

# How to Install Hyperion 11 Web Client Plugin For XP

*Note: In order to install the plugin, you must be an administrator on your computer. Please contact your local IT desktop support for assistance if you are not an administrator on your computer.*

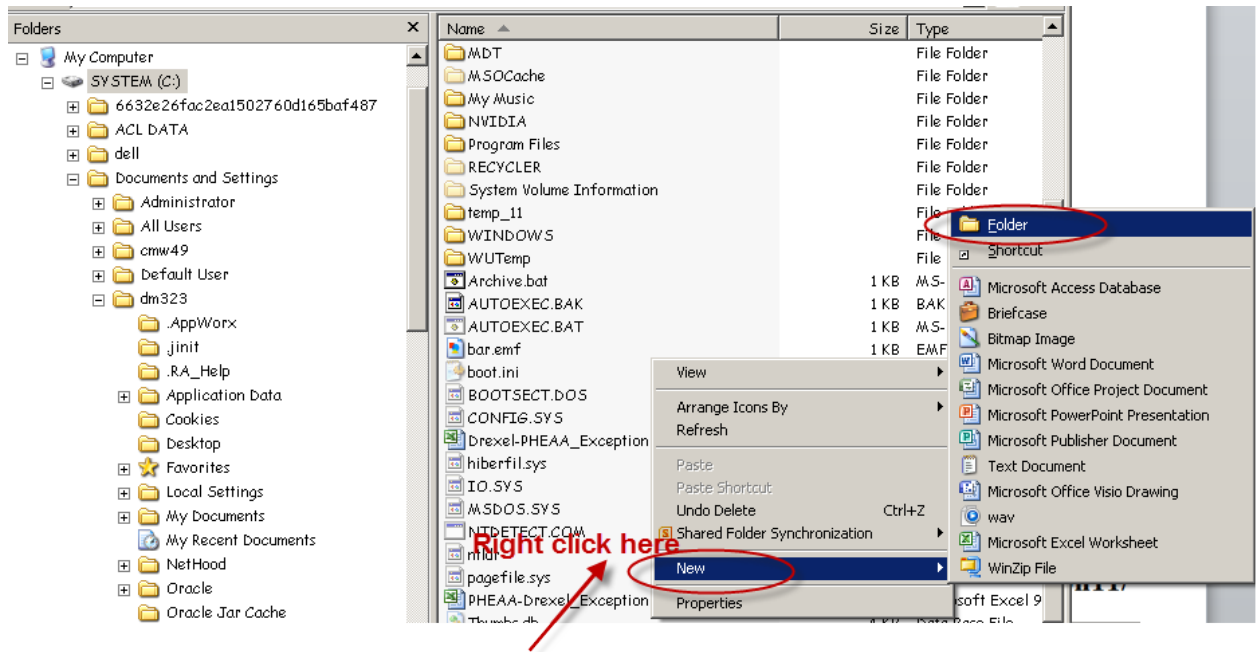

- 1.) Before downloading the Hyperion 11 plugin, first create a temporary folder on your C:\ drive.
- 2.) Right click the Windows "Start" button in the lower left hand corner of your screen and choose "Explore".

- 3.) Navigate to the C:\ drive by clicking on it in the newly opened screen:

- 4.) In the right hand window pane, right click in an empty area, choose “new” and then “folder” in the menu.

- 5.) Rename the folder to “temp\_11”.
- 6.) Open Internet Explorer.
- 7.) Go to <http://software.drexel.edu/facultyandstaff/PCsoftware/Hyperion11/>
- 8.) Log in with your Drexel user ID (Example: cpb47) and password.
- 9.) Click the blue “epm11\_webplugin.zip” link to download the plugin for Hyperion 11.

10.) Choose "Save".

