

ENVIRONMENTAL SCIENCE

Environmental science is a multidisciplinary field designed to try to understand environmental problems and find solutions to them. This field requires an understanding of a number of disciplines, including biology, chemistry, hydrology, and climatolog

y. Solving some of our environmental problems also requires some knowledge of anthropology and agriculture as well as sociology, ethics, and economics.

All students begin with a core sequence of courses and later focus in one area of specialization Students may specialize in biodiversity and conservation, ecology, environmental education, environmental policy, environmental technology, and marine science.

Students wanting specific information about the major are encouraged to stop by the department office in room 109 in Disque Hall, call the department at 215-895-2905 or visit their website at www.drexel.edu/envscience/index.html.

Employers who have hired a Drexel student:
