

2010 Security 500 Methodology

The Security 500 Benchmarking Survey is based on information from several sources:

- Data supplied directly by the organizations
- Data obtained through public resources/records

The Security 500 tracks 16 vertical markets and collects unique data where appropriate (such as patients in healthcare) and applies this data to key metrics. The key metrics collected this year include:

Security Spending/“Person”
Security Spending/Revenue
Security Officers/“Person”
Security Officers/Revenue

“Person” is focused on the type of person the security budget is intended to protect. Examples include employees, citizens, students

and patients. Rankings within each sector were primarily based on total revenue or operating budget, security budget and “person” data.

Each sector had a coach who helped us customize questions for data collection and benchmarking purposes. Therefore, there were a series of general questions that all participants completed and unique questions within each sector. Each participating organization will receive their confidential report by December 31, 2010.

The 2010 Security 500 Survey includes the following

- Sectors were measured and evaluated on metrics among peer organizations
- The data requested and metrics used to benchmark within each sector were based on the input of our advisors.

The purpose of the Security 500 is to create a reliable database to measure your

organization vs. others and create a benchmarking program among security organizations. The results will enable you to answer the question, “Where Do I Stand?” as a basis of an on going peer review process.

Typically, organizations that submitted their data ranked higher than those that were based on estimated data. Because submitted data employs a “self-selecting” methodology. For example, one clothing retailer may select “Retail” and another clothing manufacturer may select “Manufacturing/Industrial” as their vertical markets.

Based on continued feedback and the goal of creating a valuable resource for our participants and industry, the Security 500 is spread across 16 different sectors.

We recognize that as a result of the recent unprecedented economic changes that some organizations and their security leaders may no longer be in place. The listings are based on the information available at the time of publication. **SECURITY**

9th Annual
SMART CARDS in GOVERNMENT
Identity, Security & Healthcare

Nov. 17-19, 2010
Pre-conference Workshops Nov. 16

Smart Card Alliance

Walter E. Washington Convention Center, Washington, DC

Largest Exhibition of Government ID Technology
Over 50 Exhibitors in a Showcase of Industry-Leading Technology

<p>SILVER SPONSORS</p>  	<p>BADGE SPONSOR</p> 	<p>INTERNET CAFE SPONSOR</p> 
<p>TRACK SPONSORS</p>  		
<p>BREAK SPONSORS</p>  		

The Leading Showcase for Government Projects in ID and Security

The conference will provide comprehensive coverage of the continuing rollout of Personal Identity Verification (PIV) credentials, biometric-enabled security systems, and other programs deploying millions of smart cards to government employees, contractors, and U.S. citizens, including the First Responder Authentication Credential (FRAC), Transportation Worker Identification Credential (TWIC) programs, and more.

New This Year:
Expanded Coverage of Secure Electronic Medical Records

Register Early: Take Advantage of Pre-Registration Discounts • www.smartcardalliance.org