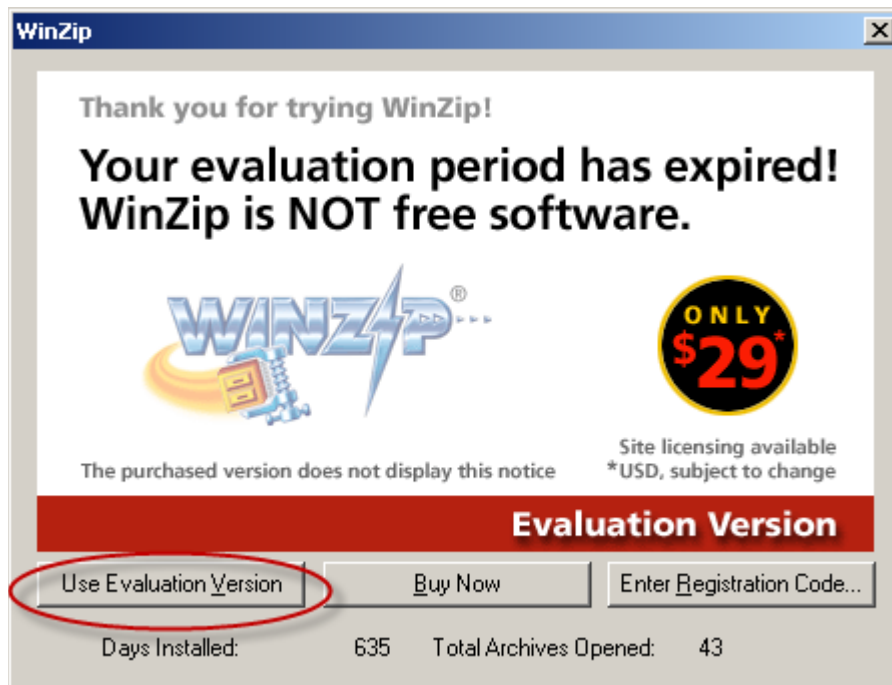

11.) Choose the "temp\_11" folder that was just created as the place to save the file:

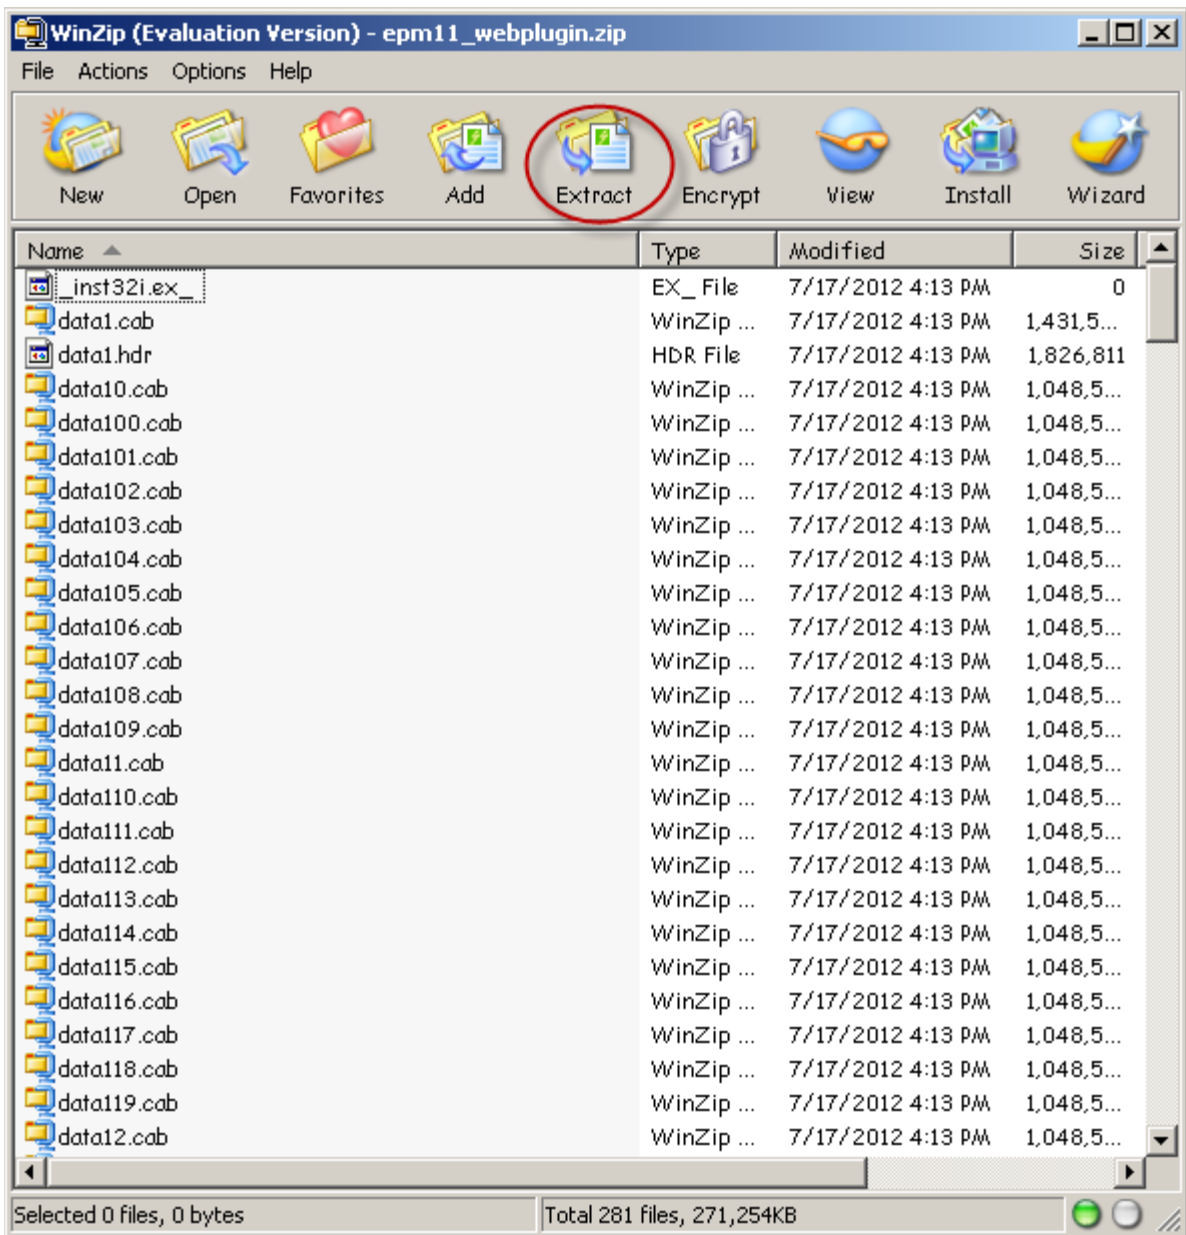

12.) After it completes downloading, choose "Open".

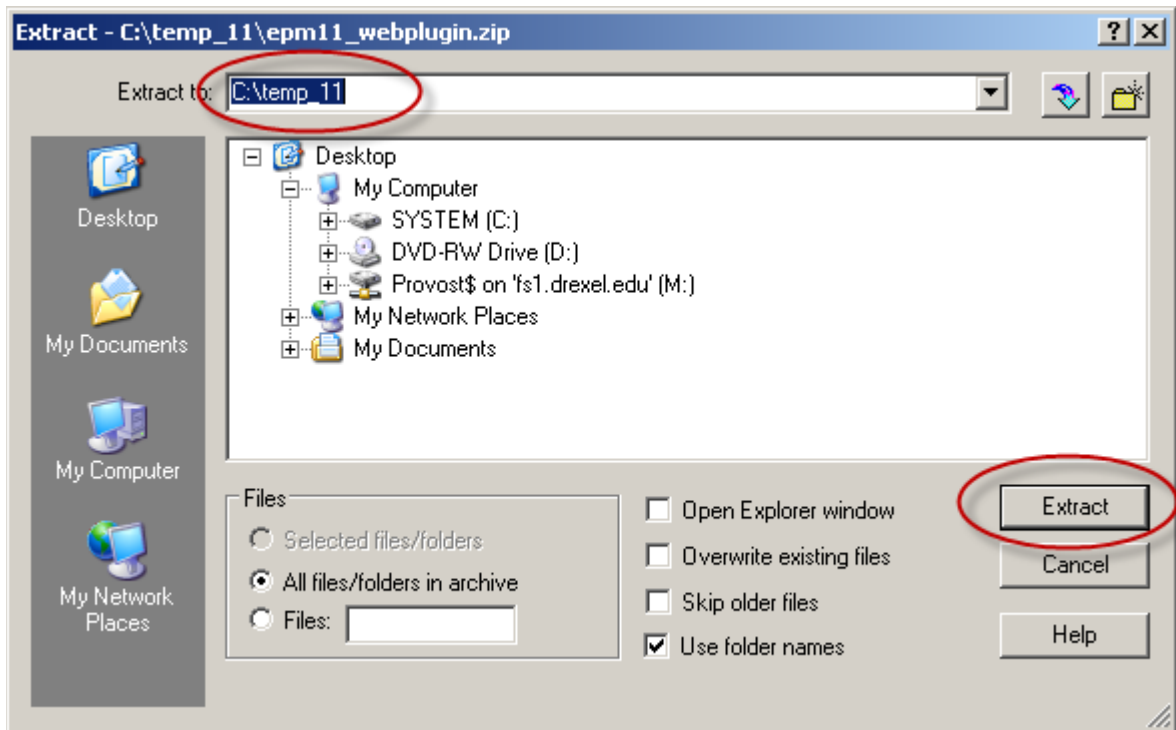

13.) Choose "Use Evaluation Version".

14.) Click the “Extract” button at the top of the WinZip window.

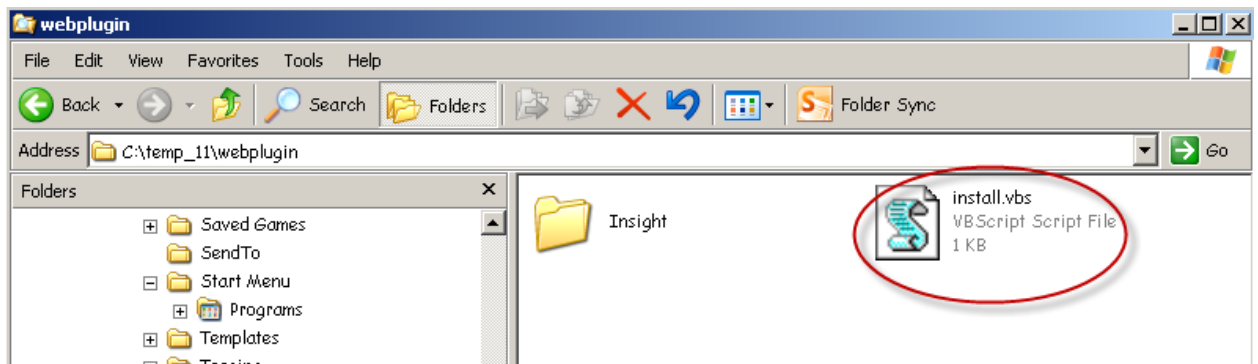

15.) Ensure that it extracts to “temp\_11” folder at the top and then click the “Extract” button in the lower right corner.

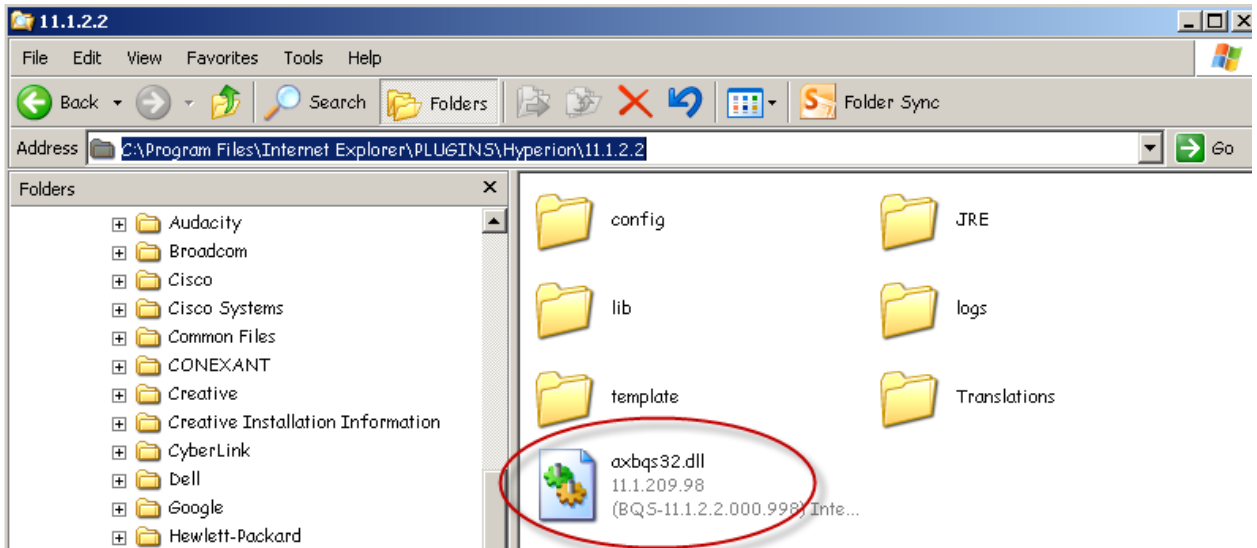

16.) Now close the WinZip application and then close all instances of Internet Explorer.

