

## Towards an Infrastructure for Health Equity Research at the Larner College of Medicine

Elizabeth A Bonney, MD MPH

Department of Obstetrics, Gynecology and Reproductive Sciences, University of Vermont, Larner College of Medicine,

SPONSOR: Richard L. Page, MD Dean, The Robert Larner M.D. College of Medicine, The University of Vermont COLLABORATORS: Gagan Deep Bajaj PhD, Mercedes Avila, PhD, Office of the Vice President for Research, University of Vermont and Vermont Leadership Education in Neurodevelopmental Disabilities Program, Burlington, VT USA

Acknowledgements: Maria Clara Avila, RN, MS, EdD Student UVM

### **Background**

Definitions: Health means physical and mental health status and well-being: broader in scope than health care. Health disparities are differences in health or in the key determinants of health Health equity is both a process and a measurable outcome whereby health disparities are reduced or eliminated. Health Equity Research is the process of developing and evaluating mechanisms to reduce health disparities.

#### Rationale

- Several institutions of similar size and research funding have established research structure to support Health Equity Research.
- Vermont is a state with a rapidly changing and fluid demographic.
- The lack of connection to and mistrust in BIPOC communities.
- While many senior faculty work in the area of racebased difference in disease, they do not understand the importance of social determinants of health and health equity.
- Support of Health Equity research is a potential mechanism to enhance both recruitment and retention of URM/BIPOC faculty.

#### **Objectives**

- **Begin a conversation**: the importance of Health Equity and the need for Health Equity Research.
- Connect with faculty stakeholders and begin a needs assessment.
- Compile potential allies and resources.
- Build an engaged community.
- Obtain structural and financial support for ongoing work and programing.

#### Methods

- Literature search: Pub med from 1970 till present and internet: Health Equity, building capacity in Health Equity Research, Vermont investigators publishing in Health equity, potential funding sources.
- 2.Interviews and discussions with leadership at UVM (15).
- 3. Meetings with community leaders and stakeholders.

- 4. Survey to Departmental Diversity Champions.
- 5. Development of a Focus Group Questionnaire.
- 6. IRB approved Focus group study via zoom to determine understanding, interest, and needs; involving junior to mid-career faculty in *nine LCOM departments*.

### **Preliminary results and Products**

1. Identified specific Health Equity journals and delineated specific sources of funding; found ~60 Vermont investigators.

#### 2. Leadership interview themes:

- Confusion: health disparities, health care delivery/access and health equity.
- In Vermont, relevant Health Equity Research relates to rurality and aging.
- **Need:** evidence-based approach to repair relationship with communities of BIPOC.
- Use social determinants of health to drive policy/programing and Network needs as part of an accountable care organization.
- Significant barriers exist to redirect current NIH funding to Health Equity Research.
- Lack of understanding: role of systemic racism and discrimination in academic medicine and health.
- The importance of personal relationships and networking.

#### 3. Faculty focus group themes:

- Lack: meaningful ongoing engagement and partnerships with BIPOC and with UVM academic communities.
- Difficult to measure racism: easier to measure representation.
- Willingness to incorporate social determinants not justice into research.
- Advocacy versus Academy; Is Health Equity work considered Research?
- Lack of support from idea to grant to award.
- Need: Mentorship, collaboration, protected time, funding.

#### 4. Community Leader themes:

- Language access, translation services.
- Communication of results back to community.
- Incorporate: Job, career development, mentoring opportunities in research.
- Website, Social Media and communications

- 5. Source of internal funding source for Health Equity Research: UVMMC Three grant application programs will have Health Equity is a priority topic for funding under this mechanism.
- 6. Research Retreat: Health Equity and Women.
- 7. Website, White paper (in progress).
- 8. Structure/Budget: Office of Health Equity Research.

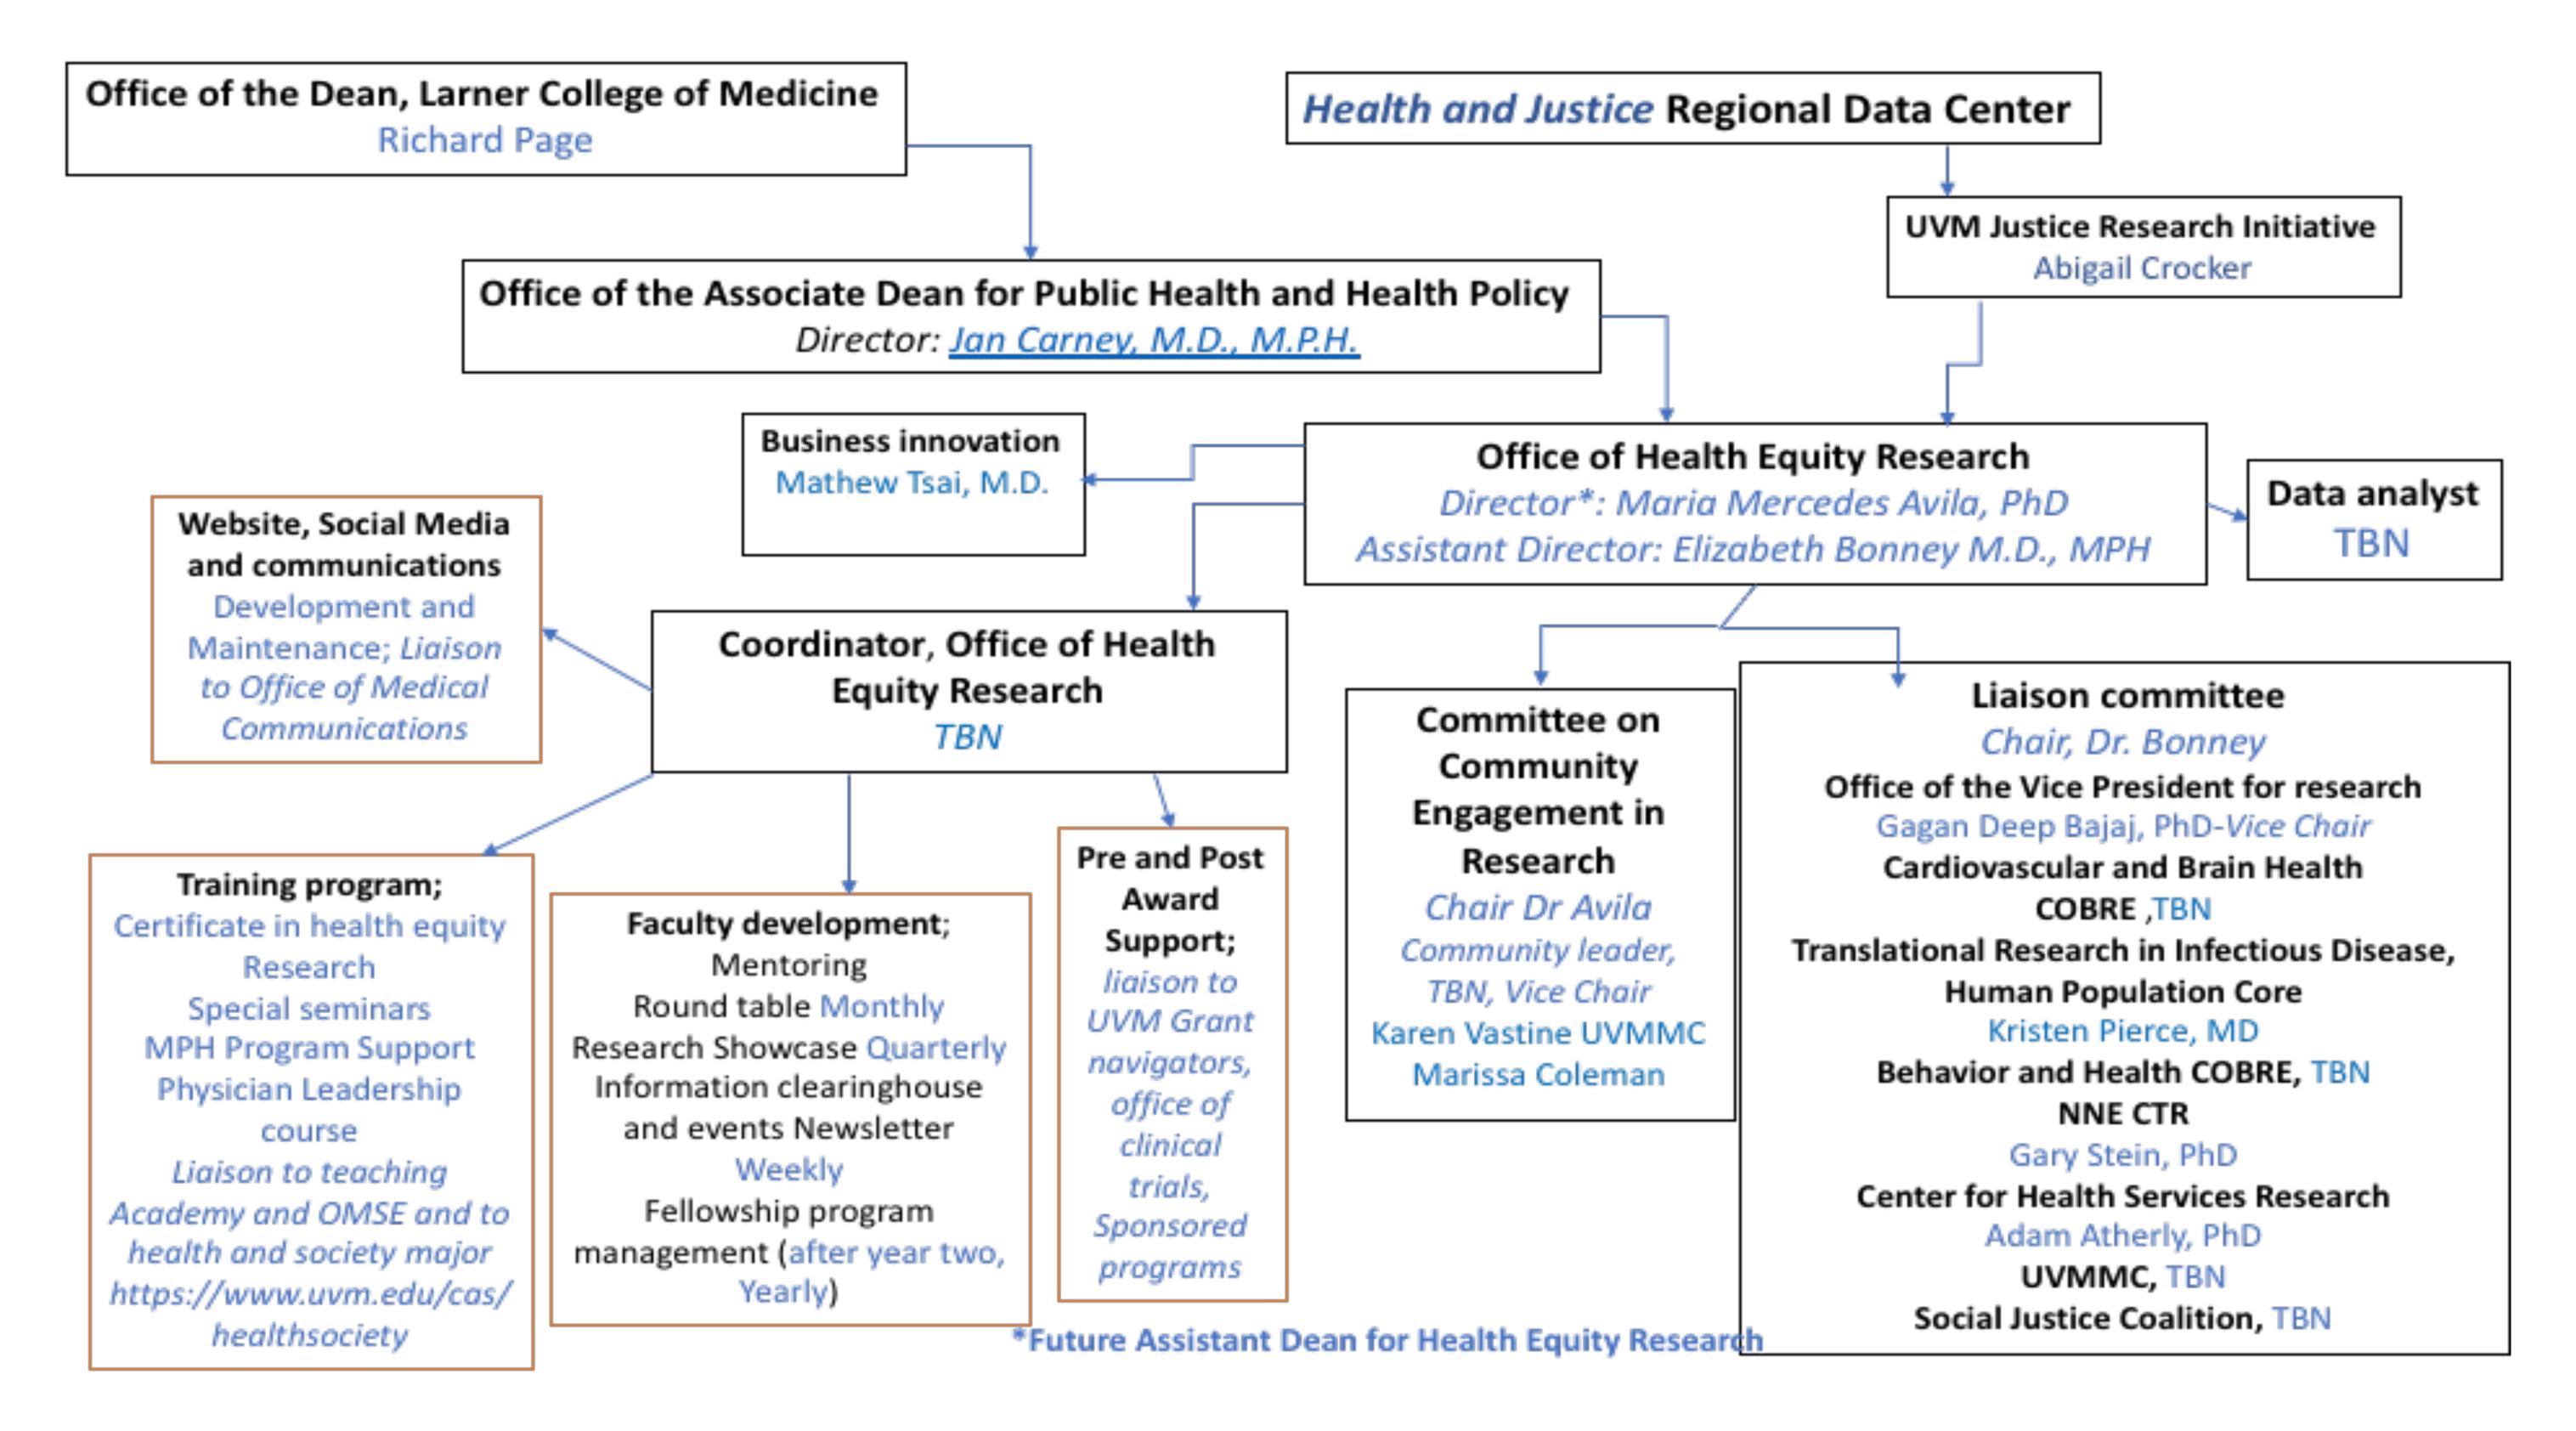

#### **Future directions**

- Focus groups with trainees.
- Return-on-investment study: expanded translation services.
- Health Equity Research Units in Research Centers.
- Health Equity Visiting Scholars program.
- Health Equity roundtable discussion series.
- Enhance funding mechanisms/Busines plan.
- Launch the Office of Health Equity Research.

## Summary and Recommendations

- Building research infrastructure requires personal relationships with leaders, buy-in from senior researchers, external funding, a significant mechanism to support junior faculty in all elements of development and internal access to field leaders.
- Institutionalize the value of cultural knowledge and understanding.
- Operationalize community engagement as part of an ongoing paradigm in research.
- Align financial priorities with Health Equity.
