*Before preparing the solutions:*

- Clean the scale surfaces with wet and then dry kimwipes
- Rinse weighing spatulas in deionized water and dry out with kimwipes
- Take weighing dishes only from closed boxes in the draw

- Put weighing dishes and spatulas only on the clean paper towel
- Wipe out the spatulas with kimwipes after weighing each chemicals
- Tightly close the bottles and put them in the cold room right away after the chemicals dissolved

1.5L of final solution + 3.0ml stock Calcium Chloride (2mM) + 1.5ml of stock Magnesium Sulfate (1.0) + 2.0 scoop of dextrose (15mM) or 1.5 scoop of dextrose (10mM)