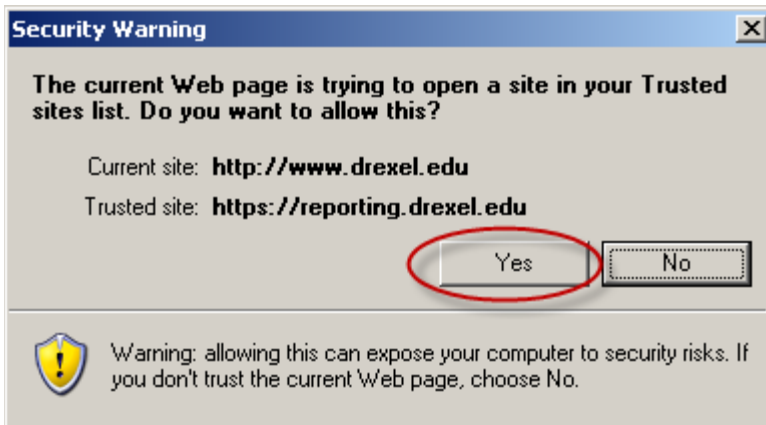

17.) Navigate to “C:\temp11\webplugin\” and double click the “Install.vbs” file.

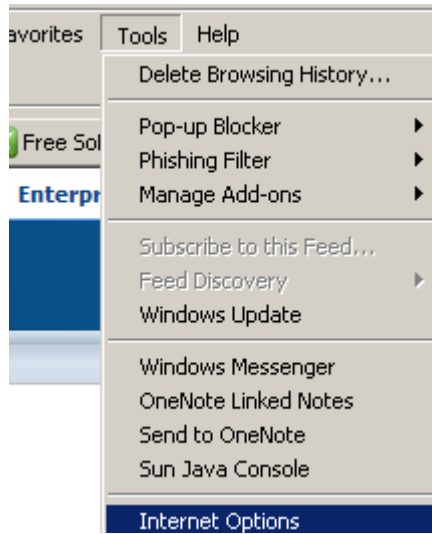

18.) After the script runs, ensure that it installed successfully by navigating to “C:\Program Files\Internet Explorer\PLUGINS\Hyperion\11.1.2.2” and confirming that “axbqs32.dll” exists.

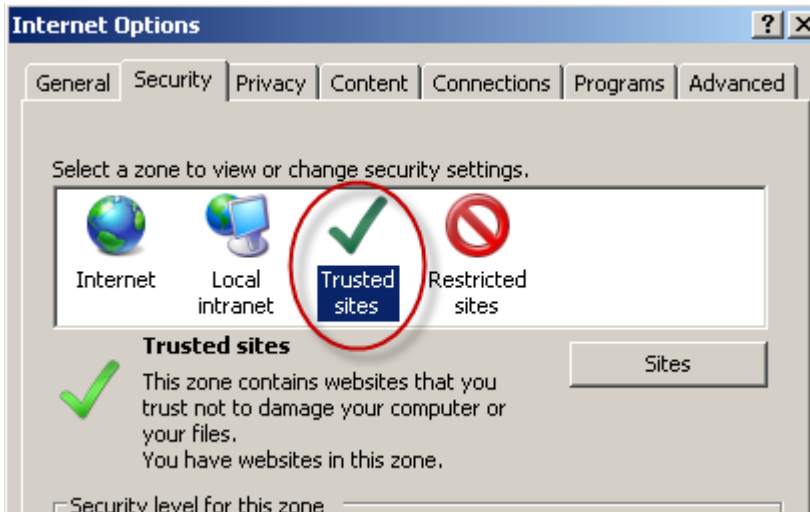

19.) Open up Internet Explore and log into the workspace (<http://www.drexel.edu/reporting>). You may be prompted to allow the webpage to open as a trusted site, click “Yes”.

20.) You may have to ensure that the workspace is a trusted site. To do this, in Internet Explorer, go to “Tools” and choose “Internet Options”.

21.) Click on the “Security” tab and click the green check mark for “Trusted sites” and then click OK.

22.) You should now be able to log into Hyperion 11.
