholarship and nonscholarship programs are available.

Drexel students are eligible to participate in the Air Force Reserve Officers' Training Corps (http://www.sju.edu/afrotc/) (AFROTC) through a cross-enrollment agreement with St. Joseph's University. All aerospace studies courses will be held on the St. Joseph's campus. The AFROTC program enables a college student to earn a commission as an Air Force officer while concurrently satisfying requirements for his or her baccalaureate degree.

Global

Study Abroad
Drexel University's Study Abroad programs are open to students in all disciplines who meet the qualifications of each individual program. Please see the study abroad website (http://www.drexel.edu/studyabroad/) for eligibility requirements of each individual program and for the most up to date program offerings.

Foreign Language Proficiency
The University awards an advanced-level Certification of Proficiency (http://catalog.drexel.edu/certificates/proficiencycertificates/) in a foreign language in recognition of exceptional ability in oral and written communication in that language. Certification is listed on the official college transcript.

Examinations leading to proficiency certification include listening comprehension, reading comprehension, and written analysis, and the ETS Achievement Test, which is also the qualifying examination for proficiency testing. Certification also requires successful completion of an extensive oral interview, with at least a "2" rating on the FSI/ACTFL rating scale. Certification indicates proven ability to function effectively in professional and social situations in a country in which the target language is spoken.

Affirmative Action and Equal Opportunity

University Policy: Affirmative Action and Equal Opportunity
It is the policy of the University to provide a working and learning environment in which employees and students are able to realize their full potential as productive members of the University community. To this end, the University affirms its commitment to equal opportunity and nondiscrimination in employment and education for all qualified individuals regardless of race, religion, color, national origin, sex, age, sexual orientation, disability or applicable veteran status or any other characteristic protected by applicable federal or state law. Further, the University is committed to taking affirmative action to increase opportunities at all levels of employment and to increase opportunities for participation in programs and activities by all faculty, staff, and students.

Affirmative Action is directed toward racial and ethnic minorities, women, persons with disabilities, and Vietnam-era veterans. All member of the University community -- faculty, staff, and students – are expected to cooperate fully in meeting these goals.

It is the policy of the University that no qualified individual with a disability shall, on the basis of the disability, be excluded from participation in University programs and activities. Disability is defined as any physical or mental impairment that substantially limits one or more major life activities; or having a record of such impairment; or being regarded as having such impairment. A qualified individual with a disability means an individual as defined above, who is capable of performing the essential functions of a particular job or of participating in a particular course of study, with or without reasonable accommodations for his/her disability. Reasonable accommodations are determined on a case-by-case basis.

Consumer Information and Student Right to Know

In accordance with federal regulations set forth by the Higher Education Opportunity Act of 1965, as amended, a summary of consumer information must be made available to all prospective and enrolled students at Drexel University. Links to the information is available on the Office of the Provost's website (http://drexel.edu/provost/policies/heoa/).

Accreditation

Drexel University's educational programs are accredited by MSCHE (Middle States Commission on Higher Education).

The Antoinette Westphal College of Media Arts and Design

- The National Association of Schools of Arts & Design has accredited Westphal's Bachelor of Science programs in: Animation & Visual Effects; Art History; Design & Merchandising; Entertainment and Arts Management (Visual Arts); Fashion Design; Film & Video; Game Art & Production; Graphic Design; Interactive Digital Media; Interior Design; Photography; Product Design; TV Production & Media Management.
- The National Association of Schools of Arts & Design has accredited Westphal's Master of Science programs in Digital Media; Fashion Design; Interior Design; and Design Research
- The National Association of Schools of Arts & Design has accredited Westphal's Doctor of Philosophy in Digital Media.
- The Architecture program is accredited by NAAB (National Architectural Accrediting Board).
- The BS in Interior Design is accredited by CIDA (Council for Interior Design Accreditation).
- The MS in Interior Architecture & Design is accredited by CIDA (Council for Interior Design Accreditation).

The Bennett S. LeBow College of Business

- The Bennett S. LeBow College of Business is accredited by AACSB (Association to Advance Collegiate Schools of Business).

The College of Engineering

- The undergraduate programs for Architectural Engineering, Chemical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering Environmental Engineering, Materials Science and Engineering, and Mechanical Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.
- The undergraduate Construction Management program is accredited by ACCE (American Council for Construction Education).
- The undergraduate Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org.
- The Project Management program is approved by the Project Management Institute (PMI)® as a Registered Education Provider (R.E.P.). This designation indicates that Drexel has met or exceeded rigorous standards for the quality and the effectiveness of its program as defined by PMI, http://www.pmi.org/learning/training-development/reps (http://www.pmi.org/learning/training-development/reps/).

The College of Arts and Sciences

- The Chemistry BS is certified by ACS (American Chemical Society).
- The Clinical Psychology PhD program is accredited by APA (American Psychological Association).
- The English Language Center is accredited by CEA (Commission on English Language Program Accreditation).

The College of Nursing and Health Professions

- The Baccalaureate Degree in Nursing (BSN), the Master's Degree in Nursing (MSN) and the Doctor of Nursing (DNP) at Drexel University are accredited by the Commission on Collegiate Nursing Education (CCNE) (http://www.aacn.nche.edu/ccne-accreditation/), One Dupont Circle, NS, Suite 530, Washington, DC, 20036, 202-887-6791.
- The Couple and Family Therapy MFT degree and Post-Master's Certificates are accredited by COAMFTE (Commission on Accreditation of Marriage and Family Therapy Education).
- The Creative Arts Therapies MA degrees in Dance/Movement Therapy and Counseling, Music Therapy and Counseling, and Art Therapy and Counseling are approved by the ADTA (American Dance Therapy Association), the AMTA (American Music Therapy Association), and the AATA (American Art Therapy Association), respectively.
- The Didactic Program in Nutrition is accredited by ACEND (Accreditation Council for Education in Nutrition and Dietetics Association).
- The Nurse Anesthesia program is accredited by COA (Council on Accreditation of Nurse Anesthesia Educational Programs).
- The Doctor of Physical Therapy (DPT) program is accredited by CAPTE (Commission on Accreditation in Physical Therapy Education).
- The Physician Assistant program is accredited by ARC-PA (Accreditation Review Commission on Education for the Physician Assistant).

The College of Computing & Informatics

- The BS in Computer Science is accredited by the Computing Accreditation Commission (CAC) of ABET (http://www.abet.org).
- The BS in Information Systems is accredited by the Computing Accreditation Commission (CAC) of ABET (http://www.abet.org).
- The BS in Information Technology is accredited by the Computing Accreditation Commission (CAC) of ABET (http://www.abet.org).
- The BS in Software Engineering is accredited by the Engineering Accreditation Commission (EAC) of ABET (http://www.abet.org).
- The MS in Library and Information Science is accredited by ALA (American Library Association).
- The MS in Health Informatics Program is in Candidacy Status, pending accreditation review by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM)

The Drexel University College of Medicine

- The MD degree is accredited by LCME (Liaison Committee on Medical Education).
- The Master's program in Histotechnology (MHP) and the MS Degree in Pathologists' Assistant program are accredited by NAACLS (National Accrediting Agency for Clinical Laboratory Sciences).

The Dornsife School of Public Health

- The Dornsife School of Public Health is accredited by CEPH (Council on Education for Public Health).

The School of Biomedical Engineering, Science and Health Systems

- The undergraduate biomedical engineering curriculum is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).

The School of Education

- Teacher education, school leadership and other programs leading to Pennsylvania State-issued credentials or endorsements for various PreK-12 subject areas are approved by the Pennsylvania Department of Education. These include teacher preparation programs in the areas of Pre-Kindergarten - Grade 4 (PK-4); Middle Level (Grades 4 - 8) in English, Mathematics and Science; the Secondary Level (Grades 7-12) in areas of Biology, Chemistry, Earth & Space Science, English, General Science, Mathematics, Physics, and Social Studies; and Special Education (both Grades PK - 8 and 7 - 12). State-approved, school leadership certification areas include School Principal K-12, School Superintendent K-12, Special Education Supervisory and Instructional Technology Specialist. Other state-approved programs and program endorsements are provided in the areas of Autism, Reading Specialist, STEM Teaching Endorsement, and Teaching English as a Second Language Program.
- The School of Education will be seeking accreditation from the Council for the Accreditation of Educator Preparation

The Thomas R. Kline School of Law

- The Thomas R. Kline School of Law is accredited by ABA (American Bar Association).
- The Master of Legal Studies (MLS) is accredited by the Compliance Certification Board (CCB)[®].

Any student or prospective student may request a copy of the documents describing the institution's accreditation. This information is available in the Provost's Office and in the Financial Aid Office, both located in the Main Building.

The Steinbright Career Development Center

The Steinbright Career Development Center (Steinbright) (http://www.drexel.edu/scdc/) serves all students and recent alumni through cooperative education and career services offerings. For information about potential co-op experiences, or to access career guides for specific majors, visit the Steinbright Center's Co-op Career Guide (http://www.drexel.edu/scdc/career-services/counseling/career-guides/) page.

I. Drexel Undergraduate Co-op

Cooperative Education at Drexel (http://www.drexel.edu/scdc/coop/) enables full-time undergraduate students to alternate periods of classroom theory with professional experience prior to graduation. Participation in co-op is available in most academic programs. Successful completion of the cooperative education experience is a graduation requirement for students enrolled in a co-op degree program. Students have the opportunity to gain 6 to 18 months of career-related work experience integrated with their coursework. Cooperative education helps students explore and confirm their career choices by assisting students in several areas of career development, including self-assessment and career exploration. Through co-op students develop confidence, professionalism and a sense of purpose. Students are expected to take advantage of every possible opportunity to observe different aspects of the workplace and to gain experience.

To learn more about undergraduate co-op, visit the Steinbright Career Development Center's website (https://drexel.edu/scdc/co-op/undergraduate/).

A. Co-op Program Schedule Options **(**http://www.drexel.edu/scdc/co-op/undergraduate**/)**

B. **Co-op Policies and Procedures**

C. Co-op Preparatory Courses **(**https://drexel.edu/scdc/co-op/co-op-curriculum**/)**

D. Classes During Co-op Go to the Provost's website **(**https://drexel.edu/provost/policies/registering-for-classes-during-co-op**/)**

II. Drexel Graduate Co-op Program (GCP)

Drexel's nearly 100-year tradition in the field of experiential education is also available in select graduate programs. Graduate co-op enables master's level students to alternate class terms with one six-month period of professional or research experience.

For more information about the graduate co-op program and a list of participating majors visit the Graduate Co-op website (https://drexel.edu/scdc/co-op/graduate/).

III. Career Services

Career Services (http://drexel.edu/scdc/career-services/exploring/) offers assistance to all current students and alumni in securing employment consistent with personal career goals and objectives. All services are free of charge to active students and alumni. Services, resources, and events include:

- Individual career counseling, including assessments designed to help individuals choose long-range career goals consistent with their abilities, education, interests, values and personality.

- Career counselors who work specifically with first year students and graduating seniors. Individual appointments and group programs covering topics including resume writing, interview preparation, job search strategies and offer negotiation.

- On-Campus Interview Program which provides opportunities for on-campus interviews with employers from business, industry, education, and government services.

- Handshake. Drexel's online job search system. Students can review job postings with employers who are interested in hiring Drexel students and alumni. Students can also research companies, information on career fairs, and company-hosted information sessions with Handshake (https://drexel.edu/scdc/career-services/searching-for-job/handshake/).

- Comprehensive pre-professional advising services to students and alumni who are considering careers in law or medicine.

- Two of the largest career fairs in the Delaware Valley in October and April open to all students and alumni. In addition, a career fair specifically for engineering and technology students is held in the winter term.

The Close School of Entrepreneurship

In today's extremely competitive global workforce, there is an increased value and demand for initiative, independence, innovation, and the intellectual dexterity to rethink the old ways of doing things and invent new ones. The Charles D. Close School of Entrepreneurship has pioneered an approach to entrepreneurship education that addresses this need by teaching students to be entrepreneurial thinkers and doers, preparing them to meet the world market on solid footing and to create their own opportunities.

The Close School defines entrepreneurship as more than starting a company or sparking innovation within established organizations. At the Close School, entrepreneurship is a habit of mind and an attitude; a skill set applicable to pursuing innovation in both personal and career contexts. We cultivate a student's approach to life built around innovative thinking, calculated daring, and proactive behavior.

Within our unique curriculum, students learn skills such as resilience, collaboration, negotiation, and communication. The Close School's academic and co-curricular programs prepare students for the ever-evolving 21st-century workforce, which will include experiences in new-venture creation, self-employment, corporate innovation, and the development of impactful social enterprises.

Minors

- Corporate Entrepreneurship (p. 23)
- Entrepreneurship and Innovation (p. 23)
- Social Entrepreneurship (p. 23)

Certificate

- *NEW:* Entrepreneurship (p. 23)

Background

In December 2012, the Charles and Barbara Close Foundation's gift of $12.5 million established the Charles D. Close School of Entrepreneurship. In January 2013, the Charles D. Close School of Entrepreneurship became the first degree-granting school of entrepreneurship, independent of a business school, in the nation. The Close School is founded on the principle that every student should have the opportunity to dream big and pursue their passions. We encourage, educate, and enable innovation and entrepreneurship.

Why is learning about entrepreneurship important to your career? There are several significant reasons. First, entrepreneurial skills will protect you in a weak job market by giving you the tools to create your own jobs. Second, learning about entrepreneurship broadens your perspective about ways to pursue your career entrepreneurially, rather than on traditional pathways in particular fields. Third, today, more than ever, companies seek employees with some type of entrepreneurial experience. Leading companies of all sizes understand that they must **innovate** to survive and prosper. Students who have developed an entrepreneurial mindset have strong communication skills, recognize how to take initiative, and know how to execute. By hiring entrepreneurial individuals, these companies are bringing innovative perspectives into the workplace.

Entrepreneurship is much more than the process of starting a company. Entrepreneurship is a habit of mind and an attitude; a skill set applicable to pursuing innovation in business, personal, and career contexts and an approach to life built around innovative thinking, calculated daring, and proactive behavior. Our goal is to infuse **entrepreneurial thinking and doing** in our courses and related programs.

Our courses and programs are designed to be experiential and interdisciplinary. They are available to all students throughout the University, regardless of major. We offer a fully funded Entrepreneurship Co-op and courses that provide small amounts of seed funding for new student businesses. Through our Baiada Institute for Entrepreneurship, an array of programs and business competitions enhance your entrepreneurial experience.

At the Close School of Entrepreneurship, we believe that **all** students have the potential to be innovative; to take their ideas, in whatever context, and make them a reality. To elicit the entrepreneur in you, we offer students who are interested in learning about the process of innovation and entrepreneurship various curricular and co-curricular paths to becoming an "entrepreneur."

Goals and Objectives

- Present entrepreneurship as a way to think, learn, and succeed in terms of values, behaviors, and process.
- Provide a cutting-edge approach to entrepreneurship education.
- Complement and enhance undergraduate and graduate education outcomes for students by developing entrepreneurial thinking within the curriculum.
- Encourage and create a supportive academic and physical environment to allow the pursuit of student passions and big ideas.
- Provide students, upon graduation with three competencies:

  1. The entrepreneurial mindset.
  2. An entrepreneurship toolkit.
  3. Expertise in a specific content area of their choosing.

School Offerings

The Close School of Entrepreneurship offers students various paths to becoming an "entrepreneur." The School is based on the premise that all students have the potential to be innovative: to take their ideas, in whatever context, and make their ideas a reality. The curricular and co-curricular programs are formulated to accommodate students' potential paths to learning and living entrepreneurship.

Academic Programs

The School offers a BA and an MS in Entrepreneurship and Innovation, undergraduate minors in Corporate Entrepreneurship, Entrepreneurship and Innovation, and Social Entrepreneurship, and a graduate minor in Entrepreneurship and Innovation. In addition, the Close School offers to all Drexel students, many elective courses with minimal or

no prerequisites that integrate entrepreneurial education with all other academic disciplines at the University.

Through the appointment of a core of excellent teaching faculty (serial entrepreneurs and seasoned executives) and tenured/tenure-track faculty, the Close School cultivates a research agenda, providing thought leadership to academics and practitioners. Finally, the Close School of Entrepreneurship collaborates with regional and national organizations and the entrepreneurial community to advance innovation and entrepreneurial initiatives.

Entrepreneurship Co-Op

The co-op experience is the hallmark of a Drexel education. Drexel students intersperse one or three six-month periods of work within their academic plans of study. By weaving together scholarly and practical experiences, Drexel students graduate with a unique set of skills that open up a diverse array of professional opportunities upon graduation.

The Close School recognizes that many undergraduates have already started their own companies. To encourage this entrepreneurial spirit within our student body, the Close School, in collaboration with the Steinbright Career Development Center, offers to all Drexel undergraduate students the opportunity to use their own company as their co-op experience. Students who qualify for this opportunity receive a salary ($15,000), like other co-op students who work for established companies and organizations. Most importantly, students participating in the entrepreneurship co-op receive weekly mentoring from Close School faculty.

The Baiada Institute for Entrepreneurship

The Baiada Institute is the cradle of entrepreneurship at Drexel University. Open to all students at Drexel, Baiada provides student entrepreneurs the physical space, mentoring, and resources to start their first (or next) big thing. The Baiada Institute translates the Close School of Entrepreneurship (http://www.drexel.edu/close/)'s groundbreaking curriculum (http://www.drexel.edu/close/academics/courses/) into disruptive ideas led by innovative companies, created by Drexel students from all academic disciplines.

Entrepreneurship and Innovation

Major: Entrepreneurship and Innovation
Degree Awarded: Bachelor of Arts Degree (BA)
Calendar Type: Quarter
Total Credit Hours: 181.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.0701
Standard Occupational Classification (SOC) code: 11-1011; 11-1021; 11-9199

About the Program

The BA in Entrepreneurship and Innovation is designed to prepare students to think and act entrepreneurially, in the context of established companies, in working for small and growing ventures, in starting a new venture or self-employment, and in their overall approach to their personal and professional lives. Within this innovative curriculum, students build entrepreneurial skills such as resilience, opportunity recognition, self-efficacy, negotiation, and effective communication.

The program emphasizes interdisciplinary coursework in collaboration with other Drexel colleges and schools, providing entrepreneurship students with the opportunity to take classes with future engineers, scientists, artists, and business and community leaders.

For additional information about the BA in Entrepreneurship and Innovation, please contact Rita Berson at rk25@drexel.edu.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Required Courses:

- Entrepreneurial Mindset: This is a suite of courses that addresses individual entrepreneurial skills such as resiliency, initiative, innovative thinking, and communication. These courses develop personal and interpersonal skills needed to be a successful "entrepreneur" in several contexts.

- The Process of Entrepreneurship: This set of required courses covers a broad range of topics that immerse students in the practice of entrepreneurship.

- A choice of three concentration areas: Social Entrepreneurship, Corporate Entrepreneurship, and New Venture Creation.

- Electives: Constitutes a group of courses from the Close School and across the University that reflect the themes of innovation and entrepreneurship.

- Minors: All entrepreneurship majors are required to select an academic minor, which will provide domain expertise in their area of interest. Students may select from over 150 minors offered by the University.

General Education Requirements

CIVC 101	Introduction to Civic Engagement	1.0
COM 230	Techniques of Speaking	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
PHIL 105	Critical Reasoning	3.0
UNIV C101	The Drexel Experience	1.0
Two Mathematics Courses (MATH)		**6.0-8.0**
Two Science Courses		**6.0-8.0**
	Choose from Bioscience and Biotechnology (BIO), Chemistry (CHEM), Food Science (FDSC), Geoscience (GEO), Physics (PHYS), Physics-Environmental Science (PHEV)	
Social/Behavioral Science		**6.0**
	Choose 2 courses from Anthropology (ANTH), Communications (COM), Economics (ECON), History (HIST), Political Science (PSCI), Psychology (PSY), Sociology (SOC)	
ECON 201	Principles of Microeconomics	4.0
Choose one of the following writing intensive courses:		3.0
COM 270 [WI]	Business Communication	
COM 310 [WI]	Technical Communication	

COM 317 [WI]	Environmental Communication	
COM 320 [WI]	Science Writing	
COM 375 [WI]	Grant Writing	
ECON 326 [WI]	Economic Ideas	
PSY 240 [WI]	Abnormal Psychology	
PSY 245 [WI]	Sports Psychology	
PSY 250 [WI]	Industrial Psychology	
Three Humanities/Fine Arts Courses		**9.0**
Choose from Africana Studies (AFAS), English (ENGL), Humanities-General (HUM), Global Studies (GST), Judaic Studies (JUDA), Philosophy (PHIL), Women's & Gender Studies (WGST); Any course from the Westphal College of Media Arts and Design		
Two Technology Courses		**6.0**
Choose from Computer Science (CS), Information Science & Systems (INFO), Management Information Systems (MIS), Software Engineering (SE)		
Two Ethics Courses		**6.0**
Select two of the following:		
PHIL 251	Ethics	
PHIL 301	Business Ethics	
PHIL 305	Ethics and the Media	
PHIL 311	Ethics and Information Technology	
PHIL 315	Engineering Ethics	
PHIL 321	Biomedical Ethics	
PHIL 323	Organizational Ethics	
PHIL 335	Global Ethical Issues	
Three Language Courses (Foreign Language or Computer Science) [*]		9.0-12.0
Arabic (ARBC), Chinese (CHIN), French (FREN), German (GER), Hebrew (HBRW), Italian (ITAL), Japanese (JAPN), Korean (KOR), Russian (RUSS), Spanish (SPAN) OR one of the following CS Language sequences:		
CS 143	Computer Programming Fundamentals	
CS 150	Computer Science Principles	
CS 171	Computer Programming I	
OR		
CS 150	Computer Science Principles	
CS 171	Computer Programming I	
CS 172	Computer Programming II	
Entrepreneurship Requirements		
ACCT 120	Accounting Essentials for New Ventures	4.0
BLAW 346	Entrepreneurial Law	4.0
ENTP 100	Innovation Ecosystem	1.0
ENTP 101	Life Strategies I	3.0
ENTP 105	Entrepreneurship Practice & Mindset	3.0
ENTP 205	Ready, Set, Fail	3.0
ENTP 215	Building Entrepreneurial Teams	3.0
ENTP 225 [WI]	Mindfulness & Wellbeing ([WI])	3.0
ENTP 250	Ideation	3.0
ENTP 410 [WI]	Thought Leadership	3.0
MKTG 201	Introduction to Marketing Management	4.0
Concentration Requirements		**12.0**
Select a concentration from the following options:		
Social Entrepreneurship		
ENTP 270	Social Entrepreneurship	
ENTP 275	Diversity Entrepreneurship	
ENTP 290	An Entrepreneur's Introduction to Land: Its Essence, Ethics, and Opportunity	
or ENTP 390	Energy Entrepreneurship	
ENTP 375	3BL - Triple Bottom Line	
Corporate Entrepreneurship		
ENTP 285	Organizational Innovation and Change for Corporate Entrepreneurs	
ENTP 329	Entrepreneurship & New Technologies	
or MKTG 347	New Product Development	

ENTP 340	Managing Entrepreneurial Growth	
ENTP 385	Innovation in Established Companies	
New Venture Creation		
ENTP 210 [WI]	Leading Start-Ups	
ENTP 325	Early Stage Venture Funding	
ENTP 450	Launch It!	
MKTG 364	Marketing for New Ventures	
Entrepreneurship Electives [**]		**15.0**
Select five of the following:		
CRTV 303	Creativity in the Workplace	
DIGM 223	Creative Concept Design	
DSMR 231	Retail Operations	
ECON 202	Principles of Macroeconomics	
ENTP 102	Life Strategies II	
ENTP 350	Dynamics of the Family Firm	
ENTP 360	Franchising	
ENTP 370	Global Entrepreneurship	
ENTP 440	Launch It!: Early Stage	
ENTP T180	Special Topics in Entrepreneurship	
ENTP T280	Special Topics in Entrepreneurship	
ENTP T380	Special Topics in Entrepreneurship	
ENTP T480	Special Topics in Entrepreneurship	
MIS 200	Management Information Systems	
RETL 315	Power of Retail Brands	
Required Academic Minor[***]		**24.0**
Free Electives		**24.0**
Total Credits		181.0-188.0

[*] A computer science course cannot satisfy both a technology requirement and a computer language requirement.

[**] BA students may also take any ENTP course not in their chosen concentration to meet the entrepreneurship elective requirement.

[***] BA students are required to complete an academic minor offered by any other Drexel College or School.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms

before their co-op begins. As of September 2020, COOP 101 will be one credit.

Term 1		Credits
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0

Entrepreneurship & Innovation 3-year Option

Major: Entrepreneurship and Innovation
Degree Awarded: Bachelor of Arts Degree (BA)
Calendar Type: Quarter
Total Credit Hours: 181.0
Co-op Options: None
Classification of Instructional Programs (CIP) code: 52.0701
Standard Occupational Classification (SOC) code: 11-1011

About the Program

The three-year BA in Entrepreneurship and Innovation program is a unique, accelerated plan of study that teaches entrepreneurship as a habit-of-mind that applies to both the student's career and life. Entrepreneurship is about being proactive, opportunistic, and innovative. The three-year degree in entrepreneurship & innovation offered by the Close School is rigorous and sustains all the standards of our four- or five-year degree programs. It is a degree that is particularly appealing to the student who is determined, disciplined, and goal-oriented – as we find that many entrepreneurship students are.

Our holistic approach to teaching challenges students to think and act as an entrepreneur within companies, startups, or self-employment. We have developed a curriculum that teaches resilience, collaboration, negotiation, and communication. Students will learn how to manage growth, secure funding, or manage a family firm. We stress interdisciplinary work and flexibility with all Drexel schools through the required academic minor and offer three-year students advanced experiential learning in our exclusive Entrepreneurship Practicum.

Minor in Corporate Entrepreneurship

About the Minor

The minor in Corporate Entrepreneurship is designed for students who are interested in careers that spark innovation within start-up companies or established organizations. At the Close School, entrepreneurship is a habit of mind and an attitude; a skill set applicable to pursuing innovation in both personal and career contexts. Students who minor in Corporate Entrepreneurship will learn to cultivate the entrepreneurial mindset, which builds innovative thinking, calculated daring, and proactive behavior that can be applied to their personal and professional lives.

Admission Requirements

Students of any major with more than 40.0 credits may declare a minor in Corporate Entrepreneurship.

Program Requirements

ENTP 101	Life Strategies I	3.0
ENTP 205	Ready, Set, Fail	3.0
ENTP 250	Ideation	3.0
ENTP 285	Organizational Innovation and Change for Corporate Entrepreneurs	3.0

ENTP 340	Managing Entrepreneurial Growth	3.0
ENTP 385	Innovation in Established Companies	3.0
ENTP 440	Launch It!: Early Stage	3.0
Total Credits		24.0

Minor in Entrepreneurship and Innovation

About the Minor

The minor in entrepreneurship and innovation is designed for students who are interested in starting their own ventures, working for start-up companies, or preparing for self-employment. Students who minor in entrepreneurship and innovation will learn to adopt the entrepreneurial mindset and apply it to their personal and professional lives.

For additional information about the entrepreneurship minor, please contact Rita Berson at rk25@drexel.edu.

Minor in Social Entrepreneurship

About the Minor

The Social Entrepreneurship minor is designed for students interested in learning how to create and sustain social value within companies or through the pursuit of any social enterprise. Students will learn to develop, fund, and implement innovative solutions to social, cultural, or environmental issues.

ENTP 101	Life Strategies I	3.0

Total Credits		24.0

Additional Information

For additional information about the Social Entrepreneurship minor, please contact Rita Berson at rk25@drexel.edu.

Certificate in Entrepreneurship

Only available to currently enrolled Drexel students.

The Certificate in Entrepreneurship is for students who would like to expand the scope of their undergraduate Drexel degree by also developing an entrepreneurial mindset and skillset. This certificate will help you learn to evaluate and pursue opportunities and, most importantly, realize your passions by either starting a company, being innovative in an organization, or navigating your career. By building your entrepreneurial skills and helping you assemble the tools that you need to succeed, the Certificate in Entrepreneurship equips you to achieve your life and career aspirations in an ever-changing employment landscape.

Open to Drexel students from all schools and colleges, in all majors (with the exception of Close School majors), who have completed 15 credits.

Required courses		
ENTP 105	Entrepreneurship Practice & Mindset	3.0

ENTP 205	Ready, Set, Fail	3.0
ENTP 440	Launch It!: Early Stage [*]	3.0
Choose two courses from the following:		6.0
ENTP 101	Life Strategies I	
ENTP 215	Building Entrepreneurial Teams	
ENTP 250	Ideation

Total Credits		15.0

[*] Taken as a final course in certificate program after completion of all other course requirements.

The College of Arts and Sciences

About the College

Mission Statement

By pursuing excellence in research and scholarship, we educate our students to become ethical professionals and citizens with knowledge of and appreciation for the fundamental interactions among the humanities, social sciences and the sciences in a fast-changing, challenging, and diverse world.

About the College of Arts and Sciences

Drexel University's College of Arts and Sciences (http://www.drexel.edu/coas/) (CoAS) stands unafraid in the face of change. We recognize that our ever-evolving, fast-paced culture required a new approach to education, one that understands the world is malleable and can be molded by minds inspired to lead society's evolution.

But innovation requires more than an ambitious personality. It requires versatility -- we must not only be experts in our field, but also agile enough to engage in the cross-disciplinary work needed to address modern problems resourcefully. That's why our faculty challenge students to see past their own perspectives and establish a deeper understanding of humanity's needs. It's why our co-op program inserts students within a professional culture, introducing them to the expectations of the job while offering hands-on practical application of coursework. And it's why, starting as early as early as freshman year, students team with faculty members as peers, conducting research that affects the world now.

Here at CoAS, we are committed to implementing in-the-moment change, not for personal glory, but because it's what the world needs.

Majors

- Biological Sciences (BS) (p. 28)
- Chemistry (BA, BS) (p. 38)
- Chemistry-Biochemistry Concentration (BS) (p. 43)
- Communication (BA) (p. 49)
  - Communication Concentration (p. 49)
  - Journalism Concentration (p. 50)
  - Public Relations Concentration (p. 52)
- Communication (BS) (p. 55)
  - *NEW:* Communication Concentration
  - Public Relations Concentration (p. 57)
  - Technical & Science Concentration (p. 59)
- Criminology and Justice Studies (BS) (p. 61)
- English (BA) (p. 69)
- Environmental Science (BS) (p. 73)
- Environmental Studies and Sustainability (BA) (p. 77)
- Geoscience (BS) (p. 80)
- Global Studies (BA) (p. 84)
- History (BA) (p. 92)
- Mathematics (BA, BS) (p. 97)
- Philosophy (BA) (p. 102)
- *NEW:* Philosophy, Politics & Economics (BA)

- Physics (BS) (p. 109)
- Political Science (BA) (p. 113)
- Psychology (BS) (p. 115)
- Sociology (BA) (p. 119)

Accelerated Degrees

- Chemistry (BS) / Chemistry (MS) (p. 46)
- English (BA) / Publishing (MA) (p. 122)
- Global Studies (BA) / Public Health (MPH) (p. 125)
- History (BA) / Science, Technology & Society (MS) (p. 128)
- Philosophy (BA) / Public Policy (MS) (p. 129)
- Philosophy (BA) / Science, Technology & Society (MS) (p. 132)
- Political Science (BA) / Science, Technology & Society (MS) (p. 135)
- Sociology (BA) / Science, Technology & Society (MS) (p. 136)

Certificates

- Ethical Theory and Practice (p. 160)
- Interfaith and Religious Studies (p. 160)
- Medical Humanities (p. 161)
- Philosophy, Arts, & Humanities (p. 161)
- Philosophy, Science and Technology (p. 162)
- Writing and Publishing (p. 162)

Intermediate Proficiency Certificates

- Arabic (p. 165)
- Chinese (p. 166)
- French (p. 166)
- German (p. 167)
- Hebrew (p. 167)
- Italian (p. 168)
- Japanese (p. 168)
- Korean (p. 169)
- Spanish (p. 169)

Minors

- Africana Studies (p. 139)
- Anthropology (p. 140)
- Arabic (p. 141)
- *NEW:* Asian Studies
- Astrophysics (p. 141)
- Bioinfomatics (p. 141)
- Biological Sciences (p. 142)
- Biophysics (p. 142)
- Bioscience and Society (p. 143)
- Chemistry (p. 143)
- Chinese (p. 143)
- Communication (p. 144)
- Computer Crime (p. 144)
- Criminal Justice (p. 144)
- Ecology (p. 145)
- English (p. 145)
- Environmental Studies (p. 146)

- French (p. 146)
- Geoscience (p. 147)
- German (p. 147)
- Global Studies (p. 148)
- History (p. 149)
- **NEW:** History of Capitalism
- Italian Studies (p. 149)
- Japanese (p. 149)
- Judaic Studies (p. 150)
- Korean (p. 150)
- Mathematics (p. 151)
- **NEW:** Medical Sociology
- **NEW:** Middle East and North Africa Studies
- Neuroscience (p. 152)
- Nonprofit Communication (p. 153)
- Philosophy (p. 153)
- Physics (p. 154)
- Politics (p. 154)
- Psychology (p. 154)
- **NEW:** Religious Studies
- Science, Technology and Society (p. 156)
- Sociology (p. 156)
- Spanish (p. 157)
- War and Society (p. 157)
- Women's and Gender Studies (p. 158)
- Writing (p. 159)

Special Programs

Emerging Scholars Program

This two-year program is designed for students interested in the humanities and social sciences who want to experience the range of opportunities in these disciplines before choosing a major. The program provides mentorship, specialized seminars, and co-curricular events, as well as a co-op position in the community to guide students toward defining their scholarly and career interests. The Emerging Scholars Program does not grant a degree, but helps guide students in choosing a major that's right for them.

Learn more on the College of Arts and Sciences (http://drexel.edu/coas/academics/undergraduate-programs/emerging-scholars-program/) website.

Pre-professional Programs

Students wishing to prepare for admission to professional schools of medicine, veterinary medicine, dentistry, or public health may obtain pre-professional counseling and application assistance at the Steinbright Career Development Center. (http://drexel.edu/scdc/) For health profession application assistance, students may call 215.895.2437. For law school admission assistance, students may call 215.895.1632

Accelerated Programs

The College of Arts and Sciences offers several accelerated degree programs that enable academically qualified students to earn both a bachelor's and an advanced degree concurrently, graduating sooner than they would in traditional programs. Depending on the academic program,

eligible students can be admitted to an accelerated degree program in one of two ways: as an incoming freshman or after completing a minimum of 90.0 credits but no more than 120.0 credits. Note: In addition to the options listed below, student can apply to combine degree programs into an accelerated BS/MS program. Talk to your academic advisor to learn more.

More details about Accelerated Programs can be found on the Undergraduate Admissions (http://drexel.edu/coas/admissions/overview/) website.

DragonsTeach

DragonsTeach is a collaboration between the College of Engineering, the College of Arts and Sciences, and the School of Education designed to allow students in science, technology, engineering, and math (STEM) degree programs to explore a career in education. Through a unique combination of skills development and classroom experiences, DragonsTeach students can earn a minor in STEM Education and eligibility for teaching credentials while completing their major degree program and co-ops. Learn more on the DragonsTeach website (http://drexel.edu/dragonsteach/).

Eligible Majors:

- BS in Biology
- BS or BA in Chemistry
- BS in Environmental Science
- BS or BA in Mathematics
- BS in Physics

Secondary and Elementary Teacher Certification

The School of Education offers innovative curricula that combines academic majors with appropriate coursework to satisfy state requirements for certification in elementary education. Students interested in the teacher education programs should contact the School of Education (http://drexel.edu/soe/).

The Drexel Writing Center

The Drexel Writing Center (DWC) is dedicated to helping students, faculty, and staff, at all levels of experience and across all disciplines, in their development as writers.

- The DWC works with writers at all stages in the writing process, from brainstorming ideas to polishing final drafts.
- The DWC focus is on individual, one-on-one sessions that feature a conversational, collaborative relationship between the reader and the writer they work with.
- Interaction with the DWC will help writers develop not just writing but critical thinking and reading skills.
- While DWC readers do not perform copy-editing services, they will help students learn strategies for proofreading and editing their documents.

The DWC is located at 0032 MacAlister Hall and can be reached at 215.895.6633. Further information can be found at the Drexel Writing Center (http://drexel.edu/writingcenter/) website.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

English Language Center

As part of the College of Arts and Sciences, Drexel's English Language Center (http://www.drexel.edu/elc/) offers an accredited intensive English program throughout the year. In addition to classes in academic skills such as essay writing and oral presentations, the Center offers the Language of STEM (Science Technology Engineering and Math), Language of Media and Design, Global Business English program (GLOBE), English for academic purposes, TOEFL and iELTS preparation, ESL Teaching enhancement programs, and other subjects.

Through the International Gateway program, the English Language Center offers academic language preparation for students who have an admissible high school academic background but need further English language proficiency. This pathway program combines academic English language courses, credit courses taught by CoAS faculty, and acculturation activities. Students admitted into the University Preparation program (UPREP) begin their studies at Drexel in the English Language Center in a short, pre-term program designed to prepare international students for the academic work and culture of the American university.

Accepted undergraduate students have access to free language tutoring and other academic skills workshops throughout the academic year.

For more information, see the ELC website or contact the Center at:

English Language Center
229 N. 33rd Street
Philadelphia, PA 19104

Phone: 215-895-2022
Fax: 215-895-6775
E-mail: elc@drexel.edu

The Drexel Co-op

No summers of coffee runs or mindless filing here! Drexel students embark on six-month periods of full-time employment in practical, discipline-specific positions consistent with their interests and abilities. Depending on their chosen program, students have the opportunity to participate in up to three different co-op positions - that's 18 months

of real work experience - during their time at Drexel, allowing them to explore their career options, strengthen their resumes and build a professional network in the process. While co-op opportunities can be both paid and unpaid, students who participate in the co-op program typically receive higher starting salaries post-graduation than graduates of other schools.

The number of co-op experiences required for graduation is determined by the student's chosen course of study. The following options exist for most majors:

- **Three Co-op Option** (Five Years)
- **One Co-op Option** (Four Years)
- **No Co-op Option** (Four Years) *Though this program is available, we strongly encourage students to take advantage of the co-op program, a key benefit of a Drexel education.*

Learn more on the Steinbright Career Development Center (http://drexel.edu/scdc/) website.

Global Opportunities

Global Opportunities Abound

Philadelphia may be the heart of Drexel's campus, but the world is our muse. There are numerous opportunities for Drexel Dragons to go abroad.

Study Abroad

Study abroad allows students a unique academic experience to learn about subjects from an international perspective, often with local students and professors. From Costa Rica to Barcelona, Milan to Turkey, Brazil to Israel, our students have studied all over the world.

Research Abroad

Research extends far beyond the walls of any laboratory. Our students have studied sea turtles in Costa Rica, infectious diseases in Uganda and data from the Double Chooz experiment in France. Many of our faculty members are also involved in international research collaborations and our students have the opportunity to make an impact alongside them.

Co-Op Abroad

Co-op abroad provides students with a unique professional perspective and exposure to an international work environment. Our students have worked at Coca Cola in India, the UN Development Programme in Africa, the Italian Parliament in Rome, and the Heraklion Community Mental Health Center in Greece - just to name a few.

An international co-op gives students a distinct advantage in the global economy, making them more attractive to prospective employers. Candidates with international experience also have the ability to earn higher starting salaries upon graduation.

Visit the Steinbright Career Development Center (http://drexel.edu/scdc/) website to learn more.

Travel Courses

The College of Arts and Sciences' travel-integrated courses allow students to travel domestically or internationally for one or two weeks at the end of a course to extend their studies beyond the classroom. Recent

classes have traveled to France to learn about WWI and Brazil to study commodities exchange. Talk to your academic advisor to learn more.

Alternative Spring Break

The Alternative Spring Break (ASB) program places teams of Drexel students in communities to engage in community service and experiential learning during spring break. Students may choose to work domestically or internationally in activities that benefit the environment, the community and those in need.

Community-Based Learning

In the College of Arts and Sciences' unique Community-Based-Learning (CBL) courses, students don't just study the issues affecting the world, they study alongside the people affected - from prison inmates to hospice patients. CBL courses are offered in three formats:

- Side by side
- Community Hybrid
- Service Learning

Side-by-side courses create a co-learning environment in which Drexel students and the community members take classes together.

Community hybrid courses are composed entirely of Drexel students are split between the classroom and the community.

Service-learning courses require service in the community in addition to students' credit hours in the classroom.

For a current list of available courses, visit the Lindy Center for Civic Engagement (http://drexel.edu/lindycenter/).

Biological Sciences

Major: Biological Sciences
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 182.5
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 26.0101
Standard Occupational Classification (SOC) code: 19-1029

About the Program

The biological sciences major resides in the Department of Biology (http://drexel.edu/coas/academics/departments-centers/biology/). Students earn a bachelor's degree in the biological sciences and are prepared for technical careers in research or commercial laboratories, or for professional schools or graduate study.

The biological sciences encompass many areas of study. Biologists study the structure and functions of living organisms from the individual cell to the full organism, and collectively to the community level. Discoveries in the biological sciences influence many aspects of our daily lives and have become the foundation of many new developments in biotechnology and medicine. In the past two decades, advances in molecular biology, cell biology and genetics have been rapid, opening many new, exciting career opportunities in biotechnology, genetic engineering and the development of new diagnostics and therapeutics. Biologists can pursue a variety of options including careers in medicine, dentistry, veterinary medicine or other health-related areas; in research or commercial laboratories at

pharmaceutical companies, medical research laboratories, biotechnology companies or in government agencies; and in teaching. In fact, more than 100 different occupations have been listed for biologists. Graduates in the biological sciences are in demand and enjoy a high placement rate with competitive salaries.

The curricular choices are designed to provide a sound basis for careers in the private sector, government and research laboratories, and for advanced study in graduate and professional programs in medicine, other health related areas, or in teaching.

The course requirements identifies required support courses in chemistry, physics, mathematics, humanities, and social sciences. With proper selection of electives, students can meet teacher certification requirements or complete a minor in another field. Students are encouraged to consult frequently with their academic advisor for curriculum planning.

In addition to the core requirements, students select one of five concentrations in a field of interest:

- Cell/Molecular Biology/Genetics/Biochemistry
- Organismal Biology/Physiology
- Ecology/Evolution/Genomics
- Pathobiology
- General Biology

Program Options

Co-op employment is an option for biological science students. The major offers three distinct plans:

Five-year option with co-op experience
This option allows for the greatest amount of employment experience, with three distinct six-month periods of employment included with studies. After the start of the sophomore year, students study or work through all terms, including summer.

Four-year option with co-op experience
The degree includes just one six-month period of employment. After the start of sophomore year, students study or work through all terms, including summer.

Four-year option without co-op experience
The degree can be completed in four years without co-op/internship employment. Students are not required to pursue studies during any of the summer terms.

Degree Requirements

The Biological Sciences curriculum is designed to provide students with both depth and flexibility within the field of biology. In addition to the core requirements, students select one of five concentrations in a field of interest.

- Cell/Molecular Biology/Genetics/Biochemistry
- Organismal Biology/Physiology
- Ecology/Evolution/Genomics
- Pathobiology
- General Biology

Concentration requirements and elective options are outlined below. Within each concentration, students are able to further specialize in a focus area by selecting electives in their area of interest.

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Requirements

Humanities and Social Sciences

CIVC 101	Introduction to Civic Engagement	1.0
COM 230	Techniques of Speaking	3.0
COM 310 [WI]	Technical Communication	3.0
or COM 320	Science Writing	
COOP 101	Career Management and Professional Development	0.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
PHIL 251	Ethics	3.0
or PHIL 321	Biomedical Ethics	
UNIV S101	The Drexel Experience	1.0
UNIV S201	Looking Forward: Academics and Careers	1.0
Humanities and Social Science Electives		9.0
Science, Technology, Health and Human Affairs Elective		3.0

Mathematics and Statistics

Select one of the following sequences:		12.0
Intro to Analysis		
MATH 101 & MATH 102 & MATH 239	Introduction to Analysis I and Introduction to Analysis II and Mathematics for the Life Sciences	
Calculus		
MATH 121 & MATH 122 & MATH 123	Calculus I and Calculus II and Calculus III	
MATH 410	Scientific Data Analysis I	3.0
MATH 411	Scientific Data Analysis II	3.0

Physical Sciences

BIO 311	Biochemistry	4.0
or CHEM 243	Organic Chemistry III	
CHEM 101	General Chemistry I	3.5
CHEM 102	General Chemistry II	4.5
CHEM 103	General Chemistry III	5.0
CHEM 241	Organic Chemistry I	4.0
CHEM 242	Organic Chemistry II	4.0
PHYS 152	Introductory Physics I	4.0
PHYS 153	Introductory Physics II	4.0
PHYS 154	Introductory Physics III	4.0

Core Biology Courses

BIO 122	Cells and Genetics	4.5
BIO 124	Evolution & Organismal Diversity	4.5
BIO 126	Physiology and Ecology	4.5
BIO 207	Applications in Biology I	1.0
BIO 208	Applications in Biology II	1.0
BIO 209	Cell, Molecular & Developmental Biology I	4.0
BIO 211	Cell, Molecular & Developmental Biology II	4.0
BIO 219 [WI]	Techniques in Molecular Biology	3.0
BIO 224	Form, Function & Evolution of Vertebrates	4.0
BIO 225	Vertebrate Biology and Evolution Laboratory	2.0

BIO 471	Seminar in Biological Sciences	2.0
BIO 472	Seminar in Biological Sciences	2.0
BIO 473 [WI]	Seminar in Biological Sciences	2.0
ENVS 212	Evolution	4.0
Concentration Courses		**28.0-30.0**
Free electives		24.0
Total Credits		182.5-184.5

Students select one of five concentration and fulfill the requirements, as outlined below.

1. The Cell/Molecular/Genetics/Biochemistry (CMGB) Concentration

This concentration provides exposure to several vital disciplines within Biology, and will prepare students for a diversity of careers in research, medicine, and industry. Students interested in tailoring their studies more specifically may follow the suggested "focus areas" when selecting their two CMGB Concentration electives.

Cell/Molecular/Genetics/Biochemistry (CMGB) Concentration Requirements

BIO 244	Genetics I	3.0
or BIO 444	Human Genetics	
BIO 314	Pharmacology	3.0
or BIO 404	Structure and Function of Biomolecules	
or BIO 416	Biochemistry of Major Diseases	
BIO 318	Biology of Cancer	3.0
or BIO 430	Cell Biology of Disease	
BIO 410	Advanced Molecular Biology	3.0
Cell/Molecular/Genetics/Biochemistry (CMGB) Concentration Electives (See Lists Below)		
Two Cell/Molecular/Genetics/Biochemistry (CMGB) Electives (see list below)		6.0
Organismal/Physiology Elective (see list below)		3.0
Ecology/Evolution/Genomics Elective (see list below)		3.0
Concentration Laboratory Courses		
Two Laboratory Electives (see list below)		4.0
Total Credits		28.0

*   Students interested in pursuing a focus area in Neurobiology, Pharmaceutics, Cell Biology, Biochemistry, Molecular Biology or Genetics should contact the academic advisor in the Biology Department for specific focus recommendations.

Cell/Molecular/Genetics/Biochemistry (CMGB) Electives

BIO 244	Genetics I	3.0
BIO 285	Forensic Biology	3.0
BIO 311	Biochemistry	4.0
BIO 314	Pharmacology	3.0
BIO 318	Biology of Cancer	3.0
BIO 346	Stem Cell Research	3.0
BIO 348	Neuroscience: From Cells to Circuits	3.0
BIO 404	Structure and Function of Biomolecules	4.0
BIO 414	Behavioral Genetics	3.0
BIO 415	Proteins	3.0
BIO 416	Biochemistry of Major Diseases	3.0
BIO 421	Biomembranes	3.0
BIO 430	Cell Biology of Disease	3.0
BIO 433	Advanced Cell Biology	3.0
BIO 444	Human Genetics	3.0
BIO 447	Advanced Genetics and Molecular Biology	3.0
BIO 451	Genetic Reg Development	3.0
BIO 453	Protein Dysfunction in Disease	3.0
BIO 462	Biology of Neuron Function	3.0

BIO 463	Molecular Mechanisms of Neurodegeneration	3.0
BIO 465	Neurobiology of Disease	3.0
ENVS 326	Molecular Ecology	3.0
Organismal/Physiology Electives		
BIO 201	Human Physiology I	4.0
BIO 221	Microbiology	3.0
BIO 256	Vertebrate Morphology and Physiology	3.0
BIO 284	Biology of Stress	3.0
BIO 286	Forensic Toxicology	3.0
BIO 323	Parasitology	3.0
BIO 368	Embryology	4.0
BIO 372	Histology	4.0
BIO 373	Developmental Biology	3.0
BIO 386	Gross Anatomy I	2.0
BIO 412	Biology of Aging	3.0
BIO 420	Virology	3.0
BIO 426	Immunology	3.0
BIO 349	Behavioral Neuroscience	3.0
BIO 461	Neurobiology of Autism Disorders	3.0
ENVS 254	Invertebrate Morphology and Physiology	3.0
ENVS 392	Ichthyology and Herpetology	3.0
ENVS 393	Entomology	3.0
Ecology/Evolution/Genomics Electives		
BIO 228	Evolutionary Biology & Human Health	3.0
BIO 331	Bioinformatics I	3.0
BIO 413	Genomics	3.0
BIO 436	Population Genetics	4.0
ENVS 230	General Ecology	3.0
ENVS 247	Native Plants and Sustainability	3.0
ENVS 323	Tropical Field Studies	3.0
ENVS 328	Conservation Biology	3.0
ENVS 333	Wetland Ecology	3.0
ENVS 343	Equatorial Guinea: Field Methods	3.0
ENVS 352	Ornithology	3.0
ENVS 354	Ichthyology	3.0
ENVS 355	Biogeography	3.0
ENVS 360	Evolutionary Developmental Biology	3.0
ENVS 364	Animal Behavior	3.0
ENVS 382	Field Botany of the New Jersey Pine Barrens	4.0
ENVS 383	Ecology of the New Jersey Pine Barrens	4.0
ENVS 391	Freshwater and Marine Algae	3.0
ENVS 470	Advanced Topics in Evolution	3.0
Laboratory Electives		
BIO 202	Human Physiology Laboratory	2.0
BIO 213	Drosophila Neural Research	3.0
BIO 215	Techniques in Cell Biology	3.0
BIO 222	Microbiology Laboratory	2.0
BIO 232	Discovering Antibiotics	3.0
BIO 257	Vertebrate Morphology & Physiology Lab	2.0
BIO 306	Biochemistry Laboratory	2.0
BIO 329	Dictyostelium Research	3.0
BIO 374	Developmental Biology Lab	2.0
BIO 387	Gross Anatomy I Laboratory	2.0
BIO 389	Gross Anatomy II Lab	2.0
BIO 427	Immunology Laboratory	2.0
BIO 497	Research	0.5-12.0
ENVS 255	Invertebrate Morphology and Physiology Lab	2.0
ENVS 344	Equatorial Guinea: Field Research	6.0
ENVS 353	Field Ornithology Lab	2.0
ENVS 365	Animal Behavior Laboratory	2.0
ENVS 394	Entomology Laboratory	2.0

2. The Organismal Biology/Physiology Concentration

This concentration combines courses in organismal biology and physiology with an opportunity to focus on human physiology. The concentration is designed to appeal to students interested in health and medicine, but also accommodates students seeking a wider breadth of knowledge in organismal diversity. Students can focus their electives in human physiology or can choose courses that study non-human organisms.

Organismal Biology/Physiology Concentration Requirements

BIO 201	Human Physiology I	4.0
or ENVS 254	Invertebrate Morphology and Physiology	
BIO 203	Human Physiology II	4.0
or BIO 256	Vertebrate Morphology and Physiology	
BIO 373	Developmental Biology	3.0
Select one of the following:		
BIO 412	Biology of Aging	3.0
or BIO 284	Biology of Stress	
or BIO 466	Endocrinology	
or BIO 468	Pathophysiology	
Organismal Biology/Physiology Concentration Concentration Electives (See List Below)		
Cell/Molecular/Genetics/Biochemistry (CMGB) Elective		3.0
Two Organismal/Physiology Electives		6.0
Ecology/Evolution/Genomics Elective		3.0
Concentration Laboratory Courses		
Two Laboratory Electives		4.0
Total Credits		30.0

*   Students interesting in pursuing a focus area in Human Physiology or Organismal Biology should contact the academic advisor in the Biology Department for specific focus recommendations.

*Cell/Molecular/Genetics/Biochemistry (CMGB) electives

BIO 244	Genetics I	3.0
BIO 285	Forensic Biology	3.0
BIO 311	Biochemistry	4.0
BIO 314	Pharmacology	3.0
BIO 318	Biology of Cancer	3.0
BIO 346	Stem Cell Research	3.0
BIO 348	Neuroscience: From Cells to Circuits	3.0

3. The Ecology/Evolution/Genomics Concentration

This concentration focuses on ecological and evolutionary aspects of biology for biology majors who also have specific interests in ecology, evolution or genomics. This concentration is designed to maintain a breadth of knowledge in biology, but also allows students to tailor their course work more specifically to reflect their specific area of interest.

Ecology/Evolution/Genomics Concentration requirements

ENVS 326	Molecular Ecology	3.0
BIO 228	Evolutionary Biology & Human Health	3.0
or BIO 331	Bioinformatics I	
BIO 436	Population Genetics	3.0-4.0
or ENVS 230	General Ecology	
Select one of the following:		3.0-5.0
BIO 221	Microbiology	
BIO 256	Vertebrate Morphology and Physiology	
BIO 323	Parasitology	
BIO 413	Genomics	
BIO 420	Virology	
ENVS 254	Invertebrate Morphology and Physiology	
ENVS 360	Evolutionary Developmental Biology	
ENVS 382	Field Botany of the New Jersey Pine Barrens	
ENVS 391	Freshwater and Marine Algae	
ENVS 392	Ichthyology and Herpetology	
ENVS 393	Entomology	
ENVS 438	Biodiversity	
Ecology/Evolution/Genomics concentration electives		
Select one Cell/Molecular/Genetics/Biochemistry (CMGB) elective (see list below)		3.0
Select one Organismal/Physiology elective (see list below)		3.0
Select two Ecology/Evolution/Genomics electives (see list below)		6.0
Concentration Laboratory Courses		
Select two Laboratory electives (see list below)		4.0
Total Credits		28.0-31.0

* Students interested in pursuing a focus area in Ecology, Evolutionary Biology or Genomics should contact the academic advisor in the Biology Department for specific focus recommendations.

Cell/Molecular/Genetics/Biochemistry (CMGB) electives

BIO 244	Genetics I	3.0
BIO 285	Forensic Biology	3.0
BIO 311	Biochemistry	4.0
BIO 314	Pharmacology	3.0
BIO 318	Biology of Cancer	3.0

ENVS 394	Entomology Laboratory	2.0

4. The Pathobiology Concentration

The Pathobiology concentration focuses on pathogenesis, and provides a unique option for students that differs from the more traditional disciplines in cell/molecular/genetics/biochemistry. This concentration is designed to appeal to students with an interest in pursuing careers in areas of public and allied health.

BIO 221	Microbiology	3.0
BIO 320	Microbial Pathogenesis	3.0
BIO 323	Parasitology	3.0
or BIO 420	Virology	
or BIO 435	Immunobiology of Disease	
BIO 426	Immunology	3.0
Select one Cell/Molecular/Genetics/Biochemistry (CMGB) elective (see list below)		3.0
Select two Organismal/Physiology electives (see list below)		6.0
Select one Evolutionary Bio/Ecology elective (see list below)		3.0
Concentration Laboratory Courses		
Two Laboratory electives (see list below)		4.0
Total Credits		28.0

Cell/Molecular/Genetics/Biochemistry (CMGB) electives:

BIO 244	Genetics I	3.0
BIO 285	Forensic Biology	3.0
BIO 311	Biochemistry	4.0
BIO 314	Pharmacology	3.0
BIO 318	Biology of Cancer	3.0
BIO 346	Stem Cell Research	3.0
BIO 348	Neuroscience: From Cells to Circuits	3.0
BIO 404	Structure and Function of Biomolecules	4.0
BIO 410	Advanced Molecular Biology	3.0
BIO 414	Behavioral Genetics	3.0
BIO 415	Proteins	3.0

BIO 427	Immunology Laboratory	2.0
BIO 497	Research (by permission of the department)	0.5-12.0
ENVS 255	Invertebrate Morphology and Physiology Lab	2.0
ENVS 344	Equatorial Guinea: Field Research	6.0
ENVS 353	Field Ornithology Lab	2.0
ENVS 365	Animal Behavior Laboratory	2.0

5. The General Biology Concentration

This concentration will allow maximum flexibility for students who want to develop their own unique plan of study. The concentration is designed for students who may not have one specific area of interest, but who are looking to be well-rounded in the biological sciences. Students pursuing careers in education, where a wider breadth of knowledge in biology is desirable, may choose to select this concentration.

General Biology Concentration Electives	24.0
2 or 3 Cell/Molecular/Genetics/Biochemistry (CMGB) electives (see list below)	
2 or 3 Organismal/Physiology electives (see list below)	
2 or 3 Ecology/Evolution/Genomics electives (see list below)	
Concentration Laboratory Courses	
Two Laboratory electives (see list below)	4.0
Total Credits	28.0

Cell/Molecular/Genetics/Biochemistry (CMGB) electives

BIO 244	Genetics I	3.0
BIO 285	Forensic Biology	3.0
BIO 311	Biochemistry	4.0

BIO 306	Biochemistry Laboratory	2.0
BIO 329	Dictyostelium Research	3.0
BIO 333	Bioinformatics Laboratory	2.0
BIO 374	Developmental Biology Lab	2.0
BIO 387	Gross Anatomy I Laboratory	2.0
BIO 389	Gross Anatomy II Lab	2.0
BIO 427	Immunology Laboratory	2.0
BIO 497	Research (by permission of the department)	0.5-12.0
ENVS 255	Invertebrate Morphology and Physiology Lab	2.0
ENVS 285 [WI]	Population Ecology Laboratory	2.0
ENVS 287	Community Ecology Laboratory	2.0
ENVS 327	Molecular Ecology Laboratory	2.0
ENVS 344	Equatorial Guinea: Field Research	6.0
ENVS 353	Field Ornithology Lab	2.0
ENVS 365	Animal Behavior Laboratory	2.0
ENVS 382	Field Botany of the New Jersey Pine Barrens	4.0
ENVS 383	Ecology of the New Jersey Pine Barrens	4.0
ENVS 388	Marine Field Methods	4.0
ENVS 394	Entomology Laboratory	2.0

Note about laboratory credits: ENVS 336, ENVS 382 and ENVS 388 have both a lecture and laboratory component.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plans of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Biological Sciences Major: Four-year Co-op

(Additional sample plans for other co-op options can be viewed below.)

Term 1		Credits
BIO 122	Cells and Genetics	4.5
CHEM 101	General Chemistry I	3.5
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0

MATH 121	Calculus I	4.0
or 101	Introduction to Analysis I	
UNIV S101	The Drexel Experience	1.0
	Term Credits	16.0
Term 2		
BIO 124	Evolution & Organismal Diversity	4.5
CHEM 102	General Chemistry II	4.5
CIVC 101	Introduction to Civic Engagement	1.0
ENGL 102 or 112	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing English Composition II	3.0
MATH 122 or 102	Calculus II Introduction to Analysis II	4.0
	Term Credits	17.0
Term 3		
BIO 126	Physiology and Ecology	4.5
CHEM 103	General Chemistry III	5.0
COOP 101	Career Management and Professional Development	0.0
ENGL 103 or 113	Composition and Rhetoric III: Themes and Genres English Composition III	3.0
MATH 239 or 123	Mathematics for the Life Sciences Calculus III	4.0
	Term Credits	16.5
Term 4		
BIO 207	Applications in Biology I	1.0
BIO 209	Cell, Molecular & Developmental Biology I	4.0
BIO 219 [WI]	Techniques in Molecular Biology	3.0
CHEM 241	Organic Chemistry I	4.0
PHYS 152	Introductory Physics I	4.0
	Term Credits	16.0
Term 5		
BIO 208	Applications in Biology II	1.0
BIO 211	Cell, Molecular & Developmental Biology II	4.0
CHEM 242	Organic Chemistry II	4.0
PHYS 153	Introductory Physics II	4.0
UNIV S201	Looking Forward: Academics and Careers	1.0
Biology Laboratory Requirement*		2.0
	Term Credits	16.0
Term 6		
BIO 311 or CHEM 243	Biochemistry Organic Chemistry III	4.0
ENVS 212	Evolution	4.0
PHIL 251	Ethics	3.0
PHYS 154	Introductory Physics III	4.0
	Term Credits	15.0
Term 7		
BIO 224	Form, Function & Evolution of Vertebrates	4.0
BIO 225	Vertebrate Biology and Evolution Laboratory	2.0
Sci, tech, health & human affairs elective		3.0
BIO/ENVS Elective		3.0
Biology Laboratory Requirement		2.0
	Term Credits	14.0
Term 8		
COM 230	Techniques of Speaking	3.0
MATH 410	Scientific Data Analysis I	3.0
BIO/ENVS Elective		3.0
Free Electives		6.0
	Term Credits	15.0
Term 9		
COM 310 [WI]	Technical Communication	3.0
MATH 411	Scientific Data Analysis II	3.0
Humanities/Social Science Elective		3.0
BIO/ENVS Elective		3.0

Free Elective		3.0
	Term Credits	15.0
Term 10		
BIO 471	Seminar in Biological Sciences	2.0
BIO/ENVS Electives		6.0
Free Electives		6.0
	Term Credits	14.0
Term 11		
BIO 472	Seminar in Biological Sciences	2.0
BIO/ENVS Electives		6.0
Humanities/Social Science Elective		3.0
Free Elective		3.0
	Term Credits	14.0
Term 12		
BIO 473 [WI]	Seminar in Biological Sciences	2.0
BIO/ENVS Elective		3.0
Humanities/Social Science Elective		3.0
Free Electives		6.0
	Term Credits	14.0

Total Credit: 182.5

* See degree requirements (p. 28).

Biological Sciences Major: Five-year Co-op

Term 1		Credits
BIO 122	Cells and Genetics	4.5
CHEM 101	General Chemistry I	3.5

Co-op/Career Opportunities

Opportunities

Students earn a bachelor's degree in the biological sciences and are prepared for technical careers in research or commercial laboratories or for professional schools.

Graduates typically work for pharmaceutical companies, university and medical research laboratories, biotechnology companies, or in government laboratories. Many graduates also choose to pursue an advanced degree in the medical, dental and veterinary disciplines; or Masters or PhD degrees in Biology-related fields and Public Health.

Co-op Opportunitiess

Past co-op employers of biosciences majors have included:

- GlaxoSmithKline
- Fox Chase Cancer Center
- Children's Hospital of Philadelphia
- Johnson and Johnson
- Merck
- Wistar Institute
- Moss Rehab
- ViroPharma, Inc.
- Janssen Biotech
- Integral Molecular

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities.

Dual/Accelerated Degree

Combined Bachelors/Masters Degree

Qualified students can take graduate courses in their junior and senior years for graduate credit. They can also complete a combined BS /MS degree in five years. Further questions about the BS /MS degree program should be directed to the departmental graduate advisor:

Kate Pelusi
Graduate Program Manager
Department of Biology
215.895.6374
kp475@drexel.edu

Facilities

The Department of Biology resides in the Papadakis Integrated Sciences Building (PISB). This state of the art facility has well-equipped teaching laboratories with networked computers and advanced digital image analysis capability. Both teaching and research laboratories contain a range of modern equipment including basic and cutting-edge light microscopes, confocal microscopy facilities, a Cell Imaging Center, basic and analytical ultacentrifuges, spectrophotometers, scintillation and luminescence counters, densitometers and cell culture facilities.

Visit the Research in Biology (http://www.drexel.edu/coas/academics/departments-centers/biology/research/) web page for more information.

Biological Sciences Faculty

Michael Akins, PhD *(Yale University)*. Assistant Professor. The neural mechanisms underlying how organisms interact with the environment; circuit formation, particularly of sensory circuits, and neural diseases including autism and Fragile X syndrome (FXS).

Shivanthi Anandan, PhD *(University of California, Los Angeles) Interim Vice Provost for Undergraduate Education*. Associate Professor. Microbial genetics, in particular the analysis of light-regulated signal transduction pathways and the regulation of gene expression in photosynthesizing organisms.

John R. Bethea, PhD *(University of Alabama at Birmingham)*. Professor. Neuroscience and immunology.

Valerie Bracchi-Ricard, PhD *(University Joseph Fourier, Grenoble, France)*. Research Assistant Professor. Role of TNF and TNF receptors in neuroinflammation and remyelination following spinal cord injury.

Laura Duwel, PhD *(University of Cincinnati) Assistant Department Head, Department of Biology*. Teaching Professor. Immunology and microbiology.

Felice Elefant, PhD *(Temple University) Director of the Biology Graduate Program*. Professor. Understanding the roles of two classes of chromatin regulatory proteins termed histone acetyltransferases(HATs)and histone de-methylases.

Roman Fischer, PhD *(University of Stuttgart, Germany)*. Research Assistant Professor. Regenerative and anti-inflammatory therapies to treat autoimmune and neurodegenerative diseases.

Denise Garcia, PhD *(UCLA)*. Associate Professor. Neuroscience, the role of astrocytes in the central nervous system.

Tali Gidalevitz, PhD *(University of Chicago)*. Associate Professor. Genetic and molecular pathways regulating protein folding homeostasis, and their role in protein conformation diseases, aging, and development.

Mary Katherine Gonder, PhD *(The City University of New York) Director, Bioko Biodiversity Protection Program Co-Founder, Central African Biodiversity Alliance*. Professor. Deciphering spatial patterns of biodiversity across the Gulf of Guinea and Congo Basin region;

Conservation measures to mitigate the effects of habitat loss and climate change in western equatorial Africa.

Susan Gurney, PhD *(Westfälische Wilhelms-Universität Münster (Germany))*. Associate Teaching Professor. Evolutionary genetics (human and equids); stem cell biology; forensic science

Meshagae Hunte-Brown, PhD *(Drexel University)*. Teaching Professor. Stable isotopes in aquatic food webs, ecosystem ecology, STEM education.

Jiu Jiang, MD, PhD *(Shanghai Second Medical University)*. Research Associate Professor. T cell immune response to virus infection in aged mice.

Karen Kabnick, PhD *(Massachusetts Institute of Technology)*. Associate Teaching Professor. Molecular and genetic mechanisms of cellular biology, human disease, host/parasite interactions.

Kari Lenhart, PhD *(Princeton University)*. Assistant Professor. Coordination of stem cell behavior and regulation of stem cell cytokinesis in the young and aged niche.

Robert Loudon, PhD *(Thomas Jefferson University)*. Associate Teaching Professor. Rho GTPases, regulation of actin cytoskeleton, Regulation of G protein-coupled receptors by receptor kinases and arrestins.

Daniel Marenda, PhD *(Syracuse University)*. Associate Professor. Developmental neurobiology and behavior; CHARGE syndrome; Pitt-Hopkins syndrome; Alzheimer's disease.

Donna Murasko, PhD *(Penn State Hershey Medical Center) Dean Emeritus*. Professor. The effects of aging on the adaptive immune response to influenza virus and retrovirus latency and reactivation.

Michael O'Connor, MD, PhD *(MD, Johns Hopkins University; PhD, Colorado State)*. Professor. Biophysical and physiological ecology, thermoregulation of vertebrates, ecological modeling.

Sean O'Donnell, PhD *(University of Wisconsin-Madison)*. Professor. Tropical ecology, focusing on geographic variation and elevation effects on ecology and behavior of army ants and ant-bird interactions; neurobiology, focusing on brain plasticity and brain evolution in social insects.

Ryan Petrie, PhD *(McGill University)*. Assistant Professor. Mechanisms of cell movement through three-dimensional extracellular matrix.

Jerome Ricard, PhD *(University Joseph Fourier, Grenoble, France)*. Research Assistant Professor. Inflammation and cell death after spinal cord injury. Regulation of cell death by Eph receptors.

Jacob Russell, PhD *(University of Arizona)*. Professor. Microbiomes and metagenomics; ecology and evolution of symbiosis.

Nianli Sang, MB, PhD *(M.B., Fudan University Shanghai Medical College; Ph.D., Thomas Jefferson University) Co-Director of the Cell Imaging Center*. Associate Professor. Molecular and cellular biology of cancer; posttranslational modification, folding and quality control of proteins and their implication in cell physiology and human diseases.

Aleister Saunders, PhD *(University of North Carolina, Chapel Hill) Senior Vice Provost for Research, Director of the RNAi Resource Center*. Professor. Identification and characterization of genes and proteins involved in Alzheimer's disease.

Kevin P.W. Smith, PhD *(Drexel University)*. Assistant Teaching Professor. Linking behavioral ecology and organismal diversity, neonate behavior in herpetological models, STEM education.

Elias T. Spiliotis, PhD *(The Johns Hopkins University) Director of the Cell Imaging Center* . Associate Professor. Cell polarity and cell division: regulation of cytoskeleton-dependent motility.

Jennifer Stanford, PhD *(Harvard University)*. Associate Professor. Evaluating and improving approaches to teach STEM content in higher education environments to promote student learning, engagement in STEM courses, and STEM student retention.

Khakhina Svetlana, PhD *(Rowan University, GSBS)*. Assistant Teaching Professor. Host-pathogen interactions. Exploring the diversity of bacteriophages and antibiotic-production bacteria to use it as tolls provided by nature to treat antibiotic-resistant bacterial infections.

Monica M. Togna, PhD *(New Jersey Institute of Technology)*. Assistant Teaching Professor. Examination of the structure and function of living organisms from the cellular to the organismal level in order to better understand common physiological processes.

Emeritus Faculty

Joseph Bentz, PhD *(State University of New York [SUNY] at Buffalo)*. Professor Emeritus. Biophysics, biochemistry and biopharmaceutics, focused on the molecular basis of biological membrane transport and fusion.

Cecilie Goodrich, PhD *(Harvard University)*. Professor Emeritus. Neuroscience and systems physiology, postnatal maturation of physiology and behavior in relation to brain immunocytochemistry.

Chemistry

Major: Chemistry
Degree Awarded: Bachelor of Arts (BA) or Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: BA -184.5; BS - 190.5
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 40.0501
Standard Occupational Classification (SOC) code: 19-2031

About the Program

Drexel's Department of Chemistry offers both a BA and a BS degree in chemistry. The BA is offered as a 4-year non-co-op program for those interested in following their undergraduate education in chemistry with professional school, such as law or medicine. The BS degree, offered in three formats (a 5-year three co-op, 4-year one co-op and a 4-year non-co-op), is certified by the American Chemical Society. In addition, a minor in chemistry is available for students in other majors who desire a strong physical science background.

Each student plans a course of study and selects electives in consultation with an advisor in the Department of Chemistry (http://www.drexel.edu/coas/academics/departments-centers/chemistry/). Students who show initiative and laboratory ability are encouraged to participate in undergraduate research by selecting a research problem in collaboration with one of the departmental faculty members. Students in the BS

program are required to participate in undergraduate research through the Senior Research courses.

Most graduate courses in chemistry are open to qualified seniors. Prerequisites and descriptions of available graduate courses appear in the graduate catalog.

Additional Information

For more information about the major in chemistry, contact:

Daniel King, PhD
Undergraduate Affairs Committee Chair
Department of Chemistry
Drexel University
dk68@drexel.edu

Degree Requirements (BA)

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

General Education Requirements *		
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
UNIV S101	The Drexel Experience	1.0
CIVC 101	Introduction to Civic Engagement	1.0
UNIV S201	Looking Forward: Academics and Careers	1.0

PHYS 201	Fundamentals of Physics III	4.0
Free Electives		
Free electives ***		32.0-36.0
Total Credits		184.5

* Categories of Electives:
  - *Humanities and Arts Electives*
    Designated courses in art, art history, communication studies, foreign languages (300-level or above), history, literature, music, philosophy, religion, and theatre arts.
  - *International Electives*
    Designated courses in anthropology, art history, history, literature, music, politics and sociology. Courses with an international focus may be used to fulfill requirements in other categories as well.
  - *Social and Behavioral Studies Electives*
    Designated courses in anthropology, criminal justice, economics, international relations, history, politics, psychology and sociology.
  - *Studies in Diversity Electives*
    Africana studies, women's studies or designated cross-listed courses in anthropology, art, art history, history, literature, music, philosophy, politics and sociology.
  - *Language Requirement*
    Students may satisfy the language course requirements in two ways: (1) complete at least 8 credits of a foreign language at Drexel and, at minimum, must complete the 103 level of the target language (or beyond if they place higher); or (2) take two terms of a computer language.

** Courses with CHEM prefix, although ENVS chemistry courses can also fulfill this requirement (with Department approval).

*** The total number of free elective credits depends on the number of credits required to fulfill the language requirement.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study (BA)

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Four-year One-Co-op

Term 1

		Credits
BIO 122	Cells and Genetics	4.5

Footnotes

*   Technical electives are defined as 200+ level courses from Science, Mathematics, Business, Engineering or Information Studies. Liberal studies electives are defined as courses (at any level) from all other areas.

** The American Chemical Society requires ACS-certified students to take a specified number of biochemistry courses. To fulfill this requirement in the BS curriculum, you should take a combination of one lecture and one lab course from the choice of: BIO 311, BIO 306 or BIO 404 to fulfill the biochemistry requirement. Students may also choose to take the two lecture courses (BIO 404 and BIO 311) rather than a lecture/laboratory combination.

(http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plans of Study (BS)

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Five-year Co-op

(See below this plan for Four-year Non-Co-op and One-Co-op options)

Term 1		Credits
BIO 122	Cells and Genetics	4.5
CHEM 121	Majors Chemistry I	5.0
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
MATH 121	Calculus I	4.0
UNIV S101	The Drexel Experience	1.0
	Term Credits	17.5
Term 2		
CHEM 122	Majors Chemistry II	5.0
ENGL 102 or 112	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing English Composition II	3.0
MATH 122	Calculus II	4.0
PHYS 101	Fundamentals of Physics I	4.0
CIVC 101	Introduction to Civic Engagement	1.0
	Term Credits	17.0
Term 3		
CHEM 123	Majors Chemistry III	5.5
ENGL 103 or 113	Composition and Rhetoric III: Themes and Genres English Composition III	3.0
MATH 123	Calculus III	4.0
PHYS 102	Fundamentals of Physics II	4.0
	Term Credits	16.5
Term 4		
CHEM 230 [*]	Quantitative Analysis	4.0
CHEM 231 [WI] [*]	Quantitative Analysis Laboratory	2.0
CHEM 246	Organic Chemistry for Majors I	6.5
PHYS 201	Fundamentals of Physics III	4.0
	Term Credits	16.5
Term 5		
CHEM 248	Organic Chemistry for Majors II	6.5
MATH 200	Multivariate Calculus	4.0
Free elective		3.0
	Term Credits	13.5
Term 6		
BIO 214	Principles of Cell Biology	3.0
CHEM 249	Organic Chemistry for Majors III	7.0
CHEM 253	Thermodynamics and Kinetics	4.0
MATH 210 or 201	Differential Equations Linear Algebra	4.0
	Term Credits	18.0
Term 7		

CHEM 270	Software Skills for Chemists	3.0
CHEM 357 [WI]	Physical Chemistry Laboratory I	2.5
Technical elective***		3.0
Free electives		6.0
	Term Credits	14.5
Term 8		
CHEM 355	Physical Chemistry IV	3.0
CHEM 367	Chemical Information Retrieval	3.0
CHEM 421	Inorganic Chemistry I	3.0
CHEM 430	Analytical Chemistry I	3.0
UNIV S201	Looking Forward: Academics and Careers	1.0
	Term Credits	13.0
Term 9		
CHEM 359	Atomic and Molecular Spectroscopy	3.0
CHEM 420	Molecular Symmetry and Group Theory Applied Chemistry	3.0
CHEM 431 [WI]	Analytical Chemistry II	4.0
Technical elective***		3.0
Free elective		3.0
	Term Credits	16.0
Term 10		
BIO 311	Biochemistry	4.0
or 404	Structure and Function of Biomolecules	
CHEM 346	Qualitative Organic Chemistry	5.5
CHEM 493	Senior Research Project	3.0
CHEM 358	Physical Chemistry Laboratory II	2.5
	Term Credits	15.0
Term 11		
BIO 306	Biochemistry Laboratory	2.0
CHEM 493	Senior Research Project	3.0
Liberal Studies electives		6.0
Free electives		6.0
	Term Credits	17.0
Term 12		
CHEM 422	Inorganic Chemistry II	3.0
CHEM 425	Inorganic Chemistry Laboratory	4.0
CHEM 493	Senior Research Project	3.0
Free electives		6.0
	Term Credits	16.0

Total Credit: 190.5

BS in Chemistry: Four-year Non-Co-op

Term 1		**Credits**
BIO 122	Cells and Genetics	4.5

Total Credit: 187.5-191.5

*   CHEM 230 and CHEM 231 must be taken concurrently.

**   *Biochemistry Requirement:* The American Chemical Society requires ACS-certified students to take a specified number of biochemistry courses. To fulfill this requirement in the BS curriculum, you should take a combination of one lecture and one lab course from the choice of: BIO 311, BIO 306 or BIO 404 to fulfill the biochemistry requirement. Students may also choose to take the two lecture courses (BIO 404 and BIO 311) rather than a lecture/laboratory combination. Note that the courses BIO 122 and BIO 214 are required in order to provide adequate background in biology for taking these upper-level biochemistry courses.

***   Must be at a 200+ level. See Degree Requirements for more information on acceptable classes.

Chemistry BS - Biochemistry Concentration Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

General Education Requirements

ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III

Total Credits		189.0

*   Technical electives are defined as 200+ level courses from Science, Mathematics, Business, Engineering or Information Science. Liberal studies electives are defined as courses (at any level) from all other areas.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Chemistry (BS) - Biochemistry Concentration Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Five-year Co-op

(See below this plan for Four-year Non-Co-op and Four-year One-Co-op options)

Term 1		Credits
CHEM 121	Majors Chemistry I	5.0
BIO 122	Cells and Genetics	4.5
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
MATH 121	Calculus I	4.0

Accelerated Bachelor's/Master's Dual Degree

The Bachelor's/Master's (BS/MS) dual degree program is an accelerated program providing the academically qualified student with an opportunity to earn both a BS and an MS degree (two diplomas are awarded) in five years, the time normally required to finish the co-op option BS degree alone.

This is an academically demanding program, but there are several allowances built in to enable the program to be completed in the time allotted. For instance, only 180 rather than 190.5 undergraduate quarter credits are required. The co-op experience may be adjusted; the student may take two rather than three co-op cycles, enabling two additional quarters of on-campus study. If needed, the student may also take evening courses while on co-op.

Eligibility

Exceptional students with a cumulative grade point average of at least 3.0 and who are enrolled in the five-year co-op option program are eligible for the BS/MS program. Students formally apply to the program after they have completed 90 credits but before they have completed 120 credits. Students are strongly encouraged to begin planning for the program as early as their freshman year. Students who have more than 120 credits are not eligible.

Transfer students are eligible to join the BS/MS program, but they must be able to complete the program in the time it would take to complete the BS degree alone. International transfer students must be able to meet the required minimum TOEFL score for the department graduate program (currently 550) in order to be admitted to the BS/MS program.

Application Process

Interested applicants need to formally apply to the program. Applications are available in the Office of Graduate Admissions or in the College of Arts & Sciences advisor's office. Applications must be accompanied by a Plan of Study prepared in consultation with the undergraduate and graduate advisor in the department and approved by both the Department Head and the Dean. Entry into the program must be officially approved by both the Department Head and Academic Dean.

BS/MS Requirements

Students enrolled in the BS/MS dual degree program must complete 180 undergraduate quarter credits for the BS degree and at least 45 graduate quarter credits for the MS degree. All graduate departmental requirements must be satisfied in full, including producing a thesis, if the thesis-option Master's program is elected. Master's thesis requirements may be completed in the summer term of the final year with prior approval of the department. Students in the BS/MS program must maintain a cumulative GPA of 3.0 in their undergraduate and graduate coursework to remain in the program. Further questions about the BS/MS degree program should be directed to the departmental graduate advisor.

Additional Information

For more information about the major in chemistry, contact:

Daniel King, PhD
Undergraduate Affairs Committee Chair
Department of Chemistry
Drexel University

Co-op/Career Opportunities

Opportunities for chemistry majors include working in research and development in corporate and government laboratories in the chemical, pharmaceutical and agricultural (e.g., U.S. Department of Agriculture) sectors. There is a remarkably high concentration of chemical and pharmaceutical companies in the Philadelphia region. Other options include entering medical, dental, law, or other professional schools.

The major in chemistry is sufficiently flexible to allow students to prepare to teach at the secondary level. With proper selection of electives, students can meet teacher certification requirements.

Sample Co-op Opportunities

A five-year co-op degree is offered. When students complete their co-op jobs, they are asked to write an overview of their experiences. These brief quotes are taken from some recent student reports:
Assistant chemist, pharmaceuticals manufacturer: "My position involved the synthesis and characterization of target compounds in the endotheline project. Involved the development of synthetic roots to the prescribed target. This would include the investigation of reactions which were going to be used. . . .the position was very independent. . .great working environment. "

Co-op chemist, petroleum refiner: "Performed synthesis of ligands and metal complexes. Operated FT-IR spectrometer for sample analysis. Submitted samples for analysis by mass spectrometer and NMR. . . .The position allowed me to develop the skills necessary for independent research in organic synthesis. "

Assistant lab technician, pharmaceuticals manufacturer: "I was an assistant technician in a mass spectrometry lab. . . . I was responsible for the development of SDS-gel electrophoresis techniques for gels and gel membranes. . . . I developed the methods independently and my employer encouraged me to be an expert on the technique and explore any method I found that would benefit the lab. "

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities.

Facilities

There are nine undergraduate teaching laboratories in the department: three freshman Chemistry labs, three Organic Chemistry labs, a Physical Chemistry lab, an Analytical Instrumentation Laboratory and a combined Analytical/Inorganic Chemistry lab.

Mass Spectrometry Laboratory
The department maintains a professionally staffed mass spectrometry facility available to all members of the university community. Currently available instrumentation consists of a Waters Autospec M high resolution magnetic-sector mass spectrometer, a Bruker Autoflex III MALDI Time-of-Flight Mass Spectrometer, a Thermo LTQ-FT Fourier Transform Mass Spectrometer, a Sciex API-3000 triple-quadrupole mass spectrometer, and a Varian Saturn 2000 Gas Chromatograph/Ion-trap mass spectrometer system.

Nuclear Magnetic Resonance Laboratory
The professionally staffed Chemistry Department NMR facility is equipped with 300MHz and 500MHz Varian Unity INNOVA NMR systems; both instruments have multi-nuclear capability. The probe on the 500MHz instrument is a cryogenically cooled triple resonance model (1H {13C/15N}) suitable for protein analysis. A Varian X-band 12" EPR spectrometer is also available.

Analytical Instrumentation Laboratory
The open-access departmental Analytical Instrumentation Laboratory includes two Perkin-Elmer (PE) Spectrum One Fourier-transform infrared absorption spectrometers each with a universal diamond ATR accessory, a PE Lambda-35 UV/visible spectrometer, a PE Lambda-950 UV/visible/ NIR spectrometer with a 60-mm-diameter diffuse reflectance integrating sphere, a PE model 343 polarimeter, a PE LS55B luminescence spectrometer, a PE Clarus 500 capillary-column GC with dual FID detectors, a Clarus 500 capillary-column GC/MS system (with electron impact capability), a PE Series 200 Quaternary HPLC development system with UV/visible photodiode array detector, a PE Series 200 binary HPLC system interfaced to a Sciex 2000 triple-quadrupole mass spectrometer, a PE Series 2000 binary Gel Permeation Chromatography system with refractive index detector, and a Varian AA240FS flame atomic absorption spectrometer equipped with a GTA 120 Graphite Furnace Accessory.

Organic Instrumentation Laboratory
The Organic Instrumentation Laboratory (co-located with the organic synthesis teaching laboratories in the Papdakis Integrated Sciences Building) is equipped with two Perkin-Elmer (PE) Spectrum Two Fourier-transform infrared absorption spectrometers each with a universal diamond ATR accessory, a PE Clarus 500 capillary-column GC with one FID and one TCD detector, and an Anasazi EFT-90 FT-NMR system.

Other Departmental Facilities
The department has a VEECO INNOVA N3 Multimode Scanning Probe Microscope and also maintains a computational chemistry laboratory

equipped with nine Dell Optiplex 790 computers running Hyperchem v 8.0. Research laboratories for each of the department faculty members are located in Disque and Stratton Halls. Instrumentation available in the research laboratories is described on individual faculty web pages. Full-time professional support includes two electronic instrument specialists (for NMR and MS- Chemistry Department), two electronics specialists (College of Arts & Sciences Electronics Shop), and four machinists (Drexel University Machine Shop).

Chemistry Faculty

Jason Cross, PhD *(University of Surrey (UK))*. Associate Teaching Professor. Luminescent lanthanide complexes

Fraser Fleming, PhD *(University of British Columbia (Canada)) Department Head, Chemistry*. Professor. Nitriles, Isonitriles, Stereochemistry, Organometallics

Joe P. Foley, PhD *(University of Florida)*. Professor. Separation science, especially the fundamentals and biomedical/pharmaceutical applications of the following voltage- or pressure-driven separation techniques: capillary electrophoresis (CE), electrokinetic chromatography, supercritical fluid chromatography, and high-performance and two-dimensional liquid chromatography (LC). Within these techniques, we explore novel separation modes (e.g., dual-opposite-injection CE and sequential elution LC), novel surfactant aggregate pseudophases, and chiral separations.

Lee Hoffman, PhD *(Flinders University, Adelaide, South Australia)*. Assistant Teaching Professor. Interfacial studies on the self-assembly of natural organic materials, understanding the nature of each component, and development of a mechanism describing this process;Dendrimer/metal nanocomposite design and synthesis hosting metal nanoparticles, utilizing the multivalent dendritic polymer architecture for further exploitation with other molecules such as antibodies and other targeting species.

Monica Ilies, PhD *(Polytechnic University of Bucharest)*. Associate Teaching Professor. Bioorganic chemistry and chemical biology; bioinorganic chemistry and biochemistry.

Haifeng Frank Ji, PhD *(Chinese Academy of Sciences)*. Professor. Micromechancial sensors for biological and environmental applications; Nanomechanical drug screening technology.

Daniel B. King, PhD *(University of Miami)*. Associate Professor. Assessment of active learning methods and technology in chemistry courses; incorporation of environmental data into chemistry classroom modules; development of hands-on activities and laboratory experiments.

Dionicio Martinez-Solario, PhD *(University of Alabama)*. Assistant Professor. Total synthesis of complex biologically active natural products serving as inspirational platforms for the discovery and development of new reactions and synthetic methods.

Craig McClure, PhD *(University of Michigan)*. Associate Teaching Professor. Promotion of quantitative literacy in introductory courses; development of guided inquiry activities for introductory chemistry; outreach programs in STEM fields.

Kevin G. Owens, PhD *(Indiana University)*. Associate Professor. Mass spectrometry research, including the development of sample preparation techniques for quantitative analysis and mass spectrometric imaging using matrix-assisted laser desorption/ionization (MALDI) time-of-flight mass spectrometry (TOFMS) techniques for both biological and synthetic polymer systems, the development of laser spectroscopic techniques for combustion analysis, and the development of correlation analysis and other chemometric techniques for automating the analysis of mass spectral information.

Lynn S. Penn, PhD *(Bryn Mawr College)*. Professor. Surface modification for specific applications: chemically derivatize metal and ceramic solid surfaces; designing and executing sequential chemical processes, building complex and layered structures on surfaces, with specific focus on behavior of polymer brushes (investigating the fundamental transport-selective behavior of polymer brushes because of potential in drug delivery, biomedical devices and as an explanation of some biological processes).

Susan A. Rutkowsky, PhD *(Drexel University) Associate Department Head*. Associate Teaching Professor. Development of labs and lecture demonstrations for general and organic chemistry courses; STEM outreach programs.

Jeremiah Scepaniak, PhD *(New Mexico State University)*. Assistant Professor. Design transition metal-based contrast agents for MRI & synthesis of bimetallic complexes to activate small molecules.

Reinhard Schweitzer-Stenner, PhD *(Universitat Bremen (Germany))*. Professor. Exploring conformational ensembles of unfolded or partially folded peptides and proteins; determining the parameters governing peptide self-aggregation; structure and function of heme proteins; investigating protein-membrane interactions; use of IR, VCD, Raman, NMR and absorption spectroscopy for structure analysis.

Karl Sohlberg, PhD *(University of Delaware)*. Associate Professor. Computational and theoretical materials-related chemistry: (1) complex catalytic materials; (2) mechanical and electrical molecular devices.

Anthony Wambsgans, PhD *(Rice University)*. Associate Teaching Professor.

Ezra Wood Associate Professor. Radical chemistry and formation of secondary pollutants in urban and forest environments, impacts of biomass burning on air pollution and climate change, pollutant emissions, and design and deployment of novel instrumentation for field studies.

Jun Xi, PhD *(Cornell University)*. Associate Teaching Professor. Biomacromolecular interactions both in solution and in confined environment; mechanisms of DNA replication and DNA repair; structure and function of molecular chaperones; drug target identification and new therapeutic development; single molecule enzymology; DNA directed organic synthesis.

Emeritus Faculty

Anthony W. Addison, PhD *(University of Kent at Canterbury, England)*. Professor Emeritus. Design and synthesis of novel biomimetic and oligonuclear chelates of copper, nickel, iron, ruthenium and vanadium; their interpretation by magnetochemical, electrochemical and spectroscopic methods, including electron spin resonance; CD and ESR spectroscopy and kinetics for elucidation of molecular architecture of derivatives (including NO) of oxygen-binding and electron-transfer heme- and non-heme iron metalloproteins of vertebrate and invertebrate origins; energy-transfer by Ru, Ir and lanthanide-containing molecules and assemblies.

Amar Nath, PhD *(Moscow State University, Moscow USSR)*. Professor Emeritus.

Peter A. Wade, PhD *(Purdue University)*. Professor Emeritus. Exploration of a newly discovered [3,3]-sigmatropic rearrangement in which O-allyl nitronic esters are thermally converted to #,#-unsaturated nitro compounds; development and exploitation of a carbon-based hemiacetal mimic; and exploration of cycloaddition reactions involving nitroethylene derivatives and novel nitrile oxides.

Communication

Major: Communication
Degree Awarded: Bachelor of Arts (BA)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 09.0401; 09.0900; 09.0908; 09.9999; 09.0199
Standard Occupational Classification (SOC) code: 11-2011; 11-2031; 27-3022; 27-3041; 27-3042; 27-3043

About the Program

The Department of Communication is committed to helping students become broadly educated and professionally competent communicators. Students are exposed to a variety of media and are guided in the development of their interpretive and expressive skills.

Students may complete the BA in Communication with a concentration in public relations or journalism. Those who want to keep their options open may concentrate in communication.

The Department also offers a Bachelor of Science (BS) in Communication (p. 55).

All communication majors take a common core of courses that emphasize communication theory and methods. Students in the BA program also study a modern language. Students in the public relations concentration take courses and pursue careers in public relations, event planning, media relations, social media, and corporate communication. Journalism students take courses and pursue careers as reporters, copywriters, editors, and media specialists. Students in the communication concentration have the flexibility of crafting their path through the major and thus have career possibilities in any of the areas listed here. Many communication graduates also go on to law school, business school, or graduate school.

Additional Information

If you would like to learn more about the Department of Communication, please visit the Department of Communication website (http://drexel.edu/coas/academics/departments-centers/communication/).

Degree Requirements: Communication Concentration (BA)

Students who select the communication concentration take courses in all of the existing concentrations, as well as other communication courses to prepare them for any communication-related career, or professional post-graduate options.

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

General Requirements		
CIVC 101	Introduction to Civic Engagement	1.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III

COM electives		24.0
Free electives		28.0
Total Credits		180.0-188.0

[*] Students must complete at least 8 credits of a foreign language at Drexel and, at minimum, must complete the 103 level of the target language (or beyond if they place higher).

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the

sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study: Communication Concentration (BA)

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

*   See degree requirements (p.   ).

Degree Requirements: Journalism Concentration (BA)

Journalism provides students with the skills and theoretical perspective they need to be a journalist in today's swiftly changing media environment. An extension of the program's core curriculum, the concentration hones the student's ability to write, edit, and produce

audiovisual content while at the same time exposing the student to new and evolving aspects of the field.

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Degree Requirements: Public Relations Concentration (BA)

The concentration in public relations covers a broad range of activities that help an organization and its public communicate with one another. The field includes public relations, media relations, event planning, publication design, employee and customer communication, social media, and government relations.

Skills in this field include written, oral, and visual communication. A public relations specialist might be called on to write articles for an in-house newsletter, to research and write an annual report to shareholders, to publicize a special event, to write a speech for an executive, to plan a press conference, to develop a media plan for an organization, or to script a video for an employee orientation session.

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Co-op/Career Opportunities

Public Relations Concentration

Students with a concentration in public relations find employment in a wide variety of fields, including public relations, advertising, special events planning, writing and editing, and public information. In addition, the strong communication and management skills stressed by this concentration enable students to find positions in management, human resources, marketing, consulting, and publishing.

Although graduate study is not necessary for those who pursue careers in public relations, students have used the major as a basis for graduate work in a variety of areas, including communication, business, and law.

Co-op Experiences in Public Relations

Cooperative education opportunities are available with a variety of corporations and nonprofits in such positions as corporate communication specialist, public relations assistant, and newsletter writer. The following are samples of co-op experiences:

- *Advertising and Promotions Assistant*, CoreStates Bicycle Championships, Philadelphia.
- *Corporate Communications Co-op*, Philadelphia Electric Company, Philadelphia.
- *Advertising/ Promotions Co-op*, U.S. Marketing Division, Mobil Oil Corp., Fairfax, VA.
- *Assistant Coordinator*, Communications Bureau, United Way of Southeastern Pennsylvania, Philadelphia.

Journalism Concentration

Journalism students pursue careers in journalism, broadcast media, and news. Given the rapidly changing nature of these fields, graduates may also find work in new types of publishing platforms, such as social media or mobile, or involving audiovisual content creation. Journalism graduates may also choose to pursue graduate study, whether in journalism or another discipline.

Co-op Experiences in Journalism

Journalism students have held co-ops with a number of media, news, and information companies, including the following:

- *Production assistant*, WPVI-TV (Channel 6) Philadelphia
- *Staff writer*, Delaware County Daily Times

- *Promotions department*, WPLY-FM (Y-100)
- *Production assistant*, sports department, FOX-29 (WTFX-TV)

Technical and Science Communication Concentration

Students who study technical and science communication are prepared for a variety of career options. Many students become technical writers and editors who produce manuals and reports about high-technology products and services. Students may also go on to write specifications and in-house organs for business, industry, and government. Other students conduct and interpret surveys for business. In addition, this program is excellent preparation for graduate study in a number of fields, such as law and medicine.

Co-op Experiences in Technical and Science Communication

Communication students have worked for corporations and nonprofit organizations. The following are some samples of past co-op experiences:

- *Technical writer*, Unisys Corp. and Hewlett Packard
- *Web page writer*, Hospital of the University of Pennsylvania
- *Pharmaceutical writer*, GlaxoSmithKline
- *Medical writer*, Medcases Corp.

Communication Concentration

Students in the communication concentration develop a focus that fits their interests in the field of communication and will thus be ready for a variety of career options that require strong writing and research skills, as well as graduate or professional school.

Co-op Experiences in Communication

Students in this concentration can choose from the variety of co-op opportunities open to any student in communication.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities.

Communication Faculty

Ronald Bishop, III, PhD *(Temple University) Director, Undergraduate Programs in Communication.* Professor. Investigative reporting, sports journalism, journalism history, journalism sourcing patterns, textual narrative and ideological analysis, cultural history of fame.

Joan W. Blumberg, BA *(Pennsylvania State University).* Assistant Teaching Professor. Publishing, electronic publishing, publishing and communications, publishing and mass-media.

Karen Cristiano, MS *(Temple University) Assistant Department Head of Communication.* Teaching Professor. Journalism, medical writing, feature writing, copy editing, mass media and society.

Richard Forney Assistant Teaching Professor. Broadcast journalism technology and the effects of new technologies on personal and corporate communication skills.

Alexander Friedlander, PhD *(Carnegie Mellon University) Associate Dean for Undergraduate Education, College of Arts and Sciences; Interim Co-*

Director, Judaic Studies Program. Associate Professor. Rhetorical theory and practice, document design, writing and technology.

Ernest A. Hakanen, PhD *(Temple University) Director, Graduate Programs in Communication, Culture & Media.* Professor. Telecommunications policy, adolescent media use, communication theory and history, global media, and semiotics.

Barbara Hoekje, PhD *(University of Pennsylvania).* Associate Professor. Sociolinguistic theory, discourse analysis, applied linguistics (language teaching, learning, and testing).

Alexander Jenkins, PhD *(Drexel University).* Assistant Teaching Professor. Digital games, video games, emotion, morality, online fan communities, emerging media, convergence.

Hyunmin Lee, PhD *(University of Missouri) Director, Undergraduate Programs in Communication.* Associate Professor. Social media strategies for relationship and reputation management in public relations; media messages of public health issues and its psychological and behavioral effects on the public.

Susan Magee, MFA *Director Online Teaching.* Instructor. Digital Publishing, Content reation, Blogging, Strategic Social Media, Public Relations, Business and Technical Communication

Julia May, PhD *(Drexel University) Director, Professional MS Communication Programs.* Assistant Teaching Professor. Political communication; international politics and its news coverage; public opinion; transatlantic relations; war, torture and human rights; debate in the public sphere.

Alexander Nikolaev, PhD *(Florida State University).* Associate Professor. Public relations, political communication, organizational communication, mass communication, international communications and negotiations, communications theory.

Rakhmiel Peltz, PhD *(University of Pennsylvania).* Professor. Judaic studies, Yiddish culture and linguistics, ethnography of communication, immigrant cultural studies.

Douglas V. Porpora, PhD *(Temple University).* Professor. War, genocide, torture, and human rights; macro-moral reasoning in public sphere debate; contemporary social theory moral and political communication; religion.

Rachel R. Reynolds, PhD *(University of Illinois).* Associate Professor. Sociolinguistics, ethnography of communication and discourse analysis; violence against women in mass media; political economy of migration; semiotics including the textual, the visual and multimodal.

Rosemary Rys, MA *(Rowan University).* Assistant Teaching Professor. Public relations and marketing.

Wesley Shumar, PhD *(University of Pennsylvania).* Professor. Digital media and learning; culture of higher education; entrepreneurship education; craft culture; semiotic of consumer culture.

Lawrence Souder, PhD *(Temple University) Director, Drexel Edits.* Teaching Professor. Science and technical writing, communication ethics, nonprofit communication.

Allan Stegeman, MA *(University of Houston).* Teaching Professor. Communication, technology and mass media, video.

Susan Stein, PhD *(University of Wisconsin).* Associate Teaching Professor. Science, environmental, and health communication

Scott Tattar, BA *(York College of Pennsylvania) Faculty Advisor, Drexel PRSSA, Communication Department Recruitment Liason.* Instructor. Public relations

Hilde Van den Bulck, PhD *(Katholieke Universiteit Leuven) Department Head of Communication.* Professor. Political economy of media structures; media policies for digitized media ecologies; stakeholders and coalitions in media policies; digitization; convergence and legacy media; public (service) media; celebrity culture and industry; fandom and anti-fandom.

Asta Zelenkauskaite, PhD *(Indiana University).* Associate Professor. Social media; user-generated content; computer-mediated communication; interactivity; active audience analysis; mobile communication; gender and online identity; prosumer culture; internet of things; quantitative/qualitative research.

Communication

Major: Communication
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 09.0401; 09.0900; 09.0908; 09.9999; 09.0199
Standard Occupational Classification (SOC) code: 11-2011; 11-2031; 27-3022; 27-3041; 27-3042; 27-3043

About the Program

The Department of Communication is committed to helping students become broadly educated and professionally competent communicators. Students are exposed to a variety of media and are guided in the development of their interpretive and expressive skills.

Students may complete the BS in Communication with a concentration in public relations or technical and science communication. Those who want to keep their options open may concentrate in communication.

The Department also offers a Bachelor of Arts (BA) in Communication (p. 49).

All communication majors take a common core of courses that emphasize communication theory and methods. Students in the BS program take a lab science sequence and a math analysis sequence, which includes some calculus. Students in the public relations concentration take courses and pursue careers in public relations, event planning, media relations, social media, and corporate communication. Those who choose the technical and science communication concentration go on to work in technical writing, science writing, publishing, and software and hardware documentation. Students in the communication concentration have the flexibility of crafting their path through the major and thus have career possibilities in any of the areas listed here. Many communication graduates also go on to law school, business school, or graduate school.

Additional Information

If you would like to learn more about the Department of Communication, please visit the Department of Communication website (http://drexel.edu/coas/academics/departments-centers/communication/).

Degree Requirements: Communication Concentration (BS)

Students who select the communication concentration take courses in all of the existing concentrations, as well as other communication courses to prepare them for any communication-related career, or professional post-graduate options.

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Communication Faculty

Ronald Bishop, III, PhD *(Temple University) Director, Undergraduate Programs in Communication*. Professor. Investigative reporting, sports journalism, journalism history, journalism sourcing patterns, textual narrative and ideological analysis, cultural history of fame.

Joan W. Blumberg, BA *(Pennsylvania State University)*. Assistant Teaching Professor. Publishing, electronic publishing, publishing and communications, publishing and mass-media.

Karen Cristiano, MS *(Temple University) Assistant Department Head of Communication*. Teaching Professor. Journalism, medical writing, feature writing, copy editing, mass media and society.

Richard Forney Assistant Teaching Professor. Broadcast journalism technology and the effects of new technologies on personal and corporate communication skills.

Alexander Friedlander, PhD *(Carnegie Mellon University) Associate Dean for Undergraduate Education, College of Arts and Sciences; Interim Co-Director, Judaic Studies Program*. Associate Professor. Rhetorical theory and practice, document design, writing and technology.

Ernest A. Hakanen, PhD *(Temple University) Director, Graduate Programs in Communication, Culture & Media*. Professor. Telecommunications policy, adolescent media use, communication theory and history, global media, and semiotics.

Barbara Hoekje, PhD *(University of Pennsylvania)*. Associate Professor. Sociolinguistic theory, discourse analysis, applied linguistics (language teaching, learning, and testing).

Alexander Jenkins, PhD *(Drexel University)*. Assistant Teaching Professor. Digital games, video games, emotion, morality, online fan communities, emerging media, convergence.

Hyunmin Lee, PhD *(University of Missouri) Director, Undergraduate Programs in Communication*. Associate Professor. Social media strategies for relationship and reputation management in public relations; media messages of public health issues and its psychological and behavioral effects on the public.

Susan Magee, MFA *Director Online Teaching*. Instructor. Digital Publishing, Content reation, Blogging, Strategic Social Media, Public Relations, Business and Technical Communication

Julia May, PhD *(Drexel University) Director, Professional MS Communication Programs*. Assistant Teaching Professor. Political communication; international politics and its news coverage; public opinion; transatlantic relations; war, torture and human rights; debate in the public sphere.

Alexander Nikolaev, PhD *(Florida State University)*. Associate Professor. Public relations, political communication, organizational communication, mass communication, international communications and negotiations, communications theory.

Rakhmiel Peltz, PhD *(University of Pennsylvania)*. Professor. Judaic studies, Yiddish culture and linguistics, ethnography of communication, immigrant cultural studies.

Douglas V. Porpora, PhD *(Temple University)*. Professor. War, genocide, torture, and human rights; macro-moral reasoning in public sphere debate; contemporary social theory moral and political communication; religion.

Rachel R. Reynolds, PhD *(University of Illinois)*. Associate Professor. Sociolinguistics, ethnography of communication and discourse analysis; violence against women in mass media; political economy of migration; semiotics including the textual, the visual and multimodal.

Rosemary Rys, MA *(Rowan University)*. Assistant Teaching Professor. Public relations and marketing.

Wesley Shumar, PhD *(University of Pennsylvania)*. Professor. Digital media and learning; culture of higher education; entrepreneurship education; craft culture; semiotic of consumer culture.

Lawrence Souder, PhD *(Temple University) Director, Drexel Edits*. Teaching Professor. Science and technical writing, communication ethics, nonprofit communication.

Allan Stegeman, MA *(University of Houston)*. Teaching Professor. Communication, technology and mass media, video.

Susan Stein, PhD *(University of Wisconsin)*. Associate Teaching Professor. Science, environmental, and health communication

Scott Tattar, BA *(York College of Pennsylvania) Faculty Advisor, Drexel PRSSA, Communication Department Recruitment Liason*. Instructor. Public relations

Hilde Van den Bulck, PhD *(Katholieke Universiteit Leuven) Department Head of Communication*. Professor. Political economy of media structures; media policies for digitized media ecologies; stakeholders and coalitions in media policies; digitization; convergence and legacy media; public (service) media; celebrity culture and industry; fandom and anti-fandom.

Asta Zelenkauskaite, PhD *(Indiana University)*. Associate Professor. Social media; user-generated content; computer-mediated communication; interactivity; active audience analysis; mobile communication; gender and online identity; prosumer culture; internet of things; quantitative/qualitative research.

Criminology and Justice Studies

About the Department

In what ways did the War on Drugs of the 1980s and 1990s impact urban communities in terms of street-corner dealing, violence, and overall health? What about national incarceration rates, and racial disparities in the adjudication process? How far will the War on Terrorism push the legal boundaries of government surveillance and the monitoring of electronic communications, and what will be the impacts of such forces? In what ways are "big data" being used (now and in the future) by justice, intelligence, or private organizations to identify social networks, conduct risk assessments, and make decisions about crime policy and resource deployment? Finally, what are the intersections among public health, community violence, criminal justice interventions, and housing and education policy?

Drexel University's degree programs in Criminology and Justice Studies offer a rich educational experience that emphasizes justice and criminological theory, the use of analytical tools and data to answer big questions about crime and justice while teaching students how to translate conceptual knowledge into state of the art practice. Along the way, the Department of Criminology and Justice Studies offers global educational opportunities with two courses taught abroad, a set of community-based courses that take students beyond the classroom to practice the learning process, as well as an urban educational experience in one of the premier cities in the country. With its three thematic concentrations -- Criminology and Justice Policy, Justice Informatics, and Criminal Justice -- the Department of Criminology and Justice Studies offers students many pathways through which to explore a curriculum that emphasizes innovative learning opportunities, global and civic engagement, and a culture that fosters student successes and well being.

Degree Concentrations

- Criminology & Justice Policy (p. 62)
- Justice Informatics (p. 65)
- Criminal Justice

Criminology and Justice Studies Faculty

Robert D'Ovidio, PhD *(Temple University)*. Associate Professor. The intersection of computer technology, crime and the criminal justice system, criminological theory, policing, transnational crime.

Ashley Dickinson, PhD *(Indiana University of Pennsylvania)*. Assistant Teaching Professor. Corrections; offender rehabilitation; risk management; offender classification; gender and crime.

Jordan Hyatt, PhD, JD *(University of Pennsylvania, Villanova University School of Law)*. Associate Professor. Community corrections; drug treatment; homelessness; probation/parole; re-entry; risk assessment; sentencing.

Shannon Jacobsen, PhD *(Rutgers University)*. Assistant Professor. Gender, crime and victimization, fear of crimes and perceptions of risk, campus crime, public safety, communications and crime, social inequities, mixed methods research

Robert J. Kane, PhD *(Temple University) Department Head*. Professor. Police authority and accountability; urban ecology and sociology; violence and public health; police strategies and practices.

Kathleen Powell, PhD *(Rutgers University)*. Post-Doctoral Fellow. Collateral consequences of incarceration, juvenile justice, quasi-experimental research design.

Cyndi Rickards, EdD *(Drexel University)*. Assistant Teaching Professor. On-line pedagogy; service-learning pedagogy; juvenile justice; domestic violence.

Kristene Unsworth, PhD *(University of Washington)*. Assistant Teaching Professor. Information science, policy and ethics, critical discourse analysis and qualitative methodology.

Criminology and Justice Studies

Major: Criminology and Justice Studies

Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 182.0
Co-op Options: One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 45.0401
Standard Occupational Classification (SOC) code: 11-9199

Criminology and Justice Policy concentration

About the Program

The Criminology & Justice Policy (C&JP) concentration grounds students in criminological theory and crime policy, as well as justice analytics, to help them identify, describe, and respond to current and emerging crime and security problems. A key goal of any rational crime policy is to maximize its benefits — e.g., reducing crime — while limiting its social costs, such as mass-incarceration, racial disparities, and violent backlashes. Through that lens, C&JP students will learn to map crime, calls for service, and social media posts. They will use a Geographic Information System to identify and explain crime trends, "hotspots," and "coldspots" across given geographies; and they will put their theory to use as they learn to generate and test research hypotheses related to crime and justice policy outcomes. Moreover, through community-based learning (a core value of the program), C&JP offers students the unique opportunity to experience criminology and justice education from the perspectives of those most affected by the criminal justice system: One required course is taught in an active jail; another is taught in a local community service organization.

Finally, recognizing the global nature of crime and justice issues, C&JP requires one course on international justice systems, two globally-themed courses outside the program; and it encourages all students to participate in at least one faculty-led study abroad program during which students will explore various justice-related themes (examples of recent trips: *The Legacy of Nazi Policing and Cold War Justice in Munich and Prague;* and *Crime and Justice in Scandinavia* . Please see the Study Abroad Program (https://studyabroad.drexel.edu/?FuseAction=Programs.ListAll) web page to view the location and itinerary of the 2019 study tour.). The emphasis on comparative justice and study abroad reside at the leading edge of Drexel's core value of global citizenship.

The Criminology & Justice Policy thematic concentration reserves 31.0 credits of free electives so that students can earn a minor outside the Program in Criminology and Justice Studies. Students interested in intelligence/security-related careers should consider minoring in a language. Visit Drexel's Modern Languages Program (http://www.drexel.edu/coas/academics/departments-centers/global-studies-modern-languages/degrees-programs/modern-languages/) web page for a list of language minors.

Additional Information

For more information about the Criminology & Justice Policy concentration, please contact:

Criminology and Justice Policy concentration

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Degree Requirements

General Degree Requirements

ANTH 101	Introduction to Cultural Diversity	3.0
CIVC 101	Introduction to Civic Engagement	1.0
COM 150	Mass Media and Society	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
PHIL 101	Introduction to Western Philosophy	3.0
PSCI 100	Introduction to Political Science	4.0
PSY 101	General Psychology I	3.0
SOC 101	Introduction to Sociology	3.0
UNIV H101	The Drexel Experience	1.0
UNIV H201	Looking Forward: Academics and Careers	1.0
English Elective (any ENGL course over 200-level)		3.0
Fine Arts Elective		3.0
History Elective		4.0

Math Sequence

Take any two Math courses		6.0-8.0

Science Sequence

Take any two Science courses with a lab from any combination of Biology, Chemistry, and Physics		8.0

Program in Criminology and Justice Studies Core Requirements

CJS 100	Freshman Seminar in Crime and Justice	3.0
CJS 101	Introduction to Criminal Justice	3.0
CJS 200	Criminology	3.0
CJS 210	Race, Crime, and Justice	3.0
CJS 220	Crime and the City	3.0
CJS 260	Justice in Our Community	4.0
CJS 261	Prison, Society and You	3.0
CJS 290	Crime and Public Policy	3.0
CJS 375	Criminal Procedure	3.0
CJS 376	Sentencing	3.0
PHIL 330	Criminal Justice Ethics	3.0

Global Perspectives

Any courses across the university whose descriptions are global and/or comparative		6.0

Methods and Analytics Sequence

CJS 250	Research Methods & Analytics I	3.0
CJS 300	Research Methods and Analytics II	3.0
CJS 301	Methods and Analytics III	4.0

	Term Credits	13.0

Total Credit: 182.0-184.0

Criminology and Justice Policy concentration

Professional Experiences

Students will complete one co-op (i.e., professional placement), typically during the spring and summer quarters of their Junior year. When they return for the start of their senior year, they can immediately begin their (impending) post-graduation job search with their co-op experience still recent on their resume. Some placements are paid (usually in the private sector) and others are unpaid (primarily in the public sector). The placements earn students academic credit while providing professional socialization and learning with crime and justice professionals. The networking aspects of these placements are invaluable for future career development. In addition to the learning experiences, past students have received excellent letters of recommendation for future employment agencies and for graduate and law school admissions.

In recent years, students have been placed in local agencies such as the District Attorney's Office, the Institutional Law Project, the Juvenile Law Center, the Defendants Association of Philadelphia, the Philadelphia and Bucks County Prison Systems and the Pennsylvania Prison Society, Pennsylvania and New Jersey State Police. Several students have done co-ops and later worked full time at the Eastern State Penitentiary Historical Site and Museum. On the state level, co-op students have worked with the Board of Probation & Parole and other agencies. At the federal level, The US Customs Service had an agreement to accept cooperative education placements after having been screened by faculty. The faculty in Criminology and Justice Studies has been working over the past few years to expand its list of research co-ops (primarily for students working toward graduate school) and international co-ops.

Criminology and Justice Studies Faculty

Robert D'Ovidio, PhD *(Temple University)*. Associate Professor. The intersection of computer technology, crime and the criminal justice system, criminological theory, policing, transnational crime.

Ashley Dickinson, PhD *(Indiana University of Pennsylvania)*. Assistant Teaching Professor. Corrections; offender rehabilitation; risk management; offender classification; gender and crime.

Jordan Hyatt, PhD, JD *(University of Pennsylvania, Villanova University School of Law)*. Associate Professor. Community corrections; drug treatment; homelessness; probation/parole; re-entry; risk assessment; sentencing.

Shannon Jacobsen, PhD *(Rutgers University)*. Assistant Professor. Gender, crime and victimization, fear of crimes and perceptions of risk, campus crime, public safety, communications and crime, social inequities, mixed methods research

Robert J. Kane, PhD *(Temple University) Department Head*. Professor. Police authority and accountability; urban ecology and sociology; violence and public health; police strategies and practices.

Kathleen Powell, PhD *(Rutgers University)*. Post-Doctoral Fellow. Collateral consequences of incarceration, juvenile justice, quasi-experimental research design.

Cyndi Rickards, EdD *(Drexel University)*. Assistant Teaching Professor. On-line pedagogy; service-learning pedagogy; juvenile justice; domestic violence.

Kristene Unsworth, PhD *(University of Washington)*. Assistant Teaching Professor. Information science, policy and ethics, critical discourse analysis and qualitative methodology.

Classification of Instructional Programs (CIP) code: 45.0401
Standard Occupational Classification (SOC) code: 11-9199

Justice Informatics Concentration

Program Description

With its thematic concentration in Justice Informatics (JI), Drexel University has transformed the traditional criminal justice degree program to produce graduates who possess knowledge and skills that are highly valued by criminal justice agencies in the 21st century. Namely, the program draws from criminology and criminal justice and computing and informatics to produce globally aware and technology proficient graduates who bring an analytical and information-led approach to solving the problems crime creates for society.

Each exposure to the criminal justice system represents a data collection point, which becomes part of a massive and disparate array of data held by the government. Students will learn how to collect, manage, visualize, and analyze large sources of information so that they can bring their expertise into the crime and justice occupational arena and/or graduate school. In addition to learning to work with "big" data in the public justice arena, students will learn how to identify, collect, manage, and use data from the expansive -- and rapidly growing -- private system of justice and security to creative innovative solutions for identifying, solving, and preventing crime.

Graduates of Drexel's Justice Informatics concentration will be ideally suited to meet the demands of the growing job market for crime analysts among criminal justice, defense, and intelligence agencies and in the private-sector security community. Crime analysts have become an essential part of the modern criminal justice agency. They have become vital to, for example, the large police department looking to deploy resources in a manner that matches crime trends, the intelligence agency working to prevent terrorist events, and the financial services firm hoping to identify the fraudulent use of a credit card. JI graduates can also play an integral role on teams that build future information technology solutions for intelligence, defense, and criminal justice agencies from the public and private sectors.

Given the global nature of crime and justice issues, JI requires one course on international justice systems; and it encourages all students to participate in at least one faculty-led study abroad program during which students will explore various justice-related themes (examples of recent trips: *The Legacy of Nazi Policing and Cold War Justice in Munich and Prague;* and *Crime and Justice in Scandinavia.* Please visit the Study Abroad Program (https://studyabroad.drexel.edu/?FuseAction=Programs.ListAll) web page to view the location and itinerary of the 2019 study tour). The emphasis on comparative justice and study abroad reside at the leading edge of Drexel's core value of global citizenship.

The Justice Informatics thematic concentration reserves 27.0 credits of free electives so that students can earn a minor outside the Program in Criminology and Justice Studies. Students interested in intelligence/security-related careers should consider minoring in a language. Visit Drexel's Modern Languages Program (http://www.drexel.edu/culturecomm/academics/undergraduate/modernlang/languages/) web page for a list of language minors.

Additional Information

For more information about the Justice Informatics concentration, please contact:

Robert D'Ovidio, PhD
Associate Professor of Criminology and Justice Studies

Justice Informatics Concentration

Professional Experiences

Students will complete one co-op (i.e., professional placement), typically during the spring and summer quarters of their Junior year. This way, when they return for the start of their senior year, they can immediately begin their (impending) post-graduation job search with their co-op experience still recent on their resume. Some placements are paid (usually in the private sector) and others are unpaid (primarily in the public sector).

 The placements earn students academic credit while providing professional socialization and learning with crime and justice professionals. The networking aspects of these placements are invaluable for future career development. In addition to the learning experiences, past students have received excellent letters of recommendation for future employment agencies and for graduate and law school admissions.

In recent years, students have been placed in local agencies such as the District Attorney's Office, the Institutional Law Project, the Juvenile Law Center, the Defendants Association of Philadelphia, the Philadelphia and Bucks County Prison Systems and the Pennsylvania Prison Society, Pennsylvania and New Jersey State Police. Several students have co-op'd and later worked full time at the Eastern State Penitentiary Historical Site and Museum. On the state level, co-op students have worked with the Board of Probation & Parole and other agencies. At the federal level, The US Customs Service had an agreement to accept cooperative education placements after having been screened by faculty. The faculty in Criminology and Justice Studies has been working over the past few years to expand its list of research co-ops (primarily for students working toward graduate school) and international co-ops.

Standard Occupational Classification (SOC) code: 11-9199

Criminal Justice Concentration

The Criminal Justice concentration is housed in the Department of Criminology and Justice Studies and was designed as the most flexible of our three concentrations. The Criminal Justice concentration focuses its curriculum primarily on the substance of criminal justice institutions and crime and does not require many of the analytics and computer-based courses that the other two concentrations require. This concentration is primarily intended for students seeking to double major, prepare for law school, take on multiple minors (e.g., a language and legal studies), or for students who desire a traditional criminal justice education. Because the Criminal Justice concentration reserves 41.0 credits of free electives, it easily allows students to explore a wide range of curriculum opportunities throughout Drexel. Students in the Criminal Justice concentration often double major in Psychology, Behavioral Health, Legal Studies, Business, and Global Studies; and they often take on a language minor. Moreover, although the Criminal Justice concentration does not require most of the analytical courses (e.g., Crime Mapping using Geographic Information Systems) as the other two concentration, it does allow students to take any number of those courses as electives while they pursue other curricular pathways.

The Criminal Justice concentration offers the same community-based learning and global perspective courses as the other two concentrations. Students in all three concentrations are encouraged to participate in at least one faculty-led study abroad program during which students will explore various justice related themes. Recent trips have been *The Legacy of Nazi Policing in Munich and Prague;* and *Crime and Justice in Scandinavia*. Please see the Study Abroad Program (https://studyabroad.drexel.edu/?FuseAction=Programs.ListAll) web page to view the location and itinerary of the 2019 study tour. The emphasis on comparative justice and study abroad reside at the leading edges of Drexel's core value of global citizenship.

Criminal Justice Concentration

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

On the state level, co-op students have worked with the Board of Probation & Parole and other agencies. At the federal level, the US Customs Service had an agreement to accept cooperative education placements after having been screened by faculty. The faculty in Criminology and Justice Studies has been working over the past few years to expand its list of research co-ops (primarily for students working toward graduate school) and international co-ops.

Criminology and Justice Studies Faculty

Robert D'Ovidio, PhD *(Temple University).* Associate Professor. The intersection of computer technology, crime and the criminal justice system, criminological theory, policing, transnational crime.

Ashley Dickinson, PhD *(Indiana University of Pennsylvania).* Assistant Teaching Professor. Corrections; offender rehabilitation; risk management; offender classification; gender and crime.

Jordan Hyatt, PhD, JD *(University of Pennsylvania, Villanova University School of Law).* Associate Professor. Community corrections; drug treatment; homelessness; probation/parole; re-entry; risk assessment; sentencing.

Shannon Jacobsen, PhD *(Rutgers University).* Assistant Professor. Gender, crime and victimization, fear of crimes and perceptions of risk, campus crime, public safety, communications and crime, social inequities, mixed methods research

Robert J. Kane, PhD *(Temple University) Department Head.* Professor. Police authority and accountability; urban ecology and sociology; violence and public health; police strategies and practices.

Kathleen Powell, PhD *(Rutgers University).* Post-Doctoral Fellow. Collateral consequences of incarceration, juvenile justice, quasi-experimental research design.

Cyndi Rickards, EdD *(Drexel University).* Assistant Teaching Professor. On-line pedagogy; service-learning pedagogy; juvenile justice; domestic violence.

Kristene Unsworth, PhD *(University of Washington).* Assistant Teaching Professor. Information science, policy and ethics, critical discourse analysis and qualitative methodology.

English

Major: English
Degree Awarded: Bachelor of Arts (BA)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 23.9999
Standard Occupational Classification (SOC) code: 25-1123

About the Program

The English curriculum focuses on three areas:

- A rich **Academic Core** grounded in disciplinary expertise that promotes literary exploration, sophisticated textual literacy, excellent writing, and other transferable skills;
- **Applied Learning** opportunities using skills in research, interpretation, analysis, and writing to solve real-world problems;
- Opportunities for **Civic Engagement**, connecting with community partners to promote social justice and the common good.

Our flexible curriculum offers two tracks: in Literary Studies and in Writing. We study British, American, and World literatures, stressing the cultural, historical, and political contexts that shape literary production. Courses in creative and professional writing are reinforced by opportunities for hands-on experience in writing, editing, and publishing.

The Department of English and Philosophy (http://www.drexel.edu/coas/academics/departments-centers/english-philosophy/) offers an intellectually stimulating learning experience that embraces opportunities in Philadelphia, in our region, and across the world. Our dedicated and award-winning faculty enable creativity and rigor within a supportive environment.

Students develop solid techniques in critical inquiry as well as in writing, literary analysis, and research skills. We engage issues critical to success in the twenty-first century: the connection between oral, written, and digital modes; analytical, ethical, and critical thinking; the relevance and relation of the past to the present; the relations between and among cultures; the role of literary and philosophical texts in our attempts to explain human motives and behavior; issues of personal and communal identity; and the connection of the literary arts to social change.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

UNIV H201	Looking Forward: Academics and Careers	1.0
Mathematics courses for a minimum of 6.0 credits		6.0
Science courses for a minimum of 6.0 credits		6.0
Language requirement (2 consecutive courses, reaching at least 103)		8.0
Social and Behavioral Science courses for a minimum of 12 credits		12.0
Humanities courses (other than ENGL or WRIT) for a minimum of 6 credits		6.0
International Studies courses for a minimum of 6 credits		6.0
Studies in Diversity courses for a minimum of 6 credits		6.0

MAJOR REQUIREMENTS (30-credit CORE plus 36-credit concentration either in LITERARY STUDIES or in WRITING)

Core Courses, Required for All Concentrations		**30.0**
ENGL 195	English Freshman Seminar	
ENGL 207 [WI]	African American Literature	
ENGL 301	English Major Colloquium (1-credit course, repeat twice for 3 credits total)	
ENGL 315 [WI]	Shakespeare	
ENGL 325	Topics in World Literature	
ENGL 355 [WI]	Women and Literature	
ENGL 495	Senior Project in Literature	
WRIT 195	Threshold Concepts in Writing	
WRIT 200	Language Puzzles and Word Games: Issues in Modern Grammar	
WRIT 225 [WI]	Creative Writing	
Concentration in LITERARY STUDIES or in WRITING		**36.0**
A) Literary Studies Concentration (36 credits)		

Literature Surveys - Select 4 for a minimum of 12 credits

ENGL 200 [WI]	Classical to Medieval Literature
ENGL 201	Renaissance to the Enlightenment
ENGL 202 [WI]	Romanticism to Modernism
ENGL 203 [WI]	Survey of World Literature
ENGL 204	Post-Colonial Literature
ENGL 205 [WI]	American Literature I
ENGL 206 [WI]	American Literature II
ENGL 211 [WI]	British Literature I
ENGL 212	British Literature II

Authors and Periods - Select 1 for a minimum of 3 credits

ENGL 310 [WI]	Period Studies
or ENGL 32	Major Authors

Literary Impacts - Select 1 for a minimum of 3 credits

ENGL 300 [WI]	Literature & Science
or ENGL 32	Literature and Other Arts
or ENGL 36	Literature and Society

Literary Traditions - Select one for a minimum of 3 credits

ENGL 330	The Bible as Literature
or ENGL 33	Mythology

Literary Theory - 3 credits

ENGL 380	Literary Theory

Literature Seminars - Take both for a minimum of 6 credits

ENGL 490	Seminar in English and American Literature
ENGL 492	Seminar in World Literature

English Electives - minimum of 6 credits

Choose any additional 2 courses (300+) in ENGL or WRIT for a minimum of 6 credits

B) Writing Concentration

Foundations - Select 1 for a minimum of 3 credits

WRIT 210 [WI]	The Peer Reader in Context
or WRIT 21	Advanced Composition

Rhetoric and Technique - Select 1 for a minimum of 3 credits

WRIT 212	Argument and Rhetoric
or WRIT 29	Forms Seminar

Audience Awareness - Select 1 for a minimum of 3 credits

WRIT 312 [WI]	Writing for Target Audiences
or WRIT 31	Writing for Social Change

Writing Practices - Select 7 additional courses for a minimum of 21 credits (at least 5 must be WRIT or ENGL courses)

COM 160	Introduction to Journalism
COM 270 [WI]	Business Communication
COM 310 [WI]	Technical Communication
COM 375 [WI]	Grant Writing
ENGL 312	Research Project Development
SCRP 220	Playwriting I
SCRP 270 [WI]	Screenwriting I
WRIT 210 [WI]	The Peer Reader in Context
WRIT 211	Advanced Composition
WRIT 212	Argument and Rhetoric
WRIT 215 [WI]	Story Medicine
WRIT 220 [WI]	Creative Nonfiction Writing
WRIT 226	Writing in Public Spaces
WRIT 250	"Mistakes Were Made": Truth, Writing, and Responsibility
WRIT 295	Forms Seminar
WRIT 301 [WI]	Writing Poetry
WRIT 302 [WI]	Writing Fiction
WRIT 303	Writing Humor and Comedy
WRIT 305	Life is Beautiful
WRIT 306	Writing About the Media
WRIT 310	Literary Editing & Publication

WRIT 311	Writing and Reading the Memoir	
WRIT 312 [WI]	Writing for Target Audiences	
WRIT 315	Writing for Social Change	
WRIT 400 [WI]	Writing for -- and about -- the Web	
WRIT 401	Advanced Poetry Workshop	
WRIT 405	Internship in Publishing	
WRIT T380	Special Topics in Writing	
English Electives - minimum of 6 credits		
Choose any additional 2 courses (300+) in WRIT or ENGL for a minimum of 6 credits		
FREE ELECTIVES		**52.0**
Choose 52 credits from any discipline. Consider a second major or minor, or education certification.		
Total Credits		180.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Term 1		Credits
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
ENGL 195	English Freshman Seminar	3.0
UNIV H101	The Drexel Experience	1.0
Foreign Language Course (1st consecutive course)		4.0
Math elective		3.0
Social/Behavorial Sciences elective		3.0
	Term Credits	17.0
Term 2		
CIVC 101	Introduction to Civic Engagement	1.0
ENGL 102 or 112	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing English Composition II	3.0
WRIT 200	Language Puzzles and Word Games: Issues in Modern Grammar	3.0
Foreign Language Course (2nd consecutive course, at least 103-level)		4.0
Math elective		3.0

Social/Behavioral Science elective		3.0
	Term Credits	17.0
Term 3		
ENGL 103 or 113	Composition and Rhetoric III: Themes and Genres English Composition III	3.0
ENGL 207 [WI]	African American Literature	3.0
WRIT 195	Threshold Concepts in Writing	3.0
Social/Behavioral Science		3.0
Science Elective		3.0
	Term Credits	15.0
Term 4		
ENGL 301	English Major Colloquium (1st of 3)	1.0
WRIT 225 [WI]	Creative Writing	3.0
Literature Survey - 1st of 4		3.0
Science elective		3.0
International Studies elective		3.0
Social/Behavioral Sciences		3.0
	Term Credits	16.0
Term 5		
Literature Survey - 2nd of 4		3.0
Literature Survey - 3rd of 4		3.0
Diversity Studies		3.0
International Studies elective		3.0
Humanities elective		3.0
	Term Credits	15.0
Term 6		
ENGL 301	English Major Colloquium (2nd of 3)	1.0
ENGL 315 [WI]	Shakespeare	3.0
Literature Survey - 4th of 4		3.0
Diversity Studies		3.0
Humanities elective		3.0
Free elective		3.0
	Term Credits	16.0
Term 7		
ENGL 325	Topics in World Literature	3.0
ENGL 310 [WI] or 320 [WI]	Period Studies Major Authors	3.0
Free electives		9.0
	Term Credits	15.0
Term 8		
ENGL 301	English Major Colloquium (3rd of 3)	1.0
ENGL 330 or 335	The Bible as Literature Mythology	3.0
ENGL 355 [WI]	Women and Literature	3.0
Free electives		6.0
	Term Credits	13.0
Term 9		
ENGL 300 [WI] , 323, or 360 [WI]	Literature & Science Literature and Other Arts Literature and Society	3.0
ENGL 380	Literary Theory	3.0
Free electives		9.0
	Term Credits	15.0
Term 10		
ENGL 490	Seminar in English and American Literature	3.0
UNIV H201	Looking Forward: Academics and Careers	1.0
English elective (ENGL or WRIT)		3.0
Free electives		9.0
	Term Credits	16.0
Term 11		
ENGL 492	Seminar in World Literature	3.0
English elective		3.0

Free electives		6.0
	Term Credits	12.0
Term 12		
ENGL 495	Senior Project in Literature	3.0
Free electives		10.0
	Term Credits	13.0

Total Credit: 180.0

*   See degree requirements (p. 70).

Co-op/Career Opportunities

English majors pursue a range of professions. Many go on to law school or graduate studies. Others build careers in business, politics and government, education, digital and popular media, publishing, and communications. The critical thinking, analytical, and writing skills provided by our program are essential for high-level decision-making and problem solving in any professional situation.

At Drexel, English majors gain valuable work experience through co-op employment and internship opportunities. They work as writers, analysts, and researchers at major corporations, Philadelphia-area museums, city government and visitors' bureaus, television and radio stations, law firms, and nonprofit organizations.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) for more detailed information on co-op and post-graduate opportunities.

