

DegreeWorks Functionality at a Glance for Students

DegreeWorks provides an easy way for students to see how completed courses apply to major, minor, or concentration requirements. Use DegreeWorks in conjunction with regular meetings with your advisor.

To access DegreeWorks, login to DrexelOne and select the *Student* tab at the top of the screen. Next, click the link for *More BannerWeb Student Records* and select DegreeWorks. A new browser window will pop-up with the application, so make sure pop-ups are enabled on your web browser.

Review the Symbol Legend to help you understand the audit. Whenever you click on a function button, you can click on the Help button to get more information about the function.

Audit tab: Access the most recent audit. Since DegreeWorks processes audits nightly, it is not necessary to process new audits. Web audits can be viewed in 3 different formats: Student View, Graduation Checklist and Registration Checklist. The Student View is the default and the most comprehensive.

Process: *Produce a different view by selecting the desired audit report format from the Format drop-down list box and click the View button.*

What-if Tab: Completed courses can be audited against the requirements for any major, minor, degree, catalog year or any other selectable item on the What-If Audit screen. It is usually not necessary to select a program. The combination criteria selected must be valid combinations in the Drexel catalog to produce an audit.

Process: *Select a Degree, Year, Major and Concentration if desired. Click **Process What If**. Click the Help button for additional instructions.*

Planner: The planners have the appropriate number of quarters and years for the major and/coop concentration and include co-op and vacation terms. The Calendar View is the default view and has 4 terms across with the appropriate number of years.

Process: *Click on the Planner button. Select the planner view and click Load.*

GPA Calculator: There are 3 GPA calculators. The Graduation Calculator will help you determine how you need to perform to reach your desired GPA upon graduating. The Term Calculator will help you set specific goals for the classes in your current term. The Advice Calculator will help you determine how many credits of a specific grade average you need to reach your desired GPA.

Process: *Click the GPA calc button. Select a Calculator type and click the Load button. Enter the appropriate data and click Calculate.*

Look Ahead: Enter future courses to see how they fill fit into your program.

Process: *Enter a subject code and number and add course. After you have all the courses, click Process New.*

This is the student view of DegreeWorks. Students also have access to the Graduation Checklist view and the Registration Checklist view. Students can see the term-by-term history by clicking the *Class History* link. All advisors and administrative staff who have access to DegreeWorks have the exact same functionality as the students in addition to functionality dictated by their security classes.

Disclaimer
The DegreeWorks degree audit report is to be used as a guide to plan your progress toward completion of the requirements of your academic program. Your academic advisor should be contacted if you need assistance interpreting this report or planning future course selections, or have questions regarding official degree completion status. This audit is not official notification of completion of degree or certificate requirements or an official transcript of the courses that you have completed. Your official transcript can be obtained via DrexelOne, within the Student Records menu of the Student Services channel.
