Biochemistry

Courses

BIOC 400S Biochemistry 4.0 Credits

Biochemistry is the essential basis for understanding metabolic and disease processes at the biochemical and molecular levels. Because of its importance as a foundation to medicine, biochemistry is going to be a major focus of the MCAT, beginning with the test in the summer of 2015. The course, which will be taught at Drexel University College of Medicine, by College of Medicine faculty, will cover the topics in general biochemistry, with a particular focus on those topics that are to be included on the new MCAT.

College/Department: COM School of Biomedical Sciences Professional

Repeat Status: Not repeatable for credit

BIOC T480S Special Topics in Biochemistry 0.0-12.0 Credits

Topics decided upon by faculty will vary within the area of study. **College/Department:** COM School of Biomedical Sciences Professional

Studies

Repeat Status: Can be repeated multiple times for credit

Emergency Medicine

Courses

EMMD S124S Advance Emergency Medicine 0.0 Credits

College/Department: College of Medicine **Repeat Status:** Not repeatable for credit

Family Medicine

Courses

FAMD S224S REPRODUCTIVE HEALTH 0.0 Credits

College/Department: College of Medicine **Repeat Status:** Not repeatable for credit

FAMD S244S REPRODUCTIVE HEALTH 0.0 Credits

College/Department: College of Medicine **Repeat Status:** Not repeatable for credit

FAMD S444S Environmental & Dccup Hlth 0.0 Credits

College/Department: College of Medicine **Repeat Status:** Not repeatable for credit

Medical Science Preparatory

Courses

MSPP 400S Advanced Topics in Chemistry I 4.0 Credits

This review course in general and organic chemistry will contain a review of chemical calculations and theory in topics such as stoichiometry, gas laws, thermodynamics, electrochemistry, equilibria, and pH. Atomic theory and bonding will also be reviewed. The semester ends with a discussion of the stereochemistry of organic molecules.

College/Department: COM School of Biomedical Sciences Professional Studies

Repeat Status: Not repeatable for credit

MSPP 401S Advanced Topics in Chemistry II 4.0 Credits

This review course in organic chemistry will investigate reaction mechanisms, spectroscopy, qualitative organic chemistry, and laboratory techniques.

College/Department: COM School of Biomedical Sciences Professional Studies

Repeat Status: Not repeatable for credit

MSPP 402S Advanced Topics in Physics I 4.0 Credits

This course covers classical physics as applied to the kinematics and dynamics of static and of moving bodies.

College/Department: COM School of Biomedical Sciences Professional

Studies

Repeat Status: Not repeatable for credit

MSPP 403S Advanced Topics in Physics II 4.0 Credits

This course covers classical physics as applied to: fluids, vibrations, waves, electricity, magnetism and optics.

College/Department: COM School of Biomedical Sciences Professional

Studies

Repeat Status: Not repeatable for credit

MSPP 404S Concepts in Science and Verbal Reasoning I 6.0 Credits

This is a didactic course with weekly preparations for the Verbal Reasoning and Writing, Physical Sciences and Biological Sciences of the Medical College Admissions Test. Incorporated into the course are approximately six mock MCAT exams for practice.

College/Department: COM School of Biomedical Sciences Professional

Studies

Repeat Status: Not repeatable for credit

MSPP 405S Concepts in Science and Verbal Reasoning II 6.0 Credits

This is a didactic course with weekly preparations for the Verbal Reasoning and Writing, Physical Sciences and Biological Sciences of the Medical College Admissions Test. Incorporated into the course are approximately six mock MCAT exams for practice.

College/Department: COM School of Biomedical Sciences Professional

Studies

Repeat Status: Not repeatable for credit

Pre-Medical

Courses

PMED 111S General Chemistry I 3.0 Credits

College/Department: COM School of Biomedical Sciences Professional

Studies

Studies

Repeat Status: Not repeatable for credit **Restrictions:** Can enroll if major is PMED.