English Faculty

Jan Armon, PhD *(University of Michigan).* Associate Teaching Professor. Academic functions of personal writing, composition.

Kenneth Bingham, MA *(Temple University).* Teaching Professor. First-year writing; engineering ethics; literature of baseball.

Valerie Booth, PhD *(Emory University).* Associate Teaching Professor.

André Carrington, PhD *(New York University).* Associate Professor. Cultural politics of race, gender and genre; feminism criticism; critical race theory.

Paula Marantz Cohen, PhD *(Columbia University) Distinguished Professor, Dean of the Pennoni Honors College.* Co-editor,Journal of Modern Literature; Host of the Drexel Interview. Nineteenth- and early twentieth-century English and American literature; film studies.

Lisa DiMaio, MEd *(Temple University).* Teaching Professor. English as a second language

Dan Driscoll, MA *(Temple University) Associate Director University Writing Program.* Teaching Professor. Associate Director, University Writing Center: Curricular Initiatives. Co-Director, Minor in Writing. First-year writing.

Anne Erickson, PhD *(Purdue University).* Assistant Teaching Professor. Online educational applications; the short story cycle.

Nomi Eve, MFA *(Brown University) Director of the Creative Writing MFA Program.* Assistant Teaching Professor.

Robert Finegan, MFA *(University of Pittsburgh).* Associate Teaching Professor. First-year writing; technical and creative writing.

Alexis Finger, MS *(Queens College, CUNY).* Associate Teaching Professor. Speech; ESL; oral communication.

Valerie Fox, PhD *(SUNY at Binghamton).* Teaching Professor. Founding Editor, Press 1. Twentieth century drama; modern and contemporary American poetry; first-year writing.

Edward Fristrom, PhD *(State University of New York-Albany).* Associate Teaching Professor. Professional writing, creative writing, multimedia, and writing education.

Keunah Han, PhD *(Temple University).* Associate Teaching Professor. English as a Second Language (ESL)

Cassandra Hirsch, MFA *(Rosemont College).* Associate Teaching Professor. Fiction.

Gabriella Ibieta, PhD *(City University of New York) Director, Programs in English.* Associate Professor. Comparative literature; Cuban and Latin American fiction.

Henry Israeli, MFA *(University of Iowa).* Associate Teaching Professor. Founder and editor of Saturnalia Books, a publisher of contemporary poetry.

Kirsten Kaschock, PhD *(University of Georgia).* Associate Teaching Professor. Creative writing (poetry and prose).

Elizabeth Kimball, PhD *(Temple University).* Assistant Professor. College writing, civic engaged learning, multi lingual and trans lingual practice, history and theory of rhetoric, public and community writing,18th and 19th century U.S. rhetorical history

Miriam Kotzin, PhD *(New York University).* Professor. Founding Editor, Per Contra. American literature; genre studies; creative writing; communications.

Roger Kurtz, PhD *(University of Iowa) Department Head.* Professor. Postcolonial and world literatures

Stephen Mandell, PhD *(Temple University).* Professor. First-year writing; technical writing; speech; American literature.

Deirdre McMahon, PhD *(University of Iowa).* Teaching Professor. 19th-century British literature and culture: empire, critical race studies and analyses of material culture.

Marianallet Mendez-Rivera, PhD *(University of Minnesota).* Assistant Teaching Professor. Use of the mass media to secure, maintain and enhance political power; international technical communication—including issues of translation v. localization.

Harriet Levin Millan, MFA *(University of Iowa) Director, Certificate in Writing and Publishing.* Associate Teaching Professor. Poetry.

Jill Moses, MFA *(University of Oregon).* Associate Teaching Professor. Dramatic literature; first-year writing.

Christopher T. Nielson, PhD *(Purdue University).* Teaching Professor. Shakespeare; Renaissance drama and literature; dramatic literature; first-year writing.

Karen Nulton, PhD *(Rutgers University) Director, Writing Assessment.* Teaching Professor. Writing assessment, writing pedagogy, and writing across the curriculum.

Margene Peterson, MA *(Rhode Island School of Design)*. Assistant Teaching Professor. English as a Second Language (ESL); the learning styles and strategies of non-native speakers of English.

Maegan Poland, PhD *(University of Nevada, Las Vegas)*. Assistant Teaching Professor. Creative writing; first-year writing

Abioseh Porter, PhD *(University of Alberta, Canada)*. Professor. Comparative literature; postcolonial literatures

Donald Riggs, PhD *(University of North Carolina-Chapel Hill)*. Teaching Professor. Cinematic monsters; science fiction and fantasy literature and film; Renaissance literature; creative writing; first-year writing.

Donna Rondolone, PhD *(University of Pennsylvania)*. Associate Teaching Professor. Medieval literature; Arthurian legend; first-year writing.

Gail Rosen, JD *(Temple University)*. Teaching Professor. Literature and law; first-year writing.

Doreen Alvarez Saar, PhD *(SUNY Buffalo)*. Professor. Early American literature; Eighteenth-century America; race and gender studies.

Sheila Sandapen, PhD *(Indiana University of Pennsylvania) Assistant Director, First Year Writing Program*. Associate Teaching Professor. First-year writing; cultural studies; women's studies; history and film.

Fred A. Siegel, PhD *(New York University) Director, First-Year Writing Program*. Teaching Professor. Popular theater; dramatic literature, creative non-fiction; first-year writing.

Scott Stein, MFA *(University of Miami) Director, Drexel Publishing Group*. Teaching Professor. Creative writing; first-year writing; Founding Editor, When Falls the Coliseum: A Journal of American Culture (Or Lack Thereof).

Eva Thury, PhD *(University of Pennsylvania)*. Associate Professor. Mythology; classical literature; drama; first-year writing; desktop publishing and software documentation.

Kathleen Volk Miller, MA *(Rutgers University)*. Teaching Professor. Co-Editor,Painted Bride Quarterly (PBQ); creative writing; first-year writing.

Maria Volynsky, EdD *(Temple University) Associate Director, First-Year Writing Program; ESL Coordinator*. Associate Teaching Professor. English as a Second Language (ESL).

Scott Warnock, PhD *(Temple University) Director, Drexel Writing Center; Director, University Writing Program*. Professor. Rhetoric and composition; medical writing; information technology and literacy.

Robert A. Watts, MA *(Temple University)*. Associate Teaching Professor. Creative writing; first-year writing.

Vincent Williams, PhD *(Temple University)*. Associate Teaching Professor. First-year writing; the intersection of race, gender, class and urbanism.

Jennifer Yusin, PhD *(Emory University)*. Associate Professor. Postcolonial literature; trauma theory; literary theory; psychoanalysis, and memory studies in contemporary literature in English.

Emeritus Faculty

Valarie Arms, PhD *(Temple University)*. Professor Emeritus. Rhetoric and Composition

Richard Astro, PhD *(University of Washington) Distinguished Professor*. Provost Emeritus. Twentieth-century American literature; literature and sports.

Raymond Brebach, PhD *(University of Illinois)*. Professor Emeritus. Modern British fiction; the novel; textual studies.

Environmental Science

Major: Environmental Science
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 182.5
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: *03.0104*
Standard Occupational Classification (SOC) code: *19-2041*

About the Program

The environmental science program at Drexel University is committed to educating undergraduates for technical careers and graduate study in the diverse areas of environmental science vital to understanding, conservation and restoration of clean and healthy natural environments in the 21st century. The affiliation between the Academy of Natural Sciences (https://ansp.org/) and Drexel University offers students unique opportunities to take a leadership role in ecology, environmental science and environmental policy, and to grow the scope, capacity and reputation of the natural sciences at the University. The philosophy of the Biodiversity, Earth, and Environmental Science Department is *"Experiential Learning Early and Often."*

Environmental science is a multidisciplinary field designed to examine environmental problems and find solutions. This field requires understanding of a number of disciplines, including biology, physics and chemistry. Solving some of our environmental problems also requires knowledge of environmental policy, ethics, and scientific data analysis.

The program has an integrated curricular approach designed around student laboratory and field investigations. The goal of this program is to give students not only knowledge about biology, chemistry, and ecology but also the ability to use the tools and skills of a scientist. The program includes extensive use of computers in the laboratory, and students make frequent oral and written presentations based on their laboratory projects.

Field experience electives may include trips to local aquatic and terrestrial habitats such as streams, lakes, the John Heinz National Wildlife Refuge, New Jersey Pine Barrens, Delaware, Barnegat and Chesapeake Bays, and the Appalachian Mountains. Students are also encouraged to take advantage of study abroad (http://www.drexel.edu/studyabroad/) options, including ENVS field courses. These programs often require early planning so it is advisable for interested students to speak to their advisor about opportunities in their first year.

Concentrations are available in:

- Biodiversity and Evolution
- Ecology & Conservation
- Environmental Science

Additional Information

For more information about the program, visit the Department of Biodiversity, Earth & Environmental Science's (http://www.drexel.edu/coas/academics/departments-centers/bees/) web page.

Susan Cole
Undergraduate Advisor
Environmental Science
coless@drexel.edu or email bees@drexel.edu.

Degree Requirements

The program is designed to prepare students for careers in environmental science, environmental assessment, marine science, basic and applied ecology, biodiversity, evolutionary biology, and conservation and paleontology. The requirements for specific concentrations in biodiversity and evolution; earth science; ecology & conservation; and environmental science follow the list of degree requirements.

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Degree Requirements

Humanities and Social Science		
COM 230	Techniques of Speaking	3.0
COM 310 [WI]	Technical Communication	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
PHIL 340	Environmental Ethics	3.0
or PHIL 341	Environmental Philosophy	
Humanities/Social Science electives		6.0
CIVC 101	Introduction to Civic Engagement	1.0
UNIV S101	The Drexel Experience	1.0
UNIV S201	Looking Forward: Academics and Careers	1.0
Mathematics and Statistics		**18.0**
Select one of the following sequences:		
Calculus sequence		
MATH 121	Calculus I	
MATH 122	Calculus II	
MATH 123	Calculus III	
Analysis sequence		
MATH 101	Introduction to Analysis I	
MATH 102	Introduction to Analysis II	
MATH 239	Mathematics for the Life Sciences	
Additional required mathematics courses:		
MATH 410	Scientific Data Analysis I	
MATH 411	Scientific Data Analysis II	
Physical Sciences		
CHEM 101	General Chemistry I	3.5
CHEM 102	General Chemistry II	4.5
CHEM 103	General Chemistry III	5.0
Choose two chemistry electives from:		5.0-7.0
CHEM 241	Organic Chemistry I	
ENVS 302	Environmental Chemistry Laboratory	
ENVS 310	Introduction to Environmental Chemistry	

Physics sequence		
PHYS 152	Introductory Physics I	4.0
PHYS 153	Introductory Physics II	4.0
PHYS 154	Introductory Physics III	4.0
Biological Sciences		
BIO 122	Cells and Genetics	4.5
BIO 124	Evolution & Organismal Diversity	4.5

Total Credits		182.5-186.5

Environmental Science Concentrations

Each concentration has four required courses. In addition, the department maintains a menu of electives specific to each concentration. Check with the department for selecting the appropriate 12.0 - 16.0 credits of Environmental Science electives.

Biodiversity & Evolution Concentration

Required Courses		
BIO 244	Genetics I	3.0
ENVS 312	Systematic Biology	3.0
ENVS 438	Biodiversity	3.0
ENVS 470	Advanced Topics in Evolution	3.0
Total Credits		12.0

Ecology & Conservation Concentration

Required Courses		
ENVS 284	Physiological and Population Ecology	3.0
ENVS 286	Community and Ecosystem Ecology	3.0
ENVS 328	Conservation Biology	3.0
Ecology & Conservation elective		3.0
Total Credits		12.0

Environmental Science Concentration

Required Courses		
ENSS 283	Introduction to Environmental Policy	3.0
ENVS 275	Global Climate Change	3.0

ENVS 284	Physiological and Population Ecology	3.0
or ENVS 286	Community and Ecosystem Ecology	
ENVS 310	Introduction to Environmental Chemistry	3.0
Total Credits		12.0

Notes about Environmental Science Opportunities:

- Field experience electives include quantitative environmental measurements in local aquatic and terrestrial habitats, such as streams, lakes, the Delaware Bay, the Poconos, and the New Jersey Pine Barrens (for example, Field Botany: NJ Pine Barrens; Ecology of the Pine Barrens; Marine Field Methods).
- Students are required to consult frequently with their academic advisors for curriculum planning. Many of the graduate courses in environmental science are also open to qualified seniors who wish to become familiar with some of the applications in the field. Prerequisites and descriptions of available graduate courses appear in the graduate catalog.
- The Equatorial Guinea: Bioko Island Study Abroad Program offers a unique opportunity for undergraduates and recent graduates to study tropical biodiversity and its conservation, with an emphasis on field work that takes advantage of Bioko Island's pristine rainforests ranging from sea level to over 10,000 feet in altitude, its seven species of rare monkeys and its four species of nesting sea turtles. For more information, please visit the Drexel Study Abroad Office (http://www.drexel.edu/studyabroad/).

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

The plan of study below is a generic plan, suited for all four concentrations. Contact the program advisor for additional details.

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Term 1		Credits
CHEM 101	General Chemistry I	3.5
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
ENVS 101	Introduction to Environmental Science	5.0
MATH 101 or 121	Introduction to Analysis I Calculus I	4.0
UNIV S101	The Drexel Experience	1.0

Co-op/Career Opportunities

Environmental scientists pursue careers in environmental assessment, environmental health, ecology, conservation, marine science, and atmospheric science.

Co-op Opportunities

Co-op and research opportunities will be available with the scientists at the Academy of Natural Sciences (http://www.ansp.org/). In addition, recent co-op experiences have included:

CHPlanning, Center City Philadelphia
Lakes Environmental Assn., Maine
US Environmental Protection Agency, Center City Philadelphia
Criterion Lab Inc, Philadelphia PA Suburbs
Philadelphia Water Department, Philadelphia
Temple University, Philadelphia
Fairway Testing Co., NYC
University of Alaska, Fairbanks, Alaska
Bioko Biodiversity Protection Program, Equatorial Guinea
React Environmental Professional Services Group Inc., Philadelphia
Air Management Services, Philadelphia
Exelon Corporation, Philadelphia

Graduate Opportunities

Graduates in this major typically work for government environmental agencies, in environmental consulting firms, and in environmental departments of various industries. Additional training at the graduate level is an option for many students.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities.

Environmental Science Faculty

Ted Daeschler, PhD *(University of Pennsylvania) Associate Curator of Vertebrate Zoology; Vice President for Systematic Biology and the Library: Academy of Natural Sciences.* Associate Professor. Vertebrate fauna of the Late Devonian Period in eastern North America; fossil collecting; systematic work focusing on freshwater vertebrates; nature of early non-marine ecosystems.

Jon Gelhaus, PhD *(University of Kansas) Curator, Department of Entomology: Academy of Natural Sciences.* Professor. Systematic expertise in crane flies (Tipuloidea); phylogenetic reconstruction; historical and ecological biogeography; biodiversity measures and evolution of morphological character systems.

Danielle Kreeger, PhD *(Oregon State University).* Research Associate Professor. Trophic interactions in aquatic ecosystems.

Stefanie Kroll, PhD *(SUNY College of Environmental Science and Forestry) Project Science Director, Academy of Natural Sciences.* Assistant Research Professor. Aquatic macroinvertebrate ecology, bioindicators of human stressors on aquatic ecosystems, monitoring the effects of watershed conversation, management and restoration.

Marie J. Kurz, PhD *(University of Florida) Biogeochemistry Section Leader, Academy of Natrual Sciences.* Assistant Research Professor. Interactions between geochemical, ecological & hydrologic processes in freshwater systems. Availability, transport and cycling of stream solutes; Stream ecosystem structure & function; Groundwater-surface water interactions; Adaptive management & restoration of water resources & aquatic ecosystems.

Tatyana Livshultz, PhD *(Cornell University) Assistant Curator of Botany.* Assistant Professor. Expertise of the milkweed and dogbane family (Apocynaceae); evolution and species diversity of the genus Dischidia; differences in floral form and function.

Amanda Lough, PhD *(Washington University in St. Louis).* Assistant Professor. Volcanic seismicity and the relation to magma plumbing systems; glacial seismicity and the seismicity of Antarctica; intraplate seismicity.

Richard McCourt, PhD *(University of Arizona) Associate Curator of Botany, Academy of Natural Sciences of Drexel University; 2010-2012: Program Director, Division of Graduate Education, National Science Foundation.* Professor. Biodiversity, evolution, ecology, and systematic of green algae, specifically charophyte algae.

Michael O'Connor, MD, PhD *(MD, Johns Hopkins University; PhD, Colorado State).* Professor. Biophysical and physiological ecology, thermoregulation of vertebrates, ecological modeling.

Sean O'Donnell, PhD *(University of Wisconsin-Madison).* Professor. Tropical ecology, focusing on geographic variation and elevation effects on ecology and behavior of army ants and ant-bird interactions; neurobiology, focusing on brain plasticity and brain evolution in social insects.

Marina Potapova, PhD *(Russian Academy of Sciences) Assistant Curator.* Assistant Professor. Taxonomy, ecology, and biogeography of freshwater diatoms; methods of quantifying morphological characters of diatom

frustules based on geometric morphometrics; systematic of monoraphid freshwater diatoms.

Gary Rosenberg, PhD *(Harvard University) Pilsbry Chair of Malacology*. Professor. Magnitude and origin of species-level diversity in the Mollusca.

Jacob Russell, PhD *(University of Arizona)*. Professor. Microbiomes and metagenomics; ecology and evolution of symbiosis.

Alexis Schulman, PhD *(Massachusetts Institute of Technology) Director of the Environmental Studies and Sustainability Program*. Associate Research Professor. Environmental policy and politics, Urban planning Sustainability and resilience transitions, Policy implementation,Local knowledge and community science

Jocelyn A. Sessa, PhD *(Penn State University) Assistant Curator of Invertebrate Paleontology: Academy of Natural Sciences*. Assistant Professor. Paleoecology; paleobiology; extinction recovery dynamics; climate change; isotope geochemistry; fossil and modern mollusks

Loyc Vanderkluysen, PhD *(University of Hawaii)*. Associate Professor. The cyclicity of volcanic eruptions, volcanic degassing processes, and large igneous provinces.

David J. Velinsky, PhD *(Old Dominion University) Department Head, Biodiversity, Earth and Environmental Science*. Professor. Geochemical cycling of organic and inorganic constituents of sediments and waters; Sedimentary diagenesis of major and minor elements; Isotope biogeochemistry of carbon, nitrogen and sulfur in marine and freshwater systems.

Dane Ward, PhD *(Drexel University)*. Assistant Teaching Professor. Urban agriculture and sustainability both in Philadelphia and Cienfuegos, Cuba, as well as insect community structure and population ecology of reptiles and amphibians in the New Jersey Pine Barrens.

Elizabeth B. Watson, PhD *(University of California, Berkeley)*. Associate Professor. The implications of global and regional environmental change, and unraveling the interacting effects of multiple anthropogenic stressors on coastal ecosystems to promote more informed management, conservation, and restoration.

Jason Weckstein, PhD *(Louisiana State University) Associate Curator of Ornithology*. Associate Professor. Avian phylogenetics, comparative biology and evolutionary history; biodiversity surveys of birds and their parasites and pathogens; coevolutionary history of birds and their parasites.

Emeritus Faculty

Susan S. Kilham, PhD *(Duke University)*. Professor Emeritus. Aquatic ecology: phytoplankton; physiological ecology, especially of diatoms in freshwater and marine systems; large lakes; food webs; biogeochemistry.

John G. Lundberg, PhD *(University of Michigan)*. Professor Emeritus. Diversity and diversification of fishes; documenting and interpreting the morphological, molecular, and taxonomic diversity of living and fossil fishes in the interrelated fields of systematic, faunistics and biogeography and paleobiology; exploration and collecting in poorly-known tropical freshwater habitats and regions.

Daniel Otte, PhD *(University of Michigan) Senior Curator, Systematics and Evolutionary Biology*. Professor Emeritus. Taxonomy and

biogeography of Orthoptera (grasshoppers, crickets, katydids and their relatives).

James R. Spotila, PhD *(University of Arkansas) L. D. Betz Chair Professor*. Professor Emeritus. Physiological and biophysical ecology, thermoregulation of aquatic vertebrates, biology of sea turtles.

Environmental Studies and Sustainability

Major: Environmental Studies and Sustainability
Degree Awarded: Bachelor of Arts (BA)
Calendar Type: Quarter
Total Credit Hours: 183.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 03.0103
Standard Occupational Classification (SOC) code: 19-2041

About the Program

The BA in Environmental Studies and Sustainability (ENSS) is administered in the Department of Biodiversity, Earth and Environmental Science (BEES). It is a multidisciplinary degree that takes advantage of existing courses in both the Arts and Sciences to educate graduates who will be able to work in government agencies, corporations and nonprofit organizations who develop, implement or are affected by environmental policies.

Objective

The objective of this major is to educate students so that they will be successful in finding solutions to environmental challenges that all societies will face in the 21st century. Graduates will be educated with the goal of thinking in terms of cross-cultural ideas and dialogue. In that way they will be encouraged to help people of all cultures understand environmental problems and act in the area of environmental stewardship.

The BA in Environmental Studies and Sustainability will provide graduates with a broad understanding of environmental science, policy development, needs of decision makers, attorneys and engineers, urban and international concerns and current environmental issues. Important to any future position in fields of environmental policy, planning and sustainability, the program builds on communication skills, collaboration abilities and team building, a "customer" orientation, creativity and innovative thinking ability, analytical ability and critical thinking and problem solving ability, a work orientation with professionalism and a positive attitude, occupation-specific skill and knowledge through co-op, and leadership ability. Students may opt to specialize in different study tracks including Policy, Government and Business; Social Awareness and Action, and Scientific Inquiry.

Drexel Advantage

There is a distinct advantage to a student in undertaking an environmental studies and sustainability degree at Drexel. Drexel University was one of the first universities in the nation to establish an undergraduate environmental science degree in the late 1960s. Since that time Drexel has expanded to areas of environmental policy and sustainability. Over the long history of the program, Drexel has established an extensive network of co-op employers who value Drexel students, including federal and state governments, consulting firms, research institutions, non-profit organizations and industry, with work ranging from biological field

sampling to developing policy with governmental decision makers, action plans for non-profit organizations, or model environmental strategies with industrial sustainability offices. Drexel students take advantage of the co-op program to both get more extensive experience and get paid while doing so. By graduation, students resumes include real-world experiences.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

General Requirements

CIVC 101	Introduction to Civic Engagement	1.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
MATH 101	Introduction to Analysis I	4.0
MATH 107	Probability and Statistics for Liberal Arts	3.0
UNIV S101	The Drexel Experience	1.0
UNIV H201	Looking Forward: Academics and Careers	1.0
Social and Behavioral Sciences		
SOC 101	Introduction to Sociology	3.0
or ANTH 101	Introduction to Cultural Diversity	
PSY 101	General Psychology I	3.0
PSCI 110	American Government	4.0
Social Behavior elective		3.0
Physical and Natural Sciences		
BIO 109	Biological Diversity, Ecology & Evolution	3.0
BIO 110	Biological Diversity, Ecology and Evolution Laboratory	1.0
ENVS 101	Introduction to Environmental Science	5.0
ENVS 230	General Ecology	3.0
ENSS 275	Global Climate Change	3.0
or ENVS 289	Global Warming, Biodiversity and Your Future	
GEO 201 [WI]	Earth Systems Processes	3.0
Humanities and Fine Arts		
Humanities & Fine Arts Electives		9.0
PHIL 340	Environmental Ethics	3.0
or PHIL 341	Environmental Philosophy	
Diversity Electives		**6.0**
International Studies		**6.0**
Foreign Language		**8.0**
Students must complete at least 8 credits of a foreign language and, at minimum, must complete the 103 level of the target language (or beyond if they place higher).		
ENSS Core Requirements		
Policy and Planning		
ENSS 120	Introduction to Environmental Studies	3.0
ENSS 283	Introduction to Environmental Policy	3.0
ENSS 285	Introduction to Urban Planning	3.0
ENSS 326	Cities and Sustainability	3.0
PSCI 284	Environmental Politics	4.0
Social Science		
ENSS 244	Sociology of the Environment	4.0
ENSS 346	Environmental Justice	4.0
ENVS 260	Environmental Science and Society	3.0
SOC 355 [WI]	Classical Social Theory	4.0
Economics		

ECON 201	Principles of Microeconomics	4.0
ECON 202	Principles of Macroeconomics	4.0
Modeling and Research		
ENVS 308	GIS and Environmental Modeling	3.0
SOC 241	Research Design: Qualitative Methods	4.0
SOC 242	Research Design: Quantitative Methods	4.0
ENSS Electives		**21.0**
Senior Sequence		
ENVS 441 [WI]	Issues in Global Change I: Seminar	2.0
ENVS 442	Issues in Global Change II: Research	2.0
ENVS 443	Issues in Global Change III: Synthesis	2.0
Free Electives		24.0
Total Credits		183.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Term 1		Credits
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
ENSS 120	Introduction to Environmental Studies	3.0
ENVS 101	Introduction to Environmental Science	5.0
MATH 101	Introduction to Analysis I	4.0
UNIV S101	The Drexel Experience	1.0
	Term Credits	16.0
Term 2		
BIO 109	Biological Diversity, Ecology & Evolution	3.0
BIO 110	Biological Diversity, Ecology and Evolution Laboratory	1.0
CIVC 101	Introduction to Civic Engagement	1.0
ENGL 102 or 112	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing English Composition II	3.0
PSY 101	General Psychology I	3.0
Foreign Language		4.0
	Term Credits	15.0

Term 3

ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or 113	English Composition III	
MATH 107	Probability and Statistics for Liberal Arts	3.0
SOC 101	Introduction to Sociology	3.0
or ANTH 101	Introduction to Cultural Diversity	
Foreign Language		4.0
Free elective		3.0
	Term Credits	16.0

Term 4

ENSS 283	Introduction to Environmental Policy	3.0
ENVS 230	General Ecology	3.0
ENVS 260	Environmental Science and Society	3.0
PSCI 110	American Government	4.0
Humanities & Fine Arts elective		3.0
	Term Credits	16.0

Term 5

ENSS 275	Global Climate Change	3.0
or ENVS 289	Global Warming, Biodiversity and Your Future	
ENSS 285	Introduction to Urban Planning	3.0
ENVS 308	GIS and Environmental Modeling	3.0
Humanities & Fine Arts elective		3.0
Free elective		3.0
	Term Credits	15.0

Term 6

ECON 201	Principles of Microeconomics	4.0
ENSS 244	Sociology of the Environment	4.0
SOC 355 [WI]	Classical Social Theory	4.0
UNIV H201	Looking Forward: Academics and Careers	1.0
Soc/Behavior elective		3.0
	Term Credits	16.0

Term 7

ECON 202	Principles of Macroeconomics	4.0
ENSS 326	Cities and Sustainability	3.0
GEO 201 [WI]	Earth Systems Processes	3.0
Humanities/Fine Arts elective		3.0
	Term Credits	13.0

Term 8

ENSS 346	Environmental Justice	4.0
PHIL 340	Environmental Ethics	3.0
or 341	Environmental Philosophy	
SOC 241	Research Design: Qualitative Methods	4.0
ENSS elective		3.0
Free elective		3.0
	Term Credits	17.0

Term 9

PSCI 284	Environmental Politics	4.0
SOC 242	Research Design: Quantitative Methods	4.0
ENSS electives		6.0
Diversity elective		3.0
	Term Credits	17.0

Term 10

ENVS 441 [WI]	Issues in Global Change I: Seminar	2.0
ENSS electives		6.0
Free elective		6.0
	Term Credits	14.0

Term 11

ENVS 442	Issues in Global Change II: Research	2.0
ENSS elective		3.0
Diversity elective		3.0
International elective		3.0
Free elective		3.0
	Term Credits	14.0

Term 12

ENVS 443	Issues in Global Change III: Synthesis	2.0
ENSS elective		3.0
International elective		3.0
Free elective		6.0
	Term Credits	14.0

Total Credit: 183.0

Career Opportunities

The largest job opportunities exist in the areas of environmental communication, sustainability, environmental policy, community action, water quality, parks and outdoor recreation, ecotourism, natural resources and conservation, international environmental policy, renewable energy, and climate change

This major will educate individuals who seek careers and/or additional academic training in the following fields:

- Sustainability planning and implementation
- Urban, Regional and Community Planning
- Geographic Information Systems
- Environmental Communications
- Environmental Journalism
- Environmental Law
- Park Management and Outdoor Recreation
- Environmental Consulting
- Environmental Policy Analysis
- Natural Resource Management

Environmental Studies and Sustainability Faculty

Ted Daeschler, PhD *(University of Pennsylvania) Associate Curator of Vertebrate Zoology; Vice President for Systematic Biology and the Library: Academy of Natural Sciences.* Associate Professor. Vertebrate fauna of the Late Devonian Period in eastern North America; fossil collecting; systematic work focusing on freshwater vertebrates; nature of early non-marine ecosystems.

Jon Gelhaus, PhD *(University of Kansas) Curator, Department of Entomology: Academy of Natural Sciences.* Professor. Systematic expertise in crane flies (Tipuloidea); phylogenetic reconstruction; historical and ecological biogeography; biodiversity measures and evolution of morphological character systems.

Danielle Kreeger, PhD *(Oregon State University).* Research Associate Professor. Trophic interactions in aquatic ecosystems.

Stefanie Kroll, PhD *(SUNY College of Environmental Science and Forestry) Project Science Director, Academy of Natural Sciences.* Assistant Research Professor. Aquatic macroinvertebrate ecology, bioindicators of human stressors on aquatic ecosystems, monitoring the effects of watershed conversation, management and restoration.

Marie J. Kurz, PhD *(University of Florida) Biogeochemistry Section Leader, Academy of Natrual Sciences.* Assistant Research Professor. Interactions between geochemical, ecological & hydrologic processes in freshwater systems. Availability, transport and cycling of stream solutes; Stream ecosystem structure & function; Groundwater-surface water

interactions; Adaptive management & restoration of water resources & aquatic ecosystems.

Tatyana Livshultz, PhD *(Cornell University) Assistant Curator of Botany*. Assistant Professor. Expertise of the milkweed and dogbane family (Apocynaceae); evolution and species diversity of the genus Dischidia; differences in floral form and function.

Amanda Lough, PhD *(Washington University in St. Louis)*. Assistant Professor. Volcanic seismicity and the relation to magma plumbing systems; glacial seismicity and the seismicity of Antarctica; intraplate seismicity.

Richard McCourt, PhD *(University of Arizona) Associate Curator of Botany, Academy of Natural Sciences of Drexel University; 2010-2012: Program Director, Division of Graduate Education, National Science Foundation*. Professor. Biodiversity, evolution, ecology, and systematic of green algae, specifically charophyte algae.

Michael O'Connor, MD, PhD *(MD, Johns Hopkins University; PhD, Colorado State)*. Professor. Biophysical and physiological ecology, thermoregulation of vertebrates, ecological modeling.

Sean O'Donnell, PhD *(University of Wisconsin-Madison)*. Professor. Tropical ecology, focusing on geographic variation and elevation effects on ecology and behavior of army ants and ant-bird interactions; neurobiology, focusing on brain plasticity and brain evolution in social insects.

Marina Potapova, PhD *(Russian Academy of Sciences) Assistant Curator*. Assistant Professor. Taxonomy, ecology, and biogeography of freshwater diatoms; methods of quantifying morphological characters of diatom frustules based on geometric morphometrics; systematic of monoraphid freshwater diatoms.

Gary Rosenberg, PhD *(Harvard University) Pilsbry Chair of Malacology*. Professor. Magnitude and origin of species-level diversity in the Mollusca.

Jacob Russell, PhD *(University of Arizona)*. Professor. Microbiomes and metagenomics; ecology and evolution of symbiosis.

Alexis Schulman, PhD *(Massachusetts Institute of Technology) Director of the Environmental Studies and Sustainability Program*. Associate Research Professor. Environmental policy and politics, Urban planning Sustainability and resilience transitions, Policy implementation,Local knowledge and community science

Jocelyn A. Sessa, PhD *(Penn State University) Assistant Curator of Invertebrate Paleontology: Academy of Natural Sciences*. Assistant Professor. Paleoecology; paleobiology; extinction recovery dynamics; climate change; isotope geochemistry; fossil and modern mollusks

Loyc Vanderkluysen, PhD *(University of Hawaii)*. Associate Professor. The cyclicity of volcanic eruptions, volcanic degassing processes, and large igneous provinces.

Dane Ward, PhD *(Drexel University)*. Assistant Teaching Professor. Urban agriculture and sustainability both in Philadelphia and Cienfuegos, Cuba, as well as insect community structure and population ecology of reptiles and amphibians in the New Jersey Pine Barrens.

Elizabeth B. Watson, PhD *(University of California, Berkeley)*. Associate Professor. The implications of global and regional environmental change, and unraveling the interacting effects of multiple anthropogenic

stressors on coastal ecosystems to promote more informed management, conservation, and restoration.

Jason Weckstein, PhD *(Louisiana State University) Associate Curator of Ornithology*. Associate Professor. Avian phylogenetics, comparative biology and evolutionary history; biodiversity surveys of birds and their parasites and pathogens; coevolutionary history of birds and their parasites.

Emeritus Faculty

Susan S. Kilham, PhD *(Duke University)*. Professor Emeritus. Aquatic ecology: phytoplankton; physiological ecology, especially of diatoms in freshwater and marine systems; large lakes; food webs; biogeochemistry.

John G. Lundberg, PhD *(University of Michigan)*. Professor Emeritus. Diversity and diversification of fishes; documenting and interpreting the morphological, molecular, and taxonomic diversity of living and fossil fishes in the interrelated fields of systematic, faunistics and biogeography and paleobiology; exploration and collecting in poorly-known tropical freshwater habitats and regions.

Daniel Otte, PhD *(University of Michigan) Senior Curator, Systematics and Evolutionary Biology*. Professor Emeritus. Taxonomy and biogeography of Orthoptera (grasshoppers, crickets, katydids and their relatives).

James R. Spotila, PhD *(University of Arkansas) L. D. Betz Chair Professor*. Professor Emeritus. Physiological and biophysical ecology, thermoregulation of aquatic vertebrates, biology of sea turtles.

Geoscience

Major: Geoscience
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 183.0
Co-op Options: Three Co-op (Five years)
Classification of Instructional Programs (CIP) code: 40.0699
Standard Occupational Classification (SOC) code: 11-9121

NOTE: The GEO concentrations will be discontinued effective Fall 2020 and will be replaced by broader elective options in the curriculum.

About the Program

From energy to climate change to environmental degradation, many of the most pressing societal issues of the coming century will pertain to geoscience. The study of the Earth is central to maintaining clean drinking water, mitigating environmental contamination, providing ores and rare elements necessary for industry, and locating new sources of energy.

The Biodiversity, Earth and Environmental Science (BEES) Department offers a major in geoscience, with three concentration options designed to meet the needs of students wishing to pursue graduate school or immediate employment in the geosciences:

- Applied Geology
- General Geoscience
- Paleontology

The core requirements encompass foundational courses in science, writing, and math, and traditional courses that form the backbone of the geosciences. Building upon these are innovative courses focused on Earth systems processes, key environmental issues, practical field experiences, and advanced geological study.

In addition to nourishing and honing the passions of students studying the Earth, the core curriculum is designed to:

1. Instill key technical skills early-on, as a pathway to high-quality co-op opportunities;
2. Lay the groundwork for our students to pursue advanced graduate study in the geosciences and other disciplines, and;
3. Enable our graduates to translate marketable skills and knowledge into high-quality jobs in industry and government.

Geoscience majors will begin their field experiences during the first term of their freshmen year. Most courses include a laboratory section or a hands-on recitation section ("dry lab"), plus at least three field trips to relevant regional geological sites. These courses, combined with the co-op experience and summer geological field camp, provide students real-world experience in the field.

About the Concentrations

Applied Geology

The applied geology concentration is designed for students wishing to enter the geoscience workforce upon graduation. Possible employment opportunities include jobs in: environmental consulting, geotechnical consulting, geophysical consulting, the petroleum and natural gas industry, the mining industry, federal agencies (e.g., USGS, USDA, NOAA, FEMA, EPA, DOI, and Army Corps of Engineers), and state and local agencies (e.g., state environmental agencies, state geological surveys, and municipal water departments).

General Geoscience

The general geoscience concentration allows maximum flexibility and is designed for students wishing to pursue other areas of study within the geosciences, students wishing to pursue policy-related careers, and students planning to apply to professional graduate programs, such as those in law or business schools. The policy component of this concentration allows students to explore related societal issues, which may help guide their career aspirations. This concentration also provides transfer students with a pathway to graduate on time.

Students graduating from this concentration will be well prepared to enter graduate school in science or policy, as well as to pursue professional studies. Students seeking immediate employment will be competitive for jobs with, for example, certain NGOs, environmental foundations, consulting companies, and government policy positions related to natural resources and the environment.

Paleontology

The concentration in paleontology prepares students who are interested in pursuing related research in graduate school and students seeking entry-level positions in paleontology. Examples of these jobs include biostratigrapher for petroleum companies, fossil resource manager for the Bureau of Land Management, and related positions with the National Parks Service, USGS, and state geological surveys.

Undergraduates in this concentration benefit from world-class resources already established at the Academy of Natural Sciences. These include the Invertebrate paleontology collection, with over 1 million specimens; the vertebrate fossil collection, with over 22,000 specimens; historically important specimens, such as the Thomas Jefferson fossil collection, the first discovered dinosaur skeleton, and the first discovered tyrannosaur; and the paleobotany collection, with over 5,000 specimens, including a large proportion of type specimens.

Students in the paleontology concentration will have access to numerous fossil sites along the Atlantic Coastal Plain and in the Appalachian Province. Opportunities exist for student research at two well-established sites: Dr. Daeschler's Red Hill site, which produces evolutionarily important forms representing the fish to tetrapod transition; and Dr. Lacovara's Inversand site, which records a mass-death assemblage at the end of the Cretaceous Period.

Additional Information

For additional information about this program, visit the Biodiversity, Earth and Environmental Science (BEES) Department website.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

General Education Requirements

CIVC 101	Introduction to Civic Engagement	1.0
COM 230	Techniques of Speaking	3.0
COM 310 [WI]	Technical Communication	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
PHIL 340	Environmental Ethics	3.0
or PHIL 341	Environmental Philosophy

GEO 322	Vertebrate Paleontology	
GEO 497	Research	
Paleontology elective (Choose 2 from following):		
ENVS 212	Evolution	
ENVS 312	Systematic Biology	
ENVS 352	Ornithology	
ENVS 354	Ichthyology	
ENVS 355	Biogeography	
ENVS 391	Freshwater and Marine Algae	
ENVS 470	Advanced Topics in Evolution	
Choose one of the following:		
BIO 224 & BIO 225	Form, Function & Evolution of Vertebrates and Vertebrate Biology and Evolution Laboratory	
ENVS 254 & ENVS 255	Invertebrate Morphology and Physiology and Invertebrate Morphology and Physiology Lab	
Total Credits		183.0-187.0

[*]   See the Biodiversity, Earth and Environmental Science (BEES) for the GEO Core and Paleo elective list.

[**]   See the Biodiversity, Earth and Environmental Science (BEES) Department for the General Geoscience Concentration course list.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

The sample plan of study is a general guideline that can be used for each of the three concentrations, depending on course selections in certain terms.

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Term 1		Credits
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
ENVS 101	Introduction to Environmental Science	5.0
GEO 101	Physical Geology	4.0
MATH 121	Calculus I	4.0
UNIV S101	The Drexel Experience	1.0
	Term Credits	17.0
Term 2		
CHEM 101 or BIO 124 [*]	General Chemistry I Evolution & Organismal Diversity	3.5
CIVC 101	Introduction to Civic Engagement	1.0
ENGL 102 or 112	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing English Composition II	3.0
GEO 102	History of the Earth	4.0
MATH 122	Calculus II	4.0
	Term Credits	15.5
Term 3		
CHEM 102 or BIO 126	General Chemistry II Physiology and Ecology	4.5
ENGL 103 or 113	Composition and Rhetoric III: Themes and Genres English Composition III	3.0
ENVS 102	Natural History, Research and Collections	2.0
GEO 103	Introduction to Field Methods in Earth Science	2.0
MATH 123	Calculus III	4.0
	Term Credits	15.5
Term 4		
BIO 107	Cells, Genetics & Physiology	3.0

BIO 108	Cells, Genetics and Physiology Laboratory	1.0
CHEM 103	General Chemistry III	5.0
or 101	General Chemistry I	
GEO 301	Advanced Field Methods in Earth Science	3.0
GEO 312	Sedimentology and Stratigraphy	3.5
	Term Credits	15.5
Term 5		
GEO 201 [WI]	Earth Systems Processes	3.0
GEO 215	Mineralogy	4.0
Choose one of the following two options, based on chosen concentration:		4.0
4-credit GEO concentration course		
2-credit GEO concentration (Paleo) course and a 3-credit free elective		
BIO 109	Biological Diversity, Ecology & Evolution	3.0
or CHEM 102	General Chemistry II	
BIO 110	Biological Diversity, Ecology and Evolution Laboratory	1.0
or CHEM 102	General Chemistry II	
	Term Credits	15.0
Term 6		
COM 230	Techniques of Speaking	3.0
GEO 401	Igneous and Metamorphic Petrology	5.0
PHYS 101	Fundamentals of Physics I	4.0
or 152	Introductory Physics I	
Free elective		3.0
	Term Credits	15.0
Term 7		
COM 310 [WI]	Technical Communication	3.0
GEO 325	Structural Geology	5.0
UNIV S201	Looking Forward: Academics and Careers	1.0
PHYS 102	Fundamentals of Physics II	4.0
or 153	Introductory Physics II	
Free elective		3.0
	Term Credits	16.0
Term 8		
MATH 410	Scientific Data Analysis I	3.0
PHYS 201	Fundamentals of Physics III	4.0
or 154	Introductory Physics III	
PHIL 340	Environmental Ethics	3.0
or 341	Environmental Philosophy	
GEO Concentration elective		3.0-4.0
	Term Credits	13.0-14.0
Term 9		
MATH 411	Scientific Data Analysis II	3.0
GEO Concentration courses		8.0
Free elective		3.0
Field Camp [**]		6.0
	Term Credits	20.0
Term 10		
ENVS 441 [WI]	Issues in Global Change I: Seminar	2.0
GEO 320	Invertebrate Paleontology	3.5
GEO elective		3.0-4.0
Humanities or Social Science elective		3.0
Free Elective		3.0
	Term Credits	14.5-15.5
Term 11		
ENVS 442	Issues in Global Change II: Research	2.0
GEO concentration elective		3.0-4.0
Humanities or Social Science elective		3.0
Free elective		6.0
	Term Credits	14.0-15.0
Term 12		
ENVS 443	Issues in Global Change III: Synthesis	2.0
GEO elective		3.0-4.0

Free electives	7.0
Term Credits	12.0-13.0

Total Credit: 183.0-187.0

* Choose to start CHEM or BIO sequence depending on concentration. Paleontology students should take BIO 124 & BIO 126. Students interested in applied or geochemistry should start CHEM.

** Note: Students do Field Camps during Co-Op in the Junior year. These 6.0 credits are transferred during Co-Op. Please see your advisor for additional information.

Co-Op/Career Opportunities

Co-Op Opportunities

There are over one hundred environmental, geophysical, and geotechnical firms within the greater Philadelphia region. Plus, there are opportunities with federal, state, and municipal agencies, jobs in central Pennsylvania related to the Marcellus Shale, and research opportunities between Drexel and the Academy of Natural Sciences.

All geoscience majors follow the five-year, three co-op plan of study program. Transfer students may be granted an exception for a two co-op plan of study, so that they may remain on schedule. The summer geological field camp will occur during the third co-op cycle. In this third co-op, geoscience students attend field camp and also partake in an abbreviated co-op work experience.

Career Opportunities

According to the US Bureau of Labor Statistics (BLS), employment for geoscientists through 2020 is expected to grow faster than the average for all occupations. In addition, the geosciences are expected to outpace life, physical, and social sciences in job creation. The employment outlook for geoscientists in Drexel's surrounding area is particularly bright, with a robust environmental consulting industry and exploding demand related to Marcellus Shale drilling.

The geoscience major, with its three concentrations, prepares students who are interested in entering the workforce immediately as well as those who are interested in pursuing related research in graduate schools.

Facilities and Field Sites

Facilities

The geoscience major leverages resources at Drexel University and the Academy of Natural Sciences (https://ansp.org/), such as a mineral collection with 9,000 specimens, over a million fossil specimens, Dinosaur Hall, The Patrick Center for Environmental Research, a state-of-the-art fossil preparation lab, notable research programs, and faculty with expertise in geology, paleontology, and related disciplines.

Summer Geological Field Camp

Summer geological field camp is the quintessential undergraduate experience for geosciences students. It is a long-held tradition in geology departments that students head out West, during the summer before graduation, to apply their knowledge to real-world situations and to acquire field skills that will serve them throughout their careers. This is particularly important for students in eastern schools, where the mountains are small and outcrops are scarce. Field camp also provides networking and bonding opportunity for students. Friends made at field

camp often become colleagues for life. At the Geological Society of America meeting, reunions are organized by university *and* by field camp.

The summer geological field camp for geoscience students will occur during the third co-op cycle.

Barnegat Bay Coastal Field Station

The BEES field station on Barnegat Bay in Waretown, NJ provides geoscience students with opportunities to engage in hands-on research in coastal geology, barrier island morphology, oceanography, and sedimentology. The facility includes a lodge, two classrooms/meeting rooms, dining hall, dormitories, and rustic cabins. The field station is located on 194 acres of diverse coastal habitat, including a maritime forest, tidal creek, salt marsh, fresh water pond, brackish impoundment, and bayshore environments. The department's research vessel gives students access to back-bay and near-shore marine environments.

The department holds its introductory field session for incoming freshmen and other events at the field station. The facility may also serve as a base for excursions into the Pine Barrens, a heavily forested area containing a number of interesting deposits related to the last glacial period.

Red Hill Fossil Site

The Red Hill fossil site, in Tioga County, Pennsylvania, exposes Devonian coastal sedimentary rocks that preserve a rich fossil fauna. Of particular importance is a fossil fish species, studied by Dr. Ted Daeschler, representing a critical transition between fish and tetrapods (land animals.) This site offers opportunities for studying vertebrate paleontology, stratigraphy, and sedimentology and provides students with a window into an important moment in the history of life on Earth.

Inversand Fossil Site: Local training ground for Geoscience Majors

The Inversand fossil site is a unique resource for geological education, research, and STEM outreach. The quarry is located in Gloucester Country, NJ, only 20 minutes from Drexel's campus, making it possible to conduct field exercises there within a three-hour class period. The geological formations that outcrop in the Inversand Quarry have yielded many new fossil species. The site has significance beyond vertebrate paleontology, however, and will provide a local laboratory for classes in geochemistry, geophysics, stratigraphy, sedimentology, hydrogeology, and environmental geology. As such, it will provide a valuable training-ground, a short distance from campus, for all Drexel geoscience majors.

Geoscience Faculty

Ted Daeschler, PhD *(University of Pennsylvania) Associate Curator of Vertebrate Zoology; Vice President for Systematic Biology and the Library: Academy of Natural Sciences.* Associate Professor. Vertebrate fauna of the Late Devonian Period in eastern North America; fossil collecting; systematic work focusing on freshwater vertebrates; nature of early non-marine ecosystems.

Marie J. Kurz, PhD *(University of Florida) Biogeochemistry Section Leader, Academy of Natrual Sciences.* Assistant Research Professor. Interactions between geochemical, ecological & hydrologic processes in freshwater systems. Availability, transport and cycling of stream solutes; Stream ecosystem structure & function; Groundwater-surface water interactions; Adaptive management & restoration of water resources & aquatic ecosystems.

Amanda Lough, PhD *(Washington University in St. Louis).* Assistant Professor. Volcanic seismicity and the relation to magma plumbing

systems; glacial seismicity and the seismicity of Antarctica; intraplate seismicity.

Gary Rosenberg, PhD *(Harvard University) Pilsbry Chair of Malacology.* Professor. Magnitude and origin of species-level diversity in the Mollusca.

Jocelyn A. Sessa, PhD *(Penn State University) Assistant Curator of Invertebrate Paleontology: Academy of Natural Sciences.* Assistant Professor. Paleoecology; paleobiology; extinction recovery dynamics; climate change; isotope geochemistry; fossil and modern mollusks

Loyc Vanderkluysen, PhD *(University of Hawaii).* Associate Professor. The cyclicity of volcanic eruptions, volcanic degassing processes, and large igneous provinces.

David J. Velinsky, PhD *(Old Dominion University) Department Head, Biodiversity, Earth and Environmental Science.* Professor. Geochemical cycling of organic and inorganic constituents of sediments and waters; Sedimentary diagenesis of major and minor elements; Isotope biogeochemistry of carbon, nitrogen and sulfur in marine and freshwater systems.

Global Studies

Major: Global Studies
Degree Awarded: Bachelor of Arts (BA)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 30.2001
Standard Occupational Classification (SOC) code: 19-3094

About the Program

Global Studies practices socially-responsible global citizenship through a unique combination of research-oriented and multilingual instruction, professional experience, and meaningful engagement with communities both here in Philadelphia and abroad.

Our students experience Global Studies by:

- Examining the movement of peoples, goods, and cultures across countries and regions
- Studying global issues in concrete socio-economic, cultural, and geographical contexts
- Tackling structural inequalities from a variety of perspectives and disciplines
- Developing intercultural and language skills through unique pedagogical models
- Working with employers and communities in Philadelphia and around the world through Drexel's Co-Op opportunities

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Global Media, Arts, and Cultures Concentration

General Requirements		
CIVC 101	Introduction to Civic Engagement	1.0
ECON 201	Principles of Microeconomics	4.0

ECON 202	Principles of Macroeconomics	4.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
PSCI 150	International Politics	4.0
UNIV H101	The Drexel Experience	1.0
UNIV H201	Looking Forward: Academics and Careers	1.0
Two mathematics courses		6.0-8.0
Two science courses		6.0-8.0
Global Studies Core Requirements		
GST 101	Becoming Global: Language and Cultural Context	3.0
GST 102	Understanding Global: Markets and Governance	3.0
GST 103	Acting Global: Research Methods in Global Studies	3.0
Four 200+ level GST courses		12.0
GST 400	Senior Project in Global Studies	3.0
Language minor, or minor in Asian Studies, or Middle East and North African Studies		**24.0**

Students must complete at least 24 credits above the 103 language level to earn a language minor.

Media, Arts, and Cultures Distribution Requirements		
ANTH 212 [WI]	Topics in World Ethnography	3.0
ANTH 330	Media Anthropology	3.0
DIGM 100	Digital Design Tools	3.0
ENGL 325	Topics in World Literature	3.0
PHIL 305	Ethics and the Media	3.0
Select one of the following:		**3.0**
ARTH 101	History of Art I: Ancient to Medieval	
ARTH 102	History of Art II: Renaissance to Romanticism	
ARTH 103	History of Art III: Modern Art	
Media, Arts, and Cultures Distribution Options		**24.0**

Students must complete at least 24 distribution credits from the approved list

ANTH 210 [WI]	Worldview: Science, Religion and Magic

SOC 330	Development and Underdevelopment in the Global South	
SOC 340	Globalization	
WGST 240	Women and Society in a Global Context	
WGST 275	Women's Health and Human Rights	

Electives	**53.0-48.0**
Total Credits	180.0

Global Justice and Human Rights Concentration

General Requirements

CIVC 101	Introduction to Civic Engagement	1.0
ECON 201	Principles of Microeconomics	4.0
ECON 202	Principles of Macroeconomics	4.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
PSCI 150	International Politics	4.0
UNIV H101	The Drexel Experience	1.0
UNIV H201	Looking Forward: Academics and Careers	1.0
Two mathematics courses		6.0-8.0
Two science courses		6.0-8.0

GST Core Curriculum Requirements

GST 101	Becoming Global: Language and Cultural Context	3.0
GST 102	Understanding Global: Markets and Governance	3.0
GST 103	Acting Global: Research Methods in Global Studies	3.0
Four 200+ level GST courses		12.0
GST 400	Senior Project in Global Studies	3.0

Language Minor	**24.0**

Students must complete at least 24 credits above the 103 language level to earn a language minor.

Global Justice and Human Rights Distribution Requirements

ANTH 310	Societies In Transition: The Impact of Modernization and the Third World	3.0-4.0
or SOC 330	Development and Underdevelopment in the Global South	
ENGL 360 [WI]	Literature and Society	3.0
PHIL 335	Global Ethical Issues	3.0-4.0
or PSCI 352	Ethics and International Relations	
PSCI 120	History of Political Thought	4.0
or PSCI 229	Theories of Justice	
PSCI 353	International Human Rights	4.0
Select one of the following:		**3.0-4.0**
GST 435	Model Organization of American States	
PSCI 351	International Organizations: The United Nations	
PSCI 357	The European Union in World Politics	

Global Justice and Human Rights Distribution Options	**24.0**

Students must complete at least 24 distribution credits from the approved list

AFAS T280	Special Topics in Africana Studies (Course must have a global theme)
ANTH 250	Anthropology of Immigration
ANTH 312	Approaches to Intercultural Behavior
or COM 345	Intercultural Communication
CJS 260	Justice in Our Community
CJS 261	Prison, Society and You

CJS 289	Terrorism	
CJS 320	Comparative Justice Systems	
COM 360	International Communication	
COM 362	International Negotiations	
COM 375 [WI]	Grant Writing	
CULA 426	The Kitchen Garden: Summer	
or CULA 42	The Kitchen Garden: Fall	
ECON 301	Microeconomics	
ECON 321	Macroeconomics	
ECON 342	Economic Development	
ECON 351	Resource and Environmental Economics	
ENGL 325	Topics in World Literature	
GST 221	Introduction to Global Capital and Development	
GST 231	Introduction to Identities and Communities	
GST 241	Introduction to Power and Resistance	
GST 251	Introduction to Global Media, Arts, and Cultures	
GST 261	Introduction to Global Health and Sustainability	
GST 321	Advanced Studies in Global Capital and Development	
GST 331	Advanced Studies in Identities and Communities	
GST 341	Advanced Studies in Power and Resistance	
GST 351	Advanced Studies in Global Media, Arts, and Cultures	
GST 361	Advanced Studies in Global Health and Sustainability	
GST 435	Model Organization of American States	
GST T280	Special Topics in Global Studies	
GST T380	Special Topics in Global Studies	
HIST 385	Transnational History of Science, Technology and Environment	
PHIL 241	Social & Political Philosophy	
PHIL 335	Global Ethical Issues	
PHIL 341	Environmental Philosophy	
PHIL 385	Philosophy of Law	
PHIL 391	Philosophy of Religion	
PBHL 303	Overview of Issues in Global Health	
PBHL 304	Introduction to Health & Human Rights	
PSCI 229	Theories of Justice	
PSCI 240	Comparative Politics II	
PSCI 250	American Foreign Policy	
PSCI 252	Global Governance	
PSCI 255	International Political Economy	
PSCI 260 [WI]	Power in Protest: Social Movements in Comparative Perspective	
PSCI 305	Social Development: A Global Approach	
PSCI 325	Political Theory from Below	
PSCI 351	International Organizations: The United Nations	
PSCI 352	Ethics and International Relations	
PSCI 357	The European Union in World Politics	
PSCI 360	International Law	
PSCI 361	The Politics of LGBT Movements and Rights	
SOC 210	Race, Ethnicity and Social Inequality	
SOC 220	Wealth and Power	
SOC 315	HIV/AIDS and Africa	
SOC 340	Globalization	
SOC 346	Environmental Justice	
SOC 355 [WI]	Classical Social Theory	
SOC 444	Social Movements	
WGST 240	Women and Society in a Global Context	
WGST T280	Special Topics in Women's and Gender Studies (Course must have a global theme)	
Electives		**52.0-45.0**
Total Credits		180.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Global Media, Arts, and Cultures Concentration

Term 1		Credits
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
GST 101	Becoming Global: Language and Cultural Context	3.0
MATH 101	Introduction to Analysis I	4.0
UNIV H101	The Drexel Experience	1.0
Language course		4.0
	Term Credits	15.0
Term 2		
ENGL 102 or 112	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing English Composition II	3.0

Global Studies Faculty

Anne Cecil, MA *(University of the Arts)*. Adjunct Instructor. Web designer, product designer, merchandising and artist.

Rose Corrigan, PhD *(Rutgers University) Director of the Center for Law, Policy, and Social Action*. Associate Professor. Women, public law, American politics and policy.

Brenda Dyer, MA *(University of Pennsylvania)*. Associate Teaching Professor. Language acquisition pedagogy, teaching writing, seventeenth and eighteenth century French literature, women writers, translation.

Mary Ebeling, PhD *(University of Surrey) Director, Women's and Gender Studies*. Associate Professor. Science and technology studies; emerging technologies and biocapital; media and democratic cultures; radical social movements; sociology of markets; political sociology; and ethnographic methodologies.

Christian Hunold, PhD *(University of Pittsburgh)*. Professor. Environmental policy; comparative politics; urban wildlife; political theory.

Gabriella Ibieta, PhD *(City University of New York) Director, Programs in English*. Associate Professor. Comparative literature; Cuban and Latin American fiction.

Emmanuel F. Koku, PhD *(University of Toronto)*. Associate Professor. Social network analysis; qualitative/quantitative research; medical sociology; social epidemiology; social demography; sociology of development; communication and information technology; community and urban sociology.

Christopher A. Laincz, PhD *(Duke University)*. Associate Professor. Economic development, technological change, and growth, industrial organization, macroeconomics and monetary economics.

Nada Matta, PhD *(New York University)*. Assistant Professor. Political Economy, Social Movements, Middle East Studies, Gender Studies, Revolutions, Inequality.

Maria delaluz Matus-Mendoza, PhD *(Temple University) Language Program Coordinator*. Associate Professor. Spanish Linguistic variation in the US; the relationship between language variation and mobility (social and geographical) among the Mexican communities in Mexico and in the United States; second language acquisition; language variation in media.

Usha Menon, PhD *(University of Chicago)*. Professor. Self, identity & personhood, emotional functioning, Hindu morality, gender relations in Hindu society, adult development, popular Hinduism, post-colonial feminism, Hindu religious nationalism and Islamic radicalism.

Rogelio Minana, PhD *(Penn State) Department Head, Global Studies and Modern Languages*. Professor. The role of classic cultural icons, particularly Don Quixote, in 21st century political and social justice discourse; the interplay between the traditional humanities, youth organizations, and digital storytelling.

Joel E. Oestreich, PhD *(Brown University) Director of the Global Studies major*. Professor. International organizations, international finance, development, and human rights.

Rakhmiel Peltz, PhD *(University of Pennsylvania).* Professor. Judaic studies, Yiddish culture and linguistics, ethnography of communication, immigrant cultural studies.

Abioseh Porter, PhD *(University of Alberta, Canada).* Professor. Comparative literature; postcolonial literatures

Robert Powell, PhD *(Temple University).* Assistant Teaching Professor. Early and Middle Bronze Age Crete; archaeoastronomy; early state formation; archaeology and anthropology of frontiers; mass communication.

Rachel R. Reynolds, PhD *(University of Illinois).* Associate Professor. Sociolinguistics, ethnography of communication and discourse analysis; violence against women in mass media; political economy of migration; semiotics including the textual, the visual and multimodal.

Simone Schlichting-Artur, EdD *(University of Pennsylvania) Senior Assistant Dean of Global Initiatives.* Teaching Professor. International business communication (Germany and the U.S.), public health policy and languages, German post-war history through film and literature, development of writing assessment tools for German minor.

Wesley Shumar, PhD *(University of Pennsylvania).* Professor. Digital media and learning; culture of higher education; entrepreneurship education; craft culture; semiotic of consumer culture.

Alden Young, PhD *(Princeton University) Director of the Program in Africana Studies.* Assistant Professor. African history; economic history and the history of Arab and African interactions.

Jennifer Yusin, PhD *(Emory University).* Associate Professor. Postcolonial literature; trauma theory; literary theory; psychoanalysis, and memory studies in contemporary literature in English.

Emeritus Faculty

Julie Mostov, PhD *(New York University).* Professor Emeritus. Modern political thought, democratic theory, nationalism, gender studies, South Eastern Europe and the Balkans.

History

Major: History
Degree Awarded: Bachelor of Arts (BA)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 54.0101
Standard Occupational Classification (SOC) code: 19-3093

About the Program

The history program reflects the strengths of Drexel University, including specialization in transnational history and in the history of science, technology and the environment. A series of required courses in history build skills in research and interpretation of the past while elective courses within and outside the history program allow students to shape their curriculum to meet their needs and interests. Our history graduates go to graduate school in history, to professional schools in law, medicine, and business, and to work in business, government agencies, and non-profit organizations.

We apply Drexel's experiential, research-intensive approach to the discipline of history. Using the extensive historical resources of Philadelphia, the region, and the digital world, students develop a profound understanding of history and the ways it is made. We also encourage students to enrich their education through co-op, study abroad, and summer research projects working alongside department faculty.

Degree Offered

The **Bachelor of Arts (BA)** provides a course of study that includes foreign language courses and a broad grounding in the liberal arts, with flexibility for students to choose courses to fulfill humanities, social science, math, and science requirements that will contribute to their overall educational and career plans.

The History (p. 149) minor (p. 149) allows students in other majors to explore the historical background of their discipline, to better understand the origins of the contemporary world, and to build the knowledge and skills needed to understand the development of human societies over time and to understand historical episodes into their proper contexts. The minor in History is highly flexible and allows students to choose those History courses which appeal to them and which will contribute to their broader education. To complete the minor, students must take a total of six History courses (24.0 credits), five of which must be at the 200-level or above.

Additional Information

For more information about this program, please visit the Department of History (http://drexel.edu/history/) website or contact:

Jonathan Seitz, PhD
Assistant Department Head
Teaching Professor of History
jwseitz@drexel.edu

Degree Requirements (BA)

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

General Education Requirements		
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
UNIV H101	The Drexel Experience	1.0
CIVC 101	Introduction to Civic Engagement	1.0
UNIV H201	Looking Forward: Academics and Careers	1.0
Math courses		6.0-8.0
Science courses [*]		6.0-8.0
Foundation Requirements		
Diversity electives		6.0
Two Consecutive Foreign Language courses (must complete level 201)		7.0-8.0
Humanities/Fine Arts electives		12.0
Social Science electives		12.0
International Studies electives		6.0
Core History Requirements		**32.0**
HIST 101	Introductory Seminar in History I [**]	

HIST 102	Introductory Seminar in History II **	
HIST 296	Research Methods in History I **	
HIST 301	The Study of History **	
HIST 396	Research Methods in History II **	
HIST 490 [WI]	Senior Seminar I **	
HIST 491 [WI]	Senior Seminar II **	
	Any 1 Advanced History Seminar (Topics will vary)	
HIST T380	Special Topics in History	
History Distribution Courses***		20.0
	Any 2 non-U.S. History courses	
	Any 1 U.S. History Course	
	Any 1 History courses covering pre-1700 history (May not be HIST 201)	
	Any 1 History of Science, Technology, and Environment course	
History Concentration courses or any 7 History courses (at least four must be 200-level and above)		28.0
Free electives ****		33.0
Total Credits		180.0-185.0

* Any Biology (BIO), Chemistry (CHEM), Nutrition (NFS), Physics (PHYS), Geoscience (GEO), Environmental Science (ENVS), or Physics-Environmental Science (PHEV).

** These courses must be taken in sequence.

*** Only 200-level and above HIST courses will fulfill this this requirement.

**** 33 credits is the minimum allowed. Variations in concentration requirements and actual elective choices may result in earning more free elective credits.

Optional History Concentrations

Students may select one of the two following concentrations in the History BA, or they may elect not to undertake a concentration. The courses in the required history distribution list may count toward the 28.0 credits in a concentration; the courses in the required core sequence may not count toward the 28.0 credits in the concentration.

History of Science, Technology, and Environment Concentration

HIST 302	The Study of Science, Technology, and Environment in History	4.0
Select 1 Environmental History course from the following list:		4.0
HIST 280	History of Science: Ancient to Medieval	
HIST 320	Disaster in Global History	
HIST 321	Themes in Global Environmental History	
HIST T380	Special Topics in History (with approval when appropriate topic offered)	
Select 1 Transnational Histories of Science and Technology course from the following list:		4.0
HIST T280	Special Topics in History (with approval when appropriate topic offered)	
HIST 290	Technology and the World Community	
HIST T380	Special Topics in History (with approval when appropriate topic offered)	
HIST 385	Transnational History of Science, Technology and Environment	
Select 1 History of Medicine and Disabilities course from the following list:		4.0
HIST T280	Special Topics in History (with approval when appropriate topic offered)	
HIST T380	Special Topics in History (with approval when appropriate topic offered)	
HIST 340	History of Bodies in Science, Technology, and Medicine	
HIST 341	Disabilities in History	
Concentration Electives (select three from the following list)		12.0
HIST T280	Special Topics in History (with approval when appropriate topic offered)	
HIST 283	Technology and Identity	

HIST 285	Technology in Historical Perspective	
HIST 287	History of Science: Ancient to Medieval	
HIST 288	History of Science: Medieval to Enlightenment	
HIST 289	History of Science: Enlightenment to Modernity	
HIST 290	Technology and the World Community	
HIST 291	Global History of Engineering	
HIST 292	Technology in American Life	
HIST 320	Disaster in Global History	
HIST 321	Themes in Global Environmental History	
HIST 322	Empire and Environment	
HIST 340	History of Bodies in Science, Technology, and Medicine	
HIST 341	Disabilities in History	
HIST 365	Science and State Power: Colonialism	
HIST T380	Special Topics in History (with approval when appropriate topic offered)	
Total Credits		28.0

HIST 385	Transnational History of Science, Technology and Environment	
Total Credits		27.0-28.0

† Courses which may fulfill the global engagement requirement include designated travel-integrated courses, study abroad courses (with approval), Global Classroom courses in history, or independent study courses (with approval.)

†† In addition to the required CoAS Foundation Requirements foreign language courses (two courses, including completion of a language through 201) in one language, students in the global history concentration must take at least one courses in a second foreign language.

††† At least two courses must be 300-level and above.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study (BA)

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

History BA - No concentration

Term 1		Credits
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
HIST 101	Introductory Seminar in History I	4.0
UNIV H101	The Drexel Experience	1.0
Foreign language course (103-level or higher)		4.0

Co-Op/Career Opportunities

Co-Op Experiences

History majors have a wide variety of co-op experiences from which to choose. Business and public utilities offer many possibilities, and local, state, and federal governments; museums and archives; and law firms present many additional interesting co-op placements. Pre-law students, for example, are especially eager to see the inside of a law office, whether the co-op job they receive is clerical or a more challenging paralegal assignment. These practical experiences in the "real" world can reinforce the lessons of the classroom, sharpen skills, and establish important contacts. Sample co-op positions include:

- Law clerk/paralegal, Joe Davidson, Attorney-at-Law, Philadelphia
- Research analyst, Legislative Office for Research Liaison, Harrisburg, PA
- Legislative intern, Corporate Public Affairs Division, Philadelphia Electric Company
- Assistant lobbyist, Government Relations Office, Drexel University
- Education intern, Philadelphia Museum of Art
- Researcher, Philadelphia Chamber of Commerce
- Assistant, Office of the Governor, Harrisburg, PA

Career Opportunities

The flexible programs allow students to shape a curriculum that meets their needs, whether they are preparing for the business world, graduate school in history or political science, the MS in Science, Technology, and Society program (http://catalog.drexel.edu/graduate/collegeofartsandsciences/sciencetechnologyandsociety/), an MBA or other business program, or law school.

History Faculty

Lloyd Ackert, PhD *(Johns Hopkins University).* Teaching Professor. History of science and technology; ecology; Russian science.

Debjani Bhattacharyya, PhD *(Emory University).* Associate Professor. Urban history, South Asian history, environmental history, legal history, transnational history, post-colonial theory, subaltern studies, history of modern economic thought and feminist history.

Yeonsil Kang, PhD *(Korea Advanced Institute of Science and Technology).* Visiting Assistant Professor. Science and technology studies, history of technology, environmental history.

Alison Kenner, PhD *(Rensselaer Polytechnic Institute).* Associate Professor. Science, technology, and health; environmental health problems; cities and place; feminist theory; medical anthropology; digital humanities

Scott G. Knowles, PhD *(Johns Hopkins University) Department Head, History.* Professor. Urban history, Philadelphia history, history of technology, history of disasters, modern history.

Jonson Miller, PhD *(Virginia Tech).* Teaching Professor. Science and technology, American history, military history.

Toni Pitock, PhD *(University of Delaware) Co-director, Judaic Studies Program.* Assistant Teaching Professor. Atlantic World, Jewish Migration and Diaspora, Economic Culture, Trade Networks, Colonial American History

Nic John Ramos, PhD *(University of Southern California).* Assistant Professor. African American History, history of Medicine, History of Psychiatry, urban History, 20th Century US History, History of Racial Capitalism, History of Sexuality

Rosalind Remer, PhD *(University of California, Las Angeles) Vice Provost & Executive Director, Lenfest Center for Cultural Partnerships;*

Affiliated Faculty Member. History of the Book, Early American economic and business history, Public History, Museum planning, Non-profit Management

Tiago Saraiva, PhD *(Universidad Autónoma de Madrid)*. Associate Professor. History of science and technology; transnational history; environmental history

Jonathan Seitz, PhD *(University of Wisconsin) Assistant Department Head, History*. Teaching Professor. History of religion, science, medicine, witchcraft, early modern Europe, Italy.

Amy Slaton, PhD *(University of Pennsylvania)*. Professor. History of science and technology; history of standards and metrology; intersectionality, race, labor.

Kathryn Steen, PhD *(University of Delaware)*. Associate Professor. History of technology, history of industry and business, and comparative history.

Donald F. Stevens, PhD *(University of Chicago)*. Professor. Modern Latin American history.

Alden Young, PhD *(Princeton University) Director of the Program in Africana Studies*. Assistant Professor. African history; economic history and the history of Arab and African interactions.

Michael Yudell, MPH, PhD *(Columbia University) Chair, Department of Community Health*. Associate Professor. Department of Community Health and Prevention. Public health ethics; history of public health; race and racism; autism.

Emeritus Faculty

Eric Dorn Brose, PhD *(Ohio State University)*. Professor Emeritus. German and European history.

Robert Zaller, PhD *(Washington University)*. Professor Emeritus. English history and early modern European history.

Mathematics

Major: Mathematics
Degree Awarded: Bachelor of Arts (BA) or Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 181.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 27.0101
Standard Occupational Classification (SOC) code: 15-2021

About the Program

The mathematics major at Drexel provides a supportive learning environment in which students obtain a firm grounding in the core areas of mathematics and apply this knowledge to problems encountered in a technological society. The Department of Mathematics (http://drexel.edu/coas/academics/departments-centers/mathematics/) offers students the option of either a BA or a BS degree.

The Mathematics Department takes pride in offering a balanced and flexible curriculum. Three very different kinds of skills are emphasized in the mathematics major:

Abstract Reasoning

All students majoring in mathematics take courses that emphasize abstract reasoning. Students read and write proofs, and graduate well prepared to enter a PhD program in mathematics.

Computing

All students majoring in mathematics take a series of computing courses. This emphasis on computing is one of the distinctive features of the mathematics program at Drexel, and provides students with a competitive advantage in the job market.

Mathematical Modeling

All students majoring in mathematics take multidisciplinary courses that focus on the interplay between mathematics and an area of application. Students often use electives to focus on an area of personal interest. The Department of Mathematics encourages students to minor in a subject where mathematics is applied. The Department provides an advisor to assist students in selecting electives and planning career paths.

Degree Requirements (BA)

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

General Education Requirements		
CIVC 101	Introduction to Civic Engagement	1.0
COM 230	Techniques of Speaking	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III

MATH 201	Linear Algebra	4.0
MATH 210	Differential Equations	4.0
MATH 220 [WI]	Introduction to Mathematical Reasoning	3.0
MATH 331	Abstract Algebra I	3.0-4.0
or MATH 401	Elements of Modern Analysis I	
Math Major Electives [**]		**30.0**

Select a minimum of 30 credits from the following:

MATH 205	Survey of Geometry
MATH 221	Discrete Mathematics
MATH 222 [WI]	Combinatorics
MATH 235	Math Competition Problem Solving Seminar
MATH 238	History of Mathematics
MATH 250	Mathematics of Investment and Credit
MATH 285	Differential Equations II
MATH 300	Numerical Analysis I
MATH 301	Numerical Analysis II
MATH 305	Introduction to Optimization Theory
MATH 311	Probability and Statistics I
MATH 312	Probability and Statistics II
MATH 316	Mathematical Applications of Symbolic Software
MATH 318 [WI]	Mathematical Applications of Statistical Software
MATH 319	Techniques of Data Analysis
MATH 320	Actuarial Mathematics
MATH 321	Vector Calculus
MATH 322	Complex Variables
MATH 323	Partial Differential Equations
MATH 332	Abstract Algebra II
MATH 387	Linear Algebra II
MATH 401	Elements of Modern Analysis I
or MATH 331	Abstract Algebra I
MATH 402	Elements of Modern Analysis II
MATH 422	Introduction to Topology
MATH 449	Mathematical Finance
MATH 450	Introduction to Graph Theory
MATH 475	Cryptography
MATH 483	Discrete Event Simulation
MATH 489	Tensor Calculus
Total Credits	181.0-182.0

*   Math majors must pass MATH 121 with a grade of B or higher.

**   If a student takes both of MATH 331 and MATH 401, then one of these can count as a Mathematics Elective. Up to 3 mathematics-related courses from other departments may be substituted for Mathematics Electives with departmental permission. MATH special topics courses may be substituted for Mathematics Electives with departmental permission.

Categories of Electives

- *Humanities and arts electives*
  Designated courses in art, art history, communication studies, foreign languages (300-level or above), history, literature, music, philosophy, religion, and theatre arts.

- *International electives*
  Designated courses in anthropology, art history, history, literature, music, politics and sociology. Courses with an international focus may be used to fulfill requirements in other categories as well.

- *Science electives*
  Students select two courses from chemistry, biology or physics. Both courses may be in the same subject or they may be in different subject areas.

- *Social and behavioral sciences electives*

Designated courses in anthropology, economics, criminology & justice studies, international relations, history, politics, psychology and sociology.

- *Studies in diversity electives*
  Designated courses in Africana studies, anthropology, communication, English, history, Judaic studies, linguistics, music, sociology and women's & gender studies.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Degree Requirements (BS)

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Select a minimum of 40 credits from the following:		
MATH 222 [WI]	Combinatorics	
MATH 235	Math Competition Problem Solving Seminar	
MATH 250	Mathematics of Investment and Credit	
MATH 285	Differential Equations II	
MATH 300	Numerical Analysis I	
MATH 301	Numerical Analysis II	
MATH 305	Introduction to Optimization Theory	
MATH 311	Probability and Statistics I	
MATH 312	Probability and Statistics II	
MATH 316	Mathematical Applications of Symbolic Software	
MATH 318 [WI]	Mathematical Applications of Statistical Software	
MATH 319	Techniques of Data Analysis	
MATH 320	Actuarial Mathematics	
MATH 321	Vector Calculus	
MATH 322	Complex Variables	
MATH 323	Partial Differential Equations	
MATH 387	Linear Algebra II	
MATH 422	Introduction to Topology	
MATH 449	Mathematical Finance	
MATH 450	Introduction to Graph Theory	
MATH 475	Cryptography	
MATH 483	Discrete Event Simulation	
MATH 489	Tensor Calculus	
Total Credits		181.0-184.0

[*]   Math majors must pass MATH 121 with a grade of B or higher.

[**]   MATH special topics courses may be substituted for Math Major Electives with departmental permission.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study (BA)

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

5-year co-op sequence

Term 1		Credits
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0

Co-op/Career Opportunities

Mathematicians are employed in a variety of capacities in business, industry, and government. Students can combine courses in economics or finance and mathematics to prepare for careers in the actuarial field, banks, stock exchanges, or finance departments of large corporations or other financial institutions. Students interested in science careers may focus on probability and statistics in order to work for industries like pharmaceutical manufacturers. Many others combine math studies with computer science courses to prepare for careers in information systems or engineering.

Teacher certification is also a career option available through a joint program in mathematics and teacher education.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) for more detailed information on co-op and post-graduate opportunities.

Dual Degree Bachelor's Programs

Since applied mathematics plays an important role in many different disciplines, mathematics majors often choose to pursue specialization in a second field of study. Students may choose a dual major that involves completing the requirements of two separate majors or they can opt for a minor, which involves completing the major in one field and a smaller set of courses in another.

Dual majors are common in mathematics/computer science and mathematics/physics. Students interested in a dual major should consult with their advisor or contact the assistant department head. Dual majors in other fields are also possible, but early planning and discussions with advisors is essential.

Mathematics Faculty

David M. Ambrose, PhD *(Duke University) Associate Department Head, Mathematics.* Professor. Applied analysis and computing for systems of nonlinear partial differential equations, especially free-surface problems in fluid dynamics.

Jason Aran, MS *(Drexel University).* Associate Teaching Professor.

Jonah D. Blasiak, PhD *(University of California at Berkeley).* Associate Professor. Algebraic combinatorics, representation theory, and complexity theory.

Yasmine Boolakee-Pant, MS *(University of Freiburg).* Instructor.

Robert P. Boyer, PhD *(University of Pennsylvania).* Professor. Functional analysis, C*-algebras and the theory of group.

Fernando Carreon, PhD *(University of Texas at Austin).* Teaching Professor.

Patrick Clarke, PhD *(University of Miami).* Associate Professor. Homological mirror symmetry, Landau-Ginzburg models, algebraic geometry, symplectic geometry.

Daryl Falco, MS *(Drexel University).* Associate Teaching Professor. Discrete mathematics and automata theory.

Raymond Favocci, MS *(Drexel University).* Associate Teaching Professor.

Darij Grinberg, PhD *(Massachusetts Institute of Technology).* Assistant Professor. Algebraic Combinatorics, Noncommutative Algebra, Symmetric Functions, Hopf Algebras, Enumerative Combinatorics, Invariant Theory

Pavel Grinfeld, PhD *(Massachusetts Institute of Technology).* Associate Professor. Intersection of physics, engineering, applied mathematics and computational science.

Anatolii Grinshpan, PhD *(University of California at Berkeley).* Associate Teaching Professor. Function theory and operator theory, harmonic analysis, matrix theory.

Yixin Guo, PhD *(University of Pittsburgh).* Associate Professor. Biomathematics, dynamical systems, ordinary and partial differential equations and math education.

R. Andrew Hicks, PhD *(University of Pennsylvania).* Professor. Geometry; optics; computer vision.

Pawel Hitczenko, PhD *(Warsaw University).* Professor. Probability theory and its applications to analysis, combinatorics, wavelets, and the analysis of algorithms.

Jeffrey LaComb, PhD *(Duke University).* Assistant Teaching Professor. Rare Event Simulation, Dynamical Systems, Numerical Analysis and Mathematical Biology

Georgi S. Medvedev, PhD *(Boston University).* Professor. Ordinary and partial differential equations, mathematical neuroscience.

Cecilia Mondaini, PhD *(Federal University of Rio de Janeiro).* Assistant Professor. Analysis of Partial Differential Equations, Fluid Dynamics, Stochastic Processes

Shari Moskow, PhD *(Rutgers University) Department Head.* Professor. Partial differential equations and numerical analysis, including homogenization theory, numerical methods for problems with rough coefficients, and inverse problems.

Oksana P. Odintsova, PhD *(Omsk State University).* Teaching Professor. Math education; geometrical modeling.

Dimitrios Papadopoulos, MS *(Drexel University).* Assistant Teaching Professor.

Joel Pereira, PhD *(University of North Carolina).* Assistant Teaching Professor. Commutative Algebra

Ronald K. Perline, PhD *(University of California at Berkeley) Undergraduate Adviser.* Associate Professor. Applied mathematics, numerical analysis, symbolic computation, differential geometry, mathematical physics.

Marci A. Perlstadt, PhD *(University of California at Berkeley).* Associate Professor. Applied mathematics, computed tomography, numerical analysis of function reconstruction, signal processing, combinatorics.

Adam C. Rickert, MS *(Drexel University).* Associate Teaching Professor.

Eric Schmutz, PhD *(University of Pennsylvania).* Professor. Probabilistic combinatorics, asymptotic enumeration.

Li Sheng, PhD *(Rutgers University).* Associate Professor. Discrete optimization, combinatorics, operations research, graph theory and its application in molecular biology, social sciences and communication networks, biostatistics.

Gideon Simpson, PhD *(Columbia University).* Associate Professor. Partial differential equations, scientific computing and applied mathematics.

Xiaoming Song, PhD *(University of Kansas).* Associate Professor. Stochastic Calculus, Large Deviation Theory, Theoretical Statistics, Data Network Modeling and Numerical Analysis.

Jeanne M. Steuber, MS *(Boston University).* Associate Teaching Professor.

Kenneth P. Swartz, PhD *(Harvard University).* Assistant Teaching Professor. Applied statistics, data analysis, calculus, discrete mathematics, biostatistics.

K. Shwetketu Virbhadra, PhD *(Physical Research Laboratory).* Instructor.

Richard D. White, MS *(Penn State University).* Assistant Teaching Professor.

Hugo J. Woerdeman, PhD *(Vrije Universiteit, Amsterdam).* Professor. Matrix and operator theory, systems theory, signal and image processing, and harmonic analysis.

J. Douglas Wright, PhD *(Boston University) Associate Department Head.* Professor. Partial differential equations, specifically nonlinear waves and their interactions.

Dennis G. Yang, PhD *(Cornell University).* Associate Teaching Professor. Dynamical systems, neurodynamics.

Thomas (Pok-Yin) Yu, PhD *(Stanford University).* Professor. Multiscale mathematics, wavelets, applied harmonic analysis, subdivision algorithms, nonlinear analysis, applied differential geometry and data analysis.

Matthew Ziemke, PhD *(University of South Carolina).* Assistant Teaching Professor. Functional Analysis, Operator Algebras, Semigroups, Mathematical Physics

Emeritus Faculty

Howard Anton, PhD *(Polytechnic Institute of Brooklyn).* Professor Emeritus.

Loren N. Argabright, PhD *(University of Washington).* Professor Emeritus. Functional analysis, wavelets, abstract harmonic analysis, the theory of group representations.

Robert C. Busby, PhD *(University of Pennsylvania).* Professor Emeritus. Functional analysis, C*-algebras and group representations, computer science.

Ewaugh Finney Fields, EdD *(Temple University) Dean Emeritus.* Professor Emeritus. Mathematics education, curriculum and instruction, minority engineering education.

William M.Y. Goh, PhD *(Ohio State University).* Associate Professor Emeritus. Number theory, approximation theory and special functions, combinatorics, asymptotic analysis.

Patricia Henry Russell, MS *(Drexel University).* Teaching Professor Emerita.

Bernard Kolman, PhD *(University of Pennsylvania).* Professor Emeritus. Lie algebras; theory, applications, and computational techniques; operations research.

Charles J. Mode, PhD *(University of California at Davis).* Professor Emeritus. Probability and statistics, biostatistics, epidemiology, mathematical demography, data analysis, computer-intensive methods.

Chris Rorres, PhD *(Courant Institute, New York University).* Professor Emeritus. Applied mathematics, scattering theory, mathematical modeling in biological sciences, solar-collection systems.

Justin R. Smith, PhD *(Courant Institute, New York University).* Professor Emeritus. Homotopy theory, operad theory, quantum mechanics, quantum computing.

Jet Wimp, PhD *(University of Edinburgh).* Professor Emeritus. Applied mathematics, special factors, approximation theory, numerical techniques, asymptotic analysis.

Philosophy

Major: Philosophy
Degree Awarded: Bachelor of Arts (BA)
Calendar Type: Quarter
Total Credit Hours: 182.0
Co-op Options: One Co-op (Four years); No Co-op (Four years); Three Co-op (Five years)
Classification of Instructional Programs (CIP) code: 38.0101
Standard Occupational Classification (SOC) code: 25-1126

About the Program

A great philosopher once said, "Philosophers have just interpreted the world--but the point is to change it." At Drexel, we believe ideas do affect and change the world--in how we choose what to do, in how we approach our activities, and in what we learn from them. We think the most important reason to engage in philosophy is that we *can* change the world.

The Drexel philosophy program is organized around the idea that the study of philosophy should help students confront life's complexity. Philosophy classes at Drexel involve students in the active development of their reflective, creative, rational, logical, and linguistic abilities by engaging them with the problems of life and the world. The Drexel philosophy major is an excellent preparation for success in any field of endeavor that values thoughtful reflection, logical thinking, and clear communication about real issues and concerns. It is particularly valuable as a preparation for careers in education and law, or in graduate study in philosophy, or in fields related to philosophy like critical media studies, public policy, or science, technology, and society (STS).

Drexel philosophy majors take a mixture of historical and topical courses in the major fields of philosophical inquiry. These include ethics, metaphysics (philosophy of reality), epistemology (philosophy of knowledge), aesthetics (philosophy of art), social and political philosophy, philosophy of science, and logic. Our philosophy elective classes cover a wide range of subjects including technology, medicine, law, religion, science, the environment, and more. Our upper-level seminar classes are discussion-driven, reading- and writing-intensive classes usually limited to 10-12 students.

Prior to the end of sophomore year students may choose to focus their philosophical studies in one of three areas of concentration. These are:

- Ethical Theory and Practice
- Philosophy and Law
- Philosophy, Technology, and Science

Students may also remain in the general Philosophy concentration, which gives them the widest range of options from which to select their courses.

Prior to the end of junior year, students may opt to work on a nine-credit Senior Thesis. This is a year-long, faculty-mentored independent research and writing project, culminating in a defense before the program's faculty and students. This project consists of three one-on-one tutorials with a faculty member of the student's choosing.

The philosophy BA includes approximately 50.0 credits of free electives, which makes it possible for many students to double major. The Drexel philosophy program also offers a minor in philosophy (24.0 credits) and certificate programs in Ethical Theory and Practice, Philosophy, Arts and Humanities, and Philosophy, Science, and Technology (18.0 credits each).

Additional Information

For more information about Drexel philosophy classes and programs, please visit the Department of English & Philosophy website or drop by to see our director anytime. The Department of English & Philosophy is located in MacAlister Hall, room 5044. The director can be contacted at:

PHIL 102	Introduction to Eastern Philosophy
PHIL 231	Aesthetics: Philosophy of Art
or PHIL 241	Social & Political Philosophy
PHIL 385	Philosophy of Law
PHIL 391	Philosophy of Religion
PHIL 481 [WI]	Seminar in a Philosophical School
PHIL 485 [WI]	Seminar in a Major Philosopher
Select one of the following courses:	
PHIL 301	Business Ethics
PHIL 305	Ethics and the Media
PHIL 311	Ethics and Information Technology
PHIL 315	Engineering Ethics
PHIL 317	Ethics and Design Professions

PHIL 321	Biomedical Ethics
PHIL 322	Ethics of Human Enhancement
PHIL 323	Organizational Ethics
PHIL 325	Ethics in Sports Management
PHIL 330	Criminal Justice Ethics
PHIL 335	Global Ethical Issues
PHIL 340	Environmental Ethics
Philosophy, Technology & Science Concentration:	
PHIL 111	Symbolic Logic I
PHIL 207	Symbolic Logic II
PHIL 218	Philosophy of Mathematics
or PHIL 231	Aesthetics: Philosophy of Art
PHIL 351	Philosophy of Technology
PHIL 361	Philosophy of Science
PHIL 481 [WI]	Seminar in a Philosophical School
PHIL 485 [WI]	Seminar in a Major Philosopher

Total Credits	182.0

*   Students are required to take a minimum of two consecutive courses in a foreign language and must complete at least through the 103 level. Reaching at least the 201 level is recommended for students considering graduate school in Philosophy.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Term 1		Credits
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
PHIL 101	Introduction to Western Philosophy	3.0
PHIL 105	Critical Reasoning	3.0
UNIV H101	The Drexel Experience	1.0
Language elective*		4.0
Math elective		3.0
	Term Credits	17.0

Term 2

CIVC 101	Introduction to Civic Engagement	1.0
ENGL 102 or 112	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing English Composition II	3.0
PHIL 111 or 102	Symbolic Logic I Introduction to Eastern Philosophy	3.0
Math elective		3.0
Language elective		4.0
Social Science elective		3.0
	Term Credits	17.0

Term 3

ENGL 103 or 113	Composition and Rhetoric III: Themes and Genres English Composition III	3.0
PHIL 251	Ethics	3.0
Diversity elective		3.0
Natural Science elective		3.0
Social Science elective		3.0
	Term Credits	15.0

Term 4

ARTH 101 or 102	History of Art I: Ancient to Medieval History of Art II: Renaissance to Romanticism	3.0
PHIL 211	Metaphysics: Philosophy of Reality	3.0
PHIL 212	Ancient Philosophy	3.0
Diversity elective		3.0
Natural Science elective		3.0
	Term Credits	15.0

Term 5

ARTH 102 or 103	History of Art II: Renaissance to Romanticism History of Art III: Modern Art	3.0
PHIL 214	Modern Philosophy	3.0
PHIL 221	Epistemology: Philosophy of Knowledge	3.0
PHIL 481 [WI]	Seminar in a Philosophical School	3.0
Social Science elective		3.0
	Term Credits	15.0

Term 6

COM 230	Techniques of Speaking	3.0
PHIL 207	Symbolic Logic II (or any Professional Ethics elective PHIL 301 - PHIL 340)	3.0
PHIL 215	Contemporary Philosophy	3.0
PHIL 485 [WI]	Seminar in a Major Philosopher	3.0
Free elective		3.0
Social Science elective		3.0
	Term Credits	18.0

Term 7

PHIL 231 or 218	Aesthetics: Philosophy of Art Philosophy of Mathematics	3.0
PHIL 421 [WI]	Seminar in Ancient Philosophy	3.0
UNIV H201	Looking Forward: Academics and Careers	1.0
Free electives		6.0
	Term Credits	13.0

Term 8

PHIL 431 [WI]	Seminar in Modern Philosophy	3.0
International Studies elective		3.0
Free electives		9.0
	Term Credits	15.0

Term 9

International Studies elective		3.0
Professional Ethics elective		3.0
Free electives		9.0
	Term Credits	15.0

Term 10

PHIL 497 [WI]	Senior Essay I: Research & Thesis Development (or Philosophy elective PHIL 341 - PHIL 395)	3.0
Philosophy elective PHIL 341 - PHIL 391		3.0
Free electives		6.0
	Term Credits	12.0

Term 11

PHIL 498 [WI] or 485 [WI]	Senior Essay II: Argument Construction Seminar in a Major Philosopher	3.0
Free electives		9.0
Philosophy Elective PHIL 341 - PHIL 391		3.0
	Term Credits	15.0

Term 12

PHIL 461 [WI] **	Seminar in Contemporary Philosophy	3.0
PHIL 499 [WI] or 481 [WI]	Senior Essay III: Defense Seminar in a Philosophical School	3.0
Free electives		9.0
	Term Credits	15.0

Total Credit: 182.0

*   Students must complete two consecutive courses in a foreign language and must reach the 103 level.

**   An appropriate 400-level PHIL seminar may be substituted for this requirement with program approval.

Co-op/Career Opportunities

Opportunities

No major prepares students for success in as wide a variety of careers as philosophy. Because philosophical work helps students develop superior reasoning, communication, and analytical skills, a philosophy major can be an ideal choice for pre-med or pre-law students. It is also particularly valuable as a preparation for graduate study in philosophy, and fields related to it, such as critical media studies, public policy, education, and science, technology, and society (STS). The Drexel philosophy major is an excellent preparation for success in any field of endeavor that values thoughtful reflection, logical thinking, and clear communication. Philosophy majors graduate into a wide range of successful careers in business, industry, law, government, education, and service organizations and agencies as well as many fields of graduate study and research.

In just its first five years, the Drexel philosophy BA program graduated students into careers including teaching, the law, public policy, and academic research.

Co-op Experiences

Philosophy students at Drexel are encouraged to seek out interesting co-op opportunities related to the skills and interests they are developing through their philosophical studies and potential career options they would like to explore. These can be as broad as the difference between an ethics-related co-op that has the student shadowing an ethicist working for a hospital's board of institutional review, to a student who is interested in aesthetics and politics working with the Philadelphia Mural Arts Program in liaison with community groups. Students in philosophy who are pre-law frequently pursue law-related co-ops and co-ops at public and private agencies and organizations that employ lawyers and law students. Students in philosophy who are thinking about careers in academia have the full gamut of writing, editing, and publishing co-ops available to them, as well as research related co-ops they can develop by working with professors. While academically-oriented co-ops and co-ops in the Humanities generally pay less than those in the sciences, business, law,

and engineering—if they pay at all—they are still enormously valuable as a way for students to develop a sense of what various careers might actually be like and how they work.

For detailed information on co-op and career opportunities, visit the Drexel Steinbright Career Development Center web page. For further information about co-op and career prospects related to philosophy, contact the Drexel philosophy program director:

Philosophy Faculty

Stacey Ake, PhD *(Pennsylvania State University)*. Teaching Professor. Ethics, semiotics, existentialism

Peter Amato, PhD *(Fordham University) Director, Philosophy*. Teaching Professor. Ethics, Marxism, Continental philosophy.

Jacques N. Catudal, PhD *(Temple University)*. Associate Professor. Ancient philosophy, epistemology, aesthetics.

Nathan Hanna, PhD *(Syracuse University)*. Associate Professor. Ethics, philosophy of law, philosophy of punishment

Adam Knowles, PhD *(The New School for Social Research)*. Associate Teaching Professor. Continental philosophy, phenomenology, Heidegger

Carol Mele, PhD *(University of Pennsylvania)*. Associate Teaching Professor. Ethical Theory, social and political philosophy, Rawls.

Flavia Padovani, PhD *(University of Geneva)*. Associate Professor. History and philosophy of science, epistemology, logic.

Marilyn Piety, PhD *(McGill University)*. Professor. History of philosophy, philosophy of religion, Kierkegaard.

Andrew Smith, PhD *(SUNY, Stony Brook)*. Associate Professor. Philosophy, social and political philosophy, American philosophy.

Philosophy, Politics and Economics

Major: Philosophy, Politics and Economics
Degree Awarded: Bachelor of Arts (BA)
Calendar Type: Quarter
Total Credit Hours: 189.0
Co-op Options: One Co-op (Four years); No Co-op (Four years); Three Co-op (Five years)
Classification of Instructional Programs (CIP) code: 45.1004
Standard Occupational Classification (SOC) code: 25-1065

About the Program

Drexel University's BA degree Philosophy, Politics & Economics, or PPE as it is often called, exemplifies Drexel's commitment to comprehensive education at the intersection of thought and practice. A joint endeavor of the School of Economics, the Department of Politics and the Department of English and Philosophy, the BA in PPE provides a multidisciplinary foundation for professionals and researchers who want to address the

complex, interconnected challenges of contemporary life. It prepares students for a wide variety of excellent careers that require thoughtful analysis and engaged leadership including but not limited to public service, government, international and domestic business, law, community organizing, publishing, journalism, education, academic research and more.

PPE began in the early Twentieth Century at Oxford University in the United Kingdom in an effort to ensure that scholars were ready to apply their learning in practical, governmental and business contexts to become leaders and change agents. Historically, political science and economics descend from what had been called "political economy." PPE acknowledges what is often lost in the separation and specialization of these fields—the political wisdom that understands economic imperatives and the economic intelligence that recognizes the limits of political initiative. The philosophical dimension of PPE represents the vital reflective and critical aspects that are essential to bringing political and economic insights into conversation for understanding and leadership. PPE is devoted to the idea that great learning should inspire and empower students to have an impact on the world.

Students in the Drexel BA in PPE begin with the interdisciplinary class PPE 101 *Introduction to Philosophy, Politics and Economics*, which presents the field through a discussion of how the aims and methods of the three constitutive disciplines work together and discussion of the political, economic and philosophical dimensions of specific topics and themes. The Philosophy classes in the major are mainly focused on issues in ethics, logic, philosophy of law, and social and political philosophy. The Politics classes cover a variety of subjects and constitute a solid foundation in Political Science covering topics that include Comparative Politics, History of Political Thought, Qualitative or Quantitative Research Methods, Theories of Justice, American Foreign Policy, Social Protest Movements in Comparative Perspective and more. The Economics classes are designed to give the student a foundation for profound analysis and insight. These include Microeconomics, Macroeconomics, Economic Ideas, Public Finance, and electives chosen from courses which include Game Theory and Applications, Economics of Small Business, Labor Economics, Comparative Economic Systems, Resource and Environmental Economics, and more.

PPE majors also take electives in Sociology, choosing from courses like Race, Ethnicity and Social Inequality, Wealth and Power, Gender and Society, Development and Underdevelopment in the Global South, Environmental Justice and more. In the interactive seminar capstone course, PPE 450, students work with an instructor as they formulate, evaluate and criticize public policy proposals, research and/or theoretical perspectives on political and economic issues using the research tools, arguments and methods drawn from the three fields. PPE majors at Drexel have access to the widest range of co-op positions related to public service, government, international and domestic business, law, community organizing, education, publishing, journalism, academic research and many more areas.

Admission Requirements

The interdisciplinary Philosophy, Politics and Economics (PPE) program exemplifies Drexel's commitment to comprehensive education at the intersection of thought and practice. A joint endeavor of the School of Economics, the Department of Politics, and the Department of English and Philosophy, the BA in PPE provides a multidisciplinary foundation for professionals who will address the complex, interconnected challenges of contemporary life. It prepares students for careers that require careful analysis, clear foresight, and thoughtful leadership: government,

politics, law, public policy, public service, and business. Our program starts from the idea that the economy is fundamentally political, politics are fundamentally economic, and both are shaped by centuries of philosophical inquiry. We build on a foundation of rigorous philosophical thought, political and economic theory, and applied research skills.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

College of Arts and Sciences Requirements:

CIVC 101	Introduction to Civic Engagement	1.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
PHIL 105	Critical Reasoning	3.0
UNIV H101	The Drexel Experience	1.0
UNIV H201	Looking Forward: Academics and Careers	1.0
Two Studies in Diversity classes		6.0
Two International Studies classes		6.0
Two Natural Science classes		6.0
A Mathematics sequence of at least two classes in either Analysis or Calculus [*]		8.0
Two Social and Behavioral Science classes		6.0
Two Arts & Humanities classes [**]		6.0
Two classes in one Foreign Language completing level 103 [***]		8.0
Free Electives		25.0

Major Requirements:

PPE 101	Introduction to Philosophy, Politics and Economics	3.0
PHIL 101	Introduction to Western Philosophy	3.0
PSCI 110	American Government	4.0
or PSCI 140	Comparative Politics I	
or PSCI 150	International Politics	
PHIL 111	Symbolic Logic I	3.0
PSCI 120	History of Political Thought	4.0
One of these Political Science Methods classes:		4.0
PSCI 231	Qualitative and Mixed-Methods Research in Political Science	
PSCI 232	Quantitative Research Methods in Political Science	
ECON 201	Principles of Microeconomics	4.0
ECON 202	Principles of Macroeconomics	4.0
ECON 326 [WI]	Economic Ideas	4.0
PHIL 207	Symbolic Logic II	3.0
PHIL 241	Social & Political Philosophy	3.0
PHIL 251	Ethics	3.0
Two of these Political Science Area classes:		8.0
PSCI 210	American Political Development	
PSCI 229	Theories of Justice	
PSCI 250	American Foreign Policy	
PSCI 252	Global Governance	
PSCI 260 [WI]	Power in Protest: Social Movements in Comparative Perspective	
Two of these Sociology Elective classes:		8.0
SOC 210	Race, Ethnicity and Social Inequality	
SOC 220	Wealth and Power	
SOC 230	Gender and Society	
SOC 330	Development and Underdevelopment in the Global South	
SOC 346	Environmental Justice	

ECON 334	Public Finance	4.0
SOC 355 [WI]	Classical Social Theory	4.0
SOC 356 [WI]	Contemporary Social Theory	4.0
PHIL 385	Philosophy of Law	3.0
Any two Political Science 300 and/or 400-level classes		8.0
Any three Economics classes numbered 250 or higher [†]		12.0
Any two Philosophy 400-level classes		6.0
PPE 450	Senior Seminar in Philosophy, Politics and Economics	4.0
Total Credits		189.0

[*]   For Analysis, take eitherMATH 101 and MATH 102, or MATH 172 and MATH 173 and any necessary prerequisites, For Calculus, take either MATH 116 and MATH 117 or MATH 121 and any necessary prerequisites.

[**] Recommended electives: HIST 222, HIST 315, or HIST 316.

[***] The 103 level class requires 102 and 101 (all 4 credits each) unless one tests out of 101 or 102. A student who tests out of 102 must take 103 and 201.

[†]   Recommended electives: ECON 301 and ECON 321.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Term 1		Credits
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research / English Composition I	3.0
PPE 101	Introduction to Philosophy, Politics and Economics	3.0
UNIV H101	The Drexel Experience	1.0
Foreign Language class		4.0

Philosophy, Politics & Economics Faculty

Peter Amato, PhD *(Fordham University) Director, Philosophy*. Teaching Professor. Ethics, Marxism, Continental philosophy.

Debjani Bhattacharyya, PhD *(Emory University)*. Associate Professor. Urban history, South Asian history, environmental history, legal history, transnational history, post-colonial theory, subaltern studies, history of modern economic thought and feminist history.

Sebastien Bradley, PhD *(University of Michigan)*. Associate Professor. Public finance, international economics.

Zoltan Buzas, PhD *(Ohio State University)*. Assistant Professor. International relations theory, international security, race and politics, diplomatic history.

Zoltán Búzás, PhD *(Ohio State University)*. Assistant Professor. International relations theory, international security, race and politics, diplomatic history.

Erin R. Graham, PhD *(Ohio State University)*. Associate Professor. International institutions, international relations theory, global environmental politics.

Amelia Hoover Green, PhD *(Yale University)*. Associate Professor. Dynamics of conflict-related violence; intra-armed group politics and socialization; statistics in human rights.

Nathan Hanna, PhD *(Syracuse University)*. Associate Professor. Ethics, philosophy of law, philosophy of punishment

Roger A. McCain, PhD *(Louisiana State University) Co-director*. Professor. Computational economics, game theory.

Carol Mele, PhD *(University of Pennsylvania)*. Associate Teaching Professor. Ethical Theory, social and political philosophy, Rawls.

Joel E. Oestreich, PhD *(Brown University) Director of the Global Studies major*. Professor. International organizations, international finance, development, and human rights.

Flavia Padovani, PhD *(University of Geneva)*. Associate Professor. History and philosophy of science, epistemology, logic.

Rachel R. Reynolds, PhD *(University of Illinois)*. Associate Professor. Sociolinguistics, ethnography of communication and discourse analysis; violence against women in mass media; political economy of migration; semiotics including the textual, the visual and multimodal.

Andrew Smith, PhD *(SUNY, Stony Brook)*. Associate Professor. Philosophy, social and political philosophy, American philosophy.

Jose Tapia, PhD *(New School for Social Research).* Associate Professor. Social development, world economy, climate change, macroeconomic effects on health

Physics

Major: Physics
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 40.0801
Standard Occupational Classification (SOC) code: 19-2012

About the Program

Drexel's undergraduate program provides a solid foundation in physics suitable for graduate study or to branch out into other scientific or technical disciplines. The physics program offers an innovative curriculum in a top-notch learning environment: small class sizes, personal input from faculty, and close interaction with researchers who are leaders in their fields. Students explore the span of universal phenomenon— from the farthest reaches of astrophysics and cosmology, to molecular biophysics and subatomic particle physics— providing a solid foundation for continued study and exploration. Most undergraduates actively participate in research projects, including co-authoring publications and presenting results at conferences.

Virtually every course in the physics major is designed to extend the students' ability to handle real-world problems solved by state-of-the-art techniques. An important feature of the program is the large number of electives, which allow a student to pursue topics of special interest. There are numerous elective courses in areas as diverse as biophysics and cosmology, nanoscience and particle physics. Students can also choose electives to meet teacher certification requirements.

The Laboratory for High-Performance Computational Physics is a venue for students to become proficient in numerical techniques, parallel processing, electronic communication, and the basic computer languages and software relevant to advanced studies and research in physics.

The Department of Physics (http://www.drexel.edu/coas/academics/ departments-centers/physics/) conducts a broad array of outreach activities including the Kaczmarczik Lecture Series, public observing nights at the Lynch Observatory (http://www.physics.drexel.edu/ observatory/), and demonstrations in grade school performed by the Drexel Chapter of the Society of Physics Students (http://www.drexel.edu/ coas/academics/departments-centers/physics/student-organizations/ society-physics-students/) (SPS).

In addition to the physics major, the Department also offers a minor in physics as well as a minor in astrophysics (p. 141) and a minor in biophysics (p. 142).

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Core Physics Requirements

	Term Credits	16.0
Term 4		
CHEM 101	General Chemistry I	3.5
MATH 201 or 261	Linear Algebra Linear Algebra	4.0
MATH 291	Complex and Vector Analysis for Engineers	4.0
PHYS 217	Thermodynamics	4.0
	Term Credits	15.5
Term 5		
CHEM 102	General Chemistry II	4.5
MATH 210	Differential Equations	4.0
PHYS 311	Classical Mechanics I	4.0
Subject course *		3.0
	Term Credits	15.5
Term 6		
One of the following:		3.0-5.0
CHEM 103	General Chemistry III	
Any Biology (BIO) course		
Any ENGR course 200-level or higher		
PHYS 326	Quantum Mechanics I	4.0
Method course *		3.0
Free elective		3.0
	Term Credits	13.0-15.0
Term 7		
PHYS 317	Statistical Mechanics	3.0
PHYS 327	Quantum Mechanics II	4.0
Method course		3.0
Business elective		3.0
Liberal studies elective		3.0
	Term Credits	16.0
Term 8		
PHYS 321	Electromagnetic Fields I	4.0
Two Subject courses		6.0
Technical elective		3.0
Free elective		3.0
	Term Credits	16.0
Term 9		
PHYS 322	Electromagnetic Fields II	4.0
PHYS 328 [WI]	Advanced Laboratory	3.0
Method course		3.0
Liberal studies elective		3.0
Business elective		3.0
	Term Credits	16.0
Term 10		
PHYS 408	Physics Seminar	1.0
PHYS 491	Senior Research I	3.0
UNIV S201	Looking Forward: Academics and Careers (Recommended only. For students persuing graduate study.)	1.0
Subject course		3.0
Liberal studies elective		3.0
Free elective		3.0
	Term Credits	14.0
Term 11		

PHYS 408	Physics Seminar	1.0
PHYS 492	Senior Research II	3.0
Subject course		3.0
Free electives		6.0
	Term Credits	13.0
Term 12		
PHYS 408	Physics Seminar	1.0
PHYS 493 [WI]	Senior Research III	3.0
Method course		3.0
Free electives		7.0
	Term Credits	14.0

Total Credit: 180.0-182.0

Co-op/Career Opportunities

Students who complete a degree in physics have many options. Some enter graduate school with the intention of obtaining a master's or a PhD. Others attend medical school. Engineering is yet another option, and graduates of an undergraduate physics program can enter this field with an unusually solid background in fundamental physical principles, mathematics, and computation. It is also possible for physics graduates to work in business and finance; for example, Wall Street employs many analysts trained in such "hard sciences" as physics.

Many Drexel physics graduates proceed directly into graduate schools, or medical or other professional programs. Physics graduates have attended some of the best graduate programs in the United States, including Columbia, Harvard, and CalTech. Other graduates have found jobs in engineering and business, and with such government agencies as the National Bureau of Standards.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) for more detailed information on co-op and post-graduate opportunities.

Facilities

Astrophysics Facilities:

- The Numerical Astrophysics Facility emphasizes theoretical and numerical studies of stars, star formation, planetary systems, star clusters, galaxy distributions, cosmological modeling, gravitational lensing, and the early universe. The facility employs a high-performance Graphics Processing Unit (GPU) compute cluster, each node containing two 6-core, 2.7 GHz Intel Xeon CPUs and 96 Gbytes of RAM, accelerated by 4–6 Nvidia Fermi/Titan GPUs, and connected by QDR infiniband, affording computational speeds of up to 50 trillion floating point operations per second.

- The Joseph R. Lynch Observatory houses a 16-inch Meade Schmidt-Cassegrain telescope equipped with an SBIG CCD camera.

- Drexel was a member of the original Sloan Digital Sky Survey (SDSS) collaboration; faculty and students remain active in analyzing data from the SDSS. Drexel is an institutional member of the Large Synoptic Survey Telescope (LSST), currently under construction in Chile; faculty and students are developing LSST-related machine learning tools and analyzing simulated LSST data to prepare for "first light" in 2022.

Biophysics Facilities:

- Bio-manipulation and microscopy laboratories. Four optical tables and six research grade microscopes are configured to perform microscopic spectroscopy and manipulation on solutions and individual cells. A spatial light modulator allows spatial patterns to be encoded on samples and explored; all microscopes are temperature controlled with state of the art cameras, including a 2,000 frame per second high speed system. Each optical table is also equipped with high power lasers for photolysis or fluorescence spectroscopy. Microfluidic attachments are present on one table, and in an adjacent laboratory, a small microfluidic fabrication facility has been established.

- Experimental biophysics lab for studies of proteins and biomimetic lipids, including a fluorescence spectrometer.

- The Computational Biophysics facility also includes: (i) a Beowulf cluster with 46 dual Quad-core hyperthreaded Xeon CPU (736 cores) and 12Gb of RAM nodes plus a master with 1Tb of storage and 24Gb of RAM, (ii) a Beowulf cluster with 44 dual-core Xeon CPU (344 cores),(iii) a dual Quad-core hyperthreaded Xeon CPU workstation with 24Gb RAM and 3Tb disk with two Tesla C2050 GPU CUDA-accelerated graphics card, (iv) a dual Quad-core hyperthreaded Xeon CPU workstation with 8Gb RAM and 4Tb disk with an NVIDIA N280 GPU CUDA-accelerated graphics card, (v) a quad 8-core hyperthreaded Xeon CPU workstation with 128Gb RAM and 16Tb total disk, (vi) a 72Tb file server with 12Gb RAM, (vii) a 96Tb quad 6-core file server with 64Gb RAM, (viii) and several Linux workstations connected through a gigabit network.

Condensed Matter Physics Research Facilities:

- The Energy Materials Research Laboratory is devoted to atomic scale investigations of materials for energy. As the size of the system shrinks, conventional bulk thermodynamics becomes irrelevant and we enter the realm of mesoscopic physics. The equilibrium behavior of small systems is governed by the prevailing number of surface atoms that behave differently from the bulk ones. The electronic properties are also subject to reduced number of available electronic states. We take advantage of different scanning probe microscopy and spectroscopy techniques to elucidate the local electronic properties of materials that are relevant to solving energy problems. The laboratory research is funded by grants from NSF and DOE.

- The Ultrafast Electron Diffraction Laboratory investigates structural dynamics in nanoscale materials at timescales that are fundamental to materials science and condensed matter physics. The techniques are based on exciting matter with light and probing the response of the lattice with electrons. The research interests of the lab are in a range of phenomena and systems including phase transformations induced by strong laser excitation, phase transformations in strongly correlated systems, generation and detection of coherent lattice vibrations, and characterization of materials properties of graphene, few-layer-graphene, ultra-thin graphite & nanocrystalline diamond.

- The Ultra-low Temperature Laboratory includes a dilution refrigerator, 3He and 4He cryostats and microwave sources to study quantum phenomena in nano and microscale devices, superconducting qubits, nanostructures and quantum fluids and solids.

- The Mesoscale Materials Laboratory investigates light-matter interactions and the extent and effects of ordering of lattice, charge and spin degrees of freedom on electronic phases and functional properties in solids, with an emphasis on bulk and epitaxial film complex oxides. Facilities include instrumentation for pulsed laser deposition of epitaxial complex oxide films, atomic layer deposition, variable-temperature characterization of carrier transport (DC to 20

GHz), and a laser spectroscopy lab enabling high-resolution Raman scattering spectroscopy at temperatures to 1.5 K and under magnetic field to 7 T.

Particle Physics Facilities:

- The Drexel Particle Physics Group researches fundamental neutrino properties with the DUNE long baseline experiment hosted by Fermilab and the PROSPECT short baseline reactor experiment located at Oak Ridge National Laboratory, as well as the planned nEXO neutrinoless double beta decay experiment.
- We are also active in the IceCube neutrino telescope located at the geographic South Pole.
- The Bubble Chamber Laboratory develops superheated-liquid detectors for rare-interaction searches, including the PICO dark matter experiment located at SNOLAB in Canada.

Laboratory for High-Performance Computational Physics:

- In addition to the department computing cluster (15 linux workstations), high-performance computing resources include a dual-processor server with two Xeon E5-2650 processors (16 cores), 128 GB of RAM, and two Xeon Phi P5110 co-processor cards (480 cores). Department researchers also have access to a cluster of 18 Dell PowerEdge C6145 servers (AMD Opteron 6378 Piledriver CPU's, 64 cores/server, 256 GB RAM/server) with a total of 1152 cores and 4.5TB RAM.

Physics Faculty

Alexey Aprelev, PhD *(St Petersburg State University)*. Assistant Teaching Professor. Experimental biophysics.

Eric Brewe, PhD *(Arizona State University)*. Associate Professor. Physics Education Research, introductory course reform, network analysis in learning, neuromechanisms of learning.

Luis R. Cruz Cruz, PhD *(MIT)*. Associate Professor. Computational studies of confinement effects on the folding of amyloidogenic proteins, spatial correlations of neurons in the brain, firing dynamics of neuronal networks, fluid flow through porous media.

N. John DiNardo, PhD *(University of Pennsylvania)*. Professor. Physics education research, surface physics, condensed matter physics, materials science.

Michelle Dolinski, PhD *(University of California, Berkeley) Associate Dean of Graduate Education*. Associate Professor. Neutrino physics, rare nuclear decays, cryogenic detector technologies.

Frank A. Ferrone, PhD *(Princeton University)*. Professor. Experimental and theoretical protein dynamics, kinetics of biological self-assembly, including sickle cell and Alzheimer's disease, sickle cell testing and diagnostic devices.

David M. Goldberg, PhD *(Princeton University) Associate Department Head for Undergraduate Studies*. Professor. Theoretical and computational cosmology, extragalactic astrophysics, gravitational lensing.

Goran Karapetrov, PhD *(Oregon State University)*. Professor. Experimental solid state physics, scanning probe microscopy, nanoscale catalysis, mesoscopic superconductivity.

Rachael M. Kratzer, PhD *(Drexel University)*. Assistant Teaching Professor. Quasars, active galactic nuclei

Charles Lane, PhD *(California Institute of Technology)*. Professor. Experimental tests of invariance principles and conservation laws, neutrino oscillations and properties.

Christina Love, PhD *(Temple University)*. Associate Teaching Professor. Educational methods and technology, STEM education, science literacy and outreach, particle physics, astrophysics.

Stephen L. W. McMillan, PhD *(Harvard University) Department Head*. Professor. Stellar dynamics, large-scale computations of stellar systems, and high-performance special-purpose computers.

Naoko Kurahashi Neilson, PhD *(Stanford University)*. Associate Professor. Neutrino physics, high energy astro-particle physics.

Russell Neilson, PhD *(Stanford University)*. Associate Professor. Dark matter, neutrino physics.

Gordon Richards, PhD *(University of Chicago)*. Professor. Quasars, active galactic nuclei, supermassive black holes, galaxy evolution, sky surveys, infrared/X-ray/radio astronomy

Jonathan E. Spanier, PhD *(Columbia University) Department Head, Mechanical Engineering and Mechanics*. Professor. Light-matter interactions in electronic materials, including ferroelectric semiconductors, complex oxide thin film science; laser spectroscopy, including Raman scattering.

Somdev Tyagi, PhD *(Brigham Young University) Associate Head of Non-Major Studies in Physics*. Professor. Nanobiophysics, Raman spectroscopy, magnetic materials.

Brigita Urbanc, PhD *(University of Ljubljana, Slovenia) Associate Department Head for Graduate Studies*. Professor. Computational and experimental biophysics of protein folding and assembly, relevant to Alzheimer's and Parkinson's disease; discrete molecular dynamics of coarse-grained protein and lipid models.

Jörn Venderbos, PhD *(Leiden University)*. Assistant Professor. Theory of quantum materials: topological Insulators, topological semimetals, materials prediction and design, strongly correlated electron materials, complex electronic ordering phenomena, unconventional superconductors

Michael Vogeley, PhD *(Harvard University) Associate Department Head for Graduate Studies*. Professor. Cosmology; galaxy formation and evolution; statistical analysis of large data sets; active galactic nuclei.

Emeritus Faculty

Shyamalendu Bose, PhD *(University of Maryland)*. Professor Emeritus.

Leonard D. Cohen, PhD *(University of Pennsylvania)*. Professor Emeritus.

Leonard X. Finegold, PhD *(University of London)*. Professor Emeritus.

Robert Gilmore, PhD *(Massachusetts Institute of Technology)*. Professor Emeritus.

Richard D. Haracz, PhD *(Wayne State University)*. Professor Emeritus.

Frederick House, PhD *(University of Wisconsin)*. Professor Emeritus.

Arthur P. Joblin, PhD *(Drexel University)*. Professor Emeritus.

Donald C. Larson, PhD *(Harvard University)*. Professor Emeritus.

Teck-Kah Lim, PhD *(University of Adelaide)*. Professor Emeritus.

Arthur E. Lord, PhD *(Columbia University)*. Professor Emeritus.

James McCray, PhD *(California Institute of Technology)*. Professor Emeritus.

Richard I Steinberg, PhD *(Yale University)*. Professor Emeritus.

T. S. Venkataraman, PhD *(Worcester Polytechnic Institute)*. Professor Emeritus.

Jian-Min Yuan, PhD *(University of Chicago)*. Professor Emeritus.

Political Science

Major: Political Science
Degree Awarded: Bachelor of Arts (BA)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 45.1001
Standard Occupational Classification (SOC) code: 19-3094

About the Program

The political science program in the Department of Politics (http://www.drexel.edu/coas/academics/departments-centers/politics/) helps students cultivate perspective, develop critical thinking and communication skills, and understand the economic, social, and political systems within which we live and work. Our curriculum builds on the department's research focuses and strengths. These include public policy, environmental politics, international organizations, human rights, and law and society. This flexible program allows students to shape a curriculum that meets their needs, whether they are preparing for public service, the business world, graduate school in political science, an MBA or other business program, or law school.

Degree Offered

The department offers a Bachelor of Arts (BA) in political science. Students may choose a substantive 'track' that best fits their needs and future goals. Our current tracks are: American Politics and Policy, International Politics, and Law and Politics.

The Bachelor of Arts (BA) provides a flexible course of study, which includes foreign language and allows for options in the fulfillment of humanities, social science, math, and science requirements.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

General Education Requirements		
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
UNIV H101	The Drexel Experience	1.0
UNIV H201	Looking Forward: Academics and Careers	1.0
CIVC 101	Introduction to Civic Engagement	1.0
Two Math courses		6.0-8.0
Two Science courses*		6.0-8.0
Foundation Requirements		
Studies in Diversity electives		6.0
Three Consecutive Foreign Language courses (must complete level 201)**		11.0-12.0
Humanities/Fine Arts electives		12.0
Social Science electives		12.0
International Studies electives		6.0
Core Political Science Requirements		
PSCI 110	American Government	4.0
PSCI 120	History of Political Thought	4.0
PSCI 140	Comparative Politics I	4.0
PSCI 150	International Politics	4.0
Political Science Research Methods Sequence		
PSCI 131 [WI]	Research Design for Political Science	4.0
PSCI 231	Qualitative and Mixed-Methods Research in Political Science	4.0
PSCI 232	Quantitative Research Methods in Political Science	4.0
Intermediate Courses		**16.0**
Select four of the following courses:		
PSCI 210	American Political Development	
PSCI 220	Constitutional Law I	
PSCI 223	Comparative Political Thought	
PSCI 229	Theories of Justice	
PSCI 240	Comparative Politics II	
PSCI 250	American Foreign Policy	
PSCI 251	Global Governance	
PSCI 260 [WI]	Power in Protest: Social Movements in Comparative Perspective	
PSCI 330	Public Opinion & Propaganda	
PSCI 363	Constitutional Law II	
Political Science Electives ***		**32.0**
Free Electives		**33.0**
Total Credits		180.0-185.0

* Any Biology (BIO), Chemistry (CHEM), Geoscience (GEO), Nutrition (NFS), Physics (PHYS) or Environmental Science (ENVS) course.

** University requirement is two consecutive courses; the third language course, though listed here, is a departmental requirement.

*** Choose eight 200-level or above PSCI courses.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/

academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Term 1		Credits
UNIV H101	The Drexel Experience	1.0
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
PSCI 110	American Government	4.0
PSCI 150	International Politics	4.0
Foreign Language course		4.0
	Term Credits	16.0
Term 2		
CIVC 101	Introduction to Civic Engagement	1.0
ENGL 102 or 112	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing English Composition II	3.0
PSCI 120	History of Political Thought	4.0
PSCI 131 [WI]	Research Design for Political Science	4.0
Foreign Language course		4.0
	Term Credits	16.0
Term 3		
ENGL 103 or 113	Composition and Rhetoric III: Themes and Genres English Composition III	3.0
PSCI 140	Comparative Politics I	4.0
Foreign Language course		3.0
Diversity Studies elective		3.0
Social Science elective		3.0
	Term Credits	16.0
Term 4		
PSCI 232	Quantitative Research Methods in Political Science	4.0
Choose one intermediate course		4.0
Mathematics course		3.0
Diversity Studies elective		3.0
Free elective		3.0
	Term Credits	17.0
Term 5		
PSCI 231	Qualitative and Mixed-Methods Research in Political Science	4.0
Choose one intermediate course		4.0
Social Science elective		3.0
Mathematics course		3.0
Free elective		3.0
	Term Credits	17.0
Term 6		
Choose one intermediate course		4.0
Political Science elective		4.0
Humanities/Fine Arts elective		3.0
Science elective		3.0
Free elective		3.0
	Term Credits	17.0
Term 7		
Political Science elective		4.0
Free electives		9.0
	Term Credits	13.0
Term 8		
Choose one intermediate course		4.0
Political Science elective		4.0
Humanities/Fine Arts elective		3.0
Social Science elective		3.0
	Term Credits	14.0
Term 9		
Social Science elective		3.0
Humanities/Fine Arts elective		3.0
Political Science elective		4.0
Free elective		3.0
	Term Credits	13.0
Term 10		
UNIV H201	Looking Forward: Academics and Careers	1.0
Social Science elective		3.0
Humanities/Fine Arts elective		3.0
Political Science elective		4.0
Free elective		3.0
	Term Credits	14.0
Term 11		
International Area Studies elective		3.0
Political Science electives		8.0
Free elective		3.0
	Term Credits	14.0
Term 12		
Political Science elective		4.0
International Area Studies elective		3.0
Free electives		6.0
	Term Credits	13.0

Total Credit: 180.0

Co-Op/Career Opportunities

Political science majors have a wide variety of co-op experiences from which to choose. Business and public utilities offer many lucrative possibilities, and local, state, and federal governments; museums and archives; and law firms present many additional interesting co-op placements. Pre-law students, for example, are especially eager to see the inside of a law office, whether the co-op job they receive is clerical or a more challenging paralegal assignment. These practical experiences in the "real" world can reinforce the lessons of the classroom, sharpen skills, and establish important contacts. Sample co-op positions include:

- Law clerk/paralegal, Joe Davidson, Attorney-at-Law, Philadelphia
- Research analyst, Legislative Office for Research Liaison, Harrisburg, PA
- Legislative intern, Corporate Public Affairs Division, Philadelphia Electric Company
- Assistant lobbyist, Government Relations Office, Drexel University
- Education intern, Philadelphia Museum of Art
- Researcher, Philadelphia Chamber of Commerce
- Assistant, Office of the Governor, Harrisburg, PA

Career Opportunities

The flexible programs allow students to shape a curriculum that meets their needs, whether they are preparing for the business world, graduate school in history or political science, the Department's Masters Program in Science, Technology, and Society (http://drexel.edu/coas/academics/

departments-centers/science-technology-society/), an MBA or other business program, or law school.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities.

Politics Faculty

Phillip Ayoub, PhD *(Cornell University)*. Assistant Professor. International relations, comparative politics, transnational social movements, marginalized groups

Zoltan Buzas, PhD *(Ohio State University)*. Assistant Professor. International relations theory, international security, race and politics, diplomatic history.

Zoltán Búzás, PhD *(Ohio State University)*. Assistant Professor. International relations theory, international security, race and politics, diplomatic history.

Rose Corrigan, PhD *(Rutgers University) Director of the Center for Law, Policy, and Social Action*. Associate Professor. Women, public law, American politics and policy.

Richardson Dilworth, PhD *(Johns Hopkins University) Director, Center for Public Policy*. Professor. American political development, urban politics, public policy.

Erin R. Graham, PhD *(Ohio State University)*. Associate Professor. International institutions, international relations theory, global environmental politics.

Amelia Hoover Green, PhD *(Yale University)*. Associate Professor. Dynamics of conflict-related violence; intra-armed group politics and socialization; statistics in human rights.

Christian Hunold, PhD *(University of Pittsburgh)*. Professor. Environmental policy; comparative politics; urban wildlife; political theory.

Alison Kenner, PhD *(Rensselaer Polytechnic Institute)*. Associate Professor. Science, technology, and health; environmental health problems; cities and place; feminist theory; medical anthropology; digital humanities

Joel E. Oestreich, PhD *(Brown University) Director of the Global Studies major*. Professor. International organizations, international finance, development, and human rights.

Gwen Ottinger, PhD *(University of California, Berkeley)*. Associate Professor. Social studies of science and technology, environmental justice, science and engineering ethics, citizen science, environmental ethics.

William L. Rosenberg, PhD *(Temple University)*. Professor. Behavioral politics, public opinion, and political communication.

Jack Santucci, PhD *(Georgetown University)*. Assistant Teaching Professor. Electoral Systems, Political Parties, American Political Development.

Chloe Silverman, PhD *(University of Pennsylvania) Director, Center for Science, Technology & Society*. Associate Professor. Parent advocacy for autism, neurodiversity, and pollinator health research.

Jose Tapia, PhD *(New School for Social Research)*. Associate Professor. Social development, world economy, climate change, macroeconomic effects on health

Emeritus Faculty

Julie Mostov, PhD *(New York University)*. Professor Emeritus. Modern political thought, democratic theory, nationalism, gender studies, South Eastern Europe and the Balkans.

Psychology

Major: Psychology
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 42.0101
Standard Occupational Classification (SOC) code: 19-3031

About the Program

Drexel University's Department of Psychology is a tight-knight, active community of internationally known faculty and impressive student scholars. The department defines psychology as a science of mind and behavior. From the neurophysiological underpinnings of cognition to defining the impact of human behaviors within the judicial systems and policies. Psychology contributes the human behavioral aspects to other fields, including STEM, medicine, law, arts and social sciences. Our students work alongside professors on cutting-edge research and clinical projects in a range of areas, including health, forensic, neuropsychology, human development, experimental, cognitive and clinical psychology. Undergraduates also benefit from Drexel's cooperative education program, gaining hands-on, extensive work experience in areas of their interest.

Bachelors of Science in Psychology

Students in the Bachelor of Science in Psychology program learn how to ask and answer important questions regarding human behavior, cognition and emotion, and how to apply their findings to improve lives. Within the program, students have the option to concentrate in specific areas:

Mind, Brain and Behavior

The Mind, Brain and Behavior (MBB) area of focus allows psychology majors to concentrate their plan of study on how the mind and brain produce human behavior. Situating the mind within its biological substrate is one of the great scientific challenges of the 21st centruy. MBB covers introductory through advanced courses, exposing students to the formal study of the human mind and behavior and their underlying brain systems and structures

Human Development

This area allows students to focus on issues affecting human development across the lifespan. Using a biological, cognitive and socio-emotional perspective, students gain both breadth and depth in the understanding of current issues in child, adolescent and adult development.

Clinical and Health

For those interested in health and service careers, this area of focus includes coursework, experiential learning, and individualized mentorship, providing students with practical experience in the field.

Combined Bachelors/Masters Degree

There is an accelerated MS program entitled the Psychology BS/MS Scholars program to which undergraduates may apply. For more information, visit the Drexel University Department of Psychology (http://www.drexel.edu/coas/academics/departments-centers/psychology/) homepage.

Additional Information

To schedule an appointment students should contact the Psychology department's academic advisor:

Devon M. Thomas
Academic Advisor, Undergraduate Program
Phone: 215-895-0487
Email: dmt356@drexel.edu
Office: Stratton 103A

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

College Requirements

CIVC 101	Introduction to Civic Engagement	1.0
COM 230	Techniques of Speaking	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
Select one of the following:		8.0
MATH 101 & MATH 102	Introduction to Analysis I and Introduction to Analysis II	
MATH 121 & MATH 122	Calculus I and Calculus II	
UNIV H101	The Drexel Experience	1.0
UNIV H201	Looking Forward: Academics and Careers	1.0
Business elective		4.0
Fine Arts elective		3.0
Anthropology (ANTH) elective		3.0
English (ENGL) electives, 200-level or above		6.0
History (HIST) electives		8.0
Philosophy (PHIL) elective		3.0
Political Science (PSCI) elective		4.0
Sociology (SOC) elective		3.0
Select one of the following sequences:		8.0
Biology		
BIO 107	Cells, Genetics & Physiology	
BIO 108	Cells, Genetics and Physiology Laboratory	
BIO 109	Biological Diversity, Ecology & Evolution	
BIO 110	Biological Diversity, Ecology and Evolution Laboratory	
Chemistry		
CHEM 111	General Chemistry I	
CHEM 112	General Chemistry II	
Physics		
PHYS 103	General Physics I	
PHYS 104	General Physics II	
Free electives		49.0
Departmental Requirements		
General Psychology Requirements		
PSY 111	Pre-Professional General Psychology I [*]	3.0
PSY 112	Pre-Professional General Psychology II [*]	3.0
100-Level Requirements		
Select two of the following:		6.0
PSY 120	Developmental Psychology	
PSY 140	Approaches to Personality	
PSY 150	Introduction to Social Psychology	
Required Psychology Courses		
PSY 212	Physiological Psychology	3.0
PSY 240 [WI]	Abnormal Psychology	3.0
PSY 264	Computer-Assisted Data Analysis I	3.0
PSY 265	Computer-Assisted Data Analysis II	3.0
PSY 280	Psychological Research I	3.0
PSY 290	History and Systems of Psychology	3.0
PSY 325	Psychology of Learning	3.0
PSY 330	Cognitive Psychology	3.0
PSY 360 [WI]	Experimental Psychology	3.0
PSY 380	Psychological Testing and Assessment	3.0
Advanced Psychology Electives		
Any non-required PSY course at the 200-level or above.		12.0
Senior Seminar Sequence OR Psychology Electives [**]		
PSY 490 [WI]	Psychology Senior Thesis I	4.0
PSY 491 [WI]	Psychology Senior Thesis II	4.0
PSY 492 [WI]	Psychology Senior Thesis III	4.0
Total Credits		180.0

[*]   Students with AP psychology, or transfer students with PSY 101 credit, should check the AP Student Placement Exam Crosswalk (http://www.drexel.edu/provost/policies/pdf/supporting/ap_crosswalk.pdf) or check with their advisor.

[**]   Students who do not wish to complete the research seminar sequence are required to complete 12.0 credits of additional advanced Psychology electives instead.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses

with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Term 1		Credits
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
PSY 111	Pre-Professional General Psychology I	3.0
MATH 121 or 101	Calculus I Introduction to Analysis I	4.0
UNIV H101	The Drexel Experience	1.0
Select one of the following:		4.0
CHEM 111	General Chemistry I	
PHYS 103	General Physics I	
BIO 107 & BIO 108	Cells, Genetics & Physiology	
	Term Credits	15.0
Term 2		
CIVC 101	Introduction to Civic Engagement	1.0
ENGL 102 or 112	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing English Composition II	3.0
MATH 102 or 122	Introduction to Analysis II Calculus II	4.0
PSY 112	Pre-Professional General Psychology II	3.0
Select one of the following:		4.0
BIO 109 & BIO 110	Biological Diversity, Ecology & Evolution	
CHEM 112	General Chemistry II	
PHYS 104	General Physics II	
Select one of the following:		3.0
PSY 120	Developmental Psychology	
PSY 140	Approaches to Personality	
PSY 150	Introduction to Social Psychology	
	Term Credits	18.0
Term 3		
ENGL 103 or 113	Composition and Rhetoric III: Themes and Genres English Composition III	3.0
PSY 240 [WI]	Abnormal Psychology	3.0
UNIV H201	Looking Forward: Academics and Careers	1.0
Select one of the following:		3.0
PSY 120	Developmental Psychology	
PSY 150	Introduction to Social Psychology	
PSY 140	Approaches to Personality	
Anthropology (ANTH) elective		3.0
Fine Arts elective		3.0
	Term Credits	16.0
Term 4		
PSY 264	Computer-Assisted Data Analysis I	3.0
PSY 290	History and Systems of Psychology	3.0
English (ENGL) elective, 200-level or above		3.0
Political Science (PSCI) elective		4.0
Sociology (SOC) elective		3.0
	Term Credits	16.0
Term 5		
COM 230	Techniques of Speaking	3.0
PSY 265	Computer-Assisted Data Analysis II	3.0

PSY 330	Cognitive Psychology	3.0
English (ENGL) elective, 200-level or above		3.0
Philosophy (PHIL) elective		3.0
	Term Credits	15.0
Term 6		
PSY 212	Physiological Psychology	3.0
PSY 280	Psychological Research I	3.0
PSY 360 [WI]	Experimental Psychology	3.0
Psychology elective		3.0
Business elective		4.0
	Term Credits	16.0
Term 7		
PSY 325	Psychology of Learning	3.0
PSY 380	Psychological Testing and Assessment	3.0
Psychology elective		3.0
History elective		4.0
Free elective		3.0
	Term Credits	16.0
Term 8		
Psychology elective[*]		3.0
History elective		4.0
Free electives		7.0
	Term Credits	14.0
Term 9		
Psychology elective[*]		3.0
Free electives		12.0
	Term Credits	15.0
Term 10		
PSY 490 [WI][**]	Psychology Senior Thesis I	4.0
Free electives		9.0
	Term Credits	13.0
Term 11		
PSY 491 [WI][**]	Psychology Senior Thesis II	4.0
Free electives		9.0
	Term Credits	13.0
Term 12		
PSY 492 [WI][**]	Psychology Senior Thesis III	4.0
Free electives		9.0
	Term Credits	13.0

Total Credit: 180.0

*   See degree requirements (p. 116).

**   Students who do not wish to complete the research seminar sequence are required to complete 12.0 credits of additional advanced Psychology electives instead.

Co-op/Career Opportunities

Some graduates seek employment immediately after receiving their bachelor's degrees.They are well trained to work as research assistants in consulting firms and medical settings or to provide front-line services in mental health and educational settings. Other graduates go on to professional schools in law, business, medicine, and other health professions. Still others pursue graduate training in psychology and related fields. Students build skills and knowledge that provide a foundation for advanced study, create opportunities for future growth, and can be used to improve the quality of life for others.

Co-Op Experiences

Drexel University has long been known for its co-operative education programs, through which students mix periods of full-time, career-related

employment with their studies. Co-op/internship employment is an option for psychology majors. Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities.

Psychology Faculty

Meghan Butryn, PhD *(Drexel University).* Associate Professor. Treatment and prevention of obesity and eating disorders, behavioral treatment, acceptance and commitment therapy.

Dorothy Charbonnier, PhD *(State University of New York at Stony Brook).* Associate Teaching Professor. The nature of the creative process and writing.

Evangelia Chrysikou, PhD *(Temple University).* Associate Professor. Cognitive neuroscience, neuropsychology, neural basis of language, memory, and executive functions, neurocognitive processes associated with problem solving and flexible thought

Douglas L. Chute, PhD *(University of Missouri) Louis and Bessie Stein Fellow.* Professor. Neuropsychology and rehabilitation; technological applications for the cognitively compromised and those with acquired brain injuries.

Brian Daly, PhD *(Loyola University, Chicago) Interim Department Head.* Associate Professor. Pediatric neuropsychology, intervention with at-risk youth.

David DeMatteo, PhD, JD *(MCP Hahnemann University; Villanova University School of Law) Director of the JD-PhD Program in Law and Psychology.* Professor. Psychopathy, forensic mental health assessment, drug policy; offender diversion.

Evan M. Forman, PhD *(University of Rochester) Director WELL Center.* Professor. Clinical psychology: mechanisms and measurement of psychotherapy outcome, cognitive-behavioral and acceptance based psychotherapies, the development and evaluation of acceptance-based interventions for health behavior change (for problems of obesity and cardiac disease) as well as mood and anxiety disorders; neurocognition of eating.

Pamela Geller, PhD *(Kent State University) Director, Clinical Training.* Associate Professor. Stressful life events and physical and mental health outcomes, particularly in the area of women's reproductive health (e.g. pregnancy, pregnancy loss, infertility, medical education).

Maureen Gibney, PsyD *(Widener University).* Teaching Professor. Clinical psychopathology; neuropsychological evaluation and intervention with the elderly.

Naomi Goldstein, PhD *(University of Massachusetts) Co-Director of the JD-PhD Program; Stoneleigh Foundation Fellow.* Professor. Forensic psychology; juvenile justice; Miranda rights comprehension; false confessions; juvenile justice treatment outcome research; anger management intervention development; child and adolescent behavior problems.

Kirk Heilbrun, PhD *(University of Texas at Austin).* Professor. Forensic psychology, juvenile and adult criminality, violence risk assessment, forensic psychological assessment, treatment of mentally disordered offenders, academic-sports mentoring.

Adrienne Juarascio, PhD *(Drexel University) Director, Practicum Training.* Assistant Professor. Enhancing treatment outcomes for eating disorders

and obesity; Acceptance-based behavioral treatments; Evaluating mechanisms of action in behavioral treatments

Marlin Killen, PhD *(Trident University International).* Teaching Professor. Authentic teaching methods in Psychology as well as student persistence behavior.

John Kounios, PhD *(University of Michigan) Director, PhD Program in Applied Cognitive and Brain Sciences.* Professor. Cognitive neuroscience, especially creativity, problem solving, and cognitive enhancement.

David Kutzik, PhD *(Temple University).* Professor. Social and cultural theory, political economy, gerontology, materialisms, activity theory, reflection theories, communities of practice and labor theories of culture.

Michael Lowe, PhD *(Boston College).* Professor. Prevention and treatment of eating disorders and obesity; effects of appetitive responsiveness and dietary restraint on eating regulation; psychobiology of obesity-proneness; empirical foundations of unconscious processes.

John Medaglia, PhD *(The Pennsylvania State University).* Assistant Professor. Applying models and methods developed in neuropsychology, cognitive neuroscience and graph theory to understand and treat brain dysfunction and enhance healthy functioning

Megan Meyer, PhD *(Temple University).* Assistant Teaching Professor. Influences on preferred body type; changes in body image, self-esteem, and self-efficacy in females as a function of strength training; Sensation and Perception

Danette Morrison, PhD *(University of Maryland - College Park).* Assistant Teaching Professor. Social and academic motivation within school context; Social relationships and identity development; Educational attainment of ethnic minorities

Arthur Nezu, PhD, DHLL, ABPP *(State University of New York at Stony Brook).* Distinguished University Professor of Psychology, Professor of Medicine, Professor of Community Health and Prevention. Behavioral medicine applications of problem-solving therapy and other cognitive-behavior therapies (e.g., to decrease emotional and psychosocial risk factors; improve adherence), particularly with regard to patients with cardiovascular disease; assessment.

Christine Maguth Nezu, PhD *(Fairleigh Dickinson University).* Professor of Psychology, Professor of Medicine. Cognitive-behavioral assessment and treatment for mood, anxiety, personality disorders, and coping with chronic illness; mind/body studies; stress and coping; developmental disabilities and comorbid behavioral and emotional disorders; spirituality and psychology.

Karol Osipowicz, PhD *(Thomas Jefferson University).* Associate Teaching Professor. The application of advanced neuroimaging to the study of human brain function and anatomy.

Nancy Raitano Lee, PhD *(University of Denver) Director of MS and BS/MS Programs.* Associate Professor. Neuropsychological and neuroanatomic correlates of intellectual and developmental disabilities; Verbal memory and language difficulties in Down syndrome and other genetic disorders; Comorbid autism spectrum disorder symptoms in youth with genetic disorders; Neuroanatomic correlates of individual differences in typical and atypical cognition

Diana Robins, PhD *(University of Connecticut) Interim Director, AJ Drexel Autism Institute.* Professor. Autism screening, early detection of autism

Ludo Scheffer, PhD *(University of Pennsylvania) Director of Undergraduate Studies.* Teaching Professor. Meta-cognitive development, writing, and computers; Language and literacy development in the early years in the context of family and schooling; Youth-at-risk; School violence and bullying; Program/intervention effectiveness

Maria Schultheis, PhD *(Drexel University) Vice Provost of Research, Office of Research and Innovation.* Professor. Clinical Neuropsychology and rehabilitation following neurological compromise (brain injury, stroke, multiple sclerosis), application of technologies in psychology. Specialization in the use of virtual reality (VR) simulation, and evaluation of the demands of driving after disability.

Jennifer Schwartz, PhD *(Idaho State University) Director of Psychological Services Center.* Teaching Professor. Adult psychopathology; evidence-based clinical practice; competency-based training; competency-based clinical supervision.

Julia Sluzenski, PhD *(Temple University).* Assistant Teaching Professor. Spatial and episodic memory, memory loss across the lifespan, developmental psychology.

J. Michael Williams, PhD *(University of Vermont).* Associate Professor. Memory disorder; traumatic brain injury; auditory neglect; neuropsychological assessment; recovery and rehabilitation of brain function; functional magnetic resonance imaging.

Fengqing (Zoe) Zhang, PhD *(Northwestern University).* Associate Professor. Neuroimaging data analysis; Data mining; Bayesian inference; High dimensional data analysis

Eric A Zillmer, PsyD *(Florida Institute of Technology) Carl R. Pacifico Professor of Neuropsychology and the Director of Athletics.* Professor. Psychological assessment (neuropsychological, cognitive, personality), psychiatric and neurological disorders, behavioral medicine, neurogerontology, mathematical modeling, sports psychology, psychology of genocide.

Emeritus Faculty

Donald Bersoff, JD, PhD *(Yale University, New York University).* Professor Emeritus. Law and psychology; mental health law.

James Calkins, PhD. Professor Emeritus.

Thomas Hewett, PhD *(University of Illinois at Urbana-Champaign).* Professor Emeritus. Human computer interaction and cognitive engineering; development of computing environments to support knowledge, workers, and high performance experts.

Myrna Shure, PhD *(Cornell University).* Professor Emeritus. Child development, problem-solving interventions with children, prevention programs.

Mary Spiers, PhD *(University of Alabama at Birmingham).* Professor Emeritus. Clinical neuropsychology and medical psychology; memory and practical applications for memory disorders in the elderly; cognitive health of women.

Sociology

Major: Sociology
Degree Awarded: Bachelor of Arts (BA)
Calendar Type: Quarter
Total Credit Hours: 182.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 45.1101
Standard Occupational Classification (SOC) code: 19-3041

About the Program

The sociology major at Drexel University has three components: theory, methods, substantive coursework and features specialized coursework relating to social justice issues.

Sociology is the systematic study of societies. Society is the sum total of individual and group interaction and relations, from small groups and families to global networks and complex social organizations. The discipline covers a wide variety of fields of inquiry. Sociologists examine structural relations—how human society is organized from small groups to large institutions—and is committed to developing a *critical understanding* of these relationships. Thus the sociology major stresses theory, research methods, quantitative and qualitative data analysis as applied to a wide variety of substantive areas including but not limited to social inequality, political power, gender, class, race, ethnicity, family, crime, technology and environmental change as well as a wide variety of social and political movements connected with social change. The stress on *critical understanding* means that sociology majors will strive not only to develop strong analytic abilities but an intellectual and ethical engagement reflected in sociologically informed thinking and action.The research and analytical skills developed in our program are sought after by a wide variety of professions.

Specialized social justice coursework is typically carried out in connection with community groups and organizations. It is a way the Sociology Program and Drexel University as a whole seek to become practically engaged with the wider community while promoting social justice.

For more information about the sociology major, visit the Department of Sociology (http://www.drexel.edu/coas/academics/departments-centers/sociology/) web page.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

General Requirements

CIVC 101	Introduction to Civic Engagement	1.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III

Co-op/Career Opportunities

An undergraduate degree in sociology is excellent preparation for law school, medical school, or for graduate work in such fields as sociology, history, gerontology, or political science.

Outside of academics, sociologists work in a wide variety of settings. Some serve as statistical analysts for market research firms, health care agencies, and government. Others are involved in urban planning, survey research, public relations, agency management, trend analysis, or criminal justice. There are sociologists of religion working for national church organizations, and sociologists specializing in gerontology who are engaged in research or administration for agencies concerned with the aged.

Co-op Experiences

Some recent co-op positions held by sociology students include the following:

- Human Resources Assistant, National Board of Medical Examiners (http://www.nbme.org/)
- Giving Corps Intern, Cradles to Crayons (http://www.nbme.org/)
- Organizing Internship, Food & Water Watch (https://www.foodandwaterwatch.org/)
- Marketing Intern, Stradley Ronon Stevens & Young LLP (http://www.stradley.com/)
- Small Business Outreach Co-op, The Welcoming Center for New Pennsylvanians (http://welcomingcenter.org/)

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities.

Sociology Faculty

Susan Bell, PhD *(Brandeis University) Department Head, Sociology*. Professor. The interaction between patient cultures and embodied health movements; changing culture and structure of biomedicine; the experience of illness, women's health, and narrative representations of the politics of cancer, medicine, and women's bodies.

Jessica Cohen , PhD *(Bowling Green State University)*. Associate Teaching Professor. Family demography

Mary Ebeling, PhD *(University of Surrey) Director, Women's and Gender Studies*. Associate Professor. Science and technology studies; emerging technologies and biocapital; media and democratic cultures; radical social movements; sociology of markets; political sociology; and ethnographic methodologies.

Sarah Hosman, PhD *(Boston University)*. Assistant Teaching Professor. Urban sociology, Gentrification, Cultural sociology, Economic Sociology, Narratives of place, Ethnography

Sonali Jain, PhD *(Boston University)*. Associate Teaching Professor. South Asia, Race, Ethnicity, Gender, Transnationalism.

Kelly Joyce, PhD *(Boston College) Director, Master's Program in Science Technology & Society*. Professor. Science, medicine and technology; aging and technology; qualitative social science methods; healthcare and medicine.

Emmanuel F. Koku, PhD *(University of Toronto)*. Associate Professor. Social network analysis; qualitative/quantitative research; medical sociology; social epidemiology; social demography; sociology of development; communication and information technology; community and urban sociology.

Nada Matta, PhD *(New York University)*. Assistant Professor. Political Economy, Social Movements, Middle East Studies, Gender Studies, Revolutions, Inequality.

Elizabeth McGhee Hassrick, PhD *(University of Chicago)*. Assistant Research Professor. Social network interventions that promote positive outcomes for people with ASD, their families and communities

Amanda McMillan Lequieu, PhD *(University of Wisconsin-Madison)*. Assistant Professor. Environmental sociology, political economy, place and space, rural-urban interface, qualitative and historical methodologies.

Kevin Moseby, PhD *(University of California-San Diego)*. Assistant Teaching Professor. The social and cultural studies of biomedicine/health, particularly as those domains intersect with and through the institutions

of race/sexuality/gender, social movements/community advocacy, HIV/AIDS, racial health disparities, science and technological studies, and Black Studies

Jason Orne, PhD *(University of Wisconsin-Madison)*. Assistant Professor. Urban Sociology, Sexualities Studies, Qualitative Methodologies, Sociology of Race and Ethnicity, Social Psychology, Social Theory

Mimi Sheller, PhD *(New School for Social Research) Director, Center for Mobilities Research and Policy*. Professor. Sustainable mobility and mobility justice: new cultures and infrastructures of travel, transport, mobile communication, and urbanism; Caribbean Studies: history, culture and political theory of the region, including intersections of race, ethnicity, gender, sexuality and class.

Arthur Shostak, PhD *(Princeton University)*. Professor Emeritus. Futurism, race and ethnic relations, social implications of 20th century technology, urban sociology.

Diane Sicotte, PhD *(Arizona State University)*. Associate Professor. Sociology of environmental injustice: inequalities in the citing of environmental hazards; community-based research in neighborhoods dealing with industrial hazards; sociology of the environment; urban sociology; social inequalities.

Kelly Underman, PhD *(University of Illinois at Chicago)*. Assistant Professor. Medical education, the social construction of bodies and emotions and the politics of scientific knowledge production.

Emeritus Faculty

Robert J. Brulle, PhD *(George Washington University)*. Professor Emeritus. Environmental policy and politics, critical theory, marine risk, social movements, environmental sociology.

English BA and Publishing MA

Major: English and Publishing
Degrees Awarded: Bachelor of Arts (BA) and Master of Arts (MA)
Calendar Type: Quarter
Total Credit Hours: 230.0
Co-op Options: Two Co-op (Five years)
Classification of Instructional Programs (CIP) code: 23.0101
Standard Occupational Classification (SOC) code: 25-1123

About the Program

In keeping with Drexel University's commitment to experiential learning, the accelerated degree program of a BA in English and an MA in Publishing offers students the opportunity to graduate in five years with two separate six-month co-op experiences and a Masters degree, which also includes many opportunities for hands-on experience.

Drexel's unique quarter system allows English majors with considerable flexibility within their course of study. Students can focus on writing, literary criticism, or comparative literature, for example, while also enhancing the breadth and depth of their education with courses taught in other departments and programs across the University. Drexel Publishing Group (DPG) is a unique part of the English department. DPG is solely responsible for three publications, each one unique and vital: Painted Bride Quarterly, one of the nation's oldest literary magazines; 5027mac.org, a news and culture blog written by our students; and The 33rd, the only university-based text in the United States that includes interdisciplinary, multi-genre pieces written by students at all levels

and faculty as well. DPG and its activities are the overlapping element between our undergraduate and graduate programs, with student at all levels working together to make each element more successful.

Drexel's Masters of Arts in Publishing is interdisciplinary, offering courses in law, marketing, and graphic design. Instructors come from all areas of publishing: from newspapers to small presses, from online venues to academic presses. Classes often feature guest speakers who are also currently working in the industry, such as small press founders, trade magazine editors, agents, and more. Course instructors and guest speakers inform students and broaden perspectives on career opportunities in the publishing industry.

Admission Requirements

Students must apply when their undergrad status is at a minimum of 90.0 credits and a maximum of 120.0 credits.

Global Studies BA / Public Health MPH

Major: Global Studies and Public health

Degrees Awarded: Bachelor of Arts (BA) AND Master of Public Health (MPH)
Calendar Type: Quarter
Total Credit Hours: 227.0
Co-op Options: One Co-op (Five Years)
Classification of Instructional Programs (CIP) code: 30.2001
Standard Occupational Classification (SOC) code: 19-3094

About the Program

To further prepare students for careers in the international sphere, Drexel University now offers an accelerated degree that allows students to complete an accelerated Bachelor's Degree (BA) in Global Studies and a Master's in Public Health (MPH). Students apply in their third year to Drexel's Dornsife School of Public Health; those accepted begin working on their MPH as they complete their BA, getting their MPH a year earlier than if they had done the two degrees separately. They also have a chance to complete an undergraduate co-op and gain valuable work experience as they go.

The Drexel BA degree prepares students for exciting international careers or at home working with diverse international populations. It prepares them by giving them foreign language fluency and offers a wide variety of courses in the social sciences, humanities, philosophy, hard sciences, cultural studies, and many other fields. While working on their Global Studies degree, students also are encouraged to study abroad, adding to their global perspective as well as perfecting their foreign language skills. There are also many opportunities for doing co-op abroad: a chance to live overseas for six months while gaining valuable work experience and getting a chance to truly be part of the culture of the place where they are working. Study abroad opportunities exist in many countries in Europe, Africa, Latin America, and across Asia; co-op abroad employers can also be found in almost any part of the world.

Added to this is the chance to get an accelerated degree in Public Health, a much-in-demand professional degree with many uses. Students interested in global public health, for example, can gain skills that make them attractive to international development agencies like the US Agency for International Development, the UN, or many international charitable organization. Students who want to work domestically can use their language and cultural skills in a wide variety of settings here, working with the diverse population within the US. A degree in public health allows people to make a real impact on society, improving the lives of people around the world.

Drexel Global Studies students have won a wide variety of international fellowships including Fulbright, Boren, and other US government programs. They have studied abroad in countries as diverse as France, Senegal, Equatorial Guinea, Argentina, Costa Rica, China, Japan, and Korea. They have gone on to work with the US State Department and other government agencies, with large Silicon Valley tech firms, and with private corporations around the world. Adding an MPH will open even more doors for students interested in really making a difference at home and abroad.

Additional Information

For more information, contact:

Rogelio Miñana, PhD
Department Head and Professor of Spanish

Admission Requirements

Undergraduate admissions are determined by Enrollment Management/ Admissions (http://drexel.edu/admissions/overview/).

MPH requirements are set by the School of Public Health. Eligible students must:

- Be enrolled in the 4COP undergraduate program
- Maintain a minimum overall GPA of at least 3.25
- Be able to take undergraduate and graduate coursework during their senior year
- Complete the pre-requisite courses necessary for admission (determined by the School of Public Health) into the MPH program with no lower than a "C" grade
- Obtain one written recommendation from a faculty member and one from an advisor, supervisor or mentor
- Complete the online School of Public Health application to the MPH program at the Dornsife School of Public Health in their junior year
- Complete an interview with a Dornsife faculty member

History BA / Science, Technology and Society MS

Major: History and Science, Technology and Society
Degrees Awarded: Bachelor of Arts (BA) and Master of Science in Science, Technology and Society (MS)
Calendar Type: Quarter
Total Credit Hours: 225.0
Co-op Options: One Co-op (Five years); Two Co-op (Five Years)
Classification of Instructional Programs (CIP) code: 54.0101
Standard Occupational Classification (SOC) code: 19-3093

About the Program

Drexel University permits undergraduate students in 5-year programs to apply for graduate programs while completing their undergraduate

programs, allowing students to complete their master's degrees in a shorter amount of time.

The accelerated degree program in History and Science, Technology and Society provides an opportunity to earn both a BA degree and an MS degree (two diplomas are awarded) in five years.

This program was created to meet the academic needs of History students who are interested in History, Technology and Science, and interested in pursuing careers in the rapidly growing field of STS.

Students entering the program must:

- have and maintain a minimum of 3.0 grade point average throughout the program
- have no fewer than 90.0 earned credits
- have no more than 120.0 registered credits
- complete only 2 co-ops if in a BA/MS program.

Additional Information

For more information about the accelerated BA/MS program, contact:

Jonathan Seitz, PhD
Assistant Department Head
Teaching Professor of History
jwseitz@drexel.edu

Sample Plan of Study

Recommended Plan of Study

Students should work closely with undergraduate advisor and the graduate Science, Technology & Society advisor to schedule an individualized plan of study for their accelerated degree completion.

The following is a sample plan of study.

Term 1		Credits
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
HIST 101	Introductory Seminar in History I	4.0
UNIV H101	The Drexel Experience	1.0
Foreign language course (103-level or higher)		4.0
Non-US History Course[*]		4.0
	Term Credits	**16.0**
Term 2		
CIVC 101	Introduction to Civic Engagement	1.0
ENGL 102 or 112	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing English Composition II	3.0
HIST 102	Introductory Seminar in History II	4.0
Foreign language course (201-level or higher)		3.0-4.0
Mathematics course		3.0-4.0
	Term Credits	**14.0-16.0**
Term 3		
ENGL 103 or 113	Composition and Rhetoric III: Themes and Genres English Composition III	3.0
US History course[*]		4.0
Mathematics course		3.0-4.0
Free electives		6.0
	Term Credits	**16.0-17.0**
Term 4		
HIST 296	Research Methods in History I	4.0
History course covering pre-1700 history[**]		4.0

Science elective[***]		3.0-4.0
Social and behavioral science elective		3.0
Free elective		3.0
	Term Credits	17.0-18.0
Term 5		
History of Science, Technology, and Environment course[*]		4.0
Humanities/fine arts elective		3.0
Social and behavioral science elective		3.0
Science elective[***]		3.0-4.0
International studies elective		3.0
	Term Credits	16.0-17.0
Term 6		
Non-US History course[*]		4.0
Humanities/fine arts elective		3.0
Social and behavioral science elective		3.0
International studies elective		3.0
Diversity elective		3.0
	Term Credits	16.0
Term 7		
History electives[†]		8.0
Social and behavioral science elective		3.0
Humanities/fine arts elective		3.0
Diversity elective		3.0
	Term Credits	17.0
Term 8		
HIST 301	The Study of History	4.0
UNIV H201	Looking Forward: Academics and Careers	1.0
History elective[†]		4.0
Humanities/fine arts elective		3.0
SCTS 501	Introduction to Science, Technology and Society	3.0
	Term Credits	15.0
Term 9		
HIST 396	Research Methods in History II	4.0
HIST T380	Special Topics in History	4.0
Free elective		3.0
SCTS 502	Research Methods	3.0
SCTS Ethics, Values, Identities, & Cultures course		3.0
	Term Credits	17.0
Term 10		
HIST 490 [WI]	Senior Seminar I	4.0
Free elective		4.0
SCTS 503	Advanced Research Methods	3.0
SCTS Ethics, Values, Identities, & Cultures course		3.0
	Term Credits	14.0
Term 11		
HIST 491 [WI]	Senior Seminar II	4.0
History elective[†]		4.0
SCTS 504	Science, Technology & Society Theories	3.0
SCTS 798	Master's Research	3.0
	Term Credits	14.0
Term 12		
History electives[†]		8.0
Science, Technology & Society Lab		3.0
SCTS Science and Technology Policy course		3.0
SCTS elective		3.0
	Term Credits	17.0
Term 13		
History elective[†]		4.0
Free electives		9.0
SCTS electives		6.0
	Term Credits	19.0

Term 14		
Free electives		8.0
SCTS electives		9.0
	Term Credits	17.0

Total Credit: 225.0-230.0

*   Must be 200-level or above.

**   Must be 200-level or above. May not be HIST 201.

***   See catalog for BA-History degree requirements.

†   At least four core courses must be 200-level or above.

Students are strongly encouraged to take a course during each term while on co-op. Please refer to university policy for more information.

Co-op/Career Opportunities

Co-op Experiences

History majors have a wide variety of co-op experiences from which to choose. Business and public utilities offer many possibilities, and local, state, and federal governments; museums and archives; and law firms present many additional interesting co-op placements. Pre-law students, for example, are especially eager to see the inside of a law office, whether the co-op job they receive is clerical or a more challenging paralegal assignment. These practical experiences in the "real" world can reinforce the lessons of the classroom, sharpen skills, and establish important contacts. Sample co-op positions include:

- Law clerk/paralegal, Joe Davidson, Attorney-at-Law, Philadelphia
- Research analyst, Legislative Office for Research Liaison, Harrisburg, PA
- Legislative intern, Corporate Public Affairs Division, Philadelphia Electric Company
- Assistant lobbyist, Government Relations Office, Drexel University
- Education intern, Philadelphia Museum of Art
- Researcher, Philadelphia Chamber of Commerce
- Assistant, Office of the Governor, Harrisburg, PA

Career Opportunities

The flexible programs allow students to shape a curriculum that meets their needs, whether they are preparing for the business world, graduate school in history or political science, the MS in Science, Technology, and Society program (http://catalog.drexel.edu/graduate/collegeofartsandsciences/sciencetechnologyandsociety/), an MBA or other business program, or law school.

Accelerated BA in Philosophy and MS in Public Policy

Major: Philosophy and Public Policy
Degrees Awarded: Bachelor of Arts (BA) and Master of Science (MS)
Calendar Type: Quarter
Total Credit Hours: 225.0
Co-op Options: Three Co-op (Five years)
Classification of Instructional Programs (CIP) code: 44.0501
Standard Occupational Classification (SOC) code: 19-3094

About the Program

A degree in public policy will prepare you for a wide variety of careers in which you can make a difference in the world. Drexel's program is devoted to the idea that theory without practice is empty and practice without reflection is blind. Philosophy provides an excellent foundation for the skills involved in diagnosing social needs and responding to them by formulating and evaluating public policy. Our undergraduate Philosophy program is focused on the intersection of theory and practice and the development of reasoning, writing and critical skills. These skills give the student a solid foundation for graduate-level research and ultimately for careers in government, business, education, and social-scientific research.

Admission Requirements

Students who meet the standard eligibility requirement for accelerated programs should consult with their advisor and work on an individual plan of study to submit with the Change of Curriculum form.

Degree Requirements

College of Arts and Sciences Requirements - PHIL-BA

CIVC 101	Introduction to Civic Engagement	1.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III

PLCY 517	Case Study Final Project	1.0
ELECTIVE COURSES (Required and approved)		**9.0**
Total Credits		45.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Calendar Type: Quarter
Total Credit Hours: 225.0
Classification of Instructional Programs (CIP) code: 30.1501
Standard Occupational Classification (SOC) code: 11-9121

About the Program

Drexel's Center for Science, Technology and Society (STS) brings together faculty and students who investigate the social dimensions of technology, medicine and science. Faculty in a range of fields — anthropology, criminal justice, history, information sciences, philosophy, political science, public health and sociology — conduct original research on the impact of new technologies, medical categories and scientific knowledge. They also investigate why some technologies or scientific knowledge are adopted while others are not. STS programs, also called science and technology studies, are growing in the US and worldwide. The ability to critically identify the values and incentives built into scientific knowledge and technology design and use is highly valued in settings such as health care organizations, government agencies, public policy realms, tech industries and more.

Philosophy is an excellent foundation for the kind of work STSers do, and the kind of careers they pursue. Philosophical study practices and develops aptitudes associated with careful, critical analysis and integrative, creative thought. Philosophy students develop the skills of careful reading, effective, clear writing, and thoughtful, logical argument.

This accelerated-degree program provides an opportunity to simultaneously earn a Philosophy BA degree and an STS MS degree (two diplomas are awarded) in just five years. Students can complete the MS degree solely through coursework or combine coursework with a master's project or a master's thesis. The flexibility offered by the STS curriculum, the opportunity to work closely alongside research-active faculty, and the training offered in multiple theoretical and research methodologies opens the door to a wide range of career opportunities. Students in the accelerated program have the opportunity to craft their own original research project with guidance from some of the most interesting and dynamic faculty scholars in their fields. The STS Lab course is a unique feature of the curriculum--it prepares students to work as a team to address meaningful science and technology related topics. Working with a faculty adviser, graduate students develop an individualized plan of study that allows them to pursue their interests in depth.

Admission Requirements

Depending on the academic program, eligible students can be admitted to an accelerated degree program in one of two ways: as an incoming freshman or after completing a minimum of 90 credits but no more than 120 credits.

To learn more about eligibility and enrollment requirements, visit the Undergraduate Admissions (http://drexel.edu/undergrad/academics/accelerated-degrees/) web page.

Suggested Electives **

CCM 701	Contemporary Social Theory
CCM 704	Research Methods in Communication, Culture and Media
CCM 801	Seminar in Contemporary Theory
CHP 516	History of Public Health
COM 650	Telecommunications Regulation and Policy
MGMT 602	Innovation Management
PLCY 504	Methods of Policy Analysis
PSY 612	Psychology of Human-Computer Interaction Design
PSY 712	History and Systems
SCTS 584	Historiography of Science

SCTS 639	Politics of Life	
SCTS 640	STS Perspectives on Risk and Disaster	
SCTS 660	Theoretical and Sociological Aspects of Measurement	
SCTS 665	Advanced Topics in Philosophy of Science	
SCTS 697	Internship in Science, Technology and Society	
SCTS T780	Special Topics in Science Technology and Society	
SCTS I799	Independent Study in SCTS	
Total Credits		45.0

*   Students who elect to pursue the Thesis option should complete 9.0 credits of SCTS 798 - Master's Thesis and select 12.0 credits from the list of suggested electives.

**   Additional electives may be taken from other schools and colleges in the University with approval from the Director of the MS in Science, Technology & Society program.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Term 1		Credits
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
PHIL 101	Introduction to Western Philosophy	3.0

Political Science BA / Science, Technology & Society MS

Major: Accelerated BA in Political Science and MS in Science, Technology & Society
Degrees Awarded: Bachelor of Arts (BA) & Master of Science (MS
Calendar Type: Quarter
Total Credit Hours: 225.0
Co-op Options: One Co-op
Classification of Instructional Programs (CIP) code: 45.1001
Standard Occupational Classification (SOC) code: 19-3094

About the Program

Drexel University permits undergraduate students to apply for graduate programs while completing their undergraduate programs, allowing students to complete their master's degrees in a shorter amount of time.

The accelerated-degree program provides an opportunity to simultaneously earn both a BA degree in Political Science and an MS degree in Science, Technology & Society (http://catalog.drexel.edu/graduate/collegeofartsandsciences/sciencetechnologyandsociety/) (two diplomas are awarded) in five years.

Students entering the program must:

- have and maintain a minimum of 3.0 grade point average throughout the program
- have no fewer than 90.0 earned credits
- have no more than 120.0 registered credits

The Department of Politics would especially like to encourage its own majors to consider the accelerated degree program in Science, Technology & Society. If you are currently enrolled in a 4+1 (4COP Accelerated Program) degree program, you are required to fill out the Accelerated Degree Level Conversion Form. After obtaining all the required signatures, please direct the form to the Assistant Director for Graduate Studies Office, Randell 240.

For more information about the accelerated BA/MS program, contact:
STS Program Director
Macalister Hall, 3025

Accelerated BA in Sociology and MS in Science, Technology & Society

Major: Sociology and Science, Technology & Society
Degrees Awarded: Bachelor of Arts (BA) and Master of Science (MS)
Calendar Type: Quarter
Total Credit Hours: 225.0
Co-op Options: Three Co-op (Five years)
Classification of Instructional Programs (CIP) code: 31.1501
Standard Occupational Classification (SOC) code: 11-9121

About the Program

The accelerated-degree program provides an opportunity to simultaneously earn both a BA degree and an MS degree (two diplomas are awarded) in the time normally required to finish a bachelor's degree alone. The accelerated program provides students with a strong training in sociology and in the interdisciplinary field of Science, Technology and Society (STS).

The sociology major at Drexel University has three components: theory, methods, substantive coursework and features specialized coursework relating to social justice issues.

Sociology is the systematic study of societies. Society is the sum total of individual and group interaction and relations, from small groups and families to global networks and complex social organizations. The discipline covers a wide variety of fields of inquiry. Sociologists examine structural relations—how human society is organized from small groups to large institutions—and is committed to developing a *critical understanding* of these relationships. Thus the sociology major stresses theory, research methods, quantitative and qualitative data analysis as applied to a wide variety of substantive areas including but not limited to social inequality, political power, gender, class, race, ethnicity, family, crime, technology and environmental change as well as a wide variety of social and political movements connected with social change. The stress on *critical understanding* means that sociology majors will strive not only to develop strong analytic abilities but an intellectual and ethical engagement reflected in sociologically informed thinking and action. The research and analytical skills developed in our program are sought after by a wide variety of professions.

Specialized social justice coursework is typically carried out in connection with community groups and organizations. It is a way the Sociology Program and Drexel University as a whole seeks to become practically engaged with the wider community while promoting social justice.

The Science, Technology, and Society (STS) program systemically investigates the social dimensions of science, technology and medicine. Faculty from a range of disciplines contribute to a curriculum that features a broad set of perspectives, all grounded in a foundation of critical thinking, research methods, and writing and presentation skills. The STS program emphasizes three interrelated areas: environment and sustainability; health and medicine; and information, identities and networks. The STS Lab course is a unique feature of the curriculum—it prepares students to work as a team to address meaningful science and technology related topics. Working with a faculty adviser, graduate students develop an individualized plan of study that allows them to pursue their interests in depth.

STS students are independent thinkers who are dedicated to understanding the intersections of society, science, medicine and technology. While STS students vary in their professional and educational backgrounds and career ambitions, they share a common commitment to a critical approach to our world's most pressing technoscientific challenges.

Prospective students for the MS in STS see this educational opportunity as a crucial factor in their skill development and career advancement. They are recent college graduates in the social sciences, humanities, natural sciences, and engineering; middle and high school teachers; and professionals in businesses, city and state government offices, and area hospitals. Students can attend full time or part time and complete all coursework in the evening.

Degree Requirements

General Requirements

CIVC 101	Introduction to Civic Engagement	1.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	

ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
UNIV H101	The Drexel Experience	1.0
UNIV H201	Looking Forward: Academics and Careers	1.0
Four Humanities/Fine Arts Courses		12.0
Two Mathematics Courses		6.0
Two Science Courses		6.0
Two Consecutive Foreign Language Courses		8.0

Science, Technology and Society Faculty

Lloyd Ackert, PhD *(Johns Hopkins University)*. Teaching Professor. History of science and technology; ecology; Russian science.

Peter Amato, PhD *(Fordham University) Director, Philosophy*. Teaching Professor. Ethics, Marxism, Continental philosophy.

Jesse Ballenger, PhD *(Case Western Reserve University)*. Associate Teaching Professor. Healthcare, medicine and ethics; aging and neurodegenerative diseases; Science and Technology Studies.

Mary Ebeling, PhD *(University of Surrey) Director, Women's and Gender Studies*. Associate Professor. Science and technology studies; emerging technologies and biocapital; media and democratic cultures; radical social movements; sociology of markets; political sociology; and ethnographic methodologies.

Christian Hunold, PhD *(University of Pittsburgh)*. Professor. Environmental policy; comparative politics; urban wildlife; political theory.

Kelly Joyce, PhD *(Boston College) Director, Master's Program in Science Technology & Society*. Professor. Science, medicine and technology; aging and technology; qualitative social science methods; healthcare and medicine.

Alison Kenner, PhD *(Rensselaer Polytechnic Institute)*. Associate Professor. Science, technology, and health; environmental health problems; cities and place; feminist theory; medical anthropology; digital humanities

Scott G. Knowles, PhD *(Johns Hopkins University) Department Head, History*. Professor. Urban history, Philadelphia history, history of technology, history of disasters, modern history.

Brent Luvaas, PhD *(UCLA)*. Associate Professor. DIY and independent media production; transnational consumer culture; popular music; new media and mediated subjectivities; youth culture in the US and Indonesia.

Jonson Miller, PhD *(Virginia Tech)*. Teaching Professor. Science and technology, American history, military history.

Gwen Ottinger, PhD *(University of California, Berkeley)*. Associate Professor. Social studies of science and technology, environmental justice, science and engineering ethics, citizen science, environmental ethics.

Flavia Padovani, PhD *(University of Geneva)*. Associate Professor. History and philosophy of science, epistemology, logic.

Jody A. Roberts, PhD *(Virginia Polytechnic Institute and State University) Director, Center for Contemporary History and Policy, Chemical Heritage Foundation*. Assistant Professor. Intersections of emerging molecular sciences and public policy and the ways in which tensions brought about between the two get resolved.

Tiago Saraiva, PhD *(Universidad Autónoma de Madrid)*. Associate Professor. History of science and technology; transnational history; environmental history

Jonathan Seitz, PhD *(University of Wisconsin) Assistant Department Head, History*. Teaching Professor. History of religion, science, medicine, witchcraft, early modern Europe, Italy.

Mimi Sheller, PhD *(New School for Social Research) Director, Center for Mobilities Research and Policy*. Professor. Sustainable mobility and mobility justice: new cultures and infrastructures of travel, transport, mobile communication, and urbanism; Caribbean Studies: history, culture and political theory of the region, including intersections of race, ethnicity, gender, sexuality and class.

Chloe Silverman, PhD *(University of Pennsylvania) Director, Center for Science, Technology & Society*. Associate Professor. Parent advocacy for autism, neurodiversity, and pollinator health research.

Amy Slaton, PhD *(University of Pennsylvania)*. Professor. History of science and technology; history of standards and metrology; intersectionality, race, labor.

Andrew Smith, PhD *(SUNY, Stony Brook)*. Associate Professor. Philosophy, social and political philosophy, American philosophy.

Kathryn Steen, PhD *(University of Delaware)*. Associate Professor. History of technology, history of industry and business, and comparative history.

Michael Yudell, MPH, PhD *(Columbia University) Chair, Department of Community Health*. Associate Professor. Department of Community Health and Prevention. Public health ethics; history of public health; race and racism; autism.

Emeritus Faculty

Robert J. Brulle, PhD *(George Washington University)*. Professor Emeritus. Environmental policy and politics, critical theory, marine risk, social movements, environmental sociology.

Minor in Africana Studies

About the Minor

The minor in Africana studies was created to provide the opportunity for undergraduate students throughout the University to gain an understanding of and background in the history and cultures of peoples of African descent in North and South America, the Caribbean, and Africa.

This interdisciplinary minor includes courses in anthropology, history, literature, music, political science, and sociology, and provides an opportunity for directed study in areas of particular interest to the students. The Africana studies minor has intrinsic intellectual value and helps prepare individuals to become contributors to an increasingly pluralistic society. At the same time, this minor allows students interested in business, the sciences, engineering, government, and social services to present to prospective employers a unique academic background.

All prospective students should meet with an advisor from the College as soon as possible.

Program Requirements

Required Courses

AFAS 101	Introduction to Africana Studies	3.0
AFAS 201	Cross Currents in Africana Studies	3.0
Students must complete a minimum of 18 credits from the list provided: [*]		18.0
AFAS 210	Topics in Africana Arts	

AFAS 220	Topics in Africana Society
AFAS 230	Topics in African History
AFAS 240	Topics in Africana Current Events
AFAS 255	Gender & Black Popular Culture
AFAS 260	Race, Politics and Religion
AFAS 301	Politics of Hip Hop
AFAS 385	Rum, Rice and Revolution: Caribbean History
AFAS 401	Urban Social Justice Practicum I
AFAS 402	Urban Social Justice Practicum II
AFAS I299	Independent Study in AFAS
AFAS T280	Special Topics in Africana Studies
AFAS T380	Special Topics in Africana Studies
ANTH 101	Introduction to Cultural Diversity
ANTH 310	Societies In Transition: The Impact of Modernization and the Third World
ARTH 315	African-American Art
ARTH 316	African Art
DANC 109	African Dance Technique I
ENGL 203 [WI]	Survey of World Literature (WI)
ENGL 204	Post-Colonial Literature
ENGL 207 [WI]	African American Literature
ENGL 325	Topics in World Literature **
ENGL 492	Seminar in World Literature
HIST 215	American Slavery
HIST 216	Freedom in America
MUSC 107	Jazz Ensembles
MUSC 331	World Musics
MUSC 333	Afro-American Music USA
MUSC 336	History of Jazz
PSCI 372	City in United States Political Development
SOC 210	Race, Ethnicity and Social Inequality
SOC 240	Urban Sociology
WGST 240	Women and Society in a Global Context
WGST T280	Special Topics in Women's and Gender Studies ***
Total Credits	**24.0**

*   Students must check with the Program Director for approval prior to making substitutions.

**   With a focus on the Caribbean, Latin America or the Diaspora.

***   With a focus on race or the Diaspora.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Minor in Anthropology

About the Minor

In today's globalized marketplace, Anthropology, the study of human cultural and biological diversity, is more vital than ever. Fields as varied as medicine, law, government, and business, make use of the insights of anthropologists to reach and communicate with a broad audience. The anthropology minor provides students with a cross-cultural awareness and understanding that will give them an edge up no matter what field they go into. It challenges them to think beyond their own experience and imagine the perspectives of other people and other societies. Anthropology minors graduate as cosmopolitan and engaged global citizens, with in-demand skills in researching, and making sense of, diverse human behavior.

All prospective students should meet with an advisor from the College as soon as possible.

Required (Core) Courses

ANTH 101	Introduction to Cultural Diversity	3.0
ANTH 110	Human Past: Anthropology and Prehistoric Archeology	3.0
ANTH 210 [WI]	Worldview: Science, Religion and Magic	3.0
ANTH 370	Ethnographic Methods	3.0
ANTH 410	Cultural Theory I	3.0
Select three of the following:		9.0
ANTH 111	Introduction to Biological Anthropology	
ANTH 112	Language, Culture & Cognition	
ANTH 117	Introduction to World Religions	
ANTH 120	Biblical Archaeology: The Archaeology of Israel and Jordan	
ANTH 140	Anthropology of Food	
ANTH 150	Anthropology of Water	
ANTH 205	Imagining Africa	
ANTH 212 [WI]	Topics in World Ethnography	
ANTH 215	Anthropology of Gender	
ANTH 217	Anthropology of Interfaith Relations	
ANTH 220	Aging In Cross-Cultural Perspective	
ANTH 225	Anthropology of Youth	
ANTH 240	Urban Anthropology	
ANTH 245	Reflecting on Work Identity	
ANTH 250	Anthropology of Immigration	
ANTH 255	Psychological Anthropology	
ANTH 265	Health & Healing Practices in Cross-Cultural Perspective	
ANTH 270	Comparative Religious Ethics	
ANTH 310	Societies In Transition: The Impact of Modernization and the Third World	
ANTH 312	Approaches to Intercultural Behavior	
ANTH 325	DIY Culture	
ANTH 330	Media Anthropology	
ANTH 335	Anthropology of Education	
ANTH 340	Crete Through The Looking Glass	
ANTH 345	Visual Anthropology	
ANTH 350	Anthropology of Language	
ANTH 355	Digital Culture	
ANTH 360	Culture and the Environment	
ANTH 363	Sacred Traditions of the East	
ANTH 365	Family and Kinship	
ANTH 375	Digital Ethnography	
ANTH 385	Community Engaged Anthropology	
ANTH 411	Cultural Theory II	

ANTH T180	Special Topics in Anthropology	
ANTH T280	Special Topics in Anthropology	
ANTH T380	Special Topics in Anthropology	
ANTH T480	Special Topics in Anthropology	
Total Credits		24.0

Minor in Arabic

About the Minor

Effective March 1, 2020, students will no longer be accepted into this minor. Students are encouraged to explore the Intermediate Arabic Proficiency Certificate **(p. 165) or the** Middle East and North Africa Studies minor **(p. 152).**

In our globalized world, intercultural and multilingual communication is an indispensable asset for the 21st century citizen and worker. As part of the Department of Global Studies and Modern Languages, we offer language instruction rooted in communication and embedded in authentic cultural contexts. Language study opens a world of opportunities for our students, from co-ops and study abroad programs to engagement with global communities here in Philadelphia. Media and technology, as well as travel and commerce, make the study of languages more crucial than ever, for tackling global challenges such as climate change and inequality demand that our students communicate across languages and cultures.

All prospective students should meet with an advisor from the College as soon as possible.

The Arabic minor requires 24 credits of language study above Arabic 103. Students can choose from the following courses options including a minimum 13 credits of Special Topics classes.		24.0
ARBC 201	Arabic IV	
ARBC 202	Arabic V	
ARBC 450	Advanced Studies in Language, Media, and Society	
ARBC T280	Special Topics in Arabic	
ARBC T380	Special Topics in Arabic	

* Students can take multiple Special Topics courses for Minor credit.

Minor in Asian Studies

About the Minor

This minor offers an interdisciplinary look at the East, Southeast, and South Asia regions, which hold a critically important geopolitical position in terms of not only business and security, but also in terms of political, religious, cultural, and gender studies. Together with content courses in English offered through a variety of departments, this minor also includes 12 credits of instruction in one of our three Asian languages (Chinese, Korean, or Japanese).

All prospective students should meet with an advisor from the College as soon as possible.

Students must complete 12 credits of language study in Chinese, Japanese, or Korean		12.0
Students must complete a minimum of 12 credits of elective courses		12.0-14.0
ANTH 363	Sacred Traditions of the East	
ARTH 301	Asian Art and Culture	
ARTH 302	Art of India	
ARTH 303	Art of China	
ARTH 304	Art of Japan	
ENGL 325	Topics in World Literature *	

FMST 293	Japanese Cinema: Kurosawa	
HIST 261	Making of Modern South Asia	
HIST 263	The World and China	
HIST 264	East Asia in Modern Times	
HIST 322	Empire and Environment	
PHIL 102	Introduction to Eastern Philosophy	
Total Credits		24.0-26.0

*   South Asian Literature

Study abroad, Global Studies (GST) courses at the 200 and 300 levels, and special topics courses focused on Asia will be consider for elective credit. Students must receive permission from the department.

Students who complete a minimum of 8 language credits in one language, including CHIN 202, KOR 202, or JAPN 202, are eligible to receive an intermediate language certificate.

Minor in Astrophysics

About the Minor

Astrophysics brings together many disparate areas of physics— gravitational physics govern the evolution of galaxies and clusters, nuclear physics dominates the cores of stars, electromagnetism governs the radiation that we use to observe these objects. Students majoring in mathematics and computer science, as well as other disciplines, are often fascinated by the questions raised by astrophysics.

Because of the overlap in requirements between the astrophysics minor and the physics minor, (p. 154) students cannot minor in both.

Admission Requirements

Consultation with the Physics Department.

Program Requirements

Required Prerequisite Courses		
PHYS 113 & PHYS 114 & PHYS 115	Contemporary Physics I and Contemporary Physics II and Contemporary Physics III	
OR		
PHYS 101 & PHYS 102 & PHYS 201	Fundamentals of Physics I and Fundamentals of Physics II and Fundamentals of Physics III	
Required Courses		
PHYS 217	Thermodynamics	4.0
PHYS 231	Introductory Astrophysics	3.0
PHYS 232	Observational Astrophysics	3.0
PHYS 311	Classical Mechanics I	4.0
PHYS 321	Electromagnetic Fields I	4.0
PHYS 431	Galactic Astrophysics	3.0
PHYS 432	Cosmology	3.0
Total Credits		24.0

Minor in Bioinformatics

About the Minor

The bioinformatics minor examines the application of computer technology and programming to biological fields such as genomics or proteomics. This multidisciplinary program is designed for students majoring in biomedical engineering, biological sciences, computer

science, information systems, or mathematics. Combination with other majors is possible through consultation with the program director. The minor is divided among courses in biology, programming and computation, human-computer interface design, databases, and statistics.

Program Requirements

Students must complete a minimum of 24 credits of coursework as follows:

Core Courses

BIO 331	Bioinformatics I	3.0
BIO 332	Bioinformatics II	3.0
Two Senior Research Project Courses [*]		

[*]   Until research project courses are developed specifically for this minor, the department will accept whatever research project(s) the student has taken as part of their major under the number for that major.

Area-specific courses

In each of the following five areas, the requirements of a student's major cover some of the competencies for Bioinformatics, while the remaining requirements will be fulfilled within the minor itself.
A plan of study is determined by an Advisor in the Department of Biology based on the student's major field of study. Thus, the requirements for completing the minor are determined on a case-by-case basis. Possible options for area-specific courses include the following:

Bioscience

BIO 107	Cells, Genetics & Physiology	3.0
BIO 108	Cells, Genetics and Physiology Laboratory	1.0
BIO 109	Biological Diversity, Ecology & Evolution	3.0
BIO 110	Biological Diversity, Ecology and Evolution Laboratory	1.0
BIO 449	Recombinant DNA Laboratory	5.0
Programming and Computation		
CS 171	Computer Programming I	3.0
CS 172	Computer Programming II	3.0
CS 260	Data Structures	3.0
Human/Computer Interface Design		
INFO 110	Introduction to Human-Computer Interaction	3.0
Databases		
CS 461	Database Systems	3.0
INFO 200	Systems Analysis I	3.0
INFO 210	Database Management Systems	3.0
Statistics		
MATH 310	Probability and Statistics	4.0
MATH 311	Probability and Statistics I	4.0
MATH 312	Probability and Statistics II	4.0
MATH 410	Scientific Data Analysis I	3.0
MATH 411	Scientific Data Analysis II	3.0

Additional Information

Please contact Dr. Jacob Russell at jar337@drexel.edu for additional information.

Minor in Biological Sciences

About the Minor

The minor in biological sciences is designed for students who wish to become acquainted with the life sciences while pursuing a major in another area. This option should be particularly useful for students majoring in areas such as chemistry, engineering, physics, or psychology who are interested in admission to medical schools or graduate programs. Students interested in the minor should consult with an academic advisor in the department for help with course selections.

Required Courses [*]

BIO 122	Cells and Genetics	4.5
BIO 124	Evolution & Organismal Diversity	4.5
BIO 126	Physiology and Ecology	4.5
BIO 218	Principles of Molecular Biology	4.0
or BIO 209	Cell, Molecular & Developmental Biology I	
BIO 224	Form, Function & Evolution of Vertebrates	4.0
or BIO 201	Human Physiology I	
BIO ELECTIVE OR ENVS 212 [**]		3.0
Total Credits		24.5

[*]   A grade of "C" or better must be earned for each course in this minor for the course to meet the requirement.

[**]   The Biology Elective can be selected from any of the regularly offered Biology department lecture courses 200-level and above according to your specific interests. BIO 212 and BIO 226 will not count towards the Biology elective. Note that existing course prerequisites may affect which courses may be selected.

Minor in Biophysics

About the Minor

Biophysics is the study of the complexity of life using tools provided by physics. It attempts to construct mathematical frameworks that explain among many other topics, how organisms obtain energy from the environment, how complex structures appear in the cell and how these relate to function. In essence, biophysics looks for principles that describe observed patterns and propose predictions based on these principles.

Admissions Requirements

Consultation and approval of the program director and completion of one of the prerequisite sequences. Students who have completed the PHYS 152 , PHYS 153 , PHYS 154 sequence will also be accepted into the minor provided they have an A- average in those courses and have completed MATH 121 and MATH 122 .

Program Requirements

Required Pre-requisites

PHYS 113	Contemporary Physics I	
PHYS 114	Contemporary Physics II	
PHYS 115	Contemporary Physics III	
OR		
PHYS 101	Fundamentals of Physics I	
PHYS 102	Fundamentals of Physics II	
PHYS 201	Fundamentals of Physics III	
Core Requirements		
PHYS 217	Thermodynamics	3.0-4.0
or CHEM 253	Thermodynamics and Kinetics	
or ENGR 210	Introduction to Thermodynamics	
PHYS 262	Introduction to Biophysics	3.0
PHYS 317	Statistical Mechanics	3.0
PHYS 321	Electromagnetic Fields I	4.0
PHYS 461	Biophysics	3.0
PHYS 462	Computational Biophysics	3.0

One course from the following:		4.5
BIO 122	Cells and Genetics	
BIO 141	Essential Biology	
One course from the following:		**3.0-4.0**
BIO 209	Cell, Molecular & Developmental Biology I	
BIO 214	Principles of Cell Biology	
BIO 218	Principles of Molecular Biology	
CHEM 371	Chemistry of Biomolecules	
Total Credits		26.5-28.5

Minor in Bioscience and Society

About the Minor

Designed for non-majors, the minor in bioscience and society is accessible to all students with an interest in biology. The minor includes a list of topical courses from which students can choose freely depending upon interest.

Please contact Leanne Sweppenheiser at lmt38@drexel.edu for additional information.

Required Courses [*]

Select one of the following options:		3.0-4.0
BIO 100	Applied Cells, Genetics & Physiology	
or		
BIO 107 & BIO 108	Cells, Genetics & Physiology and Cells, Genetics and Physiology Laboratory	
Select one of the following options:		3.0-4.0
BIO 101	Applied Biological Diversity, Ecology & Evolution	
or		
BIO 109 & BIO 110	Biological Diversity, Ecology & Evolution and Biological Diversity, Ecology and Evolution Laboratory	
ENVS 212	Evolution	4.0
Select four of the following: [**]		14.0
BIO 112	Biotechnology for Society	
BIO 114	Climate Change and Human Health	
BIO 116	How Your Body Works-Or Not	
BIO 118	Basics of Cancer	
BIO 264	Ethnobotany	
BIO 284	Biology of Stress	
ENVS 260	Environmental Science and Society	
Total Credits		24.0-26.0

[*]   A grade of "C" or better must be earned for each course in this minor for the course to meet the requirement.

[**]   Other courses may be substituted depending on yearly course offerings after consultation with an academic advisor in the Department of Biology.

Minor in Chemistry

About the Minor

The academic minor program in chemistry is designed to expose students to each of the major sub-disciplines of chemistry (analytical, inorganic, organic, and physical). In order to accomplish this students take a total of at least 27.5 credits of chemistry past the freshman year (100 level courses).

As chemistry is an experimental science at least two laboratory courses must be included in the group of courses taken for the minor. Students should note that their academic major may require certain chemistry courses that can also be used to fulfill the requirements for a minor in chemistry.

Required Courses

CHEM 241	Organic Chemistry I	4.0
CHEM 230	Quantitative Analysis	4.0
CHEM 253	Thermodynamics and Kinetics [*]	4.0
CHEM 421	Inorganic Chemistry I	3.0
CHEM 244	Organic Chemistry Laboratory I	3.0
Chemistry Electives [**]		9.5
Total Credits		27.5

[*]   May substitute CHEC 352 Physical Chemistry and Applications II (4 credits) or CHEC 353 Physical Chemistry and Applications III (4 credits) for the CHEM 253 Thermodynamics and Kinetics requirement.

[**]   The 9.5 credits of chemistry electives must include at least one additional laboratory course. These electives are selected from any of the regularly offered chemistry department lecture or laboratory courses 200-level and above according to your specific interests. Note that existing course pre-requisites may affect which courses may be selected. The variable credit courses CHEM 493 Senior Research Project or CHEM 497 Research (Undergraduate) may also be used to fulfill either the lecture or laboratory requirements for the minor.

Additional Information

For more information about the minor in chemistry, contact:

Daniel King, PhD
Undergraduate Affairs Committee Chair
Department of Chemistry
Drexel University
dk68@drexel.edu

Minor in Chinese

About the Minor

Effective March 1, 2020, students will no longer be accepted into this minor. Students are encouraged to explore the Intermediate Chinese Proficiency Certificate **(**p. 166**) or the** Asian Studies minor **(**p. 141**).**

In our globalized world, intercultural and multilingual communication is an indispensable asset for the 21st century citizen and worker. As part of the Department of Global Studies and Modern Languages, we offer language instruction rooted in communication and embedded in authentic cultural contexts. Language study opens a world of opportunities for our students, from co-ops and study abroad programs to engagement with global communities here in Philadelphia. Media and technology, as well as travel and commerce, make the study of languages more crucial than ever, for tackling global challenges such as climate change and inequality demand that our students communicate across languages and cultures.

All prospective students should meet with an advisor from the College as soon as possible.

The Chinese minor requires 24.0 credits of language study above Chinese 105. Students can choose from the following course options including 12 credits of Special Topics classes. Students will likely be required to take advanced courses abroad to complete the minor.		**24.0**
CHIN 201	Chinese IV	
CHIN 202	Chinese V	

CHIN 310	Advanced Writing and Speaking
CHIN 320	Introduction to Language for the Professions
CHIN 340	Introduction to Power and Resistance
CHIN 350	Introduction to Language, Media, and Society
CHIN 420	Advanced Topics in Language for the Professions
CHIN 440	Advanced Topics in Power and Resistance
CHIN 450	Advanced Topics in Language, Media, and Society
CHIN T380	Special Topics in Chinese

*Students can take multiple Special Topics courses for Minor credit.

Minor in Communication

About the Minor

The minor in communication is a 24.0 credit curriculum designed to familiarize students with communication theory while providing training in print and digital communication. The minor can provide a strong complement for majors that emphasize presentations, interpersonal skills, publicity, and marketing. Students minoring in communication can focus on public relations, journalism, technical and science communication, environmental communication, or nonprofit communication.

All prospective students should meet with an advisor from the College as soon as possible.

Students complete 2 required courses, 2 courses in one of the areas listed below, and four additional electives from the COM course offerings that fit their interest.

Please note: No more than three courses that are required for a student's major can count towards fulfilling requirements for the minor.

Core Courses		
COM 101	Human Communication	3.0
or COM 111	Principles of Communication	
COM 210	Theory and Models of Communication	3.0
Focus Areas		**6.0**
Select one of the following areas of focus (2 courses):		
Journalism		
COM 160	Introduction to Journalism	
COM 261	Advanced Journalism	
Public Relations		
COM 181	Public Relations Principles and Theory	
COM 270 [WI]	Business Communication	
or COM 282	Public Relations Writing	
or COM 284	Public Relations Research, Measurement and Evaluation	
Technical and Science Communication		
COM 310 [WI]	Technical Communication	
COM 320 [WI]	Science Writing	
or COM 375	Grant Writing	
Environmental Communication		
COM 316	Campaigns for Health & Environment	
or COM 318	Film, Celebrity and the Environmental Movement	
COM 317 [WI]	Environmental Communication	
FOUR Additional Courses		
Four COM or LING electives		12.0
Total Credits		24.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Minor in Computer Crime

About the Minor

The minor in computer crime grounds students in the fundamentals of crime, security and technology by focusing on the behavioral, legal, and societal factors associated with technology and deviance as they relate to both the private and public sectors. The curriculum exposes students to both the concepts and tools necessary to understand and ultimately address computer crime, such as financial fraud, identity theft and other digital crimes that cross national and international boundaries.

All prospective students should meet with an advisor from the College as soon as possible.

Required Courses		
CJS 101	Introduction to Criminal Justice	3.0
CJS 200	Criminology	3.0
CJS 276	Introduction to Computer Crime	3.0
CJS 274	Sex, Violence, & Crime on the Internet	3.0
CJS 365	Computer Investigations and the Law	3.0
CJS 377	Intellectual Property Theft in the Digital Age	3.0
Additional Elective Courses		
Select two of the following:		6.0
CJS 265	Criminal Investigation	
CJS 266	Crime Prevention Planning	
CJS 267	Introduction to Security Studies	
CJS 273	Surveillance, Technology, and the Law	
CJS 362	Gender, Crime, and Justice	
CJS 375	Criminal Procedure	
CJS T380	Special Topics in Criminology and Justice Studies	
Total Credits		24.0

Minor in Criminal Justice

About the Minor

Students from any major who are interested in the law, legal issues and the forensic sciences may envision a future connection with the criminal justice system. These students could enhance their career possibilities by adding a minor in criminal justice to their major field of study.

The minor consists of four required courses and four criminal justice electives chosen from two categories, for a total of 24.0 credits.

All prospective students should meet with an advisor from the College as soon as possible.

Required Courses

CJS 101	Introduction to Criminal Justice	3.0
CJS 200	Criminology	3.0
CJS 210	Race, Crime, and Justice	3.0
CJS 220	Crime and the City	3.0
Criminal Justice Elective Courses		
Select 12 credits from the following:		12.0
CJS 260	Justice in Our Community	
CJS 261	Prison, Society and You	
CJS 265	Criminal Investigation	
CJS 266	Crime Prevention Planning	
CJS 267	Introduction to Security Studies	
CJS 273	Surveillance, Technology, and the Law	
CJS 274	Sex, Violence, & Crime on the Internet	
CJS 275	Issues in Domestic Violence	
CJS 276	Introduction to Computer Crime	
CJS 277	Introduction to Correctional Practices	
CJS 278	Introduction to Law Enforcement	
CJS 280	Communities and Crime	
CJS 289	Terrorism	
CJS 290	Crime and Public Policy	
CJS 295	International Field Experience	
CJS 302	Advanced Criminological Theorizing	
CJS 320	Comparative Justice Systems	
CJS 330	Crime Mapping I Using Geographic Information Systems	
CJS 360	Juvenile Justice	
CJS 362	Gender, Crime, and Justice	
CJS 364	Community Corrections	
CJS 365	Computer Investigations and the Law	
CJS 366	Technology and the Justice System	
CJS 369	Forensic Science Survey Course	
CJS 372	Death Penalty - An American Dilemma	
CJS 374	Restorative Justice	
CJS 375	Criminal Procedure	
CJS 376	Sentencing	
CJS 377	Intellectual Property Theft in the Digital Age	
CJS 378	Science of Forensic Science	
CJS 379	Forensic DNA Analysis	
CJS 401	Program Evaluation	
CJS T380	Special Topics in Criminology and Justice Studies	
CJS I399	Independent Study in CJS	
Total Credits		**24.0**

Minor in Ecology

About the Minor

The minor in ecology meets the needs of engineering, science, arts, applied arts, information, and business students interested in environmental science. Prior to taking ENVS 230 *General Ecology*, students are minimally expected to have had one term to a year of both general biology and general chemistry.

All prospective students should meet with an advisor from the College as soon as possible.

Required Courses

ENVS 212	Evolution	4.0
ENVS 230	General Ecology	3.0
ENVS 260	Environmental Science and Society	3.0
ENVS 284	Physiological and Population Ecology	3.0
ENVS 286	Community and Ecosystem Ecology	3.0
ENVS 328	Conservation Biology	3.0
Environmental Science elective		3.0
Field Course		4.0
Choose one of:		
ENVS 382	Field Botany of the New Jersey Pine Barrens	
ENVS 383	Ecology of the New Jersey Pine Barrens

Total Credits		**26.0**

Minor in English

About the Minor

The English minor provides students from other majors with a more intensive background in literature. Coursework in the minor exposes students to literature from a variety of periods, cultures and genres and also provides practice in critical thinking, literary analysis and writing. These courses enrich students' intellectual lives and provide them with skills that are valuable in a variety of professional situations.

Where a course required for the minor is already required for a student's major, the student is directed to choose another English elective. Other substitutions are permissible at the discretion of the Program Director.

Program Requirements

Requirements

Select a minimum of 9 credits of the following:		9.0
ENGL 200 [WI]	Classical to Medieval Literature	
ENGL 201	Renaissance to the Enlightenment	
ENGL 202 [WI]	Romanticism to Modernism	
ENGL 203 [WI]	Survey of World Literature	
ENGL 204	Post-Colonial Literature	
ENGL 205 [WI]	American Literature I	
ENGL 206 [WI]	American Literature II	
ENGL 207 [WI]	African American Literature	
ENGL 211 [WI]	British Literature I	
ENGL 212	British Literature II	
ENGL 214	Readings in Fiction	
ENGL 215 [WI]	Readings in Poetry	
ENGL 216 [WI]	Readings in Drama	
Select a minimum of 6 credits of the following:		6.0
WRIT 220 [WI]	Creative Nonfiction Writing	
WRIT 225 [WI]	Creative Writing	
WRIT 301 [WI]	Writing Poetry	
WRIT 302 [WI]	Writing Fiction	
WRIT 303	Writing Humor and Comedy	
WRIT 306	Writing About the Media	
WRIT 310	Literary Editing & Publication	
WRIT 312 [WI]	Writing for Target Audiences	
WRIT T380	Special Topics in Writing	
WRIT 400 [WI]	Writing for -- and about -- the Web	
WRIT 405	Internship in Publishing	
Select a minimum of 9 credits of the following:		9.0
ENGL 300 [WI]	Literature & Science	
ENGL 302	Environmental Literature	
ENGL 303	Science Fiction	

ENGL 305 [WI]	The Mystery Story	
ENGL 306	Literature of Baseball	
ENGL 307	Literature of Genocide

ENGL 360 [WI]	Literature and Society	
ENGL 365	Topics in African American Literature	
ENGL 370	Topics in Literature and Medicine	
ENGL 380	Literary Theory	
Total Credits		24.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Minor in Environmental Studies

About the Minor

The environmental studies minor is an interdisciplinary minor designed to give students specializing in other fields a background in contemporary environmental issues and the ability to analyze such issues. For students majoring in such fields as business and engineering, the minor in environmental studies will provide them with the tools to make better decisions about products or projects related to environmental economics, politic pollutants, environmental policy, and environmental justice. For students who are liberal arts majors, the minor in environmental studies offers the opportunity to focus on the social- and natural-science aspects of the environment, and to be prepared for issues they may encounter in their careers.

All prospective students should meet with an advisor from the College as soon as possible.

Required Courses

| ENSS 120 | Introduction to Environmental Studies | 3.0 |

ENSS 283	Introduction to Environmental Policy	3.0
ENVS 260	Environmental Science and Society	3.0
Select from the following: [*]		**15.0**
ANTH 360	Culture and the Environment	
CJS 373	Environmental Crime	
COM 316	Campaigns for Health & Environment	
COM 317 [WI]	Environmental Communication	
ECON 351	Resource and Environmental Economics	
ENGL 302	Environmental Literature	
ENSS 244	Sociology of the Environment	
ENSS 285	Introduction to Urban Planning	
ENSS 326	Cities and Sustainability	
ENSS 341	Environmental Movements in America	
ENSS 346	Environmental Justice	
ENSS 348	Delaware River Issues and Policy	
ENVS 230	General Ecology	
ENVS 275	Global Climate Change	
GEO 101	Physical Geology	
HIST 321	Themes in Global Environmental History	
HIST 322	Empire and Environment	
PHIL 340	Environmental Ethics	
PHIL 341	Environmental Philosophy	
PSCI 284	Environmental Politics	
PSCI 334	Politics of Environment and Health	
PSCI 369	The Politics of Food	
PSCI 373	Animal Politics	
SOC 444	Social Movements	
Total Credits		24.0

[*]   Other courses may be taken as electives with Departmental approval.

Minor in French

About the Minor

In our globalized world, intercultural and multilingual communication is an indispensable asset for the 21st century citizen and worker. As part of the Department of Global Studies and Modern Languages, we offer language instruction rooted in communication and embedded in authentic

cultural contexts. Language study opens a world of opportunities for our students, from co-ops and study abroad programs to engagement with global communities here in Philadelphia. Media and technology, as well as travel and commerce, make the study of languages more crucial than ever, for tackling global challenges such as climate change and inequality demand that our students communicate across languages and cultures.

All prospective students should meet with an advisor from the College as soon as possible.

The French minor requires a minimum of 24 credits above French 103, including at least 12 credits above French 310, and at least one 400 level course. Students can choose from the following 300 and 400 level courses.		**24.0**
FREN 201	French IV	
FREN 202	French V	
FREN 310	Advanced Writing and Speaking	
FREN 320	Introduction to Language for the Professions	
FREN 330	Introduction to Identities and Communities	
FREN 340	Introduction to Power and Resistance	
FREN 350	Introduction to Language, Media, and Society	
FREN 410	Advanced Grammar and Translation	
FREN 420	Advanced Studies in Language for the Professions	
FREN 430	Advanced Studies in Identities and Communities	
FREN 440	Advanced Studies in Power and Resistance	
FREN 450	Advanced Studies in Language, Media, and Society	

Minor in Geoscience

About the Minor

Geosciences are at the core of numerous problems facing the world today, and impact the lives of communities across the planet. Climate change, natural disasters, access to mineral resources and clean water, and availability of energy all shape government policies and corporate strategies, and are a cause of concern for society at large.

The geoscience minor is designed to give students specializing in other fields the skills to understand and analyze these issues. It is a natural fit for environmental science majors who wish to understand how the physical world can impact biodiversity, ecological processes and environmental impacts. For students majoring in such fields as business and engineering, the minor in geoscience will provide them with the tools to make better decisions about products or projects related to natural hazards and their impact, cost and availability of natural resources, energy policy, space exploration, land use, and environmental justice. For students who are liberal arts majors, the minor in geoscience offers the opportunity to explore earth science issues that shape the social, cultural, political and scientific debate, and to be prepared for issues they may encounter in their careers.

All prospective students should meet with an advisor from the College as soon as possible.

GEO 101	Physical Geology	4.0
GEO 102	History of the Earth	4.0
GEO Electives		**16.0**
GEO 103	Introduction to Field Methods in Earth Science	
GEO 201 [WI]	Earth Systems Processes	
GEO 205	Dinosaurs and Their World	
GEO 215	Mineralogy	
GEO 301	Advanced Field Methods in Earth Science	
GEO 306	Environmental Geology	
GEO 309	Geochemistry	
GEO 312	Sedimentology and Stratigraphy

Minor in Global Studies

About the Minor

Global Studies practices socially-responsible global citizenship through a unique combination of research-oriented and multilingual instruction, professional experience, and meaningful engagement with communities both here in Philadelphia and abroad.

Students experience Global Studies by:

- Examining the movement of peoples, goods, and cultures across countries and regions
- Studying global issues in concrete socio-economic, cultural, and geographical contexts
- Tackling structural inequalities from a variety of perspectives and disciplines
- Developing intercultural and language skills through unique pedagogical models
- Working with employers and communities in Philadelphia and around the world through Drexel's Co-op opportunities

All prospective students should meet with an advisor from the College as soon as possible.

Program Requirements

Students must complete at least 201 of a language before earning the GST minor.

Core requirements		
Students are required to complete 3 200+ level GST courses		**9.0**
Global Studies Electives		**15.0**
Students must complete at least fifteen credits from the following list:		
AFAS T280	Special Topics in Africana Studies

Minor in History

About the Minor

The history minor allows students in other majors to explore the historical background of their discipline, to better understand the origins of the contemporary world, and to build the knowledge and skills needed to understand the development of human societies over time and to understand historical episodes into their proper contexts. The minor in History is highly flexible and allows students to choose those History courses which appeal to them and which will contribute to their broader education. To complete the minor, students must take a total of six History courses (24.0 credits), five of which must be at the 200-level or above.

All prospective students should meet with an advisor from the College as soon as possible.

History Electives*	
*Take any 6 HIST courses; 5 of 6 must be 200-level or higher	24.0
Total Credits	24.0

Minor in History of Capitalism

About the Minor

The Minor in History of Capitalism is dedicated to the study of Capitalism and the emergence of the modern world economy from an historical perspective.

Admission Requirements

Open to all undergraduate students. All prospective students should meet with an advisor from the College as soon as possible.

Program Requirements

Required Course		
HIST 315	History of Capitalism	4.0
Complete 3 of the following courses:		**12.0**

HIST 316	History of American Business	
HIST 322	Empire and Environment	
HIST 334	American Empire in the Nineteenth Century	
HIST 355	Venice and the Mediterranean from the Middle Ages to Napoleon	
Complete any 2 additional history courses at the 200 level or above		**8.0**
Total Credits		24.0

Minor in Italian Studies

About the Minor

Drexel University and Philadelphia have deep connections with the Italian and Italo-American communities, from which come many Drexel students. Additionally, a significant number of faculty members across the university have research interests that connect with Italy.

The interdisciplinary minor in Italian Studies is designed to attract students interested in a variety of aspects related to Italian culture and to make use of the deep and diverse pool of resources on Drexel's campus, in the region, and abroad.

The minor in Italian Studies requires three courses (9-12 cr.) of language study. This allows students to achieve a basic level of language proficiency, with the option to continue further in the language. It also allows students whose interests lie beyond the language to pursue substantial Italy-related coursework in other disciplines. The elective side of the minor includes 12-15 credits of coursework in Italian society and culture, including a required seminar in contemporary Italy.

All prospective students should meet with an advisor from the College as soon as possible.

Program Requirements

Required courses:		
Students select 9.0-12.0 credits ITAL courses.		9.0-12.0
ITAL 230	Italy and Italians Today	3.0
Italian Studies Electives:		**12.0-13.0**
ARTH 102	History of Art II: Renaissance to Romanticism	
ARTH 325	Ancient Greek and Roman Art	
ARTH 327	Italian Renaissance Art	
CULA 305	Fundamentals of Italian Cuisine	
FMST 345	Italian Neo Realism	
HIST 355	Venice and the Mediterranean from the Middle Ages to Napoleon	
SCL 419	Global Coaching Seminar	
Total Credits		24.0-28.0

The Louis Stein Minor in Judaic Studies

About the Minor

The Louis Stein Minor in Judaic Studies, housed within the College of Arts and Sciences, is designed to give students the opportunity to explore and understand the history, culture, politics, and religion of the Jewish people. Through interdisciplinary coursework and directed field study, students investigate the Jewish experience from both a contemporary and a historical perspective.

The Louis Stein Minor in Judaic Studies requires 24.0 credits: 11.0 from required courses, and 13.0 from electives. Students can apply a maximum of 6.0 credits toward the minor from field study under the supervision of the academic advisor.

Program Requirements

Required Courses

JUDA 201	Jewish Literature and Civilization [*]	3.0
JUDA 202	Jewish Life and Culture in the Middle Ages [**]	4.0
JUDA 203	Modern Jewish History [†]	4.0
Minor electives		13.0
Total Credits		24.0

[*]   Offered concurrently with ENGL 350 Jewish Literature and Civilization.

[**]   Offered concurrently with HIST 253 Jewish Life and Culture in the Middle Ages.

[†]   Offered concurrently with HIST 249 Modern Jewish History.

Courses offered as electives have included:

- JUDA 211 (http://catalog.drexel.edu/search/?P=JUDA%20211) American Jewish Experience
- JUDA 212 (http://catalog.drexel.edu/search/?P=JUDA%20212) [WI (http://catalog.drexel.edu/undergraduate/collegeofartsandsciences/judaicstudies/)] Contemporary Jewish Life
- JUDA 213 (http://catalog.drexel.edu/search/?P=JUDA%20213) Jewish Cultural Tapestry
- JUDA 214 (http://catalog.drexel.edu/search/?P=JUDA%20214) Language and Cultural Diversity in the USA
- JUDA 215 (http://catalog.drexel.edu/search/?P=JUDA%20215) Reconstructing History After Genocide
- JUDA 216 (http://catalog.drexel.edu/search/?P=JUDA%20216) Yiddish Literature and Culture
- JUDA 280 (http://catalog.drexel.edu/search/?P=JUDA%20280) Special Topics in Judaic Studies
- JUDA 298 (http://catalog.drexel.edu/search/?P=JUDA%20298) Field Work in Judaic Studies
- JUDA I299 (http://catalog.drexel.edu/search/?P=JUDA%20I299) Independent Study in Judaic Studies

- ANTH 120 (http://catalog.drexel.edu/search/?P=ANTH%20120) Biblical Archeology of Israel and Jordan
- ANTH 380 (http://catalog.drexel.edu/search/?P=ANTH%20380) Special Topics in Anthropology (When offered as Archeology of the Middle East)
- HBRW 101 (http://catalog.drexel.edu/search/?P=HBRW%20101) Introduction to Hebrew I
- HBRW 102 (http://catalog.drexel.edu/search/?P=HBRW%20102) Introduction to Hebrew II
- HBRW 103 (http://catalog.drexel.edu/search/?P=HBRW%20103) Introduction to Hebrew III
- HBRW 201 (http://catalog.drexel.edu/search/?P=HBRW%20201) Intermediate Hebrew IV

Minor in Korean

About the Minor

Effective March 1, 2020, students will no longer be accepted into this minor. Students are encouraged to explore the Intermediate Korean Proficiency Certificate **(**p. 169**) or the** Asian Studies minor **(**p. 141**).**

In our globalized world, intercultural and multilingual communication is an indispensable asset for the 21st century citizen and worker. As part of the Department of Global Studies and Modern Languages, we offer language instruction rooted in communication and embedded in authentic cultural contexts. Language study opens a world of opportunities for our students, from co-ops and study abroad programs to engagement with global communities here in Philadelphia. Media and technology, as well as travel and commerce, make the study of languages more crucial than ever, for tackling global challenges such as climate change and inequality demand that our students communicate across languages and cultures.

All prospective students should meet with an advisor from the College as soon as possible.

The Korean minor requires 24.0 credits above KOR 103. Students can select from the following course options including 12.0 credits of Special Topics classes. Students will likely be required to take advanced courses abroad to complete the minor.		24.0
KOR 201	Korean IV	
KOR 202	Korean V	
KOR 310	Advanced Writing & Speaking	
KOR 350	Introduction to Language, Media, and Society	
KOR 410	Advanced Grammar and Translation	
KOR 450	Advanced Topics in Language, Media, and Society	
KOR T380	Special Topics in Korean	

*Students can take multiple Special Topics courses for Minor credit.

Minor in Mathematics

About the Minor

The minor in Mathematics requires core courses in Calculus and Linear Algebra, as well as a selection of electives from a range of other areas. The minor complements programs in physics, computer science, finance or engineering, demonstrating further expertise and preparing students to excel after graduation.

All prospective students should meet with an advisor from the College as soon as possible.

Program Requirements

The minor in mathematics consists of five required courses and elective courses from the specified group of courses listed below resulting in a minimum of 38.0 credits.

Required Courses

MATH 121	Calculus I	4.0
MATH 122	Calculus II	4.0
MATH 123	Calculus III	4.0
MATH 200	Multivariate Calculus	4.0
MATH 201	Linear Algebra *	3.0-4.0
or MATH 261	Linear Algebra	

Mathematics Minor Electives **

Select from the following:		18.0-19.0
MATH 210	Differential Equations *	
or MATH 262	Differential Equations	
MATH 220 [WI]	Introduction to Mathematical Reasoning	
MATH 221	Discrete Mathematics	
MATH 235	Math Competition Problem Solving Seminar	
MATH 250	Mathematics of Investment and Credit	

MATH 285	Differential Equations II	
MATH 291	Complex and Vector Analysis for Engineers ***	
MATH 300	Numerical Analysis I	
MATH 301	Numerical Analysis II	
MATH 305	Introduction to Optimization Theory	
MATH 311	Probability and Statistics I	
MATH 312	Probability and Statistics II	
MATH 316	Mathematical Applications of Symbolic Software	
MATH 318 [WI]	Mathematical Applications of Statistical Software	
MATH 319	Techniques of Data Analysis	
MATH 320	Actuarial Mathematics	
MATH 321	Vector Calculus	
MATH 322	Complex Variables	
MATH 323	Partial Differential Equations	
MATH 331	Abstract Algebra I	
MATH 332	Abstract Algebra II	
MATH 387	Linear Algebra II	
MATH 401	Elements of Modern Analysis I	
MATH 402	Elements of Modern Analysis II	
MATH 410	Scientific Data Analysis I	
MATH 411	Scientific Data Analysis II	
MATH 422	Introduction to Topology	
MATH 449	Mathematical Finance	
MATH 450	Introduction to Graph Theory	
MATH 475	Cryptography	
MATH 483	Discrete Event Simulation	
MATH 489	Tensor Calculus	
Total Credits		38.0

* Students count only one of these two courses for their minor.

** A request form is available for any other mathematics courses upon the written approval prior to the beginning of the quarter in which the course is to be offered. Students should contact the Mathematics undergraduate academic advisor.

*** Students who take MATH 291 cannot also count MATH 321 or MATH 322 toward their minor.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Minor in Medical Sociology

About the Minor

The minor in medical sociology is designed to give students a broader understanding of the social dimensions of contemporary medical practice. Investigating health and illness from a national and global perspective, the minor helps students understand the relations between inequalities, health care and social justice; trends in health professions; and the importance of organizations to health care. For students majoring in such fields as health sciences, nursing, or biology, the minor in medical sociology complements their scientific training with a social science focus on humans, policy, and power in healthcare.

Admission Requirements

Open to all undergraduate Drexel students. All prospective students should meet with an advisor from the College as soon as possible.

Program Requirements

Required Courses *

SOC 235	Sociology of Health and Illness	4.0
Select three courses from the following:		12.0
SOC 238	Sociology of Health Professions	
SOC 271	Sociology of Aging	
SOC 313	Sociology of Global Health	
SOC 318	Social Networks and Health	
SOC 370	Practicum in Applied and Community Sociology	
SOC 405	Medicine, Technology and Science	
SOC 430	Politics of Life	
Select two of the following:		8.0
SOC 210	Race, Ethnicity and Social Inequality	
SOC 220	Wealth and Power	
SOC 240	Urban Sociology	
SOC 241	Research Design: Qualitative Methods	
SOC 242	Research Design: Quantitative Methods	
SOC 355 [WI]	Classical Social Theory	
SOC 356 [WI]	Contemporary Social Theory	
Total Credits		24.0

*   No more than three courses that are required for a student's major may count towards fulfilling requirements for the minor.

Minor in Middle East and North Africa Studies

About the Minor

This minor offers an interdisciplinary look at the Middle East and North Africa region, which holds a critically important geopolitical position in terms of not only security and energy, but also in terms of political, religious, cultural, and gender studies. Together with content courses in English offered through a variety of departments, this minor also includes 12.0 credits of Arabic language instruction.

All prospective students should meet with an advisor from the College as soon as possible.

Program Requirements

Core Requirements

Students must complete 12 credits of Arabic language coursework	12.0

MENA 101	The Middle East and North Africa Today: Culture and Democracy	3.0
Students must complete a minimum of 9 credits of elective courses		**9.0-10.0**
ANTH 120	Biblical Archaeology: The Archaeology of Israel and Jordan	
GST 241	Introduction to Power and Resistance (Gender Politics in the Middle East)	
GST 341	Advanced Studies in Power and Resistance (Revolution and Counter Revolution in the Arab World)	
HIST 206	Race and Islam in Africa and the Middle East	
Total Credits		24.0-25.0

Study abroad, special topics, and GST courses focused on the Middle East or North Africa will be considered for elective credit. Students must receive permission from the department.

Students who complete a minimum of 8.0 Arabic credits, including ARBC 202, are eligible to receive an intermediate language certificate.

Minor in Neuroscience

About the Minor

The Neuroscience minor allows students from a vast array of disciplines the opportunity for formalized study in Neuroscience. This interdisciplinary minor integrates content from cellular, molecular, and systems neurobiology with neuropsychology, providing students with a strong foundation in basic principles of neurobiology and neuropsychology. This minor is a collaborative effort between Biology and Psychology, but is open to students in any major with an interest in gaining a deeper understanding of the biological and cognitive principles underlying brain function.

Please contact Leanne Sweppenheiser at lmt38@drexel.edu for additional information.

Required Courses		
BIO 348	Neuroscience: From Cells to Circuits	3.0
BIO 349	Behavioral Neuroscience	3.0
PSY 312	Cognitive Neuroscience	3.0
PSY 410	Neuropsychology	3.0
Biology and Psychology Electives [*]		
Select 2 BIO courses		**6.0**
BIO 414	Behavioral Genetics	
BIO 461	Neurobiology of Autism Disorders	
BIO 462	Biology of Neuron Function	
BIO 463	Molecular Mechanisms of Neurodegeneration	
BIO 465	Neurobiology of Disease	
Select 2 PSY courses		**6.0**
PSY 212	Physiological Psychology	
PSY 213	Sensation and Perception	
PSY 310	Drugs & Human Behavior	
PSY 325	Psychology of Learning	
PSY 330	Cognitive Psychology	
PSY 336	Psychology of Language	
Total Credits		24.0

A grade of "C" or better must be earned for each course in this minor to meet the requirements.

* 3 credits of research in neuroscience as BIO 497 or PSY 499 can be substituted for 1 elective in either of the categories

Minor in Nonprofit Communication

About the Minor

The minor in nonprofit communication is a 24.0 credit curriculum designed to familiarize students with general communication theory and practice while providing training in print and electronic communication skills peculiar to the nonprofit sector. In addition to conventional course work this minor will include a practicum in the form of a 3.0 credit independent study (COM I399) for one term in which students will provide service and consultation for an area nonprofit organization as selected and coordinated by Drexel Edits (http://www.drexel.edu/coas/academics/departments-centers/communication/drexel-edits/), the university's center for the support of nonprofit communication.

All prospective students should meet with an advisor from the College as soon as possible.

Program Requirements

Core Courses

COM 181	Public Relations Principles and Theory	3.0
COM 375 [WI]	Grant Writing	3.0
COM 376	Nonprofit Communication	3.0
COM 377	Communication for Civic Engagement	3.0
COM 378	Public Service Campaigns	3.0
COM I399	Independent Study in COM	3.0
Choose at least 2 courses:		**6.0**
COM 160	Introduction to Journalism	
COM 222	Interpersonal Communication	
COM 247	Social Media in Communication	
COM 265	Audio Journalism	
COM 270 [WI]	Business Communication	
COM 282 [WI]	Public Relations Writing	
COM 330	Professional Presentations	
COM 363	Event Planning	
Total Credits		24.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

(http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Minor in Philosophy

About the Minor

A philosophy minor adds depth and breadth to your college education. Philosophy classes train you to be a critical thinker and a thoughtful, reflective person. They assist you in developing more careful reading skills and more effective writing and speaking skills. They also give you a lot of practice constructing and criticizing logical arguments. More than almost any other minor a philosophy minor will broaden and enhance your education and help you develop skills you will use in your career and also in everyday life. The minor requires a variety of classes including an introduction, a logic course, three "foundations" courses, an "area elective", an applied ethics course, and one 400-level History of Philosophy seminar.

Students who have completed 30.0 credits may apply for the philosophy minor by meeting with an advisor from the College as soon as possible.

Required Courses

PHIL 101	Introduction to Western Philosophy	3.0
or PHIL 102	Introduction to Eastern Philosophy	
PHIL 105	Critical Reasoning	3.0
or PHIL 111	Symbolic Logic I	
Select three Philosophy Foundations Electives:		**9.0**
PHIL 207	Symbolic Logic II	
PHIL 211	Metaphysics: Philosophy of Reality	
PHIL 212	Ancient Philosophy	
PHIL 214	Modern Philosophy	
PHIL 215	Contemporary Philosophy	
PHIL 221	Epistemology: Philosophy of Knowledge	
PHIL 231	Aesthetics: Philosophy of Art	
PHIL 241	Social & Political Philosophy	
PHIL 251	Ethics	
Select one Philosophy Area Elective:		**3.0**
PHIL 210	Philosophy of Sport	
PHIL 216	Philosophy of Time	
PHIL 218	Philosophy of Mathematics	
PHIL 255	Philosophy of Sex & Love	
PHIL 341	Environmental Philosophy	
PHIL 351	Philosophy of Technology	
PHIL 355	Philosophy of Medicine	
PHIL 361	Philosophy of Science	
PHIL 381 [WI]	Philosophy in Literature	
PHIL 385	Philosophy of Law	
PHIL 391	Philosophy of Religion	
Select one Applied Ethics Elective:		**3.0**
PHIL 301	Business Ethics	
PHIL 305	Ethics and the Media	
PHIL 311	Ethics and Information Technology	
PHIL 315	Engineering Ethics	
PHIL 317	Ethics and Design Professions	
PHIL 321	Biomedical Ethics	
PHIL 323	Organizational Ethics	
PHIL 325	Ethics in Sports Management	
PHIL 330	Criminal Justice Ethics	
PHIL 335	Global Ethical Issues	
PHIL 340	Environmental Ethics	
Select one Philosophy Seminar Elective:		**3.0**
PHIL 421 [WI]	Seminar in Ancient Philosophy	
PHIL 431 [WI]	Seminar in Modern Philosophy	
PHIL 461 [WI]	Seminar in Contemporary Philosophy	

PHIL 481 [WI]	Seminar in a Philosophical School	
PHIL 485 [WI]	Seminar in a Major Philosopher	
Total Credits		24.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Minor in Physics

About the Minor

Physics is a science that studies the natural phenomena at all scales, from that of the universe to elementary particles. This minor exposes the students to some of the basic principles of physics and would easily complement any other discipline—from engineering to other sciences.

The minor in physics requires a total of 10.0 credits from the elective list in addition to the prerequisite and core courses.

Because of the overlap in requirements between the astrophysics minor (p. 141) and the physics minor, students cannot minor in both.

All prospective students should meet with an advisor from the College as soon as possible.

Required Prerequisite Courses [*]		
PHYS 113	Contemporary Physics I	
PHYS 114	Contemporary Physics II	
PHYS 115	Contemporary Physics III	
Required Courses		
PHYS 311	Classical Mechanics I	4.0
PHYS 321	Electromagnetic Fields I	4.0
PHYS 217	Thermodynamics	4.0
PHYS 326	Quantum Mechanics I	4.0
Electives		
Select at least 10.0 credits from PHYS courses at the 300 level or above		10.0
Total Credits		26.0

[*]   PHYS 101, PHYS 102 and PHYS 201 will also satisfy the prerequisite requirements.

Minor in Politics

About the Minor

A Minor in Politics enriches almost every major. With a Minor in Politics, you can hone your analytical and critical thinking skills and take your understanding of political science and research methodology to your field of study.

Political science pairs well with economics, criminal justice, psychology, public health, history, anthropology, communications or education.

All prospective students should meet with an advisor from the College as soon as possible.

Required Courses		
Select three of the following:		12.0
PSCI 100	Introduction to Political Science	
PSCI 110	American Government	
PSCI 120	History of Political Thought	
PSCI 130	Research Design for Political Science	
PSCI 140	Comparative Politics I	
PSCI 150	International Politics	
Political Science Electives		
12.0 credits of any additional 200-level or higher PSCI courses.		12.0
Total Credits		24.0

Minor in Psychology

About the Minor

The minor in psychology is intended to meet the needs of students who recognize that an understanding and analysis of individual psychological processes is a key component of their education. Students in the minor learn how to ask and answer important questions regarding human behavior, cognition and emotion to complement their major. The minor may also be of interest to students who have an interest in a double major but are unable to satisfy all of the requirements in two major fields.

Entry into the minor requires that PSY 101 *General Psychology* (or an equivalent introductory course) be taken as a prerequisite. Students who have completed and who are interested in a minor in Psychology are expected to meet with the Psychology Department Academic Adviser to discuss the selection of courses appropriate to their major and their own personal interests. No more than three courses that are required for a student's major can count towards fulfilling requirements for the minor.

Required Prerequisite		
PSY 101	General Psychology I (or equivalent)	
Required Courses		
Select eight of the following:		24.0
PSY 120	Developmental Psychology	
PSY 140	Approaches to Personality	
PSY 150	Introduction to Social Psychology	
PSY 210	Evolutionary Psychology	
PSY 212	Physiological Psychology	
PSY 213	Sensation and Perception	
PSY 240 [WI]	Abnormal Psychology	
PSY 245 [WI]	Sports Psychology	
PSY 250 [WI]	Industrial Psychology	
PSY 252	Death and Dying	
PSY 264	Computer-Assisted Data Analysis I	
PSY 265	Computer-Assisted Data Analysis II	

PSY 290	History and Systems of Psychology	
PSY 310	Drugs & Human Behavior	
PSY 325	Psychology of Learning	
PSY 330	Cognitive Psychology	
PSY 332	Human Factors and Cognitive Engineering	
PSY 337	Human-Computer Interaction	
PSY 340	Psychological Testing and Assessment	
PSY 360 [WI]	Experimental Psychology	
PSY 380	Psychological Testing and Assessment	
PSY 410	Neuropsychology	
PSY 442	Theories & Practices in Clinical Psychology	
PSY T480	Special Topics in Psychology	
Total Credits		24.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Minor in Religious Studies

About the Minor

This minor provides an interdisciplinary approach to the study of religion with much flexibility to accommodate individual student interest. Students will gain a global comparative perspective on world religions.

Admission Requirements

All prospective students should meet with an advisor from the College as soon as possible.

Program Requirements

Students must complete three courses from this list		**9.0-10.0**
ANTH 117	Introduction to World Religions	
ANTH 210 [WI]	Worldview: Science, Religion and Magic	
ANTH 363	Sacred Traditions of the East	
ENGL 330	The Bible as Literature	
HIST 260	Coexistence and Conflict: Jews, Christians, and Muslims in the Early Mediterranean	
PHIL 391	Philosophy of Religion	
Students must complete at least 15 credits of additional elective courses, including a minimum of two different course rubrics:		**15.0-17.0**
ANTH 117	Introduction to World Religions	

ANTH 120	Biblical Archaeology: The Archaeology of Israel and Jordan	
ANTH 210 [WI]	Worldview: Science, Religion and Magic	
ANTH 217	Anthropology of Interfaith Relations	
ANTH 270	Comparative Religious Ethics	
ANTH 363	Sacred Traditions of the East	
ENGL 330	The Bible as Literature	
ENGL 335	Mythology	
ENGL 350	Jewish Literature and Civilization	
or JUDA 201	Jewish Literature and Civilization	
HIST 181	Religion, Science, and Medicine in History	
HIST 206	Race and Islam in Africa and the Middle East	
HIST 249	Modern Jewish History	
or JUDA 20	Modern Jewish History	
HIST 253	Jewish Life and Culture in the Middle Ages	
or JUDA 202	Jewish Life and Culture in the Middle Ages	
HIST 257	The Reformation Age	
HIST 260	Coexistence and Conflict: Jews, Christians, and Muslims in the Early Mediterranean	
HIST 358	Witches, Demons, and Witch-hunters in European History	
JUDA 212 [WI]	Contemporary Jewish Life	
JUDA 216	Yiddish Literature & Culture	
PHIL 102	Introduction to Eastern Philosophy	
PHIL 291	Judaism and Christianity: Two Religions or One?	
PHIL 391	Philosophy of Religion	
RELS T280	Special Topics in Religious Studies [*]	
RELS T380	Special Topics in Religious Studies [*]	
Total Credits		24.0-27.0

[*] Special Topics courses focused on religious studies will be considered for elective credit. Students must receive permission from the department.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Minor in Science, Technology and Society

About the Minor

The minor in Science, Technology and Society (STS) allows students to explore the cultural, ethical, historical, political, and institutional dimensions of science, medicine, and technology. By taking courses in different disciplines, students develop an interdisciplinary approach that empowers them to critically analyze the social dimensions of science, medicine, and technology. STS programs, also called science and technology studies, are growing in the US and worldwide. The ability to critically identify the values and incentives built into scientific knowledge and technology design and use is highly valued in settings such as health care organizations, government agencies, public policy realms, tech industries, and more.

For more information about this program, visit Drexel's Center for Science, Technology and Society (http://drexel.edu/coas/academics/departments-centers/science-technology-society/) page. All prospective students should meet with an advisor from the College as soon as possible.

Select 6 - 8 classes from the list below, with a minimum of 24 credits. One class must be SCTS 101. At least 2 different subject areas must be represented among these classes.		24.0
ANTH 330	Media Anthropology	
ANTH 345	Visual Anthropology	
ANTH 355	Digital Culture	
ANTH 360	Culture and the Environment	
ARCH 315	Sustainable Built Environment I	
BIO 112	Biotechnology for Society	
BIO 114	Climate Change and Human Health	
BIO 212	Biotechnology	
COM 240	New Technologies In Communication	
COM 247	Social Media in Communication	
COM 351	Computer Mediated Communication	
CJS 210	Race, Crime, and Justice	
CJS 220	Crime and the City	
CJS 273	Surveillance, Technology, and the Law	
CJS 274	Sex, Violence, & Crime on the Internet	
CJS 366	Technology and the Justice System	
ENGL 300 [WI]	Literature & Science	
ENGL 302	Environmental Literature	
ENGL 303	Science Fiction	
ENGL 370	Topics in Literature and Medicine	
INTR 310	Sustainability: History, Theory and Critic	
HIST 283	Technology and Identity

Minor in Sociology

About the Minor

The sociology minor is designed to give students specializing in other fields a broader knowledge of contemporary social issues and the ability to analyze them in a reasoned fashion. For students majoring in such fields as business and engineering, the minor helps develop skills in

critical thinking that go beyond the acquisition of specialized, professional techniques. For students majoring in another area of the liberal arts, the minor offers the opportunity to place the issues raised in the major discipline within a larger social context.

All prospective students should meet with an advisor from the College as soon as possible.

Please note: No more than three courses that are required for a student's major can count towards fulfilling requirements for the minor.

Required Courses [*]		
SOC 355 [WI]	Classical Social Theory	4.0
or SOC 356	Contemporary Social Theory	
Select five of the following: [**]		20.0
SOC 115	Social Problems	
SOC 210	Race, Ethnicity and Social Inequality	
SOC 215	Sociology of Work

Total Credits		24.0

[*]   No more than three courses that are required for a student's major can count towards fulfilling requirements for the minor.

[**]   Students must take at least three elective courses at the 300 or 400 level.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end

of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Minor in Spanish

About the Minor

In our globalized world, intercultural and multilingual communication is an indispensable asset for the 21st century citizen and worker. As part of the Department of Global Studies and Modern Languages, we offer language instruction rooted in communication and embedded in authentic cultural contexts. Language study opens a world of opportunities for our students, from co-ops and study abroad programs to engagement with global communities here in Philadelphia. Media and technology, as well as travel and commerce, make the study of languages more crucial than ever, for tackling global challenges such as climate change and inequality demand that our students communicate across languages and cultures.

All prospective students should meet with an advisor from the College as soon as possible.

The Spanish minor requires a minimum of 24 credits above SPAN 103, including at least 12 credits above SPAN 310, and at least one 400 level course. Students can choose from the following 300 and 400 level courses.		24.0
SPAN 201	Spanish IV	
SPAN 202	Spanish V	
SPAN 310	Advanced Writing and Speaking	
SPAN 320	Introduction to Language for the Professions	
SPAN 330	Introduction to Identities and Communities	
SPAN 340	Introduction to Power and Resistance	
SPAN 350	Introduction to Language, Media, and Society	
SPAN 410	Advanced Grammar and Translation	
SPAN 420	Advanced Studies in Language for the Professions	
SPAN 430	Advanced Studies in Identities and Communities	
SPAN 440	Advanced Studies in Power and Resistance	
SPAN 450	Advanced Studies in Language, Media, and Society	

Minor in War and Society

About the Minor

This history minor concentrates on the history of wars, military and related institutions, and their broader historical and political contexts.

All prospective students should meet with an advisor from the College as soon as possible.

Program Requirements

Complete 4 of the following courses: [*]		16.0
HIST 230	United States Military History I (before 1900)	
HIST 231	US Military History II (since 1900)	
HIST 234	The United States Civil War	
HIST 235	The Great War, 1914-1918	
HIST 236	World War II	
HIST 239	The Pacific War	
HIST 331	The American Revolution	
HIST 333	U.S.-Mexican War	
HIST 338	The Vietnam War	
HIST 341	Disabilities in History	
HIST 370	Conquest of Mexico	
PSCI 150	International Politics	
PSCI 250	American Foreign Policy	
PSCI 310	Civilians in Armed Conflict	
PSCI 352	Ethics and International Relations	
PSCI 353	International Human Rights	
PSCI 360	International Law	
Complete any 2 additional history courses		**8.0**
Total Credits		24.0

[*]   At least 8 credits must be for History courses.

Minor in Women's and Gender Studies

About the Minor

The Women's and Gender Studies (WGST) Minor gives students a broad, interdisciplinary and global understanding of how gender intersects with race, age, class, sexual orientation, and other identities that shape human consciousness and experience. The WGST minor equips women, men and people who are gender variant with tools for making sense of societal structures within which they must operate as students, professionals and citizens. Through comparative study of gender across cultures, both within the United States and globally, students who minor in WGST gain a critical lens on the complexities of gender as it is constructed and understood in diverse contexts. Through WGST courses, students develop skills to be attuned to how gender impacts all aspects of human interaction, from the family, to the workplace, to the voting booth.

As an academic program Women's and Gender Studies provides a sharp focus on assumptions about the way the world can and does work. It offers a conceptual framework to analyze experiences of inequality and discrimination, and asks students to become active, engaged, thoughtful participants in their educational experiences and in their lives. Women's and Gender Studies prioritizes learning that helps students understand their "real life" experiences, at the same time that it asks students to reflect on and ask difficult, provocative and meaningful questions about those experiences.

Women's and Gender Studies works with many programs and departments at Drexel to emphasize how gender and sexuality intersect with other identities, as well as history, culture and geography to produce different beliefs, experiences and practices in peoples' lives and in larger social structures.

Because businesses working across many industries, including those in the nonprofit sector, are increasingly sensitive to issues such as gender discrimination, sexual harassment, equal pay for comparable work, support for LGBTQ-identified employees, parental leave, and day care, students with a Minor in Women's and Gender Studies gain a definite edge over other applicants for managerial and policy-making positions.

All prospective students should meet with an advisor from the College as soon as possible.

Required Courses		
WGST 101	Introduction to Women's and Gender Studies	3.0
WGST 201	Introduction to Feminisms	3.0
Choose one of the following three theory courses		**3.0**

Minor in Writing

About the Minor

The Minor in Writing invites students from all disciplines to develop their writing skills and further their abilities to think critically and creatively by encouraging them to make connections beyond the scope of their discipline.

Students who complete the Minor in Writing will:

- be better positioned to succeed as writers in their future professional and personal endeavors;
- obtain a strong background in theoretical perspectives and practices of writing and rhetoric, as well as reading;
- achieve a better understanding of writing within their major fields of study;
- gain significant practice and experience in writing in many genres and rhetorical modes.

All prospective students should meet with an advisor from the College as soon as possible.

Program Requirements

Required Courses

COM 210	Theory and Models of Communication	3.0
or ANTH 350	Anthropology of Language

WRIT 315	Writing for Social Change	
WRIT 400 [WI]	Writing for -- and about -- the Web [*]	
WRIT 405	Internship in Publishing	
WRIT T280	Special Topics in Writing	
WRIT T380	Special Topics in Writing	

WRIT T480	Special Topics in Writing	
WRIT 401	Advanced Poetry Workshop	
Total Credits		24.0

* Courses marked with an asterisk are also listed as options for the 4th required course for the minor. A student who elects to take one of these courses may not count it twice (once as a required course and once as an elective). For example, a student who chooses to take ANTH 350, "Anthropology of Language," as a required course may not take it again as one of the electives; however, this student could take PHIL 305, "Ethics and the Media," as an elective.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

(http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Certificate in Ethical Theory and Practice

Only available to currently enrolled Drexel students.

The Certificate in Ethical Theory and Practice exemplifies Drexel's commitment to engaged education and the Philosophy Program's emphasis on the inter-involvement of theory and practice. In our family, civic, work, and professional lives, we are confronted with issues of conduct and choices about what to do, what to create, how to move through the world and what kind of persons to be. This Certificate reflects each student's potential to move through the world as a positive and constructive force no matter what field of endeavor he or she may pursue.

Admission Requirements

Open to Drexel students in all schools and colleges, in all majors who have completed fifteen credits.

Program Requirements

Required Courses

PHIL 101	Introduction to Western Philosophy	3.0
or PHIL 102	Introduction to Eastern Philosophy	
PHIL 105	Critical Reasoning	3.0
PHIL 241	Social & Political Philosophy	3.0
PHIL 251	Ethics	3.0

Select two of the following:		6.0
PHIL 301	Business Ethics	
PHIL 305	Ethics and the Media	
PHIL 311	Ethics and Information Technology	
PHIL 315	Engineering Ethics	
PHIL 317	Ethics and Design Professions	
PHIL 321	Biomedical Ethics	
PHIL 322	Ethics of Human Enhancement	
PHIL 323	Organizational Ethics	
PHIL 325	Ethics in Sports Management	
PHIL 330	Criminal Justice Ethics	
PHIL 335	Global Ethical Issues	
PHIL 340	Environmental Ethics	
PHIL 385	Philosophy of Law	
Total Credits		18.0

Certificate in Interfaith and Religious Studies

Only available to currently enrolled Drexel students.

The Certificate in Interfaith and Religious Studies represents Drexel University's commitment to the study of spirituality and the contribution of the world's organized religions to the psychological and social well-being of individuals, groups, and societies. Through the study of the interrelationship of religions and the efforts of interfaith initiatives, students will better understand group commonalities and differences and attempts for social improvement and the resolution of conflict.

The Judaic Studies Program, an interdepartmental and interdisciplinary program in the College of Arts and Sciences, has for many years taught about the centrality of religion in cultural life. In its core courses, the evolution of Judaism alongside the rise of Christianity and Islam, has been studied. As the coordinating body for the new Certificate in Interfaith and Religious Studies, the Judaic Studies Program continues its tradition of exposing Drexel students to the leaders, thinkers, and institutions of the larger, outside community.

Program Requirements

Students must complete at least 15 credits from the list below:		15.0
JUDA 117	Introduction to World Religions	
or ANTH 11	Introduction to World Religions	
JUDA 221	Anthropology of Interfaith Relations	
or ANTH 217	Anthropology of Interfaith Relations	
JUDA 222	Comparative Religious Ethics	
or ANTH 27	Comparative Religious Ethics	
JUDA 223	Coexistence and Conflict: Jews, Christians, and Muslims in the Early Mediterranean	
or HIST 260	Coexistence and Conflict: Jews, Christians, and Muslims in the Early Mediterranean	
JUDA 224	Judaism and Christianity: Two Religions or One?	
or PHIL 291	Judaism and Christianity: Two Religions or One?	
JUDA 225	Philosophy of Religion	
or PHIL 391	Philosophy of Religion	
Total Credits		15.0

Any travel-add-on component to these courses can be counted towards the Certificate.

Certificate in Medical Humanities

The Certificate Program in Medical Humanities is designed for students majoring in any of the biological sciences, health professions including biomedical engineering, nursing and public health, the humanities, and the social sciences, with the aim of promoting dialogue and mutual appreciation for various approaches to health related issues.

The wide range of applicable courses within designated disciplines fosters an interdisciplinary context for investigating the many challenges within medicine and caregiving. This format, in turn, encourages students to explore illness, disability, dying, and healing as *human* experiences and to evaluate some of the limitations of an exclusively scientific perspective on medical practice and research.

A three credit introductory seminar (HUM 315) and a three credit concluding Capstone Seminar (ENGL 470) further provide intellectual cohesiveness and a sense of community among students enrolled in the program. Both co-directors of the program will help students choose courses best suited for their personal and professional interests. Note that most courses applicable to the program also fulfill humanities electives for other majors and that courses may change as departments offer more options.

Opportunities

Those students who successfully complete the program will receive a certificate in medical humanities. This certificate highlights the student's proficiency in an interdisciplinary approach to health related issues not easily attainable through isolated courses.

Additional information

For additional information, contact the program directors:

Edward "Ted" Fristrom, PhD
Department of English and Philosophy
College of Arts and Sciences, Drexel University
ecf35@drexel.edu

Stacey Ake, PHD (biology), PHD (philosophy)

Philosophy, Arts, and Humanities Certificate

Only available to currently enrolled Drexel students.

The Certificate in Philosophy, Arts, and Humanities provides an excellent opportunity for undergraduate students in all majors to deepen and broaden their educational experience through engagement with questions and ideas related to the arts and the humanities. What is the nature of art and how is it related to ideas about "beauty?" How do interpretations contribute to our idea of what is true? How can competing interpretations be assessed and evaluated? These and many other related issues will be explored.

Required Courses

Philosophy, Science, and Technology Certificate

Only available to currently enrolled Drexel students.

The Certificate in Philosophy, Science and Technology provides an excellent opportunity for undergraduate students in all majors to deepen and broaden their educational experience by enhancing and exercising their philosophical skills in relation to some of the most central issues and ideas related to science and technology. What is the nature and scope of natural science? How do the sciences produce knowledge? Is technology a neutral factor in human life and history? What is our responsibility to the environment? These and many other questions will be explored.

Certificate in Writing and Publishing

About the Program

The certificate in writing and publishing (CWP) offers currently enrolled Drexel University students the opportunity for both professional and personal development through a combination of available courses in professional writing, creative writing and publishing. The certificate enhances employment opportunities, opening a broad range of professional choices in cooperative employment and in the post-degree job market as skills are acquired. The CWP improves on-the-job performance, as the student develops writing skills and associated professional knowledge.

The program develops core competencies through the synergy of writing and publishing courses. The courses develop the student's skills in writing and publishing both through theory and practical application.

General requirements

The certificate in writing and publishing allows students to achieve certification in one or more of the following tracks:

- professional writing and publishing
- creative writing and publishing
- comprehensive writing and publishing (no longer accepting new students)

Each track requires the completion of a minimum of six courses (18.0 credits). Tracks can be designed to meet the professional needs and personal interests of the individual student.

Working with an advisor, students will choose not only the track but the courses within the track to develop an individually tailored program. Students can choose courses that will meet the general requirements of the program, while also satisfying their own professional and personal requirements.

Those students who have successfully completed this program will receive a certificate in writing and publishing. The transcript will indicate the completion of the CWP. This certification will indicate proficiency in written communication and familiarity with techniques in publishing in a variety of venues. The certificate program in writing and publishing highlights the student's acquisition of skills more than they would be in a list of courses on a transcript.

The completion of the certificate demonstrates the student's commitment to writing and publishing skills. It highlights writing skills of students majoring in business and technical areas; similarly, for students in the humanities and social sciences, it certifies writing and publishing skills, either in creative writing or professional writing.

Students meet with one of the two program co-directors to determine their track:

Harriet Levin Millan
Director, Certificate in Writing and Publishing
harriet.levin.millan@drexel.edu

Henry Israeli

Associate Director, Certificate in Writing and Publishing
hpi22@drexel.edu

Track Requirements

The professional writing and publishing track offers three options: business communication and publishing; technical communication and publishing; and journalism. This track is useful for business majors or students in technical or science areas who want to highlight their acquisition of writing skills. For students majoring in the humanities it provides an opportunity to develop areas of writing and publishing competencies in the professional arena. The creative writing and publishing track, is useful to all students as it encourages personal and professional development through creative writing and a knowledge of publishing. The comprehensive track is no longer accepting new students.

Note: Many majors already require one or more of the courses leading to the certificate in writing and publishing or list these courses as recommended electives

Professional Writing and Publishing Track

18.0 quarter credits

The professional writing and publishing track is useful for business majors or students in technical or science areas who want to highlight their acquisition of writing skills. For students majoring in the humanities it provides an opportunity to develop areas of writing and publishing competencies in the professional arena.

This track offers three focus options:

- business communication and publishing: for students interested in a career in business.
- technical communication and publishing: for students interested in engineering, science, information science and technology and careers in higher education.
- journalism: for students interested in global journalism and international affairs.

WRIT 303	Writing Humor and Comedy	
WRIT 306	Writing About the Media	
WRIT 312 [WI]	Writing for Target Audiences	
WRIT T380	Special Topics in Writing	
Total Credits		18.0

[*]   By Director's permission only.

Creative Writing and Publishing track

18.0 quarter credits

This track is designed for students who want to develop their creative writing skills either for personal development and expression, or because they recognize that creative writing develops imagination; sharpens clarity of expression; and enhances sensitivity to other people. Creative writing is a good pre-professional concentration for pre-law, pre-med, and the social sciences. The importance of creative writing has been recognized for engineering and for business.

Select three of the following (one of which must be a 200-level course):		9.0
WRIT 220 [WI]	Creative Nonfiction Writing	
WRIT 225 [WI]	Creative Writing	
WRIT 301 [WI]	Writing Poetry	
WRIT 302 [WI]	Writing Fiction	
WRIT 303	Writing Humor and Comedy	
WRIT 306	Writing About the Media	
WRIT T380	Special Topics in Writing	
Select one of the following:		3.0
COM 335	Digital Publishing	
COM 340	Desktop Publishing	
COM 350 [WI]	Document Design and Evaluation	
VSCM 479	Graphic Design Seminar: Advanced Media (Bookmaking)	
WRIT 310	Literary Editing & Publication	
WRIT 400 [WI]	Writing for -- and about -- the Web	
WRIT 405	Internship in Publishing [*]	
Select any two additional Certificate in Writing and Publishing courses, including but not limited to the following:		6.0
COM 160	Introduction to Journalism	
COM 261	Advanced Journalism	
COM 270 [WI]	Business Communication	
COM 310 [WI]	Technical Communication	
COM 315	Investigative Journalism	
COM 320 [WI]	Science Writing	
COM 350 [WI]	Document Design and Evaluation	
COM 375 [WI]	Grant Writing	

COM 390 [WI]	Global Journalism	
COM 420	Technical, Science and Health Editing	
CULA 412	Food Writing	
HNRS 301	Colloquium II [**]	
VSCM 480 [WI]	Graphic Design Seminar: Design Perceptions	
WRIT 210 [WI]	The Peer Reader in Context	
WRIT 312 [WI]	Writing for Target Audiences	
Total Credits		18.0

[*]   WRIT 405 must be taken twice if no other publishing course is taken.

[**]   By Director's permission only.

Entertainment Writing and Publishing Track

18.0 quarter credits

Entertainment Writing and Publishing is designed for students in any major who want to highlight their acquisition of writing skills. For students majoring in any entertainment field it provides an opportunity to develop areas of writing and publishing competencies in the professional entertainment field.

The track is designed for students who want to pursue writing either for personal development and expression as a personal or creative pursuit or profession. The Entertainment Writing and Publishing track will give students a strong multidisciplinary introduction to writing for a variety of entertainment professions including screenwriting, sports journalism, food writing, game writing, grant writing, and more. This track is designed for both students already studying any of the entertainment fields (such as Entertainment and Arts Management), as well as other students who are interested in exploring the field.

General Requirements		
WRIT 306	Writing About the Media	3.0
or WRIT 226	Writing in Public Spaces	
WRIT 312 [WI]	Writing for Target Audiences	3.0
or COM 375	Grant Writing	
Select two of the following		**6.0**
COM 265	Audio Journalism	
COM 305	Sports Journalism	
CULA 412	Food Writing	
DSMR 315 [WI]	Media Merchandising I	
ENGL 323	Literature and Other Arts	
HNRS 301	Colloquium II [**]	
SCRP 270 [WI]	Screenwriting I	
SCRP 241	Writing TV Comedy	
SCRP 242	Writing TV Drama	
SCRP 260	Writing Comics	
SCRP 280 [WI]	Writing the Short Film	
SCRP 290	Game: Universe & Story	
WRIT 303	Writing Humor and Comedy	
Select One of the Following		**3.0**
COM 335	Digital Publishing	
COM 340	Desktop Publishing	
VSCM 479	Graphic Design Seminar: Advanced Media ((Bookmaking))	
WRIT 310	Literary Editing & Publication	
WRIT 400 [WI]	Writing for -- and about -- the Web	
WRIT 405	Internship in Publishing [*]	
Select one of the following		**3.0**
COM 160	Introduction to Journalism	

COM 270 [WI]	Business Communication	
COM 420	Technical, Science and Health Editing

COM 310 [WI]	Technical Communication	
COM 420	Technical, Science and Health Editing	
or COM 375	Grant Writing	
or VSCM 480	Graphic Design Seminar: Design Perceptions	
Track B		
COM 270 [WI]	Business Communication	
COM 375 [WI]	Grant Writing	
or COM 350	Document Design and Evaluation	
or VSCM 48	Graphic Design Seminar: Design Perceptions	
Journalism		
COM 160	Introduction to Journalism	3.0
Select one of the following:		
COM 315	Investigative Journalism	
COM 390 [WI]	Global Journalism	
CULA 412	Food Writing	
WRIT 210 [WI]	The Peer Reader in Context ***	
Total Credits		21.0

* WRIT 405 Must be taken twice.

** Students select two of the following course sequences from at least two different categories

*** By Director's permission only.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Intermediate Arabic Proficiency Certificate

The Intermediate Arabic Proficiency Certificate* offers students a language certificate at the intermediate level as proof that they are sufficiently proficient** to interact with native speakers in a basic everyday context and within standard cultural norms, whether abroad or in the United States.

Please note that this certificate is available only to currently matriculated Drexel students.

Program Requirements

The Intermediate Arabic Proficiency Certificate* offers students a language certificate at the intermediate level as proof that they are sufficiently proficient** to interact with native speakers in a basic everyday context and within standard cultural norms, whether abroad or in the United States.

The Intermediate Arabic Certificate requires a minimum of 8.0 credits*** including the successful completion of the required course, ARBC 202. Students can choose from the following courses:		8.0--20.0
ARBC 101	Arabic I	
ARBC 102	Arabic II	
ARBC 103	Arabic III	
ARBC 201	Arabic IV	
ARBC 202	Arabic V	
ARBC 310	Advanced Writing and Speaking	
Total Credits		8.0-20.0

* Only students who place at or below the ARBC 202 level are eligible for the Intermediate Arabic Proficiency Certificate.

** The proficiency certificate is based on standardized outcomes set by the American Council on the Teaching of Foreign Languages (ACTFL, actfl.org (https://www.actfl.org/)).

*** Demonstrated proficiency through Drexel's placement test in ARBC 101, ARBC 102, ARBC 103, and/or ARBC 201 may reduce the number of required credits to a minimum of 8.0. (Note that completion of placement test[s] do not count toward academic credit.)
The required credits for the certificate is determined by placement level:
*For students who place into:
101 – 20 credits
102 – 16 credits
103 – 12 credits
201 – 8 credits
202 – 8 credits (student has to take 310 as well)
**Students who place above 202 are encouraged to pursue a language minor.

Intermediate Chinese Proficiency Certificate

The Intermediate Chinese Proficiency Certificate* offers students a language certificate at the intermediate level as proof that they are sufficiently proficient** to interact with native speakers in a basic everyday context and within standard cultural norms, whether abroad or in the United States.

Please note that this certificate is available only to currently matriculated Drexel students.

Program Requirements

The Intermediate Chinese Proficiency Certificate* offers students a language certificate at the intermediate level as proof that they are sufficiently proficient to interact with native speakers in a basic everyday context and within standard cultural norms, whether abroad or in the United States.**

The Intermediate Chinese Certificate requires a minimum of 8 credits*** including the successful completion of the required course, CHIN 202. Students can choose from the following courses:		8.0-20.0
CHIN 101	Chinese I	
CHIN 102	Chinese II	
CHIN 103	Chinese III	
CHIN 201	Chinese IV	
CHIN 202	Chinese V	
CHIN 310	Advanced Writing and Speaking	
Total Credits		8.0-20.0

* Only students who place at or below CHIN 202 level are eligible for the Intermediate Chinese Proficiency Certificate.

** The proficiency certificate is based on standardized outcomes set by the American Council on the Teaching of Foreign Languages (ACTFL, actfl.org (https://www.actfl.org/)).

*** Demonstrated proficiency through Drexel's placement test in CHIN 101, CHIN 102, CHIN 103, and/or CHIN 201 may reduce the number of required credits to a minimum of 8.0. (Note that completion of placement test[s] do not count toward academic credit.)
The required credits for the certificate is determined by placement level:
*For students who place into:
101 – 20 credits
102 – 16 credits
103 – 12 credits
201 – 8 credits
202 – 8 credits (student has to take 310 as well)
**Students who place above 202 are encouraged to pursue a language minor.

Intermediate French Proficiency Certificate

The Intermediate French Proficiency Certificate* offers students a language certificate at the intermediate level as proof that they are sufficiently proficient** to interact with native speakers in a basic everyday context and within standard cultural norms, whether abroad or in the United States.

Please note that this certificate is available only to currently matriculated Drexel students.

Program Requirements

The Intermediate French Proficiency Certificate* offers students a language certificate at the intermediate level as proof that they are sufficiently proficient to interact with native speakers in a basic everyday context and within standard cultural norms, whether abroad or in the United States.**

The Intermediate French Certificate requires a minimum of 8-20 credits*** including the successful completion of the required course, FREN 202. Students can choose from the following courses:		8.0-20.0
FREN 101	French I	
FREN 102	French II	
FREN 103	French III	
FREN 201	French IV	
FREN 202	French V	
FREN 310	Advanced Writing and Speaking	
Total Credits		8.0-20.0

* Only students who place at or below the FREN 202 level are eligible for the Intermediate French Proficiency Certificate.

** The proficiency certificate is based on standardized outcomes set by the American Council on the Teaching of Foreign Languages (ACTFL, actfl.org (https://www.actfl.org/))

*** Demonstrated proficiency through Drexel's placement test in FREN 101, FREN 102, FREN 103, and/or FREN 201 may reduce the number of required credits to a minimum of 8.0. (Note that completion of placement test[s] do not count toward academic credit.)

The required credits for the certificate is determined by placement level:

*For students who place into:

101 – 20 credits

102 – 16 credits

103 – 12 credits

201 – 8 credits

202 – 8 credits (student has to take 310 as well)

**Students who place above 202 are encouraged to pursue a language minor.

Program Requirements

The Intermediate Spanish Proficiency Certificate* offers students a language certificate at the intermediate level as proof that they are sufficiently proficient to interact with native speakers in a basic everyday context and within standard cultural norms, whether abroad or in the United States.**

The Intermediate Spanish Certificate requires a minimum of 8-20 credits*** including the successful completion of the required course, SPAN 202. Students can choose from the following courses:		8.0-20.0
SPAN 101	Spanish I	
SPAN 102	Spanish II	
SPAN 103	Spanish III	
SPAN 201	Spanish IV	
SPAN 202	Spanish V	
SPAN 310	Advanced Writing and Speaking	
Total Credits		8.0-20.0

* Only students who place at or below the SPAN 202 level are eligible for the Intermediate Spanish Proficiency Certificate.

** The proficiency certificate is based on standardized outcomes set by the American Council on the Teaching of Foreign Languages (ACTFL, actfl.org (https://www.actfl.org/)).

*** Demonstrated proficiency through Drexel's placement test in
      SPAN 101, SPAN 102, SPAN 103, and/or SPAN 201 may reduce the
      number of required credits to a minimum of 8.0. (Note that completion
      of placement test[s] do not count toward academic credit.)
      The required credits for the certificate is determined by placement
      level:
      *For students who place into:
      101 – 20 credits
      102 – 16 credits
      103 – 12 credits
      201 – 8 credits
      202 – 8 credits (student has to take 310 as well)
      **Students who place above 202 are encouraged to pursue a
      language minor.

College of Computing & Informatics

From our position on the leading edge of information and technology, Drexel University's College of Computing & Informatics (CCI) instills the knowledge and skills necessary for our students to lead and innovate across industries in a rapidly evolving technological landscape.

Building on Drexel University's exceptional foundation of entrepreneurship and cooperative education, we provide unparalleled professional experiences and the on-the-job training that is vital to preparing today's students for tomorrow's world. At CCI, our unique structure bringing computing and informatics together under one roof in a dynamic, collaborative college allows us to spot trends before they emerge, to solve problems before they occur, and to build a better tomorrow, starting today.

The College contributes to theory and practice along dimensions that include technical, human, organizational, policy and societal considerations. This broad perspective positions the College to address the complex, multi-disciplinary problems that are increasingly common as society becomes more dependent on information technology.

The academic programs of the College provide broad and deep coverage of computing & informatics. For more information about the College, please visit the College's website (http://www.drexel.edu/cci/).

Majors

- Computer Science (BACS, BSCS) (p. 171)
  - Computer Security Concentration (p. 182)
  - Game Programming and Development Concentration (p. 184)
- Computing and Security Technology (BSCST) (p. 185)
- Data Science (BSDS) (p. 192)
- Information Systems (BSIS) (p. 197)
- Software Engineering (BSSE) (p. 204)

Minors

- Computer Science (p. 210)
- Computing Technology (p. 211)
- Data Science (p. 211)
- Human Computer Interaction (p. 211)
- Information Systems (p. 212)
- Security Technology (p. 212)
- Software Engineering (p. 212)

About the College

The College of Computing & Informatics (http://www.drexel.edu/cci/) (CCI) offers a number of undergraduate degrees in computer science, computing & security technology, data science, information systems, and software engineering. The degree programs are open to freshmen and transfers from other departments at Drexel and other universities. Students have access to the computing facilities available to all Drexel students.

The College educates professionals through its interdisciplinary programs to meet a wide range of needs in the computing and informatics fields to benefit all sectors of society.

Transfer admission for traditional undergraduate programs occurs in the fall term only due to the sequence of required courses. Internal transfer students can be admitted at any term. Admission to the BS online completion program in computing & security technology is offered on a rolling basis. Please contact an undergraduate advisor (https://drexel.edu/cci/current-students/undergraduate/advising/) for more information.

Cooperative Education

Cooperative education emphasizes career management through experiential learning as an integral part of the education process. The co-op is based on employment in practical, major-related positions consistent with the interests, abilities, and aptitudes of the students.

For more general information on Drexel University's co-op opportunities, visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/).

Computer Science

Major: Computer Science
Degree Awarded: Bachelor of Science in Computer Science (BSCS) or Bachelor of Arts in Computer Science (BACS)
Calendar Type: Quarter
Total Credit Hours: 186.5
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 11.0701
Standard Occupational Classification (SOC) code: 11-3021; 15-1111; 15-1131; 15-1132; 11-1199

About the Program

The College of Computing & Informatics' Bachelor of Science/Arts in Computer Science offers extensive exposure and hands-on practice in the core areas of the field, including programming paradigms and languages, algorithms, systems, networking, and software engineering. Students also select upper level tracks in areas such as artificial intelligence, security, graphics and vision, and human-computer interaction. The program's flexibility allows students to easily sample from areas in which they would like to apply their computing knowledge. This hands-on curriculum combined with co-op provides real-world experience that culminates in a full-year software project.

The programs of study in computer science are designed with the flexibility to prepare students for careers in a rapidly changing profession and to allow strong preparation for graduate education in the field. In addition to the courses in the major, the Bachelor of Science program emphasizes foundation courses in the sciences and in applied mathematics, leading to careers involving applications in science and engineering. The Bachelor of Arts degree emphasizes foundation courses in the humanities and the social sciences, leading to careers involving applications in those areas.

Core courses in all programs include programming and data structures, programming language concepts, computer systems architecture, and software methodology and engineering. Students also choose two other tracks from a list of possible specializations. Please contact your advisor (https://drexel.edu/cci/current-students/undergraduate/advising/) at the College of Computing & Informatics for a current list of computer science track and elective courses.

Concentrations

- Computer Security (p. 182)
- Game Programming and Development (p. 184)

Additional Information

For more information about this program, please visit the BS/BA in Computer Science web page (https://drexel.edu/cci/academics/undergraduate-programs/bsba-computer-science/) on the College of Computing & Informatics' website.

Degree Requirements (BS)

The Bachelor of Science (BS) in Computer Science program emphasizes foundation courses in the sciences and in applied mathematics, leading to careers involving applications in science and engineering.

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Computer Science Requirements		
CS 164	Introduction to Computer Science	3.0
CS 171	Computer Programming I	3.0
or CS 175	Advanced Computer Programming I	
CS 172	Computer Programming II	3.0
or CS 176	Advanced Computer Programming II	
CS 260	Data Structures	3.0
CS 265	Advanced Programming Tools and Techniques	3.0
CS 270	Mathematical Foundations of Computer Science	3.0
CS 277	Algorithms and Analysis	3.0
CS 281	Systems Architecture	4.0
CS 283	Systems Programming	3.0
CS 360	Programming Language Concepts	3.0
SE 181	Introduction to Software Engineering and Development	3.0
SE 310	Software Architecture I	3.0
Computer Science track courses (see below)		18.0
Computer Science electives (see below)		6.0
Computing & Informatics Requirements		
CI 101	Computing and Informatics Design I	2.0
CI 102	Computing and Informatics Design II	2.0
CI 103	Computing and Informatics Design III	2.0
CI 491 [WI]	Senior Project I	3.0
CI 492 [WI]	Senior Project II	3.0
CI 493 [WI]	Senior Project III	3.0
Mathematics Requirements		
MATH 121	Calculus I	4.0
MATH 122	Calculus II	4.0
MATH 123	Calculus III	4.0
MATH 200	Multivariate Calculus	4.0
MATH 201	Linear Algebra	4.0
MATH 221	Discrete Mathematics	3.0
MATH 311	Probability and Statistics I	4.0
Science Requirements		**19.0**
Select one of the following lab science sequences:		
BIO 122	Cells and Genetics	
& BIO 124	and Evolution & Organismal Diversity	
& BIO 126	and Physiology and Ecology	
Or		
CHEM 101	General Chemistry I	
& CHEM 102	and General Chemistry II	
& CHEM 103	and General Chemistry III	

Or		
PHYS 101	Fundamentals of Physics I	
& PHYS 102	and Fundamentals of Physics II	
& PHYS 201	and Fundamentals of Physics III	
Science electives (see below)		
Arts & Humanities Requirements		
COM 230	Techniques of Speaking	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
PHIL 311	Ethics and Information Technology	3.0
Writing & Communication electives (see below)		6.0
Arts & Humanities, Business, or Social Studies electives (see below) [*]		18.0
University Requirements		
UNIV CI101	The Drexel Experience	2.0
or CI 120	CCI Transfer Student Seminar	
CIVC 101	Introduction to Civic Engagement	1.0
COOP 101	Career Management and Professional Development	0.0
Free electives		**22.5**
Total Credits		186.5

[*]   At least 3.0 credit must be taken from a Business category course (see below) and at least 3.0 credits must be from a Social Studies category course (see below)

Program Electives

Independent study courses and special topics courses must be approved by the department prior to enrollment to satisfy a program elective requirement.

