Executive Leadership in
Academic Technology
and Engineering

ELATE at Drexel®

"I am so glad that I chose to participate in the ELATE program. My visibility on my own campus has increased exponentially, and I am now recognized as a campus-wide leader. I now have a network of strong women leaders from across the country. The entire experience has caused others to see me differently, and more importantly, caused me to see myself differently. I can see a new future unfolding in front of me.

The ELATE program was like 10 years of career development wrapped into one."

Amy S. Fleischer, Ph.D.
Chair, Department of Mechanical Engineering, Villanova University

ELATE at Drexel is a national effort supporting women faculty in academic leadership. The program is a blend of three week-long, in-residence sessions, online and conference call discussions, and institutional action project development mentored by senior administrative leaders at participants' institutions.

The ELATE curriculum integrates knowledge and skills in four essential dimensions of leadership.

- **Personal and Professional Leadership Effectiveness** to address strategic, operational, and relational challenges.
- **Strategic Finance and Resource Management** to enhance the missions of academic organizations.
- **Organizational Dynamics** to provide strategies for leading, executing, and managing change initiatives.
- **Communities of Leadership Practice** to sustain leadership development beyond the fellowship year.

IMPORTANT DATES