PMED 112S General Chemistry I Lab 1.0 Credit

The aim is to provide an introduction to the principles of general chemistry that will give the student a command of its concepts and language. The semester course will cover within the time limitations topics organized around the four major themes: • Foundations of general chemistry including the physical state, atomic structure/theory • Fundamentals of molecular structure and bonding • Types of reactions • Thermodynamics.

College/Department: COM School of Biomedical Sciences Professional

Repeat Status: Not repeatable for credit **Restrictions:** Can enroll if major is PMED.

Corequisite: PMED 111S

PMED 114S CONCEPTS IN CHEMISTRY I 4.0 Credits

College/Department: College of Medicine Repeat Status: Not repeatable for credit Restrictions: Can enroll if major is PMED.

PMED 121S General Physics I 3.0 Credits

College/Department: COM School of Biomedical Sciences Professional

Studies

Repeat Status: Not repeatable for credit **Restrictions:** Can enroll if major is PMED.

PMED 122S General Physics I Lab 1.0 Credit

This course is the first recitation lab portion of a four-course algebrabased sequence providing a comprehensive introduction to physics. This course provides students with laboratories and discussions consisting of hands-on experiences using technical equipment on campus, everyday household items at home, and computer simulations at home. Topics include kinematics, mechanics, waves, sound, and fluids.

College/Department: COM School of Biomedical Sciences Professional

Studies

Repeat Status: Not repeatable for credit

Corequisite: PMED 121S

PMED 131S General Chemistry II 3.0 Credits

College/Department: COM School of Biomedical Sciences Professional

Studies

Repeat Status: Not repeatable for credit

PMED 132S General Chemistry II Lab 1.0 Credit

The aim is to provide an introduction to the principles of general chemistry that will give the student a command of its concepts and language. The semester course will cover within the time limitations topics organized around the four major themes: Foundations of general chemistry including the solutions, solids and intermolecular bonding; Fundamentals of reaction equilibrium, acid-base chemistry and chemical kinetics; Familiarize students with entropy and electron transfer reactions; Foundations of nuclear medicinal chemistry, polymer and inorganic chemistry in society.

College/Department: COM School of Biomedical Sciences Professional

Studies

Repeat Status: Not repeatable for credit Restrictions: Can enroll if major is PMED. Prerequisites: PMED 111S [Min Grade: C]

Corequisite: PMED 131S

PMED 141S General Physics II 3.0 Credits

College/Department: COM School of Biomedical Sciences Professional

Studies

Repeat Status: Not repeatable for credit

PMED 142S General Physics II Lab 1.0 Credit

PMED 142S is the second recitation lab part of a four-course algebrabased sequence providing a comprehensive introduction to physics for pre-medical students. This course provides students with laboratories consisting of hands-on experiences using technical equipment on campus, everyday household items at home, and computer simulations at home. Topics include electricity, magnetism, light, optics, heat, thermodynamics, and radioactivity.

College/Department: COM School of Biomedical Sciences Professional

Studies

Repeat Status: Not repeatable for credit

Prerequisites: PMED 121S [Min Grade: C] and PMED 122S [Min Grade:

C1

Corequisite: PMED 141S

PMED 151S College Algebra & Trigonometry 3.0 Credits

College/Department: COM School of Biomedical Sciences Professional

Studies

Repeat Status: Not repeatable for credit **Restrictions:** Can enroll if major is PMED.

PMED 211S General Biology I 3.0 Credits

College/Department: COM School of Biomedical Sciences Professional

Studies

Repeat Status: Not repeatable for credit **Restrictions:** Can enroll if major is PMED.

PMED 212S General Biology I Lab 1.0 Credit

Students will be able to formulate hypotheses, become familiar with the scientific method, retain information about the basic principles of biology. At the end of this course, you should be able to present your findings in a clear, written format and have a strong knowledge of biological concepts and how to apply them in a lab setting.

College/Department: COM School of Biomedical Sciences Professional

Studies

Repeat Status: Not repeatable for credit **Restrictions:** Can enroll if major is PMED.

Corequisite: PMED 211S

PMED 221S Organic Chemistry I 3.0 Credits

College/Department: COM School of Biomedical Sciences Professional

Studies

Repeat Status: Not repeatable for credit **Restrictions:** Can enroll if major is PMED.