- **Computer Science electives**: any CS course numbered 300 or higher
- **Science electives**: any CHEM (except CHEM 111, CHEM 112, CHEM 113, CHEM 114, CHEM 151), BIO (except BIO 161, BIO 162, BIO 163; can take only one of BIO 100, BIO 107, BIO 122; can take only one of BIO 101, BIO 109, BIO 124), PHYS (except PHYS 050, PHYS 100,PHYS 103, PHYS 104, PHYS 105, PHYS 106 [WI] , PHYS 121, PHYS 122, PHYS 151, PHYS 160, PHYS 305, PHYS 324,PHYS 405; cannot take both PHYS 131 & PHYS 181), ENVS, ENSS, PHEV
- **Writing & Communications electives**: any WRIT, COM, ENGL courses officially certified as Writing Intensive (http://drexel.edu/engphil/about/DrexelWritingCenter/wiCourses/course_list/) (WI), SCRP 270 [WI] and SCRP 275
- **Business electives**: any ACCT, BLAW, BUSN, ECON, ENTP, FIN, HRMT, INTB, MGMT, MIS, MKTG, OPM, OPR, ORGB, STAT, TAX
- **Social Studies electives**: any AFAS, ANTH, GST, HIST, JUDA, PSCI, PSY (except PSY 332, PSY 337), SOC, WGST
- **Arts & Humanities electives**: any ARCH, ARTH, CMGT, CJS, COM, CULA, DANC, EDEX, EDUC, ENGL (except ENGL 101, ENGL 102, ENGL 103, ENGL 105, ENGL 111, ENGL 112, ENGL 113), ESTM, FASH, FMST, FMVD, GST, INTR, LING, MUSC, PHIL, PHTO, THTR, VSCM, VSST, WRIT, Foreign Language courses (http://www.drexel.edu/culturecomm/academics/undergraduate/modernlang/languages/) as defined by the College of Arts and Sciences, and GMAP 260, ANIM 140, ANIM 141, ANIM 211, ANIM 212

Computer Science Tracks

Students must complete two of the following Computer Science tracks for a total of 18.0 credits. The tracks may overlap by one course. Students should check with the College for any additional Special Topics courses being offered that may be appropriate for one of the tracks. The student may propose a Student Defined Track with departmental approval.

Algorithms and Data Structures

CS 440	Theory of Computation	3.0
CS 457	Data Structures and Algorithms I	3.0
CS 458	Data Structures and Algorithms II	3.0

Artificial Intelligence

Select three of the following:		9.0
CS 380	Artificial Intelligence	
CS 383	Machine Learning	
CS 385	Evolutionary Computing	
CS 387	Game AI Development	
CS 481	Advanced Artificial Intelligence	

Computer and Network Security

Select three of the following:		9.0
CS 303	Algorithmic Number Theory and Cryptography	
CS 377	Software Security	
CS 472	Computer Networks: Theory, Applications and Programming	
CS 475	Computer and Network Security	

Computer Architecture

Select three of the following:		9.0
CS 352	Processor Architecture & Analysis	
CS 476	High Performance Computing	
ECEC 356	Embedded Systems	
ECEC 413	Introduction to Parallel Computer Architecture	

Computer Graphics and Vision

Select three of the following:		9.0
CS 430	Computer Graphics	
CS 431	Advanced Rendering Techniques	
CS 432	Interactive Computer Graphics	
CS 435	Computational Photography	

Computing Systems

Select three of following:		9.0
CS 314	Computing in the Small	
CS 352	Processor Architecture & Analysis	
CS 361	Concurrent Programming	
CS 365	System Administration	
CS 370	Operating Systems	
CS 375	Web and Mobile App Development	
CS 441	Compiler Workshop I	
CS 461	Database Systems	
CS 472	Computer Networks: Theory, Applications and Programming	

Game Development and Design

Select three of the following:		9.0
CS 341	Serious Game Development	
or CS 342	Experimental Game Development	
CS 345	Computer Game Design and Development	
CS 387	Game AI Development	
CS 445	Topics in Computer Gaming	
GMAP 377	Game Development: Workshop I	
GMAP 378	Game Development: Workshop II	

Graphics and Interaction

Select three of the following:		9.0
CS 338	Graphical User Interfaces	
CS 341	Serious Game Development	
or CS 342	Experimental Game Development	
CS 345	Computer Game Design and Development	
CS 387	Game AI Development	
CS 430	Computer Graphics	
CS 431	Advanced Rendering Techniques	
CS 432	Interactive Computer Graphics	
CS 435	Computational Photography	
CS 445	Topics in Computer Gaming	
GMAP 377	Game Development: Workshop I	
GMAP 378	Game Development: Workshop II	
INFO 310	Human-Centered Design Process & Methods	
or PSY 337	Human-Computer Interaction	

Human-Computer Interaction

Select three of the following:		9.0
CS 338	Graphical User Interfaces	
CS 345	Computer Game Design and Development	
CS 432	Interactive Computer Graphics	
INFO 310	Human-Centered Design Process & Methods	
or PSY 337	Human-Computer Interaction	

Intelligent Systems

Select three courses from the following:		9.0
CS 380	Artificial Intelligence	
CS 383	Machine Learning	
CS 385	Evolutionary Computing	
CS 387	Game AI Development	
CS 430	Computer Graphics	
CS 431	Advanced Rendering Techniques	
CS 432	Interactive Computer Graphics	
CS 435	Computational Photography	
CS 481	Advanced Artificial Intelligence	

Numeric and Symbolic Computation

Select three of the following:		9.0
CS 300	Applied Symbolic Computation	
CS 303	Algorithmic Number Theory and Cryptography	
MATH 300	Numerical Analysis I	
MATH 301	Numerical Analysis II	
MATH 305	Introduction to Optimization Theory	

Programming Languages

CS 440	Theory of Computation	3.0
CS 441	Compiler Workshop I	3.0
CS 442	Compiler Workshop II	3.0

Software and Security

Select three of the following:		9.0
CS 303	Algorithmic Number Theory and Cryptography	
CS 377	Software Security	
CS 472	Computer Networks: Theory, Applications and Programming	
CS 475	Computer and Network Security	
SE 311	Software Architecture II	
SE 320	Software Verification and Validation	
SE 410	Software Evolution	

Software Engineering

SE 311	Software Architecture II	3.0
SE 320	Software Verification and Validation	3.0
SE 410	Software Evolution	3.0

Systems and High-Performance Computing

Select three of the following:		9.0
CS 314	Computing in the Small	
CS 352	Processor Architecture & Analysis	
CS 361	Concurrent Programming	
CS 365	System Administration	
CS 370	Operating Systems	
CS 375	Web and Mobile App Development	
CS 440	Theory of Computation	

CS 441	Compiler Workshop I	
CS 442	Compiler Workshop II	
CS 461	Database Systems	
CS 472	Computer Networks: Theory, Applications and Programming	
CS 476	High Performance Computing	
ECEC 356	Embedded Systems	
ECEC 413	Introduction to Parallel Computer Architecture	
Theory and Computation		
Select three of the following:		9.0
CS 300	Applied Symbolic Computation	
CS 303	Algorithmic Number Theory and Cryptography	
CS 440	Theory of Computation	
CS 441	Compiler Workshop I	
CS 442	Compiler Workshop II	
CS 457	Data Structures and Algorithms I	
CS 458	Data Structures and Algorithms II	
MATH 300	Numerical Analysis I	
MATH 301	Numerical Analysis II	
MATH 305	Introduction to Optimization Theory	

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Degree Requirements (BA)

The Bachelor of Arts (BA) in Computer Science program emphasizes foundation courses in the humanities and the social sciences, leading to careers involving applications in those areas.

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

MATH 305	Introduction to Optimization Theory	

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses

with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study (BS)

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

BS Computer Science

5 YR UG Co-op Concentration

Term 1		Credits
CI 101	Computing and Informatics Design I	2.0
CS 164	Introduction to Computer Science	3.0
MATH 121	Calculus I	4.0
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0

Accelerated Degrees

The College of Computing & Informatics offers several Accelerated Degree programs designed to allow students to complete both a bachelor's degree and a graduate degree along with cooperative educational experience in fewer years than would be typical if pursuing the degrees separately. Students accepted in this program can combine any of the College's bachelor's and master's degree programs as well as other options:

- Any CCI BS/any CCI MS Accelerated Degree (BS & MS in five years, including 2 Co-ops)
- Any CCI BS/MBA Accelerated Degree (BS/MBA)
- Any CCI BS/JD Accelerated Degree (BS/JD)

For more information on the criteria for entering this program, visit the BS/MS Accelerated Degree (http://drexel.edu/undergrad/academics/accelerated-degrees/) page on Drexel's website.

Bachelor's/Master's Accelerated Degree in Computer Science

Applying

The guidelines for applying to the Computer Science Bachelor's/Master's (BS/MS) Accelerated Degree Program are as follows:

- University regulations require application after the completion of 90.0 credits but before the completion of 120.0 credits.
- Applicants must have an overall cumulative Grade Point Average of 3.5 or higher.
- Letters of recommendation from two Computer Science faculty are required.
- Students must submit a plan of study. Consult your advisor and course schedules for guidance.
- Applicants must have completed the following courses with a minimum GPA of 3.50

Program Requirements

The courses below should be taken at Drexel. Seek guidance from your advisor regarding additional coursework if any courses below have been taken outside of Drexel.

CS 171	Computer Programming I	3.0
or CS 175	Advanced Computer Programming I	
CS 172	Computer Programming II	3.0
or CS 176	Advanced Computer Programming II	
CS 260	Data Structures	3.0
CS 265	Advanced Programming Tools and Techniques	3.0
CS 270	Mathematical Foundations of Computer Science	3.0
CS 281	Systems Architecture	4.0
MATH 221	Discrete Mathematics	3.0

Requirements

The requirements of the Computer Science BS/MS program follow the requirements of both the BS in Computer Science (http://catalog.drexel.edu/undergraduate/collegeofcomputingandinformatics/computerscience/#requirementsbstext) and the MS in Computer Science (http://catalog.drexel.edu/graduate/collegeofcomputingandinformatics/computerscience/#degreerequirementsmstext). Students must complete all the requirements of the BS in Computer Science (http://catalog.drexel.edu/undergraduate/collegeofcomputingandinformatics/computerscience/#requirementsbstext) except that they may drop two free electives (still maintaining the 180.0 credit minimum for the BS degree). In addition, students must complete 45.0 credits of graduate courses to satisfy the requirements of the MS in Computer Science (http://catalog.drexel.edu/graduate/collegeofcomputingandinformatics/computerscience/#degreerequirementsmstext). Please refer to the linked program pages for the details of these requirements.

When completing undergraduate CS electives and graduate CS courses, students should take care to avoid equivalent courses at both the undergraduate and graduate levels. The table below indicates pairs of equivalent courses; students may only take one or the other in each pair but not both.

CS 338	Graphical User Interfaces	3.0
or CS 530	Developing User Interfaces	
CS 370	Operating Systems	3.0
or CS 543	Operating Systems	
CS 380	Artificial Intelligence	3.0
or CS 510	Introduction to Artificial Intelligence	
CS 430	Computer Graphics	3.0
or CS 536	Computer Graphics	
CS 431	Advanced Rendering Techniques	3.0
or CS 636	Advanced Computer Graphics	
CS 432	Interactive Computer Graphics	3.0
or CS 537	Interactive Computer Graphics	
CS 435	Computational Photography	3.0
or CS 583	Introduction to Computer Vision	
CS 440	Theory of Computation	3.0
or CS 525	Theory of Computation	
CS 457	Data Structures and Algorithms I	3.0
or CS 521	Data Structures and Algorithms I	
CS 458	Data Structures and Algorithms II	3.0
or CS 522	Data Structures and Algorithms II	
CS 472	Computer Networks: Theory, Applications and Programming	3.0
or CS 544	Computer Networks	
CS 475	Computer and Network Security	3.0
or CS 645	Network Security	
CS 481	Advanced Artificial Intelligence	3.0
or CS 610	Advanced Artificial Intelligence	

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic

advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Plan of Study

Students in the BS/MS program typically forego their third co-op and take advanced courses during those two terms. The sample plan of study below thus assumes a total of 14 terms completed within a 5-year period.

Term 1		Credits
CI 101	Computing and Informatics Design I	2.0
CS 164	Introduction to Computer Science	3.0
MATH 121	Calculus I	4.0
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research / English Composition I	3.0
UNIV 101	The Drexel Experience	1.0
Science lab		4.5
	Term Credits	17.5
Term 2		
CI 102	Computing and Informatics Design II	2.0
CS 171 or 175	Computer Programming I / Advanced Computer Programming I	3.0
MATH 122	Calculus II	4.0
ENGL 102 or 112	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing / English Composition II	3.0
COOP 101	Career Management and Professional Development	0.0
CIVC 101	Introduction to Civic Engagement	1.0
Science lab		4.5
	Term Credits	17.5
Term 3		
CI 103	Computing and Informatics Design III	2.0
CS 172 or 176	Computer Programming II / Advanced Computer Programming II	3.0
MATH 123	Calculus III	4.0
ENGL 103 or 113	Composition and Rhetoric III: Themes and Genres / English Composition III	3.0
UNIV 101	The Drexel Experience	1.0

CI 493 [WI]	Senior Project III	3.0

Graduate course	3.0
Graduate course	3.0
Graduate course	3.0
Term Credits	12.0

Total Credit: 226.5

Co-op/Career Opportunities

Co-Op Options

Three co-op options are available for this program:

- 5-year/3 co-op
- 4-year/1 co-op
- Accelerated Degree (BS & MS): 5-year/2 co-op

Career Opportunities

The demand for computing skills is tremendous and growing, with highly paid jobs. Most professionals in the field focus on the design and development of software and software-based applications. Typical jobs include software engineer, programmer, web designer, multimedia or software developer, systems analyst or consultant, manager of technical staff, client-server architect, network designer, and database specialist. Most positions require at least a bachelor's degree. Relevant work experience, such as that provided by co-operative education, is also very important, as cited by the Occupational Outlook Handbook (http://www.bls.gov/ooh/) published by the US Bureau of Labor Statistics.

Job titles of recent computer science graduates include:

- Web Developer
- Software Systems Engineer
- Software Developer
- Network Engineer
- Application Analyst

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities.

3675 Market Street

In March 2019, the College of Computing & Informatics relocated to 3675 Market (https://drexel.edu/cci/about/our-facilities/). For the first time in the College's history, all CCI faculty, students and professional staff are housed under one roof. Occupying two floors in the brand new uCity Square building, CCI's new home offers state-of-the-art technology in our classrooms, labs, meeting areas and collaboration spaces. 3675 Market offers Class A laboratory, office, coworking, and convening spaces. In fall 2019, the College will open a third floor which will include additional offices, classrooms, a research lab, a maker space, and a ground-breaking DXC Technology Innovation Lab. Located at the intersection of Market Street and 37th Street, 3675 Market will act as a physical nexus, bridging academic campuses and medical centers to the east and south, the commercial corridors along Market Street and Chestnut Street, and the residential communities to the north and west.

The uCity Square building offers:

- Speculative lab/office space
- World-class facilities operated by CIC (https://cic.us/philadelphia/)
- Café/restaurant on-site

- Quorum, a two-story, 15K SF convening space and conference center
- Adjacent to future public square
- Access to Science Center's nationally renowned business acceleration and technology commercialization programs

Drexel University Libraries

Drexel University Libraries (http://www.library.drexel.edu/) is a learning enterprise, advancing the University's academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through three physical locations, including W. W. Hagerty Library, Queen Lane Library, and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at library.drexel.edu (http://www.library.drexel.edu/) or in-person at W. W. Hagerty Library (http://www.library.drexel.edu/locations/).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

CCI Commons

Located on the 10th floor of 3675 Market Street, the CCI Commons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, and more collaborative space for its students. Students have access to 3675 Market's fully equipped conference room with 42" displays and videoconferencing capabilities. The CCI Commons provides technical support to students, faculty, and professional staff. In addition, the staff provides audio-visual support for all presentation classrooms within 3675 Market. Use of the CCI Commons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the CCI Commons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the CCI Commons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as "DreamSpark" that allows students free access to a wide array of Microsoft software titles and operating systems.

The CCI Commons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University's network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

CCI Learning Center

The CCI Learning Center (CCILC), located in 3675 Market Street's CCI Commons student computer lab, provides consulting and other learning resources for students taking computer science classes. The CCILC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

The CCILC and CCI Commons serve as a central hub for small group work, student meetings, and TA assistance.

Research Laboratories

The College houses multiple research labs, led by CCI faculty, in 3675 Market Street including: the Drexel Health and Risk Communication Lab, Interactive Systems for Healthcare, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), High Performance Computing Laboratory (SPIRAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Social Computing Research Group, Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College's research web page (http://cci.drexel.edu/research.aspx).

Evaluations

The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the Computer Science degree is evaluated relative to the following Objectives and Outcomes.

Computer Science Program Educational Objectives

Drexel Computer Science alumni will:

a. be valued employees in a wide variety of occupations in industry, government and academia, in particular as computer scientists and software engineers;

b. succeed in graduate and professional studies, such as engineering, science, law, medicine and business;

c. pursue life-long learning and professional development to remain current in an ever changing technological world;

d. provide leadership in their profession, in their communities, and society;

e. function as responsible members of society with an awareness of the social and ethical ramifications of their work.

Computer Science Student Outcomes (for Bachelor of Science and Bachelor of Arts)

The Drexel Computer Science program enables students to attain, by the time of graduation:

a. An ability to apply knowledge of computing and mathematics appropriate to the discipline

b. An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution

c. An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs

d. An ability to function effectively on teams to accomplish a common goal

e. An understanding of professional, ethical, legal, security and social issues and responsibilities

f. An ability to communicate effectively with a range of audiences

g. An ability to analyze the local and global impact of computing on individuals, organizations, and society

h. Recognition of the need for and an ability to engage in continuing professional development

i. An ability to use current techniques, skills, and tools necessary for computing practice

j. An ability to apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the tradeoffs involved in design choices.

k. An ability to apply design and development principles in the construction of software systems of varying complexity.

Additional Information

The Computer Science BS program is accredited by the Computing Accreditation Commission (CAC) of ABET, http://www.abet.org.

To view the latest BS/BA in Computer Science program enrollment numbers, please click here (https://drexel.edu/cci/academics/undergraduate-programs/facts/).

Computer Science Faculty

Yuan An, PhD *(University of Toronto, Canada) Director of International Programs.* Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

David Augenblick, MS *(University of Pennsylvania).* Associate Teaching Professor. Introductory and object-oriented programming, data structures and database systems, computer application project management, application of computer programming principles and solutions to engineering problems.

Marcello Balduccini, PhD *(Texas Tech University) Senior Research Scientist, Applied Informatics Group.* Associate Research Professor. Logic programming, declarative programming, answer set programming, knowledge representation, various types of reasoning

M. Brian Blake, PhD *(George Mason University) Executive Vice President for Academic Affairs and Provost; Distinguished Professor of Systems and Software Engineering; Joint Appointments with the College of Engineering and the College of Medicine.* Software engineering approaches for integration of Web-based systems.

Mark Boady, PhD *(Drexel University).* Assistant Teaching Professor. Computer Algebra, complex symbolic calculations, automation of computation problems

David E. Breen, PhD *(Rensselaer Polytechnic Institute).* Associate Professor. Self-organization, biomedical image/video analysis, biological simulation, geometric modeling and visualization

Matthew Burlick, PhD *(Stevens Institute of Technology).* Assistant Teaching Professor. Image processing, machine learning, real-time video tracking, object detection and classification, statistics/probability, and acoustics

Yuanfang Cai, PhD *(University of Virginia)*. Associate Professor. Formal software design modeling and analysis, software economics, software evolution and modularity.

Bruce W. Char, PhD *(University of California-Berkeley)*. Professor. Symbolic mathematical computation, algorithms and systems for computer algebra, problem-solving environments parallel and distributed computation.

Christopher Geib, PhD *(University of Edinburgh)*. Associate Professor. Decision making and reasoning under conditions of uncertainty, planning, scheduling, constraint, based reasoning, human computer and robot interaction, probabilistic reasoning, computer network security, large scale process control, user interfaces.

Colin Gordon, PhD *(University of Washington)*. Assistant Professor. Software reliability, program behavior, concurrent and systems-level code, formal assurance, programming models, distributed computing, even testing

Jeremy R. Johnson, PhD *(Ohio State University)*. Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Constantine Katsinis, PhD *(University of Rhode Island)*. Teaching Professor. High-performance computer networks, parallel computer architectures with sustained teraflops performance, computer security, image processing.

Geoffrey Mainland, PhD *(Harvard University)*. Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD *(University of Toronto) The Auerbach Berger Chair in Cybersecurity Distinguished Professor of Computer Science*. Professor. Software engineering; software security; code analysis; evolutionary computation.

Adelaida Alban Medlock, MS *(Drexel University)*. Associate Teaching Professor. Introductory programming; computer science education.

William Mongan, MS *(Drexel University) Associate Department Head for Undergraduate Affairs, Computer Science*. Associate Teaching Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach

Ko Nishino, PhD *(University of Tokyo) Associate Department Head for Graduate Affairs, Computer Science*. Professor. Computer vision, computer graphics, analysis and synthesis of visual appearance.

Krzysztof Nowak, PhD *(Washington University)*. Associate Teaching Professor. Fourier analysis, partial differential equations, image processing, wavelets, asymptotic distribution of eigenvalues, numerical methods and algorithms, computer science education.

Santiago Ontañón, PhD *(University of Barcelona)*. Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning

Jeffrey L. Popyack, PhD *(University of Virginia)*. Professor. Operations research, stochastic optimization, computational methods of Markov decision processes; artificial intelligence, computer science education.

Jeffrey Salvage, MS *(Drexel University)*. Teaching Professor. Object-oriented programming, multi-agent systems, software engineering, database theory, introductory programming, data structures.

Dario Salvucci, PhD *(Carnegie Mellon University) Department Head, Computer Science*. Professor. Human computer interaction, cognitive science, machine learning, applications for driving.

Kurt Schmidt, MS *(Drexel University)*. Associate Teaching Professor. Data structures, math foundations for computer science, programming tools, programming languages.

Ali Shokoufandeh, PhD *(Rutgers University) Senior Associate Dean of Research*. Professor. Theory of algorithms, graph theory, combinational optimization, computer vision.

Erin Solovey, PhD *(Tufts University)*. Assistant Professor. Human-computer interaction, brain-computer interfaces, tangible interaction, machine learning, human interaction with complex and autonomous systems.

Julia Stoyanovich, PhD *(Columbia University)*. Assistant Professor. Data and knowledge management, big data, biological data management, search and ranking.

Brian Stuart, PhD *(Purdue University)*. Associate Teaching Professor. Machine learning, networking, robotics, image processing, simulation, interpreters, data storage, operating systems, computer science, data communications, distributed/operating systems, accelerated computer programming, computer graphics.

Filippos Vokolos, PhD *(Polytechnic University)*. Assistant Teaching Professor. System architecture, principles of software design and construction, verification and validation methods for the development of large software systems, foundations of software engineering, software verification & validation, software design, programming languages, dependable software systems.

Emeritus Faculty

Valerie Ann Yonker, PhD *(Drexel University)*. Associate Teaching Professor Emerita. Human service information systems, systems analysis and design, measurement in software evaluation, knowledge engineering.

Computer Science

Computer Security Concentration

The Computer Science concentration in Computer Security is designed to supply graduates with the skills needed to prepare them for a wide range of opportunities. It gives students the ability to design and implement computing security and privacy processes, software and systems. Students use mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of such systems.

Computer security specialists are needed who can work within cyberspace to help secure, defend against, respond to, and in some instance, even initiate preemptive attacks. These individuals must have detailed knowledge of the systems they protect, an understanding of the cyber-environment and physical environment in which they operate, and an understanding of the ethical expectations and legal surroundings of their field.

Additional Information

For more information about this concentration, visit the College of Computing & Informatics (https://drexel.edu/cci/academics/undergraduate-programs/bsba-computer-science/)' web site.

Computer Security Concentration Program Requirements

Students in the Computer Security Concentration should follow the below concentration requirements in addition to the core degree requirements for the BS in Computer Science program (p. 172). For any questions regarding your plan of study, please contact your Undergraduate Advisor (https://drexel.edu/cci/current-students/undergraduate/advising/).

The concentration in Computer Security follows the requirements of the B.S. in Computer Science (p. 172) except as noted below.

Computer Science Requirements		67.0
The following courses must be taken as the 6 CS track courses and the CS electives:		
CS 303	Algorithmic Number Theory and Cryptography	
CS 361	Concurrent Programming	
CS 370	Operating Systems	
CS 377	Software Security	
CS 467	Security and Human Behavior	
CS 472	Computer Networks: Theory, Applications and Programming	
CS 475	Computer and Network Security	
INFO 310	Human-Centered Design Process & Methods	
Computing & Informatics Requirements		15.0
Mathematics Requirements		27.0
Science Requirements		19.0
Arts & Humanities Requirements		36.0
The following course must be taken as the Social Studies elective:		
PSY 101	General Psychology I	
The following course must be taken as the Business elective:		
ECON 201	Principles of Microeconomics	
University Requirements		3.0
Free Electives		19.5
Total Credits		186.5

Computer Security Concentration Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Term 1		Credits
CI 101	Computing and Informatics Design I	2.0
CS 164	Introduction to Computer Science	3.0
MATH 121	Calculus I	4.0
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
UNIV 101	The Drexel Experience	1.0
Science lab		4.5
	Term Credits	17.5
Term 2		
CI 102	Computing and Informatics Design II	2.0
CS 171 or 175	Computer Programming I Advanced Computer Programming I	3.0
MATH 122	Calculus II	4.0

ENGL 102 or 112	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing English Composition II	3.0
CIVC 101	Introduction to Civic Engagement	1.0
COOP 101	Career Management and Professional Development	0.0
Science lab		4.5
	Term Credits	17.5
Term 3		
CI 103	Computing and Informatics Design III	2.0
CS 172 or 176	Computer Programming II Advanced Computer Programming II	3.0
MATH 123	Calculus III	4.0
ENGL 103 or 113	Composition and Rhetoric III: Themes and Genres English Composition III	3.0
UNIV 101	The Drexel Experience	1.0
Science lab		4.5
	Term Credits	17.5
Term 4		
CS 265	Advanced Programming Tools and Techniques	3.0
CS 270	Mathematical Foundations of Computer Science	3.0
PSY 101	General Psychology I	3.0
MATH 200	Multivariate Calculus	4.0
SE 181	Introduction to Software Engineering and Development	3.0
	Term Credits	16.0
Term 5		
CS 260	Data Structures	3.0
MATH 221	Discrete Mathematics	3.0
ECON 201	Principles of Microeconomics	4.0
Free elective		6.0
	Term Credits	16.0
Term 6		
COM 230	Techniques of Speaking	3.0
CS 277	Algorithms and Analysis	3.0
CS 281	Systems Architecture	4.0
MATH 201	Linear Algebra	4.0
SE 310	Software Architecture I	3.0
	Term Credits	17.0
Term 7		
CS 283	Systems Programming	3.0
CS 360	Programming Language Concepts	3.0
Free Elective		6.0
Science elective		4.0
	Term Credits	16.0
Term 8		
CS 303	Algorithmic Number Theory and Cryptography	3.0
CS 361	Concurrent Programming	3.0
INFO 310	Human-Centered Design Process & Methods	3.0
MATH 311	Probability and Statistics I	4.0
PHIL 311	Ethics and Information Technology	3.0
	Term Credits	16.0
Term 9		
CS 370	Operating Systems	3.0
Arts & Humanities elective		3.0
Writing & Communications Elective		3.0
Free Elective		4.0
	Term Credits	13.0
Term 10		
CI 491 [WI]	Senior Project I	3.0
CS 467	Security and Human Behavior	3.0
CS 472	Computer Networks: Theory, Applications and Programming	3.0
Writing & Communications elective		3.0

Arts & Humanities elective		3.0
	Term Credits	15.0
Term 11		
CI 492 [WI]	Senior Project II	3.0
CS 475	Computer and Network Security	3.0
Arts & Humanities elective		3.0
Free Elective		4.0
	Term Credits	13.0
Term 12		
CI 493 [WI]	Senior Project III	3.0
CS 377	Software Security	3.0
Science Elective		3.0
Arts & Humanities Elective		3.0
	Term Credits	12.0

Total Credit: 186.5

Computer Science

Game Programming and Development Concentration

The concentration in game programming and development provides conceptual understanding of game design and practical experience in the design and the development of games. The courses in this concentration include fundamentals of game design and development, large-scale game development, and special topics in educational and experimental game design.

Additional Information

For more information about this concentration, visit the College of Computing & Informatics (https://drexel.edu/cci/academics/undergraduate-programs/bsba-computer-science/)' web site.

Degree Requirements

Students in the Game Programming and Development Concentration should follow the below concentration requirements in addition to the core degree requirements for the B.S. in Computer Science (p. 172).

The Game Programming and Development concentration follows the requirements of the B.S. in Computer Science (p. 172) except as noted below. For any questions regarding your plan of study, please contact your Undergraduate Advisor (https://drexel.edu/cci/current-students/undergraduate/advising/).

Computer Science Requirements		**64.0**
Select three of the following courses to fulfill the Game Development and Design track:		
CS 341	Serious Game Development	
or CS 342	Experimental Game Development	
CS 345	Computer Game Design and Development	
CS 387	Game AI Development	
CS 445	Topics in Computer Gaming	
Computing & Informatics Requirements		**15.0**
Mathematics Requirements		**27.0**
Science Requirements		**19.0**
The sequence below must be taken as the lab science sequence:		
PHYS 101	Fundamentals of Physics I	
& PHYS 102	and Fundamentals of Physics II	
& PHYS 201	and Fundamentals of Physics III	
Arts & Humanities Requirements		**36.0**
The following course must be taken as the Social Studies elective:		

PSY 101	General Psychology I	
The following courses must be taken as Arts & Humanities electives:		
ANIM 140	Computer Graphics Imagery I	
ANIM 211	Animation I	
GMAP 260	Overview of Computer Gaming	
VSST 110	Introductory Drawing	
University Requirements		**3.0**
Free Electives		**22.5**
The following courses must be taken as a free elective:		
GMAP 377	Game Development: Workshop I	
GMAP 378	Game Development: Workshop II	
Total Credits		186.5

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study (BS) - Game Programming and Development Concentration

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

5 YR 5 YR UG Co-op Concentration /Game Programming & Development

Term 1		Credits
CI 101	Computing and Informatics Design I	2.0
CS 164	Introduction to Computer Science	3.0
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0

	Term Credits	16.0
Term 12		
CI 493 [WI]	Senior Project III	3.0
Computer Science elective		3.0
Writing & Communications elective		3.0
Free elective		3.5
	Term Credits	12.5

Total Credit: 186.5

Computing and Security Technology

Major: Computing and Security Technology
Degree Awarded: Bachelor of Science in Computing & Security Technology (BSCST)
Calendar Type: Quarter
Total Credit Hours: 188.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) Code: 11.1003
Standard Occupational Classification (SOC) Code: 15-1122

Note: The on-campus CST major (Full Time only) admits new and transfer students Fall Quarter. The online CST major (Part Time only) admits transfer students Fall and Spring Quarters.

About the Program

The College of Computing & Informatics' Bachelor of Science in Computing & Security Technology (BSCST) prepares students for work related to the management and administration of large-scale computing infrastructure. Students gain experience with core information technology (IT) areas including servers, databases, networks, the Web, and information security and cybersecurity. The program emphasizes practical education and fundamental concepts that are supplemented by laboratory experience.

Core courses provide students with practical knowledge and skills related to proprietary and open source servers, network administration, software development, database administration, and IT security. Students take advanced electives and a concentration in either Computing Technology or Computing Security. The advanced courses include topics such as mobile applications, IT risk assessment, intrusion detection, security audits, and computer forensics.

The degrees in Computing & Security Technology, Data Science (p. 192), and Information Systems (p. 197) share a common first year. This allows students to easily switch among the degrees early in their studies. In addition, some of the electives in each degree are accessible to students in the other two majors; this provides a deeper and broader set of advanced topics for students in all three majors.

The BS in Computing & Security Technology is offered as a full-time, on-campus bachelor's degree program or as an online, part-time degree completion program for students who have completed approximately two years of college work.

For more information about this program, please visit the BS in Computing & Security Technology web page (https://drexel.edu/cci/academics/

undergraduate-programs/bs-computing-security/) on the College of Computing & Informatics' website.

Degree Requirements

Students completing this major must select either a concentration in computing technology or a concentration in computing security.

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Computing & Security Technology Core Requirements

CT 140	Network Administration I	3.0
CT 200	Server I	3.0
CT 201	Information Technology Security I	3.0
CT 210	Open Server I	3.0
CT 301	Information Technology Security II	3.0
CT 310	Open Server II	3.0
CT 320	Server II	3.0
CT 330	Network Administration II	3.0
Students completing this major must select either a concentration in Computing Technology or a concentration in Computing Security. see below		21.0

Information Science Requirements

INFO 101	Introduction to Computing and Security Technology	3.0
INFO 102	Introduction to Information Systems	3.0
INFO 103	Introduction to Data Science	3.0
INFO 200	Systems Analysis I	3.0
INFO 210	Database Management Systems	3.0
INFO 215	Social Aspects of Information Systems	3.0

Programming Requirements **9.0**

Choose one of the following sequences		
INFO 151 & CS 171 & CS 172	Web Systems and Services I and Computer Programming I and Computer Programming II	
INFO 151 & INFO 152 & INFO 153	Web Systems and Services I and Web Systems and Services II and Applied Data Management	

Computing & Informatics Requirements

CI 101	Computing and Informatics Design I	2.0
CI 102	Computing and Informatics Design II	2.0
CI 103	Computing and Informatics Design III	2.0
CT 491 [WI]	Senior Project I	3.0
CT 496 [WI]	Senior Project II	3.0
CCI elective *		6.0

Mathematics Requirements

Choose Mathematics Sequence		8.0
If a Math seqence of less than 8 credits is taken, additional 2 credits added to free electives		
MATH 171 & MATH 172	Introduction to Analysis A and Introduction to Analysis B	
MATH 101 & MATH 102	Introduction to Analysis I and Introduction to Analysis II	
MATH 121 & MATH 122	Calculus I and Calculus II	
MATH 180	Discrete Computational Structures	4.0
STAT 201	Introduction to Business Statistics	4.0

Natural Science Requirements ** **8.0**

Liberal Studies Requirements

ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
COM 230	Techniques of Speaking	3.0
Liberal Studies Electives ***		12.0

University Requirements

UNIV CI101	The Drexel Experience	2.0
or CI 120	CCI Transfer Student Seminar	
CIVC 101	Introduction to Civic Engagement	1.0
COOP 101	Career Management and Professional Development	0.0
Free Electives		**32.0**
Total Credits		188.0

*   One course must be a CCI 300 level or higher course.

**   Students select any non-required courses from the following: ANAT, BIO, CHEM, ENVS, FDSC, NFS, PHEV, PHYS, HSCI, GEO, ENSS.

*** Students select any non-required courses from the following: ANTH, COM, ENGL, HIST, PHIL, PSCI, PSY, SOC, WRIT, ECON, ENTP, ARTH, FMST, MUSC, TVST, VSST

Please note: **If a Computing & Security Technology student pursues a Business Administration Minor, MIS classes do not count towards the Business Administration Minor for Computing & Security Technology students. Students must choose another option to fulfill the Business Administration Minor requirements.**

Concentration in Computing Technology

Computing Technology Concentration Requirements

CT 335	Mobile Applications	3.0
CT 353	Virtual Environments and Cloud Security	3.0
CT 355	Wireless Network Security Technology	3.0
CT 415	Disaster Recovery and Continuity Planning	3.0
INFO 366	Database Administration II	3.0

Computing Technology Electives

Select two of the following:		6.0
CT 362	Network Auditing Tools	
CT 393	Information Technology Security Risk Assessment	
CT 412	Information Technology Security Policies	
INFO 215	Social Aspects of Information Systems	
Total Credits		21.0

Concentration in Computing Security

CI 101	Computing and Informatics Design I	2.0
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research / English Composition I	3.0
INFO 101	Introduction to Computing and Security Technology	3.0
INFO 151	Web Systems and Services I	3.0
MATH 171	Introduction to Analysis A	3.0
UNIV CI101	The Drexel Experience	1.0
	Term Credits	15.0
Term 2		
CI 102	Computing and Informatics Design II	2.0
CIVC 101	Introduction to Civic Engagement	1.0
CS 171	Computer Programming I	3.0
ENGL 102 or 112	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing / English Composition II	3.0

INFO 102	Introduction to Information Systems	3.0
MATH 172	Introduction to Analysis B	3.0
COOP 101	Career Management and Professional Development	0.0
	Term Credits	15.0
Term 3		
CI 103	Computing and Informatics Design III	2.0
ENGL 103 or 113	Composition and Rhetoric III: Themes and Genres English Composition III	3.0
INFO 103	Introduction to Data Science	3.0
INFO 153 or CS 172	Applied Data Management Computer Programming II	3.0
MATH 180	Discrete Computational Structures	4.0
UNIV CI101	The Drexel Experience	1.0
	Term Credits	16.0
Term 4		
CT 140	Network Administration I	3.0
CT 201	Information Technology Security I	3.0
INFO 200	Systems Analysis I	3.0
INFO 215	Social Aspects of Information Systems	3.0
Free Elective		3.0
	Term Credits	15.0
Term 5		
CT 301	Information Technology Security II	3.0
CT 330	Network Administration II	3.0
INFO 210	Database Management Systems	3.0
STAT 201	Introduction to Business Statistics	4.0
Free Electives		4.0
	Term Credits	17.0
Term 6		
CT 200	Server I	3.0
CT 210	Open Server I	3.0
CT 335	Mobile Applications	3.0
Liberal Studies Elective		3.0
Science Elective I		4.0
	Term Credits	16.0
Term 7		
CT 310	Open Server II	3.0
CT 320	Server II	3.0
INFO 355	Systems Analysis II	3.0
Free Elective		3.0
Science Elective II		4.0
	Term Credits	16.0
Term 8		
COM 230	Techniques of Speaking	3.0
INFO 310	Human-Centered Design Process & Methods	3.0
INFO 365	Database Administration I	3.0
Computing Technology Elective		3.0
Liberal Studies Elective		3.0
Free Elective		3.0
	Term Credits	18.0
Term 9		
INFO 324 [WI]	Team Process and Product	3.0
INFO 366	Database Administration II	3.0
INFO 420	Software Project Management	3.0
Free Electives		6.0
	Term Credits	15.0
Term 10		
CT 355	Wireless Network Security Technology	3.0
CCI Elective		6.0
Liberal Studies Elective		3.0
Free Elective		3.0
	Term Credits	15.0

Term 11		
CT 362	Network Auditing Tools	3.0
Computing Technology Elective		3.0
CT 491 [WI]	Senior Project I	3.0
Free Electives		6.0
	Term Credits	15.0
Term 12		
CT 415	Disaster Recovery and Continuity Planning	3.0
CT 496 [WI]	Senior Project II	3.0
Free Elective		6.0
Liberal Studies Elective		3.0
	Term Credits	15.0

Total Credit: 188.0

Accelerated Degrees

The College of Computing & Informatics offers several Accelerated Degree programs designed to allow students to complete both a bachelor's and a graduate degree along with cooperative educational experience in fewer years than would be typical if pursuing the degrees separately. Students accepted in this program can combine any of the College bachelor's and master's degree programs as well as other options:

- Any CCI BS/any CCI MS Accelerated Degree (BS & MS in five years, including 2 Co-ops)
- Any CCI BS/MBA Accelerated Degree (BS/MBA)
- Any CCI BS/JD Accelerated Degree (BS/JD)

For more information on the criteria for entering this program visit the BS/MS Accelerated Degree (http://drexel.edu/undergrad/academics/accelerated-degrees/) page on Drexel's website.

For more information on how to apply for the BS/MS Accelerated Degree program, please visit the College of Computing & Informatics' website (https://drexel.edu/cci/admissions/undergraduate/admissions-requirements/cci-bsms-degree-admissions/).

Co-Op/Career Opportunities
Co-Op Options

Three co-op options are available for this program:

- 5-year/3 co-op
- 4-year/1 co-op
- Accelerated Degree: 5-year/2 co-op

Co-op is not available for online students.

Career Opportunities

Graduates of the Computing and Security Technology program who complete a concentration in Computing Technology can pursue careers as information technologists and advanced technicians in a wide range of industries. Information technologists are capable of performing multiple IT tasks and accessing various information resources. The program gives students a unique set of applied skills that allow them to fill a number of roles as part of the information systems team. Graduates with a concentration in Computing Security pursue careers as advanced technicians who operate and administer the security tools, technologists who create and install security solutions, and leaders who define the security policies.

Job titles of recent computing and security technology graduates include:

- Security Administrator
- Chief Information Security Officer
- IT Audit Manager
- Project Manager
- Lead Systems Engineer
- Network Engineer
- Server Engineer

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more information on career opportunities.

Facilities

3675 Market Street

In March 2019, the College of Computing & Informatics relocated to 3675 Market (https://drexel.edu/cci/about/our-facilities/). For the first time in the College's history, all CCI faculty, students and professional staff are housed under one roof. Occupying two floors in the brand new uCity Square building, CCI's new home offers state-of-the-art technology in our classrooms, labs, meeting areas and collaboration spaces. 3675 Market offers Class A laboratory, office, coworking, and convening spaces. In fall 2019, the College will open a third floor which will include additional offices, classrooms, a research lab, a maker space, and a ground-breaking DXC Technology Innovation Lab. Located at the intersection of Market Street and 37th Street, 3675 Market will act as a physical nexus, bridging academic campuses and medical centers to the east and south, the commercial corridors along Market Street and Chestnut Street, and the residential communities to the north and west.

The uCity Square building offers:

- Speculative lab/office space
- World-class facilities operated by CIC (https://cic.us/philadelphia/)
- Café/restaurant on-site
- Quorum, a two-story, 15K SF convening space and conference center
- Adjacent to future public square
- Access to Science Center's nationally renowned business acceleration and technology commercialization programs

Drexel University Libraries

Drexel University Libraries (http://www.library.drexel.edu/) is a learning enterprise, advancing the University's academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through three physical locations, including W. W. Hagerty Library, Queen Lane Library, and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at library.drexel.edu (http://www.library.drexel.edu/) or in-person at W. W. Hagerty Library (http://www.library.drexel.edu/locations/).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

CCI Commons

Located on the 10th floor of 3675 Market Street, the CCI Commons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, and more collaborative space for its students. Students have access to 3675 Market's fully equipped conference room with 42" displays and videoconferencing capabilities. The CCI Commons provides technical support to students, faculty, and professional staff. In addition, the staff provides audio-visual support for all presentation classrooms within 3675 Market. Use of the CCI Commons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the CCI Commons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the CCI Commons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as "DreamSpark" that allows students free access to a wide array of Microsoft software titles and operating systems.

The CCI Commons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University's network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

CCI Learning Center

The CCI Learning Center (CCILC), located in 3675 Market Street's CCI Commons student computer lab, provides consulting and other learning resources for students taking computer science classes. The CCILC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

The CCILC and CCI Commons serve as a central hub for small group work, student meetings, and TA assistance.

Research Laboratories

The College houses multiple research labs, led by CCI faculty, in 3675 Market Street including: the Drexel Health and Risk Communication Lab, Interactive Systems for Healthcare, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), High Performance Computing Laboratory (SPIRAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Social Computing Research Group, Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College's research web page (http://cci.drexel.edu/research.aspx).

Evaluations

The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the Computing & Security Technology degree is evaluated relative to the following Objectives and Outcomes.

BS Computing & Security Technology Program Educational Objectives

Within three to five years of graduating, alumni of the program are expected to achieve one or more of the
following milestones:

- Be valued contributors to private or public organizations as demonstrated by promotions, increased responsibility, or other professional recognition
- Contribute to professional knowledge as demonstrated by published papers, technical reports, patents, or conference presentations
- Succeed in continuing professional development as demonstrated by completion of graduate studies or professional certifications
- Display commitment and leadership within the profession and community as demonstrated by contributions towards society's greater good and prosperity

BS Computing & Security Technology Program Student Outcomes

The program enables students to attain, by the time of graduation:

- An ability to apply knowledge of computing and mathematics appropriate to the program's student outcomes and to the discipline
- An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution
- An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs
- An ability to function effectively on teams to accomplish a common goal
- An understanding of professional, ethical, legal, security and social issues and responsibilities
- An ability to communicate effectively with a range of audiences
- An ability to analyze the local and global impact of computing on individuals, organizations, and society
- Recognition of the need for and an ability to engage in continuing professional development
- An ability to use current techniques, skills, and tools necessary for computing practice

Computing & Informatics Faculty

Denise E. Agosto, PhD *(Rutgers, The State University of New Jersey)*. Professor. Youth information behaviors, public libraries, multicultural issues in youth library services, and qualitative research methods.

Yuan An, PhD *(University of Toronto, Canada) Director of International Programs*. Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

David Augenblick, MS *(University of Pennsylvania)*. Associate Teaching Professor. Introductory and object-oriented programming, data structures and database systems, computer application project management,

application of computer programming principles and solutions to engineering problems.

Marcello Balduccini, PhD *(Texas Tech University) Senior Research Scientist, Applied Informatics Group*. Associate Research Professor. Logic programming, declarative programming, answer set programming, knowledge representation, various types of reasoning

Ellen Bass, PhD *(Georgia Institute of Technology) Joint Appointment with the College of Nursing and Health Professions*. Professor. Characterizing human judgement and decision making, modeling human judgement when supported by information automation, computational models of human-human and human-automation coordination.

Mark Boady, PhD *(Drexel University)*. Assistant Teaching Professor. Computer Algebra, complex symbolic calculations, automation of computation problems

David E. Breen, PhD *(Rensselaer Polytechnic Institute)*. Associate Professor. Self-organization, biomedical image/video analysis, biological simulation, geometric modeling and visualization

Matthew Burlick, PhD *(Stevens Institute of Technology)*. Assistant Teaching Professor. Image processing, machine learning, real-time video tracking, object detection and classification, statistics/probability, and acoustics

Yuanfang Cai, PhD *(University of Virginia)*. Associate Professor. Formal software design modeling and analysis, software economics, software evolution and modularity.

Christopher Carroll, MS *(Drexel University) BSCST Program Director*. Associate Teaching Professor. Information technology within healthcare companies, computer networking and design, IT infrastructure, server technology, information security, virtualization and cloud computing.

Bruce W. Char, PhD *(University of California-Berkeley)*. Professor. Symbolic mathematical computation, algorithms and systems for computer algebra, problem-solving environments parallel and distributed computation.

Chaomei Chen, PhD *(University of Liverpool)*. Professor. Information visualization, visual analytics, knowledge domain visualization, network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Catherine D. Collins, MLIS *(Indiana University)*. Associate Teaching Professor. Knowledge management, collection development, management of information organizations, information sources and services, international development.

M. Carl Drott, PhD *(University of Michigan)*. Associate Professor. Systems analysis techniques, web usage, competitive intelligence.

Andrea Forte, PhD *(Georgia Institute of Technology) PhD Program Director, and MS in Information Program Director*. Associate Professor. Social computing, human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, information literacy.

Susan Gasson, PhD *(University of Warwick)*. Associate Professor. The co-design of business and IT-systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Christopher Geib, PhD *(University of Edinburgh)*. Associate Professor. Decision making and reasoning under conditions of uncertainty, planning, scheduling, constraint, based reasoning, human computer and robot interaction, probabilistic reasoning, computer network security, large scale process control, user interfaces.

Colin Gordon, PhD *(University of Washington)*. Assistant Professor. Software reliability, program behavior, concurrent and systems-level code, formal assurance, programming models, distributed computing, even testing

Jane Greenberg, PhD *(University of Pittsburgh) Alice B. Kroeger Professor*. Metadata, ontological engineering, data science, knowledge organization, information retrieval

Peter Grillo, PhD *(Temple University) Associate Department Head for Undergraduate Affairs, Information Science*. Teaching Professor. Strategic applications of technology within organizations.

Jeremy R. Johnson, PhD *(Ohio State University)*. Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Xia Lin, PhD *(University of Maryland) Department Head, Information Science*. Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Geoffrey Mainland, PhD *(Harvard University)*. Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD *(University of Toronto) The Auerbach Berger Chair in Cybersecurity Distinguished Professor of Computer Science*. Professor. Software engineering; software security; code analysis; evolutionary computation.

Gabriela Marcu, PhD *(Carnegie Mellon University)*. Assistant Teaching Professor. Human-computer interaction, health informatics, action research, ethnography, user experience design, designing for social change, organizational information systems, ubiquitous computing, knowledge management.

Adelaida Alban Medlock, MS *(Drexel University)*. Associate Teaching Professor. Introductory programming; computer science education.

William Mongan, MS *(Drexel University) Associate Department Head for Undergraduate Affairs, Computer Science*. Associate Teaching Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach

Ko Nishino, PhD *(University of Tokyo) Associate Department Head for Graduate Affairs, Computer Science*. Professor. Computer vision, computer graphics, analysis and synthesis of visual appearance.

Danuta A. Nitecki, PhD *(University of Maryland at College Park) Dean of Libraries.* Professor. Library metrics and use in management, library as place, and academic library service models.

Krzysztof Nowak, PhD *(Washington University)*. Associate Teaching Professor. Fourier analysis, partial differential equations, image processing, wavelets, asymptotic distribution of eigenvalues, numerical methods and algorithms, computer science education.

Santiago Ontañón, PhD *(University of Barcelona)*. Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning

Jung-ran Park, PhD *(University of Hawaii at Manoa)*. Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Alex Poole, PhD *(University of North Carolina)*. Assistant Professor. Digital curation, archives and records management, digital humanities, and diversity, inclusivity, and equity.

Jeffrey L. Popyack, PhD *(University of Virginia)*. Professor. Operations research, stochastic optimization, computational methods of Markov decision processes; artificial intelligence, computer science education.

Lori Richards, PhD *(University of North Carolina)*. Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Michelle L. Rogers, PhD *(University of Wisconsin-Madison)*. Associate Professor. Human-computer interaction, healthcare informatics, human factors engineering, socio-technical systems, health services research, patient safety.

Jeffrey Salvage, MS *(Drexel University)*. Teaching Professor. Object-oriented programming, multi-agent systems, software engineering, database theory, introductory programming, data structures.

Dario Salvucci, PhD *(Carnegie Mellon University) Department Head, Computer Science*. Professor. Human computer interaction, cognitive science, machine learning, applications for driving.

Kurt Schmidt, MS *(Drexel University)*. Associate Teaching Professor. Data structures, math foundations for computer science, programming tools, programming languages.

Ali Shokoufandeh, PhD *(Rutgers University) Senior Associate Dean of Research*. Professor. Theory of algorithms, graph theory, combinational optimization, computer vision.

Erin Solovey, PhD *(Tufts University)*. Assistant Professor. Human-computer interaction, brain-computer interfaces, tangible interaction, machine learning, human interaction with complex and autonomous systems.

Il-Yeol Song, PhD *(Louisiana State University)*. Professor. Conceptual modeling, ontology and patterns, data warehouse and OLAP, object-oriented analysis and design with UML, medical and bioinformatics data modeling & integration,.

Julia Stoyanovich, PhD *(Columbia University)*. Assistant Professor. Data and knowledge management, big data, biological data management, search and ranking.

Brian Stuart, PhD *(Purdue University)*. Associate Teaching Professor. Machine learning, networking, robotics, image processing, simulation, interpreters, data storage, operating systems, computer science, data communications, distributed/operating systems, accelerated computer programming, computer graphics.

Filippos Vokolos, PhD *(Polytechnic University)*. Assistant Teaching Professor. System architecture, principles of software design and construction, verification and validation methods for the development of

large software systems, foundations of software engineering, software verification & validation, software design, programming languages, dependable software systems.

Rosina Weber, PhD *(Federal University of Santa Catarina)*. Associate Professor. Case-based reasoning, explainable artificial intelligence, machine learning, textual analytics, natural language understanding, language models, recommender systems, technological aspects of knowledge management, project management, and requirements engineering.

Erija Yan, PhD *(Indiana University)*. Assistant Professor. Network Science, information analysis and retrieval, scholarly communication methods and applications.

Emeritus Faculty

Michael E. Atwood, PhD *(University of Colorado)*. Professor Emeritus. Human-computer interaction, computer-supported cooperative work, organizational memory.

Thomas A. Childers, PhD *(Rutgers University)*. Professor Emeritus. Measurement, evaluation, and planning of information and library services, the effectiveness of information organizations.

David E. Fenske, PhD *(University of Wisconsin-Madison)*. Dean Emeritus and Professor. Digital libraries, informatics, knowledge management and information technologies.

John B. Hall, PhD *(Florida State University)*. Professor Emeritus. Academic library service, library administration, organization of materials.

Katherine W. McCain, PhD *(Drexel University)*. Professor Emeritus. Scholarly communication, information production and use in the research process, development and structure of scientific specialties, diffusion of innovation, bibliometrics, evaluation of information retrieval systems.

Carol Hansen Montgomery, PhD *(Drexel University) Dean of Libraries Emeritus*. Research Professor. Selection and use of electronic collections, evaluation of library and information systems, digital libraries, economics of libraries and digital collections.

Delia Neuman, PhD *(The Ohio State University)*. Professor Emerita. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Gerry Stahl, PhD *(University of Colorado)*. Professor Emeritus. Human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, theory of collaboration.

Howard D. White, PhD *(University of California at Berkeley)*. Professor Emeritus. Literature information systems, bibliometrics, research methods, collection development, online searching.

Susan Wiedenbeck, PhD *(University of Pittsburgh)*. Professor Emeritus. Human-computer interaction, end-user programming/end-user development, empirical studies of programmers, interface design and evaluation.

Data Science

Major: Data Science
Degree Awarded: Bachelor of Science in Data Science (BSDS)
Calendar Type: Quarter
Total Credit Hours: 187.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 11.0401; 11.0501; 11.0802
Standard Occupational Classification (SOC) code: *15-1121; 15-1141*

About the Program

The Bachelor of Science in Data Science (BSDS) prepares students to meet the challenges presented by the explosive growth of very large scale and complex data sources. The availability of data from sources such as business activities, social media and scientific instruments constantly creates new problems requiring data-driven solutions and opportunities and problems for innovation. BS in Data Science students develop the knowledge and skill to address these opportunities for the benefit of individuals and organizations. Students in the degree complete a minor, typically in business or the sciences, to provide knowledge and skill in a specific subject area to which data science techniques can be applied.

Data Science students learn to:

- Define domain specific and context-relevant data analytics questions and hypotheses for individuals and organizations.
- Select relevant data sources and transform data suitable for solving data analytics problems.
- Identify appropriate techniques and tools for acquiring, retrieving, analyzing, and making use of the data.
- Apply data analytics techniques and skills to build analytical and predictive models for answering data science questions.
- Create visualizations and communicate data analytics results to stakeholders and decision makers.
- Assess the necessary skills arising from the interdisciplinary nature of data science as a combination of hacking skills, analytical techniques, and domain knowledge.

The degrees in Computing and Security Technology (p. 185), Data Science, and Information Systems (p. 197) share a common first year. This allows students to easily switch among the degrees early in their studies. In addition, some of the electives in each degree are accessible to students in the other two majors; this provides a deeper and broader set of advanced topics for students in all three majors.

Additional Information

For more information about this program, please visit the BS in Data Science web page (https://drexel.edu/cci/academics/undergraduate-programs/bs-datascience/) on the College of Computing & Informatics' website.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Data Science Requirements

INFO 101	Introduction to Computing and Security Technology	3.0
INFO 102	Introduction to Information Systems	3.0
INFO 103	Introduction to Data Science	3.0
INFO 200	Systems Analysis I	3.0
INFO 202	Data Curation	3.0
INFO 210	Database Management Systems	3.0
or CS 461	Database Systems	

INFO 212	Data Science Programming I	3.0
INFO 213	Data Science Programming II	3.0
INFO 215	Social Aspects of Information Systems	3.0
INFO 250	Information Visualization	3.0
INFO 300	Information Retrieval Systems	3.0
INFO 323	Cloud Computing and Big Data	3.0
INFO 332	Exploratory Data Analytics	3.0
INFO 371	Data Mining Applications	3.0
INFO 432	Advanced Data Analytics	3.0
INFO 440	Social Media Data Analysis	3.0
INFO 442	Data Science Projects	3.0
CCI Electives		**6.0**
Select 2 CCI courses that are at 200 or above level and not otherwise required		
Data Science Electives		**6.0**
Select 2 of the following courses:		
CS 375	Web and Mobile App Development	
CS 380	Artificial Intelligence	
CS 383	Machine Learning	
INFO 315	Advanced Database Management Systems	
INFO 350	Visual Analytics	
INFO 355	Systems Analysis II	
INFO 420	Software Project Management	
Computing and Informatics Requirements		
CI 101	Computing and Informatics Design I	2.0
CI 102	Computing and Informatics Design II	2.0
CI 103	Computing and Informatics Design III	2.0
CI 491 [WI]	Senior Project I	3.0
CI 492 [WI]	Senior Project II	3.0
CI 493 [WI]	Senior Project III	3.0

INFO 151	Web Systems and Services I	3.0
CS 171	Computer Programming I	3.0
CS 172	Computer Programming II	3.0
Mathematics Requirements		
Select one of the following sequences:		12.0
MATH 101 & MATH 102 & MATH 180	Introduction to Analysis I and Introduction to Analysis II and Discrete Computational Structures	
MATH 121 & MATH 122 & MATH 180	Calculus I and Calculus II and Discrete Computational Structures	
Statistics Requirements		
STAT 201	Introduction to Business Statistics	4.0
STAT 202	Business Statistics II	4.0
Natural Science Requirements		
Science electives: Select from ANAT, BIO, CHEM, ENVS, FDSC, NFS, PHEV, PHYS. Courses from other departments may be considered with advisor approval.		8.0
Behavioral and Social Science Requirements		
PSY 101	General Psychology I	3.0
PSY 330	Cognitive Psychology	3.0
Arts and Humanities Requirements		
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
COM 230	Techniques of Speaking	3.0
or COM 310	Technical Communication	
University and College Requirements		
UNIV CI101	The Drexel Experience	2.0
or CI 120	CCI Transfer Student Seminar	

CIVC 101	Introduction to Civic Engagement	1.0
COOP 101	Career Management and Professional Development	0.0
Minor Requirements [*]		**24.0**
Choose a minor in a data science application area including business and natural science		
Free Electives		**27.0**
Total Credits		187.0

[*] Students should consult their academic advisor regarding a minor that requires more than 24.0 credits. *Please note:* If a Business Administration Minor is selected, MIS classes do not count towards the Business Administration Minor for Data Science students. Students must choose another option to fulfill the Business Administration Minor requirements.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Term 1		Credits
CI 101	Computing and Informatics Design I	2.0
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
INFO 101	Introduction to Computing and Security Technology	3.0

Accelerated Degrees

The College of Computing & Informatics offers several Accelerated Degree programs designed to allow students to complete both a bachelor's degree and a graduate degree along with cooperative educational experience in fewer years than would be typical if pursuing the degrees separately. Students accepted in this program can combine any of the College bachelor's and master's degree programs as well as other options.

- Any CCI BS/any CCI MS Accelerated Degree (BS & MS in five years, including 2 Co-ops)
- Any CCI BS/MBA Accelerated Degree (BS/MBA)
- Any CCI BS/JD Accelerated Degree (BS/JD)

For more information on the criteria for entering this program, visit the BS/MS Accelerated Degree (http://drexel.edu/undergrad/academics/accelerated-degrees/) page on Drexel's website.

For more information on how to apply for the BS/MS Accelerated Degree program, please visit the College of Computing & Informatics' website (https://drexel.edu/cci/admissions/undergraduate/admissions-requirements/cci-bsms-degree-admissions/).

Co-op/Career Opportunities

Co-Op Options

Three co-op options are available for this program:

- 5-year/3 co-op
- 4-year/1 co-op
- Accelerated Degree (BS & MS): 5-year/2 co-op

Career Opportunities

The new data science major provides valuable skills that can be transported to a number of job settings. The demand for graduates with data science knowledge is strong, and employers often want evidence of additional communication and problem-solving skills that can be applicable to specific disciplines. Data science program graduates could potentially serve as key members of organizational data science teams able to create novel information products, with an emphasis on solving problems that can only be addressed using large and disparate data sources. The program is also an excellent preparation for graduate study in data science.

Sample job titles for data science graduates include:

- Data Scientist
- Business Intelligence Officer

- Information Architect
- Usability Analyst

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities.

3675 Market Street

In March 2019, the College of Computing & Informatics relocated to 3675 Market (https://drexel.edu/cci/about/our-facilities/). For the first time in the College's history, all CCI faculty, students and professional staff are housed under one roof. Occupying two floors in the brand new uCity Square building, CCI's new home offers state-of-the-art technology in our classrooms, labs, meeting areas and collaboration spaces. 3675 Market offers Class A laboratory, office, coworking, and convening spaces. In fall 2019, the College will open a third floor which will include additional offices, classrooms, a research lab, a maker space, and a ground-breaking DXC Technology Innovation Lab. Located at the intersection of Market Street and 37th Street, 3675 Market will act as a physical nexus, bridging academic campuses and medical centers to the east and south, the commercial corridors along Market Street and Chestnut Street, and the residential communities to the north and west.

The uCity Square building offers:

- Speculative lab/office space
- World-class facilities operated by CIC (https://cic.us/philadelphia/)
- Café/restaurant on-site
- Quorum, a two-story, 15K SF convening space and conference center
- Adjacent to future public square
- Access to Science Center's nationally renowned business acceleration and technology commercialization programs

Drexel University Libraries

Drexel University Libraries (http://www.library.drexel.edu/) is a learning enterprise, advancing the University's academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through three physical locations, including W. W. Hagerty Library, Queen Lane Library, and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at library.drexel.edu (http://www.library.drexel.edu/) or in-person at W. W. Hagerty Library (http://www.library.drexel.edu/locations/).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

CCI Commons

Located on the 10th floor of 3675 Market Street, the CCI Commons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, and more collaborative space for its students. Students have access to 3675 Market's fully equipped conference room with 42" displays and videoconferencing capabilities. The CCI Commons provides technical support to students, faculty, and professional staff. In addition, the staff provides audio-visual support for all presentation classrooms within 3675 Market. Use of the CCI Commons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the CCI Commons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the CCI Commons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as "DreamSpark" that allows students free access to a wide array of Microsoft software titles and operating systems.

The CCI Commons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University's network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

CCI Learning Center

The CCI Learning Center (CCILC), located in 3675 Market Street's CCI Commons student computer lab, provides consulting and other learning resources for students taking computer science classes. The CCILC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

The CCILC and CCI Commons serve as a central hub for small group work, student meetings, and TA assistance.

Research Laboratories

The College houses multiple research labs, led by CCI faculty, in 3675 Market Street including: the Drexel Health and Risk Communication Lab, Interactive Systems for Healthcare, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), High Performance Computing Laboratory (SPIRAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Social Computing Research Group, Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College's research web page (http://cci.drexel.edu/research.aspx).

Evaluations

The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the Data Science degree is evaluated relative to the following Objectives and Outcomes.

BS Data Science Program Educational Objectives

Within three to five years of graduation, alumni of the program are expected to achieve one or more of the following milestones:

- Be valued contributors to private or public organizations as demonstrated by promotions, increased responsibility, or other professional recognition
- Contribute to professional knowledge as demonstrated by published papers, technical reports, patents, or conference presentations
- Succeed in continuing professional development as demonstrated by completion of graduate studies or professional certifications
- Display commitment and leadership within the professional and community as demonstrated by contributions towards society's greater good and prosperity.

BS Data Science Program Student Outcomes

The program enables students to attain, by the time of graduation

- An ability to apply knowledge of computing and mathematics appropriate to the discipline
- An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution
- An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs
- An ability to function effectively on teams to accomplish a common goal
- An understanding of professional, ethical, legal, security and social issues
- An ability to communicate effectively with a range of audiences
- An ability to analyze the local and global impact of computing on individuals, organizations, and society
- Recognition of the need for and an ability to engage in continuing professional development
- An ability to use current techniques, skills, and tools necessary for computing practice

Information Science Faculty

Denise E. Agosto, PhD *(Rutgers, The State University of New Jersey)*. Professor. Youth information behaviors, public libraries, multicultural issues in youth library services, and qualitative research methods.

Yuan An, PhD *(University of Toronto, Canada) Director of International Programs*. Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

Ellen Bass, PhD *(Georgia Institute of Technology) Joint Appointment with the College of Nursing and Health Professions*. Professor. Characterizing human judgement and decision making, modeling human judgement when supported by information automation, computational models of human-human and human-automation coordination.

Christopher Carroll, MS *(Drexel University) BSCST Program Director*. Associate Teaching Professor. Information technology within healthcare companies, computer networking and design, IT infrastructure, server technology, information security, virtualization and cloud computing.

Chaomei Chen, PhD *(University of Liverpool)*. Professor. Information visualization, visual analytics, knowledge domain visualization, network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Michael Chu, MSE *(University of Pennsylvania)*. Associate Teaching Professor. System, server, computer networking and design; IT infrastructure; information technology management and security; Web system programming; database and mobile application development.

Catherine D. Collins, MLIS *(Indiana University)*. Associate Teaching Professor. Knowledge management, collection development, management of information organizations, information sources and services, international development.

M. Carl Drott, PhD *(University of Michigan)*. Associate Professor. Systems analysis techniques, web usage, competitive intelligence.

Andrea Forte, PhD *(Georgia Institute of Technology) PhD Program Director, and MS in Information Program Director*. Associate Professor. Social computing, human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, information literacy.

Susan Gasson, PhD *(University of Warwick)*. Associate Professor. The co-design of business and IT-systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Tim Gorichanaz, PhD *(Drexel University)*. Assistant Teaching Professor. Human information behavior, human-centered computing, neo-documentation studies, and information ethics.

Jane Greenberg, PhD *(University of Pittsburgh) Alice B. Kroeger Professor*. Metadata, ontological engineering, data science, knowledge organization, information retrieval

Peter Grillo, PhD *(Temple University) Associate Department Head for Undergraduate Affairs, Information Science*. Teaching Professor. Strategic applications of technology within organizations.

Thomas Heverin, PhD *(Drexel University)*. Associate Teaching Professor. Computer security, ethical hacking, computer forensics, network forensics, cloud security and cybersecurity.

Gregory W. Hislop, PhD *(Drexel University)*. Professor. Information technology for teaching and learning, online education, structure and organization of the information disciplines, computing education research, software evaluation and characterization.

Xiaohua Tony Hu, PhD *(University of Regina, Canada)*. Professor. Data mining, text mining, Web searching and mining, information retrieval, bioinformatics and healthcare informatics.

Weimao Ke, PhD *(University of North Carolina at Chapel Hill)*. Associate Professor. Information retrieval (IR), distributed systems, intelligent filtering/recommendation, information visualization, network science, complex systems, machine learning, text/data mining, multi-agent systems, the notion of information.

Xia Lin, PhD *(University of Maryland) Department Head, Information Science*. Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Danuta A. Nitecki, PhD *(University of Maryland at College Park) Dean of Libraries.* Professor. Library metrics and use in management, library as place, and academic library service models.

Jung-ran Park, PhD *(University of Hawaii at Manoa).* Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Alex Poole, PhD *(University of North Carolina).* Assistant Professor. Digital curation, archives and records management, digital humanities, and diversity, inclusivity, and equity.

Lori Richards, PhD *(University of North Carolina).* Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Michelle L. Rogers, PhD *(University of Wisconsin-Madison).* Associate Professor. Human-computer interaction, healthcare informatics, human factors engineering, socio-technical systems, health services research, patient safety.

Aleksandra Sarcevic, PhD *(Rutgers University).* Associate Professor. Computer-supported cooperative work, human-computer interaction, and healthcare informatics.

Bupesh Shetty, PhD *(University of Iowa).* Assistant Teaching Professor. Process pattern mining, data mining, operations management, sports analytics, information systems, and machine learning applications.

Brian Smith, PhD *(Northwestern University) Senior Associate Dean of Academic Affairs.* Professor. Design of computer-based learning environments, computer science education, human-computer interaction, creativity and innovation; design sciences; informal/everyday learning.

Il-Yeol Song, PhD *(Louisiana State University).* Professor. Conceptual modeling, ontology and patterns, data warehouse and OLAP, object-oriented analysis and design with UML, medical and bioinformatics data modeling & integration,.

Rosina Weber, PhD *(Federal University of Santa Catarina).* Associate Professor. Case-based reasoning, explainable artificial intelligence, machine learning, textual analytics, natural language understanding, language models, recommender systems, technological aspects of knowledge management, project management, and requirements engineering.

Jake Williams, PhD *(University of Vermont).* Assistant Professor. Data science, scientific programming, computational social science, computational linguistics and natural language processing, mathematics, machine learning, algorithms, and scalability.

Erjia Yan, PhD *(Indiana University Bloomington).* Assistant Professor. Network science, information analysis and retrieval, scholarly communication methods and applications.

Christopher C. Yang, PhD *(University of Arizona, Tucson).* Professor. Web search and mining, security informatics, knowledge management, social media analytics, cross-lingual information retrieval, text summarization, multimedia retrieval, information visualization, information sharing and privacy, artificial intelligence, digital library, and electronic commerce.

Emeritus Faculty

Michael E. Atwood, PhD *(University of Colorado).* Professor Emeritus. Human-computer interaction, computer-supported cooperative work, organizational memory.

Thomas A. Childers, PhD *(Rutgers University).* Professor Emeritus. Measurement, evaluation, and planning of information and library services, the effectiveness of information organizations.

David E. Fenske, PhD *(University of Wisconsin-Madison).* Dean Emeritus and Professor. Digital libraries, informatics, knowledge management and information technologies.

Linda Marion, PhD *(Drexel University).* Teaching Professor Emerita. Formal and informal communication, bibliometric studies of scholarly communication, diffusion of information, information use in the social sciences, academic and public libraries, information science education.

Katherine W. McCain, PhD *(Drexel University).* Professor Emeritus. Scholarly communication, information production and use in the research process, development and structure of scientific specialties, diffusion of innovation, bibliometrics, evaluation of information retrieval systems.

Carol Hansen Montgomery, PhD *(Drexel University) Dean of Libraries Emeritus.* Research Professor. Selection and use of electronic collections, evaluation of library and information systems, digital libraries, economics of libraries and digital collections.

Delia Neuman, PhD *(The Ohio State University).* Professor Emerita. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Gerry Stahl, PhD *(University of Colorado).* Professor Emeritus. Human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, theory of collaboration.

Howard D. White, PhD *(University of California at Berkeley).* Professor Emeritus. Literature information systems, bibliometrics, research methods, collection development, online searching.

Susan Wiedenbeck, PhD *(University of Pittsburgh).* Professor Emeritus. Human-computer interaction, end-user programming/end-user development, empirical studies of programmers, interface design and evaluation.

Valerie Ann Yonker, PhD *(Drexel University).* Associate Teaching Professor Emerita. Human service information systems, systems analysis and design, measurement in software evaluation, knowledge engineering.

Information Systems

Major: Information Systems
Degree Awarded: Bachelor of Science Degree in Information Systems (BS)
Calendar Type: Quarter
Total Credit Hours: 187.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 11.0401
Standard Occupational Classification (SOC) code: 11-3021

About the Program

The College of Computing & Informatics' Bachelor of Science in Information Systems (BSIS) prepares students to apply information

technology for the benefit of individuals and organizations. Students develop the skills and knowledge to design, develop, and manage leading-edge information systems. Since many Information Systems students choose careers in business organizations, a minor in business is built into the degree requirements.

The Information Systems curriculum prepares students for a wide range of information technology applications. Students learn how to determine client needs, design appropriate solutions, specify data architectures, and improve the usability of systems.

The core courses in the program address topics including fundamentals of programming, systems analysis and design, database management systems, networking, security and privacy, and social aspects of information systems. These courses provide a foundation for more advanced courses in technical areas of interest to each student. The technical courses are supplemented by courses in business, behavioral sciences, natural sciences, mathematics, and the humanities to provide balance and useful supplemental materials for information systems careers.

The BSIS has four (4) core competencies students will have mastered upon graduation. The core competencies are supported by three (3) courses in each area.

- Requirements and Design

1. INFO 200 *Systems Analysis I*
2. INFO 324 [WI] *Team Process and Product*
3. INFO 355 *System Analysis II*

- Database and Information Management

1. INFO 210 *Database Management Systems*
2. INFO 315 *Advanced Database Management Systems*
3. INFO 371 *Data Mining Applications*

- User Experience

1. INFO 150 *Introduction to Ubiquitous Computing*
2. INFO 310 *Human-Centered Design Process & Methods*
3. INFO 405 *Social and Collaborative Computing*

- Security and Assurance

1. CT 201 *Information Technology Security I*
2. CT 250 *IT Security Awareness*
3. INFO 375 *Introduction to Information Systems Assurance*

The degrees in Computing and Security Technology (p. 185), Data Science (p. 192), and Information Systems share a common first year. This allows students to easily switch among the degrees early in their studies. In addition, some of the electives in each degree are accessible to students in the other two majors, and this provides a deeper and broader set of advanced topics for students in all three majors.

Additional Information

For more information about this program, please visit the BS in Information Systems web page (https://drexel.edu/cci/academics/undergraduate-programs/bs-information-systems/) on the College of Computing & Informatics' website.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Information Systems Requirements		
CT 140	Network Administration I	3.0
CT 201	Information Technology Security I	3.0
CT 250	IT Security Awareness	3.0
INFO 101	Introduction to Computing and Security Technology	3.0
INFO 102	Introduction to Information Systems	3.0
INFO 103	Introduction to Data Science	3.0
INFO 150	Introduction to Ubiquitous Computing	3.0
INFO 200	Systems Analysis I	3.0
INFO 210	Database Management Systems	3.0
INFO 215	Social Aspects of Information Systems	3.0
INFO 310	Human-Centered Design Process & Methods	3.0
INFO 315	Advanced Database Management Systems	3.0
INFO 324 [WI]	Team Process and Product	3.0
INFO 355	Systems Analysis II	3.0
INFO 371	Data Mining Applications	3.0
INFO 375	Introduction to Information Systems Assurance	3.0
INFO 405	Social and Collaborative Computing	3.0
INFO 420	Software Project Management	3.0
INFO/CT Electives [*]		12.0
Programming Requirements		**9.0**
Choose one of the following sequences		
INFO 151 & CS 171 & CS 172	Web Systems and Services I and Computer Programming I and Computer Programming II	
INFO 151 & INFO 152 & INFO 153	Web Systems and Services I and Web Systems and Services II and Applied Data Management	
Computing and Informatics Requirements		
CI 101	Computing and Informatics Design I	2.0
CI 102	Computing and Informatics Design II	2.0
CI 103	Computing and Informatics Design III	2.0
CI 491 [WI]	Senior Project I	3.0
CI 492 [WI]	Senior Project II	3.0
CI 493 [WI]	Senior Project III	3.0
Business or IS Environment Minor Requirements (See Minor Requirements below)		**24.0**
Mathematics Requirements		
Choose 1 of the following sequences:		8.0
If sequence less than 8 credit, add additional 2 credits to free electives		
MATH 171 & MATH 172	Introduction to Analysis A and Introduction to Analysis B	
MATH 101 & MATH 102	Introduction to Analysis I and Introduction to Analysis II	
MATH 121 & MATH 122	Calculus I and Calculus II	
MATH 180	Discrete Computational Structures	4.0
STAT 201	Introduction to Business Statistics	4.0
Natural Science Requirements		
Select 8.0 credits from any non-required courses from the following: ANAT, BIO, CHEM, ENVS, FDSC, NFS, PHEV, PHYS, HSCI, GEO, ENSS		8.0
Liberal Studies Requirements		
COM 230	Techniques of Speaking	3.0
or COM 310	Technical Communication	
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	

ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
Select and non-required courses from ANTH, COM, ENGL, HIST, PHIL, PSCI, PSY, SOC, WRIT, ECON, ENTP, ARTH, FMST, MUSC, TVST, VSST		6.0
University and College Requirements		
CIVC 101	Introduction to Civic Engagement	1.0
COOP 101	Career Management and Professional Development	0.0
UNIV CI101	The Drexel Experience	2.0
or CI 120	CCI Transfer Student Seminar	
Free Electives		**28.0**
Total Credits		187.0

*   Any non-required INFO or CT course

MInor Requirements:

Students must complete the requirements for a minor in an information systems application area. The following minors are approved for this requirement:

- College of Business minors – Note: the MIS minor cannot be used for this requirement due to its considerable overlap with the IS major
- Close School of Entrepreneurship minors
- School of Public Health minors
- Other minors in IS application areas may be taken for this requirement with prior approval of an advisor

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

**   COOP 101 is taken either winter or spring depending on co-op cycle. Please consult your advisor for additional information.

Accelerated Degrees

The College of Computing & Informatics offers several Accelerated Degree programs designed to allow students to complete both a bachelor's degree and a graduate degree along with cooperative educational experience in fewer years than would be typical if pursuing the degrees separately.

Students accepted in this program can combine any of the College's bachelor's and master's degree programs as well as other options:

- Any CCI BS/any CCI MS Accelerated Degree (BS & MS in five years, including 2 Co-ops)
- Any CCI BS/MBA Accelerated Degree (BS/MBA)
- Any CCI BS/JD Accelerated Degree (BS/JD)

For more information on the criteria for entering this program, visit the BS/MS Accelerated Degree (https://drexel.edu/undergrad/academics/accelerated-degrees/) page on Drexel's website.

For more information on how to apply for the BS/MS Accelerated Degree program, please visit the College of Computing & Informatics' website (https://drexel.edu/cci/admissions/undergraduate/admissions-requirements/cci-bsms-degree-admissions/).

Co-op/Career Opportunities

Co-Op Options

Two co-op options are available for this program:

- 5-year/3 co-op
- 4-year/1 co-op
- Accelerated Degree (BS & MS): 5-year/2 co-op

The following list is a sample of recent co-op job titles and employers:

- *Applications Architect,* Aetna
- *e-Communications Intern,* Airgas
- *PC Network Support,* Aramark
- *Information Systems Intern,* Campbell's Soup
- *Distributed WAN Support Co-op,* Cigna
- *Network Services,* GlaxoSmithKline
- *Programmer/Analyst*, Independence Blue Cross
- *Information Management Co-op,* Johnson & Johnson
- *Database Developer,* Princeton Plasma Physics
- *Website Developer,* QVC
- *Shared Services Co-op,* Wyeth

Career Opportunities

The demand for information systems professionals is strong. Graduates find careers in a number of areas, including designing information systems, leading project teams, planning, developing, and marketing information systems. Most information systems students enter the professional world right after graduation, but some continue their studies in advanced information technology programs.

Job titles of recent information systems graduates include:

- Security Analyst
- Network Systems Analyst
- Database Administrator
- Data Communications Analyst
- Systems Administrator
- Systems Engineer

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities.

3675 Market Street

In March 2019, the College of Computing & Informatics relocated to 3675 Market (https://drexel.edu/cci/about/our-facilities/). For the first time in the College's history, all CCI faculty, students and professional staff are housed under one roof. Occupying two floors in the brand new uCity Square building, CCI's new home offers state-of-the-art technology in our classrooms, labs, meeting areas and collaboration spaces. 3675 Market offers Class A laboratory, office, coworking, and convening spaces. In fall 2019, the College will open a third floor which will include additional offices, classrooms, a research lab, a maker space, and a ground-breaking DXC Technology Innovation Lab. Located at the intersection of Market Street and 37th Street, 3675 Market will act as a physical nexus, bridging academic campuses and medical centers to the east and south, the commercial corridors along Market Street and Chestnut Street, and the residential communities to the north and west.

The uCity Square building offers:

- Speculative lab/office space
- World-class facilities operated by CIC (https://cic.us/philadelphia/)

- Café/restaurant on-site
- Quorum, a two-story, 15K SF convening space and conference center
- Adjacent to future public square
- Access to Science Center's nationally renowned business acceleration and technology commercialization programs

Drexel University Libraries

Drexel University Libraries (http://www.library.drexel.edu/) is a learning enterprise, advancing the University's academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through three physical locations, including W. W. Hagerty Library, Queen Lane Library, and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at library.drexel.edu (http://www.library.drexel.edu/) or in-person at W. W. Hagerty Library (http://www.library.drexel.edu/locations/).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

CCI Commons

Located on the 10th floor of 3675 Market Street, the CCI Commons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, and more collaborative space for its students. Students have access to 3675 Market's fully equipped conference room with 42" displays and videoconferencing capabilities. The CCI Commons provides technical support to students, faculty, and professional staff. In addition, the staff provides audio-visual support for all presentation classrooms within 3675 Market. Use of the CCI Commons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the CCI Commons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the CCI Commons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as "DreamSpark" that allows students free access to a wide array of Microsoft software titles and operating systems.

The CCI Commons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University's network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

CCI Learning Center

The CCI Learning Center (CCILC), located in 3675 Market Street's CCI Commons student computer lab, provides consulting and other learning resources for students taking computer science classes. The CCILC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

The CCILC and CCI Commons serve as a central hub for small group work, student meetings, and TA assistance.

Research Laboratories

The College houses multiple research labs, led by CCI faculty, in 3675 Market Street including: the Drexel Health and Risk Communication Lab, Interactive Systems for Healthcare, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), High Performance Computing Laboratory (SPIRAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Social Computing Research Group, Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College's research web page (http://cci.drexel.edu/research.aspx).

Evaluations

The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the Information Systems degree is evaluated relative to the following Objectives and Outcomes.

BS in Information Systems Program Educational Objectives

Within three to five years of graduating, alumni of the program are expected to achieve one or more of the following milestones:

a. Be valued contributors to private or public organizations as demonstrated by promotions, increased responsibility, or other professional recognition
b. Contribute to professional knowledge as demonstrated by published papers, technical reports, patents, or conference presentations
c. Succeed in continuing professional development as demonstrated by completion of graduate studies or professional certifications
d. Demonstrate commitment and leadership within their profession and community as demonstrated by professional and community activity or contributions towards society's greater good and prosperity

BS in Information Systems Student Outcomes

The program enables students to attain, by the time of graduation:

a. An ability to apply knowledge of computing and mathematics appropriate to the discipline
b. An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution
c. An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs
d. An ability to function effectively on teams to accomplish a common goal
e. An understanding of professional, ethical, legal, security and social issues
f. An ability to communicate effectively with a range of audiences

g. An ability to analyze the local and global impact of computing on individuals, organizations, and society

h. Recognition of the need for and an ability to engage in continuing professional development

i. An ability to use current techniques, skills, and tools necessary for computing practice.

j. An understanding of processes that support the delivery and management of information systems within a specific application environment

The BSIS is accredited by the Computing Accreditation Commission (CAC) of ABET, http://www.abet.org.

To view the latest BS in Information Systems program enrollment numbers, please click here (https://drexel.edu/cci/academics/undergraduate-programs/facts/).

Computing & Informatics Faculty

Denise E. Agosto, PhD *(Rutgers, The State University of New Jersey)*. Professor. Youth information behaviors, public libraries, multicultural issues in youth library services, and qualitative research methods.

Yuan An, PhD *(University of Toronto, Canada) Director of International Programs*. Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

David Augenblick, MS *(University of Pennsylvania)*. Associate Teaching Professor. Introductory and object-oriented programming, data structures and database systems, computer application project management, application of computer programming principles and solutions to engineering problems.

Marcello Balduccini, PhD *(Texas Tech University) Senior Research Scientist, Applied Informatics Group*. Associate Research Professor. Logic programming, declarative programming, answer set programming, knowledge representation, various types of reasoning

Ellen Bass, PhD *(Georgia Institute of Technology) Joint Appointment with the College of Nursing and Health Professions*. Professor. Characterizing human judgement and decision making, modeling human judgement when supported by information automation, computational models of human-human and human-automation coordination.

Mark Boady, PhD *(Drexel University)*. Assistant Teaching Professor. Computer Algebra, complex symbolic calculations, automation of computation problems

David E. Breen, PhD *(Rensselaer Polytechnic Institute)*. Associate Professor. Self-organization, biomedical image/video analysis, biological simulation, geometric modeling and visualization

Matthew Burlick, PhD *(Stevens Institute of Technology)*. Assistant Teaching Professor. Image processing, machine learning, real-time video tracking, object detection and classification, statistics/probability, and acoustics

Yuanfang Cai, PhD *(University of Virginia)*. Associate Professor. Formal software design modeling and analysis, software economics, software evolution and modularity.

Christopher Carroll, MS *(Drexel University) BSCST Program Director*. Associate Teaching Professor. Information technology within healthcare companies, computer networking and design, IT infrastructure, server technology, information security, virtualization and cloud computing.

Bruce W. Char, PhD *(University of California-Berkeley)*. Professor. Symbolic mathematical computation, algorithms and systems for computer algebra, problem-solving environments parallel and distributed computation.

Chaomei Chen, PhD *(University of Liverpool)*. Professor. Information visualization, visual analytics, knowledge domain visualization, network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Catherine D. Collins, MLIS *(Indiana University)*. Associate Teaching Professor. Knowledge management, collection development, management of information organizations, information sources and services, international development.

M. Carl Drott, PhD *(University of Michigan)*. Associate Professor. Systems analysis techniques, web usage, competitive intelligence.

Andrea Forte, PhD *(Georgia Institute of Technology) PhD Program Director, and MS in Information Program Director*. Associate Professor. Social computing, human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, information literacy.

Susan Gasson, PhD *(University of Warwick)*. Associate Professor. The co-design of business and IT-systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Christopher Geib, PhD *(University of Edinburgh)*. Associate Professor. Decision making and reasoning under conditions of uncertainty, planning, scheduling, constraint, based reasoning, human computer and robot interaction, probabilistic reasoning, computer network security, large scale process control, user interfaces.

Colin Gordon, PhD *(University of Washington)*. Assistant Professor. Software reliability, program behavior, concurrent and systems-level code, formal assurance, programming models, distributed computing, even testing

Jane Greenberg, PhD *(University of Pittsburgh) Alice B. Kroeger Professor*. Metadata, ontological engineering, data science, knowledge organization, information retrieval

Peter Grillo, PhD *(Temple University) Associate Department Head for Undergraduate Affairs, Information Science*. Teaching Professor. Strategic applications of technology within organizations.

Jeremy R. Johnson, PhD *(Ohio State University)*. Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Xia Lin, PhD *(University of Maryland) Department Head, Information Science*. Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Geoffrey Mainland, PhD *(Harvard University)*. Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD *(University of Toronto) The Auerbach Berger Chair in Cybersecurity Distinguished Professor of Computer Science*.

Professor. Software engineering; software security; code analysis; evolutionary computation.

Gabriela Marcu, PhD *(Carnegie Mellon University)*. Assistant Teaching Professor. Human-computer interaction, health informatics, action research, ethnography, user experience design, designing for social change, organizational information systems, ubiquitous computing, knowledge management.

Adelaida Alban Medlock, MS *(Drexel University)*. Associate Teaching Professor. Introductory programming; computer science education.

William Mongan, MS *(Drexel University) Associate Department Head for Undergraduate Affairs, Computer Science*. Associate Teaching Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach

Ko Nishino, PhD *(University of Tokyo) Associate Department Head for Graduate Affairs, Computer Science*. Professor. Computer vision, computer graphics, analysis and synthesis of visual appearance.

Danuta A. Nitecki, PhD *(University of Maryland at College Park) Dean of Libraries.* Professor. Library metrics and use in management, library as place, and academic library service models.

Krzysztof Nowak, PhD *(Washington University)*. Associate Teaching Professor. Fourier analysis, partial differential equations, image processing, wavelets, asymptotic distribution of eigenvalues, numerical methods and algorithms, computer science education.

Santiago Ontañón, PhD *(University of Barcelona)*. Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning

Jung-ran Park, PhD *(University of Hawaii at Manoa)*. Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Alex Poole, PhD *(University of North Carolina)*. Assistant Professor. Digital curation, archives and records management, digital humanities, and diversity, inclusivity, and equity.

Jeffrey L. Popyack, PhD *(University of Virginia)*. Professor. Operations research, stochastic optimization, computational methods of Markov decision processes; artificial intelligence, computer science education.

Lori Richards, PhD *(University of North Carolina)*. Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Michelle L. Rogers, PhD *(University of Wisconsin-Madison)*. Associate Professor. Human-computer interaction, healthcare informatics, human factors engineering, socio-technical systems, health services research, patient safety.

Jeffrey Salvage, MS *(Drexel University)*. Teaching Professor. Object-oriented programming, multi-agent systems, software engineering, database theory, introductory programming, data structures.

Dario Salvucci, PhD *(Carnegie Mellon University) Department Head, Computer Science*. Professor. Human computer interaction, cognitive science, machine learning, applications for driving.

Kurt Schmidt, MS *(Drexel University)*. Associate Teaching Professor. Data structures, math foundations for computer science, programming tools, programming languages.

Ali Shokoufandeh, PhD *(Rutgers University) Senior Associate Dean of Research*. Professor. Theory of algorithms, graph theory, combinational optimization, computer vision.

Erin Solovey, PhD *(Tufts University)*. Assistant Professor. Human-computer interaction, brain-computer interfaces, tangible interaction, machine learning, human interaction with complex and autonomous systems.

Il-Yeol Song, PhD *(Louisiana State University)*. Professor. Conceptual modeling, ontology and patterns, data warehouse and OLAP, object-oriented analysis and design with UML, medical and bioinformatics data modeling & integration,.

Julia Stoyanovich, PhD *(Columbia University)*. Assistant Professor. Data and knowledge management, big data, biological data management, search and ranking.

Brian Stuart, PhD *(Purdue University)*. Associate Teaching Professor. Machine learning, networking, robotics, image processing, simulation, interpreters, data storage, operating systems, computer science, data communications, distributed/operating systems, accelerated computer programming, computer graphics.

Filippos Vokolos, PhD *(Polytechnic University)*. Assistant Teaching Professor. System architecture, principles of software design and construction, verification and validation methods for the development of large software systems, foundations of software engineering, software verification & validation, software design, programming languages, dependable software systems.

Rosina Weber, PhD *(Federal University of Santa Catarina)*. Associate Professor. Case-based reasoning, explainable artificial intelligence, machine learning, textual analytics, natural language understanding, language models, recommender systems, technological aspects of knowledge management, project management, and requirements engineering.

Erija Yan, PhD *(Indiana University)*. Assistant Professor. Network Science, information analysis and retrieval, scholarly communication methods and applications.

Emeritus Faculty

Michael E. Atwood, PhD *(University of Colorado)*. Professor Emeritus. Human-computer interaction, computer-supported cooperative work, organizational memory.

Thomas A. Childers, PhD *(Rutgers University)*. Professor Emeritus. Measurement, evaluation, and planning of information and library services, the effectiveness of information organizations.

David E. Fenske, PhD *(University of Wisconsin-Madison)*. Dean Emeritus and Professor. Digital libraries, informatics, knowledge management and information technologies.

John B. Hall, PhD *(Florida State University)*. Professor Emeritus. Academic library service, library administration, organization of materials.

Katherine W. McCain, PhD *(Drexel University)*. Professor Emeritus. Scholarly communication, information production and use in the research

process, development and structure of scientific specialties, diffusion of innovation, bibliometrics, evaluation of information retrieval systems.

Carol Hansen Montgomery, PhD *(Drexel University) Dean of Libraries Emeritus*. Research Professor. Selection and use of electronic collections, evaluation of library and information systems, digital libraries, economics of libraries and digital collections.

Delia Neuman, PhD *(The Ohio State University)*. Professor Emerita. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Gerry Stahl, PhD *(University of Colorado)*. Professor Emeritus. Human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, theory of collaboration.

Howard D. White, PhD *(University of California at Berkeley)*. Professor Emeritus. Literature information systems, bibliometrics, research methods, collection development, online searching.

Susan Wiedenbeck, PhD *(University of Pittsburgh)*. Professor Emeritus. Human-computer interaction, end-user programming/end-user development, empirical studies of programmers, interface design and evaluation.

Software Engineering

Major: Software Engineering
Degree Awarded: Bachelor of Science in Software Engineering (BSSE)
Calendar Type: Quarter
Total Credit Hours: 188.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Program (CIP) code: 14.0903
Standard Occupational Classification (SOC) code: *15-1132; 15-1133*

About the Program

The College of Computing & Informatics' Bachelor of Science in Software Engineering (BSSE) prepares students to design and build software systems. Software is essential to the functioning of modern society but high quality software is very challenging to create. Software engineering focuses on the knowledge and skills to meet that challenge and create high quality software on schedule within budget.

The Software Engineering curriculum addresses a full range of software activities including gathering client requirements, designing and constructing software solutions, testing software, and modifying and extending existing systems. The curriculum also recognizes that most software is developed by teams, and students develop skills in project management and team operation. Graduates are well-prepared to function as software engineering team members and also move toward software engineering management.

The core courses address programming and use of software development tools, specification and design, software architecture, verification and validation, software evolution, and team projects. These courses are supplemented with courses drawn from computer science and Informatics that provide theoretical background and application knowledge. The full curriculum prepares BSSE students to apply processes, methods, and tools to the problem of building and maintaining software with a defined level of quality, at a predictable cost, on a predictable schedule.

Additional Information

For more information about this program, please visit the BS in Software Engineering web page (https://drexel.edu/cci/academics/undergraduate-programs/bs-software-engineering/) on the College of Computing & Informatics' website.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

,,

Software Engineering Requirements		
CS 164	Introduction to Computer Science	3.0
CS 171	Computer Programming I	3.0
or CS 175	Advanced Computer Programming I	
CS 172	Computer Programming II	3.0
or CS 176	Advanced Computer Programming II	
SE 210	Software Specification and Design I	3.0
SE 181	Introduction to Software Engineering and Development	3.0
SE 211	Software Specification and Design II	3.0
SE 310	Software Architecture I	3.0
SE 311	Software Architecture II	3.0
SE 320	Software Verification and Validation	3.0
SE 410	Software Evolution	3.0
Computer Science Requirements		
CS 260	Data Structures	3.0
CS 265	Advanced Programming Tools and Techniques	3.0
CS 281	Systems Architecture	4.0
CS 283	Systems Programming	3.0
CS 472	Computer Networks: Theory, Applications and Programming	3.0
Information Systems Requirements		
INFO 210	Database Management Systems	3.0
INFO 310	Human-Centered Design Process & Methods	3.0
INFO 420	Software Project Management	3.0
Computing & Informatics Requirements		
CI 101	Computing and Informatics Design I	2.0
CI 102	Computing and Informatics Design II	2.0
CI 103	Computing and Informatics Design III	2.0
CI 491 [WI]	Senior Project I	3.0
CI 492 [WI]	Senior Project II	3.0
CI 493 [WI]	Senior Project III	3.0
Computing & Informatics Electives (see below)		**18.0**
Mathematics Requirements		
CS 270	Mathematical Foundations of Computer Science	3.0
MATH 121	Calculus I	4.0
MATH 122	Calculus II	4.0
MATH 123	Calculus III	4.0
MATH 221	Discrete Mathematics	3.0
STAT 201	Introduction to Business Statistics	4.0
STAT 202	Business Statistics II	4.0
Science Requirements		**18.0**
Select one of the following lab science sequences:		
BIO 122	Cells and Genetics	
& BIO 124	and Evolution & Organismal Diversity	
& BIO 126	and Physiology and Ecology	
CHEM 101	General Chemistry I	
& CHEM 102	and General Chemistry II	
& CHEM 103	and General Chemistry III	
PHYS 101	Fundamentals of Physics I	
& PHYS 102	and Fundamentals of Physics II	
& PHYS 201	and Fundamentals of Physics III	

Additional Science electives to reach 21 credits (see below)

Arts & Humanities Requirements		
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
PHIL 105	Critical Reasoning	3.0
PHIL 311	Ethics and Information Technology	3.0
COM 230	Techniques of Speaking	3.0
COM 310 [WI]	Technical Communication	3.0
PSY 101	General Psychology I	3.0
PSY 330	Cognitive Psychology	3.0
Select two of the following:		8.0
ACCT 110	Accounting for Professionals	
ECON 201	Principles of Microeconomics	
ECON 202	Principles of Macroeconomics	
Arts & Humanities, Business, or Social Studies elective (see below)		3.0
University Requirements		
UNIV CI101	The Drexel Experience	2.0
or CI 120	CCI Transfer Student Seminar	
CIVC 101	Introduction to Civic Engagement	1.0
COOP 101	Career Management and Professional Development	0.0
Free Electives		**13.5**
Total Credits		186.5

Program Electives

Independent study courses and special topics courses must be approved by the department prior to enrollment to satisfy a program elective requirement.

- **Computing & Informatics electives**: any non-required CS, INFO, SE course numbered 300 or higher; a well as CT 210, CT 200, CT 320, CT 330
- **Science electives**: any CHEM (except CHEM 111, CHEM 112, CHEM 113, CHEM 114, CHEM 151), BIO (except BIO 161, BIO 162, BIO 163; can take only one of BIO 100, BIO 107, BIO 122; can take only one of BIO 101, BIO 109, BIO 124), PHYS (except PHYS 050, PHYS 100, PHYS 103, PHYS 104, PHYS 105, PHYS 106 [WI] , PHYS 121, PHYS 122, PHYS 151, PHYS 160, PHYS 305, PHYS 324, PHYS 405; cannot take both PHYS 131 and PHYS 181), ENVS, ENSS, PHEV.
- **Business electives**: any ACCT, BLAW, BUSN, ECON, ENTP, FIN, HRMT, INTB, MGMT, MIS, MKTG, OPM, OPR, ORGB, STAT, TAX
- **Social Studies electives**: any AFAS, ANTH, HIST, GST, JUDA, PSCI, PSY (except PSY 332, PSY 337), SOC (except SOC 364, SOC 365), WGST
- **Arts & Humanities electives**: any ARCH, ARTH, CMGT, CJS, COM, CULA, DANC, EDEX, EDUC, ENGL (except ENGL 101, ENGL 102, ENGL 103, ENGL 105), ESTM, FASH, FMST, FMVD, GST, INTR, LING, MUSC, PHIL, PHTO, THTR, VSCM, VSST, WRIT, Foreign Language courses (http://www.drexel.edu/culturecomm/academics/undergraduate/modernlang/languages/) as defined by the College of Arts and Sciences, and GMAP 260, ANIM 140, ANIM 141, ANIM 211, ANIM 212

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

5 YR UG Co-op Concentration

ECON 202	Principles of Macroeconomics	
ECON 201	Principles of Microeconomics	
Computing & Informatics electives		6.0
	Term Credits	16.0
Term 12		
CI 493 [WI]	Senior Project III	3.0

Computing & Informatics elective	3.0
Arts & Humanities elective	3.0
Free elective	3.5
Term Credits	12.5

Total Credit: 186.5

Accelerated Degrees

The College of Computing & Informatics offers several accelerated degree programs designed to allow students to complete both a bachelor's degree and a graduate degree along with cooperative educational experience in fewer years than would be typical if pursuing the degrees separately.

Students accepted in this program can combine any of the Computing and Informatics bachelor's and master's degree programs as well as other options:

- Any CCI BS/any CCI MS Accelerated Degree (BS & MS in five years, including 2 Co-ops)
- Any CCI BS /MBA Accelerated Degree (BS/MBA) (BS & MBA in four years, including 1 Co-op option only)
- Any CCI BS/JD Accelerated Degree (BS/JD)

For more information on the criteria for entering this program, visit the BS/MS Accelerated Degree (http://drexel.edu/undergrad/academics/accelerated-degrees/) page on the Drexel website.

For more information on how to apply for the BS/MS Accelerated Degree program, please visit the College of Computing & Informatics' website (https://drexel.edu/cci/admissions/undergraduate/admissions-requirements/cci-bsms-degree-admissions/).

Co-op/Career Opportunities
Co-Op Options

Three co-op options are available for this program:

- 5-year/3 co-op
- 4-year/1 co-op
- Accelerated Degree: 5-year/2 co-op

Career Opportunities

The demand for software engineering professionals is quite strong. Graduates can expect career opportunities in software design and development in a variety of application areas. Software engineering graduates are particularly well suited to work as members or leaders of software project teams. They have knowledge and skills to help them develop quality software within schedule and cost constraints.

According to the U.S. Bureau of Labor Statistics' Occupational Outlook Handbook (http://www.bls.gov/ooh/), software developer is among the fastest growing U.S. careers requiring at least a bachelor's degree, with an estimated 302,500 new jobs by 2026. Although they have jobs in most industries, many software developers work in computer systems design and related services firms or software publishers. The field's rapid growth is mainly due to the increase in demand for computer software, especially in healthcare.

Most software engineering students enter the professional world right after graduation, but some continue their studies in advanced software engineering programs.

Job titles of recent software engineering graduates include:

- Software Engineer
- Software Architect
- Software System Project Manager
- Software Project Team Leader

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities.

3675 Market Street

In March 2019, the College of Computing & Informatics relocated to 3675 Market (https://drexel.edu/cci/about/our-facilities/). For the first time in the College's history, all CCI faculty, students and professional staff are housed under one roof. Occupying two floors in the brand new uCity Square building, CCI's new home offers state-of-the-art technology in our classrooms, labs, meeting areas and collaboration spaces. 3675 Market offers Class A laboratory, office, coworking, and convening spaces. In fall 2019, the College will open a third floor which will include additional offices, classrooms, a research lab, a maker space, and a ground-breaking DXC Technology Innovation Lab. Located at the intersection of Market Street and 37th Street, 3675 Market will act as a physical nexus, bridging academic campuses and medical centers to the east and south, the commercial corridors along Market Street and Chestnut Street, and the residential communities to the north and west.

The uCity Square building offers:

- Speculative lab/office space
- World-class facilities operated by CIC (https://cic.us/philadelphia/)
- Café/restaurant on-site
- Quorum, a two-story, 15K SF convening space and conference center
- Adjacent to future public square
- Access to Science Center's nationally renowned business acceleration and technology commercialization programs

Drexel University Libraries

Drexel University Libraries (http://www.library.drexel.edu/) is a learning enterprise, advancing the University's academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through three physical locations, including W. W. Hagerty Library, Queen Lane Library, and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at library.drexel.edu (http://www.library.drexel.edu/) or in-person at W. W. Hagerty Library (http://www.library.drexel.edu/locations/).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

CCI Commons

Located on the 10th floor of 3675 Market Street, the CCI Commons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, and more collaborative space for its students. Students have access to 3675 Market's fully equipped conference room with 42" displays and videoconferencing capabilities. The CCI Commons provides technical support to students, faculty, and professional staff. In addition, the staff provides audio-visual support for all presentation classrooms within 3675 Market. Use of the CCI Commons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the CCI Commons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the CCI Commons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as "DreamSpark" that allows students free access to a wide array of Microsoft software titles and operating systems.

The CCI Commons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University's network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

CCI Learning Center

The CCI Learning Center (CCILC), located in 3675 Market Street's CCI Commons student computer lab, provides consulting and other learning resources for students taking computer science classes. The CCILC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

The CCILC and CCI Commons serve as a central hub for small group work, student meetings, and TA assistance.

Research Laboratories

The College houses multiple research labs, led by CCI faculty, in 3675 Market Street including: the Drexel Health and Risk Communication Lab, Interactive Systems for Healthcare, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), High Performance Computing Laboratory (SPIRAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Social Computing Research Group, Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College's research web page (http://cci.drexel.edu/research.aspx).

Evaluations

The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the software engineering degree is evaluated relative to the following Objectives and Outcomes.

Program Educational Objectives

Within three to five years of graduating, alumni of the program are expected to achieve one or more of the following milestones:

a. Graduates of the program obtain employment as software developers, where their software and communication skills eventually propel them toward technical and administrative leadership positions in industry and government.

b. Graduates of the program demonstrate an ability to continue to learn throughout their career and to keep pace with changing technology as appropriate to their positions.

c. Graduates of the program specialize and enhance their software engineering knowledge by enrolling and completing technical graduate courses and other technical education to position them to advance software engineering practice as senior technical staff members or managers.

d. Graduates of the program specialize and enhance their software engineering knowledge by enrolling and graduating from MSc and PhD degree programs to position them to contribute to the intellectual foundations of the discipline of software engineering as researchers in industrial and government laboratories as well as in academia.

e. Graduates of the program advance toward becoming leaders in disciplines other than software engineering by enrolling and graduating from graduate-level degree programs in complimentary disciplines such as law and business, where the BSSE serves as an educational foundation.

f. Graduates of the program will demonstrate an awareness of their professional and social responsibility as software engineers by participation in professional activities and application of their knowledge for the good of society.

Software Engineering Student Outcomes

The program enables students to attain, by the time of graduation:

a. An ability to apply knowledge of mathematics, science and engineering

b. An ability to design and conduct experiments, as well as to analyze and interpret data

c. An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability and sustainability

d. An ability to function on multidisciplinary teams

e. An ability to identify, formulate and solve engineering problems

f. An understanding of professional and ethical responsibility

g. An ability to communicate effectively

h. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context

i. A recognition of the need for, and an ability to engage in life-long learning

j. A knowledge of contemporary issues

k. An ability to use the techniques, skills and modern engineering tools necessary for engineering practice.

Additional Information

The Software Engineering program is accredited by the Engineering Accreditation Commission (EAC) of ABET (http://www.abet.org).

To view the latest BS in Software Engineering program enrollment numbers, please click here (https://drexel.edu/cci/academics/undergraduate-programs/facts/).

Computing & Informatics Faculty

Denise E. Agosto, PhD *(Rutgers, The State University of New Jersey)*. Professor. Youth information behaviors, public libraries, multicultural issues in youth library services, and qualitative research methods.

Yuan An, PhD *(University of Toronto, Canada) Director of International Programs*. Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

David Augenblick, MS *(University of Pennsylvania)*. Associate Teaching Professor. Introductory and object-oriented programming, data structures and database systems, computer application project management, application of computer programming principles and solutions to engineering problems.

Marcello Balduccini, PhD *(Texas Tech University) Senior Research Scientist, Applied Informatics Group*. Associate Research Professor. Logic programming, declarative programming, answer set programming, knowledge representation, various types of reasoning

Ellen Bass, PhD *(Georgia Institute of Technology) Joint Appointment with the College of Nursing and Health Professions*. Professor. Characterizing human judgement and decision making, modeling human judgement when supported by information automation, computational models of human-human and human-automation coordination.

Mark Boady, PhD *(Drexel University)*. Assistant Teaching Professor. Computer Algebra, complex symbolic calculations, automation of computation problems

David E. Breen, PhD *(Rensselaer Polytechnic Institute)*. Associate Professor. Self-organization, biomedical image/video analysis, biological simulation, geometric modeling and visualization

Matthew Burlick, PhD *(Stevens Institute of Technology)*. Assistant Teaching Professor. Image processing, machine learning, real-time video tracking, object detection and classification, statistics/probability, and acoustics

Yuanfang Cai, PhD *(University of Virginia)*. Associate Professor. Formal software design modeling and analysis, software economics, software evolution and modularity.

Christopher Carroll, MS *(Drexel University) BSCST Program Director*. Associate Teaching Professor. Information technology within healthcare companies, computer networking and design, IT infrastructure, server technology, information security, virtualization and cloud computing.

Bruce W. Char, PhD *(University of California-Berkeley)*. Professor. Symbolic mathematical computation, algorithms and systems for computer algebra, problem-solving environments parallel and distributed computation.

Chaomei Chen, PhD *(University of Liverpool)*. Professor. Information visualization, visual analytics, knowledge domain visualization,

network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Catherine D. Collins, MLIS *(Indiana University)*. Associate Teaching Professor. Knowledge management, collection development, management of information organizations, information sources and services, international development.

M. Carl Drott, PhD *(University of Michigan)*. Associate Professor. Systems analysis techniques, web usage, competitive intelligence.

Andrea Forte, PhD *(Georgia Institute of Technology) PhD Program Director, and MS in Information Program Director*. Associate Professor. Social computing, human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, information literacy.

Susan Gasson, PhD *(University of Warwick)*. Associate Professor. The co-design of business and IT-systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Christopher Geib, PhD *(University of Edinburgh)*. Associate Professor. Decision making and reasoning under conditions of uncertainty, planning, scheduling, constraint, based reasoning, human computer and robot interaction, probabilistic reasoning, computer network security, large scale process control, user interfaces.

Colin Gordon, PhD *(University of Washington)*. Assistant Professor. Software reliability, program behavior, concurrent and systems-level code, formal assurance, programming models, distributed computing, even testing

Jane Greenberg, PhD *(University of Pittsburgh) Alice B. Kroeger Professor*. Metadata, ontological engineering, data science, knowledge organization, information retrieval

Peter Grillo, PhD *(Temple University) Associate Department Head for Undergraduate Affairs, Information Science*. Teaching Professor. Strategic applications of technology within organizations.

Jeremy R. Johnson, PhD *(Ohio State University)*. Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Xia Lin, PhD *(University of Maryland) Department Head, Information Science*. Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Geoffrey Mainland, PhD *(Harvard University)*. Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD *(University of Toronto) The Auerbach Berger Chair in Cybersecurity Distinguished Professor of Computer Science*. Professor. Software engineering; software security; code analysis; evolutionary computation.

Gabriela Marcu, PhD *(Carnegie Mellon University)*. Assistant Teaching Professor. Human-computer interaction, health informatics, action research, ethnography, user experience design, designing for social change, organizational information systems, ubiquitous computing, knowledge management.

Adelaida Alban Medlock, MS *(Drexel University)*. Associate Teaching Professor. Introductory programming; computer science education.

William Mongan, MS *(Drexel University) Associate Department Head for Undergraduate Affairs, Computer Science*. Associate Teaching Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach

Ko Nishino, PhD *(University of Tokyo) Associate Department Head for Graduate Affairs, Computer Science*. Professor. Computer vision, computer graphics, analysis and synthesis of visual appearance.

Danuta A. Nitecki, PhD *(University of Maryland at College Park) Dean of Libraries.* Professor. Library metrics and use in management, library as place, and academic library service models.

Krzysztof Nowak, PhD *(Washington University)*. Associate Teaching Professor. Fourier analysis, partial differential equations, image processing, wavelets, asymptotic distribution of eigenvalues, numerical methods and algorithms, computer science education.

Santiago Ontañón, PhD *(University of Barcelona)*. Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning

Jung-ran Park, PhD *(University of Hawaii at Manoa)*. Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Alex Poole, PhD *(University of North Carolina)*. Assistant Professor. Digital curation, archives and records management, digital humanities, and diversity, inclusivity, and equity.

Jeffrey L. Popyack, PhD *(University of Virginia)*. Professor. Operations research, stochastic optimization, computational methods of Markov decision processes; artificial intelligence, computer science education.

Lori Richards, PhD *(University of North Carolina)*. Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Michelle L. Rogers, PhD *(University of Wisconsin-Madison)*. Associate Professor. Human-computer interaction, healthcare informatics, human factors engineering, socio-technical systems, health services research, patient safety.

Jeffrey Salvage, MS *(Drexel University)*. Teaching Professor. Object-oriented programming, multi-agent systems, software engineering, database theory, introductory programming, data structures.

Dario Salvucci, PhD *(Carnegie Mellon University) Department Head, Computer Science*. Professor. Human computer interaction, cognitive science, machine learning, applications for driving.

Kurt Schmidt, MS *(Drexel University)*. Associate Teaching Professor. Data structures, math foundations for computer science, programming tools, programming languages.

Ali Shokoufandeh, PhD *(Rutgers University) Senior Associate Dean of Research*. Professor. Theory of algorithms, graph theory, combinational optimization, computer vision.

Erin Solovey, PhD *(Tufts University)*. Assistant Professor. Human-computer interaction, brain-computer interfaces, tangible interaction, machine learning, human interaction with complex and autonomous systems.

Il-Yeol Song, PhD *(Louisiana State University)*. Professor. Conceptual modeling, ontology and patterns, data warehouse and OLAP, object-oriented analysis and design with UML, medical and bioinformatics data modeling & integration,.

Julia Stoyanovich, PhD *(Columbia University)*. Assistant Professor. Data and knowledge management, big data, biological data management, search and ranking.

Brian Stuart, PhD *(Purdue University)*. Associate Teaching Professor. Machine learning, networking, robotics, image processing, simulation, interpreters, data storage, operating systems, computer science, data communications, distributed/operating systems, accelerated computer programming, computer graphics.

Filippos Vokolos, PhD *(Polytechnic University)*. Assistant Teaching Professor. System architecture, principles of software design and construction, verification and validation methods for the development of large software systems, foundations of software engineering, software verification & validation, software design, programming languages, dependable software systems.

Rosina Weber, PhD *(Federal University of Santa Catarina)*. Associate Professor. Case-based reasoning, explainable artificial intelligence, machine learning, textual analytics, natural language understanding, language models, recommender systems, technological aspects of knowledge management, project management, and requirements engineering.

Erija Yan, PhD *(Indiana University)*. Assistant Professor. Network Science, information analysis and retrieval, scholarly communication methods and applications.

Emeritus Faculty

Michael E. Atwood, PhD *(University of Colorado)*. Professor Emeritus. Human-computer interaction, computer-supported cooperative work, organizational memory.

Thomas A. Childers, PhD *(Rutgers University)*. Professor Emeritus. Measurement, evaluation, and planning of information and library services, the effectiveness of information organizations.

David E. Fenske, PhD *(University of Wisconsin-Madison)*. Dean Emeritus and Professor. Digital libraries, informatics, knowledge management and information technologies.

John B. Hall, PhD *(Florida State University)*. Professor Emeritus. Academic library service, library administration, organization of materials.

Katherine W. McCain, PhD *(Drexel University)*. Professor Emeritus. Scholarly communication, information production and use in the research process, development and structure of scientific specialties, diffusion of innovation, bibliometrics, evaluation of information retrieval systems.

Carol Hansen Montgomery, PhD *(Drexel University) Dean of Libraries Emeritus*. Research Professor. Selection and use of electronic collections, evaluation of library and information systems, digital libraries, economics of libraries and digital collections.

Delia Neuman, PhD *(The Ohio State University)*. Professor Emerita. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Gerry Stahl, PhD *(University of Colorado)*. Professor Emeritus. Human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, theory of collaboration.

Howard D. White, PhD *(University of California at Berkeley)*. Professor Emeritus. Literature information systems, bibliometrics, research methods, collection development, online searching.

Susan Wiedenbeck, PhD *(University of Pittsburgh)*. Professor Emeritus. Human-computer interaction, end-user programming/end-user development, empirical studies of programmers, interface design and evaluation.

Minor in Computer Science

About the Minor

The computer science minor provides students with a breadth of knowledge in areas that form the foundation of computer science. The student adds some depth by selecting courses from a list of advanced computer science courses.

Program Requirements

The Computer Science minor is available to all University students in good standing, with the exception of Computer Science majors.

Prerequisites

One of the following Mathematics sequences must be completed before entering the program:

- MATH 101 and MATH 102
- MATH 121 and MATH 122

Requirements

CS 171	Computer Programming I	3.0
or CS 175	Advanced Computer Programming I	
CS 172	Computer Programming II	3.0
or CS 176	Advanced Computer Programming II	
CS 260	Data Structures	3.0
CS 265	Advanced Programming Tools and Techniques	3.0
Additional CS courses numbered 200 or higher.		12.0
Total Credits		24.0

Note: No more than 9.0 credits from a student's major may be used to fulfill the minor requirements. Students who, because of this rule, require additional credits to reach 24.0 total credits may select additional Advanced Electives as needed.

Additional Information

For more information about this program, please visit the College of Computing & Informatics' website (https://drexel.edu/cci/academics/undergraduate-programs/undergraduate-minors/).

Minor in Computing Technology

About the Minor

The demand for individuals with technology skills is increasing and essential in today's internet-dominated society. Almost every field nowadays relies on technology. People in all fields may become responsible for building or using computer networks and increasingly more complex websites and intranets. The minor in Computing Technology combines basic courses in computing technology required to help organizations build infrastructure solutions.

Any student in any major can benefit from a minor in Computing Technology. Graduates with such background knowledge are prepared to actively participate in the application of technology within the major area of study.

The minor is available to all University students in good standing, with the exception of students majoring in Computing and Security Technology.

Program Requirements

CS 171	Computer Programming I	3.0
or INFO 151	Web Systems and Services I	
CT 140	Network Administration I	3.0
CT 200	Server I	3.0
CT 201	Information Technology Security I	3.0
CT 210	Open Server I	3.0
INFO 101	Introduction to Computing and Security Technology	3.0
INFO 210	Database Management Systems	3.0
Computer Technology Elective, select 1 of the following		3.0
CT 310	Open Server II	
CT 320	Server II	
CT 330	Network Administration II	
INFO 365	Database Administration I	
Total Credits		24.0

Additional Information

For more information, please visit the College of Computing & Informatics' website (https://drexel.edu/cci/academics/undergraduate-programs/undergraduate-minors/).

Minor in Data Science

About the Minor

Data Science provides a foundation for problem-solving in a data-driven society. The minor in Data Science combines basic courses in statistics, information and technology, and social contexts to address problems that require large and disparate datasets.

Any student in any major can benefit from a minor in data science. Graduates with such background knowledge are prepared to actively participate in the application of data science within their major area of study.

The minor is available to all University students in good standing, with the exception of students majoring in data science.

CS 171	Computer Programming I	3.0
CS 172	Computer Programming II	3.0
INFO 103	Introduction to Data Science	3.0
INFO 371	Data Mining Applications	3.0
STAT 201	Introduction to Business Statistics	4.0
STAT 202	Business Statistics II	4.0
Select 2 of the following:		6.0
CS 375	Web and Mobile App Development	
CS 380	Artificial Intelligence	
CS 383	Machine Learning	
CS 461	Database Systems	
or INFO 210	Database Management Systems	
INFO 202	Data Curation	
INFO 212	Data Science Programming I	
INFO 213	Data Science Programming II	
INFO 250	Information Visualization	
INFO 323	Cloud Computing and Big Data	
INFO 332	Exploratory Data Analytics	
INFO 350	Visual Analytics	
INFO 432	Advanced Data Analytics	
INFO 440	Social Media Data Analysis	
Total Credits		26.0

Additional Information

For more information about this program, please visit the College of Computing & Informatics' website (https://drexel.edu/cci/academics/undergraduate-programs/undergraduate-minors/).

Minor in Human Computer Interaction

About the Minor

The minor in Human Computer Interaction provides a course of study for students who would like to improve the integration of computing in the lives of individuals and to use computing to enable collaboration within groups. The minor combines courses in human computer interaction, ubiquitous computing, graphical interface design, and social computing.

The minor is available to all University students in good standing, with the exception of students already majoring in information systems, computing and security technology or data science.

Program Requirements

CS 171	Computer Programming I	3.0
or INFO 151	Web Systems and Services I	
INFO 102	Introduction to Information Systems	3.0
INFO 215	Social Aspects of Information Systems	3.0
INFO 310	Human-Centered Design Process & Methods	3.0
INFO 405	Social and Collaborative Computing	3.0
HCI Electives [**]		
Select 3 of the following:		9.0
CS 338	Graphical User Interfaces	
CS 341	Serious Game Development	
CS 342	Experimental Game Development	
CS 345	Computer Game Design and Development	
CS 375	Web and Mobile App Development	
CS 380	Artificial Intelligence	
CS 467	Security and Human Behavior	
INFO 101	Introduction to Computing and Security Technology	
INFO 103	Introduction to Data Science	
INFO 110	Introduction to Human-Computer Interaction	
INFO 150	Introduction to Ubiquitous Computing	
INFO 250	Information Visualization	
INFO 350	Visual Analytics	

INFO 405	Social and Collaborative Computing	
INFO 440	Social Media Data Analysis	
Total Credits		24.0

*   CCI majors: Replace INFO 110 with an additional HCI elective.

**   HCI Elective Recommendations:
For non-CCI majors: INFO 101 INFO 103 INFO 150 INFO 250
For CS majors: CS 338 CS 341 CS 342 CS 345 CS 380 CS 375

* An additional 9.0 credits or more are to be chosen from other course offerings in HCI pertinent to the student's overall program of study. Guidance in selecting these electives will be provided by staff and faculty of the College of Computing and Informatics.

HCI Elective Recommendations:
For non-CCI majors: INFO 101, INFO 103, INFO 110, INFO 150, INFO 250
For CS majors: CS 338, CS 341, CS 342, CS 345, CS 375, CS 380

Additional Information

For more information, please visit the College of Computing & Informatics' website (https://drexel.edu/cci/academics/undergraduate-programs/undergraduate-minors/).

Minor in Information Systems

About the Minor

The information systems minor is available to all University students in good standing, with the exception of students already majoring in computing and security technology or data science.

Program Requirements

Required Courses

CT 140	Network Administration I	3.0
INFO 101	Introduction to Computing and Security Technology	3.0
INFO 102	Introduction to Information Systems	3.0
INFO 103	Introduction to Data Science	3.0
INFO 200	Systems Analysis I	3.0
INFO 210	Database Management Systems	3.0
INFO 310	Human-Centered Design Process & Methods	3.0
One information system elective *		3.0
Total Credits		24.0

*   An additional 3 credits or more are to be chosen from other course offerings in information systems pertinent to the student's overall program of study. Guidance in selecting these electives will be provided by staff and faculty of the College of Computing and Informatics.

Additional Information

For more information, please visit the College of Computing & Informatics' website (https://drexel.edu/cci/academics/undergraduate-programs/undergraduate-minors/).

Minor in Security Technology

About the Minor

The demand for individuals with security related skills is increasing and essential in today's internet-dominated society. Computer and information systems managers are becoming more involved with the security of data, responsible for sophisticated and more efficient computer networks and increasingly more complex websites and intranets. The minor in Security Technology combines basic courses in security and technology required to help organizations keep their computer systems secure.

Any student in any major can benefit from a minor in Security Technology. Graduates with such background knowledge are prepared to actively participate in the application of security technology within the major area of study.

The minor is available to all University students in good standing, with the exception of students majoring in Computing and Security Technology.

Program Requirements

CT 140	Network Administration I	3.0
CT 201	Information Technology Security I	3.0
CT 210	Open Server I	3.0
CT 301	Information Technology Security II	3.0
CT 312	Access Control and Intrusion Detection Technology	3.0
CT 412	Information Technology Security Policies	3.0
INFO 101	Introduction to Computing and Security Technology	3.0
Security Technology Elective, Select 1 of the following:		3.0
CT 315	Security Management Practice	
CT 362	Network Auditing Tools	
CT 393	Information Technology Security Risk Assessment	
CT 415	Disaster Recovery and Continuity Planning	
Total Credits		24.0

Additional Information

For more information, please visit the College of Computing & Informatics' website (https://drexel.edu/cci/academics/undergraduate-programs/undergraduate-minors/).

Minor in Software Engineering

About the Minor

The Software Engineering minor is available to all University students in good standing, with the exception of Software Engineering majors.

Prerequisites

One of the following Mathematics sequences must be completed before entering the program:

- MATH 101 and MATH 102
- MATH 121 and MATH 122

Program Requirements

CS 171	Computer Programming I	3.0
or CS 175	Advanced Computer Programming I	
CS 172	Computer Programming II	3.0
or CS 176	Advanced Computer Programming II	
CS 260	Data Structures	3.0
CS 265	Advanced Programming Tools and Techniques	3.0
SE 210	Software Specification and Design I	3.0
SE 310	Software Architecture I	3.0
or CS 350	Software Design	
SE 320	Software Verification and Validation	3.0
Select one of the following:		3.0
SE 211	Software Specification and Design II	

SE 311	Software Architecture II	
SE 410	Software Evolution	
Total Credits		24.0

Note: No more than 9.0 credits from a student's major may be used to fulfill the minor requirements. Students who, because of this rule, require additional credits to reach 24.0 total credits may select from the following courses as needed:

INFO 210	Database Management Systems	3.0
INFO 310	Human-Centered Design Process & Methods	3.0
INFO 355	Systems Analysis II	3.0
INFO 420	Software Project Management	3.0

Additional Information

For more information, please visit the College of Computing & Informatics' website (https://drexel.edu/cci/academics/undergraduate-programs/undergraduate-minors/).

The College of Engineering

The College of Engineering curriculum is designed to provide students a thorough understanding of scientific, mathematical, and engineering fundamentals--as well as the ability to apply these areas of knowledge creatively to a wide variety of engineering problems.

Majors

- Architectural Engineering (BSAE) (p. 216)
- Chemical Engineering (BSCHE) (p. 223)
- Civil Engineering (BSCIV) (p. 226)
- Computer Engineering (BSCE) (p. 231)
- Construction Management (BSCMGT) (p. 238)
  - Real Estate Concentration (p. 240)
- Electrical Engineering (BSEE) (p. 241)
- Engineering (BSE) (p. 248)
- Engineering Technology (BSET) (p. 250)
  - Computer Engineering Technology Concentration (p. 252)

About the College

Drexel University's College of Engineering has emphasized its strengths in engineering, science and technology to train students to become the leaders of the future. In little over a century, Drexel University has transformed itself into a large, comprehensive institution committed to excellence in education, research and service to the engineering society and to the broader community. Although much has changed, the original mission of the University still rings true today.
The College of Engineering offers students a diverse academic learning and research environment embodying the highest standards of knowledge and preparing them to impact society's greatest challenges. Through entrepreneurial risk-taking and exploration, students are encouraged to find innovative solutions that promote economic development and improve life

In addition to the traditional engineering curriculum, the college offers Engineering Technology (p. 250) and Construction Management (p. 238).

Objectives of the traditional Undergraduate Engineering Program

The profession of engineering is concerned with turning the natural elements and energies to the service of mankind. The objectives of the undergraduate program in the College of Engineering (http://www.drexel.edu/coe/) are:

- *To offer an education that will give graduates the flexibility to adjust to future changes in technology*
- *To develop a sense of professionalism and entrepreneurship*
- *To provide a framework for concentrated study in a professional area*

To implement those objectives the curricula of the College of Engineering are designed to provide a firm grounding in basic science and liberal arts, along with broad-based engineering sciences and professional engineering subjects.

Cooperative Education

In five-year cooperative programs, engineering majors spend a total of 12 terms in school and six terms on co-op assignment. Freshmen attend classes for three terms. During their sophomore, pre-junior, and junior years, students generally attend class for two terms and are assigned a cooperative employment position for two terms each year.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities.

About the Traditional Engineering Curriculum

Degree Requirements

The degree of Bachelor of Science in the engineering specialities is comprised of academic work and six terms of co-op or engineering experience for the five-year program. For the four-year program, only two terms of co-op are required. Transfer students must complete a minimum of two terms of co-op or engineering experience in order to earn a cooperative engineering degree accredited by ABET (http://www.abet.org).

Engineering student must maintain an overall grade point average of 2.0 in all required courses in their major.

The Bachelor of Science in Engineering (BSE) program is a customizable undergraduate engineering degree program offered in the College of Engineering. The program is designed for students who are seeking an interdisciplinary education rooted in engineering. The degree is structured so students achieve a strong foundation in science, math and engineering. Upper level engineering electives can be chosen to fit the student's individual interests and career objectives. To learn more about the Bachelor of Science in Engineering program, please visit the (http://drexel.edu/engineering/areas-of-study/engineering/BSE/)Program Overview webpage (http://drexel.edu/engineering/areas-of-study/engineering/BSE/). (http://drexel.edu/engineering/areas-of-study/engineering/BSE/)

Curricular Organization

Students in the traditional engineering programs study many of the same subjects during the three terms in the first year. During the two terms of the sophomore year, students begin taking department specific coursework.

The first five terms are devoted to those subjects that form the foundation of the engineering curriculum. Courses in the core engineering curriculum are organized and taught to provide an integrated view of the basic sciences and an introduction to the art of engineering through group projects that deal with open-ended problems characteristic of the practice of engineering. Students also learn to use the modern tools of engineering both on the computer and in the laboratory.

The College considers it essential that students entering the Drexel Engineering Curriculum be placed in courses that take advantage of their abilities and prior training. Student preparation level is determined by a review committee that evaluates the student's high school record, standardized test scores, advanced placement and/or transfer credit, and placement exams administered during the summer before Fall enrollment.

Engineering students will take placement exams which will determine their readiness in calculus, physics, and chemistry. Students who demonstrate the preparation and skills to succeed in our core math and science courses, will immediately be placed into the courses starting in the fall term. Students that may need additional preparation are strongly encouraged to participate in the online prep courses the summer before the fall term.

In the second year, professional subjects are introduced, and all the first-level professional courses are completed by the junior year. The senior year in all curricula contains at least one elective sequence so that students can study some aspect of engineering more deeply. In addition, all curricula provide a design experience in the senior year. Recognizing the importance of general education studies in the education of an engineer, all curricula require that courses be taken in this area. These requirements are described in more detail in the General Education Requirements (http://drexel.edu/engineering/resources/undergraduate-advising/current-students/electives/general-ed-electives/).

The Common Curriculum

While some programs vary in detail, the following courses are common to most engineering curricula. See each program for specifics.

University Requirements		
CIVC 101	Introduction to Civic Engagement	1.0
UNIV E101	The Drexel Experience	2.0
Foundation Requirements		
BIO 141	Essential Biology	4.5
CHEM 101	General Chemistry I	3.5
CHEM 102	General Chemistry II	4.5
ENGR 111	Introduction to Engineering Design & Data Analysis	3.0
ENGR 113	First-Year Engineering Design	3.0
ENGR 131	Introductory Programming for Engineers	3.0
ENGR 210	Introduction to Thermodynamics	3.0
ENGR 220	Fundamentals of Materials	4.0
ENGR 231	Linear Engineering Systems	3.0
ENGR 232	Dynamic Engineering Systems	3.0
MATH 121	Calculus I	4.0
MATH 122	Calculus II	4.0
MATH 200	Multivariate Calculus	4.0
PHYS 101	Fundamentals of Physics I	4.0
PHYS 102	Fundamentals of Physics II	4.0
PHYS 201	Fundamentals of Physics III	4.0

In addition, engineering students complete a minimum of 30.0 General Education Credits (p. 215).

Electives

In addition to the electives in the General Education electives there are two types of elective sequences in the engineering curricula: technical electives and free electives. Technical electives are courses in engineering, science, or management that build on the required professional courses and lead to a specific technical specialization. Possible elective sequences should be discussed with and approved by advisors before the end of the junior year. Free electives are any courses for which students are eligible and that are not remedial in nature for engineering students.

General Education Requirements

The General Education Program is designed to give engineering students an opportunity to take a set of courses that complement their technical studies and satisfy their intellectual and/or career interests. All engineering majors must take thirty (30.0) credits. Nine (9.0) of the thirty credits are designated as follows and must be completed by all majors:

ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0

or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	

General Education requirements for specific majors can be found in the degree requirements for each major. The remaining credits can be chosen from the disciplines listed below.

Course Subjects

This following list is a sampling of subject codes for courses that can be taken to fulfill General Education requirements; other courses may be accepted upon advisor approval.

Accounting (ACCT), Africana Studies (AFAS), Anthropology (ANTH), Arabic (ARBC), Architecture (ARCH), Art History (ARTH), Business Law (BLAW), Chinese (CHIN), Communication (COM), Criminology & Justice Studies (CJS), Culinary Arts (CULA), Dance (DANC), Economics (ECON), Education (EDUC), English (ENGL, except ENGL 101, ENGL 102, ENGL 103 & ENGL 105), Entertainment & Arts Management (EAM), Entrepreneurship (ENTP), Environmental Studies & Sustainability (ENSS), Film Studies (FMST), Finance (FIN), French (FREN), General Business (BUSN), German (GER), Global Studies (GST), Hebrew (HBRW), History (HIST), Hotel & Restaurant Management (HRM), Humanities (HUM, except HUM 107 & HUM 108), Interior Design (INTR), International Business (INTB), Italian (ITAL), Japanese (JAPN), Judaic Studies (JUDA), Korean (KOR), Language (LANG), Leadership (LEAD), Management (MGMT), Marketing (MKTG), Military Science (MLSC), Music (MUSC), Music Industry Program (MIP), Operations Management (OPM), Operations Research (OPR), Organizational Behavior (ORGB), Philosophy (PHIL), Photography (PHTO), Product Design (PROD) Project Management (PROJ), Political Science (PSCI), Psychology (PSY, except PSY 330 & PSY 337), Public Health (PBHL), Real Estate (REAL), Screenwriting & Playwriting (SCRP), Sociology (SOC), Spanish (SPAN), Special Education (EDEX), Sports Management (SMT), STEM Teacher Education (ESTM), Taxation (TAX), Theatre (THTR), Visual Studies (VSST), WEST Studies (WEST), Women's and Gender Studies (WGST), and Writing (WRIT).

General Education electives must be non-technical. All Computer, Math, Engineering & Science related courses will NOT count as General Education electives.

Special Programs

Accelerated Programs/ Bachelor's/Master's Dual Degree Program

The Accelerated Program of the College of Engineering provides opportunities for highly talented and strongly motivated students to progress toward their educational goals essentially at their own pace. Primarily through advanced placement, credit by examination, flexibility of scheduling, and independent study, the program makes it possible to complete the undergraduate curriculum and initiate graduate study in less than the five years required by the standard curriculum. Students enrolled in this program may take advantage of the five-year Bachelor's/Master's Dual Degree Program described on the College of Engineering's Accelerated Programs (http://drexel.edu/engineering/programs/undergraduate/accelerated-programs/) web page.

Facilities

Core Engineering Facilities

The Freshman Engineering Design Laboratories are located in the newly-created Innovation Studio. The Studio hosts activities for all class levels from Freshman Design at one end through Senior Design at the other. It includes 3D printers, multiple sensor suites and the college machine shop representing the flow of freshman initial ideas through complex fabrication.

Freshman Design courses taken by all new freshmen are held exclusively in the Innovation Studio which was completed in the fall of 2015. A team of Drexel faculty and staff designed the studio to allow activities of many scales as well as to promote open communication within and across groups of students. The lab tables accommodate work in small and larger groups.

The Innovation Studios are an example of Drexel's commitment to undergraduate education, but providing up-to-date, high-quality technology to facilitate the kind of experiential learning that keeps Drexel at the cutting edge.

Department Facilities

Departments within the College of Engineering have laboratory equipment appropriate for required lab coursework within curriculum. Most engineering department webpages describe their specialized facilities in detail.

Architectural Engineering

Major: Architectural Engineering
Degree Awarded: Bachelor of Science in Architectural Engineering (BSAE)
Calendar Type: Quarter
Total Credit Hours: 189.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 14.0401
Standard Occupational Classification (SOC) code: 17-2199

About the Program

The architectural engineering major prepares graduates for professional work in the analysis, design, construction, and operation of residential, commercial, institutional, and industrial buildings. The program develops engineers familiar with all aspects of safe and economical construction. Students study the principles of structural support and external cladding, building environmental systems, and project management and develop depth in at least one area.

The program integrates building disciplines, including coordination with architects, construction managers, civil, mechanical, and electrical engineers, and others. Students use computer-aided design tools to understand system interactions, perform analysis, design, scheduling, and cost analysis, and present their work.

The first two years of the curriculum cover fundamentals necessary for all engineers. The pre-junior and junior years emphasize building systems and the principles governing their performance. In addition to the core engineering and science, students learn architectural approaches through studio design. Seniors focus on either structural or building environmental systems design, as well as a full-year realistic design project. The

academic program is complemented by exposure to professional practice in the co-op experience.

A special feature of the major is senior design. A group of students works with a faculty advisor to develop a significant design project selected by the group. All architectural engineering students participate in a design project.

Mission Statement

The civil and architectural engineering faculty are responsible for delivering an outstanding curriculum that equips our graduates with the broad technical knowledge, design proficiency, professionalism, and communications skills required for them to make substantial contributions to society and to enjoy rewarding careers.

Program Educational Objectives

Architectural engineering graduates will become responsible professionals who analyze, design, construct, manage, or operate various types of buildings and their systems, and/or advance knowledge of the field.

Student Outcomes

The department's student outcomes reflect the skills and abilities that the curriculum is designed to provide to students by the time they graduate. These are:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of the engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Concentration Options

Mechanical Concentration (HVAC)

Students who choose the mechanical concentration (HVAC) prepare for careers dealing with the building environment. As co-ops and graduates, they will be involved in the many design aspects of building environmental control, including:

- building load definitions
- equipment selection and design
- distribution system design
- control systems design

- energy analysis and system optimization
- building operation for safety, economy and maximum performance

Structural Concentration

Students who choose the structural concentration prepare for careers dealing with the building structure. As co-ops and graduates, they will be involved in the design of the many aspects of building structure including:

- building load definitions
- structural system design
- foundation system design

Digital Building Concentration

Students who choose the digital building concentration prepare for careers dealing with the role of computer technology in building design, construction and operation. As co-ops and graduates, they will be involved in:

- development and use of Building Information Models (BIM) and databases
- configuration and operation of building sensor and actuator networks and monitoring systems
- developing and maintaining construction schedules, databases and monitoring systems

Additional Information

The Architectural Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org).

For more information about this major, contact the program director:
Michael Waring, PhD
Associate Professor
Civil, Architectural & Environmental Engineering
msw59@drexel.edu

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

General Education/Liberal Studies Requirements

CIVC 101	Introduction to Civic Engagement	1.0

INFO 203	Information Technology for Engineers	
Three professional electives		

| Total Credits | | 189.0-194.0 |

*   General Education Requirements. (p. 215)

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Co-op/Career Opportunities

The major in architectural engineering prepares students for professional work in residential, commercial, institutional, and industrial building systems, in cooperation with architects and other engineers.

Sample Co-op Experiences

When students complete their co-op jobs, they are asked to write an overview of their experiences. These brief quotes are taken from some recent student reports:

Project technician, major university: "Studied and surveyed existing buildings and facilities for: their compliance with the Americans with Disabilities Act, heating and air conditioning equipment sizing, electrical loads, and their planning and usage of space. Designed improvements from the field surveys taken, and developed construction drawings. Worked closely with the workforce in implementing these changes."

CAD technician, private engineering firm: "Prepared computer generated construction plans for various water and sewer reconstruction projects. . . .Was able to expand my knowledge of Auto CAD to include Advanced Design Modules."

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities.

Dual/Accelerated Degree

The Accelerated Program of the College of Engineering provides opportunities for highly talented and strongly motivated students to progress toward their educational goals essentially at their own pace. Primarily through advanced placement, credit by examination, flexibility of scheduling, and independent study, the program makes it possible to complete the undergraduate curriculum and initiate graduate study in less than the five years required by the standard curriculum.

Dual Degree Bachelor's Programs

A student completing the Bachelor of Science degree program in architectural engineering may complete additional courses (specified by the department) to earn the Bachelor of Science degree in civil engineering. (The reverse is difficult because of prerequisites in the sequence of architectural studio design courses, which begins in the sophomore year.)

Bachelor's/Master's Dual Degree Program

Exceptional students can also pursue a master of science degree in the same period as the bachelor of science. Exceptional students can also pursue a master of science degree in the same period as the bachelor of science. For more information about this program, visit the Department's BS/MS Dual Degree Program (http://www.cae.drexel.edu/dual_degree.asp) page.

Facilities

The Department is well equipped with state-of-the-art facilities:

- The department computer labs are in operation: a computer-assisted design (CAD) and computerized instructional lab; and a graduate-level lab (advanced undergraduates can become involved in graduate-level work).
- External labs are used for surveying, building diagnostics, and surface and ground-water measurements.

Civil, Architectural and Environmental Engineering Faculty

Abieyuwa Aghayere, PhD *(University of Alberta)*. Professor. Structural design - concrete, steel and wood; structural failure analysis; retrofitting of existing structures; new structural systems and materials; engineering education.

Ivan Bartoli, PhD *(University of California, San Diego)*. Associate Professor. Non-destructive evaluation and structural health monitoring; dynamic identification, stress wave propagation modeling.

Robert Brehm, PhD *(Drexel University)*. Teaching Professor. International infrastructure delivery; response to natural catastrophes; risk assessment and mitigation strategies; project management techniques.

Shannon Capps, PhD *(Georgia Institute of Technology)*. Assistant Professor. Atmospheric chemistry; data assimilation; advanced sensitivity analysis; inverse modeling.

S.C. Jonathan Cheng, PhD *(West Virginia University)*. Associate Professor. Soil mechanics; geosynthetics; geotechnical engineering; probabilistic design; landfill containments; engineering education.

Eugenia Ellis, PhD, AIA *(Virginia Polytechnic Institute and State University)*. Professor. Natural and electric light sources and effects on biological rhythms and health outcomes; ecological strategies for smart, sustainable buildings of the nexus of health, energy and technology.

Yaghoob (Amir) Farnam, PhD *(Purdue University)*. Assistant Professor. Advanced and sustainable infrastructure materials; multifunctional, self-responsive and bioinspired construction materials; advanced multiscale manufacturing; characterization, and evaluation of construction materials; durability of cement-based materials.

Patricia Gallagher, PhD *(Virginia Polytechnic Institute and State University)*. Professor. Geotechnical and geoenvironmental engineering; soil improvement; soil improvement; recycled materials in geotechnics.

Patrick Gurian, PhD *(Carnegie-Mellon University)*. Professor. Risk analysis of environmental and infrastructure systems; novel adsorbent materials; environmental standard setting; Bayesian statistical modeling; community outreach and environmental health.

Charles N. Haas, PhD *(University of Illinois-Urbana) L. D. Betz Chair Professor of Environmental Engineering and Department Head, Civil, Architectural and Environmental Engineering*. Water treatment; risk assessment; bioterrorism; environmental modeling and statistics; microbiology; environmental health.

Ahmad Hamid, PhD *(McMaster University)*. Professor. Engineered masonry; seismic behavior, design and retrofit of masonry structures; development of new materials and building systems.

Simi Hoque, PhD *(University of California - Berkeley)*. Associate Professor. Computational methods to reduce building energy and environmental impacts, urban metabolism, thermal comfort, climate resilience.

Y. Grace Hsuan, PhD *(Imperial College)*. Professor. Durability of polymeric construction materials; advanced construction materials; and performance of geosynthetics.

Joseph B. Hughes, PhD *(University of Iowa)*. Distinguished University Professor. Biological processes and applications of nanotechnology in environmental systems.

L. James Lo, PhD *(University of Texas at Austin)*. Assistant Professor. Architectural fluid mechanics; building automation and autonomy; implementation of natural and hybrid ventilation in buildings; airflow distribution in buildings; large-scale air movement in an urban built environment; building and urban informatics; data-enhanced sensing and control for optimal building operation and management; novel data gathering methods for building/urban problem solving; interdisciplinary research on occupant behaviors in the built environment.

Joseph P. Martin, PhD *(Colorado State University)*. Professor. Geotechnical and geoenvironmental engineering; hydrology; transportation; waste management.

Franco Montalto, PhD *(Cornell University)*. Professor. Effects of built infrastructure on societal water needs, ecohydrologic patterns and processes, ecological restoration, green design, and water interventions.

Nariman Mostafavi, PhD *(University of Massachusetts - Amherst)*. Assistant Teaching Professor. Simulation tools for analyzing urban metabolism; environmentally responsive design; urban resilience; engineering economics; industrial ecology.

Mira S. Olson, PhD *(University of Virginia)*. Associate Professor. Peace engineering; source water quality protection and management; contaminant and bacterial fate and transport; community engagement.

Miguel A. Pando, PhD *(Virginia Polytechnic Institute and State University)*. Associate Professor. Laboratory testing of geomaterials; geotechnical aspects of natural hazards; soil-structure-interaction; geotechnical engineering.

Michael Ryan, PhD *(Drexel University) Associate Department Head of Graduate Studies*. Associate Teaching Professor. Microbial Source Tracking (MST); Quantitative Microbial Risk Assessment (QMRA); dynamic engineering systems modeling; molecular microbial biology; phylogenetics; metagenomics; bioinformatics; environmental statistics; engineering economics; microbiology; potable and waste water quality; environmental management systems.

Christopher Sales, PhD *(University of California, Berkeley)*. Associate Professor. Environmental microbiology and biotechnology; biodegradation of environmental contaminants; microbial processes for energy and resource recovery from waste; application of molecular biology, analytical chemistry and bioinformatic techniques to study environmental biological systems.

Sabrina Spatari, PhD *(University of Toronto)*. Associate Professor. Industrial ecology; development and application of life cycle assessment (LCA) and material flow analysis (MFA) methods for guiding engineering and policy decisions; specific interest in biomass and bioenergy, biofuels, and urban infrastructure.

Robert Swan Teaching Professor. Geotechnical and geosynthetic engineering; soil/geosynthetic interaction and performance; laboratory and field geotechnical/geosynthetic testing; data acquisition and instrumentation; test equipment development and test method standardization; Quality System Management (QSM) and continuous improvement.

Sharon Walker, PhD *(Yale University) Dean of the College of Engineering*. Distinguished University Professor. Water quality systems engineering.

Michael Waring, PhD *(University of Texas-Austin) Associate Department Head for Undergraduate Programs; Director of Architectural Engineering Program*. Professor. Indoor air quality and building sustainability; indoor particulate matter fate and transport; indoor chemistry and particle formation; secondary impacts of control technologies and strategies.

Jin Wen, PhD *(University of Iowa)*. Professor. Building energy efficiency; building-grid interaction; building control and operation; fault detection and diagnosis; human-building interactions; dynamic building system simulation; big data.

Aspasia Zerva, PhD *(University of Illinois - Urbana)*. Professor. Earthquake engineering; engineering seismology; structural reliability; system identification; advanced computational methods in structural analysis.

Emeritus Faculty

A. Emin Aktan, PhD *(University of Illinois at Urbana-Champaign) John Roebling Emeritus Professor of Infrastructure Studies*. Professor Emeritus. Structural engineering; health monitoring of large infrastructure systems; infrastructure evaluation; intelligent systems.

Harry G. Harris, PhD *(Cornell University)*. Professor Emeritus. Structural models; dynamics of structures, plates and shells; industrialized building construction.

James E. Mitchell, MArch *(University of Pennsylvania)*. Professor Emeritus. Architectural engineering design; building systems; engineering education.

Joseph V. Mullin, PhD *(Pennsylvania State University) Associate Department Head*. Teaching Professor. Structural engineering; failure analysis; experimental stress analysis; materials of construction; marine structures; engineering education.

Richard Weggel, PhD *(University of Illinois) Samuel S. Baxter Professor Emeritus; Civil and Environmental Engineering.* Professor Emeritus. Coastal engineering; hydraulics engineering; hydrology.

Richard Woodring, PhD *(University of Illinois) Dean of Engineering Emeritus.* Professor Emeritus. Structural engineering, reinforced concrete.

Chemical Engineering

Major: Chemical Engineering
Degree Awarded: Bachelor of Science in Chemical Engineering (BSCHE)
Calendar Type: Quarter
Total Credit Hours: 181.5
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 14.0701
Standard Occupational Classification (SOC) code: 17-2041

About the Program

The department of Chemical and Biological Engineering's chemical engineering curriculum progresses through sequences in the fundamental physical sciences, humanities, engineering sciences, and engineering design.

Chemical engineers are dedicated to designing devices and processes that convert input materials into more valuable products and often to designing those products themselves. Such end products include petrochemical derivatives, fine chemicals, pharmaceuticals, plastics, and other materials, integrated circuits, electrical energy, biologically derived fuels, and much more. Chemical engineering often begins with small laboratory scale processes that must be scaled up to production levels through carefully integrated design, optimization, economic, environmental and safety analyses.

The Department of Chemical and Biological Engineering is responsible for equipping our graduates with the broad technical knowledge and teamwork skills required for them to make substantial contributions to society.

Sample Senior Design Projects

A special feature of the major is senior design. A group of students in the chemical engineering major works with a faculty advisor to develop a significant design project. Some recent examples include:

- Design of a process to make petrochemical intermediates
- Plastics recycling design
- Process design for antibiotic products

Program Educational Objectives

The Department of Chemical and Biological Engineering has four goals pertaining to student outcomes within a few years of graduation:

- Our graduates will succeed in careers requiring strong skills in engineering, science, creative problem solving, communication, teamwork, and appropriate leadership.
- Our graduates will continue their professional development through life-long learning involving self- or group-study and on-the-job training.
- Our graduates will hold paramount the safety, health, and welfare of the public. They will conduct their work ethically and understand its global impact and sustainability.

- Our graduates will be thought leaders in their area of expertise who are prepared to contribute to research, development, and industrial innovation at the forefront of chemical engineering and related fields.

Additional Information

The Chemical Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org).

For more information about this program, visit Drexel University's Department of Chemical and Biological Engineering (https://drexel.edu/engineering/academics/departments/chemical-biological-engineering/) web page.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

General Education/Liberal Studies Requirements		
CIVC 101	Introduction to Civic Engagement	1.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0

Co-op/Career Opportunities

Chemical engineers tend to work for large corporations with such job assignments as process engineering, design engineering, plant operation, research and development, sales, and management. They also work for federal and state government agencies on projects related to environmental problems, defense, energy, and health-related research.

Some major employers of Drexel's chemical engineering graduates are DuPont, Merck, BASF, ExxonMobil, Dow Chemical, and Air Products. A number of graduates go on to pursue master's and/or doctoral degrees. Graduate schools that Drexel's chemical engineers have attended include the University of California at Berkeley and Massachusetts Institute of Technology, among others.

Co-op Experiences

Drexel is located in downtown Philadelphia with easy access to major pharmaceutical, chemical, and petroleum companies. When students complete their co-op jobs, they are asked to write an overview of their experiences. These brief quotes are taken from some recent student reports:

Research assistant, chemicals manufacturer: "Conducted research in a developmental polyamide process. Aspects included scale-up from bench-scale to batch demonstration, installation and calibration of on-line composition sensors, off-line analytical techniques to assess product quality, and interfacing with plant sites to define and standardize a critical quality lab procedure. Documented results in technical memos and in a plant presentation . . .I had a lot of freedom and responsibility. It was great interacting with other researchers and technicians. Everyone was so helpful. "

Co-op engineer, chemicals manufacturer: "Created material safety data sheets, which involved chemical composition, hazard communication, occupational safety and health, emergency response, and regulatory issues for numerous products and wastes. Handled domestic and international regulatory reviews. Determined hazardous waste reporting requirements, handling and disposal procedures. Evaluated toxicological and ecological data for assessment of hazard ratings. Provided input on product safety technical reports."

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities.

Facilities

The Department of Chemical and Biological Engineering occupies the 2nd, 3rd, and 4th floors of the Center for Automation Technology. Approximately 35,000 square feet (gross) are available for the department.

Two thousand square feet of laboratory facilities are designed for the pre-junior and junior year laboratory courses. Experiments in these laboratory courses focus on applying concepts in thermodynamics, fluid mechanics, heat and mass transfer, separations, and reaction engineering. Laboratory courses are run with class sizes of 18 students or less.

The department has two computer laboratories:

- The senior design laboratory features nine booths designed for team projects. Each booth contains a work station loaded with the latest process simulation software produced by Aspen, Simulation Sciences and HYSIS. Seniors use the room heavily during their Capstone design experience, although pre-junior courses in separations and transport also include projects requiring use of the process simulation software.
- A second computer lab contains over 30 individual work stations with general and engineering-specific software.

Many undergraduate students participate in research projects in faculty laboratories as part of independent study coursework or BS/MS thesis work. Chemical engineering faculty are engaged in a wide range of research activities in areas including energy and the environment, polymer science and engineering, biological engineering, and multi-scale modeling and process systems engineering. Further details can be found on the Department of Chemical and Biological Engineering's Research Group (https://drexel.edu/engineering/academics/departments/chemical-biological-engineering/department-research/research-groups/) web page.

Dual/Accelerated Degree

Accelerated Program

The accelerated program of the College of Engineering provides opportunities for highly-talented and strongly-motivated students to progress toward their educational goals essentially at their own pace. Through advanced placement, credit by examination, flexibility of scheduling, and independent study, the program makes it possible to complete the undergraduate curriculum and initiate graduate study in less than the five years required by the standard curriculum.

Bachelor's/Master's Dual Degree Program

Drexel offers a combined BS/MS degree program for our top engineering students who want to obtain both degrees in the same time period as most students obtain a Bachelor's degree. In chemical engineering, the course sequence for BS/MS students involves additional graduate courses and electives.

Chemical Engineering Faculty

Cameron F. Abrams, PhD *(University of California, Berkeley)*. Professor. Molecular simulations in biophysics and materials; receptors for insulin and growth factors; and HIV-1 envelope structure and function.

Nicolas Alvarez, PhD *(Carnegie Mellon University)*. Assistant Professor. Phototonic crystal defect chromatography; extensional rheology of polymer/polymer composites; surfactant/polymer transport to fluid and solid interfaces; aqueous lubrication; interfacial instabilities.

Jason Baxter, PhD *(University of California, Santa Barbara)*. Professor. Solar cells, semiconductor nanomaterials, ultrafast spectroscopy.

Richard A. Cairncross, PhD *(University of Minnesota)*. Associate Professor. Effects of microstructure on transport and properties of polymers; moisture transport and degradation on biodegradation on biodegradable polymers; production of biofuel.

Aaron Fafarman, PhD *(Stanford University)*. Associate Professor. Photovoltaic energy conversion; solution-based synthesis of semiconductor thin films; colloidal nanocrystals; electromodulation and photomodulation spectroscopy.

Vibha Kalra, PhD *(Cornell University)*. Associate Professor. Electrodes for energy storage and conversion; supercapacitors; Li-S batteries; fuel cells; flow batteries; electrospinning for nanofibers; molecular dynamics simulations; Nanotechnology, polymer nanocomposites.

Kenneth K.S. Lau, PhD *(Massachusetts Institute of Technology) Associate Department Head*. Professor. Surface science; nanotechnology; polymer thin films and coatings; chemical vapor deposition.

Raj Mutharasan, PhD *(Drexel University) Frank A, Fletcher Professor*. Biochemical engineering; cellular metabolism in bioreactors; biosensors.

Giuseppe R. Palmese, PhD *(University of Delaware)*. George B Francis Professor. Reacting polymer systems; nanostructured polymers; radiation processing of materials; composites and interfaces.

Joshua Snyder, PhD *(Johns Hopkins University)*. Assistant Professor. Electrocatalysis (energy conversion/storage); hetergeneous catalysis corrosion (dealloying nanoporous metals); interfacial electrochemical phenomena in nanostructured materials; colloidal synthesis.

Masoud Soroush, PhD *(University of Michigan)*. Professor. Process systems engineering; polymer engineering.

John H. Speidel, BSHE, MCHE *(University of Delaware; Illinois Institute of Technology)*. Teaching Professor. Chemical process safety; process design engineering.

Maureen Tang, PhD *(University of California, Berkeley)*. Assistant Professor. Batteries and fuel cells; nonaqueous electrochemistry; charge transport at interfaces.

Michael Walters, PhD *(Drexel University)*. Assistant Teaching Professor. Undergraduate laboratory.

Stephen P. Wrenn, PhD *(University of Delaware)*. Professor. Biomedical engineering; biological colloids; membrane phase behavior and cholesterol transport.

Emeritus Faculty

Charles B. Weinberger, PhD *(University of Michigan)*. Professor Emeritus. Suspension rheology; fluid mechanics of multi-phase systems.

Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 14.0801
Standard Occupational Classification (SOC) code: 17-2051

About the Program

The civil engineering major prepares students in the fundamental principles necessary to practice this profession in any of its branches, including construction management, water resources, structural, transportation, environmental, geotechnical, and public facilities engineering.

Civil engineers are active in the planning, design, construction, research and development, operation, maintenance, and rehabilitation of large engineering systems. A particular focus is the reconstruction of the nation's infrastructure through solutions that minimize the disruption of social and natural environments.

Civil engineering graduates are grounded in the fundamental principles necessary for the practice of this profession in any of its modern branches, including construction management, water resources engineering, structural engineering, geotechnical engineering, transportation engineering, and environmental engineering.

Seven of the required courses in the discipline include integral laboratories or field projects for both educational illustration and professional practice exposure.

Careful selection of the electives specified in the curriculum can lead to a wide variety of career objectives. For instance, students with an interest in water resources engineering may elect advanced courses in hydrology, ecology, and chemistry; select senior professional electives in the geotechnical and water resources areas; and choose appropriate topics for senior design and senior seminar. Seniors, with the approval of the department head, can elect certain graduate courses.

A special feature of the major is senior design. A group of students works with a faculty advisor to develop a significant design project selected by the group. All civil engineering students participate in a design project.

Mission Statement

The civil and architectural engineering faculty are responsible for delivering an outstanding curriculum that equips our graduates with the broad technical knowledge, design proficiency, professionalism, and communications skills required for them to make substantial contributions to society and to enjoy rewarding careers.

Program Educational Objectives

Civil engineering graduates will become responsible professionals who analyze, design, construct, manage or operate built and natural infrastructure and systems, and/or advance knowledge of the field.

Student Outcomes

The department's student outcomes reflect the skills and abilities that the curriculum is designed to provide to students by the time they graduate. These are:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of the engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Additional Information

The Civil Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org).

For more information about this major, contact the Department of Civil, Architectural and Environmental Engineering. (https://drexel.edu/engineering/academics/areas-of-study-programs/cvil-engineering/)

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

General Education/Liberal Studies Requirements

CIVC 101	Introduction to Civic Engagement	1.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
UNIV E101	The Drexel Experience	1.0
General Education Requirements [*]		21.0
Free Electives		6.0
Foundation Requirements		
BIO 141	Essential Biology	4.5
CHEM 101	General Chemistry I	3.5
CHEM 102	General Chemistry II	4.5
ENGR 210	Introduction to Thermodynamics	3.0
ENGR 111	Introduction to Engineering Design & Data Analysis	3.0
ENGR 113	First-Year Engineering Design	3.0
ENGR 131	Introductory Programming for Engineers	3.0
or ENGR 132	Programming for Engineers	
ENGR 220	Fundamentals of Materials	4.0
ENGR 231	Linear Engineering Systems	3.0
ENGR 232	Dynamic Engineering Systems	3.0

MEM 202	Statics	3.0
MEM 238	Dynamics	4.0
MEM 230	Mechanics of Materials I	4.0
Senior Professional Electives [**]		18.0
Total Credits		188.5

[*] General Education Requirements (p. 215).

[**] A sequence of three courses in a major area of study is required, with a total of six 3-credit professional electives.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

BS Civil Engineering

Co-op/Career Opportunities

When students complete their co-op jobs, they are asked to write an overview of their experiences. These brief quotes are taken from some recent student reports:

Engineering construction inspector, state department of transportation: Supervised daily activities involved in the roadway construction of the [interstate] bypass. Recorded daily visual inspection reports for soil sub-base and materials placed on site. Aided senior roadway engineers in approving grade prior to asphalt placement. Used various instruments to check temperature and depths for asphalt placement. Took part in on-site discussions with contractor to clear up any daily construction problems that would hinder quality of construction. "

Construction inspector, municipal department of public property: "Inspected work performed by private contractors on city public works construction and rehabilitation projects for adherence to contract plans and specifications. Projects included health centers, police and fire stations, libraries, city hall, transit concourses, and prisons. Responsible for daily inspection reports and overall coordination for each respective project. Also responsible for reviewing bills and writing contract modifications and amendments. . .the variety of work was excellent. "

Environmental co-op, chemicals manufacturer: "Compiled data and wrote monthly regulatory reports, in charge of hazardous waste management and small projects as needed. . . . I had my own responsibilities that had an impact on the entire company. Employer was really interested in my opinion and gave me a chance to demonstrate my abilities, but also knew when to step in. Everybody was willing to answer any questions I may have had."

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities.

Dual/Accelerated Degree
Accelerated program

The Accelerated Program of the College of Engineering provides opportunities for highly talented and strongly motivated students to progress toward their educational goals essentially at their own pace. Primarily through advanced placement, credit by examination, flexibility of scheduling, and independent study, the program makes it possible to complete the undergraduate curriculum and initiate graduate study in less than the five years required by the standard curriculum.

Dual Degree Bachelor's Programs

A student completing the Bachelor of Science degree program in architectural engineering may complete additional courses (specified by the department) to earn the Bachelor of Science degree in civil engineering. (The reverse is difficult because of prerequisites in the sequence of architectural studio design courses, which begins in the sophomore year.)

Civil Engineering students can also complete a dual degree with the Bachelor of Science in Environmental Engineering.

Bachelor's/Master's Dual Degree Program

Exceptional students can also pursue a master of science degree in the same period as the bachelor of science.

For more information about this program, visit the Department's BS/MS Dual Degree Program (https://drexel.edu/engineering/academics/departments/civil-architectural-environmental-engineering/academic-programs/undergraduate/accelerated-and-dual-degree-programs/) web page.

Facilities

The Civil, Architectural, and Environmental Engineering Department laboratories provide students with fully equipped space for education and research opportunities.

Structural and Geotechnical Research Laboratory Facilities and Equipment

The geotechnical and structural engineering research labs at Drexel University provide a forum to perform large-scale experimentation across a broad range of areas including infrastructure preservation and renewal, structural health monitoring, geosynthetics, nondestructive evaluation, earthquake engineering, and novel ground modification approaches among others.

The laboratory is equipped with different data acquisition systems (MTS, Campbell Scientific, and National Instruments) capable of recording strain, displacement, tilt, load and acceleration time histories. An array of sensors including LVDTs, wire potentiometers, linear and rotational accelerometers, and load cells are also available. Structural testing capabilities include two 220kips capacity loading frames (MTS 311 and Tinius Olsen), in addition to several medium capacity testing frames (Instron 1331 and 567 and MTS 370 testing frames), two 5-kips MTS actuators for dynamic testing and one degree of freedom 22kips ANCO shake table. The laboratory also features a phenomenological physical model which resembles the dynamic features of common highway bridges and is used for field testing preparation and for testing different measurement devices.

The **Woodring Laboratory** hosts a wide variety of geotechnical, geosynthetics, and materials engineering testing equipment. The geotechnical engineering testing equipment includes Geotac unconfined compression and a triaxial compression testing device, ring shear apparatus, constant rate of strain consolidometer, an automated incremental consolidometer, an automated Geotac direct shear device and a large-scale consolidometer (12" by 12" sample size). Other equipment includes a Fisher pH and conductivity meter as well as a Brookfield rotating viscometer. Electronic and digital equipment include FLIR SC 325 infrared camera for thermal measurements, NI Function generators, acoustic emission sensors and ultrasonic transducers, signal conditioners, and impulse hammers for nondestructive testing.

The geosynthetics testing equipment in the Woodring lab includes pressure cells for incubation and a new differential scanning calorimetry device including the standard-OIT. Materials testing equipment that is available through the materials and chemical engineering departments includes a scanning electron microscope, liquid chromatography, and Fourier transform infrared spectroscopy.

The Building Science and Engineering Group (BSEG) research space is also located in the Woodring Laboratory. This is a collaborative research unit working at Drexel University with the objective of achieving more comprehensive and innovative approaches to sustainable building design and operation through the promotion of greater collaboration between diverse sets of research expertise. Much of the BSEG work is simulation or model based. Researchers in this lab also share some instrumentation with the DARRL lab (see below).

Environmental Engineering Laboratory Facilities and Equipment

The environmental engineering laboratories at Drexel University allow faculty and student researchers access to state-of-the-art equipment needed to execute a variety of experiments. These facilities are located in the Alumni Engineering Laboratory Building and includes approximately 2000 SF shared laboratory space, and a 400 SF clean room for cell culture and PCR.

The major equipment used in this laboratory space consists of: Roche Applied Science LightCyclerÔ 480 Real-time PCR System, Leica fluorescence microscope with phase contrast and video camera, Spectrophotometer, Zeiss stereo microscope with heavy duty boom stand, fluorescence capability, and a SPOT cooled color camera, BIORAD iCycler thermocycler for PCR, gel readers, transilluminator and electrophoresis setups, temperature controlled circulator with immersion stirrers suitable for inactivation studies at volumes up to 2 L per reactor, BSL level 2 fume hood, laminar hood, soil sampling equipment, Percival Scientific environmental chamber (model 1-35LLVL), custom-built rainfall simulator.

The **Drexel Air Resources Research Laboratory (DARRL)** is located in the Alumni Engineering Laboratory Building and contains state-of-the-art aerosol measurement instrumentation including a Soot Particle Aerosol Mass Spectrometer (Aerodyne Research Inc.), mini-Aerosol Mass Spectrometer, (Aerodyne Research Inc.), Scanning Electrical Mobility Sizer (Brechtel Manufacturing), Scanning Mobility Particle Sizer (TSI Inc.), Fast Mobility Particle Sizer (TSI Inc.), Centrifugal Particle Mass Analyzer (Cambustion Ltd.), GC-FID, ozone monitors, and other instrumentation. These instruments are used for the detailed characterization of the properties of particles less than 1 micrometer in diameter including: chemical composition, size, density, and shape or morphology.

In addition to the analytical instrumentation in DARRL, the laboratory houses several reaction chambers. These chambers are used for controlled experiments meant to simulate chemical reactions that occur in the indoor and outdoor environments. The reaction chambers vary in size from 15 L to 1 m3, and allow for a range of experimental conditions to be conducted in the laboratory.

Computer Equipment and Software

The Civil, Architectural, and Environmental Engineering (CAEE) Department at Drexel University has hardware and software capabilities

for students to conduct research. The CAEE department operates a computer lab that is divided into two sections; one open access room, and a section dedicated to teaching. The current computer lab has 25 desktop computers that are recently updated to handle resource intensive GIS (Geographic Information Systems) and image processing software. There are a sufficient number of B&W and color laser printers that can be utilized for basic printing purposes.

Drexel University has site-licenses for a number of software, such as ESRITM ArcGIS 10, Visual Studio, SAP 2000, STAAD, Abaqus and MathworksTM Matlab. The Information Resources & Technology (IRT) department at Drexel University provides support (e.g., installation, maintenance and troubleshooting) to the above-mentioned software. It is currently supporting the lab by hosting a software image configuration that provides a series of commonly used software packages, such as MS Office and ADOBE Acrobat among others. As a part of ESRI campus license (the primary maker of GIS applications, i.e. ArcGIS) the department has access to a suite of seated licenses for GIS software with necessary extensions (e.g., LIDAR Analyst) required for conducting research.

Civil, Architectural and Environmental Engineering Faculty

Abieyuwa Aghayere, PhD *(University of Alberta)*. Professor. Structural design - concrete, steel and wood; structural failure analysis; retrofitting of existing structures; new structural systems and materials; engineering education.

Ivan Bartoli, PhD *(University of California, San Diego)*. Associate Professor. Non-destructive evaluation and structural health monitoring; dynamic identification, stress wave propagation modeling.

Robert Brehm, PhD *(Drexel University)*. Teaching Professor. International infrastructure delivery; response to natural catastrophes; risk assessment and mitigation strategies; project management techniques.

Shannon Capps, PhD *(Georgia Institute of Technology)*. Assistant Professor. Atmospheric chemistry; data assimilation; advanced sensitivity analysis; inverse modeling.

S.C. Jonathan Cheng, PhD *(West Virginia University)*. Associate Professor. Soil mechanics; geosynthetics; geotechnical engineering; probabilistic design; landfill containments; engineering education.

Eugenia Ellis, PhD, AIA *(Virginia Polytechnic Institute and State University)*. Professor. Natural and electric light sources and effects on biological rhythms and health outcomes; ecological strategies for smart, sustainable buildings of the nexus of health, energy and technology.

Yaghoob (Amir) Farnam, PhD *(Purdue University)*. Assistant Professor. Advanced and sustainable infrastructure materials; multifunctional, self-responsive and bioinspired construction materials; advanced multiscale manufacturing; characterization, and evaluation of construction materials; durability of cement-based materials.

Patricia Gallagher, PhD *(Virginia Polytechnic Institute and State University)*. Professor. Geotechnical and geoenvironmental engineering; soil improvement; soil improvement; recycled materials in geotechnics.

Patrick Gurian, PhD *(Carnegie-Mellon University)*. Professor. Risk analysis of environmental and infrastructure systems; novel adsorbent materials; environmental standard setting; Bayesian statistical modeling; community outreach and environmental health.

Charles N. Haas, PhD *(University of Illinois-Urbana) L. D. Betz Chair Professor of Environmental Engineering and Department Head, Civil, Architectural and Environmental Engineering*. Water treatment; risk assessment; bioterrorism; environmental modeling and statistics; microbiology; environmental health.

Ahmad Hamid, PhD *(McMaster University)*. Professor. Engineered masonry; seismic behavior, design and retrofit of masonry structures; development of new materials and building systems.

Simi Hoque, PhD *(University of California - Berkeley)*. Associate Professor. Computational methods to reduce building energy and environmental impacts, urban metabolism, thermal comfort, climate resilience.

Y. Grace Hsuan, PhD *(Imperial College)*. Professor. Durability of polymeric construction materials; advanced construction materials; and performance of geosynthetics.

Joseph B. Hughes, PhD *(University of Iowa)*. Distinguished University Professor. Biological processes and applications of nanotechnology in environmental systems.

L. James Lo, PhD *(University of Texas at Austin)*. Assistant Professor. Architectural fluid mechanics; building automation and autonomy; implementation of natural and hybrid ventilation in buildings; airflow distribution in buildings; large-scale air movement in an urban built environment; building and urban informatics; data-enhanced sensing and control for optimal building operation and management; novel data gathering methods for building/urban problem solving; interdisciplinary research on occupant behaviors in the built environment.

Joseph P. Martin, PhD *(Colorado State University)*. Professor. Geotechnical and geoenvironmental engineering; hydrology; transportation; waste management.

Franco Montalto, PhD *(Cornell University)*. Professor. Effects of built infrastructure on societal water needs, ecohydrologic patterns and processes, ecological restoration, green design, and water interventions.

Nariman Mostafavi, PhD *(University of Massachusetts - Amherst)*. Assistant Teaching Professor. Simulation tools for analyzing urban metabolism; environmentally responsive design; urban resilience; engineering economics; industrial ecology.

Mira S. Olson, PhD *(University of Virginia)*. Associate Professor. Peace engineering; source water quality protection and management; contaminant and bacterial fate and transport; community engagement.

Miguel A. Pando, PhD *(Virginia Polytechnic Institute and State University)*. Associate Professor. Laboratory testing of geomaterials; geotechnical aspects of natural hazards; soil-structure-interaction; geotechnical engineering.

Michael Ryan, PhD *(Drexel University) Associate Department Head of Graduate Studies*. Associate Teaching Professor. Microbial Source Tracking (MST); Quantitative Microbial Risk Assessment (QMRA); dynamic engineering systems modeling; molecular microbial biology; phylogenetics; metagenomics; bioinformatics; environmental statistics; engineering economics; microbiology; potable and waste water quality; environmental management systems.

Christopher Sales, PhD *(University of California, Berkeley)*. Associate Professor. Environmental microbiology and biotechnology; biodegradation of environmental contaminants; microbial processes for energy and resource recovery from waste; application of molecular biology, analytical chemistry and bioinformatic techniques to study environmental biological systems.

Sabrina Spatari, PhD *(University of Toronto)*. Associate Professor. Industrial ecology; development and application of life cycle assessment (LCA) and material flow analysis (MFA) methods for guiding engineering and policy decisions; specific interest in biomass and bioenergy, biofuels, and urban infrastructure.

Robert Swan Teaching Professor. Geotechnical and geosynthetic engineering; soil/geosynthetic interaction and performance; laboratory and field geotechnical/geosynthetic testing; data acquisition and instrumentation; test equipment development and test method standardization; Quality System Management (QSM) and continuous improvement.

Sharon Walker, PhD *(Yale University) Dean of the College of Engineering*. Distinguished University Professor. Water quality systems engineering.

Michael Waring, PhD *(University of Texas-Austin) Associate Department Head for Undergraduate Programs; Director of Architectural Engineering Program*. Professor. Indoor air quality and building sustainability; indoor particulate matter fate and transport; indoor chemistry and particle formation; secondary impacts of control technologies and strategies.

Jin Wen, PhD *(University of Iowa)*. Professor. Building energy efficiency; building-grid interaction; building control and operation; fault detection and diagnosis; human-building interactions; dynamic building system simulation; big data.

Aspasia Zerva, PhD *(University of Illinois - Urbana)*. Professor. Earthquake engineering; engineering seismology; structural reliability; system identification; advanced computational methods in structural analysis.

Emeritus Faculty

A. Emin Aktan, PhD *(University of Illinois at Urbana-Champaign) John Roebling Emeritus Professor of Infrastructure Studies*. Professor Emeritus. Structural engineering; health monitoring of large infrastructure systems; infrastructure evaluation; intelligent systems.

Harry G. Harris, PhD *(Cornell University)*. Professor Emeritus. Structural models; dynamics of structures, plates and shells; industrialized building construction.

James E. Mitchell, MArch *(University of Pennsylvania)*. Professor Emeritus. Architectural engineering design; building systems; engineering education.

Joseph V. Mullin, PhD *(Pennsylvania State University) Associate Department Head*. Teaching Professor. Structural engineering; failure analysis; experimental stress analysis; materials of construction; marine structures; engineering education.

Richard Weggel, PhD *(University of Illinois) Samuel S. Baxter Professor Emeritus; Civil and Environmental Engineering*. Professor Emeritus. Coastal engineering; hydraulics engineering; hydrology.

Richard Woodring, PhD *(University of Illinois) Dean of Engineering Emeritus*. Professor Emeritus. Structural engineering, reinforced concrete.

Computer Engineering

Major: Computer Engineering
Degree Awarded: Bachelor of Science in Computer Engineering (BSCE)
Calendar Type: Quarter
Total Credit Hours: 183.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 14.0901
Standard Occupational Classification (SOC) code: 15-1132; 15-1133; 15-1143; 17-2031

About the Program

The major provides a broad focus on electronic circuits and systems, computer architecture, computer networking, embedded systems, programming and system software, algorithms, and computer security.

Computer engineers design smaller, faster, and more reliable computers and digital systems, build computer networks to transfer data, embed microprocessors in larger physical systems such as cars and planes, work on theoretical issues in computing, and design large-scale software systems. Computer engineers may work in positions that apply computers in control systems, digital signal processing, telecommunications, and power systems, and may design very large-scale integration (VLSI) integrated circuits and systems.

The computer engineering degree program is designed to provide our students with breadth in engineering, the sciences, mathematics, and the humanities, as well as depth in both software and hardware disciplines appropriate for a computer engineer. It embodies the philosophy and style of the Drexel Engineering Curriculum, and will develop the student's design and analytical skills. In combination with the co-op experience, it opens to the student opportunities in engineering practice, advanced training in engineering or in other professions, and an entry to business and administration.

The computer engineering program's courses in ECE are supplemented with courses from the departments of Mathematics and Computer Science. Students gain the depth of knowledge of computer hardware and software essential for the computer engineer.

Mission Statement

The ECE Department at Drexel University (http://drexel.edu/ece/) serves the public and the university community by providing superior career-integrated education in electrical and computer engineering; by conducting research in these fields, to generate new knowledge and technologies; and by promoting among all its constituents professionalism, social responsibility, civic engagement and leadership.

Program Educational Objectives

The Electrical and Computer Engineering Program Educational Objectives are such that its alumni, in their early years after graduation can:

- Secure positions and continue as valued, creative, dependable, and proficient employees in a wide variety of fields and industries, in particular as computer engineers.
- Succeed in graduate and professional studies if pursued, such as engineering, science, law, medicine and business.

- Embrace and pursue lifelong learning for a successful and rewarding career.
- Act as an ambassador for the field of engineering through clear, professional communication with technical and non-technical audiences, including the general public.
- Accept responsibility for leadership roles in their profession, in their communities, and in the global society.
- Contribute to their professional discipline's body of knowledge.
- Function as responsible members of society with an awareness of the social and ethical ramifications of their work.

Student Outcomes

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of the engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Additional Information

The Computer Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org).

Additional information about the major is available on the ECE Department website (https://drexel.edu/engineering/academics/departments/electrical-computer-engineering/).

For advising questions, please contact the ECE advisor (https://drexel.edu/engineering/academics/departments/electrical-computer-engineering/resources/current-undergrad/).

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Students must take ENGL 101

General Education/Liberal Studies Requirements		
CIVC 101	Introduction to Civic Engagement	1.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0

Computer Engineering Electives		**27.0**
Free Electives		**18.0**
Total Credits		183.0

[*]   COM Elective: Choose one of the following: COM 230 or COM 310 [WI]

[**]   General Education Requirements (p. 215).

[***]   Science elective: choose one of the following: BIO 122, BIO 141, CHEM 102

Note: In addition to completing 183.0 credits, students majoring in Computer Engineering must have a 2.0 cumulative overall GPA and a 2.0 cumulative GPA in their Professional Requirements courses.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic

advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Term 1		Credits
CHEM 101	General Chemistry I	3.5
COOP 101	Career Management and Professional Development	0.0
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
ENGR 111	Introduction to Engineering Design & Data Analysis	3.0
MATH 121	Calculus I	4.0
UNIV E101	The Drexel Experience	1.0
	Term Credits	14.5
Term 2		
CIVC 101	Introduction to Civic Engagement	1.0
ENGR 131 or 132	Introductory Programming for Engineers Programming for Engineers	3.0
MATH 122	Calculus II	4.0

One ECE Elective***		3.0
Two Free Electives		6.0
	Term Credits	16.0

Total Credit: 183.0

* General Education Electives are courses taken from the COE approved list.

** COM Elective: Choose one of the following: COM 230 or COM 310 [WI]

*** ECE Electives (ECEX Elective) are at least 27.0 credits of ECE courses. At least 9.0 credits must be in ECEC courses at the 400# level or higher. Up to 12.0 credits may be taken from other approved departments.

† Science Elective: choose one of the following: BIO 122 BIO 141, CHEM 102

†† ECEC 4XX Electives are 400 level ECEC courses.

Note: In addition to completing 183.0 credits, students majoring in Computer Engineering must have a 2.0 cumulative overall GPA and a 2.0 cumulative GPA in their Professional Requirement courses.

Co-op/Career Opportunities

Drexel University's co-op program has an 80 year history and is one of the oldest and largest co-op programs in the world. Students graduate with 6-18 months of full time employment experience, depending on their choice of a 4-year or 5-year program. The majority of Computer Engineering students in ECE choose the 5-year program and graduate with 18 months of full-time work experience, and often receive a job offer from their third co-op employer or from a connection made from one of their co-op experiences.

Computer engineers work for computer and microprocessor manufacturers; manufacturers of digital devices for telecommunications, peripherals, electronics, control, and robotics; software engineering; the computer network industry; and related fields. A degree in computer engineering can also serve as an excellent foundation to pursue graduate professional careers in medicine, law, business, and government.

Graduates are also pursuing advanced studies in electrical and computer engineering, aerospace engineering, and mechanical engineering at such schools as MIT, Stanford, Princeton, Georgia Institute of Technology, University of California at Berkeley, University of Pennsylvania, and University of Maryland.

The Steinbright Career Development Center had a co-op placement rate of approximately 99% for electrical and computer engineering majors.

Co-op employers for computer engineering majors include:

- Lockheed Martin
- Comcast Corporation
- SAP America
- Susquehanna International Group LLC
- PJM Interconnection, LLC
- Dell
- National Board of Medical Examiners
- UNISYS Corporation
- Woodward McCoach, Inc.
- NAVSEA
- ClarivateAnalytics (Thomson Reuters)
- NVIDIA
- Excelon Corporation

For more information about the co-op process, please contact the Steinbright Career Development Center (http://drexel.edu/scdc/).

Dual Degree Bachelor's Program

With careful planning, students can complete both a Computer Engineering and an Electrical Engineering degree in the time usually required to complete one degree. For detailed information the student should contact the ECE advisor (http://drexel.edu/ece/academics/undergrad/advising/).

Bachelor's/Master's Dual Degree Program

Exceptional students can also pursue a master of science degree in the same period as the bachelor of science.

For more information on these and other options, visit the Department of Electrical and Computer Engineering BS/MS (http://drexel.edu/ece/academics/undergrad/bs-ms/) page.

Facilities

Drexel University and the Electrical and Computer Engineering Department are nationally recognized for a strong history of developing innovative research. Research programs in the ECE Department prepare students for careers in research and development, and aim to endow graduates with the ability to identify, analyze, and address new technical and scientific challenges. The ECE Department is well equipped with state-of-the-art facilities in each of the following ECE Research laboratories:

Research Laboratories at the ECE Department

Adaptive Signal Processing and Information Theory Research Group

The Adaptive Signal Processing and Information Theory Research Group (http://www.ece.drexel.edu/walsh/aspitrg/home.html) conducts research in the area of signal processing and information theory. Our main interests are belief/expectation propagation, turbo decoding and composite adaptive system theory. We are currently doing projects on the following topics:
i) Delay mitigating codes for network coded systems,
ii) Distributed estimation in sensor networks via expectation propagation,
iii) Turbo speaker identification,
iv) Performance and convergence of expectation propagation,
v) Investigating bounds for SINR performance of autocorrelation based channel shorteners.

Bioimage Laboratory

Uses computer gaming hardware for enhanced and affordable 3-D visualization, along with techniques from information theory and machine learning to combine the exquisite capabilities of the human visual system with computational sensing techniques for analyzing vast quantities of image sequence data.

Data Fusion Laboratory

The Data Fusion Laboratory investigates problems in multisensory detection and estimation, with applications in robotics, digital communications, radar, and target tracking. Among the projects in progress: computationally efficient parallel distributed detection architectures, data fusion for robot navigation, modulation recognition and RF scene analysis in time-varying environments, pattern recognition in biological data sequences and large arrays, and hardware realizations of data fusion architectures for target detection and target tracking.

Drexel Network Modeling Laboratory

The Drexel Network Modeling Laboratory investigates problems in the mathematical modeling of communication networks, with specific focus on wireless ad hoc networks, wireless sensor networks, and supporting guaranteed delivery service models on best effort and multipath routed networks. Typical methodologies employed in our research include mathematical modeling, computer simulation, and performance

optimization, often with the end goal of obtaining meaningful insights into network design principles and fundamental performance tradeoffs.

Drexel Power-Aware Computing Laboratory

The Power-Aware Computing Lab (http://dpac.ece.drexel.edu/) investigates methods to increase energy efficiency across the boundaries of circuits, architecture, and systems. Our recent accomplishments include the Sigil profiling tool, scalable modeling infrastructure for accelerator implementations, microarchitecture-aware VDD gating algorithms, an accelerator architecture for ultrasound imaging, evaluation of hardware reference counting, hardware and operating system support for power-agile computing, and memory systems for accelerator-based architectures.

Drexel University Nuclear Engineering Education Laboratory

The field of nuclear engineering encompasses a wide spectrum of occupations, including nuclear reactor design, medical imaging, homeland security, and oil exploration.The Drexel University Nuclear Engineering Education Laboratory (DUNEEL) provides fundamental hands on understanding for power plant design and radiation detection and analysis.Software based study for power plant design, as well as physical laboratory equipment for radiation detection, strengthen the underlying concepts used in nuclear engineering such that the student will comprehend and appreciate the basic concepts and terminology used in various nuclear engineering professions. Additionally, students use the laboratory to develop methods for delivering remote, live time radiation detection and analysis. The goal of DUNEEL is to prepare students for potential employment in the nuclear engineering arena.

Drexel VLSI Laboratory

The Drexel VLSI Laboratory investigates problems in the design, analysis, optimization and manufacturing of high performance (low power, high throughput) integrated circuits in contemporary CMOS and emerging technologies. Suited with industrial design tools for integrated circuits, simulation tools and measurement beds, the VLSI group is involved with digital and mixed-signal circuit design to verify the functionality of the discovered novel circuit and physical design principles. The Drexel VLSI laboratory develops design methodologies and automation tools in these areas, particularly in novel clocking techniques, featuring resonant clocking, and interconnects, featuring wireless interconnects.

Drexel Wireless Systems Laboratory

The Drexel Wireless Systems Laboratory (DWSL) contains an extensive suite of equipment for constructing, debugging, and testing prototype wireless communications systems. Major equipment within DWSL includes:

- three software defined radio network testbeds (HYDRA, USRP, and WARP) for rapidly prototyping radio, optical and ultrasonic communications systems,
- a TDK RF anechoic chamber and EMSCAN desktop antenna pattern measurement system,
- a materials printer and printed circuit board milling machine for fabricating conformal antennas and
- wireless protocol conformance testing equipment from Aeroflex.

The lab is also equipped with network analyzers, high speed signal generators, oscilloscopes, and spectrum analyzers as well as several Zigbee development platforms for rapidly prototyping sensor networks.

DWSL personnel also collaborate to create wearable, fabric based transceivers through collaboration with the Shima Seiki Haute Laboratory in the Drexel ExCITe Center.The knitting equipment at Drexel includes sixteen SDS-ONE APEX3 workstations and four state-of-the-art knitting machines. The workstations accurately simulate fabric construction and provide researchers and designers the opportunity to program, create and simulate textile prototypes, import CAD specifications of final products, and produce made-to-measure or mass-produced pieces on Shima Seiki knitting machines.For testing smart textiles for biomedical, DWSL personnel also have collaborators in the Center for Interdisciplinary Clinical Simulation and Practice (CICSP) in the Drexel College of Medicine which provides access to medical mannequin simulators.

Ecological and Evolutionary Signal-processing and Informatics Laboratory

The Ecological and Evolutionary Signal-processing and Informatics Laboratory (EESI) seeks to solve problems in high-throughput genomics and engineer better solutions for biochemical applications. The lab's primary thrust is to enhance the use of high-throughput DNA sequencing technologies with pattern recognition and signal processing techniques. Applications include assessing the organism content of an environmental sample, recognizing/classifying potential and functional genes, inferring environmental factors and inter-species relationships, and inferring microbial evolutionary relationships from short-read DNA/RNA fragments. The lab also investigates higher-level biological systems such as modeling and controlling chemotaxis, the movement of cells.

Electric Power Engineering Center

This newly established facility makes possible state-of-the-art research in a wide variety of areas, ranging from detailed theoretical model study to experimental investigation in its high voltage laboratories. The mission is to advance and apply scientific and engineering knowledge associated with the generation, transmission, distribution, use, and conservation of electric power. In pursuing these goals, this center works with electric utilities, state and federal agencies, private industries, nonprofit organizations and other universities on a wide spectrum of projects. Research efforts, both theoretical and experimental, focus on the solution of those problems currently faced by the electric power industry. Advanced concepts for electric power generation are also under investigation to ensure that electric power needs will be met at the present and in the future.

Electronic Design Automation Facility

Industrial-grade electronic design automation software suite and intergrated design environment for digital, analog and mixed-signal systems development. Field Programmable Gate Array (FPGA) development hardware. Most up-to-date FPGA/embedded system development hardware kits. Printed circuit board production facility. Also see Drexel VLSI Laboratory.

Microwave-Photonics Device Laboratories

The laboratory is equipped with test and measurement equipment for high-speed analog and digital electronics and fiber optic systems. The test equipment includes network analyzers from Agilent (100kHz- 1.3 GHz and 45 Mhz-40 GHz), and Anritsu (45 MHz-6 GHz); spectrum analyzers from Tektronix, HP, and Agilent with measurement capability of DC to 40 GHz and up to 90 GHz using external mixers; signal generators and communication channel modulators from HP, Rhode-Schwartz, Systron Donner, and Agilent; microwave power meter and sensor heads, assortment of passive and active microwave components up to 40 GHz ;

data pattern generator and BER tester up to 3Gb/s; optical spectrum analyzer from Anritsu and power meters from HP; single and multimode fiber optic based optical transmitter and receiver boards covering ITU channels at data rates up to 10Gb/s; passive optical components such as isolator, filter, couplers, optical connectors and fusion splicer; LPKF milling machine for fabrication of printed circuit boards; wire-bonding and Cascade probe stations; Intercontinental test fixtures for testing of MMIC circuits and solid-state transistors; state-of-the-art microwave and electromagnetic CAD packages such as Agilent ADS, ANSYS HFSS, and COMSOL multi-physics module.

Music and Entertainment Technology Laboratory

The Music and Entertainment Technology Laboratory (MET-lab) is devoted to research in digital media technologies that will shape the future of entertainment, especially in the areas of sound and music. We employ digital signal processing and machine learning to pursue novel applications in music information retrieval, music production and processing technology, and new music interfaces. The MET-lab is also heavily involved in outreach programs for K-12 students and hosts the Summer Music Technology program, a one-week learning experience for high school students. Lab facilities include a sound isolation booth for audio and music recording, a digital audio workstation running ProTools, two large multi-touch display interfaces of our own design, and a small computing cluster for distributed processing.

NanoPhotonics+ Lab

Our research is primarily in the area of nanophotonics with a focus on the nanoscale interaction of light with matter. Interests include: liquid crystal/polymer composites for gratings, lenses and HOEs; liquid crystal interactions with surfaces and in confined nanospaces; alternative energy generation through novel photon interactions; ink-jet printed conducting materials for RF and photonic applications; and the creation and development of smart textiles technologies including soft interconnects, sensors, and wireless implementations.

Opto-Electro-Mechanical Laboratory

This lab concentrates on the system integration on optics, electronics, and mechanical components and systems, for applications in imaging, communication, and biomedical research. Research areas include: Programmable Imaging with Optical Micro-electrical-mechanical systems (MEMS), in which microscopic mirrors are used to image light into a single photodetector; Pre-Cancerous Detection using White Light Spectroscopy, which performs a cellular size analysis of nuclei in tissue; Free-space Optical Communication using Space Time Coding, which consists of diffused light for computer-to-computer communications, and also tiny lasers and detectors for chip-to-chip communication; Magnetic Particle Locomotion, which showed that particles could swim in a uniform field; and Transparent Antennas using Polymer, which enables antennas to be printed through an ink-jet printer.

Plasma and Magnetics Laboratory

Research is focused on applications of electrical and magnetic technologies to biology and medicine. This includes the subjects of non-thermal atmospheric pressure plasma for medicine, magnetic manipulation of particles for drug delivery and bio-separation, development of miniature NMR sensors for cellular imaging and carbon nanotube cellular probes.

Power Electronics Research Laboratory

The Power Electronics Research Laboratory (PERL) is involved in circuit and design simulation, device modeling and simulation, and experimental testing and fabrication of power electronic circuits. The research and development activities include electrical terminations, power quality, solar photovoltaic systems, GTO modeling, protection and relay coordination, and solid-state circuit breakers. The analysis tools include EMPT, SPICE, and others, which have been modified to incorporate models of such controllable solid-state switches as SCRs, GTOs, and MOSFETs. These programs have a wide variety and range of modeling capabilities used to model electromagnetics and electromechanical transients ranging from microseconds to seconds in duration. The PERL is a fully equipped laboratory with 42 kVA AC and 70 kVA DC power sources and data acquisition systems, which have the ability to display and store data for detailed analysis. Some of the equipment available is a distribution and HV transformer and three phase rectifiers for power sources and digital oscilloscopes for data measuring and experimental analysis. Some of the recent studies performed by the PERL include static VAR compensators, power quality of motor controllers, solid-state circuit breakers, and power device modeling which have been supported by PECO, GE, Gould, and EPRI.

Testbed for Power-Performance Management of Enterprise Computing Systems

This computing testbed is used to validate techniques and algorithms aimed at managing the performance and power consumption of enterprise computing systems. The testbed comprises a rack of Dell 2950 and Dell 1950 PowerEdge servers, as well as assorted desktop machines, networked via a gigabit switch. Virtualization of this cluster is enabled by VMWare's ESX Server running the Linux RedHat kernel. It also comprises of a rack of ten Apple Xserve machines networked via a gigabit switch. These servers run the OS X Leopard operating systems and have access to a RAID with TBs of total disk capacity.

Computer Engineering Faculty

Tom Chmielewski, PhD *(Drexel University)*. Teaching Professor. Modeling and simulation of electro-mechanical systems; optimal, adaptive and non-linear control; DC motor control; system identification; kalman filters (smoothing algorithms, tracking); image processing; robot design; biometric technology and design of embedded systems for control applications utilizing MATLAB and SIMULINK

Fernand Cohen, PhD *(Brown University)*. Professor. Surface modeling; tissue characterization and modeling; face modeling; recognition and tracking.

Andrew Cohen, PhD *(Rensselaer Polytechnic Institute)*. Associate Professor. Image processing; multi-target tracking; statistical pattern recognition and machine learning; algorithmic information theory; 5-D visualization

Kapil Dandekar, PhD *(University of Texas-Austin) Director of the Drexel Wireless Systems Laboratory (DWSL); Associate Dean of Research, College of Engineering.* Professor. Cellular/mobile communications and wireless LAN; smart antenna/MIMO for wireless communications; applied computational electromagnetics; microwave antenna and receiver development; free space optical communication; ultrasonic communication; sensor networks for homeland security; ultrawideband communication.

Afshin Daryoush, ScD *(Drexel University)*. Professor. Digital and microwave photonics; nonlinear microwave circuits; RFIC; medical imaging.

Anup Das, PhD *(Universit of Singapore)*. Assistant Professor. Design of algorithms for neuromorphic computing, particularly using spiking neural networks, dataflow-based design of neuromorphic computing system, design of scalable computing system; hardware-software co-design and management, and thermal and power management of many-core embedded systems

Bruce A. Eisenstein, PhD *(University of Pennsylvania)*. Arthur J. Rowland Professor of Electrical and Computer Engineering. Pattern recognition; estimation; decision theory.

Adam K. Fontecchio, PhD *(Brown University) Director, Center for the Advancement of STEM Teaching and Learning Excellence (CASTLE)*. Professor. Electro-optics; remote sensing; active optical elements; liquid crystal devices.

Gary Friedman, PhD *(University of Maryland-College Park) Associate Department Head for Graduate Affairs*. Professor. Biological and biomedical applications of nanoscale magnetic systems.

Allon Guez, PhD *(University of Florida)*. Professor. Intelligent control systems; robotics, biomedical, automation and manufacturing; business systems engineering.

Peter R. Herczfeld, PhD *(University of Minnesota)*. Professor. Lightwave technology; microwaves; millimeter waves; fiberoptic and integrated optic devices.

Leonid Hrebien, PhD *(Drexel University)*. Professor. Tissue excitability; acceleration effects on physiology; bioinformatics.

Nagarajan Kandasamy, PhD *(University of Michigan) Associate Department Head for Undergraduate Affairs*. Associate Professor. Embedded systems, self-managing systems, reliable and fault-tolerant computing, distributed systems, computer architecture, and testing and verification of digital systems.

Youngmoo Kim, PhD *(MIT) Director, Expressive and Creative Interactive Technologies (ExCITe) Center*. Professor. Audio and music signal processing, voice analysis and synthesis, music information retrieval, machine learning.

Fei Lu, PhD *(University of Michigan)*. Assistant Professor. Power electronics; wireless power transfer technology for the high-power electric vehicles and the low-power electronic devices.

Karen Miu, PhD *(Cornell University)*. Professor. Power systems; distribution networks; distribution automation; optimization; system analysis.

Bahram Nabet, PhD *(University of Washington)*. Professor. Optoelectronics; fabrication and modeling; fiber optic devices; nanoelectronics; nanowires.

Prawat Nagvajara, PhD *(Boston University)*. Associate Professor. System on a chip; embedded systems; power grid computation; testing of computer hardware; fault-tolerant computing; VLSI systems; error control coding.

Dagmar Niebur, PhD *(Swiss Federal Institute of Technology)*. Associate Professor. Intelligent systems; dynamical systems; power system monitoring and control.

Christopher Peters, PhD *(University of Michigan)*. Teaching Professor. Nuclear reactor design; ionizing radiation detection; nuclear forensics; power plant reliability and risk analysis; naval/marine power and propulsion; directed energy/high power microwaves; nonstationary signal processing; radar; electronic survivability/susceptibility to harsh environments; electronic warfare

Karkal Prabhu, PhD *(Harvard University)*. Teaching Professor. Computer engineering education; computer architecture; embedded systems

Gail L. Rosen, PhD *(Georgia Institute of Technology)*. Associate Professor. Signal processing, signal processing for biological analysis and modeling, bio-inspired designs, source localization and tracking.

Ioannis Savidis, PhD *(University of Rochester)*. Associate Professor. Analysis, modeling, and design methodologies for high performance digital and mixed-signal integrated circuits; Emerging integrated circuit technologies; Electrical and thermal modeling and characterization, signal and power integrity, and power and clock delivery for 3-D IC technologies

Kevin J. Scoles, PhD *(Dartmouth College) Associate Dean for Undergraduate Affairs*. Associate Professor. Microelectronics; electric vehicles; solar energy; biomedical electronics.

Harish Sethu, PhD *(Lehigh University)*. Associate Professor. Protocols, architectures and algorithms in computer networks; computer security; mobile ad hoc networks; large-scale complex adaptive networks and systems.

James Shackleford, PhD *(Drexel University)*. Associate Professor. Medical image processing, high performance computing, embedded systems, computer vision, machine learning

P. Mohana Shankar, PhD *(Indian Institute of Technology) Allen Rothwarf Professor of Electrical and Computer Engineering*. Professor. Wireless communications; biomedical ultrasonics; fiberoptic bio-sensors.

Matthew Stamm, PhD *(University of Maryland, College Park)*. Associate Professor. Information Security; multimedia forensics and anti-forensics; information verification; adversarial dynamics; signal processing

Baris Taskin, PhD *(University of Pittsburgh)*. Professor. Very large-scal integration (VLSI) systems, computer architecture, circuits and systems, electronic design automation (EDA), energy efficient computing.

John Walsh, PhD *(Cornell University)*. Associate Professor. Bounding the region of entropic vectors and its implications for the limits of communication networks, big data distributed storage systems, and graphical model based machine learning; efficient computation and analysis of rate regions for network coding and distributed storage; code construction, polyhedral computation, hierarchy, and symmetry

Steven Weber, PhD *(University of Texas-Austin) Department Head*. Professor. Mathematical modeling of computer and communication networks, specifically streaming multimedia and ad hoc networks.

Jaudelice de Oliveira, PhD *(Georgia Institute of Technology)*. Associate Professor. Software-defined networking; social and economic networks; network security; design and analysis of protocols, algorithms and architectures in computer networks, particularly solutions for the Internet of Things

Emeritus Faculty

Suryadevara Basavaiah, PhD *(University of Pennsylvania)*. Professor Emeritus. Computer engineering; computer engineering education; custom circuit design; VLSI technology; process and silicon fabrication

Eli Fromm, PhD *(Jefferson Medical College)*. Professor Emeritus. Engineering education; academic research policy; bioinstrumentation; physiologic systems.

Edwin L. Gerber, PhD *(University of Pennsylvania)*. Professor Emeritus. Computerized instruments and measurements; undergraduate engineering education.

Construction Management

Major: Construction Management
Degree Awarded: Bachelor of Science in Construction Management (BSCMGT)
Calendar Type: Quarter
Total Credit Hours: 186.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.2001
Standard Occupational Classification (SOC) code: 11-9021

About the Program

Construction management is a dynamic profession that is a combination of art and science. While an understanding of the technical aspects of construction is extremely important, it is also essential that construction professionals have knowledge of the business and management aspects of the profession. While construction has traditionally been a very conservative industry, the increasing rate of technological development and competition in the industry serves to accelerate the development of new construction methods, equipment, materials, and management techniques. As a result of these forces, there is an increasing need for innovative and professionally competent construction professionals.

The Construction Management major prepares students for all phases of operation and management of the construction organization including cost estimating, project scheduling, and planning, in addition to technology courses, sustainability, BIM and Virtual Design and Construction. Students are able to choose from a wide range of subjects in the social sciences and humanities to satisfy electives in the liberal arts and free elective requirements. Pursuing part-time, degree completion on average takes six years.

Students in Drexel's Construction Management program receive broad academic, technical, business, and construction management courses that are designed to produce well-rounded construction professionals. Students interested in extending their construction management studies into real estate development should consider the concentration in real estate. This concentration in real estate is designed for students to attain the knowledge and skills required to create and maintain built environments for living, working and entertainment purposes, as well as to explore issues in the real estate development process and the industry as a whole.

Program Delivery Options

Program delivery options for the Construction Management program include:

- A traditional 5-year with co-op
- 4-year with one co-op
- A part-time study option

Additional Information

For additional information, visit the Construction Management (https://drexel.edu/engineering/academics/departments/construction-engineering-project-management-systems-engineering/) website or contact:

Jessica Cruz
215.895.5943
jc635@drexel.edu

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Real Estate Concentration

The concentration in real estate provides students with training in issues such as project finance, real estate as investment, design and construction, operations, development law, environmental remediation, public policy, market analysis, and architecture. For this specialization, students take the same Construction Management (CMGT) core requirements, replacing some electives with the concentration-specific courses.

English/Communication

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Career Opportunities

The graduates of the construction management program have secured positions as project managers, estimators, schedulers, and field superintendents for general contractors, subcontractors, and construction managers. Many are employed as owner representatives working for architectural firms, consulting engineering firms, commercial companies and institutions that have needs for building or other construction projects. Some have risen to executive positions within companies while others own their own firms. Graduates have also returned to the program after obtaining positions in the field to teach and share expertise.

The College of Engineering offers a Bachelor of Science in Construction Management as well as a Certificate Program in Construction Management. Depending on student goals, each option provides a strong educational foundation for successful performance and/or entrance into the construction industry.

Employers

Some of the companies that have hired Drexel students as co-op or full-time employees:

- Gilbane Building Company
- L.F. Driscoll Construction Company
- Allan Myers
- Pennoni Associates
- Brandywine Realty Trust
- Turner Construction Company
- Intech Construction Managers
- Urban Engineers, Inc.

Potential Careers

Construction Manager: Coordinates a venture from its initial development through final construction. Develops a schedule and ensures the project is completed on time and within budget. Obtains necessary licenses and permits and oversees the progress of the project.

Cost Estimator: Prepares information about costs that are necessary for a business to bid on a contract or to determine the profitability of a proposed product. Assembles information about factors that can influence costs such as materials, labor, location, and special machinery requirements, including computer hardware and software.

Project Manager: Develops requirements, budgets, and timetables for a firm's construction plans to ensure that the projects are successful. Determines the tasks to complete, assigns responsibilities to team members, and sees the project through from conception to completion.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more information on career opportunities.

Construction Management Faculty

Jeffrey Beard, PhD *(Georgia Institute of Technology)*. Associate Clinical Professor. Project and Program Management; Entrepreneurship in design and construction; Integrated project delivery systems; History of engineering and construction; Sustainable design and construction.

Douglas Carney, MBA, AIA *(Eastern University)*. Clinical Professor. Architecture; Contract management; Master planning; Site analysis; Feasibility and zoning issues; Space needs and program development; Code analysis and compliance studies; project scheduling.

Johanna Casale, PhD *(Rutgers University)*. Assistant Teaching Professor. Engineering education, first year design, structural aspects of construction.

Charles Cook, PhD *(New York University)*. Assistant Clinical Professor. Construction management; project management; leadership and teambuilding; oral and written communication.

Christine M. Fiori, PhD *(Drexel University) Program Director*. Clinical Professor. Improving the delivery of safety education in construction curriculum; Ancient construction techniques; Design and construction in developing countries; Leadership in construction; Workforce development

Kathleen M. Short, PhD *(Virginia Tech)*. Assistant Teaching Professor. Workforce development and women in construction; transformative safety leadership; construction education.

Electrical Engineering

Major: Electrical Engineering
Degree Awarded: Bachelor of Science in Electrical Engineering (BSEE)
Calendar Type: Quarter
Total Credit Hours: 184.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 14.1001
Standard Occupational Classification (SOC) code: 17-2071

About the Program

Electrical engineers contribute to industry and research in diverse areas such as electronic circuits, lasers and photonics, semiconductor devices, computer and communication networks, wireless networks, biomedical engineering, bioinformatics, machine learning, automation and control, and power and energy systems. The electrical engineering major emphasizes the fundamentals of electrical engineering, hands-on learning, and flexibility in course selection to satisfy diverse career goals.

Students choose one or more areas of study beginning in their pre-junior year.

State-of-the-art interdisciplinary courses have been developed to prepare the Drexel engineer for the technical challenges and the business atmosphere of the 21st century. Strong emphasis is given to the role of the engineer in the global competitive economy, and to the need to work closely with experts and practitioners in many fields.

Students can choose courses in various areas of study, including telecommunications, digital signal processing, electronics, automation, and power and systems and control.

Mission Statement

The ECE Department at Drexel University serves the public and the university community by providing superior career-integrated education in electrical and computer engineering; by conducting research in these fields, to generate new knowledge and technologies; and by promoting among all its constituents professionalism, social responsibility, civic engagement and leadership.

Program Educational Objectives

The Electrical and Computer Engineering Program Educational Objectives are that its alumni in their early years after graduation:

- Secure positions and continue as valued, creative, dependable, and proficient employees in a wide variety of fields and industries, in particular as electrical engineers.
- Succeed in graduate and professional studies if pursued, such as engineering, science, law, medicine, and business.
- Embrace and pursue lifelong learning for a successful and rewarding career.
- Act as an ambassador for the field of engineering through clear, professional communication with technical and non-technical audiences, including the general public.
- Accept responsibility for leadership roles in their profession, in their communities, and in the global society.
- Contribute to their professional discipline's body of knowledge.
- Function as responsible members of society with an awareness of the social and ethical ramifications of their work.

Student Outcomes

The department's student outcomes reflect the skills and abilities that the curriculum is designed to provide to students by the time they graduate. These are:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of the engineering solutions in global, economic, environmental, and societal contexts

5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Areas of Study

Telecommunications and Digital Signal Processing (DSP)

Telecommunications and digital signal processing (DSP) are two of the fastest-growing fields of electrical engineering. The telecommunications and DSP areas of study prepare students for mastery of fundamental and applied knowledge in the theory and the technology of the transmission and processing of information-bearing signals such as voice, audio, data, images, and video. The curriculum includes core courses in electromagnetic propagation, communication devices and media, signal processing, analog and digital communication. Complementary electives can be taken in computers, electronics, control systems, and electric power systems.

Career opportunities include design and development of digital communications systems and telephony, speech recognition systems, fiber-optic networks, digital radio, medical diagnostic image processing, high-definition television, cellular and wireless communications, satellite communications, networked multimedia communications, and personal communication systems.

Electronics

The electronics area of study constitutes the study of electronic and optical semiconductor devices; analog and digital electronic circuits; and generation, transmission, and reception of information both in optical and microwave frequency ranges and guided or free-space conditions.

Career opportunities include jobs in telecommunications (optical, wireless, wired, satellite, and radar), VLSI (analog and digital), aerospace, remote sensing and instrumentation, computer circuitry interface, biomedical instrumentation, semiconductor device fabrication, and transportation.

Power and Systems/Control

Power and Systems/Control has at its core the areas of controls engineering and electric power engineering, the classic core of electrical engineering, and exploits the synergies between these two areas. These areas of study explores subjects such as modeling, analysis and control of dynamic systems including power systems, planning and optimization, electromechanical energy conversion, motor operation and control, transformers, power electronics, sensors and actuators, and the electrical and economic structure of the power industry. These areas of study offer access to two state-of-the-art laboratories. In the Interconnected Power System Laboratory, students can operate and control a small power system through the fusing of computer software and hardware technology with high-voltage, high-power technology. The Ortlip Systems Laboratory houses various experiments in sensing, feedback, and control. Both laboratories stress the use of modeling software, especially MATLAB, and the integrated use of computers and hardware.

Career opportunities include options ranging from manufacturing, the power industry (generation, transmission, distribution, marketing, and consumption), robotics, and transportation to Wall Street.

Additional Information

The Electrical Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org).

Additional information about the major is available on the ECE Department website (https://drexel.edu/engineering/academics/departments/electrical-computer-engineering/).

For advising questions, please contact the ECE advisor (https://drexel.edu/engineering/academics/departments/electrical-computer-engineering/resources/current-undergrad/).

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

In addition to completing 184.0 credits, students majoring in electrical engineering student must have a 2.0 cumulative overall GPA and a 2.0 cumulative GPA in their Electrical Engineering courses.

General Education/Liberal Studies Requirements

CIVC 101	Introduction to Civic Engagement	1.0

ECE Elective***		3.0
ECEP/S/E 4XX Elective		4.0
General Education Elective*		3.0
Free Elective		3.0
	Term Credits	15.0
Term 11		
ECE 492 [WI]	Senior Design Project II	2.0
ECE Elective***		3.0
ECEP/S/E 4XX Elective		4.0
General Education Elective*		3.0
Free Elective		3.0
	Term Credits	15.0
Term 12		
ECE 493	Senior Design Project III	4.0
ECE Elective***		3.0
ECEP/S/E 4XX Elective		4.0
Free Elective		3.0
	Term Credits	14.0

Total Credit: 184.0

* General Education Electives must be taken from the COE approved list.

** The math elective is a 3.0-4.5 credit course from MATH at a 200-level or higher. MATH 291 (*Complex & Vector Analysis*) is recommended for EE majors.

*** ECE Electives (ECEX Elective) are at least 42.0 credits of ECE courses. At least 9.0 credits must be in the major at the 400#level or higher. Up to 12.0 credits may be taken from other approved departments.

† Sophomore Engineering Elective - Choose one of the following: ENGR 210, ECES 201, MATH 221, and CHEM 103

†† COM Elective: Choose one of the following: COM 230 or COM 310 [WI]

††† Science Elective - Choose one of the following: BIO 122, BIO 141, CHEM 102

Note: 184.0 credits are needed for graduation. In addition, an ECE student must have a 2.0 cumulative overall GPA and a 2.0 cumulative GPA in their ECE Professional Requirements.

Co-op/Career Opportunities

Top co-op employers for electrical engineering majors include:

- PJM Interconnection LLC
- Exelon Corporation (PECO)
- Lockheed Martin
- Woodward McCoach, Inc.
- NAVSEA
- EwingCole
- Schweitzer Engineering Laboratories Inc.
- Ametek, Inc.
- SAP America

- Comcast Corporation
- Susquehanna Int'l Group LLP
- L-3 Communications
- Philadelphia Department of Commerce
- Philadelphia Water Department

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) for more detailed information on co-op and post-graduate opportunities.

Drexel University's co-op program has an 80 year history and is one of the oldest and largest co-op programs in the world. Students graduate with 6-18 months of full time employment experience, depending on their choice of a 4-year or 5-year program. The majority of Computer Engineering students in ECE choose the 5-year program and graduate with 18 months of full-time work experience, and often receive a job offer from their third co-op employer or from a connection made from one of their co-op experiences.

Electrical engineers are employed in corporations, government agencies, and other organizations. In their work, these engineers are developers of electrical equipment for digital communications (such as satellite communication, fiber-optic networks, and coding and cryptography), mobile radio, radar and surveillance, process control, robotics, speech processing, aerospace circuitry, power generation and distribution, computer hardware and software, computer networks, sensor technology, counter-crime measures, electronic compatibility, consumer electronics, and related fields.
Graduates are also pursuing advanced studies in electrical and computer engineering, aerospace engineering, and mechanical engineering at such schools as MIT, Stanford, Princeton, Georgia Institute of Technology, University of California at Berkeley, University of Pennsylvania, and University of Maryland.

The Steinbright Career Development Center had a co-op placement rate of approximately 99% for electrical and computer engineering majors.

A degree in electrical engineering can also serve as an excellent foundation to pursue graduate professional careers in medicine, law, business, and government.

Dual Degrees

Dual Degree Bachelor's Program

With careful planning, students can complete both an Electrical Engineering degree and a Computer Engineering degree in the time usually required to complete one degree. For detailed information the student should contact the ECE advisor (http://drexel.edu/ece/academics/undergrad/advising/).

Bachelor's/Master's Dual Degree Program

Exceptional students can also pursue a master of science degree in the same period as the bachelor of science.

For more information on these and other options, visit the Department of Electrical and Computer Engineering BS/MS (http://drexel.edu/ece/academics/undergrad/bs-ms/) page.

Facilities

Drexel University and the Electrical and Computer Engineering Department are nationally recognized for a strong history of developing innovative research. Research programs in the ECE Department prepare students for careers in research and development, and aim to endow graduates with the ability to identify, analyze, and address new technical and scientific challenges. The ECE Department is well equipped with state-of-the-art facilities in each of the following ECE Research laboratories:

Research Laboratories at the ECE Department

Adaptive Signal Processing and Information Theory Research Group

The Adaptive Signal Processing and Information Theory Research Group (http://www.ece.drexel.edu/walsh/aspitrg/home.html) conducts research in the area of signal processing and information theory. Our main interests are belief/expectation propagation, turbo decoding and composite adaptive system theory. We are currently doing projects on the following topics:
i) Delay mitigating codes for network coded systems,
ii) Distributed estimation in sensor networks via expectation propagation,
iii) Turbo speaker identification,
iv) Performance and convergence of expectation propagation,
v) Investigating bounds for SINR performance of autocorrelation based channel shorteners.

Bioimage Laboratory

Uses computer gaming hardware for enhanced and affordable 3-D visualization, along with techniques from information theory and machine learning to combine the exquisite capabilities of the human visual system with computational sensing techniques for analyzing vast quantities of image sequence data.

Data Fusion Laboratory

The Data Fusion Laboratory investigates problems in multisensory detection and estimation, with applications in robotics, digital communications, radar, and target tracking. Among the projects in progress: computationally efficient parallel distributed detection architectures, data fusion for robot navigation, modulation recognition and RF scene analysis in time-varying environments, pattern recognition in biological data sequences and large arrays, and hardware realizations of data fusion architectures for target detection and target tracking.

Drexel Network Modeling Laboratory

The Drexel Network Modeling Laboratory investigates problems in the mathematical modeling of communication networks, with specific focus on wireless ad hoc networks, wireless sensor networks, and supporting guaranteed delivery service models on best effort and multipath routed networks. Typical methodologies employed in our research include mathematical modeling, computer simulation, and performance optimization, often with the end goal of obtaining meaningful insights into network design principles and fundamental performance tradeoffs.

Drexel Power-Aware Computing Laboratory

The Power-Aware Computing Lab (http://dpac.ece.drexel.edu/) investigates methods to increase energy efficiency across the boundaries of circuits, architecture, and systems. Our recent accomplishments include the Sigil profiling tool, scalable modeling infrastructure for accelerator implementations, microarchitecture-aware VDD gating algorithms, an accelerator architecture for ultrasound imaging, evaluation of hardware reference counting, hardware and operating system support

for power-agile computing, and memory systems for accelerator-based architectures.

Drexel University Nuclear Engineering Education Laboratory

The field of nuclear engineering encompasses a wide spectrum of occupations, including nuclear reactor design, medical imaging, homeland security, and oil exploration. The Drexel University Nuclear Engineering Education Laboratory (DUNEEL) provides fundamental hands on understanding for power plant design and radiation detection and analysis. Software based study for power plant design, as well as physical laboratory equipment for radiation detection, strengthen the underlying concepts used in nuclear engineering such that the student will comprehend and appreciate the basic concepts and terminology used in various nuclear engineering professions. Additionally, students use the laboratory to develop methods for delivering remote, live time radiation detection and analysis. The goal of DUNEEL is to prepare students for potential employment in the nuclear engineering arena.

Drexel VLSI Laboratory

The Drexel VLSI Laboratory (http://vlsi.ece.drexel.edu/?title=Main_Page) investigates problems in the design, analysis, optimization and manufacturing of high performance (low power, high throughput) integrated circuits in contemporary CMOS and emerging technologies. Suited with industrial design tools for integrated circuits, simulation tools and measurement beds, the VLSI group is involved with digital and mixed-signal circuit design to verify the functionality of the discovered novel circuit and physical design principles. The Drexel VLSI laboratory develops design methodologies and automation tools in these areas, particularly in novel clocking techniques, featuring resonant clocking, and interconnects, featuring wireless interconnects.

Drexel Wireless Systems Laboratory

The Drexel Wireless Systems Laboratory (DWSL) contains an extensive suite of equipment for constructing, debugging, and testing prototype wireless communications systems. Major equipment within DWSL includes:

- three software defined radio network testbeds (HYDRA, USRP, and WARP) for rapidly prototyping radio, optical and ultrasonic communications systems,
- a TDK RF anechoic chamber and EMSCAN desktop antenna pattern measurement system,
- a materials printer and printed circuit board milling machine for fabricating conformal antennas and
- wireless protocol conformance testing equipment from Aeroflex.

The lab is also equipped with network analyzers, high speed signal generators, oscilloscopes, and spectrum analyzers as well as several Zigbee development platforms for rapidly prototyping sensor networks.

DWSL personnel also collaborate to create wearable, fabric based transceivers through collaboration with the Shima Seiki Haute Laboratory in the Drexel ExCITe Center.The knitting equipment at Drexel includes sixteen SDS-ONE APEX3 workstations and four state-of-the-art knitting machines. The workstations accurately simulate fabric construction and provide researchers and designers the opportunity to program, create and simulate textile prototypes, import CAD specifications of final products, and produce made-to-measure or mass-produced pieces on Shima Seiki knitting machines.For testing smart textiles for biomedical, DWSL personnel also have collaborators in the Center for Interdisciplinary

Clinical Simulation and Practice (CICSP) in the Drexel College of Medicine which provides access to medical mannequin simulators.

Ecological and Evolutionary Signal-processing and Informatics Laboratory

The Ecological and Evolutionary Signal-processing and Informatics Laboratory (EESI) seeks to solve problems in high-throughput genomics and engineer better solutions for biochemical applications. The lab's primary thrust is to enhance the use of high-throughput DNA sequencing technologies with pattern recognition and signal processing techniques. Applications include assessing the organism content of an environmental sample, recognizing/classifying potential and functional genes, inferring environmental factors and inter-species relationships, and inferring microbial evolutionary relationships from short-read DNA/RNA fragments. The lab also investigates higher-level biological systems such as modeling and controlling chemotaxis, the movement of cells.

Electric Power Engineering Center

This newly established facility makes possible state-of-the-art research in a wide variety of areas, ranging from detailed theoretical model study to experimental investigation in its high voltage laboratories. The mission is to advance and apply scientific and engineering knowledge associated with the generation, transmission, distribution, use, and conservation of electric power. In pursuing these goals, this center works with electric utilities, state and federal agencies, private industries, nonprofit organizations and other universities on a wide spectrum of projects. Research efforts, both theoretical and experimental, focus on the solution of those problems currently faced by the electric power industry. Advanced concepts for electric power generation are also under investigation to ensure that electric power needs will be met at the present and in the future.

Electronic Design Automation Facility

Industrial-grade electronic design automation software suite and integrated design environment for digital, analog and mixed-signal systems development. Field Programmable Gate Array (FPGA) development hardware. Most up-to-date FPGA/embedded system development hardware kits. Printed circuit board production facility. Also see Drexel VLSI Laboratory.

Microwave-Photonics Device Laboratories

The laboratory is equipped with test and measurement equipment for high-speed analog and digital electronics and fiber optic systems. The test equipment includes network analyzers from Agilent (100kHz- 1.3 GHz and 45 Mhz-40 GHz), and Anritsu (45 MHz-6 GHz); spectrum analyzers from Tektronix, HP, and Agilent with measurement capability of DC to 40 GHz and up to 90 GHz using external mixers; signal generators and communication channel modulators from HP, Rhode-Schwartz, Systron Donner, and Agilent; microwave power meter and sensor heads, assortment of passive and active microwave components up to 40 GHz ; data pattern generator and BER tester up to 3Gb/s; optical spectrum analyzer from Anritsu and power meters from HP; single and multimode fiber optic based optical transmitter and receiver boards covering ITU channels at data rates up to 10Gb/s; passive optical components such as isolator, filter, couplers, optical connectors and fusion splicer; LPKF milling machine for fabrication of printed circuit boards; wire-bonding and Cascade probe stations; Intercontinental test fixtures for testing of MMIC circuits and solid-state transistors; state-of-the-art microwave and

electromagnetic CAD packages such as Agilent ADS, ANSYS HFSS, and COMSOL multi-physics module.

Music and Entertainment Technology Laboratory

The Music and Entertainment Technology Laboratory (MET-lab) is devoted to research in digital media technologies that will shape the future of entertainment, especially in the areas of sound and music. We employ digital signal processing and machine learning to pursue novel applications in music information retrieval, music production and processing technology, and new music interfaces. The MET-lab is also heavily involved in outreach programs for K-12 students and hosts the Summer Music Technology program, a one-week learning experience for high school students. Lab facilities include a sound isolation booth for audio and music recording, a digital audio workstation running ProTools, two large multi-touch display interfaces of our own design, and a small computing cluster for distributed processing.

NanoPhotonics Laboratory

Our research is primarily in the area of nanophotonics with a focus on the nanoscale interaction of light with matter. Interests include: liquid crystal/polymer composites for gratings, lenses and HOEs; liquid crystal interactions with surfaces and in confined nanospaces; alternative energy generation through novel photon interactions; ink-jet printed conducting materials for RF and photonic applications; and the creation and development of smart textiles technologies including soft interconnects, sensors, and wireless implementations.

Opto-Electro-Mechanical Laboratory

This lab concentrates on the system integration on optics, electronics, and mechanical components and systems, for applications in imaging, communication, and biomedical research. Research areas include: Programmable Imaging with Optical Micro-electrical-mechanical systems (MEMS), in which microscopic mirrors are used to image light into a single photodetector; Pre-Cancerous Detection using White Light Spectroscopy, which performs a cellular size analysis of nuclei in tissue; Free-space Optical Communication using Space Time Coding, which consists of diffused light for computer-to-computer communications, and also tiny lasers and detectors for chip-to-chip communication; Magnetic Particle Locomotion, which showed that particles could swim in a uniform field; and Transparent Antennas using Polymer, which enables antennas to be printed through an ink-jet printer.

Plasma and Magnetics Laboratory

Research is focused on applications of electrical and magnetic technologies to biology and medicine. This includes the subjects of non-thermal atmospheric pressure plasma for medicine, magnetic manipulation of particles for drug delivery and bio-separation, development of miniature NMR sensors for cellular imaging and carbon nanotube cellular probes.

Power Electronics Research Laboratory

The Power Electronics Research Laboratory (PERL) is involved in circuit and design simulation, device modeling and simulation, and experimental testing and fabrication of power electronic circuits. The research and development activities include electrical terminations, power quality, solar photovoltaic systems, GTO modeling, protection and relay coordination, and solid-state circuit breakers. The analysis tools include EMPT, SPICE, and others, which have been modified to incorporate models of such controllable solid-state switches as SCRs, GTOs, and MOSFETs. These programs have a wide variety and range of modeling capabilities used

to model electromagnetics and electromechanical transients ranging from microseconds to seconds in duration. The PERL is a fully equipped laboratory with 42 kVA AC and 70 kVA DC power sources and data acquisition systems, which have the ability to display and store data for detailed analysis. Some of the equipment available is a distribution and HV transformer and three phase rectifiers for power sources and digital oscilloscopes for data measuring and experimental analysis. Some of the recent studies performed by the PERL include static VAR compensators, power quality of motor controllers, solid-state circuit breakers, and power device modeling which have been supported by PECO, GE, Gould, and EPRI.

Testbed for Power-Performance Management of Enterprise Computing Systems

This computing testbed is used to validate techniques and algorithms aimed at managing the performance and power consumption of enterprise computing systems. The testbed comprises a rack of Dell 2950 and Dell 1950 PowerEdge servers, as well as assorted desktop machines, networked via a gigabit switch. Virtualization of this cluster is enabled by VMWare's ESX Server running the Linux RedHat kernel. It also comprises of a rack of ten Apple Xserve machines networked via a gigabit switch. These servers run the OS X Leopard operating systems and have access to a RAID with TBs of total disk capacity.

Electrical Engineering Faculty

Tom Chmielewski, PhD *(Drexel University)*. Teaching Professor. Modeling and simulation of electro-mechanical systems; optimal, adaptive and non-linear control; DC motor control; system identification; kalman filters (smoothing algorithms, tracking); image processing; robot design; biometric technology and design of embedded systems for control applications utilizing MATLAB and SIMULINK

Fernand Cohen, PhD *(Brown University)*. Professor. Surface modeling; tissue characterization and modeling; face modeling; recognition and tracking.

Andrew Cohen, PhD *(Rensselaer Polytechnic Institute)*. Associate Professor. Image processing; multi-target tracking; statistical pattern recognition and machine learning; algorithmic information theory; 5-D visualization

Kapil Dandekar, PhD *(University of Texas-Austin) Director of the Drexel Wireless Systems Laboratory (DWSL); Associate Dean of Research, College of Engineering*. Professor. Cellular/mobile communications and wireless LAN; smart antenna/MIMO for wireless communications; applied computational electromagnetics; microwave antenna and receiver development; free space optical communication; ultrasonic communication; sensor networks for homeland security; ultrawideband communication.

Afshin Daryoush, ScD *(Drexel University)*. Professor. Digital and microwave photonics; nonlinear microwave circuits; RFIC; medical imaging.

Anup Das, PhD *(Universit of Singapore)*. Assistant Professor. Design of algorithms for neuromorphic computing, particularly using spiking neural networks, dataflow-based design of neuromorphic computing system, design of scalable computing system; hardware-software co-design and management, and thermal and power management of many-core embedded systems

Bruce A. Eisenstein, PhD *(University of Pennsylvania)*. Arthur J. Rowland Professor of Electrical and Computer Engineering. Pattern recognition; estimation; decision theory.

Adam K. Fontecchio, PhD *(Brown University) Director, Center for the Advancement of STEM Teaching and Learning Excellence (CASTLE).* Professor. Electro-optics; remote sensing; active optical elements; liquid crystal devices.

Gary Friedman, PhD *(University of Maryland-College Park) Associate Department Head for Graduate Affairs.* Professor. Biological and biomedical applications of nanoscale magnetic systems.

Allon Guez, PhD *(University of Florida)*. Professor. Intelligent control systems; robotics, biomedical, automation and manufacturing; business systems engineering.

Leonid Hrebien, PhD *(Drexel University)*. Professor. Tissue excitability; acceleration effects on physiology; bioinformatics.

Nagarajan Kandasamy, PhD *(University of Michigan) Associate Department Head for Undergraduate Affairs.* Associate Professor. Embedded systems, self-managing systems, reliable and fault-tolerant computing, distributed systems, computer architecture, and testing and verification of digital systems.

Youngmoo Kim, PhD *(MIT) Director, Expressive and Creative Interactive Technologies (ExCITe) Center.* Professor. Audio and music signal processing, voice analysis and synthesis, music information retrieval, machine learning.

Fei Lu, PhD *(University of Michigan)*. Assistant Professor. Power electronics; wireless power transfer technology for the high-power electric vehicles and the low-power electronic devices.

Karen Miu, PhD *(Cornell University)*. Professor. Power systems; distribution networks; distribution automation; optimization; system analysis.

Bahram Nabet, PhD *(University of Washington)*. Professor. Optoelectronics; fabrication and modeling; fiber optic devices; nanoelectronics; nanowires.

Prawat Nagvajara, PhD *(Boston University)*. Associate Professor. System on a chip; embedded systems; power grid computation; testing of computer hardware; fault-tolerant computing; VLSI systems; error control coding.

Dagmar Niebur, PhD *(Swiss Federal Institute of Technology)*. Associate Professor. Intelligent systems; dynamical systems; power system monitoring and control.

Christopher Peters, PhD *(University of Michigan)*. Teaching Professor. Nuclear reactor design; ionizing radiation detection; nuclear forensics; power plant reliability and risk analysis; naval/marine power and propulsion; directed energy/high power microwaves; nonstationary signal processing; radar; electronic survivability/susceptibility to harsh environments; electronic warfare

Gail L. Rosen, PhD *(Georgia Institute of Technology)*. Associate Professor. Signal processing, signal processing for biological analysis and modeling, bio-inspired designs, source localization and tracking.

Ioannis Savidis, PhD *(University of Rochester)*. Associate Professor. Analysis, modeling, and design methodologies for high performance digital and mixed-signal integrated circuits; Emerging integrated circuit technologies; Electrical and thermal modeling and characterization, signal and power integrity, and power and clock delivery for 3-D IC technologies

Kevin J. Scoles, PhD *(Dartmouth College) Associate Dean for Undergraduate Affairs.* Associate Professor. Microelectronics; electric vehicles; solar energy; biomedical electronics.

Harish Sethu, PhD *(Lehigh University)*. Associate Professor. Protocols, architectures and algorithms in computer networks; computer security; mobile ad hoc networks; large-scale complex adaptive networks and systems.

James Shackleford, PhD *(Drexel University)*. Associate Professor. Medical image processing, high performance computing, embedded systems, computer vision, machine learning

P. Mohana Shankar, PhD *(Indian Institute of Technology) Allen Rothwarf Professor of Electrical and Computer Engineering.* Professor. Wireless communications; biomedical ultrasonics; fiberoptic bio-sensors.

Jonathan E. Spanier, PhD *(Columbia University) Department Head, Mechanical Engineering and Mechanics.* Professor. Light-matter interactions in electronic materials, including ferroelectric semiconductors, complex oxide thin film science; laser spectroscopy, including Raman scattering.

Matthew Stamm, PhD *(University of Maryland, College Park)*. Associate Professor. Information Security; multimedia forensics and anti-forensics; information verification; adversarial dynamics; signal processing

Baris Taskin, PhD *(University of Pittsburgh)*. Professor. Very large-scal integration (VLSI) systems, computer architecture, circuits and systems, electronic design automation (EDA), energy efficient computing.

John Walsh, PhD *(Cornell University)*. Associate Professor. Bounding the region of entropic vectors and its implications for the limits of communication networks, big data distributed storage systems, and graphical model based machine learning; efficient computation and analysis of rate regions for network coding and distributed storage; code construction, polyhedral computation, hierarchy, and symmetry

Steven Weber, PhD *(University of Texas-Austin) Department Head.* Professor. Mathematical modeling of computer and communication networks, specifically streaming multimedia and ad hoc networks.

Jaudelice de Oliveira, PhD *(Georgia Institute of Technology)*. Associate Professor. Software-defined networking; social and economic networks; network security; design and analysis of protocols, algorithms and architectures in computer networks, particularly solutions for the Internet of Things

Emeritus Faculty

Eli Fromm, PhD *(Jefferson Medical College)*. Professor Emeritus. Engineering education; academic research policy; bioinstrumentation; physiologic systems.

Edwin L. Gerber, PhD *(University of Pennsylvania)*. Professor Emeritus. Computerized instruments and measurements; undergraduate engineering education.

Engineering

Major: Engineering
Degree Awarded: Bachelor of Science in Engineering (BSE)

Calendar Type: Quarter
Total Credit Hours: 180.5
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional (CIP) code: 14.0101
Standard Occupational Classification (SOC) code: 17-2199

About the Program

The Bachelor of Science in Engineering major is an interdisciplinary engineering major for students who do not intend to be practicing engineers. Students in the Bachelor of Science in Engineering major combine a rigorous engineering education in the College of Engineering with interdisciplinary studies in fields outside of engineering such as law, medicine, business, entrepreneurship, teaching, international studies, public policy, music, art, environmental studies, and more. The Bachelor of Science in Engineering major provides a strong grounding in the foundations of engineering, in quantitative skills, and in the analytic processes that engineers use in design of practical technology.

Drexel's Bachelor of Science in Engineering major was developed to provide students with educational and professional challenges not available in the traditional engineering curriculum.

Program Objectives

The key objectives of the Bachelor of Science in Engineering program are to provide the student with:

- a strong foundation in science and mathematics
- a foundation of the fundamentals of engineering as a discipline
- a strong grounding in a second cognate area (either technical, pre-professional, cultural, global, or another area worked out between the student and his/her advisor)
- an integrating experience that ties the technical and the cognate areas together. Examples of such experiences may be, but are not limited to, research projects, capstone designs, a public service assignment, etc.

Additional Information

Additional information about the Bachelor of Science in Engineering program is available on the Bachelor of Science in Engineering website. (https://drexel.edu/engineering/academics/areas-of-study-programs/engineering/bs/)

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

General Education/Liberal Studies Requirements

CIVC 101	Introduction to Civic Engagement	1.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
UNIV E101	The Drexel Experience	1.0
General Education Requirements [*]		24.0

Free Electives	24.0
Math and Science Requirements	
BIO 141	Essential Biology	4.5
CHEM 101	General Chemistry I	3.5
CHEM 102	General Chemistry II	4.5
MATH 121	Calculus I	4.0
MATH 122	Calculus II	4.0
MATH 200	Multivariate Calculus	4.0
PHYS 101	Fundamentals of Physics I	4.0
PHYS 102	Fundamentals of Physics II	4.0
PHYS 201	Fundamentals of Physics III	4.0
Core Curriculum Requirements	
ENGR 111	Introduction to Engineering Design & Data Analysis	3.0
ENGR 113	First-Year Engineering Design	3.0
ENGR 131	Introductory Programming for Engineers	3.0
or ENGR 132	Programming for Engineers	
ENGR 231	Linear Engineering Systems	3.0
ENGR 232	Dynamic Engineering Systems	3.0
Engineering Requirements	
Senior Design Sequence or Research Project		8.0
200+ Level Courses [**]		22.0
300+ Level Courses [**]		22.0
Technical Electives	
200+ Level Courses [***]		18.0
Total Credits		180.5

[*] General Education Requirements. (p. 215)

[**] Students may choose between AE, BMES, CHE, CAE, CS, ECE, ENGR, ENVE, MATE or MEM.

[***] Students may choose between BMES, CS, MATH, CHEM, PHYS, BIO or approved College of Engineering courses. Advisor approval is required for technical electives.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

5 YR UG Co-op Concentration

Facilities

From the start of their freshman year, students learn to use the equipment they are likely to need in their careers, such as oscilloscopes, signal generators, amplifiers, and power supplies. These skills make students more useful as co-op employees and give them a competitive advantage in their engineering careers.

Computer/Design Center

The Drexel Curriculum boasts two types of lab experience: Instrumentation and Computer Design. Instrumentation Labs introduce Engineering Majors to the sight, sound, and feel of equipment such as digital multimeters, power supplies, oscilloscopes, and waveform generators. The Computer Labs imbue these pre-engineers with knowledge of software which will be vital in today's work environment.

Engineering Technology

Major: Engineering Technology
Degree Awarded: Bachelor of Science in Engineering Technology (BSET)
Calendar Type: Quarter
Total Credit Hours: 185.5
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional (CIP) code: 15.0401; 15.9999; 15.1299; 15.0699; 15.0805
Standard Occupational Classification (SOC) code: 17-3029; 17-3027

About the Program

The degree is *Engineering Technology*, the career is *Engineering.*™

The BS in Engineering Technology program at Drexel University is organized around a practice-based learning, with extensive use of hands-on laboratory exercises in a majority of the classes. Due to its application-oriented focus, the program is suited for students who learn best by seeing concepts put into practice, "learn by doing" and plan to pursue careers in a variety of design-, production-, and service-related positions. In addition, the program teaches how the different engineering fields work together as a system.

Engineering Technology is a branch of engineering that emphasizes practice and the application of theory to solve real-world problems. Although the subject areas of core courses in both engineering technology and traditional engineering are similar, engineering technology courses stress the application of engineering techniques, while traditional engineering courses focus on the development of concepts.

Engineering Technology graduates integrate electrical, mechanical, and industrial engineering disciplines to solve problems and meet opportunities and technical challenges in healthcare, energy, transportation, communications, environmental protection, defense and homeland security, and buildings and infrastructure.

The state-of-the-art technology at the heart of the practice-based laboratories, allows graduates to be well versed in the application of modern technology to production-level engineering problems. Through real world industry-sponsored capstone projects, internships with local and international companies, students in the Engineering Technology

program frequently become closely connected to the regional industry and often end up employed with those local industries.

The following concentrations are available under the Engineering Technology degree:

- Computer Engineering Technology (p. 252)
- Electrical Engineering Technology (p. 254)
- Healthcare Engineering Technology (p. 256)
- Industrial Engineering Technology (p. 257)
- Mechanical and Manufacturing Engineering Technology (p. 259)

All students enrolled in the program are required to take general education courses, including mathematics, sciences and general education electives. All concentrations consist of core fundamental courses, technical electives, free electives, and a three-term senior design project, reflecting industrial practices. During pre-junior year, students need to choose one of the five available concentrations.

Full-time students can opt for a four-year program with a six-month co-op or a five-year program with three six-month co-op cycles.

Engineering technology graduates are uniquely qualified to serve in a variety of functions requiring traditional and nontraditional technological skills. The program also prepares students for graduate study in a variety of fields, including engineering technology, engineering management, business administration, and health-care.

Mission

The mission of the Engineering Technology program is to provide contemporary students with an academic foundation and practical education in engineering technology through an outstanding curriculum and applied research program, and the participation of our students in one of the nation's most successful cooperative educational programs.

Engineering Technology Program Educational Objectives

Produces Graduates who:

- Apply discipline-specific theory, experiments and real-world experience to interpret, analyze and solve current and emerging technical problems.
- Communicate clearly and persuasively with technical and non-technical people in oral, written and graphical forms.
- Function individually or a member of a team, or as a leader on teams to design quality systems, components or processes in a timely, responsible and creative manner.
- Demonstrate behavior consistent with professional ethics and are cognizant of social concerns as they relate to the practice of engineering technology.
- Strive for professional growth and engage in lifelong learning.

Engineering Technology Student Outcomes

The program's outcomes reflect the skills and abilities that the curriculum is designed to provide to students by the time they graduate. These are:

- an ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve broadly defined engineering problems appropriate to the discipline;

- an ability to design systems, components, or processes meeting specified needs for broadly defined engineering problems appropriate to the discipline;
- an ability to apply written, oral, and graphical communication in broadly defined technical and non-technical environments, and an ability to identify and use appropriate technical literature;
- an ability to conduct standard tests, measurements, and experiments to analyze and interpret the results to improve processes; and
- An ability to function effectively as a member or leader on a technical team.

Additional Information

The Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET. (http://www.abet.org)

For additional information, please contact Gerry Willis at gtm23@drexel.edu or 215-895-6253 or visit the Engineering Technology (https://drexel.edu/engineering/academics/departments/engineering-technology/) web page.

Career Opportunities

The Engineering Technology program is designed to meet employers' growing needs for college-educated problem-solvers, created by the technology revolution. Career opportunities in engineering technology are virtually limitless with at least 5,500 companies in the region offering jobs for engineering technologists. As a leading urban university in the Greater Philadelphia region, Drexel's location offers access to a vast number of industries including:

- Defense
- Aerospace
- Power generation
- Public utilities
- Shipbuilding
- Railroad
- Manufacturing
- Environmental
- Chemical
- Pharmaceutical
- Medical care

With the skills developed in this program, students will be able to integrate academic theory and professional practice in order to communicate effectively with engineers from different fields, scientists, the production workforce, marketing professionals, company management, and ultimately the customer. Students may participate in the design, development, testing, and manufacturing of industrial machinery, electric and electronic equipment, medical devices, consumer products, and other equipment.

Engineering technologists can serve in industry in many capacities; some fields include:

- Automation design and process engineering
- Mechanical/production engineering
- Electrical engineering and electronics
- Field engineering
- Systems engineering and management
- Environmental engineering

- Quality control
- Sales and customer service
- Systems/programming
- Testing engineering

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on post-graduate opportunities.

Engineering Technology Faculty

M. Eric Carr, MsCpE *(Drexel University)*. Instructor. Computer Engineering, Digital Design, Programmable Devices, Genetic Algorithms, Programming, Additive Manufacturing, Maker Movement.

Richard Chiou, PhD *(Georgia Institute of Technology)*. Associate Professor. Green manufacturing, mechatronics, Internet-based robotics and automation, and remote sensors and monitoring.

Yalcin Ertekin, PhD *(University of Missouri-Rolla)*. Associate Clinical Professor. High speed machining with micromachining applications, machining process optimization and condition monitoring using multiple sensors, FEA simulation with 3D solid modeling applications, rapid prototyping and reverse engineering, quality and reliability improvement through statistically designed experiments, neural networks and data mining and Taguchi methods, CNC machine tool calibration characterization of cold fastening, clinching and self-pierced riveting processes, non-invasive surgical tool design, student learning enhancement using online simulation tools.

Vladimir Genis, PhD *(Kiev State University, Ukraine) Department Head, Engineering Technology*. Professor. Ultrasound wave propagation and scattering, ultrasound imaging, electronic instrumentation, piezoelectric transducers, and engineering education. Designed and developed diagnostic and therapeutic equipment for medical applications and electronic systems and techniques for defense-related and industrial applications.

Irina Ciobanescu Husanu, PhD *(Drexel University)*. Assistant Clinical Professor. Microgravity combustion, thermal-fluid science with applications in micro-combustion, fuel cells and research of alternative and green fuels, energy conversion and renewable energy, industrial experience in aerospace engineering areas (theoretical analysis, numerical simulations and experimental investigations), design and testing of propulsion systems, mechanical instrumentation, and developing industrial applications of aircraft engines.

Lunal Khuon, PhD *(Massachusetts Institute of Technology)*. Clinical Associate Professor. Radio frequency, analog, and biomedical integrated circuits, biomedical instrumentation, neural interfaces, wireless systems, and engineering education. Research topics include area-efficient and power-efficient integrated circuits, plasmonics, adiabatic circuits, rotary clocks, and medical cyber-physical systems.

Michael Mauk, PhD, PE *(University of Delaware)*. Assistant Clinical Professor. Rapid prototyping, microfluidics, alternative energy including solar energy and photovoltaics, semiconductor materials science, nanotechnology.

Engineering Technology

Computer Engineering Technology Concentration

Effective March 15, 2020, new students are no longer being accepted into this concentration, however similar options are available. Contact Gerry Willis at gtm23@drexel.edu **or 215-895-6253 for additional information.**

The Computer Engineering Technology Concentration provides in-depth knowledge of hardware and software design, development, and maintenance. Through our solid, laboratory-centric curriculum, students gain a strong background in software and hardware development with programming languages and HDLs currently used in industry. In addition, students learn state-of-the-art techniques for developing robust technological solutions, including network- and web-based applications and Internet of Things (IoT) considerations.

The focus of the curriculum is on embedded systems design and development. From low-level gate-based design to the use of high-end microprocessors and current bus standards, students gain a thorough architectural understanding of computer systems. The curriculum includes in-depth design and analysis of combinational logic, sequential logic and state machines, microcontroller systems, microprocessor systems, and state-of-the-art computer technology.

Additional Information

For more information on the Technology minor, please contact Gerry Willis at gtm23@drexel.edu or 215-895-6253.

Computer Engineering Technology Concentration Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

General Education Requirements		
COM 230	Techniques of Speaking	3.0

Engineering Technology

Electrical Engineering Technology Concentration

The Electrical Engineering Technology (EET) concentration prepares graduates who are able to design, develop, test, or supervise the manufacturing and installation of electrical and electronic equipment, components, or systems for commercial, industrial, military, or scientific use. The EET graduates are problem solvers that can work through technical challenges and present pragmatic solutions.

The EET concentration provides an extensive background in electric circuit analysis and electronics. Students are required to study digital and analog electronics, digital computer design, analysis of electric power systems, and renewable energy.

During the first three years, students of all concentrations in engineering technology take electrical, mechanical, and industrial courses to get a solid, systematic background in different engineering fields. Students are required to complete general and concentration engineering technology courses, technical electives, and free elective courses that permit students great latitude in tailoring the program of study to match their career goals.

Additional Information

For more information, please contact Gerry Willis at gtm23@drexel.edu or 215-895-6253.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are

advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Electrical Engineering Technology Concentration

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/

english-philosophy/university-writing-program/drexel-writing-center/)
Students scheduling their courses can also conduct a search for courses
with the attribute "WI" to bring up a list of all writing-intensive courses
available that term.

Sample Plan of Study

Students participating in the cooperative education program will be
enrolled in the required prep course, COOP 101, generally three terms
before their co-op begins. As of September 2020, COOP 101 will be one
credit.

5 YR UG Co-op Concentration

Term 1		Credits
CHEM 101	General Chemistry I	3.5
EET 102	Introduction to Engineering Technology	3.0
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
MATH 110	Precalculus	3.0
PHYS 152	Introductory Physics I	4.0
UNIV E101	The Drexel Experience	1.0
	Term Credits	17.5
Term 2		
CIVC 101	Introduction to Civic Engagement	1.0
EET 208	Introduction to Programming for Embedded Systems	3.0
ENGL 102 or 112	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing English Composition II	3.0
MATH 121	Calculus I	4.0
MET 100	Graphical Communication	3.0
PHYS 153	Introductory Physics II	4.0
	Term Credits	18.0
Term 3		
COOP 101	Career Management and Professional Development	0.0
EET 209	Fundamentals of Virtual Instrumentation	3.0
ENGL 103 or 113	Composition and Rhetoric III: Themes and Genres English Composition III	3.0
MATH 122	Calculus II	4.0
MET 101	Engineering Materials	3.0
PHYS 154	Introductory Physics III	4.0
	Term Credits	17.0
Term 4		
EET 201	Circuit Analysis I	4.0
EET 333 [WI]	Non-Destructive Evaluation of Materials	4.0
MET 209	Fluid Power	4.0
STAT 201	Introduction to Business Statistics	4.0
	Term Credits	16.0

Engineering Technology

Industrial Engineering Technology Concentration

**Effective March 15, 2020, new students are no longer being accepted
into this concentration, however similar options are available.
Contact Gerry Willis at** gtm23@drexel.edu **or 215-895-6253 for
additional information.**

The industrial engineering technology concentration provides students
with knowledge and skills in management and relevant engineering
technology disciplines for manufacturing, service, and healthcare
enterprises, including automation, logistics, scheduling, simulation,
maintainability, and advanced manufacturing processes. Students learn
how to co-ordinate, integrate, and optimize people, machines, materials,
and energy to improve efficiency, sustainability, quality, and environment.

During the first three years, students of all concentrations in engineering
technology take electrical, mechanical, and industrial courses to get a
solid, systematic background in different engineering fields. Students are
required to complete general and concentration engineering technology

courses, technical electives, and free elective courses that permit students great latitude in tailoring the program of study to match their career goals.

Additional Information

For more information, please contact Gerry Willis at gtm23@drexel.edu or 215-895-6253.

Industrial Engineering Technology Concentration

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Industrial Engineering Technology Concentration

Environmental Engineering

Major: Environmental Engineering
Degree Awarded: Bachelor of Science in Environmental Engineering (BSENE)
Calendar Type: Quarter
Total Credit Hours: 190.5
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 14.1401
Standard Occupational Classification (SOC) code: 17-2081

About the Program

Environmental engineering is concerned with the design of systems, policies and processes to protect human, animal, and plant populations from the effects of adverse environmental factors, including toxic chemicals and wastes, pathogenic bacteria, and global warming, and to design systems that enable a more sustainable society.

Environmental engineers design systems, processes and policies to minimize the effect of human activities on the physical and living environment so that we can all live more healthy and sustainable lives. Environmental engineers work to meet human needs for resources in ways to minimize impact on the ecosystem and adverse effects on health. This field builds on other branches of engineering, especially civil, chemical, and mechanical engineering. It also builds on information from many of the sciences, such as chemistry, physics, hydrology, geology, atmospheric science, and several specializations of biology (ecology, microbiology, and biochemistry). Students who elect to study environmental engineering will become familiar with many of these areas because maintaining and improving the environment requires that problems be evaluated and solutions found using a multidisciplinary approach.

Mission

The mission of the undergraduate environmental engineering program at Drexel University is to graduate outstanding engineers who can identify, evaluate and solve complex environmental problems, and who desire to continue their education on a lifelong basis.

Program Educational Objectives

Environmental engineering graduates will become responsible professionals who analyze, design, construct, manage or operate facilities or systems to protect or enhance the environment of people and other living things, or advance knowledge of the field.

Student Outcomes

The department's student outcomes reflect the skills and abilities that the curriculum is designed to provide to students by the time they graduate. These are:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

3. An ability to communicate effectively with a range of audiences

4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts

5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Additional Information

The Environmental Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org).

For more information about this major, visit the Civil, Architectural and Environmental Engineering Department (http://www.cae.drexel.edu/) and the BS in Environmental Engineering (http://www.drexel.edu/cae/academics/bs-environmental-engineering/) page.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

[*] General Education Requirements (p. 215).

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Co-op/Career Opportunities

Environmental Engineers pursue careers with many different industries, such as chemical, pharmaceutical and manufacturing, in groundwater and hazardous waste remediation, in water or wastewater treatment, in air pollution abatement and control, and in mining. Some also join environmental consulting firms which serve several engineering areas. In addition, some students go to graduate school. The breadth of an environmental engineering education prepares the student to follow many career paths.

Co-op Experiences

Past co-op employers of Environmental Engineering majors have included:

- Exelon, Philadelphia, PA
- U.S. Environmental Protection Agency, Philadelphia, PA
- Philadelphia Water Department, Philadelphia, PA
- Sun Co., Philadelphia, PA
- Aqua America, Bryn Mawr, PA
- Fairmount Park Commission, Philadelphia, PA
- Weston Solutions, West Chester, PA
- CDM Consultants, Philadelphia PA and other offices

Dual/Accelerated Degree

The Accelerated Program of the College of Engineering provides opportunities for highly talented and strongly motivated students to progress toward their educational goals essentially at their own pace. Through advanced placement, credit by examination, flexibility of scheduling, and independent study, the program makes it possible to complete the undergraduate curriculum and initiate graduate study in less than the five years required by the standard curriculum.

Bachelor's/Master's Dual Degree Program

Drexel offers a combined BS/MS degree program for our top engineering students who want to obtain both degrees in the same time period as most students obtain a Bachelors degree.

For more information on this program visit the Department's BS/MS Dual Degree Program (https://drexel.edu/engineering/academics/departments/civil-architectural-environmental-engineering/academic-programs/undergraduate/accelerated-and-dual-degree-programs/) page.

Facilities

The Department is well equipped with state-of-the-art facilities:

- The department computer labs are in operation: a computer-assisted design (CAD) and computerized instructional lab; and a graduate-level lab (advanced undergraduates can become involved in graduate-level work)
- External labs are used for surveying, building diagnostics, and surface and ground-water measurements
- Molecular microbiology laboratory to conduct PCR and qPCR analyses, as well as classical measurements
- Analytical equipment for chemical contaminants
- Instrumentation for characterization of indoor and outdoor atmospheric aerosols

Civil, Architectural and Environmental Engineering Faculty

Abieyuwa Aghayere, PhD *(University of Alberta)*. Professor. Structural design - concrete, steel and wood; structural failure analysis; retrofitting of existing structures; new structural systems and materials; engineering education.

Ivan Bartoli, PhD *(University of California, San Diego)*. Associate Professor. Non-destructive evaluation and structural health monitoring; dynamic identification, stress wave propagation modeling.

Robert Brehm, PhD *(Drexel University)*. Teaching Professor. International infrastructure delivery; response to natural catastrophes; risk assessment and mitigation strategies; project management techniques.

Shannon Capps, PhD *(Georgia Institute of Technology)*. Assistant Professor. Atmospheric chemistry; data assimilation; advanced sensitivity analysis; inverse modeling.

S.C. Jonathan Cheng, PhD *(West Virginia University)*. Associate Professor. Soil mechanics; geosynthetics; geotechnical engineering; probabilistic design; landfill containments; engineering education.

Eugenia Ellis, PhD, AIA *(Virginia Polytechnic Institute and State University)*. Professor. Natural and electric light sources and effects on biological rhythms and health outcomes; ecological strategies for smart, sustainable buildings of the nexus of health, energy and technology.

Yaghoob (Amir) Farnam, PhD *(Purdue University)*. Assistant Professor. Advanced and sustainable infrastructure materials; multifunctional, self-responsive and bioinspired construction materials; advanced multiscale manufacturing; characterization, and evaluation of construction materials; durability of cement-based materials.

Patricia Gallagher, PhD *(Virginia Polytechnic Institute and State University)*. Professor. Geotechnical and geoenvironmental engineering; soil improvement; soil improvement; recycled materials in geotechnics.

Patrick Gurian, PhD *(Carnegie-Mellon University)*. Professor. Risk analysis of environmental and infrastructure systems; novel adsorbent materials; environmental standard setting; Bayesian statistical modeling; community outreach and environmental health.

Charles N. Haas, PhD *(University of Illinois-Urbana) L. D. Betz Chair Professor of Environmental Engineering and Department Head, Civil, Architectural and Environmental Engineering*. Water treatment; risk assessment; bioterrorism; environmental modeling and statistics; microbiology; environmental health.

Ahmad Hamid, PhD *(McMaster University)*. Professor. Engineered masonry; seismic behavior, design and retrofit of masonry structures; development of new materials and building systems.

Simi Hoque, PhD *(University of California - Berkeley)*. Associate Professor. Computational methods to reduce building energy and environmental impacts, urban metabolism, thermal comfort, climate resilience.

Y. Grace Hsuan, PhD *(Imperial College)*. Professor. Durability of polymeric construction materials; advanced construction materials; and performance of geosynthetics.

Joseph B. Hughes, PhD *(University of Iowa)*. Distinguished University Professor. Biological processes and applications of nanotechnology in environmental systems.

L. James Lo, PhD *(University of Texas at Austin)*. Assistant Professor. Architectural fluid mechanics; building automation and autonomy; implementation of natural and hybrid ventilation in buildings; airflow distribution in buildings; large-scale air movement in an urban built environment; building and urban informatics; data-enhanced sensing and control for optimal building operation and management; novel data gathering methods for building/urban problem solving; interdisciplinary research on occupant behaviors in the built environment.

Joseph P. Martin, PhD *(Colorado State University)*. Professor. Geotechnical and geoenvironmental engineering; hydrology; transportation; waste management.

Franco Montalto, PhD *(Cornell University)*. Professor. Effects of built infrastructure on societal water needs, ecohydrologic patterns and processes, ecological restoration, green design, and water interventions.

Nariman Mostafavi, PhD *(University of Massachusetts - Amherst)*. Assistant Teaching Professor. Simulation tools for analyzing urban metabolism; environmentally responsive design; urban resilience; engineering economics; industrial ecology.

Mira S. Olson, PhD *(University of Virginia)*. Associate Professor. Peace engineering; source water quality protection and management; contaminant and bacterial fate and transport; community engagement.

Miguel A. Pando, PhD *(Virginia Polytechnic Institute and State University)*. Associate Professor. Laboratory testing of geomaterials; geotechnical aspects of natural hazards; soil-structure-interaction; geotechnical engineering.

Michael Ryan, PhD *(Drexel University) Associate Department Head of Graduate Studies*. Associate Teaching Professor. Microbial Source

Tracking (MST); Quantitative Microbial Risk Assessment (QMRA); dynamic engineering systems modeling; molecular microbial biology; phylogenetics; metagenomics; bioinformatics; environmental statistics; engineering economics; microbiology; potable and waste water quality; environmental management systems.

Christopher Sales, PhD *(University of California, Berkeley)*. Associate Professor. Environmental microbiology and biotechnology; biodegradation of environmental contaminants; microbial processes for energy and resource recovery from waste; application of molecular biology, analytical chemistry and bioinformatic techniques to study environmental biological systems.

Sabrina Spatari, PhD *(University of Toronto)*. Associate Professor. Industrial ecology; development and application of life cycle assessment (LCA) and material flow analysis (MFA) methods for guiding engineering and policy decisions; specific interest in biomass and bioenergy, biofuels, and urban infrastructure.

Robert Swan Teaching Professor. Geotechnical and geosynthetic engineering; soil/geosynthetic interaction and performance; laboratory and field geotechnical/geosynthetic testing; data acquisition and instrumentation; test equipment development and test method standardization; Quality System Management (QSM) and continuous improvement.

Sharon Walker, PhD *(Yale University) Dean of the College of Engineering*. Distinguished University Professor. Water quality systems engineering.

Michael Waring, PhD *(University of Texas-Austin) Associate Department Head for Undergraduate Programs; Director of Architectural Engineering Program*. Professor. Indoor air quality and building sustainability; indoor particulate matter fate and transport; indoor chemistry and particle formation; secondary impacts of control technologies and strategies.

Jin Wen, PhD *(University of Iowa)*. Professor. Building energy efficiency; building-grid interaction; building control and operation; fault detection and diagnosis; human-building interactions; dynamic building system simulation; big data.

Aspasia Zerva, PhD *(University of Illinois - Urbana)*. Professor. Earthquake engineering; engineering seismology; structural reliability; system identification; advanced computational methods in structural analysis.

Emeritus Faculty

A. Emin Aktan, PhD *(University of Illinois at Urbana-Champaign) John Roebling Emeritus Professor of Infrastructure Studies*. Professor Emeritus. Structural engineering; health monitoring of large infrastructure systems; infrastructure evaluation; intelligent systems.

Harry G. Harris, PhD *(Cornell University)*. Professor Emeritus. Structural models; dynamics of structures, plates and shells; industrialized building construction.

James E. Mitchell, MArch *(University of Pennsylvania)*. Professor Emeritus. Architectural engineering design; building systems; engineering education.

Joseph V. Mullin, PhD *(Pennsylvania State University) Associate Department Head*. Teaching Professor. Structural engineering; failure analysis; experimental stress analysis; materials of construction; marine structures; engineering education.

Richard Weggel, PhD *(University of Illinois) Samuel S. Baxter Professor Emeritus; Civil and Environmental Engineering*. Professor Emeritus. Coastal engineering; hydraulics engineering; hydrology.

Richard Woodring, PhD *(University of Illinois) Dean of Engineering Emeritus*. Professor Emeritus. Structural engineering, reinforced concrete.

Materials Science and Engineering

Major: Materials Science and Engineering
Degree Awarded: Bachelor of Science in Materials Science and Engineering (BSMSE)
Calendar Type: Quarter
Total Credit Hours: 185.5
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 14.1801
Standard Occupational Classification (SOC) code: 17-2131

About the Program

Materials science and engineering (MSE) is concerned with the production, structure, characterization, properties and utilization of metals, ceramics, polymers, composites, electronic, optical, nano- and bio-compatible materials. Materials scientists and engineers play a key role in our increasingly complex technological society by extending the limited supply of materials, improving existing materials, and developing and designing new and superior materials and processes with an awareness of their cost, reliability, safety, and societal/environmental implications.

Students majoring in materials science and engineering (MSE) receive a thorough grounding in the basic sciences and engineering of all materials. All students are required to take course sequences that include materials processing, thermodynamics and kinetics of materials, and their physical and mechanical behavior, plus laboratories designed to familiarize them with the instruments and advanced techniques used to characterize materials and evaluate their structure, properties and performance. A number of tracks allow upper-level students to focus their technical electives in areas of specialization, including nanoscale materials and nanotechnology, biomaterials, electronic and photonic materials, soft materials and polymers, advanced materials design and processing, or in a custom track. In addition, several required senior level courses emphasize the role of materials selection and specification in design.

Throughout the senior year, students majoring in materials science and engineering (MSE) work on a capstone senior design project over the course of three terms, with guidance from a faculty advisor and graduate student mentor. Students, generally working in small groups, synthesize information from their courses to arrive at solutions to real-world engineering problems.

Some recent senior design project topics include:

- Low Cost Plasma Cleaner Using Microwave Radiation
- Characterization of γ' as a Function of Thermal Handling
- Grain Boundary Engineering in Alloy 625 Plus
- Effect of Titanium Additions to HSLA-100 Steel
- Synthesis and Characterizations of Metal-Halide Perovskite Containing Micelles
- Materials Discovery Through Machine Learning
- Biomimetic Mineralization of Bone

- Novel Use of Biomimetic Aggrecan to Regenerate and Molecularly Repair Damaged Skin
- 3-D Printing of PLA and Bone Scaffold Mimetic with Microstructural Analyses

Mission Statement

The Department of Materials Science and Engineering (http://www.drexel.edu/materials/) will provide our BS, MS and PhD graduates with the technical and theoretical knowledge, design capabilities, professionalism, and communications skills necessary for them to excel in leadership positions in academia, industry, and government at the national and international levels.

Vision

Materials science and engineering is a multi-disciplinary field that is at the forefront of all emerging technologies. Advances in the understanding of the process-structure-property-performance relationships of materials will be critical for future developments, including in energy storage and power generation, biomaterials and nanomaterials. The Department of Materials Science and Engineering at Drexel University is recognized as a leader in these areas through its teaching and scholarly research.

Program Educational Objectives

The educational objectives of the Materials Science and Engineering BS degree program are:

- Materials Science and Engineering program graduates possess the core technical competencies in their field necessary to successfully interface with other engineering disciplines in the workplace.
- At least 30% of Materials Science and Engineering program graduates have progressed towards graduate education, to become leaders in industry, academia, etc.
- Materials Science and Engineering program graduates are leaders in their chosen fields.
- Materials Science and Engineering program graduates are engaged in lifelong learning.
- Materials Science and Engineering program graduates possess written and verbal communication skills appropriate for professional materials engineers and/or scientists.

Student Outcomes

The department's student outcomes reflect the skills and abilities that the curriculum is designed to provide to students by the time they graduate. These are:

1. An ability to apply, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Additional Information

The Materials Science and Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org).

Total Credits		185.5

*   A "Track" is a sequence of 4-5 technical electives (12.0-18.0 credits) with an underlying connection to a specific area of materials science and engineering. With the rapid expansion of the technical and scientific knowledge in the field of materials science and engineering, organizing technical electives into thematic tracks benefits students. Combined with relevant co-op experiences and senior design, the tracks can provide strong evidence of specialization, which will benefit students in future job searches.

Technical electives can be taken during the junior and (mostly during) the senior year. For planning reasons, better coordination with senior design, and to accommodate students with an out-of-cycle schedule (e.g., transfer students), tracks need to be declared by the beginning of the pre-junior year. Students may change their track selection after consulting with their MSE department advisor.

** Non-designated General Education Requirements (p. 215).

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses

with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

General education elective*		3.0
	Term Credits	12.0

Total Credit: 185.5

*   See degree requirements (p. 266).

4 YR UG Co-op Concentration

Term 1

		Credits
CHEM 101	General Chemistry I	3.5
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
ENGR 111	Introduction to Engineering Design & Data Analysis	3.0
MATH 121	Calculus I	4.0
UNIV E101	The Drexel Experience	1.0
	Term Credits	14.5

Term 2

CHEM 102	General Chemistry II	4.5
CIVC 101	Introduction to Civic Engagement	1.0
ENGR 131 or 132	Introductory Programming for Engineers Programming for Engineers	3.0
MATH 122	Calculus II	4.0
PHYS 101	Fundamentals of Physics I	4.0
	Term Credits	16.5

Term 3

COOP 101	Career Management and Professional Development	0.0
ENGL 102 or 112	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing English Composition II	3.0
ENGR 113	First-Year Engineering Design	3.0
MATH 200	Multivariate Calculus	4.0
PHYS 102	Fundamentals of Physics II	4.0
General Education Elective		3.0
	Term Credits	17.0

Term 4

BIO 107	Cells, Genetics & Physiology	3.0
BIO 108	Cells, Genetics and Physiology Laboratory	1.0
ENGR 220	Fundamentals of Materials	4.0
ENGR 231	Linear Engineering Systems	3.0
PHYS 201	Fundamentals of Physics III	4.0
Free Elective		3.0
	Term Credits	18.0

Term 5

CHEM 241	Organic Chemistry I	4.0
ENGL 103 or 113	Composition and Rhetoric III: Themes and Genres English Composition III	3.0
ENGR 210	Introduction to Thermodynamics	3.0
ENGR 232	Dynamic Engineering Systems	3.0
MATE 230	Fundamentals of Materials II	4.0
	Term Credits	17.0

Term 6

ECON 201	Principles of Microeconomics	4.0
Technical Elective/Track Course		3.0
General Education Electives		6.0
	Term Credits	13.0

Term 7

ECON 202	Principles of Macroeconomics	4.0
PHIL 315	Engineering Ethics	3.0
Free Elective		3.0
Technical Elective/Track Course		3.0
	Term Credits	13.0

Term 8

MATE 214	Introduction to Polymers	4.0
MATE 240	Thermodynamics of Materials	4.0
MATE 280	Advanced Materials Laboratory	4.0
MATE 355	Structure and Characterization of Crystalline Materials	3.0
MATE 370	Mechanical Behavior of Solids	3.0
	Term Credits	18.0

Term 9

MATE 245	Kinetics of Materials	4.0
MATE 315	Processing Polymers	4.5
MATE 341	Defects in Solids	3.0
MATE 351	Electronic and Photonic Properties of Materials	4.0
	Term Credits	15.5

Term 10

CHE 350	Statistics and Design of Experiments	3.0
MATE 366 [WI]	Processing of Metallic Materials	4.5
MATE 455	Biomedical Materials	3.0
MATE 460	Engineering Computational Laboratory	4.0
MATE 491 [WI]	Senior Project Design I	2.0
	Term Credits	16.5

Term 11

MATE 345	Processing of Ceramics	4.5
MATE 492	Senior Project Design II	3.0
Technical Elective/Track Course		3.0
General Education Elective		3.0
	Term Credits	13.5

Term 12

CHEC 353	Physical Chemistry and Applications III	4.0
MATE 410	Case Studies in Materials	3.0

MATE 493 [WI]	Senior Project Design III	3.0
Technical Elective/Track Course		3.0
	Term Credits	13.0

Total Credit: 185.5

Co-op/Career Opportunities

Examples of industries in which materials science and engineering graduates play major roles include: base metals industries; specialist alloys; advanced ceramics; petrochemical; biomaterials and implants; pharmaceuticals; consumer products; electronics and photonics; nanotechnology; power generation; energy conversion, storage and conservation (fuel cells, advanced batteries, supercapacitors and photovoltaics); environmental protection and remediation; information and telecommunications; and transportation (aerospace, automotive, bicycles, railways).

Typical job functions include design and development of new materials, materials selection for specific applications, manufacturing, performance and failure analysis, quality control and testing, research and development, technical management, sales and marketing, teaching, technical services, and technical writing.

Please visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) for more detailed information on co-op and post-graduate opportunities.

Dual/Accelerated Degree

Accelerated Degree Program

The Accelerated Degree Program within the College of Engineering provides opportunities for highly talented and motivated students to progress toward their educational goals essentially at their own pace. These options include opportunities for accelerated studies, dual degrees, as well as a combined bachelor's/master's (BS/MS) program. Primarily through advance placement, credit by examination, flexibility of scheduling, and independent study, this "fast-track" makes it possible to complete both the undergraduate curriculum and Master's level graduate studies in the five years required by the standard curriculum.

Dual Degree Bachelor's Programs

With careful planning, students can complete two full degrees in the time usually required to complete one. For detailed information, students should contact their advisors.

Bachelor's/Master's Dual Degree Program

Exceptional students can also pursue a master of science (MS) degree in the same period as the bachelor of science (BS). The combined BS/MS degree in Materials Science and Engineering differs from the standard BS degree in that there are two six-month Co-op periods instead of three, and in the last two years, the necessary graduate courses are taken.

For more information about this program, please visit the Department's BS/MS Dual Degree Program (http://www.drexel.edu/materials/academics/undergrad/bs-ms/) page.

Facilities

Biomaterials and Biosurfaces Laboratory
This laboratory contains 10 kN biaxial and 5 kN uniaxial servo-hydraulic mechanical testing machines, a Fluoroscan X-ray system, a microscopic imaging system, a spectra-fluorometer, a table autoclave, centrifuge, vacuum oven, CO_2 incubators, biological safety cabinet, thermostatic water baths, precision balance and ultrasonic sterilizer.

Nanobiomaterials and Cell Engineering Laboratory
This laboratory contains a fume hood with vacuum/gas dual manifold, vacuum pump and rotary evaporator for general organic/polymer synthesis; gel electrophoresis and electroblotting for protein characterization; bath sonicator, glass homogenizer and mini-extruder for nanoparticle preparation; centrifuge; ultrapure water conditioning system; precision balance; pH meter and shaker.

Ceramics Processing Laboratory
This laboratory contains a photo-resist spinner, impedance analyzer, Zeta potential meter, spectrafluorometer, piezoelectric d33 meter, wire-bonder, and laser displacement meter.

Dynamic Characterization Laboratory
This laboratory contains metallographic sample preparation (sectioning, mounting and polishing) facilities; inverted metallograph; microhardness tester; automated electropolishing for bulk and TEM sample preparation; SEM tensile stage for EBSD; Magneto-Optical Kerr Effect (MOKE) magnetometer.

MAX/MXene Ceramics Laboratory
This laboratory contains a vacuum hot-press; a hot isostatic press (HIP) for materials consolidation and synthesis; laser scattering particle size analyzer; creep testers, Ar-filled glove-box, high-speed saw, and assorted high temperature furnaces; metallographic preparation facilities; high temperature closed-loop servo-hydraulic testing machines.

Mechanical Testing Laboratory
This laboratory contains mechanical and closed-loop servo-hydraulic testing machines, hardness testers, Charpy and Izod impact testers, equipment for fatigue testing, metallographic preparation facilities and a rolling mill with twin 6" diameter rolls.

Mesoscale Materials Laboratory
This laboratory contains instrumentation for growth, characterization, device fabrication, and design and simulation of electronic, dielectric, ferroelectric and photonic materials. Resources include physical and chemical vapor deposition and thermal and plasma processing of thin films, including oxides and metals, and semiconductor nanowire growth. Facilities include pulsed laser deposition, atomic layer deposition, chemical vapor deposition, sublimation growth, and resistive thermal evaporation. Variable-temperature high-vacuum probe station and optical cryostats including high magnetic field, fixed and tunable-wavelength laser sources, several monochromators for luminescence and Raman scattering spectroscopy, scanning electron microscopy with electron beam lithography, and a scanning probe microscope.

Nanomaterials Laboratory
This laboratory contains instrumentation for synthesizing, testing and manipulation of nanomaterials carbon and two dimensional carbides under microscope, high-temperature autoclaves, Sievert's apparatus; glove-boxes; high-temperature vacuum and other furnaces for the synthesis of nano-carbon coatings and nanotubes; tube furnaces for synthesis of carbides and nitrides; potentiostat/galvanostat for electrochemical testings; ultraviolet-visible (UV-VIS) spectrophotometry; Raman spectrometers; Differential scanning calorimeter (DSC) and thermogravimetric analyzer (TGA) up to 1500 $^{\circ}$C with mass spectrometer, Zeta potential analyzer; attrition mill, bath and probe sonicators, centrifuges; electro-spinning system for producing nano-fibers.

Oxide Films and Interfaces Laboratory
This laboratory contains an oxide molecular beam epitaxy (MBE) thin film deposition system; physical properties measurement system (PPMS) for electronic transport and magnetometry measurements from 2 – 400K, up to 9 T fields; 2 tube furnaces.

Powder Processing Laboratory
This laboratory contains vee blenders, ball-mills, sieve shaker + sieves for powder classification, several furnaces (including one with controlled atmosphere capability); and a 60-ton Baldwin cold press for powder compaction.

Soft Matter Research and Polymer Processing Laboratories
These laboratories contain computerized thermal analysis facilities including differential scanning calorimeters (DSC), dynamic mechanical analyzer (DMA) and thermo-gravimetric analyzer (TGA); tabletop tensile tester; strip biaxial tensile tester; vacuum evaporator; spin coater; centrifuge; optical microscope with hot stage; liquid crystal tester; microbalance; ultrasonic cleaner; laser holographic fabrication system; polymer injection molder and single screw extruder.

Natural Polymers and Photonics Laboratory
This laboratory contains a spectroscopic ellipsometer for film characterization; high purity liquid chromatography (HPLC) system; refractometer; electro-spinning systems for producing nano-fibers.

X-ray Tomography Laboratory
This laboratory contains a high resolution X-ray micro-tomography instrument and a cluster of computers for 3D microstructure reconstruction; mechanical stage, a positioning stage and a cryostage for *in-situ* testing. For more information on departmental facilities, please visit the Department's Facilities web page (http://www.materials.drexel.edu/research/facilities/).

Centralized Research Facilities
The Department of Materials Science & Engineering relies on Core Facilities within the University for materials characterization and micro- and nano-fabrication. These facilities contain a number of state-of-the-art materials characterization instruments, including environmental and variable pressure field-emission scanning electron microscopes (SEMs) with Energy Dispersive Spectroscopy (EDS) for elemental analysis, and Orientation Image Microscopy (OIM) for texture analysis; a Transmission Electron Microscope (TEM) with STEM capability and TEM sample preparation equipment; a dual-beam focused ion beam (FIB) system for nano-characterization and nano fabrication; a femtosecond/terahertz laser Raman spectrometer; visible and ultraviolet Raman micro spectrometers with a total of 7 excitation wavelengths for non-destructive chemical and structural analysis and Surface Enhanced Raman (SERS); a Fourier Transform Infrared (FTIR) spectrometer with a microscope and full array of accessories; a Nanoindenter; an X-ray Photoelectron Spectrometer (XPS)/Electron Spectroscopy for Chemical Analysis (ESCA) system; and X-Ray Diffractometers (XRD), including small angle/wide angle X-Ray scattering (SAX/WAX).

More details of these instruments, information how to access them and instrument usage rates can be found at Drexel University's Centralized Research Facilities (http://crf.coe.drexel.edu/) web page.

Materials Science and Engineering Faculty

Michel Barsoum, PhD *(Massachusetts Institute of Technology)*. Distinguished Professor. Processing and characterization of novel ceramics and ternary compounds, especially the MAX and 2-D MXene phases.

Hao Cheng, PhD *(Northwestern University)*. Associate Professor. Drug delivery, molecular self-assembly, cell-nanomaterial interactions, regenerative medicine and cell membrane engineering.

Yury Gogotsi, PhD *(Kiev Polytechnic Institute) Director, A. J. Drexel Nanotechnology Institute*. Distinguished University & Charles T. and Ruth M. Bach Professor. Nanomaterials; carbon nanotubes; nanodiamond; graphene; MXene; materials for energy storage, supercapacitors, and batteries.

Richard Knight, PhD *(Loughborough University) Associate Department Head and Undergraduate Advisor*. Teaching Professor. Thermal plasma technology; thermal spray coatings and education; plasma chemistry and synthesis.

Christopher Y. Li, PhD *(University of Akron)*. Professor. Soft and hybrid materials for optical, energy, and bio applications; polymeric materials, nanocomposites, structure and properties.

Andrew Magenau, PhD *(University of Southern Mississippi)*. Assistant Professor. Structurally complex materials exhibiting unique physical properties designed and fabricated using an assortment of methodologies involving directed self-assembly, externally applied stimuli, structure-function correlation, and applied engineering principles suited for technologies in regenerative medicine, biological interfacing, catalytic, electronic, and optical applications

Michele Marcolongo, PhD, PE *(University of Pennsylvania) Department Head, Materials Science and Engineering*. Professor. Orthopedic biomaterials; acellular regenerative medicine, biomimetic proteoglycans; hydrogels.

Steven May, PhD *(Northwestern University) Department Head*. Professor. Synthesis of complex oxide films, superlattices, and devices; materials for energy conversion and storage; magnetic and electronic materials; x-ray and neutron scattering.

Ekaterina Pomerantseva, PhD *(Moscow State University, Russia)*. Associate Professor. Solid state chemistry; electrochemical characterization, lithium-ion batteries, energy generation and storage; development and characterization of novel nanostructured materials, systems and architectures for batteries, supercapacitors and fuel cells.

Caroline L. Schauer, PhD *(SUNY Stony Brook) Associate Dean, Faculty Affairs College of Engineering*. Professor. Polysaccharide thin films and nanofibers.

Wei-Heng Shih, PhD *(Ohio State University)*. Professor. Colloidal ceramics and sol-gel processing; piezoelectric biosensors, optoelectronics, and energy harvesting devices; nanocrystalline quantum dots for bioimaging, lighting, and solar cells.

Jonathan E. Spanier, PhD *(Columbia University) Department Head, Mechanical Engineering and Mechanics*. Professor. Light-matter interactions in electronic materials, including ferroelectric semiconductors, complex oxide thin film science; laser spectroscopy, including Raman scattering.

Mitra Taheri, PhD *(Carnegie Mellon University) Hoeganeas Professor of Metallurgy*. Professor. Development of the ultrafast Dynamic Transmission Electron Microscope (DTEM) for the study of laser-induced microstructural evolution/phase transformations in nanostructured

materials; use of various in-situ Transmission Electron Microscopy techniques.

Jörn Venderbos, PhD *(Leiden University)*. Assistant Professor. Theory of quantum materials: topological Insulators, topological semimetals, materials prediction and design, strongly correlated electron materials, complex electronic ordering phenomena, unconventional superconductors

Christopher Weyant, PhD *(Northwestern University)*. Teaching Professor. Engineering education

Antonios Zavaliangos, PhD *(Massachusetts Institute of Technology) A.W. Grosvenor Professor*. Professor. Constitutive modeling; powder compaction and sintering; pharmaceutical tableting, X-ray tomography.

Emeritus Faculty

Roger D. Corneliussen, PhD *(University of Chicago)*. Professor Emeritus. Fracture, blends and alloys, as well as compounding.

Roger D. Doherty, PhD *(Oxford University)*. Professor Emeritus. Metallurgical processing; thermo-mechanical treatment.

Ihab L. Kamel, PhD *(University of Maryland)*. Professor Emeritus. Nanotechnology, polymers, composites, biomedical applications, and materials-induced changes through plasma and high energy radiation.

Jack Keverian, PhD *(Massachusetts Institute of Technology)*. Professor Emeritus. Rapid parts manufacturing, computer integrated manufacturing systems, strip production systems, technical and/or economic modeling, melting and casting systems, recycling systems.

Mechanical Engineering

Major: Mechanical Engineering
Degree Awarded: Bachelor of Science in Mechanical Engineering (BSME)
Calendar Type: Quarter
Total Credit Hours: 188.5
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 14.1901
Standard Occupational Classification (SOC) code: 17-2141

About the Program

The role of the mechanical engineer in today's society is rapidly changing. Advances in manufacturing, transportation, infrastructure systems, materials, communications, and high-performance computing have introduced new demands, opportunities, and challenges for mechanical engineers. What was once an individual endeavor has now become a team activity. Today's industries require that mechanical engineers possess diverse interdisciplinary skills, a global viewpoint, entrepreneurial and managerial abilities, and an understanding of the forces governing the marketplace.

Traditionally, mechanical engineers have been associated with industries like automotive, transportation, and power generation, and with activities involving the design, analysis, and manufacturing of products useful to society. While today such activities are still dominated by mechanical engineers, the spectrum of opportunities for these professionals has expanded tremendously. For example, mechanical engineers are involved in the design and analysis of biomedical instrumentation, electronic components, smart structures, and advanced materials; they are involved in sophisticated studies of human motion, control of satellites, and the development of more efficient energy-transfer techniques.

Drexel's Department of Mechanical Engineering and Mechanics (https://drexel.edu/engineering/academics/departments/mechanical-engineering/) (MEM) prides itself on providing its students with a comprehensive program of courses, laboratories, design projects, and co-op experiences. The MEM curriculum is designed to balance technical breadth (provided by a set of fundamental required core courses) with technical depth (provided by optional concentrations that emphasize particular fields within the profession). Thus, the MEM program not only prepares its graduates to become successful mechanical engineers needed in industry and government, but also provides an excellent springboard to pursue graduate studies in medical sciences, law, business, information technology, and any other disciplines where technological and analytical skills play an important role.

Mission Statement

The mission of the Department of Mechanical Engineering and Mechanics of Drexel University is to transfer and acquire knowledge through: (a) the education of engineers for leadership in industry, business, academia, and government; and (b) the establishment of internationally recognized research programs. This mission is accomplished by the delivery of an outstanding curriculum, by the participation of our students in one of the nation's most prestigious co-operative educational programs, and by the scholarly activities of the faculty.

Program Educational Objectives

- Our graduates will be successful in careers that deal with the design, simulation and analysis of engineering systems, experimentation and testing, manufacturing, technical services, and research.
- Our graduates will enter and complete academic and professional programs in engineering, business, management, law and medicine.
- Our graduates will communicate effectively with peers and be successful working with and leading multi-disciplinary and multi-cultural teams.
- Our graduates will recognize the global, legal, societal, and ethical contexts of their work.
- Our graduates will advance in their careers; for example, assuming increasing levels of responsibility and acquiring professional licensure.

Student Outcomes

The department's student outcomes reflect the skills and abilities that the curriculum is designed to provide to students by the time they graduate. These are:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Additional Information

The Mechanical Engineering and Mechanics program is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).

For additional information about this major, contact the MEM Department (http://drexel.edu/mem/).

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

The mechanical engineering and mechanics curriculum is designed to balance technical breadth (provided by a set of fundamental required core courses) with technical depth (provided by optional concentrations that emphasize particular fields within the profession).

General Education/Liberal Studies Requirements

CIVC 101	Introduction to Civic Engagement	1.0
COOP 101	Career Management and Professional Development	0.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
HIST 285	Technology in Historical Perspective	4.0
PHIL 315	Engineering Ethics	3.0
UNIV E101	The Drexel Experience	1.0
General Education Requirements [*]		12.0

Mathematics Requirements

MATH 121	Calculus I	4.0
MATH 122	Calculus II	4.0
MATH 200	Multivariate Calculus	4.0
MATH 201	Linear Algebra	4.0
MATH 210	Differential Equations	4.0

Physics Requirements

PHYS 101	Fundamentals of Physics I	4.0
PHYS 102	Fundamentals of Physics II	4.0
PHYS 201	Fundamentals of Physics III	4.0

Chemistry/Biology Requirements

BIO 141	Essential Biology	4.5
CHEM 101	General Chemistry I	3.5
CHEM 102	General Chemistry II	4.5

Engineering Design Requirements

ENGR 111	Introduction to Engineering Design & Data Analysis	3.0
ENGR 113	First-Year Engineering Design	3.0
ENGR 131	Introductory Programming for Engineers	3.0
or ENGR 132	Programming for Engineers	

Engineering Requirements

ENGR 210	Introduction to Thermodynamics	3.0

Engineering Economics Requirements

CIVE 240 [WI]	Engineering Economic Analysis	3.0

Materials Requirements

ENGR 220	Fundamentals of Materials	4.0

Mechanical Requirements

MEM 201	Foundations of Computer Aided Design	3.0
MEM 202	Statics	3.0
MEM 220	Fluid Mechanics I	4.0
MEM 230	Mechanics of Materials I	4.0
MEM 238	Dynamics	4.0
MEM 255	Introduction to Controls	4.0
MEM 310	Thermodynamic Analysis I	4.0
MEM 311	Thermal Fluid Science Laboratory	2.0
MEM 331	Experimental Mechanics I	2.0
MEM 351	Dynamic Systems Laboratory I	2.0
MEM 333	Mechanical Behavior of Materials	3.0
MEM 345	Heat Transfer	4.0
MEM 355	Performance Enhancement of Dynamic Systems	4.0
MEM 361	Engineering Reliability	3.0
MEM 391	Introduction to Engineering Design Methods	1.0
MEM 435	Introduction to Computer-Aided Design and Manufacturing	4.0
MEM 491 [WI]	Senior Design Project I	2.0
MEM 492 [WI]	Senior Design Project II	3.0
MEM 493 [WI]	Senior Design Project III	3.0
MEM Fundamental Courses. Select four of the following:		12.0-16.0
MEM 320	Fluid Dynamics I	
MEM 330	Mechanics of Materials II	
MEM 410	Thermodynamic Analysis II	
MEM 417	Introduction to Microfabrication	
MEM 423	Mechanics of Vibration	
MEM 431	Machine Design I	
MEM 437	Manufacturing Process I	
MEM 440	Thermal Systems Design	
MEM 458	Micro-Based Control Systems I	
MEM 459	Control Applications of DSP Microprocessors	
MEM Open Electives (Any two MEM courses 300 level or higher.)		6.0-8.0
COE Electives (Any 2 College of Engineering courses, including MEM courses, 300 level or higher.)		6.0-8.0
Math/Science Electives (300+ level MATH, PHYS, BIO, CHEM, CHEC, and ENVS.)		6.0-8.0
Free Electives		6.0-8.0

Electives or Optional Concentration [**]

Aerospace Concentration

Select five courses (15.0 credits) from the list below:

MEM 320	Fluid Dynamics I	
MEM 330	Mechanics of Materials II	
MEM 373	Space Systems Engineering I	
MEM 374	Space Systems Engineering II	
MEM 403	Gas Turbines & Jet Propulsion	
MEM 405	Principles of Combustion I	
MEM 406	Principles of Combustion II	
MEM 420	Aerodynamics	
MEM 423	Mechanics of Vibration	
MEM 425	Aircraft Design & Performance	
MEM 426	Aerospace Structures	
MEM 427	Finite Element Methods	
MEM 428	Introduction to Composites I	
MEM 429	Introduction to Composites II	
MEM 451	Orbital Mechanics	
MEM 453	Aircraft Flight Dynamics & Control I	
MEM 454	Aircarft Flight Dynamics & Control II	
MEM 455	Introduction to Robotics	
MEM 459	Control Applications of DSP Microprocessors	

Energy Concentration

Select five courses (15.0 credits) from the list below:

AE 430	Control Systems for HVAC	
CHE 431	Fundamentals of Solar Cells	
ECEP 354	Energy Management Principles	
ECEP 371	Introduction to Nuclear Engineering	
ECEP 380	Introduction to Renewable Energy	
ECEP 402	Theory of Nuclear Reactors	
ECEP 403	Nuclear Power Plant Design & Operation	
ECEP 406	Introduction to Radiation Health Principles	
ECEP 411	Power Systems I	
ECEP 422	Power Distribution Automation and Control	
ECEP 480	Solar Energy Engineering	
MEM 320	Fluid Dynamics I	
MEM 330	Mechanics of Materials II	
MEM 371	Introduction to Nuclear Engineering I	
MEM 400	Internal Combustion Engines	
MEM 402	Power Plant Design	
MEM 403	Gas Turbines & Jet Propulsion	
MEM 405 & MEM 406	Principles of Combustion I and Principles of Combustion II	
MEM 410	Thermodynamic Analysis II	
MEM 413 & MEM 414	HVAC Loads and HVAC Equipment	
MEM 415	Fuel Cell Engines	
MEM 445	Solar Energy Fundamentals	
MEM 446 & MEM 447	Fundamentals of Plasmas I and Fundamentals of Plasmas II	
MEM 448	Applications of Thermal Plasmas	
MEM 449	Applications of Non-Thermal Plasmas	
Total Credits		188.5-200.5

*   General Education Requirements (p. 215).

**   Students may choose to do a concentration in either Aerospace or Energy. Concentrations consist of 15.0 concentration credits.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms

before their co-op begins. As of September 2020, COOP 101 will be one credit.

Co-op/Career Opportunities

Mechanical engineers are employed in a growing number of areas, including aerospace, automotive, biomechanics, computer systems, electronic entertainment, energy, environmental, health care, manufacturing, nuclear technology, and utilities.

Most mechanical engineering graduates begin full-time employment immediately upon graduation. However, there are a number of graduates who go on to pursue master's and/or doctoral degrees in mechanical engineering. The graduate schools that Drexel's mechanical engineers have attended include Harvard, UC Berkeley, and the University of Pennsylvania.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) for more detailed information on co-op and post-graduate opportunities.

Dual/Accelerated Degree

Accelerated Program

The Accelerated Program of the College of Engineering provides opportunities for highly talented and strongly motivated students to progress toward their educational goals essentially at their own pace. These options include opportunities for accelerated studies, dual degrees, a combined bachelor's/master's program as well as participation in the University Honors Program (http://www.drexel.edu/honors/).

Primarily through advanced placement, credit by examination, flexibility of scheduling, and independent study, the "fast track" makes it possible to complete the undergraduate curriculum and initiate graduate study in less than the five years required by the standard curriculum.

Dual Degree Bachelor's Programs

With careful planning, you can complete two full degrees in the time usually required to complete one. The double major option works best in closely related areas. For detailed information please contact your advisor.

Bachelor's/Master's (BS/MS) Dual Degree Program

Exceptional students can also pursue a master of science degree in the same period as the bachelor of science. For MEM undergraduate students, the following are the possible graduate programs for the Master's degree in the BS/MS dual degree program:

- Electrical Engineering
- Computer Engineering
- Material Science Engineering
- Mechanical Engineering and Mechanics
- Biomedical Engineering
- Chemical Engineering

High achieving students have the opportunity to apply for the BS/MS program which allows students to complete both a Bachelor's and a Master's in Mechanical Engineering in a 5-year period. Entering students can indicate their interest in this program on their application but must formally apply, be qualified and be accepted into the program after earning 90.0 quarter credits and before reaching 120.0 quarter credits. The threshold requirements to be evaluated for acceptance into the program are:

- Have a minimum 3.30 GPA in all courses completed at Drexel University at time of application.
- Have a minimum of 3.50 GPA in the following seven courses (or their equivalent): *Introduction to Thermodynamics* (ENGR 210); *Fundamentals of Materials* (ENGR 220); *Linear Engineering Systems* (ENGR 231); *Dynamic Engineering Systems* (ENGR 232); *Foundations of Computer Aided Design* (MEM 201); *Statistics* (MEM 202); and *Dynamics* (MEM 238).

Students in the 5COP accelerated program will progress according to the program plan established for the 5-year with co-op undergraduate (or 5COP) program and maintain undergraduate status throughout. The 5COP program includes three 6-month cooperative education cycles.

The College of Engineering offers additional information about the BS/MS program (http://drexel.edu/engineering/programs/undergraduate/accelerated-programs/) on its website.

Facilities

Instructional Laboratories

Mechanical Engineering and Mechanics (MEM) supports instructional laboratories to provide hands-on experience with engineering measurements and to augment classroom instruction in the areas of mechanics, systems and controls, thermal fluid sciences and design and

manufacturing along with a college-supported machine shop to aid senior design.

Specialized Laboratories

BIOMEMS Lab and Lab-on-a-Chip

Develops miniature devices for biological and medical applications using microfabrication and microfluidics technologies. Our research projects are highly multidisciplinary in nature and thus require the integration of engineering, science, biology, and medicine. Projects are conducted in close collaboration with biologists and medical doctors. Our research methodology includes design and fabrication of miniature devices, experimental characterization, theoretical analysis and numerical simulation.

Computer-aided Design Lab (CAD)

Provides access to software such as AutoCAD, ANSYS, Abagus, CREO, and SOLIDWORKS either in the 42 workstation lab which is available by card access 24/7, or over any network connection using our CITRIX server. Computations are performed on a virtual pc running at the server, and students can use any smart device for input and display.

Theoretical and Applied Mechanics Group Laboratory (TAMG)

Through experimental, analytical, and computational investigations, TAMG develops insights into the deformation and failure of materials, components and structures in a broad range of time and length scales. To accomplish this goal, TAMG develops procedures that include mechanical behavior characterization coupled with non-destructive testing and modern computational tools. This information is used both for understanding the role of important material scales in the observed bulk behavior and for the formation of laws that can model the response to prescribed loading conditions.

Electrochemical Energy Systems Laboratory (ECSL)

Addresses the research and development needs of emerging alternative energy technologies. ECSL specializes in the design, diagnostics, and characterization of next-generation electrochemical energy conversion and storage systems; particularly fuel cell and battery technology. Current areas of research include polymer electrolyte fuel cells for stationary, portable, and transportation areas of next-generation flow battery technology for intermittent energy storage, load leveling and smart-grid applications. ECSL uses a comprehensive approach, including advanced diagnostics, system design, materials characterization, and computational modeling of electrochemical energy systems.

Dynamic Multifunctional Materials Laboratory (DMML)

Investigates material and/or structural behavior across 10 orders of magnitude in strain rate with temperature and electrical coupling capabilities. The DMML is equipped with novel experimental apparatus designed in house, and a wide range of full-field optical diagnostics, 2W Coherent laser and white light illumination and ultra high-speed imaging (5 Mfps).

Some of the major equipment in DMML includes a two-stage light gas gun for hypervelocity impact (*USPTO patent pending*), a modular single-stage gas gun with blast tube capability, a novel impact fatigue device (*USPTO patent pending*), compression Kolsky (split-Hopkinson) bar system in both steel for high-impedance material testing and polycarbonate for soft material characterization, a miniature tension/torsion Kolsky, a standard material load frame, optical microscopes and a wide range of

optomechanics and lens systems. DMML also has a complete material preparation setup including a diamond saw, an Allied High Tech Multiprep material polishing system, a precision microbalance, charge amplifiers, oscilloscopes, hot plates, and high performance computer workstations with Abagus, MatchID DIC software, AutoCAD/Creo, and MATLAB.

Multiscale Thermofluidics Lab

Develops novel scalable nanomanufacturing techniques using biological templates to manipulate micro- and nano-scale thermal and fluidic phenomena. Current work includes enhancing phase-change heat transfer with super-wetting nanostructured coatings and transport and separation through nanoporous membranes.

Vascular Kinetics Laboratory

Utilizes engineering methods to reveal the intricacies of vascular biology and thereby discover new ways to treat human disease. In particular, the interaction of cardiovascular cells and how their extracellular matrix is altered in diabetic hyperglycemia is studied. These discoveries are applied to novel biomaterial and drug development.

The research in the laboratory spans biochemistry, biomechanics, and vascular biology. The work is at the interface of engineering and medicine, celebrating the inherent interdisciplinary nature of biomedical engineering with a strong emphasis on clinical applications.

Biofabrication Laboratory

Utilizes cells or biologics as basic building blocks in which biological models, systems devices and products are manufactured. Biofabrication techniques encompass a broad range of physical, chemical, biological, and/or engineering process, with various applications in tissue science and engineering, regenerative medicine, disease pathogeneses and drug testing studies, biochips and biosensors, cell printing, patterning and assembly, and organ printing.

The Program for Biofabrication at Drexel integrates computer-aided tissue engineering, modern design and manufacturing, biomaterials and biology in modeling, design, and biofabrication of tissue scaffolds, tissue constructs, micro-organ, tissue models. The ongoing research focuses on bio-tissue modeling, bio-blueprint modeling, scaffold informatics modeling, biometric design of tissue scaffold, additive manufacturing of tissue scaffolds, cell printing and organ printing.

The facilities at the Biofabrication Laboratory include:

- state-of-the-art computer-aided design/engineering/manufacturing (CAD/CAE/CAM) software, medical image processing and 3D reconstruction software, and in-house developed heterogeneous modeling and homogenization software
- proprietary multi-nozzle cell deposition system for direct cell writing and construction of tissue precursors and micro-organs
- proprietary precision extruding deposition system for fabrication of 3D bipolymer tissue scaffolds
- commercial available 3DP free-form fabrication system for bio-physical modeling
- plasma instrument for surface treatment and surface functionalization
- MTS universal testing system
- laboratory for cell and tissue culture study

Complex Fluids and Multiphase Transport Lab

Conducts both experimental and modeling studies on heat/mass transfer and multi-phase flows, as well as transport phenomena in additive manufacturing and energy systems. Current projects range from basic studies in interfacial transport in directed-assembly of functional materials and nanostructure-enhanced two-phase heat transfer to design of innovative dry cooling power plants and electrochemical energy storage systems.

Laboratory for Biological Systems Analysis

Applies system level engineering techniques to biological systems with emphasis on:

- The development of bio-robotic models as tools for investigating hypotheses about biological systems
- The use of system identification techniques to evaluate the functional performance of physiological systems under natural behavioral conditions
- The design of systems that are derived from nature and use novel techniques, such as electro-active polymers, to achieve superior performance and function

Advanced Design and Manufacturing Laboratory **(**http:// www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=6**)** This laboratory provides research opportunities in design methodology, computer-aided design, analysis and manufacturing, and materials processing and manufacturing. Facilities include various computers and software, I-DEAS, Pro/E,ANSYS, MasterCAM, Mechanical DeskTop, SurfCAM, Euclid, Strim, ABQUS, and more. The machines include two Sanders Model Maker rapid prototyping machines, a BridgePort CNC Machining Center, a BOY 220 injection molding machine, an Electra high-temperature furnace for metal sintering, infiltration, and other heat treatment.

Biomechanics Laboratory **(**http://www.mem.drexel.edu/current/labs/? m=research&a=lab_desc&labID=2**)** Emphasis in this laboratory is placed on experimental modelling studies of the mechanical properties of human joints, characterization of the mechanical properties of biological materials, studies of human movements, and design and development of joint replacements with particular emphasis on total ankle replacement. Facilities include a 3-D kinematic measuring system, Tensile testing machine, joint flexibility testers, and microcomputers for data acquisition and processing.

Combustion and Fuels Chemistry Laboratory **(**http://www.mem.drexel.edu/ current/labs/?m=research&a=lab_desc&labID=1**)** Investigate chemical and physical factors that control and, hence, can be used to tailor combustion processes for engineering applications. Facilities include continuous spectroscopic reaction monitoring systems, static reactors, combustion bombs, flat flame burner systems, flow reactors, and complete analytical and monitoring instrumentation.

Research is conducted in the areas of (1) low temperature hydrocarbon oxidation, (2) cool flames, (3) auto-ignition, (4) flame instabilities, (5) flame structure, (6) flame ignition, and (7) flame extinction (quelching). New ways to improve fuel efficiency in practical combustors and recover waste energy in the transportation sector are also being explored.

Composite Mechanics Laboratory
Emphasis in this laboratory is placed on the characterization of performance of composite materials. Current interest includes damage mechanisms, failure processes, and time-dependent behavior in resin-, metal-, and ceramic-matrix composites. Major equipment includes servo-hydraulic and electromechanical Instron testing machines,

strain/displacement monitoring systems, environmental chambers, microcomputers for data acquisition and processing, composites fabrication facility, interferometric displacement gauge, X-radiography, and acoustic emission systems.

Nyheim Plasma Institute (Formerly A.J. Drexel Plasma Institute) **(**http:// www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=11**)** The Nyheim Plasma Institute was formed in 2002 to stimulate and coordinate research projects related to plasma and other modern high energy engineering techniques. Today the institute is an active multidisciplinary organization involving 23 faculty members from 6 engineering departments working in close collaboration with School of Biomedical Engineering, College of Arts and Sciences and College of Nursing and Health Professions.

Heat Transfer Laboratory
The heat transfer laboratory is outfitted with an array of instrumentation and equipment for conducting single- and multiphase heat transfer experiments in controlled environments. Present efforts are exploring the heat and mass transfer process in super-critical fluids and finary refrigerants.

Precision Instrumentation and Metrology Laboratory **(**http:// www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=7**)** This laboratory is focused on activities related to precision measurement, computer-aided inspection, and precision instrument design. Facilities include 3D Coordinate Measuring Machine (Brown & Sharpe) with Micro Measurement and Reverse engineering software, Surface Profilometer, and Laser Displacement Measuring System.

Mechanical Engineering Faculty

Jennifer Atchison, PhD *(Drexel University)*. Assistant Teaching Professor. Engineering Education, Functional Fabrics, and Nanofibers

Jonathan Awerbuch, DSc *(Technion, Israel Institute of Technology)*. Professor. Mechanics of composites; fracture and fatigue; impact and wave propagation; structural dynamics.

Nicholas P. Cernansky, PhD *(University of California-Berkeley) Hess Chair Professor of Combustion*. Professor. Combustion chemistry and kinetics; combustion generated pollution; utilization of alternative and synthetic fuels.

Bor-Chin Chang, PhD *(Rice University)*. Professor. Computer-aided design of multivariable control systems; robust and optimal control systems.

Richard Chiou, PhD *(Georgia Institute of Technology)*. Associate Professor. Green manufacturing, mechatronics, Internet-based robotics and automation, and remote sensors and monitoring.

Young I. Cho, PhD *(University of Illinois-Chicago)*. Professor. Heat transfer; fluid mechanics; non-Newtonian flows; biofluid mechanics; rheology.

Bakhtier Farouk, PhD *(University of Delaware) Billings Professor of Mechanical Engineering*. Professor. Heat transfer; combustion; numerical methods; turbulence modeling; materials processing.

Alexander Fridman, DSc, PhD *(Moscow Institute of Physics and Technology) Mechanical Engineering and Mechanics, John A. Nyheim Endowed University Chair Professor, Director of the Drexel Plasma*

Institute. Professor. Plasma science and technology; pollutant mitigation; super-adiabatic combustion; nanotechnology and manufacturing.

Li-Hsin Han, PhD *(University of Texas at Austin)*. Assistant Professor. Polymeric, micro/nano-fabrication, biomaterial design, tissue engineering, rapid prototyping, free-form fabrication, polymer micro actuators, photonics

Y. Grace Hsuan, PhD *(Imperial College)*. Professor. Durability of polymeric construction materials; advanced construction materials; and performance of geosynthetics.

Andrei Jablokow, PhD *(University of Wisconsin, Madison) Associate Department Head for Undergraduate Affairs, Mechanical Engineering and Mechanics*. Associate Teaching Professor. Engineering education; kinematics; geometric modeling.

Antonios Kontsos, PhD *(Rice University)*. Associate Professor. Applied mechanics; probabilistic engineering mechanics; modeling of smart multifunctional materials.

E. Caglan Kumbur, PhD *(Pennsylvania State University)*. Associate Professor. Next generation energy technologies; fuel cell design and development.

Harry G. Kwatny, PhD *(University of Pennsylvania) S. Herbert Raynes Professor of Mechanical Engineering*. Professor. Dynamic systems analysis; stochastic optimal control; control of electric power plants and systems.

Alan Lau, PhD *(Massachusetts Institute of Technology)*. Professor. Deformation and fracture of nano-devices and macroscopic structures; damage-tolerant structures and microstructures.

Michele Marcolongo, PhD, PE *(University of Pennsylvania) Department Head, Materials Science and Engineering*. Professor. Orthopedic biomaterials; acellular regenerative medicine, biomimetic proteoglycans; hydrogels.

Roger Marino, PhD *(Drexel University)*. Associate Teaching Professor. Engineering education; land development; product Development

Matthew McCarthy, PhD *(Columbia University) Associate Department Head for Graduate Affairs, Mechanical Engineering and Mechanics*. Associate Professor. Micro- and nanoscale thermofluidic systems, bio-inspired cooling, smart materials and structures for self-regulated two-phase cooling, novel architectures for integrated energy conversion and storage.

David L. Miller, PhD *(Louisiana State University)*. Professor. Gas-phase reaction kinetics; thermodynamics; biofuels.

Moses Noh, PhD *(Georgia Institute of Technology)*. Associate Professor. MEMS; BioMEMS; lab-on-a-chip; microfabrication; microfluidics.

Mira S. Olson, PhD *(University of Virginia)*. Associate Professor. Peace engineering; source water quality protection and management; contaminant and bacterial fate and transport; community engagement.

Sorin Siegler, PhD *(Drexel University)*. Professor. Orthopedic biomechanics; robotics; dynamics and control of human motion; applied mechanics.

Jonathan E. Spanier, PhD *(Columbia University) Department Head, Mechanical Engineering and Mechanics*. Professor. Light-matter interactions in electronic materials, including ferroelectric semiconductors,

complex oxide thin film science; laser spectroscopy, including Raman scattering.

Wei Sun, PhD *(Drexel University) Albert Soffa Chair Professor of Mechanical Engineering*. Professor. Computer-aided tissue engineering; solid freeform fabrication; CAD/CAM; design and modeling of nanodevices.

Ying Sun, PhD *(University of Iowa)*. Associate Professor. Transport processes in multi-component systems with fluid flow; heat and mass transfer; phase change; pattern formation.

Tein-Min Tan, PhD *(Purdue University)*. Associate Professor. Mechanics of composites; computational mechanics and finite-elements methods; structural dynamics.

James Tangorra, PhD *(Massachusetts Institute of Technology) Department Head, Engineering Technology*. Associate Professor. Analysis of human and (other) animal physiological systems; head-neck dynamics and control; balance, vision, and the vestibular system; animal swimming and flight; robotics; system identification; bio-inspired design.

Ajmal Yousuff, PhD *(Purdue University)*. Associate Professor. Optimal control; flexible structures; model and control simplifications.

Jack G. Zhou, PhD *(New Jersey Institute of Technology)*. Professor. CAD/CAM; computer integrated manufacturing systems; rapid prototyping; system dynamics and automatic control.

Emeritus Faculty

Leon Y. Bahar, PhD *(Lehigh University)*. Professor Emeritus. Analytical methods in engineering, coupled thermoelasticity, interaction between analytical dynamics and control systems.

Gordon D. Moskowitz, PhD *(Princeton University)*. Professor Emeritus. Biomechanics, dynamics, design, applied mathematics.

Donald H. Thomas, PhD *(Case Institute of Technology)*. Professor Emeritus. Biocontrol theory, biomechanics, fluidics and fluid control, vehicle dynamics, engineering design.

Albert S. Wang, PhD *(University of Delaware)*. Professor Emeritus. Treatment of damage evolution processes in multi-phased high-temperature materials, including ceramics and ceramic-matrix composites.

Systems Engineering BS/MS

Major: Systems Engineering
Degree Awarded: Bachelor of Science (BS) AND Master of Science (MS)
Calendar Type: Quarter
Total Credit Hours: 228.0
Classification of Instructional Programs (CIP) code: 14.2701
Standard Occupational Classification (SOC) code: 17-2199

Note: **Currently and until further notice, the program will not be accepting applications to BS/MS with Systems Engineering.**

About the Program

The Master of Science in Systems Engineering is an online curriculum integrating systems and financial management and planning.The degree enables engineering leaders to perform, lead, and manage systems

development throughout the life cycle, from conceptual development and engineering design through the operation and sustainment phases.

Program Outcomes

Graduates of the Drexel University Master of Science in Systems Engineering will be competent in their ability to:

- develop and implement models and tools to enhance and optimize complex systems;
- develop and manage processes relevant to complex systems development;
- architect, design, implement, integrate, verify, validate, support and decommission complex systems;
- use systems engineering tools and practices to identify and execute effective technical solutions;
- manage system-intensive projects within cost and schedule constraints;
- consider financial elements in all complex systems solutions.

Degree Requirements

General Education/Liberal Studies Requirements

CIVC 101	Introduction to Civic Engagement	1.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
PHIL 315	Engineering Ethics	3.0
UNIV E101	The Drexel Experience	2.0
General Education Courses		18.0

Foundation Requirements

BIO 141	Essential Biology	4.5
CHEM 101	General Chemistry I	3.5
CHEM 102	General Chemistry II	4.5
ECE 200	Digital Logic Design	4.0
ECE 201	Foundations of Electric Circuits I	4.0
ECE 203	Programming for Engineers	3.0
ENGR 111	Introduction to Engineering Design & Data Analysis	3.0
ENGR 113	First-Year Engineering Design	3.0
ENGR 131	Introductory Programming for Engineers	3.0
ENGR 220	Fundamentals of Materials	4.0
ENGR 231	Linear Engineering Systems	3.0
ENGR 232	Dynamic Engineering Systems	3.0
MATH 121	Calculus I	4.0
MATH 122	Calculus II	4.0
MATH 200	Multivariate Calculus	4.0
PHYS 101	Fundamentals of Physics I	4.0
PHYS 102	Fundamentals of Physics II	4.0
PHYS 201	Fundamentals of Physics III	4.0

Sophomore Engineering Elective Options

ENGR 210	Introduction to Thermodynamics	3.0
or MATH 221	Discrete Mathematics	

Professional Requirements

ECE 361	Probability and Data Analytics for Engineers	3.0-4.0
or ECE 362	Engineering Statistics	
ECE 391	Introduction to Engineering Design Methods	1.0
ECE 491 [WI]	Senior Design Project I	2.0
ECE 492 [WI]	Senior Design Project II	2.0

ECE 493	Senior Design Project III	4.0
ECEL 301 [WI]	Electrical Engineering Laboratory	2.0
ECEL 302	ECE Laboratory II	2.0
ECEL 303	ECE Laboratory III	2.0
ECEL 304	ECE Laboratory IV	2.0
ECES 301	Signals and Systems I	4.0
ECES 303	Signals and Systems II	3.0
ECE Electives		36.0
Math Elective		3.0
Free Electives		14.5
Required Graduate Courses		
EGMT 531	Engineering Economic Evaluation & Analysis	3.0
EGMT 572	Statistical Data Analysis	3.0
EGMT 573	Operations Research	3.0
EGMT 690	Systems Engineering Analysis II	
SYSE 510	Systems Engineering Process	3.0
SYSE 520	Global Sustainment and Integrated Logistics	3.0
SYSE 521	Integrated Risk Management	3.0
SYSE 533	Systems Integration and Test	3.0
SYSE 598	Capstone in Systems Engineering	3.0
SYSE 685	Systems Engineering Management	3.0
SYSE 688	Systems Engineering Analysis	3.0
Elective Graduate Courses (Choose 4)		**12.0**
SYSE 511	Systems Engineering Tools	
SYSE 522	Engineering Supply Chain Systems	
SYSE 523	Systems Reliability Engineering	
SYSE 524	Systems Reliability, Availability & Maintainability Analysis	
SYSE 525	Statistical Modeling & Experimental Design	
SYSE 530	Systems Engineering Design	
SYSE 531	Systems Architecture Development	
SYSE 532	Software Systems Engineering	
Total Credits		225.0-226.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

First Year

Fall

		Credits
CHEM 101	General Chemistry I	3.5
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0

Total Credit: 226.0

Systems Engineering Faculty

Richard Grandrino, MBA *(Drexel University)*. Teaching Faculty. Manager for advanced logistics operations at Lockheed Martin

Steven Mastro, PhD *(Drexel University)*. Adjunct Faculty. Machinery Research and Silencing Division of NAVSEA Philadelphia. Work focuses on advanced sensor and control technologies for condition-based maintenance, damage control, and automation.

Miray Pereira, MBA *(Rutgers University)*. Adjunct Instructor. Manages a team of consultants responsible for development, facilitation and implementation of fundamental demand management systems and capabilities for DuPont, most recently with the DuPont Safety & Protection Platform in strategic planning, mergers & acquisitions.

Walter Sobkiw, BS *(Drexel University)*. Adjunct Faculty. Author of "Systems Engineering Design Renaissance" and "Systems Practices as Common Sense."

Fernando Tovia, PhD *(University of Arkansas)*. Adjunct Instructor. Core quantitative analysis,strategic planning, supply chain management and manufacturing systems.

John Via, DEngr *(Southern Methodist University)*. Teaching Professor. Pharmaceutical, Bio-pharmaceutical, and Medical Device development and manufacturing

Minor in Architectural Engineering

About the Minor

The minor in architectural engineering, designed to broaden the professional capabilities of students, offers the building systems portion of the architectural engineering curriculum with enough attention to structural components for completeness. Pursuing a minor in architectural engineering can be of interest to mechanical engineering students who wish to learn the application of HVAC systems within the building context; to civil engineering students who require knowledge of large-scale infrastructure systems; and to chemical engineering students who wish to understand the energy and distribution aspects of process plant design.

The minor consists of a minimum of 25.5 credits total, with five required core courses. Students take a minimum of eight additional credits taken from a list of optional courses.

While this minor is primarily designed to provide technical knowledge and skills to other engineers, with the appropriate prerequisites students from other disciplines—such as architecture—can also complete this minor.

Prerequisites

The common engineering core curriculum prerequisites are required of all students in the College of Engineering. Students from other colleges will need the appropriate background prerequisite courses in physics, mathematics and thermodynamics.

Program Requirements

Required Courses

AE 220	Introduction to HVAC	3.5
AE 340	Architectural Illumination and Electrical Systems [*]	3.0
AE 390	Architectural Engineering Design I	4.0
CAEE 202	Introduction to Civil, Architectural & Environmental Engineering	3.0
CIVE 302	Structural Analysis I	4.0
Select two of the following:		8.0
AE 391	Architectural Engineering Design II	
ARCH 191	Studio 1-AE	
or ARCH 181	Architecture Studio 1A	
CIVE 240 [WI]	Engineering Economic Analysis	
CIVE 250	Construction Materials	
CIVE 303	Structural Design I	
MEM 310	Thermodynamic Analysis I	
MEM 413	HVAC Loads	
Total Credits		25.5

[*]   Students can elect to take ARCH 293 *Building Systems III* (1.5 credits) AND ARCH 396 *Building Systems IV* (1.5 credits) in place of ARCH 340.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Minor in Chemical Engineering

About the Minor

Engineering students can obtain a minor in chemical engineering by taking 27.0 credits from the courses listed below.

Admission Requirements

Pre-requisites for the 200-level minor core.

Required Core Courses

CHE 211	Material and Energy Balances I	4.0
CHE 212	Material and Energy Balances II	4.0
CHE 220	Computational Methods in Chemical Engineering I	3.0
CHE 362	Chemical Kinetics and Reactor Design	4.0
Thermodynamics		
Complete one of the following [*]		4.0
CHE 230	Chemical Engineering Thermodynamics I	
or CHE 330	Chemical Engineering Thermodynamics II	
Transport		
Complete one of the following courses [**]		4.0
CHE 341	Fluid Mechanics	
CHE 342	Heat Transfer	
CHE 343	Mass Transfer	
Electives		
Choose from other CHE core courses, elective courses or research		4.0
Total Credits		27.0

[*]   CHE will not accept ENGR 210 towards the thermodynamics requirement

[**]   Students who take an equivalent transport course as part of their core curriculum must take a different transport course (e.g., MEM cannot count CHE 341 towards the transport requirement)

Minor in Computer Engineering

About the Minor

The computer engineering minor provides students from other majors with the foundation needed to understand both the hardware and software aspects of computers. Our engineers contribute to industry and research areas such as electronic circuits and systems, computer architecture, computer networking, embedded systems, high-performance computing, software engineering, robotics and machine intelligence, computer security, medical devices, and many more.

Prerequisites

The minor assumes that students will have a background in programming which would include ECE 105, ECE 203, or CS 171. Courses taken to meet these requirements will not count toward the minor.

Program Requirements

Required Courses

ECE 200	Digital Logic Design	4.0
ECEC 201	Advanced Programming for Engineers	3.0
ECEC 204	Design with Microcontrollers	3.0
ECEC 355	Computer Organization & Architecture	3.0
ECEC 357	Introduction to Computer Networks	3.0
Electives [*]		**9.0**
Total Credits		25.0

[*] Students should choose an additional 9 credits from 300- and/or 400-level Computer Engineering (ECEC) courses. All prerequisites must be satisfied.

Additional Information

Additional information about this minor is available on the ECE Department website (https://drexel.edu/engineering/academics/departments/electrical-computer-engineering/).

For advising questions, please contact the ECE advisor (https://drexel.edu/engineering/academics/departments/electrical-computer-engineering/resources/current-undergrad/).

Minor in Construction Management

About the Minor

Students in civil engineering, architectural engineering, architecture and business may select to pursue construction management as a minor area of study. Because construction is inherently related to design in these disciplines, the construction management minor can be a natural extension of each field of study.

The requirements for the minor include:

- Completion of a minimum of 24.0 credits.
- Courses used to fulfill general education requirements may not be counted toward an academic minor.
- Up to nine credits earned within the student's major may be counted toward the minor with minor department approval.

- Prerequisite courses may be counted toward the minor if recommended by the minor department.

Program Requirements

Required Courses

CMGT 161	Building Materials and Construction Methods I	3.0
CMGT 162	Building Materials and Construction Methods II	3.0
CMGT 361	Contracts And Specifications I	3.0
CMGT 362	Contracts and Specifications II	3.0
CMGT 363	Estimating I	3.0
CMGT 467	Techniques of Project Control	4.0
Select two of the following: [*]		6.0
CMGT 261	Construction Safety	
CMGT 263	Understanding Construction Drawings	
CMGT 364	Estimating II	
CMGT 385 [WI]	Selling and Negotiation Techniques in Construction	
CMGT 461	Construction Project & Company Management	
CMGT 463	Value Engineering	

[*] Choice of electives must be approved by the department based on the student's major field and prior experience.

Certain courses within the student's major may also be used to meet the minor requirements. These include:

ARCH 261	Environmental Systems I	3.0
ARCH 262	Environmental Systems II	3.0
CIVE 240 [WI]	Engineering Economic Analysis	3.0
ARCH 161	Architectural Construction [*]	3.0
Total Credits		12.0

[*] ARCH 161 can be substituted for CMGT 161 for Architects. An elective may be substituted for CMGT 162.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Minor in Electrical Engineering

About the Minor

The minor provides students with the foundation needed to understand the diverse areas covered by the electrical engineering major. Our engineers contribute to industry and research in areas that include electronic circuits and systems, lasers and photonics, semiconductor devices, computer and communication networks, biomedical engineering, bioinformatics, robotics, automation and control, and power and energy systems.

Prerequisites

The minor assumes that students will have a background in mathematics and physics equivalent to that covered in the first two years of the engineering curriculum. In mathematics, this would include calculus (MATH 121 - MATH 122 and MATH 200), linear algebra, and differential equations. The physics requirements are PHYS 101 and PHYS 102. Courses taken to meet these requirements will not count toward the minor.

Required Courses

ECE 200	Digital Logic Design	4.0
ECE 201	Foundations of Electric Circuits I	4.0
ECES 301	Signals and Systems I	4.0
Electives *		12.0
Total Credits		24.0

*   Students should choose 12.0 credits from the 300- and/or 400-level ECE courses. These courses can come from the Computer (ECEC), Electrophysics (ECEE), Electric Power (ECEP), or Systems (ECES) groups. All prerequisites must be satisfied. Students majoring in Computer Engineering and minoring in Electrical Engineering may **only** choose elective courses from the ECEE, ECEP, and ECES course groups.

Additional information

Additional information about this minor is available on the ECE Department website (https://drexel.edu/engineering/academics/departments/electrical-computer-engineering/).

For advising questions, please contact the ECE advisor. (https://drexel.edu/engineering/academics/departments/electrical-computer-engineering/resources/current-undergrad/)

Minor in Engineering Leadership

About the Minor

By completing a minor in Engineering Leadership, students will gain practice in self-reflection, mentorship, management, and communication. Students will customize their minor by choosing from one of four available tracks: entrepreneurship, leadership, management, and technology. A culminating project focused on solving engineering problems in the local community will connect students' technical knowledge with service to others.

Admission Requirements

This program is currently open to students in engineering disciplines, which include programs from the College of Engineering, College of Computing and Informatics, School of Biomedical Engineering, and students in the Business & Engineering program in the LeBow College of Business.

Program Requirements

Required Courses

EGMT 404 [WI]	Introduction to Engineering Management Communications	3.0
EGMT 462	Introduction to Engineering Management	3.0
EGMT 470	Engineering Leadership Capstone	2.0
ORGB 320	Leadership: Theory and Practice	4.0
Elective Tracks: Students must choose one of the following elective tracks. Substitutions may be made in any of these tracks with prior approval from the Department.		**12.0**
Management Track		
BLAW 201	Business Law I	
CIVE 240 [WI]	Engineering Economic Analysis	
EGMT 465	Introduction to Systems Engineering	
PROJ 401	Introduction to Project Management	
Entrepreneurship Track		
ENTP 210 [WI]	Leading Start-Ups *	
ENTP 215	Building Entrepreneurial Teams *	
ENTP 329	Entrepreneurship & New Technologies *	
ENTP 370	Global Entrepreneurship *	
ENTP 385	Innovation in Established Companies *	
Leadership Track		
ORGB 300 [WI]	Organizational Behavior	
ORGB 400	Team Development and Leadership	
ORGB 420	Negotiations and Conflict Resolution	
PROJ 403	Essentials of Project Leadership and Teamwork	
Technology Track		
MGMT 201	Introduction to Technology Innovation Management	
MGMT 301	Designing Innovative Organizations	
MGMT 302	Competing in Technology Industries	
MGMT 364	Technology Management	
SYSE 488	Systems Engineering Analysis	
Optional (these courses may be substituted for any of the above elective options)		
EGMT 295	Survey of Mentorship	
EGMT 296	Survey of Leadership	
Total Credits		24.0

*   ENTP 101 is a prerequisite for all ENTP courses, but it will not count towards the Minor in Engineering Leadership.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/)

Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Minor in Engineering Management

About the Minor

This minor focuses on the management of technical organizations. The required courses enhance an engineer's resume to show understanding of management and leadership behaviors, economics, and systems engineering and thinking.

While this minor is primarily designed to provide engineering management knowledge and skills to other engineers, with the equivalent science background students from other majors (biomedical engineering science, for example) can also complete this minor.

Prerequisites

The common engineering core curriculum prerequisites are required of all students in the college of engineering. Students from other colleges will need the appropriate background prerequisite courses.

Program Requirements

Required Courses

BLAW 201	Business Law I	4.0
CIVE 240 [WI]	Engineering Economic Analysis	3.0
PROJ 401	Introduction to Project Management	3.0
EGMT 404 [WI]	Introduction to Engineering Management Communications	3.0
EGMT 462	Introduction to Engineering Management	3.0
or MEM 462	Introduction to Engineering Management	
EGMT 465	Introduction to Systems Engineering	3.0
Complete 2 classes from the list below		**7.0**
ECON 201	Principles of Microeconomics	
ECON 202	Principles of Macroeconomics	
ENTP 329	Entrepreneurship & New Technologies	
Other courses accepted with Director approval		
Total Credits		26.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses

with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Additional Information

More information is available on the Engineering Management Minor (http://www.drexel.edu/egmt/programs/minor/) web page.

Minor in Engineering Policy Analysis

About the Minor

An increasingly complex, interrelated, and technological society has come to rely on quantitative models of engineering systems to make decisions. While these models are used to make decisions in domains as varied as telecommunications, energy, and environmental quality, a common set of tools for the use of such models in decision making has been developed and forms the basis of an emerging discipline in engineering policy analysis. The practitioners of this discipline need training in mathematical and social science analytic approaches, as well as an understanding of the human factors that inevitably influence real-world policy choices. The minor in engineering policy analysis is designed to introduce students to these topics.

This minor broadens the exposure of engineering students to societal issues and provides an initial introduction to analytic skills which they may use both in engineering practice and as managers (given that many engineers become managers both in the private and public sector). Graduates will have additional training and credentials relevant not only to engineering careers, but also to other fields, including urban planning, management consulting, and public administration.

The program provides a basis for students to evaluate their interest and aptitude for graduate studies in fields such as business administration, public administration, and public policy. For pre-law students, the minor introduces them to analytic methods that inform the establishment and interpretation of laws as a mechanism of public policy implementation.

Applied Quantitative Methods (6.0 credits minimum)

Students select one sequence in probability and statistics consisting of one introductory course and one advanced course. Any introductory course may be combined with advanced course provided that the prerequisites of the advanced course are met.		
Introductory Course Options		
Select one of the following:		3.0-4.0
CHE 350	Statistics and Design of Experiments	
ENGR 361	Statistical Analysis of Engineering Systems	
MATH 311	Probability and Statistics I	
MEM 361	Engineering Reliability	
STAT 205	Statistical Inference I	
Advanced Course Options		
Select one of the following:		3.0-4.0
MATH 312	Probability and Statistics II	
STAT 206	Statistical Inference II	
ENVE 750	Data-based Engineering Modeling	
Additional Quantitative Method Electives		
MATH 300	Numerical Analysis I	
MATH 305	Introduction to Optimization Theory	
MATH 318 [WI]	Mathematical Applications of Statistical Software	
OPR 320	Linear Models for Decision Making	
OPR 330	Advanced Decision Making and Simulation	

Policy Analytic Methods

Students are required to take at least 11.0 credits, including a course on capital investment decision making and a two-course sequence in economics.

CIVE 240 [WI]	Engineering Economic Analysis	3.0
ECON 201	Principles of Microeconomics	4.0
ECON 202	Principles of Macroeconomics	4.0
Additional Policy Analytic Methods Electives		
ECON 250	Game Theory and Applications	
ECON 301	Microeconomics	
ECON 330	Managerial Economics	
ECON 334	Public Finance	
ECON 351	Resource and Environmental Economics	
ENVS 370	Practice of Environmental Economics	
ENVE 727	Risk Assessment	
Human Factors		
Select two of the following:		6.0
ENSS 347	Introduction to Environmental Policy Analysis	
PSCI 110	American Government	
PSCI 220	Constitutional Law I	
PSCI 372	City in United States Political Development	
SOC 215	Sociology of Work	
SOC 240	Urban Sociology	
Elective		
One additional credit of coursework is required for the minor. This credit may be any of the three areas above. It is permissible to count 3.0 of the credits from a 4.0 credit class towards fulfilling one of the other areas, thereby using the 4th credit to meet the elective credit requirement.		1.0
Total Credits		24.0-26.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Minor in Engineering Product Development

About the Minor

One of the final steps in creating a marketable product is the manufacturing of components. Throughout the design process, engineers must fully understand a variety of processes in which parts can be produced and assembled. Selecting a manufacturing method and

ensuring the parts are capable of production is a difficult but critical part of the product design process.

The minor in Engineering Product Development (EPD) will allow students to apply the theory of design for manufacturing (DFM) and design for assembly (DFA) to the overall design process. Topics include practical techniques for selection of materials and processes, design considerations for production, manual assembly and automated assembly, and Boothroyd and Dewhurst methods. Students review case studies and analyze production assemblies.

Program Requirements

EET 208	Introduction to Programming for Embedded Systems	3.0
MET 100	Graphical Communication	3.0
MET 101	Engineering Materials	3.0
MET 201	Introduction to Manufacturing Processes	3.0
MET 316	Computer Numerical Control	3.0
MET 321	Changing World of 3D Printing and Rapid Prototyping	3.0
MET 322	Design for Manufacturing and Assembly	3.0
PROD 101	History and Analysis of Product Design	3.0
PROD 220	Product Design Form Studio	4.0
Total Credits		28.0

Additional Information

For more information on the Engineering Product Development minor, please contact Gerry Willis at gtm23@drexel.edu or 215-895-6253.

Minor in Entertainment Engineering

About the Minor

Note: The Entertainment Engineering minor is not accepting new students until further notice. Please contact one of our advisors for additional information.

Digital technologies have revolutionized the world of entertainment and created a new field combining the foundations of electrical engineering with entertainment media. This minor is designed for students with the technical literacy to effectively use, as well as develop, new tools for digital content creation and manipulation for entertainment applications.

The entertainment engineering minor consists of a minimum of six (6) required courses and an additional two (2) elective courses.

Entertainment Engineering Option for Non-Engineering Majors

The minor assumes students have a background in mathematics (equivalent to Calculus II). Courses taken to meet these prerequisite requirements will not count toward the minor.

Required Courses		
DIGM 105	Overview of Digital Media	3.0
ECE 101	Electrical and Computer Engineering in the Real World	1.0
ECE 121	Introduction to Entertainment Engineering	3.0
ECES 201	Introduction to Audio-Visual Signals	4.0
ECES 352	Introduction to Digital Signal Process	4.0
PSY 101	General Psychology I	3.0
Electives		
Select one of the following:		3.0
PSY 213	Sensation and Perception	

INFO 310	Human-Centered Design Process & Methods	
Select one of the following:		3.0
FMVD 110	Basic Shooting and Lighting	
FMVD 115	Basic Editing	
FMVD 120	Basic Sound	
MIP 133	Digital Audio Workstations I	
Total Credits		24.0

Additional Information

Computer Engineering and Electrical Engineering majors must substitute ECES 301: *Systems and Signals I* for ECES 201.

Additional information about this minor is available on the ECE Department website (https://drexel.edu/engineering/academics/departments/electrical-computer-engineering/).

For advising questions, please contact the ECE advisor (https://drexel.edu/engineering/academics/departments/electrical-computer-engineering/resources/current-undergrad/).

Minor in Environmental Engineering

About the Minor

The Environmental Engineering minor focuses on pollution control and is primarily designed to broaden the professional capabilities of engineering students. For example, chemical and mechanical engineers working in process and manufacturing plants will be provided with a better understanding of the natural context of their facilities, better equipped to perform fate and risk analyses, and better able to apply the appropriate technology to control air and water discharges.

While this minor is designed to provide technical knowledge and skills to other engineers, with the appropriate prerequisites students from disciplines other than engineering can also complete this minor.

The minor consists of five required core courses and three additional courses taken from a list of options.

Prerequisites

The common engineering core curriculum prerequisites are required of all students in the College of Engineering. Students from other colleges will need the appropriate background in physics, mathematics and thermodynamics.

Required Courses

CAEE 203	System Balances and Design in CAEE	3.0
CIVE 330	Hydraulics	4.0
ENVE 300	Introduction to Environmental Engineering	3.0
ENVE 302	Environmental Transport and Kinetics	3.0
ENVS 401	Chemistry of the Environment	3.0
Select three of the following:		8.0
CIVE 430	Hydrology	
ENVE 410	Solid and Hazardous Waste	
ENVE 460	Fundamentals of Air Pollution Control	
ENVE 486	Environmental Engineering Processes Laboratory I	
ENVE 487	Environmental Engineering Processes Laboratory II	
Total Credits		24.0

Minor in Global Engineering

About the Minor

Engineering is a critical component of our increasingly connected and complex global economy. Whether developing sanitation systems in Nigeria for Engineers Without Borders, or managing engineering projects for a multinational company, understanding how to get things done in an international context is critical for today's engineers.

The Minor in Global Engineering is designed for engineers who plan to use their technical expertise in an international context. The coursework prepares students to become global citizens who are skilled and adaptive in meeting the challenges of a global work environment. The minor develops students' historical, political, and cultural awareness at a global level. It also provides students with the necessary knowledge of international business in order to succeed in the global economy.

In addition to the required coursework, students must successfully complete an experience abroad prior to graduation. Experiences other than approved Study Abroad (http://www.drexel.edu/studyabroad/) or Co-op Abroad programs must receive prior approval from the College of Engineering Associate Dean for Undergraduate Affairs.

Foreign language

Foreign language is not required for the Minor in Global Engineering, but it may be required as a prerequisite to a student's experience abroad. In addition, a student can choose to apply as many as eight (8.0) credits of 200-level or higher foreign language toward the credit requirements for the minor.

Restrictions

Currently, only students enrolled in the College of Engineering or the School of Biomedical Engineering, Science and Health Systems can enroll in this minor.

Program Requirements

Required Courses

ENGR 280	Introduction to Global Engineering	2.0
EGMT 350	Conflict Management for Engineers	3.0
EGMT 465	Introduction to Systems Engineering	3.0
PROJ 401	Introduction to Project Management	3.0
PROJ 435	Essentials of International Project Management	3.0
Select three of the following (a minimum of one course from each of the three categories):		10.0
International Business		
BLAW 340	International Business Law	
ECON 342	Economic Development [*]	
EGMT T380	Special Topics in EGMT	
INTB 200	International Business	
INTB 332	Multinational Corporations [*]	
INTB 334	International Trade [*]	
INTB 336	International Money and Finance [*]	
Political Science/History		
HIST 259	History of Europe in the 20th Century	
PSCI 140	Comparative Politics I	
PSCI 150	International Politics	
PSCI 351	International Organizations: The United Nations	
PSCI 352	Ethics and International Relations	
PSCI 353	International Human Rights	
PSCI 357	The European Union in World Politics	

Culture and Communications		
COM 360	International Communication	
SOC 330	Development and Underdevelopment in the Global South	
PHIL 335	Global Ethical Issues [**]	
WGST 240	Women and Society in a Global Context	
Total Credits		24.0

[*]   Require ECON 201 and ECON 202 as pre-requisites.

[**]   Requires PHIL 105 as a prerequisite.

Note: Students may petition the Engineering Management Department Head for permission to apply other courses they believe relevant to the Minor in Global Engineering toward their credit requirements. Such requests will be handled on a case-by-case basis.

Minor in Green Energy and Sustainability

About the Minor

This minor program aims to familiarize students with recent technological developments in renewable energy technologies and sustainability, as well as to conduct experimental work in these areas.

Students will explore the principles, characteristics and operation of various renewable energy sources, storage devices, and energy conversion systems. In addition, this minor is designed to encourage students to enhance their knowledge of the fields of sustainability and green energy technologies, so they may be able to expand their skills and career opportunities.

The minor in Green Energy and Sustainability has a broad audience, being created to give students both breadth and depth in this field, with focus on technologies and their societal, economic and environmental impact, with emphasis on the manufacturing industry.

Program Requirements

ECEP 480	Solar Energy Engineering	3.0
EET 201	Circuit Analysis I	4.0
EET 202	Circuit Analysis II	4.0
EET 320	Renewable Energy Systems	3.0
EET 322	Energy Conversion	4.0
INDE 240	Technology Economics	3.0
INDE 420	Industrial Energy Systems	3.0
Total Credits		24.0

Additional Information

For more information on the Green Energy and Sustainability minor, please contact Gerry Willis at gtm23@drexel.edu or 215-895-6253.

Minor in Materials Science and Engineering

About the Minor

In addition to the core engineering curriculum and the courses required for majors in chemical, civil, architectural and environmental, electrical, or mechanical engineering, engineering students from other majors can obtain a minor in materials science and engineering by completing 25.0 credits from the courses listed below.

Required Courses		
MATE 230	Fundamentals of Materials II	4.0
Select six (at least 21.0 credits) of the following:		21.0
MATE 214	Introduction to Polymers [*]	
MATE 240	Thermodynamics of Materials	
MATE 245	Kinetics of Materials	
MATE 280	Advanced Materials Laboratory	
MATE 341	Defects in Solids	
MATE 351	Electronic and Photonic Properties of Materials	
MATE 355	Structure and Characterization of Crystalline Materials	
MATE 370	Mechanical Behavior of Solids [**]	
MATE 455	Biomedical Materials	
Total Credits		25.0

[*]   MATE 214 requires CHEM 241 as a pre-requisite. If MATE 214 is elected, the credits for CHEM 241 can count toward the 21 credits.

[**]   MATE 370 requires MATH 201 as a pre-requisite. If MATE 370 is elected, the credits for MATH 201 can count toward the 21 credits.

Note: Only one of the prerequisites (either MATH 201 or CHEM 241) can count toward the required 25.0 credits. In other words, both MATE 214 and MATE 370 can be used to fulfill the requirements for the minor, but only the prerequisite for one of those courses will be counted toward the 25.0 credits required for the minor. Similarly, neither MATH 201 nor CHEM 241 can be counted alone as fulfilling the requirements for this minor. The credits for MATH 201 or CHEM 241 will only count toward the minor when the course(s) is/are taken as a prerequisite for MATE 214 or MATE 370, respectively. Substitution for these courses by equivalent courses offered by other departments and/or institutions may be made with the approval of the Department of Materials Science and Engineering on a case-by-case basis.

At least two-thirds of the content of a substitute course must be the same as that of the course in the list above. It is imperative that students check each course carefully with respect to prerequisites since some may be included in the list above and some may be from other departments. Courses taken outside of the MSE department as prerequisites do not count towards the 25.0 credits required for the minor. They may, however, be used as technical or free electives in students' home departments. Students pursuing the minor in Materials Science and Engineering are also encouraged to select a senior design topic that relates to the field of materials.

Minor in Mechanical Engineering and Mechanics

About the Minor

Any undergraduate student in good standing who has completed more than 30.0 credits at Drexel may apply for the minor in mechanical engineering.

The minor must contain a minimum of 24.0 MEM credits according to the following distribution: (a) 16.0 credits from any four of the 4-credit required course options; (b) at least eight credits from additional required courses or from the laboratory components and recommended electives.

Required Course Options		
Select four of the following:		16.0
MEM 220	Fluid Mechanics I	
MEM 230	Mechanics of Materials I	
MEM 238	Dynamics	

MEM 255	Introduction to Controls	
MEM 310	Thermodynamic Analysis I	
MEM 345	Heat Transfer	
MEM 355	Performance Enhancement of Dynamic Systems	
MEM 361	Engineering Reliability	
MEM 435	Introduction to Computer-Aided Design and Manufacturing	
Select three of the following:		8.0
Laboratories		
MEM 311	Thermal Fluid Science Laboratory	
MEM 331	Experimental Mechanics I	
MEM 351	Dynamic Systems Laboratory I	
Recommended Electives		
MEM 320	Fluid Dynamics I	
MEM 330	Mechanics of Materials II	
MEM 361	Engineering Reliability	
MEM 410	Thermodynamic Analysis II	
MEM 420	Aerodynamics	
MEM 423	Mechanics of Vibration	
MEM 425	Aircraft Design & Performance	
MEM 430	Advanced Stress Analysis	
MEM 437	Manufacturing Process I	
MEM 438	Manufacturing Process II	
MEM 440	Thermal Systems Design	
MEM 453	Aircraft Flight Dynamics & Control I	
MEM 455	Introduction to Robotics	
MEM 458	Micro-Based Control Systems I	
MEM 459	Control Applications of DSP Microprocessors	
MEM 462 [WI]	Introduction to Engineering Management	
Total Credits		24.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Minor in Nuclear Engineering

About the Minor

The field of nuclear engineering covers topics from fundamental particle physics to nuclear power. Example commercial applications where nuclear engineers are utilized are power, medicine, oil exploration, and testing of materials. The nuclear engineering minor familiarizes students with terminology, mathematical applications, theory, and ethics

corresponding to common nuclear engineering topics. This minor is open to all engineering, physics, and chemistry majors.

The minor assumes that students will have a background in mathematics and physics equivalent to that covered in the first two years of the engineering curriculum. In mathematics, this would include calculus (MATH 121 - MATH 122) and dynamic engineering systems (ENGR 232). The physics requirements are PHYS 101, PHYS 102 and PHYS 201. In addition, CHEM 101, ENGR 220, and ENGR 231 are needed. Courses taken to meet these requirements will not count toward the minor.

Program Requirements

Required Courses		
ECEP 371	Introduction to Nuclear Engineering	2.0
or MEM 371	Introduction to Nuclear Engineering I	
ECEP 372	Radiation Detection and Measurement	3.0
ECEP 402	Theory of Nuclear Reactors	4.0
ECEP 406	Introduction to Radiation Health Principles	3.0
MATE 450	The Nuclear Fuel Cycle & Materials	3.0
PHYS 330	Introduction to Nuclear Physics	2.0
Select 9.0 credits from at least two of the following principal areas		9.0
Industrial Applications Electives		
ECEP 403	Nuclear Power Plant Design & Operation	
MEM 402	Power Plant Design	
MEM 448	Applications of Thermal Plasmas	
MEM 449	Applications of Non-Thermal Plasmas	
Power Engineering Electives		
ECEP 352	Electric Motor Control Principles	
ECEP 354	Energy Management Principles	
ECEP 411	Power Systems I	
ECEP 412	Power Systems II	
Nuclear & Thermal Engineering & Science Electives		
MEM 446	Fundamentals of Plasmas I	
MEM 447	Fundamentals of Plasmas II	
Materials Electives		
MATE 230	Fundamentals of Materials II	
MATE 341	Defects in Solids	
MATE 355	Structure and Characterization of Crystalline Materials	
MATE 370	Mechanical Behavior of Solids	
Transport Phenomena Electives		
CHE 341	Fluid Mechanics	
CHE 342	Heat Transfer	
CIVE 320	Introduction to Fluid Flow	
MEM 220	Fluid Mechanics I	
MEM 345	Heat Transfer	
Simulation Electives		
PHYS 105	Computational Physics I	
PHYS 305	Computational Physics II	
PHYS 405	Advanced Computational Physics	
Total Credits		26.0

The Nuclear Engineering minor is open to all engineering majors. The minor consists of a minimum of six required courses for 17.0 credits and an additional 9.0 credits of elective courses.

Additional Information

Additional information about this minor is available on the ECE Department website. (http://drexel.edu/ece/academics/undergrad/minors/)

For advising questions, please contact the ECE advisor (https://drexel.edu/engineering/academics/departments/electrical-computer-engineering/resources/current-undergrad/).

Minor in Project Management

Note: **The Project Management program is not currently accepting applications for the Minor in Project Management.**

The minor in Project Management is now housed in the Goodwin College of Professional Studies.

Project management focuses on the management of teams of people and other resources in the planning, design, execution, and implementation of various aspects of projects in practically every industry. The minor in Project Management provides students with the skills necessary to perform successfully as members of project management teams.

The minor in Project Management will provide a foundation for graduate education in project management and prepare interested students to pursue the Certified Associate in Project Management (CAPM)[®] or Project Management Professional (PMP)[®] credentials from the Project Management Institute (PMI) .

A minimum grade of "C" (2.0) must be earned in each course in this minor for the minor to be awarded.

Requirements

- Open to Drexel undergraduate students in any discipline.
- Must have sophomore, pre-junior, junior, or senior standing.
- Must have a cumulative GPA of at least 3.0.
- Application to Add a Minor form (approved by the student's primary academic advisor)

Required Courses

PROJ 401	Introduction to Project Management	3.0
PROJ 402	Essentials of Project Planning & Scheduling	3.0
PROJ 403	Essentials of Project Leadership and Teamwork	3.0
PROJ 415	Essentials of Project Estimation & Cost Management	3.0
PROJ 430	Essentials of Managing Multiple Projects	3.0
Select 3 additional courses:		**9.0**
PROJ 410	Essentials of Project Quality Management	
PROJ 420	Essentials of Project Risk Assessment & Management	
PROJ 435	Essentials of International Project Management	
Project Management Elective (4XX or higher)		
Other courses, with prior written approval of student's Academic Advisor and the Project Management program (must be 4XX or higher and be relevant to Project Management)		
Total Credits		24.0

Questions about the minor in Project Management should be directed to:

Mercedes Moultrie
Program Manager
Project Management Program
Tel: 215.571.3939
E-mail: mm342@drexel.edu

CAPM, PMP, and PMBOK are registered marks of the Project Management Institute, Inc.

Minor in Robotics and Automation

About the Minor

Robotics and Automation Engineering has evolved around several engineering and technology fields such as electrical, mechanical, electro-mechanical, as well as electronics engineering. It merges the fundamental principles of electrical hardware and sensor usage with pneumatics, hydraulics, computer programming and instrumentation science, and related applications.

The Minor in Robotics and Automation (ROBT) introduces students to mechatronics engineering and prepares them for automation related careers in process control, manufacturing, computerized hardware/software integration, and sustainable automated systems. It allows students to engage in real life industrial processes related to automation in an industrial robotics laboratory setting.

Program Requirements

EET 201	Circuit Analysis I	4.0
EET 205	Digital Electronics	4.0
EET 319	PLC Fundamentals	4.0
INDE 350	Industrial Engineering Simulation	3.0
MET 205	Robotics and Mechatronics	3.0
MET 209	Fluid Power	4.0
MET 310	Advanced Robotics and Mechatronics	3.0
Total Credits		25.0

Minor in Systems Engineering

About the Minor

Systems engineering is a set of processes and tools used to guide the engineering of large scale systems. Unlike traditional engineering which may focus on very specific technical components, systems engineers focus on the entirety of a system to ensure it is run efficiently and effectively. The Minor will prepare undergraduate students for the current demands of industry and provide them with the opportunity to achieve a formal education in systems engineering.

The Minor in Systems Engineering is designed for students in the College of Engineering and School of Biomedical Engineering who are interested in the management of large, complex systems. It leads to careers in a wide range of industries, such as aerospace, communications, healthcare, manufacturing, and transportation.

The opportunity to pursue a minor in systems engineering will be offered to students who meet the following conditions:

- Minimum 3.0 Cumulative GPA
- Upper Class students (sophomores, juniors, pre-juniors and seniors)
- Student in the College of Engineering or the School of Biomedical Engineering

Core Requirements

CIVE 240 [WI]	Engineering Economic Analysis	3.0
EGMT 462	Introduction to Engineering Management	3.0
or MEM 462	Introduction to Engineering Management	
EGMT 465	Introduction to Systems Engineering	3.0
INDE 362	Operations Research for Engineering I	3.0
SYSE 488	Systems Engineering Analysis	3.0
Complete 9 credits of courses from the following list		**9.0**

ECES 356	Theory of Control	
ECES 444	Systems and Control I	
INDE 350	Industrial Engineering Simulation	
INDE 365	Systems Analysis Methods I	
INDE 366	Systems Analysis Methods II	
MEM 355	Performance Enhancement of Dynamic Systems	
SYSE 530	Systems Engineering Design	
SYSE 531	Systems Architecture Development	
SYSE 532	Software Systems Engineering	
SYSE 533	Systems Integration and Test	
Total Credits		24.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Minor in Technology

About the Minor

This minor provides both the breadth and the depth of knowledge in emerging technologies. It consists of a sampling of Engineering Technology courses that would provide students with a greater knowledge and appreciation of emerging technologies. The courses span the range of levels from first year to advanced undergraduate courses. The minor also covers emerging technology fields such as nanotechnology and renewable energy and emerging technological applications such as 3D printing and Computer Numerical Control (CNC).

The minor will serve students interested in an advance knowledge in emerging technologies or will be working in the technology field but whose majors are not necessarily engineering or engineering technology. These students will gain solid understanding of technology to stay competitive with their peers.

Program Requirements

EET 204	Introduction to Nanotechnology	3.0
EET 320	Renewable Energy Systems	3.0
EET 333 [WI]	Non-Destructive Evaluation of Materials	4.0
INDE 240	Technology Economics	3.0
MET 100	Graphical Communication	3.0
MET 205	Robotics and Mechatronics	3.0

MET 316	Computer Numerical Control	3.0
MET 321	Changing World of 3D Printing and Rapid Prototyping	3.0
Total Credits		25.0

Additional Information

For more information on the Technology minor, please contact Gerry Willis at gtm23@drexel.edu or 215-895-6253.

Certificate in Construction Management Concepts

Certificate Level: Undergraduate
Admission Requirements: High school diploma or GED
Certificate Type: Certificate
Number of Credits to Completion: 19.0
Instructional Delivery: Campus, Online
Calendar Type: Quarter
Expected Time to Completion: 1 year
Financial Aid Eligibility: Not aid eligible
Classification of Instructional Program (CIP) Code: 52.2001
Standard Occupational Classification (SOC) Code: 11-9021

About the Program

If you are looking for a way to move your construction, architecture, or engineering career forward or are considering an undergraduate or graduate degree but are unable to make the full commitment at this time, consider a certificate program from Drexel's Construction Management program.

The undergraduate certificate in the Construction Science is designed to fill the training needs of industry leaders.

Developed at the request of two contractors' associations — the General Building Contractors Association and the Contractors Association of Eastern Pennsylvania — this certificate is suitable for those who have undergraduate degrees in other fields but wish to work in the construction

industry along with those who are already employed in the industry but seek career advancement or updated training.

The Construction Management Concepts Certificate focuses on construction contracts, specifications, and practices with regard to business law and liability. The certificate also covers value engineering and construction planning, scheduling, network systems, as well as the communications required for project control and claims prevention.

Admission Requirements

Successful completion of the Fundamentals of Construction Management Certificate (p. 290) and the Construction Science Certificate (p. 290).

Program Requirements

Requirements

CMGT 361	Contracts And Specifications I	3.0
CMGT 362	Contracts and Specifications II	3.0
CMGT 385 [WI]	Selling and Negotiation Techniques in Construction	3.0
CMGT 461	Construction Project & Company Management	3.0
CMGT 463	Value Engineering	3.0
CMGT 467	Techniques of Project Control	4.0
Total Credits		19.0

Sample Plan of Study

Term 1		Credits
CMGT 361	Contracts And Specifications I	3.0
CMGT 467	Techniques of Project Control	4.0
	Term Credits	7.0
Term 2		
CMGT 362	Contracts and Specifications II	3.0
CMGT 385 [WI]	Selling and Negotiation Techniques in Construction	3.0
	Term Credits	6.0
Term 3		
CMGT 461	Construction Project & Company Management	3.0
CMGT 463	Value Engineering	3.0
	Term Credits	6.0

Total Credit: 19.0

Certificate in Construction Science

Certificate Level: Undergraduate
Admission Requirements: High school diploma or GED
Certificate Type: Certificate
Number of Credits to Completion: 18.0
Instructional Delivery: Campus, Online
Calendar Type: Quarter
Expected Time to Completion: 1 year
Financial Aid Eligibility: Not aid eligible
Classification of Instructional Program (CIP) Code: 52.2001
Standard Occupational Classification (SOC) Code: 11-9021

NAE Grand Challenge Scholars Program

About the Program

The National Academy of Engineering (NAE) Grand Challenge Scholars Program is a combined curricular and extra-curricular program with five components that are designed to prepare students to be the generation that solves the grand challenges facing society in this century. Students will work with a mentor on research related to a NAE Grand Challenge, engage in an interdisciplinary curriculum, entrepreneurship, global perspective, and service learning. Upon completing the program the student will receive a certificate of completion signed by both the NAE and the responsible Drexel University official.

Admission Requirements

Students have the opportunity to join the program anytime in the third quarter of their freshman year but not later than the end of their third year. Candidates must have a GPA of at least 3.25. The application includes a statement on why the student wishes to be a part of the program and vision statement for completion of the program requirements including the research and civic engagement requirements. Students will complete a proposed plan of study that satisfies the requirements of the GCSP and must identify a mentor who they will work with in meeting the GCSP objectives.

For more information and program contacts, please review the NAE Grand Challenges Scholars Program (https://drexel.edu/engineering/resources/for-students/leadership-research-programs/nae-grand-challenges-scholars-program/) webpage.

Program Requirements

Project or research activity
Each Scholar will engage in some research that can be identified with one of the very broadly identified NAE Grand Challenges with a research mentor. The mentorship and research issues will be discussed at the student selection interviews.

Civic Engagement activity

Each student will complete service with one community organization. The Scholar will be required to submit a written report on their activity and accomplishments.

Please note: *In each of the coursework areas below, a student has the option of choosing an alternate course, provided it is approved by the program director and satisfies NAE requirements.*

Program Requirements		
Entrepreneurship and Innovation experience. Select two courses from the following:		6.0-8.0
ENTP 210 [WI]	Leading Start-Ups	
or ENTP 440	Launch It!: Early Stage	
or MGMT 260	Introduction to Entrepreneurship	
or MGMT 365	Business Plan for Entrepreneurs	
Global and cross-cultural perspectives. Select one course from the following:		2.0-3.0
ENTP 370	Global Entrepreneurship	
or ENGR 280	Introduction to Global Engineering	
International Business. Select one course from the following:		4.0
INTB 200	International Business	
or BLAW 342	Criminal Law	
Political Science/History. Select one course from the following:		4.0
PSCI 140	Comparative Politics I	
or PSCI 352	Ethics and International Relations	
or PSCI 357	The European Union in World Politics	
Culture and Communications. Select one course from the following:		3.0
COM 360	International Communication	
or GST 359	Culture and Values	
or WGST 240	Women and Society in a Global Context	
Total Credits		19.0-22.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must

be in a student's major. The third can be in any discipline. (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

The College of Nursing and Health Professions

By anticipating and meeting the challenges presented by the nation's health care system, Drexel's College of Nursing and Health Professions is doing its part to guarantee a lasting legacy for current and future health professionals.

The College of Nursing and Health Professions offers a wide range of undergraduate programs. Many offer flexible scheduling, making it possible for students to continue their education through part-time, online, night, or weekend study.

Majors

- Behavioral Health Counseling (BS) (p. 294)
- Culinary Arts and Science (BSCAS) (p. 298)
- Health Sciences (BS) (p. 302)
- Health Services Administration (BS) (p. 306)
- Hospitality Management (BSHM) (p. 308)
- Nursing (BSN) (p. 311)
- Nursing (BSN) - Accelerated Career Entry (ACE) (p. 315)
- Nursing RN/BSN Completion Program (p. 317)
- Nutrition and Foods (BS) (p. 320)

Accelerated Programs

- Health Sciences / Physical Therapy (BS/DPT) (p. 323)
- Health Sciences / Physician Assistant (BS/MHS) (p. 325)
- Health Services Administration / Public Health (BS/MPH) (p. 326)
- Nursing (RN/BSN/MSN) (p. 328)
- Nutrition Sciences (BS/MS) (p. 331)

Minors

- Addictions Counseling (p. 334)
- Culinary Arts (p. 334)
- Exercise Science (p. 335)
- Food Science (p. 335)
- Food Studies (p. 335)
- Health Services Administration (p. 336)
- Nutrition (p. 336)
- Psychiatric Rehabilitation (p. 337)

Certificates

- Human Lactation (p. 337)
- Medical Billing and Coding (p. 338)

About the College

According to the US Bureau of Labor Statistics' employment projections, the health care sector accounts for nearly 40% of the net increase in employment over the next 10 years, adding 3.8 million jobs by 2024. The national movement to improve health and care delivery is rising in tandem with these numbers.

The College of Nursing and Health Professions has more than a century-long history of educating nurses and health professionals, uniquely preparing clinicians to practice and lead in a rapidly changing healthcare system. Since 2002, the College has embraced the practical ingenuity of Drexel through the refinement and development of more than 25 undergraduate and graduate nursing and health professions programs characterized by the integration of learning and work through cooperative education, a culture of excellence, innovation and technology infusion, research and deep civic engagement. The College has grown to include more than 5,000 students, 200 full-time faculty and 104 staff.

Mission and Approach

The College of Nursing and Health Professions prepares competent and compassionate health professionals through technology-infused and evidence-based programs. The College is committed to leading the way in improving health, reducing health disparities through innovative education, interdisciplinary research, and community-based practice initiatives.

The College has established an interdisciplinary practice in primary care, physical therapy, nutrition sciences and mental health care, including couple and family therapy, behavioral health counseling and creative arts therapies, where students learn and work with faculty in honing their clinical skills. In addition, Drexel's partnerships with employers of health professionals through its co-operative education program affords the opportunity for its undergraduate nursing and health professions students to work in the best healthcare institutions, regionally and nationally, as part of their program of study. This approach challenges the notion of "best practice" with "real practice" and helps our students to achieve the highest learning and clinical outcomes, while gaining a competitive edge in the job market.

Every program in the College has integrated into its curriculum cutting edge technology, including the use of high fidelity manikins and simulation, to build knowledge and skills in both safe and experimental learning situations before practice in actual clinical settings. All courses are web-enhanced with learning tools and information that support knowledge mastery.

The College's researchers in nutrition and rehabilitation sciences, couple and family therapy, and nursing and creative arts therapies have garnered on average $2.9 million in external funding annually. Undergraduate and graduate students work with cutting-edge researchers building knowledge in clinical disciplines with the ultimate goal of improving the quality and outcomes of care.

Accreditation

The College has 12 nationally accredited or approved clinical programs. Pass rates for professional licensing and board certifications are well above the national mean, with nine programs boasting a 100% pass rate and nursing first-time pass rates consistently above 95%.

- The Baccalaureate Degree in Nursing (BSN) and the Master's Degree in Nursing (MSN) programs are accredited by CCNE (Commission on Collegiate Nursing Education). These programs and the post-graduate APRN certificates are also approved by the Pennsylvania State Board of Nursing.
- The Couple and Family Therapy MFT degree and Post-Master's Certificate programs are accredited by COAMFTE (Commission on Accreditation of Marriage and Family Therapy Education).
- The Creative Arts Therapies MA degree programs in Art Therapy and Counseling, Dance/Movement Therapy and Counseling, and Music Therapy and Counseling are approved by AATA (American Art

Therapy Association), ADTA (American Dance Therapy Association), and AMTA (American Music Therapy Association), respectively.

- The Didactic Program in Nutrition is accredited by ACEND (Accreditation Council for Education in Nutrition and Dietetics).

- The Nurse Anesthesia program is accredited by COA (Council on Accreditation of Nurse Anesthesia Educational Programs).

- The Doctor of Physical Therapy (DPT) program is accredited by CAPTE (Commission on Accreditation in Physical Therapy Education).

- The Physician Assistant program is accredited by ARC-PA (Accreditation Review Commission on Education for the Physician Assistant).

Behavioral Health Counseling

Major: Behavioral Health Counseling
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 51.1508
Standard Occupational Classification (SOC) code: 21-1011

About the Program

The Behavioral Health Counseling program offers an innovative approach to undergraduate education offering interactive and experiential courses taught by certified, licensed, and experienced professionals. The program is designed to develop the clinical competencies needed to counsel and support people experiencing mental illnesses, substance use disorders, and children and families. During the freshman and sophomore years, students develop a foundation for clinical practice by studying humanities, social sciences, writing, biological sciences, math, and research methods. Students utilize this foundation to translate evidence- based research into practice. Students also complete ten required courses focusing on interpersonal communication skills, ethical standards, multicultural competence, addictions counseling skills, cognitive behavioral approaches, assessment and treatment planning, and psychiatric rehabilitation practices.

Students apply their knowledge and practice the skills learned during the program via community-based learning and using Drexel University's state of the art Center for Inter-professional Clinical Simulation and Practice (https://drexel.edu/cnhp/about/CICSP/). Students then select from a broad variety of electives based on their career interests. Diversity, equity, inclusion, and social justice principles are incorporated across the rigorous curriculum. The major also offers a co-op experience in a clinical setting that greatly enhances the student's preparation for employment after graduation and for graduate study.

For additional information about this major, visit the Counseling and Family Therapy Department (http://drexel.edu/cnhp/academics/departments/Counseling-and-Family-Therapy/) on the College of Nursing and Health Profession's web site.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

General Education Requirements		
CIVC 101	Introduction to Civic Engagement	1.0
UNIV NH101	The Drexel Experience	1.0
Computing/Communication Requirement		
CS 150	Computer Science Principles	3.0
or COM 230	Techniques of Speaking	
English		
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
Life Science		
BIO 100	Applied Cells, Genetics & Physiology	3.0
or BIO 107	Cells, Genetics & Physiology	
or BIO 161	General Biology I	
or BIO 164	General Biology Laboratory I	
Mathematics		
MATH 107	Probability and Statistics for Liberal Arts	3.0
or MATH 100	Fundamentals of Mathematics	
Humanities and Social Sciences		
ANTH 101	Introduction to Cultural Diversity	3.0
PSY 240 [WI]	Abnormal Psychology	3.0
SOC 101	Introduction to Sociology	3.0
Any HIST course		4.0

Free Electives		**54.0**
Behavioral Health Counseling Courses Required		**30.0**
BACS 100	Life Span Human Development	
or PSY 120	Developmental Psychology	
BACS 200	Foundation of Behavioral Health Care	
BACS 220	Counseling Theory and Practice	
BACS 232	Ethics and Professional Responsibility	
BACS 234	Introduction to Addictive Disorders	
BACS 236 [WI]	Psychiatric Rehabilitation Principles and Practices	
BACS 255	Multicultural Counseling	
BACS 301	Group Counseling I	
BACS 304	Cognitive and Behavioral Counseling I	
BACS 401	Assessment and Treatment Planning	
Behavioral Health Counseling Electives		**39.0**
Select from the following:		
BACS 210	Behavioral Disorders	
BACS 230	Genetics and Mental Health	
BACS 310	Recovery and Relapse Prevention	
BACS 312	Case Management Methods	
BACS 320	Crisis and Brief Intervention	
BACS 325	Psychopharmacology for Counselors	
BACS 345	Careers in Behavioral Health	
BACS 350	Child Psychopathology	
BACS 360	Preventing Substance Abuse	
BACS 367	Advanced Counseling Intervention	
BACS 368	Addictions Counseling with Special Populations	
BACS 370	Problem Gambling Interventions	
BACS 380	Trauma-Informed Care	
BACS 390	Special Topics in Mental Health	
BACS 404	Cognitive and Behavioral Counseling II	
BACS 405	Family-Focused Interventions	

BACS 410	Child and Adolescent Support	
BACS 411	Forensic Behavior Health Service	
BACS 412	Group Counseling II	
BACS 414	Co-Occurring Disorders	
BACS 420	Psychiatric Rehabilitation Competencies	
BACS 430	Behavioral Health and Aging	
BACS 490	Senior Research Project	
Total Credits		180.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plans of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

BS in Behavoral Health Counseling - Saturday Scholars, Winter Cohort

Term 1		Credits
BACS 232	Ethics and Professional Responsibility	3.0

	Term Credits	9.0

Total Credit: 90.0

* If 90 credits are transferred in, then 90 credits must be completed at Drexel University. The number of credits completed at Drexel depends on the number of credits transferred to the University. A minimum of 180 credits is required for graduation and this number includes transfer credits as well as credits taken at Drexel. This is just a sample plan based on 90 transfer credits.

Co-op/Career Opportunities

Drexel University has long been known for its cooperative education program, through which students mix periods of full-time, career-related employment with their studies. The Behavioral Health Counseling curriculum includes one co-op option that exposes students to the varied work environments of behavioral health professionals. Co-op provides students with an opportunity to assess their personal strengths and interests for a career in behavioral health by observing successful mental health and addictions professionals in action. Co-op students work for six months in paid or unpaid positions consistent with their interests, abilities, and aptitudes.

After Graduation

Graduates of the Behavioral Health Counseling program are widely acknowledged by regional employers as being among their best prepared new employees. This reputation helps graduates easily find preferred employment in a variety of behavioral health care settings. Many graduates elect to continue their education in graduate and doctoral programs at Drexel or leading universities across the nation. Within Drexel, students may select excellent graduate programs preparing them for licensure as behavioral health clinicians and/or administrative, research, and behavioral health policy-making positions.

Career Opportunities

Behavioral health counseling professionals are employed in a wide range of venues. Counselors are needed in social service agencies, schools, health care facilities, and inpatient and residential treatment settings. Counselors work with children, adolescents, adults, and elderly individuals who experience disability due to mental illnesses or substance use disorders. Graduates who choose to enter the behavioral health workforce find immediate employment in areas such as psychiatric rehabilitation; family and child support services; addictions counseling; case management and services coordination; forensic mental health services; individual and group counseling; and crisis intervention. The behavioral health care field is tremendously diverse and encompasses far more career opportunities than are listed here. There are career choices to be made at all levels of service — from direct care to administration and policy making. In this regard, students will find tremendous benefit both in the listings and outreach offered by Drexel's Steinbright Career Development Center and in the diverse professional career experience our faculty bring to our students.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) web page for more detailed information on post-graduate opportunities.

Facilities

The College of Nursing and Health Professions is located at Drexel University's Health Sciences Campus in Center City. A Clinical Learning Resource Center (http://www.drexel.edu/cnhp/about/CELR/) offers a simulation lab where students practices skills needed in their chosen behavioral health career. Sessions are video captured to allow students the opportunity to observe and critique their performance.

Behavioral Health Counseling Faculty

Veronica Carey, PhD *(Capella University) Assistant Dean of Diversity and Student Affairs.* Associate Clinical Professor. National and international speaker on psychiatric rehabilitation evidence-based best practices and diversity, equity, and inclusion. Adheres to social justice as an essential curriculum content orientation.

Lisa T. Schmidt, PhD *(University of Medicine and Dentistry of New Jersey).* Associate Clinical Professor. The identification of best practices in psychiatric rehabilitation, illness management and recovery, and psycho-education.

Ebony White, PhD, LPC, NCC, ACS *(Montclair State University).* Assistant Clinical Professor. Research focused on addressing issues in transracial adoption and improving trauma informed care within the African American community. Understanding global mental health within the African diaspora and expanding developmental pathways through advocacy and social justice.

Culinary Arts and Science

Major: Culinary Arts & Science
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 185.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Program (CIP) code: 12.0509
Standard Occupational Classification (SOC) code: *35-2014*

About the Program

The major in culinary arts and science allows students to deeply explore cuisine—the practical techniques of cooking, but also its science, history, culture, politics and economics. Students receive a broad overview of cooking and cuisine and specialize in food and beverage management, which prepares students for leadership positions in the restaurant and food industry.

Students majoring in culinary arts and science are prepared for careers in the food industry such as pastry chef, chef, research chef or product developer.

This baccalaureate degree in culinary arts and science is among the first of its kind in the United States. This program comprises approximately equal parts liberal arts, business, hospitality management, food science, and culinary arts. The aim of the program is to prepare students as independent thinkers who can work collaboratively in the food industry.

Program Delivery Options

Drexel's BS degrees include courses in the liberal arts, the humanities, sciences, hospitality management and culinary arts. Three business

minors are also offered. The BS degree can be completed on a full-time or part-time basis:

Traditional Four-year option, with one co-op experience:
This option includes one six-month period of full-time employment in the junior year.

Four plus One option BS/MBA combined degree, with co-op experience:
This option combines the four-year BS degree followed by the one-year Professional MBA to qualify freshmen applicants. Incoming freshmen will generally have a minimum of 1300 on the SAT, a GPA of 3.5 or higher, and be in the top 10% of their high school graduating class. For MBA requirements visit the LeBow College Professional MBA (http://www.lebow.drexel.edu/academics/graduate/drexel-lebow-mba/) website.

Part-time option without co-op experience:
Students work closely with academic advisors to develop a customized plan of study toward degree completion.

London option:
(Available for Hospitality Management and Culinary Arts and Science students.) Students are invited to spend a term in their sophomore, junior or senior year in the Study Abroad Program (http://www.drexel.edu/studyabroad/), Drexel in London, while earning up to 18.0 credits. The program's emphasis is on the global implications of and opportunities within the hospitality industry.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Food & Beverage Management Concentration

Bakery and Pastry Specialization

The Baking and Pastry Specialization provides students interested in pursuing a career in the bakeshop with the skills necessary to move up the ranks of the professional bakery. High-quality, from-scratch bakes goods and pastries continue to find prominent places on menus in fine-dining restaurants, coffee shops, cafes, and dedicated bakery retail shops. For those restaurants and shops that have the facility space, many hire skilled bakers to run internal pastry departments. The need to feature fresh-baked goods has led to the opening of more wholesale and commissary bakeries throughout the Northeast and across the country. Graduates who are highly skilled in baking and patisserie are in demand to serve in restaurant pastry programs and to run these high-volume commercial bakeries.

Required Courses

CULA 125	Foundations of Professional Baking	3.0
CULA 220	Patisserie I	3.0
CULA 225	Patisserie II	3.0
CULA 227	Wheat and Grains: Artisan Breads	3.0
CULA 228	Design, Presentation, and Decorating in Pastry	3.0
CULA 229	Confectionery	3.0
CULA 328	Brasserie Applied Baking	3.0
Total Credits		21.0

Co-op/Career Opportunities

The hospitality industry employs 15 million people nationwide. According to the National Restaurant Association statistics, employment is growing

at the rate of eleven percent each year, making this industry one of the fastest growing in the country. Our Culinary Arts & Science program enjoys close relationships with outstanding and internationally acclaimed chefs, in the finest restaurants, hotels and tourism partners in the greater Philadelphia area. We also have relationships with professional organizations that represent the industry on a regional, national and international level such as Research Chefs Association, Institute of Food Technologists and International Association of Culinary Professionals. These relationships result in over $80,000 a year in scholarship funding for our students.

Typical career paths for graduates include the following:

- Restaurants and private clubs, which employ over 9 million people in the US
- Hotels Resorts & Casinos with almost 2.5 million employees
- Airlines, tour operating companies, travel agencies and tourism consulting
- Convention, special events, meeting planning, and tourism agencies
- Food Service and beverage brokers, distributors, and suppliers to the industry
- Food waste and sustainability practices and solutions.

Co-Op Opportunities

Drexel University has long been known for its cooperative education/ internship programs, which allow students to mix periods of full-time, career-related employment with their studies. Culinary Arts & Science students pursue the 6-month co-op employment. This six-month experience during the junior year is tailored to fit the interests of each student. The following hotels, facilities, restaurants and clubs have recently offered co-op positions to Drexel's Culinary Arts & Science students. Although many of these examples are located in the Philadelphia area, co-op jobs are not limited to any region.

- Vernick Restaurant
- High Street Hospitality Group
- Jose Garces - Garces Group
- Marc Vetri - Vetri Family of Restaurants
- Kevin Spraga - Sbraga Restaurants
- Philadelphia Convention and Visitors Bureau
- America's Test Kitchen
- Philadelphia Chamber of Commerce
- Frog Commissary Catering at The Franklin Institute
- Walt Disney World Co
- Saxbys

Visit the Drexel Steinbright Career Development Center (http:// www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities.

Facilities

The major facility of the Culinary Arts & Science program is located on the sixth floor of the Academic Building. It is a 6,500 square foot space that includes three state-of-the-art commercial kitchens, bakery and laboratories, as well as the Academic Bistro (http://drexel.edu/hsm/about/ academic-bistro/), the student-run restaurant, bar and lounge. The facility also includes a sensory analysis lab, hospitality and gaming lab, and conference room. As part of the curriculum, students in this major are required to take food safety and sanitation courses which include lab work at Papadakis Integrated Science Building.

Philadelphia Location
A unique feature of the Culinary Arts & Science program at Drexel is our location in Philadelphia, with proximity to New York City, Boston, Baltimore, and Washington DC, as well as the resort centers on the Atlantic seacoast and in the Pocono Mountains. These regions include hundreds of hotels, restaurants,and resorts, that are used for field trips and campus visits by hospitality resource professionals. Students also gain hands-on experience through faculty-directed field trips throughout the region.

Culinary Arts & Science Faculty

Jonathan Deutsch, PhD *(New York University)*. Professor. Social and cultural aspects of food, culinary education, culinary improvisation, recipe and product development; food sustainability.

Brandy-Joe Milliron, PhD *(Arizona State University)*. Associate Professor. The development and evaluation of modifications in the natural environment to promote healthier living; farm to table school initiatives

Michael Traud, JD *(Villanova University) Program Director, Hospitality and Tourism Management*. Assistant Clinical Professor. Implementation of Korean Cuisine in the United States; hospitality law; Italian cuisine.

Rosemary Trout, MS *(Drexel University) Interim Program Director, Culinary Arts and Food Science*. Instructor. Food labeling and regulations; food safety and sanitation in food service and food manufacturing; food processing; sensory evaluation.

Charles Ziccardi, MS *(Drexel University)*. Assistant Teaching Professor. Classic Italian cuisine, Italian culture, gardening for the kitchen, food sustainability, and professional hospitality management.

Emeritus Faculty

A. Philip Handel, PhD *(University of Massachusetts)*. Professor Emeritus. Food science, especially lipid chemistry; food composition and functionality; evaluation and analysis of frying fats and fried foods.

Health Sciences

Major: Health Sciences
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 180.5
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 51.1199
Standard Occupational Classification (SOC) code: 11-9111

About the Program

The Bachelor's degree program in Health Sciences at Drexel University exposes students to a wide variety of careers in health care and related professions. Our emphasis on interdisciplinary study, coupled with expert faculty, gives students the opportunity to explore different facets of health-related professions before matriculating to specialized graduate programs or entering the workplace. Whether you are on the fast track to a career in health professions or still finding your path, our Health Sciences Program offers a multitude of options for completing your degree.

What you will learn

The Health Sciences Program offers a rigorous four-year curriculum for students interested in pursuing careers in health-related professions. Courses in health and clinical sciences, research methods, statistics, and healthcare ethics are combined with a core curriculum of mathematics, humanities, and social sciences to provide a fully integrated and comprehensive curriculum.

Career Opportunities

Health care professions are one of the fastest growing job sectors in the United States. There is tremendous demand for trained health care providers at all levels. In the Health Sciences Program, our multidisciplinary approach, flexible curriculum, and co-op experience provide students with a highly competitive edge in the market place and in the pursuit of graduate program admission. Some of the fields Health Sciences graduates can expect to pursue post-graduation include:

- Rehabilitation Professions
  - Physical therapy
  - Occupational therapy
  - Speech and language pathology
  - Cardiac rehabilitation
- Physician Assistant Studies
- Medicine and Dentistry
- Optometry
- Audiology
- Clinical Research
- Public Health and Health Advocacy
- Nursing
- Exercise Physiology
- Nutrition Sciences
- Bioethics
- Health Psychology

Co-op Experience

Drexel University has long been known for its cooperative education programs. As part of the Health Sciences curriculum, students incorporate a six-month co-op experience into their plan of study. This allows students to learn from healthcare leaders at renowned facilities nationwide. By building career-related employment into undergraduate study, students gain work experience, network with healthcare professionals, and hone their clinical and research skills. Some local co-op employers of Health Sciences students include Children's Hospital of Philadelphia, Magee Rehabilitation Hospital, Bryn Mawr Rehabilitation Hospital, Hahnemann University Hospital, Good Shepherd Penn Partners, NovaCare, and many other health care facilities in the region.

Accelerated Options

The Health Sciences program offers accelerated academic tracks for high achieving students to pursue degrees in the Physician Assistant Studies (p. 325) program and the Doctor of Physical Therapy (p. 323) program within the College of Nursing and Health Professions.

Articulation Agreement Options

Drexel's Health Sciences Department and Salus University's Occupational Therapy Department have partnered to offer a BS/MSOT sequential degree program. In the BS/MSOT Option, students first complete a Bachelor of Science (BS) degree in Health Sciences at Drexel University, then enroll into the 2-year Master of Science in Occupational Therapy (MSOT) program at Salus University.

Optional Concentration in Exercise Science

The concentration in Exercise Science helps prepare Health Sciences majors for graduate studies in Exercise Physiology. In addition, the concentration provides foundational knowledge and skills for a variety of fitness certifications from the American College of Sports Medicine, National Strength and Conditioning Association, and others. These certifications are often required of graduates interested in seeking employment in the fitness industry.

Drexel Graduate Options in Biomedical Sciences

Graduates of the Health Sciences program may also continue their education in the Graduate School of Biomedical Sciences and Professional Studies which offers over 40 doctoral, master's and professional development programs. These academic programs emphasize real-world experience and help guide students to make career decisions that best fit their abilities and evolving needs.

For more information, visit the Health Sciences Program (http://www.drexel.edu/cnhp/academics/departments/Health-Sciences/) page at the College of Nursing and Health Professions web site.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

General Requirements		
CIVC 101	Introduction to Civic Engagement	1.0
COOP 101	Career Management and Professional Development	0.0
UNIV NH101	The Drexel Experience	1.0
English Sequence		
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
Biology Sequence		
BIO 122	Cells and Genetics	4.5
BIO 124	Evolution & Organismal Diversity	4.5
BIO 126	Physiology and Ecology	4.5
BIO 226	Microbiology for Health Professionals	5.0
Chemistry Sequence		
CHEM 101	General Chemistry I	3.5
CHEM 102	General Chemistry II	4.5
CHEM 103	General Chemistry III	5.0
Mathematics Sequence		
MATH 101	Introduction to Analysis I	4.0
MATH 102	Introduction to Analysis II	4.0
Communications		
COM 320 [WI]	Science Writing	3.0
Health Systems		
ECON 240	Economics of Health Care Systems	4.0
HSAD 210	Health-Care Ethics I	3.0

Complete 1 of the following courses:		3.0
HSAD 309	Advanced Health-Care Ethics	
HSAD 310	Introduction to Health-Systems Administration	
HSAD 345	Ethics in Health Care Management	
Psychology		
PSY 101	General Psychology I	3.0
Two Psychology (PSY) and/or Behavioral Health Counseling (BACS) courses (minimum 6.0 credits)		6.0
Sociology		
SOC 101	Introduction to Sociology	3.0
Two Sociology (SOC) courses (minimum 6.0 credits)		8.0
Humanities		
Three Humanities (HUM, HIST, ANTH, PHIL or language electives) (minimum 9.0 credits)		9.0
Public Health		
PBHL 101	Public Health 101	3.0
One Public Health (PBHL) course (minimum 3.0 credits)		3.0
Anatomy & Physiology Courses		
ANAT 101	Anatomy & Physiology I	5.0
ANAT 102	Anatomy & Physiology II	5.0
ANAT 103	Anatomy & Physiology III	5.0
Research Courses		
HSCI 310	Introduction to Research Methods	4.0
HSCI 315	Current Issues in Health Sciences	4.0
Statistics and Assessment		
HSCI 201	Health Assessment through the Lifespan	4.0
STS 345	Statistics for the Health Sciences	4.0
Health Sciences electives (HSCI, PHGY, ANAT, NEUR, NFS) [*]		**32.0**
Free electives		**19.0**
Total Credits		180.5

[*]   Health Sciences electives include any HSCI, ANAT, PHGY, NEUR or NFS course. Up to two BIO courses may be used as Health Sciences electives with advisor permission. All 100-level freshman course requirements in BIO, CHEM, ENGL, and MATH must be complete by the time a student reaches 135.0 credits.

Optional Concentration in Exercise Science

The concentration in Exercise Science helps prepare students for graduate studies in Exercise Physiology. In addition, the concentration provides foundational knowledge and skills for a variety of fitness certifications from the American College of Sports Medicine, National Strength and Conditioning Association, and others. These certifications are often required of graduates interested in seeking employment in the fitness industry.

Students wishing to complete the concentration in Exercise Science must complete the courses listed below as 17.0 of their elective credits.

Required courses:		
HSCI 325	Exercise Physiology	4.0
HSCI 326	Applied Anatomy and Kinesiology	5.0
Complete 8.0 credits from the following list:		**8.0**
HSCI 415	Musculoskeletal Pathophysiology	
HSCI 490	Senior Research Project	
HSCI T480	Special Topics in Health Sciences	
NFS 100 & NFS 101	Nutrition, Foods, and Health and Introduction to Nutrition & Food	
NFS 325	Nutrition & Exercise Physiology	
HSCI 425	Exercise Testing and Prescription	
HSCI 410	Psychology of Physical Activity	
Total Credits		17.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plans of Study

BACHELOR OF SCIENCE IN HEALTH SCIENCES - 12 TERMS

2 terms of COOP occur after Term 7.

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Term 1		Credits
BIO 122	Cells and Genetics	4.5
CHEM 101	General Chemistry I	3.5
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
UNIV NH101	The Drexel Experience	1.0
Free elective		3.0
	Term Credits	15.0
Term 2		
BIO 124	Evolution & Organismal Diversity	4.5
CHEM 102	General Chemistry II	4.5
CIVC 101	Introduction to Civic Engagement	1.0
ENGL 102 or 112	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing English Composition II	3.0
MATH 101	Introduction to Analysis I	4.0
	Term Credits	17.0
Term 3		
BIO 126	Physiology and Ecology	4.5
CHEM 103	General Chemistry III	5.0
ENGL 103 or 113	Composition and Rhetoric III: Themes and Genres English Composition III	3.0
MATH 102	Introduction to Analysis II	4.0
	Term Credits	16.5
Term 4		
ANAT 101	Anatomy & Physiology I	5.0
BIO 226	Microbiology for Health Professionals	5.0

Facilities

The College of Nursing and Health Professions is located on Drexel University's Center City Campus. Students have access to the *Center for Interdisciplinary Clinical Simulation and Practice (CICSP)* which utilizes patient actors and automated simulation manikins to mimic real-life human physiology. The CICSP provides undergraduate Health Sciences students the opportunity to learn assessment and communication skills in a controlled setting. The College of Nursing and Health Professions also maintains the *Stephen and Sandra Sheller 11th Street Family Health Services of Drexel University*, a comprehensive, community-based health center, where students have unique opportunities to observe and participate in health care delivery.

Health Sciences Faculty

Michael Bruneau, Jr., PhD ACSM EP-C *(Springfield College).* Assistant Teaching Professor. The use of physical activity and exercise as a nonpharmacological lifestyle therapy for the prevention, treatment, and control of chronic disease; examination of supervised exercise in clinical populations including those living with overweight and obesity, hypertension, chronic kidney disease, HIV/AIDS, substance use disoders, and Alzheimer's Disease and Related Dementias, sciences of systematic review and meta-analysis

William D'Andrea, MS, BS Pharm, CCP *(MCP Hahnemann University) Associate Chair, Health Sciences..* Assistant Teaching Professor. Pharmacology, anatomy & physiology.

Mary Elizabeth Flynn, PhD *(Temple University) Undergraduate Director, Health Sciences.* Assistant Teaching Professor. Anatomy and physiology, developmental anatomy, genetics, and emerging tech in health care.

Jodie Haak, PhD *(University of Iowa).* Assistant Professor. Physiology and applied physiology, Aging and STEM pedagogy.

Michael L. Kirifides, PhD *(Hahnemann University).* Assistant Teaching Professor. Identifying, designing, and implementing preparation approach to improve standardized testing outcomes for students in the undergraduate healthcare programs. Human anatomy and physiology, toxicology, pharmacology, and neuroscience.

Margery A. Lockard, PT, PhD *(Hahnemann University).* Clinical Professor. Orthopedic/musculoskeletal physical therapy; management of patients using prosthetic and orthotic devices; and anatomy, physiology and kinesiology.

Krista L. Rompolski, PhD ACSM EP-C *(University of Pittsburgh) Director of Anatomy and Physiology, Health Sciences. Co-Director of the Human Anatomy Laboratory.* Associate Teaching Professor. Scholarship of

teaching and learning (SoTL) in the fields of anatomy and physiology; pathophysiology, and gross anatomy.

Stephen Samendinger, PhD *(Michigan State University).* Associate Professor. Studying the effect of group dynamics, self-efficacy, and social influence on healthy lifestyles motivation; understanding differences in motivation by studying how we interpret our social environment and form beliefs and associated conscious and non-conscious goal pursuits.

Sinclair A. Smith, MS, DSc *(Boston University) Chair, Health Sciences.* Professor. Effects of aging, dehydration, and oral creatine supplementation on skeletal muscle metabolism using phosphorus magnetic resonance spectroscopy. Anatomy, physiology, and exercise science.

Health Services Administration

Major: Health Services Administration
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 51.0701
Standard Occupational Classification (SOC) code: 11-9111

About the Program

The Health Services Administration program provides students with a foundation in management and economic principles related to health care, as well as an understanding of the administrative structure, operations, and policies of the health care industry.

The Health Services Administration (HSA) curriculum is a four-year full-time course of study consisting of 180.0 quarter credits and including one cooperative (co-op) experience comprised of two consecutive quarter terms during the first half or the second half of the junior year. (A non-co-op full-time time option is also available). Transfer students are eligible for the full-time curriculum with or without co-op depending on the number of approved transfer credits.) The curriculum is designed to give students a foundation in general management and economic principles and policies related to health care, as well as to expose students to the quantitative and qualitative aspects of the health care industry by means of courses in health care related to policy, law, economics, management, marketing, and health information systems. At the same time, the curriculum provides interdisciplinary courses dealing with religious, ethical, psychosocial, political, legal, literary, and historical perspectives regarding health care practices and populations in need of health care. Courses in disability and aging expand students' understanding of the role of society and health care in the lives of individuals not always well understood. In addition, the curriculum can prepare students wishing to pursue graduate studies in health services administration, business administration, public health, law, and health communication.

The program also provides a minor in HSA for Drexel University bachelor's degree-seeking students and an online certificate in Medical Billing and Coding (p. 338) for non-degree-seeking students.

Courses are available online (http://online.drexel.edu/online-degrees/healthcare-degrees/bs-hsa/). At least 60.0 approved transfer semester credits (90.0 approved quarter credits) including courses in:

- English composition and/or literature
- Natural sciences with a lab

- Computing course
- Mathematics or statistics
- Humanities/Social Sciences
- Up to 75.0 approved transfer semester credits (105.0 approved quarter credits) for students with strong academic background in health services administration

Additional Information

The contact for this program is:

Susan Feinstein, BS
Program Coordinator, Health Services Administration
1601 Cherry Street, 7th floor, Room 773
Philadelphia PA, 19102
267-359-5543
slf52@drexel.edu

For more information, visit the Health Services Administration (https://drexel.edu/cnhp/academics/undergraduate/BS-Health-Services-Administration/) page on the College's website.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

English Sequence

ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
Natural Sciences		**8.0-10.0**
Students may select from Biology (BIO), Chemistry (CHEM) or Anatomy (ANAT) courses. However, any course selected must include a laboratory component. Additional natural science subject options may be considered with the approval of the student's advisor.		
Mathematics		
MATH 101	Introduction to Analysis I	3.0-4.0
or MATH 171	Introduction to Analysis A	
MATH 102	Introduction to Analysis II	3.0-4.0
or MATH 172	Introduction to Analysis B	
Computing Course		
CS 150	Computer Science Principles	3.0
Drexel Experience		
CIVC 101	Introduction to Civic Engagement	1.0
UNIV NH101	The Drexel Experience	1.0
or UNIV 101	The Drexel Experience	
Health Services Administration Core Requirements		
HSAD 210	Health-Care Ethics I	3.0
HSAD 310	Introduction to Health-Systems Administration	3.0
HSAD 321	Health-Care Human Resources	3.0
HSAD 322	Health-Care Law	3.0
HSAD 330	Financial Management in Health Care	3.0
HSAD 331 [WI]	Non-profits and Health Care	3.0
HSAD 332 [WI]	Health-Care Marketing	3.0
HSAD 334	Management of Health Services	3.0
HSAD 335 [WI]	Health-Care Policy	3.0
HSAD 340	Leadership in Health Services Administration	3.0

HSAD 345	Ethics in Health Care Management	3.0
Business Courses		
ACCT 110	Accounting for Professionals	4.0
Complete 1 of the following ECON courses:		4.0
ECON 201	Principles of Microeconomics	
ECON 202	Principles of Macroeconomics	
ECON 240	Economics of Health Care Systems	
ORGB 300 [WI]	Organizational Behavior	4.0
STAT 201	Introduction to Business Statistics	4.0
or STS 345	Statistics for the Health Sciences	
Humanities and Social Sciences		
PSCI 110	American Government	4.0
SOC 101	Introduction to Sociology	3.0
Health Services Administration (HSAD) Electives [*]		**27.0**
Humanities and Social Sciences Electives		**29.0**
Free Electives		**40.0**
Total Credits		180.0-184.0

[*] HSAD 316 Health Care across Cultures, HSAD 325 Issues in the Health Care System, and HSAD 320 Managed Health Care are recommended electives.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

[*]   Students may select from Biology (BIO), Chemistry (CHEM) or Anatomy (ANAT) courses. However, any course selected must include a laboratory component. Additional natural science subject options may be considered with the approval of the student's advisor.

Health Services Administration Faculty

Jesse Ballenger, PhD *(Case Western Reserve University)*. Associate Teaching Professor. Healthcare, medicine and ethics; aging and neurodegenerative diseases; Science and Technology Studies.

Merritt Brockman, DHA, FACHE *(Medical University of South Carolina)*. Assistant Teaching Professor. Patient centered medical home; improvements in health care delivery.

Fred DiCostanzo, EdD *(Rutgers University)*. Assistant Professor. Organizational leadership, Healthcare Management, Human resources and team effectiveness

Stephen F. Gambescia, PhD, MEd, MBA *(Temple University)*. Professor. Health care policy, nonprofits and health care, and health care management and leadership.

Kevin Mitchell, PhD, MBA *(Walden University)*. Assistant Teaching Professor. Health Services Administration; continuous quality improvement, strategic health care management. Research interests include health disparities in vulnerable population, evidenced based medicine and clinical pharmacology and therapeutics.

Marina Moses, MS, DrPH *(Columbia University)*. Assistant Professor. Health administration; healthcare policy; nonprofit association management; sustainability.

Kristine A. Mulhorn, PhD *(University of Delaware) Chair, Department of Health Administration*. Professor. Disablity and aging; cross-national methods of functioning.

Sharrona Pearl, PhD *(Harvard University)*. Associate Professor. Medical ethics; science studies; history of science and medicine; critical race, gender, and disability studies; media studies.

Constance Karin Perry, PhD, EMT *(University of Buffalo)*. Associate Professor. Biomedical ethics and ethical theory. Research interests include autonomy, personhood, feminist ethics, the ethics of animal experimentation, and ethical issues in reproduction and pregnancy.

Hospitality Management

Major: Hospitality Management
Degree Awarded: Bachelor of Science in Hospitality Management (BSHM)

Calendar Type: Quarter
Total Credit Hours: 183.0
Co-op Options: Three Co-op (Five years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.0901
Standard Occupational Classification (SOC) code: 11-9051; 11-9081

About the Program

The hospitality management major at Drexel University prepares students for leadership positions in the lodging, food service, and tourism and gaming industries. It also provides the necessary foundation for graduate school.

The hospitality management program recognizes the critical importance of an interdisciplinary education with a global perspective for tomorrow's leaders and managers. Committed to building student knowledge across functional areas and contributing disciplines, the program allows for increased specialization with elective coursework in the following areas:

- Food and Beverage Management
- Gaming and Resort Management
- Travel and Tourism
- Hotel Administration
- Meeting and Event Planning

Home to one of the top hospitality programs in the region, Drexel prides itself on its reputation for progressive, high-quality education. The thriving metropolis of Philadelphia serves as the learning lab for these unique programs. As the sixth largest city in the United States, Philadelphia is in the midst of a restaurant renaissance featuring world-class cuisine and entertainment. Student-focused faculty members are recognized for their professional affiliations, research, published work, and above all, teaching.

Students also receive a business administration minor and have 24.0 credits of free elective to pursue a second minor option.

For more information, visit the Hospitality Management Program's (https://drexel.edu/fhm/academics/Hospitality-and-Tourism/) website.

Program Delivery Options

Drexel's BS in Hospitality Management degree includes courses in the liberal arts, the humanities, language, sciences, hospitality management and culinary arts. A business administration minor is also included. The BS degree can be completed on a full-time or part-time basis:

Four plus One option BS/MBA combined degree, with co-op experience:

This option combines the four-year BS degree followed by the one-year Professional MBA to qualify freshmen applicants. Incoming freshmen will generally have a minimum of 1300 on the SAT, a GPA of 3.5 or higher, and be in the top 10% of their high school graduating class. For MBA requirements visit the LeBow College Professional MBA (http://www.lebow.drexel.edu/academics/graduate/drexel-lebow-mba/) website.

Five-year option, with three co-op experiences:

This option allows students to pursue a variety of professional experiences in the industry including the option to co-op abroad.

Full-time Status Evening option without co-op experience:

To be eligible, students should have a minimum of two years full-time work experience related to students' majors, and a minimum of one year of college level work. Full-time students are eligible for full-time financial aid packages.

Part-time option without co-op experience:

Students work closely with academic advisors to develop a customized plan of study toward degree completion.

American University in Rome:

Every three years, the Drexel hospitality management faculty participate in a study and teach abroad experience. Students are invited to spend the fall semester abroad in Rome, Italy and earn 18.0 credits. Students take two Hospitality related courses taught by a Drexel professor and two additional courses at AUR of their choosing. All course instruction is in English, but a term of ITAL 101 *Italian I* is a pre-requisite for the experience. More information can be found on the Study Abroad website.

London option:

Students are invited to spend a term in their sophomore, junior or senior year in the Study Abroad Program (http://www.drexel.edu/studyabroad/), Drexel in London, while earning up to 18.0 credits. The program's emphasis is on the global implications of and opportunities within the hospitality industry.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Facilities

The major facility of the Hospitality Management, Culinary Arts and Food Science programs is located on the sixth floor of the Academic Building. It is a 6,500 square foot space that includes three state-of-the-art commercial kitchens, bakery and laboratories, as well as the Academic Bistro (http://www.drexel.edu/hsm/about/academic-bistro/), the student-run restaurant, bar and lounge. The facility also includes a sensory analysis lab, hospitality and gaming lab, conference room and the Les Dames d'Escoffier Library.

Philadelphia Location

A unique feature of the Hospitality Management program at Drexel is that it is located in Philadelphia, with close proximity to New York City, Baltimore, and Washington, as well as the resort centers on the Atlantic seacoast and in the Pocono Mountains. These regions include hundreds of hotels, restaurants, resorts, and casinos that are used for field trips and campus visits by hospitality resource professionals. Students also gain hands-on experience through faculty-directed field trips throughout the region.

Hospitality Management Faculty

Michael Traud, JD *(Villanova University) Program Director, Hospitality and Tourism Management.* Assistant Clinical Professor. Implementation of Korean Cuisine in the United States; hospitality law; Italian cuisine.

Nursing

Major: Nursing
Degree Awarded: Bachelor of Science Degree in Nursing (BSN)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Two year transfer student option only)
Classification of Instructional Programs (CIP) code: 51.3801

Standard Occupational Classification (SOC) code: 29-1141

About the Program

The BS in Nursing (BSN) is a full-time, four year option with one, 6 month co-op experience in the third year of study. There is also a five year program which offers three paid, six-month co-op experiences. For eligible transfer students there is a no co-op option which allows students to complete the nursing coursework in two full academic years. Students graduate with a bachelor of science in nursing and are eligible to sit for the RN licensure examination.

The BS in Nursing degree is approved by the Pennsylvania State Board of Nursing and the American Association of Colleges of Nursing.

Drexel's nursing curriculum is built to respond to the rapidly changing health care system, as well as to student's needs. The graduate of the Bachelor of Science in Nursing Program of Drexel University is prepared to:

- Apply concepts from liberal arts to nursing practice.
- Demonstrate leadership behaviors that enhance patient safety and quality care.
- Apply research-based evidence to nursing practice.
- Integrate technology to support clinical decision making in patient-centered care.
- Examine healthcare policy and financial/regulatory environments that influence the delivery of healthcare.
- Foster caring and collaborative relationships with self, patient, and the healthcare community that provide positive outcomes .
- Practice culturally congruent care that addresses health promotion and disease prevention.
- Assimilate ethical principles and professional standards into practice using evidence-based clinical judgment.
- Apply age-specific knowledge to provide safe, competent care across the lifespan.
- Pursue lifelong learning as a means to enhance practice.

A BSN is awarded at the completion of the program.

For more information about the BSN with Co-Op option at Drexel, visit the Nursing Co-Op Program (https://drexel.edu/cnhp/academics/undergraduate/bsn-nursing-co-op/) page.

Degree Requirements

Students should contact their Academic Advisor for any changes to their plans of study prior to registration due to ongoing curriculum updates.

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

General requirements

CIVC 101	Introduction to Civic Engagement	1.0

UNIV NH101	The Drexel Experience	1.0
English Sequence		
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
Biology/Nutrition courses		
BIO 226	Microbiology for Health Professionals	5.0
NFS 220	Normal & Lifespan Nutrition	4.0
NFS 315	Nutrition in Chronic Disease	4.0
Chemistry courses		
CHEM 103	General Chemistry III	5.0
CHEM 108	Health Chemistry I	3.0
Humanities and Social Science courses

Free electives		6.0
Total Credits		180.0

[*]   Students must take one approved language course, as determined by student's Academic Advisor

[**]   Or other mathematics equivalent by placement exam.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plans of Study

Students should contact their Academic Advisor for any changes to their plans of study prior to registration due to ongoing curriculum updates.

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

About the Co-op

Cooperative education was designed to provide students with real-world experience in a variety of professional settings before graduation. Co-op integrates full-time work experience in the student's field of study throughout the academic program. The College of Nursing and Health Professions co-op program is one of only two of its kind in the nation.

The nursing co-op provides students with 18 months of cooperative education in addition to the traditional clinical educational experiences.

