

## Speed Your Commute with **Check Cards**

If you participate in the Commuter Program, **Commuter Check Cards** can make your commute even easier.

### **Two Options to Fit Your Needs**

There are two types of Commuter Check Cards—one for transit and one for parking. They both work like credit cards, and you can use both if your commute requires you to park and travel by public transit.

- 1** The **Transit Card** can be used for the purchase of things like transit passes, tickets, fare cards, and vanpool passes.
- 2** The **Parking Card** can be used at any parking facility that accepts MasterCard for payment.

Don't miss this opportunity to make commuting faster, easier, and more convenient.

## It's Easy to Get Started

Once you're enrolled in the Commuter Program, simply go to the Your Spending Account website and click on the **Commuter** tab, then the **Sign Up Now** button. Follow the prompts to order your card(s) and enter the amount you want to load to your card for the month. The amount you enter will be deducted from your paycheck on a pretax basis. You can choose to go online to load the card every month, or select the recurring option to have it done automatically. Plus, you can change your preference at any time to meet your commuting needs.

## Why Use the Card?

**Using the card eliminates the waiting!** Without the card, you need to place your order for transit and/or parking passes online and wait for them to be mailed to your home. With the card, you can pay for and pick up your passes, or pay for your parking, at the point of service and be on your way. You can check your balance online at any time, and unused balances at the end of the month roll over into the next month.
