

## OPERATIONS MANAGEMENT

The Operations Management Major Program stresses a thorough knowledge of the rapidly accumulating analytical techniques in systems analysis, in addition to a full appreciation of all other phases of business.

Drexel's program stresses ways to analyze operations and performance within organizations and systems. Topics include the design, planning, control and assessment of production, service operations, quality management and supply chain management. With the proper choice of electives, this concentration also prepares students for graduate studies in industrial management, industrial engineering, management science, or operations research.

Students wanting specific information about the concentration are encouraged to stop by the department office in the Academic Building, Room 204, call the department at 215-895-2130, or visit their website at [www.lebow.drexel.edu/Faculty/Departments/Decision/index.php](http://www.lebow.drexel.edu/Faculty/Departments/Decision/index.php).

**Employers who have hired a Drexel student include:**