Through co-op, students will have the opportunity to learn the role of the nurse and unlicensed assistive personnel as well as other daily professional, political, and social issues in a work environment. Both before and during co-op, students will receive instruction on career management and professional development skills, such as résumé writing, job searches, interviewing skills, maintaining a career portfolio, negotiating salary, and professional behavior in the workplace. The clinical background students gain from co-op, coupled with a knowledge of career management, makes the Drexel option a value-added model of nursing education.

Co-op Descriptions

First Experience
Co-op I: Nursing in Contemporary Health Networks
Students will have cooperative education experiences in managed care settings, pharmaceutical companies, and other non-traditional healthcare work environments where nurses and nursing can effect change. Students will either work under the direction of a professional nurse or another health care professional with a minimum of a baccalaureate degree. Students will not perform any basic nursing skills in this role.

Second Experience
Co-op II: Acute and Chronic Health and Illness
Students on the 4-year track participate in Co-Op II, an education experience in the traditional health care environment that emphasize the delivery of nursing care to adults and adolescents with acute and chronic illnesses. The majority of placements will be in general and specialty medical-surgical units. Students will function in the role as an unlicensed assistive person and their job description will be modeled similarly to unlicensed assistive personnel or nursing externs.

Third Experience
Co-op III: Specialty Nursing Concentration
Students will have cooperative education experiences in a specialty area of their choice which will build upon their previous clinical courses and work experiences. For example, students may elect to specialize in labor and delivery, critical care, or return to work for a pharmaceutical or managed care company. Selection of content area for the Co-op III site will be made by each student in consultation with the student's faculty advisor. Students will be given a suggested reading list and texts to be used for supplemental reading and learning for the specialty co-op area. Students will function in the role as an unlicensed assistive person and their job description will be modeled similarly to the role of unlicensed assistive personnel or nursing externs.

Nursing Faculty

Suzan Blacher, PhD, RN, CARN *(Drexel University) RN-BSN Program*. Assistant Clinical Professor. Care of the patient with substance use disorders; stigmatization of addictions.

Beth Chiatti, PhD, RN, CTN, CSN *(Widener University)*. Assistant Clinical Professor. Genetics, transcultural nursing, immigrant health, human rights and global health

Danielle Devine, PhD, RN *(Villanova University)*. Assistant Clinical Professor. Neurology, Critical Care.

Gloria Donnelly, PhD *(Bryn Mawr College) Dean Emerita*. Professor. Nursing education and a variety of mental health topics including assertiveness, stress and change.

Katie Duncan, MSN, AGPCNP-BC *(University of Pennsylvania)*. Assistant Clinical Professor. Adult-gerontology primary care nurse practitioner.

Theresa Fay-Hillier, DrPH, MSN, PMHCNS-BC *(Drexel University)*. Assistant Clinical Professor. Child, adolescent and family mental health nursing.

Maryann Godshall, PhD, RN, CCRN, CPN, CNE *(Duquesne University)*. Associate Clinical Professor. Pediatrics, critical care, nursing education, pediatric burn patients.

Karen Goldschmidt, PhD, RN *(Wilmington University) Department Chair, RN-BSN Completion Department* . Assistant Clinical Professor. Professional issues, nursing education, staff development, scholarly writing.

Maureen Gonzales, MSN, WHNP *(University of Pennsylvania)*. Assistant Clinical Professor. Women's health, high risk obstetrics.

Cynthia Hambach, MSN, RN, CCRN *(Widener University)*. Assistant Clinical Professor. Critical care nursing.

Dana C. Kemery, EdD, MSN, RN, CNE, CEN, CPEN *(Drexel Universiy)*. Assistant Clinical Professor. Emergency nursing (adult and pediatric), nursing education.

Kayann Laughlin, MAHEd, MSN, RN *(Arcadia University)*. Assistant Clinical Professor. Community/public health, administration.

MaryKay Maley, DNP, APN, FNP, RN-BC *(University of Miami)*. Assistant Clinical Professor. Family health, faith community nursing, health promotion/disease prevention and mindfulness-based stress reduction.

Tasha Martin-Peters, MSN, RN *(Duke University)*. Assistant Clinical Professor. Pediatric critical care, pediatric cardiac care.

Pamela McGee, MSN, FNP-BC, CNE *(University of Pennsylvania)*. Assistant Clinical Professor. Medical/surgical nursing, gerontology, primary care, family nurse practitioner.

Kristen McLaughlin, PhD (candidate), MSN, RN, CPNP-PC *(Widener University)*. Assistant Clinical Professor. Pediatric nurse practitioner.

Nancy Murphy, PhD, RN, CNE *(University of Massachusetts Dartmouth)*. Assistant Clinical Professor. Maternal child health, psychiatric/mental health; community, home and public health care.

Maura Nitka, MSN, RN, CPN *(Drexel University)*. Assistant Clinical Professor. Pediatric nursing.

Carol Okupniak, DNP, RN-BC *(Chatham University)*. Assistant Clinical Professor. Nursing informatics, simulation and women's health.

Jennifer Olszewski, EdD, MSN, CRNP, ANP-BC *(Drexel University) Interim Chair of the BSN Nursing Accelerated Career Entry Program.* Assistant Clinical Professor. Adult-gerontology nurse practitioner, dementia care.

Alis Kotler Panzera, DrNP, WHNP-BC, RN *(Drexel University) Director of Nursing Student Success.* Assistant Clinical Professor. Board certified women's health nurse practitioner, reproductive health and female urology.

Penny Parker, MSN, FNP-C, CCTC, CIC *(Drexel University)*. Assistant Clinical Professor. Advanced heart failure and heart/lung transplantation; critical care nursing.

Genevieve Porrecca, MSN, RN, PCCN *(Holy Family University)*. Assistant Clinical Professor. Critical care

Catherine Quay, MSN, RN-BC *(Pace University)*. Assistant Clinical Professor. Board certified gerontology, medical/surgical nursing, dementia.

Leland Rockstraw, PhD, RN *(Drexel University)*. Clinical Professor. Graduate Nursing-Advanced Roles. Adult orthopedic/surgical, emergency care, critical care, and trauma/surgery intensive care and healthcare simulation.

Al Rundio, PhD, DNP, RN, APRN, CARN-AP, NEA-BC, FNAP, FIAAN, FAAN *(Chatham College)*. Clinical Professor. Transference of dependencies from bariatric surgical procedures, relapse prevention in chemically addicted clients.

Deanna Lynn Schaffer, PhD RN, ACNS-BC *(Widener University)*. Assistant Clinical Professor. Recruitment and retention in higher education, nursing leadership, nursing practice environment, and nursing informatics.

Meaghan Shattuck, MSN, RN, OCN *(Holy Family University)*. Assistant Clinical Professor. Oncology certified, medical/surgical nursing and education.

Helen Teng, PhD, RN *(University of Pennsylvania)*. Assistant Clinical Professor. Community health, immigrant health.

Ann Thiel-Barrett, DNP, RN, FNP-BC, CNE *(Chatham University)*. Assistant Clinical Professor. Family health nursing.

Denise Way, DNP, MSN, RN *(Wilmington University)*. Assistant Clinical Professor. Osteoporosis prevention throughout the lifespan.

Joyce Welliver, MSN, CRNP, CAC, RN *(Drexel University) Director of Faculty Role Development and Clinical Performance.* Assistant Clinical Professor. Psychiatric/mental health nursing, adult health

Mary Yost, PhD, RN *(Widener Unirsity) Interim Chair of the BSN Co-Op Program.* Assistant Clinical Professor. Trauma/Critical Car and Emergency Nursing.

Mary Ann Zimmer, RN, MSN, CPN *(Villanova University)*. Assistant Clinical Professor. Pediatrics, adult medical-surgical nursing, nursing education.

Nursing (BSN) - Accelerated Career Entry (ACE)

Major: Nursing
Degree Awarded: Bachelor of Science Degree in Nursing (BSN)
Calendar Type: Quarter
Total Credit Hours: 220.0
Co-op Options: No Co-op
Classification of Instructional Programs (CIP) code: 51.3801
Standard Occupational Classification (SOC) code: 29-1141

About the Program

Drexel University offers the Accelerated Career Entry Option (https://www.drexel.edu/cnhp/academics/undergraduate/Accelerated-Career-Entry-to-Nursing-Program/), a one-year intensive nursing program for students who already have bachelor's or graduate degrees. The program is ideal for working adults or college graduates who want to change careers and earn a new degree in one year. This innovative program is geared to students who will benefit from intense education in nursing science rather than the traditional program, which takes three or four years.

Like their counterparts in the traditional baccalaureate nursing program, graduates of the accelerated program emerge with a set of skills that will serve them well in their chosen profession. Our graduates:

- Utilize the growing compendium of knowledge and information sources from nursing and other disciplines to learn, teach, heal the sick, and conserve health.
- Contribute to the profession by sharing knowledge and skills with clients, peers, and other professionals in a variety of methods.
- Utilize multiple technologies that access and manage information to guide professional practice.
- Participate in culturally sensitive health promotion activities that contribute to the community's health and wellness.
- Participate in ongoing educational activities related to personal growth, professional practice, and community service.
- Apply knowledge and skills appropriate to their selected areas of career clinical practice.
- Develop personal potential for leadership in a changing health care environment.
- Integrate ethical concepts and principles, The Code of Ethics for Nurses, and professional standards into practice within professional, academic, and community settings.
- Utilize critical-thinking skills to improve the health outcomes of patients, families, and communities across the continuum of care.

Admission requirements/Prerequisites

Candidates for admission must be college graduates with a 3.0 overall GPA or a 3.0 GPA in their most-recent 60 semester hours of coursework completed. Admitted students must complete all prerequisites before

continuing with the program. Applicants whose native language is not English and/or were born outside of the United States are required to take both the TOEFL (Test of English as a Foreign Language) and the TSE (Test of Spoken English) and achieve a passing score in each.

Degree Requirements

Prerequisites

The following 8 courses, in semester terms, are prerequisites for the ACE program:

Degree Requirements

Students should contact their Academic Advisor for any changes to their plans of study prior to registration due to ongoing curriculum updates.

Prerequisites:

Chemistry with lab	4.0
Developmental Psychology	3.0
Anatomy with lab *	4.0
Physiology with lab *	4.0
Microbiology with lab *	4.0
Human Nutrition	3.0
Statistics	3.0
English	3.0

* The anatomy, physiology, and microbiology courses must have been taken within five years of beginning the program.

* Drexel University requires 180.0 quarter credits for conferral of a Bachelor's degree. Students will transfer in 134.0 quarter credits, 96.0 quarter credits from their previous Bachelor Degree and 38.0 quarter credits from their pre-requisites totaling 134.0 quarter credits. Upon completion of the NACE and NACT programs they will receive an additional 84.0 quarter credits, bringing the total to 218.0 quarter credits.

Catherine Quay, MSN, RN-BC *(Pace University)*. Assistant Clinical Professor. Board certified gerontology, medical/surgical nursing, dementia.

Leland Rockstraw, PhD, RN *(Drexel University)*. Clinical Professor. Graduate Nursing-Advanced Roles. Adult orthopedic/surgical, emergency care, critical care, and trauma/surgery intensive care and healthcare simulation.

Al Rundio, PhD, DNP, RN, APRN, CARN-AP, NEA-BC, FNAP, FIAAN, FAAN *(Chatham College)*. Clinical Professor. Transference of dependencies from bariatric surgical procedures, relapse prevention in chemically addicted clients.

Deanna Lynn Schaffer, PhD RN, ACNS-BC *(Widener University)*. Assistant Clinical Professor. Recruitment and retention in higher education, nursing leadership, nursing practice environment, and nursing informatics.

Meaghan Shattuck, MSN, RN, OCN *(Holy Family University)*. Assistant Clinical Professor. Oncology certified, medical/surgical nursing and education.

Helen Teng, PhD, RN *(University of Pennsylvania)*. Assistant Clinical Professor. Community health, immigrant health.

Ann Thiel-Barrett, DNP, RN, FNP-BC, CNE *(Chatham University)*. Assistant Clinical Professor. Family health nursing.

Denise Way, DNP, MSN, RN *(Wilmington University)*. Assistant Clinical Professor. Osteoporosis prevention throughout the lifespan.

Joyce Welliver, MSN, CRNP, CAC, RN *(Drexel University) Director of Faculty Role Development and Clinical Performance*. Assistant Clinical Professor. Psychiatric/mental health nursing, adult health

Mary Yost, PhD, RN *(Widener Unirsity) Interim Chair of the BSN Co-Op Program*. Assistant Clinical Professor. Trauma/Critical Car and Emergency Nursing.

Mary Ann Zimmer, RN, MSN, CPN *(Villanova University)*. Assistant Clinical Professor. Pediatrics, adult medical-surgical nursing, nursing education.

Nursing: RN/BSN Completion Program

Major: Nursing
Degree Awarded: Bachelor of Science Degree in Nursing (BSN)
Calendar Type: Quarter
Total Credit Hours: 180.0 quarter credits (for Registered Nurses)
Co-op Options: None
Classification of Instructional Programs (CIP) code: 51.3801
Standard Occupational Classification (SOC) code: 29-1141

About the Program

The RN/BSN Completion program is an option for nurses from associate degree and diploma nursing programs looking to complete the bachelor of science degree in nursing.

The Bachelor of Science in Nursing program continues the education of registered nurses equipping them with the skills needed for complex healthcare environments. Core courses immerse the student in genetics, evidence based practice, systems thinking, leadership and care coordination. Interactive practice experiences are woven throughout the curriculum using innovative learning technologies (e.g. digital clinical learning environments [DCE], problem-based/video case studies, and global classrooms). Learning how to adopt evidence-based practice to both clinical and leadership roles prepare students to work in inter-professional teams, improve health care systems and patient outcomes.

A BSN is awarded at the completion of the program. Qualified students are encouraged to submatriculate into the MSN program while enrolled in the BSN program.

For more information about this completion program at Drexel, visit the RN/BSN Completion Program (https://www.drexel.edu/cnhp/academics/undergraduate/RN-to-BSN-Completion-Program/) page.

State restrictions (https://online.drexel.edu/about/state-regulations.aspx) may apply.

WASHINGTON
Drexel University is currently unable to admit students living in Washington state to the online RN-BSN program.

The RN to BSN program at Drexel University is accredited by the Commission on Collegiate Nursing Education (http://www.ccneaccreditation.org/).

Admission Requirements/Prerequisites

Admission Requirements

- RN licensure (provisional acceptance will generally be offered pending successful completion of the NCLEX-RN examination)
- Official college transcripts
- College grade point average of 2.0 or better
- High school degree or equivalent

To be eligible for admission to the Bachelor of Science in nursing program, students must have completed 60.0 semester hours (90.0 quarter credits) of college prerequisites, as follows, with a grade of C or better. Students may transfer in up to 135.0 quarter credits. Remaining credits will be evaluated on an individual basis. To graduate, students must have completed 180.0 quarter credits.

The required 60.0 semester hours include:

English (includes one semester of composition)	6.0
Humanities (studio courses not acceptable)	3.0
Anatomy and Physiology	8.0
Microbiology	4.0
Sociology	3.0
Growth and Development	3.0
Psychology	3.0
Nursing	30.0
Total Credits	60.0

Students must be graduates of nursing programs that are both regionally accredited and accredited by the Accreditation Commission for Education for Nursing (ACEN) or the National League for Nursing Commission for Education Accreditation (CNEA). Students who meet the criteria of the Pennsylvania Nursing Articulation Model will receive credit for 30.0 semester hours (45.0 quarter credits) of nursing, which may be applied toward the program entrance requirements.

Degree Requirements

The College of Nursing and Health Professions faculty uses a variety of teaching and learning methods to facilitate the achievement of a student's personal objectives. All RN-BSN courses are offered online and incorporate a variety of innovative, interactive learning technologies. Courses are offered in both asynchronous and synchronous formats that allow the student flexibility in completing coursework over 10 week quarters.

Students should contact their Academic Advisor prior to registration.

TIER 1 COURSES

ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
Or transfer in 2 English courses (3 semester credits from a semester school) must include one semester of composition)		
Humanities Electives		3.0
Intro to Sociology		3.0
General Psychology		3.0
Developmental Psychology		3.0
Nursing Electives		45.0
Anatomy & Physiology I & II (w/ Labs)		10.0
Microbiology w/ Lab		5.0
Science Elective		3.0
TIER 2 COURSES		
Into to Computer Science of Communication		3.0
Statistics of the Health Sciences		4.0
Health Care Economics, Macro, or Micro		4.0
Health Care Ethics I or Advanced Health Care Ethics		3.0
Social Science Electives		3.0
Science Electives		6.0
Pharmacology or Advanced Physiology or Pathophysiology		5.0
Open Electives		23.0
TIER 3 COURSES		
NURS 325 [WI]	Critical Issues in Nursing	4.5
NURS 330 [WI]	Nursing Research: Methods and Critical Appraisal for Evidence-Based Practice	4.5
NURS 335	Genetics and Genomics: Application to Nursing Practice	4.5
NURS 340	Transformational Leadership	4.5
NURS 346	Health Assessment	6.0
NURS 380	Complex Systems of Care: Technology, Patient Safety & Quality	6.0
NURS 407 [WI]	Issues in Aging and Longevity	4.5
NURS 460	Population Health: Local & Global	6.0
NURS 465	Senior Capstone in Nursing	4.5
Total Credits		180.0

Sample Plan of Study

The Accelerated RN-BSN program is designed to be completed in 4 terms. Enrollment in Tier III assumes the student has completed an ADN or Diploma program, has passed the NCLEX-RN, and has completed all required coursework in TIER I and TIER II.

TIER III

Term 1		Credits
NURS 325 [WI]	Critical Issues in Nursing	4.5
NURS 335	Genetics and Genomics: Application to Nursing Practice	4.5
NURS 340	Transformational Leadership	4.5
	Term Credits	13.5
Term 2		
NURS 330 [WI] *	Nursing Research: Methods and Critical Appraisal for Evidence-Based Practice	4.5
NURS 380	Complex Systems of Care: Technology, Patient Safety & Quality	6.0
	Term Credits	10.5
Term 3		
NURS 346	Health Assessment	6.0

NURS 407 [WI]	Issues in Aging and Longevity	4.5
	Term Credits	10.5
Term 4		
NURS 460	Population Health: Local & Global	6.0
NURS 465	Senior Capstone in Nursing	4.5
	Term Credits	10.5

Total Credit: 45.0

*   Statistics of Health Sciences is a prerequisite to NURS 330 [WI] Research Basis of Nursing.

Nursing Faculty

Suzan Blacher, PhD, RN, CARN *(Drexel University) RN-BSN Program*. Assistant Clinical Professor. Care of the patient with substance use disorders; stigmatization of addictions.

Beth Chiatti, PhD, RN, CTN, CSN *(Widener University)*. Assistant Clinical Professor. Genetics, transcultural nursing, immigrant health, human rights and global health

Danielle Devine, PhD, RN *(Villanova University)*. Assistant Clinical Professor. Neurology, Critical Care.

Gloria Donnelly, PhD *(Bryn Mawr College) Dean Emerita*. Professor. Nursing education and a variety of mental health topics including assertiveness, stress and change.

Katie Duncan, MSN, AGPCNP-BC *(University of Pennsylvania)*. Assistant Clinical Professor. Adult-gerontology primary care nurse practitioner.

Theresa Fay-Hillier, DrPH, MSN, PMHCNS-BC *(Drexel University)*. Assistant Clinical Professor. Child, adolescent and family mental health nursing.

Maryann Godshall, PhD, RN, CCRN, CPN, CNE *(Duquesne University)*. Associate Clinical Professor. Pediatrics, critical care, nursing education, pediatric burn patients.

Karen Goldschmidt, PhD, RN *(Wilmington University) Department Chair, RN-BSN Completion Department* . Assistant Clinical Professor. Professional issues, nursing education, staff development, scholarly writing.

Maureen Gonzales, MSN, WHNP *(University of Pennsylvania)*. Assistant Clinical Professor. Women's health, high risk obstetrics.

Cynthia Hambach, MSN, RN, CCRN *(Widener University)*. Assistant Clinical Professor. Critical care nursing.

Dana C. Kemery, EdD, MSN, RN, CNE, CEN, CPEN *(Drexel Universiy)*. Assistant Clinical Professor. Emergency nursing (adult and pediatric), nursing education.

Kayann Laughlin, MAHEd, MSN, RN *(Arcadia University)*. Assistant Clinical Professor. Community/public health, administration.

MaryKay Maley, DNP, APN, FNP, RN-BC *(University of Miami)*. Assistant Clinical Professor. Family health, faith community nursing, health promotion/disease prevention and mindfulness-based stress reduction.

Tasha Martin-Peters, MSN, RN *(Duke University)*. Assistant Clinical Professor. Pediatric critical care, pediatric cardiac care.

Pamela McGee, MSN, FNP-BC, CNE *(University of Pennsylvania)*. Assistant Clinical Professor. Medical/surgical nursing, gerontology, primary care, family nurse practitioner.

Kristen McLaughlin, PhD (candidate), MSN, RN, CPNP-PC *(Widener University)*. Assistant Clinical Professor. Pediatric nurse practitioner.

Nancy Murphy, PhD, RN, CNE *(University of Massachusetts Dartmouth)*. Assistant Clinical Professor. Maternal child health, psychiatric/mental health; community, home and public health care.

Maura Nitka, MSN, RN, CPN *(Drexel University)*. Assistant Clinical Professor. Pediatric nursing.

Carol Okupniak, DNP, RN-BC *(Chatham University)*. Assistant Clinical Professor. Nursing informatics, simulation and women's health.

Jennifer Olszewski, EdD, MSN, CRNP, ANP-BC *(Drexel University) Interim Chair of the BSN Nursing Accelerated Career Entry Program*. Assistant Clinical Professor. Adult-gerontology nurse practitioner, dementia care.

Alis Kotler Panzera, DrNP, WHNP-BC, RN *(Drexel University) Director of Nursing Student Success*. Assistant Clinical Professor. Board certified women's health nurse practitioner, reproductive health and female urology.

Penny Parker, MSN, FNP-C, CCTC, CIC *(Drexel University)*. Assistant Clinical Professor. Advanced heart failure and heart/lung transplantation; critical care nursing.

Genevieve Porrecca, MSN, RN, PCCN *(Holy Family University)*. Assistant Clinical Professor. Critical care

Catherine Quay, MSN, RN-BC *(Pace University)*. Assistant Clinical Professor. Board certified gerontology, medical/surgical nursing, dementia.

Leland Rockstraw, PhD, RN *(Drexel University)*. Clinical Professor. Graduate Nursing-Advanced Roles. Adult orthopedic/surgical, emergency care, critical care, and trauma/surgery intensive care and healthcare simulation.

Al Rundio, PhD, DNP, RN, APRN, CARN-AP, NEA-BC, FNAP, FIAAN, FAAN *(Chatham College)*. Clinical Professor. Transference of dependencies from bariatric surgical procedures, relapse prevention in chemically addicted clients.

Deanna Lynn Schaffer, PhD RN, ACNS-BC *(Widener University)*. Assistant Clinical Professor. Recruitment and retention in higher education, nursing leadership, nursing practice environment, and nursing informatics.

Meaghan Shattuck, MSN, RN, OCN *(Holy Family University)*. Assistant Clinical Professor. Oncology certified, medical/surgical nursing and education.

Helen Teng, PhD, RN *(University of Pennsylvania)*. Assistant Clinical Professor. Community health, immigrant health.

Ann Thiel-Barrett, DNP, RN, FNP-BC, CNE *(Chatham University)*. Assistant Clinical Professor. Family health nursing.

Denise Way, DNP, MSN, RN *(Wilmington University)*. Assistant Clinical Professor. Osteoporosis prevention throughout the lifespan.

Joyce Welliver, MSN, CRNP, CAC, RN *(Drexel University) Director of Faculty Role Development and Clinical Performance*. Assistant Clinical Professor. Psychiatric/mental health nursing, adult health

Mary Yost, PhD, RN *(Widener Unirsity) Interim Chair of the BSN Co-Op Program*. Assistant Clinical Professor. Trauma/Critical Car and Emergency Nursing.

Mary Ann Zimmer, RN, MSN, CPN *(Villanova University)*. Assistant Clinical Professor. Pediatrics, adult medical-surgical nursing, nursing education.

Nutrition and Foods

Major: Nutrition and Foods
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 184.5
Co-op Options: One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 30.1901
Standard Occupational Classification (SOC) code: 29-1031

About the Program

The Nutrition and Foods curriculum emphasizes the relationship between food, food choices, nutrient metabolism, and medical nutrition therapy to meet the health and nutrient needs of individuals and groups.

The BS in Nutrition and Foods requires four years of study and the completion of at least 184.5 credits. The curriculum is designed to provide a sound basis for careers in dietetics and the application of the principles of nutrition and food science to the nutritional care of individuals and groups such as in hospitals, community-based nutrition facilities, food or pharmaceutical industries, or food service.

The study of the biochemical nature of nutrients and foods, their interaction with the environment, and their eventual metabolic fate is a strong career path for more research-minded students and provides a unique base for graduate study.

About the Nutrition Program

Dietetics is the practical application of nutrition in the prevention and treatment of disease. Dietetics is an exciting and challenging profession because there are many diseases that are related to nutrition, such as heart disease, high blood pressure, stroke, cancer, diabetes and obesity.

The nutrition program at Drexel University is referred to as a Didactic Program in Dietetics (DPD) because it provides classroom training for students who want to become Registered Dietitians/Nutritionists (RD/RDN). Our Didactic Program in Dietetics is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics:

Academy of Nutrition and Dietetics
120 South Riverside Plaza
Suite 2000
Chicago, IL 60606
800-877-1600 x5400
www.eatright.org (http://www.eatright.org)

The Academy of Nutrition and Dietetics (https://www.cdrnet.org/) is the nation's largest organization of food and nutrition professionals, most of whom are Registered Dietitians (RD) or Registered Dietitians/Nutritionists (RDN). Note that the "RD" and "RDN" credential are the same credential.

The Academy of Nutrition and Dietetics included the "RDN" to reflect that "all registered dietitians are nutritionists, but not all nutritionists are registered dietitians." In addition, the Academy of Nutrition and Dietetics states that adding the word "nutritionist" to the RD credential allows for a broader notion of wellness.

To become an RD/RDN, students must complete a:

- Minimum of a bachelor's degree with course work approved by ACEND. Course work typically includes nutrition and food sciences, chemistry, biochemistry, physiology, microbiology, community nutrition, nutrition counseling, basic and quantity food preparation, foodservice systems management and medical nutrition therapy. NOTE: As of January 1, 2024, the minimum of a Master's degree will be required to sit for the RDN exam.
- An accredited, supervised practice program, also called a dietetic internship (DI) or Individualized Supervised Practice Pathway (IPP), at health-care facilities, community agencies and in foodservice operations. The internship must provide a minimum of 1200 hours of hands-on training.
- Pass a national examination administered by the Commission on Dietetic Registration.

After successfully completing the BS program in Nutrition and all DPD-required courses with a C or better, students will receive a BS degree and a DPD Verification Statement. The Verification Statement is a certificate documenting completion of an accredited Didactic Program in Dietetics. At this time (prior to 2024), students need both a minimum of Bachelor's degree and a Verification Statement to be eligible for a dietetic internship.

During the senior year, most students apply for admission into a dietetic internship. To have a good chance of getting accepted into a dietetic internship, students should do the following:

- Maintain a cumulative grade point average (GPA) greater than 3.0 (this includes college courses regardless of where taken).
- Work several hundred hours in dietetics-related work and volunteer experience (especially in the food and nutrition departments at hospitals and nursing homes and in community programs such as Women, Infants, and Children [WIC]).
- Participate in activities that demonstrate leadership.

Mission, Goals, and Outcome Measures

Drexel University's Department of Nutrition Sciences, Nutrition and Dietetics Program integrates a foundation in the nutrition sciences with courses in the social sciences to provide the knowledge, skills, and professional values needed for successful entry into dietetic internships, graduate school, or dietetics employment. The learning environment is structured to allow students and interns to use current technology, to participate in conducting research, and to engage in experiential learning, including co-operative education for undergraduates.

GOAL 1

To provide quality didactic instruction and learning experiences to prepare graduates to be accepted into dietetic internships and graduate schools, or work in the field of dietetics.

- Objective #1: Eighty percent of graduating BS students and 90% of graduating MS students will apply to an accredited dietetic internship.

- Objective #2: Eighty percent of students who apply to dietetic internships or Individualized Supervised Practice Pathways (ISPPs) are accepted.
- Objective #3: Seventy-five percent of students who apply to graduate school are accepted.
- Objective #4: Eighty-percent of graduates of the Drexel University ISPP who e will be employed within 6 months of program completion.
- Objective #5: Graduates of the didactic program in dietetics (DPD) will rate 10 aspects of their didactic and learning experiences an average of "4" or better, on a scale of 1=poor to 5=excellent.
- Objective #6: At least 90% of students will complete the program within 150% of the expected time frame for the program (BS-DPD full-time = 4 years; BS-DPD part-time = 5 to 7 years; Masters of Science[MS]-DPD full time = 2 years; MS-DPD part-time = 4 years; ISPP full-time = 3 quarters or 1 year; ISPP part-time = 6 quarters or 2 years.

GOAL 2

To prepare graduates to become competent entry-level dietitians.

- Objective #1: The program's first time pass rate on the entry exam for all tracks (BS-DPD, MS-DPD, and ISPP) will be 80% or higher.
- Objective #2: Internship directors of graduates of the DPD will rate 10 aspects of the students' preparation for internship an average of "4" or better, on a scale of 1=poor to 5=excellent.
- Objective #3: Employers of alumni of the ISPP will rate 10 aspects of the employees' preparation for entry-level practice an average of "4" or better, on a scale of 1=poor to 5=excellent.

GOAL 3

To increase diversity in the profession by recruiting and retaining students from under-represented groups and facilitating their success in the program.

- Objective #1: At least 10% of student in all tracks (BS-DPD, MS-DPD and ISPP cumulatively) will be from under-represented groups.

For more information, visit the College's Nutrition Sciences (https://www.drexel.edu/cnhp/academics/undergraduate/BS-Nutrition-and-Foods/) web page.

Admission/Graduation Requirements

Admission Requirements

Drexel takes into consideration a number of criteria when determining admission, including the applicant's application, transcripts, courses in progress, two letters of recommendation, standardized test scores, essay, and special interests (list of extracurricular activities, employment, etc.). Applicants to the Nutrition and Foods program must have completed three years of high school mathematics (algebra I and II, geometry, and trigonometry) and two years of a laboratory science (biology, chemistry, or physics). Applicants should have a strong interest in, and aptitude for, the basic sciences that are required in the program.

To be considered as a transfer student, candidates should have completed a minimum of 24 college credits. Drexel operates on a rolling admission basis, which means that students will be notified about the admission decision as soon as possible after their files are complete.

Visit the Admissions (http://drexel.edu/undergrad/academics/majors/) web site for more information and to apply online.

Graduation Requirements

To receive a BS in Nutrition and Foods, students in the program must complete a plan of study of all required courses and enough elective courses to total at least 180.0 credits. An overall GPA of 2.0 or higher for all coursework undertaken at Drexel University must be earned to receive a BS. A "C" or better is required in all courses in the Didactic Program in Dietetics to receive a Verification Statement.

For the current academic calendar, visit Drexel University Academic Calendars (http://drexel.edu/provost/calendars/academic-calendars/).

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Total Credits		184.5

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Total Credit: 184.5

Career Opportunities

Possible career opportunities in dietetics include the following:

- *Clinical Dietitians* are specialists in medical nutrition therapy in hospitals, outpatient clinics, and private practices. They assess patient nutrition, develop dietary plans, provide patient counseling, and monitor patient progress.
- *Community Dietitians* work in public health agencies, health and fitness clubs, Women, Infants, and Children and non-profit organizations with a focus on nutrition. They counsel people on food choices and direct programs in nutrition awareness and disease prevention.
- *Sports Dietitians* work with professional sports teams, Olympic and/or University and College teams. They provide team and individual nutrition counseling, establish fueling stations, work with food service industry during travel, etc.
- *Management Dietitians* specialize in clinical management or food service systems. They work in hospitals, nursing homes, school food service, cafeterias, restaurants, the airline industry, etc. They manage personnel, plan and conduct employee training programs, design food systems, and plan budgets.
- *Business Dietitians* work in the food industry in product development and marketing, public relations, food styling, and menu design.
- *Consultant Dietitians* are independent business people who work as consultants to sports teams, nursing homes, corporations, etc.

Facilities

The Center for Nutrition & Performance, located in the Daskalakis Athletic Center, provides a variety of nutrition services to the Drexel community, including workshops, lectures, support for athletic teams, and individual counseling. An employee weight loss program is available through the Center for Nutrition & Performance The Center for Nutrition & Performance also works with some professional teams, as well as internationally.

Nutrition and Foods Faculty

Nyree Dardarian, MS, RD, LDN, CSSD, FAND *(Drexel University) Director, Center for Nutrition & Performance.* Clinical Assistant Professor. Energy expenditure; sports nutrition

Garrison L. Draper, MSc, CSCS, USAW, ISPAS *(Edith Cowan University, Perth, WA) Courtesy Appointment.* Visiting instructor

Susan Ettinger, PhD, RD, DABN, CDN *(Columbia University) Courtesy Appointment.* Visiting Research Professor.

Susan Fuchs, MS, IBCLC *(Drexel University) Director, Human Lactation Certificate Program.* Clinical Instructor. Human lactation

Joseph Kehayias, PhD *(Indiana University).* Professor. Body composition analyses; measurement of sarcopenia; osteoporosis; energy expenditure.

Beth L. Leonberg, MS, MA, RDN, CSP, FAND, LDN *(Colorado State University, Rowan University) Director, Didactic Program in Dietetics .* Associate Clinical Professor. Pediatric nutrition.

Brandy-Joe Milliron, PhD *(Arizona State University).* Associate Professor. The development and evaluation of modifications in the natural environment to promote healthier living; farm to table school initiatives

Jennifer Nasser, PhD, RD, FTOS *(Rutgers University).* Associate Professor. Dopamine-mediated mechanisms of food intake regulation in humans and its impact on metabolic homeostasis, especially as it applies to obesity, eating disorders and aging.

Kavitha Penugonda, PhD *(Kansas State University) Manager, Nutritional Biochemistry Laboratory.* Assistant Clinical Professor. Nutrient bioavailability in foods; nutritional supplements on health

Jennifer Quinlan, PhD *(North Carolina State University).* Professor. Food microbiology; microbiological quality and safety of produce, dairy and meat products in markets in high vs. low socioeconomics areas, Bacillus and Clostridium spores in food processing.

Vicki Schwartz, DCN, RD, LDN, CNSC, FAND *(Rutgers University).* Assistant Clinical Professor. Clinical nutrition; using standardized patients in nutrition counseling

Patricia A. Shewokis, PhD *(University of Georgia).* Professor. Roles of cognition and motor function during motor skill learning; role of information feedback frequency on the memory of motor skills, noninvasive neural imaging techniques of functional near infrared spectroscopy(fNIRS) and electroencephalograpy (EEG) and methodology and research design.

Deeptha Sukumar, PhD *(Rutgers University).* Associate Professor. Vitamin D and magnesium and bone mineral density; obesity and bone mineral density.

Stella Lucia Volpe, PhD, RD, ACSM-CEP, FACSM *(Virginia Polytechnic Institute and State University) Chair, Nutrition Sciences.* Professor. Prevention of obesity and diabetes across the lifespan; mineral metabolism and exercise; energy balance; sports nutrition.

Emeritus Faculty

Donna H. Mueller, PhD *(Temple University).* Associate Professor Emeritus. Clinical nutrition; pediatric nutrition; nutrition in pulmonary diseases, especially cystic fibrosis; nutrition in developmental delay; dental nutrition; dietetic education and professional development.

Health Sciences BS / Physical Therapy DPT

Major: Health Sciences / Physical Therapy
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 189.5

Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 51.1199
Standard Occupational Classification (SOC) code: 11-9111

About the Program

Drexel's undergraduate Health Sciences program and graduate Physical Therapy (PT) program have partnered to offer an accelerated dual-degree BS/DPT option available to high-achieving students enrolled in the Health Sciences Program. The *Accelerated BS/DPT Option* is an accelerated academic track that enables students to complete their Bachelor of Sciences and Doctor of Physical Therapy degrees in 5.5 years as opposed to the traditional 6.5 years.

Students pursue a BS degree in Health Sciences during their first three years of study, and a DPT degree during their final 2.5 years of study. The bachelor's degree in Health Sciences is awarded following completion of year four (first year of graduate study), and the doctoral degree is awarded following completion of the Physical Therapy program.

For additional information visit the Accelerated BS/DPT Option (https://drexel.edu/cnhp/academics/undergraduate/BS-DPT-Physical-Therapy-Option/) on the Health Sciences page.

Degree Requirements

Health Sciences BS / Physician Assistant MHS

Major: Health Sciences / Physician Assistant
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 186.5
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 51.1199
Standard Occupational Classification (SOC) code: 11-9111

About the Program

Drexel's undergraduate Health Sciences Program and graduate Physician Assistant (PA) Program have partnered to offer an accelerated dual-degree BS/MHS option available to high achieving students enrolled in the Health Sciences Program. The *Accelerated BS/MHS PA Option* is an accelerated academic track that enables students to complete their bachelor's and master's degrees in Health Sciences, including sitting for

the Physician Assistant National Certifying Exam (PANCE), in 5.25 years as opposed to the traditional 6.25 years.

Students pursue a Bachelor of Science degree in Health Sciences during their first three years of study, and a Master of Health Science degree during the final 2.25 years of study. The bachelor's degree in Health Sciences is awarded following completion of year four (first year of graduate study), and the master's degree is awarded following completion of the Physician Assistant Program.

For additional information visit the Accelerated BS/MHS Option (http://www.drexel.edu/cnhp/academics/departments/Health-Sciences/) on the Health Sciences page.

Health Services Administration BS / Public Health MPH

Major: Health Services Administration
Degree Awarded: Bachelor of Science (BS) Master of Public Health (MPH)
Calendar Type: Quarter
Total Credit Hours: 236.0
Co-op Options: One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 51.0701
Standard Occupational Classification (SOC) code: 11-9111

About the Program

The Health Services Administration program and the Master of Public Health program in the Dornsife School of Public Health offer an accelerated dual degree option. Participants can earn both a BS degree in Health Services Administration and a Master of Public Health (MPH) degree in five years.

Students in this accelerated, dual degree program apply to the graduate Masters of Public Health Program (http://catalog.drexel.edu/graduate/schoolofpublichealth/publichealth/) during the fall quarter of their junior year. They then follow the same application procedures as other applicants, including being interviewed by the graduate faculty. (Any student who does not meet the entrance requirements of the graduate program will be able to complete the fourth year of the Health Services Administration program and receive a BS degree.)

Students in the Master of Public Health program complete 56.0 graduate quarter credits to meet the requirements of the master's program. The accelerated, dual degree program represents an acceleration of only the undergraduate portion of the student's curriculum.

For additional information, visit the College of Nursing and Health Professions Accelerated Dual Degree Programs (https://www.drexel.edu/cnhp/academics/undergraduate/BS-MPH-Dual-Degree-Program/) page.

Nursing: Accelerated RN/BSN/MSN

Major: Nursing
Degree Awarded: Bachelor of Science in Nursing (BSN) and Master of Science in Nursing (MSN)
Calendar Type: Quarter
Total Credit Hours: 60
Co-op Options: No Co-op (Three years)
Classification of Instructional Programs (CIP) code: 51.1601
Standard Occupational Classification (SOC) code: 29-1141

About the Program

The RN-BSN-MSN Option is a pathway for RNs who have a bachelor's degree in a field other than nursing and are interested in pursuing a fast-track option to complete a BSN and MSN. This program is also available to students who are currently in the Drexel RN to BSN completion program and are interested in continuing their studies to pursue the MSN.

Application

For the following tracks, students submit an application to the MSN program upon admission:

- MSN in Clinical Nurse Leader (http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/clinicalnurseleaderinadulthealthcon/)

- MSN in Clinical Research (http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/clinicalresearchcon/)

- MSN in Nursing Education (http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/nursingedandfacrolecon/)

- MSN in Nursing Innovation (http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/nursinginnovation/)
- MSN in Nursing Leadership in Health Systems Management (http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/nursingleadershipinhealthsystemsmanagementcon/)
- MSN in Quality, Safety and Risk Management (http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/qualitysafetyandriskmanagementinhealthcare/)

Admission Requirements

The students must meet the admission requirements for the MSN program.

Specific admission criteria are outlined on the Admission Requirements RN to BSN to MSN Option (http://drexel.edu/cnhp/academics/graduate/MSN-Bridge/) page.

Student's academic transcript and professional experience are reviewed and credit is applied to meet the degree requirements. Students are awarded both the BSN and MSN at the completion of the program.

*Drexel University is currently unable to admit students living in Washington state to this program.

Degree Requirements

Note: MSN Nurse Practitioner concentrations are currently not accepting students in this program.

BSN Courses		
NURS 325 [WI]	Critical Issues in Nursing	4.5
NURS 335	Genetics and Genomics: Application to Nursing Practice	4.5
NURS 460	Population Health: Local & Global	6.0
TGFE 099 Portfolio Assessment		**15.0**
MSN Core Courses		
NURS 500 [WI]	Confronting Issues in Contemporary Health Care Environments	3.0
NURS 502	Advanced Ethical Decision Making in Health Care	3.0
NURS 544	Quality and Safety in Healthcare	3.0
RSCH 503	Research Methods and Biostatistics	3.0
RSCH 504	Evaluation and Translation of Health Research	3.0
MSN Concentration - select one from the options below		**30.0-41.0**
Total Credits		75.0-86.0

MSN Concentrations (Select one)

Clinical Nurse Leader

NURS 531	Epidemiology in Action: Tracking Health & Disease	3.0
NURS 532	Evaluation of Health Outcomes	3.0
NURS 548	Advanced Pathophysiology	3.0
NURS 549	Advanced Pharmacology	3.0
NURS 550	Advanced Health Assessment & Diagnostic Reasoning	4.0
NURS 564	The Business of Healthcare	3.0
NURS 602	Foundations for Clinical Nurse Leader	4.0
NURS 603	Clinical Nurse Leader Capstone Immersion I	5.0
NURS 604	Clinical Nurse Leader Capstone Immersion II	5.0
Total Credits		33.0

Clinical Trials Research

NURS 548	Advanced Pathophysiology	3.0
NURS 549	Advanced Pharmacology	3.0
NURS 550	Advanced Health Assessment & Diagnostic Reasoning	4.0
NURS 557	Leadership and Stewardship in the Health Professions	3.0
NURS 582	Foundation of Good Clinical Practice in Clinical Trials Mngmt	3.0
NURS 583	Operational Leadership in Clinical Trials Management	3.0
NURS 584	Current Topics in Clinical Trials	3.0
NURS 585	Clinical Trials Research Practicum	5.0
Elective		3.0
Total Credits		30.0

Nurse Educator

NURS 548	Advanced Pathophysiology	3.0
NURS 549	Advanced Pharmacology	3.0
NURS 550	Advanced Health Assessment & Diagnostic Reasoning	4.0
NURS 591	Foundations of Nursing Education	3.0
NURS 606	Curriculum Design for Higher Level Cognition	3.0
NURS 613	The Role and Responsibility of the Nursing Professor	3.0
NURS 615	Assessment, Measurement and Evaluation	3.0
NURS 616	Teaching Methods in Nursing Education	3.0
NURS 632	Nurse Educator and Faculty Role Practicum	6.0
Total Credits		31.0

Nursing Innovation

NURS 564	The Business of Healthcare	3.0
NURS 586	Innovation in Advanced Nursing Practice: Theory and Application	3.0
NURS 587	Case Studies in Intra/Entrepreneurship and Innovation in Nursing	3.0
NURS 652	Innovation Capstone Project	6.0
PROJ 501	Introduction to Project Management	3.0
Electives		12.0-15.0
Total Credits		30.0-33.0

Nursing Leadership in Health Systems Management

NURS 547	Communication and Self-Awareness for Leading and Managing in Healthcare	3.0
NURS 553	Data Analysis for Decision-Making in HC Management	3.0
NURS 557	Leadership and Stewardship in the Health Professions	3.0
NURS 558	Economics of Healthcare Management & Policy	3.0
NURS 559	Operations Management in Contemporary Healthcare Organizations	3.0
NURS 562	Workforce Management in Healthcare Organizations	3.0
NURS 564	The Business of Healthcare	3.0
NURS 567	Strategic Management: Power, Politics and Influence in Healthcare Systems	3.0
NURS 568	Practicum and Symposium in Healthcare Operations Management	3.0
NURS 569	Practicum and Symposium in Technology and Management of Information in Healthcare Organizations	3.0
Total Credits		30.0

Quality, Safety and Risk Management in Healthcare

IPS 501	Legal Compliance: Structure and Implementation	4.5
IPS 504	Regulations in Health Care	4.5
IPS 505	Health Care Quality and the Legal Context	4.5

IPS 506	HIPAA: A Patient's Legal Right to Privacy	4.5
IPS 584	Analysis of Performance Standards in Healthcare Quality	3.0
IPS 585	Science of Safety, Human Factors, and System Thinking	3.0
IPS 586	Creating a Culture of Safety	2.0
IPS 601	Quality, Safety and Risk Management Capstone	5.0
Total Credits		31.0

Sample Plan of Study - Clinical Nurse Leader concentration

First Year

Term 1		**Credits**

Nursing Faculty

Suzan Blacher, PhD, RN, CARN *(Drexel University) RN-BSN Program*. Assistant Clinical Professor. Care of the patient with substance use disorders; stigmatization of addictions.

Beth Chiatti, PhD, RN, CTN, CSN *(Widener University)*. Assistant Clinical Professor. Genetics, transcultural nursing, immigrant health, human rights and global health

Danielle Devine, PhD, RN *(Villanova University)*. Assistant Clinical Professor. Neurology, Critical Care.

Gloria Donnelly, PhD *(Bryn Mawr College) Dean Emerita*. Professor. Nursing education and a variety of mental health topics including assertiveness, stress and change.

Katie Duncan, MSN, AGPCNP-BC *(University of Pennsylvania)*. Assistant Clinical Professor. Adult-gerontology primary care nurse practitioner.

Theresa Fay-Hillier, DrPH, MSN, PMHCNS-BC *(Drexel University)*. Assistant Clinical Professor. Child, adolescent and family mental health nursing.

Maryann Godshall, PhD, RN, CCRN, CPN, CNE *(Duquesne University)*. Associate Clinical Professor. Pediatrics, critical care, nursing education, pediatric burn patients.

Karen Goldschmidt, PhD, RN *(Wilmington University) Department Chair, RN-BSN Completion Department* . Assistant Clinical Professor. Professional issues, nursing education, staff development, scholarly writing.

Maureen Gonzales, MSN, WHNP *(University of Pennsylvania)*. Assistant Clinical Professor. Women's health, high risk obstetrics.

Cynthia Hambach, MSN, RN, CCRN *(Widener University)*. Assistant Clinical Professor. Critical care nursing.

Dana C. Kemery, EdD, MSN, RN, CNE, CEN, CPEN *(Drexel Universiy)*. Assistant Clinical Professor. Emergency nursing (adult and pediatric), nursing education.

Kayann Laughlin, MAHEd, MSN, RN *(Arcadia University)*. Assistant Clinical Professor. Community/public health, administration.

MaryKay Maley, DNP, APN, FNP, RN-BC *(University of Miami)*. Assistant Clinical Professor. Family health, faith community nursing, health promotion/disease prevention and mindfulness-based stress reduction.

Tasha Martin-Peters, MSN, RN *(Duke University)*. Assistant Clinical Professor. Pediatric critical care, pediatric cardiac care.

Pamela McGee, MSN, FNP-BC, CNE *(University of Pennsylvania)*. Assistant Clinical Professor. Medical/surgical nursing, gerontology, primary care, family nurse practitioner.

Kristen McLaughlin, PhD (candidate), MSN, RN, CPNP-PC *(Widener University)*. Assistant Clinical Professor. Pediatric nurse practitioner.

Nancy Murphy, PhD, RN, CNE *(University of Massachusetts Dartmouth).* Assistant Clinical Professor. Maternal child health, psychiatric/mental health; community, home and public health care.

Maura Nitka, MSN, RN, CPN *(Drexel University).* Assistant Clinical Professor. Pediatric nursing.

Carol Okupniak, DNP, RN-BC *(Chatham University).* Assistant Clinical Professor. Nursing informatics, simulation and women's health.

Jennifer Olszewski, EdD, MSN, CRNP, ANP-BC *(Drexel University) Interim Chair of the BSN Nursing Accelerated Career Entry Program.* Assistant Clinical Professor. Adult-gerontology nurse practitioner, dementia care.

Alis Kotler Panzera, DrNP, WHNP-BC, RN *(Drexel University) Director of Nursing Student Success.* Assistant Clinical Professor. Board certified women's health nurse practitioner, reproductive health and female urology.

Penny Parker, MSN, FNP-C, CCTC, CIC *(Drexel University).* Assistant Clinical Professor. Advanced heart failure and heart/lung transplantation; critical care nursing.

Genevieve Porrecca, MSN, RN, PCCN *(Holy Family University).* Assistant Clinical Professor. Critical care

Catherine Quay, MSN, RN-BC *(Pace University).* Assistant Clinical Professor. Board certified gerontology, medical/surgical nursing, dementia.

Leland Rockstraw, PhD, RN *(Drexel University).* Clinical Professor. Graduate Nursing-Advanced Roles. Adult orthopedic/surgical, emergency care, critical care, and trauma/surgery intensive care and healthcare simulation.

Al Rundio, PhD, DNP, RN, APRN, CARN-AP, NEA-BC, FNAP, FIAAN, FAAN *(Chatham College).* Clinical Professor. Transference of dependencies from bariatric surgical procedures, relapse prevention in chemically addicted clients.

Deanna Lynn Schaffer, PhD RN, ACNS-BC *(Widener University).* Assistant Clinical Professor. Recruitment and retention in higher education, nursing leadership, nursing practice environment, and nursing informatics.

Meaghan Shattuck, MSN, RN, OCN *(Holy Family University).* Assistant Clinical Professor. Oncology certified, medical/surgical nursing and education.

Helen Teng, PhD, RN *(University of Pennsylvania).* Assistant Clinical Professor. Community health, immigrant health.

Ann Thiel-Barrett, DNP, RN, FNP-BC, CNE *(Chatham University).* Assistant Clinical Professor. Family health nursing.

Denise Way, DNP, MSN, RN *(Wilmington University).* Assistant Clinical Professor. Osteoporosis prevention throughout the lifespan.

Joyce Welliver, MSN, CRNP, CAC, RN *(Drexel University) Director of Faculty Role Development and Clinical Performance.* Assistant Clinical Professor. Psychiatric/mental health nursing, adult health

Mary Yost, PhD, RN *(Widener Unirsity) Interim Chair of the BSN Co-Op Program.* Assistant Clinical Professor. Trauma/Critical Car and Emergency Nursing.

Mary Ann Zimmer, RN, MSN, CPN *(Villanova University).* Assistant Clinical Professor. Pediatrics, adult medical-surgical nursing, nursing education.

Accelerated Dual Degree in Nutrition Sciences BS/MS

Major: Nutrition and Food Science (BS) and Human Nutrition (MS)
Degree Awarded: Bachelor of Science (BS) and Master of Science (MS)
Calendar Type: Quarter
Total Credit Hours: 229.5
Co-op Options: One Co-op (Five years)
Classification of Instructional Programs (CIP) code: 51.3101
Standard Occupational Classification (SOC) code: 29-1031

About the Program

The Accelerated Dual-Degree in Nutrition Sciences is an academic track that enables students to complete both a bachelor's degree and master's degree in five years, in preparation for becoming a Registered Dietitian/Registered Dietitian Nutritionist (RD/RDN). Students pursue the Bachelor's degree in Nutrition and Food Science during their first four years of study and the Master's degree in Human Nutrition during the final year of study. Students are eligible for the program at the end of their second year of study if they have achieved a grade of B or better in all required courses. The Bachelor of Science in Nutrition and Food Science is awarded following completion of year four (first year of graduate study), and the Master of Science in Human Nutrition is awarded following year five. Upon completion of the master's degree, students will receive the Didactic Program in Dietetics (DPD) Verification Statement, allowing them to enroll in an accredited dietetic internship.

Additional Information

For more information about Nutrition Sciences, visit the College of Nursing and Health Professions' Nutrition Sciences Department (http://drexel.edu/cnhp/academics/departments/Nutrition-Sciences/).

Admission Requirements

The Accelerated Dual-Degree in Nutrition Sciences is available to high-achieving students in the BS Nutrition and Foods program who plan to become Registered Dietitians/Registered Dietitian Nutritionists. Current students may apply for admission to the program after they have completed the first two years of the undergraduate degree program. Transfer students may apply if they have fulfilled comparable coursework at another accredited college or university and meet all other admission criteria. Applicants must have earned a grade of B or better in all required courses in the first two years of the program. Applicants must also submit a personal statement outlining their goals and interest, and two letters of recommendation from faculty.

Nutrition Sciences Faculty

Joan Rosen Bloch, PhD, CRNP *(University of Pennsylvania)*. Associate Professor. Maternal and infant health outcomes with a particular focus on racial and ethnic perinatal health disparities.

Charlene Compher, PhD, RD, CNSC, LDN, FADA, FASPEN *(Drexel University) Courtesy Appointment*. Visiting Research Professor.

Robin M. Danowski, MS, RD, LDN. Instructor. Renal Nutrition

Nyree Dardarian, MS, RD, LDN, CSSD, FAND *(Drexel University) Director, Center for Nutrition & Performance*. Clinical Assistant Professor. Energy expenditure; sports nutrition

Franceso De Luca, MD *(Catholic University of Sacred Heart, Rome, Italy) Courtesy Appointment*. Visiting Research Professor.

Angelo Del Parigi, MD *(University of Bari, Italy) Courtesy Appointment*. Visiting Research Professor.

Jonathan Deutsch, PhD *(New York University)*. Professor. Social and cultural aspects of food, culinary education, culinary improvisation, recipe and product development; food sustainability.

RoseAnn DiMaria-Ghalili, PhD, MSN, BSN, CNSC *(New York University, School of Education, Division of Nursing)*. Associate Professor. Nutrition and surgical recovery to improve the care of older adults undergoing surgery; nutrition assessment, inflammation, and health outcomes.

Garrison L. Draper, MSc, CSCS, USAW, ISPAS *(Edith Cowan University, Perth, WA) Courtesy Appointment*. Visiting instructor

Susan Ettinger, PhD, RD, DABN, CDN *(Columbia University) Courtesy Appointment*. Visiting Research Professor.

Debi Page Ferrarello, RN, MSN, MS, IBCLC, RLC *(Jefferson University, Arcadia University)*. Instructor. Human lactation

Andrea Judge, MPH, IBCLC, RLC *(University of North Carolina)*. Clinical Instructor. Human lactation

Joseph Kehayias, PhD *(Indiana University)*. Professor. Body composition analyses; measurement of sarcopenia; osteoporosis; energy expenditure.

Tanya V.E. Kral, PhD *(Pennsylvania State University) Courtesy Appointment*. Visiting Research Professor.

Beth L. Leonberg, MS, MA, RDN, CSP, FAND, LDN *(Colorado State University, Rowan University) Director, Didactic Program in Dietetics* . Associate Clinical Professor. Pediatric nutrition.

Rachelle Lessen, MS, RD, IBCLC, LDN *(Arcadia University)*. Instructor. Human lactation

Michael Lowe, PhD *(Boston College)*. Professor. Prevention and treatment of eating disorders and obesity; effects of appetitive responsiveness and dietary restraint on eating regulation; psychobiology of obesity-proneness; empirical foundations of unconscious processes.

Brandy-Joe Milliron, PhD *(Arizona State University)*. Associate Professor. The development and evaluation of modifications in the natural environment to promote healthier living; farm to table school initiatives

Juan Muniz, PhD *(Oregon State University)*. Visiting Research Professor. Food microbiology; community-based research to assess pesticide levels in homes; prevention of health effects of pesticides for indigenous farmworkers.

Jennifer Nasser, PhD, RD, FTOS *(Rutgers University)*. Associate Professor. Dopamine-mediated mechanisms of food intake regulation in humans and its impact on metabolic homeostasis, especially as it applies to obesity, eating disorders and aging.

Margaret O'Neil, PT, PhD, MPH *(MCP Hahnemann University; Duke University; University of North Carolina at Chapel Hill)*. Adjunct Associate Professor. Measurement of and interventions to improve physical activity and fitness levels and promote participation in children and youth with who are overweight/obese and those with physical disabilities (especially cerebral palsy).

Irene E. Olsen, PhD, RD, LDN *(Tufts University) Courtesy Appointment.* Visiting Research Professor.

Kavitha Penugonda, PhD *(Kansas State University) Manager, Nutritional Biochemistry Laboratory.* Assistant Clinical Professor. Nutrient bioavailability in foods; nutritional supplements on health

Jennifer Quinlan, PhD *(North Carolina State University).* Professor. Food microbiology; microbiological quality and safety of produce, dairy and meat products in markets in high vs. low socioeconomics areas, Bacillus and Clostridium spores in food processing.

Sobhana Ranjan, PhD, RD *(University of Delhi, India) Courtesy Appointment.* Visiting Research Professor.

Barry Ritz, PhD *(Drexel University) Courtesy Appointment.* Visiting Research Professor.

Patricia A. Shewokis, PhD *(University of Georgia).* Professor. Roles of cognition and motor function during motor skill learning; role of information feedback frequency on the memory of motor skills, noninvasive neural imaging techniques of functional near infrared spectroscopy(fNIRS) and electroencephalograpy (EEG) and methodology and research design.

Sinclair A. Smith, MS, DSc *(Boston University) Chair, Health Sciences.* Professor. Effects of aging, dehydration, and oral creatine supplementation on skeletal muscle metabolism using phosphorus magnetic resonance spectroscopy. Anatomy, physiology, and exercise science.

Deeptha Sukumar, PhD *(Rutgers University).* Associate Professor. Vitamin D and magnesium and bone mineral density; obesity and bone mineral density.

Alison Ventura, PhD *(Pennsylvania State University) Courtesy Appointment.* Visiting Research Professor. Factors that contribute to the development of eating behaviors and dietary preferences during infancy and early childhood.

Stella Lucia Volpe, PhD, RD, ACSM-CEP, FACSM *(Virginia Polytechnic Institute and State University) Chair, Nutrition Sciences.* Professor. Prevention of obesity and diabetes across the lifespan; mineral metabolism and exercise; energy balance; sports nutrition.

Emeritus Faculty

Donna H. Mueller, PhD *(Temple University).* Associate Professor Emeritus. Clinical nutrition; pediatric nutrition; nutrition in pulmonary diseases, especially cystic fibrosis; nutrition in developmental delay; dental nutrition; dietetic education and professional development.

Minor in Addictions Counseling

About the Minor

The minor in addictions counseling provides students with an understanding of current best-practice approaches in counseling interventions aimed at assisting people in recovery from substance use disorders. This minor appeals to students in a wide range of Drexel majors, including psychology, criminal justice, health services administration, sociology, health sciences, education, general humanities and social science, nutrition and foods, as well as other fields of study.

Academic Requirements

The minor includes six required courses and two additional BACS undergraduate courses of the student's choosing. Students may elect to begin coursework in this minor at any point in their undergraduate education. It is strongly suggested that students pursuing this minor consult with faculty in the Department of Counseling and Family Therapy (http://drexel.edu/cnhp/faculty/counseling-and-family-therapy/) program for advice in selecting electives that will best meet their goals in this minor.

Required Courses

BACS 220	Counseling Theory and Practice	3.0
BACS 234	Introduction to Addictive Disorders	3.0
BACS 301	Group Counseling I	3.0
BACS 304	Cognitive and Behavioral Counseling I	3.0
BACS 310	Recovery and Relapse Prevention	3.0
BACS 367	Advanced Counseling Intervention	3.0
Select any two additional undergraduate BACS courses		6.0
Total Credits		24.0

Minor in Culinary Arts

About the Minor

The minor in culinary arts is designed for students pursuing a variety of majors who also have an interest in food and cuisine. The required courses introduce the major cuisines, and develop necessary culinary technical skills and fundamental knowledge of foods and food preparation. Students are able to select elective courses in various cuisines or can explore more theoretical areas of the field through topics including gastronomy, food history, and food writing.

Required Courses

CULA 115	Culinary Fundamentals	3.0
or CULA 120	Techniques and Traditions I	
CULA 305	Fundamentals of Italian Cuisine	3.0
CULA 310	Fundamentals of French Cuisine	3.0
CULA 315	Fundamentals of American Cuisine	3.0
HRM 215	Commercial Food Production	4.0
Select three of the following:		8.0
CULA 121	Techniques and Traditions II	
CULA 125	Foundations of Professional Baking	
CULA 216	A la Carte	
CULA 220	Patisserie I	
CULA 225	Patisserie II	
CULA 226	Patisserie III	
CULA 240	Fundamentals of Chinese Cuisine	
CULA 306	Advanced Italian Cuisine	
CULA 311	Advanced French Technique	
CULA 320	Advanced Culinary Studio	
CULA 325	Garde Manger Laboratory	
CULA 316	Butchery Laboratory	
CULA 330	Charcuterie	
CULA 335	Fundamentals of Indian Cuisine	
CULA 400	Directed Studies with a Master Chef	
CULA 405 [WI]	Culture and Gastronomy I	
CULA 410	Culture and Gastronomy II	
CULA 415	Food Styling and Photography	
CULA 425	The Kitchen Garden	
CULA 426	The Kitchen Garden: Summer	
CULA 427	The Kitchen Garden: Fall	
HRM 315	Continental, Ethnic, and Regional Cuisine	

HRM 415	Fine Dining and Services	
Total Credits		24.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Minor in Exercise Science

About the Minor

The Minor in Exercise Science from the Health Sciences Department helps prepare students for graduate studies in Exercise Physiology, Kinesiology, Athletic Training, Physical Therapy and other health-related professions. In addition, the Minor provides undergraduates with the foundational knowledge, skills, and abilities for professional certifications offered by the American College of Sports Medicine, National Strength and Conditioning Association, and other agencies. These certifications are often required of graduates seeking employment in the fitness industry.

This is an undergraduate Minor available to Drexel students in good standing.

Foundational Courses

ANAT 103	Anatomy & Physiology III	5.0
	OR	
BIO 201 & BIO 202	Human Physiology I and Human Physiology Laboratory *	

Core Courses

HSCI 325	Exercise Physiology	4.0
HSCI 326	Applied Anatomy and Kinesiology	5.0
HSCI 425	Exercise Testing and Prescription	4.0

Electives

Select from the following		6.0
HSCI 410	Psychology of Physical Activity	
HSCI 415	Musculoskeletal Pathophysiology	
HSCI 490	Senior Research Project	
HSCI T480	Special Topics in Health Sciences	
NFS 100	Nutrition, Foods, and Health	
NFS 101	Introduction to Nutrition & Food	
NFS 325	Nutrition & Exercise Physiology	
Total Credits		24.0

*   If BIO 201 & BIO 202 combination, the total Foundational Course credits will be 6.0.

Minor in Food Science

About the Minor

The minor in food science is designed for students interested in applying the basic sciences to the world's largest industry. The minor should be especially attractive to students in chemistry, chemical engineering, nutrition, and biological sciences, as it provides a background for excellent employment and post-baccalaureate study opportunities in areas closely allied to their basic disciplines.

The minor consists of 25.0 credits. Interested students should consult with a culinary science faculty member to schedule courses appropriate for their background and goals.

Program Requirements

Required Courses

FDSC 154	Science of Food and Cooking	4.0
FDSC 270	Microbial Food Safety and Sanitation	4.0
FDSC 350	Experimental Foods: Product Development	3.0
FDSC 450	Food Microbiology	3.0
FDSC 451	Food Microbiology Laboratory	2.0
FDSC 456	Food Preservation Processes	3.0
FDSC 460	Food Chemistry	3.0
FDSC 461	Food Analysis	3.0
Total Credits		25.0

Minor in Food Studies

About the Minor

Food is central to our existence and is touched upon in a variety of disciplines at the university. This minor seeks to capture and help students navigate the breadth of course offerings that touch upon food systems. Because food systems can be studied through many different lenses, students can adapt this food studies minor to their program of study. For example, students interested in public health policy issues can create a minor of hands-on community-based culinary classes, public health, and nutrition classes. If a student is interested in food-related research and development, he or she might tailor the minor with business- or entrepreneurship-centered classes and practical experience in the Drexel Food Lab.

Program Requirements

Required Courses

CULA 115	Culinary Fundamentals	3.0
CULA 405 [WI]	Culture and Gastronomy I	3.0
FDSC 120	Food and the Senses	3.0

Food Studies Electives

Select a minimum of 15.0 credits from the list below:		15.0
CULA 125	Foundations of Professional Baking	
CULA 410	Culture and Gastronomy II	
CULA 412	Food Writing	
ENTP 250	Ideation	
ENTP 270	Social Entrepreneurship	
ENTP 440	Launch It!: Early Stage	
HRM 160	Laws of the Hospitality Industry	
HRM 315	Continental, Ethnic, and Regional Cuisine	

HRM 395	Economics of Tourism	
NFS 100 & NFS 101	Nutrition, Foods, and Health and Introduction to Nutrition & Food	
NFS 215	Nutritional Chemistry	
NFS 217	Nutrient Quality & Composition	
NFS 230	Intermediate Nutrition	
NFS 345	Foods and Nutrition of World Cultures	
NFS 391	Community Nutrition	
PBHL 101	Public Health 101	
PBHL 306	Introduction to Community Health	
PSCI 369	The Politics of Food	
Total Credits		24.0

Minor in Health Services Administration

About the Minor

The minor in health services administration is designed for students interested in preparing for careers in health services administration while pursing a major in another area. In addition, the curriculum can prepare students wishing to pursue graduate studies in health administration, business administration, public health, and law.

Required Courses

HSAD 210	Health-Care Ethics I	3.0
HSAD 310	Introduction to Health-Systems Administration	3.0
HSAD 334	Management of Health Services	3.0
Complete 1 of the following courses:		**3.0**
HSAD 330	Financial Management in Health Care	
HSAD 340	Leadership in Health Services Administration	
HSAD 345	Ethics in Health Care Management	
Health Services Administration (HSAD) electives *		
Complete 4 of the following courses:		12.0
HSAD 215	Physician Practice Management	
HSAD 308	The Affordable Care Act	
HSAD 309	Advanced Health-Care Ethics	
HSAD 312	Development of World Health Care	

HSAD 313	Evolution of Health Care in the United States	
HSAD 315	Interdisciplinary Health Services	
HSAD 316	Health Care across Cultures	
HSAD 317	Religious Views on Health Care	
HSAD 318	Health and Vulnerable Populations	
HSAD 319	Women and the Health Professions	
HSAD 320	Managed Health Care	
HSAD 321	Health-Care Human Resources	
HSAD 322	Health-Care Law	
HSAD 323	Introduction to Long-Term Care Administration	
HSAD 324	Health Technology and Ethical Responsibility	
HSAD 325	Issues in the Health Care System	
HSAD 326	Holism and Health Care	
HSAD 327	Partnerships in Health Care	
HSAD 328	Health Care for Diverse Groups	
HSAD 329	Health Care and the Media	
HSAD 330	Financial Management in Health Care	
HSAD 331 [WI]	Non-profits and Health Care	
HSAD 332 [WI]	Health-Care Marketing	
HSAD 336	Urban Health Care	
HSAD 337	Health Care/Quality Improvement	
HSAD 340	Leadership in Health Services Administration	
HSAD 341	Risk Management in Healthcare Organizations	
HSAD 342	Children and Health Care	
HSAD 343	Health and Illness in Film	
HSAD 345	Ethics in Health Care Management	
HSAD 346	Mental Illness in the Media and Arts	
HSAD 351	Ethical Issues in Reproduction	
HSAD 353	Public Health Ethics	
HSAD 475	The Supervised Health Services Administration Internship	
HSAD T180	Special Topics in Health Services Administration	
HSAD T280	Special Topics in Health Services Administration	
HSAD T380	Special Topics in Health Services Administration	
HSAD T480	Special Topics in Health Services Administration	
Total Credits		24.0

Minor in Nutrition

About the Minor

The minor in the nutrition is designed for students interested in enhancing their major with an application in human nutrition. The nutrition minor should be especially attractive to students in the premedical, biological, and behavioral neurological sciences, because it provides a background for enhanced employment and post-baccalaureate study opportunities in areas closely allied to their basic disciplines.

The minor consists of 25.0 credits. Interested students should consult with a faculty member within the Department of Nutrition Sciences to schedule courses appropriate for their background and goals.

Program Requirements

Required courses

NFS 200	Nutrition I: Principles of Nutrition	4.0
or NFS 230	Intermediate Nutrition	
NFS 203	Nutrition II: Nutrition in the Lifecycle	4.0
NFS 315	Nutrition in Chronic Disease	4.0
Select four of the following courses:		12.0-14.0
NFS 320	Pediatric Nutrition	
NFS 325	Nutrition & Exercise Physiology	

NFS 415	Advanced Nutrition I: Macronutrition	
NFS 416	Advanced Nutrition II: Micronutrients	
NFS 446	Perspectives in World Nutrition	
NFS 480	Special Studies in Nutrition and Food	
Total Credits		24.0-26.0

Minor in Psychiatric Rehabilitation

About the Minor

The minor in Psychiatric Rehabilitation provides students with an understanding of how people with serious mental illnesses learn skills and acquire resources that promote recovery and wellness. The curriculum covers a variety of evidence-based practices that support healthy living, learning, working, and socializing. This minor appeals to students in a wide range of Drexel majors, including psychology, criminology and justice studies, health services administration, sociology, health sciences, education, general humanities and social science, nutrition and foods, as well as other fields of study.

Academic Requirements

The minor requires completion of 24.0 credits, comprised of six required courses and two additional BACS undergraduate courses of the student's choosing. Students may elect to begin coursework in this minor at any point in their undergraduate education. It is strongly suggested that students pursuing this minor consult with faculty in the Behavioral Health Counseling (http://www.drexel.edu/cnhp/faculty/behavioral-health/) program for advice in selecting electives that will best meet their goals in this minor.

Required Courses

BACS 220	Counseling Theory and Practice	3.0
BACS 236 [WI]	Psychiatric Rehabilitation Principles and Practices	3.0
BACS 320	Crisis and Brief Intervention	3.0
BACS 325	Psychopharmacology for Counselors	3.0
BACS 414	Co-Occurring Disorders	3.0
BACS 420	Psychiatric Rehabilitation Competencies	3.0
Select any two additional undergraduate BACS Courses		6.0
Total Credits		24.0

Human Lactation

Certificate Level: Undergraduate
Admission Requirements: High School Diploma
Certificate Type: Certificate
Number of Credits to Completion: 18.0
Instructional Delivery: Campus
Calendar Type: Quarter
Expected Time to Completion: 18 months
Financial Aid Eligibility: Aid eligible
Classification of Instructional Program (CIP) Code: 51.0815
Standard Occupational Classification (SOC) Code: 31-9099

About the Program

Housed in the Department of Nutrition Sciences at Drexel University, the Human Lactation Certificate Program is designed to provide an opportunity for individuals interested in becoming Internationally Board Certified Lactation Consultants (IBCLCs) to obtain the required 90 hours of didactic coursework and 300 hours of supervised practice to meet eligibility through the International Board Certified Lactation Examiner's Pathway 2. The courses are designed for current Drexel students, practicing health care and public health professionals outside of Drexel, and others interested in entering the health professions. There is currently a strong global and national emphasis on increasing breastfeeding to promote health at the population level, prevent acute and chronic illness and decrease societal health care costs. The United States Surgeon General, the Centers for Disease Control and Prevention, Healthy People 2020, the Institute of Medicine, the Joint Commission, and many professional associations include breastfeeding as a key health strategy.

The certificate program consists of six, 3.0 credit courses in lactation; the first three courses are didactic, and the remaining three courses are supervised practice. The didactic coursework is offered in the classroom and online setting. The supervised practice is offered at area hospitals and outpatient clinics with whom the College of Nursing and Health Professions, Department of Nutrition Sciences is affiliated, as well as a variety of community-based lactation education/support programs.

Students who wish to become IBCLCs must complete all six courses. To be eligible to take the certifying exam given by the International Board of Lactation Consultant Examiners they must have also completed course work including anatomy and physiology, biology, child growth and development, nutrition, and psychology, which may be taken at Drexel or other institutions.

Admission Requirements

Applicants must have a minimum of a high school diploma. The International Board of Lactation Consultant Examiners requires education in 14 health science subjects in addition to education provided in human lactation and breastfeeding in the Certificate Program. At least four of the first eight health sciences courses listed below *must* be completed prior to enrolling in the Certificate Program; all of the remaining health sciences courses *must* be completed before enrolling in first supervised practice course.

A minimum of one quarter, term or semester of each of the following eight academic subjects must be completed at an accredited college or university:

- Biology
- Human Anatomy
- Human Physiology
- Infant and Child Growth and Development
- Introduction to Clinical Research
- Nutrition
- Psychology, OR Counseling Skills, OR Communication Skills
- Sociology, OR Cultural Sensitivity, OR Cultural Anthropology

The remaining six subjects may be completed at an accredited college or university, OR through continuing education courses:

- Basic Life Support*
- Medical Documentation
- Medical Terminology
- Occupational Safety and Security for Health Professionals*
- Professional Ethics for Health Professionals
- Universal Safety Precautions and Infection Control*

*These subjects will be covered during the Compliance process prior to beginning supervised practice, and *do not* need to be completed before enrolling in the program.

A detailed description of acceptable course work to fulfill these requirements is available in the International Board of Lactation Consultant's *Health Sciences Education Guide*.

Transcripts:

- Official transcripts demonstrating completion of health science requirements must be sent directly to Drexel from all the colleges/universities that you have attended. Transcripts must be submitted in a sealed envelope with the college/university seal over the flap or delivered electronically via secure delivery directly to the Program Director. Please note that transcripts are required regardless of number of credits taken or if the credits were transferred to another college/university. An admission decision may be delayed if you do not send transcripts from all colleges/universities attended.
- Transcripts must show course-by-course grades and degree conferrals. If your college/university issues only one transcript for life, you are required to have a course-by-course evaluation completed by an approved transcript evaluation agency.
- Please see the Drexel University Supporting Documents Submission Guide (http://online.drexel.edu/support/supporting-documents.aspx) for more information.

Requirements

NFS 205	Introduction to Human Lactation	3.0
NFS 305	Clinical Issues in Human Lactation	3.0
NFS 405	Public Policy of Breastfeeding	3.0
NFS 485	Lactation Supervised Practice (Taken 3 times)	9.0
Total Credits		18.0

A minimum grade of C is required for NFS 205, NFS 305, and NFS 405. NFS 485 is pass/fail.

Sample Plan of Study

First Year

Term 1		**Credits**
NFS 205	Introduction to Human Lactation	3.0
	Term Credits	3.0
Term 2		
NFS 305	Clinical Issues in Human Lactation	3.0
	Term Credits	3.0
Term 3		
NFS 405	Public Policy of Breastfeeding	3.0
	Term Credits	3.0

Second Year

Term 4		
NFS 485	Lactation Supervised Practice	3.0
	Term Credits	3.0
Term 5		
NFS 485	Lactation Supervised Practice	3.0
	Term Credits	3.0
Term 6		

NFS 485	Lactation Supervised Practice	3.0
	Term Credits	3.0

Total Credit: 18.0

Certificate in Medical Billing and Coding

Certificate Level: Undergraduate
Admission Requirements: High school transcript minimum
Certificate Type: Certificate
Number of Credits to Completion: 30.0
Instructional Delivery: Online
Calendar Type: Quarter
Expected Time to Completion: 1 year
Financial Aid Eligibility: Not aid eligible
Classification of Instructional Program (CIP) Code: 51.0713
Standard Occupational Classification (SOC) Code: 29-2071

About the Program

This online certificate program is designed for those who want to begin medical billing, coding, and medical record auditing careers or prepare for certification exams in these areas. Students will learn principles of medical billing and coding related to the three main coding manuals: CPT, ICD-10-CM, ICD-10-PCS and HCPCS. The curriculum covers principles of medical billing and coding for in-patient and outpatient hospitals.

Program Requirements

Required Courses

ANAT 202	Sectional Anatomy	3.0
HSCI 125	Medical Terminology	3.0
DMBC 201	Medical Billing I	3.0
DMBC 202	Medical Billing II	3.0
DMBC 250	Medical Billing Software	3.0
DMBC 301	Physician-Based Medical Coding I	3.0
DMBC 302	Physician-Based Medical Coding II	3.0
DMBC 303	Hospital-Based Medical Coding I	3.0
DMBC 304	Hospital-Based Medical Coding II	3.0
Choose Either:		
DMBC 350	Physician-Based Chart Auditing	3.0
or DMBC 360	Hospital-Based Case Studies	
Total Credits		30.0

Sample Plan of Study

Term 1		**Credits**
ANAT 202	Sectional Anatomy	3.0
HSCI 125	Medical Terminology	3.0
	Term Credits	6.0

The Dornsife School of Public Health

About the School

The Dornsife School of Public Health (http://drexel.edu/dornsife/) at Drexel University provides education, conducts research, and partners with communities and organizations to improve the health of populations.

Founded on the principle of health as a human right, our school is especially committed to improving health in cities, eliminating health disparities, and promoting health in all policies.

Key to the school's mission is active engagement with the world of public health practice, with communities, and with a range of policies and sectors within and outside the health care system relevant to health.

School educational programs combine rigorous training with hands-on practical experiences. Students benefit from engagement with a broad set of community partnerships and research collaborations. Graduates acquire the knowledge, skills and perspective necessary to make a difference in the health of communities in the United States and worldwide.

Majors

- Public Health (BS) (p. 343)

Accelerated Degree

- Public Health BS/MPH (p. 346)

Minor

- Global Public Health (p. 348)
- Public Health (p. 349)

Dornsife School of Public Health Faculty

Joseph Amon, PhD, MSPH *(Uniformed Services University of the Health Sciences) Director of the Office of Global Health.* Clinical Professor. Department of Community Health and Prevention. Global health; health and human rights; political epidemiology; ethics; mixed methods; health policy and advocacy; HIV/TB; monitoring and evaluation.

Amy Auchincloss, PhD, MPH *(University of Michigan).* Associate Professor. Department of Epidemiology and Biostatistics. Environmental determinants of health and the health effects of air pollution; contribution of resources in residential environments to health behaviors, obesity, diabetes and cardiovascular disease; the use of spatial analysis methods and agent-based mode

Sharrelle Barber, ScD, MPH *(Harvard University).* Assistant Research Professor. Department of Epidemiology and Biostatistics. Racism and health inequities, social epidemiology cardiovascular disease epidemiology, urban health, global health.

Scarlett Bellamy, ScD *(Harvard University).* Professor. Department of Epidemiology and Biostatistics. Clinical Trials Data Analysis Methods Health Disparities Infectious Disease Mental health and Behavioral health Reproductive or Sexual Health.

Zekarias Berhane, PhD *(University of Pittsburgh).* Assistant Research Professor. Department of Epidemiology and Biostatistics. Modeling time-to-event data with single and multiple outcomes, mixed effect models and regression diagnostics.

Usama Bilal, PhD, MPH, MD *(Johns Hopkins University).* Assistant Professor. Department of Epidemiology and Biostatistics. Urban health; macrosocial determinants of chronic diseases; health inequalities; food environments and nutrition; epidemiologic methods.

Sandra Bloom, MD *(Temple University School of Medicine).* Associate Professor. Department of Health Management and Policy. Psychological trauma and organizational stress.

Sherry Brandt-Rauf, MPhil, JD *(Columbia University).* Associate Teaching Professor. Department of Environmental and Occupational Health. Health policy, occupational health, environmental exposures, health disparities, public health law.

Jennifer Breaux, DrPh, MPH, CHES *(Drexel University) Director of Undergraduate Education.* Assistant Professor. Department of Community Health and Prevention. Maternal and child health, community health, human rights.

Darryl Brown, PhD *(Johns Hopkins University) Director of HMP Doctoral Programs..* Assistant Teaching Professor. Department of Health Management and Policy. Health services research and planning; health inequality, patient reported outcomes, applied health economics.

James W. Buehler, MD *(University of California, San Francisco) Director, MPH Program.* Clinical Professor. Department of Health Management and Policy. Public health capacity and practice, public health and healthcare interface, urban health.

Igor Burstyn, PhD *(Utrecht University).* Associate Professor. Department of of Environmental and Occupational Health. Occupational and environmental epidemiology, industrial hygiene, endocrine disruptors, environmental exposures, biomarkers, air quality, gene-environmental interaction, maternal and child health, Bayesian statistics, statistical modeling, etiology of autism.

Amy Carroll-Scott, PhD, MPH *(University of California at Los Angeles).* Assistant Professor. Department of Community Health and Prevention. The social and contextual determinants of persistent health disparities and the application of social science and community-based participatory research methods to understanding and eliminating such disparities.

Esther Chernak, MD, MPH, FACP *(UMDNJ-Robert Wood Johnson Medical School) Director of the Center for Public Health Readiness and Communication; Director of Joint Degree Programs.* Associate Clinical Professor. Department of Environmental and Occupational Health. Drexel University College of Medicine; Infectious diseases, public health emergency preparedness, medicine and public health, public health practice, crisis and emergency risk communication.

Mariana Chilton, PhD, MPH *(University of Pennsylvania) Director, Center for Hunger-Free Communities.* Professor. Department of Health Management and Policy. Nutrition, housing and health; chronic diseases; human rights, chronic diseases, community health, human rights and hunger.

Jane Clougherty, MSc, ScD *(Harvard University).* Associate Professor. Department of Environmental and Occupational Health. Social

susceptibility to environmental pollutants; air pollution exposure science; community violence; urban health.

Anneclaire De Roos, PhD, MPH *(University of North Carolina at Chapel Hill)*. Associate Professor. Department of Environmental and Occupational Health. Environmental and occupational epidemiology, pesticides, persistent pollutants, drinking water quality, greenspace in cities, extreme weather risk assessment.

Ana Diez Roux, MD, PhD, MPH *(Johns Hopkins University) Dean, Dornsife School of Public Health.* Distinguished Professor. Department of Epidemiology and Biostatistics. Social determinants of health; neighborhoods and health; psychosocial factors; air pollution, cardiovascular disease epidemiology; multilevel and systems methods; urban health and health in Latin America.

Nancy Epstein, MPH, MAHL *(University of North Carolina at Chapel Hill)*. Professor. Department of Community Health and Prevention. Community organizing and community engagement strategies; arts and community health; religion, spirituality and health; health policy and advocacy; organizational and group dynamics; behavioral health; oral health; evaluation of community health programs.

Alison A. Evans, ScD *(Harvard University)*. Associate Professor. Department of Epidemiology and Biostatistics. Epidemiology of infectious diseases and cancer; cohort studies; minority and immigrant health; chronic viral infections; hepatitis b; eliminantion of viral hepatitis; immunization; perinatal transmission.

Alex Ezeh, PhD *(University of Pennsylvania)*. Dornsife Professor. Department of Community Health and Prevention. Global/International Health; Reproductive and Sexual Health; Urban Health.

Jerry Fagliano, MPH, PhD *(Johns Hopkins University) Chair.* Associate Clinical Professor. Department of Environmental and Occupational Health. Children's health and environmental exposures; health impacts of climate change; inequities in environmental exposure and disease; spatial distribution and clustering of disease.

Robert I. Field, PhD, JD, MPH *(Columbia University) Director of the JD-Master of Public Health Program.* . Professor. Department of Health Management and Policy. Health law; public health law; health system structure; ethics of vaccines; public policy and legal aspects of health reform; genetic privacy.

Janet Fleetwood, PhD *(University of Southern California)*. Professor. Department of Community Health and Prevention. Bioethics, Strategic Planning, Social Justice & Equity.

Arthur L. Frank, MD, PhD *(Mount Sinai School of Medicine) Chair Emeritus.* Professor. Department of Environmental and Occupational Health. Environmental and occupational health, agricultural safety and health, pneumoconiosis, occupational toxicology, environmental pollution.

Dennis Gallagher, MA, MPA *(University of Pittsburgh)*. Associate Teaching Professor. Department of Health Management and Policy. Health department structure and financing; health policy and law; Medicare/Medicaid and public health infrastructure.

Marla Gold, MD *(New Jersey Medical School) Dean Emerita.* Professor. Department of Health Management and Policy. Design of HIV/AIDS care systems, treatment protocols, resource utilization, and epidemiology; CQI, managed care and systems of health care, health administration, behavioral health care and substance abuse treatment systems.

Neil Goldstein, PhD, MBI *(Drexel University)*. Assistant Research Professor. Department of Epidemiology and Biostatistics. Data Analysis Methods, eHealth or mHealth, Infectious Disease, Maternal and Child Health, Reproductive or Sexual health, Spatial Analysis or GIS, Statistical Modeling, Vaccines and vaccinations, Electronic medical records/informatics, Translational epidemiology.

Edward J. Gracely, PhD *(Temple University) Joint Appointment in Drexel University College of Medicine.* Associate Professor. Department of Epidemiology and Biostatistics. Statistics, experimental design/research methods and statistical analysis, clinical trials.

Ali Groves, PhD, MHS *(University of North Carolina)*. Assistant Professor. Department of Community Health and Prevention. Reproductive or sexual health; maternal and child health; global health; data analysis methods.

Irene Headen, PhD *(University of California, Berkeley)*. Assistant Professor. Community Engaged Research, Health Disparities Health and Place, Maternal and Child Health Mixed Methods Research, Social Determinants of Racial/Ethnic Inequities in Maternal Health, Spatial Analysis or GIS,Urban Health

Tom Hipper, MSPH, MA *(Johns Hopkins Bloomberg School of Public Health)*. Assistant Professor. Department of Environmental and Occupational Health. Crisis and risk communication in public health; mental health of first responders

Jana Hirsch, MES, PhD *(University of Michigan)*. Assistant Research Professor. Department of Epidemiology and Biostatistics. Health and place, built environment, health disparities, behavioral health, spatial analysis, GIS, urban health, physical activity, active aging and age-friendly neighborhoods, gentrification, neighborhood change.

Mary E. Hovinga, PhD, MPH *(University of Michigan)*. Associate Professor. Department of Epidemiology and Biostatistics. Cancer, cognitive disabilities; PCBs and DDT, lead exposure; neurological disorders, environmental hazards, epidemiologic study design.

Tran Huynh, PhD, MPH, CIH *(University of Minnesota)*. Assistant Professor. Department of Environmental and Occupational Health. Industrial hygiene, immigrant health, immigrant health, occupational exposure assessment and epidemiology, occupational health disparities, nail salons.

Jessie Kemmick Pintor, PhD, MPH *(University of Minnesota)*. Assistant Professor. Department of Health Management and Policy. Community based participatory research; immigrant health; health disparities; health services research; health policy; maternal & child health; mixed methods; immigration policy.

Ann Klassen, PhD *(Johns Hopkins University)*. Professor. Department of Community Health and Prevention. Cancer and chronic disease disparities, urban health, minority, immigrant and global health, tobacco control, nutrition, health communication, qualitative and mixed methods, place-based and spatial analysis.

Jennifer Kolker, MPH *(University of Michigan) Associate Dean for Public Health Practice; Director of Executive MPH Program.* Associate Clinical Professor. Department of Health Management and Policy. Public health policy and practice, workforce training, safety net programs, urban health issues; health department infrastructure and financing.

Shiriki Kumanyika, PhD, MS, MPH *(Cornell University)*. Research Professor. Department of Community Health and Prevention. Solutions to obesity and diet-related diseases in black children and adults, Ethnic

disparities in obesity in the US and other high-income countries, "Culture of health" approaches in black communities, Assessment of food environments, Environmental influences on lifestyle changes, Targeted marketing of unhealthy foods and beverages, Food and nutrition policy, Evidence-based public health, Social determinants of health and health equity, Systems science applications in public health.

Brent Langellier, PhD, MA *(University of California, Los Angelos)*. Assistant Professor. Department of Health Management and Policy. Health and health care disparities, Latino health, complex systems, quantitative methods, GIS.

Stephen E. Lankenau, PhD *(University of Maryland) Associate Dean for Research*. Professor. Department of Community Health and Prevention. HIV/AIDS, overdose prevention, prescription drug misuse, medical marijuana, injection drug use, high risk youth, homelessness.

Felice Le-Scherban, PhD, MPH *(University of Michigan)*. Assistant Professor. Department of Epidemiology and Biostatistics. Life course approaches to socioeconomic, racial, and ethnic health disparities; social determinants of health among immigrants; causal links between education and health; analytic methods in social epidemiology.

Michael LeVasseur, PhD *(Drexel University)*. Visiting Assistant Professor. Data Analysis Methods, Health Disparities, Infectious Disease,Reproductive or Sexual Health

Brian K. Lee, PhD *(Johns Hopkins University)*. Associate Professor. Department of Epidemiology and Biostatistics. Environmental determinants and epidemiology of autism spectrum disorders; perinatal epidemiology; child and material health; neuropsychiatric epidemiology, causal inference; machine learning.

Nora L. Lee, PhD *(Johns Hopkins University)*. Assistant Research Professor. Department of Epidemiology and Biostatistics. Perinatal epidemiology; preterm birth; infant mortality; autism spectrum disorders; maternal and child health; racial and ethnic health disparities; secondhand smoke; tobacco control; environmental exposures.

Longjian Liu, MD, PhD, MSc, FAHA *(The University of Hong Kong)*. Associate Professor. Department of Epidemiology and Biostatistics. Cardiovascular disease and diabetes epidemiology; Pharmacoepidemiology; Burden of disease and health disparity; Hospital EHRs data for disease risk surveillance and prediction; Air pollution and urban health.

Gina Lovasi, PhD, MPH *(University of Washington) Co-Director of the Urban Health Collaborative*. Dornsife Associate Professor. Department of Epidemiology and Biostatistics. Cardiovascular disease; data analysis methods; health and place or build environment; health disparities; spatial analysis or GIS; urban health; urban trees and greenspace; local retail; transportation, infrastructure and policies.

Ana Martinez-Donate, PhD *(Universidad Autonoma de Madrid, Spain)*. Associate Professor. Department of Community Health and Prevention. HIV prevention; tobacco control; obesity prevention; access to health services; Latino immigrants and other disadvantaged populations; development and evaluation of community-based interventions.

Philip Massey, PhD, MPH *(University of California, Los Angeles)*. Assistant Professor. Department of Community Health and Prevention. Health communication, health literacy, mHealth, social media and health, adolescent health, global health, program evaluation, quantitative methods.

Leslie McClure, PhD, MPH *(University of Michigan) Chair*. Professor. Department of Epidemiology and Biostatistics. Design, management and analysis of randomized clinical trials; issues of multiplicity in clinical trials; environmental risk factors for cardiovascular disease and stroke; geographic and racial disparities in cardiovascular disease and stroke.

Yvonne Michael, ScD *(Harvard University)*. Associate Professor. Department of Epidemiology and Biostatistics. Epidemiology of aging, social epidemiology, women's health, community-based participatory research; health disparities.

Jana M. Mossey, PhD, MPH, MSN *(University of North Carolina at Chapel Hill)*. Professor Emerita. Department of Epidemiology and Biostatistics. Epidemiological methods; research design and methods including observational and clinical trials research; psychosocial aspects of health; epidemiology of aging and pain, psychiatric epidemiology including major depression; sub-threshold and minor depression.

Alex Ortega, PhD *(University of Michigan) Chair; Director, Center for Population Health and Community Impact*. Professor. Department of Health Management and Policy. Epidemiological methods in health services research; health needs of Latino children and families; health disparities intervention research; youth engagement in community interventions.

Sungchul Park, PhD, MPH *(University of Washington)*. Assistant Professor. Department of Health Management and Policy. Health economics; health policy; health services research; health disparities; Medicare; managed care; statistical modelling; and data analysis methods.

Jonathan Purtle, DRPH, MPH, MsC *(Drexel University)*. Assistant Professor. Department of Health Management and Policy. Mental health policy and services research; policy dissemination and implementation research; traumatic stress in urban areas; trauma-informed system design; violence prevention; political institutions and health.

Harrison Quick, PhD *(University of Minnesota)*. Assistant Professor. Department of Epidemiology and Biostatistics. Bayesian inference; spatial and spatiotemporal data analysis; statistical disclosure limitation.

Alex Quistberg, PhD, MPH *(University of Washington)*. Assistant Research Professor. Department of Environmental and Occupational Health. Data analysis methods, global health or international health, health and place or built environment, health disparities, spatial analysis or GIS, urban health, intentional/violent injury and trauma, unintentional injury and trauma.

John A. Rich, MD, MPH *(Duke University) Director, Center for Nonviolence and Social Justice*. Professor. Department of Health Management and Policy. Health disparities; men's health; violence; urban health issues; primary care.

Lucy Robinson, PhD *(Columbia University)*. Assistant Professor. Department of Epidemiology and Biostatistics. Statistics, modeling and analysis of neuroimaging and CT image data, network modeling, spatio-temporal data, computational statistics, and functional data analysis.

Alexis Roth, PhD, MPH *(Indiana University)*. Assistant Professor. Department of Community Health and Prevention. HIV/AIDS; sexually transmitted infections; individual, dyadic, and structural determinants of health; technology and health; mixed methods research; community-engagement and participatory research.

Brisa Sanchez, PhD *(Harvard University)*. Dornsife Endowed Professor. Department of Epidemiology and Biostatistics. Statistical methods development, big data, data integration for environment studies, health disparities, environment exposure, built environment.

Ayden Scheim, PhD *(Western University, Canada)*. Assistant Professor. Department of Epidemiology and Biostatistics. Social epidemiology, health disparities, global health, HIV/AIDS, LGBT health, injection drug use, research methods for small and hidden populations, community-based participatory research.

Ayden Scheim, PhD *(Western Universtiy)*. Assistant Professor. Global Health or International health, Infectious Disease, Substance Use, Community Based Participatory Research,Social Epidemiology, Survey Research Methods, HIV/AIDS, LGBT Health.

Leah Schinasi, PhD *(University of North Carolina)*. Assistant Research Professor. Department of Environmental and Occupational Health. Health and place or built environment, occupational health, urban health, environmental health, environmental justice, environmental epidemiology, climate change.

Randall L. Sell, ScD *(Harvard University)*. Professor. Department of Community Health and Prevention. Demography; Defining and measuring sexual orientations, gender and sex; Sampling sexual and gender minorities for public health research.

Suruchi Sood, PhD *(University of New Mexico)*. Associate Professor. Department of Community Health and Prevention. Human rights and health; nutrition; poverty; health disparities; innovation diffusion; HIV/AIDS; violence; community-based participatory research; application of statistics to behavioral, biological and medical sciences; adolescent health; maternal and child health; international health; program evaluation; women's health; mixed methods; qualitative methods.

Jim Stimpson, PhD *(University of Nebraska) Associate Dean for Academic Affairs*. Professor. Department of Health Management and Policy. Health policy; Health services research; Health disparities; Immigrant health; Health and place or built environment; Urban health; Medical sociology.

Thersa Sweet, PhD, MPH *(University of Michigan)*. Associate Teaching Professor. Department of Epidemiology and Biostatistics. Molecular and infectious disease epidemiology, including virology, cancer biology, hospital infection control and prevention; epidemiologic studies involving HIV risk in sexual minorities.

Loni Philip Tabb, PhD *(Harvard University)*. Associate Professor. Department of Epidemiology and Biostatistics. Methods for categorical, missing and hierarchical data; spatial epidemiology/statistics, Bayesian inference, and disease mapping.

Jennifer A. Taylor, PhD, MPH, CPPH *(Johns Hopkins University)*. Associate Professor. Department of Environmental and Occupational Health. Injury prevention, patient safety, healthcare quality, organizational culture, occupational safety, data policy and surveillance, first responders, healthcare workforce.

Renee M. Turchi, MD, MPH *(Johns Hopkins University) Joint appointment in the Drexel University College of Medicine*. Associate Professor. Department of Community Health and Prevention. Medical Home; children and youth with special health care needs; care coordination; cultural competency and access to care; maternal and child health policy, teaching, community partners.

Augusta M. Villanueva, PhD *(University of Texas at Austin)*. Associate Professor. Department of Community Health and Prevention. Role of race, culture, and ethnicity on health status/outcomes; community-based participatory research; immigrant communities; academic service-learning.

Seth Welles, PhD, ScD *(Harvard University)*. Professor. Department of Epidemiology and Biostatistics. Psychosocial risk for HIV infection and STIs among sexual and gender minority adults and adolescents; correction of misclassification of sexuality and its impact on measurement of HIV/STI risk; agent-based model simulation of HIV and STI incidence among persons with substantial risk for acquiring infection; impact of life course sexual trauma and violence on mental health conditions, substance abuse, and HIV risk; HIV natural history, pathogenesis and clinical trials.

Michael Yudell, MPH, PhD *(Columbia University) Chair, Department of Community Health*. Associate Professor. Department of Community Health and Prevention. Public health ethics; history of public health; race and racism; autism.

Issa Zakeri, PhD *(University of Illinois and Urbana-Champaign)*. Professor. Department of Epidemiology and Biostatistics. Biostatistics, functional data analysis, longitudinal data analysis, multivariate analysis, statistical learning.

Public Health

Major: Public Health
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 181.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 51.2201
Standard Occupational Classification (SOC) code: 11-9111

About the Program

Public health is the science of protecting and improving the health and well-being of communities. Where clinical professionals such as doctors and nurses focus on treating individuals after they become sick or are injured, public health professional are concerned with the health of entire populations, attempting to prevent problems from occurring or recurring through education, policy development, advocacy, service and research.

Reflecting the interdisciplinary approach of the Dornsife School of Public Health (https://drexel.edu/dornsife/), students in the major will take courses originating from the various public health core disciplines, which include epidemiology, community health and prevention, environmental and occupational health, and health management and policy. The diversity in course offerings provides the students with the general foundations of each discipline within public health. Student learning is enhanced by faculty expertise from a wide array of backgrounds ranging from epidemiology, community health, global health, sociology, psychology, medicine, health policy, health economics, industrial hygiene and anthropology in addition to many more. As the students progress through the major, they will gain more breath and depth in the specific discipline of their choosing through the co-op experience as well as the capstone courses in their senior year.

The Dornsife School of Public Health is dedicated to the integration of social justice and human rights in academic public health and being a model for interdisciplinary collaboration and civic engagement.

Additionally, a commitment to global engagement is core to the School's mission. The Global Public Health Initiative was created to provide opportunities for all public health student to gain rich and meaningful experiences working on health issues that transcend national boundaries or that may be influenced by circumstances or experiences in other countries.

Upon completion of the degree, students will be better equipped to complete graduate education in public health or health sciences. Students will have acquired skills that could be translated into the workplace (city, state or local government, non for profit, etc.) or other post baccalaureate educational settings such as an MPH, JD or MD.

Goals and Objectives

By the conclusion of the major, all students will be able to:

- Illustrate the interdisciplinary nature of public health in disease prevention and health promotion on both individuals and populations.
- Recognize the interconnectedness between physical and natural sciences and how each address population-based health challenges.
- Illustrate the fundamental relationship between health and human rights and the role of social justice and ethics.
- Highlight the important role that epidemiology and surveillance play in shaping and protecting the health of populations.
- Recognize the importance of historical context regarding public health milestones as they shape policies and programs.
- Obtain a greater understanding of the role of culture and values and how they influence relationships between social determinants of health and the built environment.
- Identify and address population health challenges through the various public health concentrations.
- Illustrate the overarching role that the social determinants of health have in promoting or hindering health.
- Acquire a working knowledge of the US healthcare and healthcare delivery system.

Additional Information

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

General Education Requirements

CIVC 101	Introduction to Civic Engagement	1.0
COM 230	Techniques of Speaking	3.0
COM 320 [WI]	Science Writing	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
PBHL 101	Public Health 101	3.0
UNIV PH101	The Drexel Experience	1.0
Students must select one of the following math sequences:		12.0
MATH 101 & MATH 102 & MATH 239	Introduction to Analysis I and Introduction to Analysis II and Mathematics for the Life Sciences	
Or		
MATH 121 & MATH 122 & MATH 123	Calculus I and Calculus II and Calculus III	
Physical and Life Sciences Requirements		**16.0**
Students must select one of the following biology sequences:		
BIO 107 & BIO 108 & BIO 109 & BIO 110	Cells, Genetics & Physiology and Cells, Genetics and Physiology Laboratory and Biological Diversity, Ecology & Evolution and Biological Diversity, Ecology and Evolution Laboratory	
Or		
BIO 122 & BIO 124 & BIO 126	Cells and Genetics and Evolution & Organismal Diversity and Physiology and Ecology	

*Please note that student who take the BIO 122, BIO 124, and BIO 126 sequence will be required to take fewer free electives.

Students must select one of the following chemistry sequences:		
CHEM 111 & CHEM 112	General Chemistry I and General Chemistry II	
Or		
CHEM 101 & CHEM 102	General Chemistry I and General Chemistry II	
Social Science Requirements		
PSY 101	General Psychology I	3.0
SOC 101	Introduction to Sociology	3.0
Social Science Electives:		**37.0**
ANTH 240	Urban Anthropology	
ANTH 250	Anthropology of Immigration	
ANTH 370	Ethnographic Methods	
ECON 201	Principles of Microeconomics	
ECON 202	Principles of Macroeconomics	
ECON 240	Economics of Health Care Systems	
ENSS 244	Sociology of the Environment	
ENVE 455	Geographic Information Systems	
ENVS 341	Equatorial Guinea: Society & Environment	
HIST 222	History of Work & Workers in America	
HRMT 323	Principles of Human Resource Administration	
HSAD 210	Health-Care Ethics I	
MIS 200	Management Information Systems	
ORGB 300 [WI]	Organizational Behavior	
PBHL 305	Women and Children: Health & Society	
PBHL 307	Injury Prevention and Control	
PBHL 310	Burden of Disease	
PBHL 316	Drugs, Society, and Public Health	
PBHL 318	Violence and Trauma in Public Health	
PBHL 333	Health Inequality	
PHIL 321	Biomedical Ethics	
PSCI 353	International Human Rights	
PSY 120	Developmental Psychology	
PSY 240 [WI]	Abnormal Psychology	
PSY 250 [WI]	Industrial Psychology	
PSY 368	Psychology - Inequity & Injustice	
SOC 115	Social Problems	
SOC 210	Race, Ethnicity and Social Inequality	
SOC 235	Sociology of Health and Illness	
WGST 275	Women's Health and Human Rights	

Public Heath Core Course Requirements

PBHL 301	Epidemiology in Public Health	3.0
PBHL 302	Introduction to the History of Public Health	3.0
PBHL 303	Overview of Issues in Global Health	3.0
PBHL 304	Introduction to Health & Human Rights	3.0
PBHL 308	The U.S. Public Health System	3.0
PBHL 314	Environmental and Occupational Health	3.0

Interdisciplinary Public Health Requirements

Select 1 course from each PH Department - CHP, EOH, EPI, and HMP	12.0
Select 12 additional PH course credits	12.0

Public Health Capstone Experience

PBHL 497	Capstone Experience I	3.0
PBHL 498	Capstone Experience II	3.0
PBHL 499	Capstone Experience III	3.0
Free Electives		**39.0**
Total Credits		181.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Term 1

		Credits
BIO 107	Cells, Genetics & Physiology	3.0
BIO 108	Cells, Genetics and Physiology Laboratory	1.0
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research / English Composition I	3.0
MATH 101 or 121	Introduction to Analysis I / Calculus I	4.0
PBHL 101	Public Health 101	3.0
UNIV PH101	The Drexel Experience	1.0
	Term Credits	15.0

Term 2

BIO 109	Biological Diversity, Ecology & Evolution	3.0
BIO 110	Biological Diversity, Ecology and Evolution Laboratory	1.0
CIVC 101	Introduction to Civic Engagement	1.0
ENGL 102 or 112	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing / English Composition II	3.0
MATH 102 or 122	Introduction to Analysis II / Calculus II	4.0
PSY 101	General Psychology I	3.0
	Term Credits	15.0

Term 3

ENGL 103 or 113	Composition and Rhetoric III: Themes and Genres / English Composition III	3.0
MATH 239 or 123	Mathematics for the Life Sciences / Calculus III	4.0
SOC 101	Introduction to Sociology	3.0
Free electives		6.0
	Term Credits	16.0

Term 4

CHEM 111	General Chemistry I	4.0
PBHL 303	Overview of Issues in Global Health	3.0
Interdisciplinary Public Health Requirement		3.0
Social Science electives		6.0
	Term Credits	16.0

Term 5

CHEM 112	General Chemistry II	4.0
PBHL 301	Epidemiology in Public Health	3.0
PBHL 302	Introduction to the History of Public Health	3.0
Interdisciplinary Public Health Requirement		6.0
	Term Credits	16.0

Term 6

COM 230	Techniques of Speaking	3.0
PBHL 304	Introduction to Health & Human Rights	3.0
PBHL 314	Environmental and Occupational Health	3.0
Free elective		6.0
	Term Credits	15.0

Term 7

Free elective	3.0
Social Science electives	7.0
Interdisciplinary Public Health Requirement	6.0
Term Credits	16.0

Term 8

PBHL 308	The U.S. Public Health System	3.0
Free elective		3.0
Interdisciplinary Public Health Requirement		3.0
Social Science electives		6.0
	Term Credits	15.0

Term 9

COM 320 [WI]	Science Writing	3.0
Interdisciplinary Public Health Requirement		3.0
Social Science electives		6.0
	Term Credits	12.0

Term 10

PBHL 497	Capstone Experience I	3.0
Social Science electives		6.0
Free electives		6.0
	Term Credits	15.0

Term 11

PBHL 498	Capstone Experience II	3.0
Social Science electives		6.0
Free electives		6.0
	Term Credits	15.0

Term 12

PBHL 499	Capstone Experience III	3.0
Interdisciplinary Public Health Requirement		3.0

Free electives		9.0
Term Credits		15.0

Total Credit: 181.0

Accelerated Public Health BS/MPH

Major: Public Health
Degree Awarded: Bachelor of Science (BS) and Master of Public Health (MPH)
Calendar Type: Quarter
Total Credit Hours: 237
Co-op Options: One Co-op (Five years)
Classification of Instructional Programs (CIP) code: 51.2201
Standard Occupational Classification (SOC) code: 11-9111; 21-1091, 21-1094, 25-1071

About the Program

The Dornsife School of Public Health offers an accelerated dual degree option with its undergraduate Public Health and Master of Public Health degrees. Participants can earn both a BS degree in Public Health and a Master of Public Health (MPH) degree in five years.

In this accelerated dual degree program, students participate in the undergraduate program for four full years (including one co-operative experience). After two years of undergraduate study students begin their graduate studies in the Master of Public Health program. The third and fourth years are a mix of undergraduate and graduate courses. After the successful completion of their fourth year, students receive their BS. When students successfully complete the remainder of their graduate studies (typically one additional year/ three graduate quarters), they will receive the MPH degree.

Students admitted to the accelerated, dual degree program apply to the graduate Master of Public Health Program during their junior year. Those admitted students must verify their intent to continue in the program with their advisor by the end of the spring term of year two.

Matriculated (continuing) students seeking admissions to the Dornsife School of Public Health BS/MPH accelerated program must verify their intent to participate in the program by the start of the fall term in their sophomore year. All students then follow the same application procedures as other applicants, including being interviewed by the graduate faculty. (Any student who does not meet the entrance requirements of the graduate program will be able to complete the fourth year of the Public Health undergraduate program and receive a BS degree.)

Students in the Master of Public Health program complete 56.0 graduate quarter credits to meet the requirements of the master's program.

Additional Information

For more information about this program, please contact:

Erin Durkin, M.S.
Senior Academic Advisor
eed57@drexel.edu
267-359-6015

Admission Requirements

- Be currently enrolled in the 4 year, 1 COOP program for Undergraduate Public Health.
- Maintain a minimum overall GPA in line with the auto admit criteria for the MPH program.
- Ability to simultaneously take undergraduate and MPH courses during junior and senior year.
- Complete the prerequisite courses necessary for admission into the MPH program with no lower than a "C" grade.
- Obtain one written recommendation from a faculty member and one written recommendation from an advisor, supervisor or mentor.
- Complete the online SOPHAS application to the MPH program at the Dornsife School of Public Health in junior year.

Degree Requirements

General Education Requirements		
CIVC 101	Introduction to Civic Engagement	1.0

Minor in Global Public Health

About the Minor

The Global Health minor is intended to complement any academic major offered at Drexel and to provide students with basic knowledge about global public health as well as the necessary skills and experience to begin to build their own unique global health career.

The minor will be open to all undergraduate students in all schools and colleges, and is designed around three specific educational objectives for students: to learn more about the problems of global public health in a classroom setting, to experience the issues in global health firsthand in a field setting, and to be exposed to the variety of careers available in global public health by working with faculty, professional staff, and graduate students who are currently engaged in the field.

Upon completion of the Global Health Minor, students are able to:

1. Analyze global health problems, issues and controversies using multiple disciplinary perspectives and conceptual frameworks,
2. Integrate knowledge from academic study and experiential learning toward being active and informed citizens in a global community,
3. Demonstrate the capacity to critically reflect on one's own values, ethics, assumptions and actions in the context of cultures, collaborations and institutions; and
4. Demonstrate the capacity to collaborate across differences (e.g. cultural, social, personal, economic, values, religious).

Requirements for admission

- Undergraduate students with at least 30 credits
- Undergraduate students in good academic standing

Please note: PBHL 101 is a prerequisite for all required PBHL courses in this minor.

It is strongly suggested that students in this minor participate in a field experience which can include an elective course or co-op.

Required courses:

PBHL 301	Epidemiology in Public Health	3.0
PBHL 303	Overview of Issues in Global Health	3.0
PBHL 304	Introduction to Health & Human Rights	3.0
PBHL 317	The World's Water	3.0
Elective Courses: take 12 credits of the following:		12.0
COM 390 [WI]	Global Journalism	
ECON 342	Economic Development	
PBHL 320	Exploring the HIV/AIDS Pandemic	
PBHL 321	Disease Outbreak Investigations	
PHIL 335	Global Ethical Issues	
WGST 225	Women & Human Rights Worldwide	
WGST 240	Women and Society in a Global Context	
Total Credits		24.0

Minor in Public Health

About the Minor

The Dornsife School of Public Health trains new leaders to tackle society's current and future health challenges. The Public Health minor is designed to provide students with a broad overview of the field's diversity. Reflecting the interdisciplinary approach of the School, students are required to take courses originating from various public health core disciplines, which include: epidemiology; community health and prevention; environmental and occupational health; and health management and policy.

This minor will be a relevant course of study for students pursuing pre-med, pre-law, biology and business curricula as well as students interested in population-based applications of psychology, sociology and communications theory. Completion of the minor will provide students with an exposure to the breadth and depth of topics within public health, population-level challenges and solutions, as well as possible career options.

Requirements

Please note: PBHL 101 is a prerequisite for all required PBHL courses in this minor.

Required Courses		
PBHL 301	Epidemiology in Public Health	3.0
PBHL 302	Introduction to the History of Public Health	3.0
PBHL 303	Overview of Issues in Global Health	3.0
PBHL 304	Introduction to Health & Human Rights	3.0
Elective Choices		
Complete 12 credits from the following courses:		12.0
BIO 318	Biology of Cancer	
ECON 240	Economics of Health Care Systems	
HSAD 210	Health-Care Ethics I	
PBHL 305	Women and Children: Health & Society	
PBHL 306	Introduction to Community Health	
PBHL 307	Injury Prevention and Control	
PBHL 308	The U.S. Public Health System	
PBHL 309	Public Health Ethics	
PBHL 310	Burden of Disease	
PBHL 311	Public Health Biology	
PBHL 312	Public Health Data Analysis	
PBHL 313	The Social Determinants of Health and Well-Being	
PBHL 314	Environmental and Occupational Health	
PBHL 315	Public Health Leadership	
PBHL 316	Drugs, Society, and Public Health	
PBHL 317	The World's Water	
PBHL 318	Violence and Trauma in Public Health	
PBHL 333	Health Inequality	
PHIL 321	Biomedical Ethics	
PSCI 353	International Human Rights	
PSY 355	Health Psychology	
PSY 368	Psychology - Inequity & Injustice	
SOC 210	Race, Ethnicity and Social Inequality	
SOC 220	Wealth and Power	
SOC 235	Sociology of Health and Illness	

WGST 275	Women's Health and Human Rights	
Total Credits		24.0

Goodwin College of Professional Studies

In today's competitive job market, education is a smart investment in your future. Goodwin responds to the demands of today's learner by offering programs that tailor a student's learning experience to their career aspirations. Our General Studies degree-completion program is ideal for transfer students who already possess an associate's degree or just have existing college credits. It is also ideal for students who wish to chart their own path toward a college degree.

Major

- General Studies (BS) (p. 350)

Minor

- Client Development and Customer Service (p. 351)

General Studies

Major: General Studies
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 180.0
Classification of Instructional Programs (CIP) code: 24.0101
Standard Occupational Classification (SOC) code: 11-9199

About the Program

The Bachelor of Science (BS) in General Studies is the ideal degree completion program for self-directed students who desire a program they can tailor to their personal and professional interests. The program covers the fundamentals of a university education while allowing students to exhibit intellectual interest and discipline across a broad range of college-level coursework. A general studies degree informs employers of a graduate's ability to think creatively when problem solving and work independently at a high level with a minimum of direction.

General studies students have more options for courses which apply to their degree requirements when they register for a given term. The flexibility to study subjects which have produced some of the greatest ideas, innovations and art in recorded history, can be both a personally and professionally rewarding benefit of a general studies degree.

Designed for individuals with a diverse college background and varied educational interests that cannot be captured in a single degree program. Students have the opportunity to experiment in a variety of academic subjects through a generous amount of free electives.

The ability to include minors (http://catalog.drexel.edu/minors/)within the General Studies major can be of great value to working adults who are seeking advancement or a change in their employment. Adult learners looking to improve their earning potential often find that a degree makes them eligible for higher-level positions within their organizations or others.

The Goodwin General Studies degree completion program offers students evening and online options to make it as convenient as possible for working adults to take advantage of the opportunity to return to school and complete their college degree.

Advising

Students in the BS in General Studies program are advised by an academic advisor (determined alphabetically by last name) who serves as an important resource to students as they progress and manage their educational and career goals.

Students receive one-on-one personal advisement to ensure that educational and professional objectives are met within the course of study.

For more information on this major, visit Goodwin College's (https://drexel.edu/goodwin/academics/degree-completion-programs/bs-general-studies/) web page.

Degree Requirements

This program is designed for individuals with a diverse college background and varied educational interests that cannot be captured in a single degree program. In consultation with their academic advisor, students have the opportunity to experiment in a variety of academic subjects through a generous amount of free electives. An attractive feature is that students can complete minors (http://catalog.drexel.edu/minors/) en route to their degree.

College Requirements		
GSTD 200	Lifelong Learning Theory & Practice	3.0
GSTD 491	Senior Project in General Studies	3.0
English and Speech Requirements		
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
COM 230	Techniques of Speaking	3.0
Mathematics Requirements		
MATH 100	Fundamentals of Mathematics	3.0
MATH 171	Introduction to Analysis A	3.0
Computing Requirement [*]		
Select one of the following:		3.0
PRST 211	Computer Applications for Professionals	
Additional computing course options, with Advisor approval		
Upper Level Course Requirements		
As students choose electives from the categories below, a minimum of 36.0 credits must be upper-level courses (typically 300-level and above).		
Natural Science Electives		
Students select 9.0 credits from the following: ANAT, BIO, CHEM, FDSC, NFS, PHEV, PHYS. Courses from other departments may be considered with advisor approval.		9.0
Specialization Requirements		
Students must complete 45.0 credits within an area of specialization. The specialization is a set of courses built around a cohesive area of study. An academic advisor must pre-approve the specialization. The specialization will not appear on the student transcript.		45.0
Liberal Studies Requirements		
Students must complete 36.0 credits in Liberal Studies, covering a range of subject areas in the humanities and/or social sciences: anthropology, psychology, sociology, political science, history, philosophy, religion, literature and fine arts. (Arts history or appreciation courses, rather than applied courses.)		36.0
Free Electives		**63.0**
Total Credits		180.0

*   Courses older than three years will not be transferred into the curriculum.

Co-op/Career Opportunities

A well-rounded education results in an enriched view of the world. Full-time students majoring in General Studies find careers in diverse areas, taking skills they learn at Drexel to their future endeavors. The My College Guide (http://mycollegeguide.org/career-opportunities/general-studies-careers/) website identifies many career opportunities for students majoring in General Studies.

Goodwin College's General Studies BS degree is designed for students planning to pursue graduate studies in various professional areas.

Some General Studies students are already established in their careers and simply need a bachelor's degree to move into higher positions within their organizations and industries and/or to pursue a master's degree.

Alumni of the General Studies program include professions as:

- Senior Financial Consultant
- Professional Digital Marketing Consultant
- Rap Artist/Songwriter
- Assistant University Registrar
- Paralegal
- Mortgage Consultant
- Senior Project Manager
- Bank Manager
- Vice President, Technology
- Pharmaceutical Consultant
- Library Tech Specialist
- NYC Mayor's Office of Sustainability
- General Manager
- Realtor
- Clinical Medical Assistant

Client Development and Customer Service

About the Minor

The minor in Client Development and Customer Service is a 24.0 to 26.0 credit curriculum designed to familiarize students with customer service theory while providing practical training to develop skills for building and maintaining successful client relationships. The minor can provide a strong complement for majors that emphasize entrepreneurship, interpersonal skills, nonprofit enterprise and marketing. Students minoring in Client Development and Customer Service might also consider a double minor in Business Administration.

Admission Requirements

- Minimum GPA of 2.0
- Academic advisor approval
- Must be enrolled in an undergraduate degree program

Program Requirements

GSTD 201 [WI]	Professional Applications of Emotional Intelligence	3.0
GSTD 302	Customer Service Theory & Practice	3.0
GSTD 303	Client Relations Management	3.0
PRST 303	Interpersonal Skills for Virtual Teams	3.0
PRST 330	Career & Professional Development	3.0
PHIL 301	Business Ethics	3.0
Take a minimum of two courses from the list below		6.0
GSTD 360	Applied Organizational Research	
MKTG 321	Selling and Sales Management	
MKTG 344	Professional Personal Selling	
MKTG 357	Global Marketing	
MKTG 362	Brand and Reputation Management	
PRST 440	Policy Analysis	
Total Credits		24.0

A grade of "C" (2.0) or better must be earned in each course to be counted toward this minor.

LeBow College of Business

About the College

The mission of the LeBow College of Business is to integrate Drexel University's technological prominence with experience-based education to develop world-class leaders and advance knowledge through research. At the undergraduate level, this objective is accomplished by providing high-quality educational programs that integrate theory and practice. Drexel's highly regarded co-operative education program in which students interchange periods of academic study and full-time, off-campus employment with partner companies, sets us apart from other business schools

The College and its distinguished faculty are committed to advancing the science and practice of management through basic, applied, and instructional research in the various disciplines of business.The College maintains strong connections to business professions and the community through participation in professional organizations, a commitment to community service, and dedication to providing opportunities for lifelong learning. Drexel's LeBow College of Business—fully accredited by AASCB-International—offers two distinct undergraduate degrees, Bachelors of Science in Business Administration that has 10 major options and 5 co-majors, and Bachelors of Science in Business and Engineering, plus an option in thirteen minors and two certificate programs.

Majors

- Accounting (BSBA) (p. 355)
- Business Analytics (co-major) (BSBA) (p. 357)
- Business and Engineering (BSBAE) (p. 361)
- Business Economics (co-major) (BSBA) (p. 405)
- Finance (BSBA) (p. 364)
- General Business (BSBA) (p. 368)
- Legal Studies (BSBA) (p. 370)
- International Business (BSBA) (p. 408)
- International Business (co-major) (BSBA) (p. 411)
- Management Information Systems (BSBA) (p. 372)
- Marketing (BSBA) (p. 375)
- Operations and Supply Chain Management (BSBA) (p. 378)
- Organizational Management (co-major) (BSBA) (p. 381)
- Real Estate Management and Development (BSBA) (p. 383)
- **NEW:** Sport Business (BSBA)
- Technology Innovation Management (co-major) (BSBA) (p. 388)

Minors

- Accounting (p. 391)
- Business Administration (p. 391)
- Business Analytics (p. 392)
- **NEW:** Business Consulting
- Finance (p. 393)
- Legal Studies (p. 394)
- Management Information Systems (p. 394)
- Marketing (p. 394)

- Operations and Supply Chain Management (p. 395)
- Organizational Management (p. 395)
- Real Estate Management and Development (p. 396)
- Sport Management (p. 396)
- Technology Innovation Management (p. 397)

Certificates

- Brand and Reputation Management (p. 397)
- Social Responsibility in Business (p. 398)

The mission of the LeBow College of Business is to integrate Drexel University's technological prominence with experience-based education to develop world-class leaders and advance knowledge through research. At the undergraduate level, this objective is accomplished by providing high-quality educational programs that integrate theory and practice. Our highly regarded co-operative education program in which students interchange periods of academic study and full-time, off-campus employment with partner companies, sets us apart from other business schools.

The College and its distinguished faculty are committed to advancing the science and practice of management through basic, applied, and instructional research in the various disciplines of business.The College maintains strong connections to business professions and the community through participation in professional organizations, a commitment to community service, and dedication to providing opportunities for lifelong learning. Drexel's LeBow College of Business—fully accredited by AASCB-International—offers two distinct undergraduate degrees, Bachelors of Science in Business Administration that has 10 major options and 5 co-majors, and Bachelors of Science in Business and Engineering, plus an option in thirteen minors and two certificate programs.

About the Curriculum

BS in Business Administration Program

The Bachelor of Science in Business Administration program is designed to prepare students for managerial positions in business and other institutions. To accomplish this, the undergraduate curriculum has the following characteristics and goals:

- An early exposure to the structure and functions of business enterprises
- The bridging of theory and concepts with professional practice
- The integration of material across disciplines within business as well as between business and other fields
- The enhancement of effective communication, problem-solving, and interpersonal skills
- Coverage of the ethical issues inherent in a business setting
- Coverage of the global, political, social, and legal/regulatory environment in which businesses operate
- Coverage of the impact of technology and technological changes on the operation of the business enterprise
- An emphasis on career preparation
- Opportunities for experiential learning through traditional co-op programs and other "hands-on" opportunities

BS in Business and Engineering Program

The Business and Engineering Degree Program contains a broad-based business and engineering curriculum, enabling graduates to work successfully in technically oriented business positions. Students complete a set of broad functional business core courses along with a firm foundation in science, mathematics, and engineering. Students also study more deeply the areas of accounting, economics, finance, information systems, law, marketing, organizational behavior, entrepreneurship, operations, and statistics along with the functional areas of engineering. Graduates of this program will be well prepared to participate in innovative technological efforts in business.

The Business and Engineering Degree Program gives students the opportunity to:

- Develop a breadth and depth of knowledge in functional business areas such as accounting, economics, entrepreneurship, finance, information systems, law, marketing, organizational behavior, operations, and statistics.
- Complete a broad education in engineering disciplines after completing a firm foundation in science and mathematics.
- Develop skills in technical communication and critical reasoning.
- Study ethical issues faced by managers and engineers, and understand technology from a historical perspective.
- Apply acquired skills from co-op work experiences to further enhance their knowledge base.
- Study entrepreneurship from a management and finance perspective for preparation in innovative technological efforts.
- Learn the operational aspects of business operations to improve the functioning of technically oriented businesses

BS in Economics Program

The Bachelor of Science in Economics program is designed to provide students with an understanding of the market system, as well as economic institutions, policies and development. In addition to this deep coverage of economics, the major includes liberal arts and sciences requirements. The program is flexible, allowing the student to customize the curriculum and choose areas of emphasis including concentrations in business economics or mathematical economics, as well as to select a coordinating field from other majors and minors at Drexel. The BS in Economics program provides excellent training for graduate school in economics.

BA in Economics Program

The Bachelor of Arts in Economics introduces students to modern economics within the context of a broad-based liberal arts curriculum. The degree is oriented toward students with interest in the less quantitative features of economics and a broader liberal arts education, particularly in areas offered by the College of Arts and Sciences. The degree gives students the flexibility to major or minor in a coordinate field outside of economics.

The Economics program:

- Provides a deep understanding of economics and broad training in arts and sciences.
- Enables students to apply acquired skills from co-op work experiences to further enhance their knowledge base.

- Prepares students for a wide variety of opportunities after graduations ranging from; corporate positions, consulting, government agencies, business, and law.
- Is a rigorous program that develops students' critical thinking and problem solving skills.

Degree Requirements

The Business Administration curriculum requires a minimum of 180.0 credits. The Business & Engineering curriculum requires a minimum of 183.0 credits. The Economics curriculum requires a minimum of 187.0 credits. The courses in each curriculum may be grouped into three categories:

General Education

The liberal arts comprise 50 percent or more of total credits required. Courses in communications, economics, English, history, mathematics, natural science, political science, psychology, sociology, and statistics teach students to think effectively and to communicate ideas to others. In addition, they provide a good understanding of the economic, social, and political systems within which we live and business operates.

Common Body of Knowledge in Business

Courses in accounting, business strategy and social responsibility, finance, law, organizational behavior, management information systems, production management, and marketing introduce students to all the functional areas of business, the quantitative aspects of decision-making, and the behavioral factors common to all organizational structures.

Major (BSBA) or Coordinated Field (BSECON & BAECON)

The curriculum permits students to pursue one or more majors within the (BSBA) programs. The major coursework and the common body of knowledge in business together comprise not more than 50 percent of the total credits required for graduation. In the Economic programs, students must select a coordinated field to augment the general education and economics course work.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Cooperative Education

The five-year cooperative education programs consist of 12 terms in college and six terms in co-operative employment. During the freshman year, students spend three terms in school (fall, winter, and spring) and have a summer vacation. For each of the next three years, students alternate two terms in school with two terms of co-op. The senior year consists of three terms in college with no cooperative employment.

The four-year cooperative education program consists of 12 terms in college and two terms in cooperative employment. The two terms of co-op experience take place in the third year.

The non-cooperative four-year program comprises 12 terms in school with vacations during the summers.

Cooperative education, academic eligibility requirements, acceptance of transfer students, and placement services are described in detail in other sections of this catalog. Students wishing to prepare for admission to professional schools may obtain preprofessional counseling from the Office of Preprofessional Programs, 215.895.2437.

Special Programs

Accelerated/Dual Degrees

LeBow College offers an accelerated BS/MBA and BS/MS degree programs that provides academically qualified students with the opportunity to earn both a bachelor's degree and an MBA or MS in Accounting in the time normally required for the undergraduate degree at Drexel University. The program combines the advantage of practical work experience in the renowned Drexel Co-op with the graduate credentials of our nationally recognized programs.

LeBow College also offers a five-year dual-degree program with the European Business School (ESB) at Reutlingen University in Germany. This exciting dual degree program allows undergraduate students to earn degrees from both Drexel University's LeBow College of Business and Reutlingen University's European School of Business. In total students will spend 18 months in Germany completing two semesters of study and one semester on Co-op.

Drexel in London

The College's *Drexel in London Program* offers flexible schedules for study abroad, ranging from six-week summer sessions to six-month (two-term) combined study and co-operative education programs in which students can earn up to 18 credits and fulfill one of their co-op requirements. The program's emphasis is on international business in general, with a particular focus on the United Kingdom and the European Union. Business course selections each year will be selected from the list of courses that constitute the international business concentration, but students in other concentrations may participate in the program. Housing is provided in South Kensington, one of central London's most desirable residential sections. Drexel in London applications are administered by the Study Abroad (http://www.drexel.edu/studyabroad/) office, 215.571.3558.

Business Learning Community (BLC)

LeBow College's Business Learning Community (BLC) is a way of life at Drexel University - a cohort of freshman business students who live and attend classes together. The BLC was recently recognized by AACSB Accreditation Committee as a "strength and effective practice of the LeBow College of Business." The program is designed to ease transition to university life, (http://catalog.drexel.edu/) enhance student academic performance, (http://catalog.drexel.edu/) provide opportunities for student engagement and networking and improve the overall student experience.

LeBow BRIDGE

BRIDGE is a LeBow College of Business undergraduate program that provides support to students in four critical areas: academic excellence, financial literacy and social engagement and community service. BRIDGE scholars receive the tools to be successful through advising programs related to academics, financial skills, professional development, cultural awareness and community service.

Students work together to build relationships within a dynamic and diverse group experience. Mentors are also available to BRIDGE scholars to provide guidance and ensure a positive college experience. After freshman year, BRIDGE scholars can serve as peer mentors to underclassmen.

Global Classroom

The LeBow Global Classroom program prepares candidates to become 21st Century Executives, able to tackle the toughest business challenges in our increasingly globalized business world. Each year a select cohort of 20 high-potential students from around the world enters this rigorous global education experience to acquire the complex set of skills and attitudes to thrive in an increasingly uncharted and globalized marketplace. The learning community experience is akin to a "Global Classroom".

Peer Leader Program

LeBow College's Peer Leader Program is an outstanding learning experience for sophomore business students. Through a highly competitive application process, top-performing LeBow students with extraordinary leadership potential are identified, selected, trained and paired with UNIV 101 instructors to serve as mentors for new freshmen both inside and outside the classroom.

Summer Institutes

LeBow Summer Institutes offer an introduction to business education through exceptional summer programs designed for outstanding high school students with an interest in business. LeBow Summer Institutes offer the opportunity to maximize and develop the business and leadership skills sought after by employers and college admissions officers.

Facilities

In fall 2013, LeBow College opened its 12-story, Gerri C. LeBow Hall, with a finance trading lab, behavioral studies lab and integrated teaching technology in all classrooms. The new building features two lecture halls, 15 classrooms of varying sizes and seating configurations, including case study rooms and cluster classrooms designed to facilitate group work. Other amenities consist of extensive areas of student spaces, including 19 collaboration rooms, two quiet study areas, and 3,500 square feet of student lounges. Gerri C. LeBow Hall brings together faculty, students and staff, in a state of the art building on the University City campus. Please visit the LeBow College of Business webpage (http://www.lebow.drexel.edu/about/campuses/philadelphia/location/gerri-c-lebow-hall/) to learn more about Gerri C. LeBow Hall.

Accounting

Major: Accounting
Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.0305
Standard Occupational Classification (SOC) code: 13-2011; 11-3031; 13-2051

About the Program

Accounting is the language of business and so much more. It provides the critical information that guides decision-making at all levels of business, government and non-profit organizations. An Accounting degree offers students the opportunity to obtain technical knowledge, analytical skills and communication expertise required to lead ethical and effective organizations and people. Accounting graduates find career opportunities across many areas including public, private and government accounting.

There is a wide range of career opportunities for accountants which include public accounting, corporate and non-profit accounting, and governmental accounting. Many professional accountants obtain a license as a Certified Public Accountant (CPA) or obtain a Certified Managerial Accountant (CMA) designation after passing the examinations and completing all education and experience requirements. The University's co-op program provides practical experience for accounting students. Time spent working in accounting co-op positions is accepted as part of the experience requirement for Pennsylvania and many other states.

