

INDEPENDENT STUDY IN PSYCHOLOGY

PURPOSE: *To provide the opportunity for a graduate student to engage in the study of a particular area of clinical psychology that is not covered in-depth by an existing course. Typically, this independent study would focus on a narrower topic (e.g., mood disorder, advanced educational psychology, psychology of sleep etc.) than a given course (e.g., abnormal psychology). Moreover, the nature of the study would be more in-depth that can be accomplished in a traditional course.*

PROCESS: *The interested student needs to: (a) have a faculty sponsor willing to mentor such a course; (b) develop, along with the faculty member, a plan of study for this course; and (c) develop, along with the faculty sponsor, a formal means of evaluating the student's work for this course (e.g., formal test, research proposal).*

Please note that the title of the independent study needs to be 30 characters or less including spaces

***** In order to be registered for such a course, THIS FORM HAS TO BE COMPLETED BY THE END OF WEEK 2 OF THE ADD/DROP PERIOD FOR EACH TERM*****

Name of Student _____ ID# _____

Student Email Address _____

Name of faculty sponsor _____

Title of Course _____

Number of Credit (s) _____ Term: _____ Academic Year: _____