PMED 222S Organic Chemistry I Lab 1.0 Credit

The aim is to provide an introduction to the principles of organic chemistry that will give the student a command of its concepts and language. The semester course will cover within the time limitations topics organized around the four major themes: Foundations of organic chemistry including solubility, solids and intermolecular bonding; Fundamentals of acid-base chemistry, extraction, purification and analysis; Familiarize students with monitoring reactions using thin layer chromatography; Emphasize Techniques in determining product purity and identification, using instruments such as FTIR, UV/Vis, GC, melting point apparatus. The course allows for the familiarization of naming of compounds and allows an understanding of the behavior of various functional groups as discussed in lecture.

College/Department: COM School of Biomedical Sciences Professional Studies

Repeat Status: Not repeatable for credit Prerequisites: PMED 131S [Min Grade: C]

Corequisite: PMED 221S

PMED 231S General Biology II 3.0 Credits

This course is the second semester of the PMED general biology series. This course delves into the concepts of genetics, inheritance, evolution, and biodiversity. Specifically, we will learn about the molecular basis of inheritance, how genes encode proteins, the principles of genetics, and some of the techniques used to study molecular biology. We will then study the principles of evolution and biodiversity. Additionally, plants, photosynthesis and vertebrate evolution will also be explored.

College/Department: COM School of Biomedical Sciences Professional

Studies

Repeat Status: Not repeatable for credit **Restrictions:** Can enroll if major is PMED.

PMED 232S General Biology II Lab 1.0 Credit

This is the second semester of PMED General Biology. This recitation lab will include discussions about immunology, molecular biology, evolution, and population speciation. The experiments that will be conducted will support the concepts that are introduced in the lecture portion of the course.

College/Department: COM School of Biomedical Sciences Professional

Studies

Repeat Status: Not repeatable for credit Prerequisites: PMED 211S [Min Grade: C]

Corequisite: PMED 231S

PMED 240S Conceptual Reviews in General and Organic Chemistry 3.0 Credits

The intention of the course shall be to serve as a course concentrating on select topics in general chemistry and organic chemistry as required for the current MCAT requirements. The instruction shall be covered by the instructor along with input by a TA(s) to bridge the gap between biology, physics and chemistry. In this way, the students leave with a more holistic view of the concepts to be discussed with breadth and depth, and how these different disciplines come together to explain observations. Where possible case studies shall be used to apply the concepts taught to put them into application.

College/Department: COM School of Biomedical Sciences Professional

Studies

Repeat Status: Not repeatable for credit

Prerequisites: PMED 111S [Min Grade: C] and PMED 112S [Min Grade: C] and PMED 131S [Min Grade: C] and PMED 132S [Min Grade: C] and PMED 221S [Min Grade: C] and PMED 222S [Min Grade: C] and PMED

241S [Min Grade: C] and PMED 242S [Min Grade: C]

PMED 241S Organic Chemistry II 3.0 Credits

College/Department: COM School of Biomedical Sciences Professional

Studies

Repeat Status: Not repeatable for credit **Restrictions:** Can enroll if major is PMED.

PMED 242S Organic Chemistry II Lab 1.0 Credit

The aim is to provide an introduction to the principles of organic chemistry that will give the student a command of its concepts and language. The semester course will cover within the time limitations topics organized around the four major themes: Foundations of organic synthesis and spectroscopic tools; Functional group characteristics and reactivity; Conjugated pi Systems and aromaticity; Introduction to organometallic chemistry.

College/Department: COM School of Biomedical Sciences Professional

Studies

Repeat Status: Not repeatable for credit **Prerequisites:** PMED 221S [Min Grade: C]

Corequisite: PMED 241S

PMED 250S Molecular Biology & Biochemistry 3.0 Credits

This course will provide an introduction to the principles of biochemistry that will give the student a command of its concepts and language. Major themes will include foundations of biochemistry, structure and catalysis, bioenergetics and metabolism, and information pathways.