Students planning to obtain a CPA license must take additional coursework to meet state mandated requirements. Each state has different education requirements for licensure. Interested students should consult with their academic advisor and/or the Department of Accounting (https://www.lebow.drexel.edu/faculty-and-research/disciplines/accounting/) upon declaring the major to ensure ample time to fulfill such requirements.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Bachelor of Science in Business Administration (BSBA) Degree Requirements

General Education Requirements		
CIVC 101	Introduction to Civic Engagement	1.0
COM 270 [WI]	Business Communication	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
MATH 101	Introduction to Analysis I	4.0
MATH 102	Introduction to Analysis II	4.0
PHIL 105	Critical Reasoning	3.0
PSY 101	General Psychology I	3.0
UNIV B101	The Drexel Experience	1.0
UNIV B201 [WI]	Career Management	1.0
English literature elective ENGL 200 through ENGL 399		3.0
Fine Arts elective		3.0
History (HIST) elective		4.0
Select two of the following:		6.0
BIO 100	Applied Cells, Genetics & Physiology	
or BIO 101	Applied Biological Diversity, Ecology & Evolution	
CHEM 151	Applied Chemistry	
PHYS 151	Applied Physics	
General Education Electives		
Students select seven (21.0 credits) general education electives, with a minimum of one course in each of the following three categories. Students take the remaining 12.0 credits from any of the topics listed under Additional General Education Electives.		
Society and Culture		
Communication, English, Fine Arts, Global Studies, Language or Philosophy		3.0
Social Science		
Anthropology, History, Sociology, Political Science, Psychology		3.0
Science		
Computer Science, Information Systems, Science		3.0
Additional General Education Electives		
Twelve (12.0) credits must be earned by taking 4 courses from the following topics: Communication, English, Fine Arts, Global Studies, Language, Philosophy, Anthropology, History, Sociology, Political Science, Psychology, Computer Science, Information Systems, Math, Science		12.0
Business Requirements		
ACCT 115	Financial Accounting Foundations	4.0
ACCT 116	Managerial Accounting Foundations	4.0
BLAW 201	Business Law I	4.0
BUSN 101	Foundations of Business I (Online students take BUSN 111)	4.0
BUSN 102	Foundations of Business II (Online students take BUSN 112)	4.0
ECON 201	Principles of Microeconomics	4.0
ECON 202	Principles of Macroeconomics	4.0
FIN 301	Introduction to Finance	4.0
INTB 200	International Business	4.0
MGMT 450	Strategy and Competitive Advantage	4.0
MIS 200	Management Information Systems	4.0
MKTG 201	Introduction to Marketing Management	4.0
OPM 200	Operations Management	4.0
ORGB 300 [WI]	Organizational Behavior	4.0
STAT 201	Introduction to Business Statistics	4.0
Select one of the following:		4.0
MGMT 260	Introduction to Entrepreneurship	
MGMT 370	For-Profit Business Consulting	
MGMT 371	Nonprofit Business Consulting	
ORGB 420	Negotiations and Conflict Resolution	
STAT 202	Business Statistics II	
Major Requirements		
Eight required courses (See Major Requirements list below)		32.0
Free Electives		**18.0**
Total Credits		180.0

Required Accounting Major Courses		
ACCT 321	Financial Reporting I	4.0
ACCT 322	Financial Reporting II	4.0
ACCT 323	Financial Reporting III	4.0
ACCT 329	Advanced Accounting	4.0
ACCT 331	Cost Accounting	4.0
ACCT 341	Principles of Auditing	4.0
TAX 341	Individual Income Taxes	4.0

TAX 342	Business Income Taxes	4.0
Total Credits		32.0

A minimum of 20.0 elective (BUSN Non-BUSN) credits are required to fulfill degree completion. Students planning to take the CPA exam should review the educational requirements established by the State Board of Accountancy in the state in which they plan to sit for the examination. Students are qualified to sit for the examination in Pennsylvania by meeting the degree requirements above. Students planning to apply for a CPA license in Pennsylvania have to obtain 225.0 quarter credit hours, the equivalent to 150 semester hours.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Term 1		Credits
BUSN 101	Foundations of Business I	4.0
ECON 201	Principles of Microeconomics	4.0
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
MATH 101	Introduction to Analysis I	4.0
UNIV B101	The Drexel Experience	1.0
	Term Credits	16.0
Term 2		
BUSN 102	Foundations of Business II	4.0

MGMT 370	For-Profit Business Consulting	
MGMT 371	Nonprofit Business Consulting	
MGMT 451	Management Simulation	
STAT 202	Business Statistics II	
Free electives		8.0
Fine arts elective		3.0
	Term Credits	15.0

Total Credit: 180.0

Co-op/Career Opportunities

Public, private, and government accounting provide the greatest range of career possibilities. Professional accountants are normally certified as public accountants (CPA) or managerial accountants (CMA) after passing the appropriate professional examinations.

Drexel's co-op program provides an added advantage to accounting students; time spent working in accounting co-op positions is often accepted as part of the one year of accounting experience needed for CPA certification.

Drexel's accounting graduates accept positions in public accounting, private industry, government, and nonprofit organizations. Many also choose to continue their studies in graduate schools, pursuing such degrees as a MBA, master's in taxation, master's in accounting or a PhD. Overall, Drexel's graduates enjoy a high placement rate.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities. To learn more about career opportunities and resources see the Career Guides (http://drexel.edu/scdc/career-services/counseling/career-guides/) provided by the Steinbright Career Development Center.

Facilities

In fall 2013, LeBow College opened its 12-story, Gerri C. LeBow Hall, with a finance trading lab, behavioral studies lab and integrated teaching technology in all classrooms. The new building features two lecture halls, 15 classrooms of varying sizes and seating configurations, including case study rooms and cluster classrooms designed to facilitate group work. Other amenities consist of extensive areas of student spaces, including 19 collaboration rooms, two quiet study areas, and 3,500 square feet of student lounges. Gerri C. LeBow Hall brings together faculty, students and staff, in a state of the art building on the University City campus. Please visit the LeBow College of Business webpage (http://www.lebow.drexel.edu/about/campuses/philadelphia/location/gerri-c-lebow-hall/) to learn more about Gerri C. LeBow Hall.

Accounting Faculty

Stephen B. Bates, DBA *(Wilmington University).* Assistant Clinical Professor.

Maureen Breen, PhD *(West Chester University).* Assistant Clinical Professor. Financial reporting, internal controls in corporate and not-for-profit sectors.

Hsihui Chang, PhD *(University of Minnesota) KPMG Professor of Accounting.*

Hiu Lam Choy, PhD *(University of Rochester).* Associate Professor. Financial accounting.

Mary Copeland, MS, MBA *(American University).* Assistant Clinical Professor.

Anthony P. Curatola, PhD *(Texas A&M University) Joseph F. Ford Professor of Accounting.* Professor. Federal and state income tax policy, retirement income taxation, fringe benefits taxation, educational savings and tax incentives, federal and state income tax research.

Xin Dai, PhD *(University of Minnesota).* Assistant Professor.

Barbara Murray Grein, PhD *(University of North Carolina) Department Head, Accounting and Tax.* Associate Professor. Auditing, auditor selection, audit adjustments, audit fees, corporate governance, financial reporting.

Curtis M. Hall, PhD *(University of Arizona).* Associate Professor. Strategic cost management; corporate governance; capital markets research in accounting; human capital investment.

Natalya V. Khimich, PhD *(University of California at Berkeley).* Assistant Professor. Equity valuation, earnings quality, and accounting for innovation and intangible assets.

Stacy Kline, MBA *(Temple University).* Clinical Professor. Individual, corporation; S corporation and partnership taxation.

Johnny Lee, PhD *(University of Utah).* Associate Clinical Professor. Accounting information systems; e-business; managerial accounting; supply chain management

Gordian Ndubizu, PhD *(Temple University).* Professor. Financial accounting.

Duri Park, PhD *(Ohio State University).* Assistant Professor. Financial accounting, insider trading, investments, and cash holdings.

Jennifer Wright, MTA *(Villanova University) Assistant Department Head, Accounting and Tax.* Associate Clinical Professor.

Business Analytics

Co-Major: Business Analytics
Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 186.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.1304
Standard Occupational Classification (SOC) code: 13-2053; 15-2011; 25-1011

The Business Analytics program is a "co-major"

About the Program

How does a company design an effective social media campaign for its brand new product? How does a bank make credit card offers or detect fraud? How does a chain store stock its shelves with just the right products at the right price? Technology has made it possible to collect, store, process and analyze massive data sets that can help businesses make better decisions. However, there remains a gap that can only be filled by those with a background in business analytics. From the junior

analyst providing daily reports on production to the CEO seeking to transform his or her business, all are looking for guidance and talent in business analytics.

LeBow students are uniquely positioned to address descriptive, diagnostic, predictive, prescriptive and pre-emptive questions across the business analytics lifecycle from the corporate generation of data through the application and impact on managerial and leadership decision-making and innovation.

Ranked second in a Computerworld survey on the most difficult skills to find, Business Analytics expertise is not only scarce, but in demand. McKinsey Global Institute reports that the United States could face a shortage of between 140,000 and 190,000 individuals who possess Business Analytics skills and an additional 1.5 million managers with the skills to implement the results.

Example business analytics jobs include, BA Strategy Consultants, Business Intelligence and Performance Management Consultants, Advanced Analytics, Optimization Consultants.

Because students in this co-major are required to choose a major in one of the functional areas of business, the curriculum enables students to tailor the program to their interests and anticipated career path.

Students complete the business analytics co-major in conjunction with one of the following majors:

- Accounting (p. 355)
- Finance (p. 364)
- International Business (p. 408)
- Legal Studies (p. 370)
- Management Information Systems (p. 372)
- Marketing (p. 375)
- Operations & Supply Chain Management (p. 378)
- Sport Business (p. 386)
- Real Estate Management and Development (p. 383)

An additional distinguishing feature of the business analytics co-major is the required senior project (BSAN 460) where students work in small teams on real business analytics projects from LeBow College's corporate partners. The projects require students to bring together all the key elements of the business analytics curriculum to derive business insights for a company's current business challenges. Experiencing this data driven decision-making process is invaluable career preparation.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

General Education Requirements

CIVC 101	Introduction to Civic Engagement	1.0
COM 270 [WI]	Business Communication	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II

MKTG 366	Customer Analytics	
MKTG 367	Data-Driven Digital Marketing	
OPR 320	Linear Models for Decision Making	
OPR 330	Advanced Decision Making and Simulation	
OPR 340	Decision Models for the Public Sector	
OPR 350	Optimization in Finance	
STAT 331	Introduction to Data Mining for Business	
STAT 335	Introduction to Experimental Design	
Total Credits		186.0

*   Students select seven (21.0 credits) of additional general education electives with a minimum of one course in each of the following categories:
  - Society and Culture (Communication, English, Fine Arts, International Area Studies, Language, Philosophy)
  - Social Science (Anthropology, History, Sociology, Political Science, Psychology)
  - Math and Science (Computer Science, Information Systems, Math, Science)

**   Students completing the Business Analytics co-major must do so in conjunction with a primary business major. Students must select a primary major from the following list:
  - Accounting
  - Real Estate Management and Development
  - Finance
  - Legal Studies
  - Management Information Systems
  - Marketing
  - Operations & Supply Chain Management
  - International Business

*** Occasionally, departments can also offer special topics courses and independent studies on emerging areas of analytics. These courses may be substituted with department chair approval.

†   The following groupings of courses are recommended by departments for their respective career pathways. Students are strongly encouraged to complete three courses for at least one career pathway, based on their other major(s) and career goals.
  Accounting:
  STAT 331: Introduction to Data Mining for Business
  MIS 342: Systems Analysis and Design
  OPR 320: Linear Models for Decision Making
  Economics:
  ECON 301: Microeconomics
  ECON 350 [WI] : Applied Econometrics
  ECON 360: Time Series Econometrics
  STAT 331: Introduction to Data Mining for Business
  MKTG 366: Customer Analytics
  MKTG 367: Data-Driven Digital Marketing
  Complete one of the following two courses:
  BSAN 360: Programming for Business Analytics (R)
  MIS 349: Predictive Analytics (SAS)
  Finance:
  ECON 350 [WI] : Applied Econometrics
  ECON 360: Time Series Econometrics
  STAT 331: Introduction to Data Mining for Business
  OPR 320: Linear Models for Decision Making
  OPR 350: Optimization in Finance
  Management Information Systems:
  MIS 342: Systems Analysis and Design
  MIS 361: Information System Project Management
  Marketing: (Even though only three will be counted toward the BA co-major/minor, we recommend that the students use their primary major or free business electives to complete all of the courses below in order to develop a solid foundation. Note that MKTG 366 and STAT 331 employ similar techniques and MKTG 367 and STAT 335 employ similar techniques.)
  MKTG 326: Marketing Insights
  MKTG 366: Customer Analytics
  MKTG 367: Data-Driven Digital Marketing
  STAT 331: Data Mining
  STAT 335: Introduction to Experimental Design

Operations and Supply Chain Management:
ECON 350 [WI] : Applied Econometrics
ECON 360: Time Series Econometrics
STAT 331: Introduction to Data Mining for Business
STAT 335: Introduction to Experimental Design
MIS 342: Systems Analysis and Design
OPR 320: Linear Models for Decision Making
OPR 330: Advanced Decision Making and Simulation
OPR 340: Decision Models for the Public Sector
MKTG 366: Customer Analytics
MKTG 367: Data-Driven Digital Marketing

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Term 1		Credits
BUSN 101	Foundations of Business I	4.0
ECON 201	Principles of Microeconomics	4.0
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0

Term 12		

BSAN 460	Business Analytics Senior Project	4.0
Primary Major course*		4.0
Social Science elective		3.0
General education elective		6.0
	Term Credits	17.0

Total Credit: 186.0

*   See degree requirements (p. 358) for a list of business majors that may be completed in conjunction with the business analytics major.

Co-Op/Career Opportunities

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities. To learn more about career opportunities and resources see the Career Guides (http://drexel.edu/scdc/career-services/counseling/career-guides/) provided by the Steinbright Career Development Center.

Facilities

In fall 2013, LeBow College opened its 12-story, Gerri C. LeBow Hall, with a finance trading lab, behavioral studies lab and integrated teaching technology in all classrooms. The new building features two lecture halls, 15 classrooms of varying sizes and seating configurations, including case study rooms and cluster classrooms designed to facilitate group work. Other amenities consist of extensive areas of student spaces, including 19 collaboration rooms, two quiet study areas, and 3,500 square feet of student lounges. Gerri C. LeBow Hall brings together faculty, students and staff, in a state of the art building on the University City campus. Please visit the LeBow College of Business webpage (http://www.lebow.drexel.edu/about/campuses/philadelphia/location/gerri-c-lebow-hall/) to learn more about Gerri C. LeBow Hall.

Business Analytics Faculty

Murugan Anandarajan, PhD *(Drexel University) Interim Associate Dean for Academic Affairs.* Professor. Cyber crime, strategic management of information technology, unstructured data mining, individual internet usage behavior (specifically abuse and addiction), application of artificial intelligence techniques in forensic accounting and ophthalmology.

Orakwue B. Arinze, PhD *(London School of Economics).* Professor. Client/Server computing; Enterprise Application Software (EAS)/Enterprise Resource Planning Software (ERP); knowledge-based and decision support applications in operations management.

Hande Benson, PhD *(Princeton University).* Professor. Interior-point methods, Large Scale Optimization, Mathematical Programming, Nonlinear Optimization, Operations and Supply Chain Optimization, Optimization Software, Portfolio Optimization

Qizhi Dai, PhD *(University of Minnesota).* Associate Professor. Business Value of Information Technology, eCommerce, Economics of Information Technology, Information System Management.

Michaela Draganska, PhD *(Kellogg School of Management, Northwestern University) Department of Marketing.* Associate Professor. Advertising strategy, product assortment decisions, new product positioning, distribution channels. Marketing analytics and big data, marketing communications, marketing research, marketing strategy, technology and innovation.

Elea Feit, PhD *(University of Michigan) Department of Marketing.* Assistant Professor. Bayesian hierarchical models, interactive (eCommerce), marketing research, missing data.

Christopher Gaffney, PhD *(Rutgers University, New Brunswick).* Assistant Clinical Professor. Applied Probability, Decision Theory, Risk Analysis

David Gefen, PhD *(Georgia State University) Provost Distinguished Research Professor.* Professor. Strategic IT management; IT development and implementation management; research methodology; managing the adoption of large IT systems, such as MRP II, ERP, and expert systems; research methodology, eCommerce; Online Auctions; Outsourcing; SAS; Technology Adoption.

Jinwook Lee, PhD *(Rutgers University, New Brunswick).* Assistant Professor. Decision Models, Mathematical Programming, Risk Assessment Stochastic Optimization, Stochastic Processes.

Merrill W. Liechty, PhD *(Duke University).* Clinical Professor. Bayesian statistics, portfolio selection, higher moment estimation, higher moment estimation, Markov Chain Monte Carlo

Bruce D. McCullough, PhD *(University of Texas Austin).* Professor. Applied Econometrics, Data Mining, Econometric Techniques, Reliability of Statistical and Econometric Software.

Samir Shah, DPS *(Pace University).* Clinical Professor. Drexel University's Provost Fellow India Partnerships

Chaojiang Wu, PhD *(University of Cincinnnati).* Assistant Professor. Computational Statistics, Data Analytics, Data Mining, Decision Models, Predictive Analytics

Business and Engineering

Major: Business and Engineering
Degree Awarded: Bachelor of Science in Business and Engineering (BSBAE)
Calendar: Quarter
Total Credit Hours: 183.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.1301
Standard Occupational Classification (SOC) code: 11-1021

About the Program

The major in business and engineering combines two of Drexel's most exciting programs, linking business and engineering to provide students with expertise in both fields.

The program contains a curriculum combining coursework in both business and engineering, enabling graduates to work successfully in technically oriented business positions. Students complete a set of broad functional business core courses along with a firm foundation in science, mathematics, and engineering. Students also study quantitative decision making within a business context, technology innovation management, and operations management. They complete a minor in business as well as a concentration in engineering. Graduates of this program will be well prepared to participate in innovative technological efforts in business.

The major gives students the opportunity to learn important concepts in functional business areas such as accounting, economics, finance, information systems, law, marketing, organizational behavior, operations, and statistics.

Mission

The Bachelor of Science in Business and Engineering program provides students the opportunity to:

- Learn important concepts in functional business areas such as accounting, economics, finance, information systems, law, marketing, organizational behavior, operations, and statistics.
- Study in more depth the areas of operations, technology innovation management, and other functional business areas.
- Complete a course of study in an engineering discipline after completing a firm foundation in science and mathematics.
- Develop skills in technical communication and critical reasoning.
- Study ethical issues faced by managers and engineers, and understand technology from a historical perspective.
- Apply acquired skills in co-op work experiences to further enhance their knowledge base.
- Study entrepreneurship from a management and finance perspective for preparation in innovative technological efforts.
- Learn to improve the functioning of technically oriented businesses through operational competencies.

About the Business Minors

All Business and Engineering students are required to complete a business minor under the curriculum, and they will have the ability to choose from any of the business minors that are currently offered by the LeBow College of Business.

- Accounting
- Business Analytics
- Business Consulting
- Economics
- Finance
- International Economics (p. 415)
- Legal Studies (p. 394)
- Management Information Systems (p. 394)
- Marketing (p. 394)
- Operations & Supply Chain Management (p. 395)
- Organizational Management (p. 395)
- Sport Management (p. 396)
- Technology Innovation Management (p. 397)

About the Engineering Concentrations

All Business and Engineering students are required to complete an engineering concentration under the curriculum, and they will have the ability to choose from the following:

- Chemical Engineering
- Civil Engineering
- Electrical and Computer Engineering
- Mechanical Engineering
- General Engineering

For more information on the specific courses for the concentration, please refer to the Degree Requirements Page (p. 362).

Additional Information

For additional information about the program or to schedule an appointment, please contact the Department of Decision Sciences and MIS (https://www.lebow.drexel.edu/faculty-and-research/disciplines/decision-sciences-and-mis/).

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

General Education Requirements

CIVC 101	Introduction to Civic Engagement	1.0
COM 310 [WI]	Technical Communication (WI)	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
ENGR 231	Linear Engineering Systems	3.0
ENGR 232	Dynamic Engineering Systems	3.0
MATH 121	Calculus I	4.0
MATH 122	Calculus II	4.0
MATH 200	Multivariate Calculus	4.0
PHIL 105	Critical Reasoning	3.0
Select one of the following:		3.0
HIST 285	Technology in Historical Perspective	
PHIL 301	Business Ethics	
PHIL 315	Engineering Ethics	
UNIV B101	The Drexel Experience	1.0
UNIV B201 [WI]	Career Management	1.0

Science and Computing Requirements

CHEM 101	General Chemistry I	3.5
CHEM 102	General Chemistry II	4.5
PHYS 101	Fundamentals of Physics I	4.0
PHYS 102	Fundamentals of Physics II	4.0

Business Requirements

ACCT 115	Financial Accounting Foundations	4.0
ACCT 116	Managerial Accounting Foundations	4.0
BLAW 201	Business Law I	4.0
BUSN 101	Foundations of Business I	4.0
BUSN 102	Foundations of Business II	4.0
ECON 201	Principles of Microeconomics	4.0
ECON 202	Principles of Macroeconomics	4.0
FIN 301	Introduction to Finance	4.0
INTB 200	International Business	4.0
MGMT 201	Introduction to Technology Innovation Management	4.0
MGMT 450	Strategy and Competitive Advantage	4.0
MIS 200	Management Information Systems	4.0
MKTG 201	Introduction to Marketing Management	4.0
OPM 321	Planning and Control of Operations	4.0
ORGB 300 [WI]	Organizational Behavior (WI)	4.0
STAT 205	Statistical Inference I	4.0
STAT 206	Statistical Inference II	4.0

Business and Engineering Focus

Quantitative Decision Making in Business

OPR 320	Linear Models for Decision Making	4.0
Select one of the following:		4.0

MKTG 366	Customer Analytics	
MKTG 367	Data-Driven Digital Marketing	
OPR 330	Advanced Decision Making and Simulation	
STAT 325	Six-Sigma Quality Implementation	
STAT 331	Introduction to Data Mining for Business	

Technology Innovation Management

Select one of the following:		4.0
MGMT 301	Designing Innovative Organizations	
MGMT 302	Competing in Technology Industries	
MGMT 364	Technology Management	

Operations Management

Select one of the following:		4.0
MIS 361	Information System Project Management	
OPM 315	Service Operations Management	
OPM 325	Advanced Planning and Control of Operations	

Engineering Requirements

ENGR 111	Introduction to Engineering Design & Data Analysis	3.0
ENGR 113	First-Year Engineering Design	3.0
ENGR 131	Introductory Programming for Engineers	3.0
ENGR 220	Fundamentals of Materials	4.0
Business Minor *		**16.0**
Engineering Concentration **		**15.0**
Total Credits		183.0

*   Students must take 4-5 LeBow courses to complete the requirements of a business minor. Students must select a minor from the following list:
- Accounting
- Economics
- Entrepreneurship
- Finance
- International Economics
- Legal Studies
- Management Information Systems
- Marketing
- Operations & Supply Chain Management
- Technology Innovation Management

**   Students must select an engineering concentration and complete all five courses required for it:
- Electrical and Computer Engineering: ECE 105, ECE 200, ECE 201, ECE 303, ECES 301
- Mechanical Engineering: MEM 202, (MEM 230 and MEM 238 and MEM 330 and MEM 333) or (ENGR 210 and MEM 220 and MEM 310 and MEM 345) or (MEM 238 and MEM 255 and MEM 345 and MEM 355) or (MEM 201 and MEM 230 and MEM 238 and MEM 333)

- Civil Engineering: ENGR 210, CAEE 202, CAEE 203,CAEE 212, MEM 202
- Chemical Engineering: ENGR 210 or CHE 330, CHE 211, CHE 212, CHE 230,CHE 220
- General Engineering: Any 5 courses from those listed for the above concentrations

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Term 1		Credits
BUSN 101	Foundations of Business I	4.0
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
ENGR 111	Introduction to Engineering Design & Data Analysis	3.0
MATH 121	Calculus I	4.0
UNIV B101	The Drexel Experience	1.0
	Term Credits	15.0
Term 2		
BUSN 102	Foundations of Business II	4.0
CHEM 101	General Chemistry I	3.5
ENGL 102 or 112	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing English Composition II	3.0
ENGR 131	Introductory Programming for Engineers	3.0
MATH 122	Calculus II	4.0
	Term Credits	17.5
Term 3		
CHEM 102	General Chemistry II	4.5
ENGL 103 or 113	Composition and Rhetoric III: Themes and Genres English Composition III	3.0
ENGR 113	First-Year Engineering Design	3.0
MATH 200	Multivariate Calculus	4.0
MGMT 201	Introduction to Technology Innovation Management	4.0
	Term Credits	18.5
Term 4		
ACCT 115	Financial Accounting Foundations	4.0
CIVC 101	Introduction to Civic Engagement	1.0
ENGR 231	Linear Engineering Systems	3.0
PHYS 101	Fundamentals of Physics I	4.0
STAT 205	Statistical Inference I	4.0
	Term Credits	16.0
Term 5		
ACCT 116	Managerial Accounting Foundations	4.0
ENGR 232	Dynamic Engineering Systems	3.0
PHYS 102	Fundamentals of Physics II	4.0
STAT 206	Statistical Inference II	4.0
	Term Credits	15.0
Term 6		
ECON 201	Principles of Microeconomics	4.0
ENGR 220	Fundamentals of Materials	4.0
MIS 200	Management Information Systems	4.0

OPM 321	Planning and Control of Operations	4.0
	Term Credits	16.0
Term 7		
ECON 202	Principles of Macroeconomics	4.0
FIN 301	Introduction to Finance	4.0
MKTG 201	Introduction to Marketing Management	4.0
OPR 320	Linear Models for Decision Making	4.0
	Term Credits	16.0
Term 8		
ORGB 300 [WI]	Organizational Behavior	4.0
INTB 200	International Business	4.0
Business Minor Elective		4.0
Engineering Concentration*		3.0
	Term Credits	15.0
Term 9		
BLAW 201	Business Law I	4.0
COM 310 [WI]	Technical Communication	3.0
Engineering Concentration*		3.0
Business Minor Elective		4.0
	Term Credits	14.0
Term 10		
PHIL 105	Critical Reasoning	3.0
Select one of the following:		4.0
MKTG 366	Customer Analytics	
MKTG 367	Data-Driven Digital Marketing	
OPR 330	Advanced Decision Making and Simulation	
STAT 325	Six-Sigma Quality Implementation	
STAT 331	Introduction to Data Mining for Business	
Engineering Concentration*		3.0
Business Minor*		4.0
	Term Credits	14.0
Term 11		
Select one of the following:		4.0
MGMT 301	Designing Innovative Organizations	
MGMT 302	Competing in Technology Industries	
MGMT 364	Technology Management	
MIS 250	Introduction to Enterprise Application Software Using SAP - Logistics	
Select one of the following:		4.0
MIS 361	Information System Project Management	
OPM 315	Service Operations Management	
OPM 325	Advanced Planning and Control of Operations	
Engineering Concentration*		3.0
Business Minor*		4.0
	Term Credits	15.0
Term 12		
UNIV B201 [WI]	Career Management	1.0
MGMT 450	Strategy and Competitive Advantage	4.0
Select one of the following:		3.0
HIST 285	Technology in Historical Perspective	
PHIL 315	Engineering Ethics	
PHIL 301	Business Ethics	
Engineering Concentration		3.0
	Term Credits	11.0

Total Credit: 183.0

Facilities

In fall 2013, LeBow College opened its 12-story, Gerri C. LeBow Hall, with a finance trading lab, behavioral studies lab and integrated teaching

technology in all classrooms. The new building features two lecture halls, 15 classrooms of varying sizes and seating configurations, including case study rooms and cluster classrooms designed to facilitate group work. Other amenities consist of extensive areas of student spaces, including 19 collaboration rooms, two quiet study areas, and 3,500 square feet of student lounges. Gerri C. LeBow Hall brings together faculty, students and staff, in a state of the art building on the University City campus. Please visit the LeBow College of Business webpage (http://www.lebow.drexel.edu/about/campuses/philadelphia/location/gerri-c-lebow-hall/) to learn more about Gerri C. LeBow Hall.

Co-Op/Career Opportunities

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities. To learn more about career opportunities and resources see the Career Guides (http://drexel.edu/scdc/career-services/counseling/career-guides/) provided by the Steinbright Career Development Center.

Decision Sciences & MIS Faculty

Murugan Anandarajan, PhD *(Drexel University) Interim Associate Dean for Academic Affairs.* Professor. Cyber crime, strategic management of information technology, unstructured data mining, individual internet usage behavior (specifically abuse and addiction), application of artificial intelligence techniques in forensic accounting and ophthalmology.

Orakwue B. Arinze, PhD *(London School of Economics).* Professor. Client/Server computing; Enterprise Application Software (EAS)/Enterprise Resource Planning Software (ERP); knowledge-based and decision support applications in operations management.

Avijit Banerjee, PhD *(The Ohio State University) Department of Decision Sciences.* Professor. Interface with Marketing, Pricing Revenue Management, Inventory Control, Operations Planning and Scheduling, Production Planning and Control, Supply Chain Management

Hande Benson, PhD *(Princeton University).* Professor. Interior-point methods, Large Scale Optimization, Mathematical Programming, Nonlinear Optimization, Operations and Supply Chain Optimization, Optimization Software, Portfolio Optimization

Qizhi Dai, PhD *(University of Minnesota).* Associate Professor. Business Value of Information Technology, eCommerce, Economics of Information Technology, Information System Management.

Christopher Gaffney, PhD *(Rutgers University, New Brunswick).* Assistant Clinical Professor. Applied Probability, Decision Theory, Risk Analysis

David Gefen, PhD *(Georgia State University) Provost Distinguished Research Professor.* Professor. Strategic IT management; IT development and implementation management; research methodology; managing the adoption of large IT systems, such as MRP II, ERP, and expert systems; research methodology, eCommerce; Online Auctions; Outsourcing; SAS; Technology Adoption.

Seung-Lae Kim, PhD *(Penn State University) Department of Decision Sciences.* Professor. Inventory control, Production Planning and Control, Quality Management, Six-Sigma, Supply Chain Management

Jinwook Lee, PhD *(Rutgers University, New Brunswick).* Assistant Professor. Decision Models, Mathematical Programming, Risk Assessment Stochastic Optimization, Stochastic Processes.

Jeongsik Lee, PhD *(University of California Los Angeles).* Assistant Professor. Economics of Innovation; Social networks; Technology management

Benjamin Lev, PhD *(Case Western Reserve University).* Trustee Professor. Inventory Control, Mathematical Programming, Operations Planning and Scheduling.

Merrill W. Liechty, PhD *(Duke University).* Clinical Professor. Bayesian statistics, portfolio selection, higher moment estimation, higher moment estimation, Markov Chain Monte Carlo

Hazem Maragah, PhD *(Louisiana University) Department of Decision Sciences.* Associate Professor. Statistical quality control, total equity management, applied statistics.

Bruce D. McCullough, PhD *(University of Texas Austin).* Professor. Applied Econometrics, Data Mining, Econometric Techniques, Reliability of Statistical and Econometric Software.

Fariborz Y. Partovi, PhD *(The Wharton School, University of Pennsylvania) Department of Decision Sciences.* Professor. Manufacturing Technology Development, Quality Implementation, Quality Management, Service Management, Six-Sigma

Matthew Reindorp, PhD *(University of Maryland College Park) Interim Department Head, Decision Sciences & MIS.* Associate Clinical Professor. Real Options, Simulation, Stochastic Processes, Supply Chain Finance, Supply Chain Management

Samir Shah, DPS *(Pace University).* Clinical Professor. Drexel University's Provost Fellow India Partnerships

Wenjing Shen, PhD *(University of Michigan) Department of Decision Sciences.* Associate Professor. The interface of operations management and marketing; inventory management; supply chain management.

Min Wang, PhD *(Columbia University) Department of Decision Sciences.* Associate Clinical Professor. Healthcare Operations Management, Inventory Control, Production Planning and Control, Service Management, Supply Chain Management

Chaojiang Wu, PhD *(University of Cincinnnati).* Assistant Professor. Computational Statistics, Data Analytics, Data Mining, Decision Models, Predictive Analytics

Finance

Major: Finance
Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.1399
Standard Occupational Classification (SOC) code: 11-3031;13-2011; 13-2031; 13-2051

About the Program

Students with a major in finance obtain a thorough understanding of the basic concepts, principles, operating procedures, and analytical techniques in the various areas of finance. Throughout the finance

curriculum, students develop and apply quantitative skills for financial decision making within the business environment.

This major prepares students for careers in private business firms, including positions involving forecasting and budgeting for financial resources, cost-effectiveness analysis, control of expenditures, evaluation and financing of new projects, and evaluation of alternative methods of financing. In the investment field, opportunities include positions in security analysis, sales and trading, and investment banking. In the public sector, opportunities include positions at the federal, state, and local government levels.

For more information about the program, contact the Department of Finance (http://www.lebow.drexel.edu/faculty-and-research/disciplines/finance/).

Major Requirements

All core mathematics and statistics courses should be completed before embarking on the upper-level finance major courses. A second course in business statistics, STAT 202 with a minimum grade of C, must be completed as a prerequisite for the major's required courses.

Because of the relevance of financial accounting to the field of finance, it is strongly recommended that finance students also complete ACCT 321 and ACCT 322 (*Financial Reporting I and II*) as two of their free electives.

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Bachelor of Science in Business Administration (BSBA) Degree Requirements

General Education Requirements

CIVC 101	Introduction to Civic Engagement	1.0
COM 270 [WI]	Business Communication	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
MATH 101	Introduction to Analysis I	4.0
MATH 102	Introduction to Analysis II	4.0
PHIL 105	Critical Reasoning	3.0
PSY 101	General Psychology I	3.0
UNIV B101	The Drexel Experience	1.0
UNIV B201 [WI]	Career Management	1.0
English literature elective ENGL 200 through ENGL 399		3.0
Fine Arts elective		3.0
History (HIST) elective		4.0
Select two of the following:		6.0
BIO 100	Applied Cells, Genetics & Physiology	
or BIO 101	Applied Biological Diversity, Ecology & Evolution	
CHEM 151	Applied Chemistry	
PHYS 151	Applied Physics	

General Education Electives

Students select seven (21.0 credits) general education electives, with a minimum of one course in each of the following three categories. Students take the remaining 12.0 credits from any of the topics listed under Additional General Education Electives.

Society and Culture

Communication, English, Fine Arts, Global Studies, Language or Philosophy	3.0
Social Science	
Anthropology, History, Sociology, Political Science, Psychology	3.0
Science	
Computer Science, Information Systems, Science	3.0

Additional General Education Electives

Twelve (12.0) credits must be earned by taking 4 courses from the following topics: Communication, English, Fine Arts, Global Studies, Language, Philosophy, Anthropology, History, Sociology, Political Science, Psychology, Computer Science, Information Systems, Math, Science	12.0

Business Requirements

ACCT 115	Financial Accounting Foundations	4.0
ACCT 116	Managerial Accounting Foundations	4.0
BLAW 201	Business Law I	4.0
BUSN 101	Foundations of Business I (Online students take BUSN 111)	4.0
BUSN 102	Foundations of Business II (Online students take BUSN 112)	4.0
ECON 201	Principles of Microeconomics	4.0
ECON 202	Principles of Macroeconomics	4.0
FIN 301	Introduction to Finance	4.0
INTB 200	International Business	4.0
MGMT 450	Strategy and Competitive Advantage	4.0
MIS 200	Management Information Systems	4.0
MKTG 201	Introduction to Marketing Management	4.0
OPM 200	Operations Management	4.0
ORGB 300 [WI]	Organizational Behavior	4.0
STAT 201	Introduction to Business Statistics	4.0
Select one of the following:		4.0
MGMT 260	Introduction to Entrepreneurship	
MGMT 370	For-Profit Business Consulting	
MGMT 371	Nonprofit Business Consulting	
ORGB 420	Negotiations and Conflict Resolution	
STAT 202	Business Statistics II	

Major requirements

Eight required courses (See Major Requirements list below)	32.0
Free Electives	**18.0**
Total Credits	180.0

Required Finance Major Courses

FIN 302	Intermediate Corporate Finance	4.0
FIN 321	Investment Securities & Markets	4.0
FIN 325	Financial Institutions and Markets	4.0
Select five of the following:		20.0
FIN 323	Risk Management	
FIN 330	Derivative Securities	
FIN 332	Investment Analysis	
FIN 335	Entrepreneurial Finance	
FIN 338	Money and Capital Markets	
FIN 340	Seminar in Finance	
FIN 341	Applied Portfolio Management	
FIN 342	Advanced Portfolio Management	
FIN 345	Mergers & Acquisitions	
FIN 346	Global Financial Management	
FIN 348	Corporate Financial Reporting to Executives	
FIN 440	Credit Risk Analysis	
FIN 450	Personal Wealth Management	
FIN T480	Special Topics in FIN	
REMD 375	Real Estate Finance	
REMD 410	Real Estate Investment and Asset Management	
SMT 375	Sport Finance	
Total Credits		32.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Term 1		Credits

Writing-Intensive Course Requirements

sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Co-op/Career Opportunities

The finance program at Drexel prepares students for careers in corporate financial management, the investment field, and the public sector. It also provides excellent basic preparation for various types of professional certification, including chartered financial analyst (CFA) and certified financial planner (CFP). In money and capital markets, finance students often find careers in banking, securities analysis, and portfolio management. In government, many choose to work for regulatory agencies.

Typical positions include financial analyst, capital budgeting officer, credit analyst, merger and acquisition manager, bank trust officer, portfolio analyst, and personal wealth manager.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) for more detailed information on co-op and post-graduate opportunities. Also visit the Career Guides (http://drexel.edu/scdc/career-services/counseling/career-guides/) provided by the Steinbright Career Development Center.

Facilities

In fall 2013, LeBow College opened its 12-story, Gerri C. LeBow Hall, with a finance trading lab, behavioral studies lab and integrated teaching technology in all classrooms. The new building features two lecture halls, 15 classrooms of varying sizes and seating configurations, including case study rooms and cluster classrooms designed to facilitate group work. Other amenities consist of extensive areas of student spaces, including 19 collaboration rooms, two quiet study areas, and 3,500 square feet of student lounges. Gerri C. LeBow Hall brings together faculty, students and staff, in a state of the art building on the University City campus. Please visit the LeBow College of Business webpage (http://www.lebow.drexel.edu/about/campuses/philadelphia/location/gerri-c-lebow-hall/) to learn more about Gerri C. LeBow Hall.

Finance Faculty

David A. Becher, PhD *(Pennsylvania State University) Department of Finance*. Professor. Mergers and acquisitions, corporate governance, financial institutions.

Jie Cai, PhD *(University of Iowa) Department of Finance*. Associate Professor. Investment banking, mergers and acquisitions, corporate finance and corporate governance.

Thomas Chi-Nan Chiang, PhD *(The Pennsylvania State University) Marshall M. Austin Professor of Finance*. Professor. International finance; time series analysis of financial data; econometric modeling & forecasting; financial markets; international risk management; monetary theory; macroeconomics; emerging markets; and global country funds.

Naveen Daniel, PhD *(Arizona State University)*. Associate Professor. Corporate governance, mutual funds, hedge funds.

Daniel Dorn, PhD *(Columbia University) Department of Finance*. Associate Professor. Capital markets and investments; behavioral finance.

Eliezer M. Fich, PhD *(New York University) Department of Finance*. Professor. Empirical topics in corporate finance.

Michael Gombola, PhD *(University of South Carolina) Department Chair, Finance*. Professor. Stock offerings and repurchases, mergers, acquisitions, and restructuring; working capital management, time series analysis; options and derivatives, financial statement analysis.

Joseph Kalmenovitz, PhD *(New York University)*. Assistant Professor. Financial regulation; corporate finance; law and economics; labor.

Amy Kratchman, MBA *(Drexel University)*. Associate Clinical Professor. Investments; Portfolio Management

Michelle Lowry, PhD *(University of Rochester) TD Bank Endowed Professor*. Professor. Empirical corporate finance, including initial public offerings, mergers, and corporate governance

Edward Nelling, PhD, CFA *(University of Pennsylvania-Wharton) Department Head*. Professor. Investments; corporate finance; real estate finance.

Gregory Nini, PhD *(The Wharton School, University of Pennsylvania)*. Assistant Professor. Creditor control rights, corporate governance, and firm value; insurance economics.

Patricia Robak, PhD *(Lehigh University) Department of Finance*. Clinical Professor. Investments, money and banking, international finance.

Diana Sandberg, MS *(Drexel University)*. Associate Clinical Professor. Portfolio management, derivatives, investment management.

Bradford Sodowick, MBA, MD *(University of Pennsylvania)*. Assistant Clinical Professor. Corporate finance, healthcare finance.

Samuel H. Szewczyk, PhD *(Pennsylvania State University)*. Associate Professor. Corporate governance, mergers and acquisitions, financial engineering, investment banking, financial institutions.

George Tsetsekos, PhD *(The University of Tennessee) Dean Emeritus, LeBow College of Business; Francis Professor of Finance*. Professor. Valuation and corporate restructuring, treasury and risk/hedging operations, investment banking, securitization, emerging capital markets, multinational finance, bank asset-liability management.

Emeritus Faculty

Ralph Walkling, PhD *(University of Maryland) Stratakis Professor of Corporate Governance, Department of Finance*. Professor Emeritus. Corporate governance, mergers and acquisitions.

General Business

Major: General Business
Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.0201
Standard Occupational Classification (SOC) code: 11-1021; 11-2022; 11-3011; 11-9199

About the Program

The major in general business equips students with a thorough understanding of theory and practice in the fundamental areas of business such as accounting, economics, finance, management, and marketing. This major is intended for business students who wish to gain breadth within their undergraduate studies. Students will develop the skills and competencies necessary for success across a diverse spectrum of business organizations.

Students selecting the major in general business should choose eight courses from at least five of the following fields: accounting (ACCT (p. 751)), economics (ECON (p. 880)), finance (FIN (p. 947)), human resource management (HRMT (p. 992)), international business (INTB (p. 1005)), legal studies (BLAW (p. 1013)), management (MGMT (p. 1014)), marketing (MKTG (p. 1020)), management information systems (MIS (p. 1016)), business statistics (STAT (p. 824)), organizational behavior (ORGB (p. 1067)), operations research (OPR (p. 1066)), operations management (OPM (p. 1065)), real estate management and development (REMD (p. 383)) and sport business (SPBS (p. 1120)).

Please note that students pursuing this degree option are not eligible to obtain a business co-major or business minor.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Bachelor of Science in Business Administration (BSBA) Degree Requirements

General Education Requirements		
CIVC 101	Introduction to Civic Engagement	1.0
COM 270 [WI]	Business Communication	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I

Free Electives		**18.0**
Total Credits		180.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing

Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Eric Rios, MBA, M.ED *(Eastern University, Drexel University)*. Assistant Clinical Professor. Research on the needs of first generation college students

Legal Studies

Major: Legal Studies
Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 22.0201
Standard Occupational Classification (SOC) code: 23-1011

About the Program

Law is pervasive in all aspects of business and life. The major in legal studies provides Drexel University students with the ability to recognize the influence of the law, understand its application and make informed and intelligent decisions regarding the course of action to take.

Although the major in legal studies will benefit those interested in pursuing a career in law, it is not intended solely for students aspiring to attend law school. This major enhances any business student's perspective on the impact of legal issues within their respective professions.

Students will learn the basics of various areas of the law and the legal environment of business and will learn to identify the factual situation in which to apply that law. They will be able to analyze the facts, determine which aspects of the law are pertinent, apply the law to the facts, and draw a conclusion. Clarity of thought, reasoning and expression (both oral and written) are additional results of this process.

Emphasis is on critical thinking as a tool for problem solving, so that whatever the discipline, students will be able to identify and prevent

possible problems or seek proper and timely assistance for critical decision making.

Additional Information

For more information about the program, contact the Department of Legal Studies (https://www.lebow.drexel.edu/faculty-and-research/disciplines/legal-studies/).

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Facilities

In fall 2013, LeBow College opened its 12-story, Gerri C. LeBow Hall, with a finance trading lab, behavioral studies lab and integrated teaching technology in all classrooms. The new building features two lecture halls, 15 classrooms of varying sizes and seating configurations, including case study rooms and cluster classrooms designed to facilitate group work. Other amenities consist of extensive areas of student spaces, including 19 collaboration rooms, two quiet study areas, and 3,500 square feet of student lounges. Gerri C. LeBow Hall brings together faculty, students and staff, in a state of the art building on the University City campus. Please visit the LeBow College of Business webpage (http://www.lebow.drexel.edu/about/campuses/philadelphia/location/gerri-c-lebow-hall/) to learn more about Gerri C. LeBow Hall.

Co-Op/Career Opportunities

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities. To learn more about career opportunities and resources see the Career Guides (http://drexel.edu/scdc/career-services/counseling/career-guides/) provided by the Steinbright Career Development Center.

Legal Studies Faculty

Roger D. Collons, JD, PhD *(George Washington University; Georgia State University) Department of Legal Studies.* Professor. Patent law, preservation of wealth.

Richard P. Freedman, JD, LLM *(Temple University) Head of the Department of Legal Studies.* Associate Professor. Taxation, corporate and business matters, real estate, estate planning, estate administration and elder law.

Andrew Genetta, JD *(Cleveland-Marshall College of Law).* Associate Clinical Professor.

Rosalie S. Kreider, JD *(Villanova University) Department of Legal Studies.* Clinical Professor. Business law, international business law.

Natalie Pedersen, JD *(Harvard University) Department of Legal Studies.* Associate Professor. Employment law; employment discrimination; implicit bias.

Steven R. Sher, JD *(Georgetown University Law Center) Department of Legal Studies.* Associate Professor. Business law, product liability, negligence, medical malpractice.

Emeritus Faculty

Neal Orkin, JD *(Temple University) Department of Legal Studies.* Associate Professor Emeritus. Intellectual property rights of employed inventors and authors; labor relations.

Management Information Systems

Major: Management Information Systems
Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.1201
Standard Occupational Classification (SOC) code:11-3021

About the Major

Management Information Systems (MIS) is about managing how and why people, organizations, and markets apply, design, and deploy information technology to achieve tactical and strategic business goals. MIS is about the integration of both areas of expertise and applying the power of technology to solving business problems.

The major in management information systems prepares students for opportunities in the information technology field and business. Aimed at producing graduates who bridge the gap between technical knowledge and business functions, the program focuses on a mix of applied computer systems content, interpersonal interaction, and a practical business orientation.

While administered by the Department of Decision Sciences and MIS (https://www.lebow.drexel.edu/academics/undergraduate/areas-of-study/management-information-systems/), the major in management information systems is interdisciplinary in nature. The courses may be taken by students in other colleges and departments who wish to complement other computer-related studies with business-oriented information systems subjects.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Bachelor of Science in Business Administration (BSBA) Degree Requirements

General Education Requirements		
CIVC 101	Introduction to Civic Engagement	1.0
COM 270 [WI]	Business Communication	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
MATH 101	Introduction to Analysis I	4.0
MATH 102	Introduction to Analysis II	4.0
PHIL 105	Critical Reasoning	3.0
PSY 101	General Psychology I	3.0
UNIV B101	The Drexel Experience	1.0

UNIV B201 [WI]	Career Management	1.0
English literature elective ENGL 200 through ENGL 399		3.0
Fine Arts elective		3.0
History (HIST) elective		4.0
Select two of the following:		6.0
BIO 100	Applied Cells, Genetics & Physiology	
or BIO 101	Applied Biological Diversity, Ecology & Evolution	
CHEM 151	Applied Chemistry	
PHYS 151	Applied Physics	
General Education Electives		
Students select seven (21.0 credits) general education electives, with a minimum of one course in each of the following three categories. Students take the remaining 12.0 credits from any of the topics listed under Additional General Education Electives.		
Society and Culture		
Communication, English, Fine Arts, Global Studies, Language or Philosophy		3.0
Social Science		
Anthropology, History, Sociology, Political Science, Psychology		3.0
Science		
Computer Science, Information Systems, Science		3.0
Additional General Education Electives		
Twelve (12.0) credits must be earned by taking 4 courses from the following topics: Communication, English, Fine Arts, Global Studies, Language, Philosophy, Anthropology, History, Sociology, Political Science, Psychology, Computer Science, Information Systems, Math, Science		12.0
Business Requirements		
ACCT 115	Financial Accounting Foundations	4.0
ACCT 116	Managerial Accounting Foundations	4.0
BLAW 201	Business Law I	4.0
BUSN 101	Foundations of Business I (Online students take BUSN 111)	4.0
BUSN 102	Foundations of Business II (Online students take BUSN 112)	4.0
ECON 201	Principles of Microeconomics	4.0
ECON 202	Principles of Macroeconomics	4.0
FIN 301	Introduction to Finance	4.0
INTB 200	International Business	4.0
MGMT 450	Strategy and Competitive Advantage	4.0
MIS 200	Management Information Systems	4.0
MKTG 201	Introduction to Marketing Management	4.0
OPM 200	Operations Management	4.0
ORGB 300 [WI]	Organizational Behavior	4.0
STAT 201	Introduction to Business Statistics	4.0
Select one of the following:		4.0
MGMT 260	Introduction to Entrepreneurship	
MGMT 370	For-Profit Business Consulting	
MGMT 371	Nonprofit Business Consulting	
ORGB 420	Negotiations and Conflict Resolution	
STAT 202	Business Statistics II	
Major Requirements		
Eight required courses (See Major Requirements list below)		32.0
Free Electives		**18.0**
Total Credits		180.0

Management Information Systems Major Required Courses		
MIS 342	Systems Analysis and Design	4.0
MIS 343	Database Design and Implementation	4.0
Select six of the following: *		24.0
MIS 346	Management Information Systems Strategy	
MIS 347	Domestic and Global Outsourcing Management	
MIS 348	Visual Basic Database Programming for Business	
MIS 349	Predictive Business Analytics with Relational Database Data	
MIS 351	Introduction to Programming for Business in C#	
MIS 352	Advanced Business Programming with ASP.Net	
MIS 361	Information System Project Management	
Total Credits		32.0

*   Students select from the following courses, or any other course at LeBow with the program manager's permission.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Term 1		Credits
BUSN 101	Foundations of Business I	4.0

Co-op/Career Opportunities

Career opportunities exist in a wide range of business settings. Students prepare for careers as managers of information resource units, or as staff members who develop and support computer systems.

Recent Management Information System (MIS) graduates have gone on to work for many types of businesses and other organizations. Some job titles include: Management Consultants, IS Business Analysts, IT Project Management, IT Consultants, IT Systems Managers, Systems Analysts. Some MIS students also choose to continue their studies with an MBA; recent Drexel MIS graduates are now attending Columbia, Princeton, and the University of Pennsylvania.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities. Also visit the Career Guides (http://drexel.edu/scdc/career-services/counseling/career-guides/) provided by the Steinbright Career Development Center.

Facilities

In fall 2013, LeBow College opened its 12-story, Gerri C. LeBow Hall, with a finance trading lab, behavioral studies lab and integrated teaching technology in all classrooms. The new building features two lecture halls, 15 classrooms of varying sizes and seating configurations, including case study rooms and cluster classrooms designed to facilitate group work. Decision Sciences & MIS Faculty

Murugan Anandarajan, PhD *(Drexel University) Interim Associate Dean for Academic Affairs.* Professor. Cyber crime, strategic management of information technology, unstructured data mining, individual internet usage behavior (specifically abuse and addiction), application of artificial intelligence techniques in forensic accounting and ophthalmology.

Orakwue B. Arinze, PhD *(London School of Economics).* Professor. Client/Server computing; Enterprise Application Software (EAS)/ Enterprise Resource Planning Software (ERP); knowledge-based and decision support applications in operations management.

Avijit Banerjee, PhD *(The Ohio State University) Department of Decision Sciences.* Professor. Interface with Marketing, Pricing Revenue

Management, Inventory Control, Operations Planning and Scheduling, Production Planning and Control, Supply Chain Management

Hande Benson, PhD *(Princeton University)*. Professor. Interior-point methods, Large Scale Optimization, Mathematical Programming, Nonlinear Optimization, Operations and Supply Chain Optimization, Optimization Software, Portfolio Optimization

Qizhi Dai, PhD *(University of Minnesota)*. Associate Professor. Business Value of Information Technology, eCommerce, Economics of Information Technology, Information System Management.

Christopher Gaffney, PhD *(Rutgers University, New Brunswick)*. Assistant Clinical Professor. Applied Probability, Decision Theory, Risk Analysis

David Gefen, PhD *(Georgia State University) Provost Distinguished Research Professor*. Professor. Strategic IT management; IT development and implementation management; research methodology; managing the adoption of large IT systems, such as MRP II, ERP, and expert systems; research methodology, eCommerce; Online Auctions; Outsourcing; SAS; Technology Adoption.

Seung-Lae Kim, PhD *(Penn State University) Department of Decision Sciences*. Professor. Inventory control, Production Planning and Control, Quality Management, Six-Sigma, Supply Chain Management

Jinwook Lee, PhD *(Rutgers University, New Brunswick)*. Assistant Professor. Decision Models, Mathematical Programming, Risk Assessment Stochastic Optimization, Stochastic Processes.

Jeongsik Lee, PhD *(University of California Los Angeles)*. Assistant Professor. Economics of Innovation; Social networks; Technology management

Benjamin Lev, PhD *(Case Western Reserve University)*. Trustee Professor. Inventory Control, Mathematical Programming, Operations Planning and Scheduling.

Merrill W. Liechty, PhD *(Duke University)*. Clinical Professor. Bayesian statistics, portfolio selection, higher moment estimation, higher moment estimation, Markov Chain Monte Carlo

Hazem Maragah, PhD *(Louisiana University) Department of Decision Sciences*. Associate Professor. Statistical quality control, total equity management, applied statistics.

Bruce D. McCullough, PhD *(University of Texas Austin)*. Professor. Applied Econometrics, Data Mining, Econometric Techniques, Reliability of Statistical and Econometric Software.

Fariborz Y. Partovi, PhD *(The Wharton School, University of Pennsylvania) Department of Decision Sciences*. Professor. Manufacturing Technology Development, Quality Implementation, Quality Management, Service Management, Six-Sigma

Matthew Reindorp, PhD *(University of Maryland College Park) Interim Department Head, Decision Sciences & MIS*. Associate Clinical Professor. Real Options, Simulation, Stochastic Processes, Supply Chain Finance, Supply Chain Management

Samir Shah, DPS *(Pace University)*. Clinical Professor. Drexel University's Provost Fellow India Partnerships

Wenjing Shen, PhD *(University of Michigan) Department of Decision Sciences*. Associate Professor. The interface of operations management and marketing; inventory management; supply chain management.

Min Wang, PhD *(Columbia University) Department of Decision Sciences*. Associate Clinical Professor. Healthcare Operations Management, Inventory Control, Production Planning and Control, Service Management, Supply Chain Management

Chaojiang Wu, PhD *(University of Cincinnnati)*. Assistant Professor. Computational Statistics, Data Analytics, Data Mining, Decision Models, Predictive Analytics

Marketing

Major: Marketing
Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.1401
Standard Occupational Classification (SOC) code: 11-2021

About the Program

Marketing is one of the most dynamic areas of business because it focuses on satisfying the ever-changing wants and needs of people. Professional marketers research and identify target audiences, develop products and services, formulate pricing strategies, develop advertising and promotional campaigns, and implement methods of distribution so that customers receive products and services where and when they want them. Perhaps the most basic marketing skill is to be able to see an organization's activities from the customer's viewpoint.

A major in marketing prepares students for the many opportunities that exist in product and brand management, marketing research, advertising, digital marketing, customer analytics, retailing, channel management, logistics and physical distribution, professional personal selling and sales management, purchasing, wholesaling, marketing planning and analysis, public relations, marketing entrepreneurship, and new-product development.

Additional Information

For more information about the major, contact the Department of Marketing (http://www.lebow.drexel.edu/academics/disciplines/marketing/).

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Co-op/Career Opportunities

Marketing opportunities abound in all types of organizations — including manufacturing firms, wholesalers, retail stores, Internet firms, service organizations, banking and financial institutions, law and accounting firms, hospitals, colleges and universities, museums, chambers of commerce, professional sports teams, government agencies, charitable foundations, churches, and countless other settings. Any organization that seeks to reach a particular audience or consumer group needs the skills of marketers.

There are many specialized jobs in marketing, including product and brand managers, marketing researchers, advertising executives, pricing analysts, direct (non-store) marketers, Internet marketers, professional buyers, manufacturing agents, transportation and distribution managers, industrial and consumer salespeople, stockbrokers, sales managers, college enrollment managers, wholesalers, retailers, marketing planners, sales forecasters, marketing cost analysts, public relations managers, media and event planners, sales promotion managers, trade show or exhibit marketers, new product development managers, management consultants, digital marketers, marketing data analytics and international marketers.

Co-op Experiences

When students complete their co-op jobs, they are asked to write an overview of their experiences.These brief quotes are taken from some recent student reports:

Marketing research assistant, manufacturing firm: "Assisted in the development of new products, which included gathering information concerning competitive products, markets, pricing. Conducted testing of new products. Assisted in special projects. . .gained good experience."

Retail analyst, producer of luxury home products: "Supported the sales and production divisions.Tracked weekly and monthly sales information. Developed product placement charts for forecasting. Assisted in maintaining productivity reports. Developed and presented a window treatment market analysis."

Activity-based management (ABM) analyst, pharmaceuticals manufacturer: "Supported the ABM team (5 people). Member of two sub-project teams. Maintained full participation on both sub-teams while still maintaining responsibilities on core team. Developed proficiencies in re-engineering methodologies, activity-based costing methodologies, and support of change management. . .included as a full team member. "

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities. Also visit the Career Guides (http://drexel.edu/scdc/career-services/counseling/career-guides/) provided by the Steinbright Career Development Center.

Facilities

In fall 2013, LeBow College opened its 12-story, Gerri C. LeBow Hall, with a finance trading lab, behavioral studies lab and integrated teaching technology in all classrooms. The new building features two lecture halls, 15 classrooms of varying sizes and seating configurations, including case study rooms and cluster classrooms designed to facilitate group work. Other amenities consist of extensive areas of student spaces, including 19 collaboration rooms, two quiet study areas, and 3,500 square feet of student lounges. Gerri C. LeBow Hall brings together faculty, students and staff, in a state of the art building on the University City campus. Please visit the LeBow College of Business webpage (http://www.lebow.drexel.edu/about/campuses/philadelphia/location/gerri-c-lebow-hall/) to learn more about Gerri C. LeBow Hall.

Marketing Faculty

Rolph E. Anderson, PhD *(University of Florida) Royal H. Gibson Sr. Professor of Marketing*. Professor. Personal selling and sales management; multivariate data analysis; customer relationship management (CRM); customer satisfaction and customer loyalty.

Trina larsen Andras, PhD *(University of Texas at Austin) Head of the Department of Marketing; Academic Director, Center for Corporate Research Management*. Professor. International marketing, marketing channels management, cross-cultural communication.

Boryana Dimitrova, PhD *(Drexel University)*. Assistant Clinical Professor. Global marketing, inter-organizational, marketing channels, retailing and retail management.

Michaela Draganska, PhD *(Kellogg School of Management, Northwestern University) Department of Marketing*. Associate Professor. Advertising strategy, product assortment decisions, new product positioning, distribution channels. Marketing analytics and big data, marketing communications, marketing research, marketing strategy, technology and innovation.

Lawrence Duke, MBA *(Harvard Business School)*. Associate Clinical Professor. International marketing and strategy, new product development, business-to-business marketing, marketing of financial services.

Elea Feit, PhD *(University of Michigan) Department of Marketing*. Assistant Professor. Bayesian hierarchical models, interactive (eCommerce), marketing research, missing data.

William Halvena, PhD *(Columbia University)*. Associate Clinical Professor. Quantitative Marketing, Marketing Research, Consumer Behavior

Michael Howley, PhD *(Arizona State University)*. Clinical Professor. Investments in dissatisfied customers, service recovery, health-care marketing, marketing of service organizations, financial consequences of marketing actions.

Yanliu Huang, PhD *(The Wharton School, University of Pennsylvania)*. Associate Professor. Consumer n-store decision making, consumer planning, health marketing, memory and learning.

Daniel Korschun, PhD *(Boston University)*. Associate Professor. Brand and corporate reputation management, corporate social responsibility, internal marketing, marketing strategy, relationship marketing.

Bert Rosenbloom, PhD *(Temple University) Rauth Chair of Electronic Commerce*. Professor. Marketing channels and distribution systems, electronic commerce, inter-organizational marketing management, wholesale and retail distribution, marketing strategy and planning.

Prashant Srivastava, PhD *(Oklahoma State University)*. Associate Clinical Professor. New product development, supply chain management, B2B marketing, sales, strategic alliances, organizational learning, market orientation, healthcare marketing, and database marketing.

Rajneesh Suri, PhD *(University of Illinois at Urbana-Champaign) Associate Dean for Research, Marketing Department*. Professor. Pricing, promotions and branding.

Srinivasan Swaminathan, PhD *(University of Texas-Austin)*. Professor. Marketing research and strategy, pricing and promotions, loyalty and satisfaction.

Chen Wang, PhD *(University of British Columbia)*. Associate Professor. Consumer curiosity, self-regulation and goals, sensory perception.

Operations & Supply Chain Management

Major: Operations & Supply Chain Management
Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.0205
Standard Occupational Classification (SOC) code: 11-3051

About the Program

The major in Operations & Supply Chain Management is designed to prepare students for eventual participation as managers or specialists in the operations activity of industrial and service systems. Today, companies worldwide are competing in very different ways and very different environments than they were in the past because of technological advances. Operations, Supply Chain Management, and Logistics are key functions through which companies can gain strategic advantage, and companies are hiring graduates to drive innovations for their new economic surroundings. In this major, courses drawing on the foundations and the state-of-the-art for both production and service industries allow students to craft a course of study that can meet industry standards.

Additional Information

For additional information about the program, students should contact the Department of Decision Sciences and MIS (https://www.lebow.drexel.edu/academics/undergraduate/areas-of-study/operations-management/).

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Bachelor of Science in Business Administration (BSBA) Degree Requirements

General Education Requirements		
CIVC 101	Introduction to Civic Engagement	1.0
COM 270 [WI]	Business Communication	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
MATH 101	Introduction to Analysis I	4.0
MATH 102	Introduction to Analysis II	4.0
PHIL 105	Critical Reasoning	3.0
PSY 101	General Psychology I	3.0
UNIV B101	The Drexel Experience	1.0
UNIV B201 [WI]	Career Management	1.0
English literature elective ENGL 200 through ENGL 399		3.0
Fine Arts elective		3.0

History (HIST) elective		4.0
Select two of the following:		6.0
BIO 100	Applied Cells, Genetics & Physiology	
or BIO 101	Applied Biological Diversity, Ecology & Evolution	
CHEM 151	Applied Chemistry	
PHYS 151	Applied Physics	

General Education Electives

Students select seven (21.0 credits) general education electives, with a minimum of one course in each of the following three categories. Students take the remaining 12.0 credits from any of the topics listed under Additional General Education Electives.		
Society and Culture		
Communication, English, Fine Arts, Global Studies, Language or Philosophy		3.0
Social Science		
Anthropology, History, Sociology, Political Science, Psychology		3.0
Science		
Computer Science, Information Systems, Science		3.0

Additional General Education Electives

| Twelve (12.0) credits must be earned by taking 4 courses from the following topics: Communication, English, Fine Arts, Global Studies, Language, Philosophy, Anthropology, History, Sociology, Political Science, Psychology, Computer Science, Information Systems, Math, Science | | 12.0 |

Business Requirements

ACCT 115	Financial Accounting Foundations	4.0
ACCT 116	Managerial Accounting Foundations	4.0
BLAW 201	Business Law I	4.0
BUSN 101	Foundations of Business I (Online students take BUSN 111)	4.0
BUSN 102	Foundations of Business II (Online students take BUSN 112)	4.0
ECON 201	Principles of Microeconomics	4.0
ECON 202	Principles of Macroeconomics	4.0
FIN 301	Introduction to Finance	4.0
INTB 200	International Business	4.0
MGMT 450	Strategy and Competitive Advantage	4.0
MIS 200	Management Information Systems	4.0
MKTG 201	Introduction to Marketing Management	4.0
OPM 200	Operations Management	4.0
ORGB 300 [WI]	Organizational Behavior	4.0
STAT 201	Introduction to Business Statistics	4.0
Select one of the following:		4.0
MGMT 260	Introduction to Entrepreneurship	
MGMT 370	For-Profit Business Consulting	
MGMT 371	Nonprofit Business Consulting

Co-op/Career Opportunities

Operations & Supply Chain Management students go on to work in a variety of fields, including manufacturing, product planning and research and development. The #4 and #6 on the Top 10 Best Business Jobs in the US News and World Report rankings are Operations Analysts and Logistics Analysts. According to the Bureau of Labor Statistics (https://www.bls.gov/), the number of jobs in Operations & Supply Chain Management will grow 13-22% over the next 7 years. The Operations & Supply Chain Management major is the top BSBA Major in LeBow for job placement satisfaction. The average starting salary of our graduates is $50,667.

Co-op Placements

Operations & Supply Chain Management majors land some of the most prestigious and highest paying co-op assignments. Our co-op employers include:

- Estee Lauder
- PECO Energy
- Johnson & Johnson
- Bimbo Bakeries
- Exelon Corporation

The average weekly co-op salary is $517.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities. Also visit the Career Guides (http://drexel.edu/scdc/career-services/counseling/career-guides/) provided by the Steinbright Career Development Center.

Decision Sciences & MIS Faculty

Murugan Anandarajan, PhD *(Drexel University) Interim Associate Dean for Academic Affairs.* Professor. Cyber crime, strategic management of information technology, unstructured data mining, individual internet usage behavior (specifically abuse and addiction), application of artificial intelligence techniques in forensic accounting and ophthalmology.

Orakwue B. Arinze, PhD *(London School of Economics).* Professor. Client/Server computing; Enterprise Application Software (EAS)/Enterprise Resource Planning Software (ERP); knowledge-based and decision support applications in operations management.

Avijit Banerjee, PhD *(The Ohio State University) Department of Decision Sciences.* Professor. Interface with Marketing, Pricing Revenue Management, Inventory Control, Operations Planning and Scheduling, Production Planning and Control, Supply Chain Management

Hande Benson, PhD *(Princeton University).* Professor. Interior-point methods, Large Scale Optimization, Mathematical Programming, Nonlinear Optimization, Operations and Supply Chain Optimization, Optimization Software, Portfolio Optimization

Qizhi Dai, PhD *(University of Minnesota).* Associate Professor. Business Value of Information Technology, eCommerce, Economics of Information Technology, Information System Management.

Christopher Gaffney, PhD *(Rutgers University, New Brunswick).* Assistant Clinical Professor. Applied Probability, Decision Theory, Risk Analysis

David Gefen, PhD *(Georgia State University) Provost Distinguished Research Professor*. Professor. Strategic IT management; IT development and implementation management; research methodology; managing the adoption of large IT systems, such as MRP II, ERP, and expert systems; research methodology, eCommerce; Online Auctions; Outsourcing; SAS; Technology Adoption.

Seung-Lae Kim, PhD *(Penn State University) Department of Decision Sciences*. Professor. Inventory control, Production Planning and Control, Quality Management, Six-Sigma, Supply Chain Management

Jinwook Lee, PhD *(Rutgers University, New Brunswick)*. Assistant Professor. Decision Models, Mathematical Programming, Risk Assessment Stochastic Optimization, Stochastic Processes.

Jeongsik Lee, PhD *(University of California Los Angeles)*. Assistant Professor. Economics of Innovation; Social networks; Technology management

Benjamin Lev, PhD *(Case Western Reserve University)*. Trustee Professor. Inventory Control, Mathematical Programming, Operations Planning and Scheduling.

Merrill W. Liechty, PhD *(Duke University)*. Clinical Professor. Bayesian statistics, portfolio selection, higher moment estimation, higher moment estimation, Markov Chain Monte Carlo

Hazem Maragah, PhD *(Louisiana University) Department of Decision Sciences*. Associate Professor. Statistical quality control, total equity management, applied statistics.

Bruce D. McCullough, PhD *(University of Texas Austin)*. Professor. Applied Econometrics, Data Mining, Econometric Techniques, Reliability of Statistical and Econometric Software.

Fariborz Y. Partovi, PhD *(The Wharton School, University of Pennsylvania) Department of Decision Sciences*. Professor. Manufacturing Technology Development, Quality Implementation, Quality Management, Service Management, Six-Sigma

Matthew Reindorp, PhD *(University of Maryland College Park) Interim Department Head, Decision Sciences & MIS*. Associate Clinical Professor. Real Options, Simulation, Stochastic Processes, Supply Chain Finance, Supply Chain Management

Samir Shah, DPS *(Pace University)*. Clinical Professor. Drexel University's Provost Fellow India Partnerships

Wenjing Shen, PhD *(University of Michigan) Department of Decision Sciences*. Associate Professor. The interface of operations management and marketing; inventory management; supply chain management.

Min Wang, PhD *(Columbia University) Department of Decision Sciences*. Associate Clinical Professor. Healthcare Operations Management, Inventory Control, Production Planning and Control, Service Management, Supply Chain Management

Chaojiang Wu, PhD *(University of Cincinnnati)*. Assistant Professor. Computational Statistics, Data Analytics, Data Mining, Decision Models, Predictive Analytics

Organizational Management

Co-Major: Organizational Management
Degree Awarded: Bachelor of Science in Business Administration (BSBA)

Calendar Type: Quarter
Total Credit Hours: 186.0
Classification of Instructional Programs (CIP) code: 52.0206
Standard Occupational Classification (SOC) code: 11-9199; 11-9151

The Organizational Management program is a co-major that must be taken in conjunction with the following majors Accounting, Finance, International Business, Legal Studies, Management Information Systems, Marketing, Operations and Supply Chain Management, Real Estate Management and Development or Sport Business.

About the Program

The co-major in "Organizational Management" is designed for students with varied backgrounds who seek to develop knowledge and skills in leadership, teamwork, and communication. These organizational management skills are intended to supplement core technical skills such as Finance, Accounting, Marketing, etc. The curriculum provides students with a foundation of skills for effectively working with others in a variety of contexts and situations.

Learning Goals

Upon completing the co-major, students will be able to:

- Discover important insights about oneself as a leader and develop a self-awareness of strengths and opportunities for personal growth
- Manage career and networks to achieve personal growth
- Develop the skills and competencies needed to lead effectively in today's dynamic and diverse environment
- Increase conceptual understanding of leadership in different types of situations and facing different types of challenges
- Learn how to influence and manage conflict within organizations
- Identify various approaches and imperatives for leading teams
- Recognize ethical dilemmas in management practice and how to infuse ethical standards within a group or team
- Learn how to effectively function within a team and lead a team for success
- Recognize how human factors can both distort and enhance the process of managerial decision making
- Understand how the changing nature of work (e.g., global, technological, etc.) influences choices about design and practices within organizations

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Wendy van Ginkel, PhD *(Eramus University Rotterdam) Management Department*. Associate Professor. Team dynamics; Knowledge sharing; Diversity; Team cognition.

Daan van Knippenberg, PhD *(Leiden University) Joseph F. Rocereto Professor, Academic Director of the Institute of Strategic Leadership*. Professor. Leadership; Diversity; Teams; Team Innovation.

Real Estate Management and Development

Major: Real Estate Management and Development
Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.1501
Standard Occupational Classification (SOC) code: 11-9141

About the Program

Drexel's Real Estate Management and Development major encompasses foundation courses in real estate operations, management and development, including specialized courses in sustainability, asset management, real finance, and law. The major balances students' need for critical thinking and business acumen skills by including core business, social sciences, and humanities courses. Students in this full-time, face-to-face major will benefit from Philadelphia's outdoor classroom – its diverse real estate market. The curriculum also includes a co-op experience that partners classroom knowledge with experiential learning to further develop the requisite skills students need to succeed

as real estate management and development professionals in the built environment.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Bachelor of Science in Business Administration (BSBA) Degree Requirements

General Education Requirements

CIVC 101	Introduction to Civic Engagement	1.0
COM 270 [WI]	Business Communication	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
MATH 101	Introduction to Analysis I	4.0
MATH 102	Introduction to Analysis II	4.0
PHIL 105	Critical Reasoning	3.0
PSY 101	General Psychology I	3.0
UNIV B101	The Drexel Experience	1.0
UNIV B201 [WI]	Career Management	1.0
English literature elective ENGL 200 through ENGL 399		3.0
Fine Arts elective		3.0
History (HIST) elective		4.0
Select two of the following:		6.0
BIO 100	Applied Cells, Genetics & Physiology	
or BIO 101	Applied Biological Diversity, Ecology & Evolution	
CHEM 151	Applied Chemistry	
PHYS 151	Applied Physics	

General Education Electives

Students select seven (21.0 credits) general education electives, with a minimum of one course in each of the following three categories. Students take the remaining 12.0 credits from any of the topics listed under Additional General Education Electives.

Society and Culture	
Communication, English, Fine Arts, Global Studies, Language or Philosophy	3.0
Social Science	
Anthropology, History, Sociology, Political Science, Psychology	3.0
Science	
Computer Science, Information Systems, Science	3.0

Additional General Education Electives

Twelve (12.0) credits must be earned by taking 4 courses from the following topics: Communication, English, Fine Arts, Global Studies, Language, Philosophy, Anthropology, History, Sociology, Political Science, Psychology, Computer Science, Information Systems, Math, Science	12.0

Business Requirements

ACCT 115	Financial Accounting Foundations	4.0
ACCT 116	Managerial Accounting Foundations	4.0
BLAW 201	Business Law I	4.0
BUSN 101	Foundations of Business I (Online students take BUSN 111)	4.0
BUSN 102	Foundations of Business II (Online students take BUSN 112)	4.0
ECON 201	Principles of Microeconomics	4.0
ECON 202	Principles of Macroeconomics	4.0
FIN 301	Introduction to Finance	4.0
INTB 200	International Business	4.0
MGMT 450	Strategy and Competitive Advantage	4.0

Patricia Robak, PhD *(Lehigh University) Department of Finance*. Clinical Professor. Investments, money and banking, international finance.

Diana Sandberg, MS *(Drexel University)*. Associate Clinical Professor. Portfolio management, derivatives, investment management.

Bradford Sodowick, MBA, MD *(University of Pennsylvania)*. Assistant Clinical Professor. Corporate finance, healthcare finance.

Samuel H. Szewczyk, PhD *(Pennsylvania State University)*. Associate Professor. Corporate governance, mergers and acquisitions, financial engineering, investment banking, financial institutions.

George Tsetsekos, PhD *(The University of Tennessee) Dean Emeritus, LeBow College of Business; Francis Professor of Finance*. Professor. Valuation and corporate restructuring, treasury and risk/hedging

operations, investment banking, securitization, emerging capital markets, multinational finance, bank asset-liability management.

Emeritus Faculty

Ralph Walkling, PhD *(University of Maryland) Stratakis Professor of Corporate Governance, Department of Finance.* Professor Emeritus. Corporate governance, mergers and acquisitions.

Sport Business

Major: Sport Business
Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 31.0504
Standard Occupational Classification (SOC) code:

About the Program

The BSBA in Sport Business is designed for students who plan to pursue careers in the sport industry. The major draws on the strengths of its own offerings and the required business administration core.

Students will master the knowledge and skills necessary for success in professional sports organizations, collegiate athletics, sport media companies, and businesses that service and are complimentary to the sport industry. The co-op option engages students with extensive experiential learning. Our Philadelphia location is optimal for accessing opportunities throughout the Northeast corridor and beyond.

The program offers options covering a wide range of areas of study; students are able to match their skills, abilities, and interests with a specific niche within the sport industry. Students may choose a minor or create their own particular specialization and area of expertise, in consultation with our department's academic advisor and faculty.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Co-op/Career Opportunities

Co-op Opportunities

Drexel University has long been known for its co-operative education programs, through which students combine periods of full-time, career related employment with their studies. Co-op employment for sport business students is central to their experience.

With the BSBA sport business major, co-operative education gives students experience in a range of sport related jobs and settings. Students may be placed with professional athletic teams, university athletics and recreation programs, or with organizations aligned with sports (e.g., a sports agency). Co-op experiences are available with many of the region's sports, organizations, including professional sports teams, college athletic departments, law firms, and sports agencies, sports media networks, non-profit organizations, youth organizations, sports complexes, and others.

Career Opportunities

The multidisciplinary nature of the sport business program allows its graduates to be ready for a wide range of sport-related professions, including athletic management, the sport industry at all levels (professional, semi-professional, collegiate) within a range of organizations (public, private, professional, and amateur).

Sport business graduates are uniquely qualified for leadership, or support positions in professional and amateur sports organizations, college sports, and in other sports venues. The program also prepares students for graduate or professional study in a variety of fields including sport management, law, and business.

Facilities

In fall 2013, LeBow College opened its 12-story, Gerri C. LeBow Hall, with a finance trading lab, behavioral studies lab and integrated teaching technology in all classrooms. The new building features two lecture halls, 15 classrooms of varying sizes and seating configurations, including case study rooms and cluster classrooms designed to facilitate group work. Other amenities consist of extensive areas of student spaces, including 19 collaboration rooms, two quiet study areas, and 3,500 square feet of student lounges. Gerri C. LeBow Hall brings together faculty, students and staff, in a state of the art building on the University City campus. Please visit the LeBow College of Business webpage (http://www.lebow.drexel.edu/about/campuses/philadelphia/location/gerri-c-lebow-hall/) to learn more about Gerri C. LeBow Hall.

Sport Business Faculty

Lawrence Cohen, JD *(Temple University)*. Associate Teaching Professor. Sports and antitrust law; tickets & sales data analytics; sport sponsorship.

Jeffrey Levine, JD *(University of Louisville, Tulane University)*. Assistant Clinical Professor. Sport law, sport development and policy; non-profits in sport.

Joel Maxcy, PhD *(Washington State University) Department Head Sport Management & General Business*. Professor. Economics of sport; labor economics & policy; economics of antitrust & regulation.

Technology Innovation Management

Co-Major: Technology Innovation Management
Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 186.0
Classification of Instructional Programs (CIP) code: 52.1201
Standard Occupational Classification (SOC) code: 11-3021; 15-1131

The Technology Innovation Management program is a co-major that must be taken in conjunction with the following majors Accounting, Finance, International Business, Legal Studies, Management Information Systems, Marketing or Operations and Supply Chain Management.

About the Program

Technology and Innovation Management is a unique and exciting area within the broad field of management. The field focuses broadly on understanding the process of innovation, and management approaches to innovation with special emphasis on technology change as a source of innovations.

The Technology Innovation Management program offers a very significant way of differentiating the Drexel business student in the marketplace by embedding skill sets and knowledge base emphasizing technology innovation management which is built on a solid business background. Technology Innovation Management courses are oriented primarily toward innovation, with an emphasis on technology-based innovation.

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

PHYS 151	Applied Physics	

General Education Electives

Students select seven (21.0 credits) general education electives, with a minimum of one course in each of the following three categories. Students take the remaining 12.0 credits from any of the topics listed under Additional General Education Electives.

Society and Culture

Communication, English, Fine Arts, Global Studies, Language or Philosophy	3.0

Social Science

Anthropology, History, Sociology, Political Science, Psychology	3.0

Science

Computer Science, Information Systems, Science	3.0

Additional General Education Electives

Twelve (12.0) credits must be earned by taking 4 courses from the following topics: Communication, English, Fine Arts, Global Studies, Language, Philosophy, Anthropology, History, Sociology, Political Science, Psychology, Computer Science, Information Systems, Math, Science	12.0

Business Requirements

ACCT 115	Financial Accounting Foundations	4.0
ACCT 116	Managerial Accounting Foundations	4.0
BLAW 201	Business Law I	4.0
BUSN 101	Foundations of Business I (Online students take BUSN 111)	4.0
BUSN 102	Foundations of Business II (Online students take BUSN 112)	4.0
ECON 201	Principles of Microeconomics	4.0
ECON 202	Principles of Macroeconomics	4.0
FIN 301	Introduction to Finance	4.0
INTB 200	International Business	4.0
MGMT 450	Strategy and Competitive Advantage	4.0
MIS 200	Management Information Systems	4.0
MKTG 201	Introduction to Marketing Management	4.0
OPM 200	Operations Management	4.0
ORGB 300 [WI]	Organizational Behavior	4.0
STAT 201	Introduction to Business Statistics	4.0
Select one of the following:		4.0
MGMT 260	Introduction to Entrepreneurship	
MGMT 370	For-Profit Business Consulting	
MGMT 371	Nonprofit Business Consulting	
ORGB 420	Negotiations and Conflict Resolution	
STAT 202	Business Statistics II	

Major Requirements

Eight required courses (See Major Requirements list below)	32.0
Free Electives	**18.0**
Total Credits	180.0

Required Courses:

MGMT 201	Introduction to Technology Innovation Management	4.0
MGMT 301	Designing Innovative Organizations	4.0
MGMT 302	Competing in Technology Industries	4.0
MGMT 364	Technology Management	4.0
Select two courses from either track:		**8.0**
Product Innovation Track		
BLAW 360	Intellectual Property and Cyber Law	
MGMT 250	Masters of Management and the Origins of Wealth	
MGMT 370	For-Profit Business Consulting	
MKTG 347	New Product Development	
MKTG 355	Interactive Marketing	
MKTG 357	Global Marketing	
MKTG 365	Digital Marketing	
ORGB 400	Team Development and Leadership	
ORGB 420	Negotiations and Conflict Resolution	
Process Innovation Track		
MGMT 370	For-Profit Business Consulting	
MIS 261	Introduction to Enterprise Application Software Using SAP - Logistics	
MIS 262	Intro to Enterprise Application Software Using SAP - Accounting & Analytics	
MIS 361	Information System Project Management	
OPM 315	Service Operations Management	
OPM 321	Planning and Control of Operations	
STAT 325	Six-Sigma Quality Implementation	
Total Credits		24.0

Sample Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Term 1		Credits
BUSN 101	Foundations of Business I	4.0
ECON 201	Principles of Microeconomics	4.0
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
MATH 101	Introduction to Analysis I	4.0
UNIV B101	The Drexel Experience	1.0
	Term Credits	16.0
Term 2		
BUSN 102	Foundations of Business II	4.0
ECON 202	Principles of Macroeconomics	4.0

Select course from Track chosen in Term 11		4.0
	Term Credits	18.0

Total Credit: 186.0

Facilities

In fall 2013, LeBow College opened its 12-story, Gerri C. LeBow Hall, with a finance trading lab, behavioral studies lab and integrated teaching technology in all classrooms. The new building features two lecture halls, 15 classrooms of varying sizes and seating configurations, including case study rooms and cluster classrooms designed to facilitate group work. Other amenities consist of extensive areas of student spaces, including 19 collaboration rooms, two quiet study areas, and 3,500 square feet of student lounges. Gerri C. LeBow Hall brings together faculty, students and staff, in a state of the art building on the University City campus. Please visit the LeBow College of Business webpage (http://www.lebow.drexel.edu/about/campuses/philadelphia/location/gerri-c-lebow-hall/) to learn more about Gerri C. LeBow Hall.

Co-Op/Career Opportunities

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities. To learn more about career opportunities and resources see the Career Guides (http://drexel.edu/scdc/career-services/counseling/career-guides/) provided by the Steinbright Career Development Center.

Technology Innovation Management Faculty

Daniel Albert, PhD *(University of St. Gallen)*. Assistant Professor. Strategic Management; Strategic Change; Architectural Innovation; Organizational Design.

Suresh Chandran, PhD *(Vanderbilt University)*. Clinical Professor. Corporate entrepreneurship; corporate social responsibility; global management; intellectual property and employee rights; Sustainability; Technological Innovation.

Robert W. Keidel, PhD *(Wharton School, University of Pennsylvania)*. Clinical Professor. Cognitive coaching; Executive team building; Organizational design; Strategic thinking; Strategy creation

Jeongsik Lee, PhD *(University of California Los Angeles)*. Assistant Professor. Economics of Innovation; Social networks; Technology management

Yu-Chieh Lo, PhD *(University of Southern California)*. Associate Professor. Categorization in markets; Organization theory; Technology innovation.

Dali Ma, PhD *(University of Chicago)*. Associate Professor. Social hierarchy; Social networks; Sociology of entrepreneurship; Sociology of transitional China

Jacob Miller, PhD *(Drexel University)*. Assistant Clinical Professor. Open software; Innovation; Semantic analysis.

Rajiv Nag, PhD *(Pennsylvania State University)*. Clinical Professor. Organizational Knowledge and Identity; Organizational learning and change; Strategic Leadership; Strategic Performativity

V. K. Narayanan, PhD *(University of Pittsburgh)*. Delloitte Touche Jones Stubbs Professor. Cognition and Strategy; Corporate Entrepreneurship; Organization design

Stanley Ridgley, PhD *(Duke University)*. Associate Clinical Professor. Business communication; Cognition and strategy; Competitive

intelligence; Determinants of Firm Performance; Global Management; New Markets in Emerging Countries; Russian Business Culture.

Daniel Tzabbar, PhD *(University of Toronto)*. Associate Professor. Accessing and managing knowledge; Alliances; Human capital; Organizational learning and change; Social Capital; Technology Entrepreneurship; Technology Innovation

Minor in Accounting

About the Minor

The minor in Accounting is designed for students with varied backgrounds who seek to develop knowledge and skills in accounting fundamentals. These accounting management skills are intended to supplement other majors from around the university.

Requirements

- No more than 2 courses or 8.0 credits required by a student's major may be counted towards this minor.
- A grade of "C" (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- Business administration, business & engineering and economic students may complete any of the business minors, including: economics, finance, international economics, legal studies, management information systems, marketing, business analytics, organizational management, technology innovation management, and operations & supply chain management.
- **Cannot do a major and a minor in the same field of study.**

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment.

Program Requirements

Required Courses

ACCT 115	Financial Accounting Foundations	4.0
ACCT 116	Managerial Accounting Foundations	4.0
ACCT 321	Financial Reporting I	4.0
ACCT 322	Financial Reporting II	4.0
ACCT 323	Financial Reporting III	4.0
Select one (1) of the following:		4.0
ACCT 331	Cost Accounting	
ACCT 341	Principles of Auditing	
TAX 341	Individual Income Taxes	
Total Credits		24.0

Minor in Business Administration

About the Minor

The minor in business administration is designed to provide some flexibility while at the same time assuring exposure to a number of critical business functional areas.

Requirements

- No more than 2 courses or 8.0 credits required by a student's major may be counted towards this minor.
- A grade of "C" (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculation at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- Business administration and business & engineering & economic students may complete any of the business minors, including: accounting, economics, finance, international economics, legal studies, management information systems, marketing, business analytics, organizational management, technology innovation management, and operations & supply chain management.
- **Cannot do a major and a minor in the same field of study.**

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment.

Students select six of the following:		24.0
ACCT 115	Financial Accounting Foundations	
or ACCT 11	Accounting for Professionals	
BLAW 201	Business Law I	
or BLAW 32	Law of Business Organizations	
ECON 201	Principles of Microeconomics	
ECON 202	Principles of Macroeconomics	
FIN 301	Introduction to Finance	
MIS 200	Management Information Systems	
MKTG 201	Introduction to Marketing Management	
OPM 200	Operations Management	
ORGB 300 [WI]	Organizational Behavior	
STAT 201	Introduction to Business Statistics	
STAT 202	Business Statistics II	
Total Credits		24.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Minor in Business Analytics

About the Minor

How does a company design an effective social media campaign for its brand new product? How does a bank make credit card offers or detect fraud? How does a chain store stock its shelves with just the right products at the right price? Technology has made it possible to collect, store, process and analyze massive data sets that can help businesses make better decisions. However, there remains a gap that can only be filled by those with a background in business analytics. From the junior analyst providing daily reports on production to the CEO seeking to transform his or her business, all are looking for guidance and talent in business analytics.

LeBow students are uniquely positioned to address descriptive, diagnostic, predictive, prescriptive and pre-emptive questions across the business analytics lifecycle from the corporate generation of data through the application and impact on managerial and leadership decision-making and innovation.

Ranked second in a Computerworld survey on the most difficult skills to find, Business Analytics expertise is not only scarce, but in demand. McKinsey Global Institute reports that the United States could face a shortage of between 140,000 and 190,000 individuals who possess Business Analytics skills and an additional 1.5 million managers with the skills to implement the results.

The Business Analytics minor at LeBow consists of basic courses in statistics, operations research, and management information systems as well as advanced courses in management information systems, statistics/econometrics, and modeling. The curriculum enables students to tailor the program to their interests and anticipated career path.

One of the distinguishing features of the business analytics minor is the required senior project (BSAN 460) where students work in small teams on real business analytics projects from LeBow College's corporate partners. The projects require students to bring together all the key elements of the business analytics curriculum to derive business insights for a company's current business challenges. Experiencing this data driven decision making process is invaluable career preparation.

Requirements

- No more than 2 courses or 8.0 credits required by a student's major may be counted towards this minor.
- A grade of "C" (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- Business administration, business & engineering and economic students may complete any of the business minors, including: economics, finance, international economics, legal studies, management information systems, marketing, organizational management, technology innovation management, and operations & supply chain management.
- **Cannot do a major and a minor in the same field of study.**

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment.

BSAN 260	Introduction to Business Analytics	4.0
BSAN 360	Programming for Data Analytics	4.0
or MIS 349	Predictive Business Analytics with Relational Database Data	
BSAN 460	Business Analytics Senior Project	4.0
MIS 343	Database Design and Implementation	4.0
Business Analytics electives (select two of the following):		**8.0**
BSAN 360	Programming for Data Analytics	
ECON 301	Microeconomics	
ECON 350 [WI]	Applied Econometrics	
ECON 360	Time Series Econometrics	
MIS 342	Systems Analysis and Design

OPR 340	Decision Models for the Public Sector	
OPR 350	Optimization in Finance	
STAT 331	Introduction to Data Mining for Business	
STAT 335	Introduction to Experimental Design	
Total Credits		24.0

* The following groupings of courses are recommended by departments for their respective career pathways. Students are strongly encouraged to complete three courses for at least one career pathway, based on their other major(s) and career goals.

Accounting:
STAT 331: Introduction to Data Mining for Business
MIS 342: Systems Analysis and Design
OPR 320: Linear Models for Decision Making

Economics:
ECON 301: Microeconomics
ECON 350 [WI] : Applied Econometrics
ECON 360: Time Series Econometrics
STAT 331: Introduction to Data Mining for Business
MKTG 366: Customer Analytics
MKTG 367: Data-Driven Digital Marketing
Complete one of the following courses:
BSAN 360: Programming for Business Analytics (R)
MIS 349: Predictive Analytics (SAS)

Finance: OPR 350
ECON 350 [WI] : Applied Econometrics
ECON 360: Time Series Econometrics
STAT 331: Introduction to Data Mining for Business
OPR 320: Linear Models for Decision Making

Management Information Systems:
MIS 342: Systems Analysis and Design
MIS 361: Information System Project Management

Marketing: (Even though only three will be counted toward the BA co-major/minor, we recommend that the students use their primary major or free business electives to complete all of the courses below in order to develop a solid foundation. Note that MKTG 366 and STAT 331 employ similar techniques and MKTG 367 and STAT 335 employ similar techniques.)
MKTG 326: Marketing Insights
MKTG 366: Customer Analytics
MKTG 367: Data-Driven Digital Marketing
STAT 331: Data Mining
STAT 335: Introduction to Experimental Design

Operations and Supply Chain Management:
ECON 350 [WI] : Applied Econometrics
ECON 360: Time Series Econometrics
STAT 331: Introduction to Data Mining for Business
STAT 335: Introduction to Experimental Design
MIS 342: Systems Analysis and Design
OPR 320: Linear Models for Decision Making
OPR 330: Advanced Decision Making and Simulation
OPR 340: Decision Models for the Public Sector
MKTG 366: Customer Analytics
MKTG 367: Data-Driven Digital Marketing

Writing-Intensive Course Requirements

Minor in Business Consulting

About the Minor

The Business Consulting minor is designed to equip students with practical skills and competencies through project-based coursework and industry collaboration.

Students will complete at least half of their degree requirements in experiential learning courses. In these courses, students work in interdisciplinary teams to provide business solutions to organizations across industries.

Through elective courses, students can focus in areas such as organizational behavior, management information systems, and international business.

Admission Requirements

Open to any undergraduate student enrolled at the university.

Program Requirements

Required Courses		
MGMT 370	For-Profit Business Consulting	4.0
MGMT 371	Nonprofit Business Consulting	4.0
MGMT 372	Startup Business Consulting	4.0
Business Consulting Electives (select three of the following)		**12.0**
MGMT 301	Designing Innovative Organizations	
MGMT 364	Technology Management	
MGMT 380	International Business Consulting

ORGB 400	Team Development and Leadership	
ORGB 420	Negotiations and Conflict Resolution	
Total Credits		24.0

Minor in Finance

About the Minor

A minor in finance develops students' ability to allocate funds to their highest valued use. This minor provides a basic understanding of how businesses raise and invest capital, how individuals allocate their savings and invest and how markets function to support businesses.

Requirements

- No more than 2 courses or 8.0 credits required by a student's major may be counted towards this minor.

- A grade of "C" (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- Business administration, business & engineering and economic students may complete any of the business minors, including: accounting, economics, international economics, legal studies, management information systems, marketing, business analytics, organizational management, technology innovation management, and operations & supply chain management.
- **Students cannot do a major and a minor in the same field of study**.

All core mathematics and statistics courses should be completed before embarking on the upper-level finance minor courses. A second course in business statistics, STAT 202, with a minimum grade of C, must be completed as a prerequisite for the minor's required courses.

Program Requirements

Required Courses

ACCT 115	Financial Accounting Foundations	4.0
or ACCT 110	Accounting for Professionals	
ACCT 116	Managerial Accounting Foundations	4.0
FIN 301	Introduction to Finance	4.0
FIN 302	Intermediate Corporate Finance	4.0
FIN 321	Investment Securities & Markets	4.0
FIN 325	Financial Institutions and Markets	4.0
Total Credits		24.0

Additional Information

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment. Prospective students may also consult with the Finance Department (http://www.lebow.drexel.edu/academics/undergraduate/majors/finance/).

Minor in Legal Studies

About the Minor

- No more than 2 courses or 8.0 credits required by a student's major may be counted towards this minor.
- A grade of "C" (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- Business administration, business & engineering and economic students may complete any of the business minors, including: accounting, economics, finance, international economics, management information systems, marketing, business analytics, organizational management, technology innovation management, and operations & supply chain management.
- **Cannot do a major and a minor in the same field of study.**

Minor in Operations and Supply Chain Management

About the Minor

The minor in operations and supply chain management is designed to prepare students for eventual participation as managers or specialists in the operations activity of industrial and service systems. Today, companies worldwide are competing in very different ways and very different environments than they were in the past because of technological advances. Operations, Supply Chain Management, and Logistics are key functions through which companies can gain strategic advantage, and companies are hiring graduates to drive innovations for their new economic surroundings. In this minor, courses drawing on the foundations and the state-of-the-art for both production and service industries allow students to craft a course of study that can complement their existing major.

Requirements

- No more than 2 courses or 8.0 credits required by a student's major may be counted towards this minor.
- A grade of "C" (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the prerequisites of all classes when selecting electives. It is the responsibility of the student to know prerequisites.
- Business administration and business & engineering & economic students may complete any of the business minors, including: accounting, economics, finance, international economics, legal studies, management information systems, marketing, business analytics, organizational management and technology innovation management.
- **Cannot do a major and a minor in the same field of study.**

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment.

Program Requirements

Required Courses

OPM 321	Planning and Control of Operations	4.0
OPR 320	Linear Models for Decision Making	4.0
Select four of the following:		16.0
MGMT 301	Designing Innovative Organizations	
MGMT 364	Technology Management	
OPM 200	Operations Management	
OPM 315	Service Operations Management	
OPM 325	Advanced Planning and Control of Operations	
OPM 341	Supply Chain Management	
OPM 342	Sustainable Supply Chain Management and Logistics	
OPM 343	Managing Queues for Service Operations	
OPM 344	Revenue Management	
OPM 399	Operations & Supply Chain Management Industry Project	
OPR 330	Advanced Decision Making and Simulation	
OPR 340	Decision Models for the Public Sector	
STAT 325	Six-Sigma Quality Implementation	
Total Credits		24.0

Additional Information

For additional information about the program, students should contact the Department of Decision Sciences (http://www.lebow.drexel.edu/Faculty/Departments/Decision/).

Minor in Organizational Management

About the Minor

The minor in "Organizational Management" is designed for students with varied backgrounds who seek to develop knowledge and skills in leadership, teamwork, and communication. These organizational management skills are intended to supplement other majors from around the university. The curriculum provides students with a foundation of skills for effectively working with others in a variety of contexts and situations.

Requirements

- No more than 2 courses or 8.0 credits required by a student's major may be counted towards this minor.
- A grade of "C" (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- Business & engineering and economic students may complete any of the business minors, including: accounting, economics, finance, international economics, legal studies, management information systems, marketing, business analytics, technology innovation management, organizational management and operations & supply chain management.
- **Cannot do a major and a minor in the same field of study.**

Required Courses

ORGB 300 [WI]	Organizational Behavior	4.0
ORGB 320	Leadership: Theory and Practice	4.0
ORGB 400	Team Development and Leadership	4.0
ORGB 420	Negotiations and Conflict Resolution	4.0
Select two of the following courses:		**8.0**
HRMT 323	Principles of Human Resource Administration	
ORGB 430	Strategic Career Development	
MGMT 364	Technology Management	
MGMT 370	For-Profit Business Consulting	
Total Credits		24.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Learning Goals

Upon completing the minor, students will be able to:

- Discover important insights about oneself as a leader and develop a self-awareness of strengths and opportunities for personal growth
- Manage career and networks to achieve personal growth
- Develop the skills and competencies needed to lead effectively in today's dynamic and diverse environment

- Increase conceptual understanding of leadership in different types of situations and facing different types of challenges
- Learn how to influence and manage conflict within organizations
- Identify various approaches and imperatives for leading teams
- Recognize ethical dilemmas in management practice and how to infuse ethical standards within a group or team
- Learn how to effectively function within a team and lead a team for success
- Recognize how human factors can both distort and enhance the process of managerial decision making
- Understand how the changing nature of work (e.g., global, technological, etc.) influences choices about design and practices within organizations

Minor in Real Estate Management and Development

About the Minor

A minor in Real Estate Management & Development (REMD) is designed to prepare students to engage, analyze, and synthesize investment real estate property portfolios from a comprehensive operational perspective. Students who successfully complete the REMD Minor will be able to approach the built environment with a holistic view. The REMD Minor is open to all undergraduate students across the University.

Program Requirements

REQUIRED COURSES

BLAW 330	Real Estate	4.0
FIN 301	Introduction to Finance	4.0
REMD 110	Introduction to Real Estate Management	4.0
REMD 320	Sustainability in the Built Environment	4.0
REMD 375	Real Estate Finance	4.0
REMD 410	Real Estate Investment and Asset Management	4.0
Total Credits		24.0

Minor in Sport Management

About the Minor

The minor in sport business is designed to introduce students to the primary areas of study in the sport industry. Students will be exposed to a variety of perspectives for assessing the sports business.

SMT 110	The Business of Sport	4.0
SMT 201	Sports Marketing, Promotion, and Public Relations	4.0
SMT 285	Sport, Industry, and Society	4.0
SMT 230	Sports and the Law	4.0
SMT 320	Sport Economics	4.0
Choose a minimum of 4.0 credits from the following		**4.0-6.0**
SMT 205	Sport Media Relations	
SMT 270	Sports Facility Planning & Management	
SMT 275	Sports Event Management	
SMT 290	Digital Media in Sport	
SMT 335	Sport Governance & Policy	
SMT 340 [WI]	International Aspects of Sport	
SMT 380	Sports Analytics	
Total Credits		24.0-26.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). Minor in Technology Innovation Management

About the Minor

The minor in Technology Innovation is designed for students with varied backgrounds who seek to develop knowledge and skills in innovation process and strategic approaches to technology. These technology innovation management skills are intended to supplement other majors from around the university.

- No more than 2 courses or 8.0 credits required by a student's major may be counted towards this minor.
- A grade of "C" (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- Business & engineering and economic students may complete any of the business minors, including: accounting, economics, finance, international economics, international business, legal studies, management information systems, marketing, business analytics, organizational management, and operations & supply chain management.
- **Cannot do a major and a minor in the same field of study.**

Required Courses

MGMT 201	Introduction to Technology Innovation Management	4.0
MGMT 301	Designing Innovative Organizations	4.0
MGMT 302	Competing in Technology Industries	4.0
MGMT 364	Technology Management	4.0
Select 2 courses from either track:		**8.0**
Product Innovation Track		
BLAW 360	Intellectual Property and Cyber Law	
FIN 335	Entrepreneurial Finance	
MGMT 250	Masters of Management and the Origins of Wealth	
MGMT 370	For-Profit Business Consulting	
MKTG 347	New Product Development	
MKTG 355	Interactive Marketing	
MKTG 357	Global Marketing	
MKTG 365	Digital Marketing	
ORGB 400	Team Development and Leadership	
ORGB 420	Negotiations and Conflict Resolution	
Process Innovation Track		
MGMT 370	For-Profit Business Consulting	
MIS 350	Intro to Enterprise Application Software Using SAP - Accounting & Analytics	
MIS 361	Information System Project Management	
OPM 315	Service Operations Management	
OPM 321	Planning and Control of Operations	
STAT 325	Six-Sigma Quality Implementation	
Total Credits		24.0

Certificate in Brand and Reputation Management

Certificate Level: Undergraduate
Admission Requirements: Current Drexel students only
Certificate Type: Certificate
Number of Credits to Completion: 16.0
Instructional Delivery: Campus
Calendar Type: Quarter
Expected Time to Completion: 3 years
Classification of Instructional Program (CIP) Code: 52.1499
Standard Occupational Classification (SOC) Code: 11-2021

In the increasingly competitive and volatile global marketplace, brand and reputation management have gained considerable interest and importance in organizations, including corporations, non-profits, and those in the public sector.

The Brand and Reputation Management Certificate program introduces the concept of the product and/or corporate brand, the components that make up a good brand, and how to develop brand strategies that are appropriate for various types of organizations. Students will also learn about the various stakeholders that impact or enhance an organization's ability to build its brand and reputation as well as learn to analyze the business environment in order to identify a desired image, to create brand positioning strategy, and to develop and nurture the positive perception of a product, organization, individual or place.

Following the completion of all other required courses, all students must also complete an "honors" project as part of MKTG 363 *Brand & Reputation Management Project*. The topic and scope of the project must be approved by the Department Head in the Department of Marketing (http://www.lebow.drexel.edu/faculty-and-research/disciplines/marketing/). Completed projects will be a written project submitted to the Department Head of Marketing for evaluation in a pass/fail manner.

Program Requirements

COM 181	Public Relations Principles and Theory	3.0
MKTG 322	Advertising & Integrated Marketing Communications	4.0
MKTG 362	Brand and Reputation Management	4.0
MKTG 363	Brand & Reputation Management Project [*]	1.0
Students must complete one course from the following options, depending upon career interests:		4.0
MKTG 324	Marketing Channels and Distribution Systems	
MKTG 347	New Product Development	

MKTG 348	Services Marketing	
MKTG 356	Consumer Behavior	
Or a course from outside the LeBow College in a related field, with the approval of the Department Head in the department of Marketing.		

Total Credits	16.0

*   Taken upon the completion of all other requirements.

Certificate in Social Responsibility in Business

Through course work, civic engagement and related co-op experience, the Certificate in Social Responsibility in Business provides a well-rounded look at corporate social responsibility, giving students a unique perspective on ethical leadership in the business community. The certificate program, open only to currently enrolled Drexel University students, encourages students to seek co-op experience and positions after graduation with firms committed to acting with social responsibly.

Program Requirements

In conjunction with the Lindy Center for Civic Engagement, (http://drexel.edu/lindycenter/) students initiate and complete a socially focused winter break or spring break project during any one term/break. The scope of the project entails civic responsibility and focuses on business applications. An example would be to assist in the preparation of income tax forms for under privileged Philadelphia residents. This project is in addition to requirements of the University 101 course.

Student will use their My LIFE e-portfolios to retain reflections and relevant writings from each of the required courses.

Coordinated with the Center for Civic Engagement, students will complete a minimum of sixty hours (60) of civic engagement while a student at Drexel University.

Students are required to earn a minimum of "C" in the following required courses, and a "B" average over all the courses.

Required Courses [*]		
BUSN 103	Advanced First Year Business Seminar [*]	2.0
ENTP 270	Social Entrepreneurship	3.0
MKTG 368	Corporate Responsibility Management	4.0
ORGB 320	Leadership: Theory and Practice	4.0
PHIL 301	Business Ethics	3.0
Total Credits		16.0

*   Students must take BUSN 103 Social Responsibility in Business.

LeBow College of Business: School of Economics

Economics is one of Drexel LeBow's strongest disciplines. The LeBow College of Business celebrated its strengths in economics teaching and research by elevating its economics department into a School of Economics. The School of Economics will continue Drexel LeBow's commitment to offering a curriculum that is current and challenging, and to conducting research that aligns with business trends and informs policy makers.

A degree, major or minor in Economics provides students with a robust understanding of the workings of the market system and major economic institutions, economic policy, and development.

Majors

BA, BS, BS-JD Economics

- Economics (BA, BS, BS-JD) (p. 399)

BS Business Administration

- Business Economics co-major (p. 405)
- International Business (p. 408)
- International Business co-major (p. 411)

Minors

- Economics (p. 414)
- International Economics (p. 415)

Economics

Major: Economics
Degree Awarded: Bachelor of Science in Economics (BSECON) or Bachelor of Arts in Economics (BAECON)
Calendar Type: Quarter
Total Credit Hours: 187.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: (BS) 45.0603; (BA) 45.0601
Standard Occupational Classification (SOC) code: 19-3011

About the Program

Economics is at the root of business decisions, government policy making, and global relations. As a course of study, it can lead to diverse career opportunities, and is often viewed as excellent preparation for graduate programs in business, public policy, international affairs, and law. Both the BA in Economics and the BS in Economics programs provide students with an understanding of the market system, as well as economic institutions, policies, and development.

Bachelor of Arts in Economics

The BA in Economics introduces students to modern economics within the context of a broad-based liberal arts curriculum. The degree is oriented toward students with an interest in combining economics with courses in the humanities, and builds communications skills along with clarity of thought and expression. The degree requires that students develop a depth of knowledge in a coordinate field (minor or secondary major) outside of economics.

Bachelor of Science in Economics

The BS in Economics introduces students to modern economics within the context of a general scientific curriculum. This degree is oriented towards students interested in acquiring a broad-based education with a focus on quantitative and professional skills.

In addition to deep coverage of economics, the major includes liberal arts and sciences requirements. The degree stipulates that students either complete one of the specific economic concentrations (Business Economics or Mathematical Economics) or develop a depth of knowledge in a minor or secondary major field outside of economics. The BS in Economics program provides excellent training for graduate school in economics.

The BS in Economics offers concentration choices in both Business Economics and Mathematical Economics.

Business Economics Concentration

This concentration prepares students to apply the rigorous methods of modern quantitative economics as professionals in a business context. This program combines coursework in economics and the functional fields of business administration within a general scientific and humanities curriculum.

Mathematical Economics Concentration

This concentration prepares students for quantitative graduate programs in economics and other related fields. This program also prepares students for professional work in quantitative economics or closely related areas, by providing coursework in economics and mathematics.

Coordinate Field Option

As an alternative to choosing one of these concentrations, students may also personalize their degree by developing depth of knowledge in a minor or secondary major field outside of economics such as finance, social sciences, international studies, or natural sciences. Examples of possible coordinating minors include a minor in History or Politics for students interested in political economy or policy studies, a minor in Africana Studies for students interested in peoples of African descent, a minor in Communication for students interested in economic journalism, a minor in Data Science for students interested in the platform economy, or a minor in Global Studies for students interested in development. In addition, students can complete a specialization in business economics or mathematical economics as an area of concentration.

Minor in Economics (p. 414)

The minor in Economics provides a solid background in the application of economic theory to markets. Students complete standard courses in micro- and macroeconomics that emphasize core training in economic decision making. Students also choose a course that applies this training to a specific area such as international economics, behavioral economics, firm and industry behavior, or public policy. This type of analytical training provides a strong complement to many majors, including business fields,

but would be especially useful for students interested in careers in public policy or law.

Minor in International Economics (p. 415)

The minor in International Economics is designed for students with varied backgrounds who have a particular interest in learning more about the international economics. The curriculum provides the students a basic understanding of economics and exposes them to advanced topics dealing with international trade, international financial flows, multinational corporations, and other aspects of international economics. The minor complements a variety of degrees, particularly for students interested in applying their major discipline within an international context or within a multinational corporation.

Additional Information

For more information about this major, contact the School of Economics (https://www.lebow.drexel.edu/faculty-and-research/disciplines/economics/). (http://www.lebow.drexel.edu/Faculty/Departments/Economics/)

Degree Requirements (BS)

While a variety of options are available for study in coordinating fields, two specific concentrations have been developed to address key areas in economics.

- The business economics concentration
- The mathematical economics concentration

The requirements for those concentrations are listed beneath the general requirements for the BS in Economics program.

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

General education requirements

ANTH 101	Introduction to Cultural Diversity	3.0
CIVC 101	Introduction to Civic Engagement	1.0
COM 270 [WI]	Business Communication	3.0
CS 150	Computer Science Principles	3.0
or CS 171	Computer Programming I	
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	
ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
PSY 101	General Psychology I	3.0
SOC 101	Introduction to Sociology	3.0
UNIV B101	The Drexel Experience	1.0
UNIV B201 [WI]	Career Management	1.0
Select one of the following math sequences:		**8.0**
MATH 101 & MATH 102	Introduction to Analysis I and Introduction to Analysis II	
MATH 121 & MATH 122	Calculus I and Calculus II	
Fine arts elective		3.0
Three laboratory science electives		9.0
Two English literature electives: (ENGL 200 through ENGL 380)		6.0
One history elective		4.0

Two philosophy electives		6.0
Economics Requirements		
ECON 201	Principles of Microeconomics	4.0
ECON 202	Principles of Macroeconomics	4.0
ECON 250	Game Theory and Applications	4.0
ECON 301	Microeconomics	4.0
ECON 321	Macroeconomics	4.0
ECON 322 [WI]	Economics Seminar	4.0

INTB 332	Multinational Corporations	
INTB 338	Regional Studies in Economic Policies and International Business	
INTB 440	Seminar in International Business	
SOC 240	Urban Sociology	
**Additional Requirements [**]		
Coordinate Field		26.0
Additional courses as required to satisfy a coordinating field (a second major, minor, or one of the two available concentrations below)		
Free electives		**30.0**
Total Credits		187.0

[*]   Students pursuing the concentration in Mathematical Economics should select CS 171 over CS 150

[**]   Students who take the Mathematical Economics or Business Economics concentrations must complete the required concentration courses and free electives for a total of 56.0 credits.

Mathematical Economics Concentration

Students selecting this concentration must have satisfied the general educational mathematics requirements by completing MATH 121 and MATH 122.

ECON 348	Mathematical Economics	4.0
MATH 123	Calculus III	4.0
MATH 200	Multivariate Calculus	4.0

MATH 201	Linear Algebra	4.0
MATH 210	Differential Equations	4.0
Select three of the following:		**9.0-12.0**
MATH 220 [WI]	Introduction to Mathematical Reasoning	
MATH 285	Differential Equations II	
MATH 300	Numerical Analysis I	
MATH 301	Numerical Analysis II	
MATH 305	Introduction to Optimization Theory	
MATH 320	Actuarial Mathematics	
MATH 401	Elements of Modern Analysis I	
MATH 402	Elements of Modern Analysis II	
Free electives		27.0-24.0
Total Credits		**56.0**

Business Economics Concentration

Required Courses

ACCT 115	Financial Accounting Foundations	4.0
ECON 330	Managerial Economics	4.0
FIN 301	Introduction to Finance	4.0
MIS 200	Management Information Systems	4.0
ORGB 300 [WI]	Organizational Behavior	4.0
or BLAW 201	Business Law I	
Select two of the following:		8.0
ACCT 116	Managerial Accounting Foundations	
FIN 302	Intermediate Corporate Finance	
FIN 321	Investment Securities & Markets	
MKTG 201	Introduction to Marketing Management	
OPM 200	Operations Management	
Free electives		28.0
Total Credits		**56.0**

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study (BS)

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Term 1		Credits
ECON 201	Principles of Microeconomics	4.0
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0

Co-op/Career Opportunities

The study of economics prepares students for a variety of fields: research economists in banks, government and universities; law; economic development for local government, banks and firms; business management and consulting; government and international agencies, such as the CIA, World Bank, IMF and USAID; and business and economic journalism.

Career Paths and Degree Combinations

Economics provides an excellent foundation for many career options and can also be combined with many other majors and minors in preparing students for great careers.

For example:

Banking and Finance

- Economics and Finance
- Economics and Business
- Economics and Mathematics
- Business Economics Concentration
- Economics and Physics

Academia

- Economics and Anthropology
- Economics and Psychology
- Economics and Mathematics
- Economics and Philosophy

Economics Research in Industry

- Economics and Mathematics
- Mathematical Economics Concentration
- Economics and Marketing
- Economics and Finance

High Tech and IT Industries

- Economics and Information Systems
- Economics and Chemistry
- Economics and Biology

Economics Research in Governments and International Organizations

- Economics and Environmental Studies
- Economics and Political Science
- Economics and International Studies

Law School and Other Graduate School Options

- Economics and Legal Studies
- Economics and Philosophy
- Economics and Political Science
- Economics and International Studies

Opportunities

Recently, economics students have obtained positions at the following institutions:

- Federal Reserve Bank, Board of Governors
- Citibank
- Vanguard Corporation
- Deloitte Consulting
- Black Rock Inc.
- Tyco Electronics

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities.

Dual/Accelerated Degree

Dual Degree Bachelor's Programs

With careful planning, students can complete two full degrees in the time usually required to complete one. The double major option works best in closely related areas. For detailed information the student should contact his or her advisor.

Degree Requirements BS ECON Dual Degree Bachelor of Science / Juris Doctor

This program is a modified BS in Economics that allows students the ability to consider a BS/JD degree.

Conditional on successful admittance into Drexel's Kline School of Law (http://drexel.edu/law/).

Due to the complex nature of this program students should work closely with their advisor when selecting courses.

Marco Airaudo, PhD *(University of Pennsylvania Philadelphia)*. Associate Professor. Computational economics, international economics, macroeconomics and monetary economics.

Patricia Awerbuch, MBA *(Drexel University)*. Assistant Clinical Professor. Performance of on-campus students in an online classroom designed for distance learners; business professors.

Richard Barnett, PhD *(University of Minnesota)*. Clinical Professor. Economic theory, macroeconomics.

Sebastien Bradley, PhD *(University of Michigan)*. Associate Professor. Public finance, international economics.

Mian Dai, PhD *(Northwestern University)*. Assistant Professor. Managerial economics and strategy.

Pia DiGirolamo, PhD *(Purdue University)*. Assistant Clinical Professor. Macroeconomics, international finance.

Shawkat M. Hammoudeh, PhD *(University of Kansas)*. Professor. Applied econometrics, financial economics, international economics, and natural resource economics.

Teresa Harrison, PhD *(University of Texas Austin) Associate Dean, Academic Affairs*. Associate Professor. Econometrics, public finance, industrial organization, empirical microeconomics including health and nonprofit organizations.

Paul E. Jensen, PhD *(Penn State University) Associate Dean, College of Business*. Associate Professor. International trade. Primary research interest is international trade, particularly in empirical studies of international trade patterns.

Bang Nam Jeon, PhD *(Indiana University) Department of Economics and International Business*. Professor. Financial economics, world financial market linkages, foreign direct investment flows in the Asia-Pacific economies, the Korean economy: currency crisis, FDI, and macroeconomic issues, regional economic integration and newly industrializing economies: the

Stephen Joyce, MA *(Temple University)*. Assistant Clinical Professor. Education and human capital.

Andre Kurmann, PhD *(University of Virginia)*. Associate Professor. Computational economics, financial economics, labor economics, macroeconomics and monetary economics.

Christopher A. Laincz, PhD *(Duke University)*. Associate Professor. Economic development, technological change, and growth, industrial organization, macroeconomics and monetary economics.

Vibhas Madan, PhD *(Michigan State University)*. Professor. International trade theory, applied microeconomics.

Roger A. McCain, PhD *(Louisiana State University) Co-director*. Professor. Computational economics, game theory.

Bruce D. McCullough, PhD *(University of Texas Austin)*. Professor. Applied Econometrics, Data Mining, Econometric Techniques, Reliability of Statistical and Econometric Software.

Irina Murtazashvili, PhD *(Michigan State University)*. Assistant Professor. Applied econometrics.

Eydis Olsen, MA *(American University)*. Clinical Associate Professor. Macroeconomics, political economy.

Tristan Potter, PhD *(Boston College)*. Assistant Professor. Macroeconomics, labor.

Konstantinos Serfes, PhD *(University of Illinois at Champaign-Urbana)*. Professor. Industrial organization; microeconomics; game theory

Ricardo Serrano-Padial, PhD *(University of California at San Diego)*. Assistant Professor. Microeconomics theory, information economics with applications in finance, macroeconomics and industrial organization.

Mark Stehr, PhD *(University of California at Berkeley) Assistant Director School of Economics*. Associate Professor. Health economics, health behaviors, public finance, public policy.

Constantinos Syropoulos, PhD *(Yale University) Trustee Professor of International Economics*. Professor. International trade, political economy, applied microeconomics.

Yoto Yotov, PhD *(Boston College)*. Associate Professor. International trade, applied microeconomics, political economy.

Emeritus Faculty

Edward C. Koziara, PhD *(University of Wisconsin)*. Professor Emeritus. Applied micro and macro economics.

Bijou Yang Lester, PhD *(University of Pennsylvania)*. Professor Emeritus. Behavioral characteristics of shopping on-line, economic issues of electronic commerce, contingent employment and part-time work, the economy and suicide.

Andrew G. Verzilli, PhD *(Boston College)*. Professor Emeritus. Teaching effectiveness in economics; economics and financial history.

Chiou-shuang Yan, PhD *(Purdue University)*. Professor Emeritus. International economics, input-output analysis.

Business Economics

Major: Business Economics
Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 186.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 45.0601
Standard Occupational Classification (SOC) code: 11-9199; 19-3011; 19-3022; 25-1063

The Business Economics program is a "co-major."

About the Program

Economics is the study of allocating scarce resources among competing needs. The program places particular emphasis on the application of theory toward the solution of particular problems in such areas as international trade, money and finance, consumer activities, economic development, and other areas.

Drexel's Business Economics co-major is designed for students who wish to receive a sound education within a specific functional area of business (Primary major) while supplementing that knowledge with an overview of economics.

Prepares students to apply the rigorous methods of modern quantitative economics in a business context. This program combines coursework in

economics and the functional fields of business administration within the context of a general scientific and humanities curriculum.

More information can be found on the School of Economics webpage (http://www.lebow.drexel.edu/faculty-and-research/disciplines/economics/).

Degree Requirements

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

General Education Requirements

CIVC 101	Introduction to Civic Engagement	1.0
COM 270 [WI]	Business Communication (WI)	3.0

Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.1101
Standard Occupational Classification (SOC) code: 11-1021; 11-1011; 25-1011

About the Program

The international business major explores the international business environment as well as the internal workings of international corporations and the impact of international considerations on the various functional areas of business.

This major includes in-depth study of a foreign language, and students students choose from a menu of courses to fulfill additional requirements. The curriculum is interdisciplinary, with courses drawn from across business disciplines, economics, and anthropology. Specialized operational courses are offered, along with more general theoretical and comparative ones.

For more information about this program, contact the School of Economics (https://www.lebow.drexel.edu/faculty-and-research/disciplines/economics/).

Degree Requirements

Students completing the major in international business are required to complete six courses in the same language (a language other than the student's native language) at Drexel University. It is recommended that students also take a 320 or 420 language course, focusing on the language of business or professions. This requires a minimum of 6 language courses (24.0 credits) at the college level or up to level 6 placement, including proficiency in at least one language. Some of these courses may count toward the student's general education electives.

Students may satisfy the language requirement through foreign language course replacement by studying overseas. All study abroad programs must be approved by the Study Abroad Office (http://www.drexel.edu/studyabroad/).

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Bachelor of Science in Business Administration (BSBA) Degree Requirements

General Education Requirements		
CIVC 101	Introduction to Civic Engagement	1.0
COM 270 [WI]	Business Communication	3.0
ENGL 101	Composition and Rhetoric I: Inquiry and Exploratory Research	3.0
or ENGL 111	English Composition I	
ENGL 102	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing	3.0
or ENGL 112	English Composition II	

ENGL 103	Composition and Rhetoric III: Themes and Genres	3.0
or ENGL 113	English Composition III	
MATH 101	Introduction to Analysis I	4.0
MATH 102	Introduction to Analysis II	4.0
PHIL 105	Critical Reasoning	3.0
PSY 101	General Psychology I	3.0
UNIV B101	The Drexel Experience	1.0
UNIV B201 [WI]	Career Management	1.0
English literature elective ENGL 200 through ENGL 399		3.0
Fine Arts elective		3.0
History (HIST) elective		4.0
Select two of the following:		6.0
BIO 100	Applied Cells, Genetics & Physiology	
or BIO 101	Applied Biological Diversity, Ecology & Evolution	
CHEM 151	Applied Chemistry	
PHYS 151	Applied Physics	

General Education Electives

Students select seven (21.0 credits) general education electives, with a minimum of one course in each of the following three categories. Students take the remaining 12.0 credits from any of the topics listed under Additional General Education Electives.		
Society and Culture		
Communication, English, Fine Arts, Global Studies, Language or Philosophy		3.0
Social Science		
Anthropology, History, Sociology, Political Science, Psychology		3.0
Science		
Computer Science, Information Systems, Science		3.0

Additional General Education Electives

| Twelve (12.0) credits must be earned by taking 4 courses from the following topics: Communication, English, Fine Arts, Global Studies, Language, Philosophy, Anthropology, History, Sociology, Political Science, Psychology, Computer Science, Information Systems, Math, Science | | 12.0 |

Business Requirements

ACCT 115	Financial Accounting Foundations	4.0
ACCT 116	Managerial Accounting Foundations	4.0
BLAW 201	Business Law I	4.0
BUSN 101	Foundations of Business I (Online students take BUSN 111)	4.0
BUSN 102	Foundations of Business II (Online students take BUSN 112)	4.0
ECON 201	Principles of Microeconomics	4.0
ECON 202	Principles of Macroeconomics	4.0
FIN 301	Introduction to Finance	4.0
INTB 200	International Business	4.0
MGMT 450	Strategy and Competitive Advantage	4.0
MIS 200	Management Information Systems	4.0
MKTG 201	Introduction to Marketing Management	4.0
OPM 200	Operations Management	4.0
ORGB 300 [WI]	Organizational Behavior	4.0
STAT 201	Introduction to Business Statistics	4.0
Select one of the following:		4.0
MGMT 260	Introduction to Entrepreneurship	
MGMT 370	For-Profit Business Consulting	
MGMT 371	Nonprofit Business Consulting	
ORGB 420	Negotiations and Conflict Resolution	
STAT 202	Business Statistics II	

Major Requirements

Eight required courses (See Major Requirements list below)		32.0
Free Electives		**18.0**
Total Credits		180.0

Required International Business Major Courses *

INTB 440	Seminar in International Business	4.0
Category A, select a maximum of three of the following		12.0
ANTH 312	Approaches to Intercultural Behavior	

ECON 342	Economic Development	
ECON 344	Comparative Economic Systems	
INTB 334	International Trade	
INTB 336	International Money and Finance	
INTB 338	Regional Studies in Economic Policies and International Business	
Category B, select a minimum of four of the following		16.0
BLAW 340	International Business Law	
FIN 346	Global Financial Management	
INTB 332	Multinational Corporations	
MGMT 380	International Business Consulting	
MIS 347	Domestic and Global Outsourcing Management	
MKTG 357	Global Marketing	
Total Credits		32.0

*   Students majoring in international business must also complete a minimum of 6 language courses (24.0 credits) at the college level.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Recommended Plan of Study

Students participating in the cooperative education program will be enrolled in the required prep course, COOP 101, generally three terms before their co-op begins. As of September 2020, COOP 101 will be one credit.

Term 1		Credits
BUSN 101	Foundations of Business I	4.0
ECON 201	Principles of Microeconomics	4.0
ENGL 101 or 111	Composition and Rhetoric I: Inquiry and Exploratory Research English Composition I	3.0
MATH 101	Introduction to Analysis I	4.0
UNIV B101	The Drexel Experience	1.0
	Term Credits	16.0
Term 2		
BUSN 102	Foundations of Business II	4.0
ECON 202	Principles of Macroeconomics	4.0
ENGL 102 or 112	Composition and Rhetoric II: Advanced Research and Evidence-Based Writing English Composition II	3.0

MATH 102	Introduction to Analysis II	4.0
	Term Credits	15.0
Term 3		
ACCT 115	Financial Accounting Foundations	4.0
CIVC 101	Introduction to Civic Engagement	1.0
ENGL 103 or 113	Composition and Rhetoric III: Themes and Genres English Composition III	3.0
Select one of the following:		3.0
BIO 100 or 101	Applied Cells, Genetics & Physiology Applied Biological Diversity, Ecology & Evolution	
CHEM 151	Applied Chemistry	
PHYS 151	Applied Physics	
Modern Language 101/General Education elective		4.0
	Term Credits	15.0
Term 4		
ACCT 116	Managerial Accounting Foundations	4.0
COM 270 [WI]	Business Communication	3.0
STAT 201	Introduction to Business Statistics	4.0
Modern Language 102/General Education elective		4.0
	Term Credits	15.0
Term 5		
History Elective (HIST)		4.0
INTB 200	International Business	4.0
Select one of the following:		3.0
BIO 100 or 101	Applied Cells, Genetics & Physiology Applied Biological Diversity, Ecology & Evolution	
CHEM 151	Applied Chemistry	
PHYS 151	Applied Physics	
Modern Language 103/General Education elective		4.0
	Term Credits	15.0
Term 6		
MIS 200	Management Information Systems	4.0
BLAW 201	Business Law I	4.0
PSY 101	General Psychology I	3.0
Modern Language 201/Free elective		4.0
	Term Credits	15.0
Term 7		
FIN 301	Introduction to Finance	4.0
ORGB 300 [WI]	Organizational Behavior	4.0
MKTG 201	Introduction to Marketing Management	4.0
Modern Language 202/General Ed Elective		4.0
	Term Credits	16.0
Term 8		
OPM 200	Operations Management	4.0
INTB Category A Elective		4.0
INTB Category B Elective		4.0
Modern Language 203/Free Elective		4.0
	Term Credits	16.0
Term 9		
PHIL 105	Critical Reasoning	3.0
INTB Category B Elective		4.0
INTB Category B Elective		4.0
Science Elective		3.0
	Term Credits	14.0
Term 10		
UNIV B201 [WI]	Career Management	1.0
INTB Category A Elective		4.0
Social science elective		3.0
ENGL 200 - ENGL 399 course		3.0
Free elective		3.0
	Term Credits	14.0
Term 11		

INTB Category A Elective		4.0
MGMT 450	Strategy and Competitive Advantage	4.0
Select one of the following:		4.0
MGMT 260	Introduction to Entrepreneurship	
MGMT 370	For-Profit Business Consulting	
MGMT 371	Nonprofit Business Consulting	
MGMT 451	Management Simulation	
STAT 202	Business Statistics II	
Free elective		3.0
	Term Credits	15.0
Term 12		
INTB 440	Seminar in International Business	4.0
Fine Arts elective		3.0
Free electives		3.0
INTB Category B Elective		4.0
	Term Credits	14.0

Total Credit: 180.0

*   See degree requirements.

Co-op/Career Opportunities

International business graduates are employed in a variety of corporate settings, including the pharmaceutical, banking and telecommunication industries. Some students pursue graduate studies or find employment in multilateral governmental organizations.

The concentration has been designed to provide a competitive advantage for those students interested in international business careers. In addition to business coursework, students also take advantage of Drexel's programs in history-politics, sociology, anthropology, and other areas that focus on international topics.

The University offers minors in Arabic (p. 141), Chinese (p. 143), French (p. 146), German (p. 147), Italian Studies (p. 149), Japanese (p. 149), Korean (p. 150), and Spanish (p. 157). Each minor can include study of the vocabulary needed for business transactions within the particular language.

Proficiency certificates are also available to students at the intermediate level as proof that students are proficient enough to live abroad and interact with native speakers in their home countries and cultures. Proficiency certificates are available in Arabic (p. 165), Chinese (p. 166), French (p. 166), German (p. 167), Hebrew (p. 167), Italian (p. 168), Japanese, (p. 168) Korean, (p. 169) and Spanish (p. 169).

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc/) page for more detailed information on co-op and post-graduate opportunities. Also visit the Career Guides (http://drexel.edu/scdc/career-services/counseling/career-guides/) provided by the Steinbright Career Development Center.

Facilities

In fall 2013, LeBow College opened its 12-story, Gerri C. LeBow Hall, with a finance trading lab, behavioral studies lab and integrated teaching technology in all classrooms. The new building features two lecture halls, 15 classrooms of varying sizes and seating configurations, including case study rooms and cluster classrooms designed to facilitate group work. Other amenities consist of extensive areas of student spaces, including 19 collaboration rooms, two quiet study areas, and 3,500 square feet of student lounges. Gerri C. LeBow Hall brings together faculty, students and staff, in a state of the art building on the University City campus. Please visit the LeBow College of Business webpage (http://

www.lebow.drexel.edu/about/campuses/philadelphia/location/gerri-c-lebow-hall/) to learn more about Gerri C. LeBow Hall.

International Business Faculty

Murugan Anandarajan, PhD *(Drexel University) Interim Associate Dean for Academic Affairs.* Professor. Cyber crime, strategic management of information technology, unstructured data mining, individual internet usage behavior (specifically abuse and addiction), application of artificial intelligence techniques in forensic accounting and ophthalmology.

Rolph E. Anderson, PhD *(University of Florida) Royal H. Gibson Sr. Professor of Marketing.* Professor. Personal selling and sales management; multivariate data analysis; customer relationship management (CRM); customer satisfaction and customer loyalty.

Trina larsen Andras, PhD *(University of Texas at Austin) Head of the Department of Marketing; Academic Director, Center for Corporate Research Management.* Professor. International marketing, marketing channels management, cross-cultural communication.

Orakwue B. Arinze, PhD *(London School of Economics).* Professor. Client/Server computing; Enterprise Application Software (EAS)/Enterprise Resource Planning Software (ERP); knowledge-based and decision support applications in operations management.

Qizhi Dai, PhD *(University of Minnesota).* Associate Professor. Business Value of Information Technology, eCommerce, Economics of Information Technology, Information System Management.

Lawrence Duke, MBA *(Harvard Business School).* Associate Clinical Professor. International marketing and strategy, new product development, business-to-business marketing, marketing of financial services.

David Gefen, PhD *(Georgia State University) Provost Distinguished Research Professor.* Professor. Strategic IT management; IT development and implementation management; research methodology; managing the adoption of large IT systems, such as MRP II, ERP, and expert systems; research methodology, eCommerce; Online Auctions; Outsourcing; SAS; Technology Adoption.

Shawkat M. Hammoudeh, PhD *(University of Kansas).* Professor. Applied econometrics, financial economics, international economics, and natural resource economics.

Yanliu Huang, PhD *(The Wharton School, University of Pennsylvania).* Associate Professor. Consumer n-store decision making, consumer planning, health marketing, memory and learning.
